</tr>
<tr>
<td>06T:234</td>
<td>Entrepreneurial Marketing</td>
<td>3 s.h.</td>
<td>Practical marketing concepts for determining market potential of a business; developing a marketing plan, identifying markets, creating products, designing promotions and sales programs, assessing ongoing customer service needs.</td>
</tr>
<tr>
<td>06T:241</td>
<td>Technology Applications for Entrepreneurs</td>
<td>3 s.h.</td>
<td>Current technology applications for creating web sites; use of technology for managing and disseminating business information; development of basic e-commerce strategy; hands-on course.</td>
</tr>
</tbody>
</table>
06T:242 Innovation and Change 3 s.h.
Environment necessary for innovation; innovation applied to products, services, processes; strategies for regaining competitive advantage; management of stress created by innovation and change.

06T:245 Legal Aspects of Entrepreneurship 3 s.h.
Areas of law significant to new and emerging businesses; legal system pitfalls, constraints, opportunities; overview.

06T:246 Strategic Management of Technology and Innovation 3 s.h.
Role of technology in creation, growth, and survival of industries; process, risks, and rewards of technological innovation, commercialization; successful approaches to developing technological strategy and products.

06T:250 Managing the Growth Business 3 s.h.
Issues faced by new, rapidly growing businesses; adapting organizational structure as business expands, building a management team, hiring new employees; managing strategic growth of a business; case studies, particularly in technology sector.

06T:290 Seminar in Entrepreneurship 1-3 s.h.
Topics such as franchising, business acquisition, real estate development, e-commerce, technology transfer. Repeatable.

06T:292 Entrepreneurship: Business Consulting 3 s.h.
Experience on teams providing consulting services to start-up and early-stage companies; the consulting process—proposal development, data collection and analysis, final report preparation and presentation; projects—marketing studies, financial projections, strategic planning.

06T:294 Entrepreneurship: Advanced Business Planning 3 s.h.
Mentoring for individuals in final stages of preparing to launch their own business.
Accounting

Chair: W. Bruce Johnson
Director, Professional Program in Accounting: Lynn M. Pringle
Director, RSM McGladrey Institute of Accounting Education and Research: Ramji Balakrishnan
Director, Master of Accountancy program: Lynn M. Pringle
Professors: Ramji Balakrishnan (Ernst and Young Research Professor), Daniel W. Collins (Henry B. Tippie Research Chair in Accounting), Douglas V. De Jong (John F. Murray Professor), W. Bruce Johnson (Arthur Andersen Alumni/Faculty Professor), Mark C. Penno, Albert A. Schepanski
Professors emeriti: Billy Barnes, Valdean C. Lembke
Associate professors: Joyce E. Berg, Richard M. Tubbs
Associate professor emeritus: Richard A. Grimlund
Assistant professors: Cristi A. Gleason, Haidan Li, Sonja Olhoft Rego
Clinical assistant professor: Lynn M. Pringle
Lecturers: Amy An, Thomas J. Carroll, Robert J. Hartman

Undergraduate Program

The Department of Accounting offers the Bachelor of Business Administration in accounting for students admitted to the Professional Program in Accounting.

Undergraduate accounting majors are subject to the probation and dismissal rules described in the Tippie College of Business section of the Catalog and are governed by the Tippie College of Business Honor Code.

The B.B.A. is not sufficient preparation to take the CPA examination. The Iowa Accountancy Act requires individuals who wish to take the CPA examination to have a bachelor’s degree, 24 s.h. of business course work, 24 s.h. of accounting course work beyond principles of accounting (06A:001), total college credit of 150 s.h., and at least one year of experience.

Bachelor of Business Administration

Requirements for the B.B.A. in accounting have changed. Students who entered the major at the beginning of spring semester 2005 or later must complete the program described below. Students who began the major fall semester 2004 or earlier follow the old requirements (described in previous editions of the Catalog and available from the Undergraduate Program Office).

Undergraduate students admitted to the Professional Program in Accounting work toward the B.B.A. in accounting, which requires a minimum of 120 s.h. Course work in the program provides concentrated coverage of professional accounting subjects and closely related topics in commercial law, business, and information systems.

Students typically begin the major at the beginning of their junior year.

To enter the Professional Program in Accounting, undergraduates must complete 60 s.h. of course work at The University of Iowa [or equivalent course work at another institution] and must be
admitted to the Tippie College of Business.

Students already admitted to the business college who wish to declare accounting as a major are automatically admitted to the professional program if they have a University of Iowa g.p.a. of at least 3.00, a cumulative g.p.a. of at least 3.00, and a B-minus average in 06A:001 Introduction to Financial Accounting and 06A:002 Managerial Accounting. Students who wish to declare accounting as a major but do not satisfy the automatic admission requirements may petition the professional program for permission to enroll in the first two accounting program courses, 06A:131 Income Measurement and Asset Valuation and 06A:133 Introduction to Taxation.

Students must complete the following pre-business core courses before admission to the Professional Program in Accounting:

- 06A:001 Introduction to Financial Accounting 3 s.h.
- 06A:002 Managerial Accounting 3 s.h.
- 06E:001 Principles of Microeconomics 4 s.h.
- 06E:002 Principles of Macroeconomics 4 s.h.
- 22M:017 Calculus and Matrix Algebra for Business 4 s.h.
- 22S:008 Statistics for Business 4 s.h.

Professional Program in Accounting requirements for the junior and senior years are as follows.

All students who have departmental approval may receive 1 s.h. of academic credit for 06A:199 Academic Internship.

Students who wish to include a formal accounting internship during spring of their senior year enroll in 06A:190 Experiential Learning. To earn 3-6 s.h. of credit for the internship, they must be admitted to the M.Ac. program (the fifth year of the Professional Program in Accounting) by December 1 of their senior year and must have departmental approval before the beginning of their internship semester. See “Senior Year With Internship” below.

JUNIOR YEAR

**Fall Semester**

- 06A:131 Income Measurement and Asset Valuation 3 s.h.
- 06A:133 Introduction to Taxation 3 s.h.
- 06A:150 Professional Orientation Seminar Series (must be taken during first or second semester in the professional program) 3 s.h.
- 06J:100 Foundations of Business (taken first semester after admission to the college) 3 s.h.
- One business core requirement 3 s.h.

The business core requirements (06F:100, 06J:047, 06J:048, 06K:100, 06M:100) may be taken in any sequence, preferably before the senior year; 06J:047 is a prerequisite to 06A:148, so it should be taken before spring semester of the senior year. Students must complete 06J:100 Foundations of Business during their first semester after admission to the Tippie College of Business.

**Spring Semester**

- 06A:132 Valuation of Financial Claims 3 s.h.
- 06K:180 Applied Information Systems 3 s.h.
- Two business core requirements 6 s.h.
- Elective 3 s.h.

Due to the overlap in course content, accounting majors may not receive degree credit for 06A:121 Managerial Accounting and Decision Making, 06A:120 Financial Accounting and Reporting, and 06A:113 Taxes and Business Decisions.

**SUMMER: GMAT AND ADMISSION TO THE M.AC.**

Students who intend to continue in the Professional Program in Accounting after receiving the B.B.A. should take the Graduate Management Admission Test (GMAT) during the summer before their senior year, as preparation for applying to the Master of Accountancy program.

Students who plan to earn 3-6 s.h. of internship credit for 06A:190 Experiential Learning during the spring semester of their senior year must be admitted to the M.Ac. program by December 1 of their senior year. Those who do not participate in 06A:190 may apply to the M.Ac. program after December 1 of their senior year. See “Application Deadlines” below.

**SENIOR YEAR WITH INTERNSHIP**

Seniors who wish to include a formal accounting internship in their program take 06A:190 Experiential Learning during spring semester of their senior year. To earn 3-6 s.h. of credit for the internship, they must be admitted to the M.Ac. Program (the fifth year of the Professional Program in Accounting) by December 1 of their senior year and must have departmental approval before the beginning of their internship semester. Students may not count more than 6 s.h. earned in 06A:190 toward the B.B.A.

Students who participate in the internship normally must attend a summer session before or after their senior year in order to complete the B.B.A. requirements.
Students who chose the internship option should pursue the following study plan.

**Fall Semester**
- 06A:130 Accounting for Management Analysis and Control 3 s.h.
- 06A:144 Auditing 3 s.h.
- 06A:148 Business Law (or summer if offered) 3 s.h.
- One business core requirement 3 s.h.
- Elective 3 s.h.

**Spring Semester**
- 06A:190 Experiential Learning 3-6 s.h.

**Summer Session**
- 06A:145 Advanced Financial Accounting (if not already taken) 3 s.h.
- 06A:148 Business Law (if not already taken) 3 s.h.
- Elective 3 s.h.

**Senior Year Without Internship**
Students who do not wish to include the internship program (06A:190) during their senior year pursue the following study plan.

**Fall Semester**
- 06A:144 Auditing 3 s.h.
- One business core requirement 3 s.h.
- Three electives 9 s.h.

**Spring Semester**
- 06A:130 Accounting for Management Analysis and Control 3 s.h.
- 06A:148 Business Law 3 s.h.
- Three electives 9 s.h.

**Optional Accounting Electives**
- 06A:141 Advanced Tax Topics 3 s.h.
- 06A:145 Advanced Financial Accounting 3 s.h.
- 06A:190 Experiential Learning 3-6 s.h.
- 06A:199 Academic Internship 1 s.h.

**Graduate Programs**

The Department of Accounting offers the Master of Accountancy (M.Ac.), which is granted upon successful completion of the fifth year of the Professional Program in Accounting. It also offers a joint M.Ac./J.D. with the College of Law and a Doctor of Philosophy (Ph.D.) in business administration.

Applicants to the graduate programs in accounting must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog. Application materials must include the applicant’s score on the Graduate Management Admission Test (GMAT).

Graduate students in accounting are subject to the probation and dismissal rules of the Graduate College and are governed by the Tippie College of Business Honor Code.

**Master of Accountancy**

The Master of Accountancy (M.Ac.) is a nonthesis program that permits students to specialize in accounting areas according to their interests and objectives. It builds on the technical skills acquired in the undergraduate program, broadens students’ perspectives of the role of accounting in organizations and decision making, and further develops written and oral communication skills.

M.Ac. course work focuses on the conceptual and economic foundations of accounting with applications to current and emerging problems of professional practice. It also provides an opportunity to acquire expertise in one of four areas of specialization: financial accounting/auditing, management information systems, taxation, and managerial accounting.

Students from a variety of academic backgrounds enter the M.Ac. program. Those who enter with an undergraduate degree in accounting can expect to complete the degree in 12 months. Those who enter with a nonaccounting undergraduate degree typically require four semesters to complete the M.Ac. Study plans are adjusted to reflect each student’s particular academic background.

The M.Ac. requires a total of 30 s.h. beyond the B.B.A. At least 12 s.h. must be earned in graduate-level accounting courses, and at least 21 s.h. must be earned in 200-level courses.

Courses leading to specialization areas and those required for the core program are as follows. Because of the cross-disciplinary nature of the subject matter included in the specialization areas, courses in a number of other departments are included.
SPECIALIZATION IN FINANCIAL ACCOUNTING/AUDITING

Accounting Courses
Total of 12 s.h.
All of these:
06A:221 Financial Reporting: Theory and Practice 3 s.h.
06A:230 Advanced Auditing 3 s.h.
06A:245 Financial Information and Capital Markets 3 s.h.
One of these:
06A:220 Design and Use of Cost Management Systems 3 s.h.
06A:231 Taxes and Business Strategy 3 s.h.

Finance Courses
Total of 6 s.h.
06N:225 Managerial Finance (requires consent of M.B.A. office) 3 s.h.
One additional 200-level finance course 3 s.h.

Management Information Systems Courses
Total of 3-6 s.h.
06K:226 Visual Basic Programming (if not already taken) 3 s.h.
06K:230 Database Systems 3 s.h.

General Electives
Total of 6-9 s.h.

SPECIALIZATION IN MANAGEMENT INFORMATION SYSTEMS

Due to the timing of course offerings, students who do not begin the M.Ac. program in the summer session should take a computer programming course while they are undergraduates. This decreases the number of required management information systems courses and increases electives by 3 s.h. in the M.Ac. program.

Accounting Courses
Total of 12 s.h.
06A:220 Design and Use of Cost Management Systems 3 s.h.
Two of these:
06A:221 Financial Reporting: Theory and Practice 3 s.h.
06A:230 Advanced Auditing 3 s.h.
06A:231 Taxes and Business Strategy 3 s.h.
One of these (not already taken):
06A:221 Financial Reporting: Theory and Practice 3 s.h.

06A:230 Advanced Auditing 3 s.h.
06A:231 Taxes and Business Strategy 3 s.h.
06A:241 Tax Research 3 s.h.
06A:245 Financial Information and Capital Markets 3 s.h.

Management Information Systems Courses
Total of 9-12 s.h.
06K:226 Visual Basic Programming (if not already taken) 3 s.h.
Three 200-level information systems courses (06K or 22C) 9 s.h.

General Electives
Total of 6-9 s.h.

SPECIALIZATION IN TAXATION

Accounting Courses
Total of 9 s.h.
Two of these:
06A:220 Design and Use of Cost Management Systems 3 s.h.
06A:221 Financial Reporting: Theory and Practice 3 s.h.
06A:230 Advanced Auditing 3 s.h.
One of these (not already taken):
06A:220 Design and Use of Cost Management Systems 3 s.h.
06A:221 Financial Reporting: Theory and Practice 3 s.h.
06A:230 Advanced Auditing 3 s.h.
06A:241 Tax Research 3 s.h.
06A:245 Financial Information and Capital Markets 3 s.h.

Taxation Courses
Total of 12 s.h.
06A:231 Taxes and Business Strategy 3 s.h.
06A:241 Tax Research 3 s.h.
College of Law tax courses 6 s.h.

General Electives
Total of 9 s.h.
College of Law courses (prefix 091) follow a different calendar than do business courses. Some courses may require consent of instructor.

SPECIALIZATION IN MANAGERIAL ACCOUNTING

Accounting Courses
Total of 12 s.h.
06A:220 Design and Use of Cost Management Systems 3 s.h.
Two of these:
06A:221 Financial Reporting: Theory and Practice 3 s.h.
06A:230 Advanced Auditing 3 s.h.
06A:231 Taxes and Business Strategy 3 s.h.

One of these (not already taken):
06A:221 Financial Reporting: Theory and Practice 3 s.h.
06A:230 Advanced Auditing 3 s.h.
06A:231 Taxes and Business Strategy 3 s.h.
06A:241 Tax Research 3 s.h.
06A:245 Financial Information and Capital Markets 3 s.h.

Management Information Systems Courses
Total of 3-6 s.h.
06K:226 Visual Basic Programming (if not already taken) 3 s.h.
06K:230 Database Systems 3 s.h.

Nonaccounting Business Electives
Two 200-level business electives 6 s.h.

General Electives
Total of 6-9 s.h.

CORE PROGRAM COURSE REQUIREMENTS
Students who do not wish to pursue a specialization area must complete 30 s.h. beyond the B.B.A. At least 15 s.h. must be earned in graduate-level accounting courses and at least 21 s.h. must be earned in 200-level courses. The following courses are required.

Accounting Courses
Total of 15 s.h.
06A:220 Design and Use of Cost Management Systems (taken spring semester) 3 s.h.
06A:221 Financial Reporting: Theory and Practice (taken fall semester) 3 s.h.
06A:230 Advanced Auditing (taken spring semester) 3 s.h.
06A:231 Taxes and Business Strategy (taken fall semester) 3 s.h.
One of these (not already taken):
06A:241 Tax Research 3 s.h.
06A:245 Financial Information and Capital Markets 3 s.h.

Management Information Systems Courses
Total of 3-6 s.h.
06K:226 Visual Basic Programming (if not already taken) 3 s.h.
06K:230 Database Systems 3 s.h.

General Electives
Total of 9-12 s.h.

COURSE WORK FOR STUDENTS WITHOUT UNDERGRADUATE DEGREES IN ACCOUNTING
Courses taken by students who enter the program with a nonaccounting bachelor’s degree are determined by each student’s background and interest area. In addition to meeting the core program requirements for the M.Ac., students typically take a combination of undergraduate and M.B.A. courses to remove academic deficiencies in quantitative methods, business, and accounting. Students with a bachelor’s degree in another area of business typically are required to take 45-51 s.h. in order to complete the M.Ac. program. Those with degrees outside of business and with no accounting courses typically are required to take 57-60 s.h.

CPA Examination and the Iowa Accountancy Act
The Iowa Accountancy Act that became effective in January 2001 requires individuals who wish to take the CPA examination to have a bachelor’s degree, 24 s.h. of business course work, 24 s.h. of accounting course work beyond principles of accounting (06A:001), total college credit of 150 s.h., and at least one year of experience.

Admission
Admission to the M.Ac. program is competitive. The admissions committee reviews applications individually, considering quantitative aspects (grade-point average and GMAT scores) and qualitative aspects of each applicant’s background and professional experience (if applicable) to assess the applicant’s potential for academic success and professional growth.

Applicants to the M.Ac. program must meet the admission requirements of the Graduate College.

University of Iowa undergraduate accounting students are encouraged to take the Graduate Management Admission Test (GMAT) the summer before their senior year. Those who participate in the formal accounting internship during their senior year (06A:190 Experiential Learning) must apply to the M.Ac. early enough to ensure admission by December 1 of their senior year. Students who do not participate in 06A:190 may apply to the M.Ac. after December 1 of their senior year. See “Application Deadlines” below.

Application materials must include the following: an Application for Graduate Admissions; official
transcripts of all undergraduate and graduate course work submitted by each institution the applicant has attended; official scores on the Graduate Management Admission Test (GMAT); a supplemental application form with essay responses; a résumé and cover letter; and at least three letters of reference from former instructors or employers. (B.B.A. accounting students at The University of Iowa are not required to provide letters of reference.)

Applicants whose first language is not English must score at least 600 (paper-based) or 250 (computer-based) on the Test of English as a Foreign Language (TOEFL).

For application packets and complete information about application procedures, contact the University's Office of Admissions or the Department of Accounting.

APPLICATION DEADLINES

The Department of Accounting admissions committee reviews completed M.Ac. application files (which must include official GMAT scores) on five dates: March 1, April 15, July 15, October 1, and December 1. Applications are reviewed on these dates regardless of whether the applicant plans to begin the M.Ac. program in the fall semester (August), spring semester (January), or summer session (June). Final Graduate College application deadlines are as follows.

Fall semester entry: July 15 (April 15 for international students)
Spring semester entry: December 1 (October 1 for international students)
Summer session entry: April 15 (March 1 for international students)

Students who wish to apply for a teaching assistantship must apply to the M.Ac. program no later than April 1.

Joint M.Ac./J.D. Degree

The Department of Accounting and the College of Law offer the joint Master of Accountancy/Juris Doctor. The joint M.Ac./J.D. requires a minimum of 18 s.h. of graduate course work in accounting. Students in the program may count up to 12 s.h. of College of Law courses as electives for the M.Ac., and up to 12 s.h. of graduate accounting courses as electives for the J.D.

Separate application to each program is required. Applicants must be accepted to each program before they may enroll in the joint program.

Doctor of Philosophy

Students majoring in accounting may earn a Ph.D. in business administration. Ph.D. requirements are described under “Interdepartmental Graduate Programs” in the Tippie College of Business section of the Catalog and on the Department of Accounting web site.

Faculty

The department's faculty members stay current in their discipline by producing and disseminating accounting-related knowledge. They keep abreast of the latest developments in the field of education and the profession by participating in educational conferences and seminars and publishing in leading academic journals.

Courses

Primarily for Undergraduates

06A:001 Introduction to Financial Accounting 3 s.h.
Accounting and financial reporting procedures used by business and not-for-profit entities; emphasis on accounting concepts and use of accounting information in making economic decisions. Prerequisite: sophomore or higher standing.

06A:002 Managerial Accounting 3 s.h.
Basic topics in cost behavior, measurement, accumulation; use of cost data for relevant analysis, budgeting, performance evaluation. Prerequisites: 06A:001, 06E:001, and 22M:017.

06A:020 Accounting for Nonbusiness Students 3 s.h.
Financial and managerial accounting: financial statements—their elements, format, interrelationship, interpretation, and uses; analysis of corporate annual reports; cost/volume/profit relationships; decision analysis, performance evaluation.

For Undergraduate and Graduate Students

06A:113 Taxes and Business Decisions 3 s.h.
Tax concepts; emphasis on recognizing tax-planning opportunities, pitfalls inherent in common management decisions. Prerequisites: 06A:002 or equivalent, and nonaccounting major or consent of adviser.

06A:120 Financial Accounting and Reporting 3 s.h.
External financial reporting practices in context of decisions by management, current and potential stockholders, financial analysts; emphasis on interpretation, use of financial statements. Prerequisites: 06A:002 or equivalent, and nonaccounting major or consent of adviser.

06A:121 Managerial Accounting and Decision Making 3 s.h.
Cost estimation, measurement, and accumulation for the purposes of product costing, decision making, budgeting, control. Prerequisites: 06A:002 or equivalent, 06E:071, 06E:070, and nonaccounting major.
06A:130 Accounting for Management Analysis and Control 3 s.h.
Advanced topics in cost estimation, measurement, accumulation, use of cost data for decision making, performance evaluation in multi-unit organizations. Prerequisites: 06E:071, 06A:070, and admission to Professional Program in Accounting.

06A:131 Income Measurement and Asset Valuation 3 s.h.
Accounting rules that determine how economic events and transactions are described in published financial reports; emphasis on revenue and expense recognition, asset valuation, accrual accounting model. Prerequisite: admission to Professional Program in Accounting or pre-accounting major.

06A:132 Valuation of Financial Claims 3 s.h.
Current and long-term liabilities and stockholders’ equity, off-balance sheet financing, cash flow statement, earnings-per-share, financial instruments. Prerequisite: 06A:131.

06A:133 Introduction to Taxation 3 s.h.
Federal income taxation; individual, corporate, partnership income tax laws, regulations; emphasis on developing a broad perspective on structure, administration, rationale of federal income tax system. Prerequisite: admission to Professional Program in Accounting or pre-accounting major.

06A:141 Advanced Tax Topics 3 s.h.
Taxation of corporations, partnerships from organization through liquidation; relative merits of conducting business through partnership, corporation, proprietorship, S corporation; introduction to tax research. Prerequisites: 06A:133, 06A:180, and senior standing.

06A:144 Auditing 3 s.h.
General framework underlying auditing; role of audit standards in planning and conduct of audits; effect of regulation, ethics, liability on audit practices. Prerequisites: 06A:132, 06A:150, and senior standing.

06A:145 Advanced Financial Accounting 3 s.h.
Accounting and reporting standards for business combinations, including mergers, consolidations, and multinational enterprises; accounting for partnerships, business segments, transactions denominated in foreign currency, including hedges using foreign currency derivative instruments; reporting standards for interim financial statements and fund accounting applied to government and nonprofit entities. Prerequisites: 06A:152 and senior standing.

06A:148 Business Law 3 s.h.
Contracts, sales, debtor-creditor relations, business organizations, other aspects of law applied to business. Prerequisites: 06E:047 and senior standing.

06A:150 Professional Orientation Seminar Series 3 s.h.
Accounting careers and how accounting information is used in the business world; the M.Ac. program, internships, writing and assessments, speaking skills and oral presentations. Offered fall semesters. Corequisite: 06A:131 or 06A:132.

06A:170 Special Topics in Accounting arr.
Prerequisite: consent of instructor

06A:190 Experiential Learning 3-6 s.h.
Professional internship experience with related course work. Prerequisites: admission to M.Ac. program and consent of undergraduate accounting adviser.

06A:199 Academic Internship arr.
Professional internship experience with related course work (papers, oral presentation). Prerequisite: consent of undergraduate accounting adviser.

06A:211 Financial Reporting: Theory and Practice 3 s.h.
Corporate accounting choices in framework of traditional accounting theory, economic consequences, firm valuation. Prerequisites: 06A:132 and graduate standing in business.

06A:220 Design and Use of Cost Management Systems 3 s.h.
Development of cost accumulation and reporting systems that complement a firm’s strategy and structure; how activity-based cost management systems increase competitiveness by helping a firm manage its costs, processes, people. Prerequisite: 06A:130 or 06A:235 or consent of instructor.

06A:221 Financial Reporting: Theory and Practice 3 s.h.
Corporate accounting choices in framework of traditional accounting theory, economic consequences, firm valuation. Prerequisites: 06A:132 and graduate standing in business.

06A:230 Advanced Auditing 3 s.h.
Advanced issues such as ethics, independence, regulation and litigation, audit evidence, models of audit testing. Prerequisites: 06A:144 and graduate standing in business.

06A:231 Taxes and Business Strategy 3 s.h.
Effect of taxes on business decisions, including investment strategies, financial policies, emphasis on tax planning, evaluating tax consequences of business decisions. Prerequisites: 06N:215 or equivalent or consent of instructor, and graduate standing in business.

06A:232 Contemporary Issues in Accounting 3 s.h.
Accounting/reporting issues being addressed by FASB; recognition and measurement issues related to derivative financial instruments, measuring and reporting comprehensive income, improving disclosure effectiveness.

06A:235 Managerial Accounting 3 s.h.
Introduction to cost accumulation, reporting, cost management systems; managerial and divisional performance evaluation; appropriate use of cost data for short- and long-run decisions; product costing in manufacturing and service industries. Prerequisite: 06N:215 or consent of instructor.

06A:240 Financial Accounting Standards and Analysis 3 s.h.
Accounting model, underlying measurement concepts, valuation rules for assets, liabilities, related issues of income determination; emphasis on economic substance of transactions, evaluation and interpretation of financial data. Prerequisite: 06N:215.

06A:241 Tax Research 3 s.h.
Deciding what research is needed, evaluating tax materials, developing facility with electronic and printed tax materials. Prerequisite: 06A:141 for undergraduates.

06A:245 Financial Information and Capital Markets 3 s.h.
Use of corporate financial statements for investment and lending decisions; emphasis on financial analysis techniques, valuation, business analysis, cash flow projections, credit scoring, related research evidence. Prerequisite: 06A:240 or equivalent.

06A:286 Seminar in Accounting Research arr.
Forum on current research in accounting, related disciplines; faculty, student, guest papers, Ph.D. dissertation proposals. Prerequisite: Ph.D. enrollment.

06A:287 Seminar in Selected Accounting Topics arr.
Individual study, research paper preparation. Prerequisites: Ph.D. enrollment and consent of instructor.

Prerequisites: Ph.D. enrollment and consent of instructor.
Economics

Chair: Martynne Beth Ingram
Professors: William P. Albrecht, Gary C. Fethke (Leonard A. Hadley Professor of Leadership), Robert Fonythe (Leonard A. Hadley Chair in Leadership), John W. Fuller, John F. Geweke (Harlan E. McGregor Professor of Economic Theory), Srijith Govindan, Marlynne Beth Ingram, Forrest D. Nelson, George R. Neumann (George Daly Professor of Economics), Harry J. Paarsch, B. Ravikumar (Henry B. Tippie Research Professor of Economics), Raymond G. Riezman (Henry B. Tippie Research Professor of Economics), N.E. Savin (George Daly Professor of Economics), Charles H. Whiteman (C. Woody Thompson Professor of Economics), Stephen D. Williamson (Chester A. Phillips Professor of Financial Economics)
Professors emeriti: Carol C. Fethke, Hyman Joseph, Gerald L. Nordquist, Thomas F. Pogue, Larry Sgontz, Calvin D. Steinert, S.Y. Wu
Associate professor: John L. Solow
Associate professor emeritus: Michael S. Balch
Assistant professors: Marina Azzimonti, April M. Franco, Ayca Kaya, Fernando Leiva, Matthew F. Mitchell, Elena Pastorino, Galina Vereshchagina
Undergraduate degrees: B.A., B.S., B.B.A. in Economics
Undergraduate nondegree program: Minor in Economics
Graduate degrees: M.A., Ph.D. in Economics
Web site: http://www.biz.uiowa.edu/economics

Economics is the study of how societies allocate limited resources to achieve competing ends. Using both empirical and deductive methods, economics analyzes incentives, constraints, organizational forms, and market forces to understand patterns of production, exchange, and consumption of goods and services. It treats diverse issues such as wealth and poverty, government expenditures and taxation, prosperity and depression, inflation and unemployment, relations between management and labor, economic growth, environmental protection, health care delivery, the war on drug abuse, free trade versus protectionism, U.S. competitiveness in international markets, and the quality of American education.

The Department of Economics offers degree programs for undergraduates and graduate students.

Undergraduate Programs

The department offers three undergraduate degrees in economics: the Bachelor of Arts (B.A.) and Bachelor of Science (B.S.) awarded by the College of Liberal Arts and Sciences and the Bachelor of Business Administration (B.B.A.) awarded by the Henry B. Tippie College of Business.

Each baccalaureate program provides an excellent educational background for a variety of positions in business and government. Graduates find employment in banking, financial institutions, industrial firms, and trade organizations and in federal, state, and local government agencies dealing with economic policy, regulation, and analysis. Economics also provides excellent preparation for the study of law and for graduate study in fields such as business management, public administration, hospital and health administration, urban and regional planning, transportation, journalism, political science, and statistics.

The B.A. is designed to achieve a balance between economic theory, mathematical tools, and field applications. The B.S. maintains a similar balance but emphasizes development of analytic tools; it prepares students for graduate work in economics or related business and technical fields. The B.B.A. emphasizes economic foundations of business fields: accounting, finance, marketing, business law, and management.

Bachelor of Arts

The B.A. in economics requires 32 s.h. in the major. Students should pay close attention to the order in which they take courses, since some courses are prerequisites for others. The Handbook for Economics Majors, available from the department, offers help in developing a study plan.

The following courses are required.
All of these:
06E:071 Statistics for Strategy Problems 3 s.h.
22M:017 Calculus and Matrix Algebra for Business (students who have taken 22M:021 or 22M:025 or 22M:031 may use that class) 4 s.h.
22S:008 Statistics for Business 4 s.h.
A total of 21 s.h. in 100-level economics theory and field courses, as follows.

All of these:
06E:104 Microeconomic Theory 3 s.h.
06E:105 Macroeconomics 3 s.h.
Two advanced field courses chosen from 06E:170 through 06E:189 6 s.h.
Three additional courses chosen from 06E:111 through 06E:189 9 s.h.
Unless otherwise approved by the director of undergraduate studies, no more than 6 of the 21 s.h. required in 100-level economics courses may be satisfied by transfer or correspondence credit. Students should take 06E:104 and 06E:105 at The University of Iowa.

PREREQUISITES
Prerequisites for most 100-level courses in economics: 06E:001 and 06E:002, or consent of instructor
Prerequisites for 06E:104: 06E:001 and 22M:017, or consent of instructor
Prerequisites for 06E:105: 06E:002, 06E:104, and 22M:017
Prerequisite for 06E:071: 22S:008
Prerequisites for courses numbered 06E:170 and above: 06E:104 and 06E:105

Bachelor of Science

The B.S. in economics requires a minimum of 33 s.h. in the major. Students should pay close attention to the order in which they take courses, since some courses are prerequisites for others. The Handbook for Economics Majors, available from the department, offers help in developing a study plan.

The following courses are required.

This sequence:
22M:025-22M:026 Calculus I-II 8 s.h.
One of these:
22S:120 Probability and Statistics 4 s.h.
22S:130-22S:131 Introduction to Mathematical Statistics I-II 6 s.h.
A total of 21 s.h. in 100-level economics theory and field courses, as follows.

All of these:
06E:104 Microeconomic Theory 3 s.h.
06E:105 Macroeconomics 3 s.h.
06E:184 Introduction to Econometrics 3 s.h.
Two additional advanced field courses numbered from 06E:170 through 06E:189 6 s.h.
Two additional courses chosen from 06E:111 through 06E:189 6 s.h.

Bachelor of Business Administration

In addition to the B.B.A. common requirements of the Tippie College of Business, the B.B.A. in economics requires 18 s.h. in 100-level economics courses, including the following. Students should take 06E:104 and 06E:105 at The University of Iowa. Students should pay close attention to the order in which they take courses, since some courses are prerequisites for others. The Handbook for Economics Majors, available from the department, offers help in developing a study plan.

All of these:
06E:104 Microeconomic Theory 3 s.h.
06E:105 Macroeconomics 3 s.h.
Two field courses numbered from 06E:170 through 06E:189 6 s.h.
Two additional courses numbered from 06E:111 through 06E:189 6 s.h.
PREREQUISITES
Prerequisites for most 100-level courses in economics: 06E:001 and 06E:002, or consent of instructor
Prerequisites for 06E:104: 06E:001 and 22M:017, or consent of instructor
Prerequisites for 06E:105: 06E:002, 06E:104, and 22M:017
Prerequisite for 06E:071: 22S:008
Prerequisites for courses numbered 06E:170 and above: 06E:104 and 06E:105

Four-Year Graduation Plan

B.A. and B.S. Students
The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)
These checkpoints apply to both the Bachelor of Arts and the Bachelor of Science.
Before the third semester begins: at least one-quarter of the semester hours required for graduation
Before the fifth semester begins: at least one-half of the semester hours required for graduation, 06E:001 and 06E:002, and the math component of the quantitative courses required for major
Before the seventh semester begins: three-quarters of the semester hours required for graduation, 06E:104 and 06E:105, and one 100-level economics course
Before the eighth semester begins: three 100-level economics courses, including one advanced course (numbered 06E:170 through 06E:189), and the statistics component of the quantitative course requirement
During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

B.B.A. Students
The following checkpoints are designed for students who enter the University as first-year pre-business students. In order to stay on the plan, students must maintain the grade-point average required for guaranteed admission to the Tippie College of Business and must apply for admission to the college by the established deadline.
Students must take 06E:100 Foundations of Business during their first semester after admission to the Tippie College of Business.
Before the third semester begins: 06E:001 or 06E:002, 22M:017, and 22S:008, or equivalents;
and at least one-quarter of the semester hours required for graduation
Before the fifth semester begins: 06A:001, 06A:002, and 06E:001 or 06E:002 (whichever has not already been taken), or equivalents; all General Education requirements; and at least half of the semester hours required for graduation
Before the seventh semester begins: business core requirements, approximately half of the course work in the major (varies by major), and three-quarters of the semester hours required for graduation
Before the eighth semester begins: approximately three-quarters of course work in the major
During the eighth semester: all remaining course work in the major, and a sufficient number of semester hours to graduate

Honors

B.A. and B.S. Students
Students in the College of Liberal Arts and Sciences working toward a B.A. or B.S. in economics are encouraged to take part in the honors program in economics, which provides opportunities for high-achieving students to pursue special research interests. Honors students in economics must be members of the University Honors Program, which requires students to maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University Honors Program for more information).
To enter the honors program, students must complete 06E:104 Microeconomic Theory and 06E:105 Macroeconomics before the senior year. Honors students typically register for 06E:194 Honors Seminar in the fall of the senior year. Then they define and complete a research project under the guidance of a supervising faculty member, earning up to 6 s.h. in 06E:195 Senior Thesis in Economics. The thesis is presented orally to a committee of three faculty members,
typically the undergraduate honors adviser, the student's research supervisor, and a third faculty member agreed upon by the student and the honors adviser.

Interested students should consult the honors adviser by the second semester of their junior year.

**B.B.A. Students**
The Tippie College of Business offers qualified B.B.A. students the opportunity to pursue honors study. For more information, contact the Undergraduate Program Office or see “B.B.A. with Honors” in the Tippie College of Business section of the Catalog.

**Minor**
The minor in economics requires at least 15 s.h. in economics with a g.p.a. of at least 2.00; 12 of the 15 s.h. must be taken at The University of Iowa in courses numbered above 06E:100.

**Course Work for Nonmajors**
Students in the College of Liberal Arts and Sciences may wish to use economics courses as part of other majors or the General Education Program. The introductory courses 06E:001 Principles of Microeconomics and 06E:002 Principles of Macroeconomics are approved for General Education in social sciences; they introduce the field of economics and the specialized topics of upper-division courses. The intermediate theory courses 06E:104 Microeconomics Theory and 06E:105 Macroeconomics provide a deeper foundation in the core theories and methods of the discipline. They serve as preparation for upper-division field courses or as terminal courses in an economics study plan.

Course work in economics can be related to majors in many other fields. For example, history majors might take 06E:178 American Economic History; political science majors could elect 06E:119 Economics of the Government Sector and 06E:125 International Economics; global studies majors, 06E:133 Environmental and Natural Resource Economics; pre-law students, 06E:171 Antitrust: Legal and Economic Analysis and 06E:172 Law and Economics; mathematics and engineering majors, 06E:104 Microeconomic Theory and 06E:187 Introduction to Mathematical Economics; and statistics majors, 06E:184 Introduction to Econometrics. The Handbook for Economics Majors lists economics courses that complement studies in other fields.

Some students combine related interests by pursuing double majors in economics and another field, such as computer science, geography, global studies, history, mathematics, political science, sociology, or statistics.

**Undergraduate Economics Forum**
Students are invited to join the Undergraduate Economics Forum. The group sponsors programs to help students plan for careers or graduate study and holds social events, special lectures, and round-table discussions. It provides opportunities for students to meet other economics majors and department faculty members.

**Graduate Programs**
The Doctor of Philosophy in economics provides rigorous training in economic theory, econometrics, and applied economics. The program has six components: a coordinated sequence of core courses, a qualifying examination, a research paper, a set of major field courses, a dissertation proposal and comprehensive examination, and a dissertation.

Application deadline for admission and financial support is February 15 for fall semester entry.

The Master of Arts is offered only to students working toward a Ph.D. in economics.

**CORE SEQUENCE**

**First Semester**
- 06E:200 Economic Analysis I 3 s.h.
- 06E:203 Microeconomics I 3 s.h.
- 06E:204 Macroeconomics I 3 s.h.

**Second Semester**
- 06E:201 Economic Analysis II 3 s.h.
- 06E:205 Microeconomics II 3 s.h.
- 06E:206 Macroeconomics II 3 s.h.

**Third Semester**
- 06E:221 Econometrics 3 s.h.

**Fourth Semester**
- 06E:222 Applied Econometrics 3 s.h.

**QUALIFYING EXAMINATION**
The qualifying examination is normally taken during the summer after the first year.
RESEARCH PAPER
The research paper is normally completed the summer after the second year.

MAJOR FIELD COURSES
Each student chooses a major study area in addition to the core courses. The requirement for the major area is a minimum of 24 s.h. of intensive study in a field and in courses that enable students to understand the relationship between their specialty and related fields.

Dissertation Proposal and Comprehensive Examination
Students must defend a dissertation proposal in a comprehensive examination within one year of completing the research paper requirement.

Dissertation
Submission of the completed dissertation and an oral defense of the dissertation research completes the Ph.D. program.

Joint Ph.D./J.D. Program
The Department of Economics and the College of Law offer a joint Ph.D./J.D. program.

Special Seminar
Each year the department offers a seminar program that brings eminent economists from other universities and from government agencies to The University of Iowa campus. Presentations by Department of Economics faculty members and students also are featured.

Courses

Primarily for Undergraduates
Note: 06E:001 and 06E:002 may be taken in either order or simultaneously; they are approved for General Education in social sciences.

06E:001 Principles of Microeconomics 3-4 s.h.
Organization, workings of modern economic systems; role of markets, prices, competition in efficient allocation of resources and promotion of economic welfare; alternative systems; international trade. GE: social sciences (except for B.B.A. students).

06E:002 Principles of Macroeconomics 3-4 s.h.
National income and output; employment and inflation; money, credit; government finance; monetary, fiscal policy; economic growth, development; international finance. GE: social sciences (except for B.B.A. students).

06E:071 Statistics for Strategy Problems 3 s.h.
Continuation of 22S:008; working knowledge of statistical techniques, scientific data-based approach to problem formulation and solution, statistical techniques in the context of real data analysis, assessment of defects in statistical analyses, using data for making business decisions, choosing appropriate statistical procedures, developing skill in communicating statistical results to audiences without knowledge of statistics. Prerequisites: 22M:017 and 22S:008.

06E:104 Microeconomic Theory 3 s.h.
Economic theory of consumer behavior, producer behavior; role of markets in coordinating economic decisions; conditions for efficient resource allocation by market mechanisms; market imperfections, strategic behavior. Prerequisites: 06E:001 and 22M:017, or consent of instructor.

06E:105 Macroeconomics 3 s.h.
Measurement of national product, unemployment, inflation; determination of national income, price level; role of stabilization policies; economic growth, dynamics of inflation. Prerequisites: 06E:002, 06E:104, and 22M:017, or consent of instructor.

06E:111 Labor Economics 3 s.h.
Microeconomic analysis of labor markets, related institutions; labor supply decisions made by workers, labor demand decisions made by firms, market equilibrium; economic analysis of unions; returns to education; family decisions. Closed to students who have taken or are taking 06E:175. Prerequisites: 06E:001 and 06E:002, or consent of instructor.

06E:113 Health Economics 3 s.h.
Structure of America's health care industry, economic analysis applied to its problems of production, pricing, distribution; cost-effectiveness, financing of medical care, role of government. Prerequisites: 06E:001 and 06E:002, or consent of instructor.

06E:117 Money, Banking, and Financial Markets 3 s.h.
Role of money, institutions in determination of income, employment, prices in domestic and world economy. Prerequisites: 06E:001 and 06E:002, or consent of instructor.

06E:119 Economics of the Government Sector 3 s.h.
Economic functions of government in modern economies; economic decision making; budgetary processes; effects of government expenditures, taxation on allocation of resources, distribution of income, economic growth, stability. Prerequisites: 06E:001 and 06E:002, or consent of instructor.

06E:125 International Economics 3 s.h.
Modern theories of international trade and investment; role of tariffs and other restrictions of international trade, foreign exchange markets, international monetary arrangements, international economic policy. Prerequisites: 06E:001 and 06E:002, or consent of instructor.

06E:129 Economic Growth and Development 3 s.h.
Determinants of rising living standards; accumulation of physical and human capital; predictions of economic growth models compared to observed changes in living standards. Prerequisites: 06E:001 and 06E:002, or consent of instructor.

06E:133 Environmental and Natural Resource Economics 3 s.h.
Environmental and resource use problems; efficient mechanisms and other policies for environmental protection, management of common property resources. Prerequisites: 06E:001 and 06E:002, or consent of instructor.

06E:135 Regional and Urban Economics 3 s.h.
Theory of location and regional development; central place theory; why cities exist and trade with one another; models of land use patterns, rents; empirical tests of models, policy applications. Prerequisites: 06E:001 and 06E:002, or consent of instructor.

06E:141 Economics of American Industries 3 s.h.
Structural evolution; imperfect competition, resource allocation; development of public policy on monopoly; selected industries. Prerequisites: 06E:001 and 06E:002, or consent of instructor.
06E:145 Introduction to the Economics of Transportation 3 s.h. Transportation markets—intercity, rural, urban; transportation modes—rail, highway, air, water, pipeline; issues in environmental and economic regulation, finance, policy, planning, management, physical distribution. Same as 044:133, 102:133.

06E:160 Economics of Families and Households 3 s.h. Micro- and macroeconomic theory applied to economic decisions of families, households; practical and theoretical issues in income generation, spending and saving decisions, risk management and asset allocation, investments, and intergenerational wealth transfers. Prerequisites: 006:101 and 006:102 or consent of instructor.

06E:164 Economics in Transition 3 s.h. Emerging markets and newly industrialized nations in Asia, Latin America, the former Soviet Union; developments in these regions over past decades—financial crises, industrialization, economic reform, privatization, impact of globalization, development of human capital, income distribution; role of institutions in the transition from poor to rich nation. Prerequisites: 006:001 and 006:002, or consent of instructor.

06E:171 Antitrust: Legal and Economic Analysis 3 s.h. Topics in federal antitrust policy; merger policy, monopolization, predatory pricing, collusion, vertical restrictions, resale price maintenance, enforcements; case law, economics literature. Prerequisite: 06E:104 or 091:208 or consent of instructor. Same as 091:201.

06E:172 Law and Economics 2-3 s.h. Law examined through analytic tools of microeconomics; impact of legal rules on resource allocation, risk bearing, distribution of economic well-being. Prerequisites: 006:104 and 006:105, or consent of instructor.

06E:173 Advanced International Economics 3 s.h. Neo-classical model of international trade, imperfect competition, and international trade and investment, role of trade barriers; regional trade agreements and the World Trade Organization. Prerequisites: 006:104 and 06E:105, or graduate standing.

06E:174 Monetary Economics 3 s.h. Demand for and supply of money; money's role in economy; empirical studies of money's impact; problems with monetary control. Prerequisites: 006:104 and 006:105, or consent of instructor.

06E:175 Economic Analysis of Labor Markets 3 s.h. Labor supply and demand; investments in human capital, compensating wage differentials, discrimination, long-term contracts, occupational choice, family decisions, unions, immigration. Prerequisites: 006:104, 006:105, elementary calculus and statistics.

06E:176 Public Sector Economics 3 s.h. Economic functions of government; budgetary processes; effects of government expenditures, taxation on resource allocation, income distribution, economic growth and stability. Prerequisite: 006:104 and 006:105, or consent of instructor.

06E:177 Industrial Organization 3 s.h. Market structure; effects of business practices, informational problems on market structure; appraisal of antitrust policies, government regulation of business. Prerequisites: 006:104 and 006:105.

06E:178 American Economic History 3 s.h. Emphasis on role of population, technology. Prerequisites: 006:104 and 006:105 for economics majors; 006:001 and 16A:001 for non-economics majors. Same as 16A:144.

06E:179 History of Economic Thought 2-3 s.h. Evolution of economics as a social science; ideas of Smith, Ricardo, Malthus, Marx, Marshall, Keynes, and their major critics. Prerequisites: 006:104 and 006:105.

06E:184 Introduction to Econometrics 3 s.h. Single-equation linear statistical models, estimation and hypothesis testing, serial correlation, heteroscedasticity, generalized least squares estimation, specification analysis; errors in variables; emphasis on interpretation, application of econometric models, methods, use of computers. Prerequisite: 225:120 or equivalent.

06E:187 Introduction to Mathematical Economics 3 s.h. Mathematical structure of economic principles, problems, systems; may include constrained optimization, choice under uncertainty, general equilibrium and welfare economics, dynamical systems and control theory, game theory. Prerequisite: 06E:104 or consent of instructor.

06E:189 Topics in Economics arc. Varies content. Prerequisite: consent of instructor.
06E:211 Mathematical Economics I 3 s.h.
Convex analysis in economic theory; ordinal and cardinal preference relations; quasiconcave, concave numerical representations; separation principle for convex sets—linear programming, concave programming, Brouwer fixed point theorem, existence of competitive equilibrium. Prerequisite: 06E:205 or consent of instructor.

06E:212 Mathematical Economics II 3 s.h.
Theories of n-person games, noncooperative or cooperative; applications to general economic equilibrium analysis. Prerequisite: 06E:211.

06E:221 Econometrics 3 s.h.
Statistical inference in single and multiple equation stochastic models, models with nonindependent or nonidentically distributed error structure, dynamic models; OLS, GLS, IV, ML estimation; asymptotic distribution theory; exact, asymptotic hypothesis tests. Prerequisite: 22S:154 or equivalent.

06E:222 Applied Econometrics 3 s.h.
Empirical problems; multiple linear regression, nonlinear regression, maximum likelihood, hazard functions, univariate and multivariate time series, flexible functional forms. Prerequisite: 06E:241.

06E:223 Econometric Theory I 3 s.h.
Statistical theory underlying econometric inference; emphasis on estimation, hypothesis testing in linear models. Prerequisite: 06E:221.

06E:234 International Business—M.B.A. 3 s.h.
Problems in international business; how to export, how to deal with import competition, international joint ventures, country studies. Prerequisite: consent of instructor.

06E:235 International Trade Theory 3 s.h.
The theory of international trade, including basic models of international trade; capital and labor mobility and trade; protection of international trade; the political economy of international trade; empirical applications of international trade. Prerequisite: consent of instructor.

06E:241 Macroeconomics III 2-6 s.h.
Current research in macroeconomics; development of research topics with emphasis on theoretical and empirical analysis. Prerequisites: 06E:205 and 06E:221.

06E:245 Monetary Theory 2-3 s.h.
Research at the frontier of monetary theory and policy; overlapping generations models, search models of money, representative agents monetary models, intermediation and banking theory, and financial contracts.

06E:250 Labor Economics 3 s.h.
Problems and models, including intertemporal models of labor markets; uncertainty and labor market activity; retirement decisions; economic theories of fertility; economics of discrimination; job search models; economic models of unions; bargaining and strikes, public sector labor markets; determinants of income distribution; emphasis on empirical verification of theory. Prerequisites: 06E:205, and 06E:184 or 06E:221.

06E:271 Industrial Organization 2-4 s.h.
The firm, monopolistic competition, oligopoly and workable competition; industrial organization, nature of equilibrium under uncertainty. Prerequisites: 06E:205 and 06E:211.

06E:272 Economics of Organization 2-4 s.h.
Theoretical design of mechanisms for achieving efficient allocations within organizations, and development of empirical frameworks to implement such mechanisms; applications to problems in industrial organization and labor economics. Prerequisite: 06E:205.

06E:299 Contemporary Topics in Economics 3 s.h.
Topics not offered in other courses. Repeatable. Prerequisite: consent of instructor.
Finance

Chair: Anand M. Vijh
Professors: Jarjisu Sa-Aadu (Chester A. Phillips Professor of Business Finance and Real Estate), Anand M. Vijh (Marvin and Rose Lee Pomerantz Chair in Finance), Paul A. Weiler (John F. Murray Professor)
Professors emeriti: Charles E. Marberry, Robert M. Solodsky, Richard A. Stevenson
Clinical professor: John H. Spitzer
Associate professors: David S. Bates, Matthew T. Billett, Puneet Handa, Erik Lie, Thomas A. Rietz, Gerry L. Suchanek
Associate professor emeritus: G. Carl Schweser
Assistant professors: Toby Daglish, Jon A. Garfinkel, Todd I. Houge, James T. Leverty, Yiming Qian, Ashish Tiwari
Lecturers: Chesca Colloredo-Mansfeld, Larry Hershberger, Heidi Lie

Undergraduate degree: B.B.A. in Finance
Graduate degrees: M.B.A.; Ph.D. in Business Administration
Web site: http://www.biz.uiowa.edu/finance

Undergraduate Program
The Department of Finance undergraduate program provides a balance of theory, applications, and financial information technology that facilitates students’ transition from classroom to workplace. Through fundamental finance principles and state-of-the-art financial markets information technologies, students develop analytical abilities to interpret financial markets data, implement the latest trading and investment strategies, and make effective managerial decisions in national as well as international settings.

Careers for students majoring in finance include corporate treasury operations, cash management, mergers and acquisitions, investment banking, sales and security trading, security analysis, commercial banking and financial services, credit analysis, mortgage lending, financial planning, consulting, public administration, and venture capital.

The program stresses learning by doing, partnership with industry, and internships, with the goal of enhancing students’ career development. Students receive a balanced education consistent with the globalization of business and the explosion in financial markets and information technology.

Bachelor of Business Administration
The Bachelor of Business Administration in finance requires 20 s.h. in the major, as follows.

*Students may count only two of these courses toward the finance major.

Risk Management and Insurance Concentration
The Emmett J. Vaughan Institute of Risk Management and Insurance collaborates with the Department of Finance to offer a concentration in risk management and insurance. The concentration provides students with a foundation for careers in corporate risk management, risk management consulting, employee benefits management, insurance brokerage, and underwriting. The following courses are recommended for the concentration.

<table>

06F:104 Corporate and Financial Risk Management 3 s.h.
06F:105 Life and Health Insurance 3 s.h.
06F:106 Employee Benefit Plans 3 s.h.
Finance majors choose three of these:
06F:113 Markets for Fixed Income Securities 3 s.h.
06F:114 Commercial Banking 3 s.h.
06F:116 Futures and Options 3 s.h.
06F:126 Real Estate Process 3 s.h.
06J:156 Dynamics of Negotiations 3 s.h.
06J:162 Leadership and Personal Development 3 s.h.
06M:139 Sales Management 3 s.h.
Non-finance majors choose three of these:
06A:120 Financial Accounting and Reporting 3 s.h.
06F:111 Investment Management 3 s.h.
06F:113 Markets for Fixed Income Securities 3 s.h.
06F:114 Commercial Banking 3 s.h.
06F:116 Futures and Options 3 s.h.
06F:117 Corporate Finance 3 s.h.
06F:126 Real Estate Process 3 s.h.

Graduate Program

The Department of Finance offers the Doctor of Philosophy in business administration. Ph.D. requirements are described under "Interdepartmental Graduate Programs" in the Tippie College of Business section of the Catalog and on the Department of Finance web site.

The Master of Arts in business administration is a nonthesis degree awarded only to students who begin the Ph.D. program and decide not to continue. Incoming students may not elect to pursue the M.A.

For information about the M.B.A., contact the Tippie School of Management.

Courses

Primarily for Upper-Division Undergraduates
06F:100 Introductory Financial Management 3 s.h.
Financial management goals and decision making; valuation of bonds and stocks, risk and return analysis, portfolio diversification, market efficiency, asset pricing, cost of capital, agency theory, capital budgeting, financial planning. Prerequisites: 06F:102, 06F:101, and junior standing.

06F:101 Directed Readings in Finance arr.
Individually guided readings in selected topics. Prerequisite: consent of instructor.

06F:102 Principles of Risk Management and Insurance 3 s.h.
Introduction to risk and insurance, risk identification and evaluation, demand for insurance, effects of limited liability, theory of moral hazard and adverse selection; business and personal risk, insurance as a risk management tool. Prerequisite: 06F:100. Corequisite: 06F:110 or consent of instructor.

06F:103 Property and Liability Insurance 3 s.h.
Fundamentals of commercial property and liability insurance; commercial property and liability contracts, functions of property and liability insurers; regulation and financial analysis of property and liability insurers; marketing, underwriting, rate making, claim settlements. Prerequisite: 06F:102.

06F:104 Corporate and Financial Risk Management 3 s.h.
Analysis and treatment of pure and financial risks faced by business organizations; development of the risk management process, use of various risk management techniques on identified exposures, risk management process and techniques applied to case studies; financial risk management techniques. Prerequisite: 06F:102.

06F:105 Life and Health Insurance 3 s.h.
Types of life insurance and annuity contracts and their uses; regulation of life and health insurers; development of financial plans using life insurance products; Social Security, group and individual health insurance products, including major medical, disability income, long-term care policies, marketplace analysis; contractual provisions, determination of human life values, mathematics of life contingencies and pricing. Prerequisite: 06F:102.

06F:106 Employee Benefit Plans 3 s.h.
Management of employee benefit plans (e.g., group life, health insurance, retirement programs); design, administration, and financing of employee benefit plans; federal administration of employee benefit plans; funding requirements, financial alternatives; funding and vesting of retirement annuities; design and management of health care plans, including "cafeteria" approach and nonqualified deferred compensation arrangements; economic effects and financing employee benefits and retirement plans in private and public sectors. Prerequisite: 06F:102.

06F:110 Financial Information Technology 2 s.h.
Applications of commonly used financial software and data systems reviewed by student teams. Prerequisite: 06F:100.

06F:111 Investment Management 3 s.h.
Investment in marketable securities in domestic and international markets; financial markets, securities trading, evaluation of risk/return trade-off, formulation and implementation of investment strategies, efficient portfolio formation. Prerequisite: 06F:100. Corequisite: 06F:110.

06F:112 Security Analysis 3 s.h.
Valuation of financial securities using cases and financial information technology; macroeconomic and industry analysis, regulatory analysis, financial statement analysis, technical analysis, trading securities, active portfolio management, performance evaluation. Prerequisites: 06F:111 and UI cumulative g.p.a. of at least 2.80.

06F:113 Markets for Fixed Income Securities 3 s.h.
Theories of fixed income securities, term structure of interest rates; asset pricing models, valuation of fixed income securities and contingent claims, fixed income portfolio management, immunization strategies, yield curve analysis. Prerequisite: 06F:100 or consent of instructor. Corequisite: 06F:110.

06F:114 Commercial Banking 3 s.h.
Management of commercial banks and financial service firms; asset and liability management, credit policy, capital risk, liquidity planning, use of swaps and derivatives to hedge interest rate risk, global banking, investment strategies. Prerequisite: 06F:100. Corequisite: 06F:110.
06F:115 Investment Banking 3 s.h.
How investment bankers interact with clients in access to growth capital, sales, trading, and investment banking; role of investment bankers through varied perspectives, including those of the client (e.g., corporate CFO, treasurer, corporate development officer) and service provider (e.g., investment banking professional).
Prerequisites: 06F:100, and 06F:117 or consent of instructor.

06F:116 Futures and Options 3 s.h.
Use of options, futures, and other derivative securities in financial management; understanding types of derivative securities, markets, trading technology; applications of risk management and speculation; pricing relations with underlying securities.
Prerequisite: 06F:111.

06F:117 Corporate Finance 3 s.h.
Advanced managerial decision making; corporate financial policy, dividend policy, agency theory, corporate restructuring, capital structure strategies, mergers and acquisitions, option pricing fundamentals, convertible debt, callable debt, warrants.
Prerequisite: 06F:100. Corequisite: 06F:110.

06F:120 Real Estate Process 3 s.h.
Fundamentals of real estate finance and investments; economic base analysis, asset analysis, market analysis, mortgage markets, underwriting, alternative mortgages, mortgage-backed securities, real estate securitization, land development, valuation principles, investment analysis, tax consideration, portfolio management.
Prerequisite: 06F:100. Corequisite: 06F:110.

06F:130 International Finance 3 s.h.
International monetary systems, exchange rate determination, use of currency derivatives, hedging and risk management, currency swaps, foreign direct investment, international corporate finance, international capital budgeting, international portfolio investment, Third World debt, privatization, joint ventures.
Prerequisite: 06F:100. Corequisite: 06F:110.

06F:190 Hawkinson Scholar Seminar 1 s.h.
Advanced skill and understanding required for pursuit of investment banking, management consulting careers, specialized résumé and interview training, industry presentations, relevant case assignments. Repeatable. Prerequisite: consent of Hawkinson Institute of Business Finance director.

06F:199 Academic Internship 1-2 s.h.
Professional internship experience with associated academic content. Repeatable. Prerequisite: consent of department chair.

06F:201 Directed Readings in Finance arr.
Prerequisite: consent of instructor.

06F:202 M.A. Research Report 1 s.h.
Prerequisites: nonthesis M.A. enrollment and consent of instructor.

06F:205 Contemporary Topics in Finance arr.

06F:208 Structured Finance—Securitization 3 s.h.
Securitized assets such as mortgages, asset-backed securities (e.g., credit cards, auto loans, trade receivables), collateralized debt obligations, institutional structures, credit risk, valuation, cost of capital, corporate finance, accounting, legal, tax, and regulatory issues associated with securitization; how to design, value, and implement structured-finance products that create value from stakeholders’ perspectives.
Prerequisite: 06N:225.

06F:209 Investment Banking 3 s.h.
Overview of industry consolidation, underwriting of securities, merger valuation options, legal and regulatory considerations, IPOs, private equity, industry-specific case studies, student/practitioner discussion of issues facing industry.
Prerequisite: 06N:225 for graduate students; consent of instructor for undergraduates.

06F:210 Financial Information Technology 1 s.h.
Applications of commonly used financial software and data systems reviewed by student teams.

06F:211 Risk Management in Business 3 s.h.
Nonconsequential risks in business and selected management devices for dealing with them; managing risk in the new economy; assumptions, avoidance, transfer, and reduction of risk; risk management decisions; control of risk and reduction of losses; case studies in risk management. Prerequisite: 06N:225.

06F:212 Investment Management 3 s.h.
Hands-on approach to investing in marketable securities in domestic and global markets; market efficiency, risk-return relationships, asset-pricing models, security valuation, options and futures valuation, portfolio strategies and management.

06F:213 Futures and Options 3 s.h.
Use of options, futures, and other derivative securities in financial management; types of derivative securities, markets, trading technology; applications of risk management and speculation; pricing relations with underlying securities.

06F:214 Real Estate Finance and Investments 3 s.h.
Structuring real estate finance and investments; mortgage markets and pricing, mortgage-backed securities, development process, real estate evaluation, tax effects, securitized real estate, real estate cycles, application of derivative instruments, strategic asset allocation.

06F:215 Corporate Finance 3 s.h.
Structured problems and cases in corporate financial policy decisions; financial decision models, current and fixed asset administration, cost of capital, capital budgeting, dividends, cash flow projections, cash management, mergers and acquisitions.

06F:216 Fixed Income Securities 3 s.h.
Theories of fixed income securities, term structure of interest rates; asset pricing models, valuation of fixed income securities, valuation of contingent claims, fixed income portfolio management.

06F:217 Bonds and Interest Rate Derivatives 3 s.h.
Advanced tools for managing interest rate risk and models of interest rate dynamics applied to fixed-income securities, fixed-income derivatives; projects in fixed income management.
Prerequisites: 06F:213 or 06F:216, and consent of instructor.

06F:218 Advanced Corporate Finance 3 s.h.
Applied management; financial instruments and innovations, IPDs, REOs, mergers and acquisitions, leverage buyouts, capital structure, dividend policy, corporate restructuring, treasury operations, risk, real options, corporate control, executive compensation.

06F:219 Capital Acquisition and Cash Flow Management 3 s.h.
Same as 06E:233.

06F:220 Management of Financial Institutions 3 s.h.

06F:221 Applied Securities Management I 3 s.h.
Hands-on approach to portfolio management; setting goals, trading securities, developing programs to evaluate fund performance. First of a two-semester sequence; must be followed by 06F:222. Prerequisites: 06N:225 and consent of instructor.

Management and Organizations

Chair: Frank L. Schmidt
Professors: Murray R. Barrick (Stanley M. Howe Chair in Leadership), Jay Christensen-Szalanski, Nancy R. Hauserman (Williams Teaching Professor), Lola L. Lopes (Marvin and Rose Lee Pomerantz Chair in Business Administration), Michael K. Mount (Henry B. Tippie Research Professor of Human Resources), Sara L. Rynes (John F. Murray Professor), Frank L. Schmidt (Ralph L. Sheets Professor)
Professors emeriti: Norman F. Kallaus, Charles R. Klassen, Gerald L. Rose, Peter P. Schoderbek, Duane E. Thompson, Jude P. West
Associate professors: Terry L. Boles, Kenneth G. Brown, Amy L. Kristof-Brown, Greg L. Stewart
Clinical associate professor: Lon D. Moeller
Assistant professor: Lisa C. Dragoni
Clinical assistant professor: David K. Hensley
Lecturers: Daniel A. Cohen, Dennis M. Schrag
Undergraduate degree: B.B.A. in Management
Graduate degrees: M.B.A.; M.A., Ph.D. in Business Administration
Web site: http://www.biz.uiowa.edu/manorg

Undergraduate Program

The Department of Management and Organizations offers study of human resource management; individual, team, and organizational behavior; employment law and ethics; leadership and personal development; negotiations; training and development; and organizational design. The program is designed to give students a thorough background in these areas as well as an understanding of their application to real-life situations. Specific courses, research projects, and other experiences, such as simulations, are blended to include both theoretical and pragmatic aspects of the field.

The program prepares students for a variety of line, staff, and professional positions in business, consulting firms, government, nonprofit institutions, and education. Graduates find employment opportunities in general management, human resource management, strategic reward systems, staff benefits, organizational staffing, performance appraisal, training and development, career management, managing union employees, and employment law.

Bachelor of Business Administration

The Bachelor of Business Administration in management requires 18 s.h. in the major, as follows.

06J:130 Individuals, Teams, and Organizations 3 s.h.
06J:131 Strategic Human Resource Management 3 s.h.
06J:132 Law and Ethics in Management 3 s.h.

Three of these:
06J:140 Competitive Strategy 3 s.h.
06J:143 Dynamics of Consulting 3 s.h.
06J:145 Training and Developing Human Resources 3 s.h.
06J:146 International Business Environment 3 s.h.
06J:147 Nonprofit Organizational Effectiveness I 3 s.h.
06J:148 Nonprofit Organizational Effectiveness II 3 s.h.
06J:152 Collective Bargaining 3 s.h.
06J:156 Dynamics of Negotiations 3 s.h.
06J:160 Staffing Organizations 3 s.h.
06J:161 Managing Through Motivation 3 s.h.
06J:162 Leadership and Personal Development 3 s.h.
06J:171 Strategic Reward Systems 3 s.h.
06T:192 Entrepreneurship: Business Consulting 3 s.h.

Graduate Programs

The Department of Management and Organizations offers the Doctor of Philosophy in business administration. Ph.D. requirements are described under “Interdepartmental Graduate Programs” in the Tippie College of Business section of the Catalog and on the Department of Management and Organizations web site.

The Master of Arts in business administration is a nonthesis degree awarded only to students who begin the Ph.D. program and decide not to continue. Incoming students may not elect to pursue the M.A.

For information about the M.B.A., contact the Tippie School of Management.
Courses

Primarily for Upper-Division Undergraduates

06J:047 Introduction to Law 3 s.h.
General history, structure of law; law's action in guiding changing economic, social patterns. Prerequisite: sophomore standing.

06J:048 Introduction to Management 3 s.h.
Principles of management, organizational structure, decision making, leadership, line-staff relationships, administration of organizations. Prerequisite: sophomore standing.

06J:100 Foundations of Business 3 s.h.
Substantive areas of the business curriculum, development of a successful career; strategies for a competitive advantage in the business environment. Prerequisites: admission to Tippie College of Business and junior standing.

06J:101 Directed Readings in Management and Organizations 3 s.h.
Prerequisite: consent of instructor.

06J:130 Individuals, Teams, and Organizations 3 s.h.
Theories of organizational behavior applied to current business trends for individuals, teams, organizations; personality, managing diversity, work-family conflict, self-managed teams, charismatic leadership, work motivation, managing conflict, organizational culture. Prerequisites: 06J:047 and 06J:048.

06J:131 Strategic Human Resource Management 3 s.h.
People management activities, policies, and practices that promote effective organizations; how changes in technology, business restructuring, legal and social concerns, other issues affect human resource management. Prerequisites: 06J:047 and 06J:048.

06J:132 Law and Ethics in Management 3 s.h.
Laws affecting employer and employees, such as regulatory health and safety policies, unemployment and retirement benefits, and employment discrimination including hiring, termination, testing issues. Prerequisites: 06J:047 and 06J:048.

06J:140 Competitive Strategy 3 s.h.
How top managers plan and execute strategies that enable businesses to compete in local and global markets; analytical skills for coping with organizational uncertainties and business realities from the perspective of a senior manager; case studies. Prerequisites: 06J:041 and 06J:048. Recommended: senior standing.

06J:143 Dynamics of Consulting 3 s.h.
Consulting models, trends, and processes; characteristics of internal versus external consulting services; integration of behavioral and organizational principles into programs for organizational change. Prerequisite: 06J:130.

06J:145 Training and Developing Human Resources 3 s.h.
Concepts, practices in training and development; strategic issues affecting the design, implementation, and evaluation of training programs and of career management and organizational development activities. Prerequisite: 06J:131.

06J:146 International Business Environment 3 s.h.
Differences in international and domestic business; cultural, legal, political factors for managers. Prerequisite: junior or higher standing.

06J:147 Nonprofit Organizational Effectiveness I 3 s.h.

06J:148 Nonprofit Organizational Effectiveness II 3 s.h.
Qualities for leadership of nonprofit organizations, including relationships with staff and volunteers; relationship of nonprofit and outside world; marketing, public relations, advocacy strategies for nonprofits. Same as 024:148, 025:177, 032:128, 042:158, 049:176, 096:169.

06J:152 Collective Bargaining 3 s.h.
Labor relations; theories of collective bargaining, techniques related to negotiations, dispute resolution; emphasis on union-management dynamics. Prerequisite: 06J:131.

06J:156 Dynamics of Negotiations 3 s.h.
Predictable aspects and dynamics of bargaining experiences; simulations, experiential exercises to foster skills needed for effective negotiation in almost any situation. Prerequisite: 06J:130.

06J:159 Introduction to the U.S. Health Care System 3 s.h.
Same as 174:102.

06J:160 Staffing Organizations 3 s.h.
Staffing processes, external influences such as labor markets, the legal environment; support activities such as job analysis, employment planning, staffing activities such as internal and external recruiting, selection. Prerequisite: 06J:131.

06J:161 Managing Through Motivation 3 s.h.
Contemporary theories of motivation and their application to performance; role of intrinsic motivation, justice, incentive pay; job design, goals, feedback, social influence, attitudes, creativity. Prerequisite: 06J:130.

06J:162 Leadership and Personal Development 3 s.h.
Practical development and application of leadership and managerial skills to enhance individual and organizational effectiveness. Prerequisite: 06J:130.

06J:165 Business Policy 3 s.h.

06J:168 Topics in Management 3 s.h.
Topics not regularly offered in other courses. Prerequisites: 06J:047 and 06J:048.

06J:171 Strategic Reward Systems 3 s.h.
Role of pay and other rewards on organizational objectives; compensation's impact on employee behavior and performance; mix of pay and benefits in compensation systems; legal environment regulating pay and benefits, nonmonetary forms of reward. Prerequisite: 06J:131.

06J:199 Academic Internship 3 s.h.
Professional internship experience with associated academic content. Repeatable. Prerequisite: consent of department chair.

Primarily for Graduate Students

06J:201 Directed Readings in Management and Organizations 3 s.h.

06J:202 M.A. Research Report 1 s.h.
Prerequisite: nonthesis M.A. enrollment.

06J:205 Contemporary Topics in Management and Organizations 3 s.h.
Ph.D. seminar; research topics in human resources and organizational behavior.

06J:232 Legal Environment of Business 3 s.h.
Laws affecting employers and employees, such as regulatory health and safety policies, unemployment and retirement benefits, and employment discrimination including hiring, termination, testing issues. Prerequisites: 06J:047 and 06J:048.

06J:207 Strategic Human Resource Management 3 s.h.
Contemporary theories of motivation and their application to performance; role of intrinsic motivation, justice, incentive pay; job design, goals, feedback, social influence, attitudes, creativity. Prerequisite: 06J:130.

06J:208 Labor Relations 3 s.h.
Labor relations; theories of collective bargaining, techniques related to negotiations, dispute resolution; emphasis on union-management dynamics. Prerequisite: 06J:131.

06J:209 Collective Bargaining 3 s.h.
Labor relations; theories of collective bargaining, techniques related to negotiations, dispute resolution; emphasis on union-management dynamics. Prerequisite: 06J:131.

06J:210 International Business Environment 3 s.h.
Differences in international and domestic business; cultural, legal, political factors for managers. Prerequisite: junior or higher standing.

06J:211 Nonprofit Organizational Effectiveness I 3 s.h.

06J:212 Nonprofit Organizational Effectiveness II 3 s.h.
Qualities for leadership of nonprofit organizations, including relationships with staff and volunteers; relationship of nonprofit and outside world; marketing, public relations, advocacy strategies for nonprofits. Same as 024:148, 025:177, 032:128, 042:158, 049:176, 096:169.

06J:213 Collective Bargaining 3 s.h.
Labor relations; theories of collective bargaining, techniques related to negotiations, dispute resolution; emphasis on union-management dynamics. Prerequisite: 06J:131.

06J:214 International Business Environment 3 s.h.
Differences in international and domestic business; cultural, legal, political factors for managers. Prerequisite: junior or higher standing.

06J:215 Nonprofit Organizational Effectiveness I 3 s.h.

06J:216 Nonprofit Organizational Effectiveness II 3 s.h.
Qualities for leadership of nonprofit organizations, including relationships with staff and volunteers; relationship of nonprofit and outside world; marketing, public relations, advocacy strategies for nonprofits. Same as 024:148, 025:177, 032:128, 042:158, 049:176, 096:169.

06J:217 Collective Bargaining 3 s.h.
Labor relations; theories of collective bargaining, techniques related to negotiations, dispute resolution; emphasis on union-management dynamics. Prerequisite: 06J:131.

06J:218 International Business Environment 3 s.h.
Differences in international and domestic business; cultural, legal, political factors for managers. Prerequisite: junior or higher standing.

06J:219 Nonprofit Organizational Effectiveness I 3 s.h.

06J:220 Nonprofit Organizational Effectiveness II 3 s.h.
Qualities for leadership of nonprofit organizations, including relationships with staff and volunteers; relationship of nonprofit and outside world; marketing, public relations, advocacy strategies for nonprofits. Same as 024:148, 025:177, 032:128, 042:158, 049:176, 096:169.

06J:221 Collective Bargaining 3 s.h.
Labor relations; theories of collective bargaining, techniques related to negotiations, dispute resolution; emphasis on union-management dynamics. Prerequisite: 06J:131.

06J:222 International Business Environment 3 s.h.
Differences in international and domestic business; cultural, legal, political factors for managers. Prerequisite: junior or higher standing.
06J:235 Maximizing Team Performance 3 s.h.
Current approaches to implementing effective teams within organizations; team selection and formation, group dynamics, facilitation skills, performance and obstacle management.

06J:242 Managing and Preventing Conflict 3 s.h.
Skills for management of high-conflict situations in the workplace and for long-term business success and job satisfaction; experience developing mediation-based skills and communication techniques to prevent and resolve workplace conflicts.

06J:243 Dynamics of Consulting 3 s.h.
Consulting models, trends, processes; characteristics of internal versus external consulting services; integration of behavioral and organizational principles into organizational change programs. Prerequisite: 06N:212.

06J:244 Managing Organizational Performance 3 s.h.
Concepts and practices for effective management, measurement, and improvement of organizational performance; establishing and communicating organizational expectations, the manager as coach and motivator; measurement and methodologies, performance improvement methods. Prerequisite: 06N:212 or management course.

06J:245 Training and Developing Human Resources 3 s.h.
Concepts, practices in training and development; strategic issues affecting the design, implementation, and evaluation of training programs and of career management and organizational development activities. Prerequisite: 06N:212.

06J:246 International Management 3 s.h.
Management issues encountered in international business settings; assessing international politico-economic and sociocultural environments; managing a multicultural workforce; forming international structures and alliances; developing international business strategy.

06J:247 Nonprofit Organizational Effectiveness I 3 s.h.

06J:248 Nonprofit Organizational Effectiveness II 3 s.h.
Qualities for leadership of nonprofit organizations, including relationships with staff and volunteers; relationship of nonprofit and outside world; marketing, public relations, advocacy strategies for nonprofits. Same as 021:265, 024:248, 028:258, 032:226, 042:248, 091:322, 174:248.

06J:252 Collective Bargaining 3 s.h.
Labor relations; theories of collective bargaining, techniques related to negotiations, dispute resolution; emphasis on dynamics of union-management interaction. Prerequisite: 06N:212.

06J:256 Dynamics of Negotiations 3 s.h.
Predictable aspects and dynamics of bargaining experiences; simulations, experiential exercises to foster skills needed for effective negotiation in almost any situation. Prerequisite: M.B.A. enrollment or consent of instructor.

06J:257 Legal Issues in Human Resource Management 3 s.h.
Laws, regulations governing human resource management policies, practices; employee discipline, termination, layoffs, privacy, involvement programs; occupational safety and health; workers' compensation; discrimination. Prerequisite: 06N:212.

06J:260 Staffing Organizations 3 s.h.
Preparation processes, external influences such as labor markets, the legal environment; support activities such as job analysis, employment planning, staffing activities such as internal and external recruiting, selection. Prerequisite: 06N:212.

06J:261 Managing Through Motivation 3 s.h.
Contemporary motivation theories and their application; role of intrinsic motivation, justice, incentive pay, job design, goals, feedback, social influence, attitudes, creativity. Prerequisites: 06N:212 and 06N:227.

06J:262 Leadership and Personal Development 3 s.h.
Major theories; determinants of leader effectiveness; personal and career success; practical development of leadership, managerial skills to enhance individual, organizational effectiveness. Prerequisite: 06N:212.

06J:263 Strategic Management of Change 3 s.h.
How congruence in organizational strategic structure and culture, job design, and employee characteristics produces effective organizations; emphasis on managing organizational change, implementing and working in teams, project management. Prerequisite: 06N:212.

06J:267 Organizational Theory Ph.D. 3 s.h.
Organizational theory; effect of changing environment and technological factors on organizational structure and effectiveness; resource dependency and power; conflict, interorganizational network, population ecology, economic theories of organization, institutional theory.

06J:268 Seminar in Management 3 s.h.
Topics vary.

06J:269 Meta-Analysis in Behavioral and Social Sciences (Ph.D.) 3 s.h.
Methods for quantitative integration of findings in behavioral, social sciences: overall effect size or correlation, whether conflicting findings documented in research literature are due to moderators (interactions) or statistical and measurement artifacts.

06J:270 Research Methods in Management and Organizations (Ph.D.) 3 s.h.
Methods commonly used in behavioral research; critical evaluation of research; research process from idea generation to publication; practice in generating hypotheses, drafting surveys, analyzing data, reviewing manuscripts.

06J:271 Strategic Reward Systems 3 s.h.
Role of pay and other rewards on organizational objectives; compensation’s impact on employee behavior and performance; mix of pay and benefits in compensation systems; legal environment regulating pay and benefits; nonmonetary forms of reward. Prerequisite: 06N:212.

06J:272 Training and Careers (Ph.D.) 3 s.h.
Research-based examination of training and development programs; emphasis on increasing effectiveness of training; trainee and program design, implementation, evaluation; systemic relationships among training, careers; organizational development management.

06J:273 Measurement Theory and Methods in the Behavioral and Social Sciences (Ph.D.) 3 s.h.
Classical measurement theory, methods applied to psychological tests, questionnaires, ratings of work-related and other performances, behaviors; reliability theory and methods, instrument construction and item analysis, criterion construction, validity, combining and weighting instruments, cross-validation. Prerequisite: basic statistical methods course.

06J:274 Staffing Organizations (Ph.D.) 3 s.h.
Aspects of selection, including professional and legal standards, job analysis techniques, validation strategies, criterion development, selection techniques (e.g., psychological tests, interviews, biographical data, assessment centers), ethical issues.

06J:275 Group Processes and Conflict (Ph.D.) 3 s.h.
Understanding and implementing work groups in organizations; social influence and group processes, including communications, conflict, intergroup relations.

Management Sciences

Chair: Kurt M. Anstreicher
Professors: Kurt M. Anstreicher (Henry B. Tippie Research Professor of Management Sciences), Warren J. Boe, Gary C. Fetkbe (Leonard A. Hadley Professor of Leadership), Raj Jagannathan, Philip C. Jones (Clement T. and Sylvia H. Hanson Chair in Manufacturing Productivity), Johannes Ledolter (C. Maxwell Stanley Professor), Padmini Srinivasan
Professor emeritus: Colin E. Bell
Associate professors: Renato E. de Matta, W. Nick Street
Associate professor emerita: Eleanor M. Birch
Assistant professors: Shannon Bradshaw, Samuel Burer, Ann M. Campbell, Faiz Currim, Jeffrey W. Ohlmann, Barrett Thomas
Undergraduate degree: B.B.A. in Management Information Systems
Graduate degrees: M.B.A.; Ph.D. in Business Administration
Web site: http://www.biz.uiowa.edu/mansci

Undergraduate Program

The Department of Management Sciences offers a variety of educational experiences that develop students’ knowledge of managerial decision-making systems. Students acquire skill in applying this knowledge by constructing quantitative models, using computer technology, and creating database systems.

Students prepare for a variety of career opportunities in both manufacturing and service organizations. Graduates find entry-level work as computer programmers, systems analysts, sales representatives with computer companies, and management trainees. Entry-level work in operations management is found in materials management, line supervision, purchasing, and manufacturing systems.

Bachelor of Business Administration

The Bachelor of Business Administration in management information systems requires 22 s.h. in the major, as follows.

- 06K:126 Visual Basic Programming 3 s.h.
- 06K:176 Managerial Decision Models 3 s.h.
- 06K:182 Applications Database Management Systems 3 s.h.
- 06K:183 Systems Analysis and Design 3 s.h.
- 06K:184 Introduction to Data Communications 3 s.h.
- 22C:016 Computer Science I 4 s.h.
- One additional course from approved list of management sciences courses 3 s.h.

Graduate Programs

The Department of Management Sciences offers the Doctor of Philosophy in business administration. Ph.D. requirements are described under “Interdepartmental Graduate Programs” in the Tippie College of Business section of the Catalog and on the Department of Management Sciences web site.

The Master of Arts in business administration is a nonthesis degree awarded only to students who begin the Ph.D. program and decide not to continue. Incoming students may not elect to pursue the M.A.

For information about the M.B.A., contact the Tippie School of Management.

Courses

Primarily for Undergraduates

- 06K:070 Computer Analysis 3 s.h.
The computer and its uses in organization operation, management; computer systems terminology, programming, management information systems, use of applications software.

For Undergraduate and Graduate Students

- 06K:100 Operations Management 3 s.h.
Strategic, tactical, operational issues that arise in management of production and service operations; product and process design, facilities planning, quality management, materials management, operations planning and scheduling, emerging technologies in production and service management. Prerequisite: junior standing. Pre- or corequisite: 06K:070.
Prerequisite: consent of instructor.
- 06K:102 Management Science Topics arr.
Special topics in management information systems. Prerequisite: junior standing.
- 06K:103 Introduction to PC Hardware 1 s.h.
Basic hardware that makes up a PC, how each component relates to the other. Prerequisite: management information systems major.
06K:126 Visual Basic Programming 3 s.h.

06K:128 Web and Multimedia 3 s.h.
How multimedia tech is accomplished; tools used with each tech and modifications needed to function efficiently on the web; projects culminating in a web site.

06K:134 Information and Knowledge Management 3 s.h.
Methods to determine where the ability to capture and reuse organizational knowledge will prove most profitable to companies; how to design processes and technologies to use this information.

06K:176 Managerial Decision Models 3 s.h.
Mathematical programming, including linear, nonlinear, dynamic programming, with applications in economics, management; classical optimization techniques, transportation, network flow problems. Prerequisite: 06K:070.

06K:180 Applied Information Systems 3 s.h.
Application of computer technology to accounting and transaction processing systems; information systems infrastructure and trends; problem solving with microcomputer spreadsheets, database; accounting cycle operations using accounting software. Prerequisites: 06K:001, 06K:002, 06K:071, and 06K:070.

06K:182 Applications Database Management Systems 3 s.h.
Design, implementation of a database using relational DBMS; emphasis on issues of logical and physical design, database administration, concurrency control, maintenance. Prerequisite: 06K:070.

06K:1B3 Systems Analysis and Design 3 s.h.
Design, implementation of an information system; student projects in determination of information needs, system design, information plan development; construction of prototype information system. Prerequisite: B.B.A. senior standing. Corequisite: 06K:182 or consent of instructor.

06K:184 Introduction to Data Communications 3 s.h.
Computer communications: computer-communication system, hardware, data transmission principles; examples of existing communication networks; related managerial issues. Prerequisites: 06K:070 and B.B.A. senior standing.

06K:185 Software Development Project 3 s.h.
Development of a system using techniques from previous courses; project planning, user expectations, sys architecture and design, quality management; presentation of results. Prerequisite: 06K:182.

06K:186 Database Management II 3 s.h.
Advanced conceptual and logical design, in-depth SQL, DB administration, concurrency control, web database access; theory and practice. Prerequisite: 06K:182 or equivalent.

06K:189 E-Commerce Technology 3 s.h.
Technical tools for building e-commerce web sites; Dot Net versions of active server pages, VB, CF; student project to build prototype of an e-commerce site. Prerequisite: 06K:070.

06K:190 Network Design and Performance 3 s.h.
Computer software as central to the study of network facilities selection, performance metrics, skill development through work with the telecommunications hierarchy's layered structure. Prerequisite: 06K:184.

06K:191 Business Consulting 3 s.h.
Organizational consulting; emphasis on integration of strategy, business processes, technology, and change management through case-based learning techniques; proposal simulation. Prerequisite: 06K:070.

06K:192 Intelligent Systems with Data Mining 3 s.h.

06K:199 Academic Internship arr.
Professional internship experience with associated academic content. Repeatable. Prerequisite: consent of department chair.

**Primarily for Graduate Students**

06K:201 Directed Readings arr.
Prerequisite: consent of instructor.

06K:202 M.A. Research Report 1 s.h.
Prerequisite: nonthesis M.A. enrollment and consent of instructor.

06K:217 Data and Decisions II 3 s.h.
Advanced quantitative analysis techniques with management applications; multiple regression, time series, monte-carlo simulation, and linear, nonlinear, and discrete optimization; emphasis on spreadsheet-based modeling. Prerequisite: 06K:216 or consent of instructor.

06K:220 Introduction to Information Systems 3 s.h.
Effective ways for business firms to harness the power of information technology for strategic purposes; conventional and emerging architectures of information systems; integrated perspective on structural relationships among IT components; emphasis on case studies.

06K:223 Management of E-Commerce Systems 3 s.h.

06K:225 Health Informatics I 3 s.h.
Technological tools that support health care administration, management, and decision making. Prerequisite: graduate standing or consent of instructor. Same as 051:275, 056:283, 051:187, 056:186, 074:191, 096:263, 174:226.

06K:226 Visual Basic Programming 3 s.h.

06K:227 Introduction to Modeling with VBA 3 s.h.
Introduction to programming Visual Basic for Applications in Excel; case studies in finance, marketing, operations, accounting. Prerequisite: 06K:216.

06K:228 Web and Multimedia 3 s.h.
How multimedia tech is accomplished; tools used with each tech and modifications for efficient function on the web; projects culminating in a web site. Prerequisite: 06K:070.

06K:230 Database Systems 3 s.h.
Theories and methodologies for semantic, logical, and physical database design; entity/relationship diagrams and their mapping to database schemas; normalization; languages for relational database systems, including relational algebra, Structured Query Language, query by example; query optimization and index selection; database and view creation; query and update processing; form and report design; practice with commercial DBMS products; integrity, security, concurrency control, transaction recovery.

06K:233 Text Retrieval 3 s.h.
Theories and models for automatic text representation and retrieval using large text databases; methods for evaluating retrieval algorithms; alternative query models—Boolean, extended Boolean, probabilistic, vector, fuzzy and rough set models; vocabulary normalization; architecture of World Wide Web search engines and metadata. Prerequisite: 06K:230. Same as 021:230.
06K:234 Information and Knowledge Management 3 s.h.
Methods to determine where the ability to capture and reuse organizational knowledge will prove most profitable to companies; how to design processes and technologies to use this information. Same as 021:234.

06K:238 Data Mining and Marketing 3 s.h.
Data mining and knowledge discovery as applied to marketing, with emphasis on customer relationship management; predictive modeling, data reduction, association rules.

06K:250 Computer Networks 3 s.h.
Software engineering paradigms, software project planning and risk analysis, software analysis/design methodologies, software quality assurance/testing, software configuration management, computer-aided software engineering tools useful for business applications, group project. Prerequisites: 06K:220 and 06K:226. Same as 021:232.

06K:272 Advanced Database Analysis 3 s.h.
Advanced topics in database management systems.

06K:273 Computer Networks and Intelligent System 3 s.h.

06K:274 Advanced E-Commerce and Data Security 3 s.h.
E-commerce topics, including data security that encompasses web server and database server security considerations.

06K:275 Knowledge Discovery 3 s.h.
Knowledge discovery process, including data reduction, cleaning, transformation; advanced modeling techniques from classification, prediction, clustering, association; evaluation and integration.

06K:277 Management Sciences Topics 3 s.h.
Prerequisite: consent of instructor.

06K:278 Web Mining 3 s.h.
Techniques for mining the web and other unstructured or semistructured, hypertextual, distributed information repositories; crawling, indexing, ranking, filtering algorithms.

06K:284 Operations Strategy 3 s.h.
A firm's strategic use of operations for competitive advantage through decisions on facility size, degree of vertical integration, process technology selection, proper approach to quality, productivity, and technology.

06K:285 Project Management 3 s.h.
Preparation for managing projects and project portfolios; project selection, project planning and budgeting, scheduling, resource allocation, project control; integration of project planning tools, including project management software.

06K:286 Linear Programming 3 s.h.
Mathematical programming models; linear and integer programming, transportation models, large-scale linear programming, network flow models, convex separable programming. Prerequisites: calculus and linear algebra courses. Same as 056:270.

06K:287 Discrete Optimization 3 s.h.
Introduction to modeling and solving discrete optimization problems; integer programming, network flows, dynamic programming. Prerequisite: 06K:286 or consent of instructor.

06K:289 E-Commerce Technology 3 s.h.
Technical tools for building e-commerce web sites; Dot Net versions of active server pages, VB, C#, student project to build prototype of an e-commerce site.

06K:290 Thesis in Management Sciences arr.
Prerequisites: Ph.D. enrollment and consent of instructor.

06K:292 Supply Chain Management 3 s.h.
Design, operation, and management of a supply chain; supplier and customer contracting and partnering, inventory, transportation and logistics. Prerequisite: 06N:229.

06K:294 Rapid Continuous Improvement 3 s.h.
Hands-on experience working on rapid continuous improvement (RCI) teams sponsored by industrial affiliates of the business college involved in using RCI. Offered spring break. Prerequisite: consent of instructor.

06K:296 Service OM 3 s.h.
Major issues which represent great challenges for managers of service operations in the pure service sector (e.g., legal, banking, travel and tourism, health care, etc.).

06K:297 Research Seminar in Management Sciences 0 s.h.
Current research topics. Prerequisite: Ph.D. enrollment or consent of instructor.

06K:299 Special Topics in Management Sciences arr.
Prerequisite: consent of instructor.
Chair: Catherine A. Cole
Professors: Catherine A. Cole, Gary J. Gaeth (Cedar Rapids Area Business Chair), Irwin P. Levin, Peter C. Riese, Gary L. Russell, Randall L. Schultz, Doyle L. Weiss
Professor emerita: Carol C. Fethke
Associate professors: Thomas S. Gruca, John P. Murry
Associate professor emeritus: E. John Kottman
Assistant professors: Sri Devi Deepak, Dhananjay Nayakankuppam, Lopo L. Rego, Jing (Alice) Wang
Lecturer: David E. Collins

Undergraduate degree: B.B.A. in Marketing
Graduate degrees: M.B.A.; Ph.D. in Business Administration
Web site: http://www.biz.uiowa.edu/mrktg

Undergraduate Program

The Department of Marketing offers courses that help undergraduate students understand the business, social, and economic roles of marketing and prepare them for marketing careers.

Several decades ago, the study of marketing dealt almost exclusively with business activities involved in the flow of goods from production to consumption. Today it includes principles that are more widely applicable; they are as relevant to the success of arts, sports, and social programs as they are to firms selling goods and services. A major in marketing includes study in the behavioral sciences, communications, statistical analysis, and computer methods as well as marketing decision making.

Graduates find employment opportunities as market analysts, merchandise managers, buyers, purchasing agents, advertising managers, brand managers, and sales representatives in a variety of profit and nonprofit organizations.

Bachelor of Business Administration

The Bachelor of Business Administration in marketing requires 15-19 s.h. in the major, as follows.

At least two, but no more than three, of these:

06M:105 Web Business Strategy 3 s.h.
06M:107 Retailing Strategies 3 s.h.
06M:125 Direct Marketing Strategies 3 s.h.
06M:137 Advertising Theory 3 s.h.
06M:139 Sales Management 3 s.h.
06M:151 International Marketing 3 s.h.
06M:190 Topics in Marketing 3 s.h.

Graduate Programs

The Department of Marketing offers the Doctor of Philosophy in business administration. Ph.D. requirements are described under “Interdepartmental Graduate Programs” in the Tippie College of Business section of the Catalog and on the Department of Marketing web site.

The Master of Arts in business administration is a nonthesis degree awarded only to students who begin the Ph.D. program and decide not to continue. Incoming students may not elect to pursue the M.A.

For information about the M.B.A., contact the Tippie School of Management.

Courses

Primarily for Upper-Division Undergraduates

06M:100 Introduction to Marketing Strategy 3 s.h.
Philosophy and activities of marketing; marketing environment of an organization; strategies with respect to marketing decisions, buyer behavior; spreadsheet analysis of marketing problems. Prerequisite: 06E:001 and junior standing.

For Undergraduate and Graduate Students

06M:101 Directed Readings in Marketing arr.
Prerequisite: consent of instructor.

06M:105 Web Business Strategy 3 s.h.
Introduction to World Wide Web business and marketing concepts, methods, and applications associated with doing business on the web; web page construction and design; case studies and/or entrepreneurial projects. Prerequisite: 06M:100.

06M:107 Retailing Strategies 3 s.h.
Strategies for retail site selection, store design, supply chain management, customer relationship management/customer service, merchandising management strategies for planning merchandise assortments, buying systems, buying merchandise, pricing, promotion. Prerequisite: 06M:100.
Primarily for Graduate Students

06M:125 Direct Marketing Strategies 3 s.h.
Principles and processes of direct and database marketing; insight into the requirements for building a customer-based marketing strategy. Prerequisite: 06M:100.

06M:134 Marketing Research 3 s.h.
Marketing, research methods; role of marketing research information as a tool in marketing decision making. Prerequisites: 06E:071 and 06M:100.

06M:135 Consumer Behavior 3 s.h.
Behavioral and social aspects of marketing; research methods and findings from behavioral sciences, their relation to production, consumption, and marketing of products, services. Prerequisite: 06M:100.

06M:137 Advertising Theory 3 s.h.
Advertising as a promotional force; emphasis on theory, planning, resulting strategic and tactical decisions made by advertising executives. Prerequisite: 06M:100.

06M:139 Sales Management 3 s.h.
Personal selling, management of sales force, emphasis on recruitment, selection, training of sales representatives; problems in allocation of sales effort, supervision, control. Prerequisite: 06M:100.

06M:147 Marketing Management 3 s.h.
Marketing problems of organizations; emphasis on marketing manager's role in developing, presenting goal-oriented marketing strategies; application of marketing concepts to real business situations. Prerequisites: 06M:100, 06M:134, and 06M:135, a marketing elective numbered above 100, and senior standing.

06M:151 International Marketing 3 s.h.
Differences in global environment: how cultural considerations, political, legal, and economic conditions affect market entry strategies and marketing mix decisions; development of marketing plans for non-U.S. environments. Prerequisite: 06M:100.

06M:190 Topics in Marketing 3 s.h.
Topics not regularly offered in other courses. Prerequisites: 06M:100 and consent of instructor.

06M:199 Academic Internship arr.
Professional internship experience with associated academic content. Repeatable. Prerequisite: consent of department chair.

06M:229 Customer Relationship Management 3 s.h.
Analytical approaches to customer relationship management; issues, techniques and terminology associated with database marketing and data mining; analysis of customer databases; assessing lifetime valuation (LTV) of customers, identifying "high potential" customers, estimating return on marketing investment, building predictive models to estimate the probability of response to a marketing campaign. Prerequisite: 06N:211.

06M:230 Marketing Research Methods 3 s.h.
Managerial applications of marketing research techniques, including methods of design, analysis, interpretation of marketing research studies; assessing value of information, sampling, sources of bias, instrument construction, interpretation of scanner data, geodemographic data, applications of integrated research systems. Prerequisites: 06N:211 and 06N:216.

06M:231 Business to Business Marketing 3 s.h.
Industrial buyer behavior, buyer-seller relationships, interactive product policy and market segmentation, distribution and selling systems, skill development in market strategy formulation for industrial products and services, and in solving problems and making decisions about industrial marketing. Prerequisite: 06M:211.

06M:232 Buyer Behavior 3 s.h.
Behavior of consumers and industrial buyers; research methods and findings from behavioral sciences applied to production, consumption, and marketing of products, services; application of consumer behavior concepts to managerial decision making. Prerequisite: 06M:211.

06M:233 Service Marketing 3 s.h.
Production, consumption, and marketing of services; solutions to problems faced by service managers; development of an organizational marketing system for delivery of quality service. Prerequisite: 06M:211.

06M:234 Product Management 3 s.h.
Techniques of new product development; idea generation, concept screening, product design, market testing, forecasting, brand management strategies within the firm. Prerequisites: 06N:211 and 06N:216.

06M:235 International Marketing 3 s.h.
Domestic versus international perspective; identification and evaluation of opportunities and risks in non-U.S. markets; research problems in global markets; effects of international organizations, foreign exchange, macroeconomic policies, local law, and cultural differences on consumer behavior and marketing decisions; multinational versus global marketing strategies (entry, product adaptation, channel logistics, pricing, promotion); emphasis on practical applications. Prerequisite: 06N:211.

06M:236 Advertising and Promotion Strategy 3 s.h.
Marketing communications as dialogue between producers and consumers, how promotional mix evolves; emphasis on advertising, sales promotion, branding. Prerequisite: 06M:211.

06M:237 Field Studies in Marketing 3 s.h.
Experience in planning, designing, carrying out, reporting on a marketing research project for a profit or nonprofit client organization; communication with managers, application of marketing research, meeting deadlines, converting research findings into action recommendations for management. Repeatable. Prerequisites: 06N:211 and 06N:216. Recommended: 06M:230.

06M:238 Contemporary Topics in Marketing 3 s.h.
Topics not regularly offered in other courses. Prerequisites: 06N:211 and graduate standing.

Tippie School of Management—M.B.A. Program

Associate dean: Gary J. Gaeth
Graduate degree: M.B.A.
Web site: http://www.biz.uiowa.edu/mba

The Henry B. Tippie School of Management offers a Master of Business Administration (M.B.A.) program that provides students with a foundation for future growth and flexibility in professional management. The program, which is fully accredited by AACSB—the Association to Advance Collegiate Schools of Business, enables students to build broad-based personal portfolios of analytical skills, knowledge, leadership, and professional experience. The curriculum is rigorous, yet learning takes place in a collaborative environment that builds teamwork skills and encourages independent problem solving.

Students in the Tippie M.B.A. program come from every region of the United States and from countries worldwide. They represent a variety of backgrounds, undergraduate majors, and professional experience. The curriculum is designed for college graduates in any field; previous business course work is not required. However, full-time work experience is required for admission. Contact the Tippie School of Management for a brochure listing complete program requirements.

Full-Time, On-Campus M.B.A.

The full-time, on-campus M.B.A. program requires 60 s.h., including a minimum of 12 s.h. in a concentration area. Students may transfer up to 9 s.h. from another AACSB-accredited institution.

Full-Time M.B.A. Study Plan

First Semester
- 06N:199 M.B.A. Competitive Prep 1 s.h.
- 06N:201 Tippie M.B.A. Leadership Series 2 s.h.
- 06N:211 Marketing Management 3 s.h.
- 06N:215 Corporate Financial Reporting 3 s.h.
- 06N:216 Data and Decisions 3 s.h.
- 06N:225 Managerial Finance 3 s.h.

Second Semester
- 06N:212 Management in Organizations 3 s.h.
- 06N:213 Managerial Economics 2 s.h.
- 06N:229 Operations Management 3 s.h.

06N:230 Seminar in Strategic Management I 1 s.h.
Concentrations/Electives 6 s.h.

Third Semester
- 06N:228 International Economic Environment of the Firm 2 s.h.
- 06N:240 Strategic Management and Policy 3 s.h.
Concentrations/Electives 9 s.h.

Fourth Semester
- 06N:231 Seminar in Strategic Management II 1 s.h.
Concentrations/Electives 15 s.h.

CONCENTRATION OPTIONS
During their first year in the program, M.B.A. students choose an individual concentration area which consists of at least 12 s.h. in a specific discipline. Primary concentration areas include corporate finance, accounting, marketing, brand and category management, investments, strategic management and consulting, organizational performance, and operations management. Specialty concentrations include entrepreneurship, management information systems, nonprofit management, and international business. Individual students may develop their own concentration area, subject to approval by the Tippie School of Management.

ELECTIVES
Each student chooses 18 s.h. of graduate-level electives, in addition to their concentration course work; up to 6 s.h. may be earned in nonbusiness electives. Students must have prior approval to take courses outside the Tippie School of Management.

Admission
Applicants to the M.B.A. program must submit a complete application file, including the following:

- a completed Tippie School of Management application form and fee;
- official transcripts of all undergraduate and graduate course work, which must be submitted to the Office of Admissions by each institution attended;
official Graduate Management Admission Test (GMAT) scores; the completed supplemental application form with essay responses, and a résumé and cover letter; and three recommendations from employers or former instructors. Applicants whose first language is not English must score at least 600 (paper-based) or at least 250 (computer-based) on the Test of English as a Foreign Language (TOEFL). For TOEFL registration information, contact the University of Iowa Office of Admissions.

APPLICATION DEADLINES
The full-time, on-campus M.B.A. program admits students only for fall entry. Application deadlines are as follows.

International applicants: April 15
U.S. citizens and permanent residents (priority deadline): April 15
U.S. citizens and permanent residents: July 1
Applications received after April 15 are considered on a space-available basis.

M.B.A. for Professionals and Managers
The M.B.A.-P.M. program requires 45 s.h., including a business core of 10 courses, which develops competency in general management skills and key functional business areas, and five business electives. The elective courses, which contribute to the development of an area of expertise and foster a deeper understanding of management and business practices, are offered in marketing, finance, and management, with a smaller number offered in management information systems/operations management, accounting, and entrepreneurship. Students earn the M.B.A. in three years by completing two courses each fall and each spring semester and one course during the summer. There is some flexibility in course sequence and length of time allowed to complete the program. Following is a sample study plan.

FIRST YEAR
06N:211 Marketing Management 3 s.h.
06N:212 Management in Organizations 3 s.h.
06N:215 Corporate Financial Reporting 3 s.h.
06N:216 Data and Decisions 3 s.h.
Business elective (summer session) 3 s.h.

SECOND YEAR
06N:213 Managerial Economics 3 s.h.
06N:225 Managerial Finance 3 s.h.
06N:227 Human Resource Management 3 s.h.
06N:229 Operations Management 3 s.h.
Business elective (summer session) 3 s.h.

THIRD YEAR
06N:228 International Economic Environment of the Firm 3 s.h.
06N:240 Strategic Management and Policy 3 s.h.
Business electives 6 s.h.
Business elective (summer session) 3 s.h.

Admission
The M.B.A.-P.M. program admits students for fall or spring entry; applications are accepted throughout the year. Admission decisions are based on the quality of work experience, undergraduate grade-point average, GMAT score, letters of reference, and completed application materials. Applicants should have a minimum of three years of postbaccalaureate professional work experience before admission.

APPLICATION DEADLINES
Applicants who meet the priority deadlines are assured of an admission decision before the
registration period for admitted students; those admitted to the program receive student registration priority. The University must receive GMAT scores by the following application deadlines.

Priority deadline for fall (August): June 1
Final deadline for fall (August): July 15
Priority deadline for spring (January): November 1
Final deadline for spring (January): December 15

Enrollment in Courses Before Formal Admission

With permission, individuals not yet admitted to the program may enroll in M.B.A.-P.M. courses over three semesters within a 12-month period, for a maximum of 9 s.h. One of the three courses must include 06N:215 Corporate Financial Reporting or 06N:216 Data and Decisions. Credit is applied to the degree once the applicant is admitted to the program. Individuals who request their first registration in an M.B.A. course must first submit their résumé to the Tippie School of Management for approval. To be considered for non-admitted status, applicants should have at least one-and-a-half years of postbaccalaureate professional work experience.

Executive M.B.A. Program

The Executive M.B.A. program leads to the Master of Business Administration. Admission is limited to experienced executives who want to broaden their management skills without interrupting their professional careers. Applicants should have at least 10 years of postgraduate managerial experience. Previous academic work in business is not required.

Course work is presented over 21 months. The program begins in mid-August with a five-day residency in Iowa City, followed by classes one day each week on alternating Fridays and Saturdays. Each entering class progresses through the program as a group.

Classes for the Executive Engineer Dual Master’s Degree Program are held at the Cedar Rapids Area Education and Conference Center. Classes for the Iowa City Executive M.B.A. Program are held in the Pomerantz Center. The Tippie School of Management also offers the Executive M.B.A. Program to students in Hong Kong.

Executive M.B.A. Study Plan

Degree requirements include two 5-day residency periods (one at the beginning of each academic year), an international business seminar (7-10 days during spring semester of the second year), 14 core courses, and two electives selected and taken by all members of the class.

FIRST YEAR
06N:211 Marketing Management 3 s.h.
06N:212 Management in Organizations 3 s.h.
06N:213 Managerial Economics 1-3 s.h.
06N:215 Corporate Financial Reporting 3 s.h.
06N:216 Data and Decisions 3 s.h.
06N:225 Managerial Finance 3 s.h.
06N:227 Human Resource Management 2-3 s.h.
06N:228 International Economic Environment of the Firm 1-3 s.h.
06N:230 Seminar in Strategic Management I 1-3 s.h.

SECOND YEAR
06A:235 Managerial Accounting 3 s.h.
06A:245 Financial Information and Capital Markets 3 s.h.
06F:215 Corporate Finance 3 s.h.
06N:210 Advanced Models for Decision Support 3 s.h.
06N:229 Operations Management 3 s.h.
06N:231 Seminar in Strategic Management II 3 s.h.
06N:235 Seminar in International Business 0-3 s.h.
06N:240 Strategic Management and Policy 3 s.h.
Business electives 6 s.h.

International Executive M.B.A. Study Plan

06A:235 Managerial Accounting 3 s.h.
06N:211 Marketing Management 3 s.h.
06N:212 Management in Organizations 3 s.h.
06N:213 Managerial Economics 3 s.h.
06N:215 Corporate Financial Reporting 3 s.h.
06N:216 Data and Decisions 3 s.h.
06N:225 Managerial Finance 3 s.h.
06N:228 International Economic Environment of the Firm 3 s.h.
06N:229 Operations Management 3 s.h.
06N:240 Strategic Management and Policy 3 s.h.
Business electives 15 s.h.
Joint Degree Programs

Joint degree programs allow students to pursue two degrees concurrently, earning both more quickly than if they pursued each degree separately. The Tippie School of Management collaborates with several other University of Iowa academic units to offer joint degrees: an M.B.A./J.D. with the College of Law; an M.B.A./M.A. with the School of Library and Information Science (Graduate College); an M.D./M.B.A. with the Carver College of Medicine; an M.B.A./M.S.N. with the College of Nursing; and an M.B.A./M.H.A. with the College of Public Health.

Separate application to each college is required. Applicants must be admitted to both colleges before they can be admitted to the joint degree program.

Accelerated Professional Track

Highly qualified undergraduate students in the College of Liberal Arts and Sciences, the College of Engineering, or the Tippie College of Business may be admitted to the Accelerated Professional Track (APT) program. These students begin taking M.B.A. core courses as electives in their undergraduate program so they can earn a bachelor's degree and an M.B.A. more quickly than if they pursued each degree separately. APT students must complete an internship while in the program.

To enter the APT program, students must complete 90 s.h. of undergraduate study, have a g.p.a. of at least 3.50, have clearly defined career goals, and indicate their intent to pursue both degree programs on a full-time basis. Students also must have a professional background similar to that of students enrolled in the M.B.A. program.

Courses

See the course lists for individual departments for descriptions of M.B.A. electives.

06N:000 M.B.A. Internship 0 s.h.
Prerequisite: consent of Tippie School of Management.

06N:199 M.B.A. Competitive Prep 1 s.h.
Professional development, career strategies for successful competition in the M.B.A. marketplace. Prerequisite: consent of M.B.A. program associate.

06N:200 Directed Readings—M.B.A. 1-3 s.h.
Prerequisite: consent of associate dean for graduate programs.

06N:201 Tippie M.B.A. Leadership Series 0-3 s.h.
Seminars in developmental areas of leadership, including communications, social responsibility, and personal development. Prerequisite: graduate standing.

06N:210 Advanced Models for Decision Support 3 s.h.
Quantitative techniques in decision making, including identifying controllable decision variables, setting decision objectives, defining choice-limiting constraints, developing computer solutions in contemporary business. Prerequisite: 06N:216.

06N:211 Marketing Management 3 s.h.
Concepts, principles, models of marketing management; focus on strategic planning, management decision making, and implementation of marketing programs. Prerequisite: graduate standing.

06N:212 Management in Organizations 3 s.h.
How to explain, predict, and influence behavior in organizations; decision making, leadership, communication, group skills in management positions; motivation, leadership, teams, organizational culture, organizational design, individual differences, organizational change. Prerequisite: graduate standing.

06N:213 Managerial Economics 1-3 s.h.
Models of consumer and firm behavior with applications; market equilibrium and structure; pricing decisions. Prerequisite: graduate standing.

06N:215 Corporate Financial Reporting 3 s.h.
Contemporary financial reporting practices in the United States; how alternative accounting treatments affect the usefulness of financial information in applied decision settings. Prerequisite: graduate standing.

06N:216 Data and Decisions 3 s.h.
Quantitative modeling techniques and statistical analysis for management decision making; use of Excel for spreadsheet analysis; decision analysis, statistical inference, regression, linear programming, probability. Prerequisite: graduate standing.

06N:217 Ethics 1-2 s.h.

06N:225 Managerial Finance 3 s.h.
Time value of money, applications of present value techniques; stock and bond valuation, capital budgeting, cost of capital, capital conversion, portfolio formation and efficient market analysis, financial statement analysis, pro forma analysis, hedging financial risks. Pre- or corequisite: 06N:215.

06N:227 Human Resource Management 2-3 s.h.
Systematic approach to managing human resources through practices consistent with validated theories and empirical research, human resources practices and business strategies, human resources strategy, recruitment and selection, training and development, employment law, international human resources, career management, compensation. Prerequisite: graduate standing.

06N:228 International Economic Environment of the Firm 1-3 s.h.
Basic determinants of aggregate output, employment, wages, unemployment, consumption, investment, international trade flows, interest rates, exchange rates, prices and inflation in open economies; sources and nature of economic growth; effects of domestic and foreign monetary, fiscal policies; effects of trade, exchange rate policies. Prerequisite: 06N:213 or consent of instructor.

06N:229 Operations Management 3 s.h.
Planning and decision making activities for managing an organization's operations; trade-offs associated with operations management decisions, tools and techniques for helping operations managers implement decisions, reach goals, production and service delivery strategy, capacity planning, product and process design, total quality management, demand management,
production and service planning, scheduling, materials control, emerging production and service technologies. Prerequisite: 06N:216.

06N:230 Seminar in Strategic Management I 1-3 s.h.
Introduction to strategic management; the role of marketing, operations, and finance in strategic planning; case studies. Prerequisite: graduate standing.

06N:231 Seminar in Strategic Management II 1-3 s.h.
Strategic management integrating all aspects of business; computer simulation, lectures, case studies, readings.

06N:235 Seminar in International Business 0-6 s.h.
Issues and challenges facing organizations doing business in international markets: social, economic, political factors, business policies and customs in the global environment; may include travel, study abroad. Repeatable. Prerequisite: M.B.A. enrollment.

06N:240 Strategic Management and Policy 3 s.h.
Firm’s competitive strategy from a manager’s perspective; key strategic frameworks; integration of concepts learned throughout M.B.A. program, previous work experience. Prerequisites: 06N:211, 06N:215, 06N:225, and 06N:229.

The College of Dentistry is an integral part of The University of Iowa and its Health Sciences Campus. Its mission, which embraces the University's academic values as well as the ethical responsibilities implicit in educating future members of a profession, rests on a foundation representing every aspect of collegiate activity: education of students as general practitioners and specialists; research into all aspects of oral and dental disease and the delivery of health care; and service to the community, the state, and the profession.

Faculty members, predoctoral students, and specialty residents provide oral health care to patients at clinics in the Dental Science Building, the Center for Disabilities and Development, and dentistry clinics at University of Iowa Hospitals and Clinics and Veterans Affairs Iowa City Health Care System. Faculty, staff, and students participate in interdisciplinary research and training activities involving the University's five health science colleges as well as other University colleges and departments.

Dentistry at The University of Iowa began in 1882 as a single department. In 1900 the University underwent general reorganization and the Dental Department became the College of Dentistry. In the 19th century, dentistry was taught at several locations in Iowa, but today the college is Iowa's only provider of dental education and ranks as a leader in dental education nationwide.

The college and its educational programs are accredited by the Commission on Dental Accreditation of the American Dental Association, an independent tripartite commission authorized and recognized by the Commission on Post-Secondary Education.

Programs offered by the college cover the full spectrum of dentistry and closely integrated fields. They include the Bachelor of Science in oral health science, a degree completion program for individuals holding an A.A.S. degree in dental hygiene; the Doctor of Dental Surgery program (D.D.S.), which准备 general dentists; advanced education programs in all dental
specialties, each of which may lead to certification in a dental specialty; several advanced education programs in other areas of dentistry, including the oral science program, which offers M.S. and Ph.D. degrees; post-D.D.S. residency programs in general and hospital-based dentistry; and a wide variety of continuing education programs for the dental and allied professions.

Predoctoral Program

Doctor of Dental Surgery

The basic program leading to the Doctor of Dental Surgery (D.D.S.) consists of a minimum of three years of preprofessional study and four years of study in the College of Dentistry.

Course work during the first and second years of study integrates the basic sciences with preclinical and clinical disciplines. The basic sciences include gross anatomy, biochemistry, general histology, immunology, microbiology, pathology, pharmacology, and physiology. Students also study topics specific to dentistry, such as principles of occlusion, anesthesia and pain control, operative dentistry, facial growth and development, cariology, and preventive dentistry. During the latter part of the first year, students are introduced to their first clinical patient-treatment situation.

The second-year program continues the study of basic sciences and preclinical courses, with additional patient treatment experiences in restorative and preventive dentistry.

Third-year dental students rotate through a series of clerkships that expose them to seven clinical disciplines.

Fourth-year dental students deliver comprehensive dental care in conditions that closely approximate those in private dental practice. They also are exposed to various community dentistry health programs that include hospitals, mental health institutes, nursing homes, and the Special Care Clinic. They may participate in the Colorado Migrant Worker Program or the Foreign Dental School Exchange Program. The community dentistry programs provide exposure to facets of dentistry usually not observable in an academic setting.

Basic Sciences in the Dental Curriculum

The following science courses are offered by departments in colleges other than dentistry and are a required part of the dental curriculum.

- 060:101 Human Gross Anatomy for Dental Students
- 060:112 General Histology for Dental Students
- 069:133 Introduction to Human Pathology
- 071:111 Pharmacology for Dental Students
- 072:152 Human Physiology for Dental Students
- 099:161 Biochemistry for Dental Students

College of Dentistry courses are listed under "Nondepartmental Courses" at the end of this section.

Combined Liberal Arts and Sciences/Dentistry Program

Students who are enrolled in a baccalaureate program at The University of Iowa may be allowed to use course work from their first year of dentistry to complete their elective semester-hour requirement toward the bachelor's degree.

The provision for acceptance by the College of Liberal Arts and Sciences of 30 s.h. of elective credit earned in any other college of the University allows College of Dentistry students to obtain a bachelor's degree from the College of Liberal Arts and Sciences after successfully completing the freshman year in dentistry. To take advantage of this plan, students must fulfill all specific requirements for the bachelor's degree, including the General Education Program requirements and the requirements for a major. Students also must satisfy the College of Liberal Arts and Sciences residence requirement before enrolling in the College of Dentistry. Contact the College of Liberal Arts and Sciences for more information.

Academic Procedures

Promotions, Graduation

Student promotions and graduation are determined by the collegiate academic and professional performance committee, which is
made up of individuals appointed by the dean from the basic, preclinical, and clinical sciences and from other academic areas of the college. The performance committee may recommend to the dean that a student withdraw from the college or repeat specific courses when the student is deemed generally unprepared to be promoted or to enter the dental profession.

Committee for Appeals

When a student has been asked to withdraw from the college or wants special consideration of problems concerning promotion or graduation, he or she may appeal to the dean. All appeals are heard by an ad hoc committee appointed by the dean. The ad hoc committee investigates new information that has not been available previously or that has not been discussed as fully as the student feels it should have been. The committee determines whether this new information, or important new insights that may have been gained, could have influenced the collegiate academic and professional performance committee’s decision. The recommendation of the appeals committee is submitted to the dean for final action.

Dentistry Licensure Examination

Iowa, Colorado, Illinois, Kansas, Minnesota, Missouri, Nebraska, North and South Dakota, Washington, Wisconsin, and Wyoming belong to the Central Regional Dental Testing Service, which serves as the testing agency for clinical examinations for licensure in these states. Examinations are administered at several testing sites located at schools of dentistry within the region. Examination dates are determined by the Central Regional Dental Testing Service (CRDTS) and are available from its administrative secretary.

For a five-year period, member states, and participating states that recognize CRDTS results, accept successful completion of CRDTS requirements in lieu of their individual state’s clinical examination requirements. The license application is then filed with the individual state board of dentistry.

All states also require the National Boards, conducted by the American Dental Association, in lieu of individual state written examinations. A jurisprudence examination also is required in many states, including Iowa.

Student Organizations

All dental students are members of the American Student Dental Association through its local chapter. The American Dental Education Association, the American Association of Dental Research, the American Association of Women Dentists, the American Society of Dentistry for Children, the American Society for Geriatric Dentistry, the Student National Dental Association, and the Hispanic Dental Association also have local chapters. Students who rank in the upper 12 percent of their senior class are eligible for election to Omicron Kappa Upsilon, a national scholastic honorary dental society. The national dental professional fraternities Delta Sigma Delta and Psi Omega have chapter houses at Iowa, and housing is available to male and female dental students. In addition, both fraternities provide academic and social activities for students and their spouses.

Expenses

The College of Dentistry maintains a Supply-Instrument Management System (SIMS), which provides students with instruments and supplies necessary throughout their dental training. The SIMS usage fee for the D.D.S. is payable in installments over the four-year program.

A fee for expendable laboratory supplies is charged each of the first two years. A $100 breakage fee also must be deposited; the deposit is refundable upon graduation or termination of enrollment.

Admission

Applicants must submit a completed AADSAS (Associated American Dental Schools Application Service) application form to the American Dental Education Association (ADEA). The AADSAS application must be completed online at the American Dental Education Association web site (http://www.adea.org).

Applications are accepted beginning June 1 of the year before the year of entry. Completed applications must be on file at ADEA by November 1. Applicants should apply as early as possible. Notifications of acceptance are sent beginning December 1.

Prospective dental students are encouraged to embark on an educational program that leads to a standard bachelor’s degree. This ensures that students receive a well-rounded education.
Predental Studies
The basic academic requirement for admission to the College of Dentistry is completion of at least 90 s.h. of academic study at an accredited college. No more than 60 s.h. are accepted from a junior college or two-year institution. The predental program of study should include the following.

English: satisfactory accomplishment in English composition, rhetoric, and speech commensurate with the academic requirements for a bachelor’s degree at the college attended.

Physics: one year (equivalent to 8 s.h.), of which one-fourth must be laboratory work.

Chemistry: two years (equivalent to 16 s.h.), of which one year (equivalent to 8 s.h.) must be in organic chemistry; one-fourth of each year’s study must be laboratory work.

Biochemistry: highly recommended.

Biological science: one year (equivalent to 8 s.h.), which must include appropriate laboratory work; the requirement may be satisfied by a one-year course in principles of biology, with instruction in cell biology, metabolism, organismic biology, animal biology, genetics, development, ecology, and evolution. Preference is given to applicants who have completed more than 8 s.h. Courses in human anatomy and cell physiology are strongly recommended.

Gross anatomy: highly recommended.

Electives: sufficient course work in the social sciences, philosophy, psychology, history, foreign languages, business, and mathematics to provide a well-rounded educational background.

Grade-Point-Average Requirement
Applicants should have a cumulative g.p.a. of at least 2.50 on a 4.00 scale (a g.p.a. above 3.00 is preferred). The admissions committee gives special consideration to the quality of applicants’ course work in the predental sciences, in addition to the cumulative grade-point average.

Interviews
Personal interviews are required of applicants for admission to the College of Dentistry. Applicants are contacted to arrange an interview, usually after the AADSAS application is received by the admissions office.

Required Dental Admission Test
All applicants must complete the Dental Admission Test (DAT) sponsored by the Council on Dental Education of the American Dental Association. A computerized DAT is available throughout the year at designated Prometric Centers.

Applicants are required to take the test by August 1, one year before entering dental school. Test application forms are available online (http://www.ada.org); from the University’s Office of Admissions; the College of Dentistry Office for Student Affairs; and the American Dental Association, 211 East Chicago Avenue, Chicago, Illinois 60611.

Deposit by Accepted Applicants
Applicants accepted before February 1 are required to submit a $500 deposit within 30 days after notification of admittance. Applicants admitted after February 1 must submit the deposit within two weeks after notification of admittance. This deposit is not refundable but is credited toward the first fee payment. Applicants who fail to make the deposit within the time specified forfeit their place in the entering class.

Additional Admission Considerations
Fulfillment of the specific requirements listed for admission does not ensure admission to the College of Dentistry. From applicants meeting minimum requirements, the admissions committee selects those who appear best qualified for the study and practice of dentistry. The committee considers applicants’ academic averages, science averages, DAT scores, letters of recommendation, the interview, and other factors.

Early Admission
The College of Dentistry has formal early admission agreements with The University of Iowa; Buena Vista University in Storm Lake, Cornell College in Mount Vernon, Luther College in Decorah, Wartburg College in Waverly, Iowa; Augustana College in Rock Island, Illinois; and Prairie View A & M University in Prairie View, Texas.

The Deferred Admit Program (DAP) allows academically motivated students interested in a dental career to be admitted as early as the first year of their undergraduate college education while postponing matriculation to the College of Dentistry until they have completed at least three
years of liberal arts and sciences education. During these three years, students are engaged in a liberal arts and sciences curriculum that incorporates the dental prerequisite courses. Once selected for the program, students must maintain a specified level of academic achievement to assure matriculation to the College of Dentistry.

Financial Support

Financial assistance for dental students is based on need. Dental students who demonstrate need are eligible for Health Professions Loans, Perkins Loans, and Stafford/Ford Loans. Students applying for loans must submit the Free Application for Federal Student Aid (FAFSA). Interest on many of these loans may be deferred while the student is in school, and the loans are repayable over an extended period of time after the course of study is completed.

Short-term and long-term loans are available through the financial aid coordinator at the College of Dentistry. Research/teaching awards are given each year to qualified entering dental students. The Dental Research Awards and Resource Support Awards provide financial support up to $15,000 per year for as many as four years, if the student maintains an appropriate level of performance. Awardees are engaged in collaborative research with faculty mentors.

Financial assistance (grants and loans) is available to disadvantaged students who qualify under The University of Iowa’s Educational Opportunity Program and the Opportunity at Iowa Program. Information on financial assistance for dental students is available from the University’s Office of Student Financial Aid.

Undergraduate Program

Bachelor of Science in Oral Health Science

The College of Dentistry’s Bachelor of Science in oral health science is a degree completion program for students who hold an Associate in Applied Science (A.A.S.) from an accredited dental hygiene program. It offers dental hygienists the opportunity to supplement their existing knowledge and experience with additional liberal arts and sciences course work. Graduates of dental hygiene programs are allowed up to 60 s.h. of credit for their A.A.S. degree. Each applicant is evaluated, taking into consideration educational background and experience.

The flexible format, designed to accommodate the needs of returning adult students, provides for considerable individualization of the program of study.

Admission

Applicants should have a cumulative g.p.a. of at least 2.50 on a 4.00 scale. They must apply for admission to the University and to the B.S. in oral health science program, and interview at the College of Dentistry. Official transcripts, including degrees conferred, from each college or university attended must be submitted along with the application to the University’s Office of Admissions.

For more information about the B.S. in oral health science, contact the University’s Office of Admissions.

Graduate Programs, Postgraduate Study

Programs of study leading to the Master of Science are offered by the Departments of Operative Dentistry; Oral and Maxillofacial Surgery; Oral Pathology, Radiology, and Medicine; Orthodontics; and Preventive and Community Dentistry. Admission to these graduate programs requires satisfaction of all requirements for admission to the Graduate College, the Doctor of Dental Surgery degree or its equivalent (or a bachelor’s degree for dental hygienists applying to the Department of Preventive and Community Dentistry), and departmental approval. For graduate program descriptions, see the appropriate College of Dentistry department sections of the Catalog.

Several dentistry departments also offer postgraduate programs designed as preparation for clinical specialty practice (Endodontics; Operative Dentistry; Oral Pathology, Radiology, and Medicine; Orthodontics; Pediatric Dentistry; Periodontics; and Prosthodontics). These programs do not lead to an academic degree. A certificate is awarded upon satisfactory completion of the programs. See the appropriate sections of the Catalog.
Faculty
Iowa’s dental faculty is predominantly full-time. In addition, 97 part-time adjunct faculty members assist with clinical teaching in the D.D.S. and advanced residency programs. Approximately 88 percent of the college’s faculty members hold D.D.S. or D.M.D. degrees and 12 percent represent other disciplines. The vast majority of faculty dentists have advanced education past the D.D.S., generally with master’s degrees in specialty areas; about one-fifth hold a Ph.D.

The College of Dentistry is committed to the principle that diversity is essential to a strong educational environment—one that prepares new generations of dentists to provide high-quality care to patients from many backgrounds. The college’s full-time faculty members reflect that commitment.

Facilities
The College of Dentistry is located in the Dental Science Building on the University of Iowa Health Sciences Campus, in proximity to the Roy J. and Lucille A. Carver College of Medicine, College of Nursing, College of Pharmacy, College of Public Health, and University of Iowa Hospitals and Clinics. The Bowen Science Building and the Hardin Library for the Health Sciences also are nearby.

The south wing of the Dental Science Building is devoted to clinical teaching. There are 268 operatories in departmental clinics, student laboratories, clinical research space, and a cafeteria. The north wing houses the simulation clinic and technique bench teaching laboratory, the electronic classroom, college administrative offices, educational media service, computer support services, the academic Department of Preventive and Community Dentistry, and the research laboratories and faculty offices of the Dows Institute for Dental Research.

Dental Education and Patient Care
Patient care is integral to dental education. Students and faculty members deliver oral health care in clinics on the Health Sciences Campus and at several off-campus sites, including nursing homes. More than 25,000 people receive oral health care yearly in the college’s clinics. Patients from throughout Iowa as well as from western Illinois and northern Missouri account for most of the 110,000 patient visits each year.

Interdisciplinary Centers

Dows Institute for Dental Research
Established in 1976, the Dows Institute for Dental Research occupies the fourth floor of the Dental Science Building’s north wing. Laboratories are equipped to support a wide variety of research projects reflecting the complex nature of modern health care needs. Research in the area focuses on soft tissue and oral cancer; cariology and microbiology; epidemiology, behavior, health policy, and outcomes; and biomaterials, bone, and tissue engineering. Research also is carried out at the Office of Clinical Research and the Dental Clinical Research Center.

Although research is concentrated in these program areas, one of the unit’s strengths has been the consistent level of interaction and collaboration among individuals and programs across the college and the University.

Dental Clinical Research Center
For nearly two decades, the Dental Clinical Research Center has offered the oral health care industry a multidisciplinary setting for product testing and development directed by experienced faculty scientists in laboratory or clinical settings. Center researchers have broad experience in designing tests of therapeutic claims and product safety that meet the criteria of the ADA’s Council on Scientific Affairs and the Food and Drug Administration Clinical Trials.

Center for Oral and Maxillofacial Implants
Through integrated research, education, and clinical programs, the Center for Oral and Maxillofacial Implants facilitates the development of implants and their use as a therapeutic modality in dentistry. The center integrates basic and clinical research with technology transfer to the clinical setting, enhancing predoctoral, postgraduate, and continuing education and expanding treatment options available to patients served by the college. The center also provides vital coordination of dental specialties that participate in this treatment modality.
Nondepartmental Courses

112:100 Transfer Credits Accepted

112:118 Experiential Learning I
Problem-based learning, case studies, simulations, communication projects, small group seminars, ethics, research and treatment planning activities integrating information addressed concurrently in the dental curriculum.

112:119 Experiential Learning II
Continuation of 112:118.

112:120 First-Year Continuing Session

112:145 Introduction to Geriatric Dentistry 2 s.h.
Biological, psychological, social aspects of aging; normal aging, disease processes, pathological changes that affect oral health treatment of dental diseases and patient management.
Prerequisite: D.D.S. enrollment or completion of dental hygiene program. Same as 153:145.

112:150 Second-Year Continuing Session

112:155 Introduction to Comprehensive Care/Experiential Learning III 1 s.h.
Comprehensive dental diagnosis and treatment planning; small group discussion of students' own patient cases.

112:167 Introduction to Quality Assurance 2 s.h.
Patient management, quality assurance concepts; students coordinate treatment, patient relations, issues of quality assurance for a group of patients; ethical, moral dilemmas in relation to dental practice.

112:168 Dental Therapeutics 1 s.h.
Patients' medications and their implications for dental treatment; clinical use of medications that dentists may prescribe; guidelines for dental prescribing.

112:170 Third-Year Continuing Session

112:180 Fourth-Year Lectures and Clinics

112:185 Clinical Admissions Emergency 1 s.h.
Clinical evaluation, diagnosis, and treatment of patients with dental emergencies; patient assessment and referral to appropriate department for treatment.

112:186 Practice Management Lecture 1 s.h.
Development of a dental practice; economics, managerial principles, personnel management, leadership styles, marketing and communication, computization, decision-making, time utilization, insurance needs, banking, accounting, legal considerations, risk management, and entering into an associate contract.

112:189 Advanced Topics in Quality Assurance 2 s.h.
Quality assurance from viewpoints of practicing dentist, dental educator, dental epidemiologist, court system, analysis of senior dental practice in relation to quality assurance criteria.

112:190 Dental Student Research Honors Program
Prerequisites: D.D.S. enrollment and consent of mentor and program director.

112:199 Advanced Clinical Comprehensive Dentistry 0 s.h.
Clinical experience for professional improvement. Prerequisite: dental degree.
Endodontics

Head: William T. Johnson
Professors: David R. Drake, William T. Johnson, Richard E. Walton
Professor emeritus: Arne M. Bjorndal
Associate professor: Bruce C. Justman
Assistant professor: Anne E. Williamson
Graduate degrees: M.S., Ph.D. in Oral Science
Graduate nondegree program: Certificate in Endodontics
Web site: http://www.dentistry.uiowa.edu

Predoctoral Program

Course work and clinical experiences in endodontics are of vital importance in the overall education of a D.D.S. student.

Preclinical endodontics, taught during the sophomore year, includes a didactic and a laboratory component. In clinical endodontics, taught during the junior year, students study both normal and pathological conditions of the dental pulp and periradicular tissue. Diagnosis of pulpal and periradicular disease and various specialized aspects of endodontic treatment are emphasized. Students treat endodontic patients under direct supervision of faculty and staff.

Graduate Programs

The advanced programs offered by the Department of Endodontics are designed to provide qualified dentists with the scientific knowledge and clinical skills needed to practice endodontics and/or pursue a career in dental education and research.

The department offers several types of postdoctoral programs, which have similar clinical experiences but different didactic experiences. Each advanced program satisfies training requirements for eligibility for certification by the American Board of Endodontics. Students who complete the programs are encouraged to seek board certification. Various activities throughout the courses of study prepare the candidates for the board examination process.

The goal of each advanced program is to develop competent diagnosticians and clinicians. Students learn the scientific and clinical basis of endodontics; develop clinical skills; gain knowledge of and experience in the educational process in order to function confidently as dental educators; and develop skills in designing, conducting, reporting, and publishing the results of original research. Students in the M.S. and Ph.D. programs also gain in-depth knowledge in a scientific training discipline as preparation for an academic/research career.

Master of Science

The Master of Science requires a minimum of 30 s.h. of graduate-level work, taken over 36 months. An original research project and thesis are required. Students follow a plan of study outlined by the Department of Endodontics in compliance with basic Graduate College regulations for graduate programs in dentistry. Under most circumstances, the degree granted is a Master of Science in oral science, although master's degrees are available in other disciplines. Following successful completion of the program requirements, students are granted a Master of Science degree and a Certificate in Endodontics.

Certificate

The Certificate in Endodontics requires a minimum of 24 months of full-time formal training. The program has the same clinical but fewer didactic course requirements than the combined M.S./certificate program, and it requires no formal thesis. Students are expected to complete an original research project in the area of endodontics and to write a scientific paper for submission to a refereed journal.

Other Graduate Programs

Other graduate programs are available, such as a certificate in combination with a Ph.D. Upon completing original research and successfully defending a dissertation, students are granted a Ph.D. in a basic science area. Such programs are available by special arrangement, depending on the candidate's experience and goals.

Graduate Program Policies

Grade-Point Average

Students in each advanced program must maintain a g.p.a. of at least 3.00 to receive the
certificate and/or degree. Students who fall below this average are allowed one semester to raise their g.p.a. to at least 3.00. The circumstances of the grade-point average deficiency receive careful consideration.

**Dental Practice Privileges**

Students accepted and enrolled in any advanced program are not permitted to involve themselves in private dental practice enterprises outside the college. Failure to adhere to this policy may result in dismissal from the program.

**Program Interruption**

Whenever possible, students should complete the advanced program without interruption. Students who demonstrate need to discontinue the program temporarily should limit their time away to a maximum of one calendar year. Students must have permission from the endodontic graduate program director in order to interrupt their study.

**Admission**

Application for the M.S. and certificate programs are accepted from both U.S. and international graduates (or from those about to graduate). Applicants to either the M.S. or certificate programs must be graduates of (or graduating from) an accredited college of dentistry or a foreign equivalent. M.S. and Ph.D. applicants must meet the admission requirements of the Graduate College. A cumulative g.p.a. of at least 2.50 or equivalent is necessary for consideration for admission to any of the advanced programs.

**Application**

Application forms for the M.S. and certificate programs are available online (http://www.uiowa.edu/admissions/graduate_college.html). Application forms for the Ph.D. program are available from and should be returned to the office of the associate dean for research and graduate studies in the College of Dentistry. Applications are forwarded to the Department of Endodontics.

Applications for all programs must include the completed application form, official transcripts from all undergraduate and graduate institutions attended, three letters of recommendation, National Board Examination Scores (at least Part I, and Part II if available), an updated curriculum vitae, a personal statement, and a recent photograph.

Applicants to the M.S. program are required to take the Graduate Record Examination, which may be completed during the first semester of enrollment. International applicants whose first language is not English must present a satisfactory score on the Test of English as a Foreign Language (TOEFL).

**APPLICATION DEADLINE**

All advanced programs begin on July 1. Applications should be submitted no later than September 1 of the year preceding the anticipated date of enrollment. Finalists for each program are asked for a personal interview in October or early November. Final decisions generally are made before the last week of November.

**Financial Support**

Applicants to the M.S. and certificate programs must be able to support themselves financially until they complete the program. Besides living expenses, prospective students should plan on expenses for tuition, books, specialized equipment (e.g., surgical operating microscope, notebook computer, and ultrasonic system), instrument usage, and thesis costs. Stipends are determined on a yearly basis and depend on availability of funding.

**Courses**

**For Predoctoral Students**

- **083:140 Endodontics Preclinical Didactic** 1 s.h.
  - Basic principles, concepts, technical procedures for treatment of pulpal problems.

- **083:141 Endodontics Preclinical Laboratory** 1 s.h.
  - Basic technical procedures for treatment of pulpal problems.

- **083:160 Clinical Endodontic Practice**
  - Clinical experience in diagnosis and treatment of routine pulpal and periradicular pathology; emergency diagnosis; treatment of patients.

- **083:165 Clinical Endodontic Seminar** 1 s.h.
  - Tooth pain, anesthesia, pulpal and periradicular reactions, endodontic radiologic interpretation, trauma diagnosis and treatment, surgical endodontics, endodontic implants, bleaching, retreatment, apexification/apexigenesis.

**For Graduate Students**

Also see courses listed under the Oral Sciences Program.

- **083:200 Update in Endodontics** 1 s.h.
  - Recent advances in diagnosis, treatment planning, clinical techniques.

Family Dentistry

Head: David C. Holmes
Professors: Ana Diaz-Arnold, John V. Doering, James M. Leary
Professors emeriti: Charles Sabiston Jr., Vincent D. Williams, Gene A. Zach
Visiting associate professors: Steven H. Cooper, Larry J. Squire
Assistant professor: James T. Dunne Jr.
Visiting assistant professor: Philip L. Tan
Web site: http://www.dentistry.uiowa.edu

Predoctoral Program

The Department of Family Dentistry introduces senior D.D.S. students to a comprehensive approach to managing patients’ oral health care needs. The senior year integrates basic science knowledge, clinical skills, and dental laboratory experiences acquired during the first three years of dental school into a systematic approach to providing care.

Students who complete their education in Family Dentistry:
• understand the principles of comprehensive dental treatment planning;
• know the medical, ethical, and legal issues involved in patient care;
• are able to recognize the need for specialty consultation;
• are competent in coordinating and sequencing patient treatments;
• are effective members of the dental team;
• are prepared to enter general practice;
• are educated and have had appropriate training for the licensure examination; and
• appreciate the importance and value of lifelong learning.

Students spend five days a week in a clinical setting, where they gain experience in total patient management and care. Their didactic course work builds on their previous education. All areas of clinical and didactic instruction, patient awareness, and sensitivity to patients’ needs are stressed.

The department’s practice management curriculum prepares students to evaluate practice locations and manage the business aspects of a dental practice.

Postgraduate Program

The Department of Family Dentistry sponsors the Advanced Education in General Dentistry Program (AEGD). This postgraduate program’s objectives are to improve and refine residents’ skills and knowledge in the practice of general dentistry and to develop general practitioners who can plan and deliver high-quality dental services. AEGD practitioners are highly skilled at planning and coordinating complete treatment for complex patient care and in acting as principal coordinators when specialists’ services are necessary.

Residents are exposed to a broad range of clinical experiences while delivering comprehensive care to an assigned group of patients, who are treated solely by the residents. They have the opportunity to discuss treatment planning, progress, and outcome with other residents and faculty. They also are involved with financial management, auxiliary management, and appointment planning, thus adding to their practice management skills.

Approximately 85 percent of the program consists of general dental practice. Patient assignments are made to assure broad experience in type and complexity of treatment needs. The didactic portion constitutes approximately 15 percent of the total experience and consists of seminars by discipline-trained faculty in all specialty areas. Dental emergency responsibilities are included in the program, as are pretreatment, midtreatment, and posttreatment case presentations. Journal clubs help residents become familiar with current literature and research.

The AEGD program lasts one year and includes a stipend.

Applicants to the program must be graduates of accredited U.S. or Canadian dental schools. For more information, contact the Department of Family Dentistry. Applications must be received no later than October 15 for admission the following July 1.
Courses

For Predoctoral Students

114:184 Advanced DAU 1 s.h.
Delivery of comprehensive dental treatment in clinical setting, with chairside dental assistant; small group seminars, individual clinical coaching, self-instruction via a manual and supplemental media; instrument transfer techniques, operator and patient positioning, gaining access and visibility, work simplification and motion economy, management skills, interpersonal communication skills.

114:187 Family Dentistry Clinic I arr.
Management of treatment of patient’s total dental needs in Family Dentistry Clinic; integration of knowledge, experience for comprehensive dental care management.

114:188 Family Dentistry Clinic II arr.
Clinical experience in diagnosis, treatment planning and delivery; integrated, comprehensive dental care management.

114:194 Topics in Family Dentistry 3 s.h.
Current techniques, findings; applications for general practitioner and graduate specialty programs.

114:195 Treatment Planning and Sequencing 2 s.h.
Documentation of diagnostic procedures used in developing a treatment plan and sequence for selected clinical patients; student presentations.

For Graduate Students

114:300 Advanced Education in General Dentistry Residency 0 s.h.
Advanced dental clinical, didactic education; nondegree program in general dentistry.
Hospital Family Dentistry

Head: Kirk L. Fridrich
Division directors: Kirk L. Fridrich (Oral and Maxillofacial Surgery), Stephen J. Goepferd (Pediatric Dentistry), Jeffery Markt (Prosthodontics), Patricia K. Meredith (Family Dentistry), James Wheeler (Orthodontics)

Associate professors: Janet M. Guthmiller, William T. Johnson, Michael J. Kanellis, Patricia K. Meredith, William J. Synan, Kaaren Vargas

Assistant professors: Richard M. Burke, Mark A. Dittmer, Ali Fakhry, Lance P. Forbes, Terry J. Lindquist, Jeffrey C. Markt, Carne B. McKnight, Teresa A. Morgan, James J. Wheeler

The College of Dentistry operates a hospital dentistry clinical service at University of Iowa Hospitals and Clinics. The service includes divisions of general dentistry, maxillofacial prosthodontics, oral and maxillofacial surgery, orthodontics, and pediatric dentistry, and it interacts with the college’s specialties of orthodontics, periodontics, endodontics, diagnosis, oral pathology, and prosthodontics. A one-year general practice residency is offered by the Hospital Family Dentistry Program.

Residency Program

The residency program in general practice prepares dentists for a broader scope of private practice in general dentistry. The program combines clinical and didactic training on an individual basis and meets fundamental requirements of the Commission on Dental Accreditation of the American Dental Association.

The residency covers one year of hospital-based training. Through postdoctoral clinical, didactic, and hospital experience, residents prepare to meet the oral health needs of a wide range of ambulatory and nonambulatory patients.

Residency training includes use of hospital resources, management of ambulatory patients, inpatients, same-day surgery patients, and emergency medical and dental patients. Residents participate in consultations with other hospital services and are assigned to appropriate hospital services to fulfill the objectives of the training program. They are appointed to the house staff of the hospital and have the same privileges and responsibilities as residents in other professional education programs.

Applicants must be graduates of an accredited college of dentistry and must be licensed to practice dentistry in the United States. Selection is made through a postdoctoral dental matching program sponsored by the American Dental Education Association.

The application deadline is November 1 for admission the following July 1. Applicants are appointed after the results of the match have been received and the staff takes official action.
Head: Gerald Denehy  
Professors: Gerald Denehy, Satish Khera  
Professors emeriti: James Fuller, Wallace Johnson, Devore Killip  
Adjunct professor: Robert Margeas  
Associate professors: Steve Armstrong, Murray Boushlicher, Yvonne Chalkley, Deborah Cobb, Thomas Schulein, Marcos Vargas  
Assistant professors: Sandra Guzmán-Armstrong, Marcela Hernández  
Adjunct assistant professors: Stephanie Barquist, Stephen Bender, Terry Donnelly, Richard Grunder, Mark Kanpfe, Stephanie Nowysz-Ward, Jon Ryder, Jeremy Tu  
Adjunct instructors: Ed Fung, Lynn Griebahn, Chadwin Wagener  
Graduate degree: M.S. in Operative Dentistry  
Graduate nondegree program: Certificate in Operative Dentistry  
Web site: http://www.dentistry.uiowa.edu/public/clinics/operative/operative.html

Predoctoral Program

Course work and clinical experiences in operative dentistry are fundamental to dental students’ overall education. The operative dentistry curriculum is designed so that didactic material relates closely to laboratory and clinical experiences. The program prepares D.D.S. students to proceed independently in operative dentistry during the fourth year of training.

Graduate Program

The Department of Operative Dentistry offers advanced training designed to prepare dentists for teaching, research, and practice. Since the American Dental Association does not recognize operative dentistry as a specialty area, graduate students have the opportunity to take courses that particularly interest them. Students earn a Master of Science and a Certificate in Operative Dentistry.

Requirements for the M.S. include satisfactory completion of 52 s.h. of specified graduate-level courses; preparation of an acceptable thesis based on original research; and formal defense of the thesis and an exam by an examining committee. Students must provide their own financial support for their research and thesis.

Applicants to the program must be graduates of recognized schools of dentistry and must meet the admission requirements of the Graduate College. The department may request an interview with an applicant.

</table>
The Department of Oral and Maxillofacial Surgery combines clinical and didactic training to fit the individual interests, abilities, and development of students. Its predoctoral program is based in the College of Dentistry, with some clinical assignments in the oral and maxillofacial surgery division at University of Iowa Hospitals and Clinics. Graduate study is based primarily in the residency training program at University of Iowa Hospitals and Clinics.

**Predoctoral Program**

The predoctoral curriculum is designed to develop a foundation of professional knowledge, coupled with surgical skills, that will enable D.D.S. students to diagnose and manage surgical problems related to general dentistry practice. The program emphasizes high ethical standards and development of good surgical concepts and judgment.

The clinical portion of the curriculum allows students to develop surgical skills and apply the theoretical knowledge acquired in the didactic courses. The theory and application of anesthesia—analgesia, intravenous sedation, and nitrous oxide analgesia techniques are presented through didactic and clinical experiences.

**Graduate Programs**

**Residency Program**

The residency program in oral and maxillofacial surgery combines clinical and didactic training to prepare dentists for specialty practice. Every effort is made to adapt the program to the individual interests, abilities, and development of students, but it is essential that all students meet certain fundamental requirements.
Master of Science

The M.S. program is a four-year course of integrated didactic and clinical study, including a research project and preparation of a thesis. Students complete M.S. requirements during residency.

Admission

Students begin the four-year program only on July 1. Applicants are selected through a postdoctoral dental matching program sponsored by the American Association of Oral and Maxillofacial Surgeons. The application deadline for the match in oral and maxillofacial surgery is September 1 for admission the following July. Appointments are made after the match results are revealed and the staff elects to take official action. Appointments are offered on or before February 1 for the following July.

Applicants must have graduated from an accredited college of dentistry, should be in the upper one-third of their graduating class, must be licensed to practice dentistry in the United States, and must take the Graduate Record Examination (GRE) General Test.

They must submit an application for graduate study in oral and maxillofacial surgery; an applicant appraisal form from the applicant’s references; transcripts; and letters of recommendation from the dean of the dental college from which the applicant graduated, and from two professional references.

Once applicants have been matched, they must submit Graduate College admission forms by March 1 for admission in July. To obtain forms, contact the Office of Admissions or visit its web site.

Facilities

The University of Iowa Health Sciences Campus has outstanding basic and clinical science departments that stimulate and support scholarly research and superior clinical practice. The University of Iowa Hospitals and Clinics, the College of Dentistry, and the Roy J. and Lucille A. Carver College of Medicine provide appropriate environments for residency training in oral and maxillofacial surgery, as does the Veterans Affairs Iowa City Health Care System.

Courses

For Predoctoral Students

087:115 Anesthesia and Pain Control I 1 s.h.
Principles, techniques of complete medical history, head and neck examination, cardiovascular and respiratory examination, neuroanatomical, psychophysiological aspects of pain; pharmacologic action and techniques for using local anesthetics.

087:130 Basic Oral and Maxillofacial Surgery 2 s.h.
Principles; indications, contraindications for extractions; evaluation of patient’s related medical history; techniques of extraction, minor oral surgery procedures.

087:145 Anesthesia and Pain Control II 1 s.h.
Theory, application, instrumentation of nitrous oxide sedation; emphasis on cardiovascular, respiratory physiology; evaluation of patients, practical techniques for nitrous oxide sedation.

087:155 Advanced Oral and Maxillofacial Surgery 1 s.h.
History, examination, diagnosis, treatment of diseases and traumatic injuries of oral cavity.

Clinical experience at the College of Dentistry, University of Iowa Hospitals and Clinics, Veterans Affairs Medical Center.

For Graduate Students

087:201 Hospital Procedures 1 s.h.
Hospital rules, regulations; patient, department records; information concerning hospitalized patients.

087:202 Basic Science Review 4 s.h.
Head, neck anatomy; dissection; bacteriology, pathology.

087:207 Surgical Anatomy 1 s.h.
Head, neck structures in major oral surgery procedures; emphasis on maxillofacial problems, surgical emergencies; may include animal surgery.

087:208 Pain and Anxiety Control 1-3 s.h.
Nitrous oxide; intravenous, oral, intramuscular anxiety and pain control; pharmacology of agents; complications, their management.

087:209 Principles of Anesthesia 2 s.h.
General anesthesia; agents and their effects on respiratory, cardiovascular systems; literature.

087:211 Literature Seminars and Journal Club 1 s.h.

087:212 Surgical Case Reports 1 s.h.

087:214 Roentgen Interpretation 2 s.h.
Theory, technique.

087:215 Physical Diagnosis 2 s.h.

087:218 Oral Pathology Conference 1 s.h.
Current clinical specimens.

087:225 Oral and Maxillofacial Surgery Seminar I 1 s.h.

087:226 Oral and Maxillofacial Surgery Seminar II 1 s.h.

087:227 Oral and Maxillofacial Surgery Seminar III 1 s.h.

087:230 Oral and Maxillofacial Surgery Research I 2 s.h.
Theory topic and review committee selection, literature review.

087:231 Oral and Maxillofacial Surgery Research II 3 s.h.
Theory protocol, research.

Oral Pathology, Radiology, and Medicine

Head: Steven D. Vincent
Professors: Michael W. Finkelstein, Axel Ruprecht, Christopher A. Squier, Steven D. Vincent, Philip W. Wertz
Professors emeriti: Harold L. Hammond, William J. Hausler
Adjunct professors: Eva Dahl, Thomas P. Williams
Adjunct professor emeritus: Daniel L. Hall
Clinical professor: John W. Helstein
Associate professors: Karen A. Baker, Cynthia L. Kleinegger
Associate professors (clinical): Ronald D. Elvers, Cindy L. Marek, Patricia K. Meredith
Assistant professor: Zoya B. Kurago
Assistant professor emeritus: Francis H. Sippy
Assistant professors (clinical): Ruth D. Spieker, Sherry R. Timmons
Adjunct assistant professors: Marcello G.P. Cavalcanti, George C. Kienzie, John A. Maxwell, Daniel S. Sarasin
Graduate degree: M.S. in Stomatology
Graduate nondegree programs: Certificate in Oral and Maxillofacial Pathology, Certificate in Oral and Maxillofacial Radiology
Web site: http://www.dentistry.uiowa.edu

Predoctoral Program

The department teaches D.D.S. and other health care students about diseases that manifest in and about the oral cavity. Students learn about the clinical, radiographic, laboratory, histopathologic, and therapeutic features of these diseases as well as their etiology and natural history. They also study identification of systemic diseases through physical evaluation of patients.

Graduate Programs

Master of Science

Stomatology is the science of structure, function, and disease of the oral cavity. Study methods include examination of related histories, evaluation of clinical signs and symptoms, and use of biochemical, microscopic, and radiologic procedures to establish a diagnosis and plan for therapeutic management.

The postdoctoral programs are diverse and flexible. Two educational tracks, emphasizing oral and maxillofacial pathology or oral and maxillofacial radiology, allow postdoctoral students to obtain advanced clinical, didactic, and research-related education while pursuing a Master of Science in stomatology.

Students also may choose to apply for acceptance to the college’s graduate degree programs in oral science (see Oral Science in the Catalog).

Oral and Maxillofacial Pathology Emphasis

MASTER OF SCIENCE

Dental school graduates seeking the M.S. in stomatology with oral and maxillofacial pathology emphasis pursue comprehensive study of basic biologic and health sciences in preparation for teaching and research. A minimum of 30 s.h. of satisfactory graduate credit is required. Candidates for the M.S. prepare and submit a thesis based on the results of research conducted during their course of study.

Certificate and Master of Science

The program leading to a Certificate in Oral and Maxillofacial Pathology and an M.S. in stomatology with oral pathology emphasis combines the minimum requirements of both programs. Completion time usually is 36 to 48 months. The educational requirements of the certificate program meet the requirements for the preparation of dental specialists set by the Commission on Dental Education of the American Dental Association and the American Board of Oral and Maxillofacial Pathology.

Oral and Maxillofacial Radiology Emphasis

MASTER OF SCIENCE

Dental school graduates seeking the M.S. in stomatology with oral and maxillofacial radiology emphasis pursue comprehensive study of basic biologic and health sciences in preparation for teaching and research. A minimum of 30 s.h. of satisfactory graduate credit is required. Candidates for the M.S. prepare and submit a thesis based on the results of research conducted during their course of study.

Certificate and Master of Science

The program leading to a Certificate in Oral and Maxillofacial Radiology and an M.S. in
stomatology with oral and maxillofacial radiology emphasis combines the minimum requirements of both programs. Completion time usually is 36 to 48 months. The educational requirements of the certificate program meet the requirements for preparation of dental specialists set by the Commission on Dental Education of the American Dental Association and the American Board of Oral and Maxillofacial Radiology.

Program of Study
Students in all four programs must complete the core courses and the basic science and departmental courses appropriate to their track ("Additional Courses").

CORE COURSES
068:199 Basic Otolaryngologic Science arr.
069:204 General and Systemic Pathology 9 s.h.
086:200 Stomatology Literature Review arr.
086:226 Physical, Laboratory, and Historical Features of Disease arr.
086:230 Research in Oral Pathology, Radiology, and Medicine arr.
111:202 Research Protocol Seminar 2 s.h.
111:212 Statistical Methods for Dental Research 3 s.h.
151:210 Dental Sciences Research Methodology 2 s.h.

ADDITIONAL COURSES
Oral and Maxillofacial Pathology Track
086:227 Surgical Oral Pathology 1 s.h.
086:240 Histopathology 1 s.h.
086:241 Hospital Oral Pathology, Radiology, and Medicine arr.
151:220 Pathophysiology of Skin and Oral Mucosa 2 s.h.
151:230 Pathophysiology of Salivary Glands and Saliva 2 s.h.
151:275 Oral Microbiology and Immunology 2 s.h.
151:280 Advanced Dental Therapeutics 1 s.h.

Oral and Maxillofacial Radiology Track
077:103 Radiation Biology 4 s.h.
077:211 Medical Physics 4 s.h.
077:308 Research: Special Topics arr.
086:244 Technical Oral and Maxillofacial Radiology arr.
086:245 Head and Neck Radiology arr.

Admission
Applicants must have successfully completed an accredited program leading to the D.D.S. or D.M.D., or a foreign equivalent, and must meet the admission requirements of the Graduate College. They must have a cumulative g.p.a. of at least 3.00 (or foreign equivalent) to be considered for admission.

All applicants must take the Graduate Record Examination (GRE) General Test. International applicants whose first language is not English must present a satisfactory score on the Test of English as a Foreign Language (TOEFL).

The department's faculty makes final decisions on acceptance of applicants who meet the requirements for admission. A personal interview may be required.

Facilities
Facilities reserved for the Department of Oral Pathology, Radiology, and Medicine include a radiology special procedures area, an interpretation room, seminar rooms, a surgical oral pathology laboratory, and a clinical pathology laboratory.

In addition, the College of Dentistry has joint-use research laboratories that are well equipped and staffed for conducting research involving histology, histochemistry, materials technology, radiobiology, ultrastructure, and electron probe analysis and quantification.

Courses
For Predoctoral Students
086:120 Fundamentals of Oral Radiology 1 s.h.
Methods of clinical, radiographic examination, record keeping, correlation of basic, clinical sciences.

086:135 Oral Pathology 4 s.h.
Diseases involving oral facial organs.

086:145 Introduction to Clinical Oral Radiology 1 s.h.
Principles, techniques of diagnosis, radiology, clinical pathology in clinical practice.

086:155 Systemic Disease Manifestations 1 s.h.
Clinical medicine for dental students; basic information for patient evaluation.

086:160 Clinical Oral Diagnosis 1 s.h.
Diagnosis of oral facial diseases by clinical, laboratory, radiographic methods; clinical case analysis.

Making and processing intraoral, extroral radiographs; principles of radiographic interpretation.

Oral Science

Director: Christopher Squier
Graduate degrees: M.S., Ph.D. in Oral Science
Web site: http://www.dentistry.uiowa.edu

Graduate Programs

The College of Dentistry offers programs of study leading to the Master of Science and the Doctor of Philosophy in oral science. Both programs require that students complete courses from a core curriculum and conduct independent research leading to a thesis. They are intended to prepare graduates for careers in teaching and research.

Master of Science

The M.S. is awarded upon satisfactory completion of 30 s.h. of graduate work, including a minimum of 21 s.h. of course work, independent research leading to a dissertation, and a final examination. Completion of the program requires at least two years of full-time residence (primarily in research labs or seeing clinic patients at the Dental Science Building). M.S. candidates also involved in an advanced clinical program of two years’ duration should complete the M.S. and certificate programs by the end of a third or fourth year of study.

Students pursuing the M.S. also must be enrolled in a clinical training program offered by a College of Dentistry department.

Doctor of Philosophy

The Ph.D. is awarded upon completion of advanced course work and original research that culminates in successful defense of a dissertation. Candidates must earn a minimum of 72 s.h. of graduate credit, pass a comprehensive examination, prepare and gain approval of a research prospectus, and complete and successfully defend a dissertation that describes the results of the research. Candidates usually require at least four years of full-time study to complete the program.

Admission

Applicants to the M.S. and Ph.D. programs must hold a dental degree and should have a cumulative g.p.a. of at least 3.00; they must take the Graduate Record Examination (GRE) General Test with a combined score of at least 1600 for all three components (verbal, quantitative, and analytical) and a score of at least 500 for any individual component. These requirements are not absolute, but they carry considerable weight in the admission process. Applicants whose first language is not English must score 550 (paper-based) or 213 (computer-based) or higher on the Test of English as a Foreign Language (TOEFL); they also may be asked to take the Test of Spoken English.

Programs normally begin July 1 each year. Applicants to the Ph.D. program are asked to submit a statement describing past research experience and current research interests, and stating how completion of the Ph.D. program fits their career goals.

A personal interview may be requested for either program.

Courses

151:200 Seminars in Dental Research 1 s.h.
151:210 Dental Sciences Research Methodology 2 s.h. Practical, experimental procedures in dental research; literature and design; writing of research protocols.
151:215 Research Design in Dentistry 2 s.h. Types of studies used in dentistry; design validity; sampling methodologies; major descriptive and experimental designs used in dental research; application of statistical tests to these designs.
151:220 Pathophysiology of Skin and Oral Mucosa 2 s.h. Biology of skin, oral mucosa; changes in behavior of the tissues in a variety of physiological, pathological conditions. Offered fall semesters of odd years. Prerequisite: 151:210.
151:230 Pathophysiology of the Pulp-Dentin Complex arr. Biology of tissue; emphasis on pathological changes. Offered spring semesters of even years. Prerequisite: 151:210.
151:240 Pathophysiology of the Salivary Glands and Saliva 2 s.h. Innervation, structure, function of glands; their secretions in health and disease, their role in oral environment. Offered spring semesters of odd years. Prerequisite: 151:210.
151:260 Bone and Tooth Support Structure and Implants  
Biology of bone and periodontal structures; biologic basis for therapeutic use of dental implants.

151:275 Oral Microbiology and Immunology  
Principles of microbiology and immunology, aspects of microbial community development in the oral cavity, basic concepts of host/parasite interactions related to development of oral diseases; biological, immunological, and clinical manifestations induced by major oral pathogens. Prerequisites: microbiology, biochemistry, and biology. Recommended: immunology.

151:280 Advanced Dental Therapeutics  
Antimicrobial, analgesic, related therapies; emphasis on drug/drug interactions, dental implications of chronic cardiovascular and central nervous system medications. Offered fall semesters.

151:290 Strategies for Teaching Problem-Solving  
Design of large and small group instruction for critical thinking skills; evaluation of student performance.

151:600 Research in Oral Science  
Thesis research. Prerequisite: oral science M.S. or Ph.D. candidacy.
Orthodontics

Head: Thomas E. Southard
Professors: Samir E. Bishara, John S. Casko, Karin A. Southard, Thomas E. Southard, Robert N. Staley
Professors emeriti: Richard M. Jacobs, William Olin
Associate professor: Andrew C. Lidral
Graduate degree: M.S. in Orthodontics
Graduate nondegree program: Certificate in Orthodontics
Web site: http://www.dentistry.uiowa.edu

Predoctoral Program

The predoctoral program in orthodontics prepares general practitioners of dentistry to competently recognize, diagnose, and treat limited malocclusions of the teeth.

Lecture courses guide D.D.S. students in learning basic concepts of dental and facial growth, as well as treatment-oriented subject matter. In a laboratory course, students take and evaluate diagnostic records and fabricate treatment appliances. The department supervises a volunteer program for clinical treatment of selected patients.

Graduate Program

The goal of the graduate program in orthodontics is to educate competent individuals to practice orthodontics and dentofacial orthopedics. The program’s objectives are to provide students with an in-depth education in biological and biomechanical principles related to orthodontics; to teach students to diagnose, plan, and deliver comprehensive orthodontic health care service; and to develop students’ research and service skills.

Satisfactory completion of 24 months of intensive study, including lecture courses, seminars, clinical practicum, and a research paper, qualifies students to receive a Certificate in Orthodontics. Students who satisfactorily complete a thesis based on an original research project qualify for an M.S. in addition to the certificate.

Opportunities are available for research and independent study in the department, and there are special facilities for research in biomechanics and craniofacial growth. Interaction with other departments provides learning and research opportunities in surgical orthodontics, cleft lip and palate treatment, speech pathology, animal experimentation, and human growth.

Admission

Applicants must have a D.D.S. or equivalent and must meet the admission requirements of the Graduate College. Application deadline is September 1 for entry the following July 1. Applicants are required to come to the University for interviews with department faculty.

Pediatric Dentistry

Interim head: Cynthia K. Christensen
Professors: Stephen J. Goepferd, David C. Johnsen, James S. Wefel
Professors emeriti: Clemens A. Full, Arthur J. Nowak, Jimmy R. Pinkham, Jerry D. Walker
Adjunct professor: Rhys B. Jones
Associate professors: Michael J. Kanelis, Kaaren G. Vargas
Clinical associate professor: Cynthia K. Christensen
Assistant professor: Karin Weber-Gasparoni
Clinical assistant professor: Richard M. Burke, Jr.
Adjunct clinical assistant professors: Alis Brandtner, Pollyanne Iben, Steve Kelly, Matt Kubovich, Larry Lang, Michael Mathews, Thomas Maurice, Edward Rick, Michael Stufflebeam
Adjunct clinical instructor: Dennis Kral
Assistant-in-instruction: M. Catherine Skotowski
Graduate degree: M.S. in Dental Public Health
Graduate nondegree program: Certificate in Pediatric Dentistry
Web site: http://www.dentistry.uiowa.edu/publicclinics/pedo/pedsgp.html

The Department of Pediatric Dentistry instructs D.D.S. and graduate students in the prevention and treatment of dental diseases in children. Instruction combines didactic, laboratory, and clinical experiences and gives special consideration to reviewing current literature and managing dental problems of children with special health care needs. It also emphasizes efficient treatment through proper use of dental auxiliary personnel and record management.

Graduate Program

Graduate study in pediatric dentistry leads to a Certificate in Pediatric Dentistry (two-year program) or a certificate and a Master of Science in dental public health (three-year program). Both programs give special emphasis to preparation for certification by the American Board of Pediatric Dentistry. In addition, the three-year program in dental public health prepares students for certification by The American Board of Dental Public Health. Both programs are fully accredited by the Commission on Dental Accreditation of the American Dental Association.

Students are trained in all phases of pediatric dentistry and have career choices in practice, education, or research. Special emphasis is placed on development of leadership skills and strategies for serving vulnerable populations.

Approximately 50 percent of the program is devoted to advanced clinical activity, 30 percent to didactic courses and practice teaching, and 20 percent to original research. The program includes a core of didactic, clinical, and research-oriented courses supplemented by electives determined by students’ individual interests. Development of a minor subject area is recommended.

Close associations with the Department of Pediatrics in the Roy J. and Lucille A. Carver College of Medicine, the Center for Disabilities and Development, and University of Iowa Hospitals and Clinics permit emphasis on oral rehabilitation under general anesthesia, instruction in physical diagnosis, and management of children with developmental disabilities.

Admission

Students apply through the American Dental Education Association PASS program (http://www.adea.org/pass).

Financial Support

Stipends for residents in the three-year program are available to qualified students through a grant from the Office for Maternal and Child Health, Bureau of Community Health Services, Department of Health and Human Services. Stipends for the two-year program are provided by other federal sources.

Research Opportunities

Clinical and laboratory research projects have financial support from federal agencies and other sources. Major research areas include cariology, dental materials, dentistry for persons with special health care needs, growth and development, fluoride therapy, child behavior management, prevention, and access to care.

Faculty

Faculty members hold numerous national and state offices, committee memberships, consultancies, and honors in professional
organizations. They serve as reviewers for professional journals and federal granting agencies. They also participate regularly in continuing education programs for dentists and other health science personnel. Eight of the department's professors are diplomates of the American Board of Pediatric Dentistry.

**Courses**

**For Predoctoral Students**

- **090:140 Pediatric Dentistry Diagnosis and Treatment**
  - 3 s.h.
  - Growth and development, behavior management, diagnostic-preventive-restorative techniques for pediatric patients.

- **090:160 Clinical Pediatric Dentistry**
  - arr.
  - Comprehensive clinical management of pediatric patients.

- **090:165 Clinical Seminar in Pediatric Dentistry**
  - 1 s.h.
  - Patient management, case histories, treatment philosophies, issues in contemporary dentistry for children.

**For Graduate Students**

- **090:220 Social, Cultural, and Public Health Issues in Pediatric Dentistry**
  - 1 s.h.

- **090:300 Pediatric Dentistry Certificate Program**
  - 0 s.h.
  - Advanced dental clinical and didactic education; nondegree program toward eligibility for board certification in pediatric dentistry.
Periodontics

Head: Georgia K. Johnson
Professors: Georgia K. Johnson, Glenn Maze
Associate professor: Janet M. Guthmiller
Associate professors emeriti: Paul J. Collins, Benny F. Hawkins
Assistant professor: Ali Fakhry
Assistant clinical professor: Steven H. Clark
Adjunct clinical assistant professors: Guy Bilek, James Fili, Frank A. Wingrove
Visiting assistant professor: Steven H. Cooper
Assistant-in-instruction: Nancy A. Slach
Graduate degree: M.S. in Oral Science
Graduate nondegree program: Certificate in Periodontics
Web site: http://www.dentistry.uiowa.edu

Predoctoral Program

The predoctoral periodontal program combines didactic, laboratory, and clinical experience and applies the biological concepts of periodontology to the comprehensive clinical management of patients who have periodontal diseases.

Graduate Programs

Master of Science

Graduate students can pursue an M.S. in oral science in conjunction with the Certificate in Periodontics.

The program requires a minimum of 36 months of full-time study, including satisfactory completion of required and elective courses, preparation and defense of an acceptable thesis based on original research, and satisfactory completion of comprehensive written and oral examinations.

Certificate

The program leading to a Certificate in Periodontics provides a sound foundation for the clinical practice of periodontics. It meets all requirements of the Commission on Dental Accreditation of the American Dental Association for advanced dental education programs in periodontics. It also meets eligibility requirements for certification by the American Board of Periodontology.

The program requires 36 months of full-time study, including satisfactory completion of required and elective courses, satisfactory completion of comprehensive written and oral examinations, and an acceptable literature review or research paper.

Opportunities are provided for experience in clinical and basic research.

Admission

Applicants to graduate study in periodontics must have a D.D.S. or equivalent and must meet the admission requirements of the Graduate College. National Dental Board Examination scores, if available, are required. Interviews are encouraged but not mandatory.

Financial Support

Applicants must be financially prepared for uninterrupted studies.

Facilities

The department has 20 modern, well-equipped operatories devoted exclusively to periodontics. Hospital experience is available to students in the nearby University of Iowa Hospitals and Clinics and the Veterans Affairs Iowa City Health Care System.

Research facilities include collegiate laboratories in histology, microscopy, biomaterials, quantitation, tissue culture, molecular biology and biochemistry, and microbiology, as well as animal facilities. These collegiate facilities are in addition to those available by arrangement with University of Iowa Hospitals and Clinics, Eckstein Medical Research Building, Medical Laboratories, and the Veterans Affairs Iowa City Health Care System.

Predoctoral Program

Programs in preventive, community, and geriatric dentistry are designed to increase students’ awareness of preventive dental practices, aspects of dental practices affected by community factors, and care of compromised adult patients.

Community dentistry programs give D.D.S. students opportunities to interact with health care teams and the public in Iowa and worldwide. The department conducts off site community programs statewide, nationwide, and worldwide. It also operates the Special Care Clinic, which is housed in the Dental Science Building.

Using the community dentistry programs as the classroom, students observe and participate in a variety of activities that nurture their awareness of the societal obligations they must assume in order to become effective practitioners.

Graduate Program

The Master of Science program prepares dentists and dental hygienists to be specialists in dental public health. It has a research emphasis and requires a research project culminating in the completion and defense of a thesis.

Courses

For Predoctoral Students

111:116 Fundamentals of Clinical Dentistry 1 s.h.
Identification of health and disease in the mouth; practical methods of disease control, philosophy of preventive dentistry, patient assessment, clinical diagnosis.

111:117 Cariology and Preventive Therapies 2 s.h.
Multifactorial etiology of dental caries; support data for use of fluorides, sealants, antimicrobials, and plaque control mechanisms in control, prevention of caries. Prerequisite: 111:116.

111:118 Preventive Dentistry, Communication, and Patient Care 3 s.h.
Patient oral assessment, communication, patient management skills; oral hygiene instruction for collegiate recall patients; skills in instrumentation for detection, removal of calculus deposits. Prerequisite: 111:117.

Graduate Program

The program, designed to be completed in two academic years of full-time study, requires a minimum of 40 s.h. of course work. Successful dentist graduates meet the educational requirements for eligibility for the certifying examination of the American Board of Dental Public Health.

Courses

For Predoctoral Students

111:116 Fundamentals of Clinical Dentistry 1 s.h.
Identification of health and disease in the mouth; practical methods of disease control, philosophy of preventive dentistry, patient assessment, clinical diagnosis.

111:117 Cariology and Preventive Therapies 2 s.h.
Multifactorial etiology of dental caries; support data for use of fluorides, sealants, antimicrobials, and plaque control mechanisms in control, prevention of caries. Prerequisite: 111:116.

111:118 Preventive Dentistry, Communication, and Patient Care 3 s.h.
Patient oral assessment, communication, patient management skills; oral hygiene instruction for collegiate recall patients; skills in instrumentation for detection, removal of calculus deposits. Prerequisite: 111:117.

111:145 Clinical Preventive Dentistry 0, 2 s.h.
Experience providing complete prophylaxis and preventive services for college patients; development of communication skills in a clinic setting. Prerequisite: 111:118.

111:160 The Practice of Dentistry in the Community I 1-2 s.h.
Dental public health, history of dentistry, dental personnel, organized dentistry, professional issues, evaluation of scientific research.

111:161 The Practice of Dentistry in the Community II 1-2 s.h.
Factors that affect profession, practice of dentistry: legal and malpractice issues, supply and demand, types and practice organization, financing and quality of care.

111:185 Broadlawns Medical Center arr.
Experience providing dental care to low-income patients in a metropolitan hospital-based clinic; community-related assignments, on-call assignments in hospital, emergency department, student team experience in Des Moines.

111:186 Colorado Migrant Program arr.
Experience providing primary dental care and outreach services to a migrant population, broad understanding of needs, resources for migrant, low-socioeconomic populations.

111:187 Community Health Care: Davenport arr.
Experience providing dental care at medical-dental ambulatory health care facility serving Scott County, eight-operatory dental clinic.
111:188 St. Lukes—Dental Health Center arr.
Experience providing clinical and outreach services for low-income children and adults with developmental disabilities at St. Luke's Hospital, Cedar Rapids; operative and behavioral dental problems, hospital protocol, special needs of low-socioeconomic clients.

111:189 Geriatrics and Special Needs Program arr.
Experience in Special Care Clinic and Geriatric Mobile Dental Unit; comprehensive care for medically, physically, cognitively compromised adults, including frail elderly nursing home residents with portable equipment, other underserved populations.

111:191 Private Practice Preceptorship arr.
Development of skills and knowledge necessary for day-to-day practice of dentistry; experience at selected preceptor sites in Iowa.

111:193 Veterans Administration Medical Center: Knoxville arr.
Experience providing dental care to inpatient and outpatient veterans in a 400-bed neuropsychiatric and geriatric hospital; observation of other hospital departments, such as physical therapy, rehabilitative medicine, psychiatry.

111:194 Special Field Clinic arr.
Extramural experiences developed according to student needs; extramural opportunities. Prerequisite: department approval.

111:196 Siouxland Community Health Center arr.
Experience providing dental care at medical/dental ambulatory health care facility.

For Graduate Students

111:200 Introduction to Dental Public Health 2 s.h.
Science, philosophy, practice of dental public health.

111:201 Literature Review Methods: Dental Public Health 2 s.h.
Concepts and process of literature review, particularly in area of student's interest.

111:202 Research Protocol Seminar 2 s.h.
Development of a master's thesis protocol; identification of thesis topic, review of relevant literature, outline of potential research methods.

111:203 Independent Study: Dental Public Health arr.
Prerequisite: approval of faculty supervisor.

111:204 Principles of Oral Epidemiology arr.
Retrospective, prospective, cohort study designs; validity and reliability; distribution and determinants of oral diseases—caries, periodontal diseases, oral cancer, malocclusion, fluorosis, HIV infection, tooth loss, edentulism.

111:205 Administration of Public Dental Programs 2 s.h.
Application of general management concepts; practical aspects of planning, financing, staffing, implementing, operating, evaluating dental public health programs at federal, state, local levels.

111:206 Preventive Programs in Dental Public Health 2 s.h.
Prevention, control methods for major dental conditions, primarily dental caries, periodontal diseases; clinical efficacy, cost-effectiveness; development of comprehensive preventive oral health plan for a community.

111:207 Field Experience in Dental Public Health arr.
Arranged with public and voluntary health agencies according to students' and agencies' needs.
Prosthodontics

Head: Steven A. Aquilino
Professors: Steven A. Aquilino, Ronald L. Ettinger, Clark M. Stanford,
Professors emeriti: William E. LaVelle, Forrest R. Scandrett, Max L. Smith, Keith E. Thayer
Clinical professor: Robert L. Schneider
Associate professors: James M.S. Clancy, Terry L. Lindquist, Galen B. Schneider, Dennis J. Weir
Associate professor emeritus: Thaxter H. Miller
Adjunct associate professor: Michael J. Laitner
Clinical associate professor: Robert J. Luebke
Assistant professors: David G. Gratton, Swee-Chian Tan
Adjunct assistant professors: David R. Fritz, John W. Helicher
Clinical assistant professors: Lawrence R. Huber, Jeffrey C. Markit, Richard A. Williamson
Adjunct instructors: Frederick R. Drexier, Maria T. Locher-Claus
Graduate degree: M.S. in Oral Science
Graduate nondegree program: Certificate in Prosthodontics
Web site: http://www.dentistry.uiowa.edu

Prosthodontics is the dentistry specialty involving crowns, fixed partial dentures (bridges), removable partial dentures, complete dentures, maxillofacial prostheses, and implant prostheses.

Predoctoral Program

The predoctoral program provides D.D.S. students with the basic principles, practices, and concepts of prosthodontics required for the practice of general dentistry, through laboratory projects and treatment of patients with differing prosthodontic needs.

Graduate Programs

The department offers a Master of Science in oral science and a Certificate in Prosthodontics. The primary purpose of the M.S. program is to train and prepare dentists for careers in prosthodontic education and/or research. The certificate program is designed primarily for individuals who want to prepare for private practice in prosthodontics. Both programs require 34 months of study and satisfy the educational requirements for eligibility to take the American Board of Prosthodontics examination.

Master of Science

Students who wish to pursue a Master of Science enroll through the Graduate College. They must meet all the requirements for the master's degree as outlined in the Manual of Rules and Regulations of the Graduate College.

Students complete a core curriculum, which includes basic sciences, research methodology, and a thesis based on the student's original research, with the aid of an adviser and thesis committee. In addition, students are required to satisfactorily complete an oral and/or written examination on the thesis and on prosthodontics.

Certificate

The certificate program may provide more clinical experience than the M.S. program and does not require a thesis. Students must complete a core curriculum, which includes basic sciences, research methodology, and clinical practice—fixed, removable, maxillofacial, implant prosthodontics, and occlusion.

Admission

Applicants to either program must meet the admission requirements of the Graduate College. In addition, applicants must hold a D.D.S. or D.M.D. or a foreign equivalent. An interview may be requested. Both programs usually begin July 1. Application deadline is September 1 for the following July.

Courses

For Predoctoral Students

084:122 Principles of Occlusion 2 s.h.
Basic principles of form and function of the stomatognathic system, in both static and dynamic states; background and theory required for participation in the course's laboratory phase; anatomy, maxillomandibular relationships, dynamics of mandibular movement, equilibration of the dentition, biomaterials and their properties, introduction to temporomandibular joint disorders.

084:140 Fixed Prosthodontic Lecture I 2 s.h.
Basic biomechanical principles of fixed prosthodontics; metal, single-unit, multiple-unit fixed prostheses; diagnosis and treatment planning for the partially edentulous patient, including occlusion and esthetic concerns.

