Division of General Obstetrics and Gynecology

The Division of General Obstetrics and Gynecology provides well-woman care for women of all ages and complete care for pregnancy and birth. We also evaluate and treat gynecologic disorders. We perform office, outpatient and inpatient gynecologic surgery. We offer minimally invasive hysterectomy including total laparoscopic and robotic surgery. Our division is comprised of fourteen obstetrician-gynecologists, four certified nurse midwives, and four advanced nurse practitioners. We are all dedicated to outstanding clinical practice and teaching. Areas of special expertise are listed below.

Vulvar and Vaginal Diseases*- an integrated team provides care to women suffering from vaginal and vulvar problems*

Fibroids*- a multidisciplinary clinic with interventional radiology offers complete consultation regarding a woman's options for treatment of fibroid tumors*

Procedures*- outpatient sterilization procedures and other minor procedures including hysteroscopy and endometrial ablation are performed in an office setting*

Nurse-midwifery*- care for women in their reproductive years including well-woman visits, pregnancy and birth*

Complex Contraception*- provides family planning expertise to women whose contraceptive choices are affected by coexisting medical problems*

Menopause*- presents the prime-time woman with comprehensive counseling and health options*

Sexual Dysfunction*- provides confidential evaluation and management of female sexual concerns*

Colposcopy and Laser/LEEP*- offers diagnosis and treatment for women with abnormal Pap smears in accord with the latest national guidelines*

Our division is committed to excellence in caring for women from adolescence to maturity. We regard each patient as an individual with her own history and needs.

Thomas M. Gellhaus, MD
Division Director,
General Obstetrics and Gynecology