Degrees: B.A., B.S. (undergraduate degrees granted through College of Liberal Arts and Sciences); M.A.T., M.A., M.S., Ed.S., Ph.D.
Web site: http://www.education.uiowa.edu

The nation’s first university-level professorial chair in education was established at The University of Iowa in 1872. The department became the School of Education in 1907; and the College of Education, structured largely as it is today, was founded in 1913. Since then, the college’s growth has mirrored the growth of the University.

Over the years, College of Education faculty members have been leaders in a variety of educational fields. Particularly noteworthy have been their contributions in the fields of educational testing and measurement. These contributions helped lay the foundation for today’s testing and measurement industry, making Iowa City one of the best-known centers for this educational specialty.

The college has four departments: Counseling, Rehabilitation, and Student Development; Teaching and Learning; Educational Policy and Leadership Studies; and Psychological and Quantitative Foundations.

Teacher Education Programs

The College of Education at The University of Iowa offers two major teacher preparation programs based on baccalaureate degrees. Elementary education is a College of Liberal Arts and Sciences major leading to either a Bachelor of Arts or a Bachelor of Science degree. The secondary education programs combine a specific liberal arts and sciences academic major with teacher preparation coursework leading to a Bachelor of Arts or a Bachelor of Science degree.

The college also provides numerous specialized elementary and secondary teaching endorsement programs.

Preparation for special education teaching is offered primarily at the graduate level. In addition, a new undergraduate instructional strategist program is available for elementary education students admitted to this program. A limited number of undergraduate special
education courses are open to all students who are interested in this area, to those from other Teacher Education Programs, and to those planning to pursue graduate degrees in special education.

Undergraduate students admitted to a Teacher Education Program (TEP) must complete all College of Liberal Arts and Sciences General Education Program requirements for the Bachelor of Arts or Bachelor of Science. The quantitative or formal reasoning component must be satisfied with a college-level mathematics course.

For more information on Teacher Education Programs, contact the Office of Teacher Education and Student Services (visit http://www.education.uiowa.edu/tess).

Undergraduate Admission to Teacher Education Programs

Undergraduate applicants to The University of Iowa who wish to become teachers indicate their interest in the elementary major or a specific secondary-level teaching endorsement program on their application for admission. This results in an “Elementary Interest” (7EP) or a “Secondary Interest” (7SP) notation on the student’s official records. Eligible transfer students are automatically sent TEP application materials from the Office of Admissions when they are admitted to the University. All others must obtain application materials from the Office of Teacher Education and Student Services in the College of Education.

Application Deadlines

Application deadlines for all Teacher Education Programs are as follows.

- Summer session and fall semester: March 15
- Spring semester: October 15
- Late applications are not accepted.

General Requirements

Admission to Teacher Education Programs is competitive. Admission requirements may vary by program area. Faculty members in each program area review and select students to be admitted to their program. In order to be considered for admission to a Teacher Education Program, an undergraduate student must satisfy the following:

- admission to The University of Iowa;
- attainment of sophomore standing (30 s.h. completed) before making application to the Teacher Education Program (beginning October 2006, 40 s.h. completed);
- a g.p.a. of at least 2.70 on all college course work as well as course work completed at The University of Iowa;
- application for admission to a Teacher Education Program (includes a criminal check waiver);
- submission of Praxis I test scores that meet the minimum score requirements; and
- verification of having completed a 10-hour voluntary experience in a K-12 regular classroom setting.

Honors in Education

The College of Education Honors Opportunities Program is open to sophomores, juniors, and seniors who have maintained a g.p.a. of at least 3.50. Students with lower grade-point averages who have demonstrated research potential also may be accepted based on the recommendations of faculty members and the education honors adviser. Honors Opportunities Program students must take 07X:100 Honors Seminar in Education and 07X:101 Senior Honors Project. Successful completion of the program results in an honors designation on the diploma. The Honors Opportunities Program is housed in and administered by the Connie Belin and Jacqueline N. Blank International Center for Gifted Education and Talent Development.

Postbaccalaureate or Graduate Admission

Students who have completed a baccalaureate degree may be admitted to a teacher preparation program in one of two ways. They may apply to the Graduate College and state their objective as “certification only,” or they may apply for a master’s degree objective, either a Master of Arts in Teaching (M.A.T), or in selected majors, a Master of Arts (M.A.). Students who choose to pursue a graduate-level teacher preparation program must satisfy the following:

- eligibility for admission to the Graduate College;
- submission of an official Graduate Record Examination (GRE) General Test score report, with scores that meet the minimum score requirements; and
a cumulative g.p.a. of at least 3.00 on undergraduate work.

They also must apply to the appropriate Teacher Education Program, following the graduate admission procedure, and must meet the general requirements stated in the graduate admission section.

Students may apply to the College of Liberal Arts and Sciences as postbaccalaureate students with senior standing. Students who choose this option must apply to the appropriate Teacher Education Program, following the undergraduate admissions procedure, and must meet the general requirements stated in the undergraduate admissions section.

Application deadlines for graduate and postbaccalaureate students with senior standing are March 15 and October 15.

**Student Teaching**

The final phase of the Teacher Education Program is the professional semester, devoted to supervised student teaching and directed observation in a variety of situations. Faculty members, professional staff, and advanced graduate students who are experienced teachers serve as supervisors.

Periodic seminars provide for discussion and evaluation of student teachers' experiences. The student teaching requirement may not be met by transfer credit except under unusual circumstances and with advance approval.

To be admitted to the student teaching semester, students must submit a separate application to the Office of Teacher Education and Student Services in the College of Education. All course work in education, for the major, and for the degree must be completed before the student teaching semester. Applications are submitted during the calendar year before the student teaching semester. The deadline is November 15 for students planning to student teach the following fall semester and February 15 for students planning to student teach the following spring semester.

Admission to student teaching requires program area faculty approval as well as verification of satisfactory progress in meeting both College of Education professionalism standards and program area standards, which are set at the time of admission to the TEP. In some programs, standards are higher than the college's required g.p.a. of at least 2.70. Students should consult with their advisers regarding specific requirements for the program areas.

For more information, contact the Office of Student Field Experiences.

**Waivers**

Students who have completed courses that they want to substitute for program requirements should consult with their advisers.

**Urban Student Teaching**

Students who want to advance their educational interests through student teaching in an urban setting may apply through the Office of Student Field Experiences. The urban districts include Clark County, Nevada (Las Vegas area); Chicago Public Schools; Adams County School District 14 (Denver area); Aldine, Texas (Houston area); and Rialto, California (Los Angeles area). These options are open to all education majors who meet the requirements established for these student teaching sites. For more information about this and other programs, contact the Office of Student Field Experiences.

**International Student Teaching**

International student teaching experiences are available primarily through the Foundation for International Education. Sites include Australia; Costa Rica; England and Wales; Bagalore, India; Ireland; New Zealand; Scotland; and Taiwan. In most locations, students are assisted with housing by the on-site coordinator. Interested students must meet the regular requirements for student teaching and must have the approval of their adviser and the appropriate program coordinator. International assignments are for seven to eight weeks. Secondary education students complete an eight-week assignment in a stateside placement followed by an eight-week assignment in an international placement. Secondary education students in some program areas (for instance, English education) are required to complete a full semester of student teaching in the United States before student teaching at an international site. Elementary education students complete a seven-week assignment in a stateside placement followed by a seven-week assignment in an international placement. For more information about international student teaching opportunities, contact the Office of Teacher Education and Student Services.
State Requirements
All students seeking an Iowa teaching license must complete a course in human relations and mainstreaming for exceptional learners. These requirements can be met by completing 07B:180 Human Relations for the Classroom Teacher and 07U:100 Foundations of Special Education. Human relations courses offered through community colleges are not accepted. In the State of Iowa, applicants must be at least 21 years old to be granted a teaching license. Applicants who have been found guilty of a felony are barred from receiving an Iowa teaching license. Appeals may be filed directly with the Iowa Board of Educational Examiners.

Teacher Education Minor
Acceptance to a Teacher Education Program is prerequisite to registration for most College of Education undergraduate courses. However, the College of Education offers two minors, one in educational psychology and one in human relations, for students who wish to be better informed about education. The minors may help support students’ future career objectives and help students prepare to be better informed as parents, as taxpayers, or as future members of local boards of education. Contact the Office of Teacher Education and Student Services for more information about the minors.

Teacher Licensure/Certification Services
The Iowa Board of Educational Examiners issues teacher, support service, and administrator licenses on the recommendation of Iowa colleges and universities whose programs have been approved by the Iowa Department of Education. All University of Iowa preparation programs have Iowa Department of Education approval.

Licensure/certification requirements across the nation are subject to change. Students who plan to seek employment in a state other than Iowa should make every effort to be informed about current requirements in that state. Many states require some type of competency testing. Generally, students who apply out-of-state should first secure Iowa licensure.

To be recommended by The University of Iowa, applicants must complete all requirements of the appropriate approved program. A minimum of 20 s.h. of course work applied to meet program requirements must be earned at The University of Iowa. Fingerprinting is required for all new applicants for Iowa licensure; the State of Iowa has outlined specific procedures for the fingerprinting process.

The College of Education Office of Teacher Education and Student Services provides Iowa application forms, fingerprinting procedures, and licensure/certification assistance to all students completing approved programs offered by the college. It also provides assistance to individuals interested in adding endorsements to their Iowa license based on completion of State of Iowa minimum licensure requirements.

Graduate Programs
Graduate study in the College of Education is guided by the policies of the Graduate College, with additional requirements set by College of Education faculty members. Graduate students in education register in the Graduate College and receive their degrees from that college. See the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

Graduate programs are available in the following areas of study.

Counseling, Rehabilitation, and Student Development
M.A., Ph.D.
Counselor Education—Ph.D.
Rehabilitation Counseling—M.A., Ph.D.
School Counseling—M.A.
Student Affairs Administration and Research—Ph.D.
Student Development in Postsecondary Education—M.A., Ph.D.

Teaching and Learning
M.A.T., M.A., M.S., Ph.D.
Art Education—Ph.D.
Curriculum and Supervision—M.A., Ph.D.
Developmental Reading—M.A.
Elementary Education—M.A., Ph.D.
English Education—M.A.T., M.A.
Foreign Language Education—M.A.T., M.A.
Foreign Language and English as a Second Language—Ph.D.
Language, Literacy, and Culture—Ph.D.
Mathematics Education—M.A., Ph.D.
Science Education—M.S., M.A.T., Ph.D.
Social Studies Education—M.A., Ph.D.
Special Education—M.A., Ph.D.
Educational Policy and Leadership Studies
M.A., Ed.S., Ph.D.
Educational Administration—M.A., Ed.S., Ph.D.
Higher Education—M.A., Ed.S., Ph.D.
Social Foundations of Education—M.A., Ph.D.
Special Education Administration—Ed.S.
Student Affairs Administration and Research—Ph.D.

Psychological and Quantitative Foundations
M.A., Ed.S., Ph.D.
Counseling Psychology—Ph.D.
Educational Measurement and Statistics—M.A., Ph.D.
Educational Psychology—M.A., Ph.D.
School Psychology—Ed.S., Ph.D.

Master of Arts in Teaching
The M.A.T. program is designed for academically superior liberal arts and sciences graduates who completed few or no professional education courses in their undergraduate program. It is a nonthesis program with requirements that range from 45 to 67 s.h. See Teaching and Learning in the Catalog.

The program leads to a master's degree and licensure as a secondary teacher in the fields of English, foreign languages, and science education. Admission to the program requires a g.p.a. of at least 3.00 in undergraduate course work. The program includes 18 s.h. of graduate course work in the student’s teaching field. Students must complete a minimum of 20 s.h. of graduate work in education to satisfy licensure requirements.

A Master of Arts program with a secondary education major in social studies leads to initial teacher licensure. See “M.A. in Social Studies Education”/“Program B Requirements” in the Teaching and Learning section of the Catalog.

Master of Arts
The College of Education offers an M.A. with or without thesis. The nonthesis program usually provides more specialized course work than does the thesis program. Although the nonthesis program is not necessarily a terminal program, students who expect to continue their studies in a doctoral program are urged to select the M.A. thesis program since it offers more experience in research procedures. Students who complete a nonthesis M.A. and are admitted to a Ph.D. program may be asked to submit evidence of writing and research skills to their adviser or department during the early part of their doctoral program. For information about programs that offer a thesis option, see the program descriptions in College of Education department sections of the Catalog.

Course credit earned more than 10 years before the session in which the degree is to be conferred do not count toward requirements for any master's degree. Students must earn at least 24 s.h. in University of Iowa courses after formal admission to a master's degree, and they must complete at least 8 s.h. on campus.

Master of Science
Thesis and nonthesis programs are available for M.S. students in science education. The degree requirements are similar to those for the Master of Arts.

Specialist in Education
The Ed.S. is granted upon completion of a prescribed two-year postbaccalaureate program designed for students preparing for professional work in fields such as administration and supervision, and special services. Of the minimum 60 s.h. required for the degree, 28 s.h. must be in the specialization area; the rest may be earned in cognate fields, supervised experience, research, and elective courses. The research must culminate in a written report.

Other requirements for the Ed.S. are the same as for the master’s degree, except that the Ed.S. requires students to complete 15 s.h. of resident work on campus in one 12-month period or in two summer sessions. Course work completed 10 years before the final examination must be evaluated to determine the amount of credit that may be accepted toward program requirements.

Doctor of Philosophy
The Ph.D. is the most advanced academic degree. It is conferred upon students who have demonstrated superior scholarship and mastery of research skills in course work as well as in the preparation and defense of a dissertation.

Professional Improvement
Students are admitted to professional improvement status in a College of Education department rather than to degree candidacy. This option is appropriate only for persons who wish to update their knowledge or who are temporarily undecided about career plans. Students should file a change of status stating a
specific program objective at the earliest opportunity.

**Extramural Education**

Through the Division of Continuing Education, selected College of Education courses are offered at off-campus sites and hours outside the traditional schedule. If taken after formal admission to a specific program, some of these courses may be applied to meet residency requirements for degrees.

Special regulations govern such course work. Students should obtain prior approval from their program adviser before registering in extramural courses. Students not regularly admitted to The University of Iowa also may register in extramural courses, but credit earned before admission does not count toward residency requirements.

**Support Units, Other Resources**

**Teacher Education and Student Services**

The Office of Teacher Education and Student Services assists students, faculty, staff, and the general public in graduate and undergraduate admission, Graduate College examinations, student field experiences, and teacher licensure/certification. It also serves as a liaison with other University units, including the Graduate College, the College of Liberal Arts and Sciences, the Office of Admissions, and the Office of the Registrar, and with external agencies, including the Iowa Department of Education, out-of-state teacher licensure/certification departments, and school district personnel in Iowa and outside of the state.

A variety of application and information materials are available at the office and on its web site (visit Office of Teacher Education and Student Services on the College of Education web site).

**Education Technology Center**

The Education Technology Center (ETC) provides computer services to College of Education faculty, staff, and students. The ETC offers technical assistance to faculty and staff and maintains all computers in the college. Students use ETC lab facilities to work on assignments and to conduct research. The center encompasses four student computer labs, three of which are suitable for a classroom environment.

The Education Technology Center provides a variety of application software and World Wide Web and multimedia production tools. Faculty, staff, and students may check out digital cameras, computer projectors, wireless laptops, and other AV equipment. The ETC also provides assistive technologies for College of Education students with disabilities.

The ETC’s ePortfolio Support Center guides faculty and students on the creation of electronic portfolios. Center staff consult with faculty on identifying and linking classroom work to adopted College of Education standards. They also help students produce and upload compliant web-based ePortfolios.

The ETC partners with the University's Information Technology Services to maintain a video lab facility used for professional video production. The ETC staff also manages the Iowa Communications Network fiber-optic classroom located in the College of Education.

**Libraries**

The University's Main Library and the Psychology Library provide books, periodicals, reference works, videos, ERIC microfiche, tests, and a reserved book room for students and faculty.

**Educational Placement**

The Educational Placement Office helps students and alumni pursuing careers in teaching, research, and education leadership. Current information about services and career resources is available through the Educational Placement Office's web site (see Centers, Services & Projects on the College of Education web site). The site provides links to information about employment opportunities in schools, colleges, and related organizations. It also provides job search assistance, including curriculum vitae, résumé, and letter writing tips and samples; preparation for the job search; sample interview questions; portfolio examples; and employer advice for educators seeking jobs in K-12 environments, college and university settings, and in international locations.

The office's professional staff is available for individual conferences with students to critique a résumé or curriculum vitae, discuss job search strategies, or assist with other career matters. Workshops, seminars, and special programs related to educational employment and the job
search are offered regularly. University of Iowa students and alumni can establish a placement file consisting of letters of recommendation to be submitted to potential employers in support of employment applications.

**Advanced Measurement and Assessment Studies Center**

The Center for Advanced Studies in Measurement and Assessment (CASMA) pursues interdisciplinary research initiatives that advance the methods and practice of educational measurement and assessment.

CASMA's aim is to be a premier interdisciplinary center that performs, promotes, fosters, and disseminates high-quality research in measurement and assessment. CASMA devotes considerable resources to development of open-source computer programs for equating scores on tests.

Every other year CASMA co-sponsors a national conference on current challenges in educational testing. Periodically, the center's staff produces research reports that are available on CASMA's web site (http://www.education.uiowa.edu/casma). Recent reports have discussed topics in generalizability theory, institutional selectivity in undergraduate education, revolutions and evolutions in educational testing, decision consistency with complex assessments, and equating models.

**Evaluation and Assessment Center**

The Center for Evaluation and Assessment conducts a wide variety of project and program evaluations in collaboration with University faculty members and with school systems, universities, and other organizations throughout Iowa and nationwide.

The center's mission is to improve the quality of evaluation theory and practice; provide high-quality skill-development and training activities for graduate students; contribute to research on program evaluation and outcomes assessment; and provide high-quality services to clients in need of program evaluations, evaluation consultation or technical assistance, and outcomes assessment consultation.

The Center for Evaluation and Assessment has conducted program and project evaluations in a broad range of areas, including minority recruitment and retention; small enterprise development; delivery of social and human services; pre-K-12 curriculum and teacher professional development in science, math, history, and literacy; impact of public policies on K-12 education; and postsecondary curriculum and professional training in engineering, technology, and health care.

**Iowa Testing Programs**

The Iowa Testing Programs staff develops standardized educational tests, such as the widely used Iowa Tests of Basic Skills and Iowa Tests of Educational Development, for use in elementary and secondary schools. Iowa Testing Programs also conducts research studies in educational measurement and evaluation, publishes the results of these studies, sponsors lectures and symposia, provides consulting services to school systems, and provides training experience for graduate students in measurement and statistics.

**Belin-Blank Center for Gifted Education**

The Connie Belin and Jacqueline N. Blank International Center for Gifted Education and Talent Development conducts research and service in gifted education. It also gathers and disseminates information on the education of gifted students. Based in the College of Education, the center was established in 1988 by the Board of Regents, State of Iowa, and was renamed in 1995.

The center's programs and services include the Belin-Blank Fellowship Program in Gifted Education; the Honors Opportunity Program; Invent Iowa; the Henry B. and Jocelyn Wallace National Research Symposium on Talent Development; family counseling; consultation; educational assessment; practicum and internship experiences; course work in gifted education (including state endorsement); academic talent searches for students in grades 2-9; and a number of precollege programs for gifted students in grades 2-12. The center also administers the Iowa Online Advanced Placement Academy.

The Belin-Blank center administers two University-level student programs: the Iowa Talent Project, developed for minority students from gifted programs in Des Moines, Iowa, and the National Academy of Arts, Sciences, and
Engineering, a highly selective early-entrance program for students who have completed their junior year in high school.

The center also provides practicum and internship experiences for undergraduate and graduate students and coordinates course work for the Iowa Talented and Gifted Endorsement.

For more information, contact the Belin-Blank center director.

### Institute for School Executives

The Institute for School Executives is a membership organization for school districts and other educational agencies. Established more than three decades ago and operated by the College of Education, the institute collaborates with other educational agencies to provide statewide continuing education and staff development opportunities for school leaders.

An advisory committee of school leaders provides direction and guidance for programming activities. Management and oversight are coordinated by a faculty member of the Department of Educational Policy and Leadership Studies, who serves as the institute's director.

Institute activities provide an excellent opportunity for school leaders and College of Education students and faculty members to interact and exchange ideas, experience, and research information on a variety of topics.

### Research Support

The College of Education dean's office, through the Grant and Research Services Center (GRSC), provides grant and research-related support services for the college's faculty, staff, and students. GRSC staff members help identify internal and external funding sources, prepare and submit grant proposals and application materials, provide grant accounting services, and help in the preparation of applications for Human Subjects/Institutional Research Board review.

The college also provides limited funds for faculty research, professional development, and travel.

The Cooperating Schools Program (CSP) is a University-wide service that facilitates placement of research projects conducted by faculty, staff, and students in public schools throughout Iowa. The CSP provides information to assist researchers with obtaining permission to conduct research in Iowa schools. The program was instituted at the request of school administrators charged with the responsibility of approving research projects in their schools.

### Financial Support

Students interested in employment opportunities in the college's support units and special resources should contact the director of each facility and indicate their interests, their academic and experience records, and their career or degree goals at The University of Iowa. Some assistantships are listed in a reference available from the Office of Teacher Education and Student Services.

### Graduate Assistantships

Individual academic programs provide opportunities for teaching, research, or service assistantships as well as for fellowships and related employment opportunities. Inquiries should be addressed to the chair of the department or the director of the program in which the student believes he or she can provide service or achieve an outstanding academic record. Assistantship appointments are usually, but not always, made by the program area.

### Special Graduate Assistantships in Education

The Iowa Testing Programs provides funds to support a limited number of special graduate assistantships in education, in which students do research work under the direction of a faculty member of their choice. Students must be enrolled for at least 6 s.h. but not more than 12 s.h. per semester; assistantships are for the academic year and are renewable for a limited number of years. Students admitted to or pursuing any advanced degree program offered by the College of Education are eligible to apply, provided they are committed to a professional career in the United States.

Candidates must submit transcripts of all completed college work (undergraduate and graduate), recommendation forms specific to the assistantship, and scores on the Graduate Record Examination (GRE) General Test. For assistantship application forms, contact the Iowa Testing Programs director. Application deadline is late February.

### Student Financial Aid

Several scholarships are available to students for their student teaching semester. The scholarships are based on need, grade-point average, and future plans for teaching.
Scholarships are available each year for experienced teachers who are working toward licensure or an advanced degree in educational administration. The scholarships are based on the student’s record as an effective teacher and promise as a school administrator; students must have completed four years of teaching experience and must be planning to work as elementary or secondary administrators.

Scholarships and awards are based on available funding.

For more information, see College of Education Scholarships and Awards under “Information for Students” on the college’s web site. For application forms, contact the administrative assistant in the College of Education Office of the Dean.

College of Education Awards

Awards are presented to outstanding students in the College of Education at a spring semester ceremony.

The Duane D. Anderson Scholarship is awarded to a transfer student from an Iowa community college who is enrolled in a College of Education program. The award is based on promise and need.

The Jack Bagford Elementary Education Award is presented to an outstanding elementary education student who is an Iowa resident. The student should be scheduled to do student teaching the academic year following the award.

The David and Connie Belin Honors Award is for graduating seniors in the Teacher Education Program who have completed all requirements for the Honors Opportunity Program.

The Blommers-Hieronymus-Feldt Fellowship is awarded to a doctoral student in the field of educational measurement and statistics; nominees must have completed at least one full year in the graduate program at The University of Iowa. The award is based on academic performance in graduate course work and professional promise in measurement and statistics; it supplements the recipient’s teaching or research assistantship each year until graduation, to a maximum of three years.

The Barry Bratton Award for Achievement in Design of Instructional Processes is given to an outstanding student who has completed course work that reflects a commitment to the systematic design and improvement of instructional processes and materials.

The Debra Clausen Memorial Award is given to a qualified graduate student who will work at the Center for Disabilities and Development to evaluate and develop learning programs for students with mental disabilities, including Down Syndrome.

The T. Anne Cleary Psychological Research Scholarship is awarded to an outstanding doctoral student engaged in research on the psychological or quantitative foundations of education. The award may be presented to one international student and one permanent resident of the United States each year.

The John Leonard Davies Memorial Award is given to an outstanding graduate student majoring in education whose specialization is adult and continuing education.

The Harvey H. Davis Award is given to an outstanding candidate for an advanced degree in higher education or educational administration, particularly a student interested in the financing of education.

The Terry Ganshaw Memorial Award is given to an outstanding Ph.D. student in college student personnel.

The Albert Hood Promising Scholar Award is given to an outstanding graduate student who has made a noteworthy scholarly presentation at a national professional conference or has published a significant scholarly article in a reputable professional journal or other substantial printed work.

Loetscher Science Education Scholarship is awarded to a student in secondary science education, with preference given to those pursuing a chemistry emphasis.

The Perry Eugene McClanahan Award is given to the outstanding candidate for an advanced degree in educational administration.

The Leonard A. Miller Memorial Award is given to an outstanding first-year M.A. student majoring in rehabilitation counseling.

Minority Student Award is given to an outstanding College of Education undergraduate or graduate minority student who works with
equity issues in the college and has made positive contributions to the life of the college.

The Melvin R. Novick Award is presented to a third- or fourth-year student enrolled in the doctoral program in educational measurement and statistics who has shown outstanding academic performance and promise of the highest level of achievement in research in this field.

Paul Opstad Scholarship is awarded to a graduate student in the College of Education whose career or scholarly interests focus on the concerns and needs of international students. The scholarship is based on academic performance and commitment to working with international students.

Guy and Gladys Peterson Award is given to an outstanding student who has been admitted to and has completed at least 12 s.h. of course work in the Teacher Education Program.

Pi Lambda Theta Awards—Senior, M.A., and Ph.D. levels are given to outstanding students of high scholarship who show promise in the professional areas of research, teaching, or writing and who exhibit striking personal qualities.

The Betty Piercy Scholarship Award is given to an outstanding student in reading who is expected to benefit the field in some direct way.

The John E. Quinn Memorial Scholarship is awarded to an outstanding undergraduate liberal arts student from eastern Iowa who has been admitted to the Teacher Education Program and is pursuing secondary school teaching licensure in history.

The Rolland Ray Dissertation Fellowship is awarded to a doctoral student in the Department of Teaching and Learning whose dissertation addresses the measurement of educational objectives.

The Lloyd Smith Scholarship is awarded to an outstanding student in elementary social studies.

The Franklin Stone International Student Award is given to an outstanding international student pursuing a Ph.D. in education.

The James and Coretta Stroud Fellowship for Doctoral Study in Educational Psychology, Measurement, or Statistics is awarded to an outstanding graduate student in the Department of Psychological and Quantitative Foundations who is entering the dissertation phase of study.

The Edgar M. and Evelyn Benzler Tanruther Scholarship is awarded to an outstanding graduate student in elementary education.

The U-High Innovative Developments in Education Award is given to students who have completed or will complete student teaching during the school year. The award is based on outstanding performance as a student teacher, particularly for innovation and creativity shown during the experience.

The Erwin and Louise Wasta International Scholarship is awarded to an international student enrolled in a College of Education program. The award is based on promise and need.

Faculty

All tenure-track faculty members hold earned doctorates in their teaching fields, and many have had teaching or administrative experience in the public schools. Several hold joint appointments in the College of Liberal Arts and Sciences.

Interdepartmental Courses

07X:029 First-Year Seminar 1-2 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Prerequisite: first- or second-semester standing.

07X:100 Honors Seminar in Education 1 s.h.
Research in education and related professions in collaboration with a College of Education faculty member of student’s choice; preparation for senior honors project.

07X:101 Senior Honors Project 1-2 s.h.
Collaboration with a faculty member on research project; written report. Prerequisite: 07X:100.
Counseling, Rehabilitation, and Student Development

Chair: Dennis R. Maki
Professors: Nicholas Colangelo, Dennis Harper, Dennis R. Maki, Leslie Margolin, Ernest Pascarella, Villa Tarvydas, Elizabeth J. Whitt
Professors emeriti: Richard Dustin, Harold B. Engen, Albert B. Hood, David A. Jepsen
Associate professor: Debora Liddell
Associate professors emeriti: William A. Matthes, Ralph R. Roberts Jr.
Assistant professors: Amy Milsom, Tarrell Portman, Jodi Saunders, John Wadsworth, Sherry Watt
Adjunct assistant professors: David Grady, Barbara O’Rourke, Johnnie Sims
Adjunct lecturers: Leanne Eichinger, Valerie Garr, Sarah Hansen, Vernona Myers, Carlos Serrato, Orville Townsend
Graduate degrees: M.A., Ph.D.
Web site: http://www.education.uiowa.edu/crsd

The Department of Counseling, Rehabilitation, and Student Development generates and disseminates knowledge, develops skills, and promotes attitudes about effective professional practices that foster human development across the life span. The department prepares practitioners and scholars primarily at the graduate level, through degree programs in counselor education, rehabilitation counseling, school counseling, and student affairs. It also offers basic courses in interviewing and interpersonal skills for students in other professional and graduate programs, as well as for undergraduates.

Graduate Programs

The department offers graduate degrees in student affairs, rehabilitation counseling, school counseling, and counselor education. Prospective students must meet admission requirements for the individual programs as well as the department’s general admission requirements (see “Admission” later in this section).

Upon completing a degree in the department, students are evaluated and are expected to have awareness, knowledge, and skills in these areas:

- current definitions, professional standards, and appropriate professional practices regarding multiculturalism;
- what it means to be a multiculturally competent helping professional;
- integrated feedback into practice and professionalism in interpersonal interactions;
- personal limitations and strengths that could ultimately support or harm a client or student;
- a personal plan for future practice in the field regarding multicultural relationships.

Student Affairs

The department offers a Master of Arts in student development in postsecondary education and two Doctor of Philosophy degrees. The Ph.D. in student affairs administration and research emphasizes administrative practice and college student and student affairs research. The Ph.D. in student development in postsecondary education emphasizes counseling and helping relationships.

M.A. in Student Development in Postsecondary Education

The Master of Arts emphasizes theory and practice. It prepares students for a wide variety of entry- and mid-level positions in colleges and universities, including admissions and orientation, student activities, career planning, academic planning, residence halls, international student programs and advising, and community college counseling. M.A. students are required to pass written comprehensive examinations. A thesis is optional.

The program is accredited by the Council for the Accreditation of Counseling and Related Educational Programs (CACREP).

ADMISSION

Applicants who meet the following criteria are given preference for admission: an undergraduate g.p.a. of at least 3.00; a combined verbal and quantitative score of 1000 or higher on the Graduate Record Exam (GRE) General Test; significant undergraduate leadership experience; writing ability; and fit with the program.

The admissions committee considers each applicant’s entire application portfolio. Personal interviews are encouraged and may be required. All applications must include complete application forms; three letters of reference and/or completed recommendation forms; a written statement of goals, interests, and
experiences relevant to graduate study in student development at The University of Iowa; official GRE scores; and official transcripts for previous postsecondary course work.

Applications are considered for fall semester and are due by February 1. Applicants who submit their materials by February 1 receive preference for fellowship and assistantship opportunities.

Campus visit days, held each March and/or April, give admitted M.A. applicants the opportunity to interview for assistantships and meet current students. Prospective students also may arrange campus visits at other times.

REQUIREMENTS
The M.A. in student development and postsecondary education requires 48 s.h. It is designed for two years of full-time study (9-12 s.h. per semester), although some students study part-time toward the degree.

The curriculum is based on theories of student learning and development; theories of organization and administration; knowledge of higher education contexts; research on college students, student affairs, and higher education; counseling and helping skills; student affairs administration; and connections among research, theories, and practice.

Experiential Components
The program requires a practicum and an internship. This experiential course work provides professional development experiences for the program’s students. Practical experiences include developmental work with individual students; program planning, implementation, and evaluation; administration and supervision; exposure to diverse clientele; use of assessment and evaluation tools; familiarity with electronic technologies for communication and teaching, and application of ethical guidelines.

M.A. students must complete at least one eight-hour-per-week practicum in a student services office, usually during the second semester of the first year. An M.A. site supervisor and program faculty members supervise the practicum, which includes a weekly seminar (07C:333).

After successfully completing the practicum, students are eligible to begin a required internship in an approved student services site. The internship helps students integrate theory and standards into practice and develop a professional identity in the field. Interns must complete 600 hours under the supervision of an M.A. supervisor. Most students complete this requirement in half-time graduate assistantships over two semesters during the second year. Regular evaluations are required. Students meet weekly with their classmates and faculty supervisor in the capstone seminar (07C:363).

In addition to practicum and internships on campus, there are field site opportunities at several nearby colleges. Cornell College, Mount Mercy College, Coe College, and Kirkwood Community College are within a 20-mile drive from Iowa City. Grinnell College, Saint Ambrose University, Muscatine Community College, and Iowa Wesleyan College are within a 90-minute drive.

Sample Course Schedule
First year, fall semester:
07C:221 Theories of Counseling and Human Development Across the Life Span 3 s.h.
07C:278 Applied Microcounseling 3 s.h.
07C:281 Introduction to Computer Technology in the Helping Professions 1 s.h.
07C:330 Introduction to Student Services 3 s.h.
07C:331 College Students and Their Environments 3 s.h.

First year, spring semester:
07C:203 Career Guidance and Job Placement 3 s.h.
07C:250 Multiculturalism in the Helping Professions 3 s.h.
07C:333 Practicum in Student Services 3 s.h.
07C:334 College Student Learning and Cognitive Development 3 s.h.

Second year, fall semester:
07B:206 Research Process and Design 3 s.h.
07C:332 College Student Psychosocial and Identity Development 3 s.h.
07C:335 Administration of Student Services 3 s.h.
07C:363 Capstone Seminar in Student Services 3 s.h.

Second year, spring semester:
07B:100 Issues and Policies in Higher Education 3 s.h.
07C:363 Capstone Seminar in Student Services 3 s.h.
Electives 3-6 s.h.

Ph.D. in Student Affairs Administration and Research
The interdepartmental Doctor of Philosophy in student affairs administration and research is
offered by the Department of Counseling, Rehabilitation, and Student Development and the Department of Educational Policy and Leadership Studies. The program provides in-depth preparation for leadership positions in student affairs administration, graduate student affairs preparation programs, and/or research about college students and student affairs practice.

ADMISSION

Applicants who meet the following criteria are given preference for admission: a master's degree in student personnel, higher education, counselor education, or a related field; an undergraduate or graduate g.p.a. of at least 3.00; a combined verbal and quantitative score of 1100 or higher on the Graduate Record Exam (GRE) General Test; significant work experience in student affairs, community organizations, or successful related work; writing ability; and fit with the program.

The admissions committee considers each applicant's entire application portfolio. Personal interviews are encouraged and may be required. All applications must include complete application forms; three letters of reference and/or completed recommendation forms; a written statement of goals, interests, and experiences relevant to graduate study in student development at The University of Iowa; official GRE scores; and official transcripts for previous postsecondary course work.

Applications are considered for fall enrollment. Application deadline is January 1.

REQUIREMENTS

The Ph.D. in student affairs administration and research requires 90 s.h. beyond the bachelor's degree (approximately 60 s.h. beyond the master's degree), although a student's academic and experiential backgrounds, needs, and interests help determine the required credit. Decisions are made case-by-case in collaboration with the student and his or her advisory committee.

Educational foundations covered in the curriculum include college student learning and development, student affairs administration, integrative experiences, research tools, and minor area courses. A nine-hour written comprehensive examination must be completed successfully before the student can be admitted to candidacy for the Ph.D.

Requirements are as follows.

MINOR AREA
Ph.D. students earn 9 s.h. in minor area courses taken outside the College of Education. Disciplines such as sociology, psychology, anthropology, history, management and organizational studies, and law inform student affairs administration and research and provide deeper and broader understanding of student affairs practice and scholarship. Leaders in student affairs benefit from the varied perspectives that other disciplines can provide.

DISSERTATION
Students must complete a research dissertation, for a total of 12 s.h.

Ph.D. in Student Development in Postsecondary Education
The Doctor of Philosophy in student development in postsecondary education provides an academic, research-oriented curriculum that draws heavily on developmental and counseling theories. In addition to major course work in student development, students complete a core area in counseling and a minor. Students generally complete the program in three or four years of full-time study. The program is accredited by the Council for the Accreditation of Counseling and Related Educational Programs (CACREP).

ADMISSION TO THE PROGRAM
Applicants who meet the following criteria are given preference for admission: a master’s degree in student personnel, higher education, counselor education, or a related field; an undergraduate or graduate g.p.a. of at least 3.00; a combined verbal and quantitative score of 1100 or higher on the Graduate Record Exam (GRE) General Test; significant contribution to student affairs, community organizations, or successful related work; writing ability; and fit with the program.

The admissions committee considers each applicant’s entire application portfolio. Personal interviews are encouraged and may be required. All applications must include complete application forms; three letters of reference and/or completed recommendation forms; a written statement of goals, interests, and experiences relevant to graduate study in student development at The University of Iowa; official GRE scores; and official transcripts for previous postsecondary course work.

Applications are considered for fall enrollment. Application deadline is January 1.

REQUIREMENTS
The Ph.D. in student development in postsecondary education requires a minimum of 90 s.h. beyond the bachelor’s degree. Most students complete the Ph.D. with up to 110 s.h. of postbaccalaureate work.

Educational foundations covered in the curriculum include counseling, research and statistics, student development, and a minor area of the student’s choice. A nine-hour written comprehensive examination must be completed successfully before the student can be admitted to candidacy for the Ph.D.

The following is a sample curriculum.

Department Core
07C:255 Vocational Psychology (or equivalent) 3 s.h.
07C:347/07P:347 Home/School/Community: System Interventions 3 s.h.
07C:353 Advanced Counseling and Psychotherapy 3 s.h.
07C:357 Advanced Group Counseling and Psychotherapy 3 s.h.
07C:360 Advanced Practicum in Counseling 3 s.h.
07C:380 Practicum in College Teaching 3 s.h.
07C:400 Seminar: Ethics and Issues in Counseling 3 s.h.
07C:454 Supervision Theory and Practice 3 s.h.
07C:455 Supervising the Counseling Practicum (minimum requirement) 3 s.h.
07C:465 Internship in Counselor Education (600 hours minimum) 3 s.h.
07P:243 Intermediate Statistical Methods 3 s.h.

Research Tools and Applications
The following are minimum requirements. Students are expected to master research tools and applications beyond the minimum requirements in order to develop research skills consistent with their professional goals.
At least one course in quantitative research methods chosen from these (at least 3 s.h.):

- 07P:244 Correlation and Regression 4 s.h.
- 07P:245 Applied Multivariate Analysis 3 s.h.
- 07P:246 Design of Experiments 4 s.h.
- 07P:250 Computer Packages for Statistical Analysis 2-3 s.h.
- 07P:252 Introduction to Multivariate Statistical Methods 3 s.h.

At least one course in qualitative research methods 3 s.h.

- 07C:394 Master's Equivalency Research (for students without an approved M.A./M.S. thesis) 1-3 s.h.
- 07C:460 Seminar: Research in Counseling 3 s.h.
- 07C:493 Ph.D. Thesis 10-15 s.h.

**Student Development Theory and Practice**

- 07C:431 Seminar: Research on College Students 3 s.h.
- 07C:432 Seminar: Student Affairs Practice 3 s.h.
- 07C:433 Seminar: Current Issues in Student Affairs 3 s.h.

**MINOR AREA**

Students take a series of courses, typically at least three (9 s.h.) in an area of study outside the department. Courses are selected in collaboration with the minor adviser and are approved by the curriculum plan committee. Curriculum choices for the minor area may include measurement and statistics, comparative education, vocational counseling, academic advising, and sociology.

Graduates of the program who also complete a CACREP Master of Arts are eligible for licensure. Career options include counselor education faculty member who researches college students, student affairs administrator, and licensed practicing counselor (private or university).

**COMPREHENSIVE EXAMINATION**

The comprehensive exam consists of three 3-hour examinations and an oral defense, including a department comprehensive exam; a student development program in postsecondary education comprehensive exam; and an exam on the minor area.

**MASTER'S THESIS EQUIVALENCY**

A master's equivalency research project is required of all students who have not completed a master's thesis. The research project gives the student an opportunity to demonstrate his or her ability to do original research and writing. The research project is evaluated by a committee consisting of the major adviser and at least two other department faculty members. Successful completion includes a written paper and an oral defense. The research project may take the form of an M.A. thesis or of a research paper that can be submitted to a professional journal or to a state or national conference for presentation. The master's equivalency research project must be completed within 24 months or the first 30 s.h., whichever provides the best advantage for the student. The project also must be completed before the student can take comprehensive examinations. Students cannot register for course work beyond 30 s.h. until they have met the master's equivalency requirement. Students may earn 1-3 s.h. for the master's equivalency project.

Students who have completed an M.A. or M.S. thesis at another university or in a field outside student development in postsecondary education should submit the thesis to a committee consisting of the major adviser and at least two other department faculty members. The committee reviews the thesis relative to specific program requirements of a project reflecting inquiry following an acknowledged research methodology. Based on this review, a decision is made as to whether the student must complete a master's equivalency research project. Students must complete the Approval of Master's Equivalency Project Form, available from the Department of Counseling, Rehabilitation, and Student Development.

**DISSERTATION**

The major research project culminating in the Ph.D. thesis (10-15 s.h.) may be on any topic related to student development in postsecondary education. The thesis adviser and the examining committee approve the topic and procedures at a formal prospectus meeting. The examining committee conducts the final oral examination on the thesis.

**Rehabilitation Counseling**

**M.A. in Rehabilitation Counseling**

The Master of Arts in rehabilitation counseling prepares professional counselors to provide assistance in employment, independent living, and personal or economic development to persons with disabilities and other individuals who encounter barriers in meeting their functional needs.

Rehabilitation counselors work in a variety of settings, including public agencies such as state vocational rehabilitation programs and Veterans
Affairs vocational rehabilitation programs; private nonprofit rehabilitation centers and supported employment programs; and private for-profit worker's compensation and insurance rehabilitation agencies. They provide interventions designed to help persons with disabilities adapt to the demands of their environments. They also prepare the environments to accommodate the individual's needs. Assessment, personal and vocational counseling, development of rehabilitation plans, case management, service coordination, psychosocial adjustment, counseling, job development, placement, and follow-up are typical services that rehabilitation counselors provide.

The M.A. program in rehabilitation counseling is accredited by the Council on Rehabilitation Education (CORE). The program's specialty area in community counseling is accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP). Graduates of the M.A. program are eligible for certification by the Commission on Rehabilitation Counselor Certification (CRC) and the National Board on Counselor Certification.

ADMISSION

No specific undergraduate major area of study is required, but a major in one of the social sciences is considered good preparation for the M.A. in rehabilitation counseling. Applicants should have a good academic record and relevant experience, such as assisting individuals with disabilities. Postbaccalaureate work experience relevant to the field of rehabilitation is preferred. The program encourages applications from persons traditionally underrepresented in the field, particularly those with a disability and/or members of minority or ethnic groups. Applicants also must meet the department's admission requirements (see “Admission” later in this section).

Applicants should submit a written statement of their purpose in pursuing the degree and their personal career objectives. A personal interview is required, either in person or by telephone.

Applications for full-time study are accepted for summer session (June) entry. Application deadline is April 1 for U.S. applicants, March 1 for international applicants. Applicants who submit their materials by February 1 receive preference and have maximum access to the Rehabilitation Services Administration Scholars Program.

REQUIREMENTS

The M.S. in rehabilitation counseling requires a minimum of 60 s.h., including a 12 s.h. specialty emphasis area of the student's choice. Students can complete the program in two academic years (four semesters plus two summer sessions, approximately 21 months).

The curriculum blends academic work with supervised clinical experiences. Students take three semesters of practicum concurrently with academic courses. The program concludes with a full-time internship (40 hours per week) during a spring semester. Students generally are assigned to rehabilitation agencies or facilities that meet CORE accreditation standards and that have programs or clientele who match the student's interests and educational objectives. Some placements may require background checks.

Required rehabilitation courses, supervised practicums, internships, and comprehensive examinations are not offered during summer sessions.

Requirements are as follows.

07C:352 Internship in Rehabilitation Counseling and Case Management 12 s.h.
One of these:
07C:350 Advanced Practicum in Rehabilitation Counseling and Case Management 3 s.h.
07C:351 Advanced Practicum in Mental Health and Substance Abuse 3 s.h.

SPECIALIZATION
With their adviser's approval, students select a specialization area. Specialization areas may include aging and rehabilitation, brain injury rehabilitation, law and disability, mental health/substance abuse counseling and psychiatric rehabilitation, case management, multiculturalism, assistive technology, and administration. Students choose 12 s.h. of course work in their area. The specialization must include 9 s.h. of didactic course work and 3 s.h. of professional practice appropriate to the specialty at the practicum or internship level.

COMPREHENSIVE EXAMINATION
In addition to the departmental comprehensive examination, a three-hour written examination on the process and practice of rehabilitation counseling is required. Exams are offered only during fall and spring semesters.

Ph.D. in Rehabilitation Counselor Education
The Doctor of Philosophy in rehabilitation counselor education prepares professionals for leadership roles in rehabilitation counselor education, research, administration, and service delivery systems. It provides rehabilitation counselors the opportunity to master knowledge; clinical, teaching, and supervisory skills; and research competencies at the most advanced levels.

Ph.D. students focus on three areas of advanced development: counselor education and supervision, research, and professional practice. The program is flexible, permitting students to pursue individualized plans of study within the required curriculum. Ph.D. graduates are expected to have sufficient knowledge and skill to teach at colleges and universities, supervise other professionals, and provide clinical services to clients. They also should have competencies to engage in and evaluate theoretical, qualitative, and empirical research.

ADMISSION
Applicants should have a master's degree in rehabilitation counseling or a related area; a graduate g.p.a. of 3.00 or higher; a combined verbal and quantitative score of 1100 or higher on the Graduate Record Exam (GRE) General Test; and one year of full-time work experience in rehabilitation or a related field. Applicants should include a written statement of purpose for pursuing the Ph.D. in rehabilitation counselor education and personal career objectives, and three letters of recommendation. A personal interview is required.

Applications are accepted for fall entry. Application deadline is January 1.

REQUIREMENTS
The Ph.D. in rehabilitation counselor education requires a minimum of 90 s.h. of graduate credit. Most students complete their course work in three years and take a fourth year to complete the dissertation. Students who have not completed a master's degree in rehabilitation counseling must take appropriate masters-level courses or their equivalents. This combination of master's and doctoral course work ensures exposure to vocational rehabilitation as well as independent living rehabilitation processes, concepts, programs, and services.

Each student is required to submit a curriculum plan. The rehabilitation counseling faculty reviews each student annually. To continue in the program, students must meet the department's requirements for maintaining candidacy.

Requirements are as follows.

Department Core
07C:255 Vocational Psychology (or equivalent) 3 s.h.
07C:353 Advanced Counseling and Psychotherapy 3 s.h.
07C:357 Advanced Group Counseling and Psychotherapy 3 s.h.
07C:400 Seminar: Ethics and Issues in Counseling 3 s.h.

Program Requirements
Students are expected to have completed core rehabilitation counseling requirements during master's degree work (see "M.A. in Rehabilitation Counseling" above). The adviser and program faculty determine which master's-level courses must be taken to correct deficiencies. Students also must complete the following.
School Counseling

M.A. in School Counseling

The Master of Arts in school counseling prepares individuals to work effectively as counselors in K-12 school settings. The program is accredited by the Council for the Accreditation of Counseling and Related Educational Programs (CACREP). Successful graduates are eligible for elementary and/or secondary school counselor licensure in Iowa and for national counselor certification by the National Board for Certified Counselors.

ADMISSION

Applicants should have an undergraduate g.p.a. of 3.00 or higher; a combined verbal and quantitative score of 1000 or higher on the Graduate Record Exam (GRE) General Test; and successful experiences with children and/or adolescents.

Applications are accepted for fall or summer entry. Application deadline is April 1 for U.S. applicants; March 1 for international applicants.

REQUIREMENTS

The M.A. in school counseling requires a minimum of 48 s.h. During the first few semesters, students take core cognate courses and the microcounseling clinical skills laboratory. Then they enter a counseling practicum followed by an internship. Students who enter without teaching licensure are required to take additional course work in education (07E:170 Classroom Management, 07E:100/07S:100 Foundations of Education, and 07U:100 Foundations of Special Education) to meet school counselor licensure standards. Students are expected to complete at least 100 contact hours in practicum and 600 contact hours in internship activities in an approved school setting, under the supervision of an experienced licensed school counselor and a University faculty supervisor.

Students must complete program and department core courses, except electives, before enrolling in 07C:300 Practicum in School Counseling for the fall semester of the second year. Students who are not licensed teachers must complete course work in education before enrolling in the practicum.

Each student's progress is reviewed periodically by the program faculty. Students who have successfully completed all prerequisite courses for 07C:300 Practicum in School Counseling are reviewed in the spring to assure they are
prepared for the practicum, which is offered only in the fall semester. During the fall, students are evaluated to assure their readiness for the internship 07C:321 or 07C:322, which requires assignment in approved schools for the spring semester.

Suggested Plan of Study

The following plan of study suggests classes for four semesters of full-time study. Students who do not have teacher licensure are required to complete at least three additional courses in education before the second year of classes.

First year, fall semester:

- 07C:200 Professional School Counselor 3 s.h.
- 07C:221 Theories of Counseling and Human Development Across the Life Span 3 s.h.
- 07C:250 Multiculturalism in Helping Professions 3 s.h.
- 07C:278 Applied Microcounseling 3 s.h.
- 07P:143 Introduction to Statistical Methods 3 s.h.

First year, spring semester:

- 07C:202 Introduction to Group Counseling 3 s.h.
- 07C:203 Career Guidance and Job Placement 3 s.h.
- 07C:222 Counseling Children and Adolescents in Schools 3 s.h.
- 07C:254 Appraisal in Counseling 3 s.h.
- 07P:200 Educational Psychology 3 s.h.
- 07C:281 Introduction to Computer Technology in the Helping Professions 1 s.h.

Second year, summer session:

- Courses not completed during first year

Second year, fall semester:

- 07C:230 School Counseling Program Leadership and Management 3 s.h.
- 07C:300 Practicum in School Counseling 3 s.h.
- 07U:140 Characteristics of Disabilities 3 s.h.

Second year, spring semester:

- 07C:321/07C:322 Internship in School Counseling—Elementary and Secondary (clinical instruction, 600 hours) 6 s.h.
- Approved electives 3 s.h.

Counselor Education

Ph.D. in Counselor Education

The Doctor of Philosophy in counselor education prepares students with knowledge and skills basic to counseling, teaching, consulting, supervising counselors, and doing research. Graduates enter professional work as counselors, counselor supervisors, counselor educators, researchers and/or consultants, or work in other positions requiring expertise in human relations.

Counselor education graduates are prepared to teach the knowledge and skills required of professional counselors and to supervise beginning and advanced counselors; perform counseling interventions with individuals and groups; and teach human relations skills in colleges or universities. They provide professional consultation with counseling practitioners and policy makers about counseling program development and evaluation. They also may perform research that contributes to knowledge about counseling, supervision, and counselor education.

The program is accredited by the Council for the Accreditation of Counseling and Related Educational Programs (CACREP). The American Counseling Association (ACA) and the Association for Counselor Education and Supervision (ACES) are the professional organizations most related to program activities.

ADMISSION

In addition to the department’s admission requirements (see “Admission” later in this section), Ph.D. applicants must provide evidence of successful experience in counseling or a closely related profession. Applicants without experience may be admitted if their credentials indicate exceptional strengths.

Applications are accepted for fall entry. Application deadline is January 1.

REQUIREMENTS

The Ph.D. in counselor education requires 96 s.h. of graduate study. Students complete required courses in counseling, research tools and applications, and a minor outside the department. They also take comprehensive examinations and complete a dissertation.

Required Courses

- 07C:255 Vocational Psychology (or equivalent) 3 s.h.
- 07C:347 Home/School/Community System Interventions 3 s.h.
07C:353 Advanced Counseling and Psychotherapy 3 s.h.
07C:357 Advanced Group Counseling and Psychotherapy 3 s.h.
07C:360 Advanced Practicum in Counseling 3 s.h.
07C:380 Practicum in College Teaching 3 s.h.
07C:400 Seminar: Ethics and Issues in Counseling 3 s.h.
07C:454 Supervision Theory and Practice 3 s.h.
07C:455 Supervising the Counseling Practicum 3 s.h.
07C:465 Internship in Counselor Education (at least 240 hours) 3 s.h.
07P:385 Teaching and Learning in Higher Education 3 s.h.
An advanced multicultural counseling course 3 s.h.
At least one course in human development 3 s.h.
At least one advanced course in psychological or educational measurement 3 s.h.

Research Tools and Applications
The following are minimum requirements. Students are expected to master research tools and applications beyond the minimum requirements in order to develop research skills consistent with their professional goals.

07C:394 M.A. Equivalency Research (for students without an approved M.A./M.S. thesis) 1-3 s.h.
07C:460 Seminar: Research in Counseling 3 s.h.
07C:493 Ph.D. Thesis 10-15 s.h.
07P:243 Intermediate Statistical Methods 4 s.h.
At least one course in qualitative research methods 3 s.h.
At least one course in quantitative research methods chosen from these (at least 3 s.h.): 07P:244 Correlation and Regression 4 s.h.
07P:245 Applied Multivariate Analysis 3 s.h.
07P:246 Design of Experiments 4 s.h.
07P:250 Computer Packages for Statistical Analysis 2-3 s.h.
07P:252 Introduction to Multivariate Statistical Methods 3 s.h.

Minor Area
Students take a series of courses (typically a minimum of three) in an area of study outside the Department of Counseling, Rehabilitation, and Student Development. They select course work in collaboration with their minor area adviser, a faculty member from the area, and with approval of the curriculum plan committee.

Master's Thesis Equivalency
Students must satisfy the program’s requirements. They must complete an M.A. thesis equivalency within 30 s.h. or 24 months after entering the program, and before taking the comprehensive examination.

COMPREHENSIVE EXAMINATION
The comprehensive examination consists of three 3-hour exams and an oral defense, including a department comprehensive exam, a counselor education program comprehensive exam, and an exam on the minor area. The comprehensive exam may be taken during the student’s final semester of course work.

DISSERTATION
The major research project culminating in the doctoral thesis may be on any topic related to counseling and counselor education. The thesis adviser and the examining committee approve the topic and procedures at a formal prospectus meeting. The final oral examination on the thesis is conducted by the examining committee. Students usually earn 10 s.h. for dissertation work, but in some instances they may earn up to 15 s.h.

Admission
All M.A. and Ph.D. applicants must submit the following:

- a completed graduate application form;
- copies of official transcripts of all previous undergraduate and graduate college work;
- official report of Graduate Record Examination (GRE) General Test verbal and quantitative scores;
- a statement of the applicant’s reasons for seeking an advanced degree in the department, including a statement of personal career objectives;
- three current letters of recommendation from persons in a position to assess both the applicant’s prospects for completing either the M.A. or Ph.D., and his or her commitment to the profession.

The department may request a personal or telephone interview.

The following admission standards are considered for individual program admission decisions.

M.A. applicants should have an undergraduate g.p.a. of at least 3.00 and a combined verbal and quantitative GRE General Test score of 1000 or higher.
Ph.D. applicants should have an undergraduate g.p.a. of at least 3.00, or if they hold a graduate degree, a graduate g.p.a. of at least 3.00; and a combined verbal and quantitative GRE General Test score of 1100 or higher.

Typically, doctoral students are not admitted unless they have completed a master's degree in counseling or a related field. Relevant work experiences are important. Students who are accepted without a related master's degree must complete core master's-level course work before taking advanced Ph.D. courses. Required remedial courses and experiences are determined in consultation with the adviser and are included in a student's curriculum plan.

Visit the Department of Counseling, Rehabilitation, and Student Development web site for details about admission and program requirements.

**INTERNATIONAL APPLICANTS**

International applicants must score at least 550 (paper-based) or at least 213 (computer-based) on the Test of English as a foreign language (TOEFL). The department may require applicants with lower TOEFL scores to complete University of Iowa course work in English language fluency. TOEFL scores must be submitted with the application for admission.

**Final Decision, Special Requirements**

The criteria listed above are minimum standards for admission. Final admission decisions are made by faculty committees. Some programs may have special admission requirements due to licensure/certification standards. Special admission requirements are listed with individual program information.

**Conditional Admission**

Applicants who do not meet the requirements for regular admission may be admitted on conditional status if the faculty determines that they show strengths and promise warranting conditional admission. Applicants admitted on conditional status must satisfy the following requirements in order to achieve regular status.

M.A. students admitted on conditional status must complete at least 12 s.h. of core courses (approved by an adviser) over two consecutive sessions and earn a cumulative g.p.a. of at least 3.00.

Ph.D. students admitted on conditional status must complete at least 12 s.h. of core courses (approved by an adviser) over two consecutive sessions and earn a cumulative g.p.a. of at least 3.00.

**Maintaining Candidacy**

All graduate students must meet the following standards in order to maintain their candidacy for a degree:

- maintain a g.p.a. of at least 3.00;
- successfully complete a practicum, internship, or equivalent professional experience;
- maintain professional behavior consistent with the American Counseling Association code of ethics and any additional code of professional ethics adhered to in any agency in which the student completes a practicum or internship;
- demonstrate progress toward the degree through successful completion of semester hours specified in the curriculum plan and active registration each session (exceptions may be approved by the adviser).

Each student’s academic and professional progress is reviewed annually. A written report is provided to the student and a copy is placed in his or her department file.

**Probational Status**

M.A. and Ph.D. students who earn a cumulative g.p.a. lower than 3.00 are placed on probational status and are notified in writing. Students on probational status have two consecutive sessions to raise their grade-point average to the established standard. If that requirement is not met, the student may be removed from the program. Each student is allowed one probational status during his or her program of study.

**Application**

For application materials, visit the Department of Counseling, Rehabilitation, and Student Development web site.

Applications must be complete before they can be reviewed. Applicants are responsible for providing a complete application dossier; to check on whether an application dossier is complete, contact the College of Education Office of Teacher Education and Student Services. Application forms are available on the web.

Applicants are notified in writing after their applications have been reviewed. Applicants who are accepted must reply in writing in order to maintain their admission status.
Financial Support

Depending on federal funding, graduate training fellowships may be available for M.A. and Ph.D. students entering rehabilitation counseling through the Rehabilitation Services Administration’s Scholars Program. Many other graduate students in the Department of Counseling, Rehabilitation, and Student Development hold a wide variety of graduate assistantships. For example, many of the University’s student service units award part-time assistantships to graduate students in the department. Applicants for assistantships should contact the department or the coordinator of the particular graduate program they plan to enter.

Applicants seeking fellowships or assistantships should complete their applications as early as possible.

Facilities

In addition to the counseling suite on campus, which serves as a laboratory for training, a wide variety of supervised clinical experiences are available in community agencies, schools, and colleges, as well as throughout the University. Internships may be completed in approved sites nationwide.

Courses

07C:010 Belin-Blank Center First-Year Seminar 1 s.h.
Presentations and discussions by University resource experts and Belin-Blank Center staff. Prerequisite: Belin-Blank Center student standing.

07C:081 Making a Vocational-Educational Choice 2 s.h.
Vocational decision-making process, self-evaluation, exploration of the world of work; for students who are uncertain about their educational and vocational goals.

07C:112 Human Sexuality 1-3 s.h.
Physiological and psychological aspects of human sexuality. Same as 042:112, 096:112.

07C:119 Family Issues in Giftedness 1 s.h.
Family dynamics and issues that arise when one or more children are identified as gifted; parent/child, sibling, school/family relationships.

07C:120 Psychology of Giftedness 3 s.h.
Theories of learning, child development, motivation; issues unique to gifted education. Same as 07P:120.

07C:121 Assessment of Giftedness and Academic Talent 3 s.h.
Interpretation of standardized tests and other measurement instruments used to identify academic talent and program effectively for grades K-12; ability, aptitude, achievement tests; current issues in the use of various instruments. Same as 07P:121.

07C:123 Gender Issues and Giftedness 1 s.h.
Effect of gender on development of giftedness; differential needs of girls, boys; strategies for effective teaching, gender equity.

07C:123 Ethnic and Cultural Issues and Giftedness 1 s.h.
Effect of ethnicity and culture on development of giftedness; special needs of Black, Hispanic, Native American, and Asian gifted students; strategies for identification, programming.

07C:125 Counseling and Psychological Needs of the Gifted 1 s.h.
Psychological aspects of giftedness, counseling techniques appropriate for gifted children, adolescents; socio-emotional concerns, career development, underachievement. Same as 07P:125.

07C:126 Cognitive and Affective Needs of Underachieving Gifted 1 s.h.
Diagnostic strategy for identifying types of underachievement, teaching and counseling interventions appropriate for each. Same as 07P:126.

07C:127 Research and Theory in Talent/Giftedness 1 s.h.
Bimonthly research symposium. Same as 07P:127.

07C:128 Advanced Leadership Seminar in Gifted Education 1 s.h.
Development of administrative policies and programming based on empirical research; for experienced leaders in gifted education.

07C:129 Creativity: Issues and Applications in Gifted Education 1 s.h.
Theories that underpin contemporary definitions of creativity; instruments developed to measure creativity, activities in the school environment that enhance or inhibit student creativity. Same as 07P:129.

07C:130 Introduction to Educating Gifted Students 3 s.h.
Fundamental issues such as curriculum, counseling, family issues, gender and minority issues. Same as 07U:137.

07C:145 Marriage and Family Interaction 3 s.h.
Contemporary American marriage, family relationships, mate selection.

07C:146 Marriage and Family Interaction 3 s.h.
Marriage and Family Interaction 3 s.h.
Evolution of the family therapy movement and issues related to functional and dysfunctional family systems; significant models of family therapy and specific techniques.

07C:178 Microcounseling 1-3 s.h.
Basic skills of listening, responding, empathy, focus; advanced skills of meaning, confrontation, reframing, directives, action skills.

07C:180 Topical Seminar for Helping Professionals arc.
Topics for the continuing education of counselors and related professionals.

07C:182 Workshop for Helping Professionals 1-2 s.h.
One-week workshop; students choose a topic for community practitioners working with or interested in counseling individuals, groups, families, organizations.

07C:185 Introduction to Substance Abuse 3 s.h.
Theories of addiction and pharmacology of psychoactive drugs; legal, familial, biological, multicultural, historical issues related to substance use and misuse.

07C:186 Introduction to Assistive Technology 3 s.h.
How assistive technology can be used for attainment of goals in education or work. Same as 07U:187.

07C:188 Practicum in Teaching and Curriculum Development in Gifted Education 1-6 s.h.
Experience in developing course materials for classes offered through the Belin Center. Same as 07E:188, 07S:188, 07U:188.

07C:190 Group Processes for Related Professions 3 s.h.
Small group procedures for personal and organizational development in educational settings; discussions of theoretical
07C:193 Individual Instruction—Undergraduate
Prerequisite: consent of instructor.

07C:194 Interpersonal Effectiveness
3 s.h.
Paradigms and techniques that enhance interpersonal relationship skills.

07C:199 Counseling for Related Professions
3 s.h.
Counseling theories and techniques, ethical and multicultural considerations; small-group discussions, demonstrations, lectures.

07C:200 Professional School Counselor
3 s.h.
Professional identity of school counselors, K-12 school counseling program delivery systems, legal and ethical issues. Prerequisite: admission to school counseling program or consent of instructor.

07C:202 Introduction to Group Counseling
3 s.h.
Research, theory, ethics, planning, and practice in group counseling; leadership styles and multicultural considerations; group participation. Prerequisite: counseling, rehabilitation, and student development enrollment or consent of instructor.

07C:203 Career Guidance and Job Placement
3 s.h.
Preparation for counselors and student affairs professionals; career development concepts and theories; family and work, career counseling goals and objectives, exemplary techniques and materials, career program planning, evaluation procedures. Prerequisite: counseling, rehabilitation, and student development enrollment or consent of instructor.

07C:210 Rehabilitation Client Assessment
3 s.h.
Process and practice of assessing persons with disabilities for rehabilitation plan development and decision making; multicultural and ethical considerations.

07C:216 Group Leadership in Human Sexuality
0-3 s.h.
Repeatable. Same as 042:216, 096:216.

07C:221 Theories of Counseling and Human Development Across the Life Span
3 s.h.
Philosophical bases, ethical considerations, processes, issues, multicultural and life-span developmental considerations in counseling theories and techniques. Prerequisite: counseling, rehabilitation, and student development M.A. enrollment or consent of instructor.

07C:222 Counseling Children and Adolescents in Schools
3 s.h.
Theory and practice of school-based counseling interventions; child and adolescent development; prevention; special topics. Prerequisite: 07C:221 or 07C:278 or consent of instructor.

07C:230 School Counseling Program Leadership and Management
3 s.h.
Comprehensive K-12 school counseling program components and structures; program leadership, planning, accountability, behavioral consultation and collaboration; ethical, multicultural, family considerations.

07C:237 Seminar in Gifted Education
2-3 s.h.
Teaching and counseling needs of gifted students K-12; intensive 10-day residential program. Prerequisites: work as teacher with Belin Fellowship and consent of instructor.

07C:238 Advanced Seminar in Gifted Education
1 s.h.
Supervisory, administrative, and research issues; fellowships for seminar participants. Prerequisites: 07C:237 and consent of instructor.

07C:241 Introduction to Rehabilitation Counseling and Case Management
3 s.h.
Historical, philosophical, legislative, societal, and multicultural overview of rehabilitation process and practice; roles of rehabilitation professionals, nature of rehabilitation agencies, resources, contemporary issues and ethics.

07C:247 Medical Aspects of Disability
3 s.h.
Medical evaluation as part of the rehabilitation process; body systems, medical terminology; medical description of disabilities; functional limitations; projection of potential for rehabilitation applied to planning and placement.

07C:248 Diagnosis and Treatment Planning for Psychiatric Rehabilitation
3 s.h.
Psychiatric conditions, their diagnostic criteria, treatment planning considerations and outcomes; medical and psychiatric rehabilitation models, interrelationship in providing services to persons with psychiatric disabilities; functional assessment and client-driven rehabilitation planning for community reintegration. Prerequisite: counseling, rehabilitation, and student development enrollment or consent of instructor.

07C:250 Multiculturalism in Helping Professions
3 s.h.
Theory and application of multicultural competency in the helping professions; ethical treatment of clients in the context of a multicultural diverse society; knowledge, skill, self-awareness components relevant for helping practitioners.

07C:254 Appraisal in Counseling
3 s.h.
Aptitude, interest, personality tests used for assessment in counseling; laboratory practice in test administration, scoring, interpretation, reporting, ethical and multicultural considerations; testing procedures such as behavior assessments and personal documents. Pre- or corequisite: 07P:143 or equivalent.

07C:255 Vocational Psychology
3 s.h.
Major concepts and research evidence about life-span vocational behavior; theories of vocational choice, adjustment, development in a multicultural world.

07C:256 Marriage and Family Counseling and Psychotherapy
3 s.h.
Introduction to counseling theory, ethics, and techniques as applied to problems of marriage and the family over the life span; multicultural considerations. Prerequisites: advanced graduate standing and consent of instructor. Recommended: 07C:178 and 07C:221.

07C:263 Consultation Theory and Practice
2-3 s.h.
Analysis of various consultation models, such as behavioral and mental health, ethical and multicultural considerations. Same as 07P:263, 07W:263.

07C:264 Concepts of Addiction, Risk Behavior, and Prevention
3 s.h.
Addictive behaviors, high-risk behavior, youth vulnerable to risk, models of prevention and intervention; drug classification, perspectives of risk from a developmental perspective, models of community and school-based prevention and intervention; individual and environmental factors that contribute to onset, escalation, and maintenance of problem behavior, with focus on multicultural and diversity issues.

07C:265 Intervention and Assessment of Addictive Disorders
3 s.h.
Substance abuse, smoking, eating, and gambling behaviors; approaches relevant to acute interventions and long-term maintenance, with focus on individual and community-based perspectives; assessment instruments.

07C:266 Issues in Addictions Treatment
3 s.h.
Issues relevant to specific populations (e.g., psychiatric disability, geriatric populations, gay/lesbian/intersex/transgender population, college students, people with disabilities).

07C:270 Issues and Ethics in Counseling
3 s.h.
Ethical standards and decision making, current issues, and legal and multicultural considerations for counseling in agencies and schools; emphasis on professional practice.

Teaching and Learning

Chair: Gary M. Sasso
Clinical associate professor: Ellen Herman
Assistant professors: Gail Boldt, Heriberto Godina
Assistant professor emerita: Iva M. Bader
Clinical assistant professors: Pamela Ries, Amy Shoultz
Undergraduate degrees: B.A., B.S. (granted through College of Liberal Arts and Sciences)
Graduate degrees: M.A.T., M.A., M.S., Ph.D.
Web site: http://www.education.uiowa.edu/coeci/

Department of Teaching and Learning programs prepare graduates for positions in public schools, local and state education agencies, clinical settings, and institutions of higher education. All licensure programs are approved by the Iowa Department of Education. Undergraduate students pursuing a major in elementary education must meet the College of Liberal Arts and Sciences requirements for the Bachelor of Arts or Bachelor of Science; see the CLAS Student Academic Handbook.

Teacher Education and Licensure/Certification

Before taking required professional education courses, undergraduate students must be admitted to the Teacher Education Program (TEP). The application for admission should be submitted to the College of Education Office of Teacher Education and Student Services. Deadlines for application are March 15 and October 15 for admission to restricted course work in the following semester. Each program reviews applications and chooses a limited number of students for admission.

In order to be considered for admission, students must have completed a minimum of 30 s.h. of course work with a University of Iowa and cumulative g.p.a. of at least 2.70 at the time of application. For some subject areas, applicants must meet additional criteria. A limited number of applicants are accepted into each Teacher Education Program, so a 2.70 g.p.a. does not ensure admission. Admission decisions are based on grade-point average in the major and other criteria relevant to teaching success.

The application process includes submission of an application form, a writing sample, two letters of recommendation, and an Iowa criminal history check request form. Applicants are required to submit PRAXIS I test scores in mathematics, reading, and writing. Scores from either the PRAXIS computer-based tests (CBT) or the PRAXIS Pre-Professional Skills Tests (PPST) are accepted. Applicants must have a composite score of at least 522, with a minimum score of 170 on any single portion of the test. Applicants must also submit verification of completion of a 10-hour volunteer experience in a K-12 classroom setting.

If at any time after admission a student’s University of Iowa and/or cumulative g.p.a. falls below 2.70, he or she is placed on probation for one semester. Students who do not attain a 2.70 g.p.a. during the probationary semester are dropped from the TEP. Students should consult a College of Education adviser in their program area, or the Office of Teacher Education and Student Services for more information on admission criteria.

Graduate students who apply to the Graduate College for a teacher licensure program must apply separately for admission to the Teacher Education Program. Deadlines for application to either program are October 15 or March 15 for admission to restricted course work in the following semester. Graduate and postbaccalaureate students may submit Graduate Record Exam (GRE) General Test scores instead of PRAXIS I scores.
A limited number of applicants are accepted into each Teacher Education Program, so meeting the Graduate College admission requirements does not ensure admission. Admission decisions are based on grade-point average in the undergraduate major and other criteria relevant to teaching. Upon admission to the TEP, students are assigned an education adviser.

**Admission to Student Teaching**

Admission to the student teaching semester requires a separate application. Applications must be submitted one year before the student teaching semester. Applicants’ credentials and academic and professional progress are reviewed to ensure that the student is qualified for placement in the profession. Verification that the student meets all specific program area requirements is made when the student applies for student teaching.

Consult a College of Education adviser or the Office of Teacher Education and Student Services for information about admission and requirements for student teaching in specific licensure programs.

**Elementary Education**

The undergraduate elementary education program is designed to prepare students to teach kindergarten through sixth grade. The College of Liberal Arts and Sciences and elementary education requirements total 113-139 s.h. Students who meet or test out of the General Education Program requirements in rhetoric, foreign language, mathematics, and other areas may be able to satisfy their program requirements in as few as 113 s.h.

**FOUNDATION COURSES**

These four courses must be completed before methods courses (Block A/B below) are begun.

- **07E:090 Orientation to Elementary Education** 1 s.h.
- **07E:100 Foundations of Education** 3 s.h.
- **07E:102/07S:102 Technology in the Classroom** 2 s.h.
- **07P:075 Educational Psychology and Measurement** 3 s.h.

**METHODS COURSES**

**Block A**

Three courses taken concurrently:

- **07E:123 Reading and Responding to Children’s Literature** 2 s.h.
- **07E:160 Methods: Elementary School Language Arts** 3 s.h.
- **07E:164 Methods: Elementary School Reading** 3 s.h.

**Block B**

Three courses taken concurrently:

- **07E:161 Methods: Elementary School Social Studies** 3 s.h.
- **07E:162 Methods: Elementary School Science** 3 s.h.
- **07E:163 Methods: Elementary School Mathematics** 3 s.h.

**Methods Practicum**

Students complete a semester-length practicum and classroom management in their area of specialization after completing the appropriate methods block.

- **07E:170 Classroom Management** 2 s.h.
- **07E:172 Reading Instruction: Teaching Practicum** 4 s.h.
- **07E:174 Elementary Education: Practicum** 4 s.h.

**OTHER REQUIREMENTS**

- **07B:180 Human Relations for the Classroom Teacher** 3 s.h.
- **07E:127 Physical Education and Health for Elementary Teachers** 2 s.h.
- **07U:100 Foundations of Special Education** 3 s.h.
- **07E:120 Methods and Materials: Music for the Classroom Teacher** 2 s.h.
- **07E:122 Methods and Materials: Art for the Classroom Teacher** 2 s.h.
- **22M:006 Logic of Arithmetic** 3 s.h.
- **22M:012 Theory of Arithmetic** 3 s.h.

**AREA OF SPECIALIZATION**

Students must complete a minimum of 24 s.h. in one of the following areas of specialization: art, English language arts, ESL, hearing impaired, history, mathematics, music, reading, science, or social science. Courses in the area of specialization may be taken pass/nonpass if they are offered with the pass/nonpass option.

The special education Instructional Strategist I: Mild/Moderate (K-6) area of specialization requires separate admission. Applicants must already be admitted to the elementary education program. Applications for the specialization program are due July 15. Twenty-four students are admitted each year.
Requirement lists for each area of specialization are available from the Department of Teaching and Learning office.

**STUDENT TEACHING**

Students seeking initial licensure must complete a minimum of 14 s.h. of student teaching.

- 07E:190 Supervised Teaching in the Elementary School: Interactive Phase 7 s.h.
- 07E:191 Supervised Teaching in the Elementary School: Pre- and Post-Active Phase 7 s.h.

**TRANSFER STUDENTS**

Before they student teach, transfer students must complete 07E:090; 07E:102; two courses chosen from 07E:123, 07E:160, 07E:161, 07E:162, 07E:163, and 07E:164 at The University of Iowa; and a practicum. Transfer students must follow the normal application procedures. In addition, they are asked to complete a disclosure statement describing all practicum experiences they have taken at other institutions and a release statement allowing the College of Education Office of Teacher Education and Student Services to contact all institutions where they have done professional preparatory work.

**ADDING ENDORSEMENTS TO LICENSES**

As an addition to the K-6 Iowa endorsement, students may complete requirements for an Iowa subject area endorsement (see “Area of Specialization,” above). This option is not open to students who choose the Strategist I area of specialization.

The University of Iowa also offers an added endorsement in talented and gifted education.

**Secondary Education**

Undergraduate students seeking secondary school licensure/certification are degree candidates in the College of Liberal Arts and Sciences. They must complete the requirements for the Bachelor of Arts, Bachelor of Science, Bachelor of Music, or Bachelor of Fine Arts degrees; see the CLAS Student Academic Handbook.

Graduate students may be admitted to a program leading to teacher licensure/certification as “certification only” candidates in the Graduate College. They are subject to all Graduate College policies; see the Rules and Regulations of the Graduate College or the Graduate College section of the Catalog. Eligible graduate students also may complete initial teacher licensure/certification requirements by pursuing an M.A.T. in English education, foreign language education, or science education, or an M.A. in social studies (program B).

Licensure/certification requires a major of at least 30 s.h. of course work in a subject area taught in the secondary school. Course requirements for each major area are available from the Department of Teaching and Learning office. Candidates for secondary school teaching licensure/certification also may receive approval to teach in additional subject areas by completing an approved program of 12-24 s.h. or more of course work in those areas.

Secondary school teacher preparation programs are provided in the following areas.

**Art**
- *Coaching*
- English
- *English as a second language*
- Foreign languages—Chinese, French, German, Italian, Japanese, Latin, Russian, Spanish
- *Hearing impaired*
- *Journalism*
- Mathematics
- Music
- *Reading*
- Science, including *physical science, biological sciences, chemistry, *general science, physics, earth science, and 9-12 all science
- Social science, including anthropology, economics, geography, history, political science, psychology, and sociology
- *Talented and gifted*
- *Available as an additional approval area only; a major in one of the other areas is required for licensure.*

An Iowa secondary teaching license qualifies holders to teach in grades 7-12. Students planning to teach art or music typically complete a program that prepares them for both elementary- and secondary-level licensure.

Secondary teacher preparation programs in mathematics and foreign language also offer a program that leads to licensure/certification as a subject matter specialist in grades K-6. This K-6 licensure/certification is available only in the same subject area as the secondary certification.

For more information and the name of an adviser, contact the Department of Teaching and Learning.

**REQUIREMENTS**

Undergraduates working toward licensure/certification to teach in secondary
schools must complete the following requirements, in addition to the requirements of their major. All course work must be completed before student teaching.

One introduction to teaching course 2-3 s.h.
07B:180 Human Relations for the Classroom Teacher 3 s.h.
07E:102/07S:102 Technology in the Classroom (must be taken during student’s first semester in the college) 2 s.h.
07P:075 Educational Psychology and Measurement 3 s.h.
07S:100 Foundations of Education 3 s.h.
07S:190 Orientation to Secondary Education (must be taken during student’s first semester in the college) 1 s.h.
07S:195 Teaching Reading in Secondary Content Areas (must be taken during student’s first semester in the college) 1 s.h.
07U:100 Foundations of Special Education 3 s.h.
One or more methods of teaching courses in the major field 3-9 s.h.
One college-level mathematics course (except 22M:001, 22M:002, and 22M:003) Student teaching 12 s.h.

For initial licensure in all subject areas, student teaching must be an all-day, full-semester experience. Most students are placed in a district within a 60-mile radius of Iowa City. Placements outside this area require special approval and are considered on an individual basis. Special programs provide experience in districts with diverse populations, including Aldine, Texas (Houston area); Adams County, Colorado (Denver area); Rialto, California; and Clark County, Nevada (Las Vegas area). In most program areas, students also may apply to student teach at international sites for the second half of the semester.

Additional information about options for student teaching and application procedures is available from the Office of Teacher Education and Student Services. Applications for student teaching must be submitted during the calendar year before the student teaching semester. The deadline is November 15 for students planning to student teach the following fall semester and February 15 for students planning to student teach the following spring semester.

TRANSFER STUDENTS

Transfer students must complete 07S:102, 07S:190, 07S:195, appropriate methods classes, a practicum at The University of Iowa, and all course work in the major before they student teach. Transfer students must follow the normal application procedures. In addition, they are asked to complete a disclosure statement describing all practicum experiences they have taken at other institutions and a release statement allowing the College of Education Office of Teacher Education and Student Services to contact all institutions where they have done professional preparatory work.

Special Education

Students may be admitted to the Graduate College for the purpose of obtaining a master’s degree in special education. This degree typically includes certification in an area or areas selected by the student. See “Admission” under “Special Education” below.

Graduate Programs

The Department of Teaching and Learning offers graduate programs in elementary education, secondary education, and special education.

Elementary education programs include M.A. and Ph.D. in early childhood education, M.A. in developmental reading; and Ph.D. in language, literacy, and culture.

Secondary education programs include M.A. and Ph.D. in art education; M.A. and Ph.D. in curriculum and supervision; M.A. and M.A.T. in English education; M.A. and M.A.T. in foreign and second languages education; Ph.D. in foreign language and ESL education; a program leading to ESL endorsement; Ph.D. in language, literacy, and culture; M.A. and Ph.D. in mathematics education; M.S. in mathematics with education option; M.A. and Ph.D. in music education; M.A.T., M.S., and Ph.D. in science education; and M.A. and Ph.D. in social studies education.

Special education programs include M.A. and Ph.D. in special education; Ed.S. in special education administration; and a program leading to special education consultant authorization.

Applicants for admission to University of Iowa graduate degree programs must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.
Elementary Education

M.A. in Elementary Education
The Master of Arts in elementary education is designed to prepare students to serve as team leaders, grade level or subject area supervisors, curriculum consultants, or master teachers.

ADMISSION
Applicants must meet the admission requirements of the Graduate College. They must have completed an undergraduate teacher preparation program in either early childhood or elementary education.

REQUIREMENTS
The M.A. in elementary education with thesis requires a minimum of 30 s.h.; the M.A. without thesis requires a minimum of 32 s.h. Students must take 24 s.h. in University of Iowa courses and complete 8 s.h. on campus. Course work completed 10 or more years before admission does not count toward the M.A.

Elementary Education Graduate Core
All of these (9 s.h.):
07B:120 Teaching in a Culturally Diverse Society (or equivalent approved by adviser) 3 s.h.
07E:267 Inquiry-Based Curriculum Development in Early Childhood and Elementary Education 3 s.h.
07E:300 Design and Organization of Curriculum 3 s.h.

Instructional Cluster
Students take three courses (9 s.h.) that deal with instructional issues in the elementary classroom. The courses are drawn from one or more of the following areas: art education, music education, social studies education, science education, math education, special education, other acknowledged specialization areas. Students must choose courses outside their specialization area.

Specialization
Students take three courses (9 s.h.) in their specialization area, chosen in consultation with their adviser.

Electives
Students choose 6 s.h. of elective course work.

COMPREHENSIVE EXAMINATION
M.A. students are expected to pass a comprehensive exam that covers the course work in the graduate core, course work in the specialization area, and additional course work deemed appropriate by their adviser.

M.A. in Developmental Reading
The Master of Arts in developmental reading prepares graduate students for positions as reading specialists in kindergarten and grades 1-12. The required course work develops the skills, knowledge, and competence needed for supervisory, curricular, and remedial teaching positions in reading. The program also builds a background in reading for students who want to specialize further in the area and eventually to teach and/or conduct research at a college or university.

Successful completion of this program, combined with one year of successful teaching experience that includes teaching reading as a significant part of the responsibility, qualifies the student for certification as a reading specialist.

ADMISSION
Applicants must meet the admission requirements of the Graduate College. They must have an undergraduate g.p.a. of at least 3.00; hold an early childhood, elementary, or secondary school teaching certificate; and show evidence of completing two years of successful teaching experience.

REQUIREMENTS
The M.A. in developmental reading requires a minimum of 33 s.h. with thesis; the M.A. without thesis requires a minimum of 35 s.h. Students must complete the following courses.
07E:171 Reading and Writing: Processes and Instruction 3 s.h.
07E:264 Early Literacy Development and Instruction 2-3 s.h.
07E:265 Reading and Writing Across Intermediate Grades 3 s.h.
07E:271 Advanced Reading Clinic Techniques 2-3 s.h.
07E:272 Advanced Reading Clinic Practicum 2-3 s.h.
07E:308 Seminar: Research and Current Issues (Reading) 3 s.h.
07S:194 Methods: High School Reading 2-3 s.h.
One of these:
07P:106 Child Development 3 s.h.
07P:133 The Adolescent and Young Adult 3 s.h.
07P:200 Educational Psychology 3 s.h.
One of these:
07P:150 Introduction to Educational Measurement 3 s.h.
07U:238 Assessment of Learning Difficulties 3 s.h.
An approved literacy assessment course
One of these:
07E:267 Inquiry-Based Curriculum Development in Early Childhood and Elementary Classrooms 3 s.h.
07E:300 Design and Organization of Curriculum 3 s.h.
07S:186 Curriculum Foundations 2-3 s.h.
07S:291 Secondary School Curriculum 2-3 s.h.
One of these:
07B:383 Supervision and Evaluation 3 s.h.
07E:280 Supervision of Instruction and Staff Development 2-3 s.h.
07E:365 Reading Clinic: Supervision arr.
Thesis (if relevant)—one of these:
07E:393 M.A. Thesis in Early Childhood and Elementary Education arr.
07S:393 Master's Degree Thesis arr.
Electives
Students, in consultation with their adviser, may select the remaining required semester hours as electives from areas such as curriculum, supervision, language arts, testing and evaluation, linguistics, or speech pathology.
COMPREHENSIVE EXAMINATION
The comprehensive examination consists of two 3-hour exams. Each three-hour exam is based on an aspect of reading or literacy. With agreement of the student's adviser and committee, a comprehensive project may be substituted for the written examination in one or both areas.
Ph.D. in Elementary Education
The Doctor of Philosophy in elementary education prepares students for college and university teaching and research positions in elementary education, and for research, curriculum, supervisory, or administrative positions in public school systems and government education agencies.
ADMISSION
Applicants must meet the admission requirements of the Graduate College. Application materials should include a statement of purpose explaining the applicant's reasons for pursuing graduate study and describing his or her future goals; transcripts of all undergraduate and graduate course work; Graduate Record Exam (GRE) General Test scores; a sample of academic writing; and three letters of recommendation.
Admission is for fall or spring entry; application deadlines are January 4 for the following fall, and August 4 for the following spring.
REQUIREMENTS
The Ph.D. in elementary education requires a minimum of 90 s.h., including 10-15 s.h. of dissertation credit. Each student prepares an individual plan of study in consultation with an adviser. The final plan must be approved by the adviser and the department chair.
To remain in the program, students must maintain the grade-point average required by the Graduate College.
Ph.D. Core
All of the following are required (15 s.h.).
Foundations component:
07E:304 Schooling in the United States 3 s.h.
07S:333 Seminar on Teacher Education 3 s.h.
Research component:
07P:202 Understanding Educational Research 3 s.h.
Two other research courses chosen in consultation with adviser 6 s.h.
Elementary Education Graduate Core
All of these (9 s.h.):
07B:120 Teaching in a Culturally Diverse Society (or equivalent approved by adviser) 3 s.h.
07E:267 Inquiry-Based Curriculum Development in Early Childhood and Elementary Education 3 s.h.
07E:300 Design and Organization of the Curriculum 3 s.h.
Instructional Cluster
Students take two courses (6 s.h.) that deal with instructional issues in the elementary classroom. The courses are drawn from one or more of the following areas: art education, music education, social studies education, science education, math education, special education, another acknowledged area of specialization. Students must choose courses outside their specialization area.
Specialization
Students take four courses (12 s.h.) in their specialization area, chosen in consultation with their adviser.

Electives
Students choose 6 s.h. of elective course work.

COMPREHENSIVE EXAMINATION
Students are expected to pass a comprehensive exam that covers the course work in the Ph.D. core, course work in the instructional cluster, and course work in the specialization area.

DISSERTATION
Dissertation work ranges from 10 to 15 s.h.

Ph.D. in Language, Literacy, and Culture
The Doctor of Philosophy in language, literacy, and culture brings together scholarly traditions and contemporary theory in literacy and cultural studies. Course work provides both a broad background in relevant theoretic and research literature and opportunities to conduct original studies that explore the nature of literacy practices both in and out of school. Graduates find employment in university and college teaching, research, curriculum development, and administration of literacy programs.

ADMISSION
Applicants must meet the admission requirements of the Graduate College. They should have at least two years of experience teaching or tutoring language or literacy (reading, writing, English, language arts) and should have earned a master’s degree or have completed a significant amount of graduate course work in a literacy-related field. Application materials should include a statement of purpose explaining the applicant’s reasons for pursuing graduate study and describing his or her future goals; transcripts of all undergraduate and graduate course work; Graduate Record Exam (GRE) General Test scores; a sample of academic writing; and three letters of recommendation.

Applications for admission and for financial aid are reviewed by January 10 each year.

REQUIREMENTS
The Ph.D. in language, literacy, and culture requires a minimum of 88-90 s.h. beyond the bachelor’s degree. Course work includes an introductory seminar in language, literacy, and culture; at least 9 s.h. of additional doctoral seminars in the program; 6 s.h. of a required sequence of courses in curriculum and instruction; at least 6 s.h. of course work in research methodology; and 9-12 s.h. of graduate course work outside the Department of Teaching and Learning (6 s.h. of that outside the College of Education). Students also earn 10-12 s.h. of dissertation credit.

COMPREHENSIVE EXAMINATION AND DISSERTATION
As students near the completion of their course work, they identify several key strands for review and synthesis. With guidance from their advisors, students prepare for written and oral exams in two areas of literacy and submit a substantive issues paper, typically a report of an exploratory study or a review of research literature on a topic of special interest. They also design a syllabus for a literacy course and write a reflective commentary that demonstrates understanding of the relationship between theory and practice.

Following successful completion of all components of the comprehensive exam, students work with a faculty member to develop a proposal for a study that will make an original contribution to the understanding of some aspect of literacy. After the proposal has been approved, students conduct research and report their findings under the primary guidance of a dissertation chair.

For detailed information on the Ph.D. in language, literacy, and culture, see “Our Programs” on the Department of Teaching and Learning web site.

Secondary Education
The Department of Teaching and Learning offers, or jointly administers with departments in the College of Liberal Arts and Sciences, advanced degree programs in the following fields of professional interest: art education, curriculum and supervision, developmental reading, English education, foreign language education, mathematics education, music education, science education, and social studies education.

In some fields, only master’s-level programs are offered; in others, Ph.D. programs also are offered. All degrees are described below.

M.A. in Art Education
The Master of Arts in art education is administered by the School of Art and Art History in cooperation with the College of Education. Application should be made to the School of Art and Art History.
The program prepares highly qualified teachers of art for elementary and secondary schools and community colleges. The program’s strong academic emphasis helps teachers who are creative artists to become highly literate in the history and language of art.

**ADMISSION**

Applicants must meet the admission requirements of the Graduate College. They must have completed the equivalent of the minimum course work in art required for a University of Iowa B.A. or B.F.A. in art and must have a license/certificate to teach art. Applications must include a representative portfolio of the applicant’s work, consisting of eight slide reproductions of artwork and one example of written work, which may be a paper previously written for a course or original paper. Deficiencies in undergraduate art or courses recommended for teacher licensure/certification are evaluated following admission so that students can make up required course work concurrent with work for the degree.

**REQUIREMENTS**

The M.A. in art education requires a minimum of 38 s.h. The plan of study includes a total of 18 s.h. in studio art and art history (either 12 s.h. of studio art and 6 s.h. of art history, or 12 s.h. of art history and 6 s.h. of studio art); a total of 8 s.h. in 07S:367 Seminar: Current Issues in Art Education; and a total of 12 s.h. in additional course work, specified after the student begins the program.

M.A. students also must complete a studio thesis or a written thesis; students who elect the studio thesis must pass M.A. clearance in the School of Art and Art History.

**Ph.D. in Art Education**

The Doctor of Philosophy in art education is administered by the College of Education with the cooperation of the School of Art and Art History. Application should be made to the College of Education.

The program prepares college teachers and researchers in art education and supervisors of art in state departments of education and school systems. It also provides students with an opportunity to continue inquiry and creative work in art history and in studio.

**ADMISSION**

Applicants must meet the admission requirements of the Graduate College. They must have an M.A. in art education from The University of Iowa or an equivalent degree from an accredited degree-granting college or university. Applications must include a representative portfolio of the applicant’s work, consisting of 12 slide reproductions of artwork and two examples of written work, which may consist of papers previously written for a course or original papers. The portfolio should be submitted to the art education office in the School of Art and Art History.

In the case of course work deficiencies, students must register for appropriate remedial courses. Two years of successful teaching experience in an elementary or secondary school is required before admission to or completion of the doctoral program.

**REQUIREMENTS**

The Ph.D. in art education requires at least 60 s.h. of graduate work beyond the M.A., including at least 15 s.h. in the School of Art and Art History, 15 s.h. in art education seminars, 15 s.h. in a related area (e.g., aesthetics, anthropology, higher education, early childhood education, psychology, sociology), and 15 s.h. in thesis and tool courses. Introduction to Research in Art Education (07E:306) is also required. Students plan the course of study with their advisers.

Effective fall 2004, students admitted to any Ph.D. program in the Department of Teaching and Learning must complete at least two of the following three core courses.

- 07E:304 Schooling in the United States 3 s.h.
- 07P:202 Understanding Educational Research 3 s.h.
- 07S:333 Seminar on Teacher Education 3 s.h.

**COMPREHENSIVE EXAMINATION**

The comprehensive examination includes both oral and written exams. The written exam consists of an in-depth research problem assigned by the examining committee, to be completed within 14 days. An oral exam on the project is then held. The written portion of the exam is not intended to relate directly to the dissertation proposal.

**DISSERTATION**

Students must satisfactorily complete a written dissertation that constitutes a contribution to scholarship, for at least 12 s.h. The student is expected to prepare a dissertation proposal and defend it before the dissertation committee. An oral examination on the dissertation is the Ph.D. final examination.
M.A. in Curriculum and Supervision

The Master of Arts in curriculum and supervision prepares teachers and administrators for positions as consultants, directors, and coordinators in curriculum development. It is offered with thesis and nonthesis options.

ADMISSION

Students must meet the admission requirements of the Graduate College. Teaching experience is desirable.

REQUIREMENTS

The M.A. in curriculum and supervision with thesis requires a minimum of 30 s.h.; the nonthesis option requires a minimum of 32 s.h.

Common Curriculum Core

Total of 15 s.h., as follows:

07S:186 Curriculum Foundations 3 s.h.
07E:300 Design and Organization of Curriculum 3 s.h.
Three of these:
07B:381 Analysis and Appraisal of Curriculum 3 s.h.
07E:132/07S:132 Middle School Curriculum and Methods 3 s.h.
07E:267 Inquiry-Based Curriculum Development in Early Childhood and Elementary Education 3 s.h.
07E:304 Schooling in the United States 3 s.h.
07S:291 Secondary School Curriculum 3 s.h.

Research Core

Students select two courses (total of 6 s.h.) in consultation with the adviser.

Supervision Core

Students select two courses (total of 6 s.h.) in consultation with the educational policy and leadership studies adviser.

Cognates

Students complete a total of 3 s.h. in a subject field such as English.

Thesis

Students who elect a thesis program earn 2-4 s.h. in 07S:393 Master's Degree Thesis.

COMPREHENSIVE EXAMINATION

Two 3-hour comprehensive exams are required: one in curriculum and one in a related field in education or in a cognate field; or three 2-hour examinations.

Ph.D. in Curriculum and Supervision

The Doctor of Philosophy in curriculum and supervision is administered by the College of Education. It prepares students for leadership positions in curriculum for elementary, middle, and secondary schools, state departments, intermediate systems, and college teaching.

ADMISSION

Applicants must meet the admission requirements of the Graduate College. They must hold a valid teaching license/certificate, and have at least two years of teaching experience. A faculty review committee makes admission decisions.

REQUIREMENTS

The Ph.D. in curriculum and supervision requires a total of at least 90 s.h., including other approved graduate course work.

Effective fall 2004, students admitted to the Ph.D. program in curriculum and supervision must complete all three of the following core courses.

07E:304 Schooling in the United States 3 s.h.
07P:202 Understanding Educational Research 3 s.h.
07S:333 Seminar on Teacher Education 3 s.h.

Common Curriculum Core

Seven of these (21 s.h.):
07B:222 Introduction to Policy Analysis and Evaluation 3 s.h.
07B:381 Analysis and Appraisal of Curriculum 3 s.h.
07E:132/07S:132 Middle School Curriculum and Methods 3 s.h.
07E:267 Inquiry-Based Curriculum Development in Early Childhood and Elementary Education 3 s.h.
07E:300 Design and Organization of Curriculum 3 s.h.
07E:304 Schooling in the United States 3 s.h.
07S:291 Secondary School Curriculum 3 s.h.

Research Core

A minimum of four research tools selected in consultation with adviser 12 s.h.
Supervision Core
A minimum of four courses in educational policy and leadership studies, selected in consultation with adviser 12 s.h.

Electives
Courses chosen in consultation with adviser 9-12 s.h.

Cognates
All doctoral candidates are required to complete at least 9-12 s.h. of cognate work in two areas selected in consultation with adviser.

COMPREHENSIVE EXAMINATION
Candidates take three 3-hour comprehensive exams, one in secondary school curriculum and two in related fields in education or in a cognate field.

DISSERTATION
07S:493 Ph.D. Thesis 10-18 s.h.

M.A. in English Education
The Master of Arts in English education is intended for experienced teachers of English. It provides opportunities for professional development and preparation for department chairs, supervisors of English, and curriculum specialists for secondary schools. Application should be made to the College of Education.

ADMISSION
Applicants must meet the admission requirements of the Graduate College. They should have taken extensive course work in English and have taught English for at least two years.

REQUIREMENTS
The M.A. in English education requires a minimum of 30 s.h. Students specialize in English education and in one or two other areas. The other area(s) may include reading, writing, curriculum, adolescent literature, or a literary area. Students and their advisers plan the program of study together. The only required course is 07S:315 M.A. Seminar: English Education. At the end of the program, students take a comprehensive examination in English education and in their chosen area(s).

Students must maintain a g.p.a. of at least 3.00 while enrolled in the program.

M.A.T. in English Education
The Master of Arts in Teaching in English education is designed for students who have an undergraduate degree in English and few or no professional education courses. Successful completion of the program enables students to receive a credential to teach English in secondary schools.

ADMISSION
Applicants must meet the admission requirements of the Graduate College. They must have a B.A. in English or the equivalent, with an undergraduate g.p.a. of at least 3.00. They also must take the Graduate Record Exam and meet all TEP application requirements. Since the M.A.T. is a credentialing program, candidates must not have qualified previously for a credential. Applicants are expected to have no more than 6 s.h. of course work in professional education courses prior to admission.

REQUIREMENTS
The M.A.T. in English education requires a minimum of 45 s.h., including the following courses.

English
07S:315/08P:405 M.A. Seminar: English Education arr.
08N:141 Approaches to Teaching Writing 3 s.h.
08P:182 Language and Learning 2-3 s.h.
08P:198 Reading and Teaching Adolescent Literature 3 s.h.

Students may take the following English courses as part of the M.A.T. program or as part of their undergraduate program.

A course in Shakespeare
Three courses in American literature
A course in British literature
A course in nonfiction or creative writing (in addition to 08N:141)

Education
07B:180 Human Relations for the Classroom Teacher 3 s.h.
07E:102/07S:102 Technology in the Classroom (must be taken during student's first semester in the college) 2 s.h.
07P:200 Educational Psychology 3 s.h.
07S:100 Foundations of Education 3 s.h.
07S:114 Introduction and Practicum: English and Speech (must be completed before enrollment in 07S:115 and 07S:194) 3 s.h.
07S:115 Methods: English 3 s.h.
07S:187 Seminar: Curriculum and Student Teaching 1-3 s.h.
07S:190 Orientation to Secondary Education 1 s.h.
07S:191 Observation and Laboratory Practice in the Secondary School arr.
07S:192 Observation and Laboratory Practice in the Secondary School arr.
07S:194 Methods: High School Reading 2-3 s.h.
07U:100 Foundations of Special Education 3 s.h.

**COMPREHENSIVE EXAMINATION**

The comprehensive examination involves a series of reflective projects supervised by English education faculty. The projects encompass issues explored throughout the course of study and involve integration of theory and practice.

**M.A.T. in Foreign and Second Languages Education**

The Master of Arts in Teaching in foreign and second languages education is designed for superior liberal arts and sciences graduates who have had few or no professional education courses. Successful completion of the program leads to elementary and/or secondary teacher licensure. The M.A.T. is available in Chinese, French, German, Japanese, Latin, Spanish, and Russian.

**ADMISSION**

Applicants must meet the admission requirements of the Graduate College. They must have a bachelor's degree with a major or a strong concentration in a second language and an undergraduate g.p.a. of at least 3.00. They also must meet all TEP application requirements.

**REQUIREMENTS**

The M.A.T. in foreign and second languages education requires a minimum of 67 s.h. Students must complete at least 18 s.h. in graduate course work in the collaborating foreign language department and the following professional education courses.

**Professional Education**

07B:180 Human Relations for the Classroom Teacher 3 s.h.
07E:102/07S:102 Technology in the Classroom (must be taken during student's first semester in the college) 2 s.h.
07P:200 Educational Psychology 3 s.h.
07S:100 Foundations of Education 3 s.h.

07S:190 Orientation to Secondary Education (must be taken during student's first semester in the college) 1 s.h.
07S:195 Teaching Reading in Secondary Content Areas (must be taken during student's first semester in the college) 1 s.h.
07U:100 Foundations of Special Education 3 s.h.

**Foreign Language Teaching**

All of these:
07E:183/07S:183 Second Language Classroom Learning 3 s.h.
07S:197 Principles of Course Design for Second Language Instruction 3 s.h.
07S:200 Fundamentals of Second Language Assessment 3 s.h.

Total of 21-27 s.h. from these:
07E:106/07S:106 Foreign Language Education Practicum I 3 s.h.
07E:107/07S:107 Foreign Language Education Practicum II 3 s.h.
07S:116 Learning to Teach Second Languages I 3 s.h.
07S:117 Learning to Teach Second Languages II 3 s.h.
07S:187 Seminar: Curriculum and Student Teaching 1 s.h.
07S:191 Observation and Laboratory Practice in the Secondary School arr.

**Optional for K-12 Licensure**

07S:189 Elementary School Special Subject Area Student Teaching 1-4 s.h.

**COMPREHENSIVE EXAMINATION**

A two-part comprehensive examination is required. One part covers issues in foreign language education related to theory and practice, the other covers knowledge of and proficiency in the language and/or literature of the candidate's choice.

**ESL Endorsement**

An ESL endorsement enables an individual to teach English as a Second Language in K-12 in the state of Iowa. Because teaching endorsements are additional areas of expertise added to a teaching license, applicants must be current students in a TEP program or licensed inservice teachers.

**ADMISSION**

Applicants are admitted to the ESL endorsement program twice a year; application deadlines are
October 15 and March 15. Each applicant must submit a one-page essay explaining why he or she wishes to teach ESL; a transcript of all university-level course work; and evidence of having completed two semesters of foreign language beyond the language component of the College of Liberal Arts and Sciences General Education Program or a documented score of “advanced plus” on the oral proficiency interview (OPI) given in the language department. Applicants whose first language is not English must provide evidence of scoring 55 or higher on the Test of Spoken English (TSE).

M.A. in Foreign and Second Languages Education

The Master of Arts in foreign and second language education is designed for students who would like to pursue a foreign language education specialization in teaching (kindergarten through college) or in related fields (e.g., language laboratory directors, instructional materials designers, or evaluation specialists). It also offers enrichment in foreign language pedagogical knowledge for practicing teachers. Students may design programs with a special focus.

ADMISSION

Applicants must meet the admission requirements of the Graduate College. They must be proficient in English and in another language and have earned at least 20 s.h. in undergraduate, upper-division foreign language course work. Applicants should submit a statement of purpose explaining their graduate study goals. A g.p.a. of at least 3.00 in undergraduate course work and some experience living, working, and/or studying in the applicant’s chosen target language culture are preferred. International applicants whose first language is not English must score at least 600 (paper-based) or at least 250 (computer-based) on the Test of English as a Foreign Language (TOEFL), and at least 5 on the Test of Written English (TWE).

REQUIREMENTS

The M.A. in foreign and second languages education requires a minimum of 33-36 s.h. It offers three specializations: second languages education, a target language area (may subsume language, linguistics, literature, history, geography, or civilization), and a cognate area. The cognate area may be teacher education, reading, instructional design, measurement and statistics, or another area selected in consultation with the adviser. Students take at least 15 s.h. in second language education course work, 9 s.h. in graduate language or linguistics, and 9 s.h. in a cognate area. Students must earn 9 s.h. in courses numbered 200 or above. They also complete a research project.

Students must maintain a g.p.a. of at least 3.00 while enrolled in the program. Candidacy for the master’s degree is reevaluated annually.

Suggested courses are as follows.

Foreign and Second Languages Education

Total of 15 s.h.

07E:183/07S:183 Second Language Classroom Learning 3 s.h.
07S:197 Principles of Course Design for Second Language Instruction 3 s.h.
07S:200 Fundamentals of Second Language Assessment 3 s.h.
At least 6 s.h. from these:
07S:180 Issues in Foreign Language Education 3 s.h.
07S:184 Reading in a Second Language 3 s.h.
07S:202 Second Language Program Management 3 s.h.
07S:203 Second Language Planning in Education 3 s.h.
07S:207 Reading in Non-Roman Scripts 3 s.h.
07S:208 Designing Materials for Second Language Instruction 3 s.h.

Target Language

In consultation with the adviser, students select at least 9 s.h. of graduate language courses in their area of interest.

Cognate Area

Students complete at least 9 s.h. of course work chosen in consultation with the adviser.

MASTER’S EXAMINATION

Students take a written exam during the semester in which they plan to graduate. The exam covers second language education and the two study areas selected by the student. It is written by the graduate committee, which consists of at least three faculty members, two of whom must be from foreign and second languages education.

Ph.D. in Foreign Language and ESL Education

The Doctor of Philosophy in foreign language and ESL education provides students with the necessary content-area knowledge and research...
skills for independent research, program administration, and varied leadership positions in foreign language and ESL education. It is designed for individuals who have demonstrated success in foreign language and ESL teaching and who wish to prepare for positions in academia, government, or the private sector where in-depth knowledge of foreign language educational issues is required.

ADMISSION

Applicants must meet the admission requirements of the Graduate College. They should have at least two years of experience teaching foreign language or ESL and should hold a master's degree or have completed a significant amount of graduate course work in a foreign language or foreign language education. Applicants must have a g.p.a. of at least 3.00 in graduate course work. International applicants whose first language is not English must score at least 600 (paper-based) or at least 250 (computer-based) on the Test of English as a Foreign Language (TOEFL).

Application materials should include a statement of purpose explaining the applicant's professional goals, transcripts of all undergraduate and graduate work, Graduate Record Exam (GRE) General Test scores, a sample of academic writing, and three letters of recommendation.

REQUIREMENTS

The Ph.D. in foreign language and ESL education requires a minimum of 80 s.h., which can include courses taken for the master's degree. Most course work must be taken at the 200 level or above. At least 30 s.h. must be taken in the core area of foreign language education, at least 10 s.h. must be in specified courses in research methodology, and 9 s.h. must be in a cognate area to be determined in consultation with the adviser.

Effective fall 2004, students admitted to the Ph.D. program in foreign language and ESL must complete 07E:304 Schooling in the United States (3 s.h.). They also choose one of the following two core courses.

- 07P:202 Understanding Educational Research 3 s.h.
- 07S:333 Seminar on Teacher Education 3 s.h.

COMPREHENSIVE EXAMINATION

To qualify to take the comprehensive examination, students must successfully complete the required course work and either write a review article or carry out extended research activity. The final products of these activities must be presented formally by the student to members of the comprehensive examination committee in anticipation of preparing the article or research activity for publication and presentation at a national conference. After successful completion of the pre-exam activity, the student is eligible to sit for the comprehensive examination, which includes three 3-hour exams in foreign language education and the cognate area in education.

After passing the comprehensive examination, students consult with their adviser to choose a Ph.D. dissertation committee of at least five faculty members, who approve the dissertation proposal. The student then conducts research under the primary guidance of the adviser.

Ph.D. in Language, Literacy, and Culture

The Doctor of Philosophy in language, literacy, and culture brings scholarly traditions and contemporary theory together in literacy and cultural studies. Course work provides a broad background in relevant theoretic and research literature, and opportunities to conduct original studies that explore the nature of literacy practices both in and out of school. Graduates find employment in university and college teaching, research, curriculum development, and administration of literacy programs.

ADMISSION

Applicants must meet the admission requirements of the Graduate College. They should have at least two years of experience teaching or tutoring language or literacy (reading, writing, English, language arts) and should have earned a master's degree or have completed a significant amount of graduate course work in a literacy-related field.

Application materials should include a statement of purpose explaining the applicant's reasons for pursuing graduate study and describing his or her future goals; transcripts of all undergraduate and graduate course work; Graduate Record Exam scores; a sample of academic writing; and three letters of recommendation.

Applications for admission and for financial aid are reviewed by January 10.

REQUIREMENTS

The Ph.D. in language, literacy, and culture requires a minimum of 88-90 s.h. beyond the bachelor's degree. Course work includes an introductory seminar in language, literacy, and
culture; at least 9 s.h. of additional doctoral seminars in the program; 6 s.h. of a required sequence of courses in curriculum and instruction; at least 6 s.h. of course work in research methodology; and 9-12 s.h. of graduate course work outside the Department of Teaching and Learning (6 s.h. of that outside the College of Education). Students also earn 10-12 s.h. of dissertation credit.

**COMPREHENSIVE EXAMINATION AND DISSERTATION**

As students near the completion of their course work, they identify several key strands for review and synthesis. With guidance from their advisers, students prepare for written and oral exams in two areas of literacy and submit a substantive issues paper, typically a report of an exploratory study or a review of research literature on a topic of special interest. They also design a syllabus for a literacy course and write a reflective commentary that demonstrates understanding of the relationship between theory and practice.

Following successful completion of all components of the comprehensive exam, students work with a faculty member to develop a proposal for a study that will make an original contribution to the understanding of some aspect of literacy. After the proposal has been approved, students conduct research and report their findings under the primary guidance of a dissertation chair.

For detailed information on the Ph.D. in language, literacy, and culture, see “Our Programs” on the Department of Teaching and Learning web site.

**M.A. in Mathematics Education**

The Master of Arts in mathematics education provides students with advanced specialization in mathematics and education as a better foundation for K-12 teaching.

**ADMISSION**

Applicants must meet the admission requirements of the Graduate College. Except in unusual cases, they should hold a professional license/certificate to teach school mathematics. A combined score of 1000 on the verbal and quantitative sections of the Graduate Record Examination (GRE) General Test is preferred.

**REQUIREMENTS**

The M.A. in mathematics education requires a minimum of 32 s.h. Students take a minimum of 10 s.h. of course work in mathematics approved by the adviser. They also take a minimum of four courses in mathematics education, which must include 07S:235/07E:235 Current Issues in Mathematics Education (2-3 s.h.) and three courses chosen from the following.

- 07S:230/07E:230 Workshop in School Mathematics 1-3 s.h.
- 07S:231/07E:231 Technology in School Mathematics 2-3 s.h.
- 07S:234/07E:234 Foundations of Mathematics Education 2-3 s.h.
- 07S:236 The Teaching of Geometry 2-3 s.h.
- 07S:239 Teaching of Algebra 2-3 s.h.
- 07S:335/07E:335 Seminar: Mathematics Education 2-3 s.h.

Students choose a minimum of two courses from a cognate area; suggested areas are educational psychology, educational statistics and measurement, history or philosophy of education, pure or applied mathematics, instructional design and technology, counselor education, curriculum, administration, and special education. Courses are chosen in consultation with a faculty member from the cognate area.

Students also complete a sufficient number of electives in mathematics and education, chosen with the approval of the adviser, to complete 32 s.h. of credit.

**COMPREHENSIVE EXAMINATION**

Students take three 2-hour comprehensive exams: one in mathematics education, the second in mathematics, and the third in the cognate area.

**M.S. in Mathematics with Education Option**

The Master of Science in mathematics with education option prepares licensed/certified teachers with advanced specialization in mathematics and mathematics education. It is administered by the Department of Mathematics in the College of Liberal Arts and Sciences. Application should be made to that department.

**REQUIREMENTS**

The M.S. in mathematics with education option requires a minimum of 32 s.h. Students must earn a minimum of 24 s.h. in the Department of Mathematics, including the core master’s program for either pure mathematics or applied mathematics as described below. They also must complete two courses in mathematics education.
Pure Mathematics

One of these sequences:
22M:115-22M:116 Introduction to Analysis I-II 6 s.h.
22M:210-22M:211 Analysis I-II 6 s.h.

One of these sequences:
22M:120-22M:121 Abstract Algebra I-II 6 s.h.
22M:205-22M:206 Introduction to Algebra I-II 6 s.h.
22M:132 General Topology 3 s.h.

Applied Mathematics

22M:140 Continuous Mathematical Models 3 s.h.
22M:142 Nonlinear Dynamics with Numerical Methods 3 s.h.
22M:144 Partial Differential Equations with Numerical Methods 3 s.h.
22M:151 Discrete Mathematical Models 3 s.h.
22M:170 Numerical Analysis: Nonlinear Equations and Approximation Theory 3 s.h.
22M:171 Numerical Analysis: Differential Equations and Linear Algebra 3 s.h.
22M:174 Optimization Techniques 3 s.h.

COMPREHENSIVE EXAMINATION

Students take a comprehensive examination of six hours over the required courses in either pure mathematics or applied mathematics, and education. The examination assesses the candidate's knowledge of mathematics and of the relevance of specific concepts in teaching secondary school mathematics.

Ph.D. in Mathematics Education

The Doctor of Philosophy in mathematics education prepares supervisors, teacher education personnel, community college personnel, and researchers in mathematics education. It is administered by the College of Education.

ADMISSION

Applicants must meet the admission requirements of the Graduate College. They must have an undergraduate major in mathematics or the equivalent; a master's degree in mathematics, mathematics education, or education; a g.p.a. of at least 3.00; and, except in unusual circumstance, a current teaching license/certificate and at least two years of teaching experience.

REQUIREMENTS

The Ph.D. in mathematics education requires a minimum of 80-90 s.h. beyond the bachelor’s degree. Credit earned more than 10 years previously must be updated.

Effective fall 2004, students admitted to any Ph.D. program in the Department of Teaching and Learning must complete at least two of the following three core courses.
07E:304 Schooling in the United States 3 s.h.
07P:202 Understanding Educational Research 3 s.h.
07S:333 Seminar on Teacher Education 3 s.h.

Students must complete a minimum of 36 s.h. of graduate work in the Departments of Computer Science, Mathematics, and Statistics and Actuarial Science, including the requirements for the pure mathematics core, the applied mathematics core, or middle-grades mathematics, as follows. Electives are encouraged in the pure mathematics and applied mathematics sequences.

Pure Mathematics

22M:115-22M:116 Introduction to Analysis I-II 6 s.h.
22M:120-22M:121 Abstract Algebra I-II 6 s.h.
22M:132 General Topology 3 s.h.

Applied Mathematics

22M:140 Continuous Mathematical Models 3 s.h.
22M:142 Nonlinear Dynamics with Numerical Methods 3 s.h.
22M:144 Partial Differential Equations with Numerical Methods 3 s.h.
22M:151 Discrete Mathematical Models 3 s.h.
22M:170 Numerical Analysis: Nonlinear Equations and Approximation Theory 3 s.h.
22M:171 Numerical Analysis: Differential Equations and Linear Algebra 3 s.h.
22M:174 Optimization Techniques 3 s.h.

Middle-Grades Mathematics

For this option, no course work may replicate undergraduate work; at least five of these courses must be completed; and 22M:106, 22M:126, and 22M:151 are required unless duplicated by previous course work.

22M:100 Introduction to Ordinary Differential Equations 2-3 s.h.
22M:104 Introduction to Matrix Theory 3 s.h.
22M:106 Transformation Geometry 3 s.h.
22M:107 History of Mathematics 3 s.h.
22M:108 Philosophy of Mathematics 3 s.h.
22M:109 Classical Analysis 3 s.h.
22M:126 Elementary Theory of Numbers 2-3 s.h.
22M:127 Matrix Theory 3 s.h.
22M:151 Discrete Mathematical Models 3 s.h.
22S:120 Probability and Statistics 4 s.h.

Courses cross-listed in education do not fulfill this requirement. Students who completed their
mathematics requirement at another institution
must complete at least 6 s.h. of additional course
work in mathematics at The University of Iowa,
chosen with the adviser's approval.

Students also must complete at least five courses
in mathematics education, including 07S:235
Current Issues in Mathematics Education and
continuous registrations in 07S:335 Seminar:
Mathematics Education until the comprehensive
examination is passed.

ADDITIONAL REQUIREMENTS

Students concentrate in two additional
comprehensive examination areas in either the
mathematical sciences or education. A minimum
of three courses usually are required for a
comprehensive examination area, but candidates
should consult with faculty members in the areas
selected to determine which courses they should
take in order to adequately prepare for the
examinations.

A minimum of two courses in data analysis and
research design are required, including both
quantitative and qualitative methods.

Students must demonstrate competence in
computer programming.

Students must complete a total of at least 24 s.h.
in College of Education courses; this includes the
course work listed above.

Upon completing the program, the student must
have a cumulative g.p.a. of 3.00 or higher on all
graduate work in mathematics, all University of
Iowa graduate work in mathematics, all graduate
work, and all University of Iowa graduate work.

COMPREHENSIVE EXAMINATION

Students take three written comprehensive
examinations, one in mathematics education and
two in other fields of education or mathematics;
an oral examination follows the written
examinations. A partial list of potential cognate
areas is available from the M.A. program in
mathematics education.

DISSERTATION

Students must earn 10 s.h. of dissertation credit
in 07S:493 Ph.D. Thesis. Each candidate
completes a dissertation on a research problem in
mathematics education. A prospectus of the
proposed research must be presented to the
dissertation committee before the candidate
undertakes the study. Upon completion of the
dissertation, the candidate defends the
dissertation in an oral examination.

M.A. in Music Education

The Master of Arts in music education provides
students with deeper insights into music, the
theory and practice of music education, and the
role of music in the school curriculum. The
degree is available with thesis (30 s.h. minimum)
or without (33 s.h. minimum).

The program is administered by the School of
Music (College of Liberal Arts and Sciences) in
cooperation with the College of Education.
Application is made to the School of Music.

Ph.D. in Music Education

The Doctor of Philosophy in music education
prepares students for teaching, research, and
administrative posts. Graduates find employment
as college teachers of music education classes and
activities; as band, chorus, and orchestra
directors; and as administrators of music
departments and schools of music. Some apply
their skills in public schools as music supervisors,
research and curriculum consultants, and
directors of city or district school music
programs.

The program is administered by the School of
Music (College of Liberal Arts and Sciences) in
cooperation with the College of Education.
Application is made to the School of Music.

M.A.T. in Science Education

The Master of Arts in Teaching in science
education is designed primarily for graduates of a
bachelor's degree program in science who decide
that they would like to become teachers. It
features advanced work in science along with the
courses required for certification, enabling
students to earn a master's degree and teaching
certification at the same time.

The program assumes students have completed
considerable course work in science (at least
56 s.h.) as undergraduates, but no previous
course work in education. Students’ science
course work should be equivalent to that
required by the University of Iowa Science
Education Program (College of Liberal Arts and
Sciences).

ADMISSION

Applicants must meet the admission
requirements of the Graduate College. They must
have a bachelor's degree with a major or
equivalent in one of the sciences. A g.p.a. of at
least 3.00 is required for admission and must be
maintained throughout the program. Applicants
must meet all TEP application requirements.
REQUIREMENTS

The M.A.T. in science education requires a minimum of 48 s.h.

Professional Education Sequence Foundation

07B:180 Human Relations for the Classroom Teacher 3 s.h.
07E:102/07S:102 Technology in the Classroom (must be taken during student's first semester in the college) 2 s.h.
07P:200 Educational Psychology 3 s.h.
07S:100 Foundations of Education 3 s.h.
07S:190 Orientation to Secondary Education (must be taken during student's first semester in the college) 1 s.h.
07S:195 Teaching Reading in Secondary Content Areas (must be taken during student's first semester in the college) 1 s.h.
07U:100 Foundations of Special Education 3 s.h.

Science education courses are taken in the following sequence.

07S:151 Science Teaching and Practice with Early Learners 3 s.h.
07S:152 Methods of Teaching Science 3 s.h.
07S:153 Instructional Issues in Teaching Science 3 s.h.
07S:179 Secondary School Science Practicum 2 s.h.

Science Specialization

The following courses are required for the undergraduate degree in science education at the University of Iowa. They need not be repeated by M.A.T. candidates who need one or more advanced courses in their major science area, or by students from other interdisciplinary science discipline programs that prepare teachers for grades 6-9.

Both of these:
097:128 Meaning of Science 2 s.h.
097:130 Science in Historical Perspective 2 s.h.

Two of these (unless completed during undergraduate study):
097:102 Societal and Educational Applications of Earth Sciences and Environmental Sciences 3 s.h.
097:103 Societal and Educational Applications of Biological Sciences 3 s.h.
097:105 Societal and Educational Applications of Physical Sciences 3 s.h.
097:106 Societal and Educational Applications of Chemical Concepts 3 s.h.
097:140 Problems in Integrating the Teaching of Environmental Science 3 s.h.

Electives

A minimum of one graduate course in biology, chemistry, earth science, or physics is required. Students who have satisfied portions of the required science course work listed above must take additional science course work to meet the minimum requirement of 48 s.h.

COMPREHENSIVE EXAMINATION

Students complete the comprehensive examination before their student teaching semester. Two exams or projects, one in science education and one in a science specialization area, are required. They may not duplicate course examinations in these areas. The science education exam, under the guidance and supervision of the examining committee, consists of two parts, written and oral. Detailed requirements for the science education comprehensive examination are available from the Science Education office.

M.S. in Science Education

The Master of Science in science education is designed for students who want to pursue advanced science education specialization in teaching (kindergarten through college) or in related fields such as medical education, museum programs, and textbook editing. Although a nonthesis option is available, the thesis program is recommended.

ADMISSION

Applicants must meet the admission requirements of the Graduate College. They must have an undergraduate g.p.a. of at least 3.00 and usually must have an undergraduate degree in one of the sciences or in science education. They also must have teaching licensure/certification unless they are preparing for careers in allied health, museums, or community colleges.

REQUIREMENTS

The M.S. in science education requires a minimum of 38 s.h.
Science Education

07E:255/07S:255 Science Education: Issues, History, and Rationale 3 s.h.
07E:256/07S:256 Science Education: The Nature of Science 3 s.h.
07E:257/07S:257 Science Education: Teaching, Learning, and Curriculum Models 3 s.h.
07E:258/07S:258 Science Education Research Models and Conceptual Schemes 3 s.h.
07E:350/07S:350 Seminar: Science Education (registration required each semester in residence) 0-2 s.h.

Science Specialization

Students earn a total of 19 s.h. in science and applied science courses (100-level or above) chosen in consultation with the adviser.

Corroborative Studies (Nonthesis Only)

Science and applied science courses selected from an area other than the specialization 6 s.h.
or
07S:393 Master's Degree Thesis 6 s.h.

COMPREHENSIVE EXAMINATION

Students take a comprehensive examination in two areas: one in science education, the other in a science specialization.

Ph.D. in Science Education

The Doctor of Philosophy in science education is designed for individuals who aspire to college and university positions as science educators; major supervisory posts in national, state, and local systems; positions teaching science at small liberal arts colleges; positions as instructors of general education science courses and areas at major colleges; positions as research directors in science education; and positions in medical education.

ADMISSION

Applicants must meet the admission requirements of the Graduate College. They should have completed a master's degree in one of the sciences or science education and have a g.p.a. of at least 3.00 on all graduate work taken before applying to the program. All applicants must have completed an M.S. thesis or similar research suitable for publication.

REQUIREMENTS

The Ph.D. in science education requires a minimum of 102 s.h., which must include the courses listed below (37 s.h.); courses taken toward a master's degree count toward the 102 s.h. total.

07E:255/07S:255 Science Education: Issues, History, and Rationale 3 s.h.
07E:256/07S:256 Science Education: The Nature of Science 3 s.h.
07E:257/07S:257 Science Education: Teaching, Learning, and Curriculum Models 3 s.h.
07E:258/07S:258 Science Education Research Models and Conceptual Schemes 3 s.h.
07E:493/07S:493 Ph.D. Thesis in Early Childhood and Elementary Education 10 s.h.
07S:355 Action Research in Science Education (repeated registrations of 3 s.h. each) 9 s.h.
07S:368 Ph.D. Seminar: Current Research in Science Education (two or more registrations required after completing 07E/07S:255-258) 4 s.h.

Effective fall 2004, students admitted to any Ph.D. program in the Department of Teaching and Learning must complete at least two of the following three core courses.

07E:304 Schooling in the United States 3 s.h.
07P:202 Understanding Educational Research 3 s.h.
07S:333 Seminar on Teacher Education 3 s.h.

Students must complete 27 s.h. of credit in the major area of study (one of the following): biological science, physical science, earth science, or environmental studies.

They also complete 8 s.h. in an integrated group of supporting courses chosen from a limited number of areas, such as curriculum, applied science, educational measurement, and history/philosophy of science, in consultation with the adviser.

Students must demonstrate competency in two of the following research tool areas: statistics, computer programming and/or data processing, and research design (completion of a pilot study). Competency is certified by the adviser.

Ph.D. students usually are expected to participate in Science Education Program teaching and research throughout their residence.
All students are expected to spend a full year in residency actively involved with course work.

**COMPREHENSIVE EXAMINATION**
The comprehensive examination consists of three parts: one dealing with science education, another with an area of science, and a third with the corroborative studies area.

**DISSERTATION**
Candidates complete a minimum of 10 s.h. of dissertation credit in 07E:493 Ph.D. Thesis in Early Childhood and Elementary Education or 07S:493 Ph.D. Thesis.

**M.A. in Social Studies Education**
The Master of Arts in social studies education provides an opportunity for interdisciplinary work in education, history, social science, or related areas for classroom teachers, high school department chairs, supervisors, and others interested in advancing their competence in history and the social sciences and greater proficiency in teaching and supervision.

Students choose one of two programs. Program A provides interdisciplinary study in education, history, social science, or related areas for classroom teachers or others interested in advancing their competence in instruction and their subject area. Program B is for individuals who have a bachelor’s degree in history or social sciences and who wish to obtain a teaching license/certificate while earning the M.A.

**ADMISSION**
Applicants must meet the admission requirements of the Graduate College. They should have a bachelor’s degree in education, history, or one of the social sciences from an accredited institution; a cumulative g.p.a. of at least 3.00; a g.p.a. of at least 3.00 in history and/or social science courses; a combined verbal and quantitative score of at least 1000 on the Graduate Record Examination (GRE) General Test; and two letters of recommendation. Evidence of writing ability in a completed major paper or essay also is required. Typically, applicants to Program A are expected to hold a secondary teaching license/certificate.

After declaring a social studies education major, M.A. students must maintain a g.p.a. of at least 3.00.

**PROGRAM A REQUIREMENTS**
Program A of the M.A. in social studies education requires a minimum of 38 s.h. distributed among three concentration fields in history and social sciences (or related areas) and education, with at least 10 s.h. in each of three fields.

At least 9 of the total 38 s.h. must be earned in graduate courses numbered 200 or above distributed among the three concentration fields.

Students who choose the thesis option complete a research or investigative problem. If the thesis is research or investigation in history, social science, or a related area, the thesis director is a member of the appropriate department. If the thesis is an investigative problem in social studies education, the thesis director is a College of Education faculty member.

**PROGRAM A COMPREHENSIVE EXAMINATION**
The comprehensive examination consists of three 2-hour written exams: one on each of the three concentration fields.

**PROGRAM B REQUIREMENTS**
Program B of the M.A. in social studies education requires a minimum of 38 s.h. Students must complete all of the following courses, unless they completed some of them as part of their bachelor’s degree. In such cases, the semester-hour requirement for Program B is reduced accordingly, but it never falls below 38 s.h. All students must take the course work required for meeting all Iowa Department of Education requirements for teacher licensure/certification.

Professional education courses:
- 07B:180 Human Relations for the Classroom Teacher 3 s.h.
- 07E:102/07S:102 Technology in the Classroom (must be taken during student’s first semester in the college) 2 s.h.
- 07F:200 Educational Psychology 3 s.h.
- 07S:100 Foundations of Education 3 s.h.
- 07S:101 Introduction and Practicum: Social Studies 3 s.h.
- 07S:187 Seminar: Curriculum and Student Teaching 3 s.h.
- 07S:190 Orientation to Secondary Education (must be taken during student’s first semester in the college) 1 s.h.
- 07S:191 Observation and Laboratory Practice in the Secondary School 6 s.h.
- 07S:192 Observation and Laboratory Practice in the Secondary School 6 s.h.
- 07S:195 Teaching Reading in Secondary Content Areas (must be taken during student’s first semester in the college) 1 s.h.
- 07S:233 History and Foundations of Social Studies Education 3 s.h.
07S:277 Seminar: Social Studies Education (History Teaching and Learning) 3 s.h.
07S:277 Seminar: Social Studies Education (Education for Social Justice) 3 s.h.
07U:100 Foundations of Special Education 3 s.h.

Subject area specialization courses: a minimum of 9 s.h. of course work in history or a social science is required; students should take at least one course taught by the instructor who will serve on the examining committee.

Note: The State of Iowa requires that students certified in social studies must have a teaching major of 30 s.h. and one endorsement area of 15 s.h. Endorsement areas include anthropology, economics, geography, and psychology.

PROGRAM B COMPREHENSIVE EXAMINATION
The comprehensive examination consists of three 2-hour exams: one on the subject area specialization, one on general professional education, and one on social studies education.

Ph.D. in Social Studies Education
The Doctor of Philosophy in social studies education prepares secondary department chairs, supervisors, curriculum directors, teacher education personnel, and college instructors in the social sciences and in social studies education.

ADMISSION
Applicants must meet the admission requirements of the Graduate College. They must have a bachelor’s degree in history, the social sciences, or education; a master’s degree in history, the social sciences, or education; a cumulative g.p.a. of at least 3.00; and a combined verbal and quantitative score of at least 1200 on the Graduate Record Examination (GRE) General Test. At least two years of teaching experience is strongly preferred. Applicants who did not write a thesis as part of their M.A. must submit seminar papers or field research as equivalents.

REQUIREMENTS
The Ph.D. in social studies education requires a minimum of 90 s.h. beyond the bachelor’s degree, including course work and dissertation credit but not tool requirements. The 90 s.h. must be distributed among history, social sciences or related areas, and professional education, depending on the student’s background and goals. Students must complete at least 18 s.h. in one area of history or one of the social sciences. Seminars and courses numbered 200 or above are required in each of the study areas that constitute the major. Students must take 9 s.h. of required courses in social studies education, including 07E:233/07S:233 History and Foundations of Social Studies Education (3 s.h.) and 6 s.h. of 07E:196/07S:196 Topics in Teaching and Learning (social studies emphasis) and/or 07E:277/07S:277 Seminar: Social Studies Education.

Effective fall 2004, students admitted to any Ph.D. program in the Department of Teaching and Learning must complete at least two of the following three core courses.
07E:304 Schooling in the United States 3 s.h.
07P:202 Understanding Educational Research 3 s.h.
07S:333 Seminar on Teacher Education 3 s.h.

Tool requirements are tailored to the individual student’s program and may consist of foreign languages or other requirements. Usually, statistics plus research techniques in one or more of the chosen fields or in a language is required.

COMPREHENSIVE EXAMINATIONS
Students take three 3-hour examinations, one in each of the study areas. Depending on the distribution of course work, the nine hours of written examinations may be rearranged.

The Ph.D. examining committee consists of five members, who are selected according to the nature of the student’s Ph.D. program and distribution of course work. An oral examination is conducted by the committee following the written exam.

DISSERTATION
Ph.D. candidates must complete a dissertation on a research problem in social studies education. The candidate must present a prospectus of the proposed research to the dissertation committee before undertaking the study. Upon completion, the candidate defends the dissertation in an oral exam.

Special Education
Special education programs are offered in K-6 and 7-12 Instructional Strategist I: Mild/Moderate, and K-12 Instructional Strategist II: BD/LD. These programs are designed to prepare graduates for positions in public schools, local and state education agencies, clinical settings, and institutions of higher education. All teacher licensure/certification programs are approved by the Iowa Department of Education.
A program leading to special education licensure/certification in Instructional Strategist I: Mild/Moderate (K-6) is available to undergraduates (see "Licensure and Teacher Education Certification"/"Elementary Education" at the beginning of this section). Undergraduates who wish to pursue careers in special education should contact the Department of Teaching and Learning.

**M.A. in Special Education**

The Master of Arts in special education prepares individuals to deliver appropriate levels of service to students with disabilities at the elementary and secondary levels, in either public or private settings. Applicants with a master's degree and special education certification may request admission for the purpose of obtaining an additional area of special education licensure/certification (i.e., professional improvement). Students admitted to the M.A. program typically receive licensure/certification in at least one area upon completing the program.

**ADMISSION**

Applicants must meet the admission requirements of the Graduate College. They must have an undergraduate g.p.a. of at least 3.00 (and/or at least 3.00 on a minimum of 12 s.h. of graduate course work). A combined verbal and quantitative score of at least 1000 on the Graduate Record Exam (GRE) General Test is preferred. International applicants whose first language is not English must score at least 600 (paper-based) or 250 (computer-based) on the Test of English as a Foreign Language (TOEFL).

Application materials must include a completed Graduate College application form; copies of official transcripts for all college course work; an official report of Graduate Record Examination test scores; three current letters of recommendation; and evidence of experience and/or teacher licensure/certification. An interview may be requested.

Final admission decisions are made by the special education graduate admissions committee.

**REQUIREMENTS**

The M.A. in special education requires a minimum of 32 s.h. Contact the Department of Teaching and Learning for specific program requirements.

**Ed.S. in Special Education Administration**

The Ed.S. in special education administration is offered jointly with the Department of Educational Policy and Leadership Studies. See Educational Policy and Leadership Studies in the Catalog.

**Special Education Consultant Authorization**

The Special Education Consultant authorization program prepares consultants to serve in special education programs.

**ADMISSION**

Admission to the M.A. program or to a certification program in special education is required. Applicants must hold or meet the requirements for the special education teaching endorsement congruent with their desired consultant authorization. Teaching endorsements must be documented by copies of teaching credentials.

Applicants also must have completed four years of successful teaching experience, two of which must be congruent with their desired consultant authorization. They must provide evidence of successful teaching (e.g., written statements from school personnel documenting years of teaching, type of students served, and success as a classroom teacher).

Documentation of certifications and teaching experience should be submitted with the application for admission to the Graduate College.

**REQUIREMENTS**

The Special Education Consultant authorization program requires at least 38 s.h., including credit required for the M.A. and the teaching endorsement program. Students who already hold an M.A. in special education and an endorsement congruent with their desired consultant authorization must complete the following three courses.

- 07E:300 Design and Organization of Curriculum 3 s.h.
- 07P:263 Consultation Theory and Practice 3 s.h.
- 07P:347 Home/School/Community System Interventions 3 s.h.

Students without an M.A. in special education must complete an M.A. and teaching endorsement program in special education.
congruent with their desired consultant authorization, plus the three courses listed above (07E:300, 07P:263, 07P:347), for a total of at least 38 s.h.

**Ph.D. in Special Education**

The Doctor of Philosophy in special education prepares students for teaching and research positions in higher education, and for curriculum, supervisory, and research positions in state and local education agencies. The program permits students to study and practice extensively in their special education interest area and in an interest area outside of special education.

**ADMISSION**

Applicants must meet the admission requirements of the Graduate College. They must have master's degree or equivalent in special education; those without an M.A. thesis must have completed an equivalent project. Applicants should have a graduate g.p.a. of at least 3.50 and a combined verbal and quantitative score of at least 1000 on the Graduate Record Exam (GRE) General Test. International applicants whose first language is not English must score at least 600 (paper-based) or 250 (computer-based) on the Test of English as a Foreign Language (TOEFL). Applicants should have at least one year of full-time teaching experience with exceptional children; several years are preferred.

Application materials must include a completed Graduate College application form; copies of official transcripts for all college course work; an official report of Graduate Record Examination test scores; three current letters of recommendation; and evidence of experience and/or teacher licensure/certification. An interview may be requested.

Final admission decisions are made by the special education graduate admissions committee.

**REQUIREMENTS**

The Ph.D. in special education requires a minimum of 90 s.h. beyond the bachelor's degree. The plan of study is flexible, stresses interdisciplinary work, and varies depending on the student's background and educational goals. In general, students should have a general background in all facets of special education and in one or two specialization areas. Each student develops his or her course of study in consultation with the adviser. Requirements include 16 s.h. of core special education courses, a 3 s.h. college teaching or field service practicum, a minimum of 12 s.h. in a discipline outside special education, and at least 16 s.h. of statistics, research, and measurement tool courses.

Effective fall 2004, students admitted to any Ph.D. program in the Department of Teaching and Learning must complete at least two of the following three core courses.

- 07E:304 Schooling in the United States 3 s.h.
- 07P:202 Understanding Educational Research 3 s.h.
- 07S:333 Seminar on Teacher Education 3 s.h.

Students also are required to write the comprehensive examination and complete a doctoral dissertation (07U:493 Ph.D. Thesis in Special Education, for at least 10 s.h.).

**Financial Support**

**Elementary Education**

A number of teaching assistantships are available for graduate students in early childhood and elementary education. Assignments vary. Some involve supervising undergraduate majors enrolled in practicum; others involve teaching sections of undergraduate methods courses and supervising student teachers. Most assistantships are classified as one-half-time, which permits students to register for a maximum of 12 s.h. of credit per semester. Graduate assistants must register for at least 6 s.h. per semester.

All assistantships are awarded on a competitive basis. Applicants must have been admitted to regular status in the Graduate College and to an advanced program in the College of Education. Direct inquiries about assistantships to the chair of the Department of Teaching and Learning.

**Secondary and Special Education**

A limited number of assistantships are available for graduate students in secondary and special education. Assignments vary. Some involve teaching undergraduate courses or supervising practicum experiences; others consist primarily of research activities. Graduate assistants may register for a maximum of 12 s.h. and a minimum of 6 s.h. per semester.

Graduate students in secondary education also may be eligible for assistantships in some College of Liberal Arts and Sciences departments. Students with appropriate credentials should apply directly to the specific department or consult the College of Education adviser in the appropriate field.
Courses

Early Childhood and Elementary Education

07E:021 Oral Interpretation 3 s.h.
Same as 036:021.

07E:090 Orientation to Elementary Education 1 s.h.
Overview of elementary education expectations, including options for student teaching, classroom observation, lesson planning, performance indicators, INTASC standards, classroom management, information about mandatory child abuse reporting, blood-borne pathogens, professional ethics. Eight-week course.

07E:100 Foundations of Education 3 s.h.
Overview of American education, preschool through secondary; aims, history, philosophy of education; professional ethics, legal responsibilities; school curriculum, organization, finance, school law, political and social issues. Prerequisite: admission to TEP. Same as 075:100.

07E:101 Introduction to Education 3 s.h.
Orientation to the field; administrative organization, instructional procedures, professional ethics, legal responsibilities, contemporary problems at both elementary and secondary levels. Same as 075:101.

07E:102 Technology in the Classroom 2 s.h.
Same as 075:102.

07E:104 Remedial Methods in Speech and Hearing 2 s.h.
Emphasis on elementary grades. Usually taken in conjunction with 07E:192, which provides approximately 70 hours of supervised clinical practice in elementary schools. Primarily for speech pathology and audiology majors. Prerequisite: consent of instructor.

07E:106 Foreign Language Education Practicum I 3 s.h.
Skill development for teaching languages in the early grades; curriculum design, test creation, microteaching with inservice teachers. Prerequisite: 07E:110 or 07S:110. Corequisite: 07S:116. Same as 075:106.

07E:107 Foreign Language Education Practicum II 3 s.h.
Practice in lesson design, classroom management techniques, evaluation skills during work with inservice foreign language teachers. Corequisite: 07S:117. Same as 07S:107.

07E:110 Teaching K-12 Second Language Learners 3 s.h.
Second language learning and teaching in the multicultural classroom; influence of school setting, societal context. Prerequisite: admission to TEP. Same as 075:110.

07E:114 Parent-Child Relationships 3 s.h.
Roles and relationships within and between families, culture, society; identify (family) resources and concerns based on children’s development, abilities.

07E:118 ESL Practicum I 3 s.h.
Skill development for teaching English as a second language; curriculum design, test creation, microteaching with inservice teachers. Prerequisite: 07E:110 or 07S:110. Corequisite: 07S:118. Same as 07S:118.

07E:119 ESL Practicum II 3 s.h.
Practice in lesson design, classroom management techniques, evaluation skills during work with inservice English as a second language teachers. Prerequisite: 07E:110 or 07S:110. Corequisite: 07S:117. Same as 07S:119.

07E:120 Methods and Materials: Music for the Classroom Teacher 2-3 s.h.
Development of music skills, techniques, knowledge of methods and materials for teaching music to young children; for elementary education majors. Prerequisite: admission to TEP.

07E:122 Methods and Materials: Art for the Classroom Teacher 2 s.h.
Projects, techniques, processes in art for elementary and early childhood education majors; combination lecture and studio; painting, drawing, printmaking, sculpture, and crafts with materials and tools commonly available in the elementary schools. Same as 01E:195.

07E:123 Reading and Responding to Children’s Literature 2-3 s.h.
Reading and teaching children’s literature in elementary classrooms for aesthetic, personal, social, and critical purposes; readings from a wide range of genres; approaches to teaching children’s literature; recent trends and issues. Prerequisite: admission to elementary TEP. Corequisites: 07E:160 and 07E:164.

07E:124 Differentiating Projects with Technology 1 s.h.
Use of digital tools to enrich student presentations; PowerPoint slide shows, presentations uploaded to World Wide Web, interactive multimedia presentations via HyperStudio. Same as 075:124.

07E:125 Differentiated Curriculum for the Gifted 1 s.h.
Program options for K-12 gifted students; student abilities and needs linked with various curriculums; case studies, school materials. Same as 075:125.

07E:126 Reading for High-Ability Students 1 s.h.
Purposes and methods of reading instruction, with focus on developmentally appropriate needs of high-ability readers; genres of literature, enriched and accelerated reading curricula, role of reading in social and emotional development of gifted students. Same as 075:126, 07U:126.

07E:127 Physical Education and Health for Elementary Teachers 2 s.h.
Methods, curriculum. Prerequisite: admission to TEP.

07E:128 Differentiating through Advanced Technology 1 s.h.
Multimedia and web-based tools and utilities that enrich classroom learning and facilitate presentations made by technologically advanced students; production and editing of digital videos, computer graphics, advanced web-publishing and communication techniques; skill development. Same as 075:128, 07U:128.

07E:129 Learning and Leadership for Gifted and Talented Students 1 s.h.
Same as 075:129, 07U:129.

07E:132 Middle School Curriculum and Methods 3 s.h.
Junior high and middle school development compared; characteristics of exemplary programs, disciplinary and interdisciplinary trends; variety of teaching methods (group and individual), hands-on activities. Prerequisite: admission to TEP. Same as 075:132.

07E:134 Parent-Teacher Communication 1-3 s.h.
Realities of working with parents; interpersonal skills; options for parent support services. Same as 07P:134, 07U:134.

07E:136 Home/School/Community Partnerships 3 s.h.
Issues related to collaboration among families, educators, community members in implementing school programs. Same as 07P:136, 07S:136, 07U:136.

07E:143 Methods: Art Workshops 3 s.h.
Application of studio methods to teaching children in Saturday Children’s Art Class Program. Prerequisite: 01E:196. Same as 01E:143.
Experience conducting instruction for children; four schoolroom sessions and one on-campus meeting weekly. Prerequisite: completion of appropriate area of specialization methods block.

Topics related to linguistic diversity in the classroom grades 1-12; optimal teaching techniques for positive academic outcomes of linguistically diverse students. Same as 07E:175.

Teaching Elementary School Science 3 s.h.
Special topics, activities in student-centered teaching/learning environments; standards, integrated curriculum, alternative assessments, classroom management, problem solving, action research.

Curriculum Evaluation and Selection 1-3 s.h.
For a specific curricular area, choosing or developing criteria for evaluating, reviewing, selecting, organizing materials and activities to suit specific curricular patterns. Repeatable for different areas (see ISIS for areas offered).

Curriculum Development and Implementation 1-4 s.h.
For a specific curricular area: review of teaching methods, theory, related research; planning, developing lessons; demonstrations, observations, simulations of teaching. Repeatable for different areas (see ISIS for areas offered).

Theories of community, culture, identity in relation to language arts teaching and learning; emphasis on incorporating multiple literacies, both oral and print, into language arts curricula; action research involving oral literacy. Same as 049:101.

How language growth reflects and enables cognitive development; readings in psychology, anthropology, education; relationship of language theory to language instruction in schools. Same as 07E:182, 08P:182.

Synthesis of empirical findings on children’s and adult’s learning of a second or foreign language; emphasis on theoretical underpinnings of many approaches, methods, techniques in language teaching. Same as 07E:183, 039:177.

Elementary and secondary background developments in curriculum; definitions, historical perspective, philosophies, theories of knowledge, models, learning theories, directions of development and shaping forces; emphasis on development of a curriculum project. Same as 07E:186.

History and philosophy of developmentally appropriate practices and application to early childhood programs; managing inclusive early childhood education programs—licensing, budgeting, health and safety, food and nutrition, parent involvement, supervising staff, maintaining a quality program; implications of legislation and public policy that affect children with and without disabilities and their parents, 12-hour practicum.

Experience in developing course materials for classes offered through the Belin Center. Same as 07C:188, 07S:188, 07U:188.
07E:189 Development and Administration of Child Care Centers 3 s.h.
Topics in starting and managing a child care center: licensing, budgeting, health and safety, food and nutrition, parent involvement, supervising staff, maintaining quality; legislation and public policy affecting children with or without disabilities, and parents; 12-hour practicum.

07E:190 Supervised Teaching in the Elementary School: Interactive Phase
Student teaching at the elementary level (K-9). Prerequisite: application to the Office of Teacher Education and Student Services. Corequisite: 07E:191.

07E:191 Supervised Teaching in the Elementary School: Pre- and Post-Active Phase
arr.
Prerequisite: application to the Office of Teacher Education and Student Services. Corequisite: 07E:190.

07E:192 Special Area Student Teaching
arr.
Supervised teaching and observation in specific areas of elementary curriculum (see ISIS for areas offered). Prerequisite: consent of instructor.

07E:193 Independent Study
arr.
Prerequisites: senior standing and consent of instructor.

07E:196 Topics in Teaching and Learning
arr.
Repeatable. Prerequisite: consent of instructor. Same as 07S:196, 07U:196.

07E:197 Supervised Teaching Early Childhood Center: Interactive Phase
arr.
Prerequisite: application to the Office of Teacher Education and Student Services. Corequisite: 07E:197.

07E:198 Supervised Teaching Pre- and Post-Active Phase
arr.
Prerequisite: application to the Office of Teacher Education and Student Services. Corequisite: 07E:198.

07E:204 Literature for Children II 3 s.h.
Current theory, research, and practice in reading and responding to children's literature; genre and topic vary. Same as 07S:204, 08P:204.

07E:231 Technology in School Mathematics 2-3 s.h.
Methods, materials, issues, pedagogy, assessment, use and evaluation of mathematics software, other technology; implications for organization, development of course content. Same as 07S:231.

07E:233 History and Foundations of Social Studies Education 3 s.h.
Historical, philosophical, social foundations of social studies education; recent debates over content and instructional processes; student research projects. Same as 07S:233.

07E:234 Foundations of Mathematics Education 2-3 s.h.
History of U.S. mathematics education; learning theory applied to teaching, learning mathematics; curriculum design; curriculum and achievement patterns in different countries; sex differences in achievement; research literature. Same as 07S:234.

07E:235 Current Issues in Mathematics Education 2-3 s.h.
Recent curriculum developments, experimental programs, research relevant to classroom instruction; education trends that may have a significant impact on mathematics programs. Same as 07S:235, 22M:195.

07E:255 Science Education: Issues, History, and Rationale 2-3 s.h.
Critical analysis of research reports, philosophical statements, synthesis studies, issue statements that characterize graduate study in science education. Offered fall semesters. Same as 07S:255.

07E:256 Science Education: The Nature of Science 3 s.h.
Topics in philosophy, psychology, history, sociology of science that are related to research, practice, current issues in science education. Offered spring semesters. Prerequisite: 097:128. Same as 07S:256.

07E:257 Science Education: Teaching, Learning, and Curriculum Models 2-3 s.h.
Teaching strategies, instructional models, curriculum theory as they relate to science teaching in elementary, secondary, college settings. Offered fall semesters. Same as 07S:257.

07E:258 Science Education: Research Models and Conceptual Schemes 3 s.h.
Models of research design and major research efforts in science education; emphasis on current reports and yearly reviews of science education research. Offered spring semesters. Same as 07S:258.

07E:264 Early Literacy Development and Instruction 2-3 s.h.
Understanding of early reading and writing experiences; relationship of reading to other communication areas; knowledge of instructional approaches, techniques, materials, assessment procedures; interrelationship of home and school experiences; identification of current and crucial issues and relevant research.

07E:265 Reading and Writing Across Intermediate Grades 3 s.h.
Reading with comprehension, provision for individual differences, research in reading, extension of skills taught in primary grades; for teachers, principals, supervisors.

07E:266 Inquiry-Based Curriculum Development in Early Childhood and Elementary Classrooms 3 s.h.
Theoretical and practical organization of developmentally appropriate curricula and teaching methods to promote learning.

07E:267 Curriculum Development for Young Children 3 s.h.
Current and crucial issues in curriculum development, research, delivery of services to children in group child care settings. Prerequisite: 07E:157 or equivalent.

07E:271 Advanced Reading Clinic Techniques 2-3 s.h.
Special instructional procedures for children with severe learning problems in reading, causes of reading disorders; educational prognosis for severely disabled readers. Prerequisite: 07E:164 or 07E:171 or 07E:174. Corequisite: 07E:272.

07E:272 Advanced Reading Clinic Practicum 2-3 s.h.
Practice in selecting and using special instructional procedures; fitting clinical teaching techniques into a balanced developmental reading framework. Prerequisite: 07E:164 or 07E:171 or 07E:174. Corequisite: 07E:271.

07E:273 Reading Recovery I 2-3 s.h.

07E:274 Reading Recovery II 2-3 s.h.
Training for teachers; tutoring of first grade children; effective moment-by-moment instructional decision making.

07E:275 Reading Recovery Assessment Training 2-3 s.h.
How to administer and analyze Marie Clay's Observation Survey; includes administration of the assessment to at least two first grade children.

07E:277 Seminar: Social Studies Education arr.
Periodical literature, trends, curricular developments, research. Same as 07E:277.
07E:280 Supervision of Instruction and Staff Development 2-3 s.h.
Teacher effectiveness research, formative and summative evaluation procedures, with emphasis on the supervision of student teachers; research on staff development and bringing about change in education. Same as 07S:285.

07E:281 Reading and Writing Process 3 s.h.
Foundations of the reading and writing process, including underlying language competencies, implications for instruction. Prerequisite: consent of instructor.

07E:282 Reading Recovery Teacher Leader I 3 s.h.
Introduction to reading recovery teacher leader role; theory, practice; leadership, organization, planning, supervision, evaluation. Prerequisite: consent of instructor.

07E:283 Reading Recovery Practicum I/Teacher Leader 3 s.h.
Reading recovery procedures, practices; effective teaching decisions. Prerequisite: consent of instructor.

07E:293 Individual Instruction in Early Childhood and Elementary Education arr.
Prerequisite: consent of instructor.

07E:300 Design and Organization of Curriculum 3 s.h.
Major issues, modern selection, sequential arrangement, organization of content; relationship of time allotments to implementation; utilization of instructional equipment; appraisal procedures, staff participation in curriculum development.

07E:304 Schooling in the United States 3 s.h.
Governance, finance, and policy structures that have influenced teaching and learning in public schools.

07E:306 Introduction to Research in Art Education 3 s.h.
Methods of inquiry used for research in art education and related disciplines; methods of research design.

07E:308 Seminar: Research and Current Issues arr.
For a specific curricular area: review of the literature, critical analysis of reported research, study of current issues and problems (see ISIS for specific areas offered). Repeatable. Prerequisite: consent of instructor. Same as 07S:308.

07E:315 Seminar Mathematics Education arr.
Analysis of current research, research methodology, curriculum developments in mathematics education. Repeatable. Same as 07S:315.

07E:340 Advanced Topics in Teaching and Learning arr.
Topics vary. Same as 07S:340, 07E:340.

07E:350 Seminar: Science Education 0-2 s.h.
National issues, program features, completed faculty and doctoral candidates' research. Same as 07S:350.

07E:355 Action Research in Science Education 2-3 s.h.
Same as 07S:355.

07E:365 Reading Clinic: Supervision arr.
Supervised experience in guiding and improving teacher performance in clinical practicums. Prerequisite: consent of instructor.

07E:370 Methods in Literacy Research 3 s.h.
Conceptual and practical exploration of selected research methods, including pilot data collection, analysis, and reporting. Repeatable. Same as 07S:370, 08P:370.

07E:381 Reading Difficulties 3 s.h.
Understanding of seminal and recent research, theories of learning, beginning reading instruction, reading difficulties that have influenced literacy education. Prerequisite: consent of instructor.

07E:382 Reading Recovery Teacher Leader II 3 s.h.
Advanced theory, practice in reading recovery teacher leader role. Prerequisite: consent of instructor.

07E:383 Reading Recovery Practicum II/Teacher Leader 3 s.h.
Reading recovery procedures, educational prognosis, analysis of teacher/student interactions. Prerequisite: consent of instructor.

07E:385 Practicum in College Teaching arr.
Prerequisite: consent of instructor.

07E:390 Research and Issues Program Implementation 3 s.h.
Research and issues in change process, theories and case studies related to reading recovery program implementation. Prerequisite: consent of instructor.

07E:391 Research Project arr.
Individual research projects in a specific curricular area; for advanced students. Repeatable. Prerequisite: consent of instructor.

07E:392 Field Service Project arr.
Individual field service project in a specific curricular area; for advanced students. Repeatable. Prerequisite: consent of instructor.

07E:393 M.A. Thesis in Early Childhood and Elementary Education arr.
Prerequisite: consent of instructor.

07E:406 Research in Art Education arr.
Individual research under supervision; applicable to thesis preparation and to doctoral prospectus development. Repeatable. Same as 01E:406, 07S:406.

07E:415 Ph.D. Seminar in Language, Literacy, and Culture arr.
Historical and recent research and theory in literacy education. Repeatable. Prerequisite: consent of instructor. Same as 07E:415, 08P:425.

Prerequisite: consent of instructor.

Secondary Education

07S:090 Introduction and Practicum: Art 2 s.h.
Experience observing and assisting art teachers and students in elementary or secondary schools; four to six hours per week in the school plus on-campus class meetings. Prerequisite: admission to TEP.

07S:091 Orientation to Secondary Education 0-1 s.h.
Overview, including options for student teaching, classroom observation, lesson planning, classroom management, performance indicators, IVAAPN standards, blood borne pathogens, professional ethics. Eight weeks.

07S:095 Introduction and Practicum: Mathematics 3 s.h.
Experience designing and teaching lessons that have varying instructional intent and that use multiple instructional strategies; study and practice methods of classroom management; 30-40 hours in cooperating schools. Prerequisite: admission to TEP.

07S:096 Introduction and Practicum: Music 2 s.h.
Experience observing and assisting music teachers and students in elementary or secondary schools; six hours per week in the school plus on-campus class meetings. Prerequisite: admission to TEP.

07S:100 Foundations of Education 3 s.h.
Overview of contemporary American education, preschool through secondary; including aims, history, philosophy of education, professional ethics, legal responsibilities; school curriculum, organization, school law, finance, political, social issues. Prerequisite: admission to TEP. Same as 07E:100.
07S:101 Introduction to Education 3 s.h.
Basic orientation in the field of education; administrative organization, professional ethics, legal responsibilities, instructional procedures, contemporary problems at both elementary and secondary levels. Same as 07E:101.

07S:102 Technology in the Classroom 2 s.h.
Same as 07E:102.

07S:105 Secondary Methods: Art 3 s.h.
Art education theory and methods at elementary and secondary levels; art curriculum, unit, and lesson planning, evaluation, motivation, instructional materials, observational techniques.

07S:106 Foreign Language Education Practicum I 3 s.h.
Skill development for teaching languages in the early grades; curriculum design, test creation, microteaching with inservice teachers. Prerequisite: 07S:110. Corequisite: 07S:116. Same as 07E:106.

07S:107 Foreign Language Education Practicum II 3 s.h.
Practice in lesson design, classroom management techniques, evaluation skills during work with inservice foreign language teachers. Corequisite: 07S:117. Same as 07E:107.

07S:108 World Music as Popular Music 3 s.h.
Survey of a broad selection of popular and world music from historical and current perspectives; musical elements, instruments, organization, performance, expression.

07S:110 Teaching K-12 Second Language Learners 3 s.h.
Second language learning and teaching in the multicultural classroom; influence of school setting, societal context. Prerequisite: admission to TEP. Same as 07E:110.

07S:111 Introduction and Practicum: Social Studies 2-3 s.h.
Experience observing and assisting social studies teachers and students in secondary schools; four to six hours per week in the school plus on-campus class meetings. Prerequisite: admission to TEP.

07S:112 Introduction to Museology 3 s.h.
Introduction to history, philosophy, function, management of museums and related institutions; emphasis on American museums. GE humanities. Same as 024:102, 007:115, 113:103, 169:102.

07S:113 Methods: Secondary School Journalism 3 s.h.
Methods and materials for teaching high school journalism; publication policies, staff organization, production schedules, technology, the Internet, and techniques for advising student publications; experience in simulated teaching situations. Offered fall semesters. Same as 019:101.

07S:114 Introduction and Practicum: English and Speech 3 s.h.
Experience observing and assisting English or speech teachers and students in secondary schools; 12 hours per week in the school plus on-campus class meetings.

07S:115 Methods: English 3 s.h.
Organizational techniques, methods, materials for teaching high school English; experience in simulated teaching situations during laboratory sessions, integrated with lectures and discussions. Prerequisite: 07S:114. Same as 08P:190.

07S:116 Learning to Teach Second Languages I 3 s.h.
Approaches, methods, and techniques of teaching the modalities of listening, speaking, reading, and writing in a second language. Corequisite: 07E:106 or 07E:118 or 07S:106 or 07S:118.

07S:117 Learning to Teach Second Languages II 3 s.h.
Curriculum design, classroom management, student evaluation, technology, using context to teach culture in second languages. Prerequisite: 07E:118 or 07S:110. Corequisite: 07E:107 or 07E:119 or 07S:117 or 07S:119.

07S:118 ESL Practicum I 3 s.h.
Skill development for teaching English as a second language; curriculum design, test creation, microteaching with inservice teachers. Prerequisite: 07E:110 or 07S:110. Corequisite: 07S:116. Same as 07E:118.

07S:119 ESL Practicum II 3 s.h.
Practice in lesson design, classroom management techniques, evaluation skills during work with inservice English as a second language teachers. Prerequisite: 07E:110 or 07S:110. Corequisite: 07S:117. Same as 07E:119.

07S:121 Environmental Science for the Gifted 1 s.h.
Environmental health research; principles of toxicology, process of environmental health risk assessment; experience collecting, organizing, and analyzing information.

07S:122 Math/Science Program for High Ability Students 1 s.h.
Unique challenges and opportunities confronted by teachers of high-ability students; theory and practice, development of program outlines for implementation. Same as 07P:122.

07S:124 Differentiating Projects with Technology 1 s.h.
Use of digital tools to enrich student presentations; PowerPoint, slide shows, presentations uploaded to World Wide Web, interactive multimedia presentations via HyperStudio. Same as 07E:124.

07S:125 Differentiated Curriculum for the Gifted 1 s.h.
Program options for K-12 gifted students; student abilities and needs linked with various curriculums; case studies, school materials. Same as 07E:125.

07S:126 Reading for High-Ability Students 1 s.h.
Programs and methods of reading instruction, with focus on developmentally appropriate needs of high-ability readers; genres of literature, enriched and accelerated reading curricula, role of reading in social and emotional development of gifted students. Same as 07E:126, 07U:126.

07S:128 Differentiating through Advanced Technology 1 s.h.
Multimedia and web-based tools and utilities that enrich classroom learning and facilitate presentations made by technologically advanced students; production and editing of digital videos, computer graphics, advanced web-publishing and communication techniques, skill development. Same as 07E:128, 07U:128.

07S:129 Learning and Leadership for Gifted and Talented Students 1 s.h.
Same as 07E:129, 07U:129.

07S:130 Workshops for Secondary School Journalism and Communication Teachers 1-2 s.h.
Teaching journalistic writing and editing, photography, design, desktop publishing, current technology, web page design, developing curriculum and advising student publications; for teachers responsible for journalism publication programs or classes. Same as 019:102.

07S:132 Middle School Curriculum and Methods 3 s.h.
Junior high and middle school development compared; characteristics of exemplary programs, disciplinary and interdisciplinary trends; variety of teaching methods (group and individual); hands-on activities. Prerequisite: admission to TEP. Same as 07E:132.

07S:134 Methods: Middle School Mathematics 3 s.h.
Subject matter content, teaching and assessment techniques for grades 5-9 math; curricular planning for special needs students. Prerequisite: 07S:095 or consent of instructor. Same as 07E:173.

07S:135 Methods: High School Mathematics 3 s.h.
Subject matter content, teaching and assessment techniques for grades 9-12 math. Prerequisite: 07S:095 or consent of instructor.
Teaching and Learning 611

07S:136 Home/School/Community Partnerships 3 s.h.

07S:140 Band Methods and Materials 3 s.h.
High school and elementary school music methods required for teaching certificate; for instrumental music education majors. Prerequisites: 07E:102 or 07S:102, 07S:091, and 07S:096.

07S:141 Measurement and Evaluation in Music Education 3 s.h.
Measurement and evaluation techniques for music aptitude achievement, preference, emphasis on developing teacher-made tests and on available standardized music tests.

07S:143 Instrumental Techniques 1-3 s.h.
Repeatable. Same as 02S:105.
07S:144 Psychology of Music 2 s.h.
Cognition of music, affective response, aesthetic response, musical ability.
07S:145 Instrumental Conducting 2 s.h.
Advanced skills for instrumental conducting, score analysis, rehearsal techniques, literature selection. Prerequisite: 02S:107. Same as 02S:108.

07S:147 Choral Methods 3 s.h.
Organization, implementation of effective choral music programs for all ages. Prerequisites: 07E:102 or 07S:102, 07S:091, and 07S:096. Same as 02S:109.

07S:148 Choral Conducting and Literature 3 s.h.
Advanced skills appropriate to choral conducting, analysis, literature selection studied and implemented to develop a secure approach to choral art; students preparing to teach in the elementary or secondary schools must register under 07S:148. Prerequisite: 07S:147. Same as 02S:110.

07S:149 Introduction to Music Research 2-3 s.h.
Preparation for conducting research on music behavior.
07S:150 String Methods and Materials 2-4 s.h.
Prerequisites: 07E:102 or 07S:102, 07S:091, and 07S:096. Same as 02S:112.

07S:151 Science Teaching and Practice with Early Learners 3 s.h.
Introduction to students, schools, the purpose of schooling children in science, learning theories, science curricula, contemporary science education issues, effective science teaching.

07S:152 Methods of Teaching Science 3 s.h.
Developing, writing, and orally defending a robust research-based framework for teaching science that includes student goals, student actions, content, materials, activities, teaching behaviors and strategies, contemporary learning theories, self-evaluation. Prerequisite: 07S:151.

07S:153 Instructional Issues in Teaching Science 3 s.h.
Articulating, experiencing, practicing a research-based framework for teaching science in the real world of students, schools, teaching. Prerequisite: 07S:152. Corequisite: 07S:179.

07S:155 Approaches to Teaching Writing 3 s.h.
Theories, practices, strategies, and history of writing and teaching writing. Same as 08N:141.

07S:170 Methods: Social Studies 3 s.h.
Analysis of the teaching/learning process; organization of social studies content for teaching purposes; evaluation of learning procedures and new strategies; practicum work includes microteaching, computer-assisted modules, lesson plan development, writing test items.

07S:172 Thinking Skills 1 s.h.
Factors involved in teaching thinking skills as a total concept; the relationship of critical and creative thinking; review of published programs.

07S:173 Programming/Curriculum for High Ability Students 1 s.h.
Programming and curriculum for K-12 students identified as gifted or highly able; in-class differentiations, special projects for pull-out programs, facilitating research projects, mentoring in advanced programming.

07S:175 Linguistic Diversity in the Classroom 3 s.h.
Topics related to linguistic diversity in the classroom grades 1-12; optimal teaching techniques for positive academic outcomes of linguistically diverse students. Same as 07E:175.

07S:178 Workshop in Teaching Communication and Forensics arr.
Methods, materials, progression, evaluation in teaching; supervision of students in courses and class activities; opportunities for observation, demonstration, practice in teaching discussion and debate, and in individual speech and forensic events. Repeatable. Same as 03S:105.

Supervised teaching experience in a single subject; secondary school setting.

07S:180 Issues in Foreign Language Education 3 s.h.
Theoretical perspectives of pivotal research issues at the forefront of foreign language education; systems available to foreign language professionals for disseminating research.

07S:182 Language and Learning 2-3 s.h.
How language growth reflects and enables cognitive development; readings in psychology, anthropology, education; discussion of the relationship of language theory to schools of language instruction. Same as 07E:182, 08P:182.

07S:183 Second Language Classroom Learning 3 s.h.
Synthesis of empirical findings on children’s and adults’ learning of a second or foreign language; emphasis on theoretical underpinnings of approaches, methods, techniques in language teaching. Same as 07E:183, 039:177.

07S:184 Reading in a Second Language 3 s.h.
Current theory/research/practice in second language reading field; role of textual features and the reader in reading comprehension.

07S:186 Curriculum Foundations 2-3 s.h.
Elementary and secondary background developments in curriculum: definitions, historical perspective, philosophies, theories of knowledge, models, learning theories, directions of development and shaping forces; emphasis on development of a curriculum project. Same as 07E:186.

07S:187 Seminar: Curriculum and Student Teaching 1-3 s.h.
Discussions, role-playing, group and individual reports, analysis of critical incidents, classroom management, videotapes of student classroom performance pertinent to participants’ student teaching experiences. Corequisite: student teaching.

07S:188 Practicum in Teaching and Curriculum Development in Gifted Education 1-6 s.h.
Experience in developing course materials for classes offered through the Belin Center. Same as 07C:188, 07E:188, 07U:188.

07S:189 Elementary School Special Student Area 3 s.h.
Student Teaching arr.
Supervised teaching experience in a single subject in grades 1-6.

07S:190 Orientation to Secondary Education 0-1 s.h.
Overview, including options for student teaching, classroom observation, lesson planning, classroom management,
performance indicators, INTASC standards, blood borne pathogens, professional ethics.

07S:191 Observation and Laboratory Practice in the Secondary School arr. Student teaching experience in performing the duties of regular classroom teachers under supervision of experienced personnel in secondary schools. Prerequisite: consent of instructor.

07S:192 Observation and Laboratory Practice in the Secondary School Continuation of 07S:191. Prerequisite: consent of instructor.

07S:193 Reading and Teaching Adolescent Literature 3 s.h. Reading and evaluation of literature suitable for junior and senior high school students. Same as 08P:198.

07S:194 Methods: High School Reading 2-3 s.h. Methods and materials used in teaching developmental reading in all junior and senior high school content areas. Prerequisite: 07S:114.

07S:195 Teaching Reading in Secondary Content Areas 1 s.h. Integration of reading strategies into secondary content areas for teacher candidates in secondary education.

07S:196 Topics in Teaching and Learning arr. Prerequisite: consent of instructor. Same as 07E:196, 07U:196.

07S:197 Principles of Course Design for Second Language Instruction 3 s.h. Contemporary views of second language curriculum design; guidelines necessary for the creation of prototypical curriculum units to be transposed into classroom-ready forms; for individuals interested in foreign language materials development.

07S:198 Coaching Practicum 1-2 s.h. Supervised experience in coaching interscholastic teams under the direction of certified secondary school coaches. Prerequisites: completing teaching and coaching certification programs, admission to TEP, and consent of instructor.

07S:199 Independent Study arr. How to write language tests; discussion of fundamental issues in development of new tests or selection of existing tests.

07S:200 Fundamentals of Second Language Assessment 3 s.h. Prerequisite: 07E:196, 07U:196.

07S:201 Seminar: Current Topics in Music Education 1 s.h. Major areas of professional and research interest. Repeatable.

07S:202 Second Language Program Management 3 s.h. Preparation for supervising, administering foreign language programs at all levels; for precollege language teachers and graduate students.

07S:203 Second Language Planning in Education 3 s.h. Sociology and politics of national policy involving language, internationally; development of a research-based policy perspective on language issues in the country in which the student intends to teach.

07S:204 Literature for Children II 3 s.h. Critical perspective on creating and using media for second language contexts; instructional and literacy development issues. Prerequisite: 07E:171 or 07P:270 or 07S:184 or equivalent. Same as 164:226.

07S:205 Designing Materials for Second Language Instruction 3 s.h. Critical perspective on creating and using media for second language contexts; instructional and literacy development issues. Prerequisite: 07S:184.

07S:206 Foundations of Music Education Curriculum 3 s.h. Curriculum development, instructional materials, analysis of current teaching methods and techniques in school music programs; historical foundations of music education.

07S:207 Reading in Non-Roman Scripts 3 s.h. Theory and practice of reading in languages that use non-Roman alphabets, syllabary, logographic systems; reading in first and second language contexts; instructional and literacy development issues. Prerequisite: 07E:171 or 07P:270 or 07S:184 or equivalent. Same as 164:226.

07S:208 Cultural Curriculum 3 s.h. Prerequisite: consent of instructor. Critical perspective on creating and using media for second language contexts; instructional and literacy development issues. Prerequisite: 07S:184.

07S:209 The Teaching of Geometry 2-3 s.h. Recent developments in school mathematics teaching methods and curriculum relevant to a selected issue; one to three weeks of intensive examination, experience. Same as 07E:230.

07S:210 International Program Summer Institute for Teachers 3 s.h. Same as 187:211.

07S:211 Workshop in School Mathematics 1-3 s.h. Recent developments in school mathematics teaching methods and curriculum relevant to a selected issue; one to three weeks of intensive examination, experience. Same as 07E:231.

07S:212 Principles of Course Design for Second Language Instruction 3 s.h. Recent developments in school mathematics teaching methods and curriculum relevant to a selected issue; one to three weeks of intensive examination, experience. Same as 07E:232.

07S:213 History and Foundations of Social Studies Education 3 s.h. Same as 07E:233.

07S:214 Foundations of Mathematics Education 2-3 s.h. History of mathematics education in the United States; learning theory applied to teaching, learning mathematics; curriculum design; curriculum and achievement patterns in different countries; sex differences in achievement; research literature. Same as 07E:234.

07S:215 Current Issues in Mathematics Education 2-3 s.h. Recent curriculum developments, experimental programs, research relevant to classroom instruction, trends in education that may have a significant impact on mathematics programs. Same as 07E:235, 22M:195.

07S:216 The Teaching of Geometry 2-3 s.h. Recent developments in teaching middle school/junior and high school geometry; selection, organization of content; research on teaching and learning.

07S:217 Teaching of Algebra 2-3 s.h. Recent developments in curriculum and instructional methods in secondary school algebra; classroom use of the history of algebra, use of computer and calculators, implications of current research for the algebra classroom.

07S:218 Creative Thinking in Music 2 s.h. Review and analysis of creative literature about musical experience from theoretical and methodological perspectives; future trends for music instruction in composition, improvisation.

07S:219 Music Education Workshop 1 s.h. Materials and innovative instructional procedures for teaching instrumental music in public schools and colleges. Repeatable. Same as 025:220.

07S:220 Individual Projects in Music Education 1-2 s.h. Projects of special concern to individual music teachers in the public schools.

07S:221 Preparation of Curriculum Materials for School Science 1-3 s.h. Preparation of instructional materials for science courses. Repeatable.

**Special Education**

Courses at the 100 level are open to students in education and related disciplines.

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>07U:100</td>
<td>Foundations of Special Education</td>
<td>3 s.h.</td>
<td>Students with disabilities, gifted and talented; strategies for effective treatment, collaboration between regular and special education teachers; remediation of academic, behavioral, social problems. Prerequisite: admission to TEP.</td>
</tr>
<tr>
<td>07U:101</td>
<td>Methods: Child/Adolescents with LD and BD</td>
<td>3 s.h.</td>
<td>Strategies for effectively teaching elementary and secondary students with learning disabilities and behavioral disorders; emphasis is on practical, empirically verified techniques. Prerequisite: admission to TEP.</td>
</tr>
<tr>
<td>07U:110</td>
<td>Teaching Deaf and Hard of Hearing Students</td>
<td>3 s.h.</td>
<td>How to recognize and respond to the deaf population and how they learn best and are taught; teaching varied subject matter that addresses diversity in small groups of deaf students; teaching, use of technology, ethnic and cultural diversity, classroom management, educational program options. Taught in American Sign Language and English. Offered fall and spring semesters. Same as 158:110.</td>
</tr>
<tr>
<td>07U:115</td>
<td>Introduction: Strategist I (Elementary)</td>
<td>2 s.h.</td>
<td>Teaching students with mild disabilities in elementary resource placements; current trends and issues, basic and theoretical approaches, implications of federal and state statutes, multidisciplinary team approaches to providing appropriate educational programming. Prerequisite: admission to TEP.</td>
</tr>
<tr>
<td>07U:116</td>
<td>Methods: Strategist I (Elementary)</td>
<td>2 s.h.</td>
<td>Methods and materials for students with mild disabilities in elementary resource placements; effective school collaboration; empirically validated strategies. Prerequisite: admission to TEP.</td>
</tr>
<tr>
<td>07U:117</td>
<td>Improving Outcomes for People with Disabilities</td>
<td>3 s.h.</td>
<td>Theory and practice of interdisciplinary programming; roles and responsibilities of different disciplines serving persons with disabilities, cooperative service strategies, case management, individual program planning; includes case studies, role plays. Prerequisite: consent of instructor. Same as 042:117, 096:117.</td>
</tr>
<tr>
<td>07U:121</td>
<td>Transition and Related Issues</td>
<td>3 s.h.</td>
<td>CURRICULUMS, programs, and delivery systems that help persons with disabilities move from preschool to elementary, elementary to middle school, middle school to high school, and to postsecondary life; emphasis on ecological and task analysis, transition planning strategies, interagency collaboration, self-determination, access to resources and support services.</td>
</tr>
<tr>
<td>07U:122</td>
<td>Supervised Teaching: Elementary Strategist I</td>
<td>7 s.h.</td>
<td>Student teaching at the elementary level in a program for students with mild to moderate disabilities. Prerequisites: elementary education major and consent of instructor.</td>
</tr>
<tr>
<td>07U:126</td>
<td>Reading for High-Ability Students</td>
<td>1 s.h.</td>
<td>Purposes and methods of reading instruction, with focus on developmentally appropriate needs of high-ability readers; genres of literature, enriched and accelerated reading curricula, role of reading in social and emotional development of gifted students. Same as 07E:126, 07S:126.</td>
</tr>
<tr>
<td>07U:128</td>
<td>Differentiating through Advanced Technology</td>
<td>1 s.h.</td>
<td>Multimedia and web-based tools and utilities that teach classroom learning and facilitate presentations made by technologically advanced students; production and editing of digital video, computer graphics, advanced web-publishing and communication techniques; skill development. Same as 07E:128, 07S:128.</td>
</tr>
<tr>
<td>07U:129</td>
<td>Learning and Leadership for Gifted and Talented Students</td>
<td>1 s.h.</td>
<td>Same as 07E:129, 07S:129.</td>
</tr>
<tr>
<td>07U:133</td>
<td>The Culturally Different in Diverse Settings</td>
<td>3 s.h.</td>
<td>History, identification, characteristics, programming, educational methods and materials for the gifted; discussion on readings, films, and guest speakers; practical project. Same as 07C:133.</td>
</tr>
<tr>
<td>07U:134</td>
<td>Parent-Teacher Communication</td>
<td>1-3 s.h.</td>
<td>Realities of working with parents; interpersonal skills; options for parent support services. Same as 07E:134, 07P:134.</td>
</tr>
<tr>
<td>07U:137</td>
<td>Introduction to Educating Gifted Students</td>
<td>3 s.h.</td>
<td>History, identification, characteristics, programming, educational methods and materials for the gifted; discussion on readings, films, and guest speakers; practical project. Same as 07C:137.</td>
</tr>
<tr>
<td>07U:138</td>
<td>Assessment of Learning Problems</td>
<td>3 s.h.</td>
<td>Effective use of varied formal and informal assessment techniques for students with learning and behavior problems; techniques that inform teaching decisions. Prerequisite: admission to TEP.</td>
</tr>
<tr>
<td>07U:140</td>
<td>Characteristics of Disabilities</td>
<td>3 s.h.</td>
<td>Etologies of mild/moderate disabilities; current educational trends; educational alternatives; importance of multidisciplinary team; psychological and social-emotional characteristics of individuals.</td>
</tr>
<tr>
<td>07U:148</td>
<td>Adaptations for Students with Multiple Disabilities</td>
<td>3 s.h.</td>
<td>Enhancing participation of persons with multiple disabilities; partial participation, individualized adaptations; positioning, handling techniques; integration of therapy with educational programs.</td>
</tr>
<tr>
<td>07U:187</td>
<td>Introduction to Assistive Technology</td>
<td>3 s.h.</td>
<td>Same as 07C:187.</td>
</tr>
<tr>
<td>07U:188</td>
<td>Practicum in Teaching and Curriculum Development in Gifted Education</td>
<td>1-6 s.h.</td>
<td>Includes experience in developing course materials for classes offered through the Belin Center. Same as 07C:188, 07E:188, 07S:188.</td>
</tr>
</tbody>
</table>
OTU:190 Interdisciplinary Issues in Disabilities 1-3 s.h.
Critical issues related to interdisciplinary delivery of services to persons with developmental disabilities; observation and participation in staffing and consultation; opportunity for related community experiences.
Prerequisite: consent of instructor.

OTU:193 Independent Study in Special Education arr.
Specialized study of topics not included in other courses. Prerequisite: consent of instructor.

OTU:196 Topics in Teaching and Learning arr.
Prerequisite: consent of instructor. Same as OTU:190.

OTU:201 Strategist II Methods - Elementary 3-4 s.h.
Methods and materials; strategies for assessing behavior, academic achievement, social skills; instructional resources; consultation with parents and peers; collaboration strategies; empirically validated strategies. Prerequisite: OTU:238.

OTU:203 Strategist II Methods - Secondary 3-4 s.h.
Methods, materials, accommodations; practical skills for working in school/community settings; academic, affective, behavioral assessment; communication skills; management strategies; innovative program models; transition and career education planning; empirically validated strategies. Prerequisite: OTU:238.

OTU:206 Practicum with Exceptional Persons arr.
Practicum experience with students with disabilities; experiences differ depending upon student's program of study. Prerequisite: consent of instructor.

OTU:209 Seminar: Graduate Supervised Teaching 1 s.h.
For students enrolled in graduate student teaching practicum. Prerequisites: special education major and consent of instructor.

OTU:210 Characteristics and Programs: Persons with Severe Behavioral Disorders 2-3 s.h.

OTU:212 Characteristics and Programs: Persons with Autism 1-3 s.h.
Introduction to autism; definition, assessment, research information, communication skills, speech, language development of persons with autism. Prerequisite: consent of instructor.

OTU:230 Behavioral and Social Interventions 3 s.h.
Individual behavioral management, behavioral change strategies, and social interaction strategies; methods, and techniques for individuals with exceptional learning needs.

OTU:231 Strategist I Methods 4 s.h.
Methods and strategies K-12 that include models for providing curricular and instructional methodologies used in educating mildly and moderately disabled, collaboration and consultation models; empirically validated strategies.

OTU:236 Administration of Students with Special Needs 3 s.h.
Provides a foundation for and skill practice in tasks performed by directors of special education; prospective director of special education and school administrative personnel. Same as OTU:236.

OTU:238 Assessment of Learning Difficulties 1-3 s.h.
Administration of individual-educational assessment instruments and interpretation of test results; supervised practice in assessment and planning. Prerequisite: consent of instructor. Same as OTU:238.

OTU:250 Strategist I Student Teaching: K-6 arr.
Student teaching in a K-6 mild and moderate special education program.

OTU:251 Strategist I Student Teaching: 7-12 arr.
Student teaching in a 7-12 mild and moderate special education program.

OTU:252 Seminar: Behavioral Assessment and Evaluation 3 s.h.
Broadens skills of graduate students who engage in research with exceptional persons; research designs are usually taught in the Department of Psychological and Quantitative Foundations, but because of the nature of handicapping conditions and the low incidence of some handicaps, the single-subject design yields better research information. Same as OTU:352.

OTU:253 Strategist II Student Teaching: K-6 arr.
Student teaching in K-6 learning disabilities or behavior disorders.

OTU:254 Strategist II Student Teaching: 7-12 arr.
Student teaching in 7-12 learning disabilities or behavior disorders.

OTU:275 Direct Instruction: Academic Skills 3 s.h.
Empirically supported methods for teaching reading and mathematics K-12 to students with mild-moderate disabilities; assessment and curricular adaptations to individual needs.

OTU:293 Individual Instruction in Special Education arr.
Permits specialized study of topics not included in other courses. Prerequisite: consent of instructor.

OTU:343 Proseminar: Issues, Trends, and Research in Special Education 2-3 s.h.
Conceptual and practical development of research across special education and related disciplines; empirical review of the literature; focus on professional writing skills. Prerequisite: consent of instructor.

OTU:344 Proseminar: Issues, Trends, and Research in Special Education II 2-3 s.h.
Recent research from a variety of special education areas reviewed by students; simulated comprehensive examinations. Prerequisite: OTU:343.

OTU:345 Current Issues and Trends in Learning Disabilities 3 s.h.
Readings and discussions of current issues and trends in learning disabilities (e.g., definition, prevalence, interventions, subtyping, assessment).

OTU:348 Contemporary Research in Behavioral Disorders 3 s.h.
In-depth analysis of current research in behavioral disorders, emphasis on evaluating its methodology and contribution to the field.

OTU:353 Seminar: Single Subject Design Research 3 s.h.
Reviews of single subject research, development of student proposals; focus on special education, applied research.

OTU:355 Seminar: Transition 3 s.h.
History, legal mandates, and practice of assisting persons with disabilities through the varied transitions of life.

OTU:380 Practicum in College Teaching arr.
Supervised experience in teaching basic special education courses; for doctoral students majoring in teacher training. Prerequisite: consent of instructor.

OTU:392 Field Service Project in Special Education Internship arr.
Part-time or full-time experience as an intern in school districts or area education agencies; develops skills in supervision and administration of special education. Prerequisite: consent of instructor.

Prerequisite: consent of instructor.
Chair: Larry D. Bartlett
Program coordinator, educational administration: Marcus J. Haack
Program coordinator, higher education: Lelia B. Helms
Program coordinator, social foundations of education: Scott F. McNabb
Professors: Larry D. Bartlett, David B. Bills, Sandra B. Damico, Lelia B. Helms, Alan B. Henkin, Ernest T. Pascarella, Michael B. Paulsen
Professors emeriti: George A. Chambers, Walter J. Foley, Jerry N. Kuhn, Bradley M. Loomer, H. Bradley Sagen
Associate professors: Christine L. McCarthy, Scott F. McNabb, Christine A. Ogren, Chet S. Rzonca, Katrina Sanders Cassell, Carolyn L. Wanat
Associate professors emeriti: William E. Duffy, Robert E. Engel, Ray A. Muston, Sara C. Wolton
Clinical associate professors: Marcus J. Haack, Susan M. Lagos
Assistant professor: Paul Umbach
Assistant professor emeritus: John B. Cox
Adjunct assistant professors: Jennifer W. Daillam, Martha Milani, Dorothy M. Persson, Gerald Portman
Adjunct assistant professors emeriti: Wendell C. Boersma, Charles M. Mason
Adjunct clinical assistant professors: Kathleen M. Ershler, Nancy H. Garwood, Richard Grinoikas, Jeffrey M. Gustafson, Christopher L. Habben, John A. Krumbholz, Nancy G. Row, K. Terry Sherer, Gregg Shoultz
Graduate degrees: M.A., Ed.S., Ph.D.
Web site: http://www.education.uiowa.edu/epls/

The Department of Educational Policy and Leadership Studies offers programs that prepare administrators, professional personnel, teachers, and researchers in the fields of educational administration, higher education, and social foundations. The academic programs in the department reflect this diversity of purpose.

Graduate Programs

The department offers an M.A., Ed.S., and Ph.D. in educational administration; an Ed.S. in special education administration; an M.A. and Ph.D. in social foundations of education; and an M.A., Ed.S., and Ph.D. in higher education. Each degree program is described below, with information about degree requirements and application for admission.

Applicants for admission to University of Iowa graduate degree programs must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

Educational Administration

Study in educational administration prepares individuals for leadership positions. The department offers the M.A., Ed.S., or Ph.D. in educational administration as well as administrative licensure. It also offers joint programs with other College of Education departments and with other colleges at the University.

Licensure

To be eligible for recommendation by The University of Iowa for licensure in Iowa as a principal or superintendent, students must complete the appropriate program. The specific requirements for each program are available from the Department of Educational Policy and Leadership Studies and the Office of Teacher Education and Student Services.

Students who hold an M.A. must satisfy all core requirements and must complete at The University of Iowa the minimum semester-hour program for each licensure level they seek. Because each administrative licensure has specific requirements, candidates are required to plan their program with their adviser’s approval.

M.A. in Educational Administration

The Master of Arts in educational administration prepares individuals for appointments as school principals and office administrators, and for positions in area education agencies and state departments of education. It is a nonthesis program that requires a minimum of 36 s.h.

ADMISSION

Applicants must meet the admission requirements of the Graduate College. Admission decisions are made through a faculty review process. Factors considered include recommendations, grade-point average, Graduate Record Examination (GRE) General Test scores, an aptitude survey, an essay demonstrating writing ability, and other evidence of academic ability and professional promise.
CORE REQUIREMENTS
With the aid of an adviser, each M.A. student prepares a plan of study that includes the following core requirements.

- 07B:200 Educational Leadership Technology 1 s.h.
- 07B:201 Foundations of School Administration 3 s.h.
- 07B:236 Administration of Students with Special Needs 3 s.h.
- 07B:242 Research for Effective School Lectures 3 s.h.
- 07B:260 Contemporary Management Strategies for the K-12 Principal 3 s.h.
- 07B:285 School and Community Relationships 3 s.h.
- 07B:298 Legal Aspects of School Personnel 3 s.h.
- 07B:381 Analysis and Appraisal of Curriculum 2-3 s.h.
- 07B:383 Supervision and Evaluation of Early Childhood Programs 3 s.h.

For Iowa licensure as a principal, students must meet the human relations requirement of the State of Iowa. Students must complete the core requirements listed above and required clinical courses (07B:401, 07B:402, and 07B:403). Candidates may choose electives approved by the adviser.

COMPREHENSIVE EXAMINATION
The M.A. comprehensive examination consists of two 3-hour examinations: one in educational administration and one in a specialized area in either educational administration or a related field. Students must be registered in the Graduate College during their comprehensive examination semester if they plan to graduate at the end of that semester.

Ed.S. in Educational Administration
The Educational Specialist in educational administration prepares candidates for administrative appointments in school districts, area education agencies, state departments of education, and the U.S. Department of Education. It also helps school administrators upgrade their administrative skills to the level of superintendent of schools. Students seeking licensure plan a program approved by an adviser to meet State of Iowa licensure requirements.

ADMISSION
Applicants must meet the admission requirements of the Graduate College. Admission decisions are made through a faculty review process. Factors considered include recommendations, grade-point average, Graduate Record Examination (GRE) General Test scores, and other evidence of academic ability and professional promise.

CORE REQUIREMENTS
- 07B:291 Administration of Educational Programs and Personnel 3 s.h.
- 07B:294 Politics and Economics of Financing Public Education 3 s.h.
- 07B:297 Administrative Leadership Theory 3 s.h.
- 07B:299 Legal Aspects of School Administration 2-3 s.h.
- 07B:395 Educational Specialist Research 2-3 s.h.

PROGRAM EMPHASIS
Students must complete their remaining minimum required semester hours (minus electives) in one of the following emphasis areas. Courses listed for each emphasis area are required.

- Elementary School Administration
  - 07P:150 Introduction to Educational Measurement 3 s.h.
- Secondary School Administration
  - 07P:150 Introduction to Educational Measurement 3 s.h.
- General School Administration
  - 07B:205 Collective Bargaining in Education 3 s.h.
  - 07B:295 Financial Management of Local School Systems 3 s.h.
  - 07B:404 Central Administration Clinical Methods 1-3 s.h.
  - 07P:143 Introduction to Statistical Methods 3 s.h.

ELECTIVES
Students choose electives to complete the 62 s.h. required for the Ed.S. They may choose electives for specialization in fields such as staff personnel, business affairs, instruction, theory, legal aspects, curriculum, and information systems.

RESEARCH
All Ed.S. students must complete a formal research paper (4 s.h.) that deals with a specific problem in school administration or instruction.
COMPREHENSIVE EXAMINATION

The Ed.S. comprehensive examination consists of two 3-hour examinations: one in educational administration and the other in a specialized area of educational administration or a related field. Students must be registered in the Graduate College during their comprehensive examination semester if they plan to graduate at the end of that semester.

Ed.S. in Special Education Administration

The Education Specialist program in special education administration is offered jointly with the Department of Teaching and Learning. The program provides sufficient training and experience to enable graduates to obtain entry-level positions in special education administration. The career focus of the program is on middle management positions such as supervisor and assistant director. The program requires a minimum of 62 s.h. Successful completion qualifies the student for Iowa licensure as a special education supervisor (State of Iowa Endorsement 233, 238) or special education director (State of Iowa Endorsement 239). It also qualifies the student for general administration licensure (State of Iowa Endorsement 171).

Ph.D. in Educational Administration

The Doctor of Philosophy in educational administration prepares students for leadership positions at all levels of education and administrative practice (school administration, college and university teaching and research). The program is flexible, with individually designed study plans that include course work in related disciplines and research pursuits. Integration of theory and practice is emphasized.

Ph.D. students are expected to achieve competence in educational program planning, finance and governance, leadership theory, evaluation, and research methodologies that include statistical methods. They also must gain expertise in areas of specialized program and personnel policy analysis.

Course content includes prerequisites, a core of common competencies, at least one specialization in the administrative field, cognate study outside the college, research skill development, and a research dissertation.

Common specialization areas are general administration, elementary school administration, secondary school administration, systems analysis and research, school finance, curriculum, legal aspects, theory, and school personnel. Students must demonstrate proficiency in two research tool areas.

ADMISSION

Applicants must meet the admission requirements of the Graduate College. Admission decisions are made through a faculty review process. The program admits a maximum of 10 students each fall semester or preceding summer session. Admission is based on several factors, including recommendations from college or university faculty that speak to the candidate’s scholarship and potential for academic success; cumulative grade-point average; Graduate Record Examination (GRE) General Test scores; and a written statement addressing one of several topics (personal philosophy of education, steps in the professionalization of teaching, current educational issues and their administrative impact, or the role of administration in educational organizations).

Admission is for summer or fall entry; application deadline is December 1. Applicants are notified of admission decisions by February 15.

CORE COURSES

Core courses provide the background necessary for further study, including research in specialized areas. They also develop competencies common to the functional areas of school administration. The four core courses integrate planning of educational personnel programs, analysis of the politics and economics of governance and the financing of public education, evaluation of administrative leadership theories, and options in research methodology and quantitative analysis.

Each core course carries 3 s.h. of credit, is open only to Ed.S. and Ph.D. students, and requires the development and practice of interaction, reading, and writing skills.

Seminars designed primarily for doctoral candidates are offered to supplement each functional core area. Student scholarship is reflected in writing, reading, and research in doctoral seminars.
COGNATES

Students who specialize in administration must complete a 9 s.h. cognate outside the College of Education with the adviser’s approval.

COMPREHENSIVE EXAMINATION

Ph.D. students must satisfactorily complete a six-hour comprehensive examination in the six common areas of educational administration and a three-hour examination based on the student’s specialization areas and approved by the student’s adviser and the department chair. To be eligible to take the Ph.D. comprehensive examination, students must be completing or must have completed the doctoral core courses and the research tool requirements. Students must be registered in the Graduate College during their comprehensive examination semester. They may not register for more than 3 s.h. of Ph.D. thesis credit that semester, and they may not earn dissertation credit before that semester. No Ph.D. comprehensive examinations are held during summer sessions.

Students pursuing doctoral programs in areas other than educational administration who want to use some aspect of the educational administration program as a concentration area for a comprehensive examination should consult with an adviser in the Department of Educational Policy and Leadership Studies early in their program of study.

Any specialization area open to doctoral students in educational administration is open to other doctoral students who meet the necessary prerequisites for specific courses. Students should complete approximately 12 s.h. in one specialization area before requesting a comprehensive examination. If the student decides to use a field within educational administration as a related comprehensive area, he or she should plan to complete approximately 18 s.h. of diversified course work in educational administration.

RESEARCH DISSERTATION

All students must write a formal dissertation prospectus and submit it for approval first by their adviser and then by their doctoral committee. The student and adviser determine when the prospectus is complete. The prospectus committee meets to make a final evaluation of the prospectus and to decide whether to grant the student approval to proceed. Dissertation prospectus meetings are not held during summer sessions.

Students must accumulate 10 s.h. of dissertation research credit. The doctoral program culminates with final oral defense of the dissertation. Students usually take the examination within a month of their anticipated graduation. They must be registered at The University of Iowa during the session in which they graduate.

RESIDENCY

Each doctoral student must successfully complete two semesters (minimum of 9 s.h. on campus) to fulfill the residency requirement. The following sample Ph.D. program requires a minimum of 90 s.h. and assumes that students enter with an M.A. and 32 s.h. of graduate credit.

Social Foundations of Education

Social foundations of education is an interdisciplinary program designed to enhance students’ ability to analyze the influence of social, historical, and philosophical forces on the formal educational enterprise. Major areas of specialization are comparative/international education, history of education, philosophy of education, policy studies, and sociology of education.

Applicants must meet the admission requirements of the Graduate College. A personal interview with one or more members of the social foundations faculty may be required. An undergraduate and/or graduate emphasis in philosophy, the humanities, or the social sciences is strongly recommended. Students must maintain an overall g.p.a. of at least 3.00 to remain in the program.
M.A. in Social Foundations of Education

The Master of Arts in social foundations of education requires a minimum of 18 s.h. in social foundations, which should include at least two courses each in three of the five areas of specialization. The remainder of the required 32 s.h. of course work must be in a concentration area appropriate to the student's career and academic goals. For example, students interested in philosophy of education usually take courses offered by the Department of Philosophy. Students are not required to write a thesis. M.A. students must satisfactorily complete a six-hour comprehensive examination covering their three areas of study in the social foundations program and their outside area. The examining committee may elect to hold an oral examination after the exam.

Ph.D. in Social Foundations of Education

The Doctor of Philosophy in social foundations of education requires a minimum of 90 s.h. Students are required to take a minimum of 24 s.h. in social foundations, which must include at least 12 s.h. in the major specialization area and a minimum of 6 s.h. from each of two additional areas. In addition, students must take at least 9 s.h. of related course work in a concentration area.

Approximately one-third to one-half (30-45 s.h.) of each student’s program is devoted to in-depth course work in disciplines such as history, philosophy, political science, or sociology. These sequences are individually planned by the student with the aid of his or her adviser and suggestions from the appropriate department(s).

Five required research courses are chosen in accordance with the student’s research interests and program. The first must be in quantitative methodologies (e.g., graduate-level statistics, microcomputing, demographic analysis), the second must be in qualitative analysis (e.g., philosophy of science, philosophy of social science, historiography, qualitative or case study methodologies, foreign language), and the third in either quantitative methodologies or qualitative analysis. All students must successfully complete 07B:155 Critical Thinking and 07B:206 Research Process and Design.

Students usually earn 12-15 s.h. for dissertation research.

COMPREHENSIVE EXAMINATION

Ph.D. students must satisfactorily complete an extensive comprehensive examination, including three examinations. The first is in the major area of study; the second is in the other two concentration areas; and the third is in the outside area of study and is prepared by faculty outside the social foundations program. The exams are followed by an oral examination.

RESEARCH DISSERTATION

All Ph.D. students must write a formal dissertation prospectus and submit it for approval first by their adviser and then by the members of their doctoral committee. Students and their advisers determine when the prospectus is complete.

Students must earn 12 s.h. of dissertation research credit. The doctoral program culminates with a final oral defense of the dissertation. Students must be registered at The University of Iowa during the session in which they graduate.

RESIDENCY

Each doctoral student must successfully complete two semesters (a minimum of 9 s.h. per semester) on campus to fulfill the residency requirement.

Higher Education

Postsecondary and continuing education in the United States represents an extensive and complex set of phenomena. The academic programs in higher education encompass that complexity. Degrees are offered at all levels, with emphasis on both research and practice. Preparation for either teaching or administration is available. The teaching, research, and service activities of the faculty and the work of the graduates of the several degree programs illustrate that education beyond the high school level continues in a variety of ways for all ages and in many different settings.

M.A. in Higher Education

The Master of Arts in higher education prepares students for entry- and mid-level administrative, management, and policy positions in two- and four-year institutions. It is appropriate preparation for positions such as assistant dean, assistant to the president, director, in-service director, and department or program chair in selected areas. It is a nonthesis program.
ADMISSION
Applicants must meet the admission requirements of the Graduate College. Admission is based on grade-point average, Graduate Record Examination (GRE) General Test scores, and promise for professional growth. Transcripts, GRE scores, three letters of recommendation, and a statement of educational goals are required.

Applications must be submitted well in advance of the intended semester of admission.

REQUIREMENTS
The M.A. in higher education requires a minimum of 32 s.h. Students take six hours of written examinations based on the core, concentration, and specialization, according to the plan of study developed individually for each student.

Concentration areas in which exams may be written include administrative practices, policy studies, and specializations developed in consultation with the adviser. Students majoring in another field who want to complete a related field in higher education and to be eligible to write a related-field examination should consult with a higher education adviser early in their study. Plans of study are developed individually.

Ed.S. in Higher Education
The Educational Specialist in higher education provides advanced graduate study in administration, policy studies, and specializations developed in consultation with the adviser. The Ed.S. also may be awarded upon completion of a joint program of graduate work in higher education and an academic field, or upon completion of a higher education sequence following a master’s degree program.

ADMISSION
Applicants must meet the admission requirements of the Graduate College. Admission is based on grade-point average, GRE General Test scores, and promise for professional growth. Transcripts, GRE scores, three letters of recommendation, and a statement of educational goals are required.

Applications must be submitted well in advance of the intended semester of admission.

REQUIREMENTS
The Ed.S. in higher education requires 60 s.h. The program of study must include at least 18 s.h. in professional education and related fields, including an appropriate structured internship determined in consultation with the adviser; at least 28 s.h. in the student’s specialization area and 10 s.h. of electives, all approved by the adviser; and 4 s.h. of research credit in 07B:395 Educational Specialist Research.

COMPREHENSIVE EXAMINATION
The comprehensive examination consists of two 3-hour written exams: one covering the field of higher education and one covering the student’s concentration area. The written exams may be followed by an oral exam.

RELATED FIELD
Students majoring in another field who want to complete a related field in higher education should consult with the higher education adviser early in their study. Plans of study are developed individually.

TEACHING INTERNSHIP (JOINT ED.S. PROGRAM)
Program participants teach half-time for a full semester at a cooperating community college under the supervision of an experienced faculty member in that college and with field supervision from The University of Iowa. Interns participate in the academic life of the host community college, and they often gather data for their Ed.S. research project during the internship. Participants must be willing to travel to a community college and reside there for the one-semester program.

Ph.D. in Higher Education
The Doctor of Philosophy in higher education is designed for students interested in serving as administrators, specialists, researchers, or faculty members in postsecondary institutions or related public or private agencies. The program offers concentrations in administration, policy studies, and specializations designed in consultation with the adviser.

ADMISSION
Applicants must meet the admission requirements of the Graduate College. Admission is based on grade-point average, GRE General Test scores, and promise for professional growth. Transcripts, GRE General Test scores, three letters of recommendation, and a statement of educational goals are required.

Ph.D. applicants are considered for admission as completed application materials are received. Admission is for fall or spring entry.
REQUIREMENTS
The Ph.D. in higher education requires 90 s.h. beyond the bachelor's degree. Each student must complete a series of core courses (22-24 s.h.) and 16-24 s.h. in a concentration area of his or her choice. Students also earn at least 12 s.h. in a related field or up to 30 s.h. in a minor, a requirement that may be met by appropriate previous M.A. course work that complements the student's concentration area. The dissertation (12-15 s.h.) involves research related to the concentration area.

These four components—core, concentration, minor and/or related fields, and dissertation research—constitute a major part of the typical doctoral program and give students the opportunity to specialize in one or more areas of interest.

In addition, students are required to develop research skills appropriate to their dissertation project. Students may take supplementary course work outside the department related to their program of study.

COMPREHENSIVE EXAMINATION
The Ph.D. comprehensive examination covers the field of higher education and the candidate’s mastery of research skills appropriate to his or her proposed dissertation topic.

Before taking the comprehensive exam, each Ph.D. student prepares a qualifying paper. The paper is a preliminary research proposal that demonstrates the student’s ability to identify a scholarly study topic, formulate a conceptual framework for addressing the topic based on relevant scholarly literature, and set forth a detailed research methodology. The qualifying paper may constitute a preliminary draft of the first three chapters of the dissertation proposal.

Student Affairs Administration and Research
The Doctor of Philosophy in student affairs administration and research provides in-depth preparation for leadership positions in student affairs administration, graduate student affairs preparation programs, and research on college students and student affairs practice. The Ph.D. is offered jointly by the Department of Counseling, Rehabilitation, and Student Development and the Department of Educational Policy and Leadership Studies. For more information, see Counseling, Rehabilitation, and Student Development in the Catalog.

624 College of Education

07B:220 History and Philosophy of Postsecondary Education
3 s.h.
Major themes and developments in American higher education; ideologies, people, movements that have influenced these developments.

07B:222 Introduction to Policy Analysis and Evaluation
3 s.h.
Theoretical and technical approaches to analysis and evaluation of contemporary public policies.

07B:224 Organizational Theory and Administrative Behavior
3 s.h.
Theories and concepts of organizational behavior applied in structural, organizational, administrative contexts of American education.

07B:225 Introduction to Public Policymaking
2-3 s.h.
Public policy work; tools used to create, deliver public policy.

07B:226 Educational Management
2-3 s.h.
Literature and research on management; emphasis on American education.

07B:230 Alternative Models of Schooling
2-3 s.h.
Popular alternatives to K-12 and postsecondary education; homeschooling, charter schools, magnet schools; construction of a conceptual framework for understanding alternatives.

07B:236 Administration of Students with Special Needs
3 s.h.
Foundation for and skill practice in tasks performed by directors of special education and others administering to needs of special education students, and economically and socially deprived students; for prospective school administrative personnel. Same as 07U:236.

07B:240 Topics in Education
arr.
Seminar for intensive study of one problem, issue, or work field. Repeatable.

07B:242 Research for Effective School Leaders
3 s.h.
Fundamental language of contemporary research, identification and application of basic research components to contemporary educational leadership problems; applicability of research toward effective decision making.

07B:245 The American Professoriate
3 s.h.
Research on college and university faculty members; perspectives on faculty careers, values, beliefs, role in shared governance; tenure process and policies; issues unique to faculty members of color and women faculty members.

07B:259 Political Philosophy and Education
3 s.h.
Political ideas that shape contemporary U.S. educational policy (e.g., liberalism, conservatism, libertarianism, communitarianism, socialism); fundamental political concepts such as democracy, rights, justice.

07B:260 Contemporary Management Strategies for the K-12 Principal
3 s.h.
Leadership skills and management techniques for daily organization, operation of schools; emphasis on climate, communication, group processes, conflict resolution, curriculum management.

07B:261 The Principalship
3 s.h.
Organization, supervision, administration of schools; curriculum leadership, instructional practice, personnel relations; role analysis, school-community relationships, communication channels.

07B:275 Development Policy and Planning in the Third World
3 s.h.
Cross-cultural and interdisciplinary analysis of problems associated with urbanization and development in developing nations. Same as 034:275, 042:275, 044:275, 102:275, 113:275.

07B:285 School and Community Relationships
3 s.h.
Community analysis, politics and education, power groups and influences, school issues and public responses, public relations strategies.

07B:290 Master's Project
arr.
Research for the nonthesis program; topic approved by adviser.

07B:291 Administration of Educational Programs and Personnel
3 s.h.
Personnel and program planning examined against statements of educational purpose; interrelationships and internal consistencies of program and staff administration; from perspectives of philosophy, psychology, learning theory, sociology, curriculum theory.

07B:293 Individualized Instruction
arr.
Readings, special projects, and/or studies that reflect joint instructor/student interest. Prerequisite: consent of instructor.

07B:294 Politics and Economics of Financing Public Education
3 s.h.
Theories, models, research relating to educational governance and finance considered with issues in policy development, analysis, appraisal, planning, their interrelation in American public education.

07B:295 Financial Management of Local School Systems
3 s.h.
School business administration; emphasis on fiscal management, including budgetary procedures, short- and long-range fiscal and facilities planning, management techniques.

07B:297 Administrative Leadership Theory
3 s.h.
Administrative leadership theory drawn from social psychology, sociology, political science, communications, business, and their applications; analysis and formulation of strategies for performing leadership functions in educational administration.

07B:298 Legal Aspects of School Personnel
3 s.h.
Teacher and student: liability, negotiations, rights, privileges, responsibilities of school personnel; principles of law derived from court decisions; constitutional and statutory provisions; for teachers and administrators.

07B:299 Legal Aspects of School Administration
2-3 s.h.
Nonpersonnel concerns in education: organization, property, finance, religion, discrimination, intergovernmental relations; use of constitutional and statutory provisions plus court decisions; primarily for administrators but applicable to teachers.

07B:306 Education in China
2-3 s.h.
Educational development in modern China from social, political, literary perspectives; analysis of post-1949 educational policy shifts.

07B:311 Seminar: Research Topic in Education
2-3 s.h.
Topic submitted by students; faculty. Repeatable.

07B:316 Policy Design and Implementation
2-3 s.h.
Review of literature, emphasis on policy drafting skills for administration and management in education and other settings.

07B:318 Legal Issues in Student Services
3 s.h.
Analysis of legal issues and their application to design of policies and procedures for student services in postsecondary institutions. Prerequisite: 07B:218.

</tbody>
</table>
The Department of Psychological and Quantitative Foundations offers programs in four areas: educational measurement and statistics, counseling psychology, educational psychology, and school psychology. These programs have two general goals: to help students acquire the knowledge and skills necessary to function effectively in settings that require the application of psychological and quantitative principles, and to extend knowledge and understanding of the teaching/learning process as it occurs in a variety of settings. The major emphasis in the M.A. and Ed.S. programs is on the first of these goals; that in the Ph.D. programs is on the second. However, there is some emphasis on both goals in all programs.

Undergraduate Course Work

The department offers an undergraduate minor in the combined areas of educational psychology, measurement, and statistical analysis.

Graduate Programs

The Department of Educational Policy and Leadership offers an M.A. and Ph.D. in educational measurement and statistics; a Ph.D. in counseling psychology; an M.A. and Ph.D. in educational psychology; and an Ed.S. and Ph.D. in school psychology. Each program is described below, with information about degree requirements and application for admission.

Applicants for admission to University of Iowa graduate degree programs must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

Educational Measurement and Statistics

M.A. in Educational Measurement and Statistics

The Master of Arts in educational measurement and statistics provides students with basic knowledge of educational measurement and research methodology. Graduates find employment in research centers, test publishing organizations, large school systems, and state departments of education. The program also is appropriate for students who wish to broaden their knowledge of measurement and research methodology for personal development or professional improvement.
ADMISSION
Applicants must meet the admission requirements of the Graduate College. They should have a combined verbal and quantitative score of at least 1000 on the Graduate Record Examination (GRE) General Test and should have completed at least one course in college mathematics. Experience as a teacher or research is desirable. Applicants who do not meet admission requirements but show potential for success in the program may be granted conditional admission.

Students who wish to transfer to this program from another University of Iowa program must submit a statement that explains why they want to change programs and why they think the educational measurement and statistics program will help them accomplish their educational and vocational goals.

For information about admission dates, contact the educational measurement and statistics program coordinator.

REQUIREMENTS
The M.A. in educational measurement and statistics is available with thesis (minimum of 28 s.h. of course work plus 2-4 s.h. of thesis credit) or without thesis (32 s.h. minimum). All students must complete a core of courses totaling approximately 26 s.h. Included in this core are a graduate-level survey course in educational psychology, elementary and intermediate courses in statistical methods, a course in educational research methodology, and courses in the development and use of evaluation instruments. Students who already have completed equivalent courses at another institution may add more advanced courses to the core.

The six-hour comprehensive examination typically includes three-hour examinations in educational measurement and in applied statistics. With the approval of the M.A. committee, a student may take two-hour examinations in these fields plus a two-hour examination in educational psychology or a substitute area. Three-hour examinations assume a minimum of three courses in the area; two-hour examinations assume a minimum of two courses in the area.

Ph.D. in Educational Measurement and Statistics
The Doctor of Philosophy in educational measurement and statistics prepares students for senior professional positions in educational measurement, evaluation, and statistical methods. Graduates find employment in colleges and universities, state and federal agencies, large public and private school systems, test publishing agencies, and research centers.

ADMISSION
Applicants must meet the admission requirements of the Graduate College. They must hold an M.A. from an accredited institution and have a combined verbal and quantitative score of at least 1000 on the Graduate Record Examination (GRE) General Test. At least one year of professional experience in teaching, research, or a related field is desirable. Applicants who expect to concentrate in statistics should have training in college mathematics through differential and integral calculus; deficiencies must be made up during the first year of residence. Applicants who do not meet admissions requirements but show potential for success in the program may be granted conditional admission.

Students who wish to transfer to this program from another University of Iowa program must submit a statement explaining why they want to change programs and why they think the educational measurement and statistics program will help them accomplish their educational and vocational goals.

For information about admission dates, contact the educational measurement and statistics program coordinator.

REQUIREMENTS
The Ph.D. in educational measurement and statistics requires a minimum of 90 s.h., including 12 s.h. or more of thesis credit. In addition to the substantive courses in educational measurement and statistics offered by the department, all students must complete the following related courses.

07C:254 Appraisal in Counseling 3 s.h.
07P:165 Introduction to Program Evaluation 3 s.h.
07P:200 Educational Psychology 3 s.h.
07P:220 Quantitative Educational Research Methodologies 3 s.h.

The student's adviser specifies additional course work in areas appropriate to the student's interests and vocational objectives. These courses typically include additional work in educational psychology and courses offered by other College of Education departments and University departments.

Students who concentrate in statistics and intend to teach at the college level are required to take
courses in the mathematical theory of statistics. Those who concentrate in educational measurement and evaluation take courses in curriculum, counseling, and higher education.

All students must develop familiarity with computer programming techniques and computer software designed for statistical analysis.

Candidates who enter the program without completing an M.A. thesis must complete a substitute project approved by three members of the department faculty. The project must be completed before the Ph.D. comprehensive examinations may be written.

Following completion of most of their course work, candidates take the comprehensive examination, which typically consists of three 3-hour written examinations over the fields of applied statistics, educational measurement, and program evaluation, or approved substitute areas such as educational psychology or mathematical statistics. A substitute area generally is one in which the candidate has at least 9 s.h. of course work. In place of one written examination, the student's committee may assign a project involving analytical and evaluative skills, or research creativity. The written examinations are followed by an oral examination in which the committee members may seek further evidence of the student's command of the three fields. A single decision is made on all aspects of the comprehensive examination.

Counseling Psychology

Ph.D. in Counseling Psychology

The Doctor of Philosophy in counseling psychology was granted full accreditation by the American Psychological Association in 1983. Full accreditation was renewed in 2000.

The program's goal is to prepare counseling psychologists who will promote psychology as a science and contribute to the advancement of the profession. No master's degree is offered in counseling psychology. The faculty endorses a scientist/practitioner model of training and expects students to become competent researchers and proficient practitioners. Graduates find positions in a variety of settings, including higher education, counseling centers, clinics, private practice settings, and hospitals.

ADMISSION

Applicants must meet the admission requirements of the Graduate College. Preference is given to applicants who have an undergraduate g.p.a. above 3.00 and a graduate g.p.a. above 3.50; an undergraduate major, minor, or substantial course work in psychology; a combined verbal and quantitative score above 1200 on the Graduate Record Examination (GRE) General Test; and previous research and counseling experience.

Application materials must include a Graduate College application form; official transcripts of all previous college work; an official report of GRE General Test scores (the GRE advanced test in psychology is recommended but not required); a personal statement outlining career goals and reasons for seeking advanced training in counseling psychology; and three letters of recommendation from individuals qualified to assess the applicant's potential for completing the doctoral program. The faculty encourages applications from minorities, women, and persons from a wide range of backgrounds and academic preparation. The program typically accepts between five and eight students each year.

Admission is for fall entry. Application deadline is January 1. Admissions decisions usually are made by March 15. Applicants are invited to campus for interviews before final selection. All students must study full-time.

REQUIREMENTS

The Ph.D. in counseling psychology requires a minimum of 96 s.h. beyond the bachelor's degree.

Basic Psychology

All students are required to have a thorough grounding in the basic discipline of psychology. This may be achieved through a minimum of 3 s.h. of credit in each of the following four areas: biological bases of behavior, cognitive-affective bases of behavior, social bases of behavior, and history and systems. An additional 6 s.h. are required in the area of individual differences.

Statistics and Research Design

Both of these:

07P:243 Intermediate Statistical Methods 4 s.h.
07P:257 Educational Measurement and Evaluation 3 s.h.
One of these:
07P:244 Correlation and Regression 4 s.h.
07P:246 Design of Experiments 4 s.h.

Counseling Psychology Core
07P:223/07P:225 Introduction to Counseling Psychology Practice/Research I-II 6 s.h.
07P:235 Multicultural Counseling 3 s.h.
07P:305 Psychotherapy I: Dynamic and Phenomenological Approaches 3 s.h.
07P:306 Psychotherapy III: Career Interventions 3 s.h.
07P:310 Psychological Assessment (two sections taken concurrently) 6 s.h.
07P:312 Psychological Diagnosis 3 s.h.
07P:356 Processes and Outcomes in Counseling and Psychotherapy 3 s.h.
07P:365 Psychotherapy II: Cognitive and Behavioral Approaches 3 s.h.
07P:434 Practicum in Counseling Psychology 3 s.h.
07P:453 Advanced Practicum in Counseling Psychology (repeatable) 1-3 s.h.
07P:465 Issues and Ethics in Professional Psychology 3 s.h.

Students must enroll in practicums to reach a specified level of client contact, supervision, and additional experience hours. The first practicum’s site typically is University Counseling Service. Subsequent placements at other sites must have prior approval of the counseling psychology faculty. Students must successfully complete one semester of 07P:434 Practicum in Counseling Psychology before enrolling in 07P:453 Advanced Practicum in Counseling Psychology.

Other Requirements
Elective courses are determined in collaboration with the major adviser.

The dissertation research study is planned in collaboration with the doctoral student’s major adviser. Dissertation credit can range from 12 to 15 s.h.

Students spend a calendar year in an internship setting approved by the counseling psychology faculty. The faculty determines student readiness to apply for the internship based on completion of all or almost all required course work, satisfactory progress toward completion of the portfolio requirement, and successful completion of practicum requirements. Internships usually require geographic relocation.

Comprehensive examinations are written in three areas: counseling psychology research/theory, counseling psychology practice methods/applications, and counseling psychology ethics/issues. For students who entered the program in 2002 and later, the comprehensive examination is structured as a component of the portfolio review. For more information, contact the program coordinator.

Students must show appropriate levels of emotional balance and interpersonal skills and act within the American Psychological Association’s Ethical Principles of Psychologists. For more information, contact the program director.

Educational Psychology

M.A. in Educational Psychology

The Master of Arts in educational psychology is designed to help students master the core content and methods of educational psychology. Graduates generally are qualified to apply educational psychology research findings to the solution of problems in a broad range of educational contexts. Students may elect to specialize in any of several areas, including classroom learning and instruction, motivation, development, measurement of human abilities, and the role of technology in instruction.

Full-time M.A. students are expected to complete the degree in two years or less. Each student’s progress is evaluated by the faculty after one academic year (two semesters) of study and during subsequent years. Students who do not make satisfactory progress may be required to withdraw from the program.

ADMISSION

Applicants must meet the admission requirements of the Graduate College. They must have a combined verbal and quantitative score of at least 1000 on the Graduate Record Examination (GRE) General Test; successful applicants usually score higher. Those who majored in psychology as undergraduates are encouraged to take the GRE advanced test in psychology and submit their score. International applicants whose first language is not English must submit acceptable scores on the Test of English as a Foreign Language (TOEFL). Teaching experience is desirable but not required.

Application deadline for fall semester entry is February 1. Application deadline for spring semester entry is October 1. Admission decisions are announced approximately six weeks after the application deadline. Late applications are considered if space is available.
Applicants who accept admission or financial aid for the following fall and do not relinquish either one on or before April 15 may not solicit or accept another offer. Offers made by the program after April 15 include the provision that the offer is void if the applicant accepts and continues to hold on that date a previous offer made by another program listed in the American Psychological Association publication Graduate Study in Psychology and Associated Fields. This policy is consistent with standards set by the association’s Board of Educational Affairs.

REQUIREMENTS

The M.A. in educational psychology requires a minimum of 30 s.h. A thesis is not required. Students develop a program of study in consultation with the adviser. Full-time M.A. students typically take at least 9 s.h. each semester, with the option of summer session work; they usually complete the program in four semesters. Part-time M.A. students take 3-6 s.h. each semester; they usually complete the degree in two or three years.

Students may apply to substitute equivalent course work from another institution or department for required or recommended courses.

Required courses:

- 07P:202 Understanding Educational Research 3 s.h.
- 07P:221 Educational Psychology for Effective Teaching 3 s.h.
- 07P:299 M.A. Project: The Portfolio 3 s.h.

Recommended courses (minimum 15 s.h.):

- 07P:106 Child Development 3 s.h.
- 07P:212 Advanced Life-Span Development 3 s.h.
- 07P:111 Motivation 3 s.h.
- 07P:201 Adapting Instruction to Individual Differences 3 s.h.
- 07P:203 Learning, Technology, and Effective Teaching 3 s.h.
- 07P:205 Design of Instruction 3 s.h.
- 07P:208 Designing Educational Multimedia 3 s.h.
- 07P:215 Web-Based Learning 3 s.h.
- 07P:281 Cognitive Theories of Learning Electives 3 s.h.

Psychological and Quantitative Foundations

Selection of courses depends on the student’s area of specialization. Students may substitute equivalent courses with faculty approval.

PORTFOLIO PROJECT

Rather than completing a thesis or comprehensive exam, M.A. students create a portfolio project. The goal of the portfolio is to show how a theoretical understanding and a practical application of educational psychology can help the student become a better teacher.

In the opening course of the M.A. program (07P:221), students are introduced to all aspects of educational psychology and begin to create a portfolio of work to showcase how they can use educational psychology to become more effective teachers. With each course in the program, students continue to work on individual entries for their portfolio. In the final course of the M.A. program (07P:299), students revise and present their comprehensive portfolio.

Ph.D. in Educational Psychology

The Doctor of Philosophy in educational psychology is designed to help students master the core content and methods of educational psychology and acquire the depth of knowledge and methodological sophistication necessary for original research that contributes to the discipline.

Ph.D. students are reviewed annually by the faculty. Students must complete a second-year project by the end of their second academic year in the program. Those who do not fulfill this requirement or who otherwise fail to make satisfactory progress may be required to withdraw.

Students who enter the Ph.D. program without having completed an M.A. thesis are required to complete the independent research course sequence and its assigned research project in either their first or second year. Students who have completed an empirical M.A. thesis that is acceptable to the faculty may omit the independent research sequence and second-year project.

ADMISSION

Applicants must meet the admission requirements of the Graduate College. They must have a combined verbal and quantitative score of at least 1000 on the Graduate Record Examination (GRE) General Test; successful applicants usually score higher. Those who majored in psychology as undergraduates are
encouraged to take the GRE advanced test in psychology and submit their score. International applicants whose first language is not English must submit acceptable scores on the Test of English as a Foreign Language (TOEFL). Applicants who do not meet all admission requirements may be granted conditional admission on the basis of other evidence, such as high grade-point average, strong academic preparation, and highly supportive recommendations.

Admission is for fall entry. Application deadline is January 15. Review of applications begins immediately after the deadline. Admission decisions are announced approximately six weeks after the application deadline.

Applicants who accept admission or financial aid and do not relinquish either one on or before April 15 may not solicit or accept another offer. Offers made by the program after April 15 include the provision that the offer is void if the applicant accepts a previous offer made by another program listed in the Graduate Study in Psychology. This policy is consistent with standards set by the Board of Educational Affairs of the American Psychological Association.

REQUIREMENTS

The Ph.D. in educational psychology requires a minimum of 72 s.h. beyond the bachelor’s degree. Students develop a plan of study in consultation with the adviser. Some of the required courses listed below encompass substantive areas within educational psychology. Other required courses include a proseminar that orients students to educational psychology as a profession and to key readings in the field, a research practicum in which students assist with and eventually design and carry out original research, and several courses in measurement and statistics.

Some requirements may be waived for students who begin the Ph.D. program with a master’s degree or specific course work from another program. Course requirements are as follows.

Minor Area

Students must complete a minimum of 12 s.h. that constitute a coherent program of course work outside the program and beyond the courses listed above. The minor area may be in a foundation discipline, such as psychology, or in another area of education, such as mathematics education, educational philosophy, or program evaluation. Course work must be at or above the 200-level and may span departments and colleges so long as it reflects a plan approved by the student’s adviser.

SECOND-YEAR RESEARCH PROJECT

As part of their second year of participation in 07P:230 Research in Educational Psychology, Ph.D. students are required to complete a research project of modest scope under the direction of a faculty member and must present the work in both oral and written form to the program’s faculty and students. First-year Ph.D. students may assist second-year students with data collection and other research activities, and students may design and conduct projects in collaboration with other students. The written report must be completed by the end of the student’s second academic year in the program.
Students may re-enroll in this course beyond their second year.

**COMPREHENSIVE EXAMINATION**

The Ph.D. comprehensive examination emphasizes competence and depth in one or more narrowly defined areas of research and theory. Students choose from three options in consultation with their adviser and with the approval of the examining committee, which is made up of five faculty members and is not necessarily the same as the dissertation committee. The options are a review article, an extended research activity, or a traditional comprehensive examination.

**School Psychology**

**Ed.S. in School Psychology**

The Educational Specialist in school psychology provides course work and supervised field experience in education and psychology, enabling graduates to qualify for Iowa licensure as school psychologists (State of Iowa Endorsement 40).

**ADMISSION**

Applicants must meet the admission requirements of the Graduate College. Contact the Department of Psychological and Quantitative Foundations for more information about admission to the Ed.S. in school psychology.

**REQUIREMENTS**

The Ed.S. in school psychology requires a minimum of 60 s.h. (the total depends on students’ previous course work). It includes courses in psychological foundations, psychoeducational foundations, school psychology, and research methods. Other requirements include a written comprehensive examination and a research paper prepared in conjunction with 07P:342 Research Project in School Psychology (1-6 s.h.).

**Ed.S. in School Psychology via Distance Education**

The University of Iowa and the University of Northern Iowa offer an Ed.S. in school psychology that allows students to take courses via distance education at either university. Applicants to the University of Iowa Ed.S. via distance education must meet the admission requirements of the Graduate College. Admission is for fall or spring. Contact the Department of Psychological and Quantitative Foundations for more information.

**Ph.D. in School Psychology**

The Doctor of Philosophy in school psychology was granted full accreditation by the American Psychological Association in 1992; full accreditation was renewed in 2000. The program's goal is to prepare doctoral-level school psychologists who will promote psychology as a science and contribute to the advancement of the profession. The faculty endorses a scientist/practitioner model of training and expects students to become competent researchers and proficient practitioners.

**ADMISSION**

Applicants must meet the admission requirements of the Graduate College. Preference is given to applicants with an undergraduate major in psychology or education, a g.p.a. above 3.00, and combined verbal and quantitative scores above 1000 on the Graduate Record Examination (GRE) General Test. The faculty also encourages applications from individuals with an M.A. or Ed.S. and experience as psychologists or other human service providers.

Applications must include three letters of recommendation, a personal statement of interest and goals, and a writing sample. Complete application materials, including transcripts and test scores, must be received by January 1 to be considered for fall semester admission. Admission decisions usually are made by March 15. The program admits from four to six students each year.

**REQUIREMENTS**

The Ph.D. in school psychology requires a minimum of 103 s.h. All students are required to have a thorough grounding in the basic discipline of psychology, which may be achieved through earning a minimum of 3 s.h. of credit in each of the following areas: biological bases of behavior, cognitive/affective bases of behavior, social bases of behavior, individual differences, and history and systems.

The plan of study is developed by students and their academic advisers. Students are required to write comprehensive examinations, carry out a research project equivalent in scope to an M.A. thesis, participate in an internship, and complete a doctoral dissertation, earning a minimum of 10 s.h. in 07P:493 Ph.D. Thesis in Psychological and Quantitative Foundations.
Psychological and Quantitative Foundations

Program course work in evaluation is required.

Students must enroll in practicums to reach a specified level of client contact, supervision, and additional experience hours. Placements must have prior approval of the school psychology faculty. Students must successfully complete one semester of 07P:237 Practicum in School Psychological Service before enrolling in 07P:337 Advanced Practicum in School Psychology. Students must adhere to the most recent ethical principles and standards of the American Psychological Association.

Courses

*Students may receive credit for only two of these three courses: 22S:002, 22S:008, and 22S:025 (same as 07P:025). Credit for 22S:002 is given only if the course is taken before 22S:008 or 22S:025 (same as 07P:025).

*07P:025 Elementary Statistics and Inference 3 s.h.
Graphical techniques for presenting data; descriptive statistics; sampling distribution models; logic of statistical inference; interval estimation procedures; tests of significance; correlation and prediction. GE: quantitative or formal reasoning. Prerequisite: 22M:001 or equivalent. Same as 22S:025.

07P:075 Educational Psychology and Measurement 3 s.h.
Principles and classroom applications of cognitive development, social development, learning, cognition, individual differences, motivation, testing, assessment.

07P:101 Methods of Student Assessment arr.
Development, use, evaluation of student assessment methods; written tests, performance and product assessments, observation, oral questioning, checklists; grading and reporting; administration and use of standardized tests of achievement and other cognitive abilities.

07P:106 Child Development 3 s.h.
Theories and research findings about typical course of child development, differences in development. Prerequisite: junior standing or consent of instructor.

07P:111 Motivation 3 s.h.
Principles of motivation and their application to applied settings, especially to the classroom as teachers try to motivate students.

07P:120 Psychology of Giftedness 3 s.h.
Theories of learning, child development, motivation; issues unique to gifted education. Same as 07C:120.

07P:121 Assessment of Giftedness and Academic Talent 3 s.h.
Interpretation of standardized tests and other measurement instruments used to identify academic talent and program effectively for grades K-12; ability, aptitude, achievement tests; current issues in the uses of various instruments. Same as 07C:121.

07P:122 Math/Science Program for High Ability Students 1 s.h.
Unique challenges and opportunities confronted by teachers of high ability students; theory and practice, development of program outlines for implementation. Same as 07S:122.

07P:125 Counseling and Psychological Needs of the Gifted 1 s.h.
Psychological aspects of giftedness, counseling techniques appropriate for gifted children, adolescents; socio-emotional concerns, career development, underachievement. Same as 07C:125.

07P:126 Cognitive and Affective Needs of Underachieving Gifted 1 s.h.
Diagnostic strategy for identifying types of underachievement, teaching and counseling interventions appropriate for each. Same as 07C:126.

07P:127 Research and Theory in Talent/Giftedness Symposium 1 s.h.
Symposium. Same as 07C:127.

07P:128 Neuroscientific Implications for Gifted 1 s.h.
Neurology of behavior and neurodegenerative diseases; the psychology of learning and memory, its application to gifted education.

07P:129 Creativity: Issues and Applications in Gifted Education 1 s.h.
Same as 07C:129.

07P:133 The Adolescent and Young Adult 3 s.h.
Psychological, social aspects of adolescence and young adulthood; emphasis on theory, research, practical applications.

07P:134 Parent-Teacher Communication 1-3 s.h.
Realities of working with parents; interpersonal skills; options for parent support services. Same as 07E:134, 07U:134.

07P:136 Home/School/Community Partnerships 3 s.h.

07P:143 Introduction to Statistical Methods 3 s.h.
Analysis, interpretation of research data; descriptive statistics; introduction to probability, sampling theory, statistical inference (binomial, normal distribution, t-distribution models); linear correlation, regression. Same as 22S:102.
07P:148 Bayesian Statistics 3 s.h.
Bayesian statistical analysis; focus on applications; comparison of
Bayesian and frequentist methods; Bayesian models; specification,
choice of priors, computational methods; hands-on Bayesian data
analysis using appropriate software; interpretation, presentation of
analysis results. Prerequisite: 22S:140 or equivalent. Same as 22S:138.

07P:150 Introduction to Educational Measurement 3-4 s.h.
Test development procedures, reliability, validity, item writing,
evaluation of item and test characteristics; classroom assessment
methods; interpretation of scores from standardized achievement
and aptitude tests; no background in statistics assumed.

07P:165 Introduction to Program Evaluation 3 s.h.
Models, designs, data collection techniques that guide program
evaluation; current issues, controversies. Same as 07B:165.

07P:193 Special Readings and Projects arr.
Supervised individual study. Prerequisites: senior standing and
consent of instructor.

07P:199 Topical Workshop in Psychological and
Quantitative Foundations arr.
School, educational, and counseling psychology and allied
disciplines; for professionals and graduate students in education,
mental health, social services, related fields. Repeatable.

07P:200 Educational Psychology 3 s.h.
Psychology of the teaching/learning process; developmental
concepts, social processes, language and thought; individual
differences in abilities and achievements; theory and research on
reading, writing, mathematics, thinking, studying.

07P:201 Adapting Instruction to Individual
Differences 3 s.h.
Principles of adapting instruction to meet learners' needs;
cognitive, personality, and motivational differences that moderate
the effectiveness of instructional arrangements; instruction that
meets the needs and goals of learners.

07P:202 Understanding Educational Research 3 s.h.
Issues that underlie the validity of educational research; varied
approaches to research.

07P:203 Learning, Technology, and Effective
Teaching 3 s.h.
Theories and issues in technology's use in learning and teaching;
project to design a technology-supported learning solution for an
educational problem.

07P:205 Design of Instruction 3 s.h.
Introduction to processes used to design, develop, implement,
and evaluate effective instruction; projects.

07P:206 Advanced Child Development 3 s.h.
Theories of social and cognitive development; in-depth study of
several current controversies in the field. Prerequisite: 07P:106 or
equivalent or consent of instructor.

07P:207 Evaluation of Children with Learning
Disabilities arr.
Same as 070:245.

07P:208 Designing Educational Multimedia 3 s.h.
Theory, design, and evaluation of instructional software.

07P:209 Survey Research and Design 3 s.h.
Same as 070:209.

07P:210 Social Psychology of Disability 3 s.h.
Social psychology of disability; issues in mental/physical disability
from individual, societal perspective; advanced research seminar
with emphasis on clarifying research, theoretical strategies in
psychology of disability. Prerequisites: Ph.D. student standing and
consent of instructor. Same as 070:250.

07P:212 Advanced Life-Span Development 3 s.h.
Selected theories and research in development across the life
span, especially from adolescence through late adulthood; focus
on relevance for instruction and counseling.

07P:215 Web-Based Learning 3 s.h.
Theory and practice of designing web sites to support or deliver
instruction; student team project to create an instructional web
site that integrates the theory and principles from class readings.
Prerequisites: 07P:208 and consent of instructor.

07P:220 Quantitative Educational Research
Methodologies 3 s.h.
Procedures for planning, conducting, reporting research;
evaluation of current methods in educational research;
quantitative methods. Prerequisite: 07P:143.

07P:221 Educational Psychology for Effective
Teaching 3 s.h.
How educators use educational psychology theories and research
to develop expertise in teaching and learning; cognition,
motivation, technology, individual differences.

07P:223 Introduction to Counseling Psychology
Practice/Research I 3 s.h.
Historical, theoretical, professional, scientific traditions associated
with counseling psychology; professional ethical principles.
Prerequisite: consent of instructor.

07P:224 Prepracticum/Professional Seminar in School
Psychology 3 s.h.
Preparation for practice; historical look at school psychology;
current rules; overview of issues, ethics. Prerequisite: consent of
instructor.

07P:225 Introduction to Counseling Psychology
Practice/Research II 3 s.h.
Learning and performance of basic helping skills; integration of
these skills with counseling theories, broader counseling
strategies; laboratory-based. Prerequisite: consent of instructor.

07P:230 Research in Educational Psychology
1-3 s.h.
Experience in conducting or assisting in educational psychology
empirical research project; activities from conceptualization
through data generation; preparation and presentation of research
report. Repeatable. Prerequisite: graduate standing in educational
psychology or consent of instructor.

07P:234 Advanced Multimedia Design 3 s.h.
Theory and development of multimedia programs that use video,
CD-ROM, computer animation, digital audio; emphasis on
team-development of software. Prerequisites: 07W:209 and
consent of instructor.

07P:235 Multicultural Counseling 3 s.h.
Theoretical and practical aspects of the cultural adaptation
process; implications for interventions in diverse populations;
issues. Prerequisite: counseling skills introductory course.

Supervised practicum in psychological and educational evaluation
in school settings. Repeatable. Prerequisites: 07P:238, 07P:251,
and consent of instructor.

07P:238 Assessment of Learning Difficulties 1-3 s.h.
Same as 071:238.

07P:242 Selected Applications of Statistics 3 s.h.
Application and interpretation of correlation techniques,
chi-square, t- and f-tests, interval estimation, simple cases of
analysis of variance. Prerequisite: 07P:143.

07P:243 Intermediate Statistical Methods 4 s.h.
Foundation for more advanced applied courses; logic of statistical
inference, chi-square, and other tests of statistical hypotheses;
small sample error theory, interval estimates, introduction to
analysis of variance, selected nonparametric methods.
Prerequisite: 07P:143 or equivalent. Same as 22S:148.
07P:244 Correlation and Regression 4 s.h.
Correlation techniques; selected bivariate procedures, multiple, partial, curvilinear correlation; multiple linear regression; sampling theory applied to regression analysis and correlation coefficients; simple causal models. Prerequisite: 07P:243 or equivalent. Same as 22S:157.

07P:245 Applied Multivariate Analysis 3 s.h.
Multivariate analyses of variance, discriminant analysis, factor analysis; use of multivariate statistical computer packages. Prerequisites: 22S:152 and 22S:158, or equivalents; and facility with matrix algebra. Same as 22S:161.

07P:246 Design of Experiments 4 s.h.
Theory and methods in the planning and statistical analysis of experimental studies; testing of hypotheses about linear contrasts among means in single-factor and multifactor, completely randomized, and repeated measurement designs. Prerequisite: 07P:243 or equivalent. Same as 22S:159.

07P:247 Nonparametric Statistical Methods 3 s.h.
Selected nonparametric methods; one- and two-sample location tests and estimation methods, measures of association, analyses of variance; emphasis on relationships to classical parametric procedures. Prerequisite: 07P:243 or 22S:150 or consent of instructor. Same as 22S:163.

07P:249 Factor Analysis and Structural Equation Models 3 s.h.
Foundations of exploratory and confirmatory factor analysis methods; least squares and maximum likelihood approaches; problems in factor extraction, rotation, interpretation; structural equation models via LISREL; assumptions and limitations of alternative approaches. Prerequisite: 07P:252 or equivalent or consent of instructor.

07P:250 Computer Packages for Statistical Analysis 2-3 s.h.
Computer programs and systems designed to execute statistical analysis (SAS, SPSS, BMDP, and others); lectures on regression techniques, analysis of variance, multivariate techniques; practice in entering data, calling up desired programs, interpreting computer output. Prerequisites: 07P:243 or equivalent, and elementary knowledge of computer programming.

07P:251 Individual Intelligence Testing 3 s.h.
Administration of individual intelligence tests; interpretation of test results; issues in psychological testing; factors that influence performance. Prerequisites: 07P:143 or 07P:150, and consent of instructor.

07P:252 Introduction to Multivariate Statistical Methods 3 s.h.
Selected topics in multivariate analysis, including multivariate significance tests, principal components and factor analysis, discriminant analysis, canonical correlation, multivariate analysis of variance (MANOVA). Prerequisite: 07P:244 or consent of instructor.

07P:255 Construction and Use of Evaluation Instruments 3 s.h.
Design and construction of measures used in educational evaluation: achievement tests, attitude scales, performance measures, questionnaires; emphasis on methods of instrument development and evaluation of instrument characteristics. Prerequisites: 07P:143 and 07P:257, or equivalents.

07P:257 Educational Measurement and Evaluation 3 s.h.
Evaluation and use of standardized tests and inventories in individual and group assessment; analyzing reliability, validity, normative data, interpreting measures of achievement, intelligence, aptitude, interests, attitudes, personality; current issues; for counselors, administrators, teachers, measurement specialists. Corequisite: 07P:143 or equivalent.

07P:258 Theory and Technique in Educational Measurement 3 s.h.
Mathematical foundations, principal results, and applications of classical test theory; perspectives on conditional error variance; binomial error model and applications; introduction to generalizability theory; advanced measurement topics.

07P:259 Scaling Methods 3 s.h.
Unidimensional and multidimensional scaling techniques; introduction to available computer programs for scaling; applications in educational and psychological research. Prerequisite: 07P:252 or equivalent. Recommended: 07P:249.

07P:260 Item Response Theory 3 s.h.
Theoretical foundations and practical applications; mathematical models and estimation techniques; emphasis on current applications and issues in testing; computer estimation programs. Prerequisites: 07P:243 and 07P:257.

07P:263 Consultation Theory and Practice 2-3 s.h.
Same as 07C:263.

07P:265 Program Evaluation 3 s.h.
Theoretical issues and considerations in evaluation of educational and social programs; evaluation design, methodology, metaevaluation; evaluation utilization. Prerequisites: 07P:143, 07P:150, and 07P:165; or consent of instructor.

07P:269 Advanced Personality 3 s.h.
Current research and research methods in the psychology of personality; emphasis on individual differences in personality that have implications for teaching, learning, well-being.

07P:270 Cognitive Psychology of Reading 3-4 s.h.
Theory and methods in the planning and statistical analysis of experimental studies; testing of hypotheses about linear contrasts among means in single-factor and multifactor, completely randomized, and repeated measurement designs. Prerequisite: consent of instructor.

07P:275 Constructivism and Design of Instruction 3 s.h.
Theoretical foundations of constructivism; application of constructivist principles to the design of instruction.

07P:281 Cognitive Theories of Learning 3 s.h.
Theories of learning and cognition as they relate to education; application of cognitive research to subject matter learning (mathematics, science, reading, writing). Prerequisite: 07P:200 or equivalent.

07P:283 Cognitive Development 3 s.h.
Information processing, dynamic systems, social-contextual, and neo-Piagetian theories of cognitive development and their educational implications; individual differences in cognitive development.

07P:285 Instructional Computer Simulations 3 s.h.
Theory and development of computer-based simulations, games; research on design characteristics and effectiveness; design, development, evaluation of simulation software by student teams. Prerequisites: 07P:234 and consent of instructor.

07P:292 Supervised Research in Educational Psychology 1-3 s.h.
Identification of research problems, development of research designs and materials, conducting of research studies; faculty-guided activity or seminars. Prerequisite: consent of instructor.

07P:293 Individual Instruction in Psychological and Quantitative Foundations 3 s.h.
Prerequisite: consent of instructor.

07P:299 M.A. Project: The Portfolio 3 s.h.
Individual project; reflection, revision, and presentation of portfolio entries to show how the student translates educational psychology content into his or her own effective teaching.

Engineering is defined by the Accreditation Board for Engineering and Technology as that profession in which knowledge of the mathematical and natural sciences gained by study, experience, and practice is applied with judgment to develop ways to use, economically, the materials and forces of nature for the benefit of mankind.

In short, engineering is the application of science and mathematics to solve problems for society.

The major aim of engineering is the creation of a new process, product, material, or system. This activity demands a high degree of creativity and problem solving ability coupled with a full understanding of engineering fundamentals, good judgment, and a practical sense of economics.

The College of Engineering prepares men and women for one or more of the many career opportunities in the engineering profession. Such opportunities include positions in design, production, development, research, management, and consulting. Engineers are employed in industrial organizations, governmental agencies, and private practice.

The College of Engineering's mission is to develop, disseminate, transfer, and preserve technical knowledge that improves people's lives. The college endeavors to:

- provide a well-rounded and superior engineering education that draws upon resources of a comprehensive research university to attract outstanding undergraduate and graduate students in selected engineering fields;
- conduct high-quality research in selected areas, enabling faculty members and students to keep pace with new developments and ensuring that the newest concepts are taught in its courses; and
- serve the needs of the University, industry, government, and the general populace by making its facilities and faculty expertise accessible.
The College of Engineering has five departments and four research units. The Department of Biomedical Engineering, Department of Chemical and Biochemical Engineering, Department of Civil and Environmental Engineering, Department of Electrical and Computer Engineering, and Department of Mechanical and Industrial Engineering offer a total of six undergraduate programs and several graduate programs.

The four research units are the Center for Bioinformatics and Computational Biology, the Center for Computer-Aided Design, the IIHR—Hydroscience & Engineering, and the Iowa Spine Research Center.

Undergraduate Programs

The College of Engineering offers the Bachelor of Science in Engineering (B.S.E.) in six major fields: biomedical engineering, chemical engineering, civil engineering, electrical engineering, industrial engineering, and mechanical engineering. The undergraduate programs are designed to attract the best and brightest students and prepare them to be engineers who will succeed in a workplace filled with diverse people, attitudes, and ideas; to compete in the global marketplace; to work effectively in multidisciplinary teams; and to confidently understand, use, and develop modern technology.

All six B.S.E. programs are accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology. Each has its own set of articulated educational objectives, and all are designed to ensure that graduates possess the following general attributes:

- ability to apply knowledge of mathematics, science, and engineering;
- ability to design and conduct experiments as well as to analyze and interpret data;
- ability to design a system, component, or process to meet desired needs;
- ability to function on multidisciplinary teams;
- ability to identify, formulate, and solve engineering problems;
- understanding of professional and ethical responsibility;
- ability to communicate effectively in oral, written, and graphical forms;
- broad education necessary to understand the impact of engineering solutions in a global and societal context;
- recognition of the need to engage in lifelong learning and the ability to do so;
- knowledge of contemporary issues; and
- ability to use the techniques, skills, and modern engineering tools necessary for successful engineering practice.

The University of Iowa B.S.E. programs distinguish the College of Engineering from other engineering colleges in the region. They draw on the University’s recognized strengths to offer unique opportunities for students who wish to pursue a wide range of career options and an education that goes beyond technology.

Each program emphasizes a broad understanding of fundamental principles common to all engineering disciplines and provides students with the opportunity to specialize in a selected engineering discipline. All build on the University’s research strengths. Program flexibility is provided by a curriculum in which each student develops engineering competency within a particular academic program and complements it with a tailored thematic option in support of chosen career objectives (e.g., engineering practice, project management, research and development).

Combined Degrees, Minors, Certificates

All of the college’s B.S.E. programs may be combined with a second B.S.E., a Bachelor of Business Administration (B.B.A.) in the Tippie College of Business, or a bachelor’s degree in the College of Liberal Arts and Sciences; see “Two B.S.E. Degrees,” “Combined B.B.A./B.S.E.,” and “Combined B.S.E./Liberal Arts and Sciences Degree” later in this section. Contact the Student Development Center for details.

The College of Engineering and the University of Northern Iowa offer a dual degree program in which students earn a B.S. in applied physics from UNI and a B.S.E. from The University of Iowa; see “B.S./B.S.E. Dual Degree With Northern Iowa” later in this section. The college also offers a joint bachelor’s/master’s degree with the University’s Urban and Regional Planning.
Bachelor of Science in Engineering

The College of Engineering undergraduate curricula changed fall semester 2002. Students who entered the college fall semester 2002 or later must complete the requirements described below. Students who entered the college before fall 2002 may complete the old requirements (described in pre-2002 editions of the Catalog, existing program curriculum sheets, and degree evaluation forms), with possible course substitutions. Or they may complete the new requirements, under conditions defined by each program and available from the college's Student Development Center.

The Bachelor of Science in Engineering (B.S.E.) requires a minimum of 128 s.h. Students must be enrolled in the College of Engineering for at least the last 30 s.h. of work toward the degree, or 45 of the last 60 s.h., or a total of 90 s.h. They must have a g.p.a. of at least 2.00 on all college work used to satisfy degree requirements as well as on all work undertaken at The University of Iowa.

All students must complete 22M:031 Engineering Mathematics I: Single Variable Calculus and 22M:032 Engineering Mathematics II: Multivariable Calculus, or their equivalents, with a grade of C- or higher in each course.

The faculty of each engineering program has established a curriculum—a set of required and elective courses that must be completed satisfactorily as part of the requirements for a degree in that program. The purpose of each program’s curriculum is to prepare students for the practice of engineering in that program. General guidelines for establishing course requirements in each program are provided by the national accrediting body, the Accreditation Board for Engineering and Technology (ABET).

Each B.S.E. student also must satisfy the requirements of his or her specific program, as described in the Catalog’s College of Engineering department sections: Biomedical Engineering, Chemical and Biochemical Engineering, Civil and Environmental Engineering, Electrical and Computer Engineering, and Mechanical and Industrial Engineering.

Curriculum Stems

The curriculum for each program is divided into four major curriculum stems: mathematics and basic sciences; engineering topics; elective focus area; and general education (humanities and social sciences). In addition to the four major stems, there are a few general background courses that fall outside of the stems. Students take these courses during the first year. They include 059:005-059:006 Engineering Problem Solving I and II and 010:003 Accelerated Rhetoric, which is a first-year course in writing, speaking, and critical reading. Engineering Problem Solving I-II covers a breadth of topics from engineering as a profession to team design projects to engineering computations and computer programming.

All of the courses in the curriculum stems are integrated and sequenced to help students understand the interrelationships and importance of each stem.

Mathematics and Basic Sciences

The mathematics and basic sciences stem provides the foundation upon which the engineering courses in each engineering program are based. This stem includes a minimum of five courses in mathematics and statistics and one each in chemistry and physics. The faculty of each engineering program has specified at least one additional chemistry or physics course and other additional mathematics or science courses beyond these minimum requirements to provide a base appropriate for the program’s major.

Engineering Topics

The second curriculum stem, engineering topics (science and design), builds upon the math and science stem, providing a bridge from fundamental principles to applications and creative practice.

The engineering science courses use the underlying principles learned in the mathematics and basic science courses to understand and predict the behavior of idealized models of real components or systems encountered in engineering. These courses include fundamentals of statics, thermodynamics, and electrical circuits, as well as other engineering courses relevant to each major.
Engineering design is the process of devising a system, component, or process to meet desired needs. It is a decision-making process, often iterative, in which the basic sciences, mathematics, and engineering sciences are applied optimally to convert resources to meet a stated objective. The design process includes the establishment of objectives and criteria, synthesis, analysis, construction, testing, and evaluation. Essential to the design process is the inclusion of realistic constraints such as economic factors, safety, reliability, aesthetics, ethics, and social and environmental impact.

**ELECTIVE FOCUS AREA**

In each undergraduate program, a pool of semester hours is set aside to enable students to build strength in a technical focus area, pursue a formal minor, earn a multidisciplinary certificate, or pursue a tailored program of study. Each program has its own set of guidelines and constraints for the elective focus area. See “Elective Focus Area” below.

**GENERAL EDUCATION COMPONENT**

The fourth stem involves general education course work in the humanities and social sciences. This stem promotes understanding of and appreciation for society and culture. See “General Education Component” below.

**First and Second Years**

Approximately one-third of the course requirements in each engineering program are common to all engineering majors. These common course requirements constitute a core program. Students take most of the courses in the core program during the first and second years, along with a few program-specific courses. Hence, most students may postpone making a decision about which engineering major to pursue or may change their engineering major during their first three semesters with little or no loss of time or credit. The remaining curriculum for each engineering program is listed in the Catalog’s College of Engineering department sections.

The first- and second-year courses common to all majors are listed below. Not all students complete all of these courses in the first three semesters. Students who do not follow this three-semester plan may encounter a delay in graduation because of scheduling problems for courses that require sequencing or that are offered only once a year.

### First Semester

- **004:011 Principles of Chemistry I (all majors)** 4 s.h.
- **010:003 Accelerated Rhetoric (all majors)** 4 s.h.
- **22M:031 Engineering Mathematics I: Single Variable Calculus (all majors)** 4 s.h.
- **059:005 Engineering Problem Solving I (all majors)** 3 s.h.
- **059:090 First-Year Engineering Seminar (all majors)** 0 s.h.

### Second Semester

- **004:012 Principles of Chemistry II (biomedical, chemical, and environmental majors)** 4 s.h.
  or  
  **General education component 1 (civil, electrical, industrial, and mechanical majors)** 3 s.h.
- **22M:032 Engineering Mathematics II: Multivariable Calculus (all majors)** 4 s.h.
- **22M:033 Engineering Mathematics III: Matrix Algebra (all majors)** 2 s.h.
- **029:081 Introductory Physics I (all majors)** 4 s.h.
- **059:006 Engineering Problem Solving II (all majors)** 3 s.h.

### Third Semester

- **22M:034 Engineering Mathematics IV: Differential Equations (all majors)** 3 s.h.
  or  
  **General education component 1 (optional, chemical and environmental majors)** 3 s.h.
- **059:007 Engineering Fundamentals I: Statics (all majors)** 2 s.h.
- **059:008 Engineering Fundamentals II: Electrical Circuits (all majors)** 3 s.h.
- **059:009 Engineering Fundamentals III: Thermodynamics (all majors)** 3 s.h.

Students who do not meet the eligibility requirement for **010:003 Accelerated Rhetoric** (4 s.h.) are required to complete the two-course sequence 010:001 and 010:002 Rhetoric I-II (total of 8 s.h.). Only 4 of the 8 s.h. may be applied toward the degree requirement for rhetoric.

Credit earned for courses below the level of the beginning courses specified in each engineering curriculum appears on a student’s grade report and permanent record but is not used to satisfy
any course requirements (including electives) for an engineering degree. Examples of courses in this category include 010:001 Rhetoric I, 22M:009 Elementary Functions, and 004:009 Supplemental Chemistry Lab.

**General Education Component**

Students choose 15 s.h. of general education (humanities and social science) courses from approved department and college areas. Among these 15, at least 3 s.h. must be from the pool of courses designated by the College of Engineering as humanities courses, and at least 3 s.h. must be from the pool of courses designated by the college as social science courses. To ensure depth, at least 6 s.h. of general education credit should be earned in intermediate (100-level) courses. At least one of the 100-level courses should be taken in the same department as a lower-level course already completed. Humanities and social science subject areas are defined by the College of Engineering; they may not correspond to the same general education area definitions used by the College of Liberal Arts and Sciences. Individual engineering programs may require further depth in one area and may include one or more of the general education requirements as part of a student’s elective focus area.

Courses that are primarily mathematical or scientific in nature and those designed specifically to develop art or music skills are not acceptable as social science or humanities electives.

Credit may be earned by examination; see “Undergraduate Academic Rules and Procedures”/”Academic Standards”/”Credit by Examination” later in this section.

Humanities and social science course work transferred to The University of Iowa by students with A.A. degrees who enter the College of Engineering directly from two-year schools is evaluated on the same basis as similar course work transferred by other students entering the college without a B.A. or B.S.

Students who enter the College of Engineering with a B.A. or B.S. are considered to have satisfied the general education (humanities and social science) requirement.

Students who enroll in a combined degree program in the College of Engineering and the College of Liberal Arts and Sciences or the Tippie College of Business are considered to have satisfied the College of Engineering’s general education requirement once they have completed all requirements for the liberal arts or business degree.

For details, see General Education Component (GEC) on the college’s web site (under Current Students/Engineering Student Records/Curriculum Guides).

**Elective Focus Area**

Students choose elective focus area courses in two broad categories: traditional career goals and nontraditional career goals. The degree plans students choose to pursue and the courses they take may affect the number and type of employment opportunities available to them after graduation. Program advisers help students develop coherent, well-focused plans that fit their goals.

Students who pursue a well-defined plan may replace up to 21 s.h. of traditional technical electives with course work toward a minor or certificate. Or, with an adviser’s guidance, they may pursue a rigorous, well-focused, nontraditional program outside existing minor or certificate programs. Each College of Engineering undergraduate program is responsible for approving proposed plans of study, ensuring that the program’s ABET accreditation criteria are met and that students’ choices are consistent with their career aspirations and with the college’s educational mission.

To pursue one of these alternatives, a student must define and justify his or her career goal, obtain the program’s approval for the detailed plan of study before taking the courses, and then complete the plan as it has been defined.

Guidelines for elective focus areas vary by program. For details, see Engineering Curriculum Guides and EFAs on the college’s web site (under Current Students/Engineering Student Records/Curriculum Guides).

**Four-Year Graduation Plan**

College of Engineering students who choose to participate in the University’s Four-Year Graduation Plan must be admitted on schedule and must complete specified courses during the first year in order to stay on the plan. They must work closely with their advisers to make sure they know what requirements must be met and the appropriate sequences in which to take courses.

The agreement holds both the student and the University responsible for clearly defined actions to ensure graduation within four years. Since changes in a student’s interests may lead to changes in goals or majors, there is no penalty for withdrawing from the Four-Year Graduation Plan.
For more information, contact the College of Engineering's Student Development Center.

**Honors**

Outstanding undergraduate engineering students may qualify to participate in the Engineering Honors Program or the University Honors Program. See “Undergraduate Academic Rules and Procedures”/“Academic Recognition”/“Honors Program” later in this section.

**Minors**

Students graduating from the College of Engineering may earn a minor in the Tippie College of Business or a minor or minors in any degree-granting department or approved program in the College of Liberal Arts and Sciences. A minor in another college may be earned by satisfying requirements established by the college offering the minor. A notation of the minor is entered on the student's permanent record.

College of Engineering programs generally allow use of a non-engineering minor to satisfy their elective focus area requirements. Students who pursue this option must work closely with program advisers to ensure compatibility with their engineering career aspirations.

Students must inform the Office of the Registrar of their fulfillment of minor requirements when they apply for a degree. This assures that the minor designation is included on their transcript. See “Undergraduate Academic Rules and Procedures”/“Application for Degree” later in this section.

**Minor in Business**

Engineering students who wish to earn a minor in business must complete two economics courses (06E:001 and 06E:002), two accounting courses (06A:001 and 06A:002); a marketing course (06M:100), a management course (06J:048), a finance or engineering economy course (06F:100 or 056:054), a legal course (06J:047), a computer course (059:006), a calculus course (22M:031), and a statistics course (22S:039).

Students must maintain a g.p.a. of at least 2.00 in courses applicable to the minor and must complete at least 15 s.h. of courses for the minor in residence at The University of Iowa. For more information, contact the Tippie College of Business Undergraduate Program Office.

**Minor in Liberal Arts and Sciences**

Engineering students who wish to earn a minor offered by the College of Liberal Arts and Sciences must complete a minimum of 15 s.h. in the minor, including at least 12 s.h. in advanced courses taken at The University of Iowa and approved by the school, department, or program offering the minor. Students should confer with the academic unit offering the minor to identify acceptable courses. Students must have a g.p.a. of at least 2.00 in courses taken for the minor. Courses in the minor may not be taken pass/nonpass. See Minors offered by the College of Liberal Arts and Sciences (http://www.clas.uiowa.edu/departments/minors.shtml) for details.

**Certificate in International Business**

The Tippie College of Business and the College of Liberal Arts and Sciences offer the Certificate in International Business. The program is designed for University of Iowa undergraduates interested in broadening their understanding of the global economy and their awareness of the political, historical, and social environment in which international business operates.

Certificate students study international business and economics, international relations and institutions, a foreign language, and the contemporary art, literature, culture, and/or politics of the related geographical area. The certificate's range of courses permits students to tailor areas of specialization that suit their individual interests and complement their majors.

The certificate requires 29 s.h.; a minimum of 20 s.h. must be completed at The University of Iowa or in approved study abroad programs. Guided Independent Study is accepted toward the certificate. Students must maintain a g.p.a. of at least 2.00 on all certificate course work. Certificate courses may not be taken pass/nonpass, nor may a single course be counted toward more than one certificate requirement.

Interested students must declare their intention to pursue the certificate with the international business certificate adviser in the Tippie College of Business; contact the Tippie Undergraduate Program Office for details.

For a detailed description of certificate requirements, see International Business in the Catalog.
Certificate in Technological Entrepreneurship

The College of Engineering and the Tippie College of Business offer a joint program leading to the Certificate in Technological Entrepreneurship. The program entails study of the entrepreneurial process as it relates to technology.

The certificate program is designed not only for students who intend to start and/or operate their own business but for any student interested in gaining a better understanding of the entrepreneurial process. The program's range of electives permits students to tailor areas of specialization to their individual interests.

Interested students must declare their intention to pursue the certificate with the College of Engineering technological entrepreneurship program faculty representative. To receive the certificate, students must be granted a degree in engineering; maintain a g.p.a. of at least 2.00 on all certificate course work; and take at least 12 s.h. of certificate course work at The University of Iowa or in approved study-abroad courses. Completion of the program results in the notation “Certificate in Technological Entrepreneurship” on the student’s transcript.

For details, see Certificate in Technological Entrepreneurship on the college’s web site (under Current Students/Academic Information). For application information, contact the College of Engineering Office of the Dean.

Cooperative Education and Internship Program

The Cooperative Education and Internship Program offers students the opportunity to explore engineering careers and develop engineering skills through periods of professional practice. Supervised professional engineering-related experiences in business, industry, education, or government expose students to the challenges and opportunities of the day-to-day life of an engineer. Students with co-op and/or internship experience are sought by employers and usually receive higher starting salaries upon graduation. A portion of registered co-op and/or internship experience before graduation can be credited toward the experience requirements for professional licensure in Iowa and some other states.

Qualified students may choose to alternate periods of on-campus study with full-time work experience, or they may elect to work half-time while taking at least 6 s.h. of classes. The co-op experience can cover one to three semesters, a series of summer placements, or a single summer. Students may apply to the program following their first year. Academic record and class status are considered in acceptance decisions. Interested students and employers or organizations must register on Employment Expo and contact the College of Engineering director of co-ops and internships. For details, see Cooperative Education and Internship Program on the college’s web site (under Current Students/Student Services).

Two B.S.E. Degrees

Current College of Engineering students and recent graduates may earn a second Bachelor of Science in Engineering. The second degree requires at least 30 s.h. of residence course work beyond the 128 s.h. required for the first B.S.E., with a g.p.a. of at least 2.00. The additional 30 s.h. must include all courses required by the second engineering degree program, including the senior-level design course sequence and any specific social science elective requirements. Elective focus area courses selected for the second B.S.E. must be of a variety and level that permit students to meet at least the minimal level of competence usually expected of graduates of that program.

Students must file an academic study plan, which must be approved by the faculty of the second degree program, submitted to the Student Development Center, and placed in the student’s permanent file before the student may begin course work in the second B.S.E. The study plan should include a list of the courses to be taken in the second program along with a list of the courses already completed and yet to be completed for the first engineering degree program. Any changes in the plan must be approved by the student’s faculty adviser in the second program and by the department chair of that program (the college petition form may be used for this purpose), submitted to the Student Development Center, and placed in the student’s permanent file.

Engineering and Business

The College of Engineering and the Tippie College of Business offer a combined degree program in which students earn two University of Iowa bachelor’s degrees: a Bachelor of Business Administration (B.B.A.) from the Tippie College of Business and a Bachelor of Science in Engineering (B.S.E.) from the College of Engineering.
The combined business/engineering degree program requires a total of 158 s.h.; at least 30 s.h. must be earned in College of Engineering courses, and at least 30 s.h. must be earned in Tippie College of Business courses. Both degrees must be granted at the end of the same academic session.

Students in the program must complete all General Education components and all other requirements for both majors. They must enroll in appropriate mathematics and engineering courses early in their course of study in order to complete the program in a timely way. Because courses in natural sciences, mathematics, humanities, and social sciences count toward the B.B.A. and the B.S.E., students may count a single course toward both degrees.

B.B.A./B.S.E. students usually meet the degree requirements of both colleges in about five years; time required depends on the student's choice of major study areas.

Students may not use the second-grade option for courses in the combined program.

Students are assigned two advisers, one in the Tippie College of Business undergraduate Program Office, the other in their College of Engineering major department.

Contact the College of Engineering student Development Center or the Tippie College of Business Undergraduate Program Office for specific degree requirements.

**Combined B.S.E./Liberal Arts and Sciences Degree**

Students may earn two University of Iowa baccalaureate degrees in a combined program in the College of Engineering and the College of Liberal Arts and Sciences. Successful candidates are awarded a B.S.E. (Bachelor of Science in Engineering) by the College of Engineering and a B.A. (Bachelor of Arts), B.S. (Bachelor of Science), B.F.A. (Bachelor of Fine Arts), or B.M. (Bachelor of Music) by the College of Liberal Arts and Sciences.

To qualify for both degrees in the combined degree program, students must complete a total of 158 s.h., including at least 30 s.h. earned in College of Engineering courses and at least 30 s.h. earned in College of Liberal Arts and Sciences courses. Students who complete the combined degree program must receive both degrees simultaneously.

Students in the combined program usually can meet the degree requirements of both colleges in about five academic years. The exact length of time necessary to complete the program is determined by the major areas of study selected in each college. Students who enter the combined degree program are assigned two faculty advisers, one in their major department in the College of Engineering and the other in their major department in the College of Liberal Arts and Sciences.

To enter the combined degree program, students must be admitted to both the College of Engineering and the College of Liberal Arts and Sciences and must have College of Engineering approval to enter the combined degree program. Those who enter the program are required to complete the general education components and all other requirements for both majors. Combined degree program applicants must meet the high school course or unit requirements for admission to each of the two colleges.

It is crucial that students enroll in the proper mathematics and engineering courses early in their course of study to expedite the completion of the program. The specific engineering courses taken by each student vary according to engineering major. Since courses in natural sciences, mathematics, humanities, and social sciences are accepted for credit by both colleges, students may be able to count a particular course toward both degrees.

Contact the Student Development Center for information about specific requirements.

**B.S./B.S.E. Dual Degree With Northern Iowa**

The 3+2 dual degree program leads to a B.S. in applied physics from the University of Northern Iowa (UNI) and a B.S.E. from The University of Iowa. It requires approximately three years of study at UNI followed by approximately two years of study at Iowa. There is no guarantee that students can complete the 3+2 degree in five years.

Students interested in the program are guaranteed admission to the University of Iowa portion of the program if they have a g.p.a. of at least 3.00 (B average) in all course work and in the chemistry, mathematics, and physics courses required by the University of Northern Iowa physics department.

During the first three years of the program, students complete at least 90 s.h. of course work at the University of Northern Iowa. They must...
successfully complete courses in each of the following areas: chemistry, mathematics through differential equations, physics to satisfy the applied physics major requirements, and courses to satisfy the General Education requirements. Credit for courses passed with a grade of C or higher is transferred to The University of Iowa as credit for equivalent courses there.

At The University of Iowa, students complete the B.S.E. requirements that were current at the time of their admission to the UI College of Engineering. Course work completed at The University of Iowa is transferred to the University of Northern Iowa and applied toward the requirements for that institution’s B.S. in applied physics.

When transferring to Iowa from UNI, students must submit applications for admission, housing, and financial aid to The University of Iowa by the University’s established deadlines.

**Joint B.S.E./M.S. or M.A. in Planning**

The College of Engineering and the Urban and Regional Planning Program offer the joint Bachelor of Science in Engineering/Master of Arts or Master of Science for students who wish to pursue a career in planning in either the public or private sector. Planning encompasses the development of alternatives to improve the quality of life in cities and regions.

Graduates of the combined program are technically oriented professionals who have a clear understanding of policy development and implementation. They fill positions such as public works director, transportation engineer, and public utilities staff member. Their work involves a blend of civil and industrial engineering problems and policy analysis.

The joint program satisfies all requirements of both degrees. It requires a minimum of 152 s.h., including at least 45 s.h. of urban and regional planning graduate courses. Completion of the program takes five years—one fewer than would be required for consecutive completion of both programs.

Each student in the joint program has two advisers, one in engineering and one in urban and regional planning. Students enroll in the College of Engineering for their first four years in the program and in the Graduate College for their fifth year. Successful students receive a B.S.E. at the end of the fourth year and an M.A. or M.S. in planning at the end of the fifth year.

To join the combined degree program, students must first be admitted to the College of Engineering. During spring semester of their second year in engineering, they apply for admission to the joint program. Students admitted to the program apply for admission to the Graduate College at the end of their fourth year. Applicants must have completed all requirements for a B.S.E., have an undergraduate g.p.a. of at least 3.00, and earn a score on the Graduate Record Exam (GRE) General Test judged satisfactory by the urban and regional planning admissions committee.

While enrolled in the College of Engineering, students must maintain the overall grade-point average required by their engineering program.

Students also must maintain a g.p.a. of at least 3.00 in planning courses in the joint program. If they do not, they may be placed on academic probation, and if they fail to satisfy the conditions of probation, they are dismissed from the joint program. Dismissal from the joint program does not affect a student’s standing in the College of Engineering.

Students in the joint program must maintain a cumulative g.p.a. of at least 3.00 in order to graduate with an M.A. or M.S. in planning.

**Joint Program Curriculum**

Students in the joint program follow the standard B.S.E. curriculum for their College of Engineering program during the first and second year. Urban and regional planning courses (prefix 102) are added in the third and fourth years. Students earn 15 s.h. of their required B.S.E. elective focus area credit in courses that also meet the requirements of the M.A. or M.S. in planning.

During the summer after the fourth year, most students in the joint program complete an approved internship.

The fifth year usually includes the remaining urban and regional planning core courses and electives. Students take the M.S. or M.A. comprehensive examination during spring of the fifth year.

A typical study plan calls for completion of the following planning courses during the third and fourth years (15 s.h. are applied to requirements of both the B.S.E. elective focus area and the planning courses).

**Third year, fall semester:**
- 102:202 Land Use Planning: Law and Practice 4 s.h.
- 102:205 Economics for Policy Analysis 3 s.h.
Third year, spring semester:
102:201 Analytic Methods in Planning II 2 s.h.

Fourth year, fall semester:
102:203 History and Theories of Planning 3 s.h.

Fourth year, spring semester:
Electives 3 s.h.

During the fifth year and the preceding summer session, students take the remaining 30 s.h. of planning courses, as follows. This completes the 45 s.h. of planning course work required for the M.S. or M.A.

Summer before fifth year:
102:335 Internship 2 s.h.

Fifth year, fall semester:
102:208 Program Seminar in Planning Practice 1 s.h.
102:209 Field Problems in Planning I 1 s.h.
Electives 12 s.h.

Fifth year, spring semester:
102:210 Field Problems in Planning II 3 s.h.
Electives 11 s.h.

See Urban and Regional Planning (Graduate College) in the Catalog for course descriptions and information about the University's Urban and Regional Planning Program.

**Undergraduate Admission**

To be considered for admission to the College of Engineering as first-year students, applicants must have successfully completed at least four years of English/language arts; four years of mathematics, which must include at least two years of algebra, one year of geometry, and one year of higher mathematics (trigonometry, analysis, calculus); two years of a single foreign language; three years of natural science, which must include at least one year of chemistry and at least one year of physics; and at least two years of social studies. A high school computer programming course is recommended but not required.

Applicants are guaranteed admission to the College of Engineering if they have an ACT composite score of 25 or higher and an ACT math score of 25 or higher; rank in the top 30 percent of their class; and have no high school unit deficiencies. Students who do not meet these requirements, or who attend a high school that does not rank its students, are encouraged to send recommendations from math and science teachers and a personal statement of special circumstances that may have kept them from meeting these standards.

Incoming first-year and transfer students who do not meet the foreign language requirement may be admitted on conditional status for a maximum of four semesters in order to complete two semesters of an introductory college-level foreign language.

Students who do not meet the other high school unit requirements may be admitted on special review by the College of Engineering. They may be required to make up deficiencies by taking a lower-level course in their area of deficiency before enrolling in the first required course in that area. For example, students who have high math grades and standardized test scores, but who are deficient by one unit in mathematics, may be required to complete a course such as 22M:009 Elementary Functions before enrolling in the first engineering calculus course.

Students who are unsure whether to pursue a degree in engineering or a degree in liberal arts and sciences are strongly encouraged to begin in engineering if they meet the admission requirements.

For more information about admission to the College of Engineering, see http://www.uiowa.edu/admissions/undergrad/requirements/fy-eng.html on the University's Office of Admissions web site.

**TRANSFER APPLICANTS**

Transfer applicants must have completed the same high school unit requirements as entering first-year students and must submit an official high school transcript as well as a transcript of college work undertaken at other institutions. To transfer to the College of Engineering, students must have demonstrated success in math, science, and engineering courses, ideally earning all As and Bs with no grade lower than a C in these foundation subjects. Transfer students must have completed calculus I and the equivalent of either 004:011 Principles of Chemistry I or 029:081 Introductory Physics I (the first semester of chemistry designed for majors, or the first semester of calculus-based physics). Overall grade-point average also is considered in transfer applications.

For more information about transfer admission to the College of Engineering, see http://www.uiowa.edu/admissions/undergrad/requirements/xferr-eng.htm on the University's Office of Admissions web site.
Academic Advising

Undeclared engineering students are advised by the staff members in the Student Development Center. Engineering students who have declared an academic program are advised by faculty advisers assigned to that program. Students may request a change of adviser when it is deemed appropriate. All students are required to have a conference with their advisers before registering for classes each semester.

Application for Degree

Students who wish to be considered for graduation must file an Application for Degree with the Office of the Registrar before the deadline date during the session in which the degree is to be conferred.

Students who do not graduate on the date indicated in the Application for Degree must file another application for the next applicable session. Students do not need to be registered to apply for a degree.

See Application for Degree (http://www.registrar.uiowa.edu/graduation/degereeapp.aspx) on the University's Office of the Registrar web site.

Academic Recognition

Engineering Honors Program

The College of Engineering Honors Program provides special recognition for outstanding undergraduate students who demonstrate exceptional accomplishment through research, directed independent study, teaching internships, or other approved nondegree enrichment activities. Engineering students who wish to graduate with honors must maintain a University of Iowa g.p.a. of at least 3.33, complete an honors project with a faculty member, and participate in a college-wide honors seminar with faculty members and other honors students. Successful completion of the honors program requirements leads to a B.S.E. with honors, which is recorded on the student's University academic record.

First-year and sophomore students with a University of Iowa g.p.a. of at least 3.33 are automatically admitted to the University Honors Program, which provides access to all of the services offered through the University's Honors Center. Engineering students are encouraged to participate in honors activities. Engineering students are the second largest collegiate group in the University Honors Program.

For more information, contact the College of Engineering associate dean for academic programs.

Graduation With Honors

High scholastic achievement is certified in two ways; graduation with distinction based on grades only, and graduation with honors based on both grades and exceptional accomplishment. To be eligible for graduation with honors, students must be recommended by their major department, approved by a selected honors committee and the director of the honors program, and complete honors requirements.

Graduation With Distinction

The college awards degrees “with highest distinction” to students in the highest 2 percent of their graduating class, “with high distinction” to students in the next-highest 3 percent, and “with distinction” to students in the next-highest 5 percent. Ranking is based on students' grade-point average for all college-level study undertaken up to their final registration.

To be eligible to graduate with distinction, students must take their final 60 s.h. of study in residence at the college and must have completed at least 45 s.h. in the college before their final registration. Students in the combined engineering/liberal arts and sciences program are eligible to graduate with distinction regardless of the college in which they complete their residency requirement.

Dean's List

Undergraduate students in the College of Engineering who have a g.p.a. of 3.50 or higher on 12 s.h. or more of graded work (excluding University of Iowa Guided Correspondence Study courses) during a given semester and who have no semester hours of I (incomplete) or O (no grade reported) during the same semester are recognized by inclusion on the Dean's List for that semester.
President's List

University of Iowa undergraduate students who have a g.p.a. of 4.00 on 12 s.h. or more of graded work and who have no semester hours of I (incomplete) or O (no grade reported) for two consecutive semesters (excluding summer sessions) are recognized by inclusion on the President's List.

Academic Standards

Maximum Schedule

Course schedules of more than 18 s.h. for a semester, 9 s.h. for a summer session, or 3 s.h. for a winter session require approval of the advising staff in the college's Student Development Center. Permission to Register for Additional Hours forms are available on the college's web site (under Current Students/Student Records Information/Forms).

Classification of Students

Students in the College of Engineering are classified by the number of semester hours of credit they have earned toward the Bachelor of Science in Engineering.

First-year: 0-29 s.h. earned toward the B.S.E.
Sophomore: 30-59 s.h. earned toward the B.S.E.
Junior: 60-89 s.h. earned toward the B.S.E.
Senior: 90 s.h. or more earned toward the B.S.E.

Grading System

The college uses a letter grading system. Plus and minus designate gradations of performance between letter grades. Numerical equivalents of letter grades are as follows.

<table>
<thead>
<tr>
<th>Grade</th>
<th>Grade points</th>
</tr>
</thead>
<tbody>
<tr>
<td>A+</td>
<td>4.33</td>
</tr>
<tr>
<td>A [superior]</td>
<td>4.00</td>
</tr>
<tr>
<td>A-</td>
<td>3.67</td>
</tr>
<tr>
<td>B+</td>
<td>3.33</td>
</tr>
<tr>
<td>B [above average]</td>
<td>3.00</td>
</tr>
<tr>
<td>B-</td>
<td>2.67</td>
</tr>
<tr>
<td>C+</td>
<td>2.33</td>
</tr>
<tr>
<td>C [average]</td>
<td>2.00</td>
</tr>
<tr>
<td>C-</td>
<td>1.67</td>
</tr>
<tr>
<td>D+</td>
<td>1.33</td>
</tr>
<tr>
<td>D [below average]</td>
<td>1.00</td>
</tr>
<tr>
<td>D-</td>
<td>0.67</td>
</tr>
<tr>
<td>F (failing)</td>
<td>0</td>
</tr>
</tbody>
</table>

This grading system is used for all students in both undergraduate and graduate engineering courses. Grades of D-minus are passing grades; that is, courses completed with grades of D-minus or higher count toward collegiate requirements, with the exception of 22M:031 and 22M:032 Engineering Mathematics I-II: Single and Multivariable Calculus, which have a minimum grade requirement of C-minus or higher. Grades of A-plus have a value of 4.33 in calculating grade-point averages, but averages displayed in University records are truncated so that they do not exceed 4.00.

Academic Probation and Dismissal

Students who do not achieve or surpass the following University of Iowa cumulative and semester minimum grade-point averages are placed on academic probation.

First-year (0-29 s.h. earned toward B.S.E.), 1.80
Sophomore (30-59 s.h. earned toward B.S.E.), 1.90
Junior (60-89 s.h. earned toward B.S.E.), 1.95
Senior (90 or more s.h. earned toward B.S.E.), 2.00

Students on academic probation are restored to good standing when they successfully complete an additional 9 s.h. toward an engineering degree, either in one semester or cumulatively, and their University of Iowa cumulative and semester grade-point averages equal or exceed those designated above.

The college reviews academic records for all students at the end of the fall and spring semesters. There is no review at the end of the summer session. Students are placed on probation, dismissed for unsatisfactory progress (with or without previous probationary status), or restored to good standing only at the end of the fall and spring semesters. Students on academic probation are not permitted to continue their enrollment without written expectations for their future performance.

Students who do not make satisfactory progress may be dismissed from the college without an intervening probationary period. Students who are dismissed from the college for unsatisfactory academic progress due to circumstances beyond their control, such as a death in their immediate family or extended personal illness, may appeal for a revocation of the dismissal. A student dismissed in January must submit a written appeal by the second day of spring semester.
classes. A student dismissed in May must submit the written appeal by June 15.

Students dismissed from the college for poor scholarship may appeal to reenroll after an interval of at least one calendar year. A written appeal for reinstatement must be submitted before June 15 for reinstatement in a fall semester or before December 1 for reinstatement in a spring semester.

For details about engineering academic probation and engineering academic appeals procedures, visit the College of Engineering web site (under Current Students/Student Procedures/Academic Standards, and Appeal Procedures).

**Dropping and Adding Courses**

Courses may be added with permission of the adviser and the instructor during the first three weeks of the semester or first one-and-one-half weeks of the summer session.

Courses may be dropped with permission of the adviser and the instructor at any time during the first 10 weeks of the semester. Only under compelling circumstances may courses be dropped after the 10th week, in which case special approval must be granted by the adviser, the course instructor, and the dean’s office.

Under no circumstance are students permitted to drop after the beginning of the scheduled final examination period.

**Limits on Withdrawing From Courses**

Undergraduates receive the mark of W for any course dropped after the second week of the semester or the first one-and-one-half weeks of the summer session. Students may not drop the same course with a mark of W more than twice. Special courses that may be repeated are exempt from this rule.

Students admitted to degree programs in the College of Engineering fall 1991 and after are limited to a total of five Ws while enrolled in the College of Engineering. First-year students entering the University directly from high school with no prior full-time college experience are permitted to exclude Ws received during their first two sessions of enrollment.

Students who have a legitimate reason for dropping a course (e.g., disabling illness, death of an immediate family member) and can document that reason are permitted to exclude that drop from the maximum, but the W is not removed from the record. Requests for such exclusions are made in the Student Development Center.

**Withdrawal of Registration**

Students who withdraw their entire registration must consult the staff at the Student Development Center. A student on scholastic probation who withdraws registration at any time without good cause may not be permitted to enroll for the following semester without specific approval from the Student Development Center staff. Withdrawal cards for students enrolled in the college are signed by the associate dean for academic programs.

**Pass/Nonpass Option**

A maximum of two courses taken pass/nonpass (P/N) may be applied toward satisfaction of the general education (humanities and social sciences) requirement. P/N registration must be approved by the student’s adviser and the instructor of the course and must be completed during the first three weeks of a semester or the first two weeks of a summer session. P/N registration may not be changed after the deadline for adding courses. The pass/nonpass option may not be used for courses taken to satisfy the rhetoric requirement. Guided Independent Study courses taken for humanities or social science credit may not be taken P/N.

Students enrolled in courses taught in the College of Engineering may choose to be graded pass/nonpass under the following conditions:

- the signatures of the adviser and instructor must be obtained on the proper form, and the completed form must be submitted to the registration center by the student within the time period established by University policy;
- the mark of P (pass) is awarded where the final course grade earned was C-minus or higher;
- the mark of N (nonpass) is given for grades of D-plus or below; marks of P and N are not used in computing the grade-point average, and the mark of N does not count as earned credit.

No course work taken in the College of Engineering on the pass/nonpass option may be used to satisfy requirements for an engineering degree.
Second-Grade-Only Option

A student may elect to repeat a course with only the new grade being counted in his or her grade-point average. The option may be applied to no more than three courses, and it may be applied only once to a particular course. Transfer students may apply the option on a prorated basis.

A course may not be repeated under the second-grade-only option once it has been used as a prerequisite for a more advanced course that the student has completed successfully.

To exercise the second-grade-only option, students register as usual for the course that is to be repeated, then complete a Second Grade Option form at the Student Development Center; Second Grade Option forms are available on the college's web site (under Current Students/Student Records Information/Forms). The form must be completed during the session in which the course is repeated, within the first 12 weeks of the fall or spring semester or the first six weeks of the summer session. Students must follow this procedure or both grades will be counted in the University of Iowa grade-point average.

Under the second-grade-only option, the registrar marks the permanent record to show that a particular course has been repeated. Both grades remain on the permanent record, but only the second is used in calculating the grade-point average and semester hours earned. The course must be taken the second time under the same circumstances and with the same grade option as it was taken the first time.

The second-grade-only option cannot be used to remove a grade of incomplete, which must be removed in the usual manner. A student who holds a degree from The University of Iowa may not apply the second-grade-only option to a course taken before the degree was conferred.

Satisfactory/Fail Courses

The noncredit professional seminar courses required in each of the professional programs are offered only satisfactory/fail (S/F). No other engineering courses are offered on this basis. An F (failure) grade earned for such a class does not satisfy any portion of the professional seminar requirement.

Incomplete and No Report Grades

A mark of I (incomplete) or O (no report) that is not replaced by a final grade before the announced deadline during the student’s next regular semester of registration is replaced by a final grade of F (fail). Students with incompletes from the spring semester are exempt from completing the course during the succeeding summer session.

Credit by Examination

Students who have acquired knowledge in subject areas from sources other than formal course registrations may be granted credit toward graduation by examination, under the following conditions and limitations.

No more than 32 s.h. of credit by examination may be applied toward B.S.E. degree requirements.

College-Level Examination Program (CLEP) credit may be counted toward the lower-level General Education Component (humanities and social science) requirements. CLEP credit earned in natural science areas does not count toward the engineering degree. Credit also may be earned through Advanced Placement Exams. For details about CLEP and Advanced Placement Exam credit, visit the college's web site (under Current Students/Student Records Information/Exam Credit).

Credit by Examination students may earn credit for equivalent experience or former course work in any of the required common core courses through successful completion of examinations prepared and graded by the core course committees. Students who fail a core course are not permitted to earn credit by examination for the failed course. Students who wish to earn credit for core courses by examination must obtain approval from the associate dean for academic programs.

With approval of the departmental faculty, credit in three or fewer courses (totaling no more than 6 s.h.) may be awarded upon successful completion of final examinations in program elective courses.

Foreign Language Incentive Program

The University's Foreign Language Incentive Program (FLIP) gives entering engineering students two options for earning college credit.

Option 1: Entering students who place into a fifth-semester language course and complete the course with a grade of B-minus or higher receive 4 s.h. of exam credit for the fourth-semester course. The credit is ungraded but may be
counted toward the hours required for graduation. Incentive credit is not granted for college course work for which credit has been received.

Students are eligible for incentive credit only during their first and second registrations at The University of Iowa.

Option 2: Students may receive 2 s.h. of exam credit for earning a grade of B-minus or higher in a first-semester-level course in a foreign language different from the language used to satisfy the foreign language requirement. They may earn another 2 s.h. for completing the second-semester-level course in that language for a grade of B-minus or higher.

For details about FILP for engineering students, visit the college’s web site (under Current Students/Student Records Information/Exam Credit). For more information on eligibility and restrictions, consult the Student Development Center.

### Credit From Other Colleges

Course requirements in engineering may be satisfied with credit earned in courses taken in other University of Iowa colleges or at other accredited colleges or universities. When students apply for admission to the College of Engineering, they must submit official transcripts from each college attended along with their application for admission. After the credit has been certified by the Office of Admissions as college-level work from an accredited institution and after admission has been granted, the credit is evaluated by the Student Development Center either before or during the student's first semester of enrollment in the college.

Satisfaction of engineering course requirements by transfer course work may be approved by the Student Development Center if, course-by-course, there is a match in the content and level of the transfer courses, and if the grades earned for such courses are C-minus or higher. Students who want to satisfy the engineering General Education Component (GEC) (social sciences and humanities) requirements or The University of Iowa rhetoric requirements by transfer work must follow the College of Engineering General Transfer Credit Guidelines.

Students planning to attend a two- or four-year institution before transferring to the College of Engineering should discuss the planned transfer with officials at both schools before embarking on a transfer program. The College of Engineering has recommended transfer course lists for most Iowa community colleges and some four-year colleges. Once students are enrolled in the College of Engineering, they must have prior approval for course work taken at other institutions.

For details about transfer credit for engineering students, including recommended transfer course lists and taking course work at other institutions, visit the college’s web site (under Current Students/Student Records Information/Transferring Credit to Iowa).

By policy of the Board of Regents, State of Iowa, a student may apply a maximum of 64 s.h. of transfer credit earned at a two-year college toward the 128 s.h. required for the B.S.E. However, transfer credit from a two-year school in excess of 64 s.h. is used in computing grade-point average and may be used to satisfy course requirements, even though the semester hours cannot be counted toward the total required for graduation. A grade of C-minus or higher is required in order for transfer credit to be applied toward a degree requirement.

### Course Substitutions

For students in the College of Engineering, the substitution of an alternate course for a required course requires the approval of a petition. Permission for Course Substitution forms are available on the college's web site (under Current Students/Student Records Information/Forms) or at the Student Development Center. The form must be completed by the student and must be approved by the student's adviser and by the chair of the academic department in which the student is majoring.

If the petition involves a required engineering core course or a General Education Component (social sciences or humanities) course, then it also must be approved by the Student Development Center. Substitutions for required engineering core courses should be made infrequently and only under compelling circumstances. Substitutions of courses that are required by the student's program are governed by the faculty of that program; approval of these course substitutions is needed only from the faculty adviser and the department chair. All petitions must be forwarded to the Student Development Center for inclusion in the student's permanent file.

### Auditing Courses

Students in the College of Engineering may register for a course for zero credit (audit) with
the permission of the course instructor and the advisor. The mark of R is assigned to students registered for zero credit if attendance and performance in the course are satisfactory; if unsatisfactory, the mark of W is assigned. Courses completed with a mark of R do not meet any requirements nor do they carry any credit toward graduation. Auditing may not be used as a second-grade-only option.

To register for a course on an audit basis, students must obtain the instructor’s authorizing signature and their adviser’s signature and must register for 0 s.h. To change registration from audit to credit or from credit to audit, a drop-add form is used. These changes must be made during the first three weeks of a semester or the first one-and-one-half weeks of a summer session.

Misconduct, Complaints

Student Academic Misconduct

Policies regarding cases of cheating or plagiarism are outlined on the College of Engineering website (http://www.engineering.uiowa.edu/current-students/academic-misconduct.html) and are included in Policies and Regulations Affecting Students, on the University’s Division of Student Services website (http://www.uiowa.edu/~vpss/policies/index.html). In cases of cheating on an exam or quiz, the policy recommends that the instructor reduce the student’s grade, including the assignment of F for the course. When a course grade has been reduced to an F, the student may not drop the course or use the second-grade-only option to eliminate the failing grade.

At the beginning of each semester, course instructors individually announce and explain their policies on acceptable levels of student-student collaboration on graded work, which includes homework assignments, and lab or design projects. When a policy is violated, a zero is assigned for the total portion of the course grade allocated to the requirement in which the violation occurs. The instructor sends a written report of any disciplinary action to the office of the dean and the report is placed in the student’s file. Students are notified by the office of the dean of any disciplinary action reported and are informed of appeal procedures.

Student Activities and Organizations

The College of Engineering student body is represented by the Engineering Student Council. The council plans and carries out activities involving the entire college, such as the student and faculty picnic and MECCA Week. The organization also acts on collegewide matters of general student interest.

Engineering students publish their own student journal, Hawkeye Engineer. The journal is staffed by students, with faculty members serving only in an advisory capacity.

The following engineering technical societies are represented by University of Iowa student chapters: American Institute of Chemical Engineers, American Society of Civil Engineers, American Society of Mechanical Engineers, Institute of Electrical and Electronics Engineers, Institute of Industrial Engineers, and National Society of Professional Engineers.

A student club of the Society of Automotive Engineers is open to all engineering majors, and a student society of biomedical engineers, which is formally recognized by the University, is open to biomedical engineering majors. The University chapter of Tau Beta Pi, a national honorary society for students in all engineering fields, gives special recognition to superior students in their junior and senior years. The work of students who are outstanding in their respective fields is recognized by Alpha Eta Mu Beta, honorary biomedical engineering society; Omega Chi Epsilon, honorary chemical engineering society;
Chi Epsilon, honorary civil engineering society; Eta Kappa Nu, honorary electrical engineering society; Alpha Pi Mu, honorary industrial engineering society; and Pi Tau Sigma, honorary mechanical engineering society.

Engineering student organizations dedicated to providing support and assistance in the development of more equitable enrollments of minorities and women in the college are the Multi-Ethnic Engineering Student Association and the student chapter of the Society of Women Engineers. A local chapter of Theta Tau, a national professional engineering fraternity, is active in service to the college and draws its membership from students throughout the college.

Professional Licensure

Licensure as a professional engineer is governed by the laws of each state. Most states’ minimum requirements include graduation from an accredited engineering curriculum of at least four years, followed by at least four years of practical experience and successful completion of two major examinations.

The agency that controls and monitors the licensing procedure in Iowa is the Iowa Engineering and Land Surveying Examining Board. The first step in the procedure for students enrolled in an accredited program is to pass an examination on engineering fundamentals given near the time of graduation. Following graduation and the successful completion of the engineering fundamentals exam, graduates receive an Engineer-in-Training (EIT) certificate. The final step in the procedure is to pass the principles and practice exam in a specialty area following a minimum of four years of approved professional experience. At this point, the graduate engineer becomes a licensed Professional Engineer.

Graduate Programs

The College of Engineering offers the Master of Science and Doctor of Philosophy in biomedical engineering, chemical and biochemical engineering, civil and environmental engineering, electrical and computer engineering, industrial engineering, and mechanical engineering. For information about principal research and study areas, degree requirements, admission, and financial support for individual graduate programs, see the Catalog's College of Engineering department sections:

- Biomedical Engineering
- Chemical and Biochemical Engineering
- Environmental Engineering
- Civil and Computer Engineering
- Mechanical and Industrial Engineering.

Applicants must meet the admission requirements of the Graduate College; for detailed information about Graduate College policies, see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

College Facilities

The Seamans Center for the Engineering Arts and Sciences is home to the College of Engineering. Dedicated in 2001, the Seamans Center combines new construction with extensive renovation of the former Engineering Building to provide space for learning, teaching, research and collaboration that anticipates the needs of 21st-century engineering.

The center's Student Commons and John Deere Plaza Lobby provide welcoming space for students to work individually or together on homework and projects, with wireless computer connections. Additional work rooms and conference areas join the center's expanded classrooms and flexible research space in an environment designed to serve the needs of the college's students, faculty, and staff.

All five of the college's departments have headquarters in the building, and most faculty offices are located there.

Lichtenberger Engineering Library

The Lichtenberger Engineering Library is a center of college activity. It maintains a collection of more than 100,000 volumes and provides access to more than 1,000 current journal titles. The library offers internet access to a wide array of indexes and abstracts and houses a significant collection of standards. Study space is provided for library users.

Hanson Technical Communication Center

The Hanson Center for Technical Communication (CTC) helps undergraduate engineering students develop and polish their written communication skills. The center's coordinator and assistant coordinator supervise a
staff of professional writing consultants and peer consultants.

CTC writing consultants are professional instructors who work in teams to help engineering faculty members present and evaluate writing-intensive assignments. They also provide individual feedback and assessment of students' work throughout the writing process.

CTC peer consultants are engineering students who have strong writing skills. Peer consultants conduct one-on-one tutoring sessions at the center, helping their fellow students develop skills relating to organization, audience analysis, precise technical descriptions, and persuasive and logical narratives.

The CTC coordinator teaches an elective course, 059:004 Essentials of Technical Communication (2 s.h.), which uses a workshop approach to help students explore and practice communication genres practiced by engineers. Students deliver presentations, practice literature and patent searches, and work in teams to acquaint themselves with the reality of writing in the workplace. The course also uses selected readings and response papers to broaden students' perspectives on the role of engineers in society.

**Computer Systems Support**

Engineering Computer Systems Support (CSS) provides for curricular computing at the College of Engineering. A large network of high performance Hewlett Packard color graphics UNIX workstations and XP workstations, along with extensive commercial and public domain software, support the full range of engineering college classes. The college provides the same type of computer hardware and software that students will use when they graduate and begin working as engineers. CSS updates hardware and software regularly to maintain the best educational environment.

Engineering and other students who take engineering courses are provided with an engineering computing account, which they keep during their tenure at the college. This account provides students with electronic mail and access to the Internet. The college's computer labs provide students with more than 300 networked computers, and labs at the Seamans Center are open 24 hours per day. CSS provides support for student computing.

**Engineering Design & Prototyping Center**

The Engineering Design & Prototyping Center (EDPC) provides state-of-the-art technical resources to University and to private sector research and development groups for concept development, project design, full service machining, and rapid prototype modeling.

**Engineering Electronics Shop**

The Engineering Electronics Shop is a full-service electronics support facility for the College of Engineering. The shop provides design, construction, repair, calibration, and preventive maintenance services for both teaching and research laboratories. There also is an extensive electronics parts supply store and PC board facility for engineering students and researchers.

**Engineering Professional Development**

Engineering Professional Development (EPD), part of the college's Student Development Center, provides engineering students and alumni with comprehensive professional development services and programs. The EPD professional staff assists students with career exploration and career search skills, helping them choose co-ops, internships, study abroad, and experiential opportunities and search for rewarding careers.

Clients receive career and job search counseling and attend seminars appropriate to their goals and knowledge of careers. Students receive the guidance they need to be competitive in the job market. Up-to-date employer, salary, and industry information helps them make informed decisions.

EPD services and resources include résumé and cover letter critiques; practice interviews; advice on career decision making, job search strategies, and interviewing; online job listings for full-time, part-time, internships, and co-op positions; information on regional and national employers, including the National JobBank, Harris InfoSource, Online recruiting system, information about study abroad; and free career publications.
IIHR—Hydroscience & Engineering

IIHR—Hydroscience & Engineering (formerly the Iowa Institute of Hydraulic Research) is one of the nation’s premier and oldest fluids research and engineering laboratories. Its activities encompass the broad spectrum of fluid mechanics, engineering and environmental hydraulics, and hydrometeorology.

Basic and applied engineering research programs are carried out at IIHR in nine modern, well-equipped laboratories. IIHR conducts teaching and research programs in fluid mechanics (turbulent shear flows, vortex dynamics, ship hydrodynamics, biofluid dynamics, and computational fluid dynamics); environmental hydraulics (river hydraulics, computational hydraulics, hydraulic structures, bioremediation, water quality dynamics, air-water exchange processes, ice-related river hydraulics, winter highway maintenance, and ice modeling); water and air resources (hydrometeorology, hydroclimatology, hydrogeology, hydrology, remote sensing and water resources); and history of hydraulics and fluid mechanics.

IIHR maintains state-of-the-art research facilities, including a large low-turbulence wind tunnel, a vortex dynamics laboratory, a ship-model towing tank, extensive energy balance equipment, and radiometric and meteorological stations. It also has specialized equipment, such as a three-dimensional scanning elastic lidar, a differential absorption lidar, particle image velocimetry (PIV) and laser Doppler velocimetry (LDV) systems, and state-of-the-art computer resources.

IIHR has constructed a new research and education facility on the Mississippi River near Muscatine, Iowa. The Lucille A. Carver Mississippi Riverside Environmental Research Station provides opportunities for researchers and educators from around the world to study river processes in a multidisciplinary setting. The research station’s state-of-the-art facilities support study of diverse facets of the Upper Mississippi River and promote a better understanding of river ecosystems and their response to natural events and human activities.

High-level involvement of graduate students is a hallmark of most IIHR projects. IIHR is heavily involved in fluids engineering for industry and in fundamental research programs, providing graduate students and postdoctoral trainees with unique opportunities for valuable research and engineering experience. Undergraduates also have opportunities to participate in IIHR projects.

Center for Computer-Aided Design

The Center for Computer-Aided Design is a College of Engineering research unit dedicated to the advancement and practical implementation of modeling and simulation research. The unit promotes multidisciplinary research, scholarship, and technology transfer with applications in design and optimization, kinematics and dynamics, human factors, and solid mechanics.

Among the technology applications currently under investigation at the center are meshfree methods for structural analysis and design sensitivity analysis, composite materials, probabilistic mechanics and reliability, reliability-based design optimization, topology optimization, multidisciplinary design optimization, advanced geometric modeling and CAD, human interaction with advanced technology and automation, human-computer interaction and virtual reality, computational modeling of human performance, mechanisms and robotics, and real-time dynamic simulation for haptic interfaces. CCAD research activities promote individual and multidisciplinary approaches to design and engineering analysis, engaging research participants from a variety of academic fields and interests.

Twelve faculty members currently are affiliated with CCAD, representing the Departments of Civil and Environmental Engineering, Mechanical and Industrial Engineering, and Mathematics (College of Liberal Arts and Sciences). Together, these faculty members supervise more than 30 graduate and undergraduate students. CCAD also employs 10 full-time professional staff members and three postdoctoral research scholars.

CCAD maintains a variety of high-performance computer systems. Its primary computing capability consists of a network of Hewlett-Packard HP C-, B-, and J-class workstations and servers and Silicon Graphics workstations. Most individual workstations incorporate high-performance graphics for general computing needs, including CAD/CAE, software development, virtual prototyping, and virtual environment development. More than 40 Windows NT workstations are connected to the HP/Silicon Graphics network, providing routine X windows access. A 16-processor HP Exemplar S-class supercomputer with 3 GB of main
memory, more than 45 GB of local disk space, and two J6000 dual processor compute servers, each with 4 GB of memory, provide resources for extensive engineering analysis capabilities using a wide variety of industry-standard and locally developed software. A Network Appliance F520 file server with more than 200 GB of disk supports the storage needs of all center UNIX resources. Standard desktop, multimedia, and office productivity applications are hosted on a network of Dell and Micron personal computers running Windows 2000. Network-capable Hewlett-Packard LaserJet and Tektronix color printers support the center's printing needs, and there is a variety of CD creation, video, and video production equipment for archival, dissemination, visualization, and presentation of center research.

Connecting all of this is a switched network using 10/100BaseT Ethernet via HP 4000M network switches connected via Gigabit Ethernet to the College of Engineering backbone. Each switch has its own dedicated connection to the Network Appliance file server and uses a mesh of 100BaseT connections to provide 400Mbps full-duplex connectivity between each pair of switches.

The center supports a wide range of commercially available scientific and engineering packages. For structural analysis, the center uses ABAQUS, ANSYS, and MSC Nastran, as well as pioneering software in the area of meshless analysis, ADAMS and DADS for dynamic analysis, and Altair HyperWorks and MSC Patran for preprocessing, meshing, and visualization. It uses PTC's ProEngineer for CAD. Additional software tools include Mathematica, Matlab, IMSL, Xmath, and DOT.

Organizations supporting CCAD's research program include the National Science Foundation, the National Aeronautics and Space Administration (NASA), the U.S. Departments of Transportation and Defense, the Iowa Department of Transportation, the Minnesota Department of Transportation, and industry leaders such as Caterpillar, 3M, Allsteel Inc., LG Digital Appliances, Maytag Corporation, Honda, General Motors, Nissan, and Rockwell International.

Iowa Spine Research Center

The Iowa Spine Research Center (ISRC) assesses clinical effectiveness and outcome in diagnosing and treating various spinal diseases. It also provides guidance in spinal research and patient care. The center, a unique collaboration between the College of Engineering and the Carver College of Medicine, involves teams of investigators that include engineers, economists, surgeons, research scientists, nurses, therapists, and students.

Center for Bioinformatics and Computational Biology

The Center for Bioinformatics and Computational Biology facilitates development of new areas of study and expanded research opportunities in informatics areas related to the basic biological sciences and applied medical research.

The field of bioinformatics and computational biology (BCB) involves creation of methods for applying advanced mathematics and computation to problems of biological and biomedical interest, for example, understanding of the human genome, evolution of plants and animals, and relationships between microorganisms and higher-order life-forms. BCB is characterized by a diverse confluence of traditional academic disciplines. Biology and computing are joined by applied mathematics, biochemistry, biomedical and computer engineering, physics, probability and statistics, and others.

The Center for Bioinformatics and Computational Biology sponsors a seminar series, varied symposiums, and a seed grant program. It is affiliated with the University's Carver Center for Comparative Genomics, Center for Macular Degeneration, Coordinated Laboratory for Computational Genomics, DNA Facility, Holden Comprehensive Cancer Center, and Iowa Center for Gene Therapy.

Course Numbering System

The title of each course offered by the College of Engineering is preceded by a three-digit prefix and a three-digit suffix separated by a colon.

The second digit of the prefix is 5, which identifies the course as one offered by the College of Engineering.

The third digit of the prefix identifies the College of Engineering program that offers the course as follows:

051—Biomedical engineering
052—Chemical and biochemical engineering
053—Civil and environmental engineering
055—Electrical and computer engineering
The three-digit suffix of a course number identifies the level and type of course. Generally, suffix numbers below 100 designate courses primarily for undergraduates, numbers 100 to 199 designate courses for undergraduates and graduate students, and numbers 200 and above designate courses primarily for graduate students.

The courses offered by each department are listed in the department’s section by discipline area, starting with the lowest-level course and proceeding to the highest-level course.

A brief description is included for each course. Prerequisite and corequisite courses listed in course descriptions are University of Iowa courses. Students who have not taken the University of Iowa prerequisite but who have earned credit in equivalent course work from another institution should consult the course instructor if they have questions concerning their preparation for the course. They must obtain the instructor’s consent before registering for the course.

Engineering students may enroll in any course in the College of Engineering if they meet the course prerequisite and corequisite requirements. Undergraduates from other colleges may enroll in engineering courses only with consent of the College of Engineering director of admissions and outreach; contact the Student Development Center.

The college’s individual undergraduate programs and course requirements for each engineering major are described in the Catalog’s College of Engineering department sections. Each undergraduate program builds upon a core program (see “Undergraduate Curriculum” earlier in this section). The following core program courses are offered by the college. Not all core courses are required for each engineering major.

Undergraduates from other colleges cannot register for core program courses without special permission from the college’s director of admissions and outreach; contact the Student Development Center.

### Courses

#### Engineering Core

The college’s individual undergraduate programs and course requirements for each engineering major are described in the Catalog’s College of Engineering department sections. Each undergraduate program builds upon a core program (see “Undergraduate Curriculum” earlier in this section). The following core program courses are offered by the college. Not all core courses are required for each engineering major.

Undergraduates from other colleges cannot register for core program courses without special permission from the college’s director of admissions and outreach; contact the Student Development Center.

</table>
057:186 Experiential Design I  arr.
057:187 Experiential Design II 3 s.h.
Prerequisite: 057:186.

Core Engineering

059:004 Essentials of Technical Communication 2 s.h.
Engineering as a real-world community of engineers working to increase their competence and confidence in the basic forms of technical communication.

059:005 Engineering Problem Solving I 3 s.h.
Development and demonstration of specific problem solving skills; directed project or case study involving actual engineering problems and their solutions.

059:006 Engineering Problem Solving II 3 s.h.
Engineering problem solving using computers; introduction to digital computations, problem formulation using a procedural high-level language, structured, top-down program design methodology, debugging and testing, introduction to use of software libraries; examples from numerical analysis and contemporary applications in engineering. Corequisite: 22M:031.

059:007 Engineering Fundamentals I: Statics 2 s.h.
Vector algebra, forces, couples, moments, resultants of force couple systems; friction, equilibrium analysis of particles and finite bodies, centroids; applications. Prerequisite: 22M:031. Corequisite: 029:081.

059:008 Engineering Fundamentals II: Electrical Circuits 3 s.h.
Kirchhoff's laws and network theorems; analysis of DC circuits; first order transient response; sinusoidal steady-state analysis; elementary principles of circuit design; laboratory experience with DC, AC, and transient circuits. Corequisites: 22M:034 and 029:082.

059:009 Engineering Fundamentals III: Thermodynamics 3 s.h.
Basic elements of classical thermodynamics, including first and second laws, properties of pure materials, ideal gas law, reversibility and irreversibility, and Carnot cycle; control volume analysis of closed simple systems and open systems at steady state; engineering applications, including cycles; psychrometrics. Prerequisites: 004:011, 22M:031, and 029:081.

059:090 First-Year Engineering Seminar 0 s.h.
Introduction to engineering student life; electronic resources; keys to and skills for success; coping with adversity; selecting a major; advising responsibilities; curriculum choices and career objectives; ethics; communication; internships and co-ops; job search skills. Prerequisite: first-semester standing.
The past four decades have seen a tremendous growth of technological activity in biology and medicine. As engineers increasingly have become involved with projects in the life and health sciences, there has been greater need for them to become more familiar with the fields of biology and medicine. Recognition of this need has led to the emergence of a new interdisciplinary engineering activity designed to bridge the gap between the life sciences and engineering—the biomedical engineering profession.

The Department of Biomedical Engineering fosters interdisciplinary activities across departments and colleges and maintains strong ties with the Carver College of Medicine. The department strives to provide a well-rounded and superior engineering education that attracts outstanding students at both the undergraduate and graduate levels; conduct high-quality research that enables faculty members and students to keep pace with and initiate new developments; and serve government, industry, and institutions worldwide by making the department’s facilities and faculty expertise accessible.

Several engineering faculty members have joint appointments in the Carver College of Medicine. Both biomedical engineering undergraduates and graduate students participate actively with college faculty members and their colleagues in the life and health sciences on projects of mutual interest.

Undergraduate Program

The department offers the Bachelor of Science in Engineering in biomedical engineering. The program provides a contemporary education in a multidisciplinary area. Its objective is to produce graduates who:

- have the ability to identify, formulate, and solve open-ended problems with medical relevance, including the design of devices, systems, and processes to improve human health;
- are able to pursue a wide range of career options, including those in industry, academia, and medicine; and
- are able to advance to leadership positions in their chosen field.

Students who complete the program may pursue traditional career opportunities in industry, such as those rooted in mechanical or electrical engineering disciplines, or they may pursue newer areas of engineering, such as design and development of biomedical instrumentation, diagnostic aids, life-support systems, prosthetic and orthotic devices, and man-machine systems. Other career options are available in government (Food and Drug Administration, Environmental Protection Agency, National Institutes of Health, Veterans Affairs). Some biomedical engineering graduates elect to continue formal education in engineering, medicine, or law.

Bachelor of Science in Engineering

The College of Engineering undergraduate curricula changed fall semester 2002. Students who entered the college fall semester 2002 or later must complete the requirements described below. Students who entered the college before fall 2002 may complete the old requirements.
The B.S.E. in biomedical engineering builds on the foundation provided by the College of Engineering core curriculum. It prepares students for the challenges and opportunities associated with careers in the biomedical engineering profession. The program has been designed carefully to enable students to satisfy the entrance requirements of the Graduate College and, with the selection of a three-course sequence in organic chemistry in the elective courses, the Carver College of Medicine, the College of Dentistry, or the allied health sciences.

The B.S.E. in biomedical engineering requires a minimum of 128 s.h. The curriculum covers four major stems: mathematics and basic sciences, engineering topics, elective focus area, and general education (15 s.h. of humanities and social science courses). All students take 059:005-059:006 Engineering Problem Solving I-II and 010:001-010:002 Accelerated Rhetoric. General education component courses must be selected to satisfy the requirements of the College of Engineering. See “Curriculum Stems” and “General Education Component” under “Bachelor of Science in Engineering” in the College of Engineering section of the Catalog.

Elective focus area courses must be selected according to guidelines established by the Department of Biomedical Engineering. See “Elective Focus Area” after the following curriculum list.

Some courses in the curriculum are prerequisites to others. Students who take courses in the order below satisfy the prerequisite requirements automatically. Students who do not follow this sequence still must satisfy all course prerequisites.

Elective Focus Area

The biomedical engineering program offers a variety of elective focus area options, including standard focus areas developed and maintained by the program and flexible focus areas tailored to individual student interests. For more detailed information about elective focus areas, see “Bachelor of Science in Engineering”/“Elective Focus Area” in the College of Engineering section of the Catalog. For a list of standard biomedical engineering elective focus area options and guidelines for tailored elective focus areas, contact the Department of Biomedical Engineering or visit its web site.

Combined B.S.E./M.S.

Students who wish to complete a Bachelor of Science in Engineering and a Master of Science in biomedical engineering at The University of Iowa can apply to the fast-track B.S.E./M.S. program. Students in the fast-track B.S./M.S. program receive a B.S. in biomedical engineering once they have completed all of the requirements for the B.S. They normally complete the required course work for the M.S. one year later.

To be admitted to the program, students must have completed at least 80 s.h., must have a cumulative g.p.a. of at least 3.50, and must submit a letter of application to the chair of the Department of Biomedical Engineering stating the intended area of specialization and the name of the M.S. adviser.

Graduate Programs

The department offers the Master of Science and the Doctor of Philosophy in biomedical engineering. The aim of graduate study at both levels is to educate students more deeply and broadly than is possible at the undergraduate level. The goal is to enable students to use contemporary methods at an advanced level during a professional career in engineering design, development, and research.

Each student's course of study is based on individual background and career objectives, and sound academic practice. Department faculty members have teaching and research expertise in areas related to cardiovascular and fluid biomechanics, musculoskeletal biomechanics, biomaterials and tissue engineering, bioinstrumentation, biosystems, biomedical imaging, biological signal analysis, bioinformatics and computational biology, and other allied fields.

An individual program for each student may be developed from courses offered by the biomedical engineering department and other departments, especially mechanical engineering, electrical engineering, physiology, mathematics, and biological sciences. M.S. students who want a more general program may combine emphases, while those who want some specialization in any particular field may accommodate these preferences through the combination of departmental courses and appropriate electives from other departments of the College of Engineering and the University.

Ph.D. programs may center on any one of the previously described areas through the choice of appropriate course work and research topic.

Master of Science

The M.S. in biomedical engineering requires a minimum of 30 s.h. and is offered with or without thesis. Students who choose the nonthesis program must earn at least 6 s.h. of 200-level courses. Those who choose the thesis program may count no more than 6 s.h. of thesis research and writing credit toward the degree. The M.S. is designed to be a terminal degree or a step toward the Ph.D.

A tentative plan of study for each student is determined through consultation with an adviser. An M.S. committee of at least three graduate faculty members, including at least two on the biomedical engineering faculty, is appointed by the dean of the Graduate College. The student's plan of study is reviewed by the committee before the student has completed 18 s.h. of course work. The plan of study then is submitted for review to the department chair.
To earn the M.S., students are required to attain a g.p.a. of at least 3.00 on a minimum of 30 s.h. of graduate work and successfully complete the final examination administered by their committee.

The requirements for the M.S. may be completed in one calendar year. However, students with assistantships or other duties or constraints may need up to two years to complete the degree.

Candidates for the M.S. (thesis or nonthesis) must complete the following courses or their equivalents with a grade of B or higher.

- Advanced mathematics
- Human physiology (027:130)

Individual study plans should include as much advanced work as individual aptitude and previous preparation permit.

**Admission**

Applicants must meet the admission requirements of the Graduate College; for detailed information about Graduate College policies, see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

Applicants who have earned a baccalaureate or postbaccalaureate degree in engineering or in the mathematical or physical sciences, with a g.p.a. of at least 3.00, and who have a combined verbal and quantitative score of 1250 on the Graduate Record Examination (GRE) General Test are eligible to be considered for admission to the M.S. program in biomedical engineering.

Students with a lower grade-point average or GRE General Test scores may be considered for conditional admission. They must achieve regular standing within 8 s.h. of initial registration by attaining a g.p.a. of at least 3.00 at The University of Iowa and regular acceptance by the department faculty. Students who do not meet these requirements are subject to dismissal.

Reference letters, research interests, previous graduate grade-point average, and other factors may be considered in making admission decisions.

**Doctor of Philosophy**

The doctoral program requires a minimum of 72 s.h. of graduate work, including acceptable transfer credit. At least 42 s.h. must be earned in formal course work taken after the B.S. is awarded, and at least 12 s.h. must be earned for research and thesis. For students entering with an M.S., at least 18 s.h. of formal course work must be completed beyond the M.S., and at least 12 s.h. must be earned for research and thesis. Based on research progress, examination results, or other measures, the student's graduate committee may require additional formal course work to strengthen perceived areas of weakness.

**Admission**

Applicants must meet the admission requirements of the Graduate College; for detailed information about Graduate College policies, see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

Admission to the Ph.D. program is conditional until students successfully complete a qualifying examination, which is administered by the biomedical engineering faculty. The decision on whether the student's performance on this examination is adequate for admission to the Ph.D. program is made by the biomedical engineering faculty.

Admission to Ph.D. candidacy requires a g.p.a. of at least 3.25 on all graduate work done at The University of Iowa. Upon completion of the course work specified in the plan of study and with the required grade-point average and the adviser's recommendation, students are admitted to the comprehensive examination by their committee.

Having satisfactorily completed these examinations, students usually have only to complete and defend their dissertation at the final examination. Requirements for the Ph.D. generally can be completed in about three years beyond the master's degree.

**Financial Support**

Students are encouraged to apply for fellowships and assistantships. Contact the chair of the Department of Biomedical Engineering.

**Special Facilities and Laboratories**

**Required Undergraduate Laboratories**

Four dedicated undergraduate teaching laboratories are associated with the required and elective courses in biomedical engineering: Biomechanics Laboratory, Biomaterials and Tissue Engineering Laboratory, Biomeasurements and
Systems Laboratory, and Biomedical Imaging Laboratory.

BIOMECHANICS

The Biomechanics Laboratory is equipped to perform experiments in biological flow analysis and in human musculoskeletal systems. The laboratory houses a pulse duplicator for simulating physiological pulsatile flow, a flow visualization set-up to analyze flow past stenosis and aneurysms, blood pressure and flow measurement devices, digital still and video cameras for kinematic analysis, a ski binding tester, a drop tower for impact testing, a four-channel EMG amplifier system, and a table-top material testing machine. The laboratory is used for 051:050 Biomechanics, elective courses in cardiovascular and skeletal biomechanics, other elective courses, senior design projects, and demonstrations in 051:030 BME Fundamentals.

BIOMATERIALS AND TISSUE ENGINEERING

The Biomaterials and Tissue Engineering Laboratory is equipped to test mechanical and thermal properties of biomaterials, thin sectioning of hard tissues, and prostheses for histology. It also is equipped for basic tissue engineering experiments. The laboratory is used for 051:070 Biomaterials I; elective courses in biotransport processes, biomaterials, and tissue engineering; senior design projects; and demonstrations in 051:030 BME Fundamentals.

BIOMEASUREMENTS AND BIOSYSTEMS

The Biomeasurements and Biosystems Laboratory is equipped to measure biomedical variables of clinical and physiological interest, design and build electronic instrumentation, and conduct modeling experiments in physiology. It is used for 051:040 Biological Systems Analysis I and 051:080 Bioelectrical Design, elective courses in biomeasurements and biological systems analysis, senior design projects, and demonstrations in 051:030 BME Fundamentals.

BIOMEDICAL IMAGING

The Biomedical Imaging Laboratory has state-of-the-art computer hardware and software for teaching the fundamentals of medical imaging and image analysis required in 051:060 Fundamentals of Biomedical Imaging. It also is used for elective courses in physics and in analysis of medical imaging, the medical imaging practicum course, and demonstrations in 051:030 BME Fundamentals.

Research Facilities and Laboratories

BIOMATERIALS LABORATORY

The Biomaterials Laboratory is equipped to characterize implant materials and biological tissues for their mechanical and thermal properties. Hard tissue histological slide preparations, for both microradiograph and optical, can be made for the study of interactions between bone and implant interactions. Metallographic sample preparations can be made and analyzed under optical microscopes.

The laboratory contains MTS (model 812) materials testing machine with recorder and controller; automatic data acquisition and process computer dedicated to the MTS machine; differential scanning calorimeter (Perkin-Elmer DSC-4 model); Omega x-ray generator with microradiographic attachment; Bronwill thin sectioning saw; Buehler Isomet thin sectioning saw; Buehler metalographic and petrographic grinding and polishing wheels; IR, polarizing, reflection research type microscopes; temperature-controlled bath; Lindberg tube furnace; strain gage attachment and measurement devices; videotape and play equipment; and conventional and vacuum oven with a diffusion pump.

SPINE RESEARCH LABORATORY

The Spine Research Laboratory is equipped for interdisciplinary research. The laboratory’s MTS Bionix (with extended columns) servohydraulic testing equipment permits application of uniaxial tension or compression together with axial torsion under displacement or load control. The laboratory also has a fully automated 3-D motion measuring system. These devices are used to test mechanical properties of biomechanical joints and tissues, and for biomechanical evaluation of the performance of surgical treatment modalities.

Other equipment includes digital cameras, surgical tools, and sensors (i.e., LVDTs, six-degrees-of-freedom load cell, pressure transducers, digital inclinometers).

A biaxial biomechanical culture system is available for application of controlled compression and/or shear forces onto the intervertebral disc during culture, in order to investigate the disc’s biological responses to mechanical loads. This culture system is used in conjunction with an incubator in which cells and tissues can be cultured. Basic equipment for histology and immunohistochemical analyses includes a microtome, ovens, a microscope, and glassware for chemical processes.
SPINE BIOMECHANICS AND ERGONOMICS LABORATORY

Located at University of Iowa Hospitals and Clinics, the Spine Biomechanics and Ergonomics Laboratory is equipped for investigation of the biomechanics of the spine, particularly problems related to production and treatment of low back pain. For example, electromyography equipment, accelerometry, a motion capture system, and a force plate are used to study response to sudden loads. A stadiometer is used to evaluate how varied activities affect shrinkage (creep) in the spine. A pressure pad is used to study interface pressures between people and chairs or beds.

JOLT/VIBRATION/SEATING LABORATORY

The Jolt/Vibration/Seating Laboratory is equipped for investigation of the biomechanics of the spine, particularly problems related to low back pain due to the interaction between people and equipment in jolt (impact) and vibration environments. Three shakers are available to simulate impact and vibration environments.

Human responses are measured using equipment including load cells, electromyography, accelerometry, position sensors, and pressure pads. Portable sensors and data recorders are used to evaluate impact and vibration environments in the field and compare them to domestic and international guidelines and standards.

UPPER EXTREMITY BIOMECHANICS LABORATORY

The Upper Extremity Biomechanics Laboratory is configured for image analysis, upper extremity physical testing, and radiographic archives. A two-sensor Optotrak system, coupled with The MotionMonitor software package, is used to collect upper-extremity kinematic data.

CARDIOVASCULAR BIOMECHANICS LABORATORY

The Cardiovascular Biomechanics Laboratory houses an EMS Whitest uniaxial tension/compression testing system, a pulse-duplicating apparatus with flow loop, a spectrophotometer, silicone prototype fabrication utilities, high-speed/high-resolution cameras, a Sun Solaris workstation, and personal computers. The lab is equipped for soft tissue tensile/compression testing and viscoelastic creep/relaxation testing; simulation of flow through fabricated, anatomically realistic, patient-specific models of vasculature and heart valves; quantification of protein content in soft tissues; fabrication of realistic, compliant prototypes of human organs; and computational modeling of hemodynamics and tissue mechanics of normal and pathological cardiovascular organs.

IMAGE PROCESSING LABORATORY

The Image Processing Laboratory is equipped to perform sophisticated image processing procedures required for varied investigations. Its equipment centers around a cluster of workstations, a video graphics copy device, a video camera that is used as a densitometer, and various other peripherals. The cluster is connected to the University-wide broadband communications system through which data can be transferred from ICAEN, all Academic Computing machines, all hospital computers, and off-campus computers (such as the national supercomputer system).

Many investigators use this facility to analyze cardiac images obtained from cine-CT or ultrasound, and for cross-section of human spines, dental specimens, and so forth.

ORTHOPAEDIC BIOMECHANICS LABORATORY

The Orthopaedic Biomechanics Laboratory occupies 20 rooms on the ground floor of Westlawn. It is configured primarily for macroscopic-level physical testing of musculoskeletal constructs (e.g., bones, articular joints, orthopaedic implants) and for corresponding computational modeling. The physical testing area includes a multipurpose wet lab, a multipurpose dry lab, a surgical preparation room, a mechanical testing room, a machine shop, and a specimen storage area. The computational modeling area is arranged around eight separate workstation seats in two adjoining partially partitioned areas. Adjacent to these core operational areas are offices for faculty, research staff, students, and fellows; a secretarial/reception area; a conference room; and a library.

BIOINFORMATICS AND COMPUTATIONAL BIOLOGY LABORATORY

The Bioinformatics and Computational Biology Laboratory is wired for high-speed networking (10- and 100-megabit and gigabit ethernet, hardwired and wireless, and ATM). It includes five dedicated Linux clusters, 126 computing systems, 178 CPUs, more than 100 gigabytes of RAM, and 2.5 terabytes of disk space. Computer resources include a dedicated compute server cluster of 18 Linux systems (36 CPUs) connected with a dedicated, switched, copper Gigabit Ethernet intranet—18 Dual AMD MP-2400 (2.2 GHz, 2 GB memory, 40 GB disk each); second dedicated compute server cluster of 16 Linux systems (32 CPUs) connected with a dedicated, switched, fiber-optic Gigabit Ethernet intranet—12 Dual Pentium III (500 MHz, 1 GB memory, 9 GB disk each), and four Dual Pentium III (500 MHz, 2 GB memory, 9 GB disk each);
and third dedicated compute cluster of nine Linux systems (18 CPUs) connected with a dedicated 2.4 GB multistage intranet—eight Dual Pentium III (866 MHz, .5 GB memory, 45 GB disk each), and one Dual Pentium III (866 MHz, 1 GB memory, 45 GB disk each). There are two additional clusters: an 8-node cluster of Pentium II class machines, and a 12-system heterogeneous cluster of various SUNs, HPs, and SGIs; four dedicated, dual fiber channel, redundant disk storage systems (RAID) 412 GB usable each. An additional 78 computers are used as compute servers, web servers, database servers, file servers, workstations, laptops, and for other developmental and experimental needs.

IOWA SPINE RESEARCH CENTER BIOMECHANICS LABORATORY

The Iowa Spine Research Center Biomechanics Laboratory is fully equipped to perform studies of tissue and/or specimen response to mechanical loads. An MTS Bionix machine (with extended columns) servohydraulic testing machine permits application of uniaxial tension or compression in concert with axial torsion under displacement (rotation) or load control. In addition, the laboratory has a large base plate with T-slots, grips, an environmental chamber, and an independent controller with specialized test control and data acquisition and analysis routines.

An MTS Model 810 servohydraulic testing machine permits uniaxial tension or compression under displacement, load, or strain control. A bank of fatigue testing machines is planned.

An apparatus for testing spinal motion segments for their balance point and buckling behaviors also is available.

TISSUE ENGINEERING LABORATORY

The Tissue Engineering Laboratory is outfitted with a fume hood, sink, laboratory counters, tables, and major tissue culture equipment, including a Baker SG3 laminar flow hood, a NuAir water jacked incubator, an autoclave, a vacuum pump, a Zeiss Axiovert S-100 phase contrast and bright field microscope with a computer interface, computer-controlled peristaltic pumps, a computer-controlled water bath, and a refrigerator and freezer.

The inverted microscope has an image capture system interfaced to a computer workstation with image processing software. A variety of sensors for performing temperature, pressure, and flow measurements also are available. The laboratory’s computers are equipped with software for graphical, numerical, image analysis, word processing, and symbolic computation. Liquid nitrogen dewars, and CO2 and N2 tanks have been installed. An Ussing chamber with electrodes and a high impedance Keithley electrometer also are available.

LARGE-SCALE DIGITAL CELL ANALYSIS LABORATORY

The Large-Scale Digital Cell Analysis Laboratory is involved in development of the large-scale digital cell analysis system (LSDCAS) and model-based approaches to problems of general biological interest. The facilities include the Real-Time Cell Analysis Laboratory, in the Seams Center, with 10 Linux workstations, a Power Mac, printers, and scanners; and Real-Time Cell Analysis Data Center, also in the Seams Center, with two Itanium servers (36 GB RAM/144 GB RAID storage), a fiber channel RAID storage system (2 terabytes), two dual-Pentium servers (2 MB RAM/36 GB disk storage), dual 30 amp/240 volt uninterruptible power supplies, 30-slot DLT tape library, fiber channel switch, fiber channel/SCSI bridge, rack-mount monitor/keyboard, and KVM switch.

The Quantitative Real-Time Cell Analysis Facility, located in the Medical Education and Research Facility, has a LSDCAS system consisting of three automated microscope systems capable of performing real-time single-cell analysis experiments, located in a dedicated darkroom to regulate illumination conditions. Each microscope system is controlled by a microcomputer interfaced to a digital camera and a microscope controller. This facility also includes a small tissue culture support laboratory containing a cell incubator, and access to tissue culture hoods, freezers, refrigerators, and other equipment.

The Biomedical Research Laboratory, in the Medical Education Building, has a tissue culture hood, dual-chamber incubator, Coulter cell counter, protein and nucleic acid gel electrophoresis and blotting apparatus, refrigerators, freezers, and a variety of tools used for biochemistry, cell biology, and molecular biology.

Courses

Special Topics

051:000 Cooperative Education Training Assignment: Biomedical Engineering 0 s.h.

Biomedical engineering students participating in the Cooperative Education Program register for this course during work assignment periods; registration provides a record of participation in the program on the student’s permanent record. Prerequisites: admission to Cooperative Education Program and consent of faculty adviser.
668 College of Engineering

051:030 BME Fundamentals 2 s.h.

051:040 Biological Systems Analysis I 3 s.h.
Application of principles of linear system (control) theory to analysis of biological systems; development of computer simulation techniques to study dynamic response of physiological systems. Offered fall semesters. Prerequisites: 22M:034, 059:006, and 072:154.

051:060 Fundamentals of Biomedical Imaging 3 s.h.
Fundamentals of medical imaging science and engineering; the physics of ultrasound, X-ray, and magnetic resonance; reconstruction of CT and MR images; processing and analysis of medical images. Repeatable. Prerequisites: 029:082, 059:006, 072:154, and computer programming skills. Corequisites: 051:090 and 057:017.

051:080 Biophysical Engineering 3 s.h.
Principles of electronic instrumentation, biopotential measurements, and electrical and electronic device design for biomedical engineering; theory introduced in class applied in laboratory experience designing devices for taking measurements of living systems. Prerequisites: 051:040 and 059:008.

051:083 Biomechanical Design 3 s.h.
Principles of medical devices and biomechanics; selection of material, stress and functional analysis, failure criteria, fatigue analysis, and optimal design; case study of biomechanical designs, computer-aided design methods, design of sub-systems, product liability. Prerequisites: 051:050 and 057:019.

051:085 Biomedical Engineering Senior Design I 4 s.h.
Individual or group work on a creative design project involving current problems in biomedical engineering, interdisciplinary projects involving biomedical engineering and health sciences faculty members; first semester of a year-long senior capstone design project. Prerequisites: 051:080, 051:083, and senior standing.

051:086 Biomedical Engineering Senior Design II 4 s.h.
Second semester of a year-long senior capstone design project begun in 051:085. Prerequisites: 051:085 and senior standing.

051:090 BME Freshmen/Sophomore Forum 0 s.h.
Presentations by faculty, graduate students, collaborators from the Carver College of Medicine, and Colleges of Dentistry and Law, may include visits to laboratories and industries.

051:091 Professional Seminar: Biomedical Engineering 0 s.h.
Professional aspects of biomedical engineering presented through lectures and discussions by guest speakers, field trips, films, panel discussions. Repeatable. Prerequisite: sophomore or higher standing.

051:092 Leadership and Resourcefulness 0 s.h.
Development of leadership skills and resourcefulness for real-world professional work and life. Repeatable. Prerequisite: completion of six semesters of 051:040 and 051:090 combined.

051:098 Individual Investigations: Biomedical Engineering 0-3 s.h.
Individual projects for biomedical engineering undergraduate students, such as laboratory study, engineering design projects, analysis and simulation of an engineering system, computer software development, research. Prerequisite: consent of instructor.

051:121 Introduction to Bioinformatics 4 s.h.
Overview of bioinformatics and genome science including genome projects, functional genomics, proteomics, genomics, microarray, DNA polymorphism, data mining algorithms; experimental methods and analytical approaches. Prerequisite: consent of instructor. Same as 002:169, 051:121.

051:122 Computational Genomics 3 s.h.

051:123 Bioinformatics Techniques 3 s.h.
Tools and techniques relevant to bioinformatics and genomics with theoretical and design issues; genes, algorithms, Perl, bio-Perl, XML, databases, data mining, systems software.

051:130 Introduction to Genetics and Quantitative Physiology 1 s.h.
Genetics and quantitative physiology in visceral organs and the musculoskeletal system. Corequisite: 027:130.

051:162 Biomedical Computer-Aided Design 3 s.h.
Fundamentals of computational methods and tools in design and analysis; 3D modeling and simulation; systematic approach to creation of virtual 3-D models (digital prototypes), including visualization and physics-based simulation; matrix transformations, geometric modeling, computational methods in simulation and integration; virtual reality. Prerequisites: 051:050 and 051:083.

051:178 Fast-Track Biomedical Engineering Design I 4 s.h.
First semester of year-long senior capstone design project; individual or group design project involving biomedical engineering problems. Prerequisites: 051:080, 051:083, and senior standing.

051:179 Fast-Track Biomedical Engineering Design II 4 s.h.
Second semester of year-long senior capstone design project begun in 051:178. Prerequisites: 051:178 and senior standing.

Biomaterials

051:070 Biomaterials I 3 s.h.

051:170 Graduate Biomaterials 3 s.h.

051:172 Polymers as Biomaterials 3 s.h.
Structure-property relationships and in vitro performances of polymers used to manufacture implants and other devices. Prerequisite: 051:070 or equivalent.

051:173 Metals as Biomaterials 3 s.h.
Property-structure relationship of metals used to fabricate implant materials; their interactions in vivo. Prerequisite: 051:070 or equivalent.

051:174 Ceramics and Glasses as Biomaterials 3 s.h.
Property-structure relationship of ceramics and glasses used to fabricate implant materials; their interactions in vivo. Prerequisite: 051:070 or equivalent.

051:175 Tissue Engineering 3 s.h.
Principles of tissue engineering; cell/material interactions, cellular scaffolding, material design for tissue engineering, new models. Same as 046:290, 052:227.

051:176 Biomaterials Laboratory 3 s.h.
Practical experience in design, fabrication, and testing of biomaterials and devices; mechanical testing, tissue response, design to optimize response. Basic understanding of materials required. Prerequisite: 051:070.
Biomechanics Biofluids

051:050 Biomechanics 3 s.h.

051:140 Graduate Biomechanics 3 s.h.
Understanding the human body from an engineering mechanics perspective; challenges of applying engineering principles to living systems, illustrated through real-world examples. Repeatable. Prerequisite: 057:019.

051:150 Musculoskeletal Biomechanics 3 s.h.
Principles of solid mechanics applied to analytical, experimental investigation of biological systems; emphasis on applications in kinesiology of human musculoskeletal system. Prerequisites: 057:019 and graduate standing. Corequisite: 072:154.

051:151 Intermediate Mechanics of Deformable Bodies 3 s.h.
Application of equilibrium analysis, strain-displacement relations, constitutive relationships to practical structural systems and elementary plane elasticity problems. Offered fall semesters. Prerequisite: 057:019. Same as 053:140, 058:150.

051:152 Ergonomics of Occupational Injuries 3 s.h.
Epidemiology, surveillance systems, ergonomics, biomechanics, physiology, psychology, legal aspects, and cost control. Prerequisite: 051:050 or 051:150.

051:154 Cardiac and Vascular Mechanics 3 s.h.
Bio-solid mechanics of the cardiovascular system; mechanical properties of venocones, valves, and blood vessels, their normal function, how they are affected by disease states; design of artificial organs, prostheses. Prerequisite: 057:019.

051:155 Cardiovascular Fluid Mechanics 3 s.h.

051:157 Musculoskeletal Tissue Mechanics 3 s.h.
Biomechanical characterization of bone, cartilage, and tendon/ligament at the tissue level, with applications to lower and upper limb, spine, dental, and craniofacial structures. Repeatable. Prerequisites: 051:050 and 051:151.

051:158 Biomechanics of Orthopedic Implants 3 s.h.
Design and function of hip, knee, ankle, shoulder, elbow, and wrist replacements and fracture stabilization devices; fixation modalities, stress analysis, tissue adaptation, failure mechanics. Prerequisites: 051:050, 057:019, 057:007, and 059:008.

051:233 Spine Mechanics 3 s.h.
Biomechanics applied to mechanics of the human spine; clinical aspects, state-of-the-art in spine research, basic engineering principles for biomechanical analysis. Prerequisite: 051:150.

051:254 Advanced Vascular Mechanics 3 s.h.
Topics in vascular solid mechanics; study of vascular tissue from theoretical (constitutive modeling), experimental, and computational perspectives. Prerequisite: 051:154.

051:255 Advanced Biofluid Mechanics 3 s.h.
Hemodynamic theories of atherosclerosis, Womersley models, steady and unsteady flows in curvature, bifurcation and branching arterial segments, flow dynamics past prosthetic implants, experimental and computational models, particulate and mass transport simulations in human circulation. Prerequisite: 051:155.

051:257 FE Analysis in Orthopaedic Biomechanics 3 s.h.
Finite element modeling techniques applied to musculoskeletal (orthopaedic) biomechanics; use of ABAQUS finite element software. Prerequisite: 051:150. Corequisites: 051:158 and 058:115.

Bioelectrical Engineering

051:141 Graduate Biological Systems Analysis 3 s.h.
Application of principles of linear system (control) theory to analysis of biological systems; development of computer simulation techniques to study dynamic response of physiological systems. Prerequisite: graduate standing. Corequisite: 072:154.

051:148 Digital Image Processing 3 s.h.
Same as 055:148.

051:160 Transport Phenomena in Biomedical Engineering 3 s.h.
Same as 052:271.

051:161 Graduate Biomedical Imaging 3 s.h.
Engineering and science medical imaging fundamentals; physics of ultrasound, x-ray, and magnetic resonance; reconstruction of CT and MR images; processing and analysis of medical images. Repeatable. Prerequisite: 072:154 or equivalent. Corequisite: 051:141.

051:181 Graduate Biomedical Measurements I 3 s.h.
Design, development, utilization of contemporary electronic instrumentation for measuring biomedical variables of clinical and research interest. Prerequisites: a basic electronics course and graduate standing. Corequisite: 072:154.

051:182 Biomedical Signal Processing 3 s.h.
Application of signal processing methods (e.g., Fourier, Laplace, z-transforms) to biomedical problems, such as analysis of cardiac signals, circadian rhythm, the breathing cycle, computer simulation lab. Prerequisite: 051:180.

051:185 Medical Imaging Physics 3 s.h.
Physics and data acquisition techniques of major medical imaging modalities (e.g., X-ray, CT, MR, ultrasound, PET, and SPECT); physical interactions of energy with living tissue, principles and methods used in acquiring imaging data, subsequent image construction, how inherent properties of different imaging modalities influence image quality; simple MATLAB programming required. Second in a sequence. Prerequisites: background in physics and computers, and biology or physiology or anatomy.

051:186 Multidimensional Medical Imaging Process 3 s.h.
New algorithms for processing and analyzing large volumetric data sets; review of the physics of CT, MRI, and ultrasound; 3-D convolution and filtering, geometric transformations, shape features, surface segmentation, regional segmentation, surface tiling, surface reconstruction, volumetric registration. Third in a sequence. Prerequisite: 051:185.

</table>
Chemical and biochemical engineers use physics, chemistry, biology, and mathematics to aid in the invention and production of materials and processes that benefit society. For example, biochemical engineers might develop new technologies to produce polymers from biorenewable resources; and they might apply these polymeric materials in the field of medicine for the growth and repair of tissues and organs.

Chemical and biochemical engineers engage in a wide variety of activities that benefit the global community. Fuel cells, solar energy, and biorenewable fuels (biodiesel or ethanol) fall within the realm of chemical engineering. Chemical engineering distinguishes itself from other engineering professions with its reliance on chemical reactions and physicochemical transformations to produce a wide variety of important materials and products.

Biochemical engineers are involved in a wide variety of industrial biocatalytic, fermentation, and cell culture processes that generate products ranging from the high fructose corn syrup in soft drinks to recombinant human insulin.

As part of their training, chemical and biochemical engineers learn ethical design and a respect for the larger issues in any design, such as community health, employee safety, and the global implications of the design. The University of Iowa’s curriculum emphasizes chemical process safety and environmentally conscious chemical engineering design.

Chemical and biochemical engineers work in a wide range of industries; petroleum and specialty chemical production, polymer or plastic production, food processing, microelectronics production, biochemical processing, and environmental compliance are just a few. Potential jobs include production, process development, plant design and construction, and fundamental research. Many experienced chemical and biochemical engineers move through management ranks to high-level administrative positions.

Undergraduate Program

The department offers the Bachelor of Science in Engineering in chemical engineering. The program’s objective is to produce graduates who have:

• a strong foundation of scientific and technical knowledge and are equipped with problem-solving, teamwork, and communication skills that will serve them throughout their careers;
• the ability to pursue careers as practicing chemical engineers in fields such as pharmaceuticals, microelectronics, chemicals, polymers/advanced materials, food processing, or environmental engineering;
• the ability to pursue advanced studies in disciplines such as chemical engineering, environmental engineering, medicine, law, or business; and
• the ability to assume professional leadership roles.

The program uses the following methods and strategies to achieve its educational objectives:

• foster a personalized, supportive environment for all students by taking advantage of the unique combination of a small college atmosphere in a major research university;
• enrich the undergraduate experience through cultural diversity, and international opportunities or experiential learning;
• provide a solid foundation and understanding of the fundamental principles of mathematics, science, and engineering;
• provide students with experience in learning and applying tools (e.g., computer skills) to the solution of theoretical and open-ended chemical engineering problems;

• provide students with opportunities to participate in multidisciplinary teams, and to develop and practice written and oral communication skills, both within the team and to a broader audience;

• provide students with opportunities to design and conduct chemical engineering experiments, and to design systems, components, and chemical processes to meet specific needs and constraints; and

• provide a contemporary grounding in professional responsibility, including ethics, the global and societal impact of engineering decisions, and the need for lifelong learning.

Bachelor of Science in Engineering

The College of Engineering undergraduate curricula changed fall semester 2002. Students who entered the college fall semester 2002 or later must complete the requirements described below. Students who entered the college before fall 2002 may complete the old requirements (described in pre-2002 editions of the Catalog, existing program curriculum sheets, and degree evaluation forms), with possible course substitutions. Or they may complete the new requirements, under conditions defined by each program and available from the college's Student Development Center.

The B.S.E. in chemical engineering program provides a broad education at the leading edge of technology. It emphasizes fundamental concepts, problem solving, laboratory techniques, and communication skills. Biological science joins physics, chemistry, and mathematics as foundation disciplines for chemical engineering.

The sophomore, junior, and senior years emphasize chemical engineering courses such as engineering flow and heat exchange, mass transfer and separations, chemical reaction engineering, chemical process safety, chemical engineering laboratories, process dynamics and control, and process design. Experience in instrumentation, analysis, and design is obtained through an integrated laboratory program. Routine use is made of computer-based data analysis, simulation, and design.

Students are required to participate in at least one enriching activity, which may include a research experience, a cooperative education or internship experience, study abroad, completion of the Certificate in Technological Entrepreneurship, or other approved experiences.

Chemical engineering students may gain depth of knowledge related to a career path through their selection of physical science, engineering, humanities, and social science electives. Several preapproved elective focus areas may help students define potential careers.

The B.S.E. in chemical engineering requires a minimum of 128 s.h. The curriculum covers four major stems: mathematics and basic sciences, engineering topics, elective focus area, and general education (15 s.h. of humanities and social science courses). All students take 059:005-059:006 Engineering Problem Solving I-II and 010:003 Accelerated Rhetoric. General education component courses must be selected to satisfy the requirements of the College of Engineering. See “Curriculum Stems” and “General Education Component” under “Bachelor of Science in Engineering” in the College of Engineering section of the Catalog.

Elective focus area courses must be selected according to guidelines established by the Department of Chemical and Biochemical Engineering. See “Elective Focus Area” after the following curriculum list.

Some courses in the curriculum are prerequisites to others. Students who take courses in the order below satisfy the prerequisite requirements automatically. Students who do not follow this sequence still must satisfy all course prerequisites.

## Elective Focus Area

Students may prefer to develop an individualized elective focus area, which is subject to approval by the department's curriculum committee. See the Department of Chemical and Biochemical Engineering web site for detailed descriptions of preapproved elective focus areas, guidelines for tailored elective focus areas, and typical four-year study plans based on elective focus areas.

## Graduate Programs

The Department of Chemical and Biochemical Engineering offers the Master of Science and Doctor of Philosophy. Through course work and research, graduate students gain an understanding of the principles of engineering science and use those principles in contemporary applications related to energy, the environment, biotechnology, and materials. The department emphasizes research, since most opportunities for graduates are in research and development.

## Research and Study Areas

Current research strengths of the Department of Chemical and Biochemical Engineering are in the areas of global and regional atmospheric modeling, biomaterials medical engineering, cellular engineering, photopolymerization, and biocatalysis.

## BIOMEDICAL RESEARCH

Chemical engineering-based biomedical and artificial organ research is an interdisciplinary effort with the Carver College of Medicine to investigate medical problems that may be solved through chemical and biochemical engineering practice. A current project with the Department of Obstetrics and Gynecology involves the use of...
membrane and microencapsulation technologies to develop a short-term bioartificial pancreas for diabetic pregnancy. Another project is concerned with development of more effective vaccination methods.

The department's interdisciplinary collaborations allow chemical engineering students to take advantage of facilities in both colleges. Some of the equipment available for this research includes a refrigerated centrifuge, dissecting microscope, a clean hood, and a Diamond General Oxygen Uptake System. Students have access to the Obstetrics/Gynecology core microbiology laboratory, which contains a spectrophotometer and other specialized equipment. In addition, the department shares access to ultracentrifuges, a scintillation counter, HPLC, UV illuminator and photographic equipment, and an automatic plate reader at the Medical Research Facility.

Students involved in animal research have access to the University's Office of Animal Resources, which is adjacent to the University of Iowa Hospitals and Clinics.

ENVIRONMENTAL ENGINEERING TECHNOLOGIES

Environmental contamination is a major problem facing engineers today. The Department of Chemical and Biochemical Engineering has an active research program in the environmental areas of air pollution, atmospheric chemistry, environmental change, bioremediation, and the design of new environmentally compatible technologies. Particular emphasis is placed on the chemistry and physics of local, regional, and global air-pollution problems. Research in support of this activity includes high-speed computing and detailed sensitivity analysis.

This work involves the Center for Global and Regional Environmental Research, an interdisciplinary research consortium that brings together University scientists and scholars from more than 20 disciplines, including chemistry, civil and environmental engineering, geography, geology, law, and medicine. The center's chief area of concern is environmental change.

BIOCHEMICAL AND BIOLOGICAL SEPARATION PROCESSES

Research in this area is devoted to developing a better understanding and new techniques of separation, especially for biochemistry and fermentation. The department's long-standing research strengths are fundamentals and applications of membrane-based separations. Membrane separation research in the department involves fundamentals of ultrafiltration and microfiltration, reversible and irreversible fouling of membranes by protein molecules, the role of transmembrane pressure pulsing in reducing concentration polarization, demulsification via crossflow microfiltration, application of supported emulsion liquid membranes for extractive fermentation and perfusion, membrane fabrication to produce photosensitive gas separation devices, and enzymatic membrane reactors for resolution of racemic mixtures.

Another core separation research area is the crystallization of biological macromolecules. Using a variety of environmental parameters such as pressure and temperature, researchers are evaluating the role of growth rate control on crystal quality. Other studies focus on improved crystallization screening protocols and crystal handling for subsequent structural determination via X-ray diffraction.

Photopolymerization

Photopolymerizations are chain reactions in which a liquid monomer is converted to a solid, durable polymer in a process triggered by light of the appropriate wavelength. The use of light, rather than heat, to drive a polymerization reaction offers advantages in developing new processes or products.

Photopolymerizations provide both spatial control and temporal control of reactions, since light can be directed to locations of interest in the system and is easily shuttered on or off. Photopolymerizations also provide solvent-free formulations, which reduce the emissions of volatile organic pollutants, and they exhibit extremely rapid reaction rates. These advantages have led to tremendous growth in the application of photopolymerizations in the private sector, but much of this growth has occurred without a fundamental understanding of the underlying chemical processes.

Research in the Department of Chemical and Biochemical Engineering focuses on comprehensive characterization of the kinetics, mechanisms, structure, and properties of photopolymerizations. It includes the following types of studies: characterization of the photochemical processes by which polymerizations may be initiated; kinetic characterization of cationic photopolymerization; development of methods for photopolymerization of thick polymers and composites; development of photopolymerization systems based upon agricultural feedstocks; and new methods for monitoring high-speed photopolymerization reactions.
BIOCHEMICAL ENGINEERING

Biochemical engineering involves the industrial application of enzymes, microorganisms, cells, and tissues for production of chemicals, pharmaceuticals, and other materials of commercial value.

The department is active in solving problems with the use of insect cell culture for recombinant protein and viral insecticide production. Research is being conducted to improve the quality and quantity of recombinant proteins produced in large-scale bioreactors. In addition, a continuous viral insecticide production system is being developed for the large-scale production of these environmentally safe alternatives to chemical insecticides. Finally, the insect cell/baculovirus system is being used as a model system to investigate the role of oxidative stress in viral cytotoxicity.

Novel rotating wall vessels developed at NASA are being used to simulate in vivo conditions with animal cell cultures. A major component of this research is the development of near-infrared spectroscopy for bioreactor monitoring, which will be used to monitor nutrients and byproducts noninvasively in real-time.

The department is active in designing technologies for the characterization and use of extremophiles, organisms that possess unusual abilities to survive in harsh chemical environments. In these studies, novel bioreactor systems that can withstand extremes of temperature, pressure, pH, and salinity are being developed. Extremophile strategies for survival also are being studied, with the aim of discovering unique enzymes for industrial application as well as evaluating molecular interactions that govern protein stability under extreme conditions.

In addition to the study of natural extremophiles, efforts to engineer stability in biocatalysts for industrial processing are underway. Novel solvent-tolerant enzymes and organisms for environmentally beneficial chemical reactions are being generated using molecular biology tools. Combinations of chemical and biological processing are being used to produce valued chemicals from renewable feedstocks. This work contributes to the interdisciplinary training of engineers and scientists to address the challenges of minimizing and cleaning up environmental pollution, while maximizing the economic benefits of chemical processing.

The integration of biotechnology with traditional chemical engineering has led to an interdisciplinary area involving other engineering departments and the Departments of Chemistry, Biological Sciences, Biochemistry, and Microbiology, and the College of Pharmacy. This focus includes involvement in the University's Center for Biocatalysis and Bioprocessing, whose fermentation capabilities are highlighted by its 1,500-liter fermentor.

Master of Science

The M.S. in chemical and biochemical engineering requires a minimum of 30 s.h. and is offered with and without thesis. All M.S. students must earn at least 24 s.h. in approved graduate-level course work; courses numbered below 100 may not be used to satisfy this requirement. Students who choose the thesis program earn 6 s.h. in 052:199 M.S. Thesis Research: Chemical and Biochemical Engineering. Nonthesis students earn 6 s.h. in additional approved course work and must complete and pass a final written exam on the basic core material.

M.S. students must have a graduate g.p.a. of at least 3.00 in order to graduate. Each student must pass a final M.S. examination.

There is no foreign language requirement.

Graduate students who receive assistantships, fellowships, or other financial support awarded with the understanding that they would pursue an advanced degree with thesis are not eligible to elect the nonthesis option.

Graduate students in the nonthesis program may petition for entry into the thesis program or the Ph.D. program by requesting a change of status through the Graduate College. The request is reviewed by the graduate admissions committee. If it is approved by the committee, it is forwarded to the chemical and biochemical engineering faculty for final approval. Students then are assigned to research advisers as though they were newly admitted graduate students. For a detailed description of program requirements, see the Department of Chemical and Biochemical Engineering web site.

Doctor of Philosophy

The Ph.D. in chemical and biochemical engineering requires a minimum of 72 s.h. of graduate credit. However, the degree is granted primarily on the basis of achievement rather than on the accumulation of semester hours. Candidates usually are expected to have completed three academic years in residence, or two years if they already hold a recognized
master’s degree. All candidates must complete a core course requirement, which consists of a course in transport phenomena, a course in reaction engineering, a course in advanced engineering mathematics, a course on proposal writing, and a thermodynamics course, as well as five additional courses (30 s.h.).

Ph.D. candidates are expected to maintain a g.p.a. of at least 3.25.

All doctoral students are required to satisfy a qualifying requirement and pass a comprehensive examination before they can become candidates for the degree. The Ph.D. comprehensive examination is the presentation and defense of the candidate’s Ph.D. research proposal. These examinations are arranged by members of the examining committee and may be repeated at the committee’s discretion. Comprehensive examination policies are published in the Manual of Rules and Regulations of the Graduate College (see the Graduate College in the Catalog). There is no foreign language requirement. A final examination, which is a defense of the thesis, completes the doctoral program. For a detailed description of program requirements, visit the Department of Chemical and Biochemical Engineering web site.

Admission

Applicants must meet the admission requirements of the Graduate College; for detailed information about Graduate College policies, see Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

Applicants should have a B.S. in chemical engineering, with satisfactory grades, from a recognized American college or university, and a g.p.a. of at least 2.80. Students who do not meet these requirements may be granted conditional admission, with the department chair’s approval. Graduates of foreign universities may be accepted, depending on evaluation of their records.

Applicants must submit their verbal and quantitative scores on the Graduate Record Examination (GRE) General Test with their application.

Graduate courses in chemical and biochemical engineering are designed for students who have an undergraduate background in chemical engineering. Exceptional students from other areas also may apply for admission to the M.S. or the Ph.D. program in chemical and biochemical engineering. If admitted, they may be required to take specific undergraduate courses to prepare them for graduate course work.

Financial Support

A number of fellowships, assistantships, and scholarships are awarded on a competitive basis to graduate students who qualify.

Graduate students have the opportunity to receive interdisciplinary research training in several fellowship programs administered through the Center for Biocatalysis and Bioprocessing (CBB). The program provides research training in areas that combine basic and applied research. Each year the center offers fellowships to doctoral students in biotechnology. These are funded by grants from the National Institute of General Medical Sciences, National Institutes of Health (NIH), National Science Foundation (NSF), and the CBB with funding from the State of Iowa. Through these programs, chemical and biochemical engineering students interact with students and faculty members from biochemistry, biological sciences, chemistry, civil and environmental engineering, medicinal and natural products chemistry, and microbiology.

Special Facilities and Laboratories

Undergraduate Core

MATERIALS SCIENCE LABORATORY

The Materials Science Laboratory is equipped with optical microscopes and facilities for metallographic preparation. Mechanical tensile testing instruments, heat treatment and sintering furnaces, and hardness testing machines also are available. Teaching aids include metallography specimen kits and crystallography packages.

Required Undergraduate Laboratories

CHEMICAL ENGINEERING LABORATORY

The Chemical Engineering Laboratory provides instruction for undergraduate students. It is equipped for experimentation in transport phenomena, heat transfer, fluid flow, chemical engineering unit operations, and reaction kinetics and catalysis. The laboratory includes pilot plant equipment, such as a distillation column, wiped film evaporator, shell-and-tube heat exchanger, jacketed kettle, and agitated extractor. Other equipment includes a computer-controlled
stirred-tank reactor system, packed-bed catalytic reactor, concentric tube heat exchanger, reciprocating plate extractor, membrane gas separator, microbial fermentor, and a tangential flow filtration system. Analytical equipment includes gas chromatographs, UV/visible spectrophotometers, and HPLC.

The laboratory is continuously updated to reflect advances at the forefront of chemical engineering technology. Additionally, a wide array of small equipment is available to support laboratory projects and demonstrations in chemical engineering courses and for use by students performing independent investigations.

**PROCESS CONTROL LABORATORY**

The Process Control Laboratory is a modern, computer-based instructional laboratory that is integral to the senior process control course. The laboratory consists of computer control of a shell-and-tube heat exchanger, a stirred-tank reactor, and a three-tank flow process. Additional laboratories include instruction in the use of analog controllers.

The Computer Control Laboratory offers an ensemble of learning experiences with the same equipment, to provide analogies and better insight into the control process. Topics include determination of the gain and time constants for single capacitance systems; determination of gain, time constant, and damping factor of second-order processes; determination of the open-loop and closed-loop response to step and ramp changes in input for single capacitance and multicapacitance processes; approximations of multicapacitance systems as first-order and second-order processes with dead-time through experimental evaluation; analysis of instrumentation characteristics and transfer functions; tuning and optimization of feedback control parameters (P, PI, and PID); system identification through frequency response methods; determination of system stability; and development of feed-forward control schemes.

Experimental arrangements in the laboratory are simple enough in design to be easily understood, yet complicated enough to help students appreciate system characteristics inherent in industrial processes (e.g., large time lags, error in parameter estimation).

**CHEMICAL PROCESS SAFETY LABORATORY**

The Chemical Process Safety Laboratory is an integral part of 052:187 Chemical Process Safety. It is equipped with two flash-point testers, a reactive system screening tool (RSST), a flammability limits tester, a Hartmann tube, a Van de Graaff generator, a high impedance electrometer, a field meter, a Faraday cage, and relief sizing software. This equipment is used in a series of experiments to demonstrate the principles of flammability, reactivity, explosions, relief valve sizing, and electrostatics relevant to industry.

**Graduate Facilities and Laboratories**

The department offers a wide variety of facilities to support and develop research activities.

**COMPUTER FACILITIES**

The departmental computer facilities contain a variety of graphics workstations, printers, and microcomputers. The department is supported by the college's Computer Systems Support (CSS). CSS maintains a large network of high performance UNIX and Windows XP workstations along with extensive commercial and public domain software. The department also has access to the University's central research facility in high-speed vector computation. This facility has SGI Power Challenger mini-supercomputers and provides nodes for external links for access to supercomputers.

**SEPARATION AND BIOSEPARATION PROCESSES**

Equipment available for purification of biological molecules and the study of separation processes includes an ultra speed centrifuge; a microfluidizer; a French pressure cell homogenizer; a large-scale, continuous-rotating, annular bed electrophoresis column; a packed-bed electrophoresis column; a Waters Delta Prep 3000 HPLC system; an Amicon DC 30 ultrafiltration system; a small-scale hollow fiber and spiral wound membrane pilot system; membrane permeability measurement apparatus; immobilized reactor-separators; and facilities for the fabrication of membranes. The laboratory is supported by additional gas and liquid chromatographs, several UV-Vis scanning spectrophotometers, computerized data acquisition systems, and other analytical equipment. The department also has pilot plant equipment for the study of filtration, distillation, extraction, and other equilibrium stage processes.

**CRYSTALLIZATION STUDIES**

Equipment for crystallization studies includes a dedicated Rigaku RU300 rotating anode generator and RAXIS-II area detector for conducting X-ray diffraction studies, an ALV dual static/dynamic laser light scattering goniometer, an ALV DR1 differential refractometer,
a high-precision Bellingham & Stanely Abbe refractometer, three microscopic digital imaging systems, a CSC isothermal titration calorimeter, a CSC differential scanning calorimeter, a Perkin-Elmer Pyris cryogenic calorimeter, and typical protein chemistry tools (e.g., liquid chromatography, gel electrophoresis, centrifuges, and so forth).

**BIOCHEMICAL ENGINEERING**

Facilities in the Biochemical Engineering Laboratory include a three-liter agitated bioreactor and a 6-liter airlift fully controlled bioreactor, gas and liquid chromatographs, UV-Vis spectrophotometers, centrifuges, carbon dioxide incubators, Class II-A safety cabinets, microscopes, Coulter particle counter, rotary shaker, autoclave, 2 D gel electrophoresis equipment, and laboratory computers.

Through collaborative research agreements, graduate students also have access to specialized facilities for electron microscopy, protein structure, and recombinant DNA research; the Flow Cytometry Facility; the High Resolution Mass Spectrometry Facility; the Large-Scale Fermentation Facility; and the Tissue Culture/Hybridoma Core Facility.

**AIR POLLUTION MODELING AND VISUALIZATION**

The Geographic Information Systems (GIS) Laboratory, located in the Center for Global and Regional Environmental Research, provides state-of-the-art computer hardware and software for management, analysis, and visualization of environmental data. The equipment includes modern multiprocessor workstations with advanced graphic capabilities, as well as Macintosh and Windows PCs. Peripheral equipment includes zip, jaz, CD, and digital tape drives, a high-quality color printer, a laser printer, and a CD writer. A Pyramid Systems Immersadesk provides for 3D immersive (virtual reality) visualization of data on a 4-by-5-foot screen.

A local network links the machines to each other and to the campuswide network, through which the laboratory accesses University mainframe computers and other on- and off-campus computing resources. A variety of software packages and programming languages, including Arc/Info, Arcview, NCAR Graphics, Matlab, S-Plus, and Vis5d are available for data analysis and display. Mapping grade GPS equipment produces highly accurate data, which can be used by GIS software for analysis and visualization.

The GIS laboratory also uses an SGI-Orion multiprocessor system with 8 processors. Each processor is an MIPS R4000 running at 150 MHz. It has 512 megabytes of memory and 2 gigabytes of local disk space. The operating system is IRIX 5.3. Some of the implementations use the native IRIX support for parallel programming, others use MPI (Message Passing Interface). Some automatic tools for generating parallel MPI programs using the SUIF compiler (Stanford University Intermediate Format) are under development. A recently acquired SGU-Power Challenge machine has 16 R4400 processors running at 200MHz with 512 megabytes of memory and 18 gigabytes of local disk space that runs IRIX 6.1.

**FUNDAMENTALS AND APPLICATIONS OF PHOTOPOLYMERIZATION**

The Photopolymerization Center was established to advance fundamental understanding of the kinetics and mechanisms of photopolymerizations. To this end, the center provides unique opportunities for collaborations by industrial and academic investigators to explore photopolymerization processes and develop novel applications based upon photopolymerizations.

The center provides equipment and instrumentation for the characterization of photopolymerization systems on the molecular, microscopic, and macroscopic levels. Center researchers pursue understanding of fundamental photophysical and photochemical processes involved in the photoinitiation reaction; characterization of high-speed propagation and termination kinetics that lead to the polymer structure; and evaluation of material properties through the course of the photopolymerization reaction. Both radical and cationic photopolymerizations are studied with state-of-the-art experimental techniques to elucidate the complex chemical and physical mechanisms that control the initiation, propagation, and termination of the active centers.

**Courses**

**General Topics**

052:000 Cooperative Education Training Assignment: Chemical Engineering 0 s.h.

Chemical engineering students participating in the Cooperative Education Program register for this course during work assignment periods; registration provides a record of participation in the program on the student’s permanent record. Prerequisite: admission to Cooperative Education Program and consent of co-op faculty adviser.
052:041 Process Calculations 3 s.h.
Solutions of industrial problems using material and energy balances, stoichiometric and nonstoichiometric chemical reactions, changes of state, solutions, mixing problems; computer applications. Recommended: 22M:031 or equivalent.

052:090 CBE Departmental Seminar 0 s.h.
Introduction to the profession; presentations, visits to laboratories, industries.

052:091 Professional Seminar: Chemical Engineering 0 s.h.
Professional aspects of chemical engineering presented through lectures and discussions by guest speakers, field trips, films, panel discussions. Prerequisite: sophomore standing.

052:092 Senior Enriching Activities Seminar 0 s.h.
Experiences to develop multidisciplinary team skills and increase understanding of the impact of engineering practice both locally and globally; written and oral discussion of student enrichment. Prerequisite: senior standing.

052:098 Individual Investigations: Chemical Engineering arr.
Individual projects for chemical engineering undergraduate students, such as laboratory study, engineering design project, analysis and simulation of an engineering system, computer software development, research. Prerequisite: consent of faculty advisor.

052:103 Chemical Engineering Thermodynamics 3 s.h.
Applications of thermodynamic principles to chemical and physical processes; prediction of material properties; phase equilibria and chemical equilibrium applied to mixtures and reacting systems. Corequisite: 052:041 or consent of instructor.

052:107 Sustainable Systems 3 s.h.
New and emerging concepts in sustainable systems design and assessment. Same as 053:107.

052:115 Computational Tools in Chemical Engineering 3 s.h.
Introduction to computational tools for chemical engineering problems; varied commercial software packages, including Excel, ChemCad, Maple, MathLab; problem solving experience to learn strengths and weaknesses of each package. Recommended: computer background.

052:117 Intermediate Thermodynamics 3 s.h.
Fundamental principles of thermodynamics as applied to phase equilibrium, properties of fluids, first and second law, variable composition systems, behavior of real fluids, mathematical techniques for solution thermodynamics. Prerequisite: 052:103 or 058:040 or graduate standing. Same as 058:140.

052:118 Mathematical Methods in Engineering 3 s.h.
Analytical solutions to ordinary and partial differential equations, asymptotic approximations to partial differential equations, perturbation theory, asymptotic expansion of integrals, boundary layer theory, summation of series as applied to chemical engineering problems. Prerequisite: graduate standing. Same as 053:113, 058:113.

052:171 Thermodynamics/Transport Laboratory 3 s.h.
Error analysis, propagation of errors, experimental design, data collection techniques, report writing, oral presentations, laboratory investigations of thermodynamics, fluid flow, heat transfer, fluid rheology. Prerequisites: 052:103 and 052:151.

052:172 Chemical Reaction Engineering/Separations Laboratory 2 s.h.
Experimental design, data collection techniques, report writing, oral presentations, laboratory investigations of chemical reaction engineering and separations; experiments with plug flow and batch reactors, CSTRs, dissolution, extraction, evaporation. Prerequisite: 052:171. Corequisite: 052:105.

052:173 Senior Laboratory Experience 2 s.h.
Experimental design, emphasis on communication skills; open-ended independent laboratory projects consistent with elective focus area. Prerequisite: 052:172.

052:187 Chemical Process Safety 3 s.h.
Application of transport phenomena, thermodynamics, chemical kinetics to study of safety, health, loss prevention; government regulations, toxicology/Industrial hygiene, relief sizing, runaway reactions, toxic release and dispersion models, source models, fires and explosions, risk assessment, hazard identification, case studies and accident investigation, incorporation of safety into design, laboratory experiments. Prerequisite: 052:161. Corequisite: 052:105.

052:192 Special Topics 1 s.h.
Research techniques for graduate students in chemical and biochemical engineering. Prerequisite: graduate standing or consent of instructor.

052:195 Contemporary Topics: Chemical and Biochemical Engineering arr.
Research techniques for graduate students in chemical and biochemical engineering. Prerequisite: graduate standing or consent of instructor.

052:196 Photopolymerization Topics 1 s.h.
Seminars presented by faculty members, research assistants, students.

052:215 Introduction to Literature Review and Proposal Writing 3 s.h.
Tools for reviewing literature, skills for critical reading of publications, training in successful proposal writing, experience drafting a proposal that can be used as a starting point for the Ph.D. comprehensive.

Biochemical Engineering

052:208 Introduction to Biochemical Engineering 3 s.h.
Biochemistry, cellular biology, recombinant DNA and hybridoma technologies; emphasis on engineering aspects of biotechnology, including enzyme kinetics, cell growth kinetics, transport phenomena in bioreactors, bioreactor design, bioseparations, formulation and sterilization of growth media, commercial applications of biotechnology. Prerequisites: 004:121 and 22M:031.

052:218 Bioseparations 3 s.h.
Introduction to separation/purification techniques in biochemical engineering; filtration, centrifugation, chromatography, extraction, electrophoresis, crystallization, cell disruption for intracellular product recovery. Prerequisite: 052:161 or consent of instructor.

052:222 Advanced Biochemical Engineering 3 s.h.
Advanced concepts in the behavior of biological systems used in modern technologies (e.g., food processing, pharmaceutical production, environmental remediation, chemical synthesis); application of biochemical engineering principles to design, development, and analysis of processes that use biocatalysis.

052:225 Biotechnology of Extremophiles 3 s.h.
Evolution and engineering of biocatalysis under extreme conditions; physiological, kinetic, and molecular behavior of systems that perform under extremes of temperature, pH, salinity, pressure, solvent concentrations.

052:226 Engineering Aspects of Animal Cell Culture 3 s.h.
Applications of animal cell culture (insect and mammalian) in biochemical engineering, with emphasis on recombinant protein synthesis; special considerations of animal cell cultures (e.g., sensitivity to hydrodynamic stress), scale-up of attachment-dependent and attachment-independent cell cultures, medium development, hybridoma cultures, protein processing in animal cells. Prerequisite: 052:222 or consent of instructor.
052:227 Tissue Engineering 3 s.h.
Scaffolds in tissue engineering, fundamentals and principles of tissue engineering. Same as 046:290.

052:275 Perspectives in Biocatalysis 1 s.h.
Applied enzymology, protein design, structure-activity relationships, biosensor technology, microbial transformations, biodegradation of environmental pollutants. Repeatable. Prerequisite: graduate standing. Same as 004:275, 046:275, 053:275, 061:275, 099:275.

Environmental Engineering

052:231 Environmental Chemistry I 3 s.h.
Principles of general, physical, organic chemistry applied in water and air systems, emphasis on qualitative and quantitative understanding of chemical kinetics and equilibrium, acid-base reactions, complex formation, precipitation, dissolution, oxidation-reduction reactions, organic nomenclature. Prerequisite: 004:012. Same as 053:152.

052:235 Air Pollution Control Technology 3 s.h.
Sources, environmental and health impacts, regulations and modeling of air pollution; processes and alternative strategies for control, global climate considerations. Prerequisite: 053:050 or consent of instructor. Same as 053:159.

052:236 Atmospheric Chemistry and Physics 3 s.h.
Principal chemical and physical processes affecting atmospheric trace gas and pollutant cycles; emphasis on atmospheric photochemistry, aerosol science, major sources, removal processes. Prerequisite: consent of instructor. Same as 053:161.

052:237 Green Chemical Engineering 3 s.h.
Strategies for pollution prevention for chemical processes studied at the macroscopic (industrial sector), the mesoscopic (unit operations), and the microscopic (molecular level); case studies.

Reaction Engineering

052:105 Chemical Reaction Engineering 3 s.h.
Application of chemical reaction kinetics to design of chemical reactors: batch reactors, mixed flow reactors, plug flow reactors; reversible and irreversible single reactions; parallel, series, and mixed reactions; temperature and pressure effects on reactor design; heterogeneous catalysis; transport in porous catalysis. Prerequisites: 052:103 and 052:161, or consent of instructor.

052:211 Intermediate Chemical Reaction Kinetics 3 s.h.
Stoichiometry and equilibria of multiple reactions, kinetics of elementary and composite reactions, heterogeneous catalytic kinetics, transition-state theory, linear free-energy relations, reactor analysis, transport in porous catalysis. Prerequisite: 052:105.

Transport Phenomena

052:151 Engineering Flow and Heat Exchange 3 s.h.
Fundamentals of fluid flow and heat transfer, fluid rheology, boundary layer theory, potential flow, dimensional analysis, laminar and turbulent flow in pipes, flow through packed beds, fluidized beds, pumps, flow measurement, filtration, heat exchanger design, evaporator design, and conductive, convective, and radiative heat transfer. Prerequisite: 052:041 or consent of instructor.

052:161 Mass Transfer and Separations 3 s.h.
Mechanisms of diffusional and convective mass transfer; solution of industrial problems, including the design of distillation, extraction, absorption, leaching, humidification, adsorption, drying, and chromatography processes; mechanical separations. Prerequisite: 052:151 or consent of instructor.

052:217 Transport Phenomena I 3 s.h.
Unified treatment of momentum, mass, energy transport in chemical engineering problems; use of vector and tensor notations in expressing equations of continuity, motion, energy.

052:271 Transport Phenomena in Biomedical Engineering 3 s.h.
Momentum, mass, and energy transport applied to problems associated with biomedical engineering; topics ranging from fluid mechanics of blood flow to insulin response of the artificial pancreas. Same as 051:160.

052:272 Diffusive Transport 3 s.h.
Diffusive transport of heat, mass, and momentum; phenomenological laws and analogies, analytical and numerical solution techniques, inverse heat conduction, multiphase and multicomponent systems. Prerequisite: 058:145 or consent of instructor. Same as 058:245.

Materials Science

052:156 Scanning Electron Microscopy and X-Ray Microanalysis 3 s.h.
Theory, operation, application of scanning electron microscopy and X-ray microanalysis for advanced students, staff, investigators who use these techniques in their research. Same as 012:156, 060:156.

052:240 Polymer Fundamentals 1 s.h.
Basic knowledge of polymers required as a foundation for other UI courses on polymers: basic polymer terminology, polymer groups, polymerization mechanisms, molecular weight determination. Five weeks.

052:241 Polymer Science and Technology 3 s.h.
Uses, properties of industrially important polymeric materials; polymer chemistry, polymer structure, characterization, polymer processing. Recommended: 004:122.

052:242 Polymer Chemistry 3 s.h.

Process Dynamics, Design, Analysis

052:147 Modeling Analysis 3 s.h.
Application of numerical analysis to transport phenomena, chemical kinetics, and reactor design, model formulation and numerical solution; ordinary and partial differential equations. Prerequisite: graduate standing.

052:185 Process Dynamics and Control in Design 3 s.h.
Theory and application of process dynamics to the design of chemical process control systems; mathematical models of unit operations, transfer functions, feedback and feed-forward control, stability, instrumentiation, digital control systems; computer methods, including simulation and commercial software use; laboratory focus on process analysis and design. Prerequisite: 052:105.

052:186 Chemical Engineering Process Design 3 s.h.
Design of chemical process plants, including application of process calculations, thermodynamics, kinetics, process synthesis, energy efficiency in separations, heat-exchanger network synthesis, physical property estimation, safety, computer-aided design, unit operations theory, process control, economics, economic optimization. Prerequisite: 052:105. Recommended: 052:187.
052:191 Seminar in Chemical and Biochemical Engineering 0 s.h.
Presentation and discussion of recent advances and research in chemical and biochemical engineering by guest lecturers, faculty, students. Prerequisite: graduate standing.

052:198 Individual Investigations: Chemical and Biochemical Engineering arr.
Individual projects for chemical and biochemical engineering graduate students; may include laboratory study, engineering design project, analysis and simulation of an engineering system, computer software development, research. Prerequisites: graduate standing and consent of supervising faculty adviser.

052:199 M.S. Thesis Research: Chemical and Biochemical Engineering arr.
Experimental and/or analytical investigation of an approved topic for partial fulfillment of requirements for M.S. with thesis in chemical and biochemical engineering. Prerequisites: graduate standing and consent of faculty adviser.

052:299 Research: Chemical and Biochemical Engineering Ph.D. Dissertation arr.
Experimental and/or analytical investigation of an approved topic for Ph.D. in chemical and biochemical engineering. Prerequisite: consent of adviser.
Civil and Environmental Engineering

Chair: Robert E. Ettema
Professors emeriti: Dan E. Branson, Forrest M. Holly Jr., Subbash C. Jain, Harrison Kane, Wayne L. Paulson
Adjunct professors: Pedro Alvarez, Konstantine P. Georgakakos, Tatsuki Nakano
Adjunct associate professors: Anton Kruger, Louis A. Licht, Marian Maste, John Nestler
Assistant professors: George Constantinescu, Paul Hanley, Walter Illman, Tim Maties
Adjunct assistant professors: Craig Just, Ken Lloyd, Doug Schnoebelen
Adjunct lecturer: Don Guckert
Undergraduate degree: B.S.E. in Civil Engineering
Graduate degrees: M.S., Ph.D. in Civil and Environmental Engineering
Web site: http://www.cee.engineering.uiowa.edu

Civil engineering is one of the three largest fields of engineering. It traditionally has been concerned with infrastructure facilities that are both large-scale and essential to modern life. Civil and environmental engineering projects include transportation systems and their components, such as bridges, highways, public transit systems, railways, harbors, airports, seaports, and even spaceports; large-scale structures and office buildings that provide enclosed working and living space; environmental and hydraulic systems that provide clean water and air, including filtration plants and distribution systems for municipal and industrial water supplies, wastewater treatment plants, dams, levees, and irrigation systems.

Growth areas of civil and environmental engineering include infrastructure development, construction management, computer-aided design, hazardous waste management, and engineered environmental systems. In the future, civil and environmental engineers will be called upon to design structures for earth and outer space, prevent erosion and sedimentation of our rivers, predict effects of global climate change on the environment, provide modern and efficient transportation systems, and ensure the quality of our air and our surface waters and groundwaters.

In planning and design, civil and environmental engineers work with other engineers, architects, landscape architects, planners, economists, financiers, sociologists, lawyers, and other specialists as members of the design team. Some civil engineers work in engineering offices; others may be called upon to construct or supervise outdoor projects they have designed. These field assignments, many of which are in remote and fascinating parts of the world, are particularly appealing to many civil and environmental engineers. There also is significant entrepreneurial potential for civil and environmental engineers as they start their own companies.

Undergraduate Program

The department offers the Bachelor of Science in Engineering in civil engineering. The program’s objective is to provide a well-rounded, superior engineering education that:

• provides students with appropriate proficiency in the civil engineering subdisciplines of structures, water-resources engineering, transportation, and environmental engineering;
• ensures that students are knowledgeable about the importance, procedures, and benefits of professional licensure and continuing education;
• offers design experiences that include projects in the curriculum that are offered by and guided in part by the professional community; and
• provides research opportunities to undergraduate students through the department’s connections with on-campus research entities including IIHR—Hydroscience and Engineering, the Center for Global and Regional Environmental Research, the Public Policy Center, the Center for Computer Aided Design, the Center for Biocatalysis and Bioprocessing, and the Center for Health Effects of Environmental Contamination.
Bachelor of Science in Engineering

The College of Engineering undergraduate curricula changed fall semester 2002. Students who entered the college fall semester 2002 or later must complete the requirements described below. Students who entered the college before fall 2002 may complete the old requirements (described in pre-2002 editions of the Catalog, existing program curriculum sheets, and degree evaluation forms), with possible course substitutions. Or they may complete the new requirements, under conditions defined by each program and available from the college’s Student Development Center.

The B.S.E. in civil engineering requires a minimum of 128 s.h. The curriculum covers four major stems: mathematics and basic sciences, engineering topics, elective focus area, and general education (15 s.h. of humanities and social science courses). All students take 059:005-059:006 Engineering Problem Solving I-II and 010:003 Accelerated Rhetoric. General education component courses must be selected to satisfy the requirements of the College of Engineering. See “Curriculum Stems” and “General Education Component” under “Bachelor of Science in Engineering” in the College of Engineering section of the Catalog.

Elective focus area courses must be selected according to guidelines established by the Department of Civil and Environmental Engineering. See “Elective Focus Area” after the following curriculum list.

Students choose one of two subtracks: civil, which provides breadth in the discipline, or environmental, which provides a concentration. Subtrack requirements are the same for the first semester of the first year but are different beginning with the second semester.

Some courses in the curriculum are prerequisites to other courses. Students who take courses in the order below satisfy the prerequisite requirements automatically. Students who do not follow this sequence still must satisfy all course prerequisites.

**FIRST YEAR**

**First Semester**

- 004:011 Principles of Chemistry I 4 s.h.
- 010:003 Accelerated Rhetoric 4 s.h.
- 059:005 Engineering Problem Solving I 3 s.h.

**Second Semester**

- 22M:032 Engineering Mathematics II: Multivariable Calculus 4 s.h.
- 029:081 Introductory Physics I 4 s.h.
- 059:006 Engineering Problem Solving II 3 s.h.
- General education component course 3 s.h.

**SECOND YEAR**

**First Semester**

- 029:082 Introductory Physics II 3-4 s.h.
- 053:015 Civil and Environmental Engineering Practice 2 s.h.
- 059:007 Engineering Fundamentals I: Statics 2 s.h.
- 059:008 Engineering Fundamentals II: Electrical Circuits 3 s.h.
- 059:009 Engineering Fundamentals III: Thermodynamics 3 s.h.

**Second Semester**

- 22S:039 Probability and Statistics for the Engineering and Physical Sciences 3 s.h.
- 053:020 CEE Sophomore Seminar 0 s.h.
- 053:050 Natural Environmental Systems 3 s.h.
- 053:105 Engineering Geology 3 s.h.
- 057:010 Dynamics 3 s.h.
- 057:019 Mechanics of Deformable Bodies 3 s.h.

**THIRD YEAR**

**First Semester**

- 053:030 Soil Mechanics 3 s.h.
- 053:033 Principles of Structural Engineering 3 s.h.
- 053:063 Principles of Transportation Engineering 3 s.h.
- 053:068 Civil Infrastructure 3 s.h.
- 053:091 Professional Seminar: Civil Engineering 0 s.h.
- 057:020 Fluid Mechanics 4 s.h.

**Second Semester**

- 053:055 Principles of Environmental Engineering 4 s.h.
- 053:071 Principles of Hydraulics and Hydrology 3 s.h.
- 053:086 Civil Engineering Materials 3 s.h.
### Environmental Subtrack

**FIRST YEAR**

**Second Semester**
- 004:012 Principles of Chemistry II 4 s.h.
- 22M:032 Engineering Mathematics II: Multivariable Calculus 4 s.h.
- 029:081 Introductory Physics I 4 s.h.
- 059:006 Engineering Problem Solving II 3 s.h.

**SECOND YEAR**

**First Semester**
- 053:015 Civil and Environmental Engineering Practice 2 s.h.
- 059:007 Engineering Fundamentals I: Statics 2 s.h.
- 059:008 Engineering Fundamentals II: Electrical Circuits 3 s.h.
- 059:009 Engineering Fundamentals III: Thermodynamics 3 s.h.

**Second Semester**
- 22S:039 Probability and Statistics for the Engineering and Physical Sciences 3 s.h.

**THIRD YEAR**

**First Semester**
- 053:030 Soil Mechanics 3 s.h.
- 053:033 Principles of Structural Engineering 3 s.h.
- 053:063 Principles of Transportation Engineering 3 s.h.
- 053:068 Civil Infrastructure 3 s.h.
- 053:091 Professional Seminar: Civil Engineering 0 s.h.
- Elective focus area course 3 s.h.

**Second Semester**
- 053:055 Principles of Environmental Engineering 4 s.h.
- 053:071 Principles of Hydraulics and Hydrology 3 s.h.
- 053:086 Civil Engineering Materials 3 s.h.
- 053:091 Professional Seminar: Civil Engineering 0 s.h.

**FOURTH YEAR**

**First Semester**
- 053:091 Professional Seminar: Civil Engineering 0 s.h.

**Second Semester**
- 053:084 Project Design and Management in Civil Engineering 3 s.h.
- Elective focus area course 3 s.h.
- General education component course 3 s.h.
with another engineering department, or an individual focus area tailored to the student’s interests.

Standard elective focus areas are offered in environmental engineering; hydraulics and water resources; structures, mechanics, and materials; transportation; urban and regional planning; and in the broad field of civil engineering. Elective focus areas offered jointly with other engineering departments cut across programs (e.g., computer-aided engineering, design and optimization, environmental processes).

Civil engineering students must take one general education component course related to their elective focus area.

For more detailed information about elective focus areas, see “Bachelor of Science in Engineering”/“Elective Focus Area” in the College of Engineering section of the Catalog. For a list of standard elective focus area options and guidelines for tailored elective focus areas in civil engineering, see the Department of Civil and Environmental Engineering web site.

Graduate Programs

The Department of Civil and Environmental Engineering offers the Master of Science and Doctor of Philosophy. Both programs prepare students for professional careers and further study. The principal concentration areas are environmental engineering and science; global and regional environmental research; hydraulics, hydrology, and water resources; structures, mechanics, and materials; and transportation and infrastructure systems.

Research and Study Areas

ENVIRONMENTAL ENGINEERING AND SCIENCE

The environmental engineering and science curriculum provides a comprehensive base of course work and research in the areas of air- and water-quality management, environmental chemistry and microbiology, natural systems modeling, and processes for water supply, pollution control, and solid and hazardous waste management. Interdisciplinary specialization and study are conducted with programs including IIHR—Hydroscience & Engineering, the Center for Global and Regional Environmental Research, the Center for Health Effects of Environmental Contamination, the Hazardous Substances Research Center, the Center for Biocatalysis and Bioprocessing; the Departments of Chemical and Biochemical Engineering, Geography, Geoscience, Microbiology, Occupational and Environmental Health; and the Urban and Regional Planning Program. New areas of interdisciplinary focus include groundwater contamination, biotechnology, global climate change, and hazardous substances.

GLOBAL AND REGIONAL ENVIRONMENTAL RESEARCH

The department has an active interdisciplinary research program in the environmental areas of air pollution, water pollution, groundwater remediation, global atmospheric change, and hazardous waste management. Particular emphasis is placed on the microbiology, chemistry, and physics of local, regional, and global air, soil, and water quality problems. Research includes sophisticated environmental quality analysis, high-speed computing, and detailed sensitivity analysis. The Department of Chemical and Biochemical Engineering and the Center for Global and Regional Environmental Research also collaborate in these endeavors.

HYDRAULICS, HYDROLOGY, AND WATER RESOURCES

The hydraulics, hydrology, and water resources curriculum is associated with IIHR—Hydroscience & Engineering, a world-renowned research institute. Senior staff members of the institute are professors in the program; they devote about half of their time to teaching.

IIHR offers unique opportunities for students to participate actively in the research, analysis, and design aspects of real-world problems. Considerable attention is given to the use of computers in mathematical modeling and in data acquisition and processing. IIHR high-speed computer facilities and advanced graphics and communication software complement the hydrology, hydraulics, and water resources curriculum.

STRUCTURES, MECHANICS, AND MATERIALS

The structures, mechanics, and materials curriculum is designed for students who wish to gain knowledge and skill in the mechanics of solids and structures that they can apply to civil infrastructure systems and other fields. The program concentrates on developing appropriate methodologies for tackling broad, complex issues related to civil infrastructure systems, and on educating engineers in the implementation and application of methodologies to actual engineering projects. Faculty members have expertise in structural engineering, design optimization, solid mechanics, and computational methods.
TRANSPORTATION AND INFRASTRUCTURE SYSTEMS

The transportation and infrastructure systems curriculum aims at graduating students interested in developing specialized knowledge and skills applicable to a diverse set of issues associated with transportation. Faculty members have expertise in traffic engineering, infrastructure management systems, pavement engineering, advanced construction materials, dynamic load and pavement simulation, optimal design, winter highway maintenance, real-time simulation, human factors, intelligent sensors, nondestructive testing, transportation planning, and travel demand modeling.

Master of Science

The Master of Science programs in civil and environmental engineering are designed to permit further concentration in the area or areas of the student's choice. Graduates are placed in advanced technical positions in industry, consulting firms, or government, or they may continue their graduate study. Current and projected demand for M.S. graduates is excellent.

The M.S. requires a minimum of 30 s.h. and is offered with or without thesis. Students who choose the thesis program earn up to 6 s.h. for the thesis. Nonthesis students in the environmental engineering and science curriculum earn an additional 3 s.h.

With the approval of their adviser, students develop a study plan that satisfies the requirements of their chosen curriculum.

All M.S. students must have a g.p.a. of at least 3.00, pass an oral examination, and in some program options, a written examination.

Doctor of Philosophy

The Ph.D. requires a minimum of 72 s.h.; the semester-hour requirements for some curriculum areas are higher. The doctoral degree is granted primarily on the basis of achievement rather than on a prescribed course of study. Students usually need at least three years of full-time work beyond the baccalaureate to complete the degree. One year is devoted to the preparation of a dissertation that contributes to knowledge in the field. In some specialty areas, a qualifying examination may be required.

All doctoral students are required to pass a written and oral comprehensive examination before being formally admitted to candidacy for the degree. This examination usually is taken after all required course work has been completed.

The program culminates in a final examination, in which candidates must successfully defend their dissertation.

Ph.D. students must maintain a g.p.a. of at least 3.00 throughout the program.

Interdisciplinary Ph.D.

The Department of Civil and Environmental Engineering cooperates in interdisciplinary doctoral programs with the Program in Applied Mathematical and Computational Sciences; see Applied Mathematical and Computational Sciences (Graduate College) in the Catalog.

Admission

Applicants must meet the admission requirements of the Graduate College; for detailed information about Graduate College policies, see Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

Each of the program's curricula is flexible; students may be admitted from all disciplines of engineering as well as from the mathematical and basic sciences.

Applicants to the M.S. program should have a cumulative undergraduate g.p.a. of at least 3.00. Ph.D. applicants should have a graduate g.p.a. of at least 3.00. Applicants whose grade-point average is slightly lower should contact the department.

Applicants should have a combined verbal and quantitative score of at least 1100 on the Graduate Record Examination (GRE) General Test. Lower scores are considered with other evidence of academic promise (recommendation letters, grade-point average). GRE General Test scores also are used in financial aid decisions.

Financial Support

A significant number of research assistantships are available on a variety of research projects, as are a limited number of teaching assistantships. Selection of recipients usually is based on scholastic achievement and research interest.
**Special Facilities and Laboratories**

**Undergraduate Core**
The first year engineering course 059:005 Engineering Problem Solving I includes an introduction to the college’s Computer System Support (CSS). Students in the course use computer-aided design tools on engineering workstations. All civil engineering courses require knowledge of personal computers and contain significant computer content.

For information about laboratories affiliated with core courses coordinated by other engineering departments, see the Catalog section for each of the departments.

**Required and Elective Undergraduate Laboratories**

053:030 Soil Mechanics (3 s.h.): equipped for determining the classification, seepage characteristics, stress-strain properties, and strength of soils.

053:050 Natural Environmental Systems (3 s.h.): environmental chemistry and biology of air, water, and soil quality, air and water pollution, limnology, global atmospheric change, fate and transport of pollutants; hazardous substances, risk analysis, standard setting.

053:055 Principles of Environmental Engineering (4 s.h.): conducted at the University Water Treatment Plant and Iowa City Wastewater Plant for demonstrations of unit operations and processes of water and wastewater treatment, and applications in environmental chemistry and microbiology.

053:071 Principles of Hydraulics and Hydrology (3 s.h.): hydraulics of pressure conduits and open channels, dimensional analysis, flow measurements, hydraulic machinery, with laboratory.

053:153 Environmental Chemistry Laboratory (3 s.h.): experiments to demonstrate fundamental principles of aquatic chemistry and chemical analyses for characterization of water and wastewater quality, conducted in the Environmental Engineering Laboratories.

053:154 Environmental Microbiology (3 s.h.): typical microorganisms isolated and their physiology and metabolic characteristics studied in the Environmental Engineering Laboratories.

053:156 and 053:151 Physical/Chemical and Biological Treatment Processes course laboratory (both 3 s.h.): unit operations, processes studied in bench scale experiments; use of typical process analytical parameters; experiments conducted in the Environmental Engineering Laboratories, University Water Plant, and Iowa City Wastewater Treatment Plant.

**Graduate Laboratories**

**ENVIRONMENTAL ENGINEERING AND SCIENCE LABORATORIES**
The Environmental Engineering and Science Laboratories provide state-of-the-art facilities, equipment, and expertise to support both undergraduate and graduate-level instruction and research. The laboratories support research in contaminant fate and transport in various media (air, water, soil, plants, and microbes), drinking water disinfection and distribution, wastewater treatment, geochemical-contaminant interactions, bioremediation, and phytoremediation. They also provide resources for analytical chemistry, electrochemistry, molecular biology, microscopy, computer modeling, and simulated environments on the bench- and pilot-scale levels.

The Environmental Engineering and Science Laboratories are affiliated with the University’s Center for Health Effects of Environmental Contamination and its Center for Global and Regional Environmental Research, and the UI Environmental Health Sciences Research Center, an affiliate of the National Institute of Environmental Health Sciences (NIEHS).

**HYDRAULICS, HYDROLOGY, AND WATER RESOURCES LABORATORIES**
The teaching and research functions of the department are closely connected to the research and contractual activities of IIHR—Hydroscience & Engineering, which also includes the Computational Laboratory for Hydrometeorology and Water Resources.

The institute houses some of the most modern research facilities in the world, including a 330-foot towing tank, several hydraulic flumes and wind tunnels, a dispersion flume, a wave tank, three special low-temperature flow facilities for investigation of ice phenomena, an environmental hydraulic flume for modeling of atmospheric flows, a refrigerated wind tunnel, a computer-controlled data handling system, 2-D and 3-D laser doppler anemometers for microscale velocity measurements, and extensive computational facilities.
The Computational Laboratory for Hydrometeorology and Water Resources uses a Hewlett-Packard DN10000 super-minicomputer, several Hewlett-Packard high-speed workstations, and graphic terminals and peripherals. It is equipped with advanced graphic software, communication software, mathematical software packages, and a Geographic Information System (GIS).

STRUCTURES, MECHANICS, AND TRANSPORTATION LABORATORIES

Laboratories for computational solid mechanics, construction materials, optimal design, plasticity, soils testing, structural materials testing, and ice engineering are available for teaching and research. The Optimal Design Laboratory and the Computational Solid Mechanics Laboratory have state-of-the-art networks of Hewlett-Packard and Silicon-Graphics workstations and other peripherals. These labs are used to conduct research on modern computational methods for analysis and design optimization of complex structural systems.

The Construction Materials, Soils, and Plasticity Labs are equipped for the determination of physical and mechanical properties of metals, concrete, soils, plastics, and bituminous materials. Equipment includes a computer-controlled MTS axial-torsional test system, universal testing machine, and a creep machine.

The Construction Materials Laboratory contains testing equipment for concrete, asphalt, and other materials used in infrastructure construction.

The Ice Engineering Research Lab has a uniaxial MTS test system with a state-of-the-art data acquisition system. There also is a Tinnus Olson testing machine, two ice tanks, a milling machine (in a cold room for preparation of ice samples), and a variety of other equipment to allow testing of the mechanical properties of ice and of ice/structure interaction processes.

Courses

Special Topics

053:000 Cooperative Education Training Assignment: Civil Engineering 0 s.h.
Civil engineering students participating in the Cooperative Education Program register in this course during work assignment periods; registration provides a record of participation in the program on the student’s permanent record card. Prerequisites: admission to the Cooperative Education Program and consent of faculty advisor.

053:010 CEE First-Year Seminar 0 s.h.
Introduction to civil and environmental engineering curriculum and profession; presentations by senior undergraduate students, graduate students, faculty, laboratory visits. Prerequisite: first-year standing.

053:015 Civil and Environmental Engineering Practice 2 s.h.
Concepts of the built environment and the natural environment; infrastructure life cycle; engineering communication (plans, engineering drawings and information systems, computer-aided drafting); field trip to major city. Prerequisite: sophomore standing in civil engineering.

053:020 CEE Sophomore Seminar 0 s.h.
Introduction to civil and environmental engineering curriculum and profession; presentations by senior undergraduate students, graduate students, faculty, laboratory visits. Prerequisite: sophomore standing.

053:068 Civil Infrastructure 3 s.h.
Introduction to elements involved in managing civil infrastructure assets and fundamental infrastructure management techniques. Prerequisite: 053:015.

053:083 Surveying and Remote Sensing 3 s.h.
Engineering surveying measurements, methods, computations. Prerequisite: 059:005.

053:084 Project Design and Management in Civil Engineering 3 s.h.
Design of civil engineering systems, individual and team design projects oriented toward the solution of local problems, project management, construction management, contracts, bidding. Prerequisites: 053:034, 053:050, 053:083, 053:174, and senior standing.

053:091 Professional Seminar: Civil Engineering 0 s.h.
Professional aspects of civil engineering presented through lectures and discussions by guest speakers, field trips, films, panel discussions. Prerequisite: junior standing.

053:098 Individual Investigations: Civil Engineering arr.
Individual projects for civil engineering undergraduate students: laboratory study, engineering design project, analysis and simulation of an engineering system, computer software development, research. Prerequisite: consent of faculty advisor.

053:101 International Business and Infrastructure 3 s.h.
Differences between international and domestic businesses; how differences in infrastructure in the international environment influence business operations; effects of infrastructure on international commerce and business practices; case studies, site visits.

053:107 Sustainable Systems 3 s.h.
New and emerging concepts in sustainable systems design and assessment. Same as 052:107.

053:111 Numerical Calculations 3 s.h.
Development of algorithms for functional approximations, numerical differentiation, integration; solution of algebraic and differential equations, with emphasis on digital computations; initial and boundary value problems. Prerequisite: 22M:034. Same as 058:111.

053:112 Engineering Design Optimization 3 s.h.
Engineering design projects involving modeling, formulation, and analysis using optimization concepts and principles; linear and nonlinear models, optimality conditions, numerical methods. Prerequisites: 22M:033, 059:007, and junior standing. Same as 058:112.

053:113 Mathematical Methods in Engineering 3 s.h.
Matrices, vector spaces, eigenvalue problems, quadratic forms, series solutions of differential equations, special functions, function spaces, Fourier series, equations of mathematical physics,
053:115 Computer-Aided Engineering
Fundamentals of computer graphics, visualization of engineering design and analysis data, solid modeling, window-based user interface development; applications of these techniques to engineering problems. Prerequisite: working knowledge of FORTRAN or Pascal. Same as 058:110.

053:182 Statistics for Engineers
Application of statistical techniques for evaluation and optimization of engineering designs; use of spreadsheets, statistical software; design and analysis of experiments; regression analysis; system optimization; modeling deterministic and stochastic systems. Prerequisite: 22S:039 or equivalent.

053:210 Developing Professional Service Business
Exposes broad range of engineering, medical, and business students to the unique challenges of creating a specialized business; how professional skills and functional knowledge can be combined in a customer-oriented enterprise. Prerequisite: open only to M.B.A., engineering, or health science enrollment or consent of instructor. Same as 06T:210.

053:212 Analytical Methods in Fluid Dynamics
Theory and solution techniques for first- and second-order partial differential equations; wave equation; Laplace equation; heat equation; Navier-Stokes and Energy equations; calculus of variations—Euler-Lagrange equation, Sturm-Liouville problems, Rayleigh-Ritz method; variational methods in thermo/fluids; integral equations—Green's functions, Volterra and Abel equations, Fredholm equations. Prerequisite: 053:113. Same as 058:212.

053:214 Analytical Methods in Mechanical Systems
Fundamental analysis applied in mechanics and dynamics; calculus of variations, variational methods, such as Ritz and Galerkin methods; ordinary differential equations; boundary and initial value problems; stability theorem, perturbation of linear systems. Prerequisite: 053:113. Same as 058:214.

Structures, Mechanics,
and Transportation

053:030 Soil Mechanics
Identification and classification of earth materials; hydraulic and mechanical properties of soils; soil improvement; laboratory testing. Prerequisite: 057:019.

053:033 Principles of Structural Engineering
Fundamental principles of structural analysis applied to statically determinate and indeterminate structures, continuous beams, trusses, and frames; external and internal equilibrium, compatibility of deformation, influence lines, virtual work; parallel use of classical and matrix formulation; slope deflection, flexibility and stiffness methods; use of computers. Prerequisite: 057:019.

053:034 Structural Design
Fundamental analysis and design of reinforced concrete members and structures, flexure, shear, bond, continuity, beams, one-way slab system; columns. Prerequisite: 053:033.

053:063 Principles of Transportation Engineering
History of transportation modes, new transport technologies, traffic operations and control, economic evaluation of transport alternatives, transportation planning, roadway design and construction, route location, preventive maintenance strategies. Prerequisite: 22S:039.

053:080 Civil Engineering Materials
Structure, strength and failure, durability, deformation, practice, and processing for primary construction materials systems, including steel, aluminum, concrete, asphalt, fiber-reinforced composites, masonry, timber. Prerequisites: 057:019 and 059:008. Corequisite: 053:033.

053:130 Construction Materials
Structure, strength and failure, durability, deformation, practice, and processing for primary construction materials systems, including steel, aluminum, concrete, asphalt, fiber-reinforced composites, masonry, timber. Prerequisites: 053:030, 057:015, and 057:019.

053:132 Fundamentals of Vibrations
Fundamental aspects of the vibration of linear discrete and continuous mechanical and structural systems; harmonic, periodic, arbitrary excitation; modal analysis, applications. Prerequisite: 057:019. Same as 058:153.

053:133 Finite Element I
One- and two-dimensional boundary value problems; heat flow, fluid flow, tension of bars, trusses and frames; isoparametric mapping, higher order elements; elasticity problems; use of commercial software. Prerequisite: 057:019. Same as 058:115.

053:134 Structural Design II
Concepts and procedures in steel design; LRFD (load and resistance factor design) methodology for beams/columns; analysis and design of indeterminate structures. Prerequisite: 053:033.

053:137 Composite Materials
Fundamentals of solids of multiply periodic systems; applications in lightweight structures, ultrastrong materials; materials for replacement of human tissues; composites with fibers, lamellar, particulate, cellular structures. Same as 051:177, 058:170.

053:138 Prestressed Concrete Structures
Initial and time-dependent deformation of concrete structures; analysis and design of statically determinate and indeterminate prestressed concrete structures; flexure, shear, torsion, deflections; beams, slabs, composite members, columns, tension members, buildings, bridges, tanks, shells; use of computers. Prerequisite: 053:034.

053:139 Foundations of Structures
Application of soil mechanics to analysis of structural foundations, slope stability analysis; bearing capacity and settlement of shallow and deep foundations; retaining structures, bearing cuts, reinforced earth structures; usage of computational models; subsurface exploration methods. Prerequisite: 053:030.

053:140 Intermediate Mechanics of Deformable Bodies
Application of equilibrium analyses, strain-displacement relations and constitutive relationships to practical structural systems and elementary plane elasticity problems. Prerequisite: 057:019. Same as 051:151, 058:150.

053:148 Fatigue/Durability in Design
Macro- and micromechanisms of fatigue, behavior, design of engineering materials/components/structures subjected to cyclic loading, with emphasis on metals; stress-life, strain-life, linear elastic fracture mechanics approach to fatigue crack growth; safe-life, fail-safe, damage tolerant design; constant, variable amplitude life predictions; notches, residual stress, corrosion, temperature, multiaxial, weldments. Prerequisite: 051:085 or 058:055 or 058:150 or equivalent. Same as 058:158.

053:149 Fracture Mechanics
Definition and criteria for failure, yield phenomena, linear elastic fracture mechanics, plane stress and plane strain fracture toughness, J-integral, COD, fatigue, stress, fail-safe, damage tolerant design, corrosion, creep-rupture design. Prerequisite: 051:085 or 058:055 or 058:150 or equivalent. Same as 058:159.

053:162 Design of Transportation Systems
Application of CAD/CAE tools to transportation systems design; review of CAD tools, derivation of standards for geometric design, roadway design software, cross-sectional and longitudinal geometric design of highways, applications to visualization and animation. Prerequisite: 053:063 or graduate standing.
053:163 Traffic Engineering 3 s.h.
Design of traffic control devices; evaluation and analysis of intersections and transportation networks using appropriate computer software.

053:164 Winter Highway Maintenance 3 s.h.
Aspects of winter highway maintenance; current and innovative practices and the theory that underpins them.

053:165 Pavement Analysis and Design 3 s.h.
Fundamental design principles, including pavement analysis and characterization and testing of asphalt and concrete pavement materials. Prerequisite: 053:063.

053:166 Infrastructure Management System 3 s.h.
Aspects of infrastructure management system; development; data collection, analysis methodology, graphic outputs. Prerequisite: 053:063.

053:194 Graduate Seminar: Transportation 0 s.h.
Recent advances and research in transportation engineering. Prerequisite: senior or graduate standing.

053:233 Finite Element II 3 s.h.
Computer implementation, plate and shell elements; mixed and hybrid formulations; nonlinear analysis; recent development; introduction to boundary element method. Prerequisite: 053:133. Same as 058:215.

053:235 Applied Optimal Design 3 s.h.
Optimal design problem formulation; optimality conditions; linear, quadratic, convex, and nonlinear programming; Lagrangian duality; numerical algorithms for unstructured and constrained design problems, design sensitivity analysis, engineering applications. Prerequisites: 053:113 or equivalent, and senior standing.

053:236 Optimization of Structural Systems 3 s.h.
Advanced topics; optimization of structural topology, shape, and material; finite dimensional dynamic response optimization; sensitivity analysis, distributed parameter systems; projects. Prerequisite: 053:235.

053:241 Continuum Mechanics and Elasticity 3 s.h.
Cartesian tensors and geometrical foundations; concept of stress, strain, motion; fundamental physical laws; constitutive equations and finite elasticity; equations of linear elasticity; elastic extension, torsion and bending of bars. Prerequisite: 053:119. Corequisite: 053:113 or graduate standing. Same as 058:279.

053:243 Computational Inelasticity 3 s.h.
Computational techniques and implementations for elastic, hyperelastic, elastoplastic, viscoelastic, and viscoplastic material models; development of sound numerical integration algorithms from rate constitutive equations. Prerequisite: 053:241. Same as 058:251.

053:244 Energy Principles in Structural Mechanics 3 s.h.
Principles of virtual work, stationary and minimum potential energy; calculus of variations; Ritz method, Galerkin’s method; beams and plates; Hamilton’s principle; elastic stability, extremum principle of plasticity. Prerequisites: 053:113 and 053:140. Same as 058:254.

053:245 Micro mechanics of Solids 3 s.h.
Local micromechanics and dislocation inclusion theory; homogenization procedures of heterogeneous materials; effective elastic, visco-elastic, and plastic behavior of composites; micromechanics of other advanced materials; computational micromechanics. Prerequisite: 053:241 or 058:279. Same as 058:270.

053:246 Continuum Mechanics and Plasticity 3 s.h.
Finite strain measures and rate of deformation; principles of isotropy and materials indifference; constitutive equations of elastic and inelastic materials; internal variable theory of thermodynamics; endochronic theory of plasticity. Prerequisite: 053:241 or equivalent. Same as 058:258.

053:247 Advanced Continuum Mechanics 3 s.h.
Same as 058:252.

053:248 Elastic Waves in Solids 3 s.h.
Propagation mechanisms of elastic waves in solids; tools used to detect oil and gas deposits and earthquake activities, study the Earth’s geological structure; test, design, and control structural and mechanical components, diagnose medical phenomena in human body. Prerequisite: 053:132 or 053:140 or 053:241. Same as 051:248, 058:271.

053:249 Multiscale Modeling 3 s.h.
Same as 058:255.

053:250 Advanced Fracture Mechanics 3 s.h.
Same as 058:250.

053:262 Transportation Demand Analysis 3 s.h.
Application of city planning procedures and traffic engineering techniques to solution of transportation problems; travel characteristics, forecasting methods, trip generation, distribution, assignment models. Prerequisite: 226:039. Same as 102:262.

053:263 Application Simulation to Transportation 3 s.h.
Transportation system management and traffic engineering; application of real-time simulation and visualization. Prerequisite: 053:163 or 053:163. Same as 102:263.

053:267 Transportation Network Analysis 3 s.h.
Distribution of trips in a road network; elementary graph theory; optimization; representation of transportation networks; traffic assignment principles; user equilibrium; system optimal; dynamic user equilibrium assignment.

Environmental Engineering and Science

053:050 Natural Environmental Systems 3-4 s.h.
Environmental chemistry and biology of air, water, and soil quality, air and water pollution, limnology, global atmospheric change, fate and transport of pollutants; hazardous substances, risk analysis, standard setting. Prerequisite: 004:011.

053:055 Principles of Environmental Engineering 4 s.h.
Water supply and treatment processes; wastewater treatment processes; processes for air pollution control, groundwater remediation; solid and hazardous waste management. Prerequisites: 053:050 and 053:071, or consent of instructor. Same as 152:162.

053:102 Groundwater 3 s.h.
Groundwater quality and quantity; Darcy’s Law, 2-D flow equation, unsaturated zone, contaminant transport, redox reactions, drinking water quality, bioremediation; laboratories in permeability testing, porosity, media grain size analysis, pump testing, monitoring well installation. Prerequisite: engineering graduate standing.

053:104 Groundwater Modeling 3 s.h.
Principles and equations of groundwater flow and contaminant transport in aquifers; analytical solutions, numerical methods, stochastic approaches, applications of groundwater modeling software. Prerequisites: 22M:020 and 012:166. Same as 012:184.

053:105 Engineering Geology 3 s.h.
Prerequisite: engineering sophomore standing. Same as 012:179.

053:114 Geoscience for Engineers 3 s.h.

053:151 Biological Treatment Processes 3 s.h.
Applied microbiology and fundamental principles of aerobic and anaerobic biological wastewater treatment processes; sludge processing and advanced wastewater treatment and bioremediation; lectures and laboratory. Prerequisites: 053:050, 053:152, and 053:154. Corequisites: 053:055 and 053:156.
Civil and Environmental Engineering

053:152 Environmental Chemistry I 3 s.h.
Principles of general, physical, organic chemistry applied in water and air systems; emphasis on qualitative and quantitative understanding of chemical kinetics and equilibrium, acid-base reactions, complex formation, precipitation, dissolution, and oxidation-reduction reactions; organic nomenclature. Prerequisite: 004:016 or equivalent. Corequisite: 053:152.

053:153 Environmental Chemistry Laboratory 3 s.h.
Laboratory experiments to demonstrate important concepts in environmental chemistry and to familiarize students with procedures used to characterize water and wastewater and evaluate certain treatment processes. Prerequisite: 004:016 or equivalent. Corequisite: 053:152.

053:154 Environmental Microbiology 3 s.h.
Fundamentals of microbiology and microbial ecology with application in water quality and biodegradation of priority pollutants; lectures and laboratory. Corequisite: 053:152.

053:156 Physical-Chemical Process Fundamentals 3 s.h.
Theory of physical and chemical operations and processes in water and wastewater treatment, including fundamental aspects of process dynamics; lectures, laboratory. Prerequisites: 053:050 and 053:152. Corequisite: 053:055.

053:157 Environmental Engineering Design 3 s.h.
Application of physical, chemical, and biological operations and processes to the design of water and wastewater treatment systems; applications in solid and hazardous waste treatment. Prerequisites: 053:050, 053:071, and 053:055.

053:158 Solid and Hazardous Wastes 3 s.h.
Sources, characteristics, collection, disposal of solid and hazardous wastes; environmental impacts of hazardous waste management; resource recovery systems. Same as 175:198. Same as 053:050 or consent of instructor. Same as 053:052.

053:159 Air Pollution Control Technology 3 s.h.
Sources, environmental and health impacts, regulations, modeling of air pollution, processes and alternative strategies for control; global climate considerations. Prerequisite: 053:050 or consent of instructor. Same as 053:052.

053:161 Atmospheric Chemistry and Physics 3 s.h.
Principal chemical and physical processes affecting atmospheric trace gas and pollutant cycles; emphasis on atmospheric photochemistry, aerosol science, major sources and removal processes. Prerequisite: consent of instructor. Same as 052:236.

053:204 Theories of Environmental Policy and Assessment 3 s.h.
Major concerns about environment and human health and basic elements on which legislation has been enacted to deal with these concerns; emphasis on contemporary legislation that has major effects on environmental policy. Prerequisite: 053:050. Same as 152:252, 175:252.

053:225 Environmental Processing of Organic Chemicals 3 s.h.
Environmental organic chemistry, with focus on toxic and persistent organic compounds; bioaccumulation in food webs; chemical diagenesis in air, water, sediment and biotoxins; global/regional transport mechanisms. Prerequisite: 053:152 or 053:252 or consent of instructor.

053:251 Environmental Systems Modeling 3 s.h.
Mathematical modeling of environmental systems, including rivers, lakes, estuaries, treatment systems for conventional and toxic pollutants. Prerequisites: 053:050, 053:055, and 053:152; or consent of instructor.

053:252 Environmental Chemistry II 3 s.h.
Solid-liquid interface problems, heterogenous equilibrium, environmental organic chemistry, modeling chemical equilibrium and kinetics, redox chemistry, atmospheric chemistry. Prerequisite: 053:152.

053:274 Foundations in Bioremediation 3 s.h.
Aerobic degradation mechanisms with focus on the relationship between chemical structure and biochemical reactivity; process optimization through engineered control of the environment; bioremediation case studies emphasizing site characterization, system selection, design, operation, trouble-shooting. Prerequisite: 053:151 or equivalent.

053:275 Perspectives in Biocatalysis 1 s.h.
Applied enzymology; protein design; structure-activity relationships; biosensor technology; microbial transformations; biodegradation of environmental pollutants. Repeatable. Prerequisite: graduate standing. Same as 044:275, 046:275, 052:275, 061:275, 099:275.

Hydraulics, Hydrology, and Water Resources

053:071 Principles of Hydraulics and Hydrology 3 s.h.
Hydraulics of pressure conduits and open channels, dimensional analysis, flow measurements, hydraulic machinery, laboratory. Prerequisite: 057:020.

053:103 Water Quality 3 s.h.
Sources, availability, uses, characteristics, criteria, best management practices for surface waters; protection of waters impaired by eutrophication, soil erosion and sedimentation; pathogenic organisms, habitat destruction, wastewater discharges, contaminated sediments, atmospheric deposition, watershed development, invasive species, irrigation return flows, stormwater discharges, point sources, agricultural runoff; laboratory component, measurement of water quality characteristics in the field.

053:116 Probabilistic Methods in Hydroscience 3 s.h.
Common probabilistic models used in hydrology, hydraulics, and water resources; derived distributions; multivariate models and estimation of model parameters; analysis of data and model building; uncertainty analysis. Prerequisites: 22M:034 and 22S:039.

053:117 Remote Sensing 3 s.h.
Fundamentals of electromagnetic waves, atmospheric radiative transfer, passive remote sensing, weather radar; hydrologic application of remote sensing. Prerequisite: 053:116 or consent of instructor.

053:128 Fluvial Geomorphology 3 s.h.
Hydrological principles; stream channel processes; fluvial geomorphology within the drainage basin system; spatial and temporal variations in water distribution; analysis of hydrological data; flow mechanics, sediment transport; forecasting procedures; hydrograph construction, and modeling. Prerequisite: consent of instructor. Same as 012:138.

053:169 Intermediate Mechanics of Fluids 3 s.h.
Basic concepts and definitions; pressure distribution in a fluid; governing equations and boundary conditions; integral and differential analysis; dimensional analysis and similarity; experimental analysis; laminar and turbulent internal and external flows; potential flows; engineering applications. Prerequisite: 057:020. Same as 058:160.

053:170 Flow in Open Channels 3 s.h.
Energy and momentum principles in open channel flow; uniform flow; gradually varied flow; rapidly varied flow; unsteady flow; flood routing. Prerequisite: 053:071.

053:171 Water Resources Engineering 3 s.h.
Planning and economics of water resources projects; stochastic basis of design; flood control; river navigation works; hydraulic machinery; hydroelectric power systems; classification, functions of hydraulic structures; hydraulic design of spillways, energy dissipators, gates, outlet works; design of canal, other water conveyance structures; design of municipal and industrial outfall structures. Prerequisite: 053:174.

Waves, tides, harbor oscillations; coastal structures, estuary flows; flow transients in pipelines and channels. Prerequisite: 053:169. Same as 058:260.

General review of numerical methods in hydraulics. Flow of an inviscid, incompressible fluid; steady and unsteady, two- and three-dimensional flows, irrotational flows; forces and moments acting on bodies; conformal mapping; method of images; separation of variables; slender body theory; Green's functions and integral equations; numerical methods; inviscid compressible flow; shock waves. Prerequisite: 053:169. Same as 058:260.

Incompressible turbulent flow: mean-flow and Reynolds-stress equations, modeling, solution procedures, and applications; compressible boundary layers. Prerequisite: 053:169. Same as 058:260.

Equations of compressible viscous flow; classical exact analytical and numerical solutions; flow regimes and approximations; laminar boundary layers: equations, solution methods; applications; introduction to stability theory; incompressible turbulent flow: mean-flow and Reynolds-stress equations, modeling, solution procedures, and applications; compressible boundary layers. Prerequisite: 053:169. Same as 058:260.

Graduate Seminars, Advanced Topics, Research

For graduate nonmajors who want to earn credit in undergraduate civil and environmental engineering courses. Prerequisites: nonengineering graduate standing and consent of instructor.

Graduate Seminar: Structures, Mechanics, Materials 0 s.h.
Presentation and discussions of recent advances and research in structures, mechanics, and materials engineering by guest lecturers, faculty. Prerequisite: senior or graduate standing.

Graduate Seminar: Hydraulics, Hydrology, and Water Resources 0 s.h.
Presentation and discussions of recent advances and research in hydraulics, hydrology, and water resources by guest lecturers, faculty. Prerequisite: senior or graduate standing.

Contemporary Topics in Civil and Environmental Engineering 0 s.h.
New topics or areas of study not formally offered in other civil and environmental courses, ice engineering, chaos and strange attractors, remote sensing, nonlinear dynamics of hydrologic processes, advanced water and wastewater treatment processes.
hazardous waste control, global climate change, damage mechanics; based on faculty/student interest. Prerequisite: senior standing.

053:198 Individual Investigations: Civil and Environmental Engineering
Individual projects for civil and environmental engineering graduate students: laboratory study, engineering design project, analysis and simulation of an engineering system, computer software development, research. Prerequisites: graduate standing and consent of faculty adviser.

053:199 Research: Civil and Environmental Engineering M.S. Thesis
Experimental and/or analytical investigation of an approved topic for partial fulfillment of requirements for the M.S. with thesis in civil and environmental engineering. Prerequisites: graduate standing and consent of faculty adviser.

053:299 Research: Civil and Environmental Engineering Ph.D. Dissertation
Experimental and/or analytical investigation of an approved topic for partial fulfillment of requirements for the Ph.D. in civil and environmental engineering. Prerequisite: consent of faculty adviser.
Electrical and Computer Engineering

Chair: Jon G. Kuhl
Professors emeriti: Earl D. Eyman, Adrianus Korpel, Norbert R. Malik
Associate professors: Mark S. Andersland, Gary Christensen
Assistant professors: Zhiqiang Liu, Daniel Thedens, Xiaodong Wu

Undergraduate Program

The department offers the Bachelor of Science in Engineering in electrical engineering. The program’s objective is to produce graduates who:

• contribute to society in a broad range of careers;
• function professionally in an increasingly international and rapidly changing world;
• effectively understand, use, and develop modern electrical and computer engineering technologies and concepts; and
• achieve success throughout their careers.

Bachelor of Science in Engineering

The College of Engineering undergraduate curricula changed fall semester 2002. Students who entered the college fall semester 2002 or later must complete the requirements described below. Students who entered the college before fall 2002 may complete the old requirements (described in pre-2002 editions of the Catalog, existing program curriculum sheets, and degree evaluation forms), with possible course substitutions. Or they may complete the new requirements, under conditions defined by each program and available from the college’s Student Development Center.

The electrical engineering curriculum provides technical depth and breadth as well as flexibility and the opportunity for students to customize their programs according to their own goals. Students complete a common core of electrical and computer engineering courses, then select one of three tracks. The electrical engineering track provides a broad background in electrical engineering concepts and practice, preparing students for careers in a wide range of industries and organizations. The computer engineering track provides focus and depth for students preparing for careers or graduate study in computer systems hardware or software engineering. The information engineering track prepares students for careers or advanced study in telecommunications or information technology.
The B.S.E. in electrical engineering requires a minimum of 128 s.h. The curriculum covers four major stems: mathematics and basic sciences, engineering topics, elective focus area, and general education (15 s.h. of humanities and social science courses). All students take 059:005 Engineering Problem Solving I-II and 010:003 Accelerated Rhetoric. General education component courses must be selected to satisfy the requirements of the College of Engineering. See “Curriculum Stems” and “General Education Component” under “Bachelor of Science in Engineering” in the College of Engineering section of the Catalog.

Elective focus area courses must be selected according to guidelines established by the Department of Electrical and Computer Engineering. See “Elective Focus Area” after the following curriculum list.

Electrical engineering students take five required track courses and two track electives. See “Track Breadth and Depth Electives” after the following curriculum list.

Some courses in the curriculum are prerequisites to others. Students who take courses in the order below satisfy the prerequisite requirements automatically. Students who do not follow this sequence still must satisfy all course prerequisites.

**FIRST YEAR**

**First Semester**
004:011 Principles of Chemistry I 4 s.h.  
010:003 Accelerated Rhetoric (or 010:001-010:002) 4 s.h.  
22M:031 Engineering Mathematics I: Single Variable Calculus 4 s.h.  
055:090 Electrical Engineering Orientation Seminar 0 s.h.  
059:005 Engineering Problem Solving I 3 s.h.

**Second Semester**
22M:032 Engineering Mathematics II: Multivariable Calculus 4 s.h.  
22M:033 Engineering Mathematics III: Matrix Algebra 2 s.h.  
029:081 Introductory Physics I 4 s.h.  
059:006 Engineering Problem Solving II 3 s.h.  
General education component course 3 s.h.

**SECOND YEAR**

**First Semester**
22M:034 Engineering Mathematics IV: Differential Equations 3 s.h.  
029:082 Introductory Physics II 3-4 s.h.  
059:007 Engineering Fundamentals I: Statics 2 s.h.  
059:008 Engineering Fundamentals II: Electrical Circuits 3 s.h.  
059:009 Engineering Fundamentals III: Thermodynamics 3 s.h.

**Second Semester**
22M:037 Engineering Mathematics V: Vector Calculus 3 s.h.  
055:040 Linear Systems I 3 s.h.  
057:017 Computers in Engineering 3 s.h.  
057:018 Principles of Electronic Instrumentation 4 s.h.  
General education component course 3 s.h.

**THIRD YEAR**

**First Semester**
22S:039 Probability and Statistics for the Engineering and Physical Sciences 3 s.h.  
055:032 Introduction to Digital Design 3 s.h.  
055:070 Electromagnetic Theory 3 s.h.  
055:091 Professional Seminar: Electrical Engineering 0 s.h.  
Two required track courses 6 s.h.

**Second Semester**
Three required track courses 9 s.h.  
Two elective focus area courses 6 s.h.  
General education component course 3 s.h.

**FOURTH YEAR**

**First Semester**
055:088 Principles of Electrical Engineering Design 3 s.h.  
Track breadth elective 3 s.h.  
Three elective focus area courses 9 s.h.  
General education component course 3 s.h.

**Second Semester**
055:089 Senior Electrical Engineering Design 3 s.h.  
Track depth elective 3 s.h.  
Two elective focus area courses 6 s.h.  
General education component course 3 s.h.

**Required Track Courses**

Each electrical engineering curriculum track requires five track courses, as follows.

**Computer Engineering Track**
22C:019 Discrete Structures 3 s.h.  
22C:031 Algorithms 3 s.h.  
055:033 Introduction to Software Design 3 s.h.
### Electrical Engineering Track
- 055:041 Electronic Circuits 4 s.h.
- 055:043 Linear Systems II 3 s.h.
- 055:050 Communication Systems 3 s.h.
- 055:060 Control Systems 3 s.h.
- 055:072 Electrical Engineering Materials and Devices 3 s.h.

### Information Engineering Track
- 055:043 Linear Systems II 3 s.h.
- 055:046 Digital Signal Processing 3 s.h.
- 055:050 Communication Systems 3 s.h.
- 055:051 Randomness and Information 3 s.h.
- 055:054 Communication Networks 3 s.h.

### Track Breadth and Depth Electives

Students choose one track breadth elective from the courses required for one of the other two tracks.

Students also choose one track depth elective, which must be an advanced course in a subject area within the student’s track—normally a 100-level course for which one of the required track courses is a prerequisite. For a complete list of depth electives for each track, see the Department of Electrical and Computer Engineering web site.

### Elective Focus Area

The elective focus area provides access to the broad range of course work in the department, the college, and the University. Each student works with his or her academic adviser to develop an elective focus area tailored to his or her own goals—for example, additional technical depth in one or more areas of electrical engineering, completion of a minor in a relevant area, completion of the Certificate in Technological Entrepreneurship, or pursuit of interdisciplinary experience.

The elective focus area must include at least 15 s.h. of technical course work, at least 6 s.h. of which must be earned in 100-level electrical and computer engineering courses. Students earning a minor in business or a Certificate in Technical Entrepreneurship may apply up to 6 s.h. of the required technical course work to the minor or certificate. All students must demonstrate an ability to work on multidisciplinary teams.

All elective focus area plans must be approved in advance by the department.

For more detailed information about elective focus areas, see “Bachelor of Science in Engineering”/“Elective Focus Area” in the College of Engineering section of the Catalog. For more information about the department’s elective focus area guidelines, see the Department of Electrical and Computer Engineering web site.

### Graduate Programs

The Department of Electrical and Computer Engineering offers the Master of Science and Doctor of Philosophy, and an M.S. subtrack in software engineering. Excellence in scholarship and research is stimulated by close contact with the faculty throughout graduate study and through programs tailored to fit individual needs.

Students select an adviser and, with the adviser, plan an individual program bounded only by the broad guidelines of the Graduate College and the program. The department maintains close interdisciplinary ties with other University of Iowa departments, especially with the Departments of Physics and Astronomy, Computer Science, Mechanical and Industrial Engineering, and Biomedical Engineering, and the Carver College of Medicine. Principal areas of graduate study include waves and materials, computer systems, wireless communications, signal and image processing, computational genomics, and control systems and robotics.

### Research and Study Areas

#### WAVES AND MATERIALS

Research in this area is carried out primarily in the Iowa Advanced Technology Laboratories, a well-equipped, modern facility two blocks from the Engineering Building, and in Van Allen Hall. Current research topics are optical and electronic properties of semiconductors, semiconductor devices, electro-optics, nonlinear optics, nonlinear wave propagation in plasmas, nanotechnology, and medical devices.

Much work is done in collaboration with other University of Iowa departments, including the Departments of Physics and Astronomy, Chemistry, Internal Medicine, and Neurosurgery. Facilities include two molecular beam epitaxy reactors (in physics and astronomy), a microfabrication laboratory with micrometer resolution capabilities, electrical characterization capability to 22 GHz, several Ti-sapphire lasers, a mid-infrared optical parametric oscillator, and
plasma equipment for nonlinear wave plasma interaction studies.

Examples of current projects are the design and fabrication of diode lasers based on the bandgap engineering of antimony and arsenic-based III-V compound semiconductors, phase control of laser arrays, development of an all-optical power equalizer, characterization of quantum well devices, nonlinear waveguide devices, development of a noncontact method to measure transport properties, plasma and optical soliton excitation and propagation, development of cellular probes, and a noninvasive glucose sensor for medical research.

**COMPUTER SYSTEMS AND VLSI CIRCUITS**

Research emphasis is directed toward design and test of very-large-scale integrated (VLSI) circuits, high-performance computing and networking, and intelligent agent systems. Research in the VLSI area involves development of techniques and algorithms that assist in synthesis and testing of large-scale logic circuits, and incorporation of these techniques into computer-aided design tools. Current projects include new pattern sources for built-in-test, efficient test pattern generation, generation of compact test sets, and methods for reducing test data volumes.

High-performance computing research involves development of collaborative and parallel computing environments and associated software tools, and use of these facilities and tools in varied application domains, including image processing and computational biology. Current work in networking focuses on protocols and layer-integration schemes that support high-performance wireless networking, and on control and coordination of mobile ad hoc networks. Current research facilities in these areas include several large cluster computers and an experimental asynchronous transfer mode (ATM) network.

Agent technologies research is directed toward development of autonomous software and robotic agents capable of engaging in distributed collaborations that support varied application domains. Current work focuses on development of methods to reconcile diverse agent ontologies and application of agent technologies to medically related problems, including collaborative classification of macular degeneration characteristics and computer engineering education.

Departmental facilities that support this work include a network of SUN, HP, SGI, and Linux workstations, and high-speed network connections to collegiate, University, and national facilities, including an NSF-funded, dedicated ATM network of high-performance workstations, the college’s Computer Systems Support (CSS), the University's Information Technology Services, national supercomputer centers, federal laboratories, and facilities at other universities.

**BIOINFORMATICS AND COMPUTATIONAL GENOMICS**

The Coordinated Lab for Computational Genomics (CLCG) is a collaborative effort of the Department of Electrical and Computer Engineering and the Carver College of Medicine. The laboratory’s joint research projects include clustering and cDNA/EST sequencing, web-based tools for genetic linkage analysis, gene discovery and mapping, microarray hybridization, gene expression, and high-throughput genotyping. This lab is recognized worldwide for its contribution to the Human Genome Project.

The CLCG’s computational infrastructure consists of more than 126 computing systems, 178 CPUs, 100+ gigabytes of RAM, and 2.5 terabytes of disk space. The laboratory has four separate dedicated server clusters of 36, 32, 18, and 8 CPUs running Linux operating systems. This includes four dedicated, dual fiber channel, redundant disk storage systems (RAID) of 412 GB usable. CLCG is wired for 10- and 100-megabit Ethernet networking.

**SIGNAL AND IMAGE PROCESSING**

Research in image processing and basic and applied signal processing is supported by a digital signal processing laboratory and an image analysis laboratory. Collaborative research with faculty in the Departments of Radiology, Neurology, Psychiatry, Internal Medicine, and Biomedical Engineering is directed at quantitative analysis of medical images.

In the area of signal processing, current projects include analysis and design of efficient adaptive algorithms for signal processing, efficient coding and transmission of speech, speech processing aids for the hearing-impaired, robust equalization of uncertain channels, application of neural networks to communications systems, multirate signal processing, and subband coding and channel equalization.

Current projects in image processing include automated detection of vessel borders and coronary trees in angiograms using artificial intelligence techniques, detection and tracking of cardiac motion from magnetic resonance images, analysis of cardiac motion patterns, automated analysis of intravascular ultrasound images, semantic approaches to segmentation of three-dimensional brain images based on genetic
optimization algorithms, knowledge-based techniques for identification of pulmonary airway trees from CT images, and three-dimensional segmentation techniques for quantification of lung disease.

Additional projects include medical image registration using deformable shape models; modeling normal versus abnormal anatomical shape as imaged via MRI, CT, and PET; tracking growth and regression of cancer tumors before and after treatment; 3-D measurement and visualization of normal and abnormal infant skull shape; development of parallel algorithms to reduce computation time; and novel sampling and reconstruction techniques for magnetic resonance imaging acquisitions.

The E.C.E. Medical Image Analysis Laboratory is a specialized facility for digital image processing equipped with state-of-the-art equipment. It is equipped with two Silicon Graphic Onyx, three Alpha Linux, and 15 high-end dual-CPU Windows XP and Linux computers with 4 GB of RAM each. High-quality I/O devices for image digitization and visualization are available. High-capacity computer storage disk arrays offer more than 900 GB online hard disk space.

CONTROL SYSTEMS AND ROBOTICS

Current research emphasizes optimal, adaptive, digital, robust and stochastic control and the control of discrete event dynamical systems. Recent work has concerned the estimation, identification, and robust control of linear and nonlinear dynamical systems; set membership identification, control over wireless communication channels; coordinated fault tolerant control of unmanned vehicles; use of control theory to analyze distributed computing, communications, and manufacturing systems; interplay between communications and control; design of fast digital controllers using subband coding; and multirate control systems.

WIRELESS COMMUNICATIONS SYSTEMS

Current research activities in communication systems focus on design and analysis of receivers for digital wireless communications, especially on the development of effective and practical receivers for multi-user wireless cellular systems in multipath channels. Projects include the removal of intersymbol interference by blind identification/equalization, multi-user detection in CDMA without power control, receiver structures for 3G wireless cellular systems, ad hoc wireless networks, space time coding; resource allocation in OFDM systems; and scheduling in wireless networks. Fundamental theoretical issues and practical implementation are emphasized.

Master of Science

The M.S. in electrical and computer engineering is offered with and without thesis; either option may precede Ph.D. study. The thesis option requires 30 s.h. of graduate course work, including at least 12 s.h. from an approved list of electrical and computer engineering courses and 6 s.h. in 055:199 Research: Electrical and Computer Engineering M.S. Thesis. The nonthesis option requires 36 s.h. of graduate course work, including at least 18 s.h. from an approved list of electrical and computer engineering courses; nonthesis students may count no more than 3 s.h. of Independent study toward the degree. Courses required for the B.S.E. in electrical engineering do not count toward the M.S. requirements.

M.S. students must successfully complete a final examination, which is conducted by a committee of at least three faculty members. One part of the final examination for thesis students consists of an oral defense of the thesis. In order to graduate, M.S. students must have a cumulative g.p.a. of at least 3.00.

M.S. Subtrack in Software Engineering

An M.S. subtrack in software engineering is available to both thesis and nonthesis students. Successful completion of the subtrack results in the designation “with specialization in software engineering” on the student’s transcript.

The thesis subtrack requires a minimum of 30 s.h.; the nonthesis option requires 36 s.h. Both options require the following course work.

All of these:
- 055:180 Fundamentals of Software Engineering 3 s.h.
- 055:181 Formal Methods in Software Engineering 3 s.h.
- 055:182 Software Engineering Languages and Tools 3 s.h.
- 055:183 Software Engineering Project 3 s.h.

At least three of these:
- 22C:162 Advanced Operating Systems 3 s.h.
- 055:131 Introduction to VLSI Design 3 s.h.
- 055:132 High Performance Computer Architecture 3 s.h.
- 055:133 Graph Algorithms and Combinatorial Optimization 3 s.h.
- 055:134 Computer Communications 3 s.h.
The thesis option requires an additional 3 s.h. of course work from the approved list of electrical and computer engineering courses; the nonthesis option requires an additional 6 s.h. All rules for additional credit and the M.S. final examination are the same as for the nonthesis M.S.

Doctor of Philosophy

The Ph.D. in electrical and computer engineering requires at least 72 s.h. of graduate credit. At least 45 s.h. must be earned in formal course work (not thesis or other independent study), including 30 s.h. from an approved list of electrical and computer engineering courses. Each Ph.D. student’s study plan must be approved by the student’s adviser and by the graduate committee.

Ph.D. students take a Ph.D. qualifying examination and a Ph.D. comprehensive examination. Then they must successfully complete a research program that includes a minimum of 18 s.h. of Ph.D. research and culminates in the preparation of a thesis. Finally, the candidate must present a successful oral defense of the thesis.

Ph.D. students must maintain a cumulative g.p.a. of 3.25 or higher in all graduate course work. Acceptance to the Ph.D. program requires successful completion of the Ph.D. qualifying examination. This all-day written exam is given once a year, late in the spring semester. It covers four areas chosen by the student from a list of six. Students normally are expected to take the qualifying examination within the first 30 s.h. of graduate studies. A cumulative g.p.a. of at least 3.25 is required for admittance to the exam. In the event of failure, the examination may be retaken only once, the next time it is offered.

Following successful completion of the Ph.D. qualifying examination and invitation to the Ph.D. program, a student must complete a three-part Ph.D. comprehensive examination that consists of a take-home exam set by the student’s adviser and Ph.D. committee, preparation of a written thesis proposal, and an oral exam that includes presentation and defense of the proposal. A minimum of six months must separate completion of the first and last portions of the comprehensive examination. The final requirement for completion of the Ph.D. program is the preparation and successful defense of the Ph.D. thesis. This must be completed no sooner than six months but no longer than three years after completion of the comprehensive examination.

Admission

Applicants must meet the admission requirements of the Graduate College; for detailed information about Graduate College policies, see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

M.S. applicants must have a g.p.a. of at least 3.00, and Ph.D. applicants must have a g.p.a. of at least 3.25, on all electrical and computer engineering, mathematics, and physics course work. M.S. applicants with a g.p.a. between 2.75 and 3.00 in electrical and computer engineering, mathematics, and physics course work may be admitted on probation, if warranted by other aspects of their academic records.

Students with baccalaureate degrees in related areas (e.g., physics, mathematics, and computer science) may be admitted on conditional status. They may be required to complete additional course work, without earning graduate credit, before being granted regular status.

Each application is reviewed individually. Extenuating circumstances may permit deviations from the usual standards.

Financial Support

A number of fellowships, traineeships, assistantships, scholarships, and industrial grants are available to graduate students who qualify. These are awarded on a competitive basis.

Special Facilities and Laboratories

Undergraduate Core

Electrical and computer engineering provides core instruction for the college in electrical circuits, electronics, instrumentation, and computers. A key part of this core teaching responsibility lies in providing students with an early opportunity to use engineering laboratory instrumentation.

Undergraduate Laboratories

The undergraduate laboratories include facilities for the study of electrical and electronic circuits, signals and systems, microprocessor-based
computers and systems, measurement automation, communication systems, control systems, computer-aided design of VLSI circuits, image processing, robotics, and optics.

An electronic classroom devoted to image acquisition, processing, transmission, and analysis is the newest addition to the list of state-of-the-art facilities available for undergraduate and graduate education. It is equipped with high-end Hewlett Packard UNIX workstations. Class material is taught in a collaborative learning environment in which students participate during lectures, acquiring practical hands-on experience.

**Graduate Facilities and Laboratories**

The department has laboratories intended primarily for graduate research in the areas of parallel processing, image processing, CAD for VLSI circuits, software engineering, electro-optics, plasma physics, control systems, cardiovascular image processing, and wireless communication. A network of SUN, IBM, and HP workstations and server nodes provides departmental computing support. This network is tied to the College of Engineering facilities, which consist of more than 100 Hewlett-Packard workstations. Connections are provided to central University facilities and national networks. Through cooperative arrangements, advanced computing facilities at national supercomputing centers, federal laboratories, and other universities are available for graduate research.

**Courses**

**Special Topics**

055:000 Cooperative Education Training Assignment: Electrical Engineering 0 s.h.
Electrical engineering students participating in the Cooperative Education Program register in this course during work assignment periods; registration provides a record of participation in the program on the student’s permanent record. Prerequisites: admission to Cooperative Education Program and consent of cooperative faculty adviser.

055:088 Principles of Electrical Engineering Design 3 s.h.
Design problems requiring integration of subject matter from other required electrical and computer engineering courses. Prerequisite: senior standing.

055:089 Senior Electrical Engineering Design 3 s.h.
Individual or team project; demonstration of completed project and formal engineering report. Prerequisite: senior standing. Corequisite: 055:088.

055:090 Electrical Engineering Orientation Seminar 0 s.h.
Introduction to the electrical and computer engineering curriculum and profession; ethics and professionalism in the classroom and workplace. Prerequisite: first-year or transfer standing.

055:091 Professional Seminar: Electrical Engineering 0 s.h.
Professional aspects of electrical engineering presented through lectures and discussions by guest speakers, field trips, films, panel discussions. Repeatable. Prerequisite: junior standing.

055:098 Individual Investigations: Electrical Engineering 0 s.h.
Individual projects for electrical engineering undergraduate students; laboratory study, engineering design project, analysis and simulation of an engineering system, computer software development, research. Prerequisite: consent of supervising faculty adviser.

**Digital Systems, Computers, Software Engineering**

055:032 Introduction to Digital Design 3 s.h.
Modern design and analysis of digital switching circuits; combinational logic; sequential circuits and system controllers; interfacing and busing techniques; design methodologies using medium- and large-scale integrated circuits; lab arranged. Prerequisite: sophomore standing.

055:033 Introduction to Software Design 3 s.h.
Design of software for engineering systems; algorithm design and structured programming, data structures, introduction to object-oriented programming in JAVA; applications to engineering problems; lab arranged. Prerequisite: 055:017.

055:035 Computer Architecture and Organization 3 s.h.
Basic concepts; computer evolution, register transfer level design, simulation techniques, instruction sets (CISC and RISC), assembly language programming, ALU design, arithmetic algorithms and realization of arithmetic functions, hardwired and microprogrammed control, memory hierarchies, virtual memory, cache memory, interrupts and DMA, input/output; introduction to high-performance techniques, pipelining, multiprocessing; introduction to hardware description languages (Verilog, VHDL); student design and simulate a simple processor. Offered fall semesters. Prerequisites: 055:032 and 055:017.

055:036 Embedded Systems and Systems Software 3 s.h.
Microprocessors and microcontrollers as components in engineering systems; embedded system design processes; microcontroller/microprocessor architecture; interrupts and traps; memory and device interfacing; low-level and high-level software design for embedded systems; examples of embedded system architecture and design, fundamentals of operating systems; tasks and processes; context switching and scheduling; memory and file management, interprocess communication; device drivers. Prerequisite: 055:035.

055:121 Introduction to Bioinformatics 4 s.h.
Same as 002:199, 051:121.

055:122 Computational Genomics 3 s.h.

055:130 Switching Theory 3 s.h.
Switching algebra, combinational circuits—hazards, minimization, multiple-output networks; sequential circuits—critical races, essential hazards, fundamental-mode, pulse-mode, synchronous circuits-state assignment, state reduction, input-output experiments. Prerequisite: 055:032.

055:131 Introduction to VLSI Design 3 s.h.
MOS devices and circuits; MOS transistor theory, MOS processing technologies, MOS device models; timing and power considerations; performance issues; scaling; various logic schemes; circuit techniques; clocking strategies, I/O structures, design styles; ASIC design, MOS subsystem design, system case studies, use of electronic design automation tools, introduction to hardware description languages, design synthesis, design projects; lab. Prerequisites: 055:032 and 055:041.
055:132 High Performance Computer Architecture 3 s.h.
Problems involved in designing and analyzing current machine architectures using hardware description language (HDL) simulation and analysis, hierarchical memory design, pipeline processing, vector machines, numerical applications, multiprocessor architectures and parallel algorithm design techniques; evaluation methods to determine relationship between computer design and design goals. Prerequisites: 22C:112 or 22C:113 or 055:032, and 055:035. Same as 22C:160.

055:133 Graph Algorithms and Combinatorial Optimization 3 s.h.
Combinatorial optimization problems; time complexity, graph theory and algorithms; combinatorial optimization algorithms; complexity theory and NP-completeness; approximation algorithms; greedy algorithms and matroids. Prerequisite: 055:033 or equivalent.

055:134 Computer Communications 3 s.h.
Computer networks, ISO model, network topology, communication of digital data, data link control; errors and error control; point-to-point networks; broadcast networks, local network architecture; transport services; wireless networking, internetworking, user services. Prerequisites: 225:039 or 225:120, and senior standing in electrical and computer engineering or computer science. Same as 22C:168.

055:137 Digital Signal Processor Based Systems 3 s.h.
Design of digital signal processor-based engineering systems; architecture of digital signal processor; cross-development environments; assembly, high-level language programming; interfacing with external devices, systems; man/machine interfacing; priority interrupts; applications in image display, signal processing, control systems. Prerequisite: 057:017.

055:138 Testing Digital Logic Circuits 3 s.h.
Logic models for faults; fault detection in combinational and sequential circuits; fault-diagnosis; design for testability; random testing, compressed data testing, built-in testing. Prerequisite: 055:032.

055:185 Autonomous Agents and Multiagent Systems 3 s.h.
Principles and architectures of autonomous agents and multiagent systems; distributed computing platforms and programming; knowledge representation and reasoning subroutines; agent communication language design, planning, coordination, adaptation, and learning in a multiagent system. Prerequisites: 055:033 and 057:017.

055:230 Advanced Logic Synthesis 3 s.h.
Synthesis of multiple output circuits; finite state machines; algebraic factoring, testability preserving transformations; design verification; high-level synthesis. Prerequisites: 055:130 and 055:131, or consent of instructor.

Signal Processing

055:040 Linear Systems I 3 s.h.
Introduction to continuous and discrete time signals and systems with emphasis on Fourier analysis; examples of signals and systems; notion of state and finite state machines; causality, linearity and time invariance; periodicity, Fourier transforms; frequency response; convolution; IIR and FIR filters, continuous and discrete Fourier transforms; sampling and reconstruction; stability. Prerequisites: 22M:033 and 22M:034.

055:041 Electronic Circuits 4 s.h.
Design and analysis of FET and BJT amplifiers, low, midrange, high-frequency analysis; difference amplifiers; feedback amplifiers; SPICE simulation; power amplifiers; digital logic families. Prerequisites: 055:040 and 057:018.

055:043 Linear Systems II 3 s.h.
Continuation of 055:040, emphasis on Laplace and Z-transform analysis; unilateral and bilateral Laplace transform; region of convergence; stability; block diagram algebra; feedback and feedforward systems. Prerequisite: 055:040.

055:046 Digital Signal Processing 3 s.h.
Theory and techniques used in representation, analysis, and design of discrete-time signals, system concepts in frequency and sampling domains; discrete-time processing of continuous-time signals; FIR and IIR digital filter theory, design and realization techniques; theory and application of Fourier transforms. Prerequisite: 055:043.

055:131, or consent of instructor.

055:144 Digital Integrated Electronics 3 s.h.
Principles of operation of digital integrated circuits; logic families, use of four-state transistor models; sources of propagation delay; advanced design concepts; SPICE modeling; digital logic families. Prerequisite: 055:041.

055:145 Pattern Recognition 3 s.h.
Mathematical foundations and practical techniques of pattern recognition, adaptation, learning, description, statistical pattern recognition, syntactic pattern recognition, neural networks for recognition; fuzzy logic for recognition; nonstandard and combined pattern recognition approaches. Prerequisite: 055:040.

055:146 Digital Signal Processing 3 s.h.
Theory, techniques used in representing discrete-time signals; system concepts in frequency and sampling domains; FIR and IIR digital filter theory, design and realization techniques; theory, application of discrete Fourier transforms/FFT. Prerequisite: 055:046.

055:148 Digital Image Processing 3 s.h.
Mathematical foundations and practical techniques for digital manipulation of images; image sampling, compression,
055:050 Electromagnetic Theory 3 s.h.
Fundamental concepts of linear feedback control, mathematical modeling, transfer functions, system response, feedback effects, stability, root locus and frequency response analysis and design, compensation, lab arranged. Prerequisite: 055:040.

055:160 Control Theory 3 s.h.
State space approach; controllability, observability, canonical forms; design of Luenberger observers; feedback control via pole placement; stability, minimal realization; advanced topics. Prerequisite: 055:060. Same as 058:133.

055:163 Random Processes: Control and Communication 3 s.h.
Probability, vector random variables, expectations and transformations; random sequences and limit theorems; discrete and continuous random processes; Poisson and multivariate Gaussian processes, Markov chains; spectral analysis, estimation, reliability, other applications. Prerequisites: 055:050 and 055:051.

055:164 Computer-Based Control Systems 3 s.h.
Discrete and digital control systems; application of computers in control; sampling theorem; discrete time system models; analysis and design of discrete time systems; control design by state variable and input/output methods; advanced topics in digital controls; lab. Prerequisite: 055:060. Same as 058:134.

Waves and Materials

055:070 Electromagnetic Theory 3 s.h.
Electric and magnetic forces, Maxwell’s equations, wave propagation, applications, including radiation, transmission lines, circuit theory. Prerequisites: 22M:037 and 029:082.

055:072 Electrical Engineering Materials and Devices 3 s.h.
Fundamentals of semiconductor physics and devices; principles of the p-n junction diode, bipolar transistor, field effect transistor. Prerequisite: 055:070.

055:170 Advanced Electromagnetic Theory 3 s.h.
Time varying fields; plane wave propagation, reflection, refraction, waves in anisotropic media transmission lines, impedance matching, Smith chart; metallic and dielectric wave guides; resonator, antennas, antenna arrays. Prerequisite: 055:070.

055:172 Solid State Physical Electronics 3 s.h.
Semiconductor physics, semiconducting devices; elementary quantum mechanics, statistics, transport; bipolar, MOS transistors; physics of device operation as it relates to circuit design. Prerequisites: 029:083 and 055:072.

055:173 Introductory Solid State Physics 3 s.h.
Phenomena associated with solid state; classification of solids and crystal structures, electronic and vibrational properties in solids; thermal, optical, magnetic, dielectric properties of solids. Same as 029:193.

055:177 Electromagnetic Foundations of Optics 3 s.h.
Same as 029:180.

055:178 Optical Signal Processing 3 s.h.
Linear systems description of optical propagation; diffraction and angular plane wave spectrum; lenses as Fourier transformers, lens configurations as generalized optical processes; lasers, coherence, spatial frequency analysis, holography, correlators, correlation, matched filters; synthetic aperture radar; optical computing. Prerequisite: 055:070. Same as 029:184.

055:179 Electro-Optics 3 s.h.
Wave equation solutions; optical bifringence; finite beam propagation in free space, dielectric waveguides and fibers; optical resonant; nonlinear phenomena; electro-optic, acousto-optic
modulation; optical detection, noise; application to communication systems. Prerequisite: 055:070. Same as 029:182.

055:272 Quantum Electronics 3 s.h.

055:273 Semiconductor Physics 3 s.h.
Same as 029:229.

055:274 Laser Principles 3 s.h.
Laser theory, stimulated emission, dispersion theory, broadening mechanisms, rate equations, gain saturation, optical resonators, mode-locking, Q-switching techniques, survey of laser types, modes of operation. Prerequisite: 055:170 or equivalent. Same as 029:224.

055:276 Nonlinear Optics 3 s.h.
Primarily classical treatment of second- and third-order optical nonlinearities; phase matching, harmonic generation, three and four wave mixing, self-focusing, self-phase modulation, stimulated scattering of light, applications. Prerequisite: 055:170. Same as 029:222.

Graduate Seminars, Advanced Topics, Research

055:191 Graduate Seminar: Electrical and Computer Engineering 0 s.h.
Presentation and discussion of recent advances and research in electrical and computer engineering by guest lecturers, faculty, students. Prerequisite: graduate standing.

055:195 Contemporary Topics in Electrical and Computer Engineering arr.
New topics or areas of study not offered in other electrical and computer engineering courses; based on faculty/student interest; not available for individual study. Prerequisite: senior standing.

Individual projects for electrical and computer engineering graduate students; laboratory study, engineering design project, analysis and simulation of an engineering system, computer software development, research. Prerequisites: graduate standing and consent of faculty adviser.

Experimental and/or analytical investigation of approved topic for partial fulfillment of requirements for M.S. degree with thesis in electrical and computer engineering. Prerequisites: graduate standing and consent of faculty adviser.

Discussion of current research. Prerequisite: consent of instructor. Same as 029:261.

055:295 Advanced Topics in Electrical and Computer Engineering arr.
Discussion of current literature in electrical and computer engineering. Prerequisite: consent of instructor.

Experimental and/or analytical investigation of approved topic for partial fulfillment of requirements for Ph.D. in electrical and computer engineering. Prerequisite: consent of faculty adviser.
Mechanical and Industrial Engineering

Chair: Jeffrey S. Marshall
Professors: Kurt M. Anstreicher, Jaskir S. Arora, Christoph Beckermann, P. Barry Butler, Krishnan B. Chandran, Lea-Der Chen, Kyung K. Choi, Warren G. Darling, Raymond P.S. Han, Andrew Kusiak, Jeffrey S. Marshall, Peter O’Grady, Joon B. Park, Virendra C. Patel, Matthew Rizzo, Ralph I. Stephens, Frederick Stern
Associate professors: John D. Lee, Ching-Long Lin, Sharii Rahman, Thomas Schnell, Geb W. Thomas, H.S. Udaykumar
Assistant professors: Linda N. Boyle, Yong Chen, Nagi Gebraiel, Pavlo Krokhmal, Jia Lu, Albert Rainer, Shaoping Xiao
Undergraduate degree: B.S.E. in Industrial Engineering, Mechanical Engineering
Graduate degrees: M.S., Ph.D. in Industrial Engineering, Mechanical Engineering
Web site: http://www.mie.engineering.uiowa.edu/

The Department of Mechanical and Industrial Engineering was established in 2001 when the former industrial engineering and mechanical engineering departments joined together. The department offers distinct undergraduate and graduate degrees and research programs in industrial engineering and in mechanical engineering.

Industrial Engineering

Industrial engineering is concerned with analysis, design, and implementation of systems through optimal use of resources—human, material, energy, information, and financial. Systems may range from small units to extremely large operations. In order to accomplish these activities, the industrial engineer must be skilled in mathematics, physical sciences, management, and human relations as well as manufacturing, computer systems, economics, optimization, human behaviors, and systems analysis and design.

Industrial engineers have many opportunities for employment and service in industrial, government, research, and public service organizations. Employment opportunities are among the most varied in the engineering field. Industrial engineers hold positions as advisers to management or may participate directly in management decisions. Representative job titles include industrial engineer, manufacturing engineer, systems analyst, quality specialist, operations research analyst, internal consultant, human factors specialist, supervisor, and manager. While most industrial engineers are employed by manufacturing firms, others work in government agencies or service organizations such as airlines, banks, hospitals, and consulting companies.

Mechanical Engineering

Mechanical engineering is broadly concerned with energy, manufacturing, and design of machines. Mechanical engineers conceive, plan, design, and direct the manufacture, distribution, and operation of a wide variety of devices, machines, and systems—including complex human-machine systems—for energy conversion, environmental control, materials processing, transportation, materials handling, and other purposes. Major subspecialties of mechanical engineering include thermal-fluids engineering and mechanical systems engineering.

Thermal-fluid phenomena occur in many engineering systems and devices, such as aircraft; automobiles; off-road vehicles; ships; gas turbines; heat exchangers; material processes; heating, ventilating, air-conditioning, and refrigerating systems; hydraulic turbines; airbag inflators; fuel cells; environmental control devices; and biomedical systems. Mechanical systems and machines are the foundations of human technology. Examples are found in manufacturing equipment, medical equipment, automobiles, tractors, aircraft, ships, home appliances, packaging machinery, and robots.

Mechanical engineers find a wide variety of career opportunities in industry, government, and education. Mechanical engineers form an integral part of most industries, including aerospace firms, energy-generation utilities, automobile manufacturers, health care providers, food- and metal-processing industries, petroleum refineries, electronic and computer manufacturers, heavy construction and vehicle manufacturers, thermal comfort equipment firms, and farm equipment firms.
Undergraduate Programs

The department offers the Bachelor of Science in Engineering in industrial engineering, and the Bachelor of Science in Engineering in mechanical engineering.

Industrial Engineering

The objective of the B.S.E. program in industrial engineering is to produce graduates who:

• have a strong foundation of mathematical, scientific, and technical knowledge and are equipped with skills in problem solving, teamwork, and communication that will serve them throughout their careers;
• are able to pursue successful careers as practicing industrial engineers in manufacturing industries, medical institutions, and engineering consulting firms;
• are able to successfully pursue advanced studies in industrial engineering; in other engineering disciplines; or in diverse nontechnical fields such as medicine, law, or business; and
• are able to assume professional leadership roles.

Mechanical Engineering

The objective of the B.S.E. program in mechanical engineering is to produce graduates who:

• have a strong foundation of knowledge in mathematics, science, and mechanical engineering and are equipped with skills in problem solving, design, teamwork, and communication that will serve them throughout their careers;
• are able to pursue successful careers as practicing mechanical engineers in manufacturing industries, energy and utility companies, and engineering consulting firms;
• are able to successfully pursue advanced studies in mechanical engineering; in related technical areas such as physics, applied mathematics, and other engineering disciplines; and in other professional fields; and
• are able to assume professional leadership roles.

B.S.E. in Industrial Engineering

The College of Engineering undergraduate curricula changed fall semester 2002. Students who entered the college fall semester 2002 or later must complete the requirements described below. Students who entered the college before fall 2002 may complete the old requirements (described in pre-2002 editions of the Catalog, existing program curriculum sheets, and degree evaluation forms), with possible course substitutions. Or they may complete the new requirements, under conditions defined by each program and available from the college’s Student Development Center.

The undergraduate program in industrial engineering requires a strong foundation of courses in engineering science, mathematics, design, manufacturing, social science, and humanities. Advanced work includes specialty courses in manufacturing operations and industrial robotics, human factors/ergonomics, management, economics and information systems, concurrent engineering, production, quality control, and operations research. Design is an integral part of the undergraduate program; all students complete a comprehensive design experience.

The B.S.E. in industrial engineering requires a minimum of 128 s.h. The curriculum covers four major stems: mathematics and basic sciences, engineering topics, elective focus area, and general education (15 s.h. of humanities and social science courses). All students take 059:005-059:006 Engineering Problem Solving I-II and 010:003 Accelerated Rhetoric. General education component courses must be selected to satisfy the requirements of the College of Engineering. See “Curriculum Stems” and “General Education Component” under “Bachelor of Science in Engineering” in the College of Engineering section of the Catalog.

Elective focus area courses must be selected according to guidelines established by the Department of Mechanical and Industrial Engineering. See “Elective Focus Area” after the following curriculum list.

Some courses in the curriculum are prerequisites to others. Students who take courses in the order below satisfy the prerequisite requirements automatically. Students who do not follow this sequence still must satisfy all course prerequisites.
FIRST YEAR

First Semester
004:011 Principles of Chemistry I 4 s.h.
010:003 Accelerated Rhetoric 4 s.h.
22M:031 Engineering Mathematics I: Single Variable Calculus 4 s.h.
059:005 Engineering Problem Solving I 3 s.h.
059:090 First-Year Engineering Seminar 0 s.h.

Second Semester
22M:032 Engineering Mathematics II: Multivariable Calculus 4 s.h.
22M:033 Engineering Mathematics III: Matrix Algebra 2 s.h.
029:081 Introductory Physics I 4 s.h.
059:006 Engineering Problem Solving II 3 s.h.
General education component course 3 s.h.

SECOND YEAR

First Semester
22M:034 Engineering Mathematics IV: Differential Equations 3 s.h.
029:082 Introductory Physics II 3 s.h.
031:001 Elementary Psychology 3 s.h.
056:020 Industrial Engineering Sophomore Seminar 0 s.h.
059:007 Engineering Fundamentals I: Statics 2 s.h.
059:008 Engineering Fundamentals II: Electrical Circuits 3 s.h.
059:009 Engineering Fundamentals III: Thermodynamics 3 s.h.

Second Semester
22S:039 Probability and Statistics for the Engineering and Physical Sciences 3 s.h.
056:020 Industrial Engineering Sophomore Seminar 0 s.h.
056:054 Engineering Economy 3 s.h.
057:015 Materials Science 3 s.h.
057:017 Computers in Engineering 3 s.h.
Elective focus area course 3 s.h.

THIRD YEAR

First Semester
056:032 Design for Manufacturing 3 s.h.
056:144 Human Factors 3 s.h.
056:171 Operations Research 4 s.h.
Elective focus area course 3 s.h.
General education component course (100 level) 3 s.h.

Second Semester
22S:030 Statistical Methods and Computing 3 s.h.

FOURTH YEAR

First Semester
056:091 Professional Seminar: Industrial Engineering 0 s.h.
056:131 Manufacturing Systems 3 s.h.
056:147 Ergonomics 3 s.h.
056:150 Information Systems Design 3 s.h.
056:178 Digital Systems Simulation 3 s.h.
General education component course (100 level) 3 s.h.

Second Semester
056:160 Operational Systems Design 4 s.h.
Elective focus area courses (including math/science elective) 12 s.h.

Elective Focus Area

The industrial engineering program offers a variety of elective focus area options, including standard focus areas developed and maintained by the program and flexible focus areas tailored to individual student interests. For more detailed information about elective focus areas, see “Bachelor of Science in Engineering”/“Elective Focus Area” in the College of Engineering section of the Catalog. For a list of standard industrial engineering elective focus area options and guidelines for tailored elective focus areas, see the Department of Mechanical and Industrial Engineering web site.

Combined B.S.E./M.S.

Qualified industrial engineering undergraduate students who plan to earn a master's degree in industrial engineering may enroll in the program's combined Bachelor of Science in Engineering/Master of Science program, which enables students to complete the master's degree in two or three semesters after completing the bachelor's degree. Students enter the program after the junior year and are allowed to take up to 12 s.h. of courses for graduate credit. Of these, up to 6 s.h. of 100- or 200-level courses can be counted toward both the B.S.E. and the M.S., with approval of the student's graduate adviser.
To be admitted to the program, students must have completed at least 80 s.h., must have a cumulative g.p.a. of at least 3.25, and must submit a letter of application to the chair of the Department of Mechanical and Industrial Engineering.

B.S.E. in Mechanical Engineering

The College of Engineering undergraduate curricula changed fall semester 2002. Students who entered the college fall semester 2002 or later must complete the requirements described below. Students who entered the college before fall 2002 may complete the old requirements (described in pre-2002 editions of the Catalog, existing program curriculum sheets, and degree evaluation forms), with possible course substitutions. Or they may complete the new requirements, under conditions defined by each program and available from the college’s Student Development Center.

Mechanical engineering students acquire a foundation in the basic disciplines of mathematics, physics, and chemistry and in the engineering sciences of statics, dynamics, thermodynamics, mechanics of deformable bodies, mechanics of fluids and transfer processes, materials science, and electrical sciences. An understanding of these sciences enables mechanical engineers to design parts of systems and understand whole systems, plan the production and use of energy, plan and operate industrial manufacturing facilities, and design automatic control systems for machines and other mechanical systems. Students also gain an appreciation of social and humanistic issues relating to business, environment, government, history, language, religion, and international relations.

The B.S.E. in mechanical engineering requires a minimum of 128 s.h. The curriculum covers four major stems: mathematics and basic sciences, engineering topics, elective focus area, and general education (15 s.h. of humanities and social science courses). All students take 059:005-059:006 Engineering Problem Solving I-II and 010:003 Accelerated Rhetoric. General education component courses must be selected to satisfy the requirements of the College of Engineering. See “Curriculum Stems” and “General Education Component” under “Bachelor of Science in Engineering” in the College of Engineering section of the Catalog.

Elective focus area courses must be selected according to guidelines established by the Department of Mechanical and Industrial Engineering. See “Elective Focus Area” after the following curriculum list.

Upper-level students work on team projects in a senior capstone design course, 058:086 Mechanical Engineering Design Project. Participation in established research projects may be arranged.

Some courses in the curriculum are prerequisites to others. Students who take courses in the order below satisfy the prerequisite requirements automatically. Students who do not follow this sequence still must satisfy all course prerequisites.

**FIRST YEAR**

**First Semester**

- 004:011 Principles of Chemistry I 4 s.h.
- 010:003 Accelerated Rhetoric 4 s.h.
- 059:005 Engineering Problem Solving I 3 s.h.
- 059:090 First-Year Engineering Seminar 0 s.h.

**Second Semester**

- 22M:032 Engineering Mathematics II: Multivariable Calculus 4 s.h.
- 029:081 Introductory Physics I 4 s.h.
- 059:006 Engineering Problem Solving II 3 s.h.
- General education component course 3 s.h.

**SECOND YEAR**

**First Semester**

- 029:082 Introductory Physics II 3 s.h.
- 058:020 Mechanical Engineering Sophomore Seminar 0 s.h.
- 059:007 Engineering Fundamentals I: Statics 2 s.h.
- 059:008 Engineering Fundamentals II: Electrical Circuits 3 s.h.
- 059:009 Engineering Fundamentals III: Thermodynamics 3 s.h.
- General education component course 3 s.h.

**Second Semester**

- 057:010 Dynamics 3 s.h.
- 057:015 Materials Science 3 s.h.
- 057:019 Mechanics of Deformable Bodies 3 s.h.
- 058:032 Design for Manufacturing 3 s.h.
- Elective focus area course 3 s.h.
THIRD YEAR

First Semester
22M:037 Engineering Mathematics V: Vector Calculus 3 s.h.
22S:039 Probability and Statistics for the Engineering and Physical Sciences 3 s.h.
057:018 Principles of Electronic Instrumentation 4 s.h.
057:020 Fluid Mechanics 4 s.h.
058:091 Professional Seminar: Mechanical Engineering 0 s.h.
Elective focus area course 3 s.h.

Second Semester
058:040 Thermodynamics II 3 s.h.
058:045 Heat Transfer 3 s.h.
058:052 Mechanical Systems 3 s.h.
Elective focus area course 3 s.h.
General education component course 3 s.h.

FOURTH YEAR

First Semester
058:048 Energy Systems Design 4 s.h.
058:055 Mechanical Systems Design 4 s.h.
058:091 Professional Seminar: Mechanical Engineering 0 s.h.
Elective focus area courses 6 s.h.
General education component course (100 level) 3 s.h.

Second Semester
058:080 Experimental Engineering 4 s.h.
058:086 Mechanical Engineering Design Project 3 s.h.
Elective focus area courses 6 s.h.
General education component course (100 level) 3 s.h.

Elective Focus Area
The mechanical engineering program offers a variety of elective focus area options, including standard focus areas developed and maintained by the program and flexible focus areas tailored to individual student interests. For more detailed information about elective focus areas, see “Bachelor of Science in Engineering”/“Elective Focus Area” in the College of Engineering section of the Catalog. For a list of standard mechanical engineering elective focus area options and guidelines for tailored elective focus areas, see the Department of Mechanical and Industrial Engineering web site.

Combined B.S.E./M.S.
Qualified mechanical engineering undergraduate students who plan to earn a master's degree in mechanical engineering may enroll in the program's combined Bachelor of Science in Engineering/Master of Science program, which enables students to complete the master's degree in two or three semesters after completing the bachelor's degree. Students enter the program after the junior year and are allowed to take up to 12 s.h. of courses for graduate credit. Of these, up to 6 s.h. of 100- or 200-level courses can be counted toward both the B.S.E. and the M.S., with approval of the student's graduate adviser.

To be admitted to the program, students must have completed at least 80 s.h., must have a cumulative g.p.a. of at least 3.25, and must submit a letter of application to the chair of the Department of Mechanical and Industrial Engineering.

Graduate Programs
The Department of Mechanical and Industrial Engineering offers the Master of Science and the Doctor of Philosophy in industrial engineering and in mechanical engineering.

Research and Study in Industrial Engineering
Graduate study in industrial engineering is tailored individually. Each student's study program is based on his or her background and career objectives and is designed according to sound academic practice. The curriculum is highly flexible; the goal is academic excellence.

The program offers six principal academic focus areas: design and manufacturing, human factors engineering/ergonomics, engineering management, quality and production control, operations research and applied statistics, and information systems. Graduate students participate in research in their academic concentration areas.

MANUFACTURING
Ongoing manufacturing research consists of flexible manufacturing systems, optimum control of processes, and reliability assessment. Manufacturing courses, denoted by the 30 series, delve into selecting appropriate manufacturing methods, planning processing operations, devising control strategies, and designing products and manufacturing systems.

Contemporary topics in computer-aided process
planning, computer-aided design, computer-controlled manufacturing, concurrent engineering, and applications of artificial intelligence in manufacturing are covered.

**HUMAN FACTORS/ERGONOMICS**

Current research in human factors/ergonomics consists of investigating the effects of visual and auditory displays on human information processing, and developing computer systems that ease the challenges of controlling complex medical and robotic systems. This work examines how engineers should shape emerging information technology so that it enhances productivity, safety, and customer satisfaction. Industrial engineering faculty and students work on remote robot systems for Mars and the Chernobyl nuclear reactor and use the National Advanced Driving Simulator, the most advanced simulation facility in the world. Planned projects include designing and building medical simulators, applying wearable computer technologies to information systems, and examining drivers' response to in-vehicle computers.

Human factors/ergonomics studies concentrate on designing systems compatible with human capabilities and limitations. Human factors engineering integrates components from the fields of psychology, cognitive sciences, physiology, statistics, and technical sciences to address issues of human-interface design and human-systems design. Specific considerations include human cognitive abilities and limitations, visual performance, error reduction, workload assessment and mitigation, design of jobs in the industrial environment, information acquisition and processing, choice of action, operator performance measurement, and economic concerns. This area is covered by courses in the 40 series.

**ENGINEERING MANAGEMENT**

Current research in engineering management consists of entrepreneurship, parametric cash flow analysis, strategic management, and economic risk analysis. Engineering management studies concentrate on engineering administration, engineering economics, and information systems. This area is covered by courses in the 50 series.

**QUALITY AND PRODUCTION CONTROL**

Current research in quality and production control focuses on measures for corporate quality, computer-aided layout and scheduling, just-in-time production, inspection, and online expert systems in process control. The quality and production control studies consist of facilities design, quality assurance, and production control. This area is covered by courses in the 60 series.

**OPERATIONS RESEARCH AND APPLIED STATISTICS**

Ongoing research in operations research and applied statistics deals with the application of information technology for informed decision making in the public and private sectors. The primary focus of this work is modeling, simulating, and optimizing the design and operation of systems such as logistics, communications, health care, and manufacturing. Studies in operations research and applied statistics concentrate on mathematical, statistical, and computer sciences for modeling, analyzing, and optimizing systems. Various methodologies in this area include mathematical programming, heuristic optimization, statistical analysis, and digital systems simulation. This area is covered by courses in the 70 series.

**INFORMATION SYSTEMS**

Studies in information systems concentrate on system design. Design problems involve devising information systems that meet a diverse set of requirements. Contemporary topics include network-based systems, client/server systems, internet systems, and medical informatics.

**Research and Study in Mechanical Engineering**

The graduate programs in mechanical engineering educate students in more depth and breadth than is possible at the baccalaureate level. This prepares the graduate to use contemporary methods at advanced levels in professional careers in engineering design, development, teaching, and research. Each student's plan of study is based on his or her background and career objectives, and is designed according to sound academic practice. Faculty members in the program have teaching and research expertise in energy conversion, fluid and thermal sciences, solid mechanics, mechanical systems, and related areas.

Students may develop programs emphasizing fluid mechanics, thermodynamics, heat transfer, fatigue and fracture mechanics, and mechanical systems. Some may pursue more general programs that combine emphases. Others may specialize in interdisciplinary areas (e.g., energy conversion, materials engineering, automatic control, chemical processes), which involve a combination of departmental courses and
appropriate electives from other departments of the College of Engineering and the University. Ph.D. programs may center on any one of these areas through choice of appropriate course work and research topic.

For more information, see the Mechanical Engineering Graduate Student Handbook, available from the department.

The mechanical engineering program offers the following research and study areas.

**FLUID MECHANICS**

The graduate program in fluid mechanics provides the student with a rigorous and broad foundation in theoretical, numerical, and experimental aspects of the subject. It is especially suitable for those seeking careers in teaching and/or research in academic and industrial organizations. The program focuses on elucidation of fundamental principles and techniques of solving problems in the various fields of fluids engineering. Computer use, both in mathematical modeling of flow phenomena and in acquisition and processing of experimental data, is emphasized.

Although most of the relevant courses are offered by the Department of Mechanical and Industrial Engineering, students are strongly encouraged to take applied mathematics and classical mechanics courses offered by the Departments of Mathematics and Physics and Astronomy in the College of Liberal Arts and Sciences and by other College of Engineering departments.

Current research projects include computational modeling of viscous and turbulent flows; vortex dynamics; unsteady flows; environmental flows; flow separation and control; biofluid dynamics; atmospheric flows; ship hydrodynamics; thin liquid films; viscous flow around ships; propulsor flow and propulsor-body interactions; free-surface effects; nonlinear wave theory; hydraulic turbines; quantitative flow visualization and image processing; computational fluid dynamics; LDV and thermal anemometry for flow analysis; and uncertainty analysis.

**THERMAL SCIENCES**

The graduate program in thermal sciences and systems is designed to provide students with a rigorous and broad foundation in theoretical and experimental aspects of the subject. It prepares future graduates for careers in industry, teaching, and government. The program emphasizes fundamental principles, computational techniques, and experimentation used to analyze and design mechanical systems. Areas of concentration include fluid mechanics, thermodynamics, heat transfer, phase-change, combustion, and chemically reactive flows.

Most courses relevant to the specialization areas are offered by the Department of Mechanical and Industrial Engineering. Students are encouraged to supplement these with courses from other areas, such as mathematics and physics, and courses offered by other College of Engineering departments in order to balance their programs.

Current research projects include analytical, numerical, and experimental investigations of convective and radiative heat transfer in absorbing and scattering media; laminar and turbulent heat transfer; turbulent combustion; combustion of biomaterials; natural convection; spray atomization and combustion; microgravity diffusion flames; transport modeling of fuel cells; transport phenomena in materials processing, melting, and solidification; optimal control of thermal systems; and flow visualization of complex convection processes.

**MECHANICAL SYSTEMS**

The graduate program in mechanical systems is designed to provide students with a broad, strong background in theoretical, computational, experimental, and applied aspects of the subject. It prepares future graduates for careers in industry, teaching, and government. The program emphasizes fundamental principles, computational techniques, and experimentation used to analyze and design mechanical systems. Areas of concentration include machine and vehicle dynamics, operator-in-the-loop simulation, optimal design, structural optimization, computational solid mechanics, probabilistic mechanics and reliability, reliability-based design and optimization, and fatigue and fracture mechanics.

Although most courses relevant to the specialization areas are offered by the Department of Mechanical and Industrial Engineering, students are encouraged to consider appropriate courses from other areas, such as mathematics, statistics, physics, and other College of Engineering departments.

Current research projects include design sensitivity analysis of rigid and flexible mechanical systems; computer-aided design; mechanism and manipulator workspace analysis; real-time dynamic simulation; vehicle system dynamics; finite element and meshfree methods for nonlinear mechanics, multiphysics, and multiple-scale problems; stochastic meshfree and finite element methods; design sensitivity analysis
of nonlinear structural systems; reliability-based design optimization; shape optimal design of elastoplastic materials; optimal design of metal stamping process; multibody dynamics; probabilistic and elastic-plastic fracture mechanics; damage-tolerant design; and fatigue behavior and life prediction under constant and variable amplitude loading.

M.S. in Industrial Engineering

The Master of Science is offered with and without thesis. Students who intend to pursue a Ph.D. should select the thesis option; those who hold research or teaching assistantships normally are required to select the thesis option.

The M.S. with thesis requires a minimum of 30 s.h. of 100- or 200-level courses, including a maximum of 6 s.h. of research. Students in the thesis option must take at least one course from each of three focus areas: human factors, operations research production systems, and manufacturing systems. At least 9 s.h. must be earned in 200-level courses. M.S. thesis applicants who wish to pursue a Ph.D. at The University of Iowa may wish to select two 200-level courses in each of the focus areas to complete the Ph.D. breadth requirement before entering the Ph.D. program.

The M.S. without thesis requires a minimum of 36 s.h. of course work at the 100 level or above, including at least 9 s.h. of industrial engineering course work at either the 200 level or at the 100 level with the designation “advanced” in the course title.

All M.S. students must earn two-thirds of the required semester hours for the degree in the industrial engineering program. To be eligible for the M.S., students are required to maintain a g.p.a. of 3.00 on all graduate course work at The University of Iowa.

M.S. students must have strong verbal and written skills in English. They also should have strong background in their intended program area; those with insufficient background must take course work beyond the minimum M.S. requirements.

Entering students in all M.S. program areas must have background in computer programming, e.g., Java, C++, C, Pascal, or FORTRAN, probability, statistics, and mathematics equivalent to that required by accredited undergraduate engineering programs. Engineering management and human factors students find psychology and engineering economics to be useful preparation.

Compensatory course work may be required for students with nonengineering backgrounds.

During that semester, the student and the adviser prepare a study plan, which they submit to the program chair for approval. Once the plan is approved, it is filed with the student’s record. It is the student’s responsibility to assure that a study plan is submitted to the program chair.

M.S. students must pass a final comprehensive examination, as specified by the student’s examination committee, which consists of at least three Graduate College faculty members and must be approved by the department chair.

The comprehensive examination may consist of both oral and written parts. Its purpose is to assess the adequacy of the student’s defense of thesis and/or course preparation. The final study plan, approved by the department chair and the Graduate College dean, is prerequisite to the exam.

It is the student’s responsibility to submit a degree application to the Graduate College by the college’s deadline. The student should consult with his or her adviser on the composition of the advisory/examination committee and the time and place for the exam.

Ph.D. in Industrial Engineering

The Ph.D. in industrial engineering requires a minimum of 72 s.h. It is granted upon demonstration of comprehensive knowledge and scholarly work at the highest level.

The degree requires broad background as well as considerable depth in at least one area of specialization. Ph.D. students must complete a series of written and oral examinations and a written dissertation based upon the results of original investigation. They also must spend at least two semesters in residence at The University of Iowa.

Students must satisfy the requirements for the M.S. in industrial engineering before they may be admitted to the Ph.D. program. A maximum of 36 s.h. earned toward the M.S. may be counted toward the 72 s.h. required for the Ph.D.
Requirements for each student’s study plan are specified by the student’s advisory committee. There is no foreign language or special research technique requirement. Admission to degree candidacy requires a g.p.a. of at least 3.25 on all graduate work taken at The University of Iowa, demonstration of capacity for individual achievement, and successful completion of the comprehensive examination.

Entering students are advised by the department chair or by a designated faculty adviser. During the first regular semester of the student’s residence, an adviser is assigned by the department chair or the graduate program coordinator.

During that semester, the student and his or her adviser prepare a study plan, which they submit to the department chair for approval. Once the plan is approved, it is filed with the student’s record. It is the student’s responsibility to assure that a study plan is submitted to the program chair.

Upon completing the course work specified by the adviser and advisory committee, the student is admitted to the comprehensive examination, which includes both written and oral components. Part of the exam usually includes presentation of the dissertation proposal, so that the advisory committee can evaluate the student's academic preparation in light of the research to be performed. Upon satisfactorily completing the comprehensive exam, the student is accepted as a candidate for the Ph.D. and begins work on the dissertation.

**INDUSTRIAL ENGINEERING BREADTH REQUIREMENT**

Each Ph.D. student must pass at least two 200-level industrial engineering courses in each of three focus areas: human factors, operations research production systems, and manufacturing systems. Students who have earned an M.S. in the program may already have satisfied this requirement.

**QUALIFYING EXAM**

Each student must satisfy the qualifying exam requirement in two of the three focus areas. The requirement for each focus area can be satisfied by passing a written qualifying exam in the focus area or by earning a grade of A or higher in each of two 200-level industrial engineering courses in the focus area.

**FOCUS AREA STUDY**

Students take at least two more 200-level industrial engineering courses in one of the three focus areas.

**COMPREHENSIVE EXAMINATION**

Each student must demonstrate his or her ability to carry out creative individual research by completing and defending his or her dissertation research proposal in a comprehensive examination. The exam is conducted by a committee of industrial engineering and Graduate College faculty members. It is scheduled only after the qualifying examination requirement has been satisfied. The examining committee determines whether the student is ready to begin dissertation research. Once the student has completed the comprehensive examination satisfactorily, he or she is accepted as a candidate for the Ph.D. and begins work on the dissertation.

**FINAL EXAMINATION (THESIS DEFENSE)**

Each student must defend his or her completed dissertation in the final examination, which is conducted by the examining committee.

**Health Informatics Certificate**

Graduate students in industrial engineering may elect to earn the Certificate in Health Informatics. The certificate program is an interdisciplinary collaboration among the health sciences, engineering, computer science, information science, management science, and statistics. Students in the program are trained to analyze health care data, evaluate information and knowledge, and study health care research, education, and practice. Certificate students complete a minimum of 20 s.h., including 056:186 and 056:287 Health Informatics I-II and approved electives.

The certificate may be earned in conjunction with the M.S. or Ph.D., or as postgraduate study. Completion of the Certificate in Health Informatics is noted on the student’s transcript.

**M.S. in Mechanical Engineering**

The M.S. in mechanical engineering requires a minimum of 30 s.h. and is offered with and without thesis. Thesis students may count 6-9 s.h. earned for thesis research and writing toward the degree. Each student determines a study plan in consultation with an adviser and
submits the plan to the department chair for approval.

All M.S. students must register for 058:191 Graduate Seminar: Mechanical Engineering each semester.

To earn the M.S., the student must maintain a g.p.a. of at least 3.00 on graduate work used to satisfy the degree requirements and must be successful in the final examination. This examination is administered by the student’s committee, which consists of at least three faculty members, including at least one with primary appointment in the Department of Mechanical and Industrial Engineering.

The requirements for the M.S. may be completed within one calendar year. However, students with assistantship duties or other constraints may take up to two calendar years to complete the degree.

**Ph.D. in Mechanical Engineering**

The Ph.D. in mechanical engineering requires 72 s.h. beyond the baccalaureate, including at least 54 s.h. in course work (excluding thesis research) and at least 12 s.h. earned for Ph.D. thesis research. Students must pass the qualifying examination administered by the program to be formally admitted to the doctoral program.

Each student takes the comprehensive examination after passing the qualifying examination and when the course work specified in the study plan is nearly completed; in any case, the comprehensive examination should be taken no later than 28 months after the first registration in the Ph.D. program. To be admitted to the comprehensive examination, a student must be in good academic standing and must be recommended by his or her adviser. The exam is administered by the student’s committee. Admission to Ph.D. candidacy is recognized upon successful completion of the comprehensive examination.

Having satisfactorily completed the exam, the student usually has only to complete and defend the dissertation at the final examination.

Requirements for the Ph.D. usually can be completed in three to four years beyond the M.S.

**Admission**

Applicants must meet the admission requirements of the Graduate College; for detailed information about Graduate College policies, see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

**Industrial Engineering**

Reference letters, student research interests, grade-point average for previous graduate study, and factors such as faculty availability are considered in admission decisions.

M.S. applicants may be admitted from an ABET-accredited baccalaureate curriculum in any engineering discipline, or in the mathematical sciences, the physical sciences, or the computer sciences with a g.p.a. of at least 3.00 and an acceptable score on the Graduate Record Examination (GRE) General Test. Applicants from institutions outside the United States must meet equivalent conditions for regular admission. Students with lesser qualifications may be considered for conditional admission.

Students from business or social science programs who have mathematical preparation similar to that of engineering students are considered for regular or conditional admission. Students on conditional status must achieve regular status within two sessions of their first registration by attaining an acceptable grade-point average and gaining regular acceptance by the industrial engineering program faculty; otherwise, they are dismissed. Admissions may be limited by available resources.

Ph.D. applicants may be admitted from an ABET-accredited baccalaureate curriculum or a postbaccalaureate curriculum in any engineering discipline or in the mathematical sciences, computer science, or physical sciences with a g.p.a. of at least 3.25 and an acceptable GRE General Test score. Applicants from outside the United States must meet equivalent standards for regular admission as determined by The University of Iowa. Students also may be admitted from business or social science programs as determined individually.

Applicants who intend to pursue a Ph.D. and who have a B.S. or an M.S. without thesis usually are admitted first to the M.S. program. All admissions to the Ph.D. program are reviewed by the graduate studies committee.

**Mechanical Engineering**

Applicants who have earned a baccalaureate or master’s degree in engineering curriculum or in the mathematical or physical sciences are eligible to be considered for admission to graduate study in mechanical engineering. In order to be considered for regular admission, applicants must...
have a g.p.a. of at least 3.00 on all previous college-level work and Graduate Record Examination (GRE) General Test scores of at least 500 verbal, 750 quantitative, and 4.5 analytical writing. Students whose first language is not English must score at least 550 (paper-based) or at least 213 (computer-based) on the Test of English as a Foreign language (TOEFL).

Applicants with a lower grade-point average and/or GRE or TOEFL test scores may be considered for conditional admission, under exceptional circumstances. Applicants admitted conditionally must achieve regular standing within one semester (excluding summer sessions) after admission by attaining a g.p.a. of at least 3.00 on their first 9 s.h. at The University of Iowa. The Graduate College cancels registration for the subsequent semester for students who have not submitted their GRE and/or TOEFL scores by the end of the first semester after admission.

Financial Support

Industrial Engineering

A number of one-quarter-time and one-half-time graduate student teaching and research assistantships are available. Awards are based on students’ academic records and assessment of their potential contribution to the research and teaching goals of the program. Advanced graduate students also may qualify for appointments as graduate teaching fellows. Contact the chair of the Department of Mechanical and Industrial Engineering for details.

Mechanical Engineering

Financial support is available to M.S. and Ph.D. students, primarily through teaching and research assistantships from the Department of Mechanical and Industrial Engineering, the Center for Computer-Aided Design, IIHR—Hydroscience and Engineering, and the National Advanced Driving Simulator. These awards may be made on a semester, academic year, or calendar year basis. Awards and reappointments are competitive and are based on the student’s potential contribution to the teaching and research goals of the department. Students who fulfill their assistantship responsibilities and continue to make satisfactory progress toward their degree objective receive preference in new assistantship awards. All applications for financial support should be submitted directly to the department chair.

M.S. students with a one-quarter-time or more appointment are required to register for a minimum of 9 s.h. during fall and spring semesters until they have completed 30 s.h. of course and research work beyond the baccalaureate degree. Ph.D. students with one-quarter-time or more appointments must register for a minimum of 9 s.h. during fall and spring semesters until they have completed 90 s.h. of course and research work beyond the baccalaureate degree. Once they meet these minimums, graduate students must register for a minimum of 2 s.h. Students with appointments must register during summer sessions. All registrations should accurately reflect the amount and type of work undertaken, the use of University facilities, and the amount of consultation with the faculty.

Special Facilities and Laboratories

Industrial Engineering: Undergraduate and Graduate Facilities

For information about laboratories affiliated with core courses coordinated by other College of Engineering departments, see the departments’ Catalog sections.

ACTIVE LEARNING FACILITY

The Active Learning Facility (ALF) uses a project-oriented, team-based, hands-on approach to education. The facility provides NT servers, personal computers, and remote plug-ins for students’ laptops. It also offers a variety of software for project management, presentations, and data analysis and reporting.

ADVANCED SYSTEM LABORATORY

The Advanced Systems Laboratory houses research on development and implementation of computational algorithms for the optimization of complex systems.

COGNITIVE SYSTEMS LABORATORY

The Cognitive Systems Laboratory is devoted to examining the safety, performance, and user acceptance implications of technology insertion into complex systems. The laboratory has networked computers, a video editing workstation, a process control simulation, and a low-cost driving simulator. The simulator is equipped with five cameras, instrumentation to record all driver activity, and an eye tracking facility.
system. The Cognitive Systems Laboratory shares the driving simulator and an instrumented vehicle with the Operator Performance Laboratory. The equipment supports class projects, system development, and undergraduate and graduate research.

ESPIRIT LAB

The ESPIRIT (Engineering Science Preparation and Introductory Training) Lab is the home of an accelerated educational program that selects a small group of engineering students during their first year and nurtures them throughout their study at Iowa. ESPIRIT introduces young engineers to the world of the engineering laboratory, teaches the practical and technical skills that most often prove useful in the lab, and helps students develop the research habits of self-reliance and self-discipline. The program also promotes effective teamwork, journaling, and technical writing. ESPIRIT emphasizes open-ended program solving, analytic skills, and scientific rigor, preparing students to address significant, challenging problems throughout their careers.

GROK LABORATORY

The GROK Laboratory develops computer software and mechanical devices to improve human performance with complex tasks. The laboratory has developed technologies used by NASA to control robots exploring South America and Mars. It also designs and develops microsurgery and dental simulators to train new surgeons and dentists.

OPERATOR PERFORMANCE LABORATORY

Research in the Operator Performance Laboratory (OPL) focuses on determining human performance in a variety of situations, with particular emphasis on driving and flight deck environments. Much of the research is performed in the field using a state-of-the-art instrumented vehicle that is equipped with five cameras, eye movement equipment, two computers, video equipment, and a suite of sensors. The OPL also features a scale Boeing 737-400 fixed-base flight simulator with six channels of visuals. The flight simulator is equipped with a remote eye-tracking device that allows the activation of selected virtual controls in the flight deck. A specially designed stimulus presentation booth is used for color research and for photometry applications. Computer models of operator performance are designed based on the data obtained in the laboratory and field research.

E-COMMERCE LABORATORY

The E-Commerce Laboratory provides a facility for advanced research on Internet technologies and educational programs in key Internet subjects. The laboratory contains the full facilities necessary for a strong Internet capability, including Windows NT workstations, PCs and Macs, UNIX workstations, Internet server software for each platform, Java, VRML, JavaScript, ActiveX and VBScript programming facilities, videoconferencing cameras and group collaboration software, CAD systems software, and database systems.

Activities at the E-Commerce Laboratory include working with companies to improve their use of the Internet; providing assistance in advanced uses of the World Wide Web; providing seminars and workshops to improve Internet education; and carrying out research in key Internet technologies.

Research is under way in a number of key areas, including videoconferencing using the Internet; rapid product development through Internet links with suppliers and customers; virtual reality over the Internet; use of remote databases to access corporate data; use of the Internet to support team-based activities; security of Internet-based activities; and CAD file viewing and manipulation through the World Wide Web.

COMPUTER NUMERICAL CONTROL MACHINING LABORATORY

The Computer Numerical Control (CNC) Machining Laboratory gives undergraduate and graduate students hands-on experience in programming and operating a CNC lathe, a CNC milling machine, and a coordinate measuring machine. CNC programs can be developed through the machine control keyboard or downloaded via RS232C data link from the college’s network. Research on the machinability of metals for cutting tool and machining parameters is conducted in the lab. A machine vision system is used to evaluate tool wear patterns.

ADVANCED WELDING LABORATORY

The Advanced Welding Laboratory provides improved facilities and automated equipment for automated arc welding. Gas metal arc welding (GMAW or MIG) systems are used in undergraduate courses to demonstrate process control issues, and in research to investigate process relationships and process control algorithms during high-speed welding. Two full-size Yaskawa Motoman SV3 seven-axis welding robot systems are used for
demonstrations, for the investigation of the weld process variable control, and for off-line programming.

The laboratory also includes four Scorbot III and one Scorbot V small-scale material handling robots, various sensing devices, microcomputers of various types, precision controller devices, programmable controllers, and actuation devices.

INTELLIGENT SYSTEMS LABORATORY

The Intelligent Systems Laboratory provides facilities for research in computational intelligence leading to applications in industry, service organizations, and health care. Research in the laboratory is funded by government agencies and industrial corporations. Solutions to practical problems and enhancement of engineering education are emphasized. Most of the laboratory’s recent projects concentrate on development of software tools for product development, manufacturing, and health care applications.

The Intelligent Systems Laboratory is furnished with the latest computer technology to support research on numerous computing platforms. Diverse software is available for modeling, design, and construction of intelligent systems—for example, data mining software, neural networks, expert systems, and simulation software.

Mechanical Engineering: Graduate Facilities

FLUID MECHANICS

The program in fluid mechanics is conducted in close collaboration with IIHR—Hydroscience & Engineering. The equipment available to graduate students includes several wind tunnels and hydraulic flumes, an environmental flow facility, a towing tank, two special low-temperature flow facilities for investigation of ice phenomena, hot-wire and laser anemometer systems, particle-image velocimetry systems, and computer-based data acquisition systems.

Facilities available in the department include a flow visualization and imaging system with CCD (charge-coupled devices) camera, and a low-speed wind tunnel. IIHR and College of Engineering shops provide the necessary support. In addition to using in-house workstations and computers, the department’s faculty members and students make extensive use of supercomputers at national centers.

THERMAL SCIENCES

Facilities for research in the thermal sciences and systems consist of a low-pressure combustion chamber, a high-pressure chamber for atomization study, a test rig for heat transfer to near supercritical fluids, a diffusion flame test rig, an enclosed laminar flame test rig, a 20-liter explosion vessel, an airbag inflator test rig, an air atomization spray apparatus, test stands for melting and solidification studies, various optical measurement systems, and two commercial direct digital control systems. Laser-based diagnostics (e.g., laser-induced fluorescence, imaging, and laser Doppler anemometry) are available for solidification, turbulent flow, heat transfer, and combustion studies. Flow visualization and imaging by CCD camera are available for the study of complex fluid motion and heat convection, and combustion flows.
MECHANICAL SYSTEMS

Experimental facilities for the department’s fatigue and fracture mechanics study include access to a scanning electron microscope, a field computer data acquisition system, state-of-the-art computer controlled servo-hydraulic closed-loop fatigue test equipment, and equipment for characterization of material properties. Conventional strength of materials test equipment also is available.

Computer-based simulation research activities in the mechanical systems area are carried out mainly in the Center for Computer-Aided Design (CCAD). CCAD maintains a variety of high-performance computer systems in support of its technology research and development efforts. A 16-processor HP Exemplar S-class supercomputer provides resources for extensive engineering analysis capabilities using a wide variety of industry-standard and locally developed software. General computing services are supported by a number of UNIX and Windows NT applications servers connected to centralized file servers. CAD/CAE, software development, virtual prototyping, and virtual environment development applications are hosted on more than 40 Hewlett-Packard and Silicon Graphics UNIX workstations. Standard desktop, multimedia, and office productivity applications are hosted on a network of more than 40 workstations.

Courses

Industrial Engineering

Special Topics

056:000 Cooperative Education Training Assignment: Industrial Engineering 0 s.h.
Industrial engineering students participating in the Cooperative Education Program register in this course during work assignment periods; registration provides a record of participation in the program on the student’s permanent record. Prerequisites: admission to Cooperative Education Program and consent of faculty adviser.

056:010 Industrial Engineering Freshman Seminar 0 s.h.
Introduction to curriculum and profession; ethics and professionalism in classroom and workplace. Prerequisite: first-year or transfer standing in engineering.

056:020 Industrial Engineering Sophomore Seminar 0 s.h.
Curriculum and profession; ethics and professionalism in classroom and workplace. Prerequisite: sophomore or transfer standing in engineering.

056:091 Professional Seminar: Industrial Engineering 0 s.h.
Professional aspects of industrial engineering presented through lectures and discussions by guest speakers, field trips, films, panel discussions. Repeatable. Prerequisite: junior standing.

056:098 Individual Investigations: Industrial Engineering 3 s.h.
Independent projects in industrial engineering for undergraduate students, including laboratory study, an engineering design project, analysis and simulation of an engineering system, computer software development, CAD/CAM applications, or research. Prerequisite: consent of course adviser.

Manufacturing

056:032 Design for Manufacturing 3 s.h.
Fundamentals of design, engineering graphics, and manufacturing processing; computer graphics using Pro-ENGINEER for CAD and CAM; typical industrial processes, including fundamentals of casting, welding, machining, forming, computer numerical control (CNC) machining, laboratory exercises and projects. Same as 058:032.

056:131 Manufacturing Systems 3 s.h.
Manufacturing as systems consisting of computer and microprocessor-based control systems; manufacturing and logistics systems; supply chain management; quality function deployment; MRP/ERP systems; lean manufacturing; concurrent engineering; value stream mapping and six sigma. Offered spring semesters. Prerequisite: 056:032 or consent of instructor. Same as 058:131.

056:132 Introduction to Industrial Robotics 3 s.h.
Operation and control of robot systems; robotic sensors and data acquisition subsystems; machine vision; software for robot control; design of robotic workcells; laboratory projects; manufacturing process control theory and application. Prerequisite: 056:006.

056:134 Process Engineering 3 s.h.
Methodologies, algorithms, and tools for processing modeling, analysis, and reengineering; modeling issues in product and component design, product and process modularity, quality, reliability, agility. Prerequisite: 056:171.

056:231 Computer-Integrated Manufacturing 3 s.h.
Design and operational issues related to the integration of computers in manufacturing systems; theoretical and applied topics. Offered fall semesters.

056:233 E-Commerce: Product Development 3 s.h.
Computer and experimental methods for analyzing product development using electronic commerce; software for product development; information systems; collaborative design. Prerequisite: 056:131 or 056:231 or 056:234.

056:234 Information Systems for Design and Manufacturing 3 s.h.
Information systems that support product and process design. Prerequisite: 056:131 or 056:231 or 056:233.

056:235 Computational Intelligence 3 s.h.
Concepts, models, algorithms, and tools for development of intelligent systems; data mining, expert systems, neural networks for engineering, medical and systems applications. Prerequisite: 056:171. Same as 096:313.

056:238 Evolutionary Computation 3 s.h.
Evolutionary computation, genetic programming, development of evolutionary systems for applications in industry, medicine, and nonstructured environments; case studies. Prerequisite: 056:171.

056:239 Knowledge Discovery and Management 3 s.h.
Introduction to data analysis methods, data mining tools and techniques, data engineering, data warehousing, evolutionary computation; case studies in applications of knowledge discovery and management. Prerequisite: 225:039 or equivalent.
Human Factors/Ergonomics

056:144 Human Factors 3 s.h.
Design of human-machine systems; development of optimum work environments by applying principles of behavioral science and basic knowledge of human capacities and limits. Prerequisite: 031:001.

056:147 Ergonomics 3 s.h.
Ergonomic design of jobs and products in an industrial and consumer market setting: principles of good design, examples of poor design; consequences of poor job and product design; principles of work sampling, usability studies, performance rating, sizing and planning of workstations, hand tool design, ergonomic design in transportation; related group project.

056:148 Human-Centered System Design 3 s.h.
Design strategies for creating customer-centered systems; interview and observation techniques for gathering customer requirements and creating work models; tools for restructuring work and prototype development. Prerequisite: 056:144.

056:240 Human Performance in Engineering Systems 3 s.h.
Human performance limits and capabilities relevant to design of engineering systems; focus on cognitive limits associated with information processing. Prerequisites: 056:144 and 056:147.

056:241 Research Methods in Human Factors Engineering 3 s.h.
Logic and methods for research and for analysis and evaluation of complex human-machine systems; advanced techniques for enhancement of human interaction with advanced information technology; emphasis on cognitive task analysis techniques for innovative design, understanding of how technology affects safety, performance, user acceptance. Prerequisite: 056:240 or intermediate statistics course or consent of instructor.

056:242 Human/Computer Interaction 3 s.h.
Development of projects using human factors principles in the design of computer interfaces.

056:243 Modeling Operator Performance 3 s.h.
Modeling techniques that support design and analysis of the human role in complex systems; process and concepts associated with model development and application. Corequisite: 056:240 or consent of instructor.

056:244 Human Factors in Transportation 3 s.h.
Human capabilities and limitations in transportation context; human factor design from automobiles to spacecraft, transportation environment, air traffic control, crew resource management; related semester project. Corequisite: 056:240 or 056:241 or consent of instructor.

056:245 Assessing Human Visual Performance 3 s.h.
Measuring, modeling, and optimizing human visual performance; display design for optimal legibility, research in visibility, legibility, conspicuity, and camouflage; visibility model development. Corequisite: 056:240 or 056:241 or consent of instructor.

056:246 The Design of Virtual Environments 3 s.h.
Development of techniques for designing and creating three-dimensional representations of information for simulation, scientific visualization, and engineering; emphasis on human factors issues, software. Corequisite: 056:240 or consent of instructor.

056:248 Analytical Methods in Human Factors Engineering 3 s.h.
How analytical techniques can be used to analyze human factors data, how techniques complement each other; techniques used across disciplines (e.g., behavioral science, civil and industrial engineering, economics, epidemiology, marketing); case studies; experience designing a survey and using statistical analysis software to analyze survey data. Prerequisites: 22S:039 and 056:144.

Engineering Management

056:054 Engineering Economy 3 s.h.
Basic concepts of engineering economy: time value of money, cash flow equivalence, depreciation, tax considerations, continuous cash flows, cost accounting overview, main analysis techniques—present worth, uniform annual cost, rate of return, benefit/cost ratio, replacement and break-even analysis. Corequisite: 225:039.

056:056 Leadership in Engineering 1 s.h.
How to balance aspects of college life, explore a personal mission, and set priorities. Prerequisite: consent of instructor.

056:150 Information Systems Design 3 s.h.
Structure and design of computer-based information systems; concepts of information systems, decision making, computer hardware, software, data structures; methods for determining system requirements; designing, implementing, evaluating, managing information systems; applied projects. Prerequisites: 057:017 and 059:006.

056:153 Human-Centered System Design 3 s.h.
Current readings, cases in engineering management; methods for organizing, planning, funding, controlling engineering efforts; nature of the engineering and management function. Offered fall semesters. Prerequisite: 056:054.

Quality and Production Control

056:160 Operational Systems Design 4 s.h.
Projects involving the design of products and related operational systems in an industrial or service organization, including associated entrepreneurial or intrapreneurial planning. Offered spring semesters. Prerequisites: 056:054, 056:134, and senior standing.

056:161 Enhanced Design Experience 3 s.h.
Real-world, in-depth design experience in student teams, working with engineers at major companies in the region; application of industrial engineering knowledge and skills to design products and related operational systems. Prerequisite: senior standing.

056:162 Quality Control 3 s.h.
Basic techniques of statistical quality control; application of control charts for process control variables; design of inspection plans and industrial experimentation; modern management aspects of quality assurance systems. Offered fall semesters. Prerequisite: 225:030 or 225:039. Same as 225:133.

056:163 Quality Engineering I 3 s.h.
Engineering techniques for designing quality into manufactured products, processes; design, analysis of multifactor experiments, economics of reducing variation, critique of Taguchi methods. Offered fall semesters. Corequisite: 056:162 or consent of instructor.

056:166 Production Systems 3 s.h.
Models for design and operation of manufacturing systems; equipment selection, machine layout, group technology, process planning, production planning and scheduling, just-in-time concepts, concurrent engineering, intelligent systems. Offered fall semesters. Prerequisites: 056:032 and 056:171.

056:268 Reliability Theory and Applications 3 s.h.
Fundamental topics in reliability engineering, including system reliability modeling, statistical inference of lifetime data, basic preventive maintenance models; statistics and random process models, including Poisson processes, renewal processes, Markov processes. Prerequisites: 22M:033, and 22S:039 or equivalent.
Operations Research and Applied Statistics

056:171 Operations Research 4 s.h.
Operations research models and applications emphasizing both deterministic and probabilistic models: linear programming, duality, parametric analysis, dynamic programming, Markov chains, queueing theory. Offered fall semesters. Prerequisites: 22M:033 and 22S:039.

056:170 Applied Linear Regression 3 s.h.
Regression analysis with focus on applications; model formulation, checking, selection, interpretation and presentation of analysis results; simple and multiple linear regression; ANOVA; hands-on data analysis with SAS software. Prerequisite: 22S:030 or 22S:039 or 22S:120 or equivalent. Same as 22S:152.

056:178 Digital Systems Simulation 3 s.h.
Simulation modeling and analysis; emphasis on construction of models, interpretation of modeling results; input and output analysis; modeling discrete, continuous and hybrid systems; construction of model-related databases—hands-on usage of ARENA simulation software, manufacturing, health care, and service applications. Offered spring semesters. Prerequisite: 22S:030 or 22S:039 or graduate standing.

056:181 Internet Systems Design 3 s.h.
The Internet's background; how the net operates and can be used; design of Internet-based systems; programming in an Internet-based environment. Corequisite: 057:017 or consent of instructor.

056:186 Health Informatics I 3 s.h.

056:270 Linear Programming 3 s.h.
Formulation and solution of linear optimization problems; duality, sensitivity analysis, decomposition methods; simplex and interior algorithms; extensions to semidefinite and second-order cone optimization. Prerequisite: 056:171 or equivalent. Same as 06K:286.

056:271 Nonlinear Optimization 3 s.h.
Mathematical models, theory, algorithms for constrained and unconstrained optimization; nonlinear, geometric, quadratic, dynamic programming, optimality conditions; aspects of duality theory. Prerequisite: 056:171 or equivalent.

056:272 Integer Programming and Network Flows 3 s.h.
Theory, applications, algorithms for combinatorial optimization problems, including integer and mixed integer mathematical programming problems as well as problems formulated in a network or graph setting, including routing of vehicles, location of facilities in networks and scheduling. Offered fall semesters. Prerequisite: 056:171 or equivalent.

056:273 Stochastic Systems 3 s.h.
Probabilistic operations research models and algorithms, with emphasis on applications in manufacturing and production planning, random processes; Markov chains and applications; probabilistic dynamic programming; Markov decision processes; queueing models. Prerequisites: 056:171 and an introductory course in probability models.

056:287 Health Informatics II 3 s.h.
Journal articles on health informatics topics reviewed in seminar format with several faculty members; student group projects. Prerequisite: 056:186. Same as 021:280, 051:189, 074:192, 096:289.

Graduate Seminars, Advanced Topics, Research

056:191 Graduate Seminar: Industrial Engineering 0 s.h.
Recent advances and research in industrial engineering presented by guest lecturers, faculty, students. Prerequisite: graduate standing.

056:195 Contemporary Topics in Industrial Engineering arr.
New topics or areas of study not offered in other industrial engineering courses; topics based on faculty/student interest. Prerequisite: senior standing.

Individual projects for industrial engineering graduate students. Prerequisites: instructor approval and consent of instructor.

Experimental and/or analytical investigation of an approved topic for partial fulfillment of requirements for M.S. in industrial engineering. Prerequisites: graduate standing and consent of adviser.

056:205 Advanced Topics in Industrial Engineering arr.
Discussion of current literature in industrial engineering. Prerequisite: consent of instructor.

056:208 Special Topics in Industrial Engineering arr.
Prerequisite: consent of instructor.

Experimental and/or analytical investigation of an approved topic for partial fulfillment of requirements for Ph.D. in industrial engineering. Prerequisite: consent of adviser.

Mechanical Engineering

Special Topics

058:000 Cooperative Education Training Assignment: Mechanical Engineering 0 s.h.
Mechanical engineering students participating in the Cooperative Education Program register in this course during work assignment periods; registration provides a record of participation in the program on the student’s permanent record. Prerequisites: admission to the Cooperative Education Program and consent of the cooperative education faculty adviser.

058:020 Mechanical Engineering Sophomore Seminar 0 s.h.
Introduction to the mechanical engineering profession and curriculum; ethics and professionalism in classroom and workplace; mentoring program and professional societies; visits to laboratories and local companies. Prerequisite: sophomore standing or transfer student.

058:080 Experimental Engineering 4 s.h.

058:080 Mechanical Engineering Design Project 3 s.h.
Application of mechanical, thermal, fluid systems design; student teams design projects initiated at various levels in the design process and carried through to higher levels, emphasis on synthesis, written and oral communication. Corequisite: 058:048 or 058:055.
058:090 Mechanical Engineering First-Year Seminar 0 s.h.
Introduction to the mechanical engineering curriculum, profession; visits to laboratories, industries. Prerequisite: first-year or transfer standing.

058:091 Professional Seminar: Mechanical Engineering 0 s.h.
Professional aspects of mechanical engineering; presentations, student/faculty interaction, professional society involvement, panel discussions, plant trips. Prerequisite: junior standing.

Individual projects for mechanical engineering undergraduate students; laboratory study; engineering design project; analysis, synthesis, simulation of an engineering system; computer software development, research. Prerequisite: consent of adviser.

General Topics

058:110 Computer-Aided Engineering 3 s.h.
Computational engineering modeling and simulation, geometric modeling, grid generation, finite element and finite-volume methods, uncertainty analysis, optimization, engineering applications. Prerequisite: 058:052 or equivalent. Corequisite: 058:045. Same as 053:115.

058:111 Numerical Calculations 3 s.h.
Development of algorithms for functional approximations, numerical differentiation and integration; solution of algebraic and differential equations, with emphasis on digital computers; initial and boundary value problems. Prerequisite: 22M:034. Same as 053:111.

058:112 Engineering Design Optimization 3 s.h.
Same as 053:112.

058:113 Mathematical Methods in Engineering 3 s.h.

058:115 Finite Element I 3 s.h.
One- and two-dimensional boundary value problems; heat flow, fluid flow, torsion of bars, trusses and frames; isoparametric mapping; higher order elements; elasticity problems; use of commercial software. Prerequisite: 057:019. Same as 053:133.

058:131 Manufacturing Systems 3 s.h.
Manufacturing as systems consisting of computer and microprocessor-based control systems; part design and manufacture using CAD/CAM, Pro/E, technical, quality, and economic trade-offs regarding the design, selection, and implementation of various degrees of computer aiding in manufacturing systems; computer numerical control (CNC) machining, automated material handling, automated assembly, flexible manufacturing systems. Offered spring semesters. Prerequisite: 056:032 or consent of instructor. Same as 056:131.

058:186 Enhanced Design Experience 3 s.h.
Experience working in teams on industry-sponsored design and product development projects scheduled for production; emphasis on practical experience with the complete design process, from conceptualization through prototyping, evaluation, testing, and production; written and oral communication. Prerequisites: 058:080 and consent of instructor.

058:214 Analytical Methods in Mechanical Systems 3 s.h.
Vector and function spaces; functional and operations in Hilbert spaces; calculus of variations and functional analysis with application to mechanics; Ritz and Galerkin methods. Prerequisite: 058:113. Same as 053:214.

058:215 Finite Element II 3 s.h.
Computer implementation; plate and shell elements; mixed and hybrid formulations; nonlinear analysis; recent development; introduction to boundary element method. Prerequisite: 053:133. Same as 053:233.

Thermal Engineering and Fluids

058:040 Thermodynamics I 3 s.h.
Power and refrigeration cycles; mixtures of gases, psychometric mixtures; availability; thermodynamics of combustion and chemical equilibrium. Prerequisite: 059:009.

058:045 Heat Transfer 3 s.h.
Principles of heat transfer by conduction, convection, radiation; analytical and numerical methods of solution; applications to engineering problems. Prerequisites: 22M:034 and 057:020.

058:048 Energy Systems Design 4 s.h.
Principles and design of energy conversion systems, including solar, wind, and geothermal power systems; design of thermal-fluid system components, modeling and simulation of systems, optimization techniques; design projects. Prerequisites: 058:040 and 058:045.

058:140 Intermediate Thermodynamics 3 s.h.
Thermodynamics principles applied to phase equilibrium; properties of fluids; first and second law, variable composition systems, behavior of real fluids, mathematical techniques for thermodynamics. Prerequisite: 052:113 or 058:040. Same as 052:117.

058:143 Computational Fluid and Thermal Engineering 3 s.h.
Governing equations of fluid flow and heat transfer; basic numerical techniques for solution of the governing equations; estimation of accuracy and stability of the approximations; boundary conditions; grid generation; applications to flows and heat transfer in engineering systems; familiarity with software for analysis and design of thermo-fluid systems. Prerequisite: 058:045.

058:145 Intermediate Heat Transfer 3 s.h.
Steady and unsteady conduction, forced and natural convection, surface and gaseous radiation; condensation and evaporation; analytical and numerical methods and applications. Prerequisite: 058:045.

058:146 Modeling of Materials Processing 3 s.h.
Manufacturing processes for metals, polymers, semiconductors, processing by casting, solidification, crystal growth, polymer molding and extrusion, welding, heat treating, application of optical (laser) and electromagnetic energy; processes that use momentum, heat, mass transfer principles; measurement and instrumentation for materials processing; current topics in materials processing. Prerequisite: 058:045 or consent of instructor.

058:147 Fuel Cells 3 s.h.
Introduction to fuel cell design and performance evaluation; thermodynamics, transport phenomena, and reaction fundamentals essential to understanding of the processes and phenomena that pose limits on fuel cell performance. Prerequisites: 058:040 and 058:045.

058:148 Combustion and Propulsion Engineering 3 s.h.
Chemical kinetics, thermodynamic equilibrium, transport equations; thermodynamics of fluid flows; laminar flames; basic gas turbine cycles; propulsion systems—open gas turbine cycles, turboprop, turbofan, turbojet, ramjet; supersonic inlets; nozzle flows; contemporary propulsion concepts. Prerequisite: 058:040 or graduate standing.

058:160 Intermediate Mechanics of Fluids 3 s.h.
Basic concepts and definitions; pressure distribution in a fluid; governing equations and boundary conditions; integral and...
Mechanical and Industrial Engineering
058:152 Vehicle Dynamics and Simulation 3 s.h.
Vehicle dynamic response; suspension, steering, braking, and powertrain system design; computer-aided system simulation; tire modeling; acceleration and steady-state turning performance. Prerequisite: 057:010.

058:153 Fundamentals of Vibrations 3 s.h.
Vibration of linear discrete and continuous mechanical and structural systems; harmonic, periodic, and arbitrary excitation; modal analysis; applications. Prerequisite: 057:019. Same as 053:132.

058:154 Intermediate Kinematics and Dynamics 3 s.h.
Kinematic and dynamic analysis of unconstrained and constrained planar mechanical systems; computational kinematics, variational and Lagrangian dynamics, constrained dynamics. Prerequisite: 057:010. Corequisite: 058:052.

058:155 Mechanics of Robotics 3 s.h.
Introduction to robot components, types, power systems, mechanics, and control; homogenous transformations, Denavit-Hartenberg formulation for serial kinematic chains, direct and inverse kinematics of serial manipulators, differential rotations and translations, manipulator Jacobian and inverse Jacobian, trajectory planning, position and force control of manipulators. Prerequisites: 22M:034, 057:010, and consent of instructor.

058:157 Digital Human Modeling 3 s.h.
Computational methods used in modeling, simulating, and animating humans; multibody kinematics; dynamics of human kinematic chain; human-machine interaction. Prerequisites: 057:010 and 058:052.

058:158 Fatigue/Durability in Design 3 s.h.
Macro- and micromechanics of fatigue behavior, design of engineering materials/components/structures subjected to cyclic loading, emphasis on metals; stress-life, strain-life, linear elastic fracture mechanics approach to fatigue crack growth, slow life, fast-life, fast-fatigue tolerant design; constant and variable amplitude life predictions; notches, residual stress, corrosion, temperature, multifatigue, weldments. Prerequisite: 051:085 or 058:055 or 058:150 or equivalent. Same as 053:148.

058:159 Fracture Mechanics 3 s.h.
3-D stress states, definition and criteria for failure, nominal and local yield phenomena, linear elastic and elastic-plastic fracture mechanics, plane stress and plane strain fracture toughness, J-integral, crack opening displacement, environmental assisted cracking, fatigue crack growth, fast-life, and damage tolerant design. Prerequisite: 051:085 or 058:055 or 058:150 or equivalent. Same as 053:149.

058:170 Composite Materials 3 s.h.
Mechanics of solid multiphase systems, with applications in lightweight structures, ultrasonic materials, materials for the protection of the body and replacement of human tissues; composites with fibrous, lamellar, particulate, cellular structures; composites of biological origin. Prerequisite: 058:150. Same as 051:177, 053:137.

058:250 Advanced Fracture Mechanics 3 s.h.
Fracture of modern engineering materials; linear-elastic fracture; computational methods; functionally graded materials; elastic-plastic fracture; multiscale fracture and fatigue crack initiation. Prerequisites: 058:113, 058:115, and 058:159. Same as 053:250.

058:251 Computational Inelasticity 3 s.h.
Computational techniques and implementations for elastic, hyperelastic, elastic-plastic, visco-elastic, and visco-plastic material models; development of sound numerical integration algorithms from rate constitutive equations. Prerequisite: 053:241. Same as 053:243.

058:252 Advanced Continuum Mechanics 3 s.h.
Continuum mechanics of fluids and solids; balance laws, invariance restrictions, continuum thermodynamics, constraint theory, mixtures, materials with microstructure. Prerequisite: 058:262 or 058:279. Same as 053:247.

058:253 Computational Methods in Dynamics 3 s.h.
Computational methods for three-dimensional multirigid body systems; spatial kinematics and dynamics; constrained and reciprocal dynamics for closed-loop multi-chain systems. Prerequisite: 058:154.

058:254 Energy Principles in Structural Mechanics 3 s.h.
Principles of virtual work; stationary and minimum potential energy; calculus of variations; Ritz method, Galerkin's method; beams, plates, Hamilton's principle; elastic stability; extremum principle of plasticity. Prerequisites: 058:113 and 058:150. Same as 053:244.

058:255 Multiscale Modeling 3 s.h.
Computational modeling of engineering materials ranging from molecular to continuum scales, molecular dynamics and Monte Carlo methods, nanoscale continuum modeling, scale-coupling methods. Prerequisite: 058:115 or 058:143. Same as 053:246.

058:256 Computational Solid Mechanics 3 s.h.
Advanced computational methods for nonlinear and dynamic analysis of solids, structures; new space and time discretization methods for problems including highly nonlinearities, large deformation, contact/impact conditions. Prerequisites: 058:113 and 058:115, or equivalents.

058:257 Probabilistic Mechanics and Reliability 3 s.h.
Stochastic and reliability analysis of mechanical systems; computational methods for structural reliability; random eigenvalue problem; random field and stochastic finite element methods. Prerequisites: 058:113 and 058:115.

058:258 Continuum Mechanics and Plasticity 3 s.h.
Finite strain measures and rate of deformation; principles of isotropy and material indifferency; constitutive equations of elastic and inelastic materials; internal variable theory of thermodynamics; endochronic theory of plasticity. Same as 053:246.

058:259 Mechanical Design in Structures 3 s.h.
Discrete and continuum variational equilibrium equations, discrete design sensitivity analysis for static responses and eigenvalues, interactive design workstations, continuum sizing design sensitivity analysis for static responses and eigenvalues, design sensitivity analysis of structural dynamics, differentiability theory, shape optimal design, shape design sensitivity analysis, design sensitivity of nonlinear structural systems. Prerequisites: 053:115, 058:115, and 058:150.

058:270 Micromechanics of Solids 3 s.h.
Local micromechanics and Eshelby's inclusion theory; homogenization procedures of heterogeneous materials; effective elastic, visco-elastic, and plastic behavior of composites; micromechanics of other advanced materials; computational micromechanics. Prerequisite: 053:241 or 058:279. Same as 053:245.

058:271 Elastic Waves in Solids 3 s.h.
Same as 051:248, 053:248.

058:279 Continuum Mechanics and Elasticity 3 s.h.
Cartesian tensors and geometrical foundations; concept of stress, strain, motion; fundamental physical laws; constitutive equations and finite elasticity; equations of linear elasticity, elastic extension, torsion and bending of bars. Prerequisite: 057:019. Corequisite: 058:113 or graduate standing. Same as 053:241.

058:295 Advanced Topics in Mechanical Systems 3 s.h.
Advanced contemporary topics in mechanical systems engineering not covered in other courses and determined by student/faculty interest.
Graduate Seminars, Advanced Topics, Research

058:191 Graduate Seminar: Mechanical Engineering 0 s.h.
Presentation and discussion of recent advances and research in mechanical engineering by guest lecturers, faculty, students. Prerequisite: graduate standing.

058:195 Contemporary Topics in Mechanical Engineering arr.
New topics in fluid and thermal sciences and mechanical systems not covered in other courses; topic and coverage determined by student/faculty interest. Prerequisite: junior standing.

Individual project in mechanical engineering, for department graduate students; laboratory study, engineering design project, analysis and simulation of an engineering system, computer software development, research. Prerequisites: graduate standing and consent of adviser.

Experimental and/or analytical investigation of an approved topic for partial fulfillment of requirements for M.S. in mechanical engineering. Prerequisites: graduate standing and consent of adviser.

Experimental and/or analytical investigation of an approved topic for partial fulfillment of requirements for Ph.D. in mechanical engineering. Prerequisite: consent of adviser.

Dean: John C. Keller
Associate deans: Sandra Barkan, Dale Eric Wurster
Web site: http://www.grad.uiowa.edu

The University of Iowa has been a leading center of advanced study for more than a century. Presently, the Graduate College accounts for nearly one-fifth of the University's total enrollment. This high ratio reflects the breadth of the University's graduate programs and resources, the strength of a graduate faculty with a long tradition of personal and professional concern for students, and the opportunities afforded graduate students for involvement, recognition, and support.

The Graduate College is responsible for the review and approval of proposals for new graduate programs and for the periodic survey and evaluation of existing programs. Through its administration of scholarship, fellowship, and research assistantship funds, the college encourages research and strengthening of departments. In cooperation with the Office of the Vice President for Research, it offers assistance to individual faculty members in finding the resources necessary for research projects, and it works with the other colleges and departments of the University to formulate policies concerning selection, supervision, and support of graduate students.

The faculty of the Graduate College is made up of all University tenure-track faculty members at the ranks of assistant professor, associate professor, and professor. A 17-member Graduate Council, elected from and by the graduate faculty and the Graduate Student Senate, is the executive committee of the graduate faculty and is advisory to the dean of the Graduate College.

Degrees Offered

The Graduate College confers the Master of Arts (M.A.), Master of Science (M.S.), Master of Accountancy (M.Ac.), Master of Arts in Teaching (M.A.T.), Master of Computer Science (M.C.S.), Master of Fine Arts (M.F.A.), Master of Health Administration (M.H.A.), Master of Physical Therapy (M.P.T.), Master of Public Health (M.P.H.), Educational Specialist (Ed.S.), Master of Science in Nursing (M.S.N.), Master of Social

</table>
Interdisciplinary Degree Programs

The Graduate College participates in a number of University of Iowa interdisciplinary degree programs. Detailed information about the following master’s and doctoral degree programs is provided later in this section of the Catalog: Applied Mathematical and Computational Sciences, Genetics, Immunology, Library and Information Science, Molecular Biology, Neuroscience, Second Language Acquisition, Translational Biomedicine, and Urban and Regional Planning.

Interdisciplinary Master’s and Doctoral Programs

In addition to the degree programs listed above, the graduate faculty has authorized the awarding of interdisciplinary master’s and doctoral degrees. Students seeking approval for interdisciplinary master’s and doctoral programs must previously have been admitted to and enrolled in a departmental program in the Graduate College. See sections X.A. and XII.D. in Rules and Regulations of the Graduate College on the college’s web site or in this section of the Catalog.

Joint Degree Programs

Joint Law and Graduate Degrees

Joint programs under which students can pursue degrees simultaneously in the College of Law and the Graduate College have been developed with the law college and a number of departments in the Graduate College. See College of Law in the Catalog.

Joint Programs Offered Through the Graduate College

Various joint programs have been developed whereby students work simultaneously toward two advanced degrees. Consult the appropriate Catalog sections for more information. Established joint programs include business administration/library and information science; health management and policy/urban and regional planning; social work/urban and regional planning; occupational and environmental health/urban and regional planning; public health/nursing; public health/medicine; and business administration/nursing.

Joint B.S./M.S. Program in Biomedical Engineering

The Graduate College and the College of Engineering offer a joint B.S./M.S. program in biomedical engineering. The program allows students to take a limited number of courses that count toward both the B.S. and M.S. degree requirements, to attend and participate in the departmental graduate seminar, and to work on a master’s thesis or project research before they have been awarded a baccalaureate degree. See Biomedical Engineering in the Catalog.

Joint B.A./M.A. Program in German

The Graduate College and the College of Liberal Arts and Sciences offer a joint B.A./M.A. program in German. The program permits students to take 12 s.h. of course work that fulfills both B.A. and M.A. degree requirements and provides an opportunity for early entrance to advanced courses in German. See German (College of Liberal Arts and Sciences) in the Catalog.

Joint B.S./M.S. Program in Industrial Engineering

The Graduate College and the College of Engineering offer a joint B.S./M.S. program in industrial engineering. The program allows students to begin earning graduate credit (6 s.h. may be applied toward both the B.S. and M.S. degree requirements), to attend one of the department’s graduate seminars, and to work on a master’s thesis research before they have been awarded a baccalaureate degree. See Mechanical and Industrial Engineering in the Catalog.

Joint B.A./M.A. Program in Linguistics

A joint B.A./M.A. program in linguistics with a specialization in Teaching English as a Second Language (TESL) is offered by the Graduate College and the College of Liberal Arts and
Sciences. The program permits students to take a limited number of courses that fulfill both B.A. and M.A. degree requirements and provides for early entrance to advanced courses in linguistics. Joint B.A./M.A. students also may gain experience teaching ESL at the college level early in their graduate careers. See Linguistics (College of Liberal Arts and Sciences) in the Catalog.

**Joint B.S./M.S. Program in Mechanical Engineering**

The Graduate College and the College of Engineering offer a joint B.S./M.S. program in mechanical engineering. The program allows students to begin earning graduate credit (6 s.h. may be applied toward both the B.S. and M.S. degree requirements), to attend a graduate seminar, and to participate in master's research before they have been awarded a baccalaureate degree. See Mechanical and Industrial Engineering in the Catalog.

**Joint D.V.M./M.P.H. Program**

The UI Graduate College and College of Public Health, in collaboration with Iowa State University's College of Veterinary Medicine, offer the joint D.V.M./M.P.H. program. This dual degree requires students to be accepted into the D.V.M. program as a condition of acceptance into the combined degree program. Once admitted, a student may use course work credit to fulfill elective requirements in both programs. Students may apply 18 s.h. of public health course work toward the D.V.M. degree (which requires a total of 150 s.h.), and 9 s.h. of veterinary medicine degree course work toward the M.P.H. degree (which requires a total of 39 s.h.). The degrees generally are awarded conjointly. See Master of Public Health in the Catalog.

**Library Science/Book Studies**

The joint M.A. in library and information science and Certificate in Book Studies/Book Arts and Technologies prepares students for careers in special collections librarianship. The 51 s.h. program trains individuals to manage varied types of special collections, such as rare books, manuscripts, archives, graphics, music, and ephemera. Successful completion of the program is noted on the student's transcript. See Center for the Book (College of Liberal Arts and Sciences) and Library and Information Science (Graduate College) in the Catalog.

**Medical Scientist Training Program**

The Medical Scientist Training Program (MSTP) is an interdisciplinary M.D./Ph.D. program offered jointly by the Carver College of Medicine and the Graduate College. See Medical Scientist Training Program (Carver College of Medicine) in the Catalog.

**Certificate Programs**

The Graduate College participates in a number of University of Iowa certificate programs. See Rhetorics of Inquiry (Graduate College) and Transportation Studies (Graduate College) in the Catalog for detailed information about certificates in those programs.
Advanced Practice Nursing
The post-master’s degree Certificate in Advanced Practice Nursing allows for advanced clinical training in four specialty tracks: pediatric nurse practitioner, adult/gerontology nurse practitioner, family nurse practitioner, and psychiatric/mental health nursing. Certificate requirements include advanced clinical core courses and a sequence of specialty courses. Successful completion of the specialty sequence qualifies a student to sit for certification as a nurse practitioner and/or a clinical nurse specialist. Completion of the certificate program is noted on the student’s transcript. See College of Nursing in the Catalog.

Aging Studies
The Aging Studies Program is a multidisciplinary nondegree certificate program administered by the College of Liberal Arts and Sciences in cooperation with other colleges of The University of Iowa. The 21 s.h. program is designed to complement graduate degree programs for students with academic, professional, research, or service career interests in aging. Successful completion of the Certificate in Aging Studies is noted on the student’s transcript. See Aging Studies (College of Liberal Arts and Sciences) in the Catalog.

American Indian and Native Studies
The American Indian and Native Studies Program offers an interdisciplinary certificate program focusing on the histories, cultures, languages, arts, crafts, beliefs, political and social organizations, economies, geographies, literatures, and contemporary legal and political concerns of Native Americans of the United States as well as other indigenous peoples of the Western Hemisphere. Successful completion of the Certificate in American Indian and Native Studies is noted on the student’s transcript. See American Indian and Native Studies (College of Liberal Arts and Sciences) in the Catalog.

Book Studies/Book Arts and Technologies
The Certificate in Book Studies/Book Arts and Technologies offers an interdisciplinary approach to study of the relationship between the book in culture and book arts and technologies. It also provides opportunities for focused laboratory or academic investigations into either area. Successful completion of the program is noted on the student’s transcript. See Center for the Book (College of Liberal Arts and Sciences) in the Catalog.

Clinical Investigation
The Certificate in Clinical Investigation is designed for clinicians who wish advanced training in clinical methodology and applied patient-oriented research skills. Certificate requirements include didactic course work, clinical research preceptorships, and clinical research seminar participation. Students in the certificate program must be practicing academic clinicians who have completed doctoral training. Successful completion of the program is noted on the student’s transcript. See Carver College of Medicine and College of Public Health in the Catalog.

Global Health Studies
The interdisciplinary Global Health Studies Program emphasizes international health problems and solutions and compares U.S. and foreign health practices. Requirements for the Certificate in Global Health Studies include core courses, electives, foreign study and/or internship, a research project, and foreign language skills. Students do not need special health science courses to participate. Completion of the certificate program is noted on the student’s transcript. Both the College of Liberal Arts and Sciences and the Graduate College award a Certificate in Global Health Studies. See Global Health Studies (College of Liberal Arts and Sciences) in the Catalog.

Graduate Teaching Certificate
The Certificate in Graduate Teaching provides overarching administration and structure that complements discipline-oriented graduate teaching preparation programs. The 12 s.h. program has three parts: course work, teaching experience, and preparation of a teaching portfolio. It is open only to graduate students enrolled in degree programs. Formal application is made through the Graduate College. Completion of the certificate is noted on the student’s transcript.

Health Informatics
The Certificate in Health Informatics is an interdisciplinary collaboration among the health sciences, engineering, computer science, information science, management science, and
statistics. Students in this program are trained to analyze health care data, evaluate information and knowledge, and develop study skills in health care research, education, and practice. Certificate students complete a minimum of 20 s.h., including Health Informatics I and II and approved electives. The certificate may be earned in conjunction with a master's or a doctoral degree or as postgraduate study. Completion of the certificate program is noted on the student's transcript. See College of Nursing and Library and Information Science (Graduate College) in the Catalog.

Statistical Genetics

The Certificate in Statistical Genetics prepares master's-level students to conduct genetic data analyses. The program may be completed in conjunction with or following receipt of a master's degree in biostatistics or a related field. Certificate requirements include five courses plus a preceptorship, for a total of 16 s.h., with a g.p.a. of 3.00 or higher. Successful completion of the program's requirements is entered on the student's transcript. See Public Health Genetics in the Catalog.

Nursing Informatics

The Certificate in Nursing Informatics focuses on data, information, and knowledge of management in nursing. It familiarizes students with the development, support, and evaluation of applications, tools, processes, and structures that help nurses manage data in direct patient care and administrative and management support systems. The program is available for master's, post-master's, doctoral, and postdoctoral students. Completion of the certificate program is noted on the student's transcript. See College of Nursing in the Catalog.

Nursing Service Administration

The Certificate in Nursing Service Administration is designed to upgrade the skills and expertise of nurses practicing in management and nursing administration. Certificate requirements include advanced nurse manager core courses and related support courses. The program is open to postbaccalaureate, master's, postmaster's, and doctoral students. Completion of the certificate program is noted on the student's transcript. See College of Nursing in the Catalog.

Sacred Music

The Certificate in Sacred Music is an interdisciplinary program with course offerings in sacred music, choral conducting/literature, keyboard, voice, religion, and art and art history. Students may earn the 25 s.h. certificate while working toward a graduate degree; or with prior admission to the Graduate College and consent of the faculty adviser for the certificate, they may complete the certificate apart from pursuit of a graduate degree. Successful completion of the certificate program is entered on the student's transcript. See Music (College of Liberal Arts and Sciences) in the Catalog.

Film and Critical Studies in Paris

The University of Iowa is one of a consortium of 21 colleges and universities associated with the Council on International Educational Exchange (CIEE), which sponsors the Film Studies Program and the Contemporary Criticism and Culture Program. These are two unique academic opportunities offered at the Centre Universitaire Américain du Cinéma et de la Critique à Paris.

The Film Studies Program is designed to explore film theory and analysis—not to train filmakers or technicians. The curriculum provides courses and seminars in film theory, formal structures, history, and ideology. Participants study the relationships between film and other art forms, film culture, film and language, and film and psychoanalysis. Students discuss the evolution of the early cinema; the silent films of Griffith, Lang, Eisenstein, and Keaton; the classic Hollywood film; French cinema during and after the transition to sound; and European and American avant-garde cinemas. Participants study the works of Metz, Freud, Barthes, Lacan, Althusser, Foucault, and others to gain an understanding of contemporary French culture, mass media, and the visual arts.

The Contemporary Criticism and Culture Program focuses on recent developments in French political thought and social institutions, linguistics, social sciences, and literary theory. It draws on recent theoretical concepts in the fields of linguistics, psychoanalysis, anthropology, history, and philosophy to analyze verbal and audiovisual representations in literature, painting, photography, film, and television. The interdisciplinary nature of this program makes it relevant not only to French majors but also to students of other disciplines concerned with the problems of criticism and culture. It is of particular value to those who want to explore the applicability of modernist French theory to a variety of disciplines.
The program also permits specialization in history, characterized by the application to historical research of insights from other fields, such as linguistics, cultural geography, anthropology, sociology, and economics. Particularly distinctive in the French historical approach has been a preoccupation with the long-term evolution of populations and the social, economic, and cultural development of groups of ordinary people, seen in their urban or regional contexts.

Students may concentrate in one of these programs entirely or develop an individual program combining elements from both study center components.

Participating students are registered in the University of Paris III—Censier and are eligible to take selected courses within the University of Paris as well as those sponsored directly by the center. The program is open to both undergraduate and graduate students from The University of Iowa. For more information, contact the Department of Cinema and Comparative Literature.

Research Resources

Many of the University's diverse research activities are centrally administered by the Office of the Vice President for Research, which has a cooperative relationship with the Graduate College.

Financial Support

Approximately half of the University's graduate students receive some form of University-administered financial assistance. For eligibility requirements and application procedures, see "Section VII. Graduate Appointments" in the Manual of Rules and Regulations of the Graduate College. The following are the primary sources of assistance.

Teaching and Research Assistantships

Available in most departments; assistantship stipends typically range between $15,736 for a half-time academic-year appointment and $19,233 for a half-time fiscal-year appointment; assistants also are eligible for tuition scholarships. Assistants (one-quarter-time or more) are classified as residents for fee purposes.

Iowa Arts Fellowships

For first-year University of Iowa graduate students entering M.F.A. programs; typical stipends are $15,000 for the academic year, with all tuition and fees paid, for as many as two years (the second year being contingent on demonstrated exceptional progress toward completion of the M.F.A.); no departmental service obligations.

Iowa Performance Fellowships

For first-year D.M.A. candidates in a performance area of music; nominated by the School of Music; academic-year fellowships ($15,000 year one, $7,745 years two and three), summer fellowships ($2,000 years one and two), and all tuition and fees; the School of Music provides a 25 percent teaching or research assistantship ($7,665 years two and three).

Dean's Graduate Fellowships

For first-year graduate students from underrepresented ethnic minority groups; for doctoral students, a 12-month stipend of $18,000 plus tuition and fees for the academic year; for master's students, a ten-month stipend of $14,000 plus tuition and fees for up to two academic years.

Presidential Graduate Fellowships

Five-year awards for doctoral students on a year-round basis; typical stipends are $21,000 per year plus full tuition and fees for as many as four years; in their final year, awardees receive $25,000 with all tuition and fees paid; recipients have no assignments and are free to pursue their own studies, research, and writing full time for two of the five years and all summers.

Graduate College Block-Allocation Fellowships

Graduate College fellowships provide $15,000 for the academic year.

Graduate College Summer Fellowships

For advanced doctoral students who have academic-year appointments and have completed at least two years in a graduate program at The University of Iowa at the time of application; priority given to postcomprehensive students; a summer stipend of $3,000 plus tuition and standard fees; required enrollment in a minimum of one course during the six-week or eight-week summer session, enrollment in the three-week summer session does not qualify.

T. Anne Cleary International Research Fellowships

For doctoral students who have completed their comprehensive examinations; to be used for dissertation research outside of the United States;
the awards, which are meant to supplement other research funds, vary from $500 to $15,000; doctoral students in any discipline may apply.

Seashore and Ballard Dissertation Fellowships
For doctoral students in the humanities who have completed all doctoral degree requirements except the dissertation; nominated by departments; $1,500 per month plus tuition (for up to 2 s.h.), fees, and a health insurance allowance; up to 12 months of funding.

Social Sciences Dissertation-Year Fellowships
For doctoral students in the social sciences who have completed all doctoral degree requirements except the dissertation; nominated by departments; $1,500 per month plus tuition (for up to 2 s.h.), fees, and a health insurance allowance; up to 12 months of funding.

Scholarships
Scholarships provide up to full tuition and fees.

Summer Intensive Language Scholarships
Tuition awards for summer intensive study of non-English language needed to pursue a chosen dissertation topic.

Graduate Student Travel Awards
Reimbursements for travel by graduate students to present research and scholarship results to professional conferences; competitive across disciplines; awards vary from $100 to $300; funds administered by the Graduate Student Senate and the Graduate College.

Rules and Regulations of the Graduate College
The following text is from the Manual of Rules and Regulations of the Graduate College. The most updated version of this manual is available online; see “Current Students” on the Graduate College web site.

The Academic Program

Section I. Admission to the Graduate College

A. APPLICATION PROCEDURE
All students seeking to register for the first time in the Graduate College of The University of Iowa must secure formal admission from the director of Admissions. Applicants may obtain the proper forms from the Office of Admissions. Prospective students may also download the application or apply online from the admissions web site.

In addition to these forms, official transcripts, test scores, and other supporting material must be submitted by the designated deadline prior to the session in which admission is expected. Specific deadline dates will be established by the dean of the Graduate College and the director of Admissions and printed in the Catalog and elsewhere.

B. GRADUATE RECORD EXAMINATION
All applicants prior to consideration for admission should take the General (Aptitude) Test of the Graduate Record Examination (GRE) or, for applicants to graduate programs in business administration, the Graduate Management Admission Test (GMAT). Applicants for whom admission data are complete, with the exception of scores on the GRE or the GMAT, may, depending on departmental policy, be admitted if they meet all other requirements. The GRE, or the GMAT, must be taken before the end of the student’s first session of enrollment. The test is given at test centers established under the direction of Educational Testing Service,
Princeton, New Jersey. The judgment of acceptable levels of performance on this test and its weight in the decision on admission of a student is left to the departments. Some departments in fields where GRE Subject (Advanced) Tests are available require these in addition to the General [Aptitude] Test. Inquiries about the General (Aptitude) Test may be directed to University Evaluation and Examination Service, and inquiries about the requirement of the Subject (Advanced) Test should be addressed to the executive of the department in which the applicant is interested.

C. ENGLISH FOR INTERNATIONAL STUDENTS
Prior to consideration for admission, international student applicants whose native language is other than English must take and pass TOEFL (Test of English as a Foreign Language), unless they have received a degree from an accredited college or university in the United States, the United Kingdom, Canada (except Quebec), Australia, or New Zealand. The examination is given at various times of the year and in many centers throughout the world. Inquiries should be addressed to the director, TOEFL, Educational Testing Service, Princeton, New Jersey 08541.

International students transferring from unfinished degree programs of other universities in the United States who have not taken this examination, or who have received a score lower than the minimum established by the Graduate College dean, must take the TOEFL examination and receive a passing score prior to consideration for admission.

Students who barely pass the established minimum on the TOEFL will be required to sit for an English evaluation upon arrival in Iowa City. The Graduate College will require these students to take and pass recommended course work in English usage at The University of Iowa designed especially for international students.

D. EARLY ADMISSION
A student who is within 6 s.h. of having satisfied all the requirements for the bachelor's degree at The University of Iowa or any other accredited college may be given provisional admission.

E. CANDIDACY
Admission to the Graduate College is not the equivalent of acceptance as a candidate for an advanced degree, which must be earned through work successfully completed at The University of Iowa. (See “Section X. Master's Degrees” and “Section XII. Doctor's Degrees.”)

F. DECLARATION OF MAJOR AND DEGREE
Every applicant for admission must indicate on the application form the department or program of major interest and the degree, certificate, or professional objective he or she intends to pursue. The only exceptions to this regulation are the limited number of applicants registered as nondegree ("special") students. (See definition of nondegree status in next section.) Changes in the major or degree status may be made in the course of a student's graduate study with the approval of the department to which the transfer is proposed. To initiate such action, the student must file a change of major or degree status in the Office of Admissions.

G. ADMISSION REQUIREMENTS AND STATUS
Graduates of any college or university accredited by regional accrediting associations may be admitted to the Graduate College if their academic records meet the required standards. Upon admission, all students fall into one of the following three categories:

1. Regular—For students who have met the minimum requirements for admission and who have been accepted by a department, or interdepartmental degree program, for work leading to a graduate degree or certificate or for professional improvement. The minimum g.p.a. for admission as a regular student to all graduate programs is 3.00.

   Departments or programs may petition the Graduate College dean for admission of a student whose g.p.a. is lower than 3.00, if there is sufficient evidence of the student's academic and/or professional achievement indicating his/her potential for success in a graduate program.

   Departments, or committees in charge of interdepartmental degree programs, may, and often do, set higher minimum admission requirements than those set forth above for the Graduate College as a whole. Information concerning departmental or program requirements may be obtained directly from the executive of the department concerned.

2. Conditional—Students who are interested in working toward a graduate degree or certificate but who are required by a department to demonstrate their ability to do satisfactory graduate work before being admitted to regular status. To be admitted on a conditional basis, the student must be recommended by a department, which will assume responsibility for advising him or her. The student on conditional status must achieve regular status within two sessions of...
registration in the Graduate College by attaining a g.p.a. of at least 3.00 and acceptance by the major department, or be dismissed.

3. Nondegree (Special)—Students with a valid bachelor's degree and at least a 2.50 g.p.a. are eligible to register for a total of no more than two courses per semester. In addition, a nondegree student may not accumulate more than two courses within a given department/program under this classification. These students must be approved for admission by the Graduate College and the Office of Admissions. Nondegree graduate students are not eligible for a graduate degree.

H. ADMISSION OF FACULTY MEMBERS TO GRADUATE STUDY

Persons who hold faculty rank of assistant professor (including clinical assistant professor) or above at The University of Iowa may be admitted as nondegree students. (See “Section G” above.) A person holding faculty rank as specified above may petition the Graduate College dean for permission to enter a departmental program for work leading to an advanced degree, certificate, or professional improvement except in the department of his or her appointment or a closely related department. Such petitions must have prior approval of the department of appointment, dean of the college of appointment, the department in which study is to be pursued, and the Graduate College.

I. READMISSION

Students who are admitted to and enroll in the Graduate College, but who then fail to register for a period of 36 months or more, must apply for readmission. Their acceptance is dependent upon departmental approval for the session in which readmission is desired. Consideration of the application for readmission will be governed by the departmental and Graduate College admissions standards in effect at the time of reapplication.

Section II. Registration

A. STANDARD SCHEDULE

Students registered in the Graduate College may register for no more than 15 s.h. in all courses eligible for graduate credit (100-level or above). In a schedule of mixed graduate and undergraduate courses, two hours of undergraduate credit may be substituted for 1 s.h. of graduate credit, with registration limited to a total of 18 s.h. This equivalency applies to the calculation of academic load only. Graduate credit is not given for courses numbered under 100. The maximum for the eight-week summer session is 8 s.h. Corresponding maximums for the three-week summer and winter sessions and the six-week summer session are 3 or 6 s.h., respectively.

The maximum semester-hour registration for work scheduled outside of the regular eight-week summer session will be arranged on a basis proportionate to that stated above with the approval of the Graduate College dean. In the regular semester, 9 s.h. constitutes full-time registration. (Fellows are required to carry at least 9 s.h. during a semester as a condition of their appointments.) One-quarter-time and one-third-time appointees are permitted to register for the maximum 15 s.h. per semester and 8 s.h. during the eight-week summer session.

B. COURSES NOT INCLUDED IN FULL REGISTRATION

In addition to a full schedule, a graduate student may register for offered courses carrying 0 s.h. of credit.

C. CHANGES IN ANNOUNCED CREDIT

Graduate students may not register for more credit than that offered for any course, but may register for less credit, or no credit, by permission of the instructor. The number of courses a graduate student may take for limited or no credit is subject to the consent of the adviser and the approval of the dean of the Graduate College.

D. REDUCED SCHEDULES FOR TEACHING AND RESEARCH

Assistants and Other Appointees

1. One-half-time appointees may register for not more than 12 s.h. during a semester or 6 s.h. during the eight-week summer session.

2. Five-eighths-time appointees may register for not more than 10 s.h. during a semester or 5 s.h. during the eight-week summer session.

3. Two-thirds- and three-quarter-time appointees may register for not more than 9 s.h. during a semester or 5 s.h. during the eight-week summer session.

4. Seven-eighths-time appointees may register for not more than 7 s.h. during a semester or 4 s.h. during the eight-week summer session.

5. Full-time appointees, including full-time instructors, may register for not more than 6 s.h. during a semester or 3 s.h. during the eight-week summer session.
E. RETROACTIVE REGISTRATION
No form of retroactive registration is permitted.

F. REGISTRATION FOR PART OF A SESSION
A graduate student may register at any time during the semester or the eight-week summer session for not more than 1 s.h. of credit for each of the remaining weeks of classes (not including the examination period) in the term. The total registration may not exceed the 15 s.h. permitted for a semester and the 8 s.h. permitted for the eight-week summer session. Registration after the last day of the second week of a semester or the third day of the second week of a summer session is permitted only in courses involving special projects, readings, individual study, thesis, or research, with the signed approval of the instructor concerned and the Graduate College dean. Proportional credit limitations and deadlines for the three-week and six-week summer sessions will be established on a prorated basis.

G. EXTRAMURAL REGISTRATION
After admission to a departmental program in the Graduate College, registration for work done off campus may be accepted for residence credit under the following circumstances:
1. Traveling Scholar Program of the Committee on Institutional Cooperation [see “Section III”].
2. Research at approved locations under the direction of members of the graduate faculty of The University of Iowa.
3. Fieldwork as part of a regularly scheduled course or research program.
4. Courses taught off campus by members of the graduate faculty (see “Section X.D” and “Section XII.C” for minimum semester hours required on campus for the master’s and doctor’s degrees).
5. Residence graduate credit from another Iowa Regents’ university [see “Section V.B”].
6. As many as 9 s.h. of graduate work taken at the Quad-Cities Graduate Center from faculty other than faculty of the Iowa Regents’ universities, provided the work is acceptable to the student’s major department for the specified degree.

Extramural registration does not count toward residence credit in the following circumstances:
1. Course work transferred from another institution,
2. Guided Independent Study courses.

H. GUIDED INDEPENDENT STUDY (GIS) COURSES
Guided Independent Study (GIS) credits do not count as residence credits. Not more than 9 s.h. of graduate GIS work can be applied toward an advanced degree; such credit must be acceptable for the student’s plan of study. A graduate student may not register for GIS courses without the approval of the executive of his or her major department.

I. SYSTEM OF COURSE NUMBERS
Courses primarily for graduate students are numbered 200 or above in each department. Courses open to and carrying credit for both graduate and undergraduate students are numbered from 100 to 199. A student must be enrolled in the Graduate College in order to earn graduate credit for course work numbered 100 or above. Courses below 100 are not accepted for graduate credit irrespective of a student’s classification. Graduate credit may not be earned for taking courses numbered below 100 by registering in such courses as readings, special projects, or independent study having course numbers of 100 or above.

J. AUDITING OF COURSES
Upon approval of the instructor and the adviser, graduate students may audit courses for zero credit. Fee assessment for auditing courses is based on the number of hours for which the course is offered, with a minimum of 1 s.h. Auditing is permitted only for a student who is currently registered. See “Section VI.C” for the marking system.

K. DROPPING OF COURSES
All graduate students who drop courses after the deadline date established by the dean of the Graduate College for each session and published by the registrar shall receive the grade of F unless the entire registration is withdrawn. This regulation may be waived by the Graduate College dean only on the recommendation of the Student Health director or the Counseling Service. If a student withdraws registration after the deadline date, the student must obtain permission from the dean of the Graduate College before being permitted to reregister.

Section III. Traveling Scholar Program

A. PURPOSE
The program, under the auspices of the Committee on Institutional Cooperation representing 12 universities in the Midwest,
enables a doctoral student to take advantage of special resources available on another campus but not available on his or her own campus: special course offerings, research opportunities, unique laboratories, and library collections.

B. PROCEDURE
1. A CIC Traveling Scholar first must be recommended by his or her own graduate adviser, who will approach an appropriate faculty member at the possible host institution in regard to a visiting arrangement.
2. After agreement by the student's adviser and the faculty member at the host institution, graduate deans at both institutions will be fully informed by the adviser and have the power to approve or disapprove.
3. A CIC Traveling Scholar will be registered at the home university, and fees will be collected and kept by that institution.
4. Credit for the work taken will be recorded at the home university.
5. Those desiring additional information should inquire at the office of the Graduate College.

C. CONDITIONS
CIC Traveling Scholars will normally be limited to two semesters or three quarters on another campus. Each university retains its full right to accept or reject any student who wishes to study under its auspices.

Section IV. Academic Standing, Probation, and Dismissal

A. NONDOCTORAL STUDENTS
A nondoctoral departmental (master's, professional improvement, certificate) student, except one on conditional status, shall be placed on probation if, after completing 8 s.h. of graduate work, the student's cumulative grade-point average on graduate work done at The University of Iowa falls below 2.75. If, after completing 8 more s.h. of graduate work at this University, the student's cumulative grade-point average remains below the required level, the student shall be dropped from the program and denied permission to reregister unless the student applies and is accepted for a nondoctoral degree or certificate program. If, after completing the second 8 s.h., the cumulative grade-point average is at least 3.00, the student is returned to good standing.

B. DOCTORAL STUDENTS
A doctoral student on regular status shall be placed on probation if, after completing 8 s.h. of graduate work, the student's cumulative grade-point average on graduate work done at The University of Iowa falls below 3.00. If, after completing 8 more s.h. of graduate work at this University, the student's cumulative grade-point average remains below the required level, the student shall be dropped from the program and denied permission to reregister unless the student applies and is accepted for a nondoctoral degree or certificate program. If, after completing the second 8 s.h., the cumulative grade-point average is at least 3.00, the student is returned to good standing.

C. RESTRICTION ON STUDENTS ON PROBATION
A student on probation shall not be permitted to take comprehensive or final examinations leading to any degree or certificate, nor may the student receive any graduate degree or certificate.

D. DEPARTMENTAL REGULATIONS AND DISSEMINATION OF INFORMATION
In addition to the above University-wide requirements, departments may establish further requirements which then determine the individual student's standing with regard to probation and dismissal. To this end, each department or program shall compile a written list of standards and procedures for work in that area. These documents shall be on file in each departmental office and the office of the Graduate College dean. Copies are to be available for students in the departmental office, and departments shall make all reasonable efforts to inform students. Subsequent changes in standards or procedures shall be communicated by the department to each student and the Graduate College dean. Whenever departments revise standards for a given program, the new regulations will not apply retroactively to the disadvantage of those already in the program. In addition to notifying students that they are subject to the rules of the Graduate College as set forth in the Manual of Rules and Regulations, any standards established by the department more stringent than the general Graduate College requirements shall be stated. Information shall be provided outlining required courses applicable to the various departmental programs of study, examination procedures and other formal evaluations, departmental policies with regard to awarding and renewing assistantships, time limits on programs of study, departmental registration policies, departmental grade-point requirements, requirements for changing from one degree
program to another within the
department—especially from the master’s to the
doctor’s—departmental probation and dismissal
policies and procedures (see “E” following), and
other matters as are appropriate. The nature of
the departmental advisory system shall be
explained to incoming students.

E. ACADEMIC PROGRESS, DEPARTMENTAL
PROBATION, AND DISMISSAL PROCEDURES

If a student is failing to meet departmental
standards, the department shall warn the student
of this fact in writing. The notification shall
specify in what way(s) the student is failing to
meet the standards. The student shall be
provided a reasonable amount of time to meet
the standards prior to departmental dismissal. If
conditions such as conditional admission or
probation are imposed, the department shall give,
at the time of its imposition, written explanation
of this status and its time limits.

A student who will not be permitted to reregister
for failure to meet standards shall be notified of
this fact in writing with reasons for the action
provided. Such dismissal may follow failure to
meet conditions of admission, conditions of
probation, pre-announced departmental
grade-point requirements or other standards, or
failure of a regularly scheduled examination or
formal evaluation. If a student judges the
dismissal decision improper, the student has a
right to review. Each department shall establish
procedures for handling such reviews. The
procedures are to be approved by the Graduate
College dean and shall afford a fair and
expeditious review. A description of these
procedures shall be included in the departmental
regulations described above. (See “Section
IV.D.”)

F. GRADUATE COLLEGE REVIEW OF DEPARTMENTAL
DISMISSAL

Questions involving judgment of performance
will not be reviewed beyond the department
level. If, however, the student feels there has
been unfairness or some procedural irregularity
concerning dismissal, the student may pursue a
grievance according to the Academic Grievance
Procedure (AGP) established by the Graduate
College. The AGP is available in the Graduate
College. The student should consult with the
Graduate College prior to initiating an academic
grievance.

Section V. Credits

A. TRANSFER OF GRADUATE CREDIT

Graduate work at other institutions will be
entered on the student’s permanent record by the
Office of Admissions and a report of this action
will be sent to the student and to his or her
major department. Credit for these courses
toward an advanced degree at Iowa must have
the approval of the major department and the
dean of the Graduate College. (See “Section
X.E.” and “Section XII.E.”, Reduction of Old
Credits.)

B. RESIDENCE TRANSFER CREDIT

After admission to a departmental program in the
Graduate College, residence graduate credit from
another Iowa Regents’ university may be counted
as residence credit at this institution, provided
such work is acceptable to the student’s major
department on the basis of the department’s
determination of its applicability toward the
degree. (See “Sections X.D.” and “XII.C” for
minimum semester hours required on campus for
the master’s and doctor’s degrees, and “Sections
X.E. and XII.E.”, Reduction of Old Credits.)

C. GRADUATE CREDIT FOR VETERANS

Credit may be granted for studies pursued in war
and military situations under such regulations as
may be formulated by the national educational
agencies and under such adaptation of standing
rules as the Graduate Council may authorize
from time to time to meet group or individual
situations. The value of such credit in satisfying
requirements for a degree will be determined by
the major department with the approval of the
dean.

D. WITHDRAWAL OF REGISTRATION AND
PROPORTIONAL

Credit for Students Entering Military Service
1. Students who leave within the first six weeks
of the semester receive no credit.
2. Students who leave within the period of seven
to nine weeks receive one-half credit.
3. Students who leave within the period of 10 to
12 weeks receive two-thirds credit.
4. Grade reports for the one-half and two-thirds
credit periods: (a) Instructors report grades only
as satisfactory or unsatisfactory. (b) Credit is to be
assigned on the basis of total registration minus
thesis and seminar. (c) Courses are to be counted
toward specific degree requirements only after
the student returns and then only with the
department’s approval.
5. Students who complete the twelfth week receive full credit.

6. Grade reports for the full-credit period: (a) Grades are to be reported only at the end of the semester. (b) Credit is to be reported in specific courses.

7. In each instance, the instructor reports the student’s credit, grade, and date of withdrawal. No credit is granted unless the student’s work is satisfactory at the time of leaving.

8. The amount of credit in thesis and research registration is to be reported to the registrar by individual instructors on the above basis except that less or zero credit may be assigned.

Section VI. Marking System

A. MARKS CARRYING GRADUATE CREDIT

B. MARKS CARRYING NO GRADUATE CREDIT
These are D+, D, D-, F , I—incomplete, W—withdrawn without discredit, R—registered, and U—unsatisfactory.

C. AUDIT
R is assigned when a student registered for zero credit attends as an auditor throughout the course; if the student fails to meet the instructor's requirements for class attendance, W is assigned.

D. INCOMPLETE
The grade of I is to be used only when a student’s work during a session cannot be completed because of illness, accident, or other circumstances beyond the student’s control. In registrations for thesis, research, or independent study, the satisfactory/unsatisfactory grades may be applied. (See next paragraph, “E.”) Students who receive the mark of I must remove that mark within the first session of registration after the closing date of the session for which it is given, or else the grade becomes F , except that students with I's from the spring semester are exempt from completing the course during the succeeding summer session.

Specific deadlines for the submission of student work to the faculty and for the faculty’s report on I grades to the registrar will be set by the Graduate College dean for each session and printed in the academic calendar. Courses may not be repeated to remove incompletes; removal of an I is accomplished only through completion of the specific work for which the mark is given.

E. THESIS, RESEARCH, READINGS, INDEPENDENT STUDY, AND SPECIAL PROJECTS
Grades of S and U may be used for registrations in thesis, research, independent study, and special projects. S—satisfactory means that the student receives credit for the work; U—unsatisfactory means that he or she receives no credit. Neither S nor U is used in computing grade-point averages. At a later date, the instructor may change the S to a letter grade. In addition, departments may ask the Graduate College dean for permission to use grades of S and U as described above for courses which, because of their special or experimental nature, are judged to be more appropriate for such grading. The type of grading system to be used in the above cases should always be mutually understood by the instructor and student.

F. GRADES OF S AND U
S and U may be used for courses taken by a graduate student outside the major department or interdepartmental degree program provided that the instructor of the course and the student’s departmental adviser approve the registration. Arrangements for satisfactory/unsatisfactory grading in these courses are accomplished by filing a card with appropriate signatures in the Registrar’s Office at the time of registration, or no later than the last day of the second week of a semester or the third day of the second week of a summer session. No changes from letter grades to satisfactory/unsatisfactory grades or vice versa will be allowed after these dates.

It is not the policy of the Graduate College to abandon the traditional letter grades described in this section; however, in certain exceptional instances, departments having several areas of concentration involving widely differing types of effort may request the permission of the Graduate Council to allow students majoring in one area to register in courses in another area within the same department or program on a satisfactory/unsatisfactory basis. In these instances, satisfactory/unsatisfactory cards will be used as described in the preceding paragraph.

G. COMPUTED GRADE-POINT AVERAGE
This is based only upon graduate work graded A+=4.33, A=4.00, A-=3.67, B+=3.33, B=3.00, B-=2.67, C+=2.33, C=2.00, C-=1.67, D+=1.33, D=1.00, D-=0.67, and F=0. Although a grade of A+ has a value of 4.33 in computing a student's g.p.a., the cumulative average is truncated so as not to exceed 4.00.
Section VII. Graduate Appointments

A. SCHOLARSHIPS
Scholarships are competitive and are awarded on merit.

1. Eligibility for graduate scholarships and fellowships will include: (a) registration in the Graduate College; (b) cumulative g.p.a. of at least 3.00; (c) a GRE score or a GMAT score above a point to be designated by the Graduate College dean; (d) a satisfactory rate of progress in completing the program for the degree.

2. Preference will be given to candidates for the doctoral degree.

3. Recommendations for graduate scholarships may be made to the Graduate College by the appropriate department executive, director, or dean. A graduate scholarship may be awarded whether or not a student holds an assistantship. The amount of scholarship for the academic year may vary, but in no case exceed the comprehensive fee assessed. Scholarships will be credited to the student’s University account.

B. GRADUATE COLLEGE FELLOWSHIPS
Fellowships are awarded by the Graduate College upon recommendation by departments to students with outstanding academic records. Fellows must be registered as full-time students. The primary purpose of the awards is to permit an advanced student to complete his or her dissertation or creative project and take the degree. Other terms of the award will be established by the Graduate College dean in consultation with the Graduate Council.

C. FACULTY RESEARCH ASSISTANTSHIPS
Faculty research assistantships are awarded to qualified graduate students and serve two purposes: to provide research service to professorial members of the academic staff and to provide apprenticeship experience for graduate students who are in training in research. Not more than 20 hours of service per week are required of a half-time assistant. Other part-time service is scaled in proportion, and a limited academic schedule is permitted (see “Section II.D”). Appointments ordinarily are made for the nine-month academic year, but appointments may be made for other periods of time by special arrangement. Stipends vary with the qualifications of the appointee and the amount of service rendered.

D. GRADUATE TEACHING ASSISTANTSHIPS
These assistantships serve two purposes: assistance in the instructional program of the University and the preparation of future college teachers. In order to achieve both aims, scholastically superior graduate students who show exceptional promise as teachers are selected for graduate teaching assistantships. All appointments are made by the dean of the appropriate college on recommendation of the department.

E. ELIGIBILITY FOR SCHOLARSHIPS, FELLOWSHIPS, AND RESEARCH ASSISTANTSHIPS
Scholars, fellows, and faculty research assistants must be registered as regular students in good standing in the academic session in which they intend to hold an appointment (fall, spring, or summer) in order to hold such appointments. Appointments will be terminated when registration and/or student status is terminated. In no instance may a student be promised or tendered an appointment until after approval for admission to the Graduate College by the director of Admissions.

F. CREDIT
No academic credit is allowed for the teaching or research service for which the student receives payment as a graduate assistant.

G. LOANS
Graduate students requiring financial assistance may apply for loans at the Office of Student Financial Aid.

H. OTHER FORMS OF SUPPORT
Many departments offer financial assistance in the form of traineeships, part-time employment on research programs, or part-time teaching. Inquiries should be addressed directly to the major department.

Section VIII. Advanced Programs Offered in the Graduate College
The major areas in which the Graduate College offers degree programs are listed under “Degree Programs” at the beginning of this section of the Catalog.
Section IX. General Requirements for Advanced Degrees

A. APPLICATION FOR DEGREE
The student must file an application for an anticipated degree with the registrar by the deadline date printed in the Graduate College academic calendar for the session in which the degree will be conferred. The student must have the application signed by his or her adviser. Failure to file the application by the deadline date established by the Graduate College dean will result in postponement of graduation to a subsequent session.

B. ENROLLMENT IN FINAL SESSION
The student must be enrolled during the session in which the degree is to be conferred. Students who are away from the University campus during that session may meet this requirement by registering for independent study, research, or thesis hours according to the practice in the various departments. Doctoral candidates who have completed all work except the final examination may register for Doctoral Final Registration described in “Section XII.1” if such registration is appropriate. Master's candidates who have completed all work except the final examination may register for Master's Final Registration if such registration is appropriate. Both the Doctoral Final Registration and Master's Final Registration require a 2 s.h. tuition/fee payment, and may be repeated if the degree requirements are not completed in this session. Registration in a Guided Independent Study course or in a course for which tuition/fees are not assessed (Cooperative Education Internship, for example) will not satisfy this requirement.

Section X. Master's Degrees

A. KINDS OF DEGREES
The University of Iowa offers programs leading to the Master of Arts (M.A.) degree, Master of Science (M.S.) degree, and several professional master's degrees.

M.A. and M.S. degrees require mastery of methodologies and practices of research and scholarship of the discipline. A thesis describing original scholarship or research may be required. M.A./M.S. degrees may be designed either as preparation for entry into doctoral degree programs or to provide advanced study and accomplishment that serves a variety of career and other purposes. Degrees are awarded in many fields of study, or majors, consistent with conventions of the discipline (e.g., M.A. in Art, English, Psychology; M.S. in Chemistry, Mathematics, Physiology). (For complete list, see Section VIII.) M.A. and M.S. degrees require a minimum of 30 s.h., a final examination and, in some fields, a thesis.

Professional master's degrees provide knowledge, perspectives, and skills required for professional practice. Some programs may include introduction to research or scholarship sufficient to allow application of current literature to practice. Professional master's degrees generally are indicated by a three- or four-letter designation; examples include the Master of Fine Arts (M.F.A.), Master of Social Work (M.S.W.), Master of Public Health (M.P.H.), Master of Physician Assistant Studies (M.P.A.), Master of Science in Nursing (M.S.N.), Master of Accountancy (M.Ac.). (For complete list, see Section VIII.) Professional master's degrees require a minimum of 30 s.h. Some may require a final examination as well as a thesis, papers, projects, colloquia, internships, or other experiential-based activity typical of preparation for practice in the field.

A student may prepare a proposal for an interdisciplinary course of study, including the plan of study defining course work, examination requirements, a research plan, and a committee of at least three faculty members, with either the department most directly concerned or the Graduate College designated as the sponsor. Final approval of such individual programs is granted by the Graduate College dean, who may add members to the student's supervising committee from other closely related departmental faculties or from the Graduate Council. The degree will be awarded in interdisciplinary studies (master's) stipulated in the approved graduate program and, parenthetically, the name of the sponsoring department.

B. PLAN OF STUDY
The applicant for a master's degree must file a plan of study approved by the adviser and the departmental executive with the Graduate College within the session in which the degree is to be granted and by the deadline date printed in the Graduate College academic calendar. If the session in which a student takes his or her final exam is earlier than the session in which the degree is to be granted, the Plan of Study must be filed prior to the administration of the student's final examination. The plan shall meet the requirements for the degree approved by the graduate faculty. (See also “Section IV.D. Departmental Regulations and Dissemination of Information.”)
C. MAJOR AND RELATED FIELDS
The plan of study should provide for reasonable concentration in the major field of interest and, subject to the approval of the major department, may include related subjects from other departments.

D. ACADEMIC RESIDENCE REQUIREMENT
Of the minimum of 30 s.h. required for the degree, at least 24 s.h. must be completed under the auspices of The University of Iowa after admission to a graduate department/program. Various forms of extramural registration may qualify toward fulfillment of the aforementioned 24-hour residence requirement (see “Section II.G. Extramural Registration”) in addition to regular on-campus registration. Students who have elected or who are required to write a thesis for conferral of their master's degrees, must complete at least 8 semester hours of the 24-hour, academic residence requirement on campus. At the discretion of the department, the 8-semester hour, on-campus requirement may be waived for non-thesis master's programs. Election of the waiver option is to be applied programmatically, and not on a student-by-student basis, and must be formally conveyed to the Graduate College.

E. REDUCTION OF OLD CREDITS
Credits for a master's degree dating back more than 10 years from the session in which the degree is to be conferred are not counted toward fulfillment of degree requirements. This rule may be waived by the dean in cases affected by military service.

F. LIMIT ON PROFESSIONAL COURSES
Work taken by a student in the Colleges of Dentistry, Law, or Medicine while enrolled for a professional degree may be credited to a graduate program leading to a master's degree if it is taken after the student has earned a bachelor's degree or has completed work equivalent to that required for a bachelor's degree at The University of Iowa. The work accepted from the professional college must be directly related to the student's major field of study in the Graduate College and be approved as a part of the plan of study by the student's adviser and the major department. Work completed while registered for a professional degree in law, medicine, or dentistry will be counted as part of the residence requirement for nondoctoral degrees in the Graduate College only when the student is registered in an appropriate joint degree program.

G. TWO MASTER'S DEGREES
The granting by this university of two master's degrees simultaneously or in succession requires the satisfaction of all requirements for each degree separately, including two theses where a thesis is required for each, and two examinations, with a minimum combined total of 60 s.h. of graduate credit.

H. MASTER'S DEGREE WITH THESIS
Not more than 9 s.h. of credit for thesis research and writing shall be counted in satisfying the 30 s.h. minimum requirement. The thesis may be a scholarly study or an artistic production.

One copy of the thesis, complete and in final typed form, must be presented to the Graduate College for a check of formal characteristics by the first-deposit deadline date in the session in which the degree is to be conferred. (See the Graduate College Thesis Manual.) After approval by the Graduate College and by the thesis committee, two copies of the thesis must be deposited with the Graduate College by the final-deposit deadline date in the graduation session. Failure to submit the first and final deposits of the thesis by the deadline dates established by the Graduate College will result in the postponement of graduation to a future session.

If the thesis is in some nonprint form (e.g., painting, statue, performance in music) the librarian will help the student and faculty adviser work out an appropriate method of preparing the work, if such help is needed. Once the accompanying manuscript is accepted, it is treated the same as any other thesis.

Nonrefundable fees are charged each thesis candidate to cover processing and publication costs of the thesis.

The thesis committee shall consist of at least three members of the graduate faculty and may or may not be identical to the final examination committee. (The final examination committee for the master's degree shall consist of at least three members of the graduate faculty, at least two of whom are from the major department. See “X.K. Examining Committee.”)

I. MASTER'S DEGREE WITHOUT THESIS
A master's degree without thesis, consisting of at least 30 s.h. of graduate work, may be awarded upon the completion of a curriculum prescribed by a department and approved by the Graduate Council.
J. FINAL EXAMINATION

The requirements for master’s degrees may include a final examination which, at the discretion of the major department, may be written or oral or both. Such an examination will not duplicate course examinations. It will be evaluated by the examining committee as satisfactory or unsatisfactory, with two unsatisfactory votes making the committee report unsatisfactory. The report of the final examination is due in the Graduate College not later than 48 hours after the examination, and by the deadline date established by the Graduate College.

If the department so recommends, a candidate who fails the examination may present himself or herself for reexamination, but not sooner than the next regularly scheduled examination period in the following session.

The examination may be repeated only once.

A student must graduate within one calendar year after passing the final examination for a master’s degree; failure to meet this deadline will require reexamination of the student.

Upon recommendation of a department, the comprehensive examination for a doctoral degree may be substituted for the master’s examination.

Some master’s programs do not require a final exam. Students are responsible for checking the specific requirements of their individual degree programs.

K. EXAMINING COMMITTEE

The examining committee for the master’s degree consists of at least three members of the graduate faculty, appointed by the Graduate College dean upon recommendation of the major department or program, at least two of whom are from the major department. If the examination covers work in another department, one member of the committee must be from that department. Upon recommendation of the major department, the dean may appoint additional qualified persons (not necessarily members of the graduate faculty) to serve as voting members of the examining committee, and, at his or her discretion, the Graduate College dean may add a member to the committee.

Section XI. Graduate Certificate Programs

Graduate certificate programs reflect specialization, either within a field or in an area of study, research, or training. Some graduate certificate programs may be open only to students seeking degrees in related fields; others may be offered as independent programs. Graduate certificate programs are designed to enhance skills, to provide professional development and career advancement opportunities, to broaden career options, and for other purposes, both for traditional, full-time students and for those with full-time employment.

Graduate certificate programs usually require a minimum of 15 s.h. of specified course work and may, in addition, require papers, projects, or experiential learning components designed for specific cohorts. Certificate programs generally require two to three semesters to complete.

Examples include the graduate certificates in aging studies, American Indian and native studies, health informatics, and advanced nurse practitioner. Requirements for each graduate certificate are included in The University of Iowa General Catalog.

Section XII. Doctor’s Degrees

A. CHARACTER OF DEGREE

The Graduate College offers doctoral programs leading to the Doctor of Philosophy (Ph.D.), the highest degree awarded by the university; the Doctor of Musical Arts (D.M.A.); the professional Doctor of Physical Therapy (D.P.T.) and the professional Doctor of Audiology (Au.D.). The Doctor of Philosophy degree indicates marked excellence in original research or other creative work, and superior comprehension in the discipline. The Doctor of Musical Arts degree indicates marked excellence in performance and pedagogy. The Doctor of Physical Therapy degree indicates marked excellence in physical therapy differential diagnosis and clinical integration. The Doctor of Audiology degree indicates marked excellence in theoretical and advanced clinical skills.

B. PREREQUISITES

The candidate must present evidence of having completed a satisfactory amount of undergraduate work in the subject proposed for investigation or, in the case of deficiency, must register for prerequisite courses.

C. RESIDENCE REQUIREMENT

The doctorate is granted primarily on the basis of achievement rather than on the accumulation of semester hours of credit; however, the candidate is expected to have completed at least three years of residence in a graduate college. At least part of
this residence must be spent in full-time involvement in one’s discipline, at this university, beyond the first 24 s.h. of graduate work; this requirement can be met either by: (1) enrollment as a full-time student (9 s.h. minimum) in each of two semesters; or (2) enrollment for a minimum of 6 s.h. in each of three semesters during which the student holds at least a one-third-time assistantship certified by the department as contributing to the student’s doctoral program. (For purposes of record and assessment of fees, student registration should reflect accurately the amount and kind of work undertaken in the Graduate College. All doctoral programs, including acceptable transfer credit, will contain a minimum of 72 s.h. of graduate work.)

D. INTERDISCIPLINARY STUDIES PROGRAMS

A student may prepare a proposal for an interdisciplinary course of study, including the plan of study defining course work, examination requirements, research plan, and a committee of at least five faculty members with either the department most directly concerned or the Graduate College, designated as the sponsor. Final approval of such individual programs is granted by the Graduate College dean, who may add members to the student’s supervising committee from other closely related departmental faculties or from the Graduate Council. The degree will be awarded in interdisciplinary studies (doctorate) stipulated in the approved graduate program and, parenthetically, the name of the sponsoring department.

E. REDUCTION OF OLD CREDITS

Courses taken 10 or more years prior to the comprehensive examination will be evaluated by the major department in order to determine the amount of credit that shall be allowed for such work. Evaluation of such old credits will be reported to the Graduate College by the departmental executive at the time of submission of the plan of study.

F. LIMIT ON PROFESSIONAL COURSES

Work taken by a student in the Colleges of Dentistry, Law, or Medicine while enrolled for a professional degree may be credited to a graduate program leading to a doctoral degree if it is taken after the student has earned a bachelor’s degree or has completed work equivalent to that required for a bachelor’s degree at The University of Iowa. The work accepted from the professional colleges must be directly related to the student’s major field of study in the Graduate College, and the plan of study must be approved by the student’s adviser and the major department. Work completed while registered for a professional degree in law, medicine, or dentistry will be counted as part of the one academic year which must be spent in residence as a doctoral student only when the student is registered in a formally established joint degree program.

G. JOINT PROGRAM FOR MASTER’S AND DOCTORAL DEGREES

Those students who expect to continue their training through the doctoral degree may pursue a joint program for the master’s and doctor’s degrees. The master’s examination may be combined with the comprehensive examination for the doctorate for these candidates. The examining committee will file separate reports of its actions on the final examination for the master’s degree and for the comprehensive examination. Upon recommendation of the department and approval of the Graduate College dean, students who are well qualified by previous training may submit a plan of study that leads directly to the doctoral degree without earning the master’s degree as an intervening part.

H. REQUIREMENT IN FOREIGN LANGUAGES

There is no general Graduate College requirement in foreign languages. Those departments that do require competence in one or more foreign languages establish standards as to the extent and level of competence, as well as methods of testing. Specific requirements will be found in the departmental statements of standards and procedures (see “Section IV.D.”).

Specifications of departmental requirements in foreign languages are filed in the Graduate College office and may be changed upon the initiative of the departments.

I. REQUIREMENTS FOR THE DOCTOR OF PHYSICAL THERAPY (D.P.T.) AND DOCTOR OF AUDIOLOGY (A.U.D.)

Students enrolled in professional D.P.T. and Au.D. programs do not take comprehensive and final examinations and do not deposit a thesis with the Graduate College. The departments will be required to submit a doctoral plan of study to the Graduate College during the session of degree conferral. The plan will provide a listing of all graduate courses taken that apply toward the degree and a listing of courses in progress. The plan is to be filed no later than the deadline date printed in the Graduate College academic calendar.
J. PLAN OF STUDY
The development of a plan of study at the doctoral level is the responsibility of the student working together with his or her adviser. A formal plan of study must accompany the departmental request to the Graduate College for permission to conduct the comprehensive examination. The plan will provide a listing of all graduate courses taken that apply toward the degree and a listing of courses in progress or to be completed after the comprehensive examination.

K. COMPREHENSIVE EXAMINATION
The candidate must satisfactorily complete a comprehensive examination, consisting of written or oral parts or both at the discretion of the major department. Admission to the comprehensive examination is granted upon the recommendation of the major department, the filing of the plan of study, and the approval of the dean of the Graduate College. A student must be registered in the Graduate College at the time of the comprehensive examination, which must be satisfactorily completed not later than the session prior to the session of graduation. This examination, administered only on campus, is intended to be an inclusive evaluation of the candidate’s mastery of the major and related fields of study, including the tools of research in which competence has been certified.

The comprehensive examination is not a deferred qualifying examination. It is intended to evaluate the candidate’s mastery of the subject at or near the end of his or her formal preparation and prior to the completion of the dissertation. The comprehensive examination and the final examination, which is concerned chiefly with defense of the thesis and related subjects, are the two principal examinations for the Ph.D. and D.M.A. doctoral degrees.

The comprehensive examination will be evaluated by a convened meeting of the committee. Each committee member will sign the examination report as satisfactory, reservations, or unsatisfactory. The completed exam warrant will be submitted to the Graduate College office within 14 days after the completion of the examination. Two “unsatisfactory” votes will make the committee report unsatisfactory.

A vote of “reservations” should only be used when a faculty member feels that the deficiencies displayed by the student were modest, and can be readily rectified. In the event of a report with two or more votes of “reservations,” the actions required of the student, by the committee, that are necessary to correct the deficiencies must be recorded and submitted to the Graduate College with the examination report form. Copies of the written statement of necessary actions should be kept by: the appropriate departmental executive, the chair of the examination committee, and the student. The statement must specify the time allowed for completion of the aforementioned actions. The language describing the actions must be specific. For instance, if additional coursework is required, a list of suitable courses must be presented. If the candidate needs to rewrite his or her research prospectus, the deficient areas must be identified, etc. If the candidate satisfies the required actions in the specified period of time, the appropriate departmental executive will send a written report to the Graduate College indicating the date for which the examining committee considers the actions to have been satisfied. Upon approval of the dean of the Graduate College, the comprehensive exam will be recorded as “satisfactory” as of that date. If the actions are not satisfied on time, or if the actions are not of sufficient quality, the appropriate departmental executive will send a written report to the Graduate College indicating that fact. Upon approval of the dean of the Graduate College, the comprehensive exam will be recorded as “unsatisfactory” as of that date. The candidate will not be admitted to the final oral examination of the dissertation until a grade of “satisfactory” has been recorded for the comprehensive exam.

In case of a report of unsatisfactory on a comprehensive examination, the committee may grant the candidate permission to present himself or herself for reexamination not sooner than four months after the first examination. The examination may be repeated only once, at the option of the department.

L. CONTINUOUS REGISTRATION AFTER COMPLETION OF THE COMPREHENSIVE EXAMINATION
The student is required to register each fall and spring semester after satisfactorily completing the comprehensive examination until the degree is awarded. If a student fails to register, the student may not be readmitted to candidacy until the student has submitted an application that has been approved by the student’s adviser, the departmental executive, and the Graduate College dean.

In order to maintain continuous registration, doctoral students may register (1) for required and/or elective courses, research, and thesis hours to complete the plan of study, or (2) for Doctoral Continuous Registration (DCR). DCR requires a 2 s.h. tuition/fee payment. If a
temporary lapse in a student’s academic program is required due to military service, medical leave, maternity leave, or personal/family leave, a student may petition the Graduate College to be allowed to register for Ph.D. Postcomprehensive Registration (PCR), which allows for the assessment of a special minimum fee. If a petition is granted, it is to be understood that a student will not make significant use of university resources, or engage in significant consultation with the faculty. The Ph.D. Postcomprehensive Registration is not to be used for a student’s final registration in a doctoral program. In the final semester, doctoral students may register for Doctoral Final Registration (DFR), which requires a 2 s.h. tuition/fee payment, or appropriate course work. The DFR may be repeated if the degree requirements are not completed in this session.

Under no circumstances may courses for which tuition/fees are not assessed (Cooperative Education Internship, for example), be used to satisfy the continuous registration or final registration requirement of the Graduate College.

No registration for the summer or winter sessions is required. The exceptions are when the student is taking a degree at the end of the summer session, or when enrollment is required by the student's department.

M. DISSERTATION FOR THE DOCTORAL DEGREE

One copy of the dissertation, complete and in final form, must be presented at the office of the Graduate College by the first-deposit deadline date in the session in which the degree is to be conferred.

Two copies of the approved dissertation must be deposited at the office by the final-deposit deadline date in the graduation session. The final deposit can be no later than the end of the semester (summers excluded) following the session in which the final examination is passed; failure to meet this deadline will require reexamination of the student. Failure to submit the first and final deposits of the thesis by the deadline dates established by the Graduate College will result in the postponement of graduation to a future session.

Regulations regarding preparation of the dissertation copy shall be promulgated by the dean of the Graduate College. Dissertations will be microfilmed and thus made available on a permanent basis. An abstract of the dissertation, not to exceed 350 words of text, is to be deposited with the dissertation. The abstract must be approved and signed by the dissertation adviser. The abstract is published in the journal of Dissertation Abstracts International. One copy of the dissertation is bound and indexed at the University's Main Library.

If the dissertation is in some nonprint form (e.g., painting, statue, performance in music) the librarian will help the student and faculty adviser work out an appropriate method of preparing the work, if such help is needed. Once the accompanying manuscript is accepted, it is treated the same as any other thesis.

Dissertations shall be made available to all members of the examining committee not later than two weeks before the date of the examination.

N. DISSERTATION FEES

Nonrefundable fees are charged each doctoral candidate to cover processing and publication costs of the dissertation and abstract.

O. FINAL EXAMINATION

The work for the degree culminates in a final oral examination administered on campus. This examination should include: a critical inquiry into the purposes, methods, and results of the investigation—not a mere recapitulation of the procedures followed—and intensive questioning on areas of knowledge constituting the immediate context of the investigation.

The final examination may not be held until the next session after the student satisfactorily completes the comprehensive examination; however, a student must pass the final examination no later than five years after satisfactorily completing the comprehensive examination. Failure to meet this deadline will result in a reexamination of the student to determine his or her qualifications for taking the final examination. The procedures to be followed are the same as those for the comprehensive examination. (See "XII.K. Comprehensive Examination."

Final examinations for the doctorate are open to the public. Members of the faculty of the Graduate College are especially invited to attend and, subject to the approval of the chair, to participate in the examination.

The report of the final examination is due in the Graduate College office not later than 48 hours after the examination. The final examination will be evaluated as satisfactory or unsatisfactory. Two unsatisfactory votes will make the committee report unsatisfactory. In case of a report of unsatisfactory in the final examination, the candidate may not present himself or herself for reexamination until the next session. The
examination may be repeated only once, at the option of the major department.

P. EXAMINING COMMITTEES

The comprehensive and final examinations are conducted by committees of no fewer than five members of the graduate faculty appointed by the Graduate College dean upon recommendation of the major department, at least two of whom are from the major department. Departments may request the dean’s permission to replace one of the five members of the graduate faculty by a recognized scholar of professorial rank from another academic institution. A member of the graduate faculty from outside the major department is required in those cases where a related field outside the major department is included in the comprehensive examination. For the final examination, one member of the committee must be a member of the graduate faculty from outside the major department, whether that department is on campus or off campus.

Upon recommendation of the major department, the Graduate College dean may appoint additional qualified persons (not necessarily members of the graduate faculty) to serve as voting members of the examining committees. However, four members of doctoral committees (two members for master’s committees) must come from the regular (tenure and tenure-track faculty) graduate faculty. A voting member may be added at the discretion of the Graduate College dean.

Section XIII. Exceptions

Petitions to waive these regulations may be made for appropriate and justifiable reasons on behalf of any graduate student through the departmental executive to the dean and the Graduate Council.

Doctor of Philosophy

The Program in Applied Mathematical and Computational Sciences is an autonomous, broadly based interdisciplinary program leading to the Doctor of Philosophy. The program helps students achieve a command of theoretical and applied mathematics and obtain basic knowledge in another area (engineering, medicine, or one of the behavioral, biological, physical, or social sciences). The program is flexible; students can concentrate on applied mathematics, such as differential equations and numerical analysis, or on other applicable techniques in mathematics. Scientific computing is an important part of applied mathematics today, so it is often a part of student training and dissertation research.

Applicants should have a desire to apply a mathematical science (mathematics or statistics) to relevant problems in another area. To be prepared for graduate-level course work in both mathematics and the outside area, applicants should have a bachelor’s or master’s degree with a strong mathematics component and some background in the other area.

PLAN OF STUDY

Faculty members help each student plan a course of study that is consistent with the student’s background, interests, and goals.

These individual programs are designed to help students develop expertise in methods of applied mathematics and build a good foundation in related topics of theoretical mathematics. The individual programs also provide sufficient knowledge in an outside area to enable students to use mathematical techniques in that area.

Students can arrange their study plans to earn a master’s degree from another department after they complete part of their plan. Students find suitable thesis problems and supervisors with the help of the faculty.

COMPREHENSIVE EXAMINATIONS

Students take a qualifying examination over three of the four core course sequences required for the Ph.D. (differential equations, numerical analysis, analysis, and topology). They also take a comprehensive examination over the chosen outside area.

Graduate degree: Ph.D. in Applied Mathematical and Computational Sciences

Web site: http://www.math.uiowa.edu/amcs

Applied mathematicians formulate mathematical models to analyze and predict the behavior of systems in various scientific and engineering disciplines. They use a combination of analytical and computational techniques to solve problems in areas such as physics, biology, economics, and engineering. Their work is crucial in developing new technologies, improving existing ones, and solving complex real-world problems.

Career opportunities for applied mathematicians include positions in colleges, universities, governmental laboratories, business, industry, and consulting firms.

Doctor of Philosophy

The Program in Applied Mathematical and Computational Sciences is an autonomous, broadly based interdisciplinary program leading to the Doctor of Philosophy. The program helps students achieve a command of theoretical and applied mathematics and obtain basic knowledge in another area (engineering, medicine, or one of the behavioral, biological, physical, or social sciences). The program is flexible; students can concentrate on applied mathematics, such as differential equations and numerical analysis, or on other applicable techniques in mathematics. Scientific computing is an important part of applied mathematics today, so it is often a part of student training and dissertation research.

Applicants should have a desire to apply a mathematical science (mathematics or statistics) to relevant problems in another area. To be prepared for graduate-level course work in both mathematics and the outside area, applicants should have a bachelor’s or master’s degree with a strong mathematics component and some background in the other area.

PLAN OF STUDY

Faculty members help each student plan a course of study that is consistent with the student’s background, interests, and goals.

These individual programs are designed to help students develop expertise in methods of applied mathematics and build a good foundation in related topics of theoretical mathematics. The individual programs also provide sufficient knowledge in an outside area to enable students to use mathematical techniques in that area.

Students can arrange their study plans to earn a master’s degree from another department after they complete part of their plan. Students find suitable thesis problems and supervisors with the help of the faculty.

COMPREHENSIVE EXAMINATIONS

Students take a qualifying examination over three of the four core course sequences required for the Ph.D. (differential equations, numerical analysis, analysis, and topology). They also take a comprehensive examination over the chosen outside area.
One program objective is to have each student’s dissertation research include many of the activities of an applied mathematical scientist. For example, a student might formulate a model, do a quantitative analysis of the model, and interpret the results.

**Admission and Financial Support**

Fellowships and research and teaching assistantships are available to qualified applicants. Fellowship support is available during the summers. Applications for fall semester admission and for financial support should be received by January 15. Information about admission requirements, financial support, graduate study, computing facilities, employment opportunities, recent graduates, and the faculty is available on The University of Iowa’s web site [http://www.uiowa.edu](http://www.uiowa.edu). For application forms and more information about the academic program, contact the chair of the Program in Applied Mathematical and Computational Sciences.

biosciences

The Biosciences Program provides graduate
students the freedom to explore research in any
of 12 University of Iowa biosciences research
departments and programs: the Departments of
Anatomy and Cell Biology, Biochemistry,
Biological Sciences, Chemistry, Microbiology,
Pharmacology, and Physiology and Biophysics,
and the Programs in Free Radical and Radiation
Biology, Genetics, Immunology, Molecular
Biology, and Neuroscience. The program leads to
a Ph.D. degree in one of the biosciences
disciplines.

Biosciences students enjoy the flexibility of
investigating several disciplines through research
rotations in the laboratories of Biosciences
Program faculty members. Following completion
of their first year in the program, students select a
research laboratory and program affiliation and
decide on a thesis project that will lead to a
Ph.D.

Semester hour requirements for the doctorate
vary by program, but all Ph.D. degrees at Iowa
require at least 72 s.h. of graduate study. For
detailed information on Graduate College
policies, see the Manual of Rules and Regulations
of the Graduate College.

Curriculum
During their first year in the program, students
perform three 10-week research rotations in
Biosciences Program departments and programs
of their choice. They also take a principles course
(156:201), a seminar course (156:265), and one
or more electives.

Biosciences students are advised on course
selection, research rotations, and registration by a
faculty member closely related to the student’s
research and academic interests. As research
rotations are assigned, the faculty adviser works
in consultation with the student’s rotation
advisers until the end of the first year.

Biosciences students provide a short oral
presentation following each research rotation to
an audience of their primary adviser, research
adviser(s), and other biosciences students.
Rotation advisers provide rotation reports, and
rotations are evaluated by the student’s primary
adviser. The student’s primary adviser also
confers with the student on course grades,
subsequent rotations, and the student’s selection
of a department or program and lab for thesis
research.

In addition to laboratory rotations, all biosciences
students take 156:201 Principles in Molecular
and Cell Biology, which provides a foundation for
understanding basic principles of molecular and
cell biology relevant to all bioscience disciplines
and teaches students how to evaluate literature
critically.

The Biosciences Seminar (156:265) dovetails
with current seminar series offered by the
Biosciences Program’s departments and
programs. At the beginning of each semester,
biosciences students meet to choose
approximately 12 seminars that they all will
attend. Students choose seminars under
advisement from the course instructor, who
ensures that all students contribute to the
selection process. During the first semester,
student groups are formed and each group selects
a paper from a chosen speaker to present. During
the second semester, individual students select and present a paper.

Overall student progress is monitored by the student’s primary adviser, rotation adviser(s), and program director, who meet at the end of each semester to review the student’s progress. At the end of the second semester, the primary adviser, in cooperation with rotation adviser(s), makes a recommendation to the Biosciences Program director whether the student should continue in the Ph.D. program. University guidelines, such as maintaining a cumulative g.p.a. of 3.00 or higher, are considered, along with performance in rotations.

During the second semester, Biosciences Program students meet with prospective mentors regarding thesis proposals and openings available in the mentors' laboratories. Students identify which program and laboratory they would like to join. Two weeks before the spring semester ends, students submit their choice of graduate programs and faculty mentors to the Biosciences Program office, which coordinates each student’s transfer to his or her chosen program. From that point on, the department or program advises the student and evaluates his or her performance.

Most participating departments and programs require that students take a comprehensive exam at the end of the second year and no later than the third year. Following successful completion of the exam, students are advanced to Ph.D. candidacy.

REQUIRED COURSES
All Biosciences Program students must complete the following course work. Students earn at least 12 s.h. each semester.

Fall Semester
- 156:201 Principles in Molecular and Cell Biology 4 s.h.
- 156:265 Biosciences Seminar 1 s.h.
- 156:302 Biosciences Research (10-week research rotations) arr.
One elective

Spring Semester
- 156:265 Biosciences Seminar 1 s.h.
- 156:302 Biosciences Research (10-week research rotations) arr.
- 650:270 Responsible Conduct in Research 1 s.h.
Two electives

Admission
The program accepts students with a variety of backgrounds in the biological and physical sciences. Entering students must hold a baccalaureate degree from an accredited college or university and should have completed courses in biology, chemistry, physics, and calculus consistent with requirements for a baccalaureate degree in the sciences. An undergraduate g.p.a. of at least 3.00 is required.

Applicants must submit their scores on the Graduate Record Examination; a combined verbal and quantitative score of 1200 and an analytical writing score of 4.5 or higher are preferred. Applicants whose first language is not English must score above 600 (paper-based) or 250 (computer-based) on the Test of English as a Foreign Language (TOEFL).

Other indicators of academic accomplishments, such as research experience and letters of recommendation, are considered.

Information about graduate training and application materials are available from the Biosciences Program office.

Financial Support
Graduate students receive stipend and tuition support from The University of Iowa and other sources. Students promoted to the second year in the program receive support from their graduate departments and programs. The Biosciences Program also helps some students apply for competitive national awards for outstanding academic and research achievement.

Facilities
The basic science and clinical departments of the Carver College of Medicine are clustered on the west campus of the University, primarily in the Bowen Science Building, Eckstein Medical Research Building, Medical Laboratories, Medical Education and Biomedical Research Facility, and University of Iowa Hospitals and Clinics. Nearby are the Hardin Library for the Health Sciences and the Veterans Affairs Iowa City Health Care System.

The Departments of Anatomy and Cell Biology, Biochemistry, Microbiology, Pharmacology, and Physiology and Biophysics are housed in the Bowen Science Building. Laboratories of clinical departments are located primarily in the Medical Laboratories and the Medical Research Center. The Eckstein Medical Research Building houses
major core facilities for microscopy, image
analysis, flow cytometry, protein structure, and
monoclonal antibody production, as well as
research laboratories for basic investigators with
interdisciplinary approaches to cancer, molecular
biology, genetics, and immunology. The
geographic proximity of these facilities promotes
interchange among clinical and basic science
faculty members and students and maximizes use
of the University's extensive core facilities for
biomedical research.

Integral to the University's research environment
are the Alzheimer’s Disease Research Center,
Holden Comprehensive Cancer Center, Iowa
Cardiovascular Center, Clinical Research Center,
Cooperative Human Linkage Center, Craniofacial
Anomalies Research Center, Diabetes-
Endocrinology Research Center, Digestive
Diseases Core Center, Iowa Child Health
Research Center, University of Iowa Cystic
Fibrosis Center, Iowa Specialized Center for
Pulmonary Research, Lipid Research Clinic,
Mental Health Clinical Research Center,
Schizophrenia Research Center, Iowa Center for
Gene Therapy, and Specialized Centers for
Congenital Heart Disease and Hypertension and
for Occupational and Immunological Lung
Disease.

In addition to the University's extensive facilities
for research support, the Carver College of
Medicine and the College of Liberal Arts and
Sciences operate a variety of research support
facilities. Tissue culture, autoclaving, purified
water, darkrooms, counters, and a variety of
general-use equipment and services are available
on a shared basis.

Courses

156:201 Principles in Molecular and Cell Biology  4 s.h.
Introduction to critical reasoning as applied to fundamental
principles of molecular and cell biology; recent scientific
literature. Repeatable.

156:265 Biosciences Seminar  1 s.h.
Focus on a journal article relevant to a weekly biosciences
seminar series. Repeatable. prerequisite: consent of instructor.
Same as 002:270, 072:342.

156:302 Biosciences Research  arr.
Research experience in the lab of a Biosciences Program faculty
member. Repeatable.
Chair: Debashish Bhattacharya (Biological Sciences)
Affiliated faculty: Michael Anderson (Physiology and Biophysics), William Ballard (Biological Sciences), Debashish Bhattacharya (Biological Sciences), Kevin Campbell (Physiology and Biophysics), Thomas Casavant (Electrical and Computer Engineering), Chi-Lien Cheng (Biological Sciences), Robert Cornell (Anatomy and Cell Biology), Beverly Davidson (Internal Medicine), Deborah Dawson (Preventive and Community Dentistry), John Donelson (Biochemistry), Daniel Ebert (Biological Sciences), Hatem El-Shanti (Pediatrics), Jan Fasler (Biological Sciences), Michael Feiss (Microbiology), Joseph Frankel (Biological Sciences), Pamela Geyer (Biochemistry), Gary Gussin (Biological Sciences), Michael Henry (Physiology and Biophysics), Erin Irish (Biological Sciences), Wayne Johnson (Physiology and Biophysics), Bradley Jones (Microbiology), Yoshito Kitamoto (Anesthesiology), Andrew Lidral (Orthodontics), Jim Jung-Ching Lin (Biological Sciences), John Logsdon (Biological Sciences), Robert Malone (Biological Sciences), Bryant McAllister (Biological Sciences), Anton McCaffery (Internal Medicine), Paul McCay (Pediatrics), John Menninger (Biological Sciences), W. Scott Meyers-Kowley (Physiology and Biophysics), Jeff Murray (Pediatrics), Shivanand Patil (Pediatrics), Henry Paulson (Neurology), Robert Piper (Physiology and Biophysics), Michael Rebagliati (Anatomy and Cell Biology), Andrew Russo (Physiology and Biophysics), Brian Schutte (Pediatrics), Alberto Segre (Computer Science, Val Sheffield (Pediatrics), Ming-Chie Shih (Biological Sciences), Curt Sigmund (Internal Medicine), Diane Staluski (Biological Sciences), Richard Smith (Otolaryngology—Head and Neck Surgery), Bento Soares (Pediatrics), George Stauffer (Microbiology), C. Martin Stoltzfus (Microbiology), Edwin Stone (Ophthalmology and Visual Sciences), Veronica Vieland (Biostatistics), Lori Wallrath (Biochemistry), Thomas Watanuki (Psychiatry), Lois Weinman (Biochemistry), David Weiss (Microbiology), Marcia Willing (Pediatrics), Mary Wilson (Internal Medicine), Chun-Fang Wu (Biological Sciences)

Graduate degree: Ph.D. in Genetics
Web site: http://genetics.grad.uiowa.edu

Doctor of Philosophy

The interdepartmental Ph.D. Program in Genetics is designed to promote collaborative investigation and intellectual interaction among students and faculty participants affiliated with several different departments.

Students who enroll in the program are encouraged to obtain a broad background in genetics, including molecular, population, and human genetics. Within this context, course requirements are flexible enough to permit students to tailor their formal course work to their individual needs.

Students have the option to declare a Ph.D. emphasis in computational genetics.

All students enrolled in the program are required to take the following courses.

All of these:
- 127:150 Genetic Analysis of Biological Systems 3 s.h.
- 127:200 Special Topics in Genetics [seminar course] 1 s.h.
- 156:201 Principles in Molecular and Cell Biology 4 s.h.

One of these:
- 002:171 Molecular Genetics 4 s.h.
- 142:210 Advanced Prokaryotic Molecular Biology 3 s.h.

One of these:
- 002:131 Evolution 4 s.h.
- 002:168 Genes and Development 3 s.h.
- 127:191 Human Molecular Genetics 3 s.h.

All of these:
- 650:270 Responsible Conduct in Research 1 s.h.
- Elective course work in molecular and microbial genetics, cell and development genetics, human genetics, or computational genetics 8 s.h.
- Seminar courses approved by the program 5 s.h.

Even more important than formal course work is the opportunity to do significant research in genetics. Research interests of the participating faculty include virtually all areas of genetics, ranging from bacteriophage genetics to human medical genetics. In each area of genetics, there is a group of faculty members who have closely related interests.

The University is also strong in several related disciplines, including microbial physiology, enzymology, virology, protein biochemistry, computational genetics, and developmental cell biology, all of which contribute significantly to the overall training program.

In addition to completing research and course work, students must pass a comprehensive examination, usually at the end of their second year in the program.
Medical Scientist Training Program

Students may combine study toward an M.D. and a Ph.D. in genetics. For information, contact the Medical Scientist Training Program (Carver College of Medicine).

Dental Scientist Training Program

Students with a D.D.S. degree may be candidates for the dental science program. For information, contact the College of Dentistry.

Admission

Prospective doctoral students in genetics should have a strong undergraduate background in science, including courses in general genetics, organic chemistry, biochemistry, introductory physics, and mathematics, as well as a strong commitment to genetic research and teaching. Students can make up deficiencies in a particular area during their first year of graduate study.

Admission to the program is based on assessment of applicants’ undergraduate academic records, performance on the Graduate Record Examination (GRE) Aptitude Test, and letters of recommendation. Admission requirements are not rigid. Most students working toward a Ph.D. in genetics at the University have an undergraduate g.p.a. above 3.50, and GRE Aptitude Test scores (verbal and quantitative) above 1250. Students with lower grade-point averages or GRE scores may be admitted, depending on prior research experience and other indications of academic potential.

Students generally begin graduate work in the fall semester.

Financial Support

All genetics graduate students receive a financial stipend of $22,000 (academic year 2005-2006) plus tuition.

Financial support comes from training grants, research assistantships, teaching assistantships, scholarships, individual research grants, or other departmental or college funds. All students are required to do some teaching as part of their development as future scientists and faculty members.

Associated Courses

The following courses provide credit toward the Ph.D. in genetics. Not all courses are offered every year.

The Immunology Program provides interdisciplinary training in the concepts and methodologies of basic and applied immunology. Faculty members are involved in a variety of research projects dealing with the immune system at all levels—structural, functional, cellular, biochemical, and molecular. The didactic component of the training comprises a sequence of core courses in immunology and related disciplines. Students are involved directly in laboratory research from their first semester through their original thesis projects leading to the Ph.D.

### Doctor of Philosophy

The program is quite flexible, accommodating students with a wide range of backgrounds in course work as well as practical experience in the biological and physical sciences. Entering students generally are expected to have strong records in biology, chemistry, biochemistry, microbiology, genetics, and mathematics. An introductory course in immunology is desirable. Deficiencies in specific areas often can be remedied through appropriate course work taken during the first year of graduate studies.

The curriculum consists of a sequence of required and elective courses that provide training in the conceptual and methodologic aspects of immunology. There is ample opportunity for study in a variety of fields that interface with immunology.

All students must take the following courses.

- 142:215 Molecular Biology of Gene Expression 3 s.h.
- 148:201 Graduate Immunology I 3 s.h.
- 148:202 Graduate Immunology II 3 s.h.
- 148:211 Immunology Seminar [taken fall and spring of first year, spring of second year] 1 s.h.
- 148:221 Advanced Topics in Immunology 3 s.h.
- 148:231 Research in Immunology arr.
- 156:201 Principles in Molecular and Cell Biology 4 s.h.
- Electives (approved by adviser) 6 s.h.

After successfully completing the comprehensive examination, usually at the end of the second year of graduate study, students advance to candidacy for the Ph.D. degree. They devote most of their time to research and writing their dissertation. Upon successful completion of all requirements, including the dissertation and its oral defense according to the Rules and Regulations of the Graduate College, students are awarded a Ph.D. in immunology.

### Admission

For information regarding admission and application procedures, contact the Immunology Program or visit its web site.

### Financial Support

All students in the Immunology Program receive stipends and tuition support, which comes from a variety of sources, including training grants from the National Institutes of Health, University of Iowa fellowships and graduate research assistantships, and individual faculty research grants.

### Facilities

Training is conducted in laboratories and teaching facilities of the Carver College of Medicine Departments of Internal Medicine, Pathology, Microbiology, Pediatrics, Pharmacology, and Urology. Faculty laboratories
and central research core facilities provide students with access to state-of-the-art research equipment.

Library and Information Science

Director: David Eichmann
Professor: Padmini Srinivasan
Professors emeritae: Esther Bierbaum, Velva Jeanne Osborn
Adjunct professor: Nancy L. Baker
Associate professors: David Eichmann, Christine Pawley
Associate professors emeriti: Louane L. Newsome, Carl Orgren
Adjunct associate professor: Jean Donham
Assistant professors: James Elmborg, Marc Light, Jennifer Burek Pierce
Graduate degree: M.A. in Library and Information Science
Web site http://www.uiowa.edu/~libsci

Today's age is defined by the intersection of information, technology, and human creativity. In this context, library and information science is dedicated to understanding the nature of information, the interaction between information and communication technologies, the relationship between information and knowledge, the cognitive and affective aspects of knowledge acquisition, and the interface between people and information. It offers new knowledge, technological benefits, and professional expertise for every dimension of human affairs.

Library and information professionals take on many challenges in serving the needs of their constituencies—children and teachers, members of academic communities, employees of profit and nonprofit organizations, and the public at large—constituencies that range from information poor to information rich. They work in the contexts of issues such as information and communication technology, public and private information policy, managerial policy, and regional, national, and international economics.

The School of Library and Information Science prepares professionals to meet these diverse challenges. It offers a graduate-level program of preparation for careers in all types of libraries and information centers, providing students with a strong, well-rounded education in an environment that supports individuals from all segments of a multicultural, multiethnic, and multilingual society. Its curriculum reflects the profession's immediate and long-range needs and prepares students to be leaders in a changing field.

By promoting excellence in research, the school contributes to the base of theoretical and practical knowledge in library and information science and helps develop an understanding of how to meet the varied and changing information needs of individuals and society. It also provides public service through continuing education programs, selective consulting services for library and information centers, and participation in professional organizations.

The school strongly encourages its students, faculty members, and alumni to shape the future of the profession by filling key roles in organizations involved in all aspects of the information cycle.

Master of Arts

The master's program has held continuous accreditation from the American Library Association since 1971.

Students pursuing the master's degree gain an understanding of the foundations of the library and information profession, including the history of the field, ethical and philosophical concerns, the information cycle, principles and procedures for dealing with a variety of information carriers, and the theory and practice of strategic management. They examine future trends, with emphasis on cutting-edge technological concerns. They study the discipline's research base, gaining heightened awareness of the synergism between library and information science and other disciplines, as well as the close relationship between research and practice. Finally, students become knowledgeable about the factors that underline users' information needs and appropriate strategies to satisfy those needs.

Graduates have many options for employment. Alumni hold positions in public, school, special, and academic libraries as well as other information settings. They serve in varied roles, such as information consultant, database manager, library administrator, webmaster, network coordinator, cataloger, children's librarian, school library media specialist, and archivist.
Curriculum
The Master of Arts in library and information science requires 36 s.h. of graduate credit with a g.p.a. of at least 3.00, and the successful completion of a portfolio. The 36 s.h. include 17 s.h. earned in required core courses and 19 s.h. earned in electives, distributed among four curricular clusters. A thesis option is available for students who wish more research experience.

The curriculum is designed around four cluster areas: foundations/applications, conceptual structures/systems, resources/services, and policy/planning. Students may choose an area of concentration, but they are required to take courses in each cluster.

FOUNDATIONS/APPLICATIONS
Minimum requirement is 6 s.h.

Core Courses
021:101 Foundations of Library and Information Science 3 s.h.
021:202 Research Methods 3 s.h.

Electives
021:282 Practicum in Libraries and Information Centers 2-3 s.h.
021:284 School Library Media Practicum 3 s.h.
021:286 Research Practicum 1-3 s.h.
021:292 Independent Study 1-3 s.h.
021:299 Thesis 6 s.h.

CONCEPTUAL STRUCTURES/SYSTEMS
Minimum requirement is 7 s.h.

Core Courses
021:120 Design of Automated Systems 3 s.h.
021:122 Organization of Information I 3 s.h.

Electives
021:123 User Education: Multimedia 3 s.h.
021:124 Database Systems 3 s.h.
021:220 Programming for Text Manipulation 3 s.h.
021:222 Organization of Information II 3 s.h.
021:224 Electronic Publishing 3 s.h.
021:226 Digital Libraries 3 s.h.
021:228 Hypertext Systems 2 s.h.
021:230 Text Retrieval 3 s.h.
021:232 Computer Networks 3 s.h.
021:234 Information Knowledge Management 3 s.h.
021:239 Topics 1-3 s.h.

RESOURCES/SERVICES
Minimum requirement is 5 s.h.

Core Course
021:141 Reference and Information Services 3 s.h.

Electives
021:142 Web Search Engines 1 s.h.
021:143 Resources for Children 3 s.h.
021:144 Resources for Young Adults 3 s.h.
021:240 Collection Management 3 s.h.
021:242 Online Information Systems 2 s.h.
021:244 Government Information Resources 3 s.h.
021:248 Information Literacy 1 s.h.
021:254 Analysis of Scholarly Domains 3 s.h.
021:256 History of Readers and Reading 3 s.h.
021:258 The Transition From Manuscript to Print 3 s.h.
021:259 Topics 1-3 s.h.

POLICY/PLANNING
Minimum requirement is 5 s.h.

Core Courses
One of these:
021:260 Strategic Management 2 s.h.
021:262 School Library Media Administration 2 s.h.
021:263 Nonprofit Organizational Effectiveness I 3 s.h.

Electives
021:264 Program Evaluation 1 s.h.
021:265 Nonprofit Organizational Effectiveness II 3 s.h.
021:269 Archives Administration 3 s.h.
021:270 Public Libraries 3 s.h.
021:271 College and University Libraries 3 s.h.
021:272 Special Libraries 3 s.h.
021:275 Health Informatics I 3 s.h.
021:278 Information Policy 2 s.h.
021:279 Topics 1-3 s.h.

Transfer Credit
Up to 9 s.h. of graduate credit in library and information science or related areas may be accepted in transfer from another institution, subject to the approval of the transfer credit committee. Approval is given course-by-course and is determined by the course’s content, currency, and applicability to the student’s program.
Completion Time
Students typically complete the program in a year and a half. The maximum allowable load for graduate students is 15 s.h. during regular semesters and 8 s.h. during summer sessions, but most full-time students carry fewer semester hours than the maximum. It also is possible to complete the program on a part-time basis.

Specializations
Students earn 19 s.h. in elective courses selected with the guidance of their adviser. Students’ programs often are designed around particular career goals. Following are examples of possible specializations.

PUBLIC LIBRARIES
Public libraries provide informational, educational, and recreational materials and a wide range of services for a diverse clientele. Although public libraries receive the bulk of their funding from local taxes, they also may be organized on a regional or statewide cooperative basis. The variety of uses, services, materials, and organizational structures of public libraries makes this a challenging area of librarianship. Public librarians need to develop skills in analyzing the communities they serve, designing comprehensive marketing plans to meet their needs, implementing the plans in a cost-effective way, and evaluating the success of their efforts.

ACADEMIC LIBRARIES
The academic library, whether in a community college, a four-year college, or a university, provides information services in support of the parent institution’s teaching, research, and public service missions. These services include instruction in the use of the library and its resources. Management skills and subject or language competence often are required. Since librarians in this setting usually are considered academic faculty members, possession of a second master’s or other advanced degree is desirable.

SPECIAL LIBRARIES AND INFORMATION CENTERS
Special libraries serve corporations, private companies, government agencies, technical and academic institutions, museums, medical facilities, and information management consulting firms. They are organized to anticipate and quickly respond to the specific information needs of their users. Special librarians are information resource experts who collect, analyze, evaluate, package, and disseminate information to facilitate accurate decision making. Knowledge of information technology and the ability to design services suitable to the parent organization are professional necessities. In addition, substantial subject expertise may be required.

SCHOOL LIBRARY MEDIA CENTERS
The school library media center makes available to students and teachers a wide range of library and instructional materials in a variety of formats. The work of the library media specialist includes providing instruction to students in accessing, evaluating, and using information, collaborating with teachers on the use of resources in instruction, providing leadership in the use of instructional and information technologies, offering reading guidance, providing reference service, and managing the library media center. The University of Iowa offers a state-approved program leading to endorsement as school media specialist K-12. In order to fulfill state requirements for this endorsement, students must hold or be eligible for a teaching license and must complete a designated sequence of courses, which leads both to certification and to the M.A. degree.

INFORMATION SCIENCE
The multidisciplinary field of information science is influenced by the rapid growth in digital information collections and technologies. This specialization offers expertise in retrieval, dissemination, and use of information. In addition to libraries and information centers, many for-profit organizations are finding that information is a valuable commodity in today’s competitive world and are employing information management personnel. The curriculum offers opportunities to study information science aspects, such as digital libraries, electronic publishing, and automated systems design.

Joint Master’s Degree Programs
The School of Library and Information Science has established joint degree programs with the Tippie College of Business and the College of Law. The primary goal of these joint programs is the integration of the two areas of study. To enroll in a joint program, students must be admitted to the School of Library and Information Science and to the other unit. Up to 9 s.h. in business or law may be applied toward the M.A. in library and information science; up to 9 s.h. in library and information science may
be applied toward the M.B.A., and 12 s.h. may be applied to the J.D.

In addition to these formal joint programs, arrangements can be made for joint programs between departments on an ad hoc basis. A minimum of 60 s.h. of graduate work is required for a joint master’s degree program.

For more information on joint degrees, see College of Law in the Catalog or contact the Tippie College of Business.

**Joint M.A./Book Studies Certificate**

Students interested in special collections, book arts, or museum librarianship may pursue a M.A. in library and information science in conjunction with a graduate Certificate in Book Studies/Book Arts and Technologies. The joint program also may be appropriate for students interested in book studies scholarship and those seeking careers in publishing, graphic arts, or book-related industries that require a similar blend of subject and technical knowledge.

To enroll in the joint program, students must be admitted both to the School of Library and Information Science and to the Center for the Book, and must fulfill the basic requirements of each program.

The joint program requires a total of 51 s.h. At least 27 s.h. must be earned in the M.A. program, at least 15 s.h. must be earned in the certificate program, and the remaining 9 s.h. may be earned in either program.

**Health Informatics Certificate**

Students interested in careers involving health science libraries or hospital information centers may pursue the interdisciplinary Certificate in Health Informatics. The certificate, offered by the Graduate College and several other colleges and departments, emphasizes the organization, management, and use of health care information; health care research, education, and practice; and information technology developments in the socioeconomic context of health care.

The certificate requires at least 20 s.h. of course work, including Health Informatics I and II and approved electives. Students may earn the Certificate in Health Informatics in conjunction with their M.A. in library and information science. Visit [http://www.uiowa.edu/health-informatics](http://www.uiowa.edu/health-informatics) for more information.

**Facilities and Resources**

The School of Library and Information Science is housed in the south wing of the University’s Main Library, in a setting that promotes community among students, faculty, and staff. Facilities are provided for the varied instructional and research activities of the school.

**Technology Laboratory**

The school houses a state-of-the-art technology laboratory with current Pentium and Macintosh computers. The computers are networked to the campus backbone and provide access to a rich variety of relevant software. The laboratory is used primarily by students for course assignments and to gain experience with specialized software. In addition, the classrooms are equipped with networked machines that allow faculty members to use teaching technologies in their courses. Finally, an Apple XServe is used to deliver and maintain a common software environment.

Students have access to Dialog, LEXIS, NEXIS, OCLC databases, Westlaw, and a wide variety of library automation products. They also are given an account for file storage.

**Research Laboratory**

The facilities of the school’s research laboratory are used by faculty members and students to investigate current problems, such as distributed information retrieval, cross-language information retrieval, and information filtering. They are available for student-based research investigations.

**University Libraries**

All of the resources of the University of Iowa Libraries are available to students and faculty of the school. The system contains more than 4 million volumes in the Main Library and 11 departmental libraries.

The web-based catalog provides access to books and periodicals, electronic indexes, and full-text databases held by University Libraries. In addition, the InfoHawk Gateway to online resources provides access to selected Internet and CD-ROM resources arranged by subject and academic discipline. Wireless Internet access is available in many areas of the Main Library.

Students also have full access to the Information Arcade, which facilitates integration of new
information and multimedia technologies with learning and research. Here students find a variety of electronic resources for learning advanced information skills and for gaining access to information in various formats and through various networks, including the Internet. The Arcade also houses an electronic classroom.

The third floor of the Main Library houses the government publications, map, and special collections rooms, including the Iowa Women’s Archives.

Other Libraries

Students have access to a variety of libraries through field trips, practicum experience, and personal use: the State Historical Society Library in Iowa City; the Iowa City, Coralville, and Cedar Rapids public and school libraries; the Augustana, Coe, Cornell, Mount Mercy, and Grinnell College libraries; and the Herbert Hoover Presidential Library in West Branch.

The Iowa City Public Library, only four blocks from the Main Library, was one of the first public libraries in the nation to convert to a totally computerized catalog. Its service philosophy and contemporary management practices provide students with an innovative public library model. The Iowa City Community School District’s media program has been recognized nationally for its excellence in information skills curriculum and for leadership in technology.

Other Resources

Lindquist Center, across the street from the Main Library, houses the College of Education Curriculum Resources Laboratory and Education Technology Center. The Curriculum Resources Laboratory contains an extensive collection of book and nonbook instructional materials for children in preschool through grade 12. It is especially valuable for students interested in school or public library work.

Lindquist Center also houses the academic technologies and campus services departments of the University’s Information Technology Services. It provides instructional and research computing facilities and services for the University community. All University students, staff, and faculty may use the center’s computers for University-related research, thesis preparation, and class work. Instructional Technology Centers provide campuswide access to the University’s academic computing resources and the Internet.

Student Activities

All students in the program are automatically members of LISSO, the Library and Information Science Student Organization, which also serves as the student chapter of the American Library Association. In addition, there are student chapters of the American Society for Information Science and Technology (ASIST) and Special Libraries Association (SLA). These student-run organizations sponsor various activities such as speaker series, workshops, brown bag lunches, and picnics. The associations provide students with significant opportunities for professional and extracurricular growth. Students also are encouraged to join other state and national professional organizations.

Honor Society

The Beta Beta Theta Chapter of Beta Phi Mu, the international honor society for library and information science, is located at The University of Iowa. Each year new members are chosen from the top 25 percent of the preceding year’s graduating classes. To be eligible for membership, graduates must achieve a g.p.a. of at least 3.75, demonstrate professional promise, and be recommended by the faculty.

Placement

The school provides active placement assistance to its graduates through printed and electronic announcements, seminars on Internet job searching, résumé writing and interviewing, and personal counseling. The University’s Educational Placement Office issues a regular listing of job openings and provides a credential file service.

According to the annual placement survey in Library Journal, Iowa’s placement rate consistently ranks among the highest for ALA-accredited programs. Iowa graduates find positions in all types of libraries. The placement distribution for six recent years was: academic libraries, 38 percent; public libraries, 28 percent; special libraries, 17 percent; and school libraries, 17 percent. Iowa graduates currently work in libraries in 46 states and 9 foreign countries. Strong personal and academic qualifications, job flexibility, and geographic mobility are important factors in obtaining a position.
Admission

Applicants for admission to the M.A. program are required to have a g.p.a. of at least 3.00 on a 4.00 scale and are required to take the GRE General Test. The admissions committee also considers each applicant’s letters of recommendation, statement of purpose, and other appropriate criteria. Each entering class is selected on a competitive basis.

International applicants whose first language is not English must score 600 (paper-based) or 250 (computer-based) or higher on the Test of English as a Foreign Language (TOEFL).

Applicants begin the admission process by contacting the School of Library and Information Science. The process requires a completed application form, transcripts of all academic work, a written statement of purpose and goals, three letters of recommendation, and an on-campus or telephone interview with members of the faculty.

Completed applications should be received by the school by February 1 for consideration for fall admission. Decisions of the admissions committee are announced three to four weeks after the deadline. Late applications are considered if places are still available. Financial aid often is not available for late applicants. Admitted students are immediately assigned a faculty adviser for program planning.

Financial Support

The School of Library and Information Science awards partial-tuition scholarships and one-quarter-time graduate assistantships. To be considered for scholarships or assistantships, applicants must have an undergraduate g.p.a. of at least 3.00 and a combined score (verbal, quantitative, and analytical) of 1700 on the old GRE General Test, or 1100 (verbal and quantitative) and 4.5 (analytical writing) on the new GRE. Prospective students are urged to apply for these awards before February 1. For information on student loans, work-study eligibility, or other financial assistance, contact the Office of Student Financial Aid. For information on national scholarships, contact the School of Library and Information Science or visit its web site. Part-time employment usually is available in the University Libraries and other campus units.

</tbody>
</table>
021:222 Organization of Information II 3 s.h.
Systems for describing materials and information in catalogs and organizing them for effective retrieval in libraries, museums, and other information centers; AACR2 descriptive principles, Dewey and Library of Congress classifications, Sears and LC subject headings, cataloging networks and services. Prerequisite: 021:122.

021:223 Organization of Information III 3 s.h.
Special problems in description of materials; authority work; file structures; serials, other nonmonographic materials; Library of Congress, other classifications; subject headings, cataloging networks and services. Prerequisite: 021:222.

021:224 Electronic Publishing 3 s.h.

021:226 Digital Libraries 3 s.h.
Current digital libraries efforts; models, methods, tools that support digital libraries. Prerequisite: 021:120.

021:228 Hypertext Systems 2 s.h.
Theory, design, and implementation of hypertext-based information systems; access mechanisms, including navigation, browsing, search; issues in representation of information, user interfaces; case studies of representative systems, including the World Wide Web. Prerequisite: 021:101.

021:230 Text Retrieval 3 s.h.
Theories for automatic text representation and retrieval using text databases; evaluation methodologies; alternative query models—Boolean, extended Boolean, probabilistic, vector fuzzy, rough set models; vocabulary normalization; web search engines, metadata. Prerequisite: 021:120 or consent of instructor. Same as 06K:233.

021:232 Computer Networks 3 s.h.
Fundamental concepts in telecommunications and networking; survey of network technologies and services, with emphasis on understanding digital data communications and their role in business organizations. Prerequisite: 06K:220. Same as 06K:250.

021:234 Information Knowledge Management 3 s.h.
Issues in distributed, networked, heterogeneous, and dynamic information environments (intranets, web); hypertext, XML, CGI, and scripting languages; algorithms for coping with information overload and scalability—indexing, crawling, search engines, information filtering, information agents and brokers. Corequisite: 06K:230 or 06K:250. Same as 06K:234.

021:239 Topics: Conceptual Structures/Systems 1-3 s.h.
Special topics relevant to conceptual structures (e.g., knowledge representation, manipulation schemes) and systems (e.g., intelligent OPACS, user interface technologies). Repeatable. Prerequisite: 021:120.

021:240 Collection Management 3 s.h.
Collection management of print and electronic resources; selection and management principles, policies, procedures in various settings; production and distribution of resources; intellectual freedom.

021:242 Online Information Systems 2 s.h.
State-of-the-art online information systems, free-based and fee-based; theories and behavioral models in information seeking, services, management.

021:244 Government Information Resources 3 s.h.
Emphasis on federal documents as an information resource; state, local, foreign, international materials; special concerns of organizing and administering document collections.

021:248 Information Literacy 1 s.h.
Models of the information search process; design of information literacy curriculum and teaching strategies based on models; emphasis on theory and research on behaviors and skills of information seeking. Corequisite: 021:101.

021:254 Analysis of Scholarly Domains 3 s.h.
Information transfer in academic disciplines; scientific method; other means of knowledge construction, resulting literatures; reference tools used to control literature for a variety of audiences; emphasis on humanities, social sciences, or sciences. Prerequisite: 021:141.

021:256 History of Readers and Reading 3 s.h.
Social nature of American reading practices from colonial times to present; theories and contexts of reading; reading communities; dimensions of gender, age, class, religion, race, ethnicity; examples of recent scholarship; use of primary resources; seminar. Same as 108:220.

021:258 The Transition from Manuscript to Print 3 s.h.
Same as 108:183, 16E:118.

021:259 Topics: Resources/Services 1-3 s.h.
Current topics in types of information resources and services.

021:260 Strategic Management 2 s.h.
Principles of strategic planning, management, leadership; user-centered library and information center services, designing internal management information systems for decision making, creating a climate conducive to change.

021:262 School Library Media Administration 2 s.h.
Design of library media programs; development of philosophy, analysis of functions, program/personnel evaluation; emphasis on curricular and teaching roles of library media specialists.

021:263 Nonprofit Organizational Effectiveness I 3 s.h.

021:264 Program Evaluation 1 s.h.
Purposes of program evaluation, including improvement, accreditation, funding support; strategies for evaluating programs, including cost-benefit analysis, outcomes-based evaluation, output measures, rubrics for program evaluation; relationship between institutional mission, evaluation. Prerequisite: 021:202.

021:265 Nonprofit Organizational Effectiveness II 3 s.h.

021:269 Archives Administration 3 s.h.
Purpose and function of archival repositories; elements of archival practice—collection solicitation, appraisal, arrangement and description of collections, preservation and conservation, reference, outreach.

021:270 Public Libraries 3 s.h.
Historical development of public libraries; current issues in public library management and policy making, including intellectual freedom; readers advisory service and genres of popular materials for adults.

021:271 College and University Libraries 3 s.h.
Objectives, organization, unique functions and services of academic libraries; educational environment in which academic libraries function; examination of issues and problems affecting academic libraries.

021:272 Special Libraries 3 s.h.
Management, organizational structures, collections, client services in special libraries; site visits to a variety of special libraries, information centers; projects that apply theoretical principles.

021:275 Health Informatics I 3 s.h.
Technological tools that support health care administration, management, and decision making. Prerequisite: graduate standing or consent of instructor. Same as 06K:225, 050:283, 051:187, 056:186, 074:191, 096:283, 174:228.

Molecular Biology

Director: Minnetta V. Gardinier (Pharmacology)
Affiliated faculty: Michael Apicella (Microbiology), Nikolai Artemyev (Physiology and Biophysics), Jackie Bickenbach (Anatomy and Cell Biology), Gail Bishop (Microbiology), Kevin Campbell (Physiology and Biophysics), Steven Clegg (Microbiology), Michael Cohen (Pathology), Beverly Davidson (Internal Medicine), Frederick Domann (Radiation Oncology), John E. Donelson (Biochemistry), Martine Dunnwald (Dermatology), John Engelhardt (Anatomy and Cell Biology), Sarah England (Physiology and Biophysics), Michael Feiss (Microbiology), Rory Fisher (Pharmacology), Sonya Franklin (Chemistry), Alice Fulton (Biochemistry), Minnetta Gardinier (Pharmacology), Pamela Geyer (Biochemistry), Prabhat Goswami (Radiation Oncology), Steven Green (Biological Sciences), Gregory S. Hageman (Ophthalmology and Visual Sciences), Raymond Hohl (Internal Medicine), Mary Horne (Pharmacology), Aloysius Klingelhofer (Microbiology), John Koland (Pharmacology), C. Michael Knudson (Pathology), Amnon Kohen (Chemistry), David Kuśner (Internal Medicine), Gloria Lee (Internal Medicine), Steven Lentz (Internal Medicine), Andrew Lidrai (Orthodontics), Jim Jung-Ching Lin (Biological Sciences), Wendy Maury (Microbiology), Anton McCaffrey (Internal Medicine), Jeffery Meier (Internal Medicine), John R. Menninger (Biological Sciences), Scott Mye-Rowley (Physiology and Biophysics), Jeffrey Murray (Pediatrics), William M. Nauseef (Internal Medicine), Henry Paulson (Neurology), David Price (Biochemistry), Dawn Quelle (Pharmacology), Michael Rebagliati (Anatomy and Cell Biology), Richard Roller (Microbiology), Peter A. Rubenstein (Biochemistry), Andrew Rusko (Physiology and Biophysics), David Sheff (Pharmacology), Curt D. Sigmund (Internal Medicine), Mark Stammes (Physiology and Biophysics), Jack Stapleton (Internal Medicine), Mark F. Stintzi (Microbiology), C. Martin Stolzthau (Microbiology), Edwin Stone (Ophthalmology and Visual Sciences), Stefan Strack (Pharmacology), Christie Thomas (Internal Medicine), Lubomir P. Turek (Pathology), Lori Walfarth (Biochemistry), Todd Washington (Biochemistry), Daniel Weeks (Biochemistry), Lois S. Weissman (Biochemistry), David Weiss (Microbiology), Michael Welsh (Internal Medicine), Mary Wilson (Internal Medicine), Marc Wolf (Biochemistry), Charles Yeaman (Anatomy and Cell Biology), Joseph Zabner (Internal Medicine)

Graduate degree: Ph.D. in Molecular Biology
Web site: http://molbio.grad.uiowa.edu

Doctor of Philosophy

The Molecular Biology Program provides interdisciplinary training in the concepts and methodologies fundamental to the investigation of biological mechanisms at the molecular level. Faculty members are involved in a variety of research projects related to gene expression and regulation. The principal didactic component of the program is a sequence of core courses in molecular and cellular biology. Students engage in laboratory research immediately upon enrollment and progress rapidly to original thesis projects that lead to a Ph.D. in molecular biology.

The program is sufficiently flexible to accommodate students with a wide range of backgrounds in the biological and physical sciences. Entering students are expected to have a solid background in science, including introductory biology and chemistry, organic chemistry, physical chemistry, calculus, genetics, and biochemistry. Students can remedy deficiencies in particular areas by taking appropriate courses during the first year of graduate study.

The curriculum consists of a sequence of required and elective courses that provide didactic training in molecular biology and ensure a comprehensive exposure to concepts and experimental methodologies in the field. Because of the diversity of biological research problems that can be pursued by employing molecular biological approaches, the program provides a variety of options for specialization in particular areas of interest.

REQUIRED COURSES

All students must take the following courses. Precomprehensive students register for 142:280 every semester; postcomprehensive students participate in a journal club of their choice. All students register for 142:290 Seminar in Molecular Biology every semester.

156:201 Principles in Molecular and Cell Biology (fall)
4 s.h.

One of these (fall or spring):
142:210 Advanced Prokaryotic Molecular Biology
3 s.h.
142:215 Molecular Biology of Gene Expression
3 s.h.
One of these (fall or spring):
142:220 Mechanisms of Cellular Organization 3 s.h.
142:225 Mechanisms of Cell Growth and Development 3 s.h.

One of these (fall or spring):
Biochemistry/chemistry core (see list below) 3 s.h.
Pharmacology/physiology core (3 s.h. minimum, see list below) 3 s.h.

All of these:
142:280 Topics in Molecular Biology (fall and spring) 1 s.h.
142:290 Seminar in Molecular Biology 1 s.h.
650:270 Responsible Conduct in Research 1 s.h.

CORE REQUIREMENT
Biochemistry/Chemistry:
004:180 Introduction to Molecular Modeling 3 s.h.
004:205 Bioinorganic Chemistry 3 s.h.
004:211 Chemical Catalysis in Biology 3 s.h.
099:241-099:242 Biophysical Chemistry I-II 6 s.h.

Pharmacology/Physiology:
002:155 Cell Physiology 4 s.h.
061:260 Graduate Microbial Physiology 3 s.h.
071:135 Principles of Pharmacology 4 s.h.
072:153 Graduate Physiology 4 s.h.

In addition, all students are required to complete at least 6 s.h. chosen from the approved elective courses.

After successfully completing the comprehensive examination, usually at the end of the second year of graduate study, students advance to candidacy for the Ph.D. degree. They devote all of their time to completing thesis research and writing their Ph.D. dissertation. Upon successful completion of all requirements, including the dissertation and its oral defense according to the Rules and Regulations of the Graduate College, students are awarded a Ph.D. in molecular biology.

Financial Support
Graduate students in the Molecular Biology Program receive stipends and tuition support from institutional and extramural sources, including training grants from the National Institutes of Health, and University of Iowa fellowships and graduate research assistantships.

Facilities
Training is conducted primarily in laboratories and teaching facilities of the Carver College of Medicine Departments of Anatomy and Cell Biology, Biochemistry, Dermatology, Internal Medicine, Microbiology, Neurology, Ophthalmology and Visual Sciences, Pathology, Pediatrics, Pharmacology, Physiology and Biophysics, and Radiation Oncology, and in the College of Liberal Arts and Sciences Departments of Biological Sciences and Chemistry. Faculty laboratories and central research facilities available to students provide access to the most up-to-date research equipment.

Courses
142:210 Advanced Prokaryotic Molecular Biology 3 s.h.
Mechanism and regulation of DNA, RNA, and protein synthesis in bacteria. Prerequisites: 156:201, or 002:128 and 099:130; and consent of instructor. Same as 061:210.

142:215 Molecular Biology of Gene Expression 3 s.h.
Principles and techniques for investigating mechanisms of controlling eukaryotic gene expression; basic genome organization, chromatin structure, transcription, RNA processing, translation; cloning methods, use of electronic sequence databases, footprinting, chromatin immunoprecipitation, in vivo and in vitro transcription assays, DNA microarray analysis, information retrieval. Prerequisite: 156:201.

142:220 Mechanisms of Cellular Organization 3 s.h.
Integration of concepts of cell biology, original research data concerning structure, chemistry, function of cellular organelles and their assembly; emphasis on relation of cellular structure, function from macromolecular to organelle-cellular levels of organization; plasma membrane, endoplasmic reticulum, cytoskeleton, centrosome and centrosome; Golgi apparatus, lysosome, mitochondrion, nucleus. Prerequisite: 099:130 or equivalent. Same as 060:216, 072:220.

142:225 Mechanisms of Cell Growth and Development 3 s.h.
Molecular mechanisms that control cell proliferation and differentiation, cancerous transformation, and normal embryonic development; current understanding of intracellular signaling processes, cell cycle control, oncogenes and tumor suppressor genes, mechanisms of apoptosis (programmed cell death), and cellular senescence (aging). Prerequisite: 156:201 or consent of instructor. Same as 060:225, 072:225.

142:280 Topics in Molecular Biology 1 s.h.
Opportunity to work closely with participating faculty to gain skill in critical reading of research literature and facility in presenting the material to an audience. Repeatable. Prerequisite: advanced graduate standing and consent of instructor.

Wasserman (Psychology), Joshua Weiner (Biological Sciences), Michael Welsh (Internal Medicine), John Wemmie (Psychiatry), Terence H. Williams (Anatomy and Cell Biology), Chun-Fang Wu (Biological Sciences)

Graduate degree: Ph.D. in Neuroscience
Web site: http://neuroscience.grad.uiowa.edu

The Neuroscience Program provides an interdisciplinary and interdepartmental approach to graduate education and research training in the structure, function, and development of the nervous system and its role in cognition and behavior. Students obtain training at all levels of the nervous system, from cellular/molecular to behavioral/cognitive. Following broad-based instruction in a core curriculum, students focus on one of three main tracks in the program: cellular/molecular, systems/development, or behavioral/cognitive.

Doctor of Philosophy

The Neuroscience Program curriculum is designed around three tracks: molecular/cellular, developmental/systems, and cognitive/behavioral. Students specialize in one of the tracks. The curriculum for each student is tailored to meet his or her needs, depending on the student's background and choice of track. All Neuroscience Program students must complete a set of core courses in addition to course work appropriate for their chosen tracks.

Within a framework of core, track-specific, and elective courses, each student pursues a program of study individually designed according to his or her undergraduate training and graduate research goals. After enrolling in the Neuroscience Program, entering students consult with the advisory committee regarding their level of preparation for the program's required courses. The Student Advisory Committee meets with all first- and second-year graduate students once each semester, helping each student explore his or her research interests and select faculty mentors for the required laboratory rotations. Each student is expected to complete three rotations in faculty laboratories before selecting a thesis adviser. Rotations ordinarily last 12 weeks but may last from 8 to 16 weeks. Under special circumstances, two rotations may be in the same laboratory, an arrangement that permits the student to learn a variety of techniques and approaches before settling down to work on the dissertation project. Students usually choose a dissertation lab at the end of their first year.
Students are expected to demonstrate competency, through prerequisites or coursework, in each of four fields: biochemistry, general physiology, cell biology, and statistics. These requirements ordinarily should be fulfilled by the end of the first year of graduate study. Waivers of background course requirements may be requested by students who have taken equivalent courses before entering the neuroscience program.

**NEUROSCIENCE CORE**

The following nine courses form the core of the neuroscience graduate curriculum.

- 132:180 Fundamental Neuroscience 4 s.h.
- 132:181 Neurophysiology 3-4 s.h.
- 132:230 Methods in Neuroscience 2 s.h.
- 132:234 Medical Neuroscience 4 s.h.
- 132:240 Topics in Cognitive Neuroscience (cognitive track) 3 s.h.
- 132:246 Developmental Neurobiology 3 s.h.
- 156:201 Principles in Molecular and Cell Biology (molecular track) 4 s.h.
- 650:270 Responsible Conduct in Research 1 s.h.
- A statistics course 3-4 s.h.

In addition, students register for the following two courses each semester.

- 132:265 Neuroscience Seminar 0-1 s.h.
- 132:305 Neuroscience Research arr.

**ELECTIVES**

Elective requirements may be met with three or more courses from a list of courses offered by the Departments of Anatomy and Cell Biology, Biological Sciences, Pharmacology, Physiology and Biophysics, Psychology, and other departments as appropriate. Students must take electives in at least two of the program's three tracks, ensuring that they receive advanced training both in their area of specialization and in related areas of neuroscience. With permission of the Student Advisory Committee, students may satisfy the elective requirement wholly or in part by registration in 132:301 Directed Study in Neuroscience.

**Financial Support**

Full-time Neuroscience Program students receive stipends and full tuition scholarships through fellowships and research assistantships. Awards are renewed annually, based on continued satisfactory progress and availability of funds. For 2005-06, the standard stipend for graduate students is $22,000. University of Iowa Presidential Fellowships, awarded on a competitive basis to incoming graduate students, provide entry-level stipends of $21,000 per year (a supplement provided by the Neuroscience Program raises this entry-level stipend to $23,000 per year).

The Neuroscience Program is committed to supporting its graduate students for their entire training period. Students normally are supported in the first year by the program. After that, support is expected to come from the student's primary research mentor. Occasionally, advanced students are supported through teaching assistantships. Tuition is paid for all students.

**NIH Training Grant**

The Neuroscience Program is supported by a training grant from the National Institutes of Health. The grant provides stipend and tuition support for a select group of first- and second-year graduate students.

**Facilities**

Training is conducted primarily in the laboratories and teaching facilities of the Carver College of Medicine graduate Departments of Anatomy and Cell Biology, Biochemistry, Pharmacology, and Physiology and Biophysics; clinical Departments of Internal Medicine, Neurology, and Psychiatry; and the College of Liberal Arts and Sciences graduate Departments of Biological Sciences, Exercise Science, Psychology, and Speech Pathology and Audiology. Students use faculty laboratories and central research facilities for ultrastructural analysis; histochemistry and immunocytochemistry; electrophysiology; fluorescence-activated cell sorting; cellular and subcellular biochemistry; cell, tissue, and organ culture; operant and classical conditioning; molecular biology; behavioral genetics; neural substrates of complex behavior; brain-behavior relationships in humans; neuropsychology; and functional neuroimaging (PET, fMRI).

Rhetorics of Inquiry (POROI)

Director: Thomas Swiss (English/Rhetorics of Inquiry)
Curriculum committee: David Depew (Communication Studies/Rhetorics of Inquiry), Leslie H. Margolin (Counseling, Rehabilitation, and Student Development/Rhetorics of Inquiry), Joanna Ploeger (Communication Studies), Merrie Snell (Rhetorics of Inquiry), Thomas Swiss (English/Rhetorics of Inquiry), Charles Williams (American Studies)
Graduate nondegree program: Certificate in Rhetorics of Inquiry
Web site: http://www.uiowa.edu/~poroi

The Project on Rhetorics of Inquiry (POROI) is an interdisciplinary program that explores how scholarship and professional discourse are conducted through argument, how paradigms of knowledge are sensitive to social-political contexts, and how the presentation of scholarly and professional findings is an audience-sensitive process.

POROI began informally in 1980. Its activities now include seminars, workshops, national conferences, a variety of classes, and a peer-reviewed online journal. Together with the Graduate College, POROI also offers the graduate certificate program in rhetorics of inquiry.

Certificate

Students may pursue the Certificate in Rhetorics of Inquiry in conjunction with a graduate degree in any field. The certificate program gives students the opportunity to enhance their abilities to argue in oral, written, and multimedia forms within their own disciplines, and to enhance their understanding of the similarities and differences among various fields.

The program’s objectives are to:

- help students cultivate habits of interdisciplinary study and research through reading, writing, and conversation;
- encourage students to cross conceptual and institutional boundaries that often appear to separate the arts, humanities, and professions from each other and from the social, natural, and formal sciences;
- improve students’ awareness of the rhetorical dimensions of argumentation and inquiry; and
- certify that students who have completed the program are prepared to do rhetorical and cross-disciplinary work after they graduate.

Requirements

In order to earn the Certificate in Rhetorics of Inquiry, students must complete four courses offered by POROI, including 160:200 Introduction to Rhetorics of Inquiry.

Admission

Master’s and doctoral candidates in good standing are eligible to register for the certificate program. To register, contact the Project on Rhetorics of Inquiry or visit its web site.

Courses

POROI courses are open to certificate students and to those not enrolled in the certificate program.

160:160 Issues in Rhetoric and Culture 3 s.h.
Rhetorical theory and criticism as culturally embedded practices; rhetorical production of selves and social difference; relationships between rhetoric and literature, philosophy, popular texts. Same as 008:181, 010:160, 036:146.

160:180 Literature and Translation 3 s.h.
Same as 041:180, 048:180.

160:182 Honors Seminar on Political Theory 3 s.h.
Challenges to Western Civilization by recent movements in radical politics; environmentalism, feminism, Islamism; development of tactics and strategies, disagreements with western ideologies and cultures; institutions and practices emerging in response to such movements; interaction of political movements and electronic media. Prerequisite: consent of instructor.

160:183 Invention 3 s.h.
Invention techniques and strategies of published writers; practice of these techniques and strategies in writing exercises; imitation of forms, voices, points of view; unconventional juxtapositions of form and content; parody; forms of “free writing.” Same as 08N:183.

160:190 Issues in Rhetorics of Inquiry 1-4 s.h.
Key foundational issues relevant to rhetoric of inquiry; theoretical, cultural, and practical approaches to the phenomenon of constructed knowledge.

160:195 Issues in Rhetorics of Science 1-2 s.h.
How rhetorical analysis can clarify contested issues about science (e.g., how boundaries are drawn between sciences and between science and nonscience; relation between science and technology, including life sciences and biotechnology; relation of sciences to society, including contested claims about social construction of science); guest lecturers. Repeatable.

**Second Language Acquisition**

**Directors:** L. Kathy Heilenman (French and Italian/Teaching and Learning), Judith Liskin-Gasparro (Spanish and Portuguese)

**Affiliated faculty:** Stephen M. Alessi (Psychological and Quantitative Foundations), Micheline Chalhoub-Deville (Teaching and Learning), William D. Davies (Linguistics), Michael E. Everson (Teaching and Learning), Elena Gavruseva (Linguistics), Yukiko Abe Hatasa (Asian Languages and Literature), L. Kathy Heilenman (French and Italian/Teaching and Learning), Richard Hurtig (Speech Pathology and Audiology), Chuanren Ke (Asian Languages and Literature), Paul Kemphinsly (Spanish and Portuguese), Judith E. Liskin-Gasparro (Spanish and Portuguese), Sue K. Otto (Spanish and Portuguese), Carlos Eduardo Peferos (Spanish and Portuguese), James P. Pusack (German), Leslie Schrier (Teaching and Learning/Spanish and Portuguese), Kathy L. Schuh (Psychological and Quantitative Foundations), Carol Severino (Rhetoric), Helen Shen (Asian Languages and Literature), Roumyana Slabakova (Linguistics), Bruce H. Spencer (German), Ikuko Yuasa (Asian Languages and Literature)

**Graduate degree:** Ph.D. in Second Language Acquisition

**Web site:** [http://intl-programs.uiowa.edu/academic/flare/index.htm](http://intl-programs.uiowa.edu/academic/flare/index.htm)

Second language acquisition (SLA) is a multidisciplinary field whose goal is to understand the processes that underlie non-native language learning. The Second Language Acquisition Program draws from varied academic disciplines, among them linguistics, psychology, psycholinguistics, sociology, sociolinguistics, discourse analysis, conversation analysis, and education.

**Doctor of Philosophy**

Like the field itself, the Ph.D. program in second language acquisition is interdisciplinary. Students interested in pursuing the Ph.D. must hold an M.A. in an appropriate field (e.g., linguistics, foreign language education, English as a second language), or they must have equivalent academic experience.

Doctoral students may specialize in one of three areas: linguistics, language program direction, or technology. Students may pursue their interdisciplinary interests in courses offered by the College of Liberal Arts and Sciences Departments of Asian Languages and Literature, French and Italian, German, Linguistics, Rhetoric, Spanish and Portuguese, and Speech Pathology and Audiology, and the College of Education Departments of Teaching and Learning, and Psychological and Quantitative Foundations.

**Requirements**

The program requires 72 s.h., including a maximum of 33 s.h. earned in work toward the master's degree. The program is divided into foundation courses (13 courses, or 39 s.h.); specialization courses (5 courses, or 15 s.h.), and dissertation work (18 s.h.).

**FOUNDATION COURSES**

All of these:

- 164:201 Second Language Acquisition Research and Theory I 3 s.h.
- 164:202 Second Language Acquisition Research and Theory II 3 s.h.
- 164:211 Multimedia and Second Language Acquisition 3 s.h.
- 164:221 Topics in Second Language Acquisition: Speaking 3 s.h.
- 164:223 Topics in Second Language Acquisition: Listening 3 s.h.
- 164:226 Reading in the Non-Roman Scripts (or 07S:184, but not both) 3 s.h.
- 164:227 Topics in Second Language Acquisition: Writing 3 s.h.
- 164:229 Cultural Curriculum 3 s.h.

Two of these:

- 07S:184 Reading in a Second Language (or 164:226, but not both) 3 s.h.
- 164:221 Topics in Second Language Acquisition: Speaking 3 s.h.
- 164:223 Topics in Second Language Acquisition: Listening 3 s.h.
- 164:226 Reading in the Non-Roman Scripts (or 07S:184, but not both) 3 s.h.
- 164:227 Topics in Second Language Acquisition: Writing 3 s.h.
- 164:229 Cultural Curriculum 3 s.h.

To complete the foundation requirement, students select one course from each of the following eight areas, in consultation with their adviser. With the adviser's approval, courses not listed here may be used to fulfill the requirement.

**Curriculum**

- 07E:300 Design and Organization of Curriculum 3 s.h.
- 07S:186 Curriculum Foundations 2-3 s.h.
- 07S:197 Principles of Course Design for Second Language Instruction 3 s.h.
- 07S:208 Designing Materials for Second Language Instruction 3 s.h.

SPECIALIZATION COURSES

Each student selects one of three specialization areas—linguistics, language program direction, or technology. Students take five courses, for a total of 15 s.h., in their chosen area. An individually designed specialization may be developed in consultation with the adviser.

Linguistics Specialization

Requirements for the linguistics specialization are as follows.

One of the following three-course sequences (Group 1 or Group 2):

Group 1

- 103:203 Introduction to Phonology 3 s.h.
- 103:204 Phonological Theory 3 s.h.
- 103:214 Advanced Phonological Theory 3 s.h.
**Group 2**

103:201 Introduction to Syntax 4 s.h.
103:202 Syntactic Theory 3 s.h.
103:212 Advanced Syntactic Theory 3 s.h.

One of these:
103:173 Generative Second Language Acquisition 3 s.h.
An alternate course on linguistic theory and second language acquisition

One of these:
031:122/103:172 Language Development 3 s.h.
031:218 Cognitive Development 3 s.h.
An alternate course on parsing/psycholinguistic mechanisms

**Language Program Direction Specialization**

Students who choose the language program direction specialization take five of the following courses (chosen from those not taken to satisfy the foundation requirements).

07S:180 Issues in Foreign Language Education 3 s.h.
07S:183 Second Language Classroom Learning 3 s.h.
07S:184 Reading in a Second Language 3 s.h.
07S:197 Principles of Course Design for Second Language Instruction 3 s.h.
07S:202 Second Language Program Management 3 s.h.
07S:208 Designing Materials for Second Language Instruction 3 s.h.
39J:258 Second Language Acquisition of Japanese 3 s.h.
164:205 Analysis of L1 and L2 Data 3 s.h.
164:221 Topics in Second Language Acquisition: Speaking 3 s.h.
164:223 Topics in Second Language Acquisition: Listening 3 s.h.
164:226 Reading in the Non-Roman Scripts 3 s.h.
164:227 Topics in Second Language Acquisition: Writing 3 s.h.
164:229 Cultural Curriculum 3 s.h.

Some students may include an internship experience as part of the specialization.

164:230 Internship arr.

**Technology Specialization**

Requirements for the technology specialization are as follows.

164:212 Practicum in CALL Software Development 1-4 s.h.

A three-course sequence in psychological and quantitative foundations:

07P:205 Design of Instruction 3 s.h.
07P:208 Designing Educational Multimedia 3 s.h.
07P:215 Web-Based Learning 3 s.h.

Students choose their remaining specialization course work from the following (others may be approved by the student’s adviser).

07P:275 Constructivism and Design of Instruction 3 s.h.
021:120 Design of Automated Systems 3 s.h.
021:220 Programming for Text Manipulation 3 s.h.
22C:104 Introduction to Informatics 3 s.h.
103:157 Electronic Corpora and Linguistic Analysis 3 s.h.

**Thesis**

All candidates must complete a thesis (164:303 Ph.D. Thesis), for which they may earn up to 18 s.h.

**Optional Course Work**

Students may include the following optional course work in their degree programs.

164:300 Special Topics in Second Language Acquisition arr.

**Admission**

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College. Strong applicants hold a master's degree in a related area, have a cumulative g.p.a. of at least 3.50 in master's degree work, and speak and write English and another language at a professional level. Applicants must submit a writing sample that demonstrates their ability to synthesize and analyze information using standard academic English.

**Financial Support**

Teaching assistantships are available through the Foreign Language Acquisition Research and Education Program (FLARE). Assistantships usually involve teaching elementary or intermediate language courses. FLARE also offers
a limited number of research assistantships. Contact the Second Language Acquisition Program for details.

Courses

164:201 Second Language Acquisition Research and Theory I 3 s.h.
Theories regarding success and failure in acquisition of second or subsequent languages; research, issues. Same as 009:237, 035:201, 039:200, 39J:201.

164:202 Second Language Acquisition Research and Theory II 3 s.h.
Continuation of 164:201. Prerequisite: 164:201 or consent of instructor. Same as 035:202, 039:201.

164:205 Analysis of L1 and L2 Data 3 s.h.
Issues in qualitative and quantitative analysis of first- and second-language data; data collection, analytical frameworks and approaches. Prerequisite: 164:201 or consent of instructor. Same as 039:205.

164:207 Sociolinguistics 3 s.h.
Topics such as discourse and conversation analyses, linguistic pragmatics, linguistic variations, issues of language and gender. Prerequisite: 103:100 or equivalent. Same as 039:207.

164:211 Multimedia and Second Language Acquisition 3 s.h.
Foreign language multimedia in the context of current second language acquisition theories and research; readings on interactivity, interface design, feedback, learner control, and acquisition of vocabulary, grammar, and culture; multimedia development project. Prerequisite: foreign language teaching methodology course or consent of instructor. Same as 009:238, 013:253, 035:212.

164:212 Practicum in CALL Software Development 1-4 s.h.
Supervised experience in an applied setting involving development of computer-assisted language learning (CALL) software. Repeatable. Prerequisites: 164:211, faculty sponsor, and consent of instructor.

164:221 Topics in Second Language Acquisition: Speaking 3 s.h.
Theory, pedagogy, research, and assessment in second language speaking. Same as 009:236, 035:228.

164:223 Topics in Second Language Acquisition: Listening 3 s.h.
Theory, pedagogy, research, and assessment in second language listening. Same as 039:223.

164:226 Reading in the Non-Roman Scripts 3 s.h.
Theory and practice of reading in languages that use non-Roman alphabets, syllabaries, logographic systems; reading in first- and second-language contexts; instructional and literacy development issues. Prerequisite: 07E:171 or 07P:270 or 07S:184 or equivalent. Same as 07S:207.

164:227 Topics in Second Language Acquisition: Writing 3 s.h.
Theory, pedagogy, research, and assessment in second language writing. Same as 010:275, 035:227.

164:229 Cultural Curriculum 3 s.h.
Same as 07S:209.

164:230 Internship arr.
Prerequisite: consent of instructor.

164:299 Special Topics in German Linguistics 3 s.h.
Same as 013:299, 103:232.

164:300 Special Topics in Second Language Acquisition arr.
Repeatable. Prerequisite: consent of instructor.

Repeatable. Prerequisite: consent of instructor.

Repeatable. Prerequisite: consent of instructor.

Repeatable. Prerequisite: consent of instructor.
The Translational Biomedicine Program prepares skilled clinicians to pursue new knowledge about health and disease through patient-based research. The program's goal is to support the medical research enterprise in its efforts to advance the prevention, treatment, and cure of disease.

Students in the program are trained to conduct rigorous, original clinical investigations using basic biological and physiological principles. They receive didactic training and engage in substantial mentored research opportunities in the areas of disease mechanisms, or etiology; new clinical insights into diagnosis or natural history of disease; objective assessment and outcome of therapeutic intervention; medical informatics; and development of new approaches to therapeutics.

Master of Science

The Graduate College requires 36 s.h. for a Master of Science degree. However, Translational Biomedicine Program course work and research requirements over a three-year span are equivalent to 60 s.h. Each student's plan of study is based on his or her chosen discipline. All students take background courses in epidemiology, study design, and statistics as well as advanced courses in basic sciences relevant to their individual research areas.

Students also must write a proposal for a K23 Mentored Patient-Oriented Research Career Development Award from the National Institutes of Health. For M.S. candidates, the K23 proposal replaces the thesis. A draft of the K23 proposal must pass an internal review by the end of the student's second year.

Students may choose to pursue research areas in any of the health sciences disciplines, and they enjoy considerable flexibility in scheduling course work and beginning research.

The following courses are required. All students must register for 050:224 and 050:225 each semester in the program.

050:224 Seminar in Translational Biomedicine 1 s.h.
050:225 Translational Biomedical Research 1 s.h.

**SAMPLE SCHEDULE**

**First Semester**
- 050:224 Seminar in Translational Biomedicine 1 s.h.
- 060:204 Survival Skills for a Research Career 1 s.h.
- 171:161 Introduction to Biostatistics 3 s.h.
- 173:160 Introduction to Epidemiology Data Analysis with Computers 2 s.h.
- 173:140 Epidemiology I: Principles 3 s.h.
- 173:240 Epidemiology II: Advanced Methods 3 s.h.

**Second Semester**
- 050:224 Seminar in Translational Biomedicine 1 s.h.
- 050:225 Translational Biomedical Research arr.
- 050:270 Responsible Conduct in Research 0 s.h.
- 171:162 Design and Analysis of Biomedical Studies 3 s.h.
- 171:241 Applied Categorical Data Analysis 3 s.h.
- 173:240 Epidemiology II: Advanced Methods 3 s.h.

**Third and Following Semesters**
- 050:224 Seminar in Translational Biomedicine 1 s.h.
- 050:225 Translational Biomedical Research arr.

**Doctor of Philosophy**

For information about the Ph.D. program, contact the Translational Biomedicine Program.

**Admission**

The Translational Biomedicine Program welcomes students with diverse educational and scientific backgrounds and varied research interests. Applicants to the program should have strong interest and background in a health science profession and knowledge of basic sciences and medicine. They should hold an advanced degree in one of the health sciences (e.g., M.D., D.O., D.D.S., D.V.M., M.S.N., Pharm.D., Ph.D.).

Admission is based on applicants' undergraduate and graduate academic achievement, performance on the Graduate Record Examination (GRE) General Test, and letters of recommendation. Applicants whose first language is not English must take the Test of English as a Foreign Language (TOEFL).

The program helps applicants find suitable mentors. All prospective students, and their mentors, must guarantee that once accepted to the program, applicants will be able to devote essentially all of their time over a three-year period to training. For instance, a fellow in the Carver College of Medicine could spend no more than two months each year working on clinical assignments (e.g., two months of inpatient assignments or one month of inpatient assignments and one-half day per week in a clinic).

**Financial Support**

Funding of tuition and salaries or stipends is available from a number of sources. Contact the Translational Biomedicine Program for information.

**Facilities**

Training is conducted mainly in the laboratories and teaching facilities of the Carver College of Medicine and the College of Public Health. The University of Iowa Clinical Research Center is available for research training. The program also is linked with the Carver College of Medicine’s graduate training program in clinical research.

**Associated Courses**

- 050:224 Seminar in Translational Biomedicine 1 s.h.
- 050:225 Translational Biomedical Research arr.
Transportation Studies

Director: David J. Forkenbrock
Affiliated faculty: Marc P. Armstrong (Geography), M. Aqhar Bhatti (Civil and Environmental Engineering), David J. Forkenbrock (Urban and Regional Planning/Civil and Environmental Engineering), John W. Fuller (Urban and Regional Planning/Economics), Paul F. Hanley (Urban and Regional Planning), Hostin David Lee (Civil and Environmental Engineering), John D. Lee (Mechanical and Industrial Engineering), Wilfrid A. Nixon (Civil and Environmental Engineering), Gerard Rushton (Geography/Health Management and Policy), Thomas Schnell (Mechanical and Industrial Engineering), James W. Stoner (Civil and Environmental Engineering/Urban and Regional Planning)

Graduate nondegree program: Certificate in Transportation Studies
Web site: http://ppc.uiowa.edu

Transportation is vital to modern society. The United States, like other nations, faces many critical transportation problems and issues. The highway system is reaching an advanced stage of its life cycle, public transit operating deficits are growing, the quality of transportation available to many citizens is unacceptably low, serious inequities exist between transportation modes, and extensive changes are called for in traditional transportation institutions.

Transportation engineers and planners draw on a number of skills to respond to the challenges they face. They must analyze and forecast the movement of people and goods within and between cities; identify effective and efficient means for providing desired transportation services; price these services properly; and evaluate the impact that transportation changes have on land use, environmental quality, the local or regional economy, and various subgroups within society.

Certificate

No single academic discipline can supply all of the theories, principles, or methods needed to address the varied and complex problems in transportation. Recognizing this, the Department of Civil and Environmental Engineering and the Urban and Regional Planning Program participate in the interdisciplinary Transportation Studies Program, through which students in the participating units can earn a Certificate in Transportation along with their graduate degrees. The Department of Geography also supports the transportation certificate program by offering courses in geographic information systems (GIS), location theory, and other related areas.

The Certificate in Transportation is coordinated by the Public Policy Center in conjunction with the Graduate College. Completion of the certificate requirements is documented on the student’s transcript. The certificate is awarded in conjunction with the established degree requirements of the individual academic units.

Students who enroll in a course of study leading to transcript certification also may wish to participate in faculty-led transportation research, which may explore topics such as system planning, traffic operations and engineering, spatial data systems and analysis, simulation applications, and policy issues.

Certificate with M.S. or Ph.D. in Civil and Environmental Engineering

The Department of Civil and Environmental Engineering offers transportation degrees at both the Master of Science and Doctor of Philosophy levels. The M.S. may be earned either with thesis (a 30 s.h. program that includes up to 6 s.h. of credit for thesis research) or without thesis (requires a minimum of 30 s.h. of credit). Nonthesis students usually are required to complete a research paper based on independent study and to defend the paper in an oral examination.

Students who wish to complete the M.S. in a single academic year must complete 15 s.h. during both the fall and spring semesters. The Ph.D. degree involves a minimum of 72 s.h. beyond the B.S. degree, with up to 18 s.h. earned for dissertation research. A minimum of one year of campus residency is required. For detailed information on the residency requirement, see section XII.C of the Manual of Rules and Regulations of the Graduate College.

Individuals with degrees in other transportation-related disciplines are encouraged to apply to the Transportation Studies Program. Depending on a student’s background, additional course work in statistics, computer programming, simulation, mathematics, and operations research
may be required for the certificate. Credit earned in these courses may not be applicable to the student's degree program.

The following courses are required.

Six courses in transportation:
053:162 Design of Transportation Systems 3 s.h.
053:163 Traffic Engineering 3 s.h.
053:165 Pavement Analysis and Design 3 s.h.
053:166 Infrastructure Management System 3 s.h.
053:262 Transportation Demand Analysis 3 s.h.
102:267 Transportation Policy Analysis 3 s.h.

One general core course:
053:115 Computer-Aided Engineering 3 s.h.

A typical master's certificate program in civil and environmental engineering includes the following courses.

**First Semester**
053:115 Computer-Aided Engineering 3 s.h.
053:162 Design of Transportation Systems 3 s.h.
053:166 Infrastructure Management System 3 s.h.
102:269 Transportation Program Seminar 1 s.h.

**Second Semester**
053:163 Traffic Engineering 3 s.h.
053:165 Pavement Analysis and Design 3 s.h.
053:262 Transportation Demand Analysis 3 s.h.
Technical elective 3 s.h.

**Third Semester**
102:267 Transportation Policy Analysis 3 s.h.
Technical electives 6 s.h.

Technical electives are advanced courses in engineering operations research, information technology computer-aided design, urban and regional planning, business, or economics. Specific course requirements are sufficiently flexible to conform to a student's graduation schedule and area of specialization.

Technical electives include the following.
053:133 Finite Element I 3 s.h.
053:164 Winter Highway Maintenance 3 s.h.
053:267 Transportation Network Analysis 3 s.h.

Applications should be made through the Graduate College and the Department of Civil and Environmental Engineering.

**Certificate with M.A. or M.S. in Urban and Regional Planning**

The graduate Urban and Regional Planning Program offers Master of Arts and Master of Science degrees in a transportation concentration. During the first year, students complete an integrated core curriculum consisting of courses in planning economics and public finance, analytic methods, planning theory, and law. Beginning in the second semester, students take courses in an area of concentration, such as transportation, where core concepts are applied to a selected specialization. The planning curriculum is intended to provide students with the capability to examine policy in transportation, devise workable options, evaluate these optional courses of action, and work toward the implementation of policy solutions.

Planning students complete a total of 50 s.h.; the core accounts for 20 s.h., the area of concentration constitutes a minimum of 9 s.h., and electives complete the remaining credit. Students who select the thesis option may register for up to 6 s.h. of thesis credit and 8 s.h. of readings. Students may apply 3 s.h. of readings to the area of concentration requirement and substitute the thesis for the portfolio.

The transportation major in urban and regional planning typically includes the following courses.

**First Semester**
102:200 Analytic Methods in Planning I 3 s.h.
102:202 Land Use Planning: Law and Practice 4 s.h.
102:203 History and Theories of Planning 3 s.h.
102:205 Economics for Policy Analysis 3 s.h.
102:208 Program Seminar in Planning Practice 1 s.h.

**Second Semester**
102:201 Analytic Methods in Planning II 2 s.h.
102:260 Transportation Policy and Planning 2 s.h.
Planning elective 4-5 s.h.

**Third Semester**
102:209 Field Problems in Planning I 1 s.h.
102:265 Transportation Regulation and Finance 3 s.h.
102:267 Transportation Policy Analysis 3 s.h.
102:269 Transportation Program Seminar 1 s.h.
Fourth Semester

102:210 Field Problems in Planning II 3 s.h.
102:262 Transportation Demand Analysis 3 s.h.

Two of these:
053:267 Transportation Network Analysis 3 s.h.
102:263 Applied Simulation to Transportation 3 s.h.
102:264 Transportation Planning Process 3 s.h.
Planning elective 3 s.h.

Students select optional transportation courses according to their individual interests. Electives typically include 102:295 Economic Development Policy (3 s.h.).

Applications should be made through the Graduate College and the Urban and Regional Planning Program.
Urban and Regional Planning

Chair: Alan H. Peters
Professors: Peter S. Fisher, David J. Forkenbrock, John W. Fuller, Alan H. Peters, James A. Throgmorton
Associate professors: Heather I. MacDonald, James W. Stoner
Assistant professors: Jerry A. Anthony, Paul F. Hanley, Lucie Laurian
Adjunct lecturers: Douglas Boothroy, Garth Frable, Teresa McMahon, David Swenson, John Yapp
Graduate degrees: M.A., M.S. in Urban and Regional Planning
Web site: http://www.uiowa.edu/~urp

Urban and regional planning is a dynamic and exciting field encompassing the development and implementation of public policies that improve the quality of life in cities and regions. Today's planners find themselves in demand for such diverse jobs as transport planner, zoning administrator, environmental analyst with a natural resources agency, economic development planner, regional solid waste management coordinator, state public health planner, neighborhood planner, state legislative analyst, and transportation consultant.

Recent graduates of the program have taken positions with city, metropolitan, and regional planning agencies, state and federal government, nonprofit organizations, and private consulting firms. They work in all geographic regions of the United States and in several countries around the world.

Master's Degrees

The planning curriculum is a two-year program that leads to a Master of Science or a Master of Arts in urban and regional planning. It consists of 50 s.h., including 20 s.h. of core courses, 9 s.h. of courses in an area of concentration, and 21 s.h. of electives. Students may earn 2 s.h. for completion of an approved internship with a planning agency during summer or the academic year.

All students, including those in joint degree programs, must complete a minimum of 35 s.h. of planning courses (prefix 102). Up to 15 s.h. of course work from other departments can be counted toward the planning degree. All core and concentration area courses must be completed with a grade of B-minus or higher, and students must attain an overall graduate g.p.a. of at least 3.00.

The curriculum is based on the philosophy that planners must develop the theoretical and analytic skills that will permit them to analyze social problems and evaluate public policies. Planners also must cultivate professional skills such as report writing, oral presentation, computer use, and team management in order to work effectively in various organizational and political environments.

CORE CURRICULUM

The core curriculum helps students develop an understanding of the institutions—social, economic, political, administrative, and legal systems—that provide the context for policy analysis and constrain public choices. It also promotes development of the ability to identify social goals and normative criteria for evaluating public policies, as well as the analytic skills to perform such investigations. In total, the core accounts for 20 s.h. (14 s.h. in the first fall semester, 2 s.h. in the spring semester, and 4 s.h. in the second year).
Courses in the first semester are drawn primarily from traditional disciplines, particularly economics and statistics, together with an introduction to theories and practice of planning and to land use planning. As students proceed through the curriculum, increasing emphasis is placed on the development of critical judgment and insight, achieved through the application of theory and methods to realistic planning problems and case studies.

Core curriculum courses and required semester hours are noted in the following typical class schedule.

Students may request a waiver of selected core courses on the basis of previous course work.

**First Semester**
- 102:200 Analytic Methods in Planning I 3 s.h.
- 102:202 Land Use Planning: Law and Practice 4 s.h.
- 102:203 History and Theories of Planning 3 s.h.
- 102:205 Economics for Policy Analysis 3 s.h.
- 102:208 Program Seminar in Planning Practice 1 s.h.

**Second Semester**
- 102:201 Analytic Methods in Planning II 2 s.h.
- Electives and area of concentration courses 10 s.h.

**Third Semester**
- 102:209 Field Problems in Planning I 1 s.h.
- Electives and area of concentration courses 9 s.h.
- Internship 2 s.h.

**Fourth Semester**
- 102:210 Field Problems in Planning II 3 s.h.
- Electives and area of concentration courses 9 s.h.

**CONCENTRATION AREA**

Beginning in the second semester of the program, students develop an area of concentration by applying the concepts and skills developed in the core to a specific field of planning. Currently, there are four areas of concentration supported by faculty and course offerings in the planning program: transportation planning, housing and community development, economic development, and land use and environmental planning.

Students complete at least 9 s.h. of courses in their area of concentration. Courses offered by other University departments may supplement those offered by the planning program.

Students may combine two areas of concentration. Examples of combined areas are environmental and economic development planning, and transportation and community development planning. Students also may design other areas of concentration, subject to faculty approval. For example, students can specialize in health services planning with appropriate course work in the Department of Health Management and Policy or Occupational and Environmental Health, or in human services planning with courses in the School of Social Work.

**PORTFOLIO**

Students must complete a portfolio of papers that are approved by the final exam committee.

**Options**

**THESIS**

A thesis is not required, although students may petition to write one. Students may register for up to 6 s.h. of thesis credit. In addition, they may take up to 8 s.h. of readings to develop a thesis topic and prepare a literature review. Students may apply 3 s.h. of readings to the area of concentration requirement and substitute the thesis for the portfolio.

**INTERNSHIP**

Students are encouraged to complete an internship in a planning agency or related organization. To earn 2 s.h. of credit for the internship, students must submit a brief paper summarizing and evaluating their experience. Internships usually are paid staff positions and are completed during the summer between the first and second years or during the academic year.

**PRACTICUM**

An extended internship, consisting of at least five months of full-time employment in a planning-related organization, may qualify as a practicum. A practicum generally takes place during the summer and into the fall semester of the second year. It carries 5 s.h. of credit and substitutes for the required field problems courses, 102:209 and 102:210, and the internship.

**INTERNATIONAL THEME**

Many of the program’s elective courses have an international component. Moreover, each year the program offers a seminar covering international planning issues and a course in comparative aspects of planning. It is possible to register for summer courses through Iowa State University’s College of Design in Rome, Italy.
Joint Programs

Civil and Environmental Engineering

Students pursuing a B.S. in civil and environmental engineering may apply for admission to the joint program with urban and regional planning, beginning in their junior year. Graduates of the joint program with engineering have technical skills and an understanding of policy development and implementation, a combination of skills that prepares them for employment as public works directors, city engineers, transportation engineers, or in public utilities.

The B.S. in engineering requires 128 s.h. The joint program reduces the total semester hours required for both degrees from 178 to 152. Students earn 117 s.h. in engineering courses and 35 s.h. in graduate planning courses. In their junior year they begin taking required and elective planning courses that count toward the secondary area of focus requirement for the B.S. in engineering.

See Civil and Environmental Engineering in the Catalog.

Law

The Urban and Regional Planning Program and the College of Law cooperate in administering a program that satisfies the degree requirements leading to an M.A. in planning and a J.D. in law. The program usually requires four years to complete, a reduction of one academic year from the total requirements of the two programs taken separately. It may be completed in less time if the student chooses the accelerated law program. Admission to each academic unit is required.

Law is the most popular of the joint degree programs. Students in the planning and law program typically seek employment as attorneys, especially in law firms that specialize in land use or environmental law; as city managers; as city planners or planning administrators; or in advocacy organizations. See College of Law in the Catalog.

Health Management and Policy

Students interested in health planning may wish to enroll in a joint master's degree program offered by the Urban and Regional Planning Program and the Department of Health Management and Policy in the College of Public Health. This three-year program leads to an M.A. in planning and an M.H.A. (Master of Health Administration). Completing the joint program takes one year less than completion of the two programs separately. Admission to each academic unit is required.

The health management and policy degree enables students to strengthen their credentials as health planners or expand their job options to include administrative positions in the health field as well as health planning jobs. Graduates of the joint degree program typically find employment in hospitals, state departments of health, and other private, nonprofit, or public health agencies. See Health Management and Policy in the Catalog.

Occupational and Environmental Health

Students interested in environmental health may elect to pursue a joint master's degree offered by the Urban and Regional Planning Program and the College of Public Health. This option results in an M.A. in planning and an M.S. in occupational and environmental health. The joint program requires 65 s.h. of credit, including 35 s.h. earned in urban and regional planning and 30 s.h. earned in occupational and environmental health. The program can be completed in five semesters. Admission to each academic unit is required.

Graduates of the program typically find employment in the public health field, with state health and human services departments, or as health or environmental planners. See Occupational and Environmental Health in the Catalog.

Social Work

For those interested in a career in social service delivery or human services planning, a joint program is offered by urban and regional planning and the School of Social Work, leading to an M.A. in planning and an M.S.W in social work. It is possible to complete the program in three years, although some students may require an additional semester. Admission to each academic unit is required.

Graduates of this joint program find careers as human services planners for local planning agencies, nonprofit social service agencies, and state governments. See Social Work in the Catalog.
Transportation

The Transportation Studies Program is administered through the University's Public Policy Center. A Certificate in Transportation Studies is awarded to students who satisfactorily complete a prescribed set of courses in transportation. These courses are taught in urban and regional planning, engineering, and economics. The certificate program allows planning students with a concentration in transportation to extend their training and obtain an additional credential. See Transportation Studies in the Catalog.

Admission

Admission to the Urban and Regional Planning Program is open to students from any undergraduate major or area of concentration.

Admission is based on Graduate Record Examination (GRE) General Test scores (verbal, quantitative, and analytical writing), letters of recommendation, previous academic performance, and a written statement of purpose. International applicants whose first language is not English are required to submit official TOEFL scores.

Applicants should submit the application form, GRE General Test scores, TOEFL score (for international students), recommendation letters, statement of purpose, and transcripts. For fall admission, applications should be submitted to arrive early in the year (preferably by January 15), although applications are accepted until July 15 (April 15 for international students). Applications for spring admission should be received by October 1 and no later than December 1. Fall admission is strongly preferred. Students applying for financial aid should submit their materials by January 15.

Financial Support

Students in the Urban and Regional Planning Program receive financial support from the program primarily in the form of teaching or research assistantships and contract or grant-funded assistantships. Assistantships typically require 10 hours of work per week under the direction of a faculty member. A few full or partial tuition scholarships also are available.

Students initiate applications for financial support, and awards are made on the basis of merit, experience, and interests. Assistantships may be renewed for up to a total of four semesters. The planning program has been successful in providing support to the majority of its students.

Students applying for financial support are encouraged to submit application materials and requests for support by January 15. Students who apply after that date are considered only as remaining funds permit. Financial support usually is not available for students beginning the program in the spring semester.

Courses

102:055 The Splendor of Cities 3 s.h.
Evolution of city structure in response to social, cultural, political, and economic forces; cities through time and across continents; varied resource materials, including video, novels, texts. Same as 033:112.

102:101 Planning Livable Cities 3 s.h.
Development of livable cities in the United States; economic, physical, environmental, and political forces that shape their growth; impact of planning, how it shapes the future of cities. Same as 044:136.

102:112 The City: Narrative and Design 3 s.h.
History, culture, and built environment of a major city (e.g., Berlin, Germany); how storytelling and city building interact to create the city as it currently exists and as it might exist in the future; films, novels, physical plans, histories, social science texts. Same as 033:112.

102:125 Environmental Impact Analysis 4 s.h.
Fundamental concepts underlying measurement, assessment, and evaluation of environmental impacts; case studies in cost-benefit analysis, risk assessment, resource allocation, social impact assessment, public participation, management information systems; field trips to environmental control facilities. Same as 044:125.

102:133 Introduction to Economics of Transportation 3 s.h.
Overview of transportation markets—intercity, rural, urban; transportation modes—rail, highway, air, water, pipeline, transit; issues in finance, policy, planning, management, physical distribution, and environmental, economic, and safety regulation. Same as 06E:145, 044:133.

102:158 Storytelling and Urban Engagement 3 s.h.
Storytelling's social role linked to the professional practice of urban planning; hands-on interaction with neighborhoods in Iowa City. Same as 008:158, 045:163.

102:200 Analytic Methods in Planning I 1-3 s.h.
Methods used in planning and policy analysis; emphasis on application of statistical techniques and quantitative reasoning in planning problems; use of computers and data systems in planning analysis.

102:201 Analytic Methods in Planning II 2-3 s.h.
Integration of methods with the planning process; application of multiple regression, population estimation and projection, survey methods, time series analysis, industrial growth and change; presentation of results to decision makers and the public.

102:202 Land Use Planning: Law and Practice 4 s.h.
Legal, social foundations of land use planning; comprehensive planning, zoning and subdivision review; legal aspects of land use, environmental planning; ordinance drafting, staff report writing; citizen participation.
102:203 History and Theories of Planning 3 s.h.
History of urban planning in America as a reflection of social and economic forces; alternative planning philosophies, roles, and ethical choices open to planners.

102:205 Economics for Policy Analysis 1-3 s.h.
Principles of economics for planners; concepts and techniques of microeconomic analysis; income inequality; the role of government in the economy; tax and pricing policy; project evaluation; externalities.

102:208 Program Seminar in Planning Practice 1 s.h.
Planning process, roles of planners, professional ethics and standards. Repeatable.

102:209 Field Problems in Planning I 1 s.h.
Experience working on a two-semester project involving a current planning issue, usually for a client. Prerequisite: urban and regional planning graduate standing.

102:210 Field Problems in Planning II 3 s.h.
Continuation of 102:209. Prerequisites: 102:209 and urban and regional planning graduate standing.

102:214 Land Use Policy and Planning 3 s.h.
Environmental preservation, site development concepts, downtown revitalization, historic preservation, brownfields.

102:215 Applied GIS for Planners 2 s.h.
Spatial matrices, routing, network flows, partitioning and clustering, facility location models; three-dimensional GIS analysis; statistical analysis in spatial context. Prerequisite: consent of instructor.

102:216 Conflict, Negotiation, and Planning 3 s.h.
Conflict within communities, and planners’ responses; networking, negotiating, mediating, coalition building, consensus building; case studies, role playing. Prerequisite: 102:203 or consent of instructor. Same as 160:216.

102:217 Spatial Analysis in Planning 2-3 s.h.
Data bases, GIS, planning support systems; spatial model building and use of spatial statistics; applications to substantive problems in transportation, environment, housing, economic development. Prerequisite: 102:215 or consent of instructor.

102:218 Applied GIS 1 s.h.
Development, maintenance, and operation of an enterprise-wide Geographic Information System (GIS); implementation of a parcel-based data system model common to government entities; practical experience using data for land-use planning analysis. Prerequisite: consent of instructor.

102:219 Practicum 5 s.h.
Full-time internship of at least five months with a planning-related organization. Prerequisite: urban and regional planning graduate standing.

102:220 Virtual Reality and Urban Development 2 s.h.
Creation of terrain models from DEMs and CAD-based site plans, panoramas, incorporation of existing and proposed buildings into virtual reality models; use of VRML and presentation strategies, including digital movies. Prerequisite: 102:215.

102:221 Poverty, Planning and Public Policy 3 s.h.
Who and where the poor are in the United States; consequences of poverty; competing explanations of poverty; historical survey and critique of antipoverty policies at federal, state, and city levels; role of urban development policies. Prerequisites: 102:200, 102:203, and 102:205, or consent of instructor.

102:223 Financing Local Government 3 s.h.
Financing of local government infrastructure through property taxes, bonding, impact fees, pricing, tax increment financing, institutional alternatives—downtown improvement districts, special districts, homeowners’ associations; fiscal disparities and regional finance; case studies. Prerequisite: 102:205 or consent of instructor.

102:225 Social Equity Planning 2 s.h.

102:226 The Planning Process 3 s.h.
The planning process: evaluation of plans, their quality, implementation, outcomes; public participation mechanisms and issues; case studies of planning projects and processes.

102:230 Land Use Administration 1 s.h.
Process of administering zoning and other land use regulations at the local government level; personnel, management, enforcement issues.

102:233 The Land Development Process 2-3 s.h.
How land is developed; analysis of site suitability; preparation of subdivision plan, site plan review, development approval process, infrastructure and site preparation, negotiating local development policies; field trips. Prerequisite: 102:202 or consent of instructor.

102:235 Growth Management 3 s.h.
Causes and consequences of urban sprawl; shortfalls in conventional land use planning; local and state growth management policies, techniques of policy implementation, positive and negative impacts of such policies; Smart Growth; emerging challenges. Prerequisite: 102:202.

102:240 Environmental Processes and Institutions 1-3 s.h.
Foundations of environmental planning for healthy cities and communities; how urban form, air and water quality, and natural hazards affect environmental planning and health.

102:242 Urban Environmental Planning and Politics 3 s.h.
Understanding and improving the practice of urban environmental planning; techniques of planning; flooding water supply, sewage treatment, natural areas conservation.

102:243 Healthy Cities and the Environment 3 s.h.
Foundations of environmental planning for healthy cities and communities; how urban form, air and water quality, and natural hazards affect environmental planning and health.

102:245 Special Topics in Environmental Planning 1 s.h.
102:246 Environmental Policy 3 s.h.
Environmental policy formation and politics; comparative international perspective on the United States’ experience. Prerequisite: consent of instructor.

102:264 Transportation Planning Process 2-3 s.h.
Institutional setting for transportation planning, evolution of domestic transportation policy; international influences, transportation modes and markets, current sources of transportation planning information, emerging policy issues.

102:262 Transportation Demand Analysis 3 s.h.
City planning procedures and traffic engineering techniques applied to transportation problems; trip generation, distribution, assignment, mode choice models; travel surveys, data collection techniques, arterial flow, intersection performance, parking, transit system analysis. Same as 053:262.

102:263 Applied Simulation to Transportation 3 s.h.
Same as 053:263.

102:200 Transportation Policy and Planning 2 s.h.
Institutional setting for transportation planning, evolution of domestic transportation policy; international influences, transportation modes and markets, current sources of transportation planning information, emerging policy issues.

102:262 Transportation Demand Analysis 3 s.h.
City planning procedures and traffic engineering techniques applied to transportation problems; trip generation, distribution, assignment, mode choice models; travel surveys, data collection techniques, arterial flow, intersection performance, parking, transit system analysis. Same as 053:262.

102:263 Applied Simulation to Transportation 3 s.h.
Same as 053:263.

102:204 Transportation Planning Process 2-3 s.h.
Technical issues, political interface, citizen involvement, intermodal questions, public versus private roles; review and critique of transportation plans.
102:265 Transportation Regulation and Finance 1-3 s.h.
Theories and methods of exerting public control over passenger and freight transportation; social and environmental regulations; effects of changing finance, regulation, and pricing policies, including privatization, tolls, impact fees. Same as 044:265.

102:266 Transportation and Land Use Planning 3 s.h.
Policies and interactions between transportation and land use; location theories and practices; transportation infrastructure, land use, travel behavior modeling; current policies that influence travel behavior and urban form.

102:267 Transportation Policy Analysis 2-3 s.h.
Applied methods for analyzing practical problems in transportation planning and policy, facility investment analysis, pricing of public services, social equity and redistributive effects, impacts of alternative financing approaches.

102:269 Transportation Program Seminar 1 s.h.
Transportation finance, safety and economic regulation, planning processes, management, government policy issues at federal, state, and local levels. Repeatable.

102:271 Housing Policy 3 s.h.
Recent housing policy initiatives at federal, state, and local levels.

102:273 Community Development 1-3 s.h.
Community Development Corporation involvement in housing and neighborhood revitalization; infill housing development and preservation; comprehensive community development initiatives.

102:275 Development Policy and Planning in the Third World 3 s.h.
Cross-cultural and interdisciplinary analysis of problems associated with urbanization and development in Third World countries. Same as 078:275, 034:275, 042:275, 044:275, 113:275.

102:277 Affordable Housing Finance 3 s.h.
Financing development or rehabilitation of affordable housing; low-income housing tax credits, the housing finance system and current regulatory issues; mortgage discrimination, improving financing for rental housing.

102:290 Economic Impact Assessment 2-3 s.h.
Economic impact and growth analysis, including economic base, income expenditure, input-output analysis; use of economic impact analysis in a cost-benefit context, industrial location and mobility theory with statistics applications. Prerequisite: 102:205 or consent of instructor.

102:295 Economic Development Policy 2-3 s.h.
Analysis of policies and programs at national, regional, state, and local levels that address problems of economic growth, development, decline. Prerequisite: consent of instructor.

102:297 Community Development Finance 3 s.h.
Financial statements and small business finance; local revolving loan funds for small businesses; evaluation of loan proposals; community development agency financing of commercial redevelopment; case studies of community development lending. Prerequisite: 102:205 or consent of instructor.

102:300 Special Topics in Planning 1-3 s.h.

102:305 Readings arr.

102:315 Independent Study in Planning 1-6 s.h.
Research and analysis of a special planning problem; opportunity for student to apply knowledge in area of specialization.

102:335 Internship 2 s.h.
Work in a planning or related agency or nonprofit organization. Prerequisite: consent of instructor.
Graduate College
College of Law

Dean: Carolyn C. Jones  
Associate deans: Eric G. Andersen, Arthur E. Bonfield, Margaret Brinig, Marcella David, Linda A. McGuire, John C. Reitz  
Executive librarian: Mary Ann Nelson  
Professors: Eric G. Andersen, David C. Baldus (Joe B. Tye Professor), Patrick B. Bauer, Randall P. Bezanson (David H. Vernon Professor), Peter D. Blanck (Charles M. and Marion Kierscht Professor), Arthur E. Bonfield (Allan D. Vestal Professor), Willard L. Boyd (Rawlings-Miller Professor), Margaret Brinig (William G. Hammond Professor), Steven J. Burton (John F. Murray Professor), William G. Buis (O.K. Patton Professor), Patricia A. Cain (Aliber Family Professor), Jonathan C. Carlson, Enrique R. Carrasco, Marcella David, Ann Estin, Josephine Gittler (Wiley B. Rutledge Professor), Herbert J. Hovenkamp (Ben and Dorothy Willie Professor), Mark Janis, Carolyn C. Jones (F. Wendell Miller Professor of Law), Kenneth J. Kress, Shelly F. Kurz (Percy Bondwell Professor), Marc Linder, Jean C. Love (Martha Eilen Tye Professor), Mark J. Osiel, Todd Petry, Margaret Raymond, John C. Reitz (Edward L. Carmody Professor), Hillary A. Sale, Mark Sidel, Peggie R. Smith, Alexander Somer, John-Mark Stensvaag (Charlotte and Fred Hubbell Professor), James J. Tomkovick (Edward A. Howrey Professor), Lea S. VanderVeld (Josephine K. Witte Professor), Larry D. Ward (Orville and Ermine Dykstra Professor), Gerald B. Wetlaufer, Adrien Wing (Bessie Durton Murray Professor)  
Clinical professors: Patricia Acton, John S. Allen, Lois K. Cox, Reta Noblett-Feld, Leonard Sandler, Barbara A. Schwartz, John Whiston  
Degrees: J.D., LL.M.  
Web site: http://www.law.uiowa.edu

The University of Iowa College of Law, founded in 1865, is the oldest law school in continuous operation west of the Mississippi River. More than 750 students and a full-time faculty of 50 are engaged at the college in a cooperative study of law, legal institutions, professional ethics, the role of law in public policy matters, and the intersection of law and other disciplines.

The college’s student/faculty ratio of 13.5-to-1 is one of the best in American legal education. Seven members of the law faculty hold Ph.D. degrees in law-related disciplines.

Through traditional Socratic classes, research seminars, closely supervised writing exercises, ambitious professional skills training programs, and clinical experiences, the college seeks to produce public-spirited leaders who will be rigorous thinkers, trusted advisers, forceful advocates, creative policy makers, and innovative scholars.

The college conducts its programs in the Boyd Law Building, a 200,000-square-foot facility that opened in 1986. Its spacious library, three courtrooms, clinic suite, building-wide audiovisual system, and extensive computer technologies are recognized as outstanding features in an educational facility specially designed for modern legal training.

The college is home to one of the nation’s premier law libraries. The Law Library has the largest collection of legal volumes and volume equivalents among all public law schools. Its staff numbers 30 library professionals and it provides comfortable seating for 700 patrons, with 440 private study carrels, each equipped with its own data port. The library boasts a fully computerized information retrieval system. WESTLAW and LEXIS are available at numerous terminals for training and research activities, and the online electronic card catalog provides instant information about all cataloged materials.

The college celebrates diversity. Its faculty includes six full-time professors from minority backgrounds, including African American, Asian American, and Hispanic American. In 1967 the
college undertook one of the nation’s first and most aggressive affirmative action programs aimed at attracting a more racially and ethnically diverse student body. Its success in this continuing effort has resulted in a minority student population that routinely makes up 20-25 percent of the law college’s current student body (the state of Iowa’s minority population is around 5 percent).

The college offers a challenging curriculum that is carefully balanced between substantive courses, perspective offerings, examination of ethical values and professionalism, and skills-training programs, including a highly active in-house legal clinic. Iowa’s writing program—one of the strongest among law schools nationwide—is an integral part of all students’ academic experience. During both semesters of their first year, students take one small section class taught by a full-time professor who focuses individually on the development of each student’s analytical, research, writing, and advocacy skills.

The college also requires five additional writing units at the upper level, a requirement that must be fulfilled with at least two credits of faculty-supervised written work. The remaining three may be satisfied through a range of options, including writing for one of the school’s four law journals, participating in the clinical program, completing exercises in appellate advocacy, or enrolling in specific seminars or independent writing projects.

The Writing Resource Center supports and builds upon classroom writing instruction and assists students with a broad range of writing tasks (see “Resources”/“Writing Resource Center” later in this section). The center and the writing program as a whole exemplify the personalized attention and dedication to individual learning for which the college is renowned in legal circles.

The college is proud of its four student-run scholarly journals. The Iowa Law Review has served as a scholarly legal journal since 1915, analyzing developments in the law and recommending new paths for the law to follow. It frequently is ranked among the top 20 legal periodicals in the country, based on the frequency with which it is cited.

The Journal of Corporation Law is the nation’s oldest and top-rated student-run legal periodical specializing in corporate law. It provides the legal and academic communities with high-quality articles on corporate issues and business law.

Transnational Law & Contemporary Problems, which began publication in 1991, addresses legal issues confronting the global community. It has earned an excellent reputation based on its symposiums on issues such as world food policy and global environmental regulation.

The Journal of Gender, Race, & Justice hosts a symposium at the college each fall, attracting nationally renowned legal scholars and practitioners who discuss topics such as criminal justice, education, and critical race feminism. The journal publishes the papers presented at the symposium.

In keeping with its educational mission of encouraging the acquisition of broad social awareness and technical professional competence, the college offers a strong program in the rapidly expanding fields of international and comparative law. It does so for three reasons: in an era of global interdependence, an effective lawyer must understand international law and foreign legal systems; as professionals and community leaders, lawyers familiar with international and comparative law are crucial to the formulation of public policy at all levels of society; and the study of international and comparative law provides an essential theoretical foundation for all lawyers by affording unique insight into the nature of law and legal process.

All College of Law students benefit from international exposure through association with students in the college’s Master of Laws program in international and comparative law. LL.M. students take most of their classes with J.D. students. In addition, each year non-U.S. law professors and other non-U.S.-trained jurists pursue research in the Law Library; they also may audit or speak in classes.

The journal Transnational Law & Contemporary Problems offers students a law review experience dedicated to international issues. The college also fields a team every year in the Philip C. Jessup International Moot Court Competition, and there are opportunities for students to get involved with two faculty-run centers, the University of Iowa Center for Human Rights and the University of Iowa Center for International Finance and Development, as well as student groups such as the International Law Society and the Iowa Coalition for Human Rights.

Over the years, the college has enjoyed great success in preparing women and men to be professional and civic leaders. In the 20th century, Iowa graduates served as U.S. senators and representatives, state governors, and presidents of the American Bar Association, of major universities, and of the country’s largest corporations. Iowa also has been a leader in

The center and the writing program as a whole exemplify the personalized attention and dedication to individual learning for which the college is renowned in legal circles.

...
preparing American law teachers. Currently one judge on the U.S. Court of Appeals for the Eighth Circuit, four of Iowa’s eight U.S. district judges, two of the Iowa Supreme Court’s seven justices, and four of the nine judges on the Iowa Court of Appeals are UI College of Law graduates. Approximately 60 percent of the practicing lawyers in Iowa are UI College of Law graduates. The college is resolved to continue its traditional role of training future lawyers for positions of professional and community leadership in the 21st century.

**Professional Programs**

The College of Law offers the Juris Doctor (J.D.), and the Master of Laws (LL.M.) in international and comparative law. It also collaborates with a variety of University of Iowa graduate programs to offer joint J.D./graduate degree programs through the Graduate College. See "Joint J.D./Graduate Degrees" later in this section.

**Full-Time Policy**

The faculty believes that students receive a better legal education when they devote substantially all of their time to educational pursuits. For this reason, students are expected to pursue their law training full time. This policy is consistent with the accreditation standards of the American Bar Association and the Association of American Law Schools.

In extraordinary circumstances, it may be possible for students to enroll for fewer than 10 s.h. per semester. Students who believe they may be unable to attend full time should contact the dean’s office before registering for classes.

**Entrance Dates**

The college offers two starting dates to entering students: a class of 30 students enter mid-May (at the beginning of the college’s summer session) and approximately 180 students enroll in late August (at the beginning of the college’s fall semester). All attend courses full time during fall and spring semesters and may attend the summer term at any point during their academic careers. Mid-May entrants can expect to graduate no earlier than 27 months after beginning law study.

The summer term consists of two periods of five-and-a-half week sessions, during which four to five upperclass and three to four first-year courses usually are offered. Generally, students may attend either or both periods. Students who enter in May attend the entire 11-week session during their first summer.

**Admission to the Iowa Bar**

A rule adopted by the Iowa Supreme Court requires all law students who intend to apply for admission to the Iowa Bar to register that intention with the court by November 1 of the year they begin law school. Details are available from the College of Law registrar or the clerk of the Iowa Supreme Court.

**Juris Doctor**

The Juris Doctor requires 90 s.h., including required and elective courses. All entering students are expected to take all courses designated as first-year courses and may not register for different courses or fewer semester hours without permission of the associate dean.

No student may be enrolled during any fall or spring semester for more than 18 s.h. applicable to the J.D., or for more than 13 s.h. during any two adjacent summer sessions.

To be eligible for the J.D., a student must:

- receive course credit for 90 s.h.;
- take and complete all required courses;
- satisfy the writing requirements;
- complete the course of study required for the degree in no fewer than 27 months after commencing law study at the College of Law or at a law school from which transfer credit has been accepted; and
- achieve a cumulative g.p.a. of at least 2.00 (65), a C average.

Receiving credit in a course is dependent upon successful completion of a final examination, or all assigned work, or both. In order to take the final examination, students must satisfy all requirements established by the instructor, including class attendance, written work, special readings, oral reports, and so forth.

**First-Year Curriculum**

Development of professional skills begins in the first year, with emphasis on careful reading, essential writing skills, legal research, and argumentation. Students concentrate on developing analytical skills (for example, reading and understanding judicial opinions), gain a sense of the role of legal institutions in society, and focus on developing good writing and research skills.
First-year courses are as follows.

**Fall Semester**

- **091:102 Introduction to Law and Legal Reasoning** 1 s.h.
- **091:120 Contracts and Sales Transactions I** 3, 5 s.h.
- **091:124 Criminal Law** 3, 5 s.h.
- **091:132 Property I** 3, 5 s.h.
- **091:364 Torts** 3, 5 s.h.

**Spring Semester**

- **091:104 Civil Procedure** 4, 6 s.h.
- **091:116 Constitutional Law I** 3, 5 s.h.
- **091:121 Contracts and Sales Transactions II** 3, 5 s.h.
- **091:136 Property II** 3, 5 s.h.

Legal bibliography

Students who enter law school in May take all of the above over the summer session and two regular academic semesters, plus **091:210 Appellate Advocacy I** and 6-12 s.h. of electives.

Entering first-year students are expected to take all first-year courses and may not register for different courses or fewer hours without permission of the associate dean.

**FIRST-YEAR SMALL-SECTION PROGRAM**

One of the distinctive benefits of legal education at The University of Iowa is the first-year small-section program, which integrates training in basic lawyering skills into substantive courses taught by regular, full-time faculty. The program’s purposes include careful development of each student’s skills in legal analysis, argumentation, research, and writing.

In the fall semester (summer session for May entrants), the entering class is divided into sections of approximately 30 students. In the spring (fall for May entrants), each section includes approximately 20 students. The subject matter of the small-section courses varies from year to year but has included that of virtually every course in the first-year curriculum.

In the small-section course, students are given a series of challenging assignments, each with a different educational objective. Faculty members provide extensive critiques of student performance and discuss the assigned exercises both in class and in individual conferences.

First-year students receive two additional semester hours for their first-semester small section and two for their second-semester small section. A mandatory curve is applied to the grade distribution in all first-year courses.

**Upperclass Curriculum**

In the second and third years, students are exposed to a broad array of substantive areas of the law, with focus on fact gathering, interviewing, counseling, drafting, transaction planning, negotiation, and litigation. They also concentrate course work or writing and research opportunities in particular areas of interest.

Very few common requirements exist in the second and third years. All students must take **091:210 Appellate Advocacy I** in the second year, and before graduating all must take **091:232 Constitutional Law II** and a course in professional ethics.

**Writing Requirement**

All students must earn five upper-level writing units in order to graduate. They earn one of the units with satisfactory completion of **091:210 Appellate Advocacy I**. At least two of the remaining four writing units must be earned under direct faculty supervision, in courses, seminars, research projects, or legal clinical work. The remaining two may be earned through a combination of courses and activities that carry writing credit, including **091:402 Moot Court Board**, advanced appellate advocacy activities, and journals, including the Iowa Law Review, Journal of Corporation Law, Journal of Gender, Race, & Justice, and Transnational Law & Contemporary Problems.

**Concentrated Study Opportunities**

Students may pursue their interest in a particular subject area by selecting appropriate course work and independent research projects. For example, in the corporate business area, students may take several courses: **091:241 and 091:242 Corporations I and II** (7 s.h.), **091:217 Corporate Finance** (3 s.h.), **091:355 Securities Regulations** (4 s.h.), **091:243 Taxation of Business Enterprise** (3 s.h.), **091:239 Corporate Governance and Control** (1 s.h.), and **091:253 Employment Discrimination** (2-3 s.h.).

**Independent Research**

A student may sign up for 1-3 s.h. in **091:500 Independent Research Project** after obtaining authorization from the faculty member who agrees to supervise the student’s project. When independent research involves a paper, the work must include research and the submission of at least one draft to the faculty member for comments; a second draft generally is required, and the faculty member may require additional
drafts. Students may earn additional credit for longer papers. Generally, each 1 s.h. of credit requires 20 pages of double-spaced text, excluding footnotes. Exceptions may be made for projects that involve substantial empirical work.

Students who wish to pursue independent research should contact one of the professors who have been designated to supervise a limited number of student writing and research projects during that semester; the designated professors are listed in the semester's registration materials.

Students may not register for more than 3 s.h. for a single research project. They also may apply no more than 6 s.h. of independent research toward the J.D., and they may take no more than 4 s.h. under the supervision of the same faculty member, unless the limit is waived by the dean or the dean's delegate.

Papers produced for independent research may be eligible for entry in competitions sponsored by varied groups. Cash prizes frequently are available. Competition announcements are posted on the bulletin boards outside the college's Writing Center.

**Supplementary Writing**

In Supplementary Writing (091:502), a faculty member supervises one or more students in connection with a substantive course taught by the faculty member and for which the student has registered. The writing project builds on or proceeds from the materials covered in the related course and entails work beyond the course's content. At the faculty member's discretion, students may take Supplementary Writing during the same semester as the substantive course or during the following semester. Supplementary Writing projects are graded separately from the related course. Registration materials typically include the names of faculty members offering the course, and for each faculty member, the name of the related substantive course, the number of writing units available, and reasonable details specified for structuring the writing.

**Directed Research and Writing**

In Directed Research and Writing (091:501), a faculty member supervises a student in a research and writing project unrelated to any substantive course. Each faculty member who plans to teach Directed Research and Writing lists the general subject area and/or specific topics he or she will supervise and may specify other details about how the writing supervision will be structured (e.g., topic selection, submission dates, required outlines, preliminary submissions). Students may register for the course without the faculty member's prior consent. Registration materials typically include the names of faculty members offering the course, and for each faculty member, the subject matter (a general category or detailed topics, at the faculty member's discretion), the number of writing units available, and reasonable details specified for structuring the writing.

**Writing Tutorial**

The Writing Tutorial (091:503) combines features of 091:504 Tutorial and 091:501 Directed Research and Writing. A faculty member lists the subject matter and/or specific topics he or she will supervise and provides the writing supervision in a group setting. The faculty member also specifies the subject and the general approach for group meetings and decides how the group members will interact in connection with the writing project (for instance, group members may work on separate parts of a single project, or on separate but related projects). Enrollment in Writing Tutorial is limited by the number of writing units the faculty member offers. Students earn the same number of semester hours and writing units for their work in a Writing Tutorial. Registration materials typically include the names of faculty members offering the course, and for each faculty member, the subject matter (a general category or more detailed topics, at the faculty member's discretion), the number of writing units available, and reasonable details specified for structuring the writing and the tutorial's group process.

**Seminars**

Students should direct questions about a seminar’s requirements to the College of Law registrar or the instructor before the seminar begins, because they may not be permitted to drop the class after it meets the first time.

Seminars usually offer up to 5 s.h., including up to 3 writing units. Seminar formats vary widely; consult the Law School Guide to Courses and semester registration materials for details. Students are graded on the basis of a research paper, and at the instructor's discretion, for class participation and other seminar requirements.

A common seminar format consists of a research portion for 2 s.h. (usually in the fall), and a writing portion for 3 s.h. (usually in the spring). The total 5 s.h. of credit may be allocated between the semesters as best accommodates the student's schedule. Reduction of credit for
seminars requires the instructor's consent. In some seminars, students are permitted, with the instructor's consent, to enroll for the class portion but not the writing portion. The students' performance in the class portion is evaluated on the same basis as for other courses—by examinations, papers, class participation, or other methods at the faculty member's discretion. Students must obtain the instructor's consent before registering.

Papers produced for seminars may be eligible for entry in competitions sponsored by varied groups. Cash prizes frequently are available. Competition announcements are posted on the bulletin boards outside the college's Writing Center.

**Tutorial**

A student may sign up for 1-3 s.h. for work undertaken in 091:504 Tutorial after obtaining authorization from the faculty member who agrees to supervise the student's project. Tutorials may involve different types of pedagogical techniques, such as discussion sessions, assignments of problems, or short papers. In all tutorials, the student and faculty member must meet for at least five hours for each 1 s.h. the student earns. No writing units are awarded for tutorials. To register, students must submit a form that confirms the arrangement with the faculty member; forms are available from the College of Law registrar.

**Clinical Programs, Internships, Clerkships**

Students who have completed the equivalent of three semesters toward their J.D. degrees (summer entrants may count the first full summer session as one semester) are eligible to apply their theoretical knowledge to real cases under the supervision of faculty members and other attorneys through participation in the College of Law's Clinical Law Programs.

Some 30 students participate each semester in the in-house programs. They may represent individual and organizational clients in a variety of areas including immigration, domestic violence, criminal defense, consumer/bankruptcy, disability, non-profit organizations, civil rights, employment law, and general civil practice.

Other students may enroll in externships in Iowa City and the surrounding area, where they act as staff attorneys, assisting in all phases of the legal process. Typical placements include Student Legal Services, Iowa Legal Aid (Iowa City and Cedar Rapids), HELP Legal Services (Davenport), the City Attorney's Office (Iowa City), the federal public defender (Cedar Rapids), the United States Attorney's Offices (Cedar Rapids and Rock Island, Illinois), and several federal judges, including the U.S. Bankruptcy Court (Cedar Rapids). A clinical semester also is available, in which students spend an entire semester in the Iowa Attorney General's Office, the U.S. Attorney's Office, or the federal court in Des Moines.

Students may earn a total of up to 15 s.h. in the Clinical Law Programs and up to 20 s.h. for clinic and nonlaw courses offered in other University of Iowa colleges.

The College of Law also is involved in programs that do not carry academic credit. Each summer it participates in the County Attorney Internship Program, through which students work as paid employees for county attorneys throughout the state and in the Poverty Law Internship Program, placing students in Iowa Legal Aid offices. The college also helps place students in a variety of unpaid clerkships and internships nationwide that provide insight into the workings of the legal system.

**Joint J.D./Graduate Degrees**

The college has developed joint degree programs with a number of University graduate programs through the Graduate College, under which students pursue degrees simultaneously in both colleges.

Joint degree candidates may count up to 12 s.h. earned for the graduate degree toward the 90 s.h. required for the J.D., providing the courses are relevant to both degrees and the 12 s.h. are earned after admission to the combined degree program and after matriculation at the College of Law.

Separate admission to each program is required. Applicants to graduate programs must meet the admission requirements of the Graduate College; see Manual of Rules and Regulations of the Graduate College or Graduate College in the Catalog.

Graduate departments establish their own requirements for the joint degree program, including the number of semester hours taken for the J.D. that may be counted toward the graduate degree.

Joint graduate degree programs have been initiated with the Tippie College of Business, the Carver College of Medicine, and the College of
Public Health; the Schools of Journalism and Mass Communication, Library and Information Science, and Social Work; the Departments of Accounting, American Studies, Anthropology, Chemistry, Computer Science, Educational Policy and Leadership Studies, English, History, Health Management and Policy, Management and Organizations, Philosophy, Political Science, Religious Studies, Sociology, Spanish and Portuguese, Urban and Regional Planning; and Counseling, Rehabilitation, and Student Development.

Many departments have advisers for the joint program. For more information, consult the associate dean of the College of Law and the individual graduate departments.

Master of Laws in International and Comparative Law

The Master of Laws (LL.M.) in international and comparative law is an important component of the College of Law’s international approach to legal education. The program is designed for graduates of J.D. programs in the United States who wish to deepen their understanding of international and comparative law, including the law pertaining to international business transactions, and for non-U.S.-trained jurists who wish to receive advanced training or a comparative introduction and training in U.S. law and legal institutions.

The LL.M. program is small, generally admitting no more than 15 students per year, so each student receives substantial attention from the faculty. Each LL.M. student is encouraged to work with his or her faculty adviser to shape an individualized study program that makes best use of the college’s resources.

The LL.M. requires a minimum of 24 s.h. earned in College of Law courses, which offer a strong focus on international and comparative law. With their adviser’s approval, LL.M. students may count toward the degree up to 6 s.h. of law study abroad, or nonlaw graduate-level courses or externships.

LL.M. students take many courses in U.S., international, and comparative law with the college’s J.D. students. This broad contact with U.S. law students and professors provides an effective comparative experience for non-U.S.-trained students, and U.S. trained students benefit from close contact with non-U.S.-trained lawyers.

LL.M. applicants who are graduates of U.S. law schools must have been granted a J.D. from a school that is a member of the Association of American Law Schools or is approved by the American Bar Association. Non-U.S. law graduates must have completed the basic course of university studies that qualifies them to sit for the bar examination (e.g., the French maîtrise, the German first state bar examination); if the bar exam does not require a specific degree, applicants should be experienced members of the bar or have completed at least the first university degree in law. Applicants without a degree from a four-year English-language university must score at least 580 (paper-based) or at least 237 (computer-based) on the Test of English as a Foreign Language (TOEFL); those with scores lower than a 600 (paper-based) or 250 (computer-based) may be required to take English course work upon entering The University of Iowa.

All applicants must present evidence of high academic potential, such as high class rank in their previous law studies; strong recommendations, especially from law professors who supervised their work in classes or seminars; and challenging professional work experience. The College of Law relies heavily on academic references to assess applicants’ credentials.

Because U.S. applicants and all others with first-language fluency in English are required to produce a substantial publishable paper in the program, applicants must show evidence of ability to carry out complex research and writing projects.

Cocurricular Programs

As many as 6 of the 90 s.h. required for the J.D. may be earned through participation in the college’s rich cocurricular program offerings.

Client Counseling

In the Client Counseling Program, students interview and counsel clients and witnesses. They gain experience in recognizing and resolving legal, nonlegal, and ethical issues arising in the context of those activities.

The intraschool client counseling competition is held in the fall to determine the two 2-person teams that will represent The University of Iowa College of Law in the regional client counseling competition, held in the spring.
Moot Court

The Moot Court appellate advocacy programs familiarize students with writing appellate briefs, acquaints them with citation form, develops research skills, and strengthens persuasive ability in oral argument at the appellate court level.

Each academic year, the Moot Court office administers 091:210 Appellate Advocacy I (required for graduation) in one semester, and three Moot Court competitions in the other semester. Students who rank in the top 96 scoring positions of the Appellate Advocacy I (out of approximately 220 students) are eligible for the competitions according to their rank: the top 32 are eligible for 091:404 Van Oosterhout Moot Court Competition; the next 32 are eligible for 091:405 Baskerville Moot Court Competition; and the next 32 are eligible for 091:430 Jessup International Moot Court Competition.

The appellate advocacy program is administered by the Moot Court Board, which consists of 26 student judges and an executive board of 12 members.

Trial Advocacy

The Trial Advocacy Program (091:370 Trial Advocacy) is a student-run, faculty-supervised program in which students develop and refine skills used to prepare and try civil and criminal cases. The heart of the program is the two-semester-hour course in trial advocacy taught by law school faculty, federal and state judges, and experienced trial attorneys. Students are on their feet during most class sessions, practicing the arts of jury selection, opening statement, direct and cross examination, introduction of exhibits, use of expert testimony, and closing argument. The course culminates with a full-scale trial—from the filing of pretrial motions to the rendering of a jury verdict—conducted by student co-counsel before a visiting judge and a jury of laypersons.

The Stephenson Competition is named after Judge Roy L. Stephenson, a U.S. District Court and Eighth Circuit Court of Appeals judge and a 1940 graduate of the College of Law. Students who demonstrate superior ability in advocacy skills during the trial advocacy courses participate in a series of mock trials judged by local members of the bench and bar. Individuals selected from the competition represent The University of Iowa in the national trial competition.

Journals

IOWA LAW REVIEW

Since its inception in 1915, the Iowa Law Review has served as a scholarly legal journal, noting and analyzing developments in the law and suggesting future paths for the law to follow. Students have managed the Review since 1935, editing and publishing articles by professors and students. The Review is published five times annually and is staffed by second-year student writers and third-year editors. To learn more about the Iowa Law Review, visit its web site (http://law.uiowa.edu/journals/lr/index.php).

TRANSNATIONAL LAW & CONTEMPORARY PROBLEMS

Transnational Law & Contemporary Problems is produced twice a year by Iowa law students. Each issue of this international law journal presents a symposium addressing a contemporary issue of international concern; recent issues have treated such diverse topics as legal challenges and prospects for Africa in the third millennium, families and children in international law, and the effects of globalization on human rights. Contributors include experts from around the globe in a variety of disciplines, including law, economics, anthropology, sociology, and ecology. The journal also publishes articles written by Iowa law students and sponsors an internationally advertised student writing competition each year.

Law students who have completed at least two semesters may earn up to 2 s.h. of credit by writing for the journal. Highly qualified students who complete the writing and secondary hour requirements may be chosen to fill an editorial position, for which they earn additional credit. They also may be eligible for a monetary stipend.

To learn more about Transnational Law & Contemporary Problems, visit its web site (http://www.law.uiowa.edu/journals/tlcp).

THE JOURNAL OF CORPORATION LAW

The Journal of Corporation Law is a student-operated periodical that publishes articles relevant to modern business enterprise. The journal’s scope includes antitrust, intellectual property, labor law, securities, taxation, employment discrimination, insurance, products liability, and regulated industries, as well as traditional corporate topics. Selected articles submitted from practitioners and academics are published in each of four annual issues. Several student articles also are selected for publication.
All students who have completed two semesters of class work are eligible to write for the journal. Students who meet the writing and secondary hour requirements are eligible for selection to the journal’s editorial board and may receive additional academic credit. They also may be eligible for a monetary stipend. To learn more about The Journal of Corporation Law, visit its web site (http://www.uiowa.edu/~lawjcl).

THE JOURNAL OF GENDER, RACE & JUSTICE

The Journal of Gender, Race & Justice pushes at the boundaries of traditional legal scholarship and theory in its focus on social justice issues. Each fall the journal hosts a live symposium, bringing nationally renowned legal scholars and practitioners to the college to discuss topics such as race, gender, economic class, ability, and identity. The journal publishes the papers presented at the symposium. Each issue also includes articles written by Iowa law students.

All students completing two semesters are eligible to write for the journal. Students who meet the writing and secondary hour requirements are eligible for a position on the editorial board. To learn more about The Journal of Gender, Race, & Justice, visit its web site (http://www.law.uiowa.edu/journals/grj).

Study Abroad

A consortium of seven American law schools, coordinated through The University of Iowa College of Law, offers an annual study-abroad program in which students attend a spring semester at Florida State University’s London study center. There they study American and English law with faculty from the American schools and the University of London. Students participating in the program register for 660:824 London Law Consortium.

The College of Law also offers up to 8 s.h. of credit for intensive course work at Arcachon, France, in conjunction with the University of Bordeaux. Courses are offered for four weeks in May and June and are taught in English by professors from Iowa and Bordeaux. Application deadline is February 1. Students participating in the program register for 660:823 Program in Comparative Law in Bordeaux, France.

Two Iowa law students may attend the Bucerius Law School in Hamburg, Germany, each fall semester in an exchange program with that school. Students earn 12-15 s.h. of credit through course work taught in English.

The International Law Society and the law Career Services Office provide information on other study-abroad programs.

Academic Achievement Program

The College of Law Academic Achievement Program (AAP) helps students achieve their potential as they go from successful undergraduate careers to the unique challenges of law study. Although AAP focuses on helping first-year students, its programs are open to all.

AAP presents a variety of programs, including a fall-semester lecture series for new students. Examples of content areas include time management for law study, developing effective study groups, outlining and organizing class notes and course materials, taking essay exams, and answering multiple choice tests. Several weeks before exams, a pre-exam series focuses on exam readiness. AAP group programs for the summer entering class are geared especially to the needs of summer term students.

Spring semester programming responds to special challenges of the second semester, including reviewing and learning from fall exams, taking on complex writing projects, exam preparation, and other matters.

In addition to offering group programs, AAP provides individual help with study skills. When personal issues affect a student’s concentration or studying, the program provides direct help and refers students to University and community support resources.

Academic Honors

Graduation With Distinction

Students who entered the College of Law in August 1998 or later may receive their J.D. degrees with honors, in recognition of superior scholarship, as follows. (Averages are figured on final grade-point average.)

- With highest distinction—cumulative g.p.a. of 3.50 (85) or higher
- With high distinction—top 12.5 percent of the graduating class
- With distinction—top 37.5 percent of the graduating class
Order of the Coif

The Order of the Coif, a national legal honor society, has a chapter at The University of Iowa. The order is dedicated to scholarship and advancement of high ethical standards in the legal profession. Membership is drawn from the top 10 percent of the senior class. Initiates are selected by the faculty after graduation.

Prizes and Awards

Hancher-Finkbine Medallions are awarded each year by the University to outstanding graduates; honorees are chosen from nominations made by University departments and colleges based on learning, leadership, and loyalty.

The Philip G. Hubbard Human Rights Award is presented each year by the University to recognize outstanding contributions to human rights and equal opportunity, as described in the University's Human Rights Policy.

The Alan I. Widiss Faculty Scholar Award is presented to the student who has made an especially outstanding and distinctive contribution to the development of written legal scholarship.

The Randy J. Holland Award for Corporate Scholarships is presented to the student who has written an outstanding scholarly paper in the area of corporate law.

The Robert S. Hunt Legal History Award is presented to a student who has written an outstanding scholarly paper in the field of legal history.

The Donald P. Lay Faculty Recognition Award is presented to the student who has made distinctive contributions to the College of Law’s cocurricular, community, or education programs.

The Iowa State Bar Association Prize is presented to the student who possesses the attitude, ability, and other qualities that indicate success as a future leader of the bar association.

The Antonia “D.J.” Miller Award for Advancement of Human Rights recognizes outstanding contributions by a student to the advancement of human rights in the law school community.

The Dean’s Achievement Award is presented each year to a student, who, through his or her achievements, has exemplified, promoted, or contributed to cultural, racial, or ethnic diversity in the law school.

The National Association of Women Lawyers Award is presented to a law student who contributes to the advancement of women in society and women in the legal profession and who also has attained high academic achievement.

The Erich D. Mathias Award for International Social Justice is presented to a student who has made an outstanding contribution or demonstrated commitment to attaining international social justice.

The John F. Murray Award recognizes the student with the highest academic standing in the graduating class.

The ALI-ABA Scholarship and Leadership Award is presented to a student who represents an outstanding combination of scholarship and leadership, the qualities embodied by the American Law Institute and the American Bar Association.

Awards for Outstanding Scholastic Achievement (West Group) are presented to students who have shown outstanding performance in both the academic and cocurricular programs of the College of Law.

The Russell Goldman Award recognizes the student who has demonstrated the most improved academic performance after the first year.

The Iowa College of Law Appellate Advocacy Award is presented to a student for outstanding achievement in and service to the appellate advocacy program.

The Iowa Academy of Trial Lawyers Award is presented to a student for outstanding achievement in the Roy L. Stephenson Trial Advocacy Competition.

The International Academy of Trial Lawyers Award is presented to a student who has demonstrated distinction in trial advocacy skills.

The Michelle R. Bennett Client Representation Award recognizes outstanding service in the college’s clinical law programs.

The ABA/BNA Award for Excellence in the Study of Intellectual Property is presented to a student who has demonstrated excellence in the study of intellectual property law.

The American Bankruptcy Institute Medal for Excellence in Bankruptcy Studies is presented to a student who has demonstrated excellence in the field of bankruptcy.
The Joan Hueffner and Stephen Steinbrink Real Estate Law and Property Award is presented to a student who has demonstrated excellence and promise in the field of real estate law. The Dillon Prize is presented to a student who has written an outstanding essay on legal history or on the intersection of law and another discipline.

**Admission**

**Undergraduate Education and Law School**

Applicants for admission to The University of Iowa College of Law must complete all requirements for the baccalaureate degree before beginning law school. Fulfillment of the basic requirements does not guarantee admission. The College of Law Admissions Committee selects applicants it deems best able to help the college fulfill its primary mission of providing a high quality legal education in a diverse and stimulating environment and preparing students to serve as leaders in their professional and civic communities. Preference is given to applicants who are residents of Iowa (approximately 65 percent of each entering class is drawn from Iowa residents).

The services that College of Law graduates are called upon to perform are so varied, and the possible fields of endeavor so broad and diverse, that the college prescribes no uniform undergraduate program for those planning to enter law school. With the assistance of faculty advisers, each student should develop an undergraduate program that explores and develops that student’s particular intellectual interests.

Iowa strongly endorses the three basic objectives recommended by a committee of the Association of American Law Schools: education for comprehension and expression in words; education for a critical understanding of the human institutions and values with which the law deals; and education for greater power in thinking. Anyone thinking of attending law school should keep these objectives in mind while planning an undergraduate course of study.

The association’s recommendations emphasize that undergraduate education of students for a full life through liberal education is far more important than education directed too pointedly toward later professional training and practice. Students are urged not to sacrifice broad perspective for detailed specialization.

**Selection of Applicants**

The college uses multiple criteria in evaluating applicants for admission. Part of the entering class is admitted under a “presumptive admit” process, in which the faculty admissions committee admits students primarily on the strength of their numbers, namely the cumulative undergraduate grade-point average and LSAT score. Before admission offers are made, each applicant’s complete file is reviewed to ensure that the overall record suggests the applicant’s suitability for admission, in keeping with the primary mission of the law school.

Although undergraduate academic record and performance on the LSAT are both important admission criteria, the college recognizes that in some circumstances they do not accurately reflect an applicant’s potential to succeed in the study of law, develop skills as a leader, enrich the learning environment of his or her fellow students, and serve the public interest as a lawyer.

To evaluate applicants’ total suitability for admission, the college has developed a “numbers-plus” admissions policy, under which part of each entering class is admitted. Under the “numbers-plus” policy, undergraduate record and LSAT scores are supplemented by nonquantifiable factors that may provide insight to an applicant’s overall potential for success in the study and practice of law.

For example, an applicant who can substantiate that his or her standardized test scores are not predictive of academic performance in law school may receive proportionately greater consideration from the committee for his or her grade-point average. Other factors the committee may consider include special academic or professional abilities not reflected in the grade-point average, disability or serious health factors that affected prior academic performance, extracurricular activities, exceptional school-year work commitments due to family financial circumstances, postbaccalaureate academic success (including graduate study), law-related employment experience, public service commitment, leadership in groups historically underrepresented in the legal profession, educational or socioeconomic disadvantage, native language other than English, unusual motivation or perseverance in overcoming obstacles to law study, and any other information...
the committee considers relevant to the applicant's potential for law study.

Candidates who wish to bring such factors to the committee's attention may do so in their personal statement, through letters of recommendation, or by other documentation included with their application.

**Entrance Dates**

Applicants may apply for either May or August admission. Students who enter in May have the opportunity to graduate in less than three years. Applications for both entrance dates are accepted beginning September 1 of the year prior to admission, with an application deadline of March 15 in the year of admission. Because the college has a rolling admissions process, applicants are encouraged to submit their applications as soon as possible.

Each application must include an application fee, which is nonrefundable. Students from disadvantaged backgrounds who cannot afford the fee should apply for a waiver.

The May and August entrance dates have separate applicant pools. Candidates may apply to the May entering class, August entering class, or both (with a preference indicated on the application). Admission to the May entering class does not guarantee admission to the August entering class, and vice versa.

For additional information, contact the College of Law Office of Admissions and Financial Aid, c/o College of Law, The University of Iowa, Iowa City, IA 52242-1113. Applications are available online at http://www.law.uiowa.edu/admissions.

**Application Process**

**LSDAS Report and Transcripts**

The University of Iowa College of Law participates in the Law School Data Assembly Service (LSDAS). Applicants must register for this service through the Law School Admission Council (LSAC); foreign-educated applicants are exempt from this requirement. Prospective law applicants find the information they need to complete their application for admission to the law school in the council's free, annual publication, *Law Services Registration and Information Book*, and on LSAC's web site (http://www.lsac.org). It takes approximately three weeks from the time the College of Law requests the LSDAS report until it arrives.

Applicants whose fall course work does not appear on the LSDAS report should send an official transcript of that course work to the University's Office of Admissions. Applicants who are already University of Iowa students or are not registered for fall classes are exempt.

Applicants are responsible for submitting an official transcript from each college or university they have attended to Law School Admission Council, Box 2000, Newtown, PA 18940-0998.

Each applicant's undergraduate institution must forward the applicant's class rank or the grade distribution for the applicant's class to the College of Law, if such information is available. Information about class rank is helpful in the application process, but not required. Currently enrolled or former University of Iowa students need not provide this information.

Before classes begin, every applicant who accepts admission to the College of Law must file official transcripts showing conferral of degree with the University's Office of Admissions.

**Letters of Recommendation**

The college requires applicants to submit at least one letter of recommendation. Recommendations from professors or others who can comment on the candidate's critical thinking, writing skills, and potential for success in law school are particularly welcome.

The college participates in the Letter of Recommendation Service offered by the Law School Admission Council. A letter of recommendation form can be downloaded at http://www.lsac.org. Recommenders should send letters of recommendation with the required forms, to Law School Admission Council, P.O. Box 8508, Newtown, PA 18940-8508.

**Law School Admission Test**

Applicants for admission must take the Law School Admission Test (LSAT). The test is given several times each year and may be taken at numerous locations in the United States and abroad. Test application forms may be obtained from the Law School Admission Council.

Applicants are urged to take the test no later than the fall preceding the fall semester or summer session for which they are applying. Applicants' LSAT scores may not be available until approximately four weeks after their test date.

The December test date is the last one that the admissions committee can consider for applicants.
requesting admission the following summer or fall. Scores more than five years old are not accepted.

Applicants whose first language is not English also must take the Test of English as a Foreign Language (TOEFL).

Deferrals
Admission is for the year of application; deferrals are granted only in extraordinary circumstances.

Deposit Upon Acceptance
All applicants must make a nonrefundable deposit of $250 (U.S.). Summer entrants accepted before February 15 must submit the deposit by March 1; those accepted after February 15 have two weeks to submit the deposit. Fall entrants accepted before March 15 must submit the deposit by April 1; those accepted after March 15 have two weeks to submit the deposit.

Fall entrants must pay a second nonrefundable deposit of $150 (U.S.) by June 15.

For those who enroll, the deposit is credited toward tuition and fees. All accepted applicants, including scholarship, fellowship, and loan recipients, are required to pay the deposit. Applicants who fail to make the deposit by the specified time forfeit their place in the entering class.

Financial Support
The College of Law administers its substantial financial aid program to advance the goals of its selective admission policy. Grants, scholarships, work-study funds, and loans are awarded on the basis of need or merit to provide access to legal education for the talented and diverse students admitted to the college. A number of part-time employment opportunities also are available to upper-level students.

Inquiries regarding financial aid should be directed either to the University's Office of Student Financial Aid or to the College of Law's Office of Admissions and Financial Aid.

All financial aid information is subject to change without notice.

Application for Financial Aid
Eligibility for financial aid is based on need established by completion of the Free Application for Federal Student Aid (FAFSA) and the required supporting documents. The FAFSA should be completed online at www.fafsa.ed.gov after January 1 each year and should be completed as soon as possible thereafter, since some financial aid is subject to the availability of funds.

Although financial aid awards are not made until after applicants are admitted to the College of Law, applicants should not wait for the notice of admission before filing the FAFSA. Admitted students who provide the required documents are informed of their eligibility for financial aid on the award notification letter. Students must reapply for aid every year.

Applicants are urged to investigate other sources of aid. Public libraries, private and civic organizations, and the Internet are excellent sources for information about financial aid resources.

Scholarships, Fellowships

Merit-Based Support
All students admitted to the College of Law are considered for merit-based scholarships and fellowships based on their academic achievement. A separate application is not required. Recipients are notified by letter. Potential aid renewal for the second and third year for some scholarships and fellowships requires continuing class rank in the top 25 percent. Awards may range from $500 to full resident tuition with a research assistantship component in upper-level years.

Need-Based Scholarships
All admitted students who file a Free Application for Federal Student Aid (FAFSA) and required supporting documents are considered automatically for need-based scholarships. Recipients are notified by award letter. Awards may range from $500 to full resident tuition.

Iowa Law School Foundation Scholarships
The University of Iowa Law School Foundation Scholarships include scholarships based on need, merit, or a combination of need and merit. These scholarships are available to a limited number of students who meet the criteria established by the scholarship donors. All admitted students are considered for the merit-based scholarships, and all admitted students who file the FAFSA and required supporting documents are considered automatically for the need-based scholarships. A
Law Opportunity Fellowship

The College of Law is committed to affording opportunity for a legal career to persons historically underrepresented in the legal profession. The Law Opportunity Fellowship Program was established by the University to provide access to law school for students from groups and backgrounds historically underrepresented within the academic community. Among criteria considered in awarding the fellowships are educationally and/or socioeconomically disadvantaged backgrounds, existing educational debt load, leadership potential, academic merit, and importance of the fellowship award to the student’s financial ability to attend law school.

The Law Opportunity Fellowship provides full resident tuition for three years and the opportunity to hold a research assistant position for the second and third years. All admitted students who file the FAFSA and required supporting documents are considered for the Law Opportunity Fellowship. A separate application is not required. Recipients are notified by award letter.

Employment

The College of Law discourages student employment during the first year of law school, due to the intensive course schedule. In no event may a full-time student work more than 20 hours per week.

Research Assistant Positions

Research assistant positions are available with many faculty members for second- and third-year students. Students classified as nonresidents who hold quarter-time research assistantships (10 hours per week) automatically qualify for resident tuition status during the semester(s) in which they serve as research assistants.

UI Part-Time Employment

The University offers a variety of part-time employment positions for students. Students do not need to apply for financial aid in order to work in these positions. Information about part-time employment is available from the University’s Office of Student Financial Aid.

College Work-Study

Federal College Work-Study is a need-based employment opportunity for a limited number of students in their second and/or third year at the law college. College Work-Study may reduce the student’s William D. Ford Federal Direct Loan eligibility. Students must demonstrate financial eligibility for work-study through the FAFSA and its required documents.

Community Employment

A limited number of jobs are available throughout the local legal community, and there are many opportunities for nonlegal employment in the area. Students should contact employers directly.

Loans

All admitted students who file the FAFSA and required supporting documents are considered for the University of Iowa Law Foundation Loan, the Federal Perkins Loan, and the William D. Ford Federal Direct Loans.

Iowa Law School Foundation Loan, Federal Perkins Loan

These are low-interest loans based on exceptional financial need. Interest does not accrue and payments are not required until the student is no longer enrolled at least half-time in school.

Federal Direct Ford Loans

The William D. Ford Federal Direct Subsidized Loan is a low-interest loan based on financial need. Interest does not accrue and payments are not required until the student is no longer enrolled at least half-time in school. Interest on the Federal Direct Unsubsidized Ford Loan accrues while the student is in school; however, both principal and interest payments may be deferred while the student is in school.

The interest rate for the Federal Direct Subsidized Ford Loan is variable. Adjusted annually, it is not to exceed an annual percentage rate of 8.25 percent.

Law Access, Iowa Partnership, and Law Achiever Loans

The Law Access Loan, the Iowa Partnership Law Loan, and the Law Achiever Loan are private loan programs for students whose cost of attending law school has not been met through
other sources of financial aid. A separate application is required, and a credit check is a required part of the process to determine eligibility.

**Academic Policies**

**Transfer Credit**

No more than 30 s.h. may be transferred to Iowa from another law school. To qualify for transfer credit, courses must have been completed at an ABA-accredited law school. Grades received at another law school are not counted in calculating the cumulative grade-point average.

**Courses Taken Before Admission to the College of Law**

Students may not count toward the J.D. credit earned in courses they took before matriculation at the College of Law, with the exception of transfer students from other law schools.

**Courses Taken Outside the College of Law**

Students who take courses outside the College of Law must first obtain permission from the associate dean. If “special permission of the instructor required” is indicated on ISIS (Iowa Student Information Services web site), the student also must obtain the instructor’s signature.

Students not enrolled in a joint degree program may apply toward the J.D. a maximum of 6 s.h. earned in courses outside the College of Law. Such courses are approved only if they contribute directly to the professional competence of an attorney or broaden the student’s understanding of law, the legal process, or any particular legal subject. More information about limitations on accreditation of non-College of Law courses is available from the associate dean.

**Courses Taken at Another Law School After Enrollment at Iowa**

With the permission of the dean, enrolled students may receive credit for courses taken and passed at other ABA-accredited law schools, up to a maximum of 30 s.h. Grades of C and higher are reflected on the student’s transcript as credit for the designated semester hours. Grades of D are reflected as 1.70-1.90 (63) on the Iowa transcript.

**Externships**

Students may be able to arrange externships for academic credit with certain nonprofit organizations and government agencies. Most externships are established for the summer, for a maximum of 6 s.h. of credit. Externships also may be arranged for the fall or spring semester. All students who participate in externships must write a research paper. Externship credit counts toward the maximum allowable clinic credit.

Students have arranged recent externships with the U.S. Department of Justice, the Small Business Administration, U.S. district court judges, bankruptcy judges, and the American Civil Liberties Union, among others.

**Grading Policy**

The College of Law has adopted a new numbering system for grading, effective for students who entered the college in May 2004 and later. In the following text, the new number is listed first; the pre-May 2004 number follows in parentheses.

A numerical grade is assigned to each student in each course, except as otherwise provided (e.g., for courses graded pass/fail, for courses that continue the following term, for grades of incomplete). Grades are recorded in the University’s permanent record.

The highest grade awarded at the College of Law is 4.30 (92), the lowest 1.40 (55). No academic credit is given for grades below 1.60 (60) or for grades of “fail.”

Numerical grades may be translated into a letter grade as follows.

4.30-4.10 = A+
4.00-3.80 (92-85) = A
3.70-3.50 = A-
3.40-3.20 (84-80) = B+
3.10-3.00 (79-75) = B
2.90-2.50 (74-70) = B-
2.40-2.00 (69-65) = C
1.90-1.70 (64-60) = D
1.60-1.40 (59-55) = F

Professors may disenroll students for cause or reduce grades for inappropriate academic conduct, for example, plagiarism. Such measures are subject to appropriate due process.

With the dean’s permission, a student may retake a course in which he or she has received a failing grade. The second grade is recorded either as “pass”—a grade of 2.00 (65) or higher—or “fail” and is not used in computing the student’s cumulative grade-point average. Rather, the first
grade received for the course remains on the
transcript and is used in computing the
grade-point average.

If the course being retaken is sectioned, the dean
designates the section to which the student will
be assigned.

The faculty does not apply a mandatory grade
curve beyond the first year, but grades in second-
and third-year courses are expected to
approximate the curve used in large-section
first-year courses.

**Pass/Fail Grades**

Credit for certain courses is offered only on a
pass/fail basis. In the case of a failing academic
performance in a pass/fail course, the faculty
supervisor or instructor may assign a failing
numerical grade, i.e., between 1.60 (59) and
1.40 (55). Individual faculty members may allow
students to withdraw from a course rather than
receive a failing grade.

**Miscellaneous Grading Marks**

Marks other than “pass,” “fail,” and numerical
grades are as follows.

“R” means registered. It indicates that a student
has completed the first half of a year-long
program, such as a seminar or journal, for which
a grade cannot be assigned until the second half
of the program has been completed.

“W” means withdrawn. It carries no course or
residency credit and is not used in computing the
cumulative grade-point average.

“I” means incomplete. It carries no course credit
toward a degree until it is changed, nor is it used
in computing the cumulative grade-point average.
A mark of “I” may be reported only in
exceptional cases and only if the unfinished part
of the work is small and is unfinished for reasons
acceptable to the instructor, and if the student’s
standing in the course is satisfactory. Students
remove an incomplete by completing the
unfinished work during their next period of
residence.

**Class Ranking**

Students in the top 10 percent in each class may
be informed of their exact rank; grade-point
averages at the 87.5 percentile and
62.5 percentile are posted.

Students are ranked following the fall semester,
spring semester, and summer session each year.
Final class standing is determined each August
and is available in September. It includes students
who completed all graduation requirements in
August, May, and the previous December. For
purposes of ranking undergrad students, the
same system is used, based on the expected
graduation date.

**Release of Transcripts**

A student’s grades are not given to persons
outside the College of Law, including prospective
employers, without written permission of the
student.

**Class Attendance and Preparation**

Students must be regular and punctual in
attending classes and must be prepared to
participate in class discussions. Students may be
dropped from a course or failed, at the discretion
of the instructor, for excessive absence or
repeated lack of preparation. Students also are
expected to attend special class meetings and be
punctual in submitting course assignments,
memos, and papers.

**Examination Policy**

One examination is given in each course, with
few exceptions. Before taking an exam, each
student is assigned an identification number for
that exam. Instructors report final exam grades
by each student’s number to the dean’s office,
where the grades are kept on file for two years.
After the grades are recorded, the dean’s office
gives the names corresponding to the students’
numbers to the instructor, who then assigns final
grades for the course. This permits the instructor
to award credit for class participation and ensures
anonymity in exam grading. Students and the
registrar’s office receive only the final grades.

Students who have more than one examination
scheduled for the same day, two exams within
24 hours, or exams four days in a row may
schedule a make-up time for one of the exams.
Students who have exams three days in a row
may reschedule one only with permission of the
instructor.

Students usually reschedule exams on the
Saturday morning immediately following the
regularly scheduled exam. Whenever possible,
the dean sets aside one to three days as an
upperclass study period between the end of
regular classes and the first regularly scheduled
upperclass exam.
Extra Exam Time for Students Whose Native Language is Not English

Students who are at a substantial disadvantage in taking a timed exam because their native language is not English may receive additional time to complete the exam, commensurate with the extent of their disadvantage.

Students seeking additional time must make a written request in the dean’s office by the deadline announced for the semester in which the exam is to be taken. An undergraduate degree from an English-speaking college or university is considered prima facie evidence that the student is not qualified for extra time.

Accommodations for Students With Disabilities

A physical or mental disability may put a law student at a substantial disadvantage in taking an examination. For purposes of the college’s policy on exam accommodations for students with disabilities, a student with a disability is one who has a physical or mental impairment that substantially limits one or more of the student’s major life activities. Commensurate with the nature and extent of the disadvantage, the College of Law makes reasonable accommodations in exam conditions for students, while respecting faculty members’ discretion to decide how to test the substantive knowledge and analytical skills essential to the course or the legal profession and preserving the fairness of exams for students without disabilities. Students who believe they may be entitled to exam accommodations are encouraged to consult with the associate dean as soon as possible after entering law school, even if they have not yet decided whether to request an exam accommodation. Whenever possible, instructors do not learn the identity of a student who requests or receives exam or instructional program accommodations.

In addition to exam accommodations, the college is committed to providing reasonable accommodations for students with disabilities for all instructional, cocurricular, and extracurricular activities it sponsors.

Drop/Add Policy

Students may add or drop a regularly scheduled course or seminar during the first two weeks it meets. Starting with the first day of class, students must have written consent of the instructor to add or drop a course.

A student may not drop a course once the final examination in the course has been distributed to the student. Individual instructors may set a policy of not permitting drops past a certain time limit, except in hardship cases; they are encouraged to distribute written notices of their policies during the first week of class.

A student who, after two weeks, drops an elective course for reasons not related to hardship may not reenroll in the course in a later semester without the instructor’s permission.

Students who wish to drop the advanced appellate advocacy programs without showing cause may do so prior to the distribution of the problem and the finalization of participants in their rounds. After the problem has been distributed, only the faculty adviser may authorize a drop and then only upon show of cause.

Withdrawal

First-year students who withdraw during the academic year or who fail to reenroll for the second semester are not eligible to return to school. Instead, they must compete with other applicants for the year in which they wish to return. The reason for the withdrawal and the quality of work done prior to withdrawal or failure to reenroll are considered when students reapply.

Unless granted a leave of absence by the dean, second- and third-year students who fail to enroll for any semester during the academic year must obtain permission from the admissions committee if they wish to reenroll. (Students are considered first-year if they have fewer than 27 s.h. of credit at the time of withdrawal or failure to enroll.)

The associate dean may grant a second- or third-year student a leave of absence for up to one year, if the student shows good cause.

Students who withdraw from the College of Law after paying tuition are entitled to a pro rata refund.

Audit

Students may audit a class with the instructor’s permission, provided the class is not filled within the preregistration period.

Student Conduct

Students are expected to act in a manner appropriate at a professional school. An act or omission that is dishonest or designed to take
unfair advantage may subject a student to sanctions as serious as expulsion from school. Misconduct policies and procedures are published annually in the college’s Student Handbook.

**Academic Advising**

The Associate dean for academic affairs works with the dean on academic programs and problems of the law school.

The Associate dean for student affairs provides academic advice and counseling to students; advocates for student concerns; offers information and makes referrals for students with professional, personal, or family problems; facilitates operation of the student discipline system; and arranges reasonable accommodations for disabled students. The associate dean also advises law students pursuing combined degrees in University of Iowa graduate programs and serves as the liaison with those programs.

Each faculty adviser advises five or six students on course selection, academic matters, and when necessary, other concerns.

Small section instructors advise students enrolled in their small sections during students’ first year of study.

Each year one or two tenured faculty members are selected by the Iowa Student Bar Association to serve as College of Law ombudspersons. Students who have a problem or grievance should seek an ombudsperson’s help. All complaints are handled in strict confidence.

The College of Law registrar is in charge of student record keeping and should be students’ first recourse for information about course enrollment, scheduling, residence requirements, combined program status, student certification for various loan agencies and state bar applications, and progress toward graduation.

The Student Services Committee oversees coordination and periodic review of how the college provides academic and curricular counseling to law students. The committee reviews and coordinates the college’s efforts to provide information, offer services and programs, and make referrals regarding its students’ mental and emotional health. The committee has oversight for assignment of faculty academic advisers to law students, for matters of faculty/student collegiality, and for the Academic Achievement Program.

**Resources**

**Iowa Law Library**

The centerpiece of the Boyd Law Building is the University of Iowa Law Library, which occupies space on four floors and is one of the major repositories of legal materials in the United States.

Iowa’s collection currently is ranked fourth in the number of volumes and volume equivalents and second in the number of titles among all U.S. law school libraries. It contains more than 1 million volumes and volume equivalents and covers a full range of Anglo-American, foreign, international, and comparative law. The library contains in-depth collections on law of the United States and of every state and territory. Its collection of early English legal source materials and its holdings of state documents are extensive. Since 1968 the library has been a selective Federal Documents Depository. An open-stack policy makes the collection accessible to all patrons, and a full staff of professional librarians serves students, faculty members, and other users.

The WESTLAW and LEXIS/NEXIS computerized information retrieval systems are available for training and research activities. Several CD-ROM and online data retrieval systems are available on workstations open to the public.

The entire collection of the law library is cataloged on the InfoHawk database, including the collection of U.S. government documents. The InfoHawk system also features an automated circulation system for checking materials out of the library.

The library uses both OCLC, the Online Computer Library Center, and RLG [Research Libraries Group] for online cataloging, catalog card production, and interlibrary loans. OCLC’s database contains the collections of most of the public and state historical libraries throughout the United States. RLG’s database includes the major research collections in the country and abroad.

**Writing Resource Center**

The Writing Resource Center is dedicated to strengthening law students’ command of writing skills central to the study and practice of law. The first writing center in the country established specifically for a law school community, the Writing Resource Center serves as an extension...
of the classroom and supplements the college's small-section writing program.

Members of the writing center's staff help law students with a broad range of writing, including class assignments, seminar papers, law journal articles, and symposium presentations. They also assist students with résumés, application letters, and writing samples.

In addition to helping students with general writing skills in one-on-one tutorial sessions, the center's staff trains editors in editing skills, sets up individualized programs of study, offers grammar and style workshops, and provides strategies for overcoming writer's block and adapting material for various audiences.

The Writing Resource Center is staffed by writers, including second- and third-year law students, lawyers, and a director whose Ph.D. degree is in the area of writing instruction.

**Career Services Office**

The College of Law Career Services Office provides career planning and job search assistance to law students. Each year the office sponsors a comprehensive series of programs on career options and job search skills. It also maintains a library of resources and provides individual advising by professional staff. Job search assistance also is available to alumni.

The special rigor that characterizes Iowa's distinctive brand of legal education attracts a wide variety and growing number of recruiters to campus each year. During a typical academic year, more than 250 employers send representatives to Iowa City to conduct job interviews, and many more firms use the college's Career Services Office to search for prospective employees through written inquiries and off-campus interviews.

Iowa graduates traditionally have had excellent success in finding employment; usually, more than 98 percent are employed within a few months of graduation. The career services staff is happy to talk with prospective students regarding the college's programs and the success of its graduates.

**Student Services**

**Bookstore**

The College of Law has its own bookstore, which carries all assigned texts and materials for law classes. It also stocks a variety of professionally prepared outlines, hornbooks, and other study aids, as well as a limited selection of school supplies, including pens, notebook paper, binders, USB flashdrives, computer disks, and so forth.

Photocopied handouts and teaching materials assigned by course instructors are available through the bookstore.

Students may charge costs for books, class materials, and supplies directly to their University accounts. The bookstore does not accept credit cards.

**Computers and Word Processing**

Since electronic information technologies are vital in legal and business work, the College of Law encourages all law students to become proficient with computers. Access to word processing software also helps law students draft the many papers, articles, and other manuscripts that are a regular part of the law curriculum. The college has installed 41 personal computers attached to a local area network for use by its students. Students also are encouraged to purchase computers, if possible, and to use them in connection with their law school work.

The law college provides network and Internet access from all student library carrels. To participate, law students supply their own laptop computers, which must meet required specifications. Specifications are available from the Law Library computer support office.
Wireless internet access is also available in some areas of the Law Library.

The college's computers are loaded with WordPerfect and Microsoft Word software and the college provides training for and access to the two major online computer research databases, West Publishing Company's WESTLAW and Mead Data's LEXIS. Once students complete the training, they have unlimited free access to these services at home via their own PCs and on the student and public workstations in the Law Library.

The Law Library also provides CD-ROM workstations that allow access to databases in CD-ROM formats. Some of the titles available are United Nations documents, complete from 1945; Index to Legal Periodicals; TIARA, a database containing treaties; and numerous U.S. government documents published on CD-ROM.

The University provides free e-mail accounts to its students, faculty, and staff through its Information Technology Services office (ITS). Students can sign up for e-mail accounts online or at the ITS offices in south Lindquist Center. ITS advises University of Iowa students, faculty, and staff on computer hardware and software needs and can provide information about educational discounts on some purchases. ITS also offers a wide variety of free computer short courses throughout the year. For information on computing resources at the University, consult “Computing” on the University's home page.

**Copy Services**

Copy machines are available on each floor of the law library. Students with a copy card can use any of the machines. Cards are available for purchase from the library's circulation desk. Students also may use networked printers in the library and charge them to their University accounts.

For better quality and/or high-volume copying, there is a University-operated copy service on the first floor of the Boyd Law Building. Prices are comparable with those at commercial concerns, and students may charge copying to their University bills.

**Student Activities and Organizations**

Alianza promotes viable changes within existing legal institutions in order to develop constructive legal and community programs, produce competent and effective Latino and Latina attorneys, and utilize available resources—activities necessary to safeguard and advance the rights and opportunities of oppressed peoples. To achieve these goals, Alianza recruits for the law school. Alianza’s philosophy is that national unity is fundamental for the collective awareness needed to bring about progressive policies in legal education. The association welcomes all students.

The American Constitution Society (ACS) is a new nonpartisan organization whose goal is to foster discussion of important issues of law and policy. Visit the society's web site (http://www.americanconstitutionsociety.org).

The Asian American Law Students Association (AALSA) seeks to instill greater awareness among law students of the needs of the Asian American community, and to encourage a greater commitment toward meeting those needs. Visit the association's web site (http://www.uiowa.edu/~aalsa).

The Iowa chapter of the Black Law Students Association (BLSA) focuses on the relationship of black attorneys to the American legal structure and works to foster an attitude of professional competence. BLSA strives to promote the needs and goals of black law students, instill a greater awareness among law students of the needs of the black community, and encourage a greater commitment toward meeting those needs. The chapter seeks involvement in the local community and in recruitment programs. Membership is open to all students who support the association's goals. Visit the association's web site [http://www.uiowa.edu/~blsa].

The Christian Legal Society maintains a Christian law fellowship at the College of Law whose mission is to enable its members to love their Lord and to love their neighbors as themselves.

The college’s Equal Justice Foundation (EF), a chapter of the national foundation, supports public interest law concerns, with emphasis on promoting equal access and adequate representation in the courts and other forums for citizens and citizens’ groups. The UI chapter’s professional activities are aligned with those of the national organization. They include work in varied legal activities statewide; College of Law activities, including coordination with other student organizations to provide the college with a better public interest support base; promotion of public interest career opportunities; and provision of information about public interest activities and concerns. Membership is open to all College of Law students.
The Environmental Law Society provides an educational forum for environmental law topics. During spring semester, the organization sponsors a lecture series featuring professors and experts in environmental law. The group also provides limited legal research and counseling services for attorneys, organizations, and citizens who have questions concerning environmental law. Membership is open to all College of Law students.

The Federalist Society fosters critical thought and debate about the application of conservative and libertarian principles to the law. Its mission is to promote, advocate, and defend its founding principles and further their application through its activities, which are aimed at reordering the legal system’s priorities to place a premium on individual liberty and the rule of law, and restoring recognition of those principles among law students, faculty members, lawyers, and judges.

The Intellectual Property Law Society (IPLS) promotes exploration of traditional areas of intellectual property law (patent, trademark, copyright) and related areas such as antitrust and entertainment law. The society provides a forum for faculty and student discussion of contemporary issues relating to intellectual property law and its practice; fosters interaction between law students and intellectual property law practitioners through a mentor program that pairs members with intellectual property law practitioners; and offers symposia. All members of the University community are welcome to attend a Society meeting or symposium. Visit the society’s web site [http://www.law.uiowa.edu/~iplaw].

The Iowa Law Student Animal Legal Defense Fund (SALDF) is dedicated to providing a forum for education, advocacy, and scholarship aimed at protecting the lives and interests of animals through the legal system, and to raising the profile of the field of animal law. The organization has three goals: to educate the College of Law community about forms of institutionalized animal abuse, to foster awareness of litigation as a means to combat this abuse, and to provide opportunities for students to work with attorneys on litigation projects aimed at protecting animals’ lives and interests.

The Iowa Law Student Animal Legal Defense Fund (SALDF) is dedicated to providing a forum for education, advocacy, and scholarship aimed at protecting the lives and interests of animals through the legal system, and to raising the profile of the field of animal law. The organization has three goals: to educate the College of Law community about forms of institutionalized animal abuse, to foster awareness of litigation as a means to combat this abuse, and to provide opportunities for students to work with attorneys on litigation projects aimed at protecting animals’ lives and interests.

The International Law Society aims to increase student and faculty awareness of international law and related issues. The society’s brown bag lunch lecture series and annual spring conference expose students and faculty to a wide variety of contemporary legal issues surrounding the study and practice of international law. Members also work to support the activities of the University of Iowa Center for Human Rights; promote the Iowa-Arcachon, France, summer program in comparative and international law; participate in the annual Philip C. Jessup International Moot Court Competition; and bring together faculty members and students who share an interest in international affairs. Visit the society’s web site [http://www.law.uiowa.edu/groups/ils].

The Iowa Coalition for Human Rights (ICHR) promotes awareness and activism concerning domestic and international human rights violations. The coalition pursues its aims through academics, activism, and volunteer activities open to the University of Iowa community and the public. Visit the coalition’s web site [http://www.law.uiowa.edu/groups/ichr].

The Iowa Student Bar Association (ISBA) acts as the College of Law’s student government. Governed by an executive council, the association provides a collective voice for the student body and a source of organization and funding for a variety of college activities and programs. Law students may get involved with the association by serving as class representatives or on faculty-student committees, which deal with admissions, curriculum, financial aid, placement, and so forth. The association presents speakers, sponsors events with other organizations, publishes a newsletter, and sponsors social events. Its legal guardian program assigns entering law students to upperclass students, who provide encouragement and information. Visit the association’s web site [http://www.law.uiowa.edu/groups/isba/trialrun.php].

The J. Reuben Clark Law Society emphasizes three basic values and attitudes toward the practice of law and the place of law in modern society: public service, loyalty to the rule of the law and the Constitution of the United States, and appreciation for the religious dimension in American society and in lawyers’ personal lives.

Law Students for Choice is committed to increasing education and professional training in reproductive rights law. The society supports Iowa law student activism, advocacy, and networking in order to ensure that new lawyers can successfully defend and expand family planning rights and reproductive freedoms.

The Native American Law Students Association (NALSA) promotes awareness of legal, political, cultural, and social issues that affect Native Americans, Alaskan Natives, Native Hawaiians, and other indigenous peoples. NALSA also seeks to promote the study of federal Indian
law and provides a forum for the exploration of issues in tribal sovereignty, natural resources, family law, trust obligations, and cultural identity.

The National Lawyers Guild (NLG) is dedicated to the use of law as a means to promote progressive social change. Iowa’s student chapter sponsors discussion panels on topics such as South African divestment and has cosponsored events with other student organizations. It also invites faculty members to speak in the college’s student lounge on topics ranging from the political aspects of selecting Supreme Court justices to employment discrimination. Membership in the Iowa chapter is open to all College of Law students. Membership in the national organization is optional.

The Organization for Women Law Students and Staff (OWLSS) aims to address the changing needs and problems of women in the legal profession and to develop, recommend, and implement new programs, especially those that meet the needs of women at the College of Law. It also sponsors programs of interest to the general law school community. OWLSS has sponsored fall recruitment of prospective women law students, a safety-in-numbers program, brown bag lunches with guest speakers, sponsorship of members to the annual National Women and the Law Conference, a support network, a regular newsletter, and joint programs with women student groups in medicine and dentistry. Membership is open to all College of Law students, faculty members, and staff members. Visit the organization’s web site (http://www.law.uiowa.edu/groups/owlss).

The Outlaws provides a common forum for gay, lesbian, bisexual, and transgendered persons interested in the law, and promotes a climate of mutual support, protection, and professional advancement. Membership is open to all College of Law students and faculty members. Visit the group’s web site (http://www.uiowa.edu/~outlaws).

Founded in 1902, Phi Alpha Delta (PADS) is the nation’s oldest and largest law fraternity. It was the first law fraternity to remove membership restrictions based on race, color, creed, national origin, and grade-point average. Iowa’s Hammond Chapter was established in 1908 and became the first PADS chapter to accept students of all races and religions. It participates in fund-raisers and other service projects to benefit local and national service organizations. Membership is open to all College of Law students. The Pro Bono Society exists to reinforce the value of public service and volunteerism in the legal profession. Membership in the Pro Bono Society is earned through objectively measured activities during the academic year. Iowa law students who complete and report 15 hours of voluntary public service in each of two consecutive semesters are considered for membership. Time donated to a charitable or public service cause, which may be law-related or not, is considered voluntary public service; the requirement is interpreted broadly, so that students may volunteer in an area of interest to them. Members receive a certificate of membership and are invited to attend the annual recognition dinner. The society is organized through the Iowa Student Bar Association.

The 21st-Century Democrats work to elect Democratic candidates and provide opportunities for political candidates and elected officials to speak at the law school and interact with students and staff.

Special Activities

Parents and Partners Day

Each fall, the parents, spouses, and friends of all students are invited to the campus for activities sponsored by the Iowa Student Bar Association and the Iowa Law School Foundation. Past activities have included a simulated class, a brunch, a musical or auction, and a tour of the college. The weekend is a good opportunity for families and friends to see what the life of a law student is really like.

Supreme Court Day

The College of Law hosts the Iowa Supreme Court on The University of Iowa campus each fall. Third-year students present oral arguments in a moot case to the court, and faculty members host receptions at their homes for the justices, attorneys, and students, providing an opportunity for informal visits with members of the court.

Iowa Advocate

_Iowa Advocate_, the law school’s alumni magazine, is published twice a year. It features articles and news about the college and its alumni, faculty, and students.
Iowa Law School Foundation

During the three years that students spend at the College of Law, many of the classes, programs, and projects in which they participate are partially or totally supported by private gifts from law alumni and friends.

The Iowa Law School Foundation was created by the 1952 graduating class to promote close relations between the college and its alumni and to solicit gifts for scholarships, faculty support, and other projects that benefit the college.

Foundation funding benefits student scholarships, loans, and research assistantships; guest speakers; student orientation activities; the clinical law programs; Moot Court, Trial Advocacy, and Client Counseling programs; the student-edited law journals, and Iowa Advocate.

In order to support these programs and activities, the Iowa Law School Foundation actively solicits contributions from the college’s more than 8,700 alumni.

Legal Aid

Students in need of legal assistance may consider turning to the University’s Student Legal Services. The Legal Services Corporation of Iowa also provides civil representation to indigent clients.

Courses

Some courses are offered irregularly. For information on current course offerings, consult the College of Law registrar. Also see the ISIS (Iowa Student Information Services) web site and the College of Law Guide to Courses.

First Year

091:102 Introduction to Law and Legal Reasoning 1 s.h.
Basic concepts and intellectual skills necessary for understanding the first-year curriculum.

091:104 Civil Procedure 4-6 s.h.
Procedure before trial; commencement of a suit; jurisdiction over the person and venue; pleadings, motion practice, including summary judgment, simple joinder of parties and claims in determining scope and size of the lawsuit; pretrial discovery procedures, the trial, claim and issue preclusion.

091:116 Constitutional Law I 3-5 s.h.
Constitutional allocation of governmental powers; doctrine of judicial review and nature of judicial function in constitutional cases; relationships among branches of national government; the federal system, including powers delegated to national government, powers reserved to states, and intergovernmental immunities; relationship between state and national governments.

091:120 Contracts and Sales Transactions I 1, 3-5 s.h.
Purpose, scope, development of judicial protection, as modified by legislation, accorded parties to contractual agreements; creation of contracts, their performance, construction, interpretation, remedies for breach.

091:121 Contracts and Sales Transactions II 3-5 s.h.
Continuation of 091:120; emphasis on the Sales Article of U.C.C. relative to unencumbered sales transactions.

091:124 Criminal Law 3, 5 s.h.
Basic understanding of the substantive criminal law; underlying premises of and justifications for criminal law; emphasis on general doctrines that define the minimum elements necessary to impose criminal liability, essential requirements of culpable conduct, blameworthiness mental state; rape, homicide, causation, attempt, conspiracy, accomplice liability, various defenses to criminality, such as self-defense, duress, intoxication, insanity, diminished capacity.

091:132 Property I 3, 5 s.h.
Concept of private property as one of the legal system's basic foundations; historical development of Anglo-American property law, changing currents of economic, social, political thought; emphasis on understanding decision making by courts in the common-law tradition; fundamental notions relating to the origins of property rights, relationship of possession and ownership, pliability of property law, the impetus for promoting transfer of property interests, function of public recording, role of adverse possession and prescriptive use in imparting stability to property relationships, responsiveness of property law to social change as illustrated by landlord-tenant act.

091:136 Property II 3-5 s.h.
Continuation of 091:132; limitations imposed on use of property by private agreement and public regulations; problem areas, including easements, restrictive covenants, nuisance, eminent domain, constitutional limitations on public activities adversely affecting private property, zoning, other forms of land use control; relative merits of private ordering, judicial activity, legislative and administrative measures for resolving conflicts in resource use; relationships between law and other disciplines, particularly economics; law's utility as an instrument for achieving societal objectives.

091:364 Torts 3, 5 s.h.
Development of tort principles; civil responsibility for harms to tangible personal and property interests; roles of legislatures, judges, juries; intentional harms, negligence, and strict liability from perspectives of jurisprudence, economics, and moral philosophy.

Second and Third Year

091:125 Criminal Procedure: Investigation 3-4 s.h.
Guarantees and rights of the Fourth, Fifth, and Sixth Amendments to the U.S. Constitution against police and prosecutorial practices designed to investigate and prove criminal cases; protection against unreasonable searches and seizures, guarantee against extraction of involuntary confessions, privilege against self-incrimination, constraints upon securing confessions (i.e., Miranda), due process protection against unreliable suggestive identification procedures, right to counsel, protection against involuntary admissions and identification practices; exclusionary rules and remedies that enforce guarantees and rights.

091:192 Art, Law, and Ethics 3 s.h.
How law and ethics apply to the individuals and institutions concerned with the visual arts; historical focus; issues from 18th century to present; how to evaluate the ways in which law and ethics support and constrain the visual arts; development of vocabulary critical for recognizing and evaluating legal and ethical issues in the visual arts. Same as 01H:182, 024:161, 033:175.
812 College of Law

091:193 Human Rights in the World Community 1-3 s.h.
Human rights, their moral and legal basis, their promotion and protection through international organizations; comparative and international analysis of equality and nondiscrimination, human rights issues that confront the contemporary world; how the world community enforces human rights at global, regional, and national levels and in the private sector. Prerequisite: junior, senior, or graduate standing.

091:195 Introduction to Public International Law 1-3 s.h.
Principles of law that determine rights and duties of nations in their dealings with each other, with focus on interests in the United States; procedural aspects of international law involving international institutions, including the International Court of Justice.

Custodial state intervention through the juvenile justice and child welfare systems to protect children from maltreatment by parents and other caretakers; definitions of child abuse and neglect, reporting laws, civil abuse and neglect proceedings, foster care and out-of-home placement of children, termination of parental rights, role of attorneys and guardians ad litem in child abuse and neglect proceedings.

091:197 Advanced Criminal Law: Sex Offenses 1 s.h.
Traditional approaches to defining forcible rape, modern efforts at reforming and reformulating the law of forcible rape (exemplary statutes and proposals, critical assessments of these statutes and proposals); deception and nonphysical threats as bases for sexual assault prosecutions; aspects of sex offense law pertaining to family, issues surrounding the crime of statutory rape and other sex offenses involving minors and children, legitimacy of and reasons for criminalization of sexual relations between consenting adults.

091:198 Advanced Legal Research 2 s.h.
American legal resources, in-depth, nonlegal information sources; introduction to research resources of other legal jurisdictions and international law.

091:200 Agricultural Law 2-3 s.h.
How law affects and is affected by agriculture; land and production credit, including agricultural leases and security interests in farm products; anticompetitive farm laws; federal and state regulation of production, distribution, and marketing of crops and livestock; agricultural cooperatives; livestock feeding facilities; crop and livestock production contracts; soil conservation programs; legal mechanisms promoting preservation of farmland.

091:201 Antitrust: Legal and Economic Analysis 3 s.h.
Survey and economic analysis of American antitrust laws; focus on law of monopolization, federal merger policy, monopolization, predatory pricing, vertical restraints, resale price maintenance, private enforcement. Same as 06E:171.

091:202 Advanced Civil Procedure 3 s.h.
Complex civil litigation, personal and subject matter jurisdiction, discovery, intervention, mandatory (interlocutory) injunctions, class actions, appellate jurisdiction, class actions.

091:203 Income Taxation of Estates and Trusts 1-3 s.h.

091:204 Administrative Law 3 s.h.
Formal and informal procedures, processes, and functions of state and federal administrative agencies; legislative, executive, and judicial control of their actions.

091:206 Criminal Procedure: Adjudication 3-4 s.h.
Adjudicatory phases of the criminal justice system: indictments and the charging process, preliminary hearings, applications for release on bail and pretrial detention, processes of discovery, guilty pleas, jury selection, conduct of criminal trials, sentencing proceedings and post-trial motions, appellate review, collateral remedies, focus on constitutional rights, specifically the Fifth, Sixth, Eighth, and Fourteenth Amendments, statutory provisions, rules of criminal procedure.

091:207 Arbitration 2 s.h.
Arbitration's role in modern conflict resolution, in varied settings.

091:208 Antitrust Law 3 s.h.
Laws dealing with restraints of trade, monopolization and mergers; history of these laws and their development in the courts; current doctrine and its underlying legal and economic theories; analytical tools of trade; sufficiency of economic efficiency as the measure of justice.

091:210 Appellate Advocacy I 0-1 s.h.
Experience based on an assigned fictitious case: writing an appellate brief asserting the client's position, and arguing the case before a panel of students, faculty, community attorneys.

091:211 Appellate Advocacy II 1 s.h.
Continuation of 091:210; increased complexity; for second-year students who want more experience in appellate advocacy.

091:213 Business Reorganizations 3 s.h.
Reorganization of business under Chapter 11 of the federal bankruptcy code; commencement of proceedings, mechanisms for continuation or cessation of business operations, case administration, executory contracts and avoidance powers, determination of claims, formulation and confirmation of reorganization plans, discharge and other effects of a confirmed plan. Prerequisite: 091:214 (preferred) or 091:222 or 091:244 or 091:332.

091:214 Bankruptcy 3-4 s.h.
Right of individuals and entities to file for federal bankruptcy protection; overview of state collection remedies, core bankruptcy topics such as automatic stay, property of the estate, calculation of creditors' claims; consumer bankruptcy under Chapter 7 (liquidation) and Chapter 13 (reorganization of debts of individuals), ethical issues in bankruptcy representation, effectiveness of consumer bankruptcy system, Chapter 11 (business reorganizations).

091:216 Business Planning 3-4 s.h.
Problems involving common business transactions in the context of business planning and counseling, emphasis on problems of closely held corporations. Prerequisites: 091:241 and 091:272.

091:217 Corporate Finance 1, 3 s.h.
Applications of modern financial theory to modern corporate law topics, including use of valuation techniques, portfolio theory, diversification strategies, financial statement analysis. Prerequisite: 091:241.

091:218 Corporate Crimes 3 s.h.
How corporations and their officers, directors, employees, and agents can violate criminal law; liability imposed under state and federal laws in the United States, criminal liability under laws of other countries; fundamentals of U.S. law; case studies of recent prosecutions involving American corporations.

091:219 Civil Procedure in Pretrial Theory and Practice arr.
The law of pleadings and other pretrial matters presented in 091:104; hypothetical case developed from interview to pleading to early pretrial stages; experience drafting relevant pleadings and motions.

091:220 Notable American Trials: Trial Skills 2-3 s.h.
Trial skills and strategy; real trial transcripts, contemporary accounts of the selected trials; secondary literature evaluating what actually happened in the courtroom and relevant history.

091:221 Creating Value in Business Deals and Conflicts 1 s.h.
Development of skills for managing situations creating value for clients in conflicts.
091:222 Commercial Transactions 3-4 s.h.
Commerical and consumer transactions, with focus on use of
negotiable instruments and personal property security interests;
basic legal structure of articles 3, 4, and 9 of the Uniform
Commercial Code; related provisions of the Bankruptcy Code.

091:223 Civil Commitment and Guardianship
Laws 1-3 s.h.
General law of civil commitment examined through the law of
Iowa and relevant U.S. Supreme Court cases; teaching
nonreturnability doctrine, corporation for prosecution or defense of
civil commitment cases in Iowa.

091:224 Comparative Law 2-3 s.h.
Comparative study of origins, development, and characteristic
features of the world's main legal systems; common and civil law
traditions; historical development of the main legal systems, their
sources, ideologies, techniques; subjects important to
international legal practice (e.g., international judicial assistance,
application of foreign law in American courts, application of
American law in foreign courts); in-depth study may include
United States, France, Germany, China, Russia, South Africa, or
Palestine. Same as 144:142.

091:225 Comparative Law in Post-Communist
Countries arr.
Law and legal reforms in Russia, the newly independent states
(NIS), and post-communist countries of eastern and central
Europe.

091:226 The Regulation of Banking in the United
States 2-3 s.h.
Existing and ideal role of regulation in facilitating economic
growth and ensuring sound banking practices; main federal laws
addressing market entry/expansion, bank and holding company
supervision, deposit insurance/bank failure.

091:227 Comparative Constitutional Law 2-3 s.h.
Constitutional law structures; decision making and substantive
results under a variety of different constitutional systems,
including major Western and non-Western systems; forms of
judicial review and separation of powers, forms of federalism and
alternatives to federalism, conceptions of fundamental human
rights.

091:228 Conflict of Laws 2-3 s.h.
Problems created when a transaction or relationship has
associations with more than one jurisdiction; emphasis on
selection of appropriate jurisdiction-selecting rules, recognition of
other states' judgments; current evolution in theoretical
approaches to these problems.

091:229 International Intellectual Property Law 3 s.h.
International instruments in intellectual property (e.g., TRIPs
agreement, Berne Convention, Paris Convention) and key
regional agreements (e.g., European Patent Convention);
intellectual property regimes and doctrines of interest within
those regimes. Prerequisite: an intellectual property course or
content of instruction. Recommended: 091:295.

091:231 Antitrust Policy 3 s.h.
Federal antitrust policy concerning mergers, distribution restraint,
franchising, government regulation. Prerequisite: student who has
taken or will not take 091:201.

091:232 Constitutional Law II 3, 5 s.h.
Limits on governmental power imposed by the national
constitution for protection of individuals; protection of life, liberty,
and property by due process and equal protection; freedom of
expression and association; religious freedom and the guarantee
against establishment of religion; 1st and 14th Amendments.

091:234 Commercial Contract Drafting 2-3 s.h.
Components of common commercial contracts, analytical and
technical processes involved in drafting contracts for commercial
purposes; settlement agreements, contracts for services, agency
agreements, employment agreements, stock or asset purchase
agreement, leases, problems associated with data processing
contracts; trial drafting of appropriate clauses for contract
problems in varied commercial settings.

091:236 Contemporary Russian Law in Historical
Context 3 s.h.
Contemporary law and legal reforms in Russia, in context of
Russian, Soviet, and European history; introduction to the current
Russian legal system; similarities and differences in the
contemporary Russian legal system and the traditional (pre-1917)
and Soviet legal models; major legal issues of contemporary
Russia; degree to which Russian law is characterized by continuity
or change relative to law of former Russian empire and USSR.

091:237 Comparative Criminal Law Issues: United
States and United Kingdom 1-3 s.h.
Right of silence/right against self-incrimination in Britain and
America; historical origins, recent development, and practical
application of these rights; effects of capacity and age on the
exercise of these rights, the prosecutor's obligation of disclosure
and recognized exceptions; admissibility of evidence.

091:239 Corporate Governance and Control 1-3 s.h.
Principal issues in creation of appropriate governance and control
systems for large publicly-held corporations. Recommended:
091:241.

091:240 Advanced Arbitration 1-2 s.h.
Advancement of fundamental legal concepts explored in 091:207
through analysis in context of varied applications and hypothetical
problems; stages of arbitration, from agreement to arbitrate and
selection of arbitrators to final award; post-award remedies,
judicial review. Prerequisite: 091:207.

091:241 Corporations I 3-4 s.h.
Structure, characteristics of both large publicly and closely held
corporations; distribution of powers among management,
directors, shareholders, fiduciary duties that limit those powers;
may include basic principles of agency, partnership, and limited
partnership law.

091:242 Corporations II 2-3 s.h.
Continuation of 091:241; emphasis on shareholders' derivative
actions, appraisal remedies, insider trading. Prerequisite: 091:241.

091:243 Taxation of Business Enterprise 3-4 s.h.
Income tax treatment of corporations, partnerships, and limited
liability companies, with focus on closely held firms and their

091:244 Debt Collection Law 2 s.h.
Procedures for collection of unsecured debt; mechanisms for
enforcement of money judgments, exempt property, sheriff's sales,
regulation of abusive collection practices, pre-judgment
remedies, statutory lien, constitutional limitations, fraudulent conveyances,
state law insolvency procedures.

091:245 Domestic Abuse Law 2-3 s.h.
The law's response to domestic abuse (i.e., the pattern of violent
crime and coercive control used in adult intimate relationships); cultural
context of domestic violence, legal and social reform efforts of
the past decade and their impact on the administration of justice,
use of common law and statutory injunctions, the criminal justice
system's response, constitutional and interpositional torts,
mediation, federal legislation.

091:246 Family Law in the World Community arr.
Family law topics from an international and comparative law
perspective, treatment of family law problems in various legal
systems, application of international treaties and conventions to
issues such as child custody, adoption, reproductive freedom,
domestic violence. Prerequisite: 091:195 or 091:268 or consent
of instructor.

Constitutional theory and doctrine under the First Amendment,
with focus on the free press guarantee and protection for news
and journalism. Prerequisite: 091:232.
091:249 Election Law 2-3 s.h.
Major areas of law governing elections and political participation in the United States; how election laws influence political activity, and vice versa; Constitutional right to political participation, the doctrine of one person one vote, race discrimination in voting rights, role of political parties, law of campaign finance; legal issues of 2000 presidential election.

091:250 Employment Law 2-3 s.h.
Rights of employees, employers in unorganized workplaces; legal issues that arise between employers and employees in nonunionized settings.

091:251 Employee Benefits arr.
The basic act and its detailed implementing regulations; types of qualified plans, plan funding mechanisms, participation standards, permissible discrimination in benefits and contributions, vesting requirements, tax deductions to employers, taxation of distribution to employees, fiduciary concepts, IRAs, and plans for self-employed individuals. Prerequisite: 091:272.

091:252 Gender and the Law 3 s.h.
How considerations of gender have shaped the development of constitutional law and argument, from the American Revolution to present. Same as 16A:175.

091:253 Employment Discrimination 2-3 s.h.
Legal prohibitions against discrimination in employment on the basis of race, sex, national origin, age, focus on Title VII of the Civil Rights Act of 1964; procedural and remedial problems, elementary issues of proof.

091:254 Education Law 3 s.h.
Federal and state authority to govern public and private schools; rights of parents, teachers, students; powers of legislators, judges, education; interaction of law and education policy. Corequisite: 091:232.

091:255 Environmental Law 3 s.h.
Role of the legal system in addressing problems of environmental disruption, with special emphasis on air, water, hazardous waste pollution.

091:256 Federal Criminal Practice 2 s.h.
Individual steps in the criminal process, development of advocacy skills required for effective practice of law. Prerequisite: 091:125.

091:257 Establishing a Business in the EU 1 s.h.
Legal and practical issues related to establishing and conducting businesses in the European Union; issues that affect how businesses are organized and run under the laws of the union and its member states; business organization, labor regulations, competition law issues, dispute resolution alternatives.

091:258 Arts and Entertainment Law 1-2 s.h.
The entertainment industry; issues affecting creative artists, financiers, producers, other participants in the world of theater, print publishing, motion pictures, television, music, fine arts.

091:259 Government Contracts arr.
Legal structure under which the federal government places contracts and through which it attempts to advance public policy goals; differences and similarities between the government’s process of specialized litigation forums and the common law of contracts and UCC Article 2 law; efficacy of litigation forums and policy goals.

Impact of the constitutional distribution of powers on the conduct of U.S. foreign relations; influence of separation of powers doctrines on conduct of foreign relations, status of international law in the U.S. legal system, role of courts in adjudicating issues affecting foreign relations, controversy over the distribution of war powers between the president and Congress.

091:261 Health Law 2-3 s.h.
Major areas of concern in health law; tension between quality, access, costs; may include malpractice, quality control, health care financing, access (insurance, Medicare, and Medicaid), licensing, bioethics (end-of-life decisions, informed consent, surrogacy, organ transplantation).

091:262 Federal Regulations of Health Care Industry: Fraud and Abuse 2 s.h.
Impact of governmental regulation on business planning and transactions in application of federal fraud and abuse laws to organizational entities; False Claims Act and the Stark Law, corporate compliance programs, enforcement efforts. Prerequisite: 091:241 or consent of instructor.

091:263 Disability, Law, and Society 2-3 s.h.
Policy issues, statutes, and case law examined in legal, societal, and historical contexts; the role of families in supporting full participation in society by children and others with severe disabilities.

091:264 Survey of British and Commonwealth Legal History 2-3 s.h.
British legal history from 16th to early 20th century; development of law in the British colonies; history of the jury; changing roles of defense counsel and prosecutors; development of law of evidence and defendant’s rights, women and family, labor law, law and evolution of modern capitalism in the railway industry, legal education, family and labor law in the colonies.

091:265 Evidence 3 s.h.
Rules of evidence developed in common-law courts and under statutes; judicial notice; examination of witnesses; privilege and competency; remote and prejudicial evidence; hearsay; burden of proof and presumptions; roles of judge and jury.

091:266 European Union Law 2-3 s.h.
Law of the European Union; EU legal and institutional structure; role of the European Court of Justice in elaborating constitutional and administrative law for the EU on the basis of treaties and legislation; principle of free movement; progress of European integration.

091:267 Legal Internship arr.
Experience in nonprofit organizations, government agencies; unpaid; usually summer.

091:268 Family Law 3-4 s.h.
Creation, dissolution of marriage and parent-child relationships; lawyer's practical approach to family law problems combined with a broader view of how the law should treat those problems as a matter of sound policy.

091:269 Advanced Family Law 3-4 s.h.
Theory and practice in family law; central problems in family law practice from theoretical and practical perspectives. Prerequisite: 091:268.

091:270 Federal Criminal Law 2-3 s.h.
Federal criminal law enforcement, the scope of federal criminal laws, and limits on federal criminal authority examined in the context specific federal crimes, such as RICO, mail fraud, drug defense enforcement, criminal civil rights statutes.

091:271 The First Amendment 3 s.h.

091:272 Basic Federal Income Taxation 3-4 s.h.
Operation, policies, principles of federal income tax, including gross income, deductions, property dispositions, tax accounting, income shifting.

091:273 Public International Finance 2-3 s.h.
Law and policy relating to international financial flows emanating from official sources, such as the International Monetary Fund, World Bank, United Nations, regional development banks, individual governments (lateral aid), history of international public finance, operations of major multilateral financial institutions, challenges facing international public finance in a global era.

<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>091:274</td>
<td>Federal Courts: Constitutional Litigation and the Dual Court System</td>
<td>3 s.h.</td>
<td>Dual court and dual law system in the United States; emphasis on constitutional tort litigation (actions against governmental officials for violations of the U.S. Constitution); supremacy of federal law, preemption, federal incorporation of state law, federal and state court jurisdiction over cases arising under federal law, judicial federalism (including various abstention doctrines), the 11th Amendment; constitutional tort litigation, including the scope of the plaintiff's rights in constitutional tort actions; immunities that may be invoked by a defendant; range of legal and equitable remedies potentially available to a successful plaintiff.</td>
</tr>
<tr>
<td>091:275</td>
<td>Federal Courts: The Structure and Jurisdiction of the Federal Judiciary</td>
<td>3 s.h.</td>
<td>Overview of federal courts' federal-question, diversity, supplemental, and appellate (jurisdiction; venue, removal of cases from state to federal courts; other issues in powers of federal judiciary, such as Congress’s power to alter the structure and jurisdiction of the federal courts, of forum non conveniens doctrine, federal habeas corpus petitions, transfer of cases, claim and issue preclusion, powers of legislative courts.</td>
</tr>
<tr>
<td>091:277</td>
<td>Cyberspace Law</td>
<td>2-3 s.h.</td>
<td>The Internet and World Wide Web’s implications for law; application of traditional legal concepts to Internet transactions, the new changes in the practice of law and court procedures; focus on the Internet's unique implications for content regulation, copyright, defamation, e-business, jurisdiction, obscenity, privacy, taxation. Prerequisite: closed to students who have taken 091:624.</td>
</tr>
<tr>
<td>091:278</td>
<td>Federal Tax Practice and Procedures</td>
<td>3 s.h.</td>
<td>Drafting and research techniques, with focus on civil tax litigation, from examination by the IRS to final resolution. Prerequisite: 091:272.</td>
</tr>
<tr>
<td>091:280</td>
<td>Immigration</td>
<td>1-3 s.h.</td>
<td>Role of immigration, immigrants, immigration law in American culture; history of U.S. immigration policy, with emphasis on role of race and ethnicity in immigration law, practices; various perspectives or ideas about immigration, including attitudes toward immigrants (such as nativism during Progressive Era), role of women and family life in households, tensions between immigrant and other laborers in the workplace, source, limits of federal power over immigration, immigration quotas and preferences, ground for exclusion and deportation; citizenship.</td>
</tr>
<tr>
<td>091:281</td>
<td>Interest-Based Negotiation for Lawyers</td>
<td>2-3 s.h.</td>
<td>Theory and practice of interest-based or problem-solving negotiation; acquisition and enhancement of the skills for this approach to negotiation.</td>
</tr>
<tr>
<td>091:282</td>
<td>International Business Transactions</td>
<td>1-3 s.h.</td>
<td>Legal and practical issues in international trade and investment; typical private transactions, such as the sale of goods (documentary sales transaction, INCOTERMS, letters of credit, agency, distribution), transfer of technology (franchising, licensing), and direct investment across national borders; how private international sales, investment, and licensing transactions are structured to permit private businesses to minimize and plan for the risks associated with conducting business on a global scale.</td>
</tr>
<tr>
<td>091:283</td>
<td>Copyrights</td>
<td>2-3 s.h.</td>
<td>Federal law of copyright, primarily the Copyright Act of 1978; emphasis on copyright protections affecting new technologies, such as videotape, computer hardware and software, electronic data transfer, cable television rebroadcasts; ability of legal concepts to keep pace with technological developments. Recommended: 091:205.</td>
</tr>
<tr>
<td>091:284</td>
<td>Insurance</td>
<td>3-4 s.h.</td>
<td>Legal principles and doctrines applicable to insurance marketing arrangements, contract formation, determination of penseus and interests protected by insurance coverage; risks transferred, when risks will be at variance with insurance policy provisions, claims process, governmental regulations of the insurance business.</td>
</tr>
<tr>
<td>091:285</td>
<td>Foreign Comparative and International Legal Research</td>
<td>1 s.h.</td>
<td>Treaty research, locating and identifying documents from international organizations and tribunals, legal research in selected jurisdictions outside the United States; print and electronic sources and research methods in foreign and international law; project to complete a pathfinder on a foreign or international law topic.</td>
</tr>
<tr>
<td>091:286</td>
<td>Introduction to Intellectual Property Law</td>
<td>3-4 s.h.</td>
<td>Concept of intellectual property; survey of decisions in patents, trademark and unfair competition, copyright, trade secrets, related areas; issues arising from intersections of areas.</td>
</tr>
<tr>
<td>091:287</td>
<td>International Trade Law: Basic Norms and Regulations</td>
<td>3 s.h.</td>
<td>Basic norms and legal framework of international trade as expressed in the GATT/WTO regime and U.S. trade laws; issues raised by regional trade blocs such as NAFTA; controversies such as the economic and philosophical justifications for, and objections to, free trade from a variety of perspectives.</td>
</tr>
<tr>
<td>091:288</td>
<td>Jurisprudence</td>
<td>2-3 s.h.</td>
<td>Selected legal philosophers, with emphasis on legal positivism and natural law, relationship between law and morality. Same as 144:413.</td>
</tr>
<tr>
<td>091:289</td>
<td>International Law of the Oceans and Their Resources</td>
<td>2-3 s.h.</td>
<td>Difficulties that confront the world’s oceans; law relating to protection of their resources, particularly marine living resources and maintenance of biodiversity.</td>
</tr>
<tr>
<td>091:290</td>
<td>Juvenile Delinquency and the Juvenile Justice System</td>
<td>1-3 s.h.</td>
<td>Juvenile criminal offenders (“juvenile delinquents”), juvenile status offenders (e.g., runaways and truants), and the juvenile justice system; law governing investigation of juvenile crimes, juvenile court delinquency procedures, juvenile corrections; role of attorneys in delinquency proceedings.</td>
</tr>
<tr>
<td>091:291</td>
<td>International Environmental Law</td>
<td>3 s.h.</td>
<td>Laws and institutions developed by the international community to deal with international environmental problems, including those of the atmosphere (acid rain, ozone depletion, radioactive fallout, climate change), hydropower (land-based sea pollution, sea-based vessel pollution, transboundary groundwater diversion), lithosphere (hazardous waste disposal, toxic pollutants, decertification), biosphere (driftnet fishing, endangered elephants, loss of tropical rainforests).</td>
</tr>
<tr>
<td>091:292</td>
<td>Labor Law</td>
<td>3 s.h.</td>
<td>Federal law and its enforcement by judicial, administrative, arbitral tribunals relating to unionized employees and private firms; rights of employees to organize and engage in concerted activities and collective bargaining.</td>
</tr>
<tr>
<td>091:293</td>
<td>Law in American History I</td>
<td>3 s.h.</td>
<td>American legal and social problems from early New England colonization (1620) until around 1880; church and state in colonial America, private law; Constitutional theory at the time of the Revolution, Blackstone in America, competition and economic development, federal judicial power under Swift v. Tyson, Civil War amendments and first civil rights statutes, rise of regulated industry; Darwin and American law; 19th century American tort and contract law, antitrust movement, rise of social sciences, women and family law in the 19th century, interdisciplinary. Same as 16A:110.</td>
</tr>
<tr>
<td>091:294</td>
<td>Introduction to Roman Law</td>
<td>2-3 s.h.</td>
<td>Overview of Roman civilization as framework for study of its law; Roman constitution, sources of private law; selected elements of the Roman law of obligations; second life of Roman law—rediscovery, acceptance, and influence in Europe and beyond.</td>
</tr>
</tbody>
</table>
091:295 International Commercial Arbitration arr. Arbitration agreements, proceedings, and enforcement of awards; in an international context; student role-playing experience as arbitrators, advocates, other participants in arbitration-related legal proceedings.

091:297 Law and Accounting 2-3 s.h. Accounting as the language of business; familiarization with the vocabulary of accounting, knowledge and skill development in using accounting information as an analytical tool.

091:298 English Legal System 1 s.h. Taught in spring London Law Consortium.

091:299 Genetics 2-3 s.h. How new genetic technologies are raising legal, ethical, social, and economic issues for individuals and the institutions that serve them.

091:302 Estate Planning 2 s.h. Practical planning and drafting of policy issues related to wills, trusts, and other components of estate plans. Corequisite: 091:360 or 091:378.

091:303 Federal Indian Law 3 s.h. Specialized body of law that allocates power and authority in Indian country and has grown up around Native American peoples and their reservations; sovereignty arrangements, jurisdiction, federal Indian policy; tribal self-government. Same as 149:178.

091:304 Law in Asia in Transition arr. Development and reform of law and legal institutions in selected Asian countries, with focus on Vietnam and China; changing role of socialist constitutions; law and the regulation of civil society nonprofit organizations, philanthropy, grassroots organizations and the state; procuracy and prosecution reforming socialist institutions and legal process; transformation of legal profession; struggle for authority of law in socialist transitional states; law and globalization of export labor; foreign models and donor support.

091:305 Mental Health Law 1-3 s.h. Legal implications of the current medical concepts of mental disease and disorder; application of these medical concepts to legal problems such as civil and criminal commitment, mental illness, dangerousness, competency to refuse medical treatment; use of psychiatric testimony in criminal settings.

091:306 The Law of Electronic Media 2-3 s.h. Legal and public policy issues in the operation and regulation of broadcasting, cable, and new technologies. Prerequisite: junior or senior standing.

091:307 Law in the Muslim World 2-3 s.h. International and comparative law issues relevant to countries in the Muslim world; legal cultures, institutions, rules, actors, processes of several jurisdictions including Afghanistan, Saudi Arabia, Iran, Iraq, Algeria, Nigeria, Palestine, Pakistan; Islamic sharia law as practiced in Sunni and Shiite countries; the role of church versus state, fundamentalism versus secularism, as manifested in the legal system; tension between communitarianism and individualism in modern constitutionalism; interweaving of customary and religious legal practices; first, second, and third generations of human rights; international law on issues such as terrorism, self-determination; women's rights, including polygamy, divorce, child custody, inheritance.

091:308 Professional Responsibility 1-3 s.h. Public and private professional responsibility of lawyers; organization of the profession; its economics, ethics, and sociology.

091:309 Law and Economics 2-3 s.h. Introduction to law and economics, including traditional and newer ways of using economic and other social science tools to study and solve legal problems; topics from first-year curriculum and others, including corporate law, insurance, family law, regulatory topics; how legal rules affect behavior and enhance social welfare; impact of legal rules on resource allocation, risk bearing, distribution of economic well-being; how legal rules are created. Recommended: microeconomics class.

091:311 Law of France and the European Union 2-3 s.h. Summer abroad program.

091:313 Indigenous Nations Law and Government 3 s.h. Law and governance of indigenous nations within the United States. Prerequisite: senior standing. Same as 149:177.

091:315 Mediation: Theory and Practice 1-3 s.h. Essential characteristics; comparison of mediation with litigation and other alternative dispute resolution processes; stages of mediation; confidentiality; enforceability of agreements; ethical problems, particularly lawyer mediator.

091:321 Alternative Dispute Resolution Methods 3 s.h. Introduction to theory and practice of nonadversarial dispute resolution; characteristics of negotiation, mediation, arbitration, other dispute resolution methods; student role-playing, videotapes, demonstrations.

091:322 Nonprofit Organizational Effectiveness II 3 s.h. Qualities vital for leaders of nonprofit organizations, including those affecting relationships with staff and volunteers; relationship of a nonprofit to the world—nonprofit's community constituencies, governmental entities, professional associations, collaboration with other organizations; marketing, public relations, advocacy strategies for nonprofits. Prerequisite: 091:320 or consent of instructor. Same as 06J:248, 021:265, 024:248, 028:258, 032:228, 042:248, 174:248.

091:323 Natural Resource Law 2-3 s.h. Evolution of patterns of law in response to resource scarcity and social demands.

091:324 Patent Law 2-4 s.h. All aspects of U.S. patent law; patent claims, adequacy of disclosure, statutory subject matter; validity, inequitable conduct, infringement, remedies, varied specialized doctrines; focus on recent pronouncements from the Court of Appeals for the Federal Circuit. Recommended: 091:295.

091:325 Philanthropy and the Law arr. Overview of law applicable to the American philanthropic sector; recent and controversial issues in the interface between philanthropy and the law; comparative and international aspects of the regulation of philanthropy and the nonprofit sector. Same as 06J:249.

091:327 Payment Systems 2-3 s.h. Basic law of modern payment systems; traditional law of negotiable instruments, bank collection law; rules governing consumer and commercial electronic payments; Articles 3, 4, and 4A of the Uniform Commercial Code, and varied federal regulations.

091:329 Products Liability 2-3 s.h. Negligence, warranty, strict liability tort theories for personal injury, property damage, or economic loss caused by defective products; focus on the expansion of liability of manufacturers, sellers, others.

091:332 Real Estate Transfer and Finance 3 s.h. Modern real estate transactions, including problems of real estate brokers, land-sale contracts, mortgages, insurance, convervancing practices, title examinations, financing techniques, organization of real estate development ventures.
091:340 Remedies 3 s.h. Legal and equitable remedies by which the law corrects injustice and redresses legal wrongs; remedies for tortious wrongs, including damages and injunctive relief; remedies for breaches of contract, including damages, specific performance, rescission, reformation; law of restitution, with emphasis on restitutionary remedies (quasi-contract, constructive trust, equitable lien).

091:341 Managing National Security 1-3 s.h. Substance, process, and practice of national security law.

091:342 Negotiations 2-4 s.h. Nature and theory of negotiations, diverse rhetorics (including the rhetoric of legal argument) relevant to conduct of negotiations; conflict between ethics and effectiveness; readings from game theory, social psychology, anthropology, rhetoric and ethics.

091:343 Securities Disclosure: Accuracy and Enforcement 1 s.h. Mechanisms provided by securities laws to ensure accuracy of disclosure, with focus on Sarbanes-Oxley Act; consequences for firms and individuals who violate securities laws; civil enforcement by the SEC, criminal enforcement by the Justice Department. Prerequisite: 091:241.

091:345 Sentencing 3 s.h. Introduction to the law, history, and policies that govern criminal sentencing in federal and state systems; traditional indeterminate sentencing, modern determinate sentencing, modern determinate sentencing at federal and state levels, capital sentencing.

091:346 Sexuality and the Law 2-3 s.h. How the law regulates sexual relations and responds to discrimination against sexual minorities; focus on curbing edge issues involving gay men and lesbians, including employment discrimination, access to public accommodations, privacy rights, family rights.

091:350 Taxation of Non-Profits arr. Tax treatment of organizations exempt from tax under I.R.C. 501(c), including public and private charities, social welfare organizations, mutual benefit organizations; requirements for federal tax exemption, classification as a public or private charity, lobbying and political activity limitations, unrelated business income tax, tax rules on charitable giving. Recommended: 091:272 and 091:046.

091:352 Title Examination and Selected Real Estate Transactions 2 s.h. Abstract examination, and preparation of resulting title opinion; drafting and interpretation of legal description of real property, subdivision of real property, negotiation and drafting of basic contractual and transfer documents in typical real estate transactions.

091:354 State and Local Government 1-3 s.h. Allocation of decision-making authority in our society; principles and policies that underlie legal doctrines and the relationship of those principles and policies.

091:355 Securities Regulation arr. Regulation and sale of securities to the public under the Securities Act of 1933 and state blue-sky laws; remedies provided through the Securities Act; regulation and litigation under the Securities Exchange Act of 1934, which focuses on companies with publicly-traded securities. Prerequisite: 091:241.

091:356 Structure and Function of Appellate Courts 1 s.h. State and federal appellate courts in their roles of shaping and maintaining rule of law in the United States; modern appellate courts in relation to other branches of government; access to and limits on appellate review; administrative and adjudicative duties; collegiality and decision making; procedural responses to challenge of giving law in high-volume courts; work of law clerks and staff attorneys, related issues.

091:357 A Survey of Gender Work and the Law arr. Impact of law and legal norms on the economic status of women workers; historical and contemporary concerns, theoretical analysis, doctrinal developments, practical applications; intersections of race, class, ethnicity, gender, sexual orientation.

091:358 Forms of Argument/Systems of Belief 2-3 s.h.

091:360 Taxation of Gratuitous Transfers 1-3 s.h. Federal estate, gift, and generation-skipping taxes; tax and estate planning. Prerequisites: 091:272 and 091:378.

091:368 Unincorporated Business Entities 2 s.h. New forms of business organization from the business planner’s viewpoint.

091:369 Trademark and Unfair Competition Law 1-3 s.h. Acquisition and retention of trademark rights, registration, infringement, remedies; application of section 43 (a) of the Lanham Act to protect creative as well as commercial products. Recommended: 091:295.

091:370 Trial Advocacy 2 s.h. Basic skills of trial advocacy, aspects of trial technique; student participation in a full trial. Prerequisite: 091:265.

091:371 Trial Advocacy Board 1-2 s.h. Administration of Trial Advocacy Program and Stephenson Competition; research and writing in connection with trial problems and readings used in program; critique of performances of trial problems. Prerequisites: 091:265 and 091:370.

091:372 Stephenson Trial Advocacy Competition 1-3 s.h. Presentation of at least two full trials by teams of two students; finalists represent the College of Law as a regional and national trial advocacy competition. Held in January. Prerequisites: 091:370 and 091:265.

091:373 Stephenson Trial Advocacy Team arr. Student participation as College of Law representatives in Stephenson Trial Advocacy Competition.

091:377 Trusts and Estates 1-4 s.h. Transmittal of wealth within the family; policy of donative freedom, with focus on property law, including intestate succession, wills, lifetime transfers in trust or otherwise, powers of appointment, future interests, experience drafting a will, trust, or other estate planning document; for 4 s.h., additional classes on federal estate, gift, generation skipping transfer taxes, their effect on wealth transfer.

091:381 Workers Compensation 2-3 s.h. Principles of workers’ compensation law nationwide, with emphasis on Iowa statutory and case law; policy underpinnings, coverage formulas, benefit calculation, third-party suits, administrative procedure, medical issues.

091:390 British Legal Externship Program 3 s.h. British Law externship; placement in London law office under guidance of barrister or solicitor; seminar and enrollment in course on English legal system taught by faculty of King’s College, University of London.

091:399 Judicial Externship arr. One-semester student assignments to the chambers of selected judges, at both trial and appellate levels; experience participating in work of the chambers, including researching and writing memoranda to the court, drafting opinions, other court business.

091:400 Law Review 1-2 s.h. Work on Iowa Law Review.

091:401 Student Journal Editor—Law Review arr. Experience on the journal’s editorial staff: managing production, overseeing business operations, administering student writing program, selecting and editing articles for publication, supervising student research and writing. Eligibility based on previous writing for the journal.
091:402 Moot Court Board 1-3 s.h.
Experience as member of the Moot Court Board administering the Appellate Advocacy Program, researching appellate citations used in the program, judging appellate arguments. Prerequisite: consent of instructor.

091:403 Chicago Moot Court Team 1 s.h.
Student participation as College of Law representatives in Chicago Moot Court Competition. Fall of third year.

091:404 Van Oosterhout Moot Court Competition 1 s.h.
Single-elimination tournament culminating in the final four advocates arguing before a panel of judges; advocates write a portion of the brief, argue for and against the issue they briefed.

091:405 Baskerville Moot Court Competition 1 s.h.
Skill-building for student advocates, who write a portion of the brief and argue for and against the issue they briefed.

091:406 Clinical Law Program—Internship arr.
Experience working directly with faculty members on cases and in-house programs; full participation in interviewing, fact investigation, negotiation, courtroom proceedings.

Experience representing clients through legal assistance offices in eastern Iowa, under supervision of faculty members and staff attorneys.

091:408 National Moot Court Competition 1 s.h.
Participation by third-year students as law school’s representatives in the regional Moot Court competition and in judging intramural Moot Court competitions in spring semester. Prerequisite: placement as one of four finalists in 091:404.

091:409 Child and Family Advocacy Clinic arr.
Experience working with faculty members on cases involving children with health problems and their families; representation of clients in connection with health insurance, social security disability, education, and public benefits (e.g., food stamps, school lunch programs, WIC, housing, fuel and utility assistance, income support); interviews, fact investigation, negotiation, administrative and courtroom proceedings; close work with Carver College of Medicine faculty members and residents who staff pediatric units at University of Iowa Hospitals and Clinics.

091:410 Client Counseling I 1 s.h.
Foundation for recognizing and resolving legal, nonlegal, ethical issues in the legal interview; interviewing and counseling skills developed through practice sessions, lectures, observation.

091:412 Client Counseling Board arr.
Coordination of client counseling program and IntraClient Counseling Competition under supervision of faculty adviser. Prerequisite: 091:410.

091:413 Client Counseling Competition 1 s.h.

091:415 Journal of Corporation Law 1-2 s.h.
Student-organized scholarly publication that examines subjects of current importance to businesses and the bar; experience editing articles and writing commentaries on suitable topics.

Experience on the journal’s editorial staff: managing production, overseeing business operations, administering student writing program, selecting and editing articles for publication, supervising student research and writing. Eligibility based on previous writing experience.

091:420 Transnational Law and Contemporary Problems Journal 1-2 s.h.
Experience researching and writing on issues in international and comparative law. Prerequisite: second- or third-year law standing.

091:421 Student Journal Editor—TLCP Journal arr.
Experience researching, writing, and editing on issues in international and comparative law. Prerequisite: second- or third-year law standing.

091:425 Journal of Gender, Race and Justice 1-2 s.h.
Academic year experience writing two journal pieces, including a recent development and a note or a comment, and performing office duties. Prerequisite: second- or third-year law standing.

091:426 Student Journal Editor—Gender, Race and Justice arr.
Experience on the journal’s editorial staff: managing student writing program, overseeing business operations and production, selecting symposium topic and participants, selecting and editing all publications pieces. Eligibility based on writing and editing experience.

091:430 Jessup International Moot Court Competition 1 s.h.
Participation by second-year students in intramural regional and national-level moot court competition in international law; intensive criticism in appellate brief writing and oral argument. Prerequisite: 091:210.

091:431 Jessup Moot Court Competition Team 1-2 s.h.
Participation as team member in Jessup International Moot Court Competition; preparation of memorials in fall, travel to February regional rounds; travel to international competition in Washington, D.C., for top two teams.

091:450 Corporate Law Practicum arr.
One-semester externship with Justice Holland of the Delaware Supreme Court.

091:455 Health Law and Policy Practicum 1-3 s.h.
Opportunity to participate in research involving current health law and policy issues, in collaboration with organizations such as public health agencies, health professional organizations. Prerequisite: consent of instructor.

091:460 Law Study Abroad at Bucerius arr.
Experience representing clients through legal assistance offices in eastern Iowa, under supervision of faculty members and staff attorneys.

091:470 German-English Legal Translation 1-3 s.h.
Exchange student study at Bucerius Law School, Hamburg, Germany. Fall semester.

091:500 Independent Research Project arr.
Work under faculty supervision.

091:501 Directed Research and Writing arr.
Research and writing projects related to political and social theory, supervised by a faculty member.

091:502 Supplementary Writing arr.
Supplementary writing project that is related to a student’s course, but goes beyond the requirements for the course, and is supervised by the faculty member who teaches the course.

091:503 Writing Tutorial arr.
Group writing project on a subject or topical area specified by the supervising faculty member; group meetings.

091:504 Tutorial 1-4 s.h.
Work under faculty supervision; may involve substantive area of the law of jurisprudential ideas as they appear in various intellectual spheres.

091:505 UI Center for International Finance and Development Tutorial arr.
Experience maintaining a globally-read web site that hosts the E-Book on International Finance & Development and posts issues on important topics in international finance and development; aspects of public international finance, with focus on the International Monetary Fund and the World Bank.

091:601 Advanced Topics in Corporate Law arr.
Wide range of topics; theory of the firm, fiduciary duties, corporate counseling issues, history of corporate law, and so forth. Prerequisite: one law or business course in corporate law or consent of instructor.
091:602 Asian Americans and the Law arr.
Legal issues encountered by Asians and Asian Americans in the United States; how those issues have been addressed by Congress, state legislatures, the judiciary, the executive branch, the public, and the legal community.

091:603 Capital Punishment Seminar arr.
Death penalty as applied in America.

091:604 Advanced Topics in Intellectual Property arr.
Complex intellectual property issues in a focused topic area (e.g., international and comparative intellectual property, administrative patent practice). Experience in intellectual property law required.

091:605 Advanced Problems in International Environmental Law arr.
Topics vary.

091:606 Advanced Problems in International Business and Economic Relations arr.
Legal aspects of contemporary problems in transnational business and economic relations; year-long seminar. Prerequisite: 091.282 or 091.287.

Constitutional principles and laws governing the relationships between children, families, and the state and status, rights, and obligations of children; focus on coercive state intervention through juvenile and child welfare systems and criminal justice system to protect children from abuse and neglect.

091:611 Citizen Enforcement of Environmental Laws arr.
Implementation of the citizen suit—a novel, experimental feature of modern environmental statutes; simulated litigation, defense of fictitious citizen suits; with student participation on two-attorney teams. Prerequisite: 091.255.

091:612 Employment Discrimination in Global Perspective arr.
Employment discrimination law world wide; legislation and case law, role of U.S. law, challenges facing the European Union.

Criminal law viewed through literature and film; why we punish, how we determine guilt or moral blame; how punishment affects relationships among criminals, victims, and society; lawyers and judges as moral arbiters; law, morality, and faith.

091:616 Constitutional Interpretation arr.
How the U.S. Supreme Court interprets the constitution; substantive due process, equal protection doctrine. Prerequisite: 091.232.

091:618 Cultural Property arr.
Concept of cultural property, measures for its protection, impact of these measures on the transfer of cultural items; traditional art and architecture, biological and fossil material, human remains; contexts in which issues have arisen, such as stolen cultural property, property acquired during armed conflict and in colonial settings, and property collected in the field or excavated; international, national, and state law, including UNESCO convention on illicit transfer of cultural property; U.S. Archaeological Resources Protection Act, Native American Graves Protection and Repatriation Act; how developing professional ethics codes affect the concept of cultural property.

091:620 Law and Technology Seminar arr.
Production of a model statute addressing the range of issues in the selected subject area with suggested solutions; definition of statute’s scope, research projects to identify existing law and develop competing ideas and approaches; further definition and a vote on the statute’s scope and policies; further research memoranda as the statute takes shape; drafting of the statute with seminar review sessions; students work as a draft committee modeled after the Commission on Uniform State Laws.

091:621 Economics of Law Practice arr.
Funding of legal services, past, present, and future.

091:622 Critical Race Theory arr.
Social, political, and legal writings on aspects of race in development and evolution of American law; how race pervades the fabric of our society; how the law might be used to address social conditions involving commercial, constitutional, and criminal law.

091:624 Cyberspace Law Seminar arr.
The wide range of legal and public policy issues created by the newly-emerging electronic technologies; focus on student research, writing, presentations, discussion.

091:625 Corporate Counseling and Managerial Perspective arr.
Relationships between corporate counsel and clients, with focus on recent legal scholarship that attempts to view counsel and clients from the behavioral perspective and “business school” scholarship on organizational behavior and decision making; business-school case studies on management and decision making, and the lawyer’s view; business and legal questions from both points of view. Prerequisite: 091.241.

091:626 Federal Antitrust Policy arr.
Topics in federal antitrust laws; cartels and other horizontal restraints of trade, measurement of market power, exclusionary practices by dominant firms, vertical restraints, the Robinson-Patman Act, public and private enforcement, remedies, history of antitrust policy, antitrust enforcement in particular markets, such as health care, computer technology, the learned professions. Prerequisite: a law or business antitrust course or consent of instructor.

History of crime and punishment, mainly in America and Britain, also continental Europe; measurement of historical crime rates, decline and resurgence of violent crime, women’s crime, crime and class status, philosophies of punishment, death penalty, the penitentiary, parole system, development of public prosecution system.

091:630 History of the Legal Profession arr.
History of Anglo-American legal profession; amateur lawyers and Anglicization of the American bar; why there are no barristers in the United States; 19th-century professional reforms in Britain; lawyers and changing trial practice; rise of the large firm; 19th-century changes in legal education, growth of professional associations, rules to regulate conduct, Legal Realism and 20th-century changes in legal education, diversity and the bar; dilemmas of self-regulation, autonomy versus loyalty to clients, role of law education. Two semesters.

091:631 The History of Free Labor arr.
Readings from original sources on free and unfree labor, such as slavery laws, the Thirteenth Amendment, Supreme Court cases dealing with the subject of free labor; treaties and significant court cases, and from modern legal and significant court cases and modern legal and historical writings interpreting the history of free labor in American law. Repeatable.

Practice of law in and for a complex institution; problems confronting attorneys in higher education, doctrinal issues prevalent in a university setting; focus on real or hypothetical problems considered in light of background reading rather than doctrinal analysis.

How a single crime may occur in or harm more than one nation; questions addressed: which courts have jurisdiction, whose law governs, when countries may apply their criminal law extraterritorially; collaborative enforcement; the International Criminal Court.
091:637 International Law and U.S. Domestic Law arr. Relationship between domestic and international law; issues affecting the practice of contract, property, criminal, and constitutional law in the United States; international treaties and structures that affect domestic law; arbitration, intersessional differences, and the nation-state's capacity to implement public policy through its own courts and law.

091:643 Freedom of Speech Seminar arr. Philosophical foundations—self-governance, pursuit of truth, self-realization, distrust of government; importance of these foundations in selected areas—national security, violence, commercial speech, obscenity, political spending, abortion counseling, government subsidies, academic freedom. Prerequisite: 091:232.

091:645 International Labor: Law, Ethics, and Corporate Responsibility arr. Basic theories of international law relevant to labor rights; model minimum labor requirements—health and safety standards, juvenile labor, gender equality, freedom of association, living wage provisions—from legal and business perspectives; ethical obligations of businesses that operate in countries with legal and regulatory mechanisms that are less extensive than those of the United States; difficulty of implementing employee codes of ethics.

091:646 Non-Profit and Philanthropic Organizations arr. Legal regulation of philanthropic and nonprofit institutions; role, nature, and history of such institutions; tax exemption, tax treatment (including property and donor tax issues); political and legislative activities; roles of members, directors, officers; problems of external regulation, accreditation, ethics, issues for community foundations, universities, development of philanthropic and nonprofit activity in selected Third World countries.

091:648 Law and Development arr. Use of law since the late 19th century to promote legal and economic development; spread of law reform in developing countries; role of foreign agencies, multilateral agencies, bilateral agencies, other institutions in the law reform process; focus on American efforts abroad; activities by other countries, including developing countries.

091:650 Law, Health Policy, and Disability Center arr. Experience doing research and writing in areas of law and policy regarding rights of persons with disabilities; projects related to the UI Center of Law, Health Policy, and Disability Research. Prerequisite: 091:263 or consent of instructor.

091:654 Law, Politics, and the Family arr. Issues raised under the U.S. Constitution regarding state regulation of families; family and individual privacy, right to marry, procreation rights, parents' and children's rights.

091:655 Law of War, Peace, and Military Affairs arr. Three aspects of law's efforts to govern military affairs: international law of war, U.S. law regulating foreign commitment of the nation's military forces, rights of individual soldiers (particularly women, homosexuals, religious observers).

091:656 Labor Standards Legislation arr. Two federal statutes designed to intervene in the free play of market forces in certain segments of the labor market: Fair Labor Standards Act, Migrant and Seasonal Agricultural Worker Protection Act.

091:657 LLM. Seminar arr. Basic research and analytical methodologies for the international and comparative law fields; workshop approach to project proposals, drafts.

091:658 Seminar on the First Amendment arr. Issues decided in the Supreme Court's unfolding jurisprudence under the First Amendment religion guarantees; conduct as free exercise of religion; strict separation of church and state in contexts of education, public funding, and use of public space; claims of religion for exemption from general law (e.g. Vidor, Smith); school prayer and its legacy (pledge of allegiance, Ten Commandments in public spaces); evolution, creationism, intelligent design in public school curricula; relationship between free speech and free exercise of religion; vouchers and public funding of private religious schools; need- and merit-based scholarship funding; cases, historical sources, religious and philosophical views. One semester.

091:659 Law and Lawyers in Literature arr. Fundamental societal issues and ethical questions examined through discussion of literary works, including novels and plays by writers such as Camus, Coetzee, Dostoyevsky, Durrenmatt, Faulkner, Ibsen, Kafka, Melville, Schaffer, Thucydides.

091:660 Medical Tutorial for Law Students arr. Participation on medical and/or surgical rounds under supervision of attending physicians; didactic sessions on legal, medical, and ethical issues arising from the clinical experience, and issues such as peer review, credentialing, quality assurance, cost containment, AIDS, reproductive technology; recent developments in medical technologies. Coordinated by Carver College of Medicine. Prerequisite: 091:261 or equivalent.

091:661 Legal Issues: Intercollegiate Athletics arr. Legal issues affecting college and university athletics and athletes; includes drug testing, recruitment, gender equity (Title IX), NCAA regulations, endorsement contracts, coaching contracts, trademark licensing, and broadcasting rights.

091:663 Problems of International Law arr. Issues arising from contemporary problems of public international law; topics such as the law of use of force and armed conflict, international law relating to religious persecution, protection of minorities, the “girl child,” role of international organizations in peaceful settlement of disputes and in administration of justice.

091:665 National Security Law and Government Powers in Emergencies arr. National security powers of the federal government in national and international emergencies and crises; constitutional and statutory framework within which national security powers are exercised; conflicts between national security powers and individual rights, war powers and the rules of engagement, apprehension of foreign aliens through extradition or force, military tribunals and indefinite detentions of suspected terrorists, government practices in withholding information from the public and extracting critical information through extraordinary conduct, imposition of obligations on the United States under international law.

091:669 Research Seminar on Negotiations arr. The compound processes of negotiation; in-depth investigation of specific real-world negotiations. Prerequisite: 091:342.
091:670 Patenting Complex Technologies
Practicum on the patent acquisition process; how patent lawyers interact with their clients in a high-technology setting; team project simulating the patent acquisition process. Prerequisite: 091:324.

091:672 Punishment Theory Seminar
Jurisprudential, philosophical, sociological, and economic justifications for inflicting punishment; when, how, how much, and why we punish individuals for certain actions; who decides when and how much to punish—legislators, judges, parole boards, others.

091:673 Plea Bargaining and Sentencing Seminar
Laws, policies, and practices relating to guilty pleas, plea bargaining, and sentencing under indeterminate and determinate (sentencing guidelines) regimes; readings in criminology, sociology, legal materials. Prerequisite: 091:206 or consent of instructor.

091:674 Poverty Law
Income maintenance programs; case law and legislative policy regarding the poor.

091:676 Social Justice
Social justice and what is at stake in the context of fundamental rights jurisprudence and social legislation; five approaches to social justice—libertarianism, utilitarianism, intuitionism, justice as fairness, equality of resources; questions of public policy from each point of view—employment insurance, unconditional basic income, universal health insurance, educational grants.

091:680 Supreme Court Seminar
Supreme Court practice, procedure, jurisdiction; the art of opinion writing, in-depth analysis of cases on the court’s pending docket; writing briefs, conducting research, conferencing cases sitting as a mock Supreme Court, assigning and preparing opinions, soliciting votes of colleagues; preparation of two opinions.

091:681 Health Law and Public Policy
Issues in health law and policy relevant to organization, financing, and delivery of health care; modern practice of health care law involving government regulation of the health care industry.

091:685 Special Topics in Employee Benefits Law
Remedies under ERISA—what equitable relief means after the Supreme Court’s decision in Great-West Life, cases, articles, treatises on remedies and restitution.

091:690 Transnational Business Disputes
When representing or suing foreign enterprises, whose law applies to the case, when a judgment from one country is enforceable in another, how such issues affect choice of forum, and when a governmental defendant may assert sovereign immunity or act of state; questions that must be posed to foreign counsel, how the answers may be used.

091:693 Transitional Justice
How states resolve and manage tensions between objectives of social peace, justice, reconciliation (e.g., redress past abuses of basic rights); judicial and nonjudicial responses, including criminal prosecution, truth-seeking initiatives, private lawsuits for compensation from wrongdoers, monetary reparations by states to victims, displacement of perpetrators from prominent positions; strengths and weaknesses of each approach and conditions under which an approach is suitable, examined through countries including South Africa, Peru, Chile, Argentina, Rwanda, Sierra Leone, former Yugoslavia; how methods increasingly are combined to achieve comprehensive societal remediation in aftermath of abuse.

Law Study Abroad
660:823 Program in Comparative Law in Bordeaux, France
Intensive course work in France taught by professors from Iowa and France. Five-week courses in May and June.

660:824 London Law Consortium
Study abroad program for students from seven law schools (Iowa, Georgia, Utah, Kansas, Missouri-Columbia, Indiana-Bloomington, Chicago-Kent); American and British law taught by faculty drawn from the seven schools and British universities; clinical law program, work with British barristers and solicitors.

The Roy J. and Lucille A. Carver College of Medicine is an integral part of The University of Iowa. It contributes to the education of several thousand University students, is home to groundbreaking research in a wide array of disciplines, and provides a statewide educational health care resource.

The Carver College of Medicine is the only college in Iowa that offers a curriculum leading to the Doctor of Medicine. It also is home to the Division of Associated Medical Sciences, which provides programs of education and training for physician assistants, clinical laboratory scientists, nuclear medicine technologists, physical therapists, and radiation sciences professionals.

The college participates in the education of students in the Colleges of Dentistry, Nursing, Pharmacy, and Public Health, and in the life-sciences and health-related programs of the College of Liberal Arts and Sciences, the College of Engineering, and the Graduate College.

Health professionals from throughout the Midwest take part in the college’s year-round program of continuing medical education. They update their knowledge and skills through refresher courses, clinics, and conferences.

Doctor of Medicine and other health science students have a number of opportunities to gain experience in private medical offices and community hospitals. M.D. graduates may pursue further training in the specialties of family medicine, internal medicine, surgery, and pediatrics at one of 10 University of Iowa-affiliated residence programs in six Iowa cities. They also have access to two transitional-year programs. The Carver College of Medicine also offers a variety of services in support of Iowa physicians and community hospitals.

In addition to its responsibilities for educating physicians, the college addresses broad public issues of distribution and organization of health care services. Its faculty members advise and serve on national, state, and regional health planning councils, health boards, and various health agencies; some faculty members also take part in the University’s Center for Health Services Research.

Accredited by the Liaison Committee on Medical Education of the American Medical Association and the Association of American Medical Colleges, the Carver College of Medicine meets the requirements of all state licensing boards. Its M.D. diploma admits the holder to all privileges granted to graduates of all medical colleges before such boards. All other professional programs administered by the college are accredited by their respective accrediting bodies.

**Predoctoral Program**

**Doctor of Medicine**

The Carver College of Medicine accepts 142 first-year students annually into its four-year course of study leading to the Doctor of Medicine (M.D.).

**First and Second Years: Basic Medical Sciences and Foundations**

The first three semesters present a core of sciences basic to the study of medicine and introduce the student to the foundations of clinical practice.

**FIRST SEMESTER**

099:163 Biochemistry for Medical Students presents concepts concerning structures of biological macromolecules, cellular metabolism, molecular biology and genetics, and extra- and intracellular signaling mechanisms. It uses clinical examples to illustrate how alterations in these molecules and pathways can lead to pathological conditions.

060:103 Medical Gross Anatomy includes complete dissection of the human body, stressing the relationship to the living system. Clinically relevant areas of anatomical radiology, surface anatomy, human embryology, and clinical correlations are included in lectures accompanying the dissection.

060:116 Medical Cell Biology presents concepts concerning the structure and function of the cell and its organelles at the molecular level. The course consists of basic science lectures and clinical correlations and relates basic cell biological concepts to the understanding and treatment of human disease.

070:110 Medical Genetics is integrated with ongoing classes in anatomy, biochemistry, and cell biology. It provides an overview of clinical and medical genetics, with particular emphasis on recent changes that affect clinical practice with respect to common diseases that have a genetic component.

050:162 Foundations of Clinical Practice I is the first semester of a sequential four-semester course that introduces clinical skills students need in order to become practicing primary care physicians.
The five major goals for students over the four-semester course are to develop knowledge, attitudes, and skills that are necessary for:

- maturation into a competent and confident clinician;
- maintaining a lifelong process of learning the practice of medicine;
- application of relevant basic science and clinical concepts and other scientific advances to the practice of medicine;
- application of the principles of health promotion and disease prevention to the practice of medicine; and
- increasing awareness of the ethical and social context in which medicine is practiced.

Through large group lectures, small case-based learning groups, and small-group skill building sessions, students focus on communication in the doctor-patient relationship, accessing and managing medical information, and applying basic principles of evidence-based medicine and medical ethics.

SECOND SEMESTER

060:234 Medical Neuroscience is a course for medical students, physical therapy students, and graduate students in the basic medical or related sciences. Through lectures, clinical correlate presentations, laboratories, and small group discussion sessions, the course emphasizes the interdisciplinary and integrated study of the human central nervous system. Its faculty is drawn from basic science and clinical departments.

148:251 Principles of Medical Immunology is offered by the interdisciplinary Immunology Program. Its goals are to teach basic components and mechanisms of the immune response as well as medical principles of normal and abnormal immunity. The course consists of lectures by Immunology Program faculty and small group case analysis sessions.

050:240 Human Organ Systems is an interdepartmental course that presents the normal structure (histology) and function (physiology) of human organ systems in a coordinated and integrated organ systems approach. The course is designed to emphasize structure/function relationships by integrating the microscopic anatomic and physiologic function of normal human organ systems. The course's faculty includes members of basic science departments and clinical departments.

050:163 Foundations of Clinical Practice II is the second semester of a sequential, four-semester course that introduces clinical skills students need in order to become practicing primary care physicians (see 050:162 for overall course goals). In this semester, students continue to work toward course goals through small case-based learning groups, large-group lectures, and small-group skill acquisition sessions. They also are introduced to clinical medicine in a shadowing experience with health care providers. Principles of doctor-patient communication are reinforced and performance of the components of the general physical examination are taught and practiced. Multiculturalism, preventive medicine and health promotion, medical informatics, and the social context of medicine are included.

THIRD SEMESTER

071:105 Pharmacology for Health Sciences: Medical bridges the clinical and basic sciences and provides students with principles that must be understood in order to describe properly the actions of drugs in patients.

061:103 Principles of Infectious Diseases presents a comprehensive approach to the microbiology of infectious diseases, covering infectious agents at both the organism and molecular levels. The molecular aspects of pathogenesis are presented as the basis for present and future preventive and therapeutic measures. The laboratory includes hands-on experiments ranging from principles of aseptic technique to the most modern molecular aspects of diagnostic microbiology.

069:204 General and Systemic Pathology starts with general principles of disease: cell injury, inflammation, immune mechanisms, neoplasia, and hemodynamic disorders, followed by etiology, pathogenesis, epidemiology, and major clinical and morphologic manifestations of disease by organ systems. The course combines lecture information, small group analytic skills, and observation of current laboratory procedures.

050:164 Foundations of Clinical Practice III is the third semester of a sequential, four-semester course that introduces clinical skills students need in order to become practicing primary care physicians (see 050:162 for overall course goals). This semester continues the knowledge, attitude, and skill acquisition begun in the preceding two semesters. Students continue to learn through small patient-centered learning groups as well as lecture and clinical skill-building small groups. Content areas include human sexuality, biomedical ethics, and
problem-specific medical history and physical exams. Students begin to apply clinical history taking and physical exam skills learned in preceding semesters by taking complete histories and performing physical exams on simulated and real patients.

Several elective courses are available to students during the third semester. These normally carry 1 or 2 s.h. of credit. Topics include areas not specifically covered in the regular curriculum and areas related to medical practice and the role of the physician. Course offerings vary from year to year, but typical subject areas are history of medicine in western society, international health, principles of family medicine, and spirituality and health.

FOURTH SEMESTER

050:165 Foundations of Clinical Practice IV is the final course in the foundation series. The fourth semester is devoted primarily to this major interdisciplinary course, which includes participation by a large proportion of the faculty and is vital in providing students with the tools for a lifetime of patient care.

Mornings are devoted to intensive review of the diagnostic and therapeutic aspects of organ-system-based clinical medicine. The reviews are presented by teams of specialty and subspecialty clinicians. Students spend afternoons acquiring and practicing the clinician’s skills in history taking and physical examination and in learning specialized exams. Small group learning and clinical case conferences take place throughout.

Each student is evaluated individually several times during the semester. Evaluations include the student’s approach to the patient, accuracy of history and physical examination, precision in communicating data gathered, ability to synthesize available data into a realistic differential diagnosis, and ability to apply the process of problem-based learning to the understanding of patient-based problems. Cognitive knowledge of topics covered in the morning lecture and small group sessions is assessed through computer-based multiple-choice examinations. Students who need further work receive guidance and assistance.

050:182 Health Law introduces issues in health care law, with emphasis on how law shapes the rights, duties, and obligations of patients and physicians and the nature of physician/patient/family relationships. Class sessions consist of lectures and interactive case-based discussion groups.

All M.D. students are required to pass Step 1 of the United States Medical Licensing Examination before they may be promoted to the third year of the curriculum.

Third and Fourth Years: Clinical Training

The clinical courses take place during the last two years of the medical curriculum. In order to qualify for graduation with the M.D., students must complete satisfactorily a total of 81 weeks of courses during the two clinical years: 69 weeks of required courses and 12 weeks of electives. Course distribution is 49 weeks in the first clinical year and 32 weeks in the second.

Clinical Beginnings (050:170), a required week-long orientation to the core clerkships, takes place immediately before the start of the clinical courses. It introduces students to the clinical courses and includes discussions about professionalism, clinical notes and presentations, and career planning; technical skills laboratories that emphasize basic procedures important for clinical courses; a simulated patient exercise about communication of bad news; a simulated patient assessment of the core physical examination (students who fail to demonstrate competence at a predetermined level must participate in remediation); and student-developed seminars concerned with personal and professional activities in the clinical courses. The Student Clinician Ceremony completes the week’s activities.

The required clerkships are as follows.

Seven core clerkships: internal medicine, obstetrics and gynecology, pediatrics, surgery, outpatient internal medicine, community-based primary care, and family practice preceptorship; each course includes a mix of inpatient and outpatient activities, introduces the student to a specific discipline or to the practice of medicine in the community, and presents the opportunity to develop and practice clinical skills.

Required subspecialty clerkships: anesthesia, dermatology, neurology, ophthalmology, orthopaedics, otolaryngology, psychiatry, radiology, and urology, and courses in laboratory medicine and electrocardiography.

Advanced clerkships: subinternship, in which the student assumes responsibility for managing patients in a variety of approved medical disciplines, supervised by a senior resident and a faculty physician; emergency room or intensive care rotation.
Three electives: electives chosen from clerkships listed in the course book distributed by the Carver College of Medicine.

FIRST CLINICAL YEAR COURSE REQUIREMENTS
All medical students must complete satisfactorily 49 weeks of courses, including Clinical Beginnings, 36 weeks of core clerkships, and 12 weeks of courses chosen from the required subspecialty clerkships.

SECOND CLINICAL YEAR COURSE REQUIREMENTS
All medical students must complete satisfactorily 32 weeks of clerkships chosen from those not completed in the first clinical year, including the required subspecialty clerkships, the advanced clerkships, and electives.

Although the primary venues for clinical training of medical students are the University of Iowa Hospitals and Clinics and the Veterans Affairs Iowa City Health Care System, the family practice preceptorship and the community-based primary care clerkship are off-campus rotations. Other courses may be assigned to off-campus sites, as well.

Admission to the M.D. Program
The Carver College of Medicine participates in the American Medical College Application Service (AMCAS), a nonprofit centralized application processing service for applicants to U.S. medical schools. AMCAS applications are available for completion in May of the year preceding the beginning of the class for which application is being made. Prospective students are urged to apply as early as possible. The deadline for AMCAS processing is November 1.

Secondary applications are forwarded to applicants whose AMCAS applications pass a review conducted by the college. A $60 fee must accompany the secondary application from all applicants.

Admitted applicants must have an official transcript from each college they have attended sent to the University's Office of Admissions.

Technical Standards for Admission and Retention
The Carver College of Medicine seeks students who will serve the needs of society best, and it strives to graduate skilled and effective physicians. To achieve these goals, it applies the following principles and technical standards to candidates for admission and to continuing students.

PRINCIPLES
Technical standards refer to criteria that go beyond academic requirements for admission and are essential to meeting the academic requirements of the M.D. program.

Applicants to the Carver College of Medicine and students continuing in the college, with or without disabilities, are expected to meet the same requirements.

Matriculation and continuation in the college assume a certain level of cognitive and technical skill. Medical students with disabilities are held to the same fundamental standards as their non-disabled peers. Although not all students should be expected to gain the same level of proficiency with all technical skills, some skills are so essential that mastery must be achieved, with the assistance of reasonable accommodations where necessary.

Reasonable accommodations are provided to assist in learning, performing, and satisfying the technical standards.

Every reasonable attempt is made to facilitate the progress of students, providing such efforts do not compromise collegiate standards or interfere with the rights of other students and patients.

TECHNICAL STANDARDS
Applicants for admission to the Carver College of Medicine and continuing students must possess the capability to complete the entire medical curriculum and be granted the degree. To this end, they must complete all courses in the curriculum successfully. In order to acquire the knowledge and skills to function in a broad variety of clinical situations and to provide a wide spectrum of patient care, M.D. students must have abilities and skills in five areas, including observation; communication; motor skills; intellectual, conceptual, integrative, and quantitative abilities; and behavioral and social attributes.

Technological compensation can be made for some disabilities in certain areas, but each student must meet the essential technical standards in such a way that he or she is able to perform in a reasonably independent manner. The use of a trained intermediary is not acceptable in many clinical situations, because it implies that the student’s judgment must be mediated by someone else’s power of selection and observation.
**Observation:** Students must have the functional ability to observe demonstrations and experiments in the basic sciences and must have sufficient use of the senses necessary to perform a physical examination.

**Communication:** Students must be able to relate reasonably to patients and establish sensitive, professional relationships with patients, colleagues, and staff. They are expected to communicate the results of the history and examination to the patient and to their colleagues with accuracy, clarity, and efficiency.

**Motor:** Students are expected to participate in basic diagnostic and therapeutic maneuvers and procedures. Those who cannot perform these activities independently should be able to understand and direct the methodology involved in such activities.

**Intellectual, conceptual, integrative, and quantitative abilities:** Students must be able to learn to analyze, synthesize, solve problems, and reach reasonable diagnostic and therapeutic judgments. Students are expected to be able to display good judgment in the assessment and treatment of patients. They must be able to learn to respond with prompt and appropriate action in emergency situations.

**Behavioral and social attributes:** Students are expected to be able to accept criticism and respond with appropriate modification of their behavior. Students also are expected to possess the perseverance, diligence, and consistency necessary to complete the M.D. curriculum and enter the independent practice of medicine in a reasonable period of time. They must demonstrate professional and ethical demeanor and behavior in all dealings with peers, faculty, staff, and patients.

Applicants who may not meet these standards are encouraged to contact the college's admissions office.

**Admission Requirements**

Applicants for admission to the Carver College of Medicine must have a baccalaureate degree; or they must be enrolled in a baccalaureate degree program, have earned at least 94 s.h. of credit or the equivalent, and expect to receive their degree before enrolling in the Carver College of Medicine. They must have satisfied the following requirements, all taken with appropriate laboratories.

**Physics:** a complete introductory course (one year)

**Mathematics:** college algebra and trigonometry, or advanced college mathematics for applicants who completed college algebra and trigonometry in high school

**Chemistry:** at the minimum, a complete introductory course in organic chemistry (one year), ordinarily following a complete introductory course in modern general chemical principles

**Biological sciences:** a complete introductory course in principles of biology, or zoology and botany (one year), and an advanced biology course (one semester or quarter)

Fulfillment of these requirements does not guarantee admission to the Carver College of Medicine. The college's admissions committee selects applicants who appear to be best qualified to study and practice medicine.

Applicants must have a cumulative g.p.a. of at least 2.50 for all college work. Applicants should have taken the required science courses for a grade rather than electing pass/fail grading.

Preference is given to Iowa residents with high scholastic standing. Consideration also is given to outstanding nonresidents.

Applicants are required to take the Medical College Admission Test (MCAT) no earlier than five years before and no later than August of the year of application. MCAT registration is available on the AAMC web site (http://www.aamc.org).

Personal interviews are part of the admission process. Candidates invited for an interview are contacted by the admissions committee.

Applicants accepted on or before February 15 must submit an advance payment of $50 by March 1. Applicants accepted after February 15 must submit the $50 payment within two weeks after they receive notification of acceptance. The advance payment is credited toward tuition and fees.

All students who enter the Carver College of Medicine are required to comply with the pre-entrance and annual health screening program developed by the University's Student Health Service in cooperation with University of Iowa Hospitals and Clinics.

All registered Carver College of Medicine students are required to maintain health insurance (or an equivalent care plan) that satisfies minimum standards of coverage. Insurance coverage must be maintained continuously throughout each year of attendance at The University of Iowa.
Student Policies and Procedures

Student Promotion

The Carver College of Medicine has established promotion policies and procedures to ensure that each of its graduates has adequate skills, knowledge, judgment, ethical standards and personal integrity to assume the responsibilities of a medical doctor. The student promotions committee, made up of six faculty members and two students, performs these duties with the cooperation, advice, and judgment of course directors, faculty members, students, and administrators.

The committee recommends specific actions to be taken when a student's skills, knowledge, judgment, or ethical behavior is in any way considered consistently marginal or unsatisfactory. Possible recommendations include immediate dismissal of the student from the college; requiring the student to repeat all or any part of the curriculum on academic probation; and allowing the student to continue on academic probation with a full or partial course load. The committee's recommendations are forwarded for action to the senior associate dean of the Carver College of Medicine.

Medical students have the right to appeal a promotion decision. They must submit the appeal in writing to the Carver College of Medicine's senior associate dean within five days of notification of the decision. Appeals are considered by the Appeals Committee, made up of faculty representatives of the Medical Council and the Executive Committee, a medical student, a lay member, and the associate dean for student affairs (ex officio). Students may request an opportunity to appear before the Appeals Committee to make a statement and answer questions. The committee then makes its recommendation to the dean of the college, who is the final authority.

Specific information about student promotion policies and procedures is available from the Medical Student Affairs Office and is online in the Medical Student Handbook and on the college's web site.

Leaves of Absence, Withdrawal, Reinstatement

The Carver College of Medicine has established policies regarding leaves of absence, dropping courses, withdrawal from the college, and reinstatement to the college. Information about each of these policies is available at the college's Office of Student Affairs and Curriculum and is published annually in the Medical Student Handbook.

Disputes and Complaints

Student complaints concerning actions of faculty members or departments are pursued first through mechanisms established in the Carver College of Medicine. These procedures allow the greatest flexibility for all concerned in resolving a conflict. They are intended for situations such as grading disputes, alleged academic dishonesty, alleged dishonesty during a clinical rotation, alleged unethical or unprofessional conduct, and perceived discrimination or harassment.

Complaints regarding sexual harassment are handled confidentially in accordance with University policy and procedures; see the University's Policy on Sexual Harassment.

For information about the established informal mechanisms, contact the Office of Student Affairs and Curriculum or see the Medical Student Handbook.

Financial Aid

The Carver College of Medicine's philosophy is that no student should be denied a medical education due to a lack of funds. Admissions decisions at the Carver College of Medicine are made without consideration of financial need. Therefore, the Carver College of Medicine financial aid staff actively seeks financial aid sources so every student interested in a medical education can finance that education.

Financial assistance is provided by the Carver College of Medicine primarily on the basis of demonstrated financial need. Although a limited number of collegiate or institutional grants are available for the most economically disadvantaged students, most aid is in the form of loans. Examples of federal loan programs are the Federal Direct Stafford/Ford Student Loan, the Federal Direct Unsubsidized Stafford/Ford Student Loan, the Federal Perkins Loan, and the Primary Care Loan (PCL). Students also may qualify for private loans to supplement their financial aid package.

In addition, the college supports scholarship and loan programs through permanent endowments and/or contributions from alumni and friends of the Carver College of Medicine. These funds are administered by the college's financial aid office.
and are awarded as a part of a student’s total financial aid package. Funds to support short-term emergency loans are available for students with immediate financial need.

A small number of Dean’s Scholarships are awarded by the college’s admissions office to highly qualified candidates on the basis of their academic excellence, leadership abilities, and their potential to enrich the college. Dean’s Scholarships are included in the recipient’s overall financial aid package.

To learn more about financial aid, contact the Carver College of Medicine Office of Student Affairs and Curriculum financial services department.

**Graduate Programs**

The Carver College of Medicine offers graduate programs leading to the M.A. in Physical Therapy, M.S. in pathology, and Master of Physician Assistant Studies (M.P.A.S.); the M.S. and Ph.D. in biochemistry, free radical and radiation biology, microbiology, pharmacology, and physiology and biophysics; the Ph.D. in anatomy and cell biology and physical rehabilitation science; and the Doctor of Physical Therapy (D.P.T.).

Many of the college’s faculty members participate in the Graduate College’s interdisciplinary programs in genetics, immunology, molecular biology, and neuroscience, and in its Biosciences Program.

**Interdisciplinary Biosciences Program**

The Graduate College and the Carver College of Medicine offer the interdisciplinary Biosciences Program, which gives graduate students the opportunity to become acquainted with basic molecular research in the Departments of Anatomy and Cell Biology, Biochemistry, Biological Sciences, Microbiology, Pharmacology, Physiology and Biophysics, and the Programs in Free Radical and Radiation Biology, Genetics, Immunology, Molecular Biology, and Neuroscience. The Biosciences Program offers graduate students flexibility during their first year of study, before they select the department or program in which they will earn their Ph.D.

See Biosciences (Graduate College) for details.

**Medical Scientist Training Program**

The Medical Scientist Training Program (MSTP) is a combined M.D./Ph.D. program offered by the Carver College of Medicine and the Graduate College. The program prepares trainees for careers in academic medicine, with emphasis on basic and clinical research. It provides an effective means for integration of graduate education and doctoral research with the full complement of clinical studies necessary for the M.D. With a few exceptions, requirements for the combined M.D./Ph.D. can be completed in seven to eight years of continuous study. See Medical Scientist Training Program for details.

**Translational Biomedicine**

The Carver College of Medicine and the Graduate College offer a program leading to an M.S. or Ph.D. in translational biomedicine. See Translational Biomedicine (Graduate College) for details.

**Joint Degree Programs**

Students who wish to pursue an M.D. in combination with a graduate degree must be admitted to both the M.D. program and the graduate program and must make arrangements with the graduate department and with the Carver College of Medicine associate dean for student affairs and curriculum. Examples of joint degree programs are the M.D./M.P.H. with the College of Public Health, M.D./M.B.A. with the Tippie College of Business, and the M.D./J.D. with the College of Law.

**Faculty**

Nearly all Carver College of Medicine faculty members are full-time. Their work in practice and research is integral to their teaching. Many have earned national and international honors.

**Interdisciplinary Programs, Centers**

The college’s interdisciplinary programs and centers draw strength from college faculty members and the facilities available to them, without regard to departmental units or to the distinction between graduate and postgraduate training. For more information, contact the associate dean for research and graduate programs.
The following centers are subdivisions of the Carver College of Medicine.

**General Clinical Research Center**

The Clinical Research Center is the focal point at The University of Iowa for interdisciplinary programs in clinical investigation. It provides a physical and intellectual environment in which clinical investigation can be conducted with maximum regard for patient welfare and safety. The center, which has been funded continuously for 43 years by the National Institutes of Health, is a discrete unit with research nurses and dietitians, biostatistical support, and a computer facility.

**Mental Health Clinical Research Center**

The major emphasis of the Mental Health Clinical Research Center is the study of schizophrenia. The center provides the facilities for research linking the clinical picture of the illness with its underlying neurobiology. The center's seven research units conduct the necessary integrative and interdisciplinary research to advance knowledge about the disease.

**Iowa Cardiovascular Center**

The Iowa Cardiovascular Center coordinates research and training programs related to cardiovascular diseases. It encompasses several federally and nonfederally funded programs: Program—Project Grant on Integrative Functions in Neurovascular Control, the Specialized Center of Research (SCOR) in Coronary and Vascular Diseases, SCOR in Occupational and Immunologic Lung Disease, Program—Project Grant on Cerebral Blood Vessels, SCOR in Hypertension, SCOR in Congenital Heart Disease, SCOR in Cystic Fibrosis, Cystic Fibrosis Foundation Research and Development Program, Program—Project Grant on Gene Therapy for Cystic Fibrosis Lung Disease, Cystic Fibrosis Foundation Gene Therapy Center, and Training Center for Clinical Management of Lipid Disorders. It also coordinates several training programs and a coordinated program of other interdisciplinary research supported by a number of individual project grants.

The center occupies two floors of cardiovascular research laboratories and administrative offices in the Medical Research Center.

**Holden Comprehensive Cancer Center**

The Holden Comprehensive Cancer Center (HCCC) coordinates the efforts of University of Iowa faculty and staff in research, education, and demonstration programs related to all aspects of cancer. The HCCC is recognized by the National Cancer Institute as an NCI-designated cancer center and has “comprehensive” status, a designation that recognizes research scientists, physicians, and other health care professionals for their roles in treating and caring for patients with cancer.

**Alzheimer’s Disease Research Center**

The Alzheimer’s Disease Research Center studies Alzheimer’s disease and related neurological conditions from the viewpoint of neuroanatomy, neuroimaging, neuropsychology, and neurochemistry. The center’s purposes are to improve the diagnosis and treatment of these conditions, to disseminate information on new research to the public, and to contribute to a better understanding of the neural basis of cognition.

**Center for Macular Degeneration**

The Center for Macular Degeneration was organized to prevent the devastating consequences of macular degeneration in the majority of people at risk. For those already affected by the disease, the center works to develop sight-saving medical, pharmacological, and surgical treatments.

**Education and Patient Care Facilities**

First- and second-year classes are taught in the Bowen Science Building, the Medical Education Building, the Medical Laboratories, and in classrooms and conference rooms of University of Iowa Hospitals and Clinics. The new 214,000-square-foot Medical Education and Biomedical Research Facility, which opened in Fall 2001, houses the preclinical medical curriculum.

The Hardin Library for the Health Sciences is centrally located on the health sciences campus.
Students acquire clinical experience in the 763-bed University of Iowa Hospitals and Clinics, in the 93-bed Veterans Affairs Iowa City Health Care System (including observation beds), and in affiliated hospitals and ambulatory care centers throughout Iowa.

Faculty members of the Carver College of Medicine and the College of Dentistry make up the 754-member clinical staff at University of Iowa Hospitals and Clinics, whose 19 clinical services are directed by the heads of the corresponding academic departments in the two colleges. These faculty members also provide instruction for the 470 resident physicians and dentists and the 191 fellows who make up the house staff of University of Iowa Hospitals and Clinics, where facilities are provided for teaching all major medical specialties, for residencies in all specialties, and for fellowships in a number of subspecialties.

University of Iowa Hospitals and Clinics serves as a tertiary care center for Iowa and portions of adjoining states. Many patients are referred to University of Iowa Hospitals and Clinics for care and treatment not readily available in their home communities.

Research Facilities

The Medical Education and Biomedical Research Facility, opened in 2001, has expanded the college's state-of-the-art education and biomedical research laboratory space. The Eckstein Medical Research Building, which opened in 1989, was designed to provide spaces, mechanical systems, and support services that offer flexibility and adaptability for current and future research. The facility enables interdisciplinary groups of faculty scientists, each of whom is researching a human biology problem at the advancing edge of science, to conduct research in close proximity to other select researchers.

Other buildings that house research labs include Medical Laboratories, Bowen Science Building, Medical Education Building, Medical Research Facility, Medical Research Center, and buildings on the University's Oakdale Campus.

A number of facilities that support the faculty’s research and teaching endeavors are administered through the Carver College of Medicine dean’s office. University of Iowa research facilities housed in the college include the Central Electron Microscopy Research and Learning Facility, the DNA Facility, the Flow Cytometry Facility, the Gene Targeting Core Facility, the Gene Transfer Vector Core Facility, the Nuclear Magnetic Resonance Facility, the High-Resolution Mass Spectrometry Facility, the Keck Dynamic Image Analysis Facility, the Large-Scale Fermentation Facility, the Molecular Analysis Facility, the Tissue Culture/Hybridoma Core Facility, and the Transgenic Animal Facility.

The Office of Consultation and Research in Medical Education is made up of education specialists from a range of disciplines who serve the faculty, staff, and administration of all Carver College of Medicine programs. The office provides educational consultation, initiates and cooperates in educational research endeavors, and conducts faculty development activities.

Other courses include:

- **050:168 Teaching of Physical Exam Skills**: 1-2 s.h. Components of complete physical exam and educational techniques for teaching such skills: teaching of physical exam components to first-year students. Prerequisite: fourth-year M.D. enrollment.
- **050:169 Doctors in Film: Kildare to Sacks**: 1 s.h. Development of the American hero literary figure through portraits of physicians in popular film.
- **050:170 Clinical Beginnings**: 1 s.h. Orientation to third-year clerkships; technical skills, simulated patient activities, competence with the physical exam.
050:171 Women, Gender, and Medicine: Historical Perspective
Women in medicine from two historical perspectives; women as patients, healers. Prerequisite: fourth-year M.D. enrollment.

050:174 Foundations of Clinical Practice for Physician Assistants
Practice and expansion of clinical skills; development of broad understanding of the practice of medicine in social context; strengthening of self-directed learning skills in clinical medicine. Prerequisites: 117:101 and Physician Assistant Program enrollment.

050:175 Foundations of Clinical Practice IV for Physician Assistant Students
Basic diagnostic considerations in each of medicine’s clinical disciplines, as required of primary care providers.

050:180 Community-Based Primary Care
Introduction; clinical activities, work with community agencies and resources, didactic and conferences. Prerequisite: M.D. enrollment.

050:182 Health Law
Broad approach to health law issues in practice of medicine; how law shapes the nature of the physician/patient/family relationship.

050:190 Introduction to Medical Education at Iowa
Advanced concepts in anatomy, biochemistry, biostatistics, and cell biology relevant to clinical reasoning, for nontraditional medical students.

050:195 Community Health Outreach I
Presentations, patient-based learning groups, readings, and practical experience working with agencies that provide health care and wellness promotion to communities; substance abuse; child, adolescent, and adult health; aging; interpersonal violence; homelessness.

050:196 Community Health Outreach II
Presentations, patient-based learning groups, readings, and practical experience working with agencies that provide health care and wellness promotion to communities; substance abuse; child, adolescent, and adult health; aging; interpersonal violence; homelessness.

050:197 Community Health Outreach III
Presentations, patient-based learning groups, readings, and practical experience working with agencies that provide health care and wellness promotion to communities; substance abuse; child, adolescent, and adult health; aging; interpersonal violence; homelessness.

050:198 Community Health Outreach IV
Presentations, patient-based learning groups, readings, and practical experience working with agencies that provide health care and wellness promotion to communities; substance abuse; child, adolescent, and adult health; aging; interpersonal violence; homelessness.

050:203 Clinical Dietetics
Nutritional aspects of health and disease, with emphasis on medical nutrition therapy, human nutrition in the clinical state as it relates to physiology and biochemistry.

050:211 MSTP Research
Experience with physician-scientist preceptor in medical interviewing, physical examination, patient presentation through direct patient interaction. Prerequisite: Medical Scientist Training Program graduate phase enrollment.

050:222 Advanced Statistical Methods for Clinical Research

050:223 Seminar in Clinical Research
Presentation of ongoing research projects and methodology in patient-oriented clinical research. Repeatable. Prerequisites: 050:220 and Clinical Investigation Training Program enrollment, or consent of instructor.

050:224 Seminar in Translational Biomedicine
Student research presentations, journal club, invited speakers.

050:225 Translational Biomedical Research
Student research guided by mentor.

050:226 Quality Improvement in Health Care Systems
Preparation for leading continuous quality improvement programs in health care organizations; varied quality improvement techniques. Prerequisite: consent of instructor.

050:228 K30 Preceptorship Research
Academic credit for the mentored research project required of trainees in the Graduate Training Program in Clinical Investigation. Prerequisite: consent of instructor.

050:240 Human Organ Systems
Microscopic structure and function of major and specialized human organ systems; approach integrating normal microscopic anatomy and human physiology. Prerequisite: M.D. enrollment.

050:270 Responsible Conduct in Research
Ethical issues; misconduct and fraud; proper handling of data; responsible authorship; conflict of interest; research on animals and human subjects. Prerequisite: consent of Carver College of Medicine.

050:280 Medicine, Narrative, and Poetics
Insights, freedom, joy, responsibilities, and challenges of a life in medicine; reading, discussion, individual creative writing.

050:281 Global Health Issues—International
Global health topics; theoretical structure for interpreting global health care issues; for medical students.

050:282 Global Cross-Cultural Clerkship
Cross-cultural medical program at an international site; focus on health care problems of a specific community; individual educational objectives set in advance.

050:283 Health Informatics I
Technological tools that support health care administration, management, and decision making. Prerequisite: graduate standing or consent of instructor. Same as 06K:225, 021:275, 051:187, 056:186, 074:191, 096:283, 174:226.

050:284 Global Cross-Cultural Elective
Cross-cultural medical program with focus on health care problems of a domestic or international community, individually arranged.

050:285 Global Health Issues: Domestic Communities
Domestic health topics that illustrate health care needs of diverse domestic communities.

050:286 Introduction to U.S. Health Care System
Structure, function, and finance of U.S. health care system; access, cost, quality, finance mechanisms, reform process.

050:995 Individual Project: Medical History
834 Carver College of Medicine

050:999 Special Study off Campus arr.
Arranged by student with department's approval.

Hospital Certificate Programs

The following courses are conducted by University of Iowa Hospitals and Clinics staff.

670:901 Radiologic Technology Program 0 s.h.
Patient care and ethics, radiographic positioning, radiographic critique, medical terminology, radiologic physics, anatomy and physiology, radiographic technique, computer technology, radiation biology, radiographic processing, imaging equipment, quality assurance; supervised clinical education; two-year program; national board examination required at completion.

671:902 Orthoptics Program 0 s.h.
Clinical science of binocular vision, ocular motility, and related eye disorders; practical, theoretical training in the Department of Ophthalmology and Visual Sciences two-year program; written, oral and practical national board examinations required at completion. Prerequisite: bachelor's degree with specific class recommendations.

672:803 Radiation Therapy Program arr.
Theory and techniques of radiation therapy technology; emphasis on areas of oncology treatment planning, treatment set-up, dosimetry, use of megavoltage radiation-producing equipment to administer treatments. Prerequisites: completion of radiologic technology program and eligibility for registration with a national certification program.

672:903 Radiation Therapy Program 0 s.h.
Theory and techniques of radiation therapy technology; emphasis on areas of oncology treatment planning, treatment set-up, dosimetry, use of megavoltage radiation-producing equipment to administer treatments. Prerequisites: completion of radiologic technology program and eligibility for registration with a national certification program.

673:804 Diagnostic Medical Sonography Program arr.
Principles and methods in using ultrasound as an imaging modality; abdomen, obstetrics and gynecology, neurosonography, and vascular technology specialties; 18-month program; national certification required at completion. Prerequisite: completion of an allied health program or bachelor's degree with course work in physics, anatomy, patient care, and algebra.

673:805 Diagnostic Medical Sonography Clinical 0 s.h.
Principle and methods in using ultrasound as an imaging modality; abdomen, obstetrics and gynecology, neurosonography, and vascular technology specialties; 18-month program; national certification required at completion. Prerequisite: completion of an allied health program or bachelor's degree with course work in physics, anatomy, patient care, medical technology, and algebra.

673:806 Magnetic Resonance Imaging Program 0 s.h.
Imaging equipment, intervention, techniques, digital angiography, vascular anatomy and physiology, pharmacology, sterilization techniques, cardiac monitoring, six-month program; national recognition examination recommended at completion. Prerequisite: completion of radiologic technology program.

673:807 Magnetic Resonance Imaging—Clinical 0 s.h.
Prerequisite: completion of radiologic technology program.

674:806 Magnetic Resonance Imaging Program 0 s.h.
Prerequisites: completion of an accredited medical sonography or vascular technology program.

674:807 Magnetic Resonance Imaging—Clinical 0 s.h.
Prerequisite: completion of radiologic technology program.

674:901 Cardiac Sonography Course 0 s.h.
Using ultrasound as an imaging modality; specialties, including adult echocardiography, stress echocardiography; six-month program; national certification examination required at completion. Prerequisite: completion of an accredited medical sonography or vascular technology program.

674:902 Cardiac Sonography Clinical Course 0 s.h.
Prerequisites: graduation from an accredited radiography program and eligibility for registration with a national certification program.

675:908 Cardiovascular Interventional Program 0 s.h.
Imaging equipment, pharmacology, sterile techniques, cardiac monitoring, vascular anatomy and physiology, pharmacology, imaging procedures, interventional techniques, digital angiography, six-month program; national recognition examination recommended at completion. Prerequisite: completion of radiologic technology program.

675:909 Cardiovascular Interventional—Clinical 0 s.h.
Prerequisite: completion of radiologic technology program.

676:810 Computed Tomography Program 0 s.h.
Sectional anatomy, procedures and pathology, physics and imaging, introduction to multidetector CT, physiologic and 3-D imaging, CT simulation; six-month program; national recognition examination recommended at completion. Prerequisite: completion of radiologic technology program.

676:811 Computed Tomography—Clinical 0 s.h.
Prerequisite: completion of radiologic technology program.

676:910 Fellowship in Computed Tomography 0 s.h.
Sectional anatomy, procedures and pathology, physics and imaging, introduction to multidetector CT, physiologic and 3-D imaging, CT simulation; six-month program; national recognition examination recommended at completion of program. Prerequisite: completion of radiologic technology program.

676:913 Computed Tomography Clinical 0 s.h.
Prerequisite: completion of radiologic technology program.

677:101 Emergency Medical Technician—Paramedic 0 s.h.
Preparation for role of entry-level paramedic: comprehension, application, and evaluation of the clinical role; demonstration of technical proficiency in all required skills; demonstration of personal behaviors consistent with professional and employer expectations. Prerequisite: certification as an emergency medical technician—basic.
677:102 Emergency Medical Technician—Paramedic 0 s.h.
Preparation for role of entry-level paramedic: comprehension, application, and evaluation of the clinical role; demonstration of technical proficiency in all required skills; demonstration of personal behaviors consistent with professional and employer expectations. Prerequisite: 677:101.

677:103 Emergency Medical Technician—Paramedic 0 s.h.
Preparation for role of entry-level paramedic: comprehension, application, and evaluation of the clinical role; demonstration of technical proficiency in all required skills; demonstration of personal behaviors consistent with professional and employer expectations. Prerequisite: 677:102.

678:816 Principles of Quality Management/PACS I 8 s.h.
Administrative quality improvement techniques, equipment testing, and management of digital images. First of a two-semester sequence. Prerequisite: American Registry of Radiologic Technologists certification and acceptance to QM/PACS program.

678:817 Principles of Quality Management/PACS II 7 s.h.
Quality control data analysis, mammography quality management, research methods; picture, archival, and communications systems administration, implementation, analysis. Second of a two-semester sequence. Prerequisite: 678:816. Recommended: national examination at completion.

678:916 Quality Management/PACS I 0 s.h.
Administrative quality improvement techniques, equipment testing, and management of digital images. First of a two-semester sequence. Prerequisite: American Registry of Radiologic Technologists certification and acceptance to QM/PACS program.

678:917 Quality Management/PACS II 0 s.h.
Quality control data analysis, mammography quality management, research methods; picture, archival, and communications systems administration, implementation, analysis. Second of a two-semester sequence. Prerequisite: 678:916. Recommended: national examination at completion.
Anatomy and Cell Biology

Interim head: John F. Engelhardt
Professors emeriti: Ronald Bergman, Frank J. Longo, Gary W. Van Hoesen
Associate professors: Jackie Bickenbach, Robin L. Davison
Assistant professors: Botond B. Banfi, Robert A. Cornell, Michael R. Rebagliati, Charles A. Yeaman
Lecturer: Kathleen Andersen
Associates: Gregory H. Leno, Marc Pizzimenti
Graduate degrees: Ph.D. in Anatomy and Cell Biology
Web site: http://www.anatomy.uiowa.edu

The Department of Anatomy and Cell Biology performs three major functions. It teaches human anatomy to students preparing for careers in the health care professions; provides advanced courses, teaching experience, and research training to graduate students preparing for careers in academic research and related scientific fields; and conducts original research on the biological basis of cellular functions and human disease processes.

Preclinical Study

The department contributes to the preclinical education of health care professionals by providing major courses in gross anatomy, cell biology, histology, and neuroscience. The department participates in the Carver College of Medicine’s Medical Scientist Training Program and the Graduate College’s Biosciences, Molecular Biology, Immunology, Genetics, and Neuroscience Programs.

Doctor of Philosophy

Students in the Ph.D. program work toward the doctorate without an intermediate master’s degree program. They complete courses focused in one of three major areas (molecular medicine, cell biology and developmental biology, or neurobiology) in addition to related background and elective courses. Students also teach in lecture and laboratory courses under faculty supervision. The program may be completed in four to five years of intensive, full-time residence.

During the first year, students rotate through two or more faculty research laboratories. They choose a research area and become affiliated with a faculty member, who acts as their major adviser. By the end of the second year, students undertake the comprehensive examination, which assesses their ability to analyze, organize, and apply the information, concepts, and skills acquired in the first two years of the program. They also define a research problem with their major adviser, and formulate a research prospectus.

Subsequent years are devoted primarily to research.

The final Ph.D. examination consists of a public oral defense of the dissertation. The dissertation is based on original research conducted with the guidance of the major adviser and at least four other faculty members on the thesis committee.

Admission

Applicants to the Ph.D. program in anatomy and cell biology should have undergraduate preparation that includes college mathematics through calculus, one year of organic chemistry, one year of general physics, and at least two upper-level courses in biological sciences. Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog. In addition to taking the Graduate Record Examination (GRE) General Test, applicants are strongly encouraged to take the Graduate Record Examination Subject Test in Biology or their major undergraduate area.

Financial Support

Financial aid is awarded on a competitive basis to students admitted to the Ph.D. program. Applications for aid should be completed concurrently with the admissions application.

Facilities

The department occupies more than 35,000 square feet in the Bowen Science Building on the Health Sciences Campus. The building houses modern teaching facilities and well-equipped research laboratories. The most modern instrumentation is available, including facilities and equipment for microscopic digital imaging,
confocal microscopy, molecular biological techniques, tissue culture, and protein chemistry. Through collaborative programs with the Holden Comprehensive Cancer Center, Iowa Cardiovascular Center, and Alzheimer's Disease Research Center, faculty and students also have access to outstanding research facilities throughout the University of Iowa Health Sciences Campus.

060:265 Neuroscience Seminar 0-1 s.h.  

060:270 Human Anatomy, Physiology, Pathophysiology, and Assessment for Advanced Practice Nursing 3, 6 s.h.  
Interrelationships between anatomic structure and physiological function in health and disease; clinical assessment of functional integrity of organ systems; implications of pathophysiology for anesthesia. Prerequisite: admission to Anesthesia Nursing Program or consent of instructor. Same as 096:270.

060:998 Anatomy and Cell Biology on Campus arr.  
Opportunity to perform a mentioned scientific research project in a department laboratory.
Anesthesiology

Interim head: Michael M. Todd

Professors emeriti: Shiro Shimoseo, Martin Sokoll

Associate professor emeritus: James G. Carter

Associate: Srinivasan Rajagopal
Web site: http://www.anesth.uiowa.edu

Medical Student Training

The Department of Anesthesiology introduces second-year medical students to anesthesiology as a specialty, helps third-year students develop concepts and technical skills related to resuscitation, airway management, and care of the unconscious patient; and offers fourth-year students intensive study in the specialty. Diverse clinical experiences, seminars and teaching conferences, and ongoing research activities help postgraduate students and residents develop the knowledge and skills required of an anesthesiology specialist.

Nurse Anesthetist Program

The department coordinates the Anesthesia Nursing Program, a collaboration between the Carver College of Medicine and the College of Nursing. The program, open to nurses who hold a bachelor's degree, prepares nurse anesthetists to serve rural hospitals in Iowa and nationwide. The curriculum provides intensive training in didactic and clinical anesthesia and includes diverse clinical experience as well as classroom instruction, seminars, and clinical case conferences.

Courses

116:006 Clinical Anesthesia 2 s.h.
Clinical instruction in perioperative and intraoperative care of the surgical patient; introduction to the clinical management of chronic pain; seminars, clinical case conferences, small group discussions.

116:010 Clinical Anesthesia Senior 3 s.h.
Instruction and practical experience in various forms of anesthesia for surgical procedures; basic techniques of general, spinal, epidural, peripheral nerve block anesthesia; endotracheal intubation, other airway management skills; management of unconscious patients, cardiopulmonary resuscitation; pharmacology of general and regional anesthesiology, their impact on respiratory and cardiovascular function; anesthesia seminars, morbidity and mortality conference.

116:011 Intensive Care 3 s.h.
Evaluation, treatment of seriously ill patients in intensive care; ventilator management, evaluation of pulmonary function, monitoring of cardiovascular status, fluid balance and acid base problems, advance monitoring techniques.

116:271 Chemical and Physical Principles of Anesthesia Practice I 3 s.h.
Chemistry and physics, as applied to anesthesia. Prerequisite: admission to anesthesia nursing program or consent of instructor. Same as 096:271.

116:272 Pharmacology of Anesthesia Practice I 4 s.h.
Mechanism and action of drugs; focus on pharmacotherapeutic principles, including pharmacokinetics, pharmacodynamics, receptor binding, cell signaling; principles of uptake, distribution, elimination of anesthetic and adjunctive agents. Prerequisite: grade of 2.67 or higher in 116:271 or consent of instructor, and admission to anesthesia nursing program. Same as 096:272.

116:273 Pharmacology of Anesthesia Practice II 1 s.h.
Continuation of 116:272; vascular, hepatic, renal, GI, endocrine agents; cellular mechanisms, electrolytes alterations. Prerequisites: grade of 2.67 or higher in 116:272 or consent of instructor, and anesthesia nursing program enrollment. Same as 096:273.

116:274 Basic Principles of Anesthesia Practice 3 s.h.
Overview of anesthesia as a nursing specialty; patient assessment, anesthetic planning and management, pertinent regulations; principles of general and regional anesthesia for surgical specialties. Prerequisite: grade of 2.67 or higher in 116:272 or consent of instructor. Corequisite: 116:273. Same as 096:274.

116:275 Advanced Principles of Anesthesia Practice I 2 s.h.
Special needs and intraoperative management of obstetric, pediatric, and neurological patients; emphasis on pathophysiology, monitoring, ancillary requirements. Prerequisites: grade of 2.67 or higher in 116:273 and 116:274, or consent of instructor. Same as 096:275.

116:276 Advanced Principles of Anesthesia Practice II 2 s.h.
Special needs and intraoperative management of patients as cardiac, vascular, thoracic, and other surgical specialties; focus on altered pathophysiology, anesthetic requirements; strategies for special surgical situations. Prerequisites: grade of 2.67 or higher in 116:273 and 116:274, or consent of instructor. Same as 096:276.
116:277 Advanced Principles of Anesthesia Practice III 1 s.h.
Acute and chronic pain management; anesthetic problems with concurrent multisystem disease, advanced age, altered physical and/or mental status. Prerequisites: grade of 2.67 or higher in 116:273 and 116:274, or consent of instructor. Same as 096:277.

116:278 Professional Aspects of Anesthesia Nursing Practice 2 s.h.
Issues in contemporary anesthesia nursing practice: historical development, ethical, legal, and political aspects; evaluation; quality management; responsibilities; career expectations and development; role of professional organization. Prerequisite: anesthesia nursing program enrollment. Same as 096:278.

116:279 Equipment and Technological Principles of Anesthesia Practice 1 s.h.
Anesthesia delivery systems, ancillary equipment, monitoring devices; correlation of applicable chemical and physical principles for use, safe operation, care, and cleaning of anesthesia-related equipment. Prerequisites: 116:271 and anesthesia nursing program enrollment. Same as 096:279.

116:287 Pharmacology of Anesthesia Practice III 1 s.h.
Drugs specific to various specialty areas: tocolytics, vasoactive and cardioactive agents, drugs that alter clotting, chronic pain therapy agents. Prerequisites: grade of 2.67 or higher in 116:273 or consent of instructor, and anesthesia nursing program enrollment. Same as 096:287.

116:290 Introductory Clinical Anesthesia 1 s.h.
Initial anesthesia preceptorship under faculty supervision; development of basic clinical skills for work as a nurse anesthetist. Prerequisites: basic science core courses and anesthesia nursing program enrollment. Same as 096:290.

116:291 Clinical Anesthesia I 1 s.h.
Supervised anesthesia clinical experience for general, orthopedic, gynecologic, pediatric, urologic, dental, ENT, ambulatory surgery, or invasive diagnostic procedures. Prerequisites: 116:290 and anesthesia nursing program enrollment. Same as 096:291.

116:292 Clinical Anesthesia II 1 s.h.
Clinical anesthesia experience under faculty supervision at University Hospitals and Clinics, in surgical subspecialty rotations not completed in 116:291. Prerequisites: 116:291 and anesthesia nursing program enrollment. Same as 096:292.

116:293 Advanced Clinical Anesthesia 1 s.h.
Clinical anesthesia experiences in neurologic surgery, cardiovascular/thoracic surgery; experience providing anesthesia for patients with complex pathophysiology in varied surgical settings. Prerequisites: g.p.a. of at least 2.67, anesthesia nursing concentration courses, and anesthesia nursing program enrollment. Same as 096:293.

116:294 Obstetrical Anesthesia 1 s.h.
Experience providing anesthesia for the parturient and initial neonatal care; two one-month rotations of campus. Prerequisites: anesthesia nursing courses and anesthesia nursing program enrollment. Same as 096:294.

116:295 Rural Anesthesia 1 s.h.
Anesthesia experience in community hospitals; three one-month rotations at UI affiliated clinical sites in rural Iowa. Prerequisites: anesthesia nursing program enrollment and courses. Same as 096:295.

116:333 Intensive Care off Campus 1 s.h.
Evaluation and treatment of seriously ill patients in a non-UHIC intensive care unit; artificial ventilation, evaluation of pulmonary function, monitoring of cardiovascular status, fluid balance and acid base problems, advance monitoring techniques. Prerequisites: 4 s.h. of 116:010 and consent of program director.

116:998 Anesthesia on Campus arr.
Well defined research project relating to anesthesia; arranged by student with departmental approval.

116:999 Anesthesia off Campus arr.
Knowledge development in anesthesia work and monitor use; ability to identify respiratory, cardiovascular, and neurologic effects of anesthetic agents; skill in airway management; basic skills in general, spinal, epidural, and peripheral nerve block anesthesia.
The Division of Associated Medical Sciences includes five academic programs: the Clinical Laboratory Sciences, Nuclear Medicine Technology, Physical Therapy and Rehabilitation Science, Physician Assistant, and Radiation Sciences Programs. The division provides academic coordination for students in each program.

Admission to the Clinical Laboratory Sciences Program has been suspended.

The Clinical Laboratory Sciences, Nuclear Medicine Technology, and Radiation Sciences Programs offer a Bachelor of Science in addition to a certificate of completion. Students in those programs usually enroll initially in the College of Liberal Arts and Sciences and are assigned a faculty adviser from the Division of Associated Medical Sciences.

The Physician Assistant Program and the Physical Therapy and Rehabilitation Science Program offer graduate degrees, which are awarded by the Graduate College: Master of Physician Assistant Studies (M.P.A.S.), Doctor of Physical Therapy (D.P.T.), Master of Arts (M.A.) in physical therapy, and Doctor of Philosophy (Ph.D.) in physical rehabilitation science.

Although each program in the division has its own admission requirements, all require a similar foundation in the biological, chemical, and mathematical sciences. Physics, physiology, computer science, biochemistry, general statistics, and psychology are required by some programs and are highly recommended for others. Students should plan their study programs carefully to avoid conflicts in specifically required courses. It is imperative that students consult with their program adviser to assure the proper sequencing of courses.

The general academic policies described here govern all five of the division’s programs. For descriptions of each program, summaries of each profession, curriculum outlines, prerequisite and admission requirements, and lists of courses, see Clinical Laboratory Sciences, Nuclear Medicine Technology, Physical Therapy and Rehabilitation Science, Physician Assistant Program, and Radiation Sciences in the Catalog.
they have had a recent physical examination, including routine laboratory procedures and immunizations. For more information, contact Student Health Service.

Graduation Requirements for the Bachelor of Science

General Requirements

The Bachelor of Science requires a minimum of 120 s.h. of credit. The number of semester hours required after admission to a specific program varies from program to program. Students should consult the program description and/or program director for more specific information.

The general requirements for graduation include quality as well as quantity of work completed. Candidates must earn a g.p.a. of at least 2.00 in all college work attempted, all work undertaken at The University of Iowa, and all graded work attempted after admission to the Carver College of Medicine. Students enrolled in a program that uses the pass/fail/honors grading system must pass all courses required to complete the program.

The residence requirement may be met by earning the final consecutive 30 s.h. in residence, or 45 of the last 60 s.h. in residence, or an overall total of 90 s.h. in residence.

Nonresident instruction includes course work and correspondence study at other colleges, universities, and institutions; and course work in other undergraduate colleges at The University of Iowa. Some undergraduate course work in other University of Iowa colleges may count toward residency requirements; contact the individual Division of Associated Medical Sciences programs for information.

College of Liberal Arts and Sciences General Education Program requirements vary from program to program. Students must check the requirements of the specific Division of Associated Medical Sciences program or degree objective. Specific requirements for the major are listed in each program’s description.

Double Majors

Students may earn more than one major in the Carver College of Medicine by meeting the requirements for each major.

Two Baccalaureate Degrees

Students who want to earn two baccalaureate degrees, each from a different college, may do so under a combined degree program. They must have their combined course of study approved by the dean of the Carver College of Medicine and the dean of the other college to be eligible for a combined degree program.

Second Baccalaureate Degree

Students who already possess a baccalaureate degree and who want to earn an additional bachelor’s degree must complete at least 30 s.h. consecutively in the Carver College of Medicine. Students who hold a B.A. or B.S. are considered to have completed the College of Liberal Arts and Sciences General Education Program except for the foreign language component. Holders of other degrees must meet college and program degree requirements. Students with a B.A. or B.S. must satisfy the residence requirement for a bachelor’s degree at Iowa. Candidates for a second bachelor’s degree must apply for the degree through the University’s Office of Admissions.

Combined Baccalaureate Degree Program

Students may earn two University of Iowa baccalaureate degrees in a combined curriculum program in the Carver College of Medicine and the College of Liberal Arts and Sciences. Although students begin their academic program in the College of Liberal Arts and Sciences, they must be eligible for admission to Carver College of Medicine baccalaureate programs in Clinical Laboratory Sciences, Nuclear Medicine Technology, or Radiation Sciences.

Students who select this program must meet baccalaureate degree requirements specified by both colleges. Candidates in the combined program usually are able to meet the baccalaureate degree requirements of both colleges in about five academic years. The exact length of time necessary to complete the program is determined by the major areas of study selected in each college. Students who enter the combined degree program are assigned two faculty advisers, one in the major department of the Carver College of Medicine and the other in the major department of the College of Liberal Arts and Sciences.

Candidates in the combined degree program must satisfy all requirements for both degrees. They must complete an overall total of 154 s.h.,
including at least 30 s.h. of courses offered by the Carver College of Medicine and at least 30 s.h. of courses offered by the College of Liberal Arts and Sciences.

Students interested in the combined degree program should see the director of the baccalaureate program of their choice in the Carver College of Medicine.

Minors

Students graduating from the Carver College of Medicine may earn a minor or minors in any degree-granting department or program in the college outside of their major department or in another college of the University by meeting that department’s requirements for the minor. In general, a minimum of 15 s.h. must be taken in the minor.

Application for Degree

Students who want to be considered for graduation must file an application for degree with the Office of the Registrar before the deadline for the session in which the degree is to be conferred. Students who want to have a minor listed on their transcript must indicate this on the degree application form so that completion of the requirements for the minor can be verified.

Duplication

Duplication occurs when students take the same course more than once or when they take a course that duplicates the content of a course they already have completed satisfactorily. Duplication occurs when students take a course that is less advanced or at a lower level than one in the same subject that they already have completed satisfactorily. Duplication and regression are assessed by the registrar at the time of graduation analysis. Semester hours earned by duplication or regression do not count toward the number of semester hours required for graduation.

Graduation Honors

Approximately 10 percent of the division’s graduating students may be recognized for their scholastic achievement upon recommendation by the program and with the dean’s approval. Minimum criteria have been established for the following designations: distinction, high distinction, and highest distinction.

Registration and Grading

Information about tuition and fees, registration, and deadlines is available from the Office of the Registrar. Students who add or drop a course after registration or who register late are assessed a fee. Courses dropped after the deadline results in a W (withdrawal) on the transcript. Students are not allowed to register for full-semester courses after the second week of the semester or the first week of the summer session. Students must register for off-cycle courses before the first day of the course. The maximum permitted registration is 20 s.h. in a regular semester and 10 s.h. in the summer session. Students must obtain permission from the head of the division to register for more than the maximum semester hours allowed.

Changes in Registration

Courses may be added with the signatures of the adviser and the course instructor at any time during the first one-fifth of the course. They may be dropped at any time during the first two-thirds of the course. Approval is required from the head of the Division of Associated Medical Sciences for all other changes in registration and is granted only in extraordinary circumstances. Students are assigned a mark of W (withdrawn) for any course dropped after the first one-fifth of the course. Students who have registered for courses offered for variable or arranged credit may change the number of semester hours with the signatures of the instructor, the adviser, and the head of the division at any time before the end of the first two-thirds of the course.

Other changes in registration (such as to audit for zero credit) may be made only during the first one-fifth of the course.

It is the student’s responsibility to see that the change of registration form is approved by the necessary individuals and delivered to the Registration Center. Changes in registration become effective on the date the completed form is submitted to the Registration Center.

Withdrawal of Registration

Students may withdraw registration without academic penalty at any time before the end of the first four-fifths of the course, but no credit is given for the course. Later withdrawal results in automatic assignment of an F. Students who withdraw are not reinstated after the deadline for that session.
Grading Procedures
Grading procedures vary from program to program. Students should consult individual program policy statements for information.

Auditing Courses
Students may register to audit a course with approval of the appropriate program director and course instructor. In addition to obtaining these signatures, students must register for zero credit in the course to be audited. The mark of R (registered) is assigned if the student's attendance and performance are satisfactory; if they are unsatisfactory, the mark of W (withdrawn) is assigned. Courses completed with a mark of R do not meet any college requirement and carry no credit toward graduation. Auditing may not be used as a second-grade-only option.

Second-Grade-Only Option
Repeating courses for the second-grade-only option is allowed in extraordinary circumstances. To repeat a course for the second-grade-only option, students must obtain the signatures of the course instructor, the program director, and the dean on a special form obtained from the program office. The properly signed form must be presented to the Office of the Registrar before the end of the first one-fifth of the course. Both grades remain on the permanent record, but only the second one is used to calculate grade-point average and hours earned.

Incompletes
A grade of I (incomplete) may be reported if the reasons for inability to finish the course satisfactorily are acceptable to the program director and the course instructor. There also must be evidence that the course work will be finished within a reasonable length of time, usually by the end of the next academic session. Incompletes not removed by the deadline for submission of final grades for the next session result in the assignment of a grade of F. Changing the grade when an incomplete has been converted to an F requires the signature of the dean on a change of grade form.

Credit by Examination
The procedure for the acceptance of and the granting of credit by examination varies from program to program. Consult the program director for information.

Reports to Students
Instructors contact any student whose work falls below the minimum acceptable level once the problem is recognized. Grades are reported on the student's transcript, following University protocol. No formal midterm reports are given.

Courses Offered by Other University of Iowa Colleges
Division of Associated Medical Sciences students who enroll in courses offered by other University of Iowa colleges are governed by those colleges' rules in matters regarding the courses. See http://www.uiowa.edu/~provost/deos/crossenroll.doc for details.

Academic Progress, Probation, Dismissal
Students are expected to maintain satisfactory academic and professional standards and to demonstrate reasonable progress toward the degree and certificate. Students who fail to maintain satisfactory academic progress or professional standards of behavior as determined by their program may be placed on probation or dismissed from the program. Probation serves as a warning that the student will not graduate unless his or her academic performance and/or professional behavior improves.

Students on probation are restored to good standing by the program director upon evidence that the problem has been corrected. Such action is usually taken at the end of a semester or session. Entering students may be admitted on probation if they fail to meet the minimum stated standards for admission.

Continued unsatisfactory scholarship or unprofessional behavior may result in dismissal from a program. Students dismissed from a program must reapply for admission through the regular, established program admissions process, following review by the Division of Associated Medical Sciences executive committee, at least four months before the requested date of readmission.

Students placed on probation or dismissed from a program are notified in writing of these actions by the program director; copies are placed in their files.

Students are expected to attend classes regularly. Students who miss classes or examinations because of illness are expected to present evidence that they have been ill. Any other
Absences must be approved in advance by the course instructor.

Any offense against good order committed by a student in a classroom, clinical setting, or laboratory may be dealt with by the instructor or referred to the program director. The instructor reports in writing any disciplinary action taken against a student to the program director. Repeated or exceptional instances are reported to the dean.

**Academic Misconduct**

**Plagiarism and Cheating**

All cases of plagiarism and cheating in the Carver College of Medicine are reported to the dean with a statement of relevant facts. The program director and the instructor may submit recommendations for appropriate disciplinary action.

The individual instructor may reduce the student’s grade, including assignment of the grade of F in the course. A report of this action is sent to the student, the program director, and the dean.

The dean, or a faculty committee appointed by the dean, may impose the following or other penalties, as the offense warrants: disciplinary probation, requirement of additional hours for the degree, suspension from the program for a period of time, or recommendation of expulsion from the program.

**Appeals Procedure**

Students who want to appeal a decision should appeal in writing to the dean within two weeks after the date of receipt of the decision in writing.

**Financial Aid**

Students in Division of Associated Medical Sciences undergraduate programs are eligible to apply for undergraduate financial aid. Scholarships, grants, loans, and part-time job placement are administered by the University’s Office of Student Financial Aid and are awarded on the basis of demonstrated need. Part-time work in related areas is sometimes available.
Clinical Laboratory Sciences

Director: Ruthanne R. Hyduke
Medical director: Fred R. Dee
Professor: Fred R. Dee
Clinical professor: Alan D. Junkins
Clinical associate professor: Mark A. Bowman
Lecturer: Pamela Roberts
Undergraduate degree: B.S. in Clinical Laboratory Sciences
Web site: http://www.medicine.uiowa.edu/clsp

Admission to the Clinical Laboratory Sciences Program has been suspended.

The Clinical Laboratory Sciences Program is one of five academic units in the Division of Associated Medical Sciences. It is sponsored by the Carver College of Medicine, the College of Liberal Arts and Sciences, University of Iowa Hospitals and Clinics, and the Veterans Affairs Iowa City Health Care System. For information on the division’s general academic policies, see Associated Medical Sciences in the Catalog.

Clinical laboratory scientists and medical technologists perform the laboratory tests that provide physicians with information vital for accurate diagnosis and proper treatment of disease. They are in demand in hospital, private, and government laboratories; clinics; physicians’ offices; and industrial, pharmaceutical, biological, and environmental research laboratories. Clinical laboratory scientists and medical technologists are highly skilled health team members who use a battery of sophisticated procedures and instruments in their work and who possess specialized knowledge and skills acquired through completion of a formal program of academic and clinical study.

Satisfactory completion of the Clinical Laboratory Sciences Program qualifies students to take all national clinical laboratory scientist/medical technologist certification examinations. The program is accredited by the National Accrediting Agency for Clinical Laboratory Sciences. Students who have taken the required courses in their first, sophomore, and junior years complete the program as follows.

SENIOR YEAR

The professional (clinical) program consists of a minimum of 12 months of didactic and practical instruction. The first summer session and the fall semester are devoted to lectures, laboratory experience, demonstrations, short generalist rotations, and seminars covering theory and technique in clinical laboratory science. During the last semester, students have the opportunity to rotate through the clinical laboratory facilities of University of Iowa Hospitals and Clinics, the Veterans Affairs Iowa City Health Care System, and other Iowa hospitals.

The following courses are required.

069:110 Clinical Laboratory Science Concepts in Immunohematology 1 s.h.
069:111 Clinical Laboratory Science Concepts in Hematology 2 s.h.
069:112 Clinical Laboratory Science Concepts in Instrumentation and Urinalysis 4 s.h.
069:113 Clinical Laboratory Science Concepts in Microbiology 2 s.h.
069:121 Introduction to Clinical Practice 1 s.h.
069:122 Chemistry for Clinical Laboratory Science 5 s.h.
069:123 Immunohematology for Clinical Laboratory Science 4 s.h.
069:124 Hematology for Clinical Laboratory Science 5 s.h.
069:125 Microbiology for Clinical Laboratory Science 4 s.h.
069:126 Clinical Chemistry 4 s.h.
069:127 Clinical Hematology 3 s.h.
069:128 Clinical Microbiology 4 s.h.
069:129 Clinical Immunology and Molecular Pathology 3 s.h.
069:131 Clinical Laboratory Science Professional Skills Seminar 1 s.h.
069:132 Clinical Laboratory Science Management Topics and Projects 2 s.h.
069:137 Clinical Immunohematology 2 s.h.
069:138 CLS Body Fluids 1 s.h.
069:139 CLS Parasitology 1 s.h.

In addition, students must meet all other University of Iowa graduation requirements by the completion of the professional (clinical) year.

Admission

Admission to the clinical laboratory sciences and medical technology professional program is competitive; enrollment is limited to 16 students. Enrolees begin the program in late May and complete it the following May.
Applicants to the professional program must have completed all of the following prerequisites and must have earned at least 86 s.h. of college credit by the start of the professional (clinical) year.

Chemistry, including organic chemistry and biochemistry 14 s.h.
Mathematics 3 s.h.
Statistics 3 s.h.
Biology, including microbiology and human physiology 14 s.h.

Applicants must have a cumulative g.p.a. of at least 2.50 both overall and in science. Those who enter the program as undergraduate students must meet the admission requirements of the College of Liberal Arts and Sciences (contact the Office of Admissions). Students who have sophomore or higher standing, have taken some college biology and chemistry, and have a cumulative g.p.a. of at least 3.00 are eligible for early admission and may apply at any time during the year. Deadline for early admission decisions is October 15. Applications are accepted until the class is filled.

Students should consult with a Clinical Laboratory Sciences Program adviser as early as possible to plan preclinical studies that meet all requirements.

**Expenses**

The Clinical Laboratory Science Program provides laboratory coats and equipment for students in the professional-year curriculum. Students are responsible for buying textbooks and paying University tuition and student fees.

Students enrolled at The University of Iowa who intend to receive a B.S. in clinical laboratory science at the end of the professional year pay full-time University tuition and fees.

Students who are seeking only a Certificate in Clinical Laboratory Science may pay reduced tuition and fees. Contact the Clinical Laboratory Science Program for information. To enroll only in the certificate program, students must hold a baccalaureate degree from an accredited institution of higher education or be enrolled at an affiliated institution that will grant the baccalaureate degree at the completion of the clinical laboratory science certificate program.
The Nuclear Medicine Technology Program is one of five academic units in the Division of Associated Medical Sciences. It is sponsored by the Carver College of Medicine, the College of Liberal Arts and Sciences, and University of Iowa Hospitals and Clinics. For information on the division's general academic policies, see Associated Medical Sciences in the Catalog.

Nuclear medicine technology is a medical specialty that uses radioactive tracers for diagnostic, therapeutic, and research purposes. Nuclear medicine technologists generally are employed in hospitals and clinics. They work hand-in-hand with nuclear medicine physicians, health physicists, radiopharmacists, and radiochemists as an integral part of a highly trained specialty team.

At the heart of nuclear medicine technology is the use of sophisticated detectors and computers to trace the movement and localization of radioactive tracers in the human body. Other basic job responsibilities may include radiation safety; quality control; radiopharmaceutical preparation and administration; and general patient care.

The Nuclear Medicine Technology Program at The University of Iowa is fully accredited by the Joint Review Committee on Educational Programs in Nuclear Medical Technology (JRCNMT). Fulfillment of the requirements established by the JRCNMT Accreditation Board involves three years of preclinical work in the College of Liberal Arts and Sciences and the Carver College of Medicine, and a minimum of 12 months of professional clinical experience, available at University of Iowa Hospitals and Clinics and the Veterans Affairs Iowa City Health Care System.

Upon satisfactory completion of the four-year program, students receive a Bachelor of Science from the Carver College of Medicine and a certificate of training. Graduates are eligible for national certification as nuclear medicine technologists.

The required courses in the first and sophomore years emphasize the physical and biological sciences, which provide a basic background for further development in the junior year.

Applicants are strongly advised to pursue a course of study that is applicable to a baccalaureate degree, most commonly in biology, chemistry, biochemistry, or microbiology. In this way, students who are not admitted to the Nuclear Medicine Technology Program can complete a degree in their chosen area.

The following are recommended courses.

Advanced courses in chemistry, biology, or physics based on alternative major,
possible minors, interest, and career goals

SENIOR YEAR

The curriculum of the clinical year is organized in accordance with the JRCNMT Essentials of an Accredited Educational Program in Nuclear Medicine Technology. Courses are taught in the following areas: radiopharmacy, radiobiology, radiation safety, patient care, medical terminology, anatomic and physiologic bases of nuclear medicine procedures, physics and instrumentation, administration and management, medical and professional ethics, mathematics and statistics of nuclear medicine, and computer applications in nuclear medicine. Clinical rotations focus on nuclear imaging, clinical radiopharmacy, computer applications, and quantification of radioactivity in vivo and in vitro.

The clinical year consists of these courses.

- 074:101 Principles of Nuclear Medicine I 6 s.h.
- 074:102 Introductory Clinical Nuclear Medicine 6 s.h.
- 074:103 Principles of Nuclear Medicine II 6 s.h.
- 074:104 Intermediate Clinical Nuclear Medicine 3 s.h.
- 074:105 Advanced Clinical Nuclear Medicine 9 s.h.
- 074:106 6 s.h.

For course descriptions, see Radiology in the Catalog.

Admission

Prerequisites for admission to the Nuclear Medicine Technology Program include the following:

- a minimum of 94 s.h. of college credit, with a cumulative g.p.a. of at least 2.50;
- completion of the College of Liberal Arts and Sciences General Education Program components in rhetoric, foreign language, interpretation of literature, humanities, historical perspectives, quantitative or formal reasoning, social sciences (sociology and psychology are recommended), and distributed general education;
- a minimum of 20 s.h. in three science areas, including a complete introductory course with laboratory in chemistry, physics, and biology; and
- a minimum of 3 s.h. in mathematics, including at least elementary functions.

Fulfillment of these basic admission requirements does not guarantee acceptance into the Nuclear Medicine Technology Program.

A new class begins every August. Application deadline is February 1. Personal interviews are scheduled in February, and the class is selected by March 15. Class size is limited to 10 students. Prospective students are encouraged to consult the Nuclear Medicine Technology Program office to plan an appropriate preprofessional program.
The Physical Therapy and Rehabilitation Science Program is one of five academic units in the Division of Associated Medical Sciences. For information on the division’s general academic policies, see Associated Medical Sciences in the Catalog.

Physical therapists provide services to patients and clients who have impairments, functional limitations, disabilities, pain, or changes in physical function resulting from injury, disease, or other causes. Physical therapists practice and collaborate with a variety of health professionals. In the area of health promotion and wellness, they provide screening examinations, prescribe fitness programs, and educate the public regarding healthy lifestyles. Research, teaching, consultation, and administration also are parts of a physical therapist’s professional role.

A wide variety of opportunities exist for professional practice in inpatient, outpatient, and community-based settings. Examples include practice in general or specialized hospitals, programs for children with disabilities, private physical therapy clinics, extended care facilities, nursing homes, community and governmental agencies, rehabilitation centers, the armed forces, foreign service, home health agencies, school systems, fitness centers, and athletic facilities. Research and teaching careers in academic institutions are available for those who earn a Ph.D. in rehabilitation science.

The Physical Therapy and Rehabilitation Science Program is located in the Carver College of Medicine on the University of Iowa Health Sciences Campus, which includes University of Iowa Hospitals and Clinics, one of the nation’s largest university-owned teaching hospitals. The program has seven state-of-the-art independent research laboratories and is well equipped for classroom and laboratory instruction and innovative research. Students have access to faculty members in the basic sciences and medicine, basic sciences courses, clinical specialty expertise, and innovative learning experiences associated with a medical college environment. Students have access to faculty members in the basic sciences and medicine, basic sciences courses, clinical specialty expertise, and innovative learning experiences associated with a medical college environment.

**Graduate Programs**

The Physical Therapy and Rehabilitation Science Program offers three graduate degrees: Doctor of Physical Therapy (the entry-level professional degree), Master of Arts in physical therapy, and Doctor of Philosophy in physical rehabilitation science. The D.P.T. program admits 36 students each year. Around 25 physical therapists pursuing advanced research training enroll in the M.A. and Ph.D. programs each year.

Applicants for admission to University of Iowa graduate degree programs must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

**Doctor of Physical Therapy**

The Doctor of Physical Therapy (D.P.T.) professional program is fully accredited by the Commission on Accreditation in Physical
Therapy Education. Satisfactory completion of the professional program qualifies candidates to take the National Physical Therapy Examination for licensure to practice. The minimum passing score on the exam is the same in all jurisdictions.

Technical Standards for Graduation

Doctor of Physical Therapy graduates must possess and demonstrate the physical and cognitive skills and character attributes required to provide physical therapy services in a broad variety of clinical situations and environments. All D.P.T. candidates must perform, with or without reasonable accommodation, the following skills safely, effectively, efficiently, and in compliance with the legal and ethical standards set by the American Physical Therapy Association Code of Ethics and Standards of Practice.

- communicate effectively through appropriate verbal, nonverbal, and written communication with patients, families, and others;
- demonstrate ability to apply universal precautions;
- use appropriate tests and measures in order to perform a physical therapy examination;
- demonstrate the ability to reach diagnostic and therapeutic judgments through analysis and synthesis of data gathered during patient/client examination in order to develop an appropriate plan of care;
- perform fully, or in a reasonably independent manner, physical therapy interventions appropriate to the patient's status and desired goals;
- apply teaching/learning theories and methods in health care and community environments;
- accept criticism and respond by appropriate behavior modification;
- possess the perseverance, diligence, and consistency to complete the physical therapy curriculum and enter the practice of physical therapy.

Applicants with health conditions or disabilities who need accommodation to meet the technical standards for graduation should contact the University's Student Disability Services office.

Requirements

The D.P.T. requires a minimum of 102 s.h. and is completed in two and a half years. The following courses are required.

**Admission**

Applicants must meet the admission requirements of the Graduate College. They must have completed a baccalaureate degree from an accredited institution in the United States, or anticipate completing the degree before enrolling in the D.P.T. program. They must have a cumulative g.p.a. of at least 3.00 and must have completed the following prerequisite coursework, preferably with a g.p.a. of at least 3.00. All science courses must include the appropriate laboratory instruction. The prerequisite courses must have been taken for a letter grade.

**Biological sciences:** a complete introductory course in principles of general biology or zoology, and advanced course work in biology or zoology (for which an introductory course is prerequisite) equivalent to 12 s.h.

**Physics:** a complete introductory course equivalent to 8 s.h.

**Chemistry:** a complete introductory course equivalent to 8 s.h.

**Physiology:** a systemic human physiology course equivalent to 3 s.h.

**Psychology:** courses equivalent to 6 s.h.

**Mathematics:** a college-level mathematics course, at the level of trigonometry or higher, equivalent to 3 s.h.

**Statistics:** a college-level statistics course equivalent to 3 s.h.

Applicants must have a combined verbal and quantitative score of at least 1000 on the Graduate Record Examination (GRE) General Test. They must take the test early enough for their scores to be received by the University in time for the December 1 application deadline.

Applications must include three letters of recommendation, which should be sent to the Physical Therapy and Rehabilitation Science Program.

Personal interviews are required of applicants selected for consideration by the admissions committee. Interviews are conducted at The University of Iowa. The physical therapy admissions committee selects applicants who appear to be best qualified for the study and practice of the profession. Preference is given to Iowa residents.

Applications are accepted from September 1 to December 1 for entry the following summer. Prospective students should apply as early as possible.

**EARLY ADMISSION**

Applicants whose Graduate Record Exam scores and grade-point average meet a certain standard may be considered for early admission; a combined verbal and quantitative score of 1100 or higher on the GRE General Test and a cumulative g.p.a. of at least 3.75 are preferred. Application materials are the same as those for regular admission. The application deadline is October 1; applicants are notified by December 1. Applicants interviewed but not selected for early admission join the group of applicants the admission committee has chosen to consider for regular admission.

**Background Checks**

A criminal background check is required for all applicants who are recommended for admission. Drug screening is required for clinical rotations.

**Expenses**

Applicants admitted to the D.P.T. program must make an advance tuition payment of $300, which is forfeited if the applicant does not enroll. In addition to paying University tuition and fees, students are responsible for purchasing uniforms, patient evaluation kits, and course syllabi.

All students are required to comply with the pre-entry and periodic health screening program developed by Student Health Service in cooperation with University of Iowa Hospitals and Clinics. Students must pay for the health
screens. Students also are required to have health insurance.

**M.A. in Physical Therapy**

The Master of Arts in physical therapy is designed for individuals who are interested in pursuing a Ph.D. in physical rehabilitation science but who do not have a master's degree. It emphasizes research and teaching in three core areas: cardiopulmonary, musculoskeletal, and neuromuscular. The program focuses on developing strong laboratory skills and theoretical knowledge related to the rehabilitation sciences.

Students have access to the program's rehabilitation research laboratories, which are equipped with electromechanical systems and computers for measurement and analysis of cardiopulmonary responses (heart rate, blood pressure, energy cost, and ventilation), musculoskeletal function in normal, sport, and occupational activities (muscle strength and function, kinetics, and kinematics), and neuromuscular and skeletal function (electromyography, spinal reflexes, muscle fatigue, neurophysiology of pain, and CNS control mechanisms). All specialty areas include measures of quality of life outcome related to disability. Use of laboratories outside the program may also be arranged.

Collaborative studies are encouraged with other departments, such as neurology, internal medicine, occupational and environmental health, pediatrics, orthopaedics and rehabilitation, physiology and biophysics, anatomy and cell biology, engineering, and pharmacology, and with personnel in the rehabilitation therapies clinics.

Students who successfully complete the M.A. program in physical therapy possess:

- theoretical and scientific knowledge required to do basic, applied, or clinical-level research that leads to scientific presentations;
- breadth of knowledge in the cardiopulmonary, musculoskeletal, or neuromuscular specialty areas as they relate to impairment, functional limitation, and disability; and
- practical skills required for college or university teaching at the professional entry level.

**Requirements**

The M.A. in physical therapy requires a minimum of 30 s.h. beyond the baccalaureate. Completion of basic professional physical therapy education is prerequisite. Clinical experience is recommended.

Course requirements for the M.A. are consistent with many of those for the Ph.D. in physical rehabilitation science.

The curriculum is as follows.

**CORE REQUIREMENTS**

101:212 Biomedical Instrumentation and Measurement 4 s.h.
101:220 Seminar in Rehabilitation Science 2 s.h.
101:280 Teaching Practicum 1 s.h.
101:301 Thesis: Rehabilitation Science (may be taken pass/fail) 4 s.h.
171:161 Introduction to Biostatistics 3 s.h.
171:162 Design and Analysis of Biomedical Studies 3 s.h.

**SCIENTIFIC CONTENT CORE AND SPECIALTY FOCUS REQUIREMENTS**

Students take one first-level course from each of the three specialty areas and one second-level course in their identified specialty area (courses outside the department may be substituted when appropriate, with the adviser and course instructor's approval).

**Cardiopulmonary**

First-level courses:
027:141 Exercise Physiology 3 s.h.
101:206 Cardiopulmonary Therapeutics (with lab) 3 s.h.

Second-level course:
101:260 Advanced Health Promotion and Cardiopulmonary Therapeutics 3 s.h.

**Musculoskeletal**

First-level courses:
027:197 Biomechanics of Human Motion 4 s.h.
101:210 Kinesiology and Pathomechanics (with lab) 4 s.h.

Second-level courses:
027:155 Skeletal Muscle Biology 3 s.h.
101:285 Biomechanical Analysis in Rehabilitation 3 s.h.
175:190 Occupational Ergonomics I 3 s.h.
175:294 Occupational Ergonomics II 3 s.h.
175:295 Clinical Ergonomics 3 s.h.

**Neuromuscular**

First-level courses:
027:197 Biomechanics of Human Motion 4 s.h.
101:210 Kinesiology and Pathomechanics (with lab) 4 s.h.

Second-level courses:
101:285 Biomechanical Analysis in Rehabilitation 3 s.h.
175:190 Occupational Ergonomics I 3 s.h.
175:294 Occupational Ergonomics II 3 s.h.
175:295 Clinical Ergonomics 3 s.h.
Second-level courses:
- 027:155 Skeletal Muscle Biology 3 s.h.
- 027:197 Biomechanics of Human Motion 4 s.h.
- 027:314 Seminar in Motor Control 2 s.h.
- 071:207 Neuropharmacology 3 s.h.
- 101:275 Analysis of Sensori-Motor Systems in Health and Disease 3 s.h.
- 101:277 Mechanisms of Pain Transmission 3 s.h.
- 101:295 Applied Electromyography 3 s.h.
- 132:180 Fundamental Neuroscience 4 s.h.

ELECTIVES
The requirement varies.

Admission
Applicants must meet the requirements of the Graduate College. They must be graduates of an approved physical therapy professional program and must have a cumulative undergraduate g.p.a. of at least 3.00. Clinical experience is not required, but it often helps students establish their research focus.

International applicants whose first language is not English must score at least 600 (paper-based) or 250 (computer-based) on the Test of English as a Foreign Language (TOEFL).

Application materials must include a completed Graduate College application form, test scores, transcripts, three letters of recommendation, and a statement of purpose. Completed applications should be sent to the Physical Therapy and Rehabilitation Science Program.

Personal interviews are required of applicants selected for consideration by the admissions committee. On-campus interviews are preferred, but telephone interviews may be substituted when necessary.

Application deadlines are October 15 for spring semester entry (notification by December 15); March 15 for summer entry (notification by May 15); and May 15 for fall semester entry (notification by July 15).

Ph.D. in Physical Rehabilitation Science
The Doctor of Philosophy in physical rehabilitation science is designed to advance the student’s ability to independently develop and carry out research that establishes the scientific basis for prevention, evaluation, and treatment of impairments, functional limitations, and disability. The curriculum is flexible enough to accommodate research focusing on basic, applied, or clinical studies in the rehabilitation sciences. Students have access to the program’s research laboratories (see “Research Facilities” later in this section).

Graduates who complete the program are prepared for academic appointments that emphasize research, scholarship, and teaching. They possess:

- theoretical and scientific knowledge to perform basic, applied, or clinical-level original research that leads to scientific presentations, publication in peer-reviewed journals, and competition for extramural funding through scientific grant writing;
- breadth of knowledge in the cardiopulmonary, musculoskeletal, or neuromuscular specialty areas as they relate to impairment, functional limitation, and disability; and
- theoretical and practical skills required for college or university teaching at the professional entry and advanced graduate levels.

Requirements
The Ph.D. requires a minimum of 72 s.h. beyond the baccalaureate. Each student and his or her faculty adviser develop an individualized study plan. A preliminary study plan is developed within the first 9 s.h. of graduate study; a final plan is submitted to the Graduate College when the Ph.D. comprehensive examination is scheduled.

To ensure breadth of knowledge, all students complete specific scientific area core courses. Each student also must take a minimum of 20 s.h., excluding research, in his or her defined specialty area. Elective courses are selected to provide in-depth study of the specialty; they are complemented by an advanced seminar course specific to the student’s specialty and taken in preparation for the comprehensive examination. Other requirements include specific core tools and practicum courses, which provide background knowledge and skill acquisition for research and teaching.

Students must satisfactorily complete the comprehensive examinations, which are taken after all required course work is completed. Doctoral study culminates with 12 s.h. of thesis research and an oral examination.

Many Ph.D. course requirements are consistent with those for the M.A. in physical therapy. The following semester-hour requirements include master’s degree prerequisites.
GENERAL CORE REQUIREMENTS

The requirement is 41 s.h. beyond the baccalaureate.

101:212 Biomedical Instrumentation and Measurement 4 s.h.
101:220 Seminar in Rehabilitation Science 4 s.h.

Two approved courses in statistics (prerequisite to master's-level course work):

22S:102 Introduction to Statistical Methods and 22S:148 Intermediate Statistical Methods 7 s.h.
or
171:161 & 171:162 Introduction to Biostatistics, Design and Analysis of Biomedical Sciences 6 s.h.

07P:385 Teaching and Learning in Higher Education (or an equivalent approved teaching methods course) 3 s.h.
101:280 Teaching Practicum 3 s.h.

Research requirements (all of these, total of 10 s.h.):

101:284 Practicum in Research arr.
101:325 Independent Study arr.
101:327 Research in Rehabilitation Science arr.

Both of these:

101:301 Thesis: Rehabilitation Science (Ph.D.) (thesis proposal must be approved before data are collected) 12 s.h.
101:326 Scientific Writing in Rehabilitation Science 3 s.h.

SCIENTIFIC CONTENT CORE AND SPECIALTY FOCUS REQUIREMENTS

Students take one first-level course from each of the three specialty areas, and one second-level course from two of the three specialty areas (courses outside the department may be substituted when appropriate, with the adviser’s consent). Specialty focus courses include

101:214 Advanced Seminar in Rehabilitation Science (a specialty-oriented seminar taken in preparation for the Ph.D. comprehensive exam) and elective specialty courses to provide at least 20 s.h. in the student’s specialty area.

The requirement is 29-32 s.h.

Cardiopulmonary

First-level courses:
027:141 Exercise Physiology 3 s.h.
101:206 Cardiopulmonary Therapeutics (with lab) 3 s.h.

Second-level course:
101:260 Advanced Health Promotion and Cardiopulmonary Therapeutics 3 s.h.

An advanced exercise physiology laboratory (respiratory and cardiovascular)

Specialty focus courses:
101:214 Advanced Seminar in Rehabilitation Science 3 s.h.

Elective specialty courses 10 s.h.

Musculoskeletal

First-level courses:
027:197 Biomechanics of Human Motion 4 s.h.
101:210 Kinesiology and Pathomechanics (with lab) 4 s.h.

Second-level courses:
027:155 Skeletal Muscle Biology 3 s.h.
101:285 Biomechanical Analysis in Rehabilitation 3 s.h.
175:190 Occupational Ergonomics I 3 s.h.
175:294 Occupational Ergonomics II 3 s.h.
175:295 Clinical Ergonomics 3 s.h.

Specialty focus courses:
101:214 Advanced Seminar in Rehabilitation Science 3 s.h.

Elective specialty courses 9-11 s.h.

Neuromuscular

First-level courses:
027:160 Motor Control I: Neurophysiological Basis 3 s.h.
101:224 Principles of Motor Control (required for the master's degree) 4 s.h.

Second-level courses:
027:155 Skeletal Muscle Biology 3 s.h.
027:314 Seminar in Motor Control 2 s.h.
060:234 Medical Neuroscience 4 s.h.
071:207 Neuropharmacology 3 s.h.
101:275 Analysis of Sensori-Motor Systems in Health and Disease 3 s.h.
101:277 Mechanisms of Pain Transmission 3 s.h.
101:295 Applied Electromyography 3 s.h.
132:180 Fundamental Neuroscience 4 s.h.

Specialty focus courses:
027:197 Biomechanics of Human Motion 4 s.h.
101:214 Advanced Seminar in Rehabilitation Science 3 s.h.

Elective specialty courses 11 s.h.

ELECTIVES

The requirement varies.
Admission

Applicants must meet the requirements of the Graduate College. They should have a cumulative g.p.a. of at least 3.00 on master’s degree work and a combined verbal and quantitative score of at least 1100 on the Graduate Record Exam (GRE) General Test. A minimum of two years of clinical experience is highly desirable.

International applicants whose first language is not English must score at least 600 (paper-based) or 250 (computer-based) on the Test of English as a Foreign Language (TOEFL).

Application materials must include a complete Graduate College application form, test scores, transcripts, three letters of recommendation, and a statement of purpose. Completed applications should be sent to the Physical Therapy and Rehabilitation Science Program.

Personal interviews are required of all applicants selected for consideration by the admissions committee. On-campus interviews are preferred, but telephone interviews may be substituted when necessary.

Application deadlines are October 15 for spring semester entry (notification by December 15); March 15 for summer entry (notification by May 15); and May 15 for fall semester entry (notification by July 15).

Financial Support

A number of teaching and research assistantships are available for M.A. and Ph.D. students. Faculty advisers provide guidance for students seeking external scholarship support through foundations and federal programs that support Ph.D. training.

Research Facilities

The program’s state-of-the-art research facilities include the Orthopedic Gait Analysis Laboratory and a spinal cord research laboratory at University Hospitals and Clinics; the Neuromuscular Research/Motor Control Laboratory; the Cardiopulmonary Research Laboratory; the Musculoskeletal Biomechanics and Sports Medicine Research Laboratory; the Neuropsychology of Pain Laboratory; and an ergonomics laboratory. Use of other laboratories may be arranged.

Courses

101:110 Physical Therapy Management and Administration I 2 s.h.
The changing U.S. health care system; access to physical therapy services, reimbursement to health care providers, mechanisms for controlling costs while providing quality care; clinical vignettes, small group–problem solving.

101:120 Professional Issues and Ethics 1 s.h.
Evolution of physical therapy and rehabilitation science as a profession; contemporary issues in education and practice; ethical theory and approaches to analyzing and acting on ethical problems; professional and peer relationships.

101:121 Physical Therapy Management and Administration II 1 s.h.
Principles of management in physical therapy practice; historical perspective, current health care environments; business principles; marketing, managing risk, medical/legal concerns, preparing for the future.

101:122 Psychosocial Aspects of Patient Care 1 s.h.
Emotional reactions to disability, psychosocial aspects of disability as they relate to patient–physical therapist interaction; specific problems of the angry, non-compliant, or chronic-pain patient; complementary roles of other health professionals; cultural competence in professional behavior and patient treatment; importance of holistic health care.

101:131 Therapeutic Physical Agents arr.
Theoretical and practical applications for safe, effective use of physical agents (superficial and deep heat, cold, hydrotherapy), electrotherapeutic modalities (biofeedback, NMES, TENS, ioniophoresis); massage and soft tissue mobilization; emphasis on problem solving, clinical decision making. Prerequisite: Physical Therapy and Rehabilitation Science Program enrollment.

101:133 Pain Mechanisms and Treatment 2 s.h.
Introduction to basic science mechanisms, assessment, and management of pain; basic science mechanisms involved in transmission and perception of painful stimuli after tissue injury, assessment and physical therapy management of pain; emphasis on scientific principles and published literature to support treatment techniques. Prerequisite: Physical Therapy and Rehabilitation Science Program enrollment.

101:134 Physical Therapy Management of the Integumentary System 2 s.h.
Overview of physical therapy examination and management of the integumentary system; wound pathology, diagnosis associated with the integumentary system, inflammation and repair, examination and reexamination techniques, documentation, clinical decision making, lecture and laboratory formats; interventions, including patient/client information, physical agents, electrotherapy, wound dressing. Prerequisite: Physical Therapy and Rehabilitation Science Program enrollment.

101:140 Introduction to Physical Therapy Practice 2 s.h.
Lectures, case presentations, and group activities using the Guide to Physical Therapist Practice; elements of the patient/client management model, concepts of the disablement model, preferred practice patterns as applied in clinical problems; importance of professionalism, professional socialization; introduction to evidence-based practice; competence in medical terminology.

101:141 Principles of Physical Therapy I 2 s.h.
Patient management skills: documentation, basic assessment, preambulatory activities, joint range of motion, strength assessment, patient transfers, gait assessment and training, negotiation of architectural barriers.

101:142 Principles of Physical Therapy II 2 s.h.
Continuation of 101:141; expansion of previously learned skills; new skills in documentation, assessment of joint range of
Physical Therapy and Rehabilitation Science

101:143 Selected Topics in Physical Therapy Practice 2 s.h.
Specialty topics in physical therapy, such as women’s health, aquatic therapy, patient care across the lifespan, alternative or new treatments, guest lectures, lab component. Prerequisite: Physical Therapy and Rehabilitation Science Program enrollment.

101:151 Progressive Functional Exercise 2 s.h.
Therapeutic exercise options (e.g., isometrics, isotonic, isokinetics, plyometrics, endurance exercises, stretching exercises) and training principles, application to functional activities, including those of daily living, work, recreation, and sport; laboratory component. Prerequisite: Physical Therapy and Rehabilitation Science Program enrollment.

101:170 Prosthetics and Orthotics 2 s.h.
Physical therapy management and assessment of patients in need of prosthetic and orthotic devices; principles and components of prosthetic and orthotic design and use.

101:172 Radiology/Imaging for Physical Therapists 2 s.h.
Principles, procedures, and interpretation of selected diagnostic imaging techniques; plain film radiology, myelograms, CT scans, medical resonance imaging; lecture laboratory format with small group clinical case presentations.

101:173 Differential Diagnosis in Physical Therapy 2 s.h.
The use of physical therapy examination and evaluation skills to diagnose physical therapy problems; focus on use of good clinical decision-making skills when analyzing a patient’s history and administering physical therapy tests and measures to confirm or rule out differential diagnoses; components of the medical examination; importance of collaboration between therapists and other health professionals; clinical case studies presented by clinical experts.

101:176 Pharmacology for Physical Therapists 3 s.h.
Contemporary pharmacology: overview of basic pharmacokinetic and pharmacodynamic principles; relation of drug therapy to therapeutic interventions provided by physical therapists; small group clinical case presentations.

101:185 Musculoskeletal Therapeutics I 3 s.h.
Musculoskeletal techniques and biomechanical principles applied to assessment and evaluation of common orthopedic problems of the spine; problem solving, case-study approach to clinical methods, skill acquisition.

101:189 Clinical Education I 1 s.h.
Integrated clinical experiences in area physical therapy clinics; overview of the diverse nature of practice through half- or full-day experience; basic skills in examination, intervention, documentation.

101:190 Clinical Education II 1 s.h.
Continuation of 101:189; integrated half-day clinical experiences. Prerequisite: 101:189.

101:191 Clinical Education III 1 s.h.
Two-week, full-time clinical experience in physical therapy clinics in Iowa, under the guidance of physical therapists. Prerequisite: 101:190.

101:192 Clinical Education IV 1 s.h.
Continuation of 101:191; theory and practice of physical therapy procedures, development of competence in basic skills through two-week, full-time clinical experience.

101:194 Clinical Internship 1 s.h.
Full-time clinical education divided among varied settings; development of competence in independent examination, evaluation, and treatment of patients under supervision of clinical faculty.

101:200 Pediatric Physical Therapy arr.
Preparation for physical therapy practice in pediatric settings using interdisciplinary family-centered practice, normal and abnormal development, standardized assessment, service-delivery settings, interventions, management strategies specific to pediatrics.

101:201 Applied Clinical Medicine 2 s.h.
Pathological disorders frequently encountered by physical therapists in clinical practice, addressed by physicians and health professionals who are not physical therapists; physical therapy management.

101:202 Musculoskeletal Therapeutics II 3 s.h.
Pathology, assessment, management of orthopedic disorders of the upper quarter; problem-solving approach to evaluation and management of patients with musculoskeletal conditions.

101:203 Musculoskeletal Therapeutics III 4 s.h.
Pathology, assessment, management of orthopedic disorders of the lower quarter; problem-solving approach to evaluation and management of patients with musculoskeletal conditions.

101:205 Health Promotion and Wellness 3 s.h.
Overview of health promotion, fitness, and wellness strategies, with background information on applied physiology (energy metabolism and physiological responses to exercise), exercise testing and training guidelines, body composition assessment, diet, body weight management; laboratories, development of individual weight management and exercise training programs.

101:206 Cardiopulmonary Therapeutics 3 s.h.
Cardiorespiratory anatomy, physiology, and application of basic concepts, techniques in management of patients with acute and chronic cardiac, pulmonary disorders; laboratories.

101:209 Surface Anatomy 1 s.h.
Laboratory teaching activities that parallel the human anatomy course; observation, palpation, and problem solving skills; upper- and lower-limb, head and neck, thorax, and abdomen.

101:210 Kinesiology and Pathomechanics 4 s.h.
Normal and pathological movement based on understanding of muscle mechanics, segment and joint mechanics, muscle function, instructor and student-centered learning experiences; EMG laboratories.

101:212 Biomedical Instrumentation and Measurement 4 s.h.
Introduction to biomedical instrumentation and measurement, with focus on understanding sources of error and noise in biomedical research applications; basic circuit analysis, calibration of measurement tools, A/D conversion, digital filtering, lab components. Offered fall semesters of even years.

101:214 Advanced Seminar in Rehabilitation Science arr.
Current status of research for biological, mechanical, psychological components pertinent to cardiopulmonary, musculoskeletal, neuromuscular areas of rehabilitation science; preparation for comprehensive exam.

101:220 Seminar in Rehabilitation Science arr.
Seminar and journal club. Three consecutive enrollments required.

101:224 Principles of Motor Control 4 s.h.
Sensomotor mechanisms involved with normal and abnormal neuromuscular systems function; skeletal muscle properties/plasticity, muscle fatigue, neural mechanisms of muscle strengthening, spinal circuitry, simple and complex reflexes, spasticity, rigidity, posture control/balance, motor learning, applied neurological assessment of pathological conditions, such as stroke, SCI. Prerequisite: Physical Therapy and Rehabilitation Science Program enrollment.

101:225 Neuromuscular Therapeutics 3 s.h.
Techniques used in evaluation, treatment of persons with nervous system dysfunction, methods of identifying and scientific rationale for abnormal sensomotor activity and movement; normal,
abnormal motor development; techniques used to provide comprehensive institutional and home rehabilitation programs for conditions such as stroke, traumatic brain injury, multiple sclerosis, Parkinson’s disease, cerebral palsy, vestibular disorders, spinal cord injury. Prerequisite: 101:224.

101:235 Case-Based Learning I 1 s.h.
Small-group seminars and simulated patient-instructor clinical assessment labs; two clinical cases per semester; clinical problems coordinated with concurrent course work; student-centered, problem-based learning format with emphasis on evidence-based practice objectives. First in a four-course sequence.

101:236 Case-Based Learning II 1 s.h.
Small-group seminars and simulated patient-instructor clinical assessment labs; two clinical cases per semester; clinical problems coordinated with concurrent course work; student-centered, problem-based learning format with emphasis on evidence-based practice objectives. Second in a four-course sequence. Prerequisite: 101:235.

101:237 Case-Based Learning III 1 s.h.
Small-group seminars and simulated patient-instructor clinical assessment labs; two clinical cases per semester; clinical problems coordinated with concurrent course work; student-centered, problem-based learning format with emphasis on evidence-based practice objectives. Third in a four-course sequence. Prerequisite: 101:236.

101:238 Case-Based Learning IV 1 s.h.
Small-group seminars and simulated patient-instructor clinical assessment labs; two clinical cases per semester; clinical problems coordinated with concurrent course work; student-centered, problem-based learning format with emphasis on evidence-based practice objectives. Fourth in a four-course sequence. Prerequisite: Physical Therapy and Rehabilitation Science Program enrollment.

101:248 Research in Physical Therapy 2 s.h.
Topics relevant to the research process and concepts of the scientific method, including identification and development of research questions, research ethics, review of literature, research designs, statistical methods, presentation of research findings, critique of literature, focus on becoming informed, critical consumers of literature relevant to physical therapy. Prerequisite: Physical Therapy and Rehabilitation Science Program enrollment.

101:251 Critical Inquiry in Physical Therapy I 2 s.h.
Introduction to evidence-based practice tools, such as rehabilitation databases, methods to sort and analyze health care research outcomes, applications to clinical practice and decision making. Prerequisite: Physical Therapy and Rehabilitation Science Program enrollment.

101:252 Critical Inquiry in Physical Therapy II 1 s.h.
Prerequisite: Physical Therapy and Rehabilitation Science Program enrollment.

101:260 Advanced Health Promotion and Cardiopulmonary Therapeutics arr.
Anatomical, physiological principles applied to health care continuum, including wellness programs, cardiac and pulmonary rehabilitation; emphasis on body composition and weight control, exercise and cardiorespiratory adaptations to training, laboratories. Offered spring semesters.

Neuromotor mechanisms underlying posture, movement in normal and pathologic conditions; systems approach to neuromuscular system function, including skeletal muscle plasticity, muscle fatigue, neurological adaptations to strengthening, spinal circuitry, complex reflexes, spasticity, rigidity, posture/balance, motor learning; specific applications to CNS disease states (SCI, stroke, degenerative diseases). Offered fall semesters. Prerequisite: consent of instructor.
Physician Assistant Program

Director: David P. Asprey
Medical director: Daniel Fick
Assistant director: Richard W. Dehn
Director of curriculum and evaluation: Theresa Hegmann
Director of clinical education: Anthony Brenneman
Professor emeritus: Denis Oliver
Clinical professor: Richard W. Dehn
Associate professor: David P. Asprey
Assistant professors (clinical): Anthony Brenneman, Theresa Hegmann
Graduate degree: M.P.A.S.
Web site: http://www.medicine.uiowa.edu/pa/pa.htm

The Physician Assistant Program is one of five academic units in the Division of Associated Medical Sciences. For information on the division's general academic policies, see Associated Medical Sciences in the Catalog.

The physician assistant profession is one of the newest and most exciting in health care. Physician assistants (PAs) are licensed to practice medicine with physician supervision. They are responsible for making medical decisions and providing a broad range of diagnostic and therapeutic services.

Physician assistants work in a variety of settings, including medical offices, hospital emergency rooms, nursing homes, rural satellite clinics, health maintenance organizations, and patients' homes.

In the traditional office setting, PAs see patients, obtain histories, perform physical examinations, and order necessary laboratory and/or radiological studies. Based on this information, the PA establishes a diagnosis, develops an appropriate management plan, and initiates treatment that may include prescribing medications. The physician is consulted as needed and remains ultimately responsible for the care provided by the physician/PA team. PAs also are involved in both patient and community health education.

The Physician Assistant Program at The University of Iowa is accredited by the Accreditation Review Commission on Education for the Physician Assistant, Inc., and is a member of the Association of the Physician Assistant Programs. Students who complete the program are granted the Master of Physician Assistant Studies (M.P.A.S.). They are eligible to take the National Certifying Examination for Primary Care Physician Assistants, which they must complete successfully in order to register as a physician assistant in Iowa.

The Physician Assistant Program emphasizes primary care medicine, family medicine in particular. It also offers elective clinical rotations in selected medical subspecialties.

Master of Physician Assistant Studies

The M.P.A.S. requires a minimum of 106 s.h. The curriculum spans 25 months and is divided into two phases: didactic and clinical. Both phases emphasize primary health care delivery and the physician assistant’s role as a member of the health care team. The program is integrated with teaching at the Carver College of Medicine, permitting interdisciplinary activities between Doctor of Medicine and health care professions students. Physician assistant students complete approximately 65 percent of the curriculum’s didactic phase with second-year M.D. students.

The first phase is conducted on the University’s Health Sciences Campus. It begins in late May with seven months of course work in a number of basic science areas, including anatomy, biochemistry, infectious disease, pathology, pharmacology, and physiology. Whenever appropriate, related subjects are integrated to provide sequential lecture and laboratory experience. This session also includes courses in clinical decision making and an introductory course on taking a medical history and performing a physical examination.

The program’s patient assessment curriculum couples a sequence of didactic instruction with practical experiences involving simulated and real patients. The level and intensity of patient interactions increase throughout the curriculum as the student gains confidence and clinical competence.

The first phase continues with a five-week interim session followed by a 12-week introduction to clinical medicine for physician assistant students. In the five-week interim session, the infectious disease and pharmacology courses continue, and students take a short course in clinical pathology.
The spring semester of the first phase consists of a 12-week introduction to clinical skills for physician assistant students. Three interrelated courses focus on the application of basic science knowledge to understanding clinical-pathologic correlations of common and/or catastrophic disorders encountered in clinical medicine's major disciplines. The courses continue with instruction in obtaining a problem-oriented medical history and performing a physical examination.

Two weeks before clinical rotations begin, students complete 050:175 Foundations of Clinical Practice IV for Physician Assistant Students, which includes instruction in several skill areas (e.g., suturing, injections, prescription writing, medical orders). They also complete the Advanced Cardiac Life Support Program, a short course in rural medicine, and a seminar course, in which they research and discuss professional issues that will affect their practice as physician assistants.

The program’s second phase concentrates on clinical education. In 117:201 Clinical Decision Making III, students select a pertinent health question and apply an evidence-based medicine review of the data. They give a Power Point presentation of their findings to their colleagues, write a paper for submission to a journal, or prepare a poster presentation for a conference.

Students complete a 42-week core of required primary-care clinical rotations, including six weeks each of family medicine I, family medicine II, general internal medicine, pediatrics, and surgery; and four weeks each of emergency medicine, gynecology, and psychiatry. Students also select six-week electives, which may include geriatrics, cardiology, dermatology, and orthopedics.

The primary-care clinical rotations are designed to provide instruction and experience in caring for patients in a way that enables students to integrate the knowledge, skills, behaviors, and attitudes they learned in the program’s didactic phase. Clinical training is provided at University of Iowa Hospitals and Clinics, the Veterans Affairs Iowa City Health Care System, the Veterans Affairs Central Iowa Health Care System and Broadlawns Medical Center in Des Moines, and other affiliated hospitals throughout Iowa. In elective rotations, students gain additional clinical experience through placement with selected preceptors involved in office-based practices, typically in medically underserved rural areas.

- 117:342 Internal Medicine (Pulmonary) Elective for Physician Assistant Students
- 117:343 Internal Medicine (Hospice) Elective for Physician Assistant Students
- 117:344 Internal Medicine (Infectious Disease) Elective for Physician Assistant Students
- 117:345 Internal Medicine (Correctional Medicine) Elective for Physician Assistant Students
- 117:347 Urology Elective for Physician Assistant Students
- 117:348 Family Practice Elective for Physician Assistant Students
- 117:349 Gynecology Elective (Women’s Health) for Physician Assistant Students
- 117:350 Migrant Health Elective for Physician Assistant Students
- 117:351 Occupational Medicine Elective for Physician Assistant Students
- 117:352 Pediatrics (Neonatology) Elective for Physician Assistant Students
- 117:353 Internal Medicine (Rheumatology) for Physician Assistant Students
- 117:354 Medical Intensive Care for Physician Assistant Students

**Admission**

Applicants must meet the admission requirements of the Graduate College, see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog. Applicants must have taken the Graduate Record Examination (GRE) General Test within the last 10 years. They must hold a baccalaureate degree from an accredited institution in the United States and have a cumulative g.p.a. of at least 3.00 and a science g.p.a. of at least 3.00.

Applicants must have completed preparatory science courses in organic and inorganic chemistry, introductory animal biology or zoology, and general statistics or biostatistics. They also must have completed upper-level courses in human or animal physiology (lower-level combined anatomy/physiology courses do not satisfy this requirement); three upper-level courses in endocrinology, microbiology, histology, and/or related disciplines; and an introductory biochemistry course (combined organic/biochemistry courses do not satisfy this requirement). Courses in cell biology, cell physiology, genetics, molecular biology, neurobiology, and parasitology are recommended.

Applicants also must have at least 1,200 hours of health care experience.
The admissions committee gives special attention to applicants’ performance in science courses. Some successful applicants have had a cumulative and science g.p.a. of at least 3.70; up to 141 s.h. of college credit, including at least 81 s.h. in the sciences; and more than 3,000 hours of clinical and/or research experience.

Satisfaction of the basic admission requirements does not ensure acceptance to the program. The admissions committee selects the applicants it considers best qualified. Previous health care experience involving direct patient contact is preferred. The committee requests interviews with the most qualified applicants.

Applications are accepted from July 1 to November 15 for May entry. Each applicant must complete the Association of Physician Assistant Centralized application, which includes three letters of recommendation, GRE scores, and transcripts. The majority of prerequisite course requirements must be completed by the November 15 application deadline.

Expenses
In addition to University of Iowa tuition and fees, Physician Assistant Program students must purchase their medical uniforms and diagnostic equipment, an expense of approximately $1,700. Microscopes are not required.

Courses
117:001 Physician Assistant Clinical Second Year 0-3 s.h.

117:101 Introduction to Medical History and Physical Examination for Physician Assistant Students
Development of skills vital to taking a comprehensive medical history, psychomotor skills, and physical examination techniques necessary for conducting a comprehensive physical exam.

117:103 Clinical Decision Making I 1 s.h.
Review of basic concepts of research design and statistics as they apply to medical research literature, formation of a basis for sound, evidence-based, clinical decision making. Repeatable.

117:104 Clinical Decision Making II 1 s.h.
Core concepts of evidence-based medicine; development of the knowledge and practical skills to search the medical literature for answers to clinical questions and critically appraise the evidence found. Repeatable.

117:107 Seminar for Physician Assistant Students 1 s.h.
Professional issues that affect the physician assistant’s practice of medicine.

117:110 Introduction to Clinical Skills 1 s.h.
Suturing, injections, prescription and order writing, medical records, patient confidentiality, Iowa Law governing physician assistant practice, completion of the American Heart Association’s Advanced Cardiac Life Support Program. Prerequisite: completion of physician assistant curriculum phase I.

117:201 Clinical Decision Making III 1 s.h.
Asking appropriate clinical questions in the course of patient care; gathering information from multiple sources to answer questions.

117:210 Physician Assistant Internship Seminar 2 s.h.
Supervised experience in program administration, student advising and admissions, teaching, program and student evaluation, health professions research, opportunities for clinical practice.

117:300 Emergency Medicine for Physician Assistant Students
Arr.
Obtaining and recording pertinent historical data, obtaining indicated laboratory studies, assessing the results, arriving at a diagnosis, formulating a treatment plan, implementing appropriate therapy.

117:301 Gynecology for Physician Assistant Students 4 s.h.
Opportunity to develop proficiency in history and physical exam of gynecological patients; outpatient, family planning, gynecological cancer, concepts of diagnostic techniques and therapy.

117:302 Family Practice I for Physician Assistant Students 6 s.h.
Obtaining and recording complete history and physical exams; formulation of differential diagnosis and problem list; ordering, obtaining, and interpreting lab and diagnostic studies; implementation of therapeutic procedures and treatment plans.

117:303 Family Practice II for Physician Assistant Students 6 s.h.
Opportunity to participate in delivery of ambulatory primary care; at a different site from 117:302.

117:304 General Surgery for Physician Assistant Students 6 s.h.
Preparation for work as an assistant to the generalist; outpatient and inpatient surgical services, including surgical procedures and management of postoperative course.

117:305 Internal Medicine for Physician Assistant Students 6 s.h.
Eliciting a medical history, doing a pertinent physical exam, obtaining indicated lab studies, assessment of results, formulation of management plan and implementation of appropriate therapy for common internal medicine problems.

117:306 Pediatrics for Physician Assistant Students arr.
Knowledge and skills required for providing appropriate medical care to infants, children, and adolescents; initiation and promotion of interpersonal relationships.

117:307 Psychiatry for Physician Assistant Students 4 s.h.
Training in history and physical exams of psychiatric patients, including individual and family therapy; vocational testing and guidance, development of interviewing skills.

117:321 Dermatology Elective for Physician Assistant Students arr.
Recognizing dermatologic diseases and disorders, instituting appropriate management of patients with dermatologic problems.

117:322 Neurology Elective for Physician Assistant Students arr.
Performing general and neurological exams, establishing diagnosis, recommending lab studies, instituting appropriate management of common neurological diseases and disorders, recognizing the need for urgent treatment.

117:323 Obstetrics for Physician Assistant Students arr.
Proficiency in physical exam of OB patients, applying concepts of diagnostic techniques and therapy; following patients’ course, including labor, delivery, and postpartum care.
117:324 Ophthalmology Elective for Physician Assistant Students
Proficiency in recognizing ophthalmology problems; how to institute appropriate management of these conditions.

117:325 Otolaryngology Elective for Physician Assistant Students
Proficiency in recognizing otolaryngology problems; how to institute appropriate management of these conditions; opportunity for involvement in varied surgical procedures.

117:326 Pediatric Elective for Physician Assistant Students
Experience working with children and adolescents.

117:327 Radiology Elective for Physician Assistant Students
Properly interpret standard radiographic examinations; effectively communicate findings; and enhance patient care through consultation.

117:328 Pediatric Elective (Bone Marrow Transplant) for Physician Assistant Students
Basic knowledge and skills for diagnosis, treatment, and management of pre- and post-bone marrow transplant patients.

117:329 Pediatric (Cardiology) Elective for Physician Assistant Students
Cardiovascular assessment and problem management of pediatric patients; experience with a range of acute, chronic, common, and rare cardiology diseases.

117:330 Psychiatry Elective for Physician Assistant Students
Training in evaluation and treatment of psychiatry patients.

117:331 Surgery Elective for Physician Assistant Students
Experience in a wide range of surgical problems, procedures, and treatments, including diagnosis, care, and treatment, and postoperative courses of surgical patients.

117:332 Surgery Elective (Transplant/Organ Retrieval) for Physician Assistant Students
Extensive experience in care of patients with end-stage organ failure; evaluation of potential transplant candidates, participation in surgical procedures on transplant service.

117:333 Surgery Elective (Burn Unit) for Physician Assistant Students
Involvement in care on burn unit and in operating room; skills in burn debridement, grafting techniques, skin storage techniques, dressing changes, tub baths, and physical therapy procedures.

117:334 Surgery Elective (Cardiac Surgery) for Physician Assistant Students
Development of technical skills in operating room; essentials of preoperative evaluation and postoperative management of cardiac surgical patient.

117:335 Orthopedics and Rehabilitation Elective for Physician Assistant Students
Recognition of varied orthopedic problems and treatments; musculoskeletal diseases and disorders, both emergencies and common conditions, and how to establish appropriate management.

117:336 Internal Medicine Elective for Physician Assistant Students
Training in varied internal medicine problems; recognition, appropriate treatment.

117:337 Internal Medicine (Cardiology) Elective for Physician Assistant Students
Cardiovascular assessment and problem management; experience with a wide range of acute, chronic, common, and rare diseases.

117:338 Internal Medicine (EKG) Elective for Physician Assistant Students
Experience reading electrocardiograms, interpreting cardiac arrhythmias, performing and evaluating EKG stress tests.

117:339 Internal Medicine (Gastroenterology) Elective for Physician Assistant Students
Experience with a wide range of gastrointestinal pathology; history and physical exams of gastrointestinal diagnostic procedures, follow-up care of patients through outpatient clinics.

117:340 Internal Medicine (Oncology) Elective for Physician Assistant Students
Experience to develop diagnostic skills in clinical oncology and gain familiarity with methods of staging common cancers; assistance in therapy and outpatient management of cancer patients.

117:341 Internal Medicine (Geriatrics) Elective for Physician Assistant Students
Familiarity with broad spectrum of medical conditions among the elderly; experience in history and physical exams, diagnosis of geriatric patients along with follow-up visits.

117:342 Internal Medicine (Pulmonary) Elective for Physician Assistant Students
Development of basic clinical knowledge and skills for diagnosis, treatment, and management of pulmonary diseases.

117:343 Internal Medicine (Hospice) Elective for Physician Assistant Students
Work on a hospice care team performing evaluation, treatment, and education of patients with terminal illnesses; dealing with the prospect of death.

117:344 Internal Medicine (Infectious Disease) Elective for Physician Assistant Students
Development of basic clinical knowledge and skills for diagnosis, treatment, and management of infectious diseases.

117:345 Internal Medicine (Correctional Medicine) Elective for Physician Assistant Students
Experience with ambulatory medicine in a correctional institution; management of acute and chronic diseases, including HIV, hepatitis B&C, psychiatric conditions; focus on confidentiality, security.

117:347 Urology Elective for Physician Assistant Students
Proficiency in managing patients with urologic conditions; skill in taking a urologic history, performing physical exams, interpreting laboratory studies and data.

117:348 Family Practice Elective for Physician Assistant Students
Proficiency in delivering ambulatory primary care.

117:349 Gynecology Elective (Women’s Health) for Physician Assistant Students
Experience in annual gynecologic exams, PAP screening, gynecologic problems, contraception issues, STD screening and counseling, common gynecologic procedures.

117:350 Migrant Health Elective for Physician Assistant Students
Basic clinical knowledge and skills for diagnosis, treatment, and prevention of diseases, injuries, and conditions related to environmental exposure in migrant worker populations.

117:351 Occupational Medicine Elective for Physician Assistant Students
Basic clinical knowledge and skills for diagnosis, treatment, and prevention of work-related diseases, injuries, and conditions related to environmental exposure.
Basic clinical knowledge and skill for diagnosis, treatment, and management of critically ill infants.

117:353 Internal Medicine (Rheumatology) for Physician Assistant Students arr.
Basic clinical knowledge and skills for diagnosis, treatment, and management of rheumatologic diseases.

117:354 Medical Intensive Care for Physician Assistant Students arr.
Basic clinical knowledge and skills for diagnosis, treatment, and management of critically ill patients.

117:355 International Medicine for Physician Assistant Students arr.
Basic clinical knowledge and skills for diagnosis, treatment, and prevention of diseases, injuries, and conditions relevant to international medicine. Repeatable.

117:356 Interventional Radiology for Physician Assistant Students arr.
Basic clinical knowledge and skills for diagnosis and treatment of conditions requiring interventional therapy. Repeatable.
Radiation Sciences

Director: Shelley Matzen  
Undergraduate degree: B.S. in Radiation Sciences  
Web site: http://www.radiology.uiowa.edu/BSRS

The Radiation Sciences Program is one of five academic units in the Division of Associated Medical Sciences. It is sponsored by the College of Liberal Arts and Sciences, the Carver College of Medicine, and University of Iowa Hospitals and Clinics. For information on the division’s general academic policies, see Associated Medical Sciences in the Catalog.

Radiation sciences professionals work with physicians to gather accurate patient information for diagnosis, treatment, and/or research of disease and injury. The radiation sciences professional must possess knowledge, skill, and mature judgment in order to operate complex equipment safely and efficiently and to produce quality images using multiple sources of radiation energy while delivering quality patient care during procedures.

The Bachelor of Science in radiation sciences provides graduates with the knowledge they need to adapt to the increasing sophistication of the profession of radiation sciences and meet the multicredential/multicompetency demands of the profession.

Bachelor of Science

The B.S. in radiation sciences requires a minimum of 124 s.h. Radiation sciences students complete specific components of the College of Liberal Arts and Sciences General Education Program, a professional radiography program, a specialty (modality program), and advanced course work. The modality program must be completed at the Carver College of Medicine. All radiation sciences students must meet residency and g.p.a. requirements; see “General Academic Policies” in the Division of Associated Medical Sciences section of the Catalog.

Students who complete the entire program at Iowa enroll first as pre-radiation science majors in the College of Liberal Arts and Sciences, where they complete the General Education Program. During the fall semester of the first year, students apply to University of Iowa Hospitals and Clinics Radiologic Technology Program. Admission is selective. Accepted students enroll for the second and third years as nondegree students in the Radiologic Technology Program. Finally, students must be accepted to a modality program, be admitted to the Carver College of Medicine B.S. program in radiation sciences, and complete the advanced course requirements.

Certified radiographers who hold national certification from the American Registry of Radiologic Technologists, or student radiographers intending to take the national certification exam, must be admitted to the Carver College of Medicine as Bachelor of Science students in the Radiation Sciences Program. They must complete the required University courses and a specialty (modality program). Admission to modality programs is selective. Applicants must meet semester-hour, grade-point average, and residency requirements.

The program plan is as follows.

GENERAL EDUCATION COURSES

Rhetoric
Students take 010:001 and 010:002 Rhetoric I-II (8 s.h.) or 010:003 Accelerated Rhetoric (4 s.h.).

Natural Sciences
One of these sequences:
004:007-004:008 General Chemistry I-II 6 s.h.
004:011-004:012 Principles of Chemistry I-II 8 s.h.

Social Sciences
031:001 Elementary Psychology 3 s.h.

Quantitative or Formal Reasoning
22M:015 Mathematics for the Biological Sciences 4 s.h.

Distributed Education
One course in two of these areas: social sciences (except psychology), humanities, cultural diversity, and historical perspectives 6 s.h.

For information about the General Education Program, contact the College of Liberal Arts and Sciences or visit its web site (http://www.clas.uiowa.edu).
Students must complete a radiologic technology program and pass the American Registry of Radiologic Technologists (AART) national certification exam. The Radiologic Technology Program sponsored by University of Iowa Hospitals and Clinics (670:901 Radiologic Technology Program, 0 s.h.) provides education in pathology, radiation biology, radiation protection, patient care, and ethics. Students learn about anatomy and physiology, medical terminology, and radiographic procedures, imaging, and evaluation. They become acquainted with imaging equipment, study quality assurance, and participate in supervised clinical education. The 24-month program begins in June. Graduates are eligible to take the national certification exam; if they pass, they are granted 60 s.h. of credit toward the degree.

SPECIALTY (MODALITY PROGRAM)

Radiation sciences students must apply to, be accepted, and complete one of the following specialties (modality programs) at University of Iowa Hospitals and Clinics. Each program offers modality-specific didactic and supervised clinical education courses. Program duration varies. Graduates of the modality programs are eligible to take certification exams.

Nuclear Medicine Technology (074:101 and 074:105) includes classes in radiopharmacy, radiobiology, radioimmunology, radiation protection, patient care, medical terminology, instrumentation, computer applications, administration, and ethics; 12-month program (30 s.h.); begins in August.

Radiation Therapy (672:803) teaches theory and techniques of radiation therapy technology, with emphasis on competence in areas of oncology treatment planning, treatment delivery, dosimetry, and use of megavoltage radiation-producing equipment to administer treatment; 12-month program (30 s.h.); begins in August.

Diagnostic Medical Sonography (673:804 and 673:805) focuses on principles and methods in using ultrasound and offers specialties in abdominal, pediatric, obstetric, and gynecologic imaging as well as interventional procedures and vascular technology; 18-month program (30-36 s.h.); begins in August.

Magnetic Resonance Imaging (674:806 and 674:807) offers intensive study and practice in magnetic resonance imaging, including computer technology, pathophysiology, physics, advanced sectional anatomy, and instrumentation;
nine-month program (24 s.h.); begins in September and March.

Cardiovascular Intervention (675:808 and 675:809) teaches about imaging equipment, pharmacology, sterile techniques, cardiac monitoring, vascular anatomy and physiology, cardiovascular intervention technology imaging, procedures, therapeutic intervention techniques, and digital angiography; six-month program (15 s.h.); begins in September and March.

Computed Tomography (676:810 and 676:813) concentrates on sectional anatomy, single and multislice computed tomography (CT), electron beam CT, physiologic and 3-D imaging, CT simulation, physics and imaging, and procedures and pathology; six-month program (15 s.h.); begins in September and March.

Quality Management/Picture Archival and Communication Systems (678:816 and 678:817) includes courses in quality management, radiographic and mammographic quality control, research methods, federal regulations, PACS technology, networking and standards, PACS management, radiology department design and workflow; and QA for the digital department; advanced national recognition exam in Quality Management is recommended at completion; six-month program (15 s.h.); begins in September and March.

ADVANCED COURSES

06J:048 Introduction to Management 3 s.h.
22S:102 Introduction to Statistical Methods 3 s.h.
074:191 Health Informatics I (offered only fall semesters) 3 s.h.

ELECTIVES

E elective course work, to complete the required 124 s.h., should be planned in consultation with the adviser.

Advising

Pre-radiation science majors completing the General Education Program before admission to the Radiologic Technology Program are advised at the University’s Academic Advising Center. After admission to the Radiologic Technology Program, they are advised by the program’s director. Radiation sciences majors are advised by Radiation Sciences Program personnel.
Admission

Students who intend to complete the entire program at Iowa must be admitted to The University of Iowa as pre-radiation sciences majors in the College of Liberal Arts and Sciences. For information on admission requirements, contact the University's Office of Admissions. Students already enrolled at the University who decide to enroll in the Radiation Sciences Program can declare a pre-radiation sciences major.

Admission to the Radiologic Technology Program is competitive; enrollment is limited to 25. Student selection begins in October and continues until the class is full. Students accepted to the program are admitted to the Carver College of Medicine on nondegree (special) student status and must meet specific program requirements; see Information/RT & Modality Programs on the Radiation Sciences Program web site. A g.p.a. of 2.50 in general education courses is recommended.

Admission to the Carver College of Medicine radiation sciences major requires national certification in radiologic technology from the American Registry of Radiologic Technologists and a cumulative g.p.a. of at least 2.00.

Admission to specialties (modality programs) is competitive; enrollment is limited. See Prospective Students/Admission on the Radiation Sciences Program web site or contact the individual modality program directors. The application deadline varies by program from February 1 to March 1. Admission to the radiation sciences major does not guarantee admission to a modality program. Cumulative grade-point averages of 2.50 are recommended. Applicants must hold national certification from the American Registry of Radiologic Technologists.
Biochemistry

Head: John E. Donelson  
Professors emeriti: Thomas W. Conway, Earle Stellwagen, Charles A. Swenson  
Associate professors: Robert E. Cohen, Kenneth P. Murphy, Ramaswamy Subramanian, Lori Wallrath  
Assistant professors: Adrian Elcock, M. Todd Washington  
Adjunct professors: Theresa Gioannini, Nancy C. Stellwagen, Joseph Walder  
Associate professors: Robert E. Cohen, Kenneth P. Murphy, Ramaswamy Subramanian, Lori Wallrath  
Assistant professors: Adrian Elcock, M. Todd Washington  

Undergraduate degrees: B.A., B.S. in Biochemistry  
Graduate degrees: M.S., Ph.D. in Biochemistry  
Web site: http://www.biochem.uiowa.edu/  

Biochemistry is the study of the basic chemical processes that occur in all living systems. One of the most active sciences, it provides a foundation for other biosciences.  
Biochemists generally work in laboratories and/or classrooms. Those with a bachelor’s degree are often employed as research assistants in industry, government, education, and health service, or in secondary school teaching, for which licensure is required.  
Biochemists with advanced degrees—usually a doctorate—pursue teaching, research, and/or administrative careers in universities, medical schools, hospitals, private research agencies, government laboratories, biotechnology companies, and in food, drug, cosmetics, chemical, petroleum, and allied industries.  

Undergraduate Programs

The College of Liberal Arts and Sciences administers undergraduate programs and grants undergraduate degrees in biochemistry. The Department of Biochemistry offers programs of study leading to the Bachelor of Science and the Bachelor of Arts. Requirements are outlined below.  
Students choose advanced science electives to supplement biochemical studies or to satisfy requirements of a minor or a double major. In order to count science electives numbered below 100 toward the degree, students must have their adviser’s approval.  
Transfer credit for biochemistry courses requires the approval of an undergraduate adviser in biochemistry.  

Bachelor of Science

The B.S. program in biochemistry prepares students to work in positions that require a mastery of general biochemistry. It is also an excellent preparation for graduate study in biochemistry and related sciences or for study toward a professional degree in the health sciences.  
The B.S. in biochemistry requires 73 s.h. in addition to completion of the College of Liberal Arts and Sciences General Education Program. Courses required for the B.S. are as follows.  
All of these:  
002:010-002:011 Principles of Biology I-II 8 s.h.  
004:011-004:012 Principles of Chemistry I-II 8 s.h.  
22M:025-22M:026 Calculus I-II 8 s.h.  
029:081-029:082 Introductory Physics I-II 8 s.h.  
099:001 Orientation and Introduction to the Field of Biochemistry 0 s.h.  
099:101 Technical Communication in Biochemistry 1 s.h.  
099:120 Biochemistry and Molecular Biology I 3 s.h.  
099:130 Biochemistry and Molecular Biology II 3 s.h.  
099:140 Experimental Biochemistry 4 s.h.  
*099:155 Research, Independent Study (required of all B.S. students, including all honors students) 6 s.h.  
Advanced science electives, chosen in consultation with adviser 9 s.h.  
One of these sequences:  
004:121-004:122 Organic Chemistry I-II 6 s.h.  
004:123-004:124 Organic Chemistry for Majors I-II (preferred) 6 s.h.  
Two of these:  
004:131 Physical Chemistry I 3 s.h.  
004:132 Physical Chemistry II 3 s.h.  
099:241 Biophysical Chemistry I 3 s.h.  
099:242 Biophysical Chemistry II 3 s.h.
One of these:
004:121 Organic Chemistry Laboratory  3 s.h.
004:122 Organic Chemistry Laboratory
for Majors (preferred)  3 s.h.

*Students may register for 099:155 only if they
have earned an average grade of B or better in
099:120, 099:130, and 099:140 and a grade of
B-minus or better in each of 099:120, 099:130,
and 099:140; or have consent of adviser and
instructor. Students may register for 099:115 any
time.

Students are encouraged to begin research by
taking 099:115 Undergraduate Independent
Study (may be taken for a total of 6 s.h.). There
are no prerequisites. Students may arrange
independently to take this course, or they may
request assistance from an undergraduate adviser.

Bachelor of Arts

The B.A. in biochemistry requires 58 s.h. in
addition to completion of the College of Liberal
Arts and Sciences General Education Program.
The required courses are as follows.

All of these:
002:010-002:011 Principles of
Biology I-II  8 s.h.
004:011-004:012 Principles of
Chemistry I-II  8 s.h.
22M:025-22M:026 Calculus I-II  8 s.h.
029:011-029:012 College Physics  8 s.h.
099:001 Orientation and Introduction to
the Field of Biochemistry 0 s.h.
099:101 Technical Communication in
Biochemistry  1 s.h.
099:120 Biochemistry and Molecular
Biology I  3 s.h.
099:130 Biochemistry and Molecular
Biology II  3 s.h.
099:140 Experimental Biochemistry  4 s.h.
Advanced science electives, chosen in
consultation with adviser  6 s.h.

One of these sequences:
004:121-004:122 Organic Chemistry I-II  6 s.h.
004:123-004:124 Organic Chemistry for
Majors I-II (preferred)  6 s.h.

One of these:
004:131 Physical Chemistry  I  3 s.h.
099:241 Biophysical Chemistry  I  3 s.h.
099:242 Biophysical Chemistry  II  3 s.h.

In addition, B.A. students intending to go on to
advanced degrees in the biological or health
sciences are advised to include 4 s.h. or more of
099:115 Undergraduate Independent Study or
099:155 Research, Independent Study (senior
research) in their programs.

Teacher Licensure

Biochemistry majors, especially those in the B.A.
program, may qualify for teacher licensure by
taking additional courses in teacher education.
Consult the College of Education for details.

Four-Year Graduation Plan

The following checkpoints list the minimum
requirements students must complete by certain
semesters in order to stay on the University’s
Four-Year Graduation Plan. (Courses in the major
are those required to complete the major; they
may be offered by departments other than the
major department.)

Bachelor of Science

Before the third semester begins: 004:011
and 004:012, 22M:025, 099:001, and at least
one-quarter of the semester hours required for
graduation

Before the fifth semester begins: the courses
listed above, plus 002:010 and 002:011;
004:121, 004:122, and 004:141; 22M:026; and
at least one-half of the semester hours required
for graduation

Before the seventh semester begins: the
courses listed above, plus 029:011 and 029:012,
099:120, 099:130, and 099:140, two science
electives, and at least three-quarters of the
semester hours required for graduation

Before the eighth semester begins: the
courses listed above, plus 004:131 or 004:132 or
099:241 or 099:242, a science elective, and at
least 3 s.h. of 099:155

During the eighth semester: enrollment in all
remaining course work in the major, all
remaining General Education courses, and a
sufficient number of semester hours to graduate

Bachelor of Arts

Before the third semester begins: 004:011
and 004:012; math through 22M:026 or higher;
099:001; and at least one-quarter of the semester
hours required for graduation

Before the fifth semester begins: the courses
listed above, plus 002:010 and 002:011;
004:121 and 004:122, and at least one-half of
the semester hours required for graduation

Before the seventh semester begins: the
courses listed above, plus 029:011 and 029:012,
099:120, 099:130, and 099:140, two science
electives, and at least three-quarters of the semester hours required for graduation.

**Before the eighth semester begins:** the courses listed above, plus 004:131 or 099:241 or 099:242, and a science elective.

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate.

**Honors**

Qualified students may earn an honors degree in biochemistry. They must be members of the University Honors Program, which requires students to maintain a cumulative University of Iowa G.P.A. of at least 3.33 (contact the University Honors Program for more information). Honors students in biochemistry must complete 099:155 Research, Independent Study. They must present their research results in a report written in the form of a journal article and in an oral report presented at a special open departmental seminar.

**Combined Programs**

Students, especially those in the B.A. program, may include courses from other disciplines, such as business, pre-law, psychology, or journalism. This prepares them for one of the many vocations on which biochemistry has an impact.

**Graduate Program**

The Carver College of Medicine and the Graduate College coordinate the graduate program in biochemistry and other biosciences; graduate degrees are granted through the Graduate College. See Carver College of Medicine and Graduate College in the Catalog for general information about study in medicine and graduate study at the University.

The Department of Biochemistry offers a program of study leading to the M.S. and Ph.D. Students admitted to the graduate program in biochemistry usually pursue the Ph.D. Qualified students may pursue a combined program leading to the M.D./Ph.D. (Medical Scientist Training Program).

The focus of the graduate program is on the individual student. Students choose from three curricula to satisfy requirements for the degree: standard, biophysical emphasis, or molecular emphasis.

In the first year, students engage in formal course work and tutorial laboratory experiences that serve as the basis for selecting a topic for thesis research. They spend half their time in courses and the other half working in four different faculty laboratories (099:261 Research Techniques), when they learn research techniques in the context of ongoing research.

All biochemistry graduate students take the following courses.

- 099:282 Seminar 0-1 s.h.
- 156:201 Principles in Molecular and Cell Biology 4 s.h.

Graduate students in the standard curriculum also must take the following.

- 099:241-099:242 Biophysical Chemistry I-II 6 s.h.
- 142:215 Molecular Biology of Gene Expression 3 s.h.
- Electives 6 s.h.

Graduate students in the biophysical emphasis also must take the following.

- 099:241-099:242 Biophysical Chemistry I-II 6 s.h.
- Electives 9 s.h.

Graduate students in the molecular emphasis also must take the following.

- 099:241 Biophysical Chemistry I or 099:242 Biophysical Chemistry II 3 s.h.
- 142:215 Molecular Biology of Gene Expression 3 s.h.
- Electives 9 s.h.

Once students are promoted to a second year of study, they choose research laboratories for Ph.D. thesis research and begin their thesis projects. They take courses that supplement their interests and preparation, including the following required courses.

- 050:270 Responsible Conduct in Research 0 s.h.
- 099:237 Topics in Biochemistry 2 s.h.
- 099:282 Seminar 0-1 s.h.

Research Biochemistry (099:292) and elective science courses numbered 100 or above in other departments satisfy the remaining course requirements.

Students take the comprehensive examination before the end of June in their second year, after which they are admitted formally to degree candidacy and begin to concentrate on thesis research. The program culminates in successful
defense of completed thesis work before an examining committee.

In addition to meeting these requirements and those of the Graduate College, students are expected, as part of their training, to assist in teaching biochemistry for two or three semesters.

Throughout the program, students are associated with small research seminar groups and receive close personal attention from the biochemistry faculty members who serve as research advisers.

**Admission**

The graduate program in biochemistry is flexible enough to accommodate students with bachelor's degrees in any of the biological, biochemical, or physical sciences. Appropriate preparation includes one-year, college-level courses in organic and physical chemistry, biology, physics, and mathematics through calculus. Students are expected to have had one or more introductory courses in biochemistry.

Applicants must have an undergraduate g.p.a. of at least 3.00 and must submit acceptable verbal, quantitative, and analytical scores on the Graduate Record Examination (GRE) General Test. Applicants are encouraged to submit their score on the GRE Subject Test in Chemistry; Biology; or Biochemistry, Cell, and Molecular Biology.

**Financial Support**

Students admitted to the Ph.D. program in biochemistry routinely receive a stipend and tuition support.

**Research**

The department's current research interests include protein structure and function, protein folding, DNA bending, complex carbohydrate structure and function, regulation of gene expression, mechanisms of transcription and replication, enzyme reaction mechanisms, intracellular signaling, differentiation, and membrane determinants of cell shape and motility. Visit the Department of Biochemistry web site for details.

**Facilities**

Many of the Department of Biochemistry's research and teaching facilities are located on a single floor in the Bowen Science Building, where the Departments of Anatomy and Cell Biology, Microbiology, Pharmacology, and Physiology and Biophysics also are located. Several of the department's research groups are located in the adjacent Medical Education and Biomedical Research Facility.

The University of Iowa maintains a number of central research support facilities and equipment that promote campuswide interactions between research groups. These include the facilities for electron microscopy, fermentation, image analysis, high field NMR, high resolution mass spectrometry, and academic computing (through Information Technology Services). Carver College of Medicine research facilities are available to biochemistry researchers for nuclear magnetic resonance, flow cytometry, DNA synthesis, tissue culture hybridoma, gene transfer, X-ray analysis, and transgenic and gene targeting.

Individual faculty research laboratories are well-equipped for modern research, and there are many common-use laboratories, including instrument rooms, a reading room, cold rooms, tissue culture areas, preparation rooms, and a stockroom. Research is supported by staff in instrument shops, animal quarters, photography and illustration service, and by office staff, stockroom supervisors, and a purchasing agent.

Together, the department and the central support facilities provide virtually all of the equipment required for modern biochemical research. Examples of such equipment include analytical and preparative ultracentrifuges; fluorescence, optical rotatory dispersion, high-field NMR, ultraviolet-visible, and rapid kinetic instruments; amino acid analyzers and protein sequencers, gas chromatographs, preparative high performance liquid chromatographs, liquid scintillation counters, electrophoresis equipment, instrumentation for protein X-ray crystallography and microcalorimetry, and automated DNA sequencers.

The department maintains a reading room stocked with primary books and journals used by biochemists. The Hardin Library for the Health Sciences is a large, complete library located on the Health Sciences Campus. Excellent resources also are provided by branches of the University of Iowa Libraries and by computer access to bibliographic retrieval services.

**Courses**

099:001 Orientation and Introduction to the Field of Biochemistry 0 s.h.

Biochemistry and its application to other areas of basic sciences; biochemical studies, research, careers.
<table>

<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>099:101</td>
<td>Technical Communication in Biochemistry</td>
<td>1 s.h.</td>
<td>Practical aspects of writing formal scientific papers and making oral presentations on technical topics. Prerequisites: 099:120 or 099:130 or 099:140 or consent of instructor, and junior or senior standing.</td>
</tr>
<tr>
<td>099:110</td>
<td>Biochemistry</td>
<td>3 s.h.</td>
<td>Basic concepts in modern biochemistry and molecular biology, understanding of life processes in molecular terms.</td>
</tr>
<tr>
<td>099:115</td>
<td>Undergraduate Independent Study</td>
<td>arr.</td>
<td>Experience in an active biochemistry research lab, learning and performing experiments relevant to the current projects in that lab; research experience in preparation for meeting the requirements for 099:155; arranged in advance by student and faculty member. Prerequisite: first-year, sophomore, or junior standing.</td>
</tr>
<tr>
<td>099:120</td>
<td>Biochemistry and Molecular Biology I</td>
<td>3 s.h.</td>
<td>Structures of nucleic acids, proteins, carbohydrates, lipids and their participation in cellular transport, catalysis, oxidative reactions; first course of two-semester sequence that concludes with 099:130. Prerequisites: two semesters of general chemistry and one of organic chemistry. Recommended: 002:010, 002:011, and an additional organic chemistry course.</td>
</tr>
<tr>
<td>099:130</td>
<td>Biochemistry and Molecular Biology II</td>
<td>3 s.h.</td>
<td>Metabolism of lipids and nitrogen-containing compounds; regulation and integration of metabolism; information transfer in prokaryotes and eucaryotes; recombinant DNA techniques; chemistry and enzymology of replication, transcription, translation, cell transformation, and regulation of gene expression. Prerequisite: 099:120.</td>
</tr>
<tr>
<td>099:140</td>
<td>Experimental Biochemistry</td>
<td>4 s.h.</td>
<td>Quantitative and qualitative experiments on identification, fractionation, and characterization of constituents of biochemical systems; use of modern instruments and techniques for spectrophotometry, chromatography, electrophoresis, centrifugation, radiotracer studies; emphasis on experimental design and interpretation. Prerequisites: 004:016 or 004:020, and 099:120.</td>
</tr>
<tr>
<td>099:155</td>
<td>Research, Independent Study</td>
<td>2-6 s.h.</td>
<td>Independent study and research in areas of interest to the student; arranged in advance by student and biochemistry faculty member. Prerequisites: 099:120, 099:130, and 099:140.</td>
</tr>
<tr>
<td>099:161</td>
<td>Biochemistry for Dental Students</td>
<td>4 s.h.</td>
<td>Concepts of biochemistry and their application to understanding of clinical problems. Prerequisites: 004:121 or consent of instructor, and D.D.S. enrollment or consent of instructor. Recommended: 004:122.</td>
</tr>
<tr>
<td>099:162</td>
<td>Biochemistry for Pharmacy Students</td>
<td>4 s.h.</td>
<td>Concepts of biochemistry and their application to understanding of clinical problems. Prerequisites: 004:121 and Pharm.D. enrollment, or consent of instructor. Recommended: 004:122.</td>
</tr>
<tr>
<td>099:163</td>
<td>Medical Biochemistry</td>
<td>4 s.h.</td>
<td>Concepts of biochemistry, their application to understanding clinical problems. Prerequisite: M.D. enrollment.</td>
</tr>
<tr>
<td>099:164</td>
<td>Biochemistry for Physician Assistant Students</td>
<td>3 s.h.</td>
<td>Aspects of general biochemistry necessary for understanding the biochemical basis of human disease; analysis of appropriate clinical cases. Prerequisite: 099:110 or equivalent biochemistry survey.</td>
</tr>
<tr>
<td>099:226</td>
<td>Enzyme Kinetics and Bioorganic Mechanisms</td>
<td>1-2 s.h.</td>
<td>Principles and applications of steady-state and transient enzyme kinetics; mechanisms of catalysis of biochemical reactions. Prerequisite: 099:120 or consent of instructor.</td>

Dermatology

Interim head: Craig H. Syrop
Professors: Kathi C. Madison, Thomas L. Ray, Mary S. Stone, Duane C. Whitaker
Professors emeriti: Richard M. Caplan, John S. Strauss
Clinical professor: Roger I. Ceilley
Clinical professor emeritus: Dan Bovenmyer
Visiting professor: Warren Piette
Associate professor: Christopher J. Arpey
Clinical associate professors: Mark Boddicker, Robert F. Godwin, Susan Wall
Assistant professors: Laura Myers, Marta Van Beek
Clinical assistant professors: Timothy G. Abrahamson, Mark G. Cleveland, David Davis, Randall R. Maharry, Gary Quinby, Kimberly K. Schulz
Web site: http://tray.dermatology.uiowa.edu

The Department of Dermatology instructs M.D. students and trains dermatology residents in the care of patients with skin diseases. It also provides researchers with an opportunity to develop their skills in dermatology.

Medical Student Training

The Carver College of Medicine is one of the few medical colleges in the country with a required dermatology rotation for students. Each third-year M.D. student spends two weeks in the clinic and attends about 10 one-hour lectures. Students see a good cross-section of patients, including those receiving primary or tertiary care at University of Iowa Hospitals and Clinics and a large number of patients referred from Student Health Service. Additional patients are seen at the nearby Veterans Affairs Iowa City Health Care System.

Varied electives are open to fourth-year M.D. students, including further clinical experience, dermatologic research, and special studies.

Courses

062:001 Clinical Dermatology 2 s.h.
Basic dermatology; lectures, independent study, clinical experience. Prerequisite: third-year M.D. enrollment.

062:002 Dermatology Elective arr.
Advanced clinical experience, dermatologic surgery, special assignments. Prerequisite: fourth-year M.D. enrollment.

062:004 Research in Dermatology arr.
General principles of medical research; clinical or laboratory projects; individual study.

062:999 Dermatology off Campus arr.
Arranged by student with departmental approval.
Dietetic Internship

Director: Laurie Kroymann
Web site: http://www.uihc.uiowa.edu/fns/

University of Iowa Hospitals and Clinics offers a Dietetic Internship Program that is fully accredited by the American Dietetic Association’s Commission on Accreditation for Dietetics Education. It qualifies graduates to take the exam for qualification as a Registered Dietitian (RD). Clinical dietitians and food service operation managers of the Department of Food and Nutrition Services at University of Iowa Hospitals and Clinics provide the teaching for the program. Graduate courses in the program are administered by the Carver College of Medicine and the College of Public Health. See “Associated Courses” below.

Students generally complete the program with 9 s.h. of graduate credit, which may be applied toward an advanced degree. Approximately half of the program’s graduates go on to complete advanced degree programs, typically a master’s degree in health promotion, public health, or business.

University of Iowa Hospitals and Clinics awards a certificate to the program’s graduates.

Applicants must meet the admission requirements of the Graduate College and must complete a didactic program in dietetics that has approval of the ADA Commission on Accreditation for Dietetics Education.

Students enter the program in the fall semester. The postmark deadline for applications is February 15.

Associated Courses

For course descriptions, see “Nondepartmental Courses” in the Carver College of Medicine section of the Catalog and “Courses” in the Epidemiology section (College of Public Health).

050:203 Clinical Dietetics 1 s.h.
173:230 Principles of Dietary Assessment 1 s.h.
173:235 Nutritional Epidemiology 2 s.h.
173:236 Nutrition Intervention in Clinical Trials Research 2 s.h.
173:237 Nutrition Intervention in Research Lab 3 s.h.
Emergency Medicine

Director: Eric Dickson
Associate professors (clinical): Eric Dickson, Mark Graber, Stephen Scheckel
Assistant professors (clinical): Agustin Aguilar, Dana Collaguazo, Hans House, Harlo Hove, Jason Hughes, Charles Jennissen, Catherine Jones, Eric Nilles, Andrew Nugent, Bobby Peters, Christopher Russi, Roy Werner
Web site: http://www.uihealthcare.com/emergencymedicine

The Program in Emergency Medicine prepares new physicians to recognize and treat a variety of urgent and emergent conditions. The program fosters basic sciences and clinical research relevant to emergency medicine and is dedicated to the education and training of Emergency Medical Services (EMS) personnel through the Emergency Medical Services Learning Resources Center (EMSLRC).

Medical Student Training

Elective rotations for M.D. students are available at University of Iowa Hospitals and Clinics and at several other sites throughout Iowa, including St. Luke's Hospital, Cedar Rapids; Great River Medical Center, Burlington; Covenant Medical Center, Waterloo; Broadlawns Hospital, Des Moines; and Marian Health Center, Sioux City. Students also may arrange an off-service elective independently with established residency programs throughout the United States.

The program offers a special introductory month to emergency medicine as well as Wilderness Medicine, a rotation that includes a trip to the Death Valley and Mount Whitney areas of California.

Residency Program

The emergency medicine faculty directs the Iowa Emergency Medicine Residency, Iowa's only emergency medicine residency. The residency is a three-year program that prepares residents for careers in diverse areas of emergency medicine, from rural practice to academics. The program emphasizes critical care training and rotations in a wide variety of specialties. Part of the clinical component is spent at St. Luke's Hospital, Cedar Rapids.

Resources

The Emergency Treatment Center, located on the first floor of Roy Carver Pavilion, is a Level I Adult and Pediatric Trauma Center. It serves as a referral center for communities across Iowa.

Courses

184:220 Emergency Medicine: St. Luke's, Cedar Rapids  4 s.h.
Preceptorship with full-time emergency department physicians. Prerequisite: completion of M.D. third year.

184:221 Emergency Medicine UIHC  arc.
Preceptorship with residents and faculty; emphasis on principles of acute medicine. Prerequisite: completion of M.D. third year.

184:222 Emergency Medicine Off Campus  arc.
Preceptorship with residents and faculty; emphasis on principles of acute medicine. Prerequisite: completion of M.D. third year and consent of instructor.

184:223 Rural Emergency Medicine at Burlington, Iowa  4 s.h.
In-depth clinical experience in a busy rural hospital emergency department under supervision of residency-trained emergency physicians; lectures, skill labs, projects. Prerequisite: completion of M.D. third year.

184:224 Introduction to Advanced Life Support Skills  4 s.h.
Experience managing acute threats to life, including trauma, respiratory failure, poisoning, sepsis, stupor/coma, and acute MI, using ACLS and PALS courses and clinical manikin work with EMS staff. Prerequisite: completion of M.D. third year.

184:225 Wilderness Medicine  4 s.h.
Didactic and scenario training in physiology, diagnosis, and emergency treatment of heat- and cold-related illnesses, high altitude disorders, wilderness trauma, envenomations, and immersion injuries; travel to Death Valley and Mount Whitney, California. Prerequisite: completion of M.D. third year.

184:402 Emergency Medicine Des Moines  4 s.h.
Participation in acute emergency care, management of acute illnesses, follow-up care when possible; Broadlawns Hospital, Des Moines. Prerequisites: completion of M.D. third year and consent of department.

184:425 Emergency Medicine Waterloo  4 s.h.
Participation in acute emergency care, management of acute illnesses, follow-up care when possible; Covenant Medical Center, Waterloo. Prerequisite: completion of M.D. third year.

184:430 Emergency Medicine Sioux City  4 s.h.
Participation in acute emergency care, management of acute illnesses, follow-up care when possible; Covenant Medical Center, Sioux City. Option to accompany ambulance crews. Prerequisites: completion of M.D. third year and basic life support certification.
The Department of Family Medicine prepares primary care physicians. The department offers course work that is included throughout the four-year M.D. program. Twenty-five elective senior rotations give students opportunities for exposure to various Iowa communities through work in affiliated hospitals or connected facilities, in the department’s model office on the University campus, and in preceptorships with selected family physicians throughout the state. There also is opportunity for independent study during the fourth year.

Residency Program

The Department of Family Medicine directs a three-year residency program whose graduates are eligible for certification by the American Board of Family Medicine. The residency program trains physicians to provide continuous and comprehensive medical care to patients and their families. Residents are educated in all areas of family medicine—adult medicine, maternal and child health, behavioral science, surgical specialties, and community medicine. Training emphasizes the value of wellness and preventive medicine as well as curative medicine.

The program is organized as a progressive educational experience. It consists of formal teaching and clinical experiences on assigned rotations, structured conferences, and patient care in the Family Care Center. As residents develop clinical skills, medical judgment, and competence, their patient responsibilities increase. Some patients at the Family Care Center are assigned to residents, who provide medical care under faculty supervision. Each resident is responsible for his or her patients for the duration of the residency program.

Residents also learn the principles of practice management, including organizational and administrative decision making, patient record and bookkeeping procedures, and chart auditing methodologies.

Residents are expected to take responsibility for their learning environment, to avail themselves of the department’s diverse resources, and to collaborate with the faculty in order to have the best possible learning experience.
Rural Track Residency

The Family Practice Rural Track Residency Program is a collaboration of the Department of Family Medicine and the Pella Regional Health System of Pella, Iowa. The program offers trainees the opportunity to acquire skills, knowledge, and values appropriate for family physicians practicing in rural communities. Residents spend the first year of the program in Iowa City and the second and third years in Pella. The program’s graduates are eligible for certification by the American Board of Family Medicine.

Family Practice/Psychiatry Residency

The Department of Family Medicine and The Department of Psychiatry cosponsor the combined Family Practice/Psychiatry Residency Program. The program’s residents acquire broad-based training in both disciplines, including focused training in geriatrics and geriatric psychiatry, substance and alcohol abuse, diagnosis and treatment of depression, delirium, eating disorders, panic disorders, and neurotic and somatizing behavior. Graduates are eligible for certification by the American Board of Family Medicine and the American Board of Psychiatry.

Facilities

The Department of Family Medicine is located on the University of Iowa Health Sciences Campus. Faculty offices are close to the Family Care Center, where patients are seen by appointment. The department also has community-based clinics in southeast Iowa City and North Liberty, Iowa, and a rural satellite office located in Lone Tree, Iowa.

Courses

115:201 Principles of Family Medicine 2 s.h.

115:202 Spirituality and Health 1 s.h.

Current research literature on spirituality and health; religious practices that apply to health care and practical applications for use in clinical settings.

115:203 Medical Education Community Orientation 0 s.h.

Experience in a local health care delivery system away from the University setting, between first and second year of M.D. program.

115:300 Preceptorship in Family Medicine arr.

One-on-one experience with a practicing physician in his or her office; exposure to illnesses, conditions often seen in primary care; realistic background for evaluation of family medicine as a career alternative.

115:401 Family Medicine Clerkship, Broadlawns Hospital, Des Moines Family Health Center 4 s.h.

Clinical experience in inpatient and outpatient care. Prerequisite: consent of department.

115:403 Lone Tree Family Medicine Clerkship 4 s.h.

Experience providing patient care in a rural setting; continuity of care for patients of all ages. Prerequisite: fourth-year M.D. enrollment.

115:404 Advanced Preceptorship in Family Medicine 4 s.h.

Experience in community practice of family medicine. Prerequisites: consent of individual preceptor and family practice advisor.

115:405 Subinternship in Family Medicine, University of Iowa 4 s.h.

Inpatient aspects of key components of family medicine; experience on the family medicine inpatient service.

115:406 Subinternship in Family Medicine, Iowa Lutheran 4 s.h.

Patient-oriented interactive experience in an inpatient family practice environment. Prerequisite: fourth-year M.D. enrollment.

115:407 Family Medicine Iowa Lutheran arr.

Prerequisite: fourth-year M.D. enrollment.

115:408 Urban Preceptorship in Family Medicine 4 s.h.

Experience as a junior resident in all areas of family medicine, including maternity care, child and adolescent health, adult medicine.

115:409 Subinternship in Family Medicine, Mason City 4 s.h.

Experience in community practice of family medicine.

115:410 Independent Studies arr.

Work with departmental researcher on investigation in family medicine, community medicine, health care delivery, health maintenance, similar areas. Prerequisite: consent of department.

115:411 Rural Preceptorship in Family Medicine 4 s.h.

Work with family practice residents, staff in day-to-day delivery of primary medical care in Family Practice Center; experience in the Family Stress Clinic observing family-centered counseling; nursing home visits; work with departmental social worker and sports medicine specialist.

115:412 Urban Preceptorship in Family Medicine 4 s.h.

Experience providing patient care in a rural setting; continuity of care for patients of all ages. Prerequisite: fourth-year M.D. enrollment.

115:413 CNS Management and Rehabilitation, Covenant Medical Center, Waterloo 4 s.h.

Clinical experience in inpatient and outpatient care. Prerequisite: fourth-year M.D. enrollment.

115:414 Urban Preceptorship in Family Medicine 4 s.h.

Experience as a junior resident in all areas of family medicine, including maternity care, child and adolescent health, adult medicine.

115:416 Clerkship in Family Medicine—Cedar Rapids 4 s.h.

Experience as a junior resident in all areas of family medicine, including maternity care, child and adolescent health, adult medicine.

115:417 Continuity of Care—Family Medicine 4 s.h.

Longitudinal continuity of care experience for fourth-year M.D. students in an outpatient family medicine setting.

115:418 Family Medicine Clerkship, Davenport 4 s.h.

Assignment to problems commonly seen in family practice office; supervision by residents and faculty for history and physical examination and diagnostic workups and treatment of each specific problem; exposure to acutely ill patients in services of medicine.
surgery, obstetrics, pediatrics. Prerequisite: consent of department.

115:420 Family Medicine Clerkship, Sioux City 4 s.h.
Methods common in family practice medicine; participation in care of patients seen by family practice physicians, residents.
Prerequisite: consent of department.

115:421 Family Medicine Clerkship, Red Oak 4 s.h.
Application of family medicine concepts at the Family Medical Center, site of the Model Regional Primary Care Program.

115:423 Sub-Internship in Family Medicine, Waterloo 4 s.h.
Experience working as a member of family practice inpatient team at Allen Memorial Hospital and Covenant Medical Center, following patients from admission through discharge.

115:424 Family Medicine Clerkship, Waterloo 4 s.h.
Rotation at the Northeast Iowa Family Practice Center; work with patients from outpatient care through hospitalization; basic concepts of family practice, team concepts in medical care.

115:426 Geriatrics Elective arr.
Experience in monitoring and evaluating health and functional status of patients age 65 and older in the UI Geriatric Assessment Clinic and community settings. Same as 078:800.

115:429 Subinternship in Family Practice, Sioux City 4 s.h.
Experience as a junior resident in all areas of family medicine.
Prerequisite: fourth-year M.D. enrollment.

115:999 Family Medicine off Campus arr.
Clerkships; may include community hospitals.
Free Radical and Radiation Biology

Director: Larry W. Oberley
Professors: Bill Ballard, John Buatti, Garry R. Buettner, John F. Engelhardt, Kevin Kregel, Larry W. Oberley
Professors emeriti: Frank Hsieh-Fu Cheng, James W. Osborne
Associate professors: Joseph Cullen, Robin L. Davison, Frederick E. Dommann Jr., Sonya J. Franklin, Francis J. Miller, Douglas R. Spitz, Neal L. Weintraub
Adjunct associate professors: Fiorenza Ianzini, Michael L. McCormick
Assistant professors: Kyle E. Brown, Kenneth Dornfeld, Prabhat Goswami, Michael Knudson
Graduate degrees: M.S., Ph.D. in Free Radical and Radiation Biology

The Free Radical and Radiation Biology Program provides in-depth training and research experience in the physical, chemical, and biological effects of radiation. It also focuses on free radical biology. Free radicals, which are generated in great number by radiation, play a major role in the interaction of radiation with biological systems. They are of great interest to basic researchers and clinicians because of their role in a variety of diseases and pathological states, including cancer. The program stresses the importance of all of these areas to scientific research, clinical medicine, and the general public's health.

Undergraduate Study

Three courses, 077:103 Radiation Biology, and 077:107 and 077:108 Special Topics: Advanced Undergraduates, are open to University of Iowa undergraduates. Students who want an overview of the biological effects of radiation, including the role of free radicals, will find 077:103 especially appropriate. All three courses are appropriate for students who plan to enter medicine, nuclear medicine technology, environmental health, or related programs.

Graduate Programs

The Carver College of Medicine administers graduate programs in free radical and radiation biology; graduate degrees are granted through the Graduate College. See Carver College of Medicine and Graduate College in the Catalog for general information about study in medicine and graduate study at the University.

The M.S. and Ph.D. programs are open to graduate students with a background in physics, chemistry, mathematics, biology, health sciences, veterinary medicine, or engineering.

After completing the introductory course 077:103 Radiation Biology, students typically concentrate on a particular aspect of the field. Some students elect to focus on radiation biology, while others choose to emphasize free radical biology.

In addition to formal lectures and some structured laboratory exercises, plans of study for free radical and radiation biology students involve small-group conferences, discussions, and seminars. Students are encouraged to spend at least one semester as a teaching assistant, for which no registration is required and no academic credit is given.

Special Programs

Postdoctoral training is available by arrangement with the program’s director and individual faculty members. Contact the Free Radical and Radiation Biology Program.

Financial Support

Graduate students are supported as graduate assistants from funds available through research grants and contracts or from departmental funds. Individual postdoctoral awards also may be available; the candidate and his or her faculty sponsor apply for them jointly.

Facilities

The Free Radical and Radiation Biology Program has a 300 kVp orthovoltage X-ray generator and other radiation sources, including a kilo-Curie Cs-137 irradiator. Students and staff also have access to other radiation sources, such as the Co-60 gamma source and linear accelerators in the Department of Radiation Oncology.

The program has a number of radiation detectors and counters, including liquid scintillation counters. It also has ultraviolet/visible
spectrophotometers; various types of equipment for densitometry, chromatography, and electrophoresis; molecular biology equipment, including thermal cyclers; an automatic cell counter and particle sizer; tissue culture facilities; Typhoon Phosphoimager; HPLC; Electron Spin Resonance Spectrometers; and nitric oxide analyzers.

Internal Medicine

Head: Paul B. Rothman

Adjunct professor: Margaret LeMay

Internal medicine is concerned with the diagnosis, prevention, and treatment of diseases of adults. The Department of Internal Medicine's educational, patient care, and research activities cover all facets of the discipline, including general internal medicine and primary care as well as the specialized areas of allergy and immunology, cardiology, clinical pharmacology, endocrinology and metabolism, gastroenterology and hepatology, hematology, oncology, blood and marrow transplant, infectious diseases, nephrology, pulmonary, critical care, occupational medicine, and rheumatology.

Medical Student Training

The Department of Internal Medicine is committed to the complete spectrum of medical education, from didactic and clinical education of M.D. students to resident and fellowship training. The department's faculty bears a major share of teaching first- and second-year M.D. students. In the first year, faculty members participate in 060:116 Medical Cell Biology, 050:240 Human Organ Systems, and 148:251 Principles of Medical Immunology. In the second year, they participate in 071:105 Pharmacology for Health Sciences: Medical and 061:103 Principles of Infectious Diseases. They are key participants in 050:162, 050:163, 050:164, and 050:165 Foundations of Clinical Practice I-IV.

In the third year, the department's faculty members teach students for six focus weeks in 078:101 Inpatient Internal Medicine and for four weeks in 078:102 Outpatient Internal Medicine at University of Iowa Hospitals and Clinics, the Veterans Affairs Iowa City Health Care System, or hospitals of the Des Moines Area Medical Education Consortium. M.D. students actively participate as members of an inpatient ward team in 078:101 and in the evaluation and management of patients at outpatient internal medicine clinics in 078:102.

In the fourth year, M.D. students may select a clinical experience to fit their own career goals from courses offered in general medicine, subspecialties, intensive care, and a subinternship program.

Residencies and Postgraduate Work

The department offers a three-year residency training program in internal medicine. In addition, most of the department's specialty divisions offer two- and three-year clinical and research fellowships, in which fellows develop special knowledge and skills relevant to their specialties. Fellows who hold doctoral degrees may be accepted to programs whose major focus is laboratory research.

Facilities

Teaching takes place in the medical services and laboratories of University of Iowa Hospitals and Clinics, the Veterans Affairs Iowa City Health Care System, and the Veterans Affairs Central Iowa Health Care System and Iowa Methodist Medical Center in Des Moines.

Web site: http://www.int-med.uiowa.edu/
Participation in clinical conferences.

Diabetes, endocrine clinics; complete patient evaluations, charts.

Subinternship on medical critical care team, with daily rounds, teaching. Prerequisite: fourth-year M.D. enrollment.

Subinternship in Internal Medicine at VAMC, Des Moines Rotation at the Des Moines Veterans Affairs Medical Center; subinternship on general internal medicine ward. Prerequisite: fourth-year M.D. enrollment.

Subinternship in General Internal Medicine and ICU, Des Moines Four-week rotation at Des Moines Medical Education Consortium; experience as a subintern in general internal medicine and the ICU. Prerequisite: fourth-year M.D. enrollment.

Public Health Medicine Participation in ongoing projects related to public health issues of acute disease; training and career opportunities in public health practice.

General Medicine Consult Service, IMMC, Des Moines Principles of consultative medicine provided by general internists to non-internal medicine patients; how to assess perioperative risk for patients evaluated before surgery.

Clinical Allergy Immunology Pathogenesis, diagnosis, and management of asthma and allergic immunologic diseases; conducting and interpreting relevant specialized clinical and laboratory tests; emphasis on outpatients; formal and informal teaching sessions.

Clinical Immunology and Immunopathology: Laboratory and Clinical Correlations 4 s.h.

Research in Allergy Immunology Faculty-directed investigations for students interested in complement, peptides, molecular biology studies, molecular biology of C1 inhibitor and properdin, primary immunodeficiency diseases, tumor immunology; immune parameter of alcohol-related diseases, transplantation immunology.

Clinical Cardiology Development of breadth, depth in diagnostic and therapeutic problems encountered in clinical cardiology; participation in evaluation and decisions regarding patients seen sometimes in the cardiac catheterization laboratory, inpatient cardiology wards, and electrophysiology service.

Electrocardiography Scaler electrocardiography with option of viewing exercise studies including treadmill testing; initial interpretation of current tracings and daily staff conferences.

Clinical Cardiology Coronary Care Experience, Iowa Methodist, Des Moines Experience as subintern in the ICU/AMICU; daily rounds and teaching with medical critical care staff.

Clinical Endocrinology New patient evaluation, inpatient referral; returning patients in diabetes, endocrine clinic; complete patient evaluations, charts; participation in clinical conferences.

Endocrine Research Participation in all organized educational division activities, suitable clinical activities; work in research laboratory of senior staff member, participation in ongoing project. Prerequisite: consent of instructor.

Clinical Gastroenterology Work in consultation service at University Hospitals and Clinics or Veterans Affairs Medical Center; assistance in diagnostic procedures for patients examined as part of consultation service; participation in patient follow-up through weekly return clinic.

Research in Gastroenterology Prerequisite: consent of instructor.

Oncology Diagnostic skills in clinical medical oncology; methods, value of clinical staging of solid tumors and lymphomas; principles, practice of rational chemotherapy; outpatient follow-up, management of patients with lymphomas, solid tumors.

Clinical Hematology Diagnostic skills, practical approaches to anemia, blood coagulation, leukemia lymphomas; bone marrow preparations; principles, practice of rational therapy for hematological disorders.

 Palliative Care Experience caring for patients who cannot be cured, with primary goal to alleviate suffering, provide comfort.

Clinical Infectious Disease Diagnosis, treatment, follow-up, study of patients with infectious diseases, under staff guidance; techniques of diagnostic microbiology; participation in conferences, teaching activities.

Research in Infectious Disease Projects in molecular pathogenesis of infectious diseases and/or cell biology of host defense mechanisms; additional projects in application of hospital epidemiology techniques to clinical aspects of infectious diseases.

Pulmonary Disease Breadth, depth in diagnostic, therapeutic problems encountered in clinical pulmonary disease; evaluation of outpatients, inpatients under staff supervision; interpretation of special studies carried out in pulmonary function laboratory, thoracic bronchoscopy and brush biopsy of lung; exposure to diagnosis, management of acute respiratory failure in intensive care units at University of Iowa Hospitals and Clinics, Veterans Affairs Iowa City Health Care System.

Research in Pulmonary Disease Faculty-directed investigations; clinical pulmonary physiology, biopsy procedures in lung disease, pulmonary pathology, metabolic behavior of mycobacterium tuberculosis, clinical pharmacology. Prerequisite: consent of instructor.

Medical Intensive Care Unit

Pulmonary Medicine and Critical Care, Gundersen Clinic

Nephrology Evaluation of patients from University of Iowa Hospitals and Clinics inpatient service, Veterans Affairs Iowa City Health Care System; emphasis on early kidney disease, all varieties of hypertension.

Adult and Pediatric Nephrology and Hypertension Same as 070.653.

Medical and Pediatric Endocrinology Same as 070.662.
078:690 Research in Renal, Hypertension, and Electrolyte Disorders arr.
Laboratory investigation on renal physiology; participation in ongoing research involving large and small animals, using classical clearance methodology for studying aspects of sodium metabolism, influence of drugs. Prerequisite: fourth-year M.D. enrollment.

078:700 Clinical Rheumatology arr.
Clinical features of rheumatic diseases, their differential diagnosis, principles of management; patients from arthritis clinic, inpatient consultation service of University of Iowa Hospitals and Clinics, Veterans Affairs Iowa City Health Care System.

078:800 Geriatrics Elective arr.
Health monitoring, evaluation of patients 75 and older on University of Iowa Hospitals and Clinics internal medicine service; emphasis on diseases that occur most commonly or exclusively in elderly. Same as 115:426.

078:835 Subinternship in Medical Psychiatry 4 s.h.

078:902 Subinternship General Medicine: Gundersen Clinic, La Crosse, Wisconsin arr.

078:998 Internal Medicine on Campus arr.

078:999 Internal Medicine off Campus arr.
Prerequisite: consent of department.
Medical Scientist Training Program

Codirectors: Pamela Geyer (Biochemistry), Michael Welsh (Internal Medicine)
Web site: http://www.medicine.uiowa.edu/mstp

The Iowa Medical Scientist Training Program (MSTP) is a combined M.D./Ph.D. program that prepares trainees for careers in academic medicine, with emphasis on basic and clinical research. The program provides an effective means for integration of graduate education and doctoral research with the full complement of clinical studies necessary for the medical degree. With few exceptions, requirements for the combined M.D./Ph.D. can be completed in seven to eight years of continuous study.

Curriculum

The program is designed to integrate the scientific approach and clinical medicine. In the first two years of the program, trainees enroll in the basic science and introductory clinical portions of the Carver College of Medicine Doctor of Medicine curriculum. This provides a broad exposure to the language and organizing concepts that form the foundation for a career as a physician scientist. Trainees begin the research component of the graduate phase of the program through summer laboratory rotations, research presentations by MSTP faculty and students, and a student-sponsored seminar series. They also participate in MSTP grand rounds, a forum for patient-based discussions that emphasizes how science and medicine intersect.

The first-year curriculum addresses normal structure and function of human organ systems and emphasizes relationships among different disciplines. During the first semester, trainees take courses in biochemistry, gross anatomy, cell biology, and medical genetics. The second semester presents an integrated systemic core, which incorporates physiology, histology, and embryology and focuses on the development, structure, and function of human organ systems. Discipline-specific basic science instruction continues through the second semester with medical neuroscience and immunology courses.

The second-year curriculum emphasizes abnormal structure and function of human organ systems. Trainees take courses in pathology, microbiology, and pharmacology.

Throughout the first two years of study, students receive instruction in the foundations of clinical practice, including patient experience in medical history taking and physical examination. At the end of the second year, all trainees take Step One of the U.S. Medical Licensing Exam and then complete the basic core clinical clerkship in internal medicine. They gain broad exposure to the spectrum of human disease and experience with direct patient care before they enter the graduate phase of training.

At the beginning of the third year, trainees enroll in a graduate department or interdisciplinary graduate program.

The focus of the graduate years of study is engagement in academic and research experiences that promote the trainees’ development into independent investigators. Clinical contact is maintained during this phase of training through participation in seminar programs, MSTP grand rounds, and 050:212 MSTP Clinical Connections, a course that provides the opportunity for mentored clinical experiences.

Upon completing the Ph.D. dissertation, trainees return to the Carver College of Medicine curriculum to complete the clinical clerkship requirements appropriate to their career goals. During this phase, trainees bring a sophistication in the scientific approach to problem solving that they apply to human disease. They renew and develop clinical skills acquired in their early training and reinforce their understanding of the scientific basis of disease through continued participation in MSTP grand rounds. Upon completion of the clinical curriculum, trainees are awarded the M.D. and Ph.D.

Most graduates of the program elect to enter residency programs in clinical medicine and embark on careers as medical school faculty members in clinical disciplines with opportunities for basic and applied research. Other graduates accept academic appointments in basic science departments and spend a major part of their professional activity in biomedical research and teaching.
Admission

Applicants must meet requirements for admission to the M.D. program in the Carver College of Medicine and the admission requirements of the Graduate College. They should have completed requirements for a bachelor's degree at an accredited academic institution. In addition to outstanding academic credentials, including strength in biological, physical, and mathematical sciences, applicants must demonstrate aptitude for and commitment to scientific research, usually through productive research experience as undergraduates. Admission normally is made for entry to the first year of the program, but applicants already enrolled in the Carver College of Medicine may request admission with advanced standing.

Application

The Carver College of Medicine participates in the American Medical College Application Service (AMCAS). Program applicants should select M.D./Ph.D. Program-Type on their AMCAS application and instruct AMCAS to forward their credentials to the Carver College of Medicine (IA131). Applications should be submitted as early as possible to allow careful review by the admissions committees of the Medical Scientist Training Program and the Carver College of Medicine. All candidates must take the Medical College Admissions Test (MCAT), preferably in the spring and no later than the summer of the calendar year in which they submit their application. Application to the Graduate College is not required before acceptance to the MSTP. Trainees admitted to the program receive assistance with Graduate College enrollment.

Financial Support

Trainees receive stipend and tuition support from a National Institutes of Health MSTP training grant to The University of Iowa, supplemented by other institutional and individual awards. Students in the graduate phase of training receive support from their graduate departments and interdisciplinary programs. The program office also helps selected trainees apply for competitive national awards for outstanding academic and research achievement.

Courses

050:211 MSTP Research
Research experience. Prerequisite: Medical Scientist Training Program enrollment.

050:212 MSTP Clinical Connections
Experience with physician-scientist preceptor in medical interviewing, physical examination, and patient presentation through direct patient interaction. Prerequisite: participation in Medical Scientist Training Program graduate phase.
Study in the Department of Microbiology is dedicated to the branch of biological sciences that deals with the smallest living things: bacteria, archaea, fungi, algae, protozoa, and viruses. It is coupled with immunology, the study of the response of higher organisms to foreign substances.

Microbiology and immunology are at the forefront of the modern biological revolution. Microbes are often the experimental subjects of choice for examining basic genetic and biological phenomena because of their small size, rapid growth rate, and relative simplicity. A significant portion of contemporary biochemical research employs microbiological and immunological methods.

Current research is making theoretical and practical advances concerning microbial species and viruses that infect animals, including man, plants, and other microbes; the use of comparative genomics, gene expression profiling, and recombinant DNA methods to analyze basic biological processes and generate valuable products; the nature and occurrence of microbial life in extreme or unusual environments; microbial synthesis and modification of antibiotics and other natural products; the role of microbes in stabilization of the biosphere by recycling and detoxifying waste products; the genetics and regulation of metabolic processes; and the genetics and regulation of the immune response, including characterization of mechanisms used by bacteria to signal one another and characterization of interactions between different types of immune cells and their targets.

Microbiology is an excellent major for undergraduate students who want a good general education with emphasis on an important and interesting branch of biological sciences. Graduates find employment opportunities in government, hospitals, public health laboratories, research laboratories, and industrial laboratories (food, dairy, chemical, pharmaceutical, and genetic engineering companies). Those who pursue advanced degrees have more advanced career opportunities in these same areas as well as in college and university teaching.

Undergraduate Program

The College of Liberal Arts and Sciences administers undergraduate programs and grants undergraduate degrees in microbiology.

Bachelor of Science

Undergraduate students majoring in microbiology at The University of Iowa must complete the College of Liberal Arts and Sciences General Education Program. The B.S. requires a minimum of 21 s.h. in microbiology, including at least 12 s.h. taken at The University of Iowa. All University of Iowa courses must be chosen from those numbered 061:147 and above. No more than 2 s.h. of 061:161 (061:171 for honors students) and no more than 2 s.h. of 061:163 may be counted toward the 21 s.h. requirement. Students may count 061:218, but not 061:220, toward the requirement.

Students may take microbiology courses more advanced than 061:157 General Microbiology only if they receive a grade of C or higher in
061:157 and have the instructor’s consent for the courses. Mathematics and science courses required by the department for the B.S. may not be taken pass/nonpass.

Microbiology Seminar (061:163) should be taken for credit only once during the senior year. Students are encouraged to take the course for 0 s.h. during other semesters after they have taken 061:157.

Microbiology majors must take the following in addition to required microbiology courses:

- 002:010-002:011 Principles of Biology I-II 8 s.h.
- 004:011-004:012 Principles of Chemistry I-II 8 s.h.
- 004:121-004:122 Organic Chemistry I-II 6 s.h.
- 004:141 Organic Chemistry Laboratory 3 s.h.
- 029:011-029:012 College Physics 8 s.h.
- 099:120 Biochemistry and Molecular Biology I 3 s.h.
- 099:130 Biochemistry and Molecular Biology II 3 s.h.
- One of these: 22M:016 Calculus for the Biological Sciences 4 s.h.
- 22M:025 Calculus I 4 s.h.

In addition, the following courses may be recommended for some students:

- 08N:080 Nonfiction Writing 3 s.h.
- 171:161 Introduction to Biostatistics 3 s.h.

*Some medical schools require a biostatistics course for admission.

**Four-Year Graduation Plan**

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

**Before the third semester begins:** 002:010; 004:011, and 004:012; an approved calculus class; and at least one-quarter of the semester hours required for graduation

**Before the fifth semester begins:** 002:011; 004:121, 004:122, and 004:141; 061:157; and at least one-half of the semester hours required for graduation

**Honors**

Microbiology majors who are members of the University Honors Program may enroll in the honors program in microbiology. Membership in the University Honors Program requires that students maintain a cumulative University of Iowa g.p.a. of at least 3.33. Microbiology honors students must also maintain a g.p.a. of at least 3.33 in microbiology courses. The program requires 25 s.h. of course work in microbiology, including 6 s.h. in 061:171 Honors Undergraduate Research in Microbiology, which constitutes an introduction to experimental research. At the end of the research, students present written and oral reports. Students who successfully complete these requirements receive the B.S. with honors.

**Minor**

An undergraduate minor in microbiology requires at least 15 s.h. of credit in microbiology courses with a g.p.a. of at least 2.00. Students must take at least 12 of the 15 s.h. at The University of Iowa. All University of Iowa courses must be chosen from those numbered 061:147 and above.

No more than 2 s.h. of 061:161 or 061:171 and 2 s.h. of 061:163 may be counted toward the 15 s.h. requirement. Students may count 061:218, but not 061:220, toward the minor.

**Graduate Programs**

The Carver College of Medicine administers graduate programs in microbiology; graduate degrees are granted through the Graduate College. See Carver College of Medicine and Graduate College in the Catalog for general information about study in medicine and graduate study at the University.

Generally, students admitted to the graduate program pursue the Ph.D. All students admitted
to advanced degree programs are expected to assist in departmental teaching.

The objectives of the graduate programs in microbiology are to help students become highly qualified in microbiology research and teaching. The program offers study in six subdisciplines: pathogenic bacteriology, microbial genetics, immunology, microbial physiology, animal virology, and bioinformatics. Several areas involve interdisciplinary training both within and outside the department, so students receive broad experience during their course of study. Students also may pursue interdisciplinary Ph.D. programs in genetics, immunology, and molecular biology. During their first year, students rotate in three laboratories of their choice and are advised by the Graduate Student Advisory Committee. At the end of the first year, they choose a research supervisor who chairs their advisory committee. The committee provides intellectual and research guidance for the student's training.

The Department of Microbiology cooperates with other University of Iowa departments to give students ample access to diverse course offerings, seminars, and research programs. For example, microbiology students may participate in courses and seminars in clinical laboratory microbiology, immunology, genetics, cellular and molecular biology, biocatalysis/biotechnology, and electron microscopy.

**Master of Science**

M.S. students are required to take a minimum of 12 s.h. of microbiology courses in three of the department's six subdisciplines. They may substitute a course already taken at the University of Iowa or elsewhere for a course requirement, with the M.S. advisory committee's approval. Additional course requirements depend on students' interests and the advice of the examining committee. Students must write a thesis based on their own research and defend it satisfactorily in an oral examination. No more than 9 s.h. of credit for thesis research may be counted toward the Graduate College's minimum requirement of 30 s.h. for the Master of Science.

**Doctor of Philosophy**

The Ph.D. requires a minimum of 15 s.h. of credit in graduate-level courses. Students may substitute a course already taken at the University of Iowa or elsewhere for a course requirement, with the Ph.D. advisory committee's approval. They also must pass a comprehensive examination before their sixth semester in the program and write a thesis based on their own research. The thesis must be defended satisfactorily in an oral examination.

**Admission**

Applicants must meet the admission requirements of the Graduate College. They should have a cumulative g.p.a. of at least 3.00 and must have completed courses in biological sciences, chemistry (inorganic and organic), mathematics including calculus, and physics. Those admitted with deficiencies must complete the relevant course work during their first year of graduate study. Admission is determined through a review and formal vote by the faculty. Preference is given to students applying for the Ph.D. program.

**Facilities**

The department shares the Bowen Science Building with the Departments of Anatomy and Cell Biology, Biochemistry, Pharmacology, and Physiology and Biophysics. Laboratory space and modern equipment are available for teaching and research.

**Courses**

- **061:005 Microbes and Our World** 2 s.h. Bacteria, viruses, and parasites and their role in shaping human health, industry, current affairs, history.
- **061:103 Principles of Infectious Diseases** 5 s.h. Principles and methods essential to study of microorganisms, their isolation and identification; microorganisms in infectious diseases; current immunology concepts. Prerequisite: M.D. enrollment.
- **061:104 Principles Infectious Diseases—Physician Assistant** 4 s.h. Principles and methods essential to study of microorganisms, their isolation and identification; microorganisms in infectious diseases; current immunology concepts. Prerequisite: Physician Assistant Program enrollment.
- **061:112 Pharmacy Microbiology** 3 s.h. Medical microbiology: bacteriology, immunology, pathogenic bacteriology, virology, mycology, parasitology. Prerequisite: pre-pharmacy standing.
- **061:113 Dental Microbiology** 3 s.h. Medical microbiology: bacteriology, immunology, pathogenic bacteriology, virology, mycology, parasitology. Prerequisite: D.D.S. enrollment.
- **061:147 Survey of Immunology** 4 s.h. Major features of the evolutionary, ontogenic, and comparative development of innate and adaptive immune systems and their functions at the cellular and molecular levels. Prerequisite: strong background in biology, including physiology. Pre- or corequisite: biochemistry.
061:157 General Microbiology 3 s.h.
Principles of microbial diversity; microbial genetics, physiology, and metabolism, pathogenic microbeology, virology, immunology, industrial and environmental microbiology; laboratory emphasis on basic techniques. Prerequisites: 002:010 and 002:011. Corequisite: 004:124.

061:159 Pathogenic Bacteriology 3 s.h.
Pathogenic bacteria, with emphasis on mechanisms of pathogenicity, laboratory methods for isolation, identification, laboratory emphasis on advanced methods for study of pathogenic bacteria. Prerequisites: grade of C or higher in 061:157 and consent of instructor.

061:160 Microbial Physiology 3 s.h.
Bacterial genetics, cell structure, growth, energy metabolism, biosynthesis, mechanisms of signal transduction and regulation; laboratory supplement in 061:180. Prerequisite: grade of C or higher in 061:157.

061:161 Undergraduate Research in Microbiology arr.
Experimental research under faculty supervision. Prerequisite: grade of C or higher in 061:157 and consent of instructor.

061:163 Seminar: Microbiology 2 s.h.
Current topics in microbiology, immunology. Prerequisite: grade of C or higher in 061:157.

061:164 Health Sciences Microbiology 4 s.h.
Overview of bacteria, viruses, and eukaryotic microorganisms that cause human disease; microbial structure, growth control and reproduction; immunology in the context of host defense mechanisms. Prerequisite: pre-pharmacy or pre-nursing student standing or consent of instructor. Pre- or corequisite: 002:002 or 002:010 or 002:021.

061:168 Introduction to Animal Viruses 3, 5 s.h.
Basic physical, chemical, biological properties of animal viruses, their association with human disease; optional laboratory with emphasis on methods in basic, clinical, and molecular virology. Prerequisites: grade of C or higher in 061:157 and consent of instructor.

061:170 Microbial Genetics 3 s.h.
Genetics of bacteria, bacteriophages; laboratory supplement in 061:175. Prerequisite: grade of C or higher in 061:157 or consent of instructor.

061:171 Honors Undergraduate Research in Microbiology arr.
Experimental research under faculty supervision. Prerequisites: junior or senior standing and a grade point average of at least 3.33.

061:175 Microgenetics Laboratory 3 s.h.
Basic principles of genetic analysis of bacteria and bacteriophage. Prerequisite: consent of instructor. Pre- or corequisite: 061:170.

061:180 Microbial Physiology Laboratory 2 s.h.

061:188 Microbial Biotechnology 3 s.h.
Industrially relevant microbiology; molecular biology, fermentation, cell culture, downstream processing; overview of industrial organisms; processes to make enzymes, bulk chemicals, antibiotics; safety, economic, regulatory aspects. Prerequisite: grade of C or higher in 061:157.

061:190 Web-Based Nursing Microbiology 4 s.h.
Nursing microbiology, principles of immunology, web-based instruction. Prerequisite: pre-nursing standing or consent of instructor. Pre- or corequisite: 002:002 or 002:010 or 002:021.

061:201 Graduate Immunology I 3 s.h.
Prerequisites: courses in college biology, genetics, general chemistry, and introductory immunology. Recommended: biochemistry course. Same as 148:201.

061:202 Graduate Immunology II 3 s.h.
Inter cellular adhesion in the immune system, regulation of inflammation and lymphocyte traffic, immunological tolerance, autoimmune diseases, immune responses to viruses and parasites; problem-oriented experimental approaches, relevant journal articles. Same as 148:202.

061:207 Advanced Topics in Immunology 3 s.h.
Literature; skill in scientific presentation. Prerequisites: 061:201 and 061:202, or 148:201 and 148:202, or equivalents; and consent of instructor. Same as 148:291.

061:210 Advance Prokaryotic Molecular Biology 3 s.h.

061:217 Integrated Topics in Infectious Diseases 3 s.h.
Clinical cases used to raise questions in host-parasite interactions; case/scientific exposes followed by related journal club discussions at next class session. Prerequisite: consent of instructor.

061:218 Microscopy for Biomedical Research 3 s.h.
Methods of tissue preparation for transmission, scanning electron microscopy, fixation, embedding, ultra-thin sectioning and staining, theory, use, maintenance of electron microscopes; associated photographic techniques, advanced techniques such as immune EM, freeze-fracture. Prerequisites: biological science course and consent of instructor. Same as 002:216, 060:218.

061:220 Advanced Microscopy Biomedical Research arr.
Individually designed projects, library searches, seminar and workshop participation. Prerequisites: introductory EM course and consent of instructor. Same as 002:220, 060:220.

061:226 Advanced Topics in Microbial Development 2 s.h.
Lectures and journal club discussions on molecular and cellular mechanisms of bacterial and viral adaptation and survival in animate and inanimate environments. Prerequisite: consent of instructor. Pre- or corequisites: 142:220, 061:160 or 061:260, and 061:170 or 061:270.

061:259 Graduate Pathogenic Bacteriology 5 s.h.
Pathogenic bacteria, with emphasis on mechanisms of pathogenicity, laboratory methods for isolation, identification; laboratory emphasis on advanced methods for study of pathogenic bacteria; research literature. Prerequisite: consent of instructor.

061:260 Graduate Microbial Physiology 3 s.h.
Bacterial genetics, cell structure, growth, energy metabolism, biosynthesis, mechanisms of signal transduction and regulation; laboratory supplement in 061:280.

061:261 Graduate Research in Microbiology arr.
Prerequisites: microbiology graduate standing and consent of instructor.

061:263 Graduate Student Research Seminar 1 s.h.
Presentation of thesis work in progress. Prerequisite: microbiology graduate standing or consent of instructor.

061:264 Directed Study in Microbiology arr.
Prerequisites: microbiology graduate standing and consent of instructor.

061:265 Topics in Virology Literature 1 s.h.
Papers of current interest in primary virology literature. Prerequisite: consent of instructor.

061:267 Graduate Introduction to Animal Viruses 3, 5 s.h.
Basic physical, chemical, biological properties of animal viruses, their association with human diseases; optional laboratory with emphasis on methods in basic, clinical, and molecular virology; discussion topics in the primary literature. Prerequisite: consent of instructor.

061:271 Integrated Topics in Infectious Diseases 3 s.h.
Clinical cases used to raise questions in host-parasite interactions; case/scientific exposes followed by related journal club discussions at next class session. Prerequisite: consent of instructor.

061:278 Microscopy for Biomedical Research 3 s.h.
Methods of tissue preparation for transmission, scanning electron microscopy, fixation, embedding, ultra-thin sectioning and staining, theory, use, maintenance of electron microscopes; associated photographic techniques, advanced techniques such as immune EM, freeze-fracture. Prerequisites: biological science course and consent of instructor. Same as 002:216, 060:218.

061:280 Advanced Microscopy Biomedical Research arr.
Individually designed projects, library searches, seminar and workshop participation. Prerequisites: introductory EM course and consent of instructor. Same as 002:220, 060:220.

061:286 Graduate Student Research Seminar 1 s.h.
Presentation of thesis work in progress. Prerequisite: microbiology graduate standing or consent of instructor.

061:287 Directed Study in Microbiology arr.
Prerequisites: microbiology graduate standing and consent of instructor.

061:289 Topics in Virology Literature 1 s.h.
Papers of current interest in primary virology literature. Prerequisite: consent of instructor.
Microbiology

061:268 Biology and Pathogenesis of Viruses 2 s.h.
Molecular biology of animal DNA and RNA viruses, interaction of these viruses with eukaryotic cells; mechanisms of viral latency, persistence, cellular transformation, oncogenesis; virology literature. Prerequisites: 061:168 or 061:267 or equivalent, and biological sciences major.

061:270 Graduate Microbial Genetics 3 s.h.
Genetics of bacteria, bacteriophages; supplementary laboratory work in 061:271.

061:271 Graduate Microbial Genetics Laboratory 3 s.h.
Basic principles of genetic analysis in bacteria. Prerequisite: consent of instructor. Pre- or corequisite: 061:270.

061:275 Perspectives in Biocatalysis 1 s.h.
Applied enzymology, protein design, structure-activity relationships, biosensor technology, microbial transformations, biodegradation of environmental pollutants. Same as 004:275, 046:275, 052:275, 053:275, 099:275.

061:279 Bacterial Diversity 4 s.h.
Isolation, cultivation of bacteria from various habitats; physiological genetic characteristics of bacterial groups. Prerequisites: grade of C or higher in 061:157; 061:160 or 061:170 or equivalent; and consent of instructor.

061:280 Graduate Microbial Physiology Laboratory 2 s.h.
Isolation and growth of bacteria, bacterial function products, nutrient transport, metabolic pathways, enzymes. Prerequisite: consent of instructor.

061:288 Graduate Microbial Biotechnology 3 s.h.
Industrially relevant microbiology; molecular biology, fermentation, cell culture, downstream processing; overview of industrial organisms; processes to make enzymes, bulk chemicals, antibiotics; safety, economic, regulatory aspects. Prerequisite: microbiology major or consent of instructor.

061:299 Mechanisms of Parasitism Journal Club 1 s.h.
Same as 142:299.
Neurology

Head: Robert L. Rodnitzky
Professors: Harold P. Adams Jr., Adel Afifi (Pediatrics/Anatomy and Cell Biology), Kevin Campbell (Physiology and Biophysics), Antonio R. Damasio, Hanna Damasio, Jun Kimura, Ramon Lim, Jane Paulsen (Psychiatry), Matthew Rizzo, Robert Rodnitzky, William Talman, Daniel Tranel (Psychology), Gary Van Hoesen (Anatomy and Cell Biology), Michael Wall (Ophthalmology and Visual Sciences), Thoru Yamada
Professors emeriti: William E. Bell (Pediatrics), Arthur L. Benton (Psychology)
Adjunct professor: Charles Rockland
Associate professors: Ralph Adolphs (Neurosurgery), Steven Anderson, Antoine Bechara, Daniel Bonthius (Pediatrics), Beverly Davidson (Internal Medicine), Patricia Davis, M. Eric Dyken, Thomas Grabowski, Mark Granner, Matthew Howard (Neurosurgery), Robert D. Jones, Praful Kelkar, Andrew Lee (Ophthalmology and Visual Sciences/Surgery), Katherine D. Mathews (Pediatrics), Henry Paulson, E. Torage Shivapour, James B. Worrell
Assistant professors: Ed Aul, Natalie Denburg, Deema Fattal, Lynn Geweke, Erik St. Louis, Ergun Uc, Malcolm Yeh, Asgar Zaheer
Associate: Shekar Raman
Postdoctoral associates, fellows: Pedro Gonzalez, Coleman Martin, Stephanie Preston, Evan Wenger

Neurology is the branch of medical science concerned with diagnosis and management of disorders of the brain, spinal cord, peripheral nervous system, and muscle.

The Department of Neurology’s hallmark is its history of carefully integrating patient care and the education of medical, postdoctoral, and graduate students.

The department provides clinical and clinical research training to third- and fourth-year M.D. students. An active, three-year approved residency program qualifying physician trainees for board certification in neurology is a major aspect of the department’s activity; experience in clinical electrophysiology, pediatric neurology, psychiatry, and neuropathology is part of this training. The department also offers research opportunities in various fields of neuroscience, including neuropsychology, neuroimaging, and neuroanatomy, to Ph.D. students in neuroscience and psychology.

The faculty’s investigative interests center on cognitive neuroscience, degenerative diseases, cerebrovascular disease, neurogenetics, neuromuscular diseases, electrophysiological correlates of central and peripheral nervous system disease, growth factors in the nervous system, control and regulation of autonomic functions, neuro-ophthalmology, movement disorders, and pain management.

Courses

064:011 Clinical Neurology 2, 4 s.h.
Experience in clinical neurology through ward work and case-based conferences linked to required reading; focus on neurologic examination, diagnosis of neurologic problems; four-week clerkship.

064:238 Introductory Neuropsychological Assessment arc.
Standard behavioral assessment procedures; administration of neuropsychological tests under staff supervision; preparation of integrated reports on collected data; involvement in research project.

064:239 Advanced Neuropsychological Assessment arc.
Continuation of 064:238.

064:240 Topics in Cognitive Neuroscience 3 s.h.
Key topics in the neural basis of human cognition; research literature. Recommended: graduate courses in basic neuroscience, cognitive psychology. Same as 132:240.

064:302 Advanced Inpatient Neurology 4 s.h.

064:303 Advanced Outpatient Neurology 4 s.h.

064:310 Cerebrovascular Disease arc.
Experience in evaluation, management of patients with cerebrovascular diseases; conferences, clinical rounds.

064:998 Neurology on Campus arc.

064:999 Neurology off Campus arc.
Neurosurgery

The Department of Neurosurgery provides an experience oriented toward patient care and basic research concerning diseases and physiology of the nervous system. Students develop awareness of neurosurgery’s role in treating head and spine trauma, vascular disorders, brain and spinal cord tumors, pain and peripheral nerve abnormalities, degenerative spine pathology, and surgical treatment of epilepsy and movement disorders.

Clinical courses are designed around patient-centered discussions interwoven with operating room experiences. Lectures and conferences are scheduled on specific topics.

The department provides fourth-year M.D. students with access to special expertise in selected topics of investigation regarding the central nervous system and to a clinical course through special arrangements with the faculty.

Faculty

Neurology faculty strengths are centered in physiology of spinal cord trauma, epilepsy, auditory brain function and pain, primary brain tumor genetics, central nervous system tissue culture, spinal column biomechanics, and movement disorders. The department has expertise in clinical management across the spectrum of central nervous system diseases.

Facilities

Multiple, fully equipped laboratory space is available to support scientific research of the central nervous system. Faculty and technical assistance is available in all laboratories.

Courses

Neurosurgery courses are open only to M.D. and qualified associated health sciences students.

183:227 Subinternship in Neurosurgery  4 s.h.
Advanced clinical clerkship in neurological surgery; emphasis on diagnosis and operative management of surgical neurological disease.

183:228 Research in Neurological Surgery  arr.
Laboratory investigation of spinal cord injury, spinal column biomechanics and instrumentation, electrophysiology of pain, epilepsy and hearing, molecular genetics and physiology of brain tumors.

183:999 Neurosurgery off Campus  arr.
Arranged by student with department approval.
Obstetrics and Gynecology

Head: Jennifer R. Niebyl
Professors: Barrie Anderson, Jo Ann Benda (Pathology), Rudolph P. Galask (Microbiology), Susan R. Johnson, Jennifer R. Niebyl, Ingrid E. Nygaard, Elaine Smith (Epidemiology), Craig H. Syrop, Bradley Van Voorhis, Roger A. Williamson, Jerome Yankowitz, Frank J. Zlatnik
Professors (clinical): Koen DeGeest, Jane Engeldinger, Sanford M. Markham
Adjunct clinical professor: Robert M. Kretzschmar
Associate professors: Anuja Dokras, Stephen K. Hunter, Asha Rijhsinghani
Associate professors (clinical): Noelle C. Bowdler, Marygrace Elson
Adjunct clinical associate professors: Grant Paulsen, Charles W. Schauberg, Rebecca Shaw, Gerald Shirk
Assistant professors: Catherine Bradley, Baoli Yang
Assistant professors (clinical): David P. Bender, William Davis, Colleen Kennedy, Gregory Skopec, Jill Vibbaker, Kelly Ward
Associates: Janis L. Andrews, Michael Goodheart
Web site: http://obgyn.uihc.uiowa.edu/

Medical Student Training

Courses in the Department of Obstetrics and Gynecology are designed to give M.D. students a comprehensive survey of reproductive medicine. This is done through a series of didactic lectures, inpatient and outpatient assignments, ward rounds, teaching seminars, and special elective courses.

The third-year clerkship (066:004 Clinical Obstetrics and Gynecology) gives students the core knowledge, skills, and attitudes needed to provide primary health care to female patients.

The department offers fourth-year medical students a variety of electives that provide advanced training in the special areas of obstetrics and gynecology. In addition to clerkships at University of Iowa Hospitals and Clinics, these electives include a rotation at the Gundersen Clinic in La Crosse, Wisconsin, and other arranged off-campus courses.

Residency

The department offers a four-year residency. Upon completion, graduates are eligible for the written and oral examinations leading to certification by the American Board of Obstetrics and Gynecology.

Residents are assigned to the various divisions and clinical services of the department and care for both hospital inpatients and outpatients. Training is provided in normal and abnormal obstetrics, gynecologic surgery, office gynecology, ultrasound, reproductive endocrinology, gynecologic oncology, urogynecology, family planning, and endoscopic procedures.

Courses

066:004 Clinical Obstetrics and Gynecology arc
Proper diagnosis and management of obstetric and gynecologic disorders, including antepartum, intrapartum, and postpartum care; management of complications; and obstetric and gynecologic surgery.

066:006 High Risk Antepartum Obstetrics Subinternship arc
Experience in evaluating new patients in a high-risk obstetric clinic; continuing antepartum care; doing work-up, ordering diagnostic studies, and following course of complicated patients admitted to obstetric ward; assisting in diagnostic, therapeutic procedures such as fetal heart rate testing, amniocentesis, ultrasonography, intrauterine fetal transfusion.

066:010 Gynecologic Oncology Subinternship arc
Experience on a gynecologic oncology service, including operating room, inpatient and outpatient care; team management approach to gynecologic cancer patient, treatment and follow-up of invasive gynecologic neoplasms, etiology and risk factors for gynecologic neoplasias, pre- and postoperative evaluation and treatment of gynecologic neoplasias; research project encouraged.

066:013 Reproductive Endocrinology Subinternship arc
Experience evaluating new and returning patients in the Reproductive Endocrinology and Infertility Clinic; participation in preoperative, operative, and postoperative care, advanced gynecologic ultrasound, and in vitro fertilization services.

066:016 Advanced Obstetric-Gynecologic Clerkship: La Crosse, Wisconsin arc
Experience in a large professional obstetrics and gynecology practice group in a community setting; exposure to clinical obstetrics and gynecology.

066:998 Ob/Gyn on Campus arc
066:999 Ob/Gyn off Campus arc
Ophthalmology and Visual Sciences

Head: Thomas A. Weingeist
Assistant professors: Michael Abramoff, Hilary A Beaver, Terry A. Braun, Emily C. Grenlee, Brian R. Kirschling, Robert F. Mullins, Todd E. Scheetz, Christine W. Sindt, Naureen A. Syed
Web site: http://webeye.ophth.uiowa.edu

Ophthalmology is a medical and surgical specialty concerned with the diagnosis and treatment of diseases of the eye and its adnexa. The Department of Ophthalmology and Visual Sciences combines postgraduate training with research and patient care in all aspects of the visual sciences. Subspecialties represented in the department include cataract surgery, cornea and external diseases, contact lens and refraction services, genetics and molecular biology, glaucoma, laser refractive surgery, low vision, neuro-ophthalmology, ocular echography, ocular pathology, ocular vascular diseases, optometric services, pediatric ophthalmology and adult strabismus, and retinal disorders.

The department offers clinical and research training to M.D. students and limited graduate studies leading to a Ph.D. in Anatomy and Cell Biology, Molecular Biology, and Genetics. A three-year residency program with clinical experience in the ophthalmic subspecialties is offered to physician trainees. Graduates qualify for the written and oral examinations leading to certification by the American Board of Ophthalmology. Postgraduate fellowships of one to two years are available for qualified ophthalmologists in most subspecialty areas.

Facilities

The department maintains research laboratories for cell biology, biochemistry, morphology, tumor diagnosis, pathology, electrophysiology, pupillography, molecular biology, and vascular disease. Clinical facilities in ophthalmology are available at University of Iowa Hospitals and Clinics in the Pomerantz Family Pavilion and at Veterans Affairs Iowa City Health Care System and the Veterans Affairs Central Iowa Health Care System in Des Moines. The department also manages an eye clinic at the Broadlawns Medical Center in Des Moines as well as outreach programs in other communities. The department houses the University of Iowa Center for Macular Degeneration.

The department sponsors clinical conferences open to community ophthalmologists in Iowa and surrounding states where physicians can earn continuing medical education credits. The department also sponsors an annual alumni meeting with participation by nationally and internationally recognized ophthalmologists and vision scientists.

The Department of Orthopaedics and Rehabilitation offers two types of postgraduate training. The first is a five-year integrated clinical program, in which interns and residents participate simultaneously in inpatient and outpatient care, surgery, and sciences related to the neuromusculoskeletal system. The second is a six-year program for those interested in full-time academic orthopaedic careers.

Clinical Program
Trainees enter this program directly from medical school through the National Internship Matching Plan.

During the first year, trainees gain experience not only in clinical orthopaedics but also in medicine, pediatrics, neurology, surgical specialties, intensive care, anesthesiology, and other services. During the following years, residents gain experience in trauma, musculoskeletal oncology, children’s orthopaedics, adult orthopaedics, neuromuscular disorders, rehabilitation, prosthetics and orthotics, rheumatology, and basic science related to orthopaedics. They take specialized courses in anatomy, bone histology, biochemistry, physiology, and pathology.

A weekly seminar covers biomechanics, kinesiology, and selected clinical subjects.

Academic Programs
In addition to the training described for the clinical program, this program includes an additional one or two years of research in a field that interests the resident and is related to the musculoskeletal system. The research may be done in one of the orthopaedic laboratories or in a basic science department.

At the undergraduate level, the Department of Orthopaedics and Rehabilitation participates in the Bachelor of Science in athletic training, which is offered by the Department of Exercise Science (College of Liberal Arts and Sciences). Members of the orthopaedics and rehabilitation sports medicine faculty teach 076:187 Practicum in Athletic Training IV, a two-semester advanced clinical sequence (8 s.h.). Students who complete the program are eligible to apply for national certification in athletic training and pursue employment opportunities as health care professionals for sports medicine clinics and hospitals, as well as in academic settings.

Laboratories
The orthopaedics laboratories deal with problems in these major subject areas.

Biochemistry: the biochemistry of proteoglycans, collagens, and matrix proteins, both normal and altered in musculoskeletal disorders

Biomechanics: problems of the upper extremity; biomechanics of the spine, hip, and gait; total joint replacements (in conjunction with the College of Engineering)

Cell and molecular biology: studies of normal bone, cartilage, tendon, muscle, and tissues altered by experiment and disease

Facilities
The department is housed in the John Pappajohn Pavilion of University of Iowa Hospitals and Clinics and has an active service in the Veterans Affairs Iowa City Health Care System.

Facilities include 48 orthopaedic beds, five outpatient clinics, inpatient and outpatient operating rooms, a specialty library, a specialty
radiology unit, and physical therapy and rehabilitation facilities.

Specialty clinics deal with disorders such as scoliosis, club feet, congenital dislocated hip, neuromuscular disease, metabolic disease, amputation, neoplasm, trauma, and neck, back, hip, foot, knee, and hand problems.

Physicians in the outpatient clinic see approximately 175 patients per day. Approximately 5,000 major operations are performed each year under the auspices of the department.

The department provides consulting service to the Center for Disabilities and Development, Child Health Specialty Clinics, and two state programs that serve people with mental retardation.

Courses

076:002 Clinical Orthopaedics  arr.

076:187 Practicum in Athletic Training IV 4 s.h.
Clinical experience arranged through the athletic training program and the Department of Orthopaedic Surgery for athletic training majors; development of global proficiency in clinical skills. Prerequisites: athletic training major and grade of C or higher in 027:183 and 027:186.

076:201 Advanced Clinical Orthopaedics  arr.
Prerequisite: fourth-year M.D. enrollment.

076:202 Musculoskeletal Trauma  arr.
Prerequisite: fourth-year M.D. enrollment.

076:205 Physical Medicine and Rehabilitation 4 s.h.

076:998 Orthopaedics on Campus  arr.
Prerequisite: fourth-year M.D. enrollment.

076:999 Orthopaedics off Campus  arr.
Prerequisite: fourth-year M.D. enrollment.
Otolaryngology—Head and Neck Surgery

Head: Bruce J. Gantz
Associate professors: Nancy M. Bauman, Carolyn J. Brown, Keith D. Carter, Steven H. Green, Michael P. Karnell, José M. Manaligod
Assistant professors: Kristi E. Chang, Kenneth J. Dornfeld, Daniel F. Eberl, Eileen M. Finnegan, Marlan R. Hansen, John H. Lee, Russell B. Smith, Douglas K. Trask, Douglas J. Van Daele, Min Yao
Clinical assistant professors: Matthew Brown, Jeffrey Carithers, Thomas A. Ericson, Steven R. Herwig, Brenton Koch, Phillip C. Lee, Donald A. Maschka, Richard B. Merrick, Irving E. Peterson, Russell E. Schurtz, Mark K. Zlab

The Department of Otolaryngology—Head and Neck Surgery is one of the most comprehensive in the world. Founded in 1922, it also is among the oldest in the United States. Its facilities are situated at University of Iowa Hospitals and Clinics, one of the country's largest university-owned teaching hospitals. US News & World Report has consistently ranked the department's program among the top three in the nation.

The department's chief focus areas are education and training, patient care, and research. M.D. students in the Carver College of Medicine, residents, and fellows benefit from a faculty dedicated to providing thorough training in all aspects of otolaryngology and patient care.

Patients in the otolaryngology clinic enjoy access to comprehensive care in any of five subspecialties: pediatric otolaryngology, otology/neurotology, general otolaryngology and rhinology, head and neck oncology, and plastic and reconstructive surgery. University of Iowa faculty members from neurology, ophthalmology, and radiation oncology hold joint appointments in otolaryngology, adding depth to the department's resources.

The department is home to prominent research programs in cleft palate and other craniofacial defects, head and neck oncology, cochlear implants, and molecular genetics. It also offers fellowships in otology/neurotology, pediatric otolaryngology, and head and neck oncology.

Residency Program
Each year the Department of Otolaryngology—Head and Neck Surgery accepts five applicants to its residency program, which is accredited by the Accreditation Council for Graduate Medical Education. Three residents are matched to the four-year clinical track, and two are matched to the six-year research track.

The clinical track provides four years of concentrated clinical study and application in all aspects of otolaryngology. Residents begin their training with a seven-week intensive basic science course divided into an anatomy component, which includes a supervised cadaver dissection, and a 160-hour lecture series that details the study of otolaryngology and related disciplines. Each resident also completes two research rotations in order to explore research areas that interest them.

The research track is a combined clinical-research program designed for residents interested in an otolaryngology research career. After an internship year, residents complete two years of research followed by four years of clinical training. The interaction of clinicians and basic scientists from several departments affords residents the opportunity for involvement in a wide spectrum of current research in areas such as electrophysiology of the auditory system, the genetics of head and neck cancer, and gene therapy.

Fellowships
The Department of Otolaryngology—Head and Neck Surgery offers two-year fellowships in otology/neurotology and in pediatric otolaryngology, which are accredited by the Accreditation Council for Graduate Medical Education, and a one- or two-year fellowship in head and neck oncology accredited by the Advanced Training Council.

One applicant is admitted to the otology/neurotology fellowship program every two years. Otology fellows spend a minimum of 20 months on the clinical service. They attend all otology/neurotology clinics and neurotology cases in the operating room, and are responsible for inpatient service. They also have one day of dedicated research time each week.
The pediatric otolaryngology fellowship program admits one applicant each year. Fellows spend a minimum of 18 months on the clinical service, where they have the opportunity to train with all pediatric otolaryngology faculty members. Each fellow also has six months of dedicated time for academic research.

One applicant is accepted as a head and neck oncology fellow each year. Training is largely clinical, allowing fellows the opportunity to participate in a variety of procedures, ranging from skull base resection to laryngeal rehabilitation. Fellows routinely perform 35 to 45 free-tissue transfers during one year of training. They also complete a clinical and/or basic science research project relating to head and neck oncology.

Courses

068:003 Clinical Otolaryngology 2 s.h.
068:100 Clinical Internship in Otolaryngology arr.
068:120 Independent Study in Otolaryngology arr.
    Individual meetings with a faculty member; directed reading, small research study, or similar project. Repeatable.
068:199 Basic Otolaryngologic Science arr.
    Supervised cadaver head and neck dissection, with 14 areas in detail. Two weeks.
068:998 Otolaryngology on Campus arr.
068:999 Otolaryngology off Campus arr.
    Arranged by student with department approval.
Pathology

Head: Michael B. Cohen
Professors emeriti: James A. Goeken, Thomas H. Kent, Richard G. Lynch, George D. Penick, Charles E. Platz, Earl F. Ross, Marian Schwabauer
Adjunct clinical professors: Dorryl L. Buck (St. Luke's Hospital, Cedar Rapids, Iowa), Oskar W. Rokhlin, David L. Witte (Laboratory Control, Ltd., Ottumwa, Iowa)
Associate professors: Mark Bowman, Morris O. Dailey, Barry De Young, Daniel Diekema, Ronald D. Feld, Thomas H. Haugen, Michael Henry, Chris Jensen, Praful Kelkar, Patricia Kirby, Michael Knudston, Michael Mackey, Marcus Nashelisky, Tom Raife, Annette Schlaeter, Robert D. Tucker, Mohammad Vasef
Adjunct associate professor: Julia C. Goodin (State Medical Examiner)
Adjunct clinical associate professor: Bradley Randall (Sioux Falls, S.D.)
Assistant professors: Yashpal Agrawal, Laila Dahmoush, Jonathan Heusel, Mei-Yu Hsu, Michael Icardi, Zoya Kurango, Tomomi Kuwana, Kevin Legge, PiFu Luo, Peter Nagi, Sandra Richter, Naureen Syed, Sergi Syrbu, Thomas Winder
Adjunct assistant professor: Dennis Klein (Deputy State Medical Examiner)
Adjunct clinical assistant professors: Timothy Drevankyo, Jerri McLemore (Deputy State Medical Examiner), L. Jeffrey Rissman
Lecturer: Pamela Roberts
Graduate degree: M.S. in Pathology
Web site: http://www.medicine.uiowa.edu/pathology

Master of Science

The M.S. in pathology trains graduate students in cell and molecular biology. Graduates work as research scientists in a range of academic and commercial laboratories, including those in the rapidly expanding biotechnology sector. Others advance to doctoral-level study.

M.S. students take a core curriculum in cell and molecular biology as well as electives suited to their individual interests. They acquire contemporary research skills by pursuing a laboratory thesis project under the guidance of a faculty member. Currently, there are active research programs in immunology, microbiology, neuroscience, signaling and apoptosis, inflammation and vascular biology, tumor biology and cancer, and virology.

Most M.S. students complete their course of study in three years.

The department encourages applicants with Bachelor of Science degrees in biology, chemistry, biochemistry, clinical laboratory science, microbiology, and zoology. Applicants must meet the admission requirements of the Graduate College. They should have an undergraduate g.p.a. of at least 3.00 and a combined verbal and quantitative score of at least 1100 on the Graduate Record Exam (GRE) General test.

Residency

The department offers 20 residency positions in pathology, covering a training span of up to four years. The patient populations of University of Iowa Hospitals and Clinics and Veterans Affairs Iowa City Health Care System are integral to the program.

Residents gain experience in systematic rotation through the varied laboratory services, including surgical pathology, autopsy pathology, neuropathology, cytology, clinical chemistry, clinical microbiology, hematology, immunopathology, and transfusion medicine. They also have the opportunity to pursue one to three years of additional fellowship training in most pathology subspecialties.

Clinical Education

See Clinical Laboratory Sciences and Division of Associated Medical Sciences in the Catalog.
Medical Student Fellowships

The department provides seven 12-month medical student fellowships and a varying number of clerkships for medical students in any of the areas of anatomical and clinical pathology. One of the fellowships is a full-time research position in some facet of experimental pathology; the other six are primarily in anatomic pathology.

Postgraduate and Postdoctoral Training

The Department of Pathology offers postgraduate clinical fellowship programs in hemopathology, transfusion medicine, clinical microbiology, cytopathology, and surgical pathology for physicians who have completed residency training in pathology. These fellowships consist of one to two years of diagnostic work and up to two years of laboratory research.

The department provides postdoctoral research training in immunology, neuropathology, apoptosis, cancer biology, and clinical microbiology as well as in other areas of cellular and molecular pathology. These positions are open to individuals with either a Ph.D. or M.D.

Facilities

The Department of Pathology is well-equipped to carry out the sophisticated technology of modern cellular and molecular pathology. It administers more than 90,000 square feet of clinical laboratories at University of Iowa Hospitals and Clinics and has individual research and core facility laboratories, including histopathology and laser capture microscopy for cellular and molecular pathology research, in the Medical Research Center, Medical Laboratories, and at the Veterans Affairs Iowa City Health Care System. Also available are Carver College of Medicine research facilities for nucleic acid chemistry, hybridoma production, flow cytometry, ultrastructural studies, protein structure, image analysis, electron spin resonance, mass spectroscopy, nuclear magnetic resonance, and laboratory animal care.

Courses

069:090 Laboratory Tests and Disease 2 s.h.
Introduction to the role of clinical laboratory testing in diagnosis and management of human diseases; case-based approach to appropriateness, patient’s condition, interpretation of test results.

069:110 CLS Concepts in Immunohematology 0-1 s.h.
Basic concepts and techniques in blood banking, including ABO and Rh blood group systems and testing, antiglobulin testing. Offered summer sessions. Prerequisite: Clinical Laboratory Sciences Program or medical technology enrollment.

069:111 CLS Concepts in Hematology 0, 2 s.h.
Red and white blood cell function, metabolism, identification, and basic hematology laboratory methods and techniques. Offered summer sessions. Prerequisite: Clinical Laboratory Sciences Program or medical technology enrollment.

069:112 CLS Concepts in Instrumentation and Urinalysis 0, 4 s.h.
Theory and practice of instrumentation and urinalysis as applied in clinical laboratories. Offered summer sessions. Prerequisite: Clinical Laboratory Sciences Program or medical technology enrollment.

069:113 CLS Concepts in Microbiology 0, 2 s.h.
Principles of microbiology as applied to diagnosis and management of infectious disease. Offered summer sessions. Prerequisites: Clinical Laboratory Sciences Program or medical technology enrollment.

069:114 CLS Concepts in Immunology 0-1 s.h.
Laboratory diagnosis of immunologic disease; theory and practice.

069:118 Phlebotomy for Clinical Laboratory Sciences 0, 4 s.h.
Experience in phlebotomy techniques. Prerequisites: Clinical Laboratory Sciences Program or medical technology enrollment, and consent of instructor.

069:121 Introduction to Clinical Practice 0-1 s.h.

069:122 Chemistry for Clinical Laboratory Science 0, 5 s.h.
Theory, practice of analytical biochemistry applied to disease states; methodology, automation, reagent preparation. Prerequisite: 069:112.

069:123 Immunohematology for Clinical Laboratory Science 0, 4 s.h.
Theory, practice of blood banking; donor services. Prerequisite: 069:110.

069:124 Hematology for Clinical Laboratory Science 0, 5 s.h.
Theory, practice of hematology as applied to pathologic states; methodology, automation. Prerequisite: 069:111.

069:125 Microbiology for Clinical Laboratory Science 0, 4 s.h.
Theory, practice of laboratory microbiology applied to pathogenic microorganisms, including bacteria, parasites, fungi, viruses. Prerequisite: 069:114.

069:126 Clinical Chemistry 0, 4 s.h.
Rotation through clinical chemistry laboratories. Prerequisites: 069:112, 069:121, and 069:122.

069:127 Clinical Hematology 0, 3 s.h.
Course Codes: 069

069:128 Clinical Microbiology 4 s.h.
Rotation through clinical microbiology laboratories. Prerequisites: 069:113 and 069:139.

069:129 Clinical Immunology and Molecular Pathology 3 s.h.
Rotation through clinical immunology and molecular pathology laboratories. Prerequisites: 069:112, 069:122 and 069:124.

069:130 Clinical Laboratory Medicine for Physician Assistants 1 s.h.
Theory and practice of selected clinical laboratory techniques, procedures; emphasis on effective use of clinical laboratory in the diagnosis, management of disease. Prerequisite: physician assistant student standing.

069:131 CLS Professional Skills Seminar 2 s.h.
Prerequisite: Clinical Laboratory Sciences Program senior standing.

069:132 CLS Management Topics and Projects 2 s.h.
Theory and practice of clinical laboratory management. Prerequisite: Clinical Laboratory Sciences Program senior standing.

069:133 Introduction to Human Pathology arr.
Human disease; basic disease processes, organ-related and multisystem diseases; case analysis. Offered fall semesters.

069:134 Clinical Research for Clinical Laboratory Science arr.
Prerequisite: Clinical Laboratory Sciences Program enrollment.

069:135 Individual Study in Clinical Laboratory Science arr.
Management, education, or research theory and practice. Prerequisite: Clinical Laboratory Sciences Program enrollment.

069:136 Introduction to Clinical Laboratory Science 1 s.h.
Prerequisite: admission to Clinical Laboratory Sciences Program.

069:137 Clinical Immunohematology 2 s.h.
Rotation through clinical immunohematology laboratories. Prerequisites: 069:110, 069:112, and 069:123.

069:138 CLS Body Fluids 1 s.h.
Laboratory science applied to body fluids, including cell identification and enumeration, and associated chemical analyses: theory and practice. Prerequisites: 069:112 and 069:124.

069:139 CLS Parasitology 1 s.h.

069:140 Immunohematology Concepts for CLS 3 s.h.
Immunohematology techniques and concepts for the clinical laboratory. Prerequisites: Clinical Laboratory Sciences Program or medical technology enrollment, 004:122 or 099:110, 027:130, 061:157, and 069:136.

069:141 Hematology Laboratory Concepts for CLS 3 s.h.

069:142 Microbiology Concepts for CLS 2 s.h.

069:143 Hemostasis and Thrombosis for CLS 1 s.h.
Laboratory hemostasis and thrombosis; theory and practice. Prerequisite: 069:136.

069:204 General and Systemic Pathology 9 s.h.
Mechanisms of disease; etiology, pathogenesis, epidemiology, and major clinical morphologic manifestations of disease by organ systems. Prerequisite: second-year M.D. enrollment, or graduate standing and consent of instructor.

069:211 Research in Pathology arr.
Basic aspects of pathology or clinical patient material; emphasis on experimental design, methods, literature review, obtaining formal answers to specific questions. Prerequisite: M.D. enrollment, or graduate standing and consent of instructor.

069:220 Seminar in Pathology 1 s.h.
Current research and literature. Repeatable. Prerequisite: pathology graduate standing.

069:231 Special Topics in Pathology arr.
Prerequisite: M.D. enrollment, or graduate standing and consent of instructor.

069:240 Topics in Laboratory Medicine and Pathology arr.
Issues in appropriate use of clinical laboratory and pathology resources in the primary care setting, case-based approach. Prerequisite: third- or fourth-year M.D. enrollment.

069:241 Autopsy Pathology Clerkship arr.

069:245 Hematopathology Clerkship arr.

069:246 Surgical Pathology Clerkship arr.

069:249 Clinical Immunology and Immunopathology: Laboratory and Clinical Correlations 4 s.h.
Experience in immunopathology lab; allergy-immunology clinic; conferences, follow-up of lab requests, abnormalities. Prerequisite: third- or fourth-year M.D. enrollment. Same as 078:253.

069:270 Pathogenesis of Major Human Diseases 3 s.h.
Critical analysis of pathogenesis models in a series of major human diseases; clinical presentation, analysis of cellular and molecular events leading to the disease, discussion of key papers. Prerequisite: 156:201.

069:288 Molecular and Cellular Biology of Cancer 3 s.h.
Biological features, population characteristics; cell biology; molecular mechanisms; chemical, viral carcinogenesis; immunology of neoplasia, with emphasis on in-depth analysis, supporting literature. Prerequisites: strong basic science background and consent of instructor. Same as 077:288.

069:290 Medical Student Fellowships in Pathology (Externships) 0 s.h.
First-hand experience in autopsy, surgical and clinical pathology, teaching, and research to further understanding of disease mechanisms, normal and pathologic anatomy, laboratory use.

069:291 Warner Fellowship in Experimental Pathology 0 s.h.
One-year, full-time membership in established research laboratory in the Department of Pathology or collaborating laboratory. Prerequisite: M.D. enrollment.

069:998 Pathology on Campus arr.

069:999 Pathology off Campus arr.
Pediatrics

Head: Michael Artman
Professors: Adel K. Afifi (Anatomy and Cell Biology/Neurology), Richard C. Ahrens, Michael Artman, Dianne L. Atkins, Edward F. Bell, Patricia Donohoue, Claireborne Dungy, Charles Grose (Microbiology), James Hall (Social Work), Dennis C. Harper, Herman A. Hein, Scott D. Lindgren, Vera A. Loeing-Baucke, Larry T. Maloney (Epidemiology), Paul McCray, Frank H. Morris Jr., Jeffrey C. Murray (Biological Sciences/Dentistry/Epidemiology), M. Sue O’Dorriso, Shivandan R. Paral, Stanley Perlman (Microbiology), Lynn C. Richman, Thomas D. Scholz, Jeffrey Segar, Val C. Sheffield, Bento Soares (Biochemistry/Physiology and Biophysics), Eva Tsaklikian, Don C. Van Dyke (Epidemiology), David P. Wacker (Curriculum and Instruction), Miles M. Weinberger, Robert E. Weir (Religious Studies), John A. Widness, Marcia Willing, Ekhard E. Ziegler

Professors (clinical): Jeffrey Lobas, Jill Morriss, Craig Porter

Visiting professor: John Justin

Associate professors (clinical): Thomas Fagan, Thomas George, Kim Kepper-Noreuil, Mary Larew, Deborah Lin-Dyken, Ellen Link, Thomas Loew, Mary Ann Roberts, Jeffrey Smith, Ronald Spiegel

Assistant professors: Heather Bartlett, Tarah Colaizy, Jorge DiPaola, Polly Ferguson, Carrie George, Bruce Hostager, Jessica Moreland, Andrew Norris, Brian Schute, Timothy Starker, Aliye Uc

Adjunct assistant professors: Linda Cooper-Brown, Joel Ringdahl

Fellow associate: Sam Kinzer

The Department of Pediatrics provides a solid foundation for M.D. students and postgraduate trainees. It offers extensive opportunities for general pediatrics and subspecialties.

Affiliated programs add depth to the educational program in community pediatrics and primary care. The department is affiliated with the child and maternal health programs of the Bureau of Family Health, Iowa Department of Public Health; the University of Iowa regional Child Health Specialty Clinics and Center for Disabilities and Development; Blank Children’s Hospital in Des Moines; and community sites.

Medical Student Training

Didactic lectures and physical examination of the newborn, toddler, and older child provide M.D. students with their initial pediatric patient contact. This experience includes taking a history, performing a physical examination, appraisal of growth and development, nutrition, and symptoms of newborns, toddlers, and adolescents.

For junior and senior medical students, the inpatient service provides training in the complex problems of disease and critical illness. Students participate in daily rounds involving general pediatrics and all subspecialties. Challenging and interesting cases are presented for discussion of diagnosis and treatment.

Outpatient experience, available in the junior clerkship and fourth-year electives, stresses principles and practices required for the maintenance of children’s health, treatment of common general pediatric disorders, and the
diagnosis and treatment of subspecialty ambulatory patients.

Residency, Fellowships

The department offers an accredited three-year residency program designed to prepare trainees for professional careers in general pediatrics or for further fellowship training. The program meets the eligibility requirements of the American Board of Pediatrics (ABP).

Fellowships are available in many pediatrics subspecialties. Fellowship programs encourage development of knowledge and skill through research and clinical orientations in the chosen discipline. Upon satisfactory completion of the program, fellows meet the ABP eligibility requirements in their subspecialty.

Facilities

The Department of Pediatrics is located in the Children’s Hospital of Iowa at University of Iowa Hospitals and Clinics, with inpatient and outpatient areas immediately adjacent to faculty offices and the pediatric library. The pediatric inpatient service has approximately 120 beds, and more than 50,000 patients are seen each year in the general, specialty, continuity care, and field clinics and in the Emergency Treatment Center. The Center for Disabilities and Development provides resources for children with developmental disabilities, cerebral palsy, or mental retardation.

The department maintains laboratories that perform both clinical and research studies.

Courses

070:002 Clinical Pediatrics 6 s.h.
Principles, practices of health maintenance and treatment of acute and chronic illnesses in children; emphasis on diagnosis and evaluation, nutrition, behavior problems, disorders affecting children, patient care, daily rounds, ward work. Prerequisite: third-year M.D. enrollment.

070:013 Subinternship in Pediatrics: Blank Children’s Hospital, Des Moines
arr.
Experience in the care of general pediatric inpatients; daily rounds and teaching by senior residents and faculty members; daily didactic conferences. Prerequisite: fourth-year M.D. enrollment.

070:014 Emergency Room Blank Children’s Hospital, Des Moines
arr.
Pediatric emergencies and urgent care, proficiency in pediatric medicine procedures, expansion of basic knowledge. Prerequisite: fourth-year M.D. enrollment.

070:016 Pediatric Hematology/Oncology
arr.
Basic concepts of clinical approach to hematologic and oncologic problems in children and adolescents; primarily outpatient experience. Prerequisite: fourth-year M.D. enrollment.

070:017 Pediatric Neurology
arr.
Participation in outpatient and inpatient activities, teaching, morning ward rounds. Prerequisite: fourth-year M.D. enrollment.

070:019 Pediatric Cardiology
arr.
Participation in clinical activities, observation of cardiac catheterization; experience in cardiac auscultation, ECG, radiography; emphasis on physical diagnosis, approach to heart disease and murmurs in children. Prerequisite: fourth-year M.D. enrollment.

070:023 Developmental and Behavioral Pediatrics 4 s.h.
Normal developmental sequence of gestation and early childhood, impact of environmental influences, antecedents of developmental disabilities; methods to detect cognitive and motor delays in preschool children; long-term consequences of developmental disabilities for children, their families; advantages of interdisciplinary teamwork. Prerequisite: fourth-year M.D. enrollment.

070:025 Child Abuse and Neglect 4 s.h.
Hospital- and community-based multidisciplinary responses to child abuse and neglect; experience developing diagnostic skills to recognize, assess, and report cases of child abuse and neglect. Prerequisite: fourth-year M.D. enrollment.

070:027 Neonatology (NICU)
arr.
Experience caring for ill neonates, proficiency in using diagnostic tests and procedures; responsibility for care of several infants; reference and literature review, conferences, teaching, clinical rounds. Prerequisite: fourth-year M.D. enrollment.

070:028 Pediatric Inpatient Care Subinternship
arr.
Experience on pediatric inpatient team caring for patients ranging from infants through adolescents; evaluation, formulation of differential diagnoses, diagnostic workups, appropriate therapy programs. Prerequisite: fourth-year M.D. enrollment.

070:029 Critical Care (PICU) 4 s.h.
Direct care of critically ill children in a multidisciplinary medical/surgical/cardiac intensive care unit; under supervision of pediatric residents and staff, participation in educational activities and formal clinical rounds. Prerequisite: fourth-year M.D. enrollment.

070:030 Medical Genetics for the Senior Student
arr.
Participation in diagnostic, therapeutic problems, techniques for evaluation, appropriate counseling in genetic cases; conferences. Prerequisite: fourth-year M.D. enrollment.

070:033 Pediatric Gastroenterology
arr.
Diagnosis, management, treatment of diseases of gastrointestinal tract, liver, pancreas in children; ward rounds, consultations, clinics, diagnostic procedures, conferences. Prerequisite: fourth-year M.D. enrollment.

070:040 Infectious Disease Consults 4 s.h.
Prerequisite: fourth-year M.D. enrollment.

070:043 Pediatric Allergy
arr.
Experience in evaluating and treating respiratory and allergic diseases in infants, children, and adolescents. Prerequisite: fourth-year M.D. enrollment.

070:055 General Pediatric Outpatient Clinic 4 s.h.
Work in general pediatric outpatient clinics with acutely or chronically ill patients and with well children. Prerequisite: fourth-year M.D. enrollment.

070:110 Medical Genetics 2 s.h.
Germ structure and function, basic genetics concepts, application to problems in human disease. Offered fall semesters. Prerequisite: M.D. enrollment or graduate standing in related health field, and consent of instructor.
070:201 Primary Care: Infants, Children, and Adolescents II 3 s.h.
Enhancement of clinical knowledge and skills for infant, child, adolescent care; development and refinement of knowledge and skills in primary health care delivery. Prerequisites: 06s:219 and 09s:280. Same as 09s:220.

Work in pediatric psychology learning disability clinic; training, experience in assessment, interview, research. Prerequisite: consent of instructor. Same as 07P:207.

070:247 Neuropsychology of Learning Seminar arr.
Research and theory on varied approaches to learning disability; language disability; visual/perceptual disability; serial order and memory deficits. Prerequisites: 070:245 or 070:251, course on psychological testing including IQ, and consent of instructor.

070:250 Social Psychology of Disability 3 s.h.
Research seminar, mental/physical disability from individual and societal perspectives; emphasis on clarifying research and theoretical strategies in psychology of disability. Prerequisite: Ph.D. student standing and consent of instructor. Same as 07P:210.

070:251 Clinical Pediatric Neuropsychology arr.
Learning and behavior disorders resulting from central nervous system dysfunction; clinical experience in assessment of cognitive, behavioral patterns. Prerequisite: consent of instructor.

070:252 Assessment of Attention Deficit Disorder 3 s.h.
Participation in clinical, research, didactic work in evaluating children with attention deficit disorder. Prerequisite: experience in intellectual assessment of children.

070:253 Assessment of Behavior Disorders arr.
Experience in diagnostic and behavioral assessments of children with conduct disorders.

070:300 Pediatric Independent Study arr.

070:333 Pediatric Intensive Care off Campus arr.
Arranged by student and department. Prerequisite: fourth-year M.D. enrollment.

070:653 Adult and Pediatric Nephrology and Hypertension arr.
Prerequisite: fourth-year M.D. enrollment. Same as 078:653.

070:662 Medical and Pediatric Endocrinology arr.
Prerequisite: fourth-year M.D. enrollment. Same as 078:662.

070:998 Pediatrics on Campus arr.
Prerequisite: fourth-year M.D. enrollment.

070:999 Pediatrics off Campus arr.
Prerequisite: fourth-year M.D. enrollment.
Pharmacology

Head: G.F. Gebhart
Professors emeriti: Jeffrey Baron, Ranbir Bhatnagar, Gary R. Dutton, J. Paul Long, James Spratt, Thomas Tephly, Harold Williamson
Associate professors: Timothy Brennan, Minnette Gardiner, Johannes Hell, Barry Kason, John Koland, Ulla Kopp, Kathryn G. Lamping, Dawn E. Quelle, Frederick W. Quelle
Assistant professors: Mary Horne, Nancy Lill, David Sheff, Stefan Strack, Yuriy Usachev
Graduate degrees: M.S., Ph.D. in Pharmacology
Web site: http://www.medicine.uiowa.edu/pharmacology

The Department of Pharmacology offers graduate study programs leading to the M.S. and Ph.D. These programs include both didactic and research experience. Also available are opportunities for qualified students to pursue an M.S. in clinical pharmacology or a combined M.D./Ph.D. in the Medical Scientist Training Program.

The department provides professional training in pharmacology for health science students and participates with other departments in educational and research activities such as the Medical Scientist Training Program, the Physician Scientist Training Program, the Molecular Biology Program, the Neuroscience Program, the Holden Comprehensive Cancer Center, and the Iowa Cardiovascular Center.

The pharmacology department was a pioneer in offering pharmacology to undergraduate students with little or no science background. The lecture and discussion sessions in 071:120 Drugs: Their Nature, Action, and Use emphasize the mechanisms of drug action and give students a background for rational decisions concerning use of drugs. Undergraduates interested in science careers may attend an eight-week summer research program that provides opportunities for outstanding students to conduct research in faculty laboratories.

Pre- and postdoctoral students can pursue research training in all areas of pharmacology in the department in preparation for career opportunities in academia, government, and industry.

Master of Science

The M.S. in pharmacology requires a minimum of 30 s.h. Core course requirements are as follows.

071:135 Principles of Pharmacology 4 s.h.
071:203 Pharmacology Research arr.
071:204 Pharmacology Seminar 1 s.h.
071:302 Pharmacology for Graduate Students 6 s.h.
156:201 Principles in Molecular and Cell Biology 4 s.h.

Students also are expected to gain maximum experience in laboratory research while completing their course work. Satisfactory preparation and oral defense of a thesis based on the student’s own research are required for completion of the program.

Doctor of Philosophy

The Ph.D. in pharmacology requires a minimum of 72 s.h. Core course requirements are as follows.

071:135 Principles of Pharmacology 4 s.h.
071:203 Pharmacology Research arr.
071:204 Pharmacology Seminar 1 s.h.
071:209 Receptors and Signal Transduction 3 s.h.
071:302 Pharmacology for Graduate Students 6 s.h.
156:201 Principles in Molecular and Cell Biology 4 s.h.

Individual faculty research advisers may require additional courses.

During the first semester in the program, students are required to work in two different faculty laboratories before selecting a laboratory in which to pursue thesis research. Students then are expected to gain maximum laboratory research experience while completing course work. The Ph.D. comprehensive examination (written and oral) is given at the end of the fourth semester. Satisfactory preparation and oral defense of the thesis complete the program.

There is no departmental foreign language requirement.
Admission

Applicants must meet the admission requirements of the Graduate College. They should have a g.p.a. of at least 3.00 and a combined verbal and quantitative score of at least 1200 on the Graduate Record Examination (GRE) General Test. They should have completed undergraduate courses in chemistry, biology, biochemistry, and mathematics.

Admission to the graduate programs is determined by the faculty after receipt of a completed formal application and interview (if appropriate) by faculty members or other designated individuals. Each application is reviewed individually. Some standard admission criteria may be set aside for applicants who possess outstanding credentials in other areas.

Financial Support

The department provides all Ph.D. students and some M.S. students with financial support in the form of stipends and tuition support. Support is renewed annually based on satisfactory progress toward meeting degree requirements.

Courses

071:105 Pharmacology for Health Sciences: Medical 5 s.h.
Principles of pharmacology, pharmacologic actions of drugs, correlation with therapeutic uses. Offered fall semesters. Prerequisites: 050:240 and 099:163, or equivalents, and M.D. enrollment.

071:111 Pharmacology for Dental Students 5 s.h.
Principles of pharmacology, pharmacologic actions of drugs, correlation with therapeutic uses. Offered spring semesters. Prerequisites: 072:152 and 099:161, or consent of instructor, and D.D.S. enrollment.

071:120 Drugs: Their Nature, Action, and Use 2 s.h.
Principles of drug action, toxicity, sedatives, stimulants, hallucinogens, narcotics, over-the-counter agents, antibiotics, oral contraceptives. Offered spring semesters. Prerequisite: closed to Pharm.D. students.

071:125 Pharmacology for Health Sciences: Physician Assistant Students 6 s.h.
Principles of pharmacology, pharmacologic actions of drugs, correlation with therapeutic uses. Offered fall semesters. Prerequisites: 072:164 and 099:164, or consent of instructor; and Physician Assistant Program enrollment.

071:130 Drug Mechanisms and Actions 3 s.h.
Introduction to principles of pharmacology, pharmacologic actions of drugs. Offered spring semesters. Prerequisites: undergraduate biochemistry and physiology courses, or consent of instructor; and science background.

071:135 Principles of Pharmacology 4 s.h.
Principles of drug action, disposition; statistical analysis. Offered spring semesters. Prerequisite: consent of instructor.

071:180 Pharmacology for Pharmacy Students I 3 s.h.
Principles of pharmacology, toxicology, drug and toxic mechanisms; systemic and organ-specific pharmacologic and toxic responses. Offered spring semesters. Prerequisite: first-year Pharm.D. enrollment, or graduate standing and consent of instructor.

071:181 Pharmacology for Pharmacy Students II 4 s.h.
Continuation of 071:180. Offered fall semesters. Prerequisite: second-year Pharm.D. enrollment, or graduate standing and consent of instructor.

071:182 Neurotransmitter Receptors and Ion Channels 3 s.h.
Biochemistry, cell biology, physiology, and pharmacology of ionotropic and metabotropic neurotransmitter receptors and ion channels, neuronal excitability, and synaptic transmission. Prerequisite: consent of instructor.

071:203 Pharmacology Research arr.
Prerequisite: consent of department head.

071:204 Pharmacology Seminar 1 s.h.
Prerequisite: consent of department head.

071:207 Neuropharmacology 3 s.h.

071:209 Receptors and Signal Transduction 3 s.h.
Major receptor families: G-protein coupled receptors, ligand-regulated transmembrane enzymes, ligand-regulated ion channels, the steroid receptor superfamily. Emphasis on description, interpretation of specific experiments, experimental strategies underlying current research. Offered spring semesters. Prerequisites: 072:153 and 156:201, or equivalents. Same as 072:209, 132:209.

071:210 Special Topics in Pharmacology arr.
Prerequisite: consent of department head.

071:215 Topics in Neuropharmacology 1 s.h.
Recent advances in neuropharmacology, developmental neurobiology, neuroendocrinology, related neurosciences. Prerequisite: consent of instructor.

071:225 Topics in Molecular Pharmacology 1 s.h.
Recent advances in molecular pharmacology, receptor postreceptor events in stimulus coupling. Prerequisite: consent of instructor.

071:230 Behavioral Pharmacology 3 s.h.
Behavioral analysis of drug action. Emphasis on physiological and biomedical mechanisms underlying behavioral processes in experimental animals, humans. Offered spring semesters of even years. Same as 031:230.

071:235 Topics in Pain and Analgesia 1 s.h.
Recent advances in pain research, therapy. Prerequisite: consent of instructor.

Anatomical, physiological, and pharmacological mechanisms that underlie central neuronal processing of pain. Emphasis on neuronal changes during pathological conditions such as inflammation/arthritic, peripheral neuropathy. Offered fall semesters. Same as 101:277, 132:277.

071:302 Pharmacology for Graduate Students 6 s.h.
Principles of pharmacology, pharmacologic actions of drugs, correlation with therapeutic uses. Offered fall semesters. Prerequisites: 072:153 and 156:201, or equivalents; and consent of instructor.
The Department of Physiology and Biophysics offers graduate study leading to the Master of Science and Doctor of Philosophy and participates in interdisciplinary graduate programs, including the Medical Scientist Training Program, a combined M.D./Ph.D. program offered by the Graduate College and the Carver College of Medicine. It also provides instruction in physiology and biophysics for M.D., D.D.S., pre-pharmacy, and other health professional students, and it conducts a co-op exchange, a vigorous training program that gives undergraduate students the opportunity to develop as independent researchers in preparation for graduate studies.

The department's principal research areas include cell biology, genetics, endocrinology, neuroscience, and membrane physiology and biophysics; the unifying theme is the understanding of signal transduction mechanisms involved in regulating function at the cellular and molecular levels.

**Graduate Program**

Graduate study in physiology and biophysics provides students with fundamental knowledge of life processes at molecular, cellular, and integrative levels of biological function. It also imparts knowledge of modern research skills applicable to contemporary problems.

The program is designed for students whose degree objective is the Doctor of Philosophy. Students who are unable to complete the Ph.D. are granted the Master of Science if they satisfy all M.S. requirements and apply for the degree.

Students enter the graduate program through the Biosciences Program (Graduate College) or directly through the Department of Physiology and Biophysics. Those who enter directly are advised by the department's director of graduate studies, who guides them in planning required course work and introduces them to research activities of the department's faculty members.

**Master of Science**

The M.S. in physiology and biophysics requires a minimum of 30 s.h. beyond the bachelor's degree and is offered with and without thesis. Thesis students complete laboratory research and write a thesis that fulfills the requirements of the Graduate College (see Manual of Rules and Regulations of the Graduate College). Nonthesis students complete a library research report, and a written examination on the research report area and the graduate program in physiology.

**Doctor of Philosophy**

The Ph.D. in physiology and biophysics requires a minimum of 72 s.h. beyond the bachelor's degree. The core curriculum includes graduate-level courses in cell biology, molecular biology, human physiology, and neurophysiology. Advanced electives, offered by physiology and biophysics and other departments, cover a wide range of topics, including receptors and signal transduction, and developmental neurophysiology.

After successful completion of required course work and the comprehensive examination, students devote full time to thesis research, which culminates in preparation of a doctoral dissertation and its defense in a final oral exam.

All degree candidates have experience as classroom instructors, under faculty supervision, as part of their training.
Admission
Applicants must meet the admission requirements of the Graduate College. They must have a bachelor’s degree from an accredited institution, with an undergraduate major in one of the biological, chemical, physical, mathematical, or engineering sciences and one or more years of course work in biology, physics, biochemistry, and calculus. They also must have a cumulative science g.p.a. of at least 3.00 and a combined verbal and quantitative score above 1200 on the Graduate Record Examination (GRE) General Test.

Financial Support
All full-time students receive financial aid in the form of tuition and stipend support from the Department of Physiology and Biophysics. Support is renewed annually based on satisfactory progress in meeting degree requirements.

Research
Faculty research interests in the Department of Physiology and Biophysics encompass molecular and cellular endocrinology, cellular and developmental neurophysiology, and membrane structure and function. Within these, there are multiple areas of interest, including hormone receptors, reproductive endocrinology, signal transduction, regulation of gene expression, synaptic transmission, neuronal differentiation, membrane ion channels, regulation of excitability, and cardiovascular electrophysiology and regulation. Experimental models currently being investigated include rodents, yeast, drosophila, and cultured cell lines from a variety of species.

Facilities
Two floors of the Bowen Science Building are devoted to research and teaching in the Department of Physiology and Biophysics. Department faculty members also occupy laboratory facilities in the Eckstein Medical Research Building. In addition to specialized equipment in faculty research laboratories, the department provides equipment for fluorescence microscopy, isotope analysis, cell culture, and molecular biology. It also has access to the University network and the multimedia facilities. Additional resources are available at the Hardin Library for the Health Sciences.

072:265 Neuroscience Seminar 0-1 s.h.

072:270 Responsible Conduct of Research 1 s.h.
Ethical issues, including misconduct and fraud, proper handling of data, responsible authorship, conflict of interest, research on animals and human subjects. Prerequisite: consent of instructor.

072:302 Research Physiology and Biophysics arr.
Prerequisite: physiology and biophysics graduate standing.

072:342 Biosciences Seminar 1 s.h.
Focus on a journal article relevant to weekly biosciences seminar. Repeatable. Prerequisite: consent of instructor. Same as 002:270, 156:265.

Prerequisite: physiology and biophysics Ph.D. candidacy.
The Department of Psychiatry teaches M.D. students, principally during their third year, and trains resident physicians for academic and clinical careers in psychiatry. It offers no degree program.

The department maintains a four-year training program approved by the Residency Review Committee of the American Medical Association. Training experiences are available at University of Iowa Hospitals and Clinics and at the Veterans Affairs Iowa City Health Care System. Additional experiences are available at affiliated institutions: Broadlawns Medical Center in Des Moines, the Iowa Medical and Classification Center at Oakdale, the Mid-Eastern Iowa Community Mental Health Center in Iowa City, and the Independence Mental Health Institute (Iowa Department of Human Services).

The department also offers an approved two-year residency in child psychiatry. A geriatric fellowship is available after residency training.

Department of Psychiatry staff members are involved in genetic and family studies of psychiatric disorders, and research in genetic and biological psychiatry, neurochemistry, neuroimaging, neurophysiology, neuropsychiatry, and psychosocial aspects of behavior.

Many research opportunities in psychiatry are available to students and residents, and the basic science areas of neurochemistry, neurophysiology, and electrophysiology offer additional opportunities. The clinical areas of psychology, child psychiatry, and psychotherapy also offer opportunities to a limited number of students for research and further study.

Courses

073:037 Addiction Psychiatry arr. Work with patients and staff at University Hospitals and Clinics chemical dependency service; evaluation, diagnosis, management of alcohol and other substance-related disorders.

073:130 Research in Child Psychiatry for Undergraduates arr. Psychological research related to child psychiatry. Repeatable. Prerequisites: 031:001, undergraduate standing, and consent of instructor.

073:255 Psychiatric Epidemiology 3 s.h. Same as 173:267.

For Medical Students

073:005 Clinical Psychiatry 4 s.h. Prerequisite: junior medical student standing.

073:031 General Hospital Psychiatry arr. Supervised evaluation of patients at General Hospital Psychiatry, University Hospitals and Clinics. Prerequisite: M.D. enrollment.

073:033 Adult Psychiatry, Pappajohn Pavilion arr. Prerequisite: M.D. enrollment.

073:035 Child Psychiatry, Pappajohn Pavilion arr. Roles of child psychiatry as a consultation service. Prerequisite: M.D. enrollment.
073:045 Adult Outpatient Psychiatry and Psychotherapy 4 s.h.
Diagnostic assessment, evaluation, treatment of psychiatric patients; exposure to both psychotherapeutic, psychopharmacologic treatments. Prerequisite: M.D. enrollment.

073:105 Research Psychiatry arr.
Experience, training in practical application of scientific methodology; work with research project at Psychiatric Service or affiliated cooperating research centers. Prerequisite: fourth-year M.D. enrollment.

073:835 Subinternship in Medical Psychiatry 4 s.h.
Hands-on experience in evaluation and treatment of patients with combined medical and psychiatric disease; decisions regarding appropriate consultations, diagnostic tests, treatment; etiology and pathophysiology. Prerequisite: M.D. enrollment.

073:998 Psychiatry on Campus arr.
Arranged by student with departmental approval. Prerequisite: M.D. enrollment.

073:999 Psychiatry off Campus arr.
Prerequisite: M.D. enrollment.
Radiation Oncology

Head: John Buatti
Professors: John Buatti, Garry R. Buettner, Larry W. Oberley
Professor emeritus: James W. Osborne
Associate professors: John E. Bayouth, Frederick E. Domann Jr., Geraldine Jacobson, Douglas R. Spitz
Associate professor emeritus: J. Fred Doornbos
Visiting associate professor: A. Curtis Hass
Assistant professors: Mark W. Dion, Kenneth Dornfeld, Prabhat Goswami, Joseph Modrick, R. Alfredo C. Sochi, Mark C. Smith, Min Yao
Associates: Edward Pennington, Timothy J. Waldron

Radiation oncology specializes in the delivery of radiation treatments for cancer patients. It includes treatments with linear accelerators as well as isotopes and temporary and permanent surgically implanted sources. Radiation oncologists also use these methods to treat some benign diseases, such as Graves’s ophthalmopathy and coronary artery disease.

The Department of Radiation Oncology is dedicated to educating graduate students, radiation therapy technology students, and medical residents. It is associated with the Free Radical and Radiation Biology Program, which offers M.S. and Ph.D. programs, and it provides radiation therapy technology training as part of the Radiation Sciences Program (Division of Associated Medical Sciences).

The department provides a four-year program of physician residency training in radiation biology and medical therapy physics that includes clinical care and education. It offers specialized research projects and sponsors postdoctoral students in biology, physics, and clinical disciplines by arrangement with the instructor or mentor. Also available is a two- or four-week elective in radiation oncology for interested M.D. students.

Courses

186:202 Radiation Oncology 4 s.h.
Integration of clinical oncology, physics, and cancer biology; clinical work with faculty mentor; experience in clinical evaluation, technical physics, biological application.
Courses

074:006 Clinical Radiology  2 s.h.
Two-week clerkship. Prerequisite: M.D. enrollment.

074:101 Principles of Nuclear Medicine I  0, 6 s.h.
Didactic and laboratory work in radiopharmacy, patient care, radiation protection, math and statistics, radiation physics, anatomy and physiology, radiochemistry and tracer techniques, medical terminology, computer applications. Prerequisite: Nuclear Medicine Technology Program enrollment.

074:102 Introductory Clinical Nuclear Medicine  0, 6 s.h.
Experience in preparing radiopharmaceuticals, performing routine nuclear imaging and in vitro procedures; work with clinical instructors. Prerequisite: Nuclear Medicine Technology Program enrollment.

074:103 Principles of Nuclear Medicine II  0, 3 s.h.
Didactic and laboratory work in nuclear medicine instrumentation, radiobiology, professional ethics, administration and management, computer applications. Prerequisite: Nuclear Medicine Technology Program enrollment.

074:104 Intermediate Clinical Nuclear Medicine  0, 9 s.h.
Progressive responsibility in radiopharmacy, nuclear and PET imaging, cardiac stress testing. Prerequisite: Nuclear Medicine Technology Program enrollment.

074:105 Advanced Clinical Nuclear Medicine  0, 6 s.h.
Proficiency in performance, quality assurance of all radiopharmacy and nuclear medicine procedures; opportunities for independent study, research. Prerequisite: Nuclear Medicine Technology Program enrollment.

074:191 Health Informatics I  3 s.h.

074:192 Health Informatics II  3 s.h.

074:201 Advanced Clinical Radiology  arr.
Prerequisite: M.D. enrollment.

074:202 Introduction to Radiation Oncology  4 s.h.

074:203 Vascular and Interventional Radiology  arr.
Prerequisite: M.D. enrollment.

074:204 Advanced Clinical Nuclear Medicine  arr.
Routine nuclear medicine studies, including myocardial perfusion, renal studies, lung scans, biliary imaging, PET imaging, opportunity for research project.

074:901 Community Radiology  arr.
Prerequisite: M.D. enrollment.

074:998 Radiology on Campus  arr.
Prerequisite: M.D. enrollment.

074:999 Radiology off Campus  arr.
Prerequisite: M.D. enrollment.
Surgery

Interim head: G. Patrick Kealey

Professors (clinical): Alfred R. Hansen (Emergency Medicine/Surgery), Timothy A. Thomsen

Adjunct clinical professors: Philip R. Caropreso, Douglas B. Dorrer
Adjunct clinical professors emeriti: Lester R. Dragstedt III, Frederick D. Staab

Associate professors: Phyllis Chang, Joseph J. Cullen, James R. Howe, Anthony D. Sandler, W. John Sharp

Associate professor (clinical): John Lawrence

Associate professor (clinical) emeritus: Cornelius Doherty

Adjunct clinical associate professor: Robert J. Cak
Adjunct clinical associate professors emeriti: Luke C. Faber, Alfred J. Herlitzka, John K. MacGregor, Samuel D. Porter

Assistant professors (clinical): Kent C. Choi, Jeffrey E. Everett, John P. Meehan, Donna A. Skeetee, Timothy L. Van Natta

Adjunct assistant professor: Zaheer Asgar

Clinical assistant professor emeritus: Robert L. Kollmorgen

Web site: http://www.surgery.uiowa.edu

The Department of Surgery offers courses that provide a unique combination of experience oriented toward patient care, with basic surgical research designed to promote student awareness of surgery’s place among the physician’s skills. Surgery courses are open only to M.D. students and qualified students in associated health sciences.

Students develop awareness of surgical therapy’s place in the treatment of disease. Emphasis is placed on basic emergency techniques, trauma, oncology, burns, gastrointestinal and biliary tract disease, endocrine disease, transplantation, plastic surgery and reconstruction, peripheral vascular surgery, thoracic and cardiovascular surgery, and neurosurgery.

The majority of surgery courses involve patient-centered discussions and practical exercises interwoven with operating room experience. Lectures and conferences are scheduled regularly on specific topics.

Independent study courses in selected surgery topics and clinical experiences are available to fourth-year M.D. students by arrangement with the faculty.

Faculty

The faculty’s strengths center in pathophysiology and problems of severe burns, organ transplantation, surgical control of morbid obesity, inflammatory bowel disease, biliary tract disease, pediatric surgery, cardiothoracic surgery, and plastic surgery.

Facilities

Abundant patient contact provides education in a wide variety of surgical diseases. The Department of Surgery provides training in the only burn unit in Iowa approved by the American College of Surgeons and in the Level I Trauma Center at University of Iowa Hospitals and Clinics. Laboratories provide equipment, space, and technical expertise to support teaching and a wide spectrum of clinical and scientific research. Projects are available in gastrointestinal surgery, surgical microbiology, peripheral vascular surgery, transplantation, wound healing, organ preservation, cardiovascular surgery, pediatric surgery, and surgical oncology.

Courses

075:005 Clinical Surgery 6 s.h.
Experience as active member of surgical team; work on wards, in clinics and operating room; assistance in elective and emergency care.

075:161 Instrumentation in Perfusion Technology 3 s.h.
Electrical circuits, filters, pressure transducers, thermistors, cardiac output computers, fluid dynamics, intra-aortic balloon pumps, blood gas analyzers. Prerequisites: biochemistry and physiology courses, and Perfusion Technology Program enrollment.
075:162 Pathophysiology of Perfusion Technology 5 s.h.
Hemostasis, acid base physiology, gas transfer; heart anatomy, heart embryology, congenital cardiac defects. Prerequisites: biochemistry and physiology courses, and Perfusion Technology Program enrollment.

075:163 Clinical Experience I 2 s.h.
Perfusion in operating room: patient workup, observation, and reporting on extracorporeal setup, surgical procedure. Prerequisites: biochemistry and physiology courses, and Perfusion Technology Program enrollment.

075:164 Clinical Experience II 3 s.h.

075:165 Clinical Experience III arr.
Continuation of 075:164; management of cardiopulmonary bypass system. Prerequisites: 071:130, 075:164, 075:170, and 075:171.

075:166 Clinical Experience IV arr.
Continuation of 075:165; emphasis on supply maintenance, perfusion department management. Prerequisite: 075:165.

075:167 Perfusion Seminar arr.
Ethics in perfusion. Prerequisite: Perfusion Technology Program enrollment.

075:168 Research in Perfusion arr.
From topic selection to manuscript. Prerequisite: Perfusion Technology Program enrollment.

075:169 Clinical Experience V arr.
Continuation of 075:166. Prerequisite: 075:166.

075:170 Principle and Practice of Perfusion Technology 6 s.h.

075:171 Devices in Perfusion Technology 3 s.h.

075:216 Subinternship in General Surgery 4 s.h.
Responsibility for patient care on wards, in operating rooms on a surgical service. Prerequisite: 075:005.

075:218 Veterans Administration Medical Center Surgical Intensive Care arr.
Experience assessing and managing seriously or critically ill patients from general surgery; full range of subspecialties. Prerequisite: 075:005.

075:223 Subinternship in Burn Therapy arr.
Experience as member of burn team on ward, in operating room, resuscitation with fluid and electrolytes, nutritional support, wound healing, rehabilitation. Prerequisite: 075:005.

075:224 Subinternship in Pediatric Surgery arr.
Clinical experience in ward, operating room, outpatient clinic; surgical, pediatric conferences. Prerequisite: 075:005.

075:225 Subinternship in Transplantation Surgery arr.
Experience on renal transplant team; exposure to coordinated efforts of other medical disciplines (e.g., internal medicine, urology) in daily rounds, conferences. Prerequisite: 075:005.

075:226 Subinternship in Plastic Surgery arr.
Experience with problems in plastic and reconstructive surgery. Prerequisite: 075:005.

075:229 Research Surgery arr.
Project with faculty member. Prerequisites: 075:005 and consent of instructor.

Diagnosis, treatment of peripheral vascular disease; noninvasive diagnosis of arterial, venous problems; vascular problems in outpatient clinic, inpatient service; time in operating room, rounds with residents, conferences. Prerequisite: 075:005.

Clinical- or laboratory-oriented projects. Prerequisites: 075:005 and consent of instructor.

Concentration on cardiac or thoracic surgery; conferences, internship responsibilities; research. Prerequisite: 075:005.

075:233 Research in Cardiothoracic Surgery arr.
Short- or long-term project; may involve clinical material or laboratory research; completion of publishable manuscript. Prerequisites: 075:005 and consent of instructor.

075:235 Subinternship in General Surgery, Iowa Methodist Medical Center 4 s.h.
Care of general surgery patients in private hospital setting. Prerequisites: 075:005 and consent of instructor.

075:236 Intensive Care Unit—Trauma, Iowa Methodist 4 s.h.
Subinternship on trauma service team; evaluation and management of critically ill patients in the emergency room, operating room, intensive care unit. Prerequisite: fourth-year M.D. enrollment.

075:237 Subinternship in General Surgery, Davenport 4 s.h.
Participation in diagnosis and management of general surgical patients under supervision of attending surgeons from Davenport Surgical Group, Genesis Medical Center. Prerequisites: 075:005 and fourth-year M.D. enrollment.

075:998 Surgery on Campus arr.
Surgery on campus; individually arranged. Prerequisite: 075:005.

075:999 Surgery off Campus arr.
Prerequisite: 075:005 and consent of instructor.
Urology

Head: Richard D. Williams
Professor emeritus: Charles E. Hawtrey
Associate professor: Christopher S. Cooper
Clinical associate professor: Victoria J. Sharp
Assistant professors: J. Christopher Austin, Thomas S. Griffith, Fadi Joudi

Urology encompasses the subspecialty areas of urologic nephrology, oncology, and endocrinology; male reproductive physiology; erectile dysfunction; neuropathology; pediatric urology; urinary tract stone and infection, including endourology; laparoscopic urology; diagnostic urology, and urinary tract obstruction.

The Department of Urology offers instruction in all of these areas at both the undergraduate and graduate levels and provides continuing education for the delivery of urologic care.

Medical Student Training

The department cooperates with several University of Iowa basic science departments to educate first-year M.D. students in the relationship between urology and the basic sciences. It collaborates with the Department of Microbiology in teaching and research concerning immunology of genitourinary cancers and renal transplantation.

In the second-year M.D. course, 050:165 Foundations of Clinical Practice IV, the department presents illustrative lectures and demonstrations related to diagnosis and treatment of genitourinary tract diseases.

Third- and fourth-year M.D. students take Department of Urology courses that provide experience in all areas of urology. The required third-year clerkship covers the fundamentals of these areas through experience in outpatient clinics and inpatient units at University Hospitals and Clinics and the Veterans Affairs Iowa City Health Care System, as well as in daily interactive teaching seminars. Fourth-year M.D. students can take advanced elective courses of intensive study in any of the urologic subspecialties.

Continuing Education

The department offers continuing education activities throughout the year for urologic and family practitioners. These activities are conducted by the senior staff, whose interests include pediatric urology, reproductive physiology, urologic oncology, urinary tract stone (including endourology/laparoscopy), and prostatic diseases.

Research

The department has earned international recognition for its studies of prostatic diseases. The urological laboratories conduct research and offer instruction in experimental oncology, cellular immunology, and infertility.

College of Nursing

Dean: Melanie C. Dreher
Executive associate dean: M. Patricia Donahue
Associate dean, research and scholarship: Toni Tripp-Reimer
Chair, adult and gerontology study: Keela Herr
Chair, systems and practice: Rita Frantz
Chair, parent, child, and family study: Martha Craft-Rosenberg
Professors: Kathleen Buckwalter, Gloria Bulechek, Martha Craft-Rosenberg, Connie Delaney, M. Patricia Donahue, Melanie C. Dreher, Rita Frantz, Keela Herr, Diane Huber, Anne Marie McCarthy, Toni Tripp-Reimer, Janet Williams
Professors emeritae: Myrtle Aydelotte, Joanne McCloskey Dochterman, Geraldene Felton, Marion Johnson, Merdean L. Maas, Rosemary McKeighen, Hope Solomon, Barbara Thomas
Clinical professors: Geri Hall, Edward S. Thompson
Associate professors: Howard K. Butcher, Mary Kathleen Clark, Toni Clow, Perle Slavik Cowen, Ken Culp, Joann Eland, Michele Elison, Linda Everett, Kathleen Hanson, Charmaine Kleiber, Leslie Marshall, Paula Mobility, Sue Moorhead, Ann Rhodes, Janet Specht, Elizabeth Swanson
Associate professors emeritae: Janice Ann Denethy, Mildred Freel, Rose Marie Friedrich, Orpha Glick, Laura Hart, Jean Lakin, Marjorie Lyford, Eleanor McClelland, Anna E. Overland, Sandra Powell, Eta H. Rasmussen, Jean Reese, Kay Wieler
Clinical associate professors: Teresa Boese, Patricia Clinton, Michelle Rodnett, Kerri Rupe, Deborah Schoenfelder
Assistant professors: Lioness Ayres, Sue Gardner, Lisa Kelley, Sherry McKay, Sonja Lively, Rene Martin, Beverly Saboe, Deborah Schutte, Janette Taylor
Assistant professors emeritae: Carolyn Crowell, Merie Heick, Louise Krue, Frances Milde, Lavonne Ruther, Mary Stewart-Dedmon, Pamela Willard
Clinical assistant professors: Pamela Ballard, Mary Berg, Veronica Brighten, Karen Griffith, Todd Ingram, Teresa Judge-Ellis, Susan Lehmann, Nicolette Markowitz, Anita Stineman, Connie Towbridge, Jill Valde, Ann Willemsen-Dunlap, Hwanjo Yu
Lecturers: Carol Caldwell, Judith Collins, Ellen Harris-Hesi, Patricia Nelson, Kelly Smith, Karin Zuehls

Undergraduate Program

The College of Nursing is an integral part of the University of Iowa Health Science Campus, sharing in and contributing to teaching, research, and patient care resources that have earned international recognition. The University provides an unusually fine setting for nursing preparation because the educational and clinical resources vital to educating nurses are available on or near the campus. Faculty and students participate fully in University life and contribute their time, interests, and abilities to the many general and special activities of a major research university.

The college’s Bachelor of Science in Nursing (B.S.N.), Master’s in Nursing and Health Care Practice (M.N.H.P.), and Master of Science in Nursing (M.S.N.) programs are accredited by the Commission on Collegiate Nursing Education (CCNE), an autonomous accrediting arm of the American Association of Colleges of Nursing (AACN). They also are approved by the Iowa Board of Nursing. The anesthesia nursing program is accredited by the Council on Accreditation of Nurse Anesthesia Educational Programs.

Graduates of the B.S.N. and M.N.H.P. programs qualify to take the licensure examination required for practice as registered nurses (RN). Graduates of advanced practice majors in the graduate program are eligible to take certification examinations and apply for ARNP licensure.

Undergraduate Program

The Bachelor of Science in Nursing (B.S.N.) provides preparation for careers in the hospital care of patients and in community agencies such as public health services, schools, homes, and industries. It also provides a base for graduate study in nursing.

In addition to the advantages of combining general education with specialized career preparation, a college or university program offers the advantages of full participation in the social,
cultural, and recreational activities of a highly diverse campus community. In nursing, no less than in other pursuits, a college or university background enables people not only to prepare for a career but to achieve a life of thought and action informed by knowledge, introspection, and contemplation.

The nursing major provides a basis for nurses’ roles in wellness and health promotion, in acute care, and in long-term care for chronic illness. The professional nurse provides care to individuals, families, groups, and communities along a continuum of health, illness, and disability in any sector of the health care system.

In addition to providing care, the nurse serves as a coordinator of health care by organizing and facilitating the delivery of comprehensive, efficient, and appropriate service to individuals, families, groups, and communities. The nurse demonstrates the ability to conceptualize the total continuing health needs of the patient, including legal and ethical aspects of care. The University of Iowa program’s goal is to produce graduates who are competent, committed, creative, and compassionate.

The 128 s.h. course of study consists of 63 s.h. of College of Liberal Arts and Sciences General Education Program courses and supportive prenursing courses, and 65 s.h. of course work in the nursing major. Students can expect to complete the program in four or four-and-a-half academic years.

Each B.S.N. student is assigned a College of Nursing faculty member for career planning and professional development.

Nursing courses are based on the concepts of health, deviations from health, and nursing intervention, and are presented at progressive levels of complexity from the sophomore through the senior year. The curriculum reflects the current trend in health care delivery toward emphasis on nursing as a service provided both inside and outside hospitals. Students have clinical experiences selected from more than 60 agencies in the state.

### Study Abroad

The College of Nursing advocates study abroad as a rich educational experience for students. Nursing students have the opportunity to encounter another culture directly through the college’s cultural nursing experiences abroad. The intent of these regular programs is to introduce students to health care systems in other countries. In addition, students learn about health conditions and circumstances not widely prevalent in the United States (e.g., diphtheria, nutritional deficiencies). For more information, contact the College of Nursing Office of Student Services.

### Aging Studies

Students in the College of Nursing may participate in the Aging Studies Program, which is designed to provide undergraduate students a multidisciplinary approach to gerontology. Students plan their course of study with their academic adviser in close cooperation with the Aging Studies Program coordinator. Nursing students who successfully complete 21 s.h. of
acceptable course work in aging studies are awarded a certificate of completion by the University. Nursing students also have the option of completing a minor in aging studies by taking 15 s.h. outside of the major in courses approved by the program. See Aging Studies Program (College of Liberal Arts and Sciences) in the Catalog.

Honors

The College of Nursing Honors Program provides seminars and independent study experience for qualified students. In order to pursue honors studies in nursing, students must have completed the first clinical nursing course and must maintain an overall cumulative g.p.a. of at least 3.33 and a nursing major g.p.a. of at least 3.50.

The honors program enables students to explore subject matter based on individual interests, needs, and goals. It provides opportunities for self-initiative, research experience, and intellectual and personal development, and challenges students to grow and excel. Students who fulfill the requirements of the program graduate with honors in nursing.

Registered Nurses

The RN/B.S.N. progression program is designed to offer registered nurses the opportunity to build on their nursing knowledge and experience as they extend their educational goals. Courses in the nursing major focus on professional aspects of nursing, nursing process and health assessment, community/public health, leadership and management, research, and nursing issues. Each RN/B.S.N. student is assigned to a College of Nursing faculty member for academic advising and curriculum planning.

The College of Nursing participates as a receiving institution in the Iowa Statewide Articulation Plan for Nursing Education: RN to Baccalaureate. Students may transfer course work completed at other colleges and universities to satisfy prerequisites and degree requirements other than those for the nursing major. Once prerequisites are met, students may complete the RN/B.S.N. nursing major in one calendar year in a sequence that begins each summer and includes three clinical and five nonclinical nursing courses. The program is offered via distance education, through technologies including web-based learning and the Iowa Communications Network. Registered nurses planning to enter the baccalaureate program should obtain special information and early advising from the RN/B.S.N. Progression Program Office in the College of Nursing.

Faculty Advisers

Advisors from the University's Academic Advising Center advise pre-nursing students. After admission to the College of Nursing, each student is assigned a College of Nursing faculty adviser.

Student Organizations

College of Nursing undergraduate students are eligible for membership in the state and national associations of nursing students, but they also have their own organization, The University of Iowa Association of Nursing Students (UIANS), which provides opportunities for professional growth and development in nursing. UIANS representatives are members of The University of Iowa Student Government (UISG), and there is a UIANS representative on the Academic Council of the College of Nursing.

College of Nursing graduate students also have an organization, the Association of Graduate Nursing Students (AGNS). AGNS provides opportunities for professional growth, sharing of research, and representation on various college and University committees.

Expenses

Students pay University of Iowa student fees throughout the program. They also must purchase uniforms, white shoes, a stethoscope, a watch with a full-sweep second hand, and supplies and materials for required nursing courses. Students arrange for their own health screening requirements, health insurance, professional liability insurance, and transportation once they are enrolled in clinical nursing courses. Additional fees for computer testing, criminal background checks, and laboratory equipment also are assessed to the student.

Mandatory Health Insurance

All students in the College of Nursing must show annual verification that they have obtained and currently hold health insurance sufficient to satisfy the following minimal standards of coverage (or an equivalent alternative care plan):

- $250,000 lifetime benefit;
- coverage for hospitalization, including coverage for room and board, physician visits, surgeon services, X-ray, and lab services;
inpatient deductible under an individual policy not exceeding $500 per admission and a 20 percent copayment/coinsurance requirement; coverage for medically necessary care, including both physician services for treatment of emergencies, illness, accident, injury, X-ray, and lab services.

Professional Liability Insurance
All students in the College of Nursing are required to carry professional liability insurance throughout the duration of their program. Agencies in which students are involved in clinical practicums require that students have insurance coverage. Entering students in the College of Nursing are provided information about this requirement and must show verification that they have purchased and currently hold professional liability insurance with a minimum coverage of $1 million per single occurrence.

Financial Aid
In addition to general assistance available to University students, there are assistance programs specifically for nursing students. Information about financial aid is available from the University's Office of Student Financial Aid.

Admission
To apply for admission to the B.S.N. program in nursing, each student must qualify for admission to The University of Iowa and meet these requirements:

- completion of all prerequisites for admission to the College of Nursing, or current enrollment in any remaining prerequisites;
- a grade of C or higher is required in all prerequisite courses;
- a g.p.a. of at least 2.70 is recommended.

Applicants whose first language is not English must score 550 (paper-based) or 213 (computer-based) or higher on the Test of English as a Foreign Language (TOEFL). Registered nurses educated outside the United States are required to present verification of having passed the CGFNS examination and specified Excelsior baccalaureate nursing examinations. They also must meet the University's English proficiency requirements.

A criminal background check is conducted for all pre-licensure and undergraduate students upon admission.

High School Background
The College of Nursing requires four years of English, three years of social science, three years of mathematics (a minimum of algebra I and II and geometry), two years of one foreign language, one year each of biology and chemistry, one-half year of physics, and other college preparatory courses selected with the help of the high school counselor.

Preclinical Background
In addition to the biological and behavioral science courses required for College of Nursing admission, students must satisfy the following requirements before beginning clinical course work.

Rhetoric: 8 s.h. (may be satisfied by testing for advanced standing); a student who has earned 6 s.h. of credit in English composition may complete the speech component after admission.

Mathematics: three years of high school mathematics, or a score of 26 or higher on the mathematics battery of the ACT, or completion of a college mathematics course comparable to or more advanced than 22M:002 Basic Algebra II.

Physics: one-half year of high school physics or equivalent.

Other course work: animal biology, inorganic chemistry I, microbiology, human anatomy, psychology, and human development and behavior.

American College Tests
All entering first-year and undergraduate transfer students who have earned fewer than 24 s.h. when they apply for admission to The University of Iowa must complete the American College Test (ACT) or the Scholastic Aptitude Test (SAT). For information on the ACT, write to ACT Inc., Box 451, Iowa City, Iowa 52243.

Core Performance Standards
Applicants to the College of Nursing are expected to be capable of completing the entire nursing curriculum and of earning a B.S.N. The nursing curriculum requires demonstrated proficiency in a variety of cognitive, problem-solving,
manipulative, communicative, and interpersonal skills. Therefore, College of Nursing students must meet the following performance standards.

- Possess and use critical thinking skills sufficient for clinical judgment (e.g., identify cause-effect relationships in clinical situations, develop nursing care plans)
- Demonstrate interpersonal abilities sufficient for interaction with individuals, families, and groups from a variety of social, emotional, cultural, and intellectual backgrounds (e.g., establish rapport with patients, clients, colleagues)
- Possess and use communication skills sufficient for interacting with others (e.g., explain treatment procedures, initiate health teaching, observe patient/client responses, document and interpret nursing actions and patient/client responses)
- Administer cardiopulmonary procedures and other clinical procedures necessary for nursing care; calibrate and use equipment, position patients and clients
- Possess the tactile abilities (with or without an assistive device) sufficient for performing physical assessment (e.g., perform palpation functions of physical exam and those related to nursing interventions)

The examples above are not all-inclusive. Applicants who may not meet these standards are encouraged to contact the associate dean for academic affairs for a personal interview.

**Selection**

The college’s admission committee recommends to the dean the applicants who appear to be best qualified. Fulfillment of minimum admission requirements does not guarantee admission to the College of Nursing. The committee may require personal interviews. A physical examination report and specific health screening requirements must be on file at UI Student Health Service 10 days before the class opens for the first clinical nursing course.

**Application Deadlines**

- **Fall semester:** April 1
- **Summer session (RN students only):** January 15
- **Spring semester:** October 1

**Postbaccalaureate Program**

**Master’s in Nursing and Health Care Practice**

The program leading to the professional Master’s in Nursing and Health Care Practice (M.N.H.P.) prepares individuals to enter the nursing profession. The postbaccalaureate degree is not an academic master’s degree with a research focus; rather, it provides an education in the clinical skills and knowledge necessary for entry into the nursing profession. Graduates of the program are prepared to join the nursing workforce in entry-level positions or to pursue the M.S.N. or a Ph.D. in nursing.

The M.N.H.P. program is a highly structured, full-time plan of study that is completed in four consecutive semesters, including summer. Students are strongly advised not to work while enrolled in the program.

The application deadline for the M.N.H.P. program is June 1.

**Graduate Programs**

**Master of Science in Nursing**

The Master of Science in Nursing (M.S.N.) is designed to build on general and professional baccalaureate study. Graduation from an approved baccalaureate degree program is one of the admission requirements. Options are available for registered nurse applicants with a non-accredited B.S.N., a non-nursing B.A. or B.S., or a B.S.N. from a foreign country.

The curriculum consists of a core component and areas of specialization enhanced by supporting course work in the College of Nursing or in related disciplines. The number of semester hours required for graduation ranges from 33 s.h. for the basic M.S.N. to 52 s.h., depending on the concentration area.

Students may take two to three supporting courses related to their nursing specialization in the social, behavioral, or biological sciences or in business administration, law, or health management and policy.

**Degree Requirements**

The M.S.N. ordinarily requires four semesters of full-time study. Part-time study is available for
some specializations. The M.B.A./M.S.N. and anesthesia nursing programs require a minimum of six semesters of full-time study. Students must maintain a g.p.a. of at least 2.75 and must successfully complete a thesis, project, or portfolio.

The M.S.N. curriculum consists of the following components.

**ADVANCED NURSING CORE**
Core courses are taken by all students in the program. The core consists of 12 s.h. of course work, including leadership in nursing (3 s.h.), research application (3 s.h.), health policy and economics (3 s.h.), and nursing informatics in nursing and health care (3 s.h.).

**NURSING SPECIALIZATION**
Specialization allows students to build a specialized area of knowledge and practice that extends beyond the advanced nursing core. Clinical specialization may be in any of the following options: adult and gerontological nursing, child health nursing, genetics nursing, community health nursing, occupational health nursing, psychiatric/mental health nursing, anesthesia nursing, pediatric nurse practitioner, adult/gerontology nurse practitioner, neonatal nurse practitioner, and family nurse practitioner. Nonclinical options include nursing administration, the M.B.A./M.S.N. joint degree program, the M.S.N./M.P.H. joint degree program, and informatics. Some options require special acceptance procedures. Students with unique career goals have the option of modifying their plans of study under the direction of their academic advisers.

Students in the practitioner programs take an advanced clinical core that includes advanced physiology, pharmacology, health assessment, health promotion, and a professional role course. Students in other clinical options may be required to take one or more of these courses. Some of the clinical core courses are open to other students. Students in a clinical or management specialization develop their knowledge and practice through course work and fieldwork.

**SUPPORTING COURSES**
Supporting course work varies with each specialization area. Supporting courses can be selected from various academic departments at the University and should relate to the student’s interest and specialization area. Some areas of specialization require students to take some courses in other departments. For example, students in the community health nursing specialization must complete an upper-division or equivalent course in epidemiology and a management course; students in the management option select supporting courses from business, health management and policy, or allied study areas. Students select supporting course work in collaboration with their faculty adviser.

**THESIS/PROJECT/PORTFOLIO**
All M.S.N. students must take a final examination. Students satisfy this requirement by completing a thesis, project, or portfolio. Students, with their advisers, select the option that best serves their individual career objectives.

The master’s thesis is a systematic inquiry into a nursing problem. Methodologies may include historical research, case studies, analytical literature review, surveys, or experimental studies that meet the requirements of the University of Iowa Graduate College. Students earn a total of 5 s.h. for the thesis.

The master’s project is an in-depth synthesis and analysis of a chosen topic in nursing. The 15 to 20-page paper of publishable quality may not replicate previous course assignments. Students earn 2-3 s.h. for the project.

The master’s clinical portfolio is a written description of the clinical experiences that contributed to the development of the advanced practice role and a self-assessment of clinical competencies and areas for future growth. Students in the nurse practitioner, nurse anesthesia, and clinical specialty tracks are eligible to complete the clinical portfolio.

The master’s professional portfolio is a written description of practicum experiences and competencies. Students in the nonclinical tracks are eligible to complete the professional portfolio. Students earn no credit for the portfolio.

**Admission**
Students seek admission to the M.S.N. by applying directly to the Graduate College.

Minimum requirements for Graduate College admission include a completed application; official transcripts from other institutions attended; Graduate Record Examination (GRE) General Test scores; a passing score on the Test of English as a Foreign Language (TOEFL) for applicants whose first language is not English; and a g.p.a. of at least 3.00.
In addition, the College of Nursing requires the following:

- a bachelor's degree with a major in nursing from an accredited program (options are available for registered nurse applicants with a non-accredited B.S.N., a non-nursing B.A. or B.S., or a B.S.N. from a foreign country);
- the legal requirements for the practice of nursing in Iowa;
- current written recommendations from three persons familiar with the applicant's competence in the practice of nursing and potential for leadership and scholarship (forms required);
- current résumé, goal statement, and supplemental/information form;
- completion of an upper-division nursing research course in the undergraduate program; and
- successful completion of an upper-level statistics course (or equivalent) within five years of registering for 096:206 Nursing Science and Inquiry.

Students whose first language is not English must score 550 (paper-based) or 213 (computer-based) or higher on the Test of English as a Foreign Language (TOEFL).

Applications for admission to the M.S.N. program are reviewed twice a year. For review, the applicant's file must be complete, with all relevant materials submitted. Application deadlines are February 15 for fall admission and October 1 for spring admission. Students in the practitioner programs and the anesthesia program may begin those programs only in fall. Application deadline for the anesthesia program is October 1.

A criminal background check is conducted for all graduate students upon admission.

All Graduate College policies pertaining to academic standing, probation, and dismissal are applicable to graduate students in nursing.

Transfer credits applicable to the master's degree program are limited and must be approved by the director of the graduate program in nursing and by the student's adviser. Course work taken 10 years or more before the final examination must be updated, according to University policy.

**Joint M.B.A./M.S.N. Program**

The joint M.B.A./M.S.N. program is designed for students with previous clinical and administrative experience. The joint program requires a total of 61 s.h. Applicants must be accepted for graduate study in both programs. For more information, contact the College of Nursing Graduate Programs Office.

**Joint M.S.N./M.P.H. Program**

The joint M.S.N./M.P.H. program is designed for students who want to pursue careers that include professional activities in nursing and public health. The program requires a total of 60 s.h. Applicants must be accepted for graduate study in both programs. Contact the College of Nursing Graduate Programs Office for more information.

**Nursing Home Administrator Licensure**

The nursing home administrator program offers students an efficient option for completing requirements for licensure examination while obtaining a M.S.N. Students may complete the requirements for licensure by supplementing study in adult and gerontology health nursing, adult/gerontology nurse practitioner, or nurse manager.

**Doctor of Philosophy**

The Ph.D. program in nursing prepares scientists to conduct research in nursing, extend their knowledge base relevant to nursing, and contribute to the body of knowledge in the discipline of nursing. Study requires expertise in clinical nursing and competence in research that relates to nursing practice and health care delivery.

B.S.N. students who intend to pursue a Ph.D. in nursing may be eligible to enter the doctoral program directly, once they have completed the B.S.N. Contact the Graduate Programs Office for more information.

The curriculum has five focal areas from which students choose: nursing in aging, nursing administration, nursing informatics, child and family nursing, and an individualized focus. Graduates of the program aspire to careers as researchers, college and university faculty members, consultants, and as leaders in the nursing profession, in health policy-making agencies, and in health care delivery systems.
Degree Requirements

All students must take the following courses.

- 096:340-096:341 Nursing Theory
- Construction I-II 6 s.h.
- Three of these:
  - 096:300 Classics in the Social Evolution of Modern American Nursing 3 s.h.
  - 096:310 Advanced Nursing Informatics 3 s.h.
  - 096:320 Economics of Health Care and Nursing 3 s.h.
  - 096:330 Nursing's Role in Health Care Policy 3 s.h.
- Cognate minor courses 12 s.h.
- Cognate research sequence: research methods and statistics 9 s.h.
- 096:490-096:491 Research Practicum 0 s.h.

In addition, students must take the seminars and practicums appropriate for their focus area.

Aging Focus

- 096:410 Nursing Research of Biological Phenomena and Interventions for the Elderly 3 s.h.
- 096:420 Geriatric Mental Health Research 3 s.h.
- 096:430 Nursing Research in Sociocultural Phenomena and Interventions for the Elderly 3 s.h.
- 096:440 Research Utilization Residency in Care of the Elderly 3 s.h.

Nursing Administration Focus

- 096:450 Research Seminar in Nursing Administration I: Organizational Systems Concepts 3 s.h.
- 096:451 Research Seminar in Nursing Administration II: Health Care System Concepts 3 s.h.
- 096:460 Innovations in Nursing Management 3 s.h.
- 096:480 Residency in Nursing Service Administration 3 s.h.

Nursing Informatics Focus

- 096:462 Research in Nursing Informatics I 3 s.h.
- 096:463 Research in Nursing Informatics II 3 s.h.
- 096:465 Residency in Nursing Informatics 3 s.h.

One of these:
- 096:313 Computational Intelligence 3 s.h.
- 096:464 Nursing and Health Representation and Knowledge Building 3 s.h.
- 096:470 Methods and Issues in Nursing Interventions Effectiveness Research 3 s.h.

Child and Family Nursing Focus

- 096:405 Family Nursing Research 3 s.h.
- 096:445 Research Residency in Child and Family Nursing 3 s.h.

Two of these:
- 096:415 Genetic Nursing Research 3 s.h.
- 096:425 Research in Sociocultural Perspectives for Family and Women's Health 3 s.h.
- 096:435 Research in Cognitive and Behavioral Interventions for Children 3 s.h.

COMPREHENSIVE EXAM, DISSERTATION

All Ph.D. students must complete a written comprehensive examination. They earn 12 s.h. for work on the dissertation by completing 096:497 Dissertation Research Seminar I: Scholarship Development (1 s.h.), 096:498 Dissertation Research Seminar II (0 s.h.), and 096:499 Dissertation Research (11 s.h.), which includes a dissertation prospectus, the dissertation, and an oral defense.

Admission

Applicants to the Ph.D. program must satisfy the following requirements:

- completion of an accredited basic nursing program;
- completion of a master's degree program;
- current R.N. licensure to practice nursing;
- GRE General Test, preferably within the past five years;
- a minimum of one graduate-level, 3 s.h. course in research and inferential statistics;
- a two- or three-page statement describing educational objectives and identifying a focal area for doctoral study;
- three recommendations from professionals in the field; and
- a current curriculum vitae.

One year of nursing experience is preferred.

Students whose first language is not English must score 550 (paper-based) or 213 (computer-based) or higher on the Test of English as a Foreign Language (TOEFL).
Nursing Service Administration Certificate

The Certificate in Nursing Service Administration provides ongoing education for nurses who have a bachelor's degree but do not wish to pursue the M.S.N. Students in the 15 s.h. certificate program must hold a B.S.N. and have an RN license.

Post-M.S.N. Certificate Programs

The post-master's degree Certificate in Advanced Practice Nursing allows for advanced clinical training in four specialty tracks: pediatric nurse practitioner, adult/gerontology nurse practitioner, family nurse practitioner, and psychiatric/mental health nursing. Certificate requirements include advanced clinical core courses and a sequence of specialty courses. Students formulate a plan of study with the advice and counsel of their adviser and/or the director of the master's program. Successful completion of the specialty sequence qualifies a student to sit for professional certification examinations. Completion of the certificate program is noted on the student's transcript.

Nursing Informatics Certificate

The Certificate in Nursing Informatics program is open to graduate students. Course work for the certificate focuses on methods and technologies of information handling and knowledge building in nursing. Certificate students must earn 20 s.h. in courses that cover the development, support, and evaluation of applications, tools, processes, and structures used to manage data for patient care and administrative support.

Health Informatics Certificate

The Certificate in Health Informatics is open to graduate students. The certificate requires 20 s.h. earned in courses numbered 100 or above, including two required core courses.

Health Informatics I (096:283, 3 s.h.) is an interdisciplinary course intended primarily for graduate students, faculty, and health care clinicians. It explores decision-making processes and technological tools to support health care administration, management, and practice.

Health Informatics II (096:289, 3 s.h.) is an interdisciplinary course focused on field projects related to one or more health informatics topics under the direction of established researchers/educators. It includes a seminar.

Students select electives (9-14 s.h.) from outside their major program of study. For example, a student working toward a nursing degree and the Certificate in Health Informatics can use only non-nursing electives for the certificate. Students choose electives with the guidance of their academic and certificate advisers.

Students completing a thesis, project, or independent study in their major program of study may include this credit toward the Certificate in Health Informatics if the certificate adviser determines that the subject matter is pertinent.

Professional Improvement

Registered nurses who wish to take University of Iowa course work to fulfill professional or personal improvement objectives may request admission in the professional improvement (PI) category. This admission status allows students to take some graduate courses at the University without committing to a degree objective.

Admission as a nursing professional improvement student requires a formal application, including submission of three current written recommendations and all academic transcripts. GRE General Test scores, required by the University, must be submitted before the end of first semester registration. Deadlines are July 15 for fall semester admission, December 1 for spring semester admission, and May 1 for summer session admission.

Since acceptance as a PI student does not influence acceptance to the M.S.N. or Ph.D. programs, PI students interested in master's or doctoral study in nursing must follow the application procedures for those programs (see the appropriate sections, above). Only 6 s.h. or two required nursing core courses taken under the professional improvement status may be used to fulfill M.S.N. requirements. Professional improvement students may not enroll in doctoral courses.
Continuing Education

Through continuing education, the college offers nonacademic, short-term programs for registered nurses. Continuing Education Units (CEUs) are awarded for each program on the basis of one unit per 10 clock hours of instruction. The College of Nursing is approved by the Iowa Board of Nursing as an approved provider, number 1, and is accredited by the American Nurses' Association Board of Accreditation and the National Association of Pediatric Nurse Associates and Practitioners.

Facilities

The Nursing Building is centrally located on the University's main campus, in close proximity to the Carver College of Medicine and the Colleges of Dentistry, Pharmacy, and Public Health, and University of Iowa Hospitals and Clinics, Bowen Science Building, and the Hardin Library for the Health Sciences.

Completed in 1971, the building consists of five floors with varied and specialized facilities. Administrative offices are located on the first floor. Faculty offices are located on every floor except the second, which is used entirely for classrooms and laboratories.

Learning Resource Services, located on the ground level, includes a technology laboratory. There are classrooms throughout the building; conference rooms, student lounges, and meeting rooms are located conveniently. Research and computer facilities provide direct access to the University's computing facilities and to college-owned microcomputers.

Courses

Primarily for Undergraduates

096:030 Human Development and Behavior 3 s.h.
Normal developmental transitions experienced by individuals and family systems throughout the lifespan, including physical, cognitive, and social-emotional development. Prerequisite: 031:001. Same as 153:030.

096:031 Adult Development and Aging 1 s.h.

096:050 Perspectives on Health Care Systems 3 s.h.
Health care systems, delivery modes, resources, economics, contemporary problems and policies that influence health care; emphasis on the context of health care delivery. Prerequisite: facility with e-mail and World Wide Web.

096:051 Art and Science of Nursing 3 s.h.
Integrated view of theories from nursing, the arts, the sciences; history, holistic, and global perspectives on creative and scientific processes and concepts that underlie and guide nursing practice.

096:052 Community Health Nursing 3 s.h.
Community design and implementation of health promotion, maintenance, and restoration of health care; focus on clinical decision-making skills. Prerequisite: 096:127 and nursing major. Pre- or corequisite: 096:128, 096:115, and 096:127.

096:083 Diversity and Oppression in Health Care 1-2 s.h.
Messages about oppressed minority groups, how these messages relate to health care.

096:100 Mental Health Services and Policy I 3 s.h.
Same as 174:140.

096:109 Leadership U 1-3 s.h.
Reposable.

096:114 Human Pathophysiology: Organ Systems 3 s.h.
Normal and abnormal functioning of human cells, tissues, and organ systems over the lifespan; focus on processes of communication, control, defense, and movement. Prerequisites: approved courses in biology, inorganic chemistry, microbiology, and human anatomy, or consent of instructor.

096:115 Human Pathophysiology: Cellular/Neurology/Immunology 3 s.h.
Normal and abnormal functioning of human cells, tissues, and organ systems over the lifespan; focus on processes of communication, control, defense, and movement. Prerequisites: approved courses in biology, inorganic chemistry, microbiology, and human anatomy, or consent of instructor.

096:124 Pharmacotherapeutics in Nursing 3 s.h.
Basic principles of pharmacotherapeutics and pharmacologic interventions; focus on mechanism of drug actions in patient treatment. Prerequisites: 096:114 and 096:115, or consent of instructor.

096:126 Communication for Health Professionals 2 s.h.
The communication process in health care settings; emphasis on theory-based strategies to improve communication with individuals, families, other health care professionals.

096:127 Health Assessment Across the Life Span 4 s.h.
Knowledge and skills health professionals need to perform holistic health assessments of individuals across the life span; emphasis on history taking, physical assessment skills, laboratory practices. Prerequisites: anatomy, human development and behavior, and animal biology courses; and admission to the College of Nursing.

096:134 Basic Concepts of Nursing Care 4 s.h.
Physiological and behavioral concepts, nursing interventions, and activities across settings and populations; based on nursing interventions classification taxonomy. First in a two-course sequence. Prerequisite: nursing major. Pre- or corequisite: 096:114 or 096:115, and 096:127.

096:135 Complex Concepts of Nursing Care 4 s.h.

096:136 Core Clinical Practicum 4 s.h.
Acute care of adult clients in the clinical setting; in-depth practicum experience applying basic and complex concepts of nursing care; focus on clinical decision-making skills. Prerequisites: 096:126, 096:117, and 096:134. Corequisite: 096:135.

096:139 Parent-Child Nursing 3 s.h.
<table>

<tr>
<th>Course Number</th>
<th>Course Title</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>096:141</td>
<td>Gerontological Nursing</td>
<td>3 s.h.</td>
<td>Nurse's role in promoting, maintaining, and restoring the health of aging adults; nursing science applied to care of older adults in diverse settings. Prerequisite: 096:135. Pre- or corequisite: 096:124.</td>
</tr>
<tr>
<td>096:142</td>
<td>Gerontological Nursing Practicum</td>
<td>3 s.h.</td>
<td>Nursing process applied to promote, maintain, and restore health of older adults; opportunities to provide nursing care to well elderly and to acutely and/or chronically ill elderly in a variety of settings. Prerequisites: 096:155 and 096:130. Pre- or corequisites: 096:124 and 096:141.</td>
</tr>
<tr>
<td>096:143</td>
<td>Research for Nursing Practice</td>
<td>3 s.h.</td>
<td>The research process and its application to nursing. Prerequisites: 096:050, an approved statistics course, and admission to the College of Nursing.</td>
</tr>
<tr>
<td>096:146</td>
<td>Health Promotion for Older Adults</td>
<td>3 s.h.</td>
<td>Same as 153:145, 169:146.</td>
</tr>
<tr>
<td>096:147</td>
<td>End-of-Life Care for Adults and Families</td>
<td>2-4 s.h.</td>
<td>End-of-life issues in care of adults, older adults, and their families; key concepts related to end-of-life care, including the epidemiology of dying and systems of care; communication, roles and relationships, pain and symptom management, legal and ethical issues, grief and grieving, well being, psychosocial, spiritual, cultural aspects of care. Prerequisites: 096:135 and 096:136, or 88N student standing, or consent of instructor. Same as 046:145, 153:147.</td>
</tr>
<tr>
<td>096:150</td>
<td>Independent Study</td>
<td>1-3 s.h.</td>
<td>Supervised study designed for individual undergraduate students.</td>

<td>1 s.h.</td>
<td>Supervised study designed for individual honors students.</td>
</tr>
<tr>
<td>096:155</td>
<td>Psychiatric/Mental Health Nursing</td>
<td>3 s.h.</td>
<td>General principles and practices of psychiatric/mental health nursing; psychiatric disorders, populations at risk, continuity of care, problems in daily living. Prerequisite: 096:135. Pre- or corequisite: 096:124.</td>
</tr>
<tr>
<td>096:156</td>
<td>Psychiatric/Mental Health Nursing Practicum</td>
<td>3 s.h.</td>
<td>Nursing process used to deliver nursing care to individuals and families with mental illness in a variety of clinical settings; focus on promotion, maintenance, restoration of the mental health of individuals and families. Prerequisites: 096:135 and 096:136. Pre- or corequisites: 096:124 and 096:155.</td>
</tr>
<tr>
<td>096:157</td>
<td>Nursing Leadership and Care Management</td>
<td>3 s.h.</td>
<td>Analysis of nursing leadership, care management, and models of care in the context of society and the interdisciplinary health care system. Prerequisite: senior standing in nursing or consent of instructor.</td>
</tr>
<tr>
<td>096:158</td>
<td>Clinical Nursing Internship</td>
<td>5 s.h.</td>
<td>Independent internship in one of a variety of health care settings to promote role transition, lifelong learning; emphasis on integration and application of knowledge and skills to design, provide, manage, and coordinate care. Prerequisite: senior standing in nursing.</td>
</tr>
<tr>
<td>096:159</td>
<td>Contemporary Nursing Practice Issues</td>
<td>3 s.h.</td>
<td>Identification, exploration, analyses of selected issues in nursing and health care; impact of significant historical, social, political, genetic, legal, and ethical factors on development of the nursing discipline. Prerequisite: senior standing in nursing or consent of instructor.</td>
</tr>
<tr>
<td>096:160</td>
<td>Nonprofit Organizational Effectiveness I</td>
<td>3 s.h.</td>
<td>Same as 06J:147, 024:147, 025:176, 032:127, 042:157, 045:175.</td>
</tr>
<tr>
<td>096:171</td>
<td>Nursing and Society</td>
<td>1 s.h.</td>
<td>Introduction to professional nursing; history, knowledge development, roles, and health professional relationships of nursing; nursing's unique contribution to meeting societal needs through theory, research, and practice. Prerequisite: admission to M.N.H.P. program.</td>
</tr>
<tr>
<td>096:172</td>
<td>Clinical Inquiry</td>
<td>4 s.h.</td>
<td>Clinical reasoning and outcomes, information systems and management, evidence-based practice, scholarship and scientific writing, development of skill using the research process to define clinical research problems. Prerequisites: 225:101 or 225:102 or equivalent, and admission to M.N.H.P. program.</td>
</tr>
<tr>
<td>096:173</td>
<td>Clinical Reasoning</td>
<td>4 s.h.</td>
<td>Skills to help nontraditional nursing students synthesize, expand, and refine nursing concepts and clinical reasoning competencies; development and application of cognitive and psychomotor skills necessary for performing systematic, holistic, and culturally competent health assessment. Prerequisites: 096:114 or 096:115 or equivalent, 096:177, and admission to M.N.H.P. program.</td>
</tr>
<tr>
<td>096:177</td>
<td>Therapeutic Nursing Interventions</td>
<td>4 s.h.</td>
<td>Physiological and behavioral concepts, nursing diagnoses, interventions, and outcomes across settings and populations; nursing classifications; experience in the laboratory. Prerequisites: 096:114 or 096:115 or equivalent, 096:176, and admission to M.N.H.P. program.</td>
</tr>
<tr>
<td>096:183</td>
<td>Intensive Practicum II</td>
<td>4 s.h.</td>
<td>Experience in varied acute and community-based settings; opportunity to apply principles to the care of diverse populations, consistent with the four specialty theory courses; proficiency with advanced care management interventions and technologies. Prerequisites: 096:180 and admission to M.N.H.P. program. Corequisites: 096:139, 096:141, 096:153, and 096:155.</td>
</tr>
<tr>
<td>096:184</td>
<td>Hairitage: African American Women's Hair Culture</td>
<td>2-3 s.h.</td>
<td>Hair and its centrality to the experience of women of African descent; emotional, political, economical, and historical significance; political, legal, and educational implications; connections to ideas of aesthetics, race relations, family dynamics, consumerism, and so forth.</td>
</tr>
</tbody>
</table>
096:185 Internship in Care Management 14 s.h.
Intensive clinical experience in nursing care management with nurse preceptors, with focus on complex, collaborative nursing care management of diverse populations; enhancement of care management skills as a foundation for optimal clinical outcomes. Prerequisites: 096:189, 096:190, 096:153, 096:155, 096:183, and admission to M.N.H.P. program.

096:186 Cultural Expeditions in Nursing 3 s.h.
Multicultural awareness, recognition of specific health care beliefs and values; online course originating at University of Missouri-Columbia. Prerequisite: 096:135 or consent of instructor.

096:187 Legal Issues for Health Care Providers 3 s.h.
Legal issues faced by health care providers, counselors, and social services providers; administrative and regulatory requirements; civil lawsuits, issues that affect students as providers, advocates, and individuals.

096:188 Clinical Leadership I 2 s.h.
Nursing leadership, care management, and models of care in contexts of society and interdisciplinary health care; resource allocation and utilization, and delivery of care; clinical outcome improvement for populations and individuals. Prerequisites: 096:176 and 096:177.

096:189 Clinical Leadership II 2 s.h.
Builds on the content in 096:188; application of leadership and management concepts and skills in a changing, interdisciplinary health care system; concepts for human resource management and quality care outcomes for individuals and populations; personal professional roles; transition to leadership roles, support from professional organizations. Prerequisite: 096:188.

096:190 Dimensions of Professional Nursing 3 s.h.
The nursing discipline; identification, exploration, analysis of contemporary issues and trends in nursing; professional roles and responsibilities; the health care environment; importance of nursing science, theory, and research to nursing practice. Prerequisites: computer literacy and RN/B.S.N. standing, or consent of instructor.

096:191 Health Assessment 4 s.h.
Health assessment of adults; experience demonstrating assessment skills, compiling a health history, conducting a physical exam, and developing nursing diagnoses for clients. Prerequisites: RN/B.S.N. standing or consent of instructor.

096:192 Community Health Nursing 3 s.h.
Nursing's role in the relationship between community conditions and public health; principles of public health, nursing knowledge, skills used to address primary, secondary, tertiary disease prevention needs. Prerequisites: 096:190, 096:191, and nursing major or consent of instructor.

096:193 Community Health Nursing Practicum 1, 3 s.h.
Experience applying principles of public health and nursing skills and knowledge to primary, secondary, and tertiary disease prevention problems of individuals, families, and groups. Prerequisites: 096:190 and 096:191, or consent of instructor; and RN licensure in state of practicum. Pre- or corequisite: 096:192.

096:194 Leadership and Care Management in Professional Nursing Practice 3 s.h.
Nursing leadership and management in a dynamic practice environment; focus on context in which nurses practice, leadership and management principles in changing health care system. Prerequisites: 096:192, 096:193, and 096:197; or consent of instructor.

096:195 Practicum for Leadership and Care Management in Professional Nursing 3 s.h.
Experience applying concepts of leadership, management, and evidence-based practice in a variety of settings; development of individualized plan of study for the experience. Prerequisites: 096:192, 096:193, and 096:197; or consent of instructor, and RN licensure in state of practicum. Pre- or corequisite: 096:194.

096:196 Special Studies in Nursing 3 s.h.
Identification, explanation, and analysis of contemporary issues that confront the professional nurse; the practice of nursing, regulation of health care systems, available resources. Prerequisite: 096:192 or consent of instructor.

096:197 Research for Practicing Nurses 3 s.h.
Research process, its application to nursing practice for RN students; conceptual basis, methodology, data collection, data analysis, presentation and utilization of research. Prerequisites: 096:190 or consent of instructor, and an approved statistics course.

Primarily for Graduate Students

Courses are offered only if minimum enrollments are maintained.

096:170 Introduction to Case Management 2-3 s.h.
Purpose and models of case management; role and work redesign for effective outcomes of care; efficient resource use; critical paths, care management.

096:206 Nursing Science and Inquiry 3 s.h.
Research design and analysis for examining, applying, and using nursing science. Prerequisites: 096:140 and equivalent, and an advanced statistics course within past five years.

096:207 School Nursing Practice and Issues 3 s.h.
Issues in school nursing practice; roles and responsibilities of the school nurse, issues, management of common illnesses and conditions.

096:208 Leadership for Advanced Nursing Practice 3 s.h.
Roles and behaviors for leading others and influencing health care delivery.

096:209 Health Systems/Economics/Policy 3 s.h.
Global, economic, organizational, political, and technological contexts for advanced nursing practice.

096:210 Healthcare Financial Management 3 s.h.
Overview of health care finance and finance management; finance principles used by health services organizations. Prerequisite: graduate standing or consent of instructor.

096:213 Physiology for Advanced Clinical Practice 3 s.h.
Regulation of cellular, organ, and system functions; regulation of internal milieu; functional interrelationships among body systems; cellular and body-wide mechanisms of self-defense, illustrative examples of pathological phenomena. Prerequisites: anatomy, physiology, microbiology, and pathophysiology courses, or equivalent, or consent of instructor.

096:214 Advanced Health Assessment for Clinical Practice 3 s.h.
Knowledge and skills necessary for advanced health assessment of individuals and families across the life span. Prerequisite: graduate standing in nursing or consent of instructor.

096:215 Primary Care: Infants, Children, and Adolescents I 2-3 s.h.

096:217 Primary Care: Infants, Children, and Adolescents II 3 s.h.
Enhancement of clinical knowledge and skills for infant, child, adolescent care; development and refinement of knowledge and skills in primary health care delivery. Prerequisites: 096:215 or 096:280. Same as 070:201.
096:221 Primary Care: Pediatric Nurse Practitioner III Intensive Practicum 3 s.h.
In-depth practicum synthesizing clinical management and role enactment; opportunity for discussion and analysis of practice and role issues. Prerequisites: 096:220 and 096:285.

096:222 Health Promotion and Intervention for Primary Care 3 s.h.
Theories of health promotion in primary care, levels of prevention, epidemiological principles and methods; specific interventions designed to maintain, promote, optimize health across the lifespan. Prerequisite: graduate standing or consent of instructor.

096:223 Clinical Applications for Health Assessment and Health Promotion 3 s.h.
Advanced health assessment and promotion skills applied to planning, implementing, and evaluating interventions designed to maintain, promote, and optimize health across the lifespan. Prerequisite: graduate standing in nursing or consent of instructor. Pre- or corequisites: 096:214 and 096:222.

096:224 Pharmacotherapeutics for Advanced Clinical Practice 4 s.h.
Pharmacologic, pharmacokinetic, and pharmacodynamic principles essential for advanced clinical practice; classes of drugs frequently used in management of common clinical conditions; legal considerations in prescriptive authority. Prerequisite: 096:213 or consent of instructor.

096:225 Biopsychosocial Dimensions of Healthy Aging 3 s.h.
Biopsychosocial dimensions of healthy aging in individuals; healthy aging, including behavior and normal age-related physiological changes, psychosocial and cultural implications of aging; expansion of gerontological nursing based on integration of theory, research, standardized nursing languages.

096:228 Advanced Practice Genetic Nursing I 3 s.h.

096:229 Advanced Practice Genetic Nursing Practicum I 2 s.h.
Integration and application of advanced practice in genetic nursing assessment and counseling skills with individuals and families. Corequisite: 096:228 or consent of instructor.

096:230 Advanced Practice Genetic Nursing II 3 s.h.
Genetic conditions that present in adult years; gene detection, ethical and social aspects of genetic health care delivery, professional issues in the delivery of genetic care. Prerequisites: 096:228 and 096:229. Corequisites: 07C:178 and 096:231.

096:231 Advanced Practice Genetic Nursing Practicum II 2 s.h.
Application of advanced practice in genetic nursing; emphasis on conditions that present in the adult years and the nurse's role in an interdisciplinary genetic delivery system. Prerequisite: 096:229. Corequisite: 096:230.

096:232 Professional Aspects of Clinical Nursing Practice 3 s.h.
Advanced nursing role competencies and related settings in which advanced nursing practice occurs; history and development, core competencies, advanced practice roles, practice management issues. Prerequisite: 096:208.

096:234 Advanced Community Health Assessment 3 s.h.
Health of communities, process of assessment; emphasis on conceptual models from public health that focus on select populations, community assessment. Prerequisite: epidemiology course.

096:235 Advanced Community Health Nursing Practicum I 2 s.h.
Integration and application of advanced community health assessment knowledge, skills; nurse's role in population-focused practice. Prerequisites: epidemiology course and M.S.N. student standing. Corequisite: 096:234.

096:236 Advanced Community Health Intervention and Evaluation 3 s.h.
Development, implementation, evaluation of health promotion and disease prevention strategies for select populations, communities. Prerequisite: 096:234.

096:237 Advanced Community Health Nursing Practicum II 2 s.h.
Integration and application of knowledge and skills for advanced community health intervention, outcome evaluation. Offered spring semesters of odd years. Prerequisite: M.S.N. enrollment. Pre- or corequisite: 096:236.

096:238 Intensive Practicum in Advanced Community Health 3 s.h.
Synthesis of advanced public health theory, nursing knowledge, in-depth experience synthesizing clinical management, role enactment. Offered summer sessions of odd years. Prerequisites: 096:235 and 096:237.

096:241 The Care of the Frail Elderly 3 s.h.
Clinical management of the elderly, emphasis on economic considerations, principles of gerontological care, common syndromes, ethical issues; clinical application experience in a long-term care setting. Prerequisites: 096:214, 096:222, and 096:224.

096:242 Primary Care: Adult/GNP Clinical Practice I 3 s.h.
Clinical management of the pathological alterations presented in 096:280; development of comprehensive assessment and clinical management skills in the context of community services and resources. Corequisite: 096:284.

096:243 Primary Care: Adult/GNP Clinical Practice II 3 s.h.
Continuation of 096:242, which is prerequisite; clinical management of the pathological alterations presented in 096:284; comprehensive assessment and clinical management skills. Corequisite: 096:284.

096:244 Primary Care: Adult/Gerontological Nurse Practitioner III Intensive Practicum 3 s.h.
Transition from student to advanced adult/gerontological nurse practitioner; in-depth primary care experience synthesizing aspects of clinical management and role enactment. Prerequisite: 096:243.

096:246 Nursing Education: Process, Roles, and Strategies 3 s.h.
Role of nurse educator through study, application of teaching/learning theories; learning tasks of students in nursing education programs. Pre- or corequisite: 096:208 or consent of instructor.

096:247 Curriculum Development in Nursing Education 3 s.h.
Societal, educational, professional factors in undergraduate curriculum design, evaluation of components in basic nursing education programs. Prerequisite: 096:246.

096:250 Psychiatric/Mental Health Nursing Theory I 3 s.h.
Basic psychological principles, theories related to mental health and interactions between physical and mental health; psychosocial theory viewed through framework of lifespan development, infancy through adulthood. Prerequisite: graduate standing or consent of instructor.
096:251 Psychiatric/Mental Health Nursing Theory II 3 s.h.
Advanced psychiatric nursing practice with selected populations; definition and expansion of practice based on the integration of theory, standardized languages, research, self-evaluation. Prerequisite: 096:250.

096:252 Psychiatric/Mental Health Nursing Practice with Individuals 3 s.h.
Therapeutic models that guide clinical practice with individuals; major psychological and biological theories applied to nursing process with individuals in a variety of settings. Prerequisites: 096:224, 096:251, and admission to psychiatric/mental health nursing program.

096:253 Psychiatric/Mental Health Nursing Practice with Families 3 s.h.
Experience using family therapy as a treatment modality; relevance of family intervention models for meeting mental health needs of families. Prerequisites: 096:251 and admission to psychiatric/mental health nursing program.

096:254 Psychiatric/Mental Health Nursing Practice with Groups 3 s.h.
Experience using group process as a treatment modality; relevance of group intervention models for meeting mental health needs of clients across the life span. Prerequisites: 096:251 and admission to psychiatric/mental health nursing program.

096:255 Psychiatric/Mental Health Care Management 3 s.h.
Direct and indirect care responsibilities, including clinical supervision, evaluation of treatment environments, program development, interdisciplinary collaboration; development of goals for future professional development and contributions to nursing. Prerequisites: 096:251 and 096:252.

096:256 Occupational Health Nursing I 3 s.h.
Framework for occupational health nursing practice and evolving role of the occupational health nurse, focus on health in the workplace. Prerequisite: 175:230 or consent of instructor. Corequisite: 096:257.

096:257 Occupational Health Practicum I 3 s.h.

096:258 Occupational Health Nursing II 3 s.h.

096:259 Occupational Health Practicum II 3 s.h.
Transition from student role to clinical specialist role in occupational health nursing, in-depth experience in student’s interest area. Corequisite: 096:258.

096:260 Nursing Administration: Process, Roles, and Strategies 3 s.h.
Functions, responsibilities of nurse administrator; emphasis on hospital setting. Recommended: 096:208.

096:261 Nursing Administration: Process, Roles, and Strategies II 3 s.h.
Analysis of functions, responsibilities of nurse administrator. Prerequisite: 096:260 or consent of instructor.

096:263 Informatics in Nursing and Health Care 3 s.h.
Foundation of information management and processing principles that support data, information, and knowledge in provision and delivery of nursing and health care. Prerequisite: competence in computer use and nursing major, or consent of instructor.

096:264 Nursing and Health Informatics in the International Context 2, 4 s.h.
Informatics dimensions of health care systems within a specific historical, cultural, legal, ethical, and political national context; focus on unique services of nursing, necessary information infrastructure. Prerequisite: graduate informatics course.

096:266 Advanced Care Management: Interdisciplinary Approach 3 s.h.
Managing health care outcomes for cost and quality: advanced topics in health care coordination, interdisciplinary care management; managed care, financial, legal, and ethical considerations; outcomes of case management practice. Prerequisite: 096:170 or consent of instructor. Same as 174:266.

096:269 Human Physiology, Pathology, and Assessment for Advanced Practice Nursing 3 s.h.
Detailed study of normal and abnormal human physiology, including mechanisms that govern and support cell, organ, and system function; builds on basic sciences required for undergraduate nursing curriculum and on clinical skills from experience in intensive care setting. Prerequisite: admission to anesthesia nursing program or consent of instructor.

096:270 Human Anatomy, Physiology, Pathophysiology, and Assessment for Advanced Practice Nursing 3, 6 s.h.
Interrelationships between anatomic structure and physiological function in health and disease; clinical assessment of functional integrity of organ systems; implications of pathophysiology for anesthesia. Prerequisite: admission to anesthesia nursing program or consent of instructor. Same as 096:270.

096:271 Chemical and Physical Principles of Anesthesia Practice 3 s.h.
Chemistry and physics, as applied to anesthesia. Prerequisite: admission to anesthesia nursing program or consent of instructor. Same as 116:271.

096:272 Pharmacology of Anesthesia Practice I 4 s.h.
Mechanism and action of drugs, focus on pharmacotherapeutic principles, including pharmacokinetics, pharmacodynamics, receptor binding, cell signaling, principles of uptake, distribution, elimination of anesthetic and adjunctive agents. Prerequisites: grade of 2.67 or higher in 096:271 and admission to anesthesia nursing program, or consent of instructor. Same as 116:272.

096:273 Pharmacology of Anesthesia Practice II 1 s.h.
Continuation of 096:272, vascular, hepatic, renal, GI, endocrine aspects; cellular mechanisms, electrolyte alterations. Prerequisites: grade of 2.67 or higher in 096:272 and admission to anesthesia nursing program, or consent of instructor. Same as 116:273.

096:274 Basic Principles of Anesthesia Practice 3 s.h.
Overview of anesthesia as a nursing specialty; patient assessment, anesthetic planning and management, pertinent regulations; principles of general and regional anesthesia for surgical specialties. Prerequisite: grade of 2.67 or higher in 096:272, or concurrent enrollment in 096:273, or consent of instructor. Same as 116:274.

096:275 Advanced Principles of Anesthesia Practice I 2 s.h.
Special needs and intraoperative management of obstetric, pediatric, and neurological patients; emphasis on pathophysiology, monitoring, ancillary requirements. Prerequisites: grade of 2.67 or higher in 096:273 and 096:274, or consent of instructor. Same as 116:275.

096:276 Advanced Principles of Anesthesia Practice II 2 s.h.
Special needs and intraoperative management of patients in cardiac, vascular, thoracic, and other surgical specialties; focus on altered pathophysiology, anesthetic requirements, strategies for special surgical situations. Prerequisites: grade of 2.67 or higher in 096:273 and 096:274, or consent of instructor. Same as 116:276.
096:277 Advanced Principles of Anesthesia Practice III 1 s.h.
Acute and chronic pain management; anesthetic problems with concurrent multisystem disease, advanced age, altered physical and/or mental status. Prerequisites: grade of 2.67 or higher in 096:273 and 096:274, or consent of instructor. Same as 116:277.

096:278 Professional Aspects of Anesthesia Nursing Practice 2 s.h.
Issues in contemporary anesthesia nursing practice: historical development; ethical, legal, and political aspects; evaluation; quality management; responsibilities; career expectations and development; role of professional organization. Prerequisite: anesthesia nursing program enrollment. Same as 116:278.

096:279 Equipment and Technological Principles of Anesthesia Practice I 1 s.h.
Anesthesia delivery systems, ancillary equipment, monitoring devices; correlation of applicable chemical and physical principles for safe operation, care, and cleaning of anesthesia-related equipment. Prerequisites: 116:271 and anesthesia nursing program enrollment. Same as 116:279.

096:280 Primary Care: Adults and Older Individuals I 3 s.h.
Pathophysiologic alterations and clinical management of associated health care problems in adults, the elderly. Prerequisites: 096:213, 096:214, 096:222, and 096:224.

096:281 Primary Care: PNP Clinical Applications I 3 s.h.
Integration of advanced assessment skills, health promotion, and knowledge of pathophysiological alterations in development and application of advanced practice competencies, including clinical decision making and critical thinking for care of infants, children, adolescents. Prerequisite: 096:223. Corequisite: 096:219.

096:282 Primary Care: Family Nurse Practitioner Clinical Applications I 3 s.h.
Integration of advanced assessment skills, health promotion, knowledge of pathophysiological alterations to develop and apply advanced practice competencies, including clinical decision making, critical thinking. Prerequisite: 096:223. Corequisite: 096:280.

096:283 Health Informatics I 3 s.h.
Technological tools that support health care administration, management, and decision making. Prerequisite: graduate standing or consent of instructor. Same as 096.225, 021.275, 050.283, 051.187, 056.186, 074.191, 174.226.

096:284 Primary Care: Adults and Older Individuals II 3 s.h.
Continuation of 096.280. Prerequisite: 096.280.

096:285 Primary Care: PNP Clinical Applications II 3 s.h.
Continuation of 096.281. Prerequisite: 096.281. Corequisite: 096.280.

096:286 Primary Care: Family Nurse Practitioner Clinical Applications II 3 s.h.

096:287 Pharmacology of Anesthesia Practice III 1 s.h.
Drugs specific to various specialty areas: tocolytics, vasoreactive and cardioactive agents, drugs that alter clotting, chronic pain therapy agents. Prerequisites: grade of 2.67 or higher in 096:273 or consent of instructor; and anesthesia nursing program enrollment. Same as 116:287.

096:288 Primary Care: FNP Intensive Practicum 4 s.h.
In-depth practicum experience synthesizing clinical management and role enactment; seminar on practice and role issues. Prerequisite: 096:286.

096:289 Health Informatics II 3 s.h.
Selected health informatics initiatives, including computer-based patient records, physiologic monitoring, networking, imaging, virtual reality; participation in an interdisciplinary project team focused on an informatics innovation; application and research seminars. Prerequisite: graduate standing or consent of instructor. Same as 021.280, 051:189, 056:287, 074:192.

096:290 Introductory Clinical Anesthesia 1 s.h.
Initial anesthesia preceptorship; development of basic clinical skills for work as a nurse anesthetist. Prerequisites: basic science core courses and anesthesia nursing program enrollment. Same as 116:290.

096:291 Clinical Anesthesia I 1 s.h.
Supervised clinical anesthesia experience for general, orthopedic, gynecologic, pediatric, urologic, dental, ENT, ambulatory surgery, or invasive diagnostic procedures. Prerequisites: 096:290 and anesthesia nursing program enrollment. Same as 116:291.

096:292 Clinical Anesthesia II 1 s.h.
Clinical anesthesia experience under faculty supervision at University Hospitals and Clinics, in surgical subspecialty rotations not completed in 096:291. Prerequisites: 096:291 and anesthesia nursing program enrollment. Same as 116:292.

096:293 Advanced Clinical Anesthesia 1 s.h.
Clinical anesthetic experience in neurologic surgery, cardiovascular/thoracic surgery; experience providing anesthesia for patients with complex pathophysiology in varied surgical settings. Prerequisites: anesthesia nursing concentration courses, anesthesia nursing program senior standing, and g.p.a. of 2.67 or higher. Same as 116:293.

096:294 Obstetrical Anesthesia 1 s.h.
Experience providing anesthesia for the parturient, initial neonatal care; two one-month rotations off campus. Prerequisite: anesthesia nursing program enrollment. Same as 116:294.

096:295 Rural Anesthesia 1 s.h.
Anesthesia experience in community hospitals; three one-month rotations at UI-affiliated clinical sites in rural Iowa. Prerequisite: anesthesia nursing program enrollment. Same as 116:295.

096:296 Independent Study arr.
Supervised study and/or clinical practice adapted to needs of master's degree students. Prerequisite: M.S.N. enrollment.

096:297 Primary Care: Neonatal Nurse Practitioner 4 s.h.
In-depth practicum synthesizing clinical management and role enactment; opportunity to discuss and analyze practice and role issues; incorporates national guidelines for neonatal nurse practitioner content. Offered summer sessions. Prerequisites: 096.284 and 096.286.

096:298 Master's Project arr.

For Doctoral Candidates

Open to doctoral students or to others with consent of instructor.

096:300 Classics in the Social Evolution of Modern American Nursing 3 s.h.
From 1870 to present: writings, classic books, documents; influence of societal conditions on expansion of nursing services, education.

096:309 Data Mining and Machine Learning 3 s.h.
Care access and utilization. Health experiences of U.S. women and families from oppressed, inter-related, and marginalized cultural and social groups, approaches to developing and testing interventions, outcomes promoting and enhancing health of women and families; mid-range theory related to health care access and utilization.

Dean: Jordan L. Cohen
Associate dean, academic affairs: Michael W. Kelly
Associate dean, research and graduate affairs: Michael W. Duffel
Assistant to the dean: Michael T. Sullivan
Director, Division of Pharmaceutical Service: Rolland I. Poust
Director, Division of Drug Information Service: Hazel H. Seaba
Laboratory director, Center for Advanced Drug Development: Alta Botha
Head, medicinal and natural products chemistry: Kevin G. Roe
Head, pharmaceutics: Craig K. Svensson
Head, clinical and administrative pharmacy: Bernard A. Sorofman
Professors (clinical): Bruce Alexander, James A. Pinto, Hazel H. Seaba
Adjunct professors: Douglas Geraets, Robert Linhardt, Mary Milavetz
Adjunct professors (clinical): Ting-Fong Chin, Lloyd E. Matheson
Associate professors (clinical): Jay D. Currie, Michael Ernst, Ronald A. Herman, James D. Hoehns, Michael W. Kelly, Randal P. McDonough, Cindy Marek
Adjunct associate professors: Dena Dillon, Helen Eddy, William Fisher, Angela Hoth, Mickey Jerome, Mark Jones, Carl Hensley, Hall Kautzman, Craig Logemann, Alan Mumick, Warren Narducci, Mary Ross
Assistant professors: Erik Edens, Robert Kerns, Thomas Prinzenaro, Alalger K. Salem, Julie M. Urmie
Adjunct professor (clinical) emerita: Ruth A. Galloway
Instructors (clinical): Lucinda M. Harms, Jeff Reist
The pharmacy profession is concerned with a wide variety of activities, from developing new drug products to dispensing medicines for patients. A recent concept in the delivery of pharmaceutical services is pharmaceutical care—the responsible provision of drug therapy to achieve defined outcomes that improve patients' quality of life. These outcomes include preventing, arresting, or curing a disease, and/or eliminating or reducing its symptoms. Pharmaceutical care can enhance health care in rural settings and in primary care among the elderly, who are by far the heaviest users of drug therapy. In order to carry out these responsibilities, pharmacists specialize in the science of drugs and drug information.

Work as a pharmacist dispensing medications and information at the corner pharmacy is just one aspect of the profession. Pharmacists are active in research, clinical practice, teaching, and counseling. Along with their training in science and drug preparation, they learn the business and communication skills necessary for their multifaceted careers.

Demand for qualified pharmacists is high. Iowa's graduates enjoy a 100 percent placement rate. Iowa's pharmacy students study with professors who, in many cases, are pioneering the development of new drugs to solve chronic health problems. They also enjoy advanced research facilities, including those of Iowa's drug research and manufacturing area, where experimental drugs are produced for testing and licensing by manufacturers before being introduced worldwide.

The College of Pharmacy's faculty and programs are organized in divisions defined by three major content areas: clinical and administrative pharmacy, medicinal and natural products chemistry, and pharmaceutics. These divisions provide course work for both the Doctor of Pharmacy curriculum and specialized graduate programs.

**CLINICAL AND ADMINISTRATIVE PHARMACY DIVISION**

Faculty in the Clinical and Administrative Pharmacy Division provide expertise and education in the professional practice of pharmacy. Many are practitioners in a wide variety of settings; they provide instruction in the professional role of the pharmacist and the safe and effective use of medications. Course work in this division is related to pharmacotherapy, communication and practice, ethics and law, the organization and administration of the health care system, and patient care. Faculty serve as
role models, providing closely supervised practice experiences.

The division’s M.S. and Ph.D. programs are based in two areas: clinical pharmaceutical sciences, and pharmaceutical socioeconomics (behavioral, economic, social, and administrative sciences).

**MEDICINAL AND NATURAL PRODUCTS CHEMISTRY DIVISION**

The Medicinal and Natural Products Chemistry Division provides course work in areas related to understanding the chemistry of drugs and their action on human systems. Additional content areas include principles of drug discovery and drug design, natural product chemistry, and biotechnology/genomic strategies for producing new drug molecules.

The division’s M.S. and Ph.D. programs provide abundant opportunities for interface with researchers in other areas, including medicine, pharmacology, biochemistry, chemistry, and pharmaceutics.

**PHARMACEUTICS DIVISION**

The Pharmaceutics Division focuses on physical pharmacy, dosage form development and performance, industrial and manufacturing pharmacy, and the pharmacokinetics and pharmacodynamics of drugs and biological molecules. M.S. and Ph.D. programs parallel the research in the division with specialization in formulation and preformulation sciences, biopharmaceutics, pharmacokinetics, pharmacodynamics, novel drug delivery systems, and tissue engineering. Multidisciplinary program opportunities also exist with faculty in chemistry, engineering, dentistry, and other departments.

**Accreditation**

The University of Iowa College of Pharmacy is accredited by the American Council on Pharmaceutical Education. Graduates of the Doctor of Pharmacy (Pharm.D.) program are qualified to take the national licensure examination given by the Iowa Board of Pharmacy Examiners.

**Doctor of Pharmacy (Pharm.D.)**

The Doctor of Pharmacy program prepares students for work as pharmacists. It provides professional education in a number of areas, including pharmaceutical technology, biopharmaceutics, medicinal chemistry and natural products, pharmaceutical socioeconomics, clinical and hospital pharmacy, and aspects of Biotechnology.

The Tippie College of Business, the Carver College of Medicine, the College of Dentistry, and the College of Liberal Arts and Sciences contribute to the education of pharmacy students by providing instruction in the physical sciences, basic medical sciences, business, the humanities, and social sciences.

The Pharm.D. program consists of two years of prepharmacy study in the College of Liberal Arts and Sciences at The University of Iowa or at any accredited community or liberal arts college, and four years of pharmacy studies in the College of Pharmacy. Admission deadline is January 1.

The Pharm.D. program requires satisfactory completion of required courses, including 20 s.h. of general education electives, a cumulative g.p.a. of at least 2.00, and a pharmacy g.p.a. of at least 2.00. The pharmacy grade-point average is computed from grades earned in all required courses that students have completed while enrolled in the College of Pharmacy, excluding general education electives, professional electives, and selectives.

Rules and regulations concerning academic probation, pass/nonpass, credit by examination, maximum schedule, second-grade-only option, waiver or substitution of courses, cancellation of registration, drop date, and correspondence study are provided in the College of Pharmacy section of the ISIS Student Handbook, and in the College of Pharmacy Student Handbook.

**Admission Acceptance Fee**

Students admitted to the College of Pharmacy are required to submit a $250 admission acceptance fee. The fee is applied to tuition for the student’s first semester of enrollment in the college. The deposit is not refunded to applicants who do not enroll in the College of Pharmacy.

**Professional Curriculum**

Students must be enrolled in the College of Pharmacy to take the college’s courses. Graduate students in other majors must have the instructor’s consent to take College of Pharmacy courses.

In addition to the specific courses listed here, students must complete 20 s.h. of general education courses chosen from behavioral, social, humanistic, and business disciplines.

### FOURTH YEAR: ADVANCED PRACTICE EXPERIENCES

During the fourth year, students are required to take nine 5-week rotations, working in a variety of settings with pharmacists providing pharmaceutical care to their patients. These experiences emphasize the provision of primary care, which is especially important in rural Iowa.

Students earn a total of 36 s.h., as follows.

<table>
<thead>
<tr>
<th>Rotation</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>046:178 Hospital Pharmacy</td>
<td>4 s.h.</td>
</tr>
<tr>
<td>046:179 Community Pharmaceutical Care Rotation</td>
<td>4 s.h.</td>
</tr>
<tr>
<td>046:180 Medicine Rotation</td>
<td>4 s.h.</td>
</tr>
<tr>
<td>046:181 Family Practice Rotation</td>
<td>4 s.h.</td>
</tr>
<tr>
<td>046:183 Community Pharmacy Rotation</td>
<td>4 s.h.</td>
</tr>
<tr>
<td>Four rotations (4 s.h. each)</td>
<td>16 s.h.</td>
</tr>
</tbody>
</table>
The rotations are chosen from a large number of professional offerings; up to three of them may consist of research experience. Students may take additional courses during this year to prepare for graduate school.

**PROFESSIONAL ELECTIVES**

046:005 Dean's Pharmacy Forum I 1-2 s.h.  
046:006 Dean's Pharmacy Forum II 1-2 s.h.  
046:011 PDAs and Electronic Drug Information Sources 3 s.h.  
046:066 Pharmacy Computer Systems 2 s.h.  
046:101 Pharmacy Projects 1-3 s.h.  
046:105 Alternative and Complementary Medicine arr.  
046:120 Advanced Compounding 3 s.h.  
046:121 Substance Abuse 3 s.h.  
046:125 Forensic Toxicology 3 s.h.  
046:135 Perspectives in MCNP Research 1 s.h.  
046:136 Medicinal Chemistry of CNS Active Agents 3 s.h.  
046:142 Contemporary Issues in Pharmacy Practice 2 s.h.  
046:144 Elective: Insurance and Reimbursement 2-3 s.h.  
046:147 Introduction to Research Methods 3 s.h.  
046:157 Quantitative Research Methods in Pharmacy 4 s.h.  
046:171 Nonprescription Pharmacotherapy 2 s.h.  
046:172 Pharmastatistics 2 s.h.  
046:173 Parenteral Products and Technology 2 s.h.  
046:174 Pharmacy Service Development 3 s.h.  
046:176 Immunization Theory and Practice 2 s.h.  
046:177 Emerging Issues in Infectious Diseases 2-3 s.h.  
046:198 Elective: Hospital Pharmacy Practice Management 2 s.h.  
046:203 Advanced Psychopharmacotherapeutics I 2 s.h.  
046:204 Advanced Psychopharmacotherapeutics II 2 s.h.  
046:211 Total Synthesis of Natural Products 3 s.h.  
046:215 Current Medicinal Chemistry 3 s.h.  
046:219 Analytical Biochemistry 3 s.h.  
046:227 Medicinal and Natural Product Chemistry Seminar 1-2 s.h.  
046:253 Elective: Economics and Treatment Choice 2 s.h.  
046:255 Elective: Social Pharmacy 2-3 s.h.  
046:256 Elective: Marketing and Healthcare 2 s.h.  
046:257 Foundation Literature in Pharmaceutical Socioeconomics arr.

**ROTATIONS**

046:161 Drug Information Rotation 4 s.h.  
046:179 Community Pharmaceutical Care Rotation 4 s.h.  
046:180 Medicine Rotation 4 s.h.  
046:181 Family Practice Rotation 4 s.h.  
046:182 Pediatrics Rotation 4 s.h.  
046:184 Psychiatry Rotation 4 s.h.  
046:185 Neurology Rotation 4 s.h.  
046:186 Surgery Rotation 4 s.h.  
046:187 Clinical Nuclear Pharmacy Rotation 4 s.h.  
046:189 Pharm.D. Elective Rotation 4 s.h.  
046:192 Long Term Care Rotation 4 s.h.  
046:193 Home Health Care Rotation 4 s.h.  
046:194 Managed Care Rotation 4 s.h.  
046:196 Ambulatory Care Rotation 4 s.h.  
046:197 Hematology/Oncology Rotation 4 s.h.  
046:199 Research Rotation 4 s.h.

**Joint Pharm.D./M.P.H. Program**

The College of Pharmacy and the College of Public Health offer the joint Doctor of Pharmacy/Master of Public Health. Students who complete the program are granted both degrees. The program helps students develop expertise in public health related to pharmacotherapy, health promotion, disease prevention, and medication safety. Its graduates may work in areas of interest common to pharmacy and public health, such as spread and treatment of disease, community health, and immunology; bioterrorism, terrorism, and preparedness; genetics; insurance; managed care; family and juvenile health; and protection of special populations. Employment opportunities are available in hospitals and clinics and with healthcare providers; private practice; insurance and managed care organizations; local, county, state, and federal government; public health governmental agencies; and colleges and universities.

Separate admission to both programs is required. Applicants must be admitted to both programs before they can be admitted to the joint degree program.

Admission requirements include a bachelor’s degree or a minimum of 120 s.h. of undergraduate course work; an undergraduate cumulative g.p.a. of at least 3.00; one semester each of college algebra and biology; transcripts of all college course work; scores (preferably at or above the national median) on the Graduate Record Exam or the Pharmacy College Admission Test (PCAT); and three professional
recommendations (University of Iowa recommendation forms are required). Contact the College of Pharmacy and the College of Public Health for details.

Requirements

Students in the Pharm.D./M.P.H. program must complete M.P.H. core courses, practicum, and public health electives in addition to courses required for the Pharm.D.

M.P.H. CORE COURSES

Students must earn a B-minus or higher on each core course and a cumulative g.p.a. of at least 3.00 on all core courses. Students may repeat core courses to achieve this standard.

All of these:
- 170:101 Introduction to Public Health 3 s.h.
- 171:161 Introduction to Biostatistics 3 s.h.
- 172:101 Introduction to Health Promotion and Disease Prevention 3 s.h.
- 173:140 Epidemiology I: Principles 3 s.h.
- 175:197 Environmental Health 3 s.h.

One of these:
- 174:102 Introduction to the U.S. Health Care System 3 s.h.
- 174:200 Introduction to Health Care Organization and Policy 3 s.h.

M.P.H. PRACTICUM

The practicum is a fieldwork experience in which students show proficiency in applying academic principles in community settings. Students must have completed or be enrolled in all six M.P.H. core courses before registering for the practicum. A final written report and an oral presentation are required. The practicum, final report, and oral presentation constitute the final examination for the M.P.H.

The setting for the 200-hour Pharm.D./M.P.H. practicum must have both public heath and pharmacy components.

170:299 M.P.H. Practicum Experience 3 s.h.

M.P.H. ELECTIVES

Students select electives totaling 9 s.h. from one of the following public health areas: biostatistics, community and behavioral health, public health epidemiology, health communication, occupational and environmental health, public health genetics, health administration and policy, or an approved M.P.H. focus area (aging studies; clinical investigation; global health; maternal, child, and family health; or nutrition and exercise). Electives are chosen in consultation with the student’s pharmacy and public health advisers.

COURSES THAT COUNT TOWARD BOTH DEGREES

The following required courses from the Pharm.D. curriculum (9 s.h.) also count as credit toward the M.P.H.: 046:130 Core Principles in Pharmaceutical Socioeconomics, 046:154 Endocrinology, Ophthalmology, Women’s and Men’s Health Therapeutics, 046:156 Cardiovascular Therapeutics, and 046:165 Infectious Disease Therapeutics.

PHARM.D. REQUIREMENTS

The joint Pharm.D./M.P.H. program requires students to complete the professional curriculum of the Pharm.D. program (see “Doctor of Pharmacy” earlier in this section).

Pharm.D./M.P.H. students also must complete one semester of community service (046:001 Community Service: Introductory Practical Experience I) during the first professional year, and a three-week community externship (046:002 Basics of Community Pharmacy: Introductory Practical Experience II) some time after the end of the first professional year and before the beginning of the third professional year.

Students must be enrolled in the College of Pharmacy in order to take College of Pharmacy courses.

Honors

The honors program gives students an opportunity to interact as part of a small group with leading professors and scientists from all areas of the University. Students with the required grade-point averages may enroll in 046:102 Pharmacy Honors Seminar, a series of weekly discussions on topics from the humanities, the sciences, law, and the social sciences.

Honors students may elect to prepare a major paper or carry out a research project of limited scope. Seminar participation, appropriate grade-point average, and satisfactory completion of the project certifies them as having completed the College of Pharmacy Honors Program.

Admission

The college-level course work outlined below is the minimum academic requirement for admission to the College of Pharmacy. The Pharmacy College Admission Test (PCAT), a
personal statement, personal interviews, and letters of recommendation are required for admission. Students must have an overall cumulative g.p.a. of at least 2.50 to be considered for admission.

Fulfillment of these requirements does not ensure admission to the college; the admission committee selects the best qualified applicants. Questions concerning satisfaction of degree requirements should be directed to the College of Pharmacy Office of Academic Affairs.

Preprofessional Course Work

Rhetoric: 8 s.h., or 6 s.h. of transfer credit in English composition and rhetoric, and 2-3 s.h. in speech (010:001 and 010:002, or 010:003)

Human anatomy: 3 s.h. (060:110)

General biology: 8 s.h. (002:010-002:011 Principles of Biology I-II)

General chemistry: 8 s.h. (004:011-004:012)

Organic chemistry: 6 s.h. (004:121-004:122)

Mathematics: 3-4 s.h. of a satisfactory differential and integral calculus course (22M:016)

Microbiology: 3 s.h. (061:112)

Microeconomics: 3-4 s.h. (06E:001)

Physics: one year of high school physics or one semester of college-level physics with a lab (029:008)

Human physiology: 3-4 s.h. (072:150)

Statistics: 3 s.h.

General education electives: at least 12 s.h.

Each student must complete 20 s.h. of general education courses in order to graduate. Courses in moral reasoning or ethics, communications, computer science, and business are recommended. Courses in the behavioral and social sciences and the humanities are acceptable. Courses in physical education skills, applied music, and studio art are not acceptable.

Transfer Students

A grade of C or higher is required for transfer work applied toward the pharmacy degree.

Financial Aid

A number of awards are available to students working toward the Pharm.D. To be eligible for awards, students must have completed at least one year in The University of Iowa College of Pharmacy. Each award goes to only one student, unless noted otherwise. Scholarship application forms are available from the College of Pharmacy Office of Academic Affairs.

American Drug-Osco Scholarship: for a pharmacy student with a g.p.a. of at least 2.00 who is employed in a community pharmacy and resides in Iowa, Minnesota, Missouri, Nebraska, South Dakota, or Wisconsin. Two awards.

Melissa Arbogast Scholarship: for a pharmacy student with a cumulative g.p.a. of at least 3.00 who has demonstrated financial need and a strong desire to pursue a pharmacy career.

Seymour M. Blaug Memorial Award: for a pharmacy student with above-average academic achievement.

B.P. Bogan Memorial Award: for a junior pharmacy student with a g.p.a. of at least 2.50 and an interest in the practice of community pharmacy.

Ilse O. Buckner Scholarship: for a needy pharmacy student who maintains satisfactory academic progress; nonrenewable, number varies.

Burroughs Wellcome Co. Scholarships: for selected pharmacy students; financial need is considered; number varies.

Eugene Challed Scholarship: for selected pharmacy students.

Conzemius Scholarships: for selected pharmacy students; number varies.

Ben M. Cooper Memorial Award: for an academically outstanding undergraduate student; preference is given to students from Scott County, Iowa; financial need is considered.

Max Eggleton Scholarship: for a student who has completed one year; preference is given to students from Iowa; based on financial need; renewable.

Charles E. Greger Memorial Award: for a sophomore student; based on professional attitude and need.

Lori A. Grimes Memorial Scholarship: based on financial need.

Thomas D. Hill Scholarship: for any pharmacy student in good academic standing; number varies.

Frances T. and Charles Holub Memorial Awards: for selected third-year pharmacy students; financial need is considered; number varies.
Iowa Pharmacists Association Women’s Auxiliary Scholarship: for a female pharmacy student who is a resident of Iowa; financial need is considered.

Iowa Pharmacy Foundation Scholarships: for selected pharmacy students who are residents of Iowa and who demonstrate outstanding academic ability; financial need is considered; number varies.

Kuever Scholarship Fund: for a pharmacy student from Iowa in good academic standing; nonrenewable.

Linder Pharmacy Scholarship.

Ronald Madden Scholarship: for an Iowa high school graduate with a B average or better in high school.

Charles J. Malecek Pharmacy Scholarship: for a third-year pharmacy student.

Carleton Mikkelsen Scholarship.

Miller-Ruegnitz Scholarships: based on financial need; nonrenewable.

Pharmacists Mutual Scholarship: for a student who intends to become a community practitioner; must be from a midwest state where Pharmacists Mutual operates; based on academic achievement and need.

Gordon H. Sheffield Scholarships: for selected junior or senior pharmacy students who are residents of Iowa, who have demonstrated outstanding academic ability, leadership, financial need, and who have contributed service to the University community; three awards.

Shutt Pharmacy Scholarship: based on financial need; preference given to Iowa residents.

H. Curtis Snyder Award: preference given to a student interested in a sales position.

Wilbur J. Teeters Scholarship: for a pharmacy student who has completed at least one year in the college; financial need is considered.

Teeters/Wahl Scholarships: for selected pharmacy students based on need, outstanding academic ability, and U.S. citizenship; number varies.

John Stanley Thor Memorial Award: for a pharmacy student in good standing; financial need is considered.

Wal-Mart Scholarship: for a junior pharmacy student with high scholastic standing who demonstrates strong leadership, financial need, and the desire to enter a community pharmacy practice; nonrenewable.

Walgreen’s Scholarship: for a P4C student with a g.p.a. of at least 2.00, outstanding leadership and communication skills, and an interest in community pharmacy practice.

Louis C. Zopf Memorial Awards: for selected pharmacy students who are academically qualified; financial need is considered; two awards.

John and Betts Zuelke Scholarship: preference given to an Ottumwa, Iowa, area resident.

Graduate Programs

The college has graduate programs in each of its three academic divisions. M.S. and/or Ph.D. programs are available in pharmaceutics, medicinal and natural products chemistry, and clinical and administrative pharmacy.

Advanced study in the pharmaceutical sciences prepares students for research, teaching, and administrative positions in the pharmaceutical industry, in colleges and universities, in government agencies, and in health-related institutions and organizations.

Applicants must meet the admission requirements of the Graduate College (see Manual of Rules and Regulations of the Graduate College). Academic requirements for maintaining graduate registration are determined by the Graduate College and by the individual divisions of the College of Pharmacy.

For more information about graduate study, visit the College of Pharmacy web site.

Facilities

The Pharmacy Building is located on the University’s Health Science Campus, in close proximity to the Carver College of Medicine, College of Dentistry, College of Nursing, and College of Public Health. University of Iowa Hospitals and Clinics, the Bowen Science Building, and the Hardin Library for the Health Sciences also are nearby.

The building is a five-story structure designed to provide modern facilities for a comprehensive program of pharmacy education. In addition to classrooms and auditoriums, there are well-equipped separate laboratories for instruction at the professional and graduate levels.
The college operates small and large classrooms with state-of-the-art technology. The student practice lab is a technologically advanced licensed pharmacy that provides real and simulated practice experiences. The Banker Student Activity Center provides quiet individual and small-group study environments and houses College of Pharmacy Student Organizations offices.

The building also houses a fully supported Instructional Technology Center (Pharmacy ITC) in the Learning Resource Center. The ITC provides state-of-the-art desktop workstations and laptop computers available for student checkout. Both desktop and laptop computers have secure connections to the University network for online drug information searching and printing.

The Center for Advanced Drug Development can engage in the full range of the drug development process through the resources of The University of Iowa’s Division of Pharmaceutical Service, the Iowa Drug Information Network, and the Center for Biocatalysis and Bioprocessing.

The Division of Pharmaceutical Service, a pharmaceutical manufacturing facility registered with the U.S. Food and Drug Administration, develops pharmaceutical dosage forms and manufactures clinical supplies in compliance with Good Manufacturing Practices for clinical trials in humans. Its staff works closely with clients and pharmaceutics faculty members to produce virtually every type of pharmaceutical dosage form.

The Division of Drug Information Service, a service division of the college located on the University’s Oakdale Campus, publishes the IDIS (Iowa Drug Information Service), a bibliographical database that provides full-text access to specialized information related to drugs and drug therapy. IDIS reaches subscribers throughout the world. The division also is home to the Iowa Drug Information Network, which serves a network of community pharmacies and family practice sites with drug information resources, educational programs, and direct-response consultations that support the pharmaceutical care initiatives at the network’s sites. The division plays an important educational role for pharmacy students by providing both didactic and experiential teaching in drug information.

The College of Pharmacy provides students with the highest possible quality in their fourth-year professional experiential program. College faculty members and adjunct faculty members serve as preceptors, and varied institutions and pharmacy practices in Iowa and nationwide provide rotation sites. The college also provides introductory practice experience to students earlier in the curriculum. Inpatient, acute care medicine, specialty practice areas, ambulatory care, family medicine, long-term care, home health care, community pharmaceutical care, and hospital and community pharmacy rotations are delivered in Iowa City and throughout the region.

## Courses

### For Doctor of Pharmacy Students

#### Clinical and Administrative Pharmacy

- **046:001 Community Service: Introductory Practice Experience I** 1 s.h.
  - Fundamental elements of communication, teamwork, and caring in the health professional role. Repeatable. Prerequisite: P1 standing.

- **046:002 Basics of Community Pharmacy: Introductory Practice Experience II** 1 s.h.

- **046:003 Introductory Practice Experience III** 1 s.h.
  - Experience observing and exploring fundamental elements of pharmacist’s role, including patient care, communication, decision making, critical thinking, teamwork; one semester part-time. Repeatable. Prerequisite: 046:051.

- **046:005 Dean’s Pharmacy Forum I** 1-2 s.h.
  - Contemporary issues in pharmacy practice, pharmacy education, and health care.

- **046:006 Dean’s Pharmacy Forum II** 1-2 s.h.
  - Contemporary issues in pharmacy practice, pharmacy education, and health care.

- **046:011 PDAs and Electronic Drug Information Sources** 3 s.h.
  - Introduction to Palm OS PDA and web-based drug information sources for pharmacy students.

- **046:018 Journey through Illness** 1 s.h.
  - Chronic illness from a patient’s perspective; discussion with patients.

- **046:066 Pharmacy Computer Systems** 2 s.h.
  - Fundamentals of data storage and retrieval for pharmacy information systems.

- **046:102 Pharmacy Honors Seminar** 1 s.h.
  - Scientific, philosophical, economic, ethical issues of importance to the practice of pharmacy.

- **046:103 Introduction to Pharmacy Literature** 1 s.h.
  - Basic concepts and information for analysis of clinical trials published in primary biomedical and pharmacy literature; beginning-level identification, comprehension, and evaluation of context, design, methods, intended outcomes, and statistical analysis reported in the literature. Prerequisite: P1 standing.

</tbody>
</table>
analysis, cost-utility analysis, cost-benefit analysis. Prerequisite: P3 standing.

046:355 PSE Selective: Social Pharmacy 2 s.h.
Behavioral and social aspects of drug use in society; therapeutic uses of medications, pharmaceutical care systems, pharmacy-related health behaviors. Prerequisite: P3 standing.

046:356 PSE Selective: Marketing and Healthcare 2 s.h.
Marketing concepts and principles applied to health care, especially pharmacy and pharmaceuticals; marketing management, patient behavior; marketing plan; marketing mix; promotion. Prerequisite: P3 standing.

046:398 PSE Selective: Hospital Pharmacy Practice Management 2 s.h.
Organizational structure of pharmacy departments in hospitals and health care systems; models for delivery of pharmaceutical care; pharmacy’s role in drug-policy decision making; provision of drug information; clinical and distributive pharmacy services; control of pharmacy and pharmacy costs; use of information technology and automation for service delivery; supervisory management; quality improvement. Prerequisite: P3 standing.

Clinical and Administrative Pharmacy Professional Experiences

046:161 Drug Information Rotation arr.
Drug information knowledge applied to service and research projects. Prerequisites: P4C standing and consent of instructor.

046:175 Clinical Investigation 1-4 s.h.
Development of research skills through completion of a research project.

046:178 Hospital Pharmacy Rotation 4 s.h.
Practicum experience in components of hospital pharmacy; emphasis on hospital organization, inpatient and outpatient services, IV additives, unit dose, clinical services; many sites available. Prerequisites: P4C standing and consent of instructor.

046:179 Community Pharmaceutical Care Rotation 4 s.h.
Delivery of pharmaceutical care in the community pharmacy and ambulatory primary care environment. Prerequisite: P4C standing.

046:180 Medicine Rotation arr.
Advanced application of therapeutic skills necessary for the pharmacotherapeutic management of patients in general medicine or other specialties. Prerequisite: P4C standing.

046:181 Family Practice Rotation arr.
Advanced clinical experience in primary care environment involving drug therapy management of a wide variety of acute and chronic medical problems in patients of all ages. Prerequisite: P4C standing.

046:182 Pediatrics Rotation arr.
Advanced application of clinical pharmacology/toxicology principles to optimize disease management in the inpatient and outpatient pediatric population. Prerequisite: P4C standing.

046:183 Community Pharmacy Rotation 4 s.h.
Practicum experience in community pharmacy; drug distribution, communication with patients, management functions. Prerequisites: P4C standing and consent of instructor.

046:184 Psychiatry Rotation arr.
Advanced application of clinical pharmacotherapeutics and pharmacokinetic psychopharmacology to the care of inpatient and outpatient psychiatric patients using a consultative role model. Prerequisite: P4C standing.

046:185 Neurology Rotation arr.
Lecture and advanced clinical practice of pharmacotherapeutics related to neurological diseases. Prerequisite: P4C standing.

046:186 Surgery Rotation arr.
Advanced application of therapeutic skills necessary for the pharmacotherapeutic management of general surgery patients. Prerequisite: P4C standing.

046:187 Clinical Nuclear Pharmacy Rotation arr.
Advanced clinical instruction in the uses of radiopharmaceuticals, radiopharmaceutical drug interactions, pharmacological intervention in nuclear medicine studies, radiopharmaceutical drug information. Prerequisite: P4C standing.

046:189 Pharm.D. Elective Rotation arr.
Advanced practice experience in a nontraditional setting. Prerequisite: P4C standing.

046:192 Long Term Care Rotation 4 s.h.
Practice in consulting and providing services to varied long-term care environments. Prerequisite: P4C standing.

046:193 Home Health Care Rotation 4 s.h.
Team approach to delivery of health care in home health care setting, total parenteral nutrition, chemotherapy, intravenous antibiotics, lab analysis, hospice care, pain management. Prerequisite: P4 standing.

046:194 Managed Care Rotation 4 s.h.
Practice experience in providing pharmaceutical care in managed care settings. Prerequisite: P4 standing.

046:196 Ambulatory Care Rotation 4 s.h.
Pharmaceutical care in outpatient settings such as internal medicine clinics, diabetes education centers, other specialty clinics. Prerequisite: P4 standing.

046:197 Hematology/Oncology Rotation 4 s.h.
Drug therapy management of adult oncology patients and patients with hematologic malignancies, aplastic anemia, sickle cell disease, hemophilia. Prerequisite: P4 standing.

046:199 Research Rotation 4 s.h.
Practice experience in basic pharmaceutical or clinical research; proposal, study design, data collection and analysis, presentation of results. Prerequisite: P4 standing.

Medicinal and Natural Products Chemistry

046:128 Medicinal and Natural Products Chemistry I: Biotechnology and Chemotherapy 4 s.h.
First of a three-semester sequence; organic and inorganic medicinal and therapeutic agents of natural and synthetic origin; physical, chemical, biological, and biochemical properties as they relate to medicinal and therapeutic effects; comparative biological activity and toxicity; detection mechanisms; functional group chemistry; nomenclature; chemistry of radiodiagnostic and therapeutic agents; introduction to biopharmaceutical analysis. Prerequisites: 004:122, 061:112, and 099:162 or equivalents, and P1 standing.

046:131 Medicinal and Natural Products Chemistry II: Pharmacodynamic Agents 4 s.h.
Prerequisites: 046:128 and P2 standing.

046:132 Medicinal and Natural Products Chemistry III: Medicinal Neurochemistry 4 s.h.
Prerequisites: 046:128, 046:131, and P2 standing.
Pharmaceutics

046:050 Pharmacy Practice I  
2 s.h.
Prescription interpretation, aseptic technique in the preparation of parenteral products, patient counseling, applications of drug information and law. Prerequisite: P1 standing.

046:051 Pharmacy Practice II  
2 s.h.
Continuation of 046:050. Prerequisites: 046:050 and P1 standing.

046:101 Pharmacy Projects  
1-3 s.h.
Basic and applied research problems of pharmaceutical interest.

046:116 Pharmacy Practice Lab III  
2 s.h.
Pre- or corequisites: 046:149 and 046:154.

046:117 Pharmacy Practice Lab IV  
2 s.h.
Continuation of 046:116. Pre- or corequisites: 046:155 and 046:156.

046:118 Pharmacy Practice Lab V  
2 s.h.
Continuation of 046:117. Pre- or corequisites: 046:158 and 046:159.

046:119 Pharmacy Practice Lab VI  
2 s.h.
Continuation of 046:118. Pre- or corequisites: 046:164 and 046:165.

046:120 Advanced Compounding  
3 s.h.
Conceptual and practical framework for resolving therapeutic issues in compounding pharmacy practice, design and preparation of compounded medications using current quality assurance methods, legal aspects of compounding, development and marketing of a compounding practice. Prerequisites: 046:051 and 046:124.

046:123 Pharmaceutics I: Solutions  
4 s.h.
Application of physical and chemical principles to formulation, preparation of liquid dosage forms, including solution, colloidals, ointments, emulsions. Prerequisite: P1 standing.

046:124 Pharmaceutics II: Solids and Semisolids  
4 s.h.
Properties of solids; formulation, preparation, evaluation of solid dosage forms. Prerequisite: P1 standing.

046:138 Pharmacokinetics and Biopharmaceutics  
3 s.h.
Qualitative and quantitative description of kinetics of drug absorption, distribution, and elimination, including physiological factors that influence each process; adjustment of dosing regimens for optimizing therapeutic drug levels in the body. Prerequisites: 046:123 and 046:124.

046:142 Contemporary Issues in Pharmacy Practice  
2 s.h.
Contemporary issues in pharmacy practice. Repeatable.

046:144 Elective: Insurance and Reimbursement  
2-3 s.h.
Insurance and reimbursement for prescription drugs and pharmacist services; related policy issues.

046:172 PharmaStatistics  
2 s.h.
Introduction to the use of statistics. Prerequisite: P4 standing.

046:173 Parenteral Products and Technology  
2 s.h.
Knowledge and application of parenteral products and the technology used to compound and administer them. Prerequisites: 046:051 and 046:123.

046:174 Pharmacy Service Development  
3 s.h.
Issues and approaches used to develop pharmacy services; planning, service design, payment, promotion, quality improvement. Prerequisite: P3 standing or consent of instructor.

046:176 Immunization Theory and Practice  
2 s.h.
Preparation for administering routine immunizations safely and responsibly under specific order of a prescriber; preparation for administering vaccinations under protocol according to rules of the Iowa Boards of Pharmacy and Medical Examiners. Prerequisites: 046:159 and P3 standing.

046:177 Emerging Issues in Infectious Diseases  
2-3 s.h.
Contemporary issues related to infectious diseases; unusual pathogens such as Ebola, tropical medicine, bioterrorism, resistance, travel medicine, epidemiology.

046:290 Introduction to Tissue Engineering  
3 s.h.
Tissue engineering fundamentals and principles; scaffolds in tissue engineering. Same as 052:227.

For Graduate Students

Clinical and Administrative Pharmacy

046:147 Introduction to Research Methods  
3 s.h.
Scientific inquiry, experimental design, data collection, statistical methods used in the study of health services and clinical investigations; focus on understanding the research process and evaluating published studies. Prerequisite: consent of instructor. Recommended: introductory statistics.

046:213 Pharmaceutical Socioeconomics: Seminar  
1-2 s.h.
Recent research in pharmacy administration. Repeatable.

046:243 Clinical Pharmacy Sciences Research  
arr.

046:245 Analytical Techniques in Therapeutics  
3 s.h.
Basic concepts and techniques of HPLC, ELISA/RIA, PCR, in vitro pharmacodynamic models, cell culture, animal models; identification of problems, solutions.

046:251 Pharmaceutical Socioeconomics: Research  
arr.

046:255 Elective: Social Pharmacy  
2-3 s.h.
Behavioral and social aspects of drug use in society; emphasis on therapeutic uses of medications, pharmaceutical care systems, pharmacy-related health behaviors.

046:256 Elective: Marketing and Healthcare  
2 s.h.
Research on marketing's impact on delivery and consumption of health care, and on changes in marketing that result from evolution of health care systems. Prerequisite: graduate standing.

046:257 Foundation Literature in Pharmaceutical Socioeconomics  
arr.
Issues related to pharmacy administration, social and behavioral pharmacy, pharmacy education.

046:261 Analytic Issues in Health Services Research I  
3 s.h.
Same as 174:261.

046:262 Analytic Issues in Health Services Research II  
3 s.h.
Same as 174:262.

046:263 Models of Patient Behavior and Choice  
3 s.h.
Theoretical models used to describe behavior and choice in pharmaceutical socioeconomic research; models from economics, health services research, health behavior, clinical decision making.

046:264 Models of Provider Behavior and Choice  
3 s.h.
Theoretical background for study of provider decision making and behavior; models based on a classic economic approach, models used to study provider behavior.

046:269 Introduction to Clinical Pharmacogenomics  
3 s.h.
Basic pharmacogenetic techniques; use of pharmacogenomics in clinical pharmacy. Prerequisite: 002:128.

046:280 Clinical Pharmacy Sciences Seminar  
1-2 s.h.
Research by faculty, graduate students.
046:282 Advanced Pharmacokinetic/Pharmacodynamic Topics 2 s.h.
Basic concepts, computer fitting. Prerequisite: 046:170.

046:284 Introduction to Pharmaceutical Sciences Research 2 s.h.
Key principles and methods in pharmaceutical sciences research. Prerequisite: consent of instructor.

Medicinal and Natural Products Chemistry
046:135 Perspectives in MCNP Research 1 s.h.
Contemporary research in medicinal chemistry and natural products.

046:136 Medicinal Chemistry of CNS Active Agents 3 s.h.
Concepts for understanding the chemistry and pharmacology of agents on the central nervous system. Prerequisite: second-semester organic chemistry.

046:137 Enzymatic Basis of Drug Metabolism 3 s.h.
Current literature on catalytic and physical properties, distribution, and substrate specificity of enzymes involved in mammalian drug metabolism. Prerequisites: 004:122 and 099:162, or consent of instructor.

046:150 Synthetic Strategies in Medicinal Chemistry 3 s.h.
Modern chemical methods for construction of carbon-carbon bonds commonly used in synthesis of natural products; strategic disconnections for the syntheses of these molecules. Prerequisites: 004:122 and 046:132.

046:211 Total Synthesis of Natural Products 3 s.h.
Total synthesis of natural products; use of strategies, tactics, efficiency, selectivity, synthetic maneuvering. Prerequisite: consent of instructor.

046:215 Current Medicinal Chemistry 3 s.h.
Modern techniques used in drug discovery; important drug classes, their chemical mechanism of action. Prerequisite: 046:132 or consent of instructor.

046:217 Medicinal and Natural Products Chemistry Research arr.

046:219 Analytical Biochemistry 3 s.h.
Application of modern chromatographic and detection methods used to isolate, characterize, and quantify drugs and macromolecules.

046:227 Medicinal and Natural Products Chemistry Seminar 1-2 s.h.

046:275 Perspectives in Biocatalysis 1 s.h.

Pharmacetics
046:148 Pharmacokinetics and Pharmacodynamics 3 s.h.
Kinetics of drug absorption, distribution, and elimination, including development of mathematical models. Prerequisites: two semesters of calculus and one semester of statistics, or consent of instructor.

046:157 Quantitative Research Methods in Pharmacy 4 s.h.
Lecture and laboratory; collection and interpretation of analytical data, instrumental analysis as applied to pharmaceutical quality control; separation techniques.

046:202 Pharmacy: Selected Topics 1-4 s.h.
Recent advances and contemporary research in pharmacy. Repeatable.

046:203 Advanced Psychopharmacotherapeutics I 2 s.h.
Drug treatment of psychiatric disorders involving psychosis and depression. Prerequisite: 071:105 or 096:124, or 071:180 and 071:181.

046:204 Advanced Psychopharmacotherapeutics II 2 s.h.
Drug treatment of psychiatric disorders involving mania, anxiety disorders, drug-induced psychosis, substance abuse treatment, childhood depression, attention-deficit hyperactivity disorder. Prerequisite: 071:105 or 096:124, or 071:180 and 071:181.

046:206 Stability of Pharmaceuticals 3 s.h.
Mechanisms of degradation of pharmaceuticals; prediction of shelf life of pharmaceuticals, stabilization. Prerequisite: 004:132.

046:207 Polymers in Pharmaceutics 3 s.h.
Polymer science, its implications in pharmaceutics; polymers useful as excipients in design of controlled and/or sustained release products.

046:225 Product Development 3 s.h.
Application of physico-chemical principles to formulation and design of pharmaceutical dosage forms.

046:229 Advanced Pharmacokinetics and Pharmacodynamics 3 s.h.
Selected topics, including nonlinear curve fittings. Prerequisite: 046:148.

046:231 Pharmacy Seminar 1-2 s.h.
Repeatable.

046:232 Drug Delivery: Principles and Applications 3 s.h.
Design and development of drug delivery systems; mathematical analysis of dosage form performance, applications of advanced technology in emerging systems. Prerequisite: 046:237 or consent of instructor.

046:233 Pharmacy: Research arr.

046:235 Equilibria Processes 3 s.h.
Equilibria pertaining to ionic systems, complexation, partitioning, solubility. Prerequisite: 004:131.

046:236 Surface Phenomena 3 s.h.
Behavior of matter in phase boundaries, especially adsorption processes at liquid-solid and vapor-solid interfaces. Prerequisite: 004:131.

046:237 Transport Phenomena 3 s.h.
Diffusion and mass transport phenomena related to pharmaceutical systems. Prerequisite: 004:131.
The College of Public Health, established in 1999, is a partner with the Carver College of Medicine and the Colleges of Dentistry, Nursing, and Pharmacy in striving to improve human health and well-being. Consistent with the interdisciplinary traditions of public health, the college also collaborates with non-health science colleges across the University and with other Board of Regents, State of Iowa institutions, state and local agencies, and the private sector.

A population-based approach to health is a distinguishing feature of public health and of the college. For public health practitioners—a wide range of professionals including physicians, nurses, dentists, pharmacists, social workers, nutritionists, environmental scientists, health educators, and health service administrators—the primary focus is on the health of entire communities rather than individual patients. Tools commonly used by public health professionals to improve and enhance quality of life include analytical methods to identify, describe, and monitor the health of communities and populations at risk; education and prevention programs, methods of assuring access to appropriate and cost-effective care; and formulation of sound public policies.

The public health approach has led to many important health improvements over the past century. Vaccination campaigns, improved sanitation, fluoridation of drinking water, and efforts to reduce tobacco use are among the most recognizable public health initiatives. Public health programs also have led to safer workplaces, reduction of deaths from coronary heart disease and stroke, improved motor vehicle safety, and creation of effective health systems to provide care to those who need it. In the future, public health professionals will play an important role worldwide in seeking better approaches to complex issues such as quality of life for the elderly, drug and alcohol abuse, teen pregnancy, new and emerging infectious diseases, food safety, effects of bioterrorism, and nutrition.

The College of Public Health provides educational opportunities to students
campuswide. In addition to training and educating public health students, the college welcomes students from the Tippie College of Business, the Carver College of Medicine, and the Colleges of Dentistry, Education, Engineering, Law, Nursing, and Pharmacy who enroll in public health classes. Undergraduate students in the College of Liberal Arts and Sciences and graduate students from programs such as anthropology, microbiology, and statistics also register for public health courses. Collegiate faculty and staff members as well as graduate and postdoctoral students contribute to teaching and research activities throughout the health sciences campus and provide services to Iowa and the nation. Partnerships for teaching and research extend across the campus. This background provides a rich array of educational opportunities.

The college includes the Departments of Biostatistics, Community and Behavioral Health, Epidemiology, Health Management and Policy, and Occupational and Environmental Health, and the Program in Public Health Genetics. It offers four graduate degrees: Master of Health Administration (M.H.A.), Master of Public Health (M.P.H.), Master of Science (M.S.), and Doctor of Philosophy (Ph.D.).

The college is accredited by the Council on Education for Public Health (CEPH), the accrediting body for the nation’s schools and colleges of public health. Two programs in the college currently are accredited: The industrial hygiene program is accredited by the Accreditation Board for Engineering and Technology (ABET)/American Board of Industrial Hygiene (ABIH), and the Master of Health Administration and the Ph.D. in health management and policy are accredited by the Accrediting Commission on Education for Health Services Administration (ACEHSA).

Certificate in Public Health

The college offers a certificate program via distance education to improve public health practice and public health workforce capacity in Iowa and the upper Midwest. The Certificate in Public Health is designed primarily for individuals in public health practice, those in the workforce, and those interested in acquiring a basic knowledge of public health practice.

All certificate courses are offered on the Internet. Some also are offered on the University of Iowa campus and in the College of Public Health Summer Institute. Certificate students must successfully complete the program’s 12 s.h. of required course work within five years and must maintain a cumulative g.p.a. of at least 2.75 throughout the program. Students must have access to a computer and the Internet.

The following courses are required.

Both of these:
170:099 Evidence-Based Public Health Methods 3 s.h.
170:101 Introduction to Public Health 3 s.h.

Two of these:
172:101 Introduction to Health Promotion and Disease Prevention 3 s.h.
174:102 Introduction to the U.S. Health Care System 3 s.h.
175:197 Environmental Health 3 s.h.

Applicants to the certificate program must have completed at least 60 s.h. of postsecondary education course work and have a cumulative g.p.a. of at least 2.50. They should submit a statement of their career goals and their reasons for applying to the program and two letters of reference.

Application deadlines are March 15 for summer session, July 1 for fall semester, and December 1 for spring semester.

Students who have graduate standing when they complete the certificate course work, and are admitted to the M.P.H. program after earning the certificate, may apply 9 s.h. of credit from the certificate program toward the M.P.H.

Admission

For detailed information about Graduate College policies, including application requirements and procedures, see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

Each department in the College of Public Health has an admissions committee. Admission criteria usually include a satisfactory cumulative grade-point average; Graduate Record Examination scores; references; résumés; and for international applicants, scores on the Test of English as a Foreign Language (TOEFL). Other evaluation criteria may include oral and on-campus interviews, written statements, special emphasis on science and math courses, and a match of available faculty mentors with student interests. Application deadlines vary by department.
Faculty
The college's faculty includes members with single appointments in the College of Public Health as well as those with joint appointments in other University of Iowa colleges, including the Carver College of Medicine and the Colleges of Dentistry, Engineering, Law, Liberal Arts and Sciences, Nursing, and Pharmacy. In addition, the college's faculty includes adjunct members from Drake University, Iowa State University, the University of Northern Iowa, the Iowa State Department of Public Health, the Iowa State Hygienic Laboratory, the Iowa Heart Center (in Des Moines), University of Iowa Hospitals and Clinics, and the National Institutes of Health.

Research Centers and Institutes
The College of Public Health is home to 28 centers and institutes that conduct research and provide public service. These multidisciplinary centers and institutes—most of which are supported by federal grants—focus their investigative efforts on important public health topics. They conduct an array of outreach, service, and policy activities through which the College of Public Health engages with agencies, communities, and organizations throughout Iowa, the Midwest, the nation, and the world. Students are encouraged to explore opportunities for involvement with any of the college's centers and institutes.

For more information, see College of Public Health Based Centers (http://www.public-health.uiowa.edu/research/centers.html) on the college's web site.

Facilities
The college's administrative offices are housed in the General Hospital, on the University's Health Sciences Campus. Faculty offices are located on the Health Sciences Campus in the College of Medicine Administration Building, General Hospital, John Colloton Pavilion, the Medical Education Building, Medical Laboratories, and Westlawn; on the Main Campus in the Jefferson Building, MacLean Hall, and Schaeffer Hall; and on the Oakdale Research Campus in Oakdale Hall and the Institute for Rural and Environmental Health. Specialized laboratories also are located on the Oakdale Campus.

Eight student computer laboratories are housed at the college. More than 55 software packages are available for student use, most without charge. Software includes Microsoft Office products, SAS, and S+. Some specialty labs are equipped with RedHat Linux and are loaded with R, Macanova, Xlispstat, Mathematica, and other software.

Students, faculty, and staff draw on extensive library resources available across campus. Hardin Library for the Health Sciences serves as a central resource for all of the health sciences colleges. Hardin Library's Information Commons, a state-of-the-art health sciences educational technology facility, provides central support and delivery for courseware development, classroom instruction, health-related research, and independent learning. It offers high-end multimedia development workstations, networked electronic classrooms, a case-based learning and conference room, and information research workstations for searching health-related databases and the Internet.
The Master of Public Health is recognized as the primary professional degree in public health. The objective of Iowa’s M.P.H. program is to provide education and practical training in public health to students who will be leaders in their respective communities. The program is appropriate for individuals who already have professional experience and/or training in public health as well as for those whose expertise lies outside of public health.

The M.P.H. is awarded by the University of Iowa Graduate College. Combined degree programs for medical, nursing, and pharmacy students are available; see “Joint M.D./M.P.H. Program,” “Joint M.S.N./M.P.H. Program,” and “Joint Pharm.D./M.P.H. Program” in this section. A combined program for veterinary students is offered in conjunction with the College of Veterinary Medicine at Iowa State University; see “Joint D.V.M./M.P.H. Program” in this section.

Master of Public Health

The M.P.H. is offered with seven subtracks: biostatistics, community and behavioral health, ergonomics, health communication, occupational and environmental health, policy and administration, and public health epidemiology. Students also may pursue a general M.P.H., for which they must define a focused area of study: aging studies; clinical investigation; global health; maternal, child, and family health; or nutrition and exercise. The degree requires 39-48 s.h., depending on the student’s choice of specialization.

Degree requirements include a core course in public health practice and in each of the five core disciplines of public health (epidemiology, biostatistics, environmental health, health administration, and social and behavioral sciences); a bioscience course (or an additional elective course); a practicum; a set of content-specific required courses; and a set of content-specific electives. A written report and oral presentation related to the practicum constitutes the final examination.

All M.P.H. students complete the course work listed under “Common Requirements.” In addition, each student completes the course work listed for his or her chosen subtrack.

Common Requirements

The following course work is required for all M.P.H. students. Students must earn a B-minus or higher on each core course and a cumulative g.p.a. of at least 3.00 on all core courses. Students may repeat courses to achieve this standard.

CORE COURSES

All of these:
170:101 Introduction to Public Health 3 s.h.
171:161 Introduction to Biostatistics (biostatistics subtrack students must substitute 171:201 for 4 s.h.) 3 s.h.
172:101 Introduction to Health Promotion and Disease Prevention 3 s.h.
173:140 Epidemiology I: Principles 3 s.h.
175:197 Environmental Health 3 s.h.

One of these:
174:102 Introduction to the U.S. Health Care System 3 s.h.
174:200 Introduction to Health Care Organization and Policy 3 s.h.

BIOSCIENCE REQUIREMENT

All students, except those in the biostatistics, policy and administration, or community and behavioral health subtracks, take one of the following. Students who already have completed equivalent course work may substitute an additional elective course for the bioscience requirement. Contact the Master of Public Health program for current information about this requirement.

069:133 Introduction to Human Pathology 3 s.h.
096:114 Human Pathophysiology: Organ Systems 3 s.h.
096:115 Human Pathophysiology: Cellular/Neurology/Immunology 3 s.h.
096:118 Pathophysiology (a GIS course) 3 s.h.

PRACTICUM

The practicum is a fieldwork experience in which students show proficiency in applying academic
principles in community settings. There are many practicum opportunities for M.P.H. students in Iowa and surrounding states; the college’s Institute for Public Health Practice coordinates placements. The practicum is the culmination of the M.P.H. program.

Students must have completed or be enrolled in all six core courses before registering for the practicum. A final written report and an oral presentation are required. The practicum, final report, and oral presentation constitute the final examination for the M.P.H.

170:299 M.P.H. Practicum Experience 3 s.h.

Biostatistics Subtrack

The M.P.H. subtrack in biostatistics focuses on application of biostatistical methods to public health and biomedical sciences, and applications of methodology for design and analysis of research investigations in the health sciences. It provides fundamental training in the public health sciences, core biostatistical theory, and core biostatistical methods vital for health science investigations. Graduates of the program are prepared for work as statistical consultants and data analysts for public health projects.

Applicants to the biostatistics subtrack should have a bachelor's degree or equivalent in the biological, mathematical, or physical sciences. Applicants should have mathematics training in methods and techniques of single variable and multivariable differential and integral calculus, and in linear algebra. They also should be competent in at least one computer language, preferably FORTRAN, Pascal, or C.

Applicants with deficiencies in any of these areas may apply for admission and make up the deficiencies during the first year of graduate study. The following University of Iowa courses provide training at the required level.

22M:025 Calculus I 4 s.h.
22M:026 Calculus II 4 s.h.
22M:027 Introduction to Linear Algebra 4 s.h.
22M:028 Calculus III 4 s.h.

The biostatistics subtrack requires 44 s.h. In addition to the M.P.H. course work listed under “Common Requirements,” the following courses are required.

REQUIRED COURSES

All of these (20 s.h.):
171:173 Intermediate Design of Sample Surveys 3 s.h.
171:201-171:202 Biostatistical Methods I-II (171:201 is a core course for the biostatistics track) 8 s.h.
171:241 Applied Categorical Data Analysis 3 s.h.

ELECTIVES

Students choose 6 s.h. from the following (or 9 s.h. if they substitute an elective for the bioscience requirement).

22S:138 Bayesian Statistics 3 s.h.
22S:161 Applied Multivariate Analysis 3 s.h.
22S:255 Linear Models 4 s.h.
171:164 Research Data Management 3 s.h.
171:242 Applied Survival and Cohort Data Analysis 3 s.h.
171:261 Survival Data Analysis 3 s.h.
171:262 Analysis of Categorical Data 3 s.h.
171:264 Longitudinal Data Analysis 3 s.h.
171:266 Statistical Methods in Clinical Trials 3 s.h.
171:267 Intervention and Clinical Trials 3 s.h.
171:271 Advanced Survival Analysis 3 s.h.

Community and Behavioral Health Subtrack

The M.P.H. subtrack in community and behavioral health prepares public health practitioners for a variety of positions related to community development, health program implementation, and health education. Students learn how to design, implement, and evaluate evidence-based interventions directed toward identified public health problems in populations. A bachelor's degree in the social and behavioral sciences is good preparation for this program, but students come from a variety of educational backgrounds. Preference is given to applicants who have professional experience or clinical background.

The community and behavioral health subtrack requires 41 s.h. In addition to the M.P.H. course work listed under “Common Requirements,” the following courses are required.

REQUIRED COURSES

At least 12 s.h. from these:
172:106 Designing and Implementing Interventions 3 s.h.
172:130 Social Determinants of Health 3 s.h.
172:150 Health Behavior and Health Education 3 s.h.
172:181 Evaluation I: Theory and Application 3 s.h.
Ergonomics Subtrack

The M.P.H. subtrack in ergonomics takes advantage of interdisciplinary faculty strengths in the Colleges of Public Health and Engineering and the Carver College of Medicine. Ergonomics students gain a thorough understanding of workplace physical environments that contribute to musculoskeletal injuries and illness. They also acquire knowledge of engineering and administrative methods to control workplace risk factors. The program prepares students for work in industry and government agencies, as well as for further academic training.

The ergonomics subtrack requires 40 s.h. In addition to the M.P.H. course work listed under “Common Requirements,” the following courses are required.

REQUIRED COURSES

All of these (16 s.h.):
- 056:144 Human Factors 3 s.h.
- 175:180 Occupational and Environmental Health Seminar 1 s.h.
- 175:190 Occupational Ergonomics I 3 s.h.
- 175:230 Occupational Health 3 s.h.
- 175:294 Occupational Ergonomics II 3 s.h.
- 175:295 Clinical Ergonomics 3 s.h.

Electives

Students who substitute an elective for the bioscience requirement must earn 3 s.h. from these; there is no elective requirement for other students in the ergonomics subtrack.

- 175:192 Occupational Safety 3 s.h.
- 175:231 Industrial Hygiene I: Recognition 3 s.h.
- 175:251 Injury Epidemiology 3 s.h.
- 175:253 Epidemiology of Occupational Injuries 3 s.h.

Health Communication Subtrack

The M.P.H. subtrack in health communication provides opportunities for students to develop knowledge and skill in designing, evaluating, and implementing effective communication strategies and messages that speak to the health needs of diverse audiences. The program addresses clinician-patient interaction, family communication, group and organizational communication, and mass media and web-based campaigns. The M.P.H. may be of interest to clinicians, such as physicians, nurses, pharmacists, and dentists as well as other professionals who do not wish to earn a Ph.D.

Graduates of the M.P.H. subtrack in health communication will:

- know and understand basic concepts and theories of social and behavioral science related to public health;
- understand appropriate social and behavioral science research design and methodology, and analytical strategies in relation to public health;
- evaluate and interpret qualitative and quantitative scientific literature;
- understand how to affect individual, organizational, and systems change through communication; and
- recognize and implement effective evidence-based public health interventions including communication campaigns.

The health communications subtrack requires 42 s.h. In addition to the M.P.H. course work listed under “Common Requirements,” the following courses are required.
HEALTH COMMUNICATION CORE

All of these (12 s.h.):
036:371 Communication Theory 3 s.h.
172:240/36G:240 Health Communication 3 s.h.
172:242 Persuasion and Health Communication Campaigns 3 s.h.
172:246/36G:340 Health Communication Campaigns 3 s.h.

COMMUNITY AND BEHAVIORAL HEALTH CORE

Three of these (9 s.h.):
172:106 Designing and Implementing Interventions 3 s.h.
172:130 Social Determinants of Health Education 3 s.h.
172:150 Health Behavior and Health Education 3 s.h.
172:181 Evaluation I: Theory and Applications 3 s.h.
172:183 Qualitative Research for Public Health 3 s.h.

Occupational and Environmental Health Subtrack

The M.P.H. subtrack in occupational and environmental health provides students with a broad perspective on public health and career preparation for a variety of professional positions in occupational and environmental health. Public health experience is desirable background for this subtrack.

The occupational and environmental health subtrack requires 39 s.h. In addition to the M.P.H. course work listed under “Common Requirements,” the following courses are required.

REQUIRED COURSES

175:180 Occupational and Environmental Health Seminar 1 s.h.
Occupational and environmental health courses not already listed, or other approved courses 14-17 s.h.

Policy and Administration Subtrack

The M.P.H. subtrack in policy and administration focuses on advanced planning administration and program evaluation skills, including development of objectives for a health system, articulation of the steps required to meet those objectives, and evaluation of whether objectives have been met. Graduates of the program find positions in federal and state government, professional associations, and health agencies. A variety of academic backgrounds are appropriate preparation for this program, including business, liberal arts and sciences, and the health professions.

The policy and administration subtrack requires 46 s.h. In addition to the M.P.H. course work listed under “Common Requirements,” the following courses are required.

REQUIRED COURSES

One of these:
174:201 Health Care Management 3 s.h.
174:203 Strategic Planning and Marketing (if 174:201 is waived) 3 s.h.
One of these:
07P:165 Introduction to Program Evaluation 3 s.h.
172:181 Evaluation I: Theory and Applications 3 s.h.
One of these:
174:212 Health Economics I 3 s.h.
174:228 Cost Effectiveness and Decision Analysis 3 s.h.
All of these:
174:214 Financial Accounting for Health Care Organizations 3 s.h.
174:223 Seminar in Health Care Ethics 2 s.h.
174:243 Health Policy 3 s.h.

ELECTIVES

Students earn a minimum of 8 s.h., selecting at least one course from each of the following categories.

Administration

06N:215 Corporate Financial Reporting 3 s.h.
06N:225 Managerial Finance 3 s.h.
174:203 Strategic Planning and Marketing 3 s.h.
174:206 Leadership in Health Care Organizations 3 s.h.
174:208 Health Services Information Systems 2-3 s.h.
174:212 Health Economics I 3 s.h.
174:213 Health Economics II 3 s.h.
174:220 Advanced Topics in Managed Care 3 s.h.
174:224 Human Resources for Health Organizations 2-3 s.h.
174:228 Cost Effectiveness and Decision Analysis 3 s.h.

Policy

030:210 American Politics 4 s.h.
091:261 Health Law 3 s.h.
102:221 Poverty, Planning, and Public Policy 3 s.h.
The M.P.H. subtrack in public health epidemiology focuses on fundamental epidemiological concepts and methods. It provides training in the use of public health data and methods for disease assessment and in methods for evaluating the need and outcome of programs and interventions. Graduates of the program work in public health departments and other health care settings.

The public health epidemiology subtrack requires 39 s.h. In addition to the M.P.H. course work listed under “Common Requirements,” the following courses are required.

**REQUIRED COURSES**

All of these (10 s.h.):

- 171:162 Design and Analysis of Biomedical Studies 3 s.h.
- 173:145 Public Health Data Analysis with Computer 2 s.h.
- 173:160 Intro to Epidemiologic Data Analysis 2 s.h.
- 173:240 Epidemiology II: Advanced Methods 3 s.h.

**ELECTIVES**

At least 5 s.h. from these (or 8 s.h. if an elective is substituted for the bioscience requirement):

- 171:163 Intro to the Design of Sample Surveys 3 s.h.
- 171:241 Applied Categorical Data Analysis 3 s.h.
- 171:242 Applied Survival and Cohort Data Analysis 3 s.h.
- 173:155 Diagnostic Microbiology for Epidemiology 3 s.h.
- 173:157 Zoonotic Diseases 2 s.h.
- 173:225 Genetics and Epidemiology 4 s.h.
- 173:235 Nutritional Epidemiology 2 s.h.
- 173:236 Nutrition Intervention in Clinical Trials Research 2 s.h.
- 173:251 Injury Epidemiology 3 s.h.
- 173:253 Epidemiology of Occupational Injuries 3 s.h.
- 173:255 Epidemiology of Infectious Diseases 3 s.h.
- 173:256 Hospital Epidemiology 2 s.h.
- 173:260 Epidemiology of Chronic Diseases 3 s.h.
- 173:261 Epidemiology of Aging 1-2 s.h.
- 173:262 Neuroepidemiology 1 s.h.

- 173:263 Epidemiology of Reproductive Diseases 2 s.h.
- 173:265 Cardiovascular Disease Epidemiology 3 s.h.
- 173:267 Psychiatric Epidemiology 3 s.h.
- 173:270 Cancer Epidemiology and Control 3 s.h.
- 173:276 Health Care Utilization Outcomes 3 s.h.
- 173:280 Introduction to Health Care Organization and Policy 3 s.h.
- 173:285 Outcomes Research 2-3 s.h.
- 173:290 Intervention and Clinical Trials 3 s.h.
- 173:291 Pharmacoepidemiology 3 s.h.
- 174:251 Planning and Market Research for Health Systems 3 s.h.

**Joint M.D./M.P.H. Program**

The Carver College of Medicine and the College of Public Health offer the joint Doctor of Medicine/Master of Public Health. Students who complete the program are granted both degrees. They enjoy expanded career opportunities and are well prepared to apply the principles of medicine and public health in their work.

Separate admission to each program is required. Applicants must be admitted to both programs before they can be admitted to the joint program.

Contact the Carver College of Medicine and the College of Public Health for details.

The joint M.D./M.P.H. requires a minimum of 39 s.h.

**M.P.H. CORE COURSES**

Students must earn a B-minus or higher on each core course and a cumulative g.p.a. of at least 3.00 on all core courses. Students may repeat courses to achieve this standard.

All of these:

- 170:101 Introduction to Public Health 3 s.h.
- 171:161 Introduction to Biostatistics 3 s.h.
- 171:162 Design and Analysis of Biomedical Studies 3 s.h.
- 172:101 Introduction to Health Promotion and Disease Prevention 3 s.h.
- 173:140 Epidemiology I: Principles 3 s.h.
- 175:197 Environmental Health 3 s.h.

One of these:

- 174:102 Introduction to the U.S. Health Care System 3 s.h.
- 174:200 Introduction to Health Care Organization and Policy 3 s.h.

**M.P.H. PRACTICUM**

- 170:299 M.P.H. Practicum Experience (may be used as an M.D. elective) 3 s.h.
ADDITIONAL M.P.H. COURSE WORK
Focus area 18 s.h.
Required College of Public Health courses 9 s.h.
All 9 s.h. in the required College of Public Health course work must be in one of these areas: biostatistics, community and behavioral health, health communication, health policy and administration, occupational and environmental health, public health epidemiology, or an approved M.P.H. focus area (e.g., aging studies; clinical investigation; global health; maternal, child, and family health; nutrition and exercise).

REQUIRED M.D. COURSES
Biomedical ethics course 2 s.h.
Health law course 1 s.h.
Generalist core clerkships 6 s.h.

TYPICAL M.D./M.P.H. SCHEDULE
The M.P.H. year is a two- or three-semester sequence during which students complete any remaining M.P.H. core courses, the M.P.H. 9 s.h. focus area, and the practicum.

Before starting the M.P.H. year, students take two core courses and a summer symposium (9 s.h.). During the second year in medical school, they take a course in health law (1 s.h.). During the M.P.H. year, which typically falls between the second and third or the third and fourth years of medical school, M.D./M.P.H. students complete the balance of their M.P.H. core, public health focus courses, and their M.P.H. practicum (21 s.h.). During the third year of medical school, they complete the generalist core and bioethics elective (8 s.h.).

Joint M.S.N./M.P.H. Program
The College of Nursing and the College of Public Health offer the joint Master of Science in Nursing/Master of Public Health. Students who complete the program are granted both degrees. The program prepares students for positions such as director of a public or community health agency, director of occupational health for a company or corporation, case manager for specific populations, information systems specialist for a public health agency or organization, or advanced nurse practitioner in a school, occupational, or public health organization.

Separate admission to the M.S.N. and the M.P.H. programs is required. Applicants must be admitted to each program before they can be admitted to the joint degree program. Each college’s admission committee reviews each candidate independently.

Applicants must hold a baccalaureate degree in nursing from an accredited program and have an undergraduate g.p.a. of at least 3.00 and satisfactory Graduate Record Exam (GRE) General Test scores. They must submit a formal application, complete transcripts from each undergraduate and graduate school they have attended, and three professional recommendations (University of Iowa recommendations forms are required).

Contact the College of Nursing and the College of Public Health for details.

The joint degree program requires a minimum of 60 s.h. of credit. Students earn 30 s.h. in core courses from both disciplines, 9-12 s.h. in a nursing focus, and 3 s.h. in an M.P.H. capstone project. A master’s project or nursing portfolio is required. The remaining semester hours are earned in elective courses. Areas of emphasis are informatics, nursing administration, community health, and occupational health/ergonomics.

M.P.H. CORE COURSES
Students must earn a grade of B-minus or higher for each core course and a cumulative g.p.a. of at least 3.00 for all core courses. Students may repeat courses to achieve this standard.

170:101 Introduction to Public Health 3 s.h.
171:161 Introduction to Biostatistics 3 s.h.
172:101 Introduction to Health Promotion and Disease Prevention 3 s.h.
173:140 Epidemiology I: Principles 3 s.h.
175:197 Environmental Health 3 s.h.

One of these:
174:102 Introduction to the U.S. Health Care System 3 s.h.
174:200 Introduction to Health Care Organization and Policy 3 s.h.

M.S.N. CORE COURSES
096:206 Nursing Science and Inquiry 3 s.h.
096:208 Leadership for Advanced Nursing Practice 3 s.h.
096:209 Health Systems, Economics, and Policy 3 s.h.
096:263 Informatics in Nursing and Health Care 3 s.h.

Joint Pharm.D./M.P.H. Program
The College of Pharmacy and the College of Public Health offer the joint Doctor of Pharmacy/Master of Public Health. Students
who complete the program are granted both
degrees. The program helps students develop
expertise in public health related to
pharmacotherapy, health promotion, disease
prevention, and medication safety. Its graduates
may work in areas of interest common to
pharmacy and public health, such as spread and
treatment of disease, community health, and
immunology; bioterrorism, terrorism, and
preparedness; genetics; insurance; managed care;
family and juvenile health; and protection of
special populations. Employment opportunities
are available in hospitals and clinics and with
health care providers; private practice; insurance
and managed care organizations; local, county,
state, and federal government; public health
governmental agencies; and colleges and
universities.

Separate admission to both programs is required.
Applicants must be admitted to both programs
before they can be admitted to the joint degree
program.

Admission requirements include a bachelor’s
degree or a minimum of 120 s.h. of
undergraduate course work; an undergraduate
cumulative g.p.a. of at least 3.00; one semester
each of college algebra and biology; transcripts of
all college course work; scores (preferably at or
above the national median) on the Graduate
Record Exam or the Pharmacy College Admission
Test (PCAT); and three professional
recommendations (University of Iowa
recommendation forms are required).

Contact the College of Pharmacy and the College
of Public Health for details.

Requirements

Students in the Pharm.D./M.P.H. program must
complete M.P.H. core courses, practicum, and
public health electives in addition to courses
required for the Pharm.D.

M.P.H. CORE COURSES

Students must earn a B-minus or higher on each
core course and a cumulative g.p.a. of at least
3.00 on all core courses. Students may repeat
courses to achieve this standard.

All of these:
170:101 Introduction to Public Health 3 s.h.
171:161 Introduction to Biostatistics 3 s.h.
172:101 Introduction to Health
Promotion and Disease Prevention 3 s.h.
173:140 Epidemiology I: Principles 3 s.h.
175:197 Environmental Health 3 s.h.

One of these:
174:102 Introduction to the U.S. Health
Care System 3 s.h.
174:200 Introduction to Health Care
Organization and Policy 3 s.h.

M.P.H. PRACTICUM

The practicum is a fieldwork experience in which
students show proficiency in applying academic
principles in community settings. Students must
have completed or be enrolled in all six M.P.H.
core courses before registering for the practicum.
A final written report and an oral presentation
are required. The practicum, final report, and
oral presentation constitute the final examination
for the M.P.H.

The setting for the 200-hour Pharm.D./M.P.H.
pacticum must have both public health and
pharmacy components.

170:299 M.P.H. Practicum Experience 3 s.h.

M.P.H. ELECTIVES

Students select electives totaling 9 s.h. from one
of the following public health areas: biostatistics,
community and behavioral health, health
communication, health policy and
administration, occupational and environmental
health, public health epidemiology, public health
genetics, or an approved M.P.H. focus area (aging
studies; clinical investigation; global health;
maternal, child, and family health; or nutrition
and exercise). Electives are chosen in
consultation with the student’s advisers in the
Colleges of Pharmacy and Public Health.

COURSES THAT COUNT TOWARD BOTH DEGREES

The following required courses from the
Pharm.D. curriculum (9 s.h.) also count as credit
toward the M.P.H.: 046:130 Core Principles in
Pharmaceutical Socioeconomics, 046:154
Endocrinology, Ophthalmology, Women’s and
Men’s Health Therapeutics,
046:156 Cardiovascular Therapeutics, and
046:165 Infectious Disease Therapeutics.

PHARM.D. REQUIREMENTS

The joint Pharm.D./M.P.H. program requires
students to complete the professional curriculm
of the Pharm.D. program [see “Doctor of
Pharmacy” in the College of Pharmacy section of
the Catalog]. Pharm.D./M.P.H. students also
must complete one semester of community
service (046:001 Community Service:
Introductory Practical Experience I) during the
first professional year, and a three-week
community externship (046:002 Basics of Community Pharmacy: Introductory Practical Experience II) some time after the end of the first professional year and before the beginning of the third professional year.

Students must be enrolled in the College of Pharmacy in order to take College of Pharmacy courses.

Joint D.V.M./M.P.H. Program

The College of Veterinary Medicine at Iowa State University (ISU) and the College of Public Health at The University of Iowa offer the joint Doctor of Veterinary Medicine/Master of Public Health. Students who complete the program are granted both degrees. The program prepares students for work as state veterinarians, as college and university faculty members, in local and state departments of public health, in the Public Health Commissions Corp., in state agricultural departments, and for public health positions in the military.

Separate admission to each program is required. Applicants must be admitted to both programs before they can be admitted to the joint program. For M.P.H. admission requirements, see “Admission” later in this section.

The joint D.V.M./M.P.H. requires a minimum of 39 s.h. Students complete the following.

M.P.H. CORE COURSES

Students must earn a B-minus or higher for each core course and a cumulative g.p.a. of at least 3.00 for all core courses. Students may repeat courses to achieve this standard.

All of these:
170:101 Introduction to Public Health 3 s.h.
171:161 Introduction to Biostatistics 3 s.h.
172:101 Introduction to Health Promotion and Disease Prevention 3 s.h.
173:140 Epidemiology I: Principles 3 s.h.
175:197 Environmental Health 3 s.h.

One of these:
174:102 Introduction to the U.S. Healthcare System 3 s.h.
174:200 Introduction to Health Care Organization and Policy 3 s.h.

M.P.H. PRACTICUM

170:299 M.P.H. Practicum Experience 3 s.h.

M.P.H. ELECTIVES

At least 9 s.h. from these:
173:157 Zoonotic Diseases 2 s.h.
173:251 Injury Epidemiology 3 s.h.
173:255 Epidemiology of Infectious Diseases 3 s.h.
175:175 Research Methods in Disaster Studies 3 s.h.
175:195 Global Environmental Health 2 s.h.
175:209 Rural Health and Agricultural Medicine 3 s.h.
175:210 Current Topics in Agricultural Health 1 s.h.

REQUIRED D.V.M. COURSES

All of these (ISU courses):
Ethical Issues in Veterinary Medicine (VMed 303) 2 s.h.
Public Health (VMPM 388) 3 s.h.
Infectious Diseases and Preventive Medicine (VMPM 437) 3 s.h.
Laboratories in Public Health (VMPM 486) 1 s.h.

Admission

For detailed information about Graduate College policies, including application requirements and procedures, see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

Applicants to the M.P.H. program must have successfully completed one semester each of college algebra and biology.

All M.P.H. applicants must submit a Graduate College application form, three letters of reference, a statement of purpose that describes their interest in public health and identifies a specialty area, and a résumé highlighting professional experience in public health or in nursing. They also must submit scores on the Graduate Record Exam (GRE) General Test, LSAT, DAT, VCAT, GMAT, or another professional placement exam; scores must be at or above the median scores for test takers applying to similar programs.

International applicants who do not hold a baccalaureate degree from an accredited college or university in the United States, the United Kingdom, Canada (except Quebec), Australia, or New Zealand must score at least 600 (paper-based) or at least 250 (computer-based) on the Test of English as a Foreign Language (TOEFL). International applicants who score 550-599 (paper-based) or 213-249 (computer-based) are required to take English
fluency courses. Applicants who score below those ranges are not considered for admission.

APPLICATION DEADLINES

Fall entrance: May 1 (or until the class is filled) for U.S. citizens and permanent residents; April 1 for international applicants

Spring entrance: November 1 for U.S. citizens and permanent residents; October 1 for international applicants

Summer entrance: May 1 for U.S. citizens and permanent residents; March 15 for international applicants

Financial Support

A limited number of modest tuition awards are available each year for M.P.H. students. For information on financing education through jobs, grants, and loans, contact the University’s Office of Student Financial Aid.

Courses

170:099 Evidence-Based Public Health Methods 3 s.h. How to choose, conduct, and evaluate evidence-based programs and policies in public health; finding and using scientific evidence, implementing and evaluating interventions that produce new evidence.

170:101 Introduction to Public Health 3 s.h. Concepts, structures, and activities in public health practice. Offered fall semesters and summer sessions.

170:171 Problems in Public Health arr. Didactic material in public health, including tutorial, seminar, faculty-directed independent work (e.g., literature search, project, short research project).

Biostatistics

Head: Kathryn Chaloner
Deputy head: William R. Clarke
Professors: Stephan Arndt (Psychiatry), Leon Burmeister, Kathryn Chaloner (Statistics and Actuarial Science), William Clarke, Deborah Dawson (Preventive and Community Dentistry), Michael Jones (Statistics and Actuarial Science/Public Health Genetics), Bruce Pfohl (Psychiatry), George Woodworth (Statistics and Actuarial Science), Dale Zimmerman (Statistics and Actuarial Science)
Professor emeritus: Robert Woolson (Statistics and Actuarial Science)
Associate professors: Joseph Cavanaugh (Statistics and Actuarial Science), Kathryn Cowles (Statistics and Actuarial Science), Jeffrey Dawson, Jane Pendergast, Ying Zhang
Adjunct associate professor: Daniel Sargent
Clinical associate professor: M. Bridget Zimmerman
Assistant professors: Hyonggin An, Douglas Langbehn (Psychiatry), Jacob Oleson, Brian Smith
Clinical assistant professor: Gideon Zamba
Graduate degrees: M.S., Ph.D. in Biostatistics
Web site: http://www.public-health.uiowa.edu/biostat

The Department of Biostatistics prepares students for professional and academic careers in biostatistics. Graduates find positions in pharmaceutical, health care, and research companies and institutions; in universities and government agencies; and as consultants. The department also provides training for non-biostatistics students.

Current research interests in the Department of Biostatistics include computer intensive statistics, Bayesian methods, design and analysis of clinical trials, longitudinal data analysis, survival analysis, spatial modeling, analysis of data subject to missingness, time series, model selection, quality control, survey sampling, and public health statistics. Biostatistics faculty members work closely with both clinical and basic science investigators on the University of Iowa Health Sciences Campus in the design and analysis of research projects.

Graduate Programs

The department offers two graduate degrees: Master of Science and Doctor of Philosophy. In addition, a biostatistics subtrack is available in the M.P.H.; see Master of Public Health (M.P.H.) in the Catalog.

Master of Science

The M.S. program provides training in the design of experiments and in analysis of data related to biomedical or public health problems. It emphasizes mathematical, statistical, and computer methods for dealing with quantitative information, and provides opportunities for students to gain statistical consulting experience with a variety of problems.

Graduates find career opportunities in many areas, including pharmaceutics, health care, research companies and institutions, consulting firms, universities, and government agencies.

The M.S. requires a minimum of 38 s.h. of course work. Students must maintain a g.p.a. of at least 3.00. Those who receive a grade of C on 7 s.h. or more of course work may be dismissed from the program.

All M.S. students are required to complete an in-depth preceptorship under the direction of a departmental faculty member and a final comprehensive-style examination.

REQUIRED COURSES

All of these:
171:173 Intermediate Design of Sample Surveys 3 s.h.
171:201-171:202 Biostatistical Methods I-II 8 s.h.
171:241 Applied Categorical Data Analysis 3 s.h.
171:266 Statistical Methods in Clinical Trials 3 s.h.
171:280 Preceptorship in Biostatistics 3 s.h.
173:140 Epidemiology I: Principles 3 s.h.
One of these sequences:
22S:193-22S:194 Statistical Inference I-II 6 s.h.
One of these:
069:133 Introduction to Human Pathology 4 s.h.
096:114 Human Pathophysiology: Organ Systems 3 s.h.
096:115 Human Pathophysiology: Cellular/Neurology/Immunology 3 s.h.
127:191 Human Molecular Genetics 3 s.h.
170:101 Introduction to Public Health 3 s.h.
172:101 Introduction to Health Promotion and Disease Prevention 3 s.h.
174:102 Introduction to the U.S. Health Care System 3 s.h.
175:197 Environmental Health 3 s.h.

ELECTIVES
Two of these (at least 6 s.h.):
22S:138 Bayesian Statistics 3 s.h.
22S:161 Applied Multivariate Analysis 3 s.h.
22S:248 Computer Intensive Statistics 3 s.h.
22S:255 Linear Models 4 s.h.
171:164 Research Data Management 3 s.h.
171:168 Introduction to Biostatistical Computing 1 s.h.
171:242 Applied Survival and Cohort Data Analysis 3 s.h.
171:251 Theory of Biostatistics I 4 s.h.
171:252 Theory of Biostatistics II 4 s.h.
171:261 Survival Data Analysis 3 s.h.
171:262 Analysis of Categorical Data 3 s.h.
171:264 Longitudinal Data Analysis 3 s.h.
185:103 Statistics in Bioinformatics 3 s.h.
185:270 Genetics and Epidemiology 4 s.h.
185:272 Population and Quantitative Genetics 3 s.h.
185:274 Theory of Statistical Genetics 3 s.h.

Doctor of Philosophy
The Ph.D. program prepares students for professional and academic careers in biostatistics, especially for positions that emphasize developing and applying statistical methodology to solve important biological and public health problems.

The Ph.D. requires a minimum of 79 s.h. of course work. Doctoral students must maintain a g.p.a. of at least 3.00. Those who receive a grade of C on 7 s.h. or more of course work may be dismissed from the program.

All Ph.D. students must successfully complete a qualifying examination, a comprehensive examination, and a dissertation—a substantial scholarly treatise. The research topic and content, which vary depending on the program of study, must be approved by the student’s dissertation committee. Other degree requirements include approved electives chosen from Department of Biostatistics and other University of Iowa courses.

Requirements for the Ph.D. are as follows.

REQUIRED COURSES
Courses in this list also are required for the department’s M.S. degree. Students who have not completed these courses, or their equivalents, before entering the Ph.D. program are required to complete them during Ph.D. study.

All of these:
171:173 Intermediate Design of Sample Surveys 3 s.h.
171:201-171:202 Biostatistical Methods I-II 8 s.h.
171:241 Applied Categorical Data Analysis 3 s.h.
171:266 Statistical Methods in Clinical Trials 3 s.h.
171:280 Preceptorship in Biostatistics 3 s.h.
173:140 Epidemiology I: Principles 3 s.h.

One of these sequences:
22S:193-22S:194 Statistical Inference I-II 6 s.h.

One of these:
069:133 Introduction to Human Pathology 4 s.h.
096:114 Human Pathophysiology: Organ Systems 3 s.h.
096:115 Human Pathophysiology: Cellular/Neurology/Immunology 3 s.h.
127:191 Human Molecular Genetics 3 s.h.
170:101 Introduction to Public Health Promotion and Disease Prevention 3 s.h.
174:102 Introduction to the U.S. Health Care System 3 s.h.
175:197 Environmental Health 3 s.h.

In addition, Ph.D. students take the following courses.

List A
All of these:
22S:255 Linear Models 4 s.h.
171:251-171:252 Theory of Biostatistics I-II 8 s.h.
171:290 Advanced Biostatistics Seminar 2 s.h.

List B
Three of these:
22S:256 Multivariate Analysis 3 s.h.
171:261 Survival Data Analysis 3 s.h.
171:262 Analysis of Categorical Data 3 s.h.
171:264 Longitudinal Data Analysis 3 s.h.

List C
Two of these:
22S:138 Bayesian Statistics 3 s.h.
22S:161 Applied Multivariate Analysis 3 s.h.
22S:248 Computer Intensive Statistics 3 s.h.
185:274 Theory of Statistical Genetics 3 s.h.
List D

At least 3 s.h. from these:
- 22S:156 Applied Time Series Analysis 3 s.h.
- 22S:195 Probability and Stochastic Processes I 3 s.h.
- 171:243 Cohort Data Analysis 1 s.h.
- 171:280 Preceptorship in Biostatistics (in addition to preceptorship required for M.S.) 3 s.h.
- 171:290 Advanced Biostatistics Seminar 1-3 s.h.

Any course not already taken from List B or C 3 s.h.

ELECTIVES

Students must complete at least 5 s.h. of electives chosen from the following list or from other graduate-level health science courses, in consultation with their advisers.

Community and Behavioral Health
- 172:150 Health Behavior and Health Education 3 s.h.

Environmental Health
- 175:197 Environmental Health 3 s.h.
- 175:209 Rural Health and Agricultural Medicine 3 s.h.
- 175:230 Occupational Health 3 s.h.
- 175:252 Environmental Health Policy 3 s.h.
- 175:260 Environmental Toxicology 3 s.h.

Epidemiology
- 173:225 Genetics and Epidemiology 4 s.h.
- 173:235 Nutritional Epidemiology 2 s.h.
- 173:240 Epidemiology II: Advanced Methods 3 s.h.
- 173:251 Injury Epidemiology 3 s.h.
- 173:255 Epidemiology of Infectious Disease 3 s.h.
- 173:256 Hospital Epidemiology 2 s.h.
- 173:260 Epidemiology of Chronic Diseases 3 s.h.
- 173:261 Epidemiology of Aging 1 s.h.
- 173:262 Neuroepidemiology 1 s.h.
- 173:263 Epidemiology of Reproductive Diseases 1 s.h.
- 173:265 Cardiovascular Disease Epidemiology 3 s.h.
- 173:267 Psychiatric Epidemiology 3 s.h.
- 173:270 Cancer Epidemiology and Control 3 s.h.
- 173:290 Intervention and Clinical Trials 3 s.h.
- 173:291 Pharmacoepidemiology 3 s.h.

Dissertation
- 171:300 Thesis/Dissertation (at least two semesters in residence) 10 s.h.

Admission

For detailed information about Graduate College policies, including application requirements and procedures, see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

The biostatistics faculty considers several factors when evaluating applications for admission, including GRE scores, grade-point averages, letters of recommendation, intent and motivation for graduate study, and research interests. A student with deficiencies in one area may be admitted if all other components of his or her application are very strong.

All M.S. and Ph.D. program applicants must hold a baccalaureate degree, have a cumulative g.p.a. of at least 3.00, and have taken the Graduate Record Examination (GRE) General Test. International applicants who do not hold a baccalaureate degree from an accredited college or university in the United States, the United Kingdom, Canada (except Quebec), Australia, or New Zealand must score at least 600 (paper-based) or at least 250 (computer-based) on the Test of English as a Foreign Language (TOEFL). International applicants who score 550-599 (paper-based) or 213-249 (computer-based) are required to take English fluency courses. Applicants who score below those ranges are not considered for admission.

All biostatistics applicants and students are required to have strong written and oral communication skills.

All M.S. applicants must be competent in at least one computer programming language, preferably Fortran, C, or C++. They also must have mathematical sciences training in methods and techniques of single variable and multivariable differential and integral calculus, and in linear algebra.

Completion of an M.S. program in statistics or biostatistics generally is required for admission to the Ph.D. program.

M.S. APPLICATION DEADLINES

Fall entrance: January 15 (early), March 15 (late)
Spring entrance (not encouraged): October 1

Ph.D. APPLICATION DEADLINES

Fall entrance: January 15 (early), March 15 (late)
Spring entrance (not encouraged): October 1
Financial Support
A limited number of teaching and research assistantships are available. Assistantships offer financial support and resident tuition with a partial tuition scholarship, and provide valuable on-the-job training experiences.

For information on financing education through jobs, grants, and loans, contact the Office of Student Financial Aid.

Resources
Department of Biostatistics resources and activities include the Biostatistical Consulting Center, the Clinical Trials Statistical and Data Management Center, and the Center for Public Health Statistics. The Biostatistical Consulting Center provides opportunities for students to gain valuable experience working with faculty and staff in the health sciences at The University of Iowa. The Clinical Trials Statistical and Data Management Center serves the statistical design, data management, and analysis needs of a variety of multicenter clinical trials, including studies of new treatments for acute ischemic stroke and studies of islet transplantation. The Center for Public Health Statistics facilitates the collection, statistical analyses, and dissemination of health data in support of the University’s research, teaching, and service missions and in partnership with the Iowa Department of Public Health.

Courses
171:161 Introduction to Biostatistics 3 s.h.
Application of statistical techniques to biological data, including descriptive statistics; probability, normal, binomial, and Poisson distributions; sampling distributions; tests of significance; confidence intervals; analysis of frequency data; simple linear regression. Prerequisite: college algebra.

171:162 Design and Analysis of Biomedical Studies 3 s.h.
Simple and multiple linear regression and correlation; one- and two-way layout considerations in planning experiments; factorial experiments; multiple comparison techniques; orthogonal contrasts. Offered spring semesters. Prerequisite: 171:161 or equivalent. Same as 255:140.

171:163 Introduction to the Design of Sample Surveys 3 s.h.
Techniques of constructing and analyzing sample surveys, including general methods of estimation, properties of estimators, simple random sampling, stratified sampling, ratio and regression estimators, systematic sampling, cluster sampling. Offered fall semesters of odd years. Prerequisite: 171:161 or equivalent.

171:164 Research Data Management 3 s.h.
Overview of problems encountered in gathering and processing data from biomedical investigations; introduction to data management techniques useful in biomedical studies; introduction to Microsoft Access. Offered fall semesters of odd years. Prerequisite: Fortran or C programming capability.

171:168 Introduction to Biostatistical Computing 1 s.h.
Introduces R, as well as using R for writing functions, database management, high level graphics, and extending R with C or Fortran; dynamic graphics and symbolic manipulation. Pre- or corequisite: 171:201.

171:171 Statistical Methods in Oncology 1 s.h.
Statistical methods used in oncology, hematology, and cancer.

171:173 Intermediate Design of Sample Surveys 3 s.h.
Challenges in designing sample surveys, emphasis on construction and number of strata, unbiased ratio estimators, multistaged sampling, estimation of variance in complex surveys, double sampling, sampling frame construction problems, panel studies, and problems due to nonresponse. Offered spring semesters of even years.

171:174 Introductory Longitudinal Data Analysis 3 s.h.
Statistical models and estimation methods used to analyze correlated data (e.g., the same subject measured repeatedly); focus on use of statistical software. Pre- or corequisite: 171:161 or 171:163 or 22S:152. Same as 22S:160.

171:201 Biostatistical Methods I 4 s.h.
Problem-oriented probability distributions, moments, estimation, parametric and nonparametric inference for one-sample and two-sample problems, analysis of frequency data, linear regression, and correlation analysis, with emphasis on use of computers. Offered fall semesters. Prerequisites: two semesters of calculus and consent of instructor.

171:202 Biostatistical Methods II 4 s.h.
Continuation of 171:201, which is prerequisite; linear regression and correlation, multiple linear regression, multiple factor experiments, multiple comparisons, orthogonal contrasts, block and split-plot designs, confounding interactions, and mixed models. Offered spring semesters. Prerequisite: 171:201.

171:241 Applied Categorical Data Analysis 3 s.h.
Overview of methods to analyze categorical data from health science investigations; estimation of rates and risks, measures of relative risk, stratified analysis, logistic regression analysis. Offered fall semesters. Prerequisites: 171:161 and 173:140. Recommended: 171:162.

171:242 Applied Survival and Cohort Data Analysis 3 s.h.
Nonparametric and semiparametric methods for survival data, methods of directly comparing standardized rates and standardization mortality ratios; Poisson regression for cohort data. Offered spring semesters of odd years. Prerequisites: 171:162 and 171:241.

171:243 Cohort Data Analysis 1 s.h.
Methods of comparing direct standardized rates and standardized mortality ratios; Poisson regression for cohort data. Offered spring semesters of odd years. Prerequisites: 171:162 or 171:241, and consent of instructor.

171:251 Theory of Biostatistics I 4 s.h.
Intermediate study of sufficiency, exponential families, methods of estimation, uniform minimum variance unbiasedness, information, likelihood theory, confidence intervals, the Neyman-Pearson lemma, asymptotic theory and its applications. Offered fall semesters of even years. Prerequisites: 225:153 and 225:154.

171:252 Theory of Biostatistics II 4 s.h.

171:260 Survival Data Analysis 3 s.h.
Types of censoring and truncation, survival function estimation, life tables; parametric inference using exponential, Weibull, and
171:262 Analysis of Categorical Data 3 s.h.  
Models for discrete data, distribution theory, maximum likelihood and weighted least squares estimation for categorical data, tests of fit, models selection. Offered spring semesters. Prerequisites: 22S:164 and 22S:194, or consent of instructor. Same as 22S:220.

171:264 Longitudinal Data Analysis 3 s.h.  
Introduction to statistical methodology for analyzing data from observational and experimental studies in which the response variable from each subject is measured repeatedly; emphasis on use of statistical software packages and specialized programs. Offered spring semesters of odd years. Prerequisites: 22S:154 and 171:202.

171:266 Statistical Methods in Clinical Trials 3 s.h.  
Survey of statistical methods commonly used in clinical trials; methodologic perspective on the design, conduct, and analysis of trials; emphasis on Phase III randomized controlled clinical trials. Offered spring semesters. Prerequisite: 171:201 or equivalent or consent of instructor. Same as 22S:220.

171:267 Intervention and Clinical Trials 3 s.h.  
Methodologic introduction to rationale, design, conduct, analysis, and presentation of clinical trials; clinical trial designs; biostatistical methods, including sample size determination. Offered fall semesters. Prerequisites: 171:161 or equivalent, and 173:140 or equivalent; or consent of instructor. Same as 173:290.

171:271 Advanced Survival Analysis 3 s.h.  
Counting process/martingale theory leading to asymptotic results of survival methods; semiparametric regression of accelerated failure time and additive hazard models; multivariate survival models for clustered, multiple event, and recurrent event data; special topics. Prerequisite: 171:261.

171:280 Preceptorship in Biostatistics arr.  
Work experience using knowledge and skill acquired in classroom; arranged in conjunction with ongoing departmental or collegiate activities or with governmental agencies or private industry; preparation of prospectus and presentation of research results in a department seminar. Repeatable.

171:281 Independent Study in Biostatistics arr.  
In-depth pursuit of an area of special interest in biostatistics requiring substantial creativity and independence. Repeatable.

171:282 Problems/Special Topics in Biostatistics arr.  
Didactic material in biostatistics; may include tutorials, seminars, faculty-directed independent work (e.g. literature search, project, short research project). Repeatable.

171:290 Advanced Biostatistics Seminar 1-3 s.h.  
Current topics; supervised experience in reading and interpreting biostatistical literature. Offered spring semesters. Prerequisite: consent of instructor.

171:295 Research in Biostatistics arr.  
Research that may lead to a dissertation. Repeatable.

Repeatable.
Community and Behavioral Health

Head: John B. Lowe
Professors: Elizabeth Altmaier (Psychological and Quantitative Foundations), Leslie Baxter (Communication Studies), Joe D. Coulter, Melanie Dreher (Nursing), Jennifer Glass (Sociology), Paul Greenough (History), John B. Lowe, Ann Marie McCarthy (Nursing), Peter Nathan (Psychology), Michael Teague (Leisure Studies)
Adjunct professors: Frank Boster, Gene Lutz
Associate professors: Julie Andsager (Journalism and Mass Communication), Mary Aquilino, Karen Faris (Pharmacy), Erin Ferguson, James Hall (Pediatrics), Jeffrey Lobas (Pediatrics), Salome Raheim (Social Work), Nancy Thompson
Adjunct associate professors: Mary Hansen, Kevin Kelly, Mary Losch
Assistant professors: Nanette Barkey (Anthropology), Shelly Campo, Farley Nothwehr, Andrew Peterson, Erica Prussing (Anthropology), Anne-Helene Skinstad, Anne Baber Wallis, Jingzhen Ginger Yang
Adjunct assistant professor: Ralph Wilmoth
Adjunct lecturers: Dennis Affholter, Ro Foege, Dawn Gentsch, Kevin Teale, Laurie Walkner
Graduate degrees: M.S., Ph.D. in Community and Behavioral Health
Web site: http://www.public-health.uiowa.edu/cbh

The Department of Community and Behavioral Health examines the relationship between human behavior and community health and focuses on creating effective strategies for change. Its faculty members come from a variety of disciplines within the social and health sciences, drawn together by an interest in health behavior and promoting healthy communities.

Community and behavioral health students learn how to design, implement, and evaluate interventions directed toward identified public health problems in communities. They learn how public and institutional policy, the media, and community organizations can promote healthy behavior and effect positive change.

Graduate Programs
The department offers two graduate degrees: Master of Science and Doctor of Philosophy. It also offers a doctoral subtrack in addiction studies and a community and behavioral health subtrack in the Master of Public Health; see Master of Public Health (M.P.H.) in the Catalog.

Master of Science
The M.S. program prepares students for research and professional positions in community and behavioral health or for Ph.D. study in community and behavioral health.

The M.S. requires 35 s.h., including a thesis. During the first semester, students work with their academic advisers to develop a plan of study that satisfies their interests and professional goals as well as the program’s requirements. Students are required to attend departmental seminars and to complete the following courses.

COLLEGE OF PUBLIC HEALTH CORE
All of these (9 s.h.):
171:161 Introduction to Biostatistics 3 s.h.
172:101 Introduction to Health Promotion and Disease Prevention 3 s.h.
173:140 Epidemiology I: Principles 3 s.h.

BEHAVIORAL AND SOCIAL SCIENCES CORE
Three of these (9 s.h.):
113:185 Medical Anthropology 3 s.h.
172:106 Designing and Implementing Interventions 3 s.h.
172:110 Community Development in Public Health 3 s.h.
172:130 Social Determinants of Health 3 s.h.
172:240 Health Communication 3 s.h.
172:242 Persuasion and Health 3 s.h.
172:246 Health Communication Campaigns 3 s.h.

RESEARCH METHODS CORE
Two of these (6 s.h.):
07P:249 Factor Analysis and Structural Equation Models 3 s.h.
07P:252 Introduction to Multivariate Statistical Methods 3 s.h.
171:162 Design and Analysis of Biomedical Studies 3 s.h.
172:181 Evaluation I: Theory and Applications 3 s.h.
172:183 Qualitative Research for Public Health 3 s.h.
172:282 Evaluation II: Design and Methods 3 s.h.
CONTENT AREA ELECTIVES
Students work with their adviser to select at least 5 s.h. of course work appropriate to their educational goals and emphasis area. They may choose from any community and behavioral health courses not already taken, other College of Public Health courses, or other University of Iowa graduate-level courses.

THESIS
The thesis requirement is 6 s.h.

M.S. Subtrack in Health Communication
The M.S. subtrack in health communication is designed for students who wish to gain skill in designing, evaluating, and implementing effective communication strategies and messages that speak to the health needs of diverse audiences. The program addresses clinician-patient interaction, family communication, group and organizational communication, and mass media and web-based campaigns.

The health communication subtrack combines the M.S. core course work with additional concentrated learning opportunities. Students fulfill the regular M.S. requirements, using the health communication core to satisfy the content area electives requirement.

HEALTH COMMUNICATION CORE
All of these (12 s.h.):
- 036:371 Communication Theory 3 s.h.
- 172:240/036:270 Health Communication 3 s.h.
- 172:242 Persuasion and Health 3 s.h.
- 172:246/036:379 Health Communication Campaigns 3 s.h.

M.P.H. Subtrack in Health Communication
The M.P.H. subtrack in health communication prepares public health practitioners for a variety of positions in community development, health program implementation, and health education. See Master of Public Health (M.P.H.) in the Catalog.

Doctor of Philosophy
The Ph.D. program prepares individuals for academic, research, and policy-making work in the social and behavioral health sciences. This fast-growing academic specialty offers many career opportunities in academic and research institutions.

The Ph.D. requires at least 75 s.h. of course work beyond the baccalaureate degree, including transfer credit from a master’s degree. Students must successfully complete a comprehensive exam and a dissertation—a substantial scholarly treatise. The research topic must be approved by the student’s dissertation committee.

During the first semester, students work with their academic adviser to develop a plan of study that satisfies their interests and professional goals as well as the program’s requirements. Students are required to attend departmental seminars and to complete the following courses.

COLLEGE OF PUBLIC HEALTH CORE
All of these (9 s.h.):
- 171:161 Introduction to Biostatistics 3 s.h.
- 172:101 Introduction to Health Promotion and Disease Prevention 3 s.h.
- 173:140 Epidemiology I: Principles 3 s.h.

BEHAVIORAL AND SOCIAL SCIENCES CORE
Seven of these (21 s.h.):
- 113:185 Medical Anthropology 3 s.h.
- 172:106 Designing and Implementing Interventions 3 s.h.
- 172:110 Community Development in Public Health 3 s.h.
- 172:130 Social Determinants of Health 3 s.h.
- 172:150 Health Behavior and Health Education 3 s.h.
- 172:240 Health Communication 3 s.h.
- 172:242 Persuasion and Health 3 s.h.
- 172:246 Health Communication Campaigns 3 s.h.

RESEARCH METHODS CORE
Five of these (15 s.h.):
- 07P:249 Factor Analysis and Structural Equation Models 3 s.h.
- 07P:252 Introduction to Multivariate Statistical Methods 3 s.h.
- 171:162 Design and Analysis of Biomedical Studies 3 s.h.
172:181 Evaluation I: Theory and Applications 3 s.h.
172:183 Qualitative Research for Public Health 3 s.h.
172:282 Evaluation II: Design and Methods 3 s.h.

CONTENT AREA ELECTIVES
Students work with their adviser to select at least 18 s.h. of course work appropriate to their educational goals and emphasis area. They may choose from any Department of Community and Behavioral Health courses not already taken, other College of Public Health courses, or other University of Iowa graduate-level courses.

DISSERTATION
The dissertation requirement is 12 s.h.

Ph.D. Subtrack in Addiction Studies
The Ph.D. subtrack in addiction studies is designed for students who wish to gain skill in developing and evaluating addiction prevention and intervention programs. This area of study and practice examines addiction prevention and treatment from both a public health and a biopsychosocial perspective.

The addiction studies subtrack combines core course work from the Ph.D. curriculum with additional specialized training. Students fulfill the regular Ph.D. requirements, using the addiction studies core to satisfy the content area electives requirement.

ADDITION STUDIES CORE
Students work with their adviser to select 18 s.h. of addictions studies course work offered by the department. Courses focusing on treatment of substance abuse and comorbid psychopathology, prevention of substance abuse and comorbid psychopathology, and assessment and diagnosis of addiction and comorbid psychopathology are under development.

Ph.D. Subtrack in Health Communication
The Ph.D. subtrack in health communication is designed for students who wish to prepare for academic, research, and policy-making careers in the area of health communication.

The health communication subtrack combines the core course work from the Ph.D. curriculum with additional specialized training. Students fulfill the regular Ph.D. requirements, using the health communication core to satisfy the content area electives requirement.

HEALTH COMMUNICATION CORE
All of these (12 s.h.)
- 036:371 Communication Theory 3 s.h.
- 172:240/036:270 Health Communication 3 s.h.
- 172:242 Persuasion and Health 3 s.h.
- 172:246/036:379 Health Communication Campaigns 3 s.h.

Admission
For detailed information about Graduate College policies, including application requirements and procedures, see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

The community and behavioral health faculty considers several factors when evaluating applications for admission, including scores on the Graduate Record Exam, grade-point averages, letters of recommendation, intent and motivation for graduate study, and research interests. A student with deficiencies in one area may be admitted if all other components of his or her application are very strong.

All applicants must submit academic transcripts, three letters of recommendation, and a statement of purpose. Forms are available from the Department of Community and Behavioral Health or on its web site (see “Prospective Students”).

Applicants to the M.S. program must have a cumulative grade-point average of at least 3.00 and should hold a bachelor's degree from an accredited college or university. No specific undergraduate major is required. Preference is given to applicants with Graduate Record Exam verbal scores of at least 520, quantitative scores of at least 600, and analytical writing scores of at least 4.0.

Applicants to the Ph.D. program must have a graduate grade-point average of at least 3.40 and should hold a graduate degree from an accredited college or university—ideally, an M.S. in community and behavioral health, or another public health degree, or a related social science degree, or a clinical health degree. Applicants who do not hold a graduate degree should apply to the M.S. program. Preference is given to applicants with Graduate Record Exam verbal scores of at least 520, quantitative scores of at least 620, and analytical writing scores of at least 4.0. Ph.D. program applicants also must submit
their masters thesis, or if no thesis is available, a sample of their scholarly writing.

International applicants who do not hold a baccalaureate degree from an accredited college or university in the United States, the United Kingdom, Canada (except Quebec), Australia, or New Zealand must score at least 600 (paper-based) or at least 250 (computer-based) on the Test of English as a Foreign Language (TOEFL). International applicants who score 550-599 (paper-based) or 213-249 (computer-based) are required to take English fluency courses. Applicants who score below those ranges are not considered for admission.

**APPLICATION DEADLINES**

Fall entry: June 1 for U.S. citizens, April 1 for international applicants

Spring entry: November 1 for U.S. citizens, October 1 for international applicants

Applications received by January 20 receive maximum consideration for financial aid.

**Financial Support**

Several forms of financial support are available, including scholarships and awards, student loans, and graduate assistantships.

Graduate assistantships provide a stipend and entitle students to resident tuition and reduced health insurance costs. Research assistantships are competitive and are awarded according to department need and student merit. Most graduate students do not receive assistantships until their second year in the program.

Scholarships and fellowships are available through federal agencies, such as the Centers for Disease Control and the National Institutes of Health, and from private foundations.

**Resources**

The department houses the Iowa Tobacco Research Center, Prairielands Addiction Technology Transfer Center, the Iowa Center for Evaluation Research, and the Prevention Research Center. M.S. and Ph.D. students may be asked to assist with ongoing research projects.

The Iowa Tobacco Research Center supports innovative research and education on tobacco use and prevention, as well as provision and support of culturally competent and accessible smoking cessation services. The Prairielands Addiction Technology Transfer Center provides state-of-the-art training, curricula, and resources on substance use issues for counselors, health care professionals, and members of the community. The Iowa Center for Evaluation Research focuses on conducting evaluations of training, educational materials and procedures, workforce development, and community-based interventions. The Prevention Research Center focuses on improving the health of rural Iowans.

**Courses**

172:101 Introduction to Health Promotion and Disease Prevention 3 s.h.
Basic concepts, strategies, and methods of health promotion and disease prevention; health promotion in the context of public health, theories and principles that underpin health promotion, overview of policy formation and health promotion planning, implementation, evaluation. Offered spring semesters. Prerequisite: graduate standing or consent of instructor.

172:106 Designing and Implementing Interventions 3 s.h.
Background and skills necessary to plan a public health intervention program; program planning models. Offered fall semesters. Prerequisites: 172:150, and admission to College of Public Health or consent of instructor.

172:110 Community Development in Public Health 3 s.h.
Concepts, strategies, and methods of community development as major approaches to creating healthy communities and promoting social change; role of public health practitioners as agents of change in organizations, communities. Offered fall semesters. Prerequisite: graduate standing or consent of instructor.

172:115 Community Preventive Programs and Services 2 s.h.
Overview of recommended community preventive programs and services, information useful in their development and implementation. Offered fall semesters.

172:122 Maternal, Child, and Family Health 3 s.h.
Major issues, policies, and programs for health of women, children, and families in the United States; social, political, and economic determinants. Offered spring semesters. Prerequisites: 106:030 and 173:140, or consent of instructor.

172:125 American Indian Health 3 s.h.
Native American Indian health issues; anthropological and historical perspectives, cultural aspects of traditional Indian medicine, governmental policies and the Indian Health Service. Same as 149:135.

172:130 Social Determinants of Health 3 s.h.
Social and behavioral science concepts and methods relevant to effective development, implementation, improvement of health programs. Offered spring semesters. Prerequisite: graduate standing or consent of instructor.

172:131 Anthropology and International Health 3 s.h.
Medical anthropology’s critical role in international health research and practice; political ecology of infectious disease, quest for culturally appropriate interventions. Offered spring semesters. Same as 113:186, 152:184.

172:133 The Anthropology of Women’s Health 3 s.h.
How female gender intersects with culture, environment, and political economy to shape health and illness; reproductive health, violence, drug use, cancer; readings in anthropology and public health. Offered fall semesters. Prerequisite: 113:003 or 113:010 or 131:010 or graduate standing or consent of instructor. Same as 113:133, 131:133.

172:144 Physician-Patient Communication 3 s.h.
Research on characteristics and qualities of physician-patient talk.
and patient outcomes. Prerequisite: 036:060 or graduate standing or consent of instructor. Same as 036:161.

172:150 Health Behavior and Health Education 3 s.h.
Usual theories of health behavior and health education, their application to a variety of settings. Offered spring semesters. Prerequisite: graduate standing or consent of instructor.

172:160 Substance Use and Misuse in America 3 s.h.
Same as 031:173.

172:161 Substance Abuse and Mental Health 3 s.h.
Prevalence and defining characteristics of substance-related and mental health disorders; gender, cultural, ethnic, life-span, and socioeconomic differences, at individual and community levels; implication for primary and secondary prevention. Offered spring semesters. Prerequisites: graduate standing and substance abuse course, or consent of instructor.

172:163 Tobacco Use: Prevention and Control 3 s.h.
Tobacco use, particularly cigarette smoking, as a major public health concern; key factors contributing to tobacco; strategies to reduce smoking in communities.

172:170 Special Topics arr.
Didactic material in community and behavioral health that may include tutorial, seminar, or faculty-directed independent work (e.g., literature search, project, short research project). Prerequisite: consent of instructor.

172:181 Evaluation I: Theory and Applications 3 s.h.
Program evaluation methods in public health; overview of evaluation theory and models of program evaluation, examples of public health program evaluation, criteria for judging evaluation methods and products. Offered fall semesters. Prerequisite: public health student standing or consent of instructor.

172:183 Qualitative Research for Public Health 3 s.h.
Methods and theories of qualitative research that enable researchers to describe and explain social phenomena related to health behavior, illness, prevention, and treatment in the public health domain. Offered fall semesters. Prerequisite: graduate standing or consent of instructor.

172:185 Communicating with the Community 3 s.h.
Communication skills for research and practice settings, taught from a cultural perspective, with reference to gender, age, ethnicity; individual and constructive interviewing, public speaking, conducting focus groups. Offered fall semesters. Prerequisite: graduate standing or consent of instructor.

172:240 Health Communication 3 s.h.
Theories, concepts, research associated with health communication; interpersonal and mass communication approaches. Offered fall semesters. Prerequisite: graduate standing or consent of instructor. Same as 036:270.

172:242 Persuasion and Health 3 s.h.
Theories of persuasion and social influence; attitude formation, the relationship between attitudes and behavior, persuasion theories and their applications across health topics. Prerequisite: graduate standing or consent of instructor.

172:246 Health Communication Campaigns 3 s.h.
Design and analysis of health campaigns; theory, practice, methods; mass media, community, organization, and interpersonal approaches. Same as 036:379.

172:270 Independent Study in Community and Behavioral Health arr.
Pursuit of an interest in community and behavioral health requiring substantial creativity and independence. Repeatable.

172:271 Research in Community and Behavioral Health arr.
Advanced research in community and behavioral health. Repeatable.

172:282 Evaluation II: Design and Methods 3 s.h.
Design and methodology for use in public health program evaluation; evaluation planning, selection of evaluation designs, data collection and analysis, evaluation results reporting. Offered spring semesters. Prerequisites: 172:181 and a course in biostatistics or statistics.

Epidemiology

Head: James C. Torner
Professors: Trudy Burns (Biostatistics), Elizabeth Chrischilles (Pharmacy), Michael Cohen (Pathology/Urlogy), Gary Doern (Pathology), Claiburne Dungy (Pediatrics), Laurence Fuortes (Occupational and Environmental Health), Greg Gray (International Programs), William Hammonds (Anesthesiology), Loreen Herwaldt (Internal Medicine), Kathleen Janz (Health and Sport Studies), Susan Johnson (Obstetrics and Gynecology), Louis Kirchhoff (Internal Medicine), Ronald Lauer (Pediatrics), Steve Levy (Preventive and Community Dentistry), Charles Lynch (Pathology), Larry Mahoney (Pediatrics), Jeffrey Murray (Pediatrics/Biological Sciences/Pathiatric Dentistry), Corinne Peek-Asa (Occupational and Environmental Health), Michael Pfatter (Pathology), Gary Rosenthal (Internal Medicine), Audrey Sattias, Elaine Smith (Preventive and Community Dentistry), James Torner (Surgery), Don VanDyke (Pediatrics), Robert Wallace (Internal Medicine), Mary Wilson (Internal Medicine), Craig Zwerling (Occupational and Environmental Health)
Professors emeriti: Helmut Schrott (Internal Medicine), Robert Woolson (Biostatistics)
Adjunct professors: Bradley Doebbeling, Susan Joslyn, M. Patricia Quinlisk
Associate professors: Kevin Ault (Obstetrics and Gynecology), John Brooks (Pharmacy), Leslie Dennis, R. William Field (Occupational and Environmental Health), David Katz (Internal Medicine), Neal Kohatsu, Jennifer Robinson, Wayne Sanderson (Occupational and Environmental Health), Linda Snetelaar (Internal Medicine)
Adjunct associate professors: James Cerhan, Caroline Carney Doebbeling, Jose Sanchez
Assistant professors: Catherine Bradley (Obstetrics and Gynecology), Elizabeth Clark (Family Medicine), Badrinath Konety (Urology), Paul Romitti, Tara Smith
Graduate degrees: M.S., Ph.D. in Epidemiology
Web site: http://www.public-health.uiowa.edu/epi

The Department of Epidemiology focuses on surveillance for disease, risk factors for disease in the general population, behavioral factors in disease, use and outcome of health interventions and care, and the establishment and evaluation of disease control measures in the community. Students are guided by faculty members whose research interests include epidemiology of communication disorders, pharmacoepidemiology, cancer epidemiology, infectious disease epidemiology, adverse reproductive outcome epidemiology, anatomic pathology, cardiovascular disease, nutrition, smoking cessation, epidemiology of reproduction, dental epidemiology, clinical epidemiology, neuroepidemiology, meta-analysis, intervention trials, international health, and effects of aging.

Graduate Programs

The department offers two graduate degrees: Master of Science and Doctor of Philosophy. In addition, an epidemiology subtrack is available in the M.P.H.; see Master of Public Health (M.P.H.) in the Catalog.

Master of Science

The M.S. program prepares graduate students for professional careers in which specialized knowledge of epidemiological methods and analytic techniques are essential. Graduates find employment in local, state, and federal health agencies, academic institutions, and private enterprise.

The M.S. requires 38 s.h. and is offered with or without thesis. Students must maintain a g.p.a. of at least 3.00. Those who receive a grade of C on 7 s.h. or more of course work may be dismissed from the program. Students who choose to complete the degree without thesis are required to pass a comprehensive examination.

Students are required to attend departmental seminars and journal club. They also must present one scientific poster at an international, national, regional, state, university, or department poster session.

The following courses are required.

REQUIRED COURSES

All of these:
171:161 Introduction to Biostatistics 3 s.h.
171:162 Design and Analysis of Biomedical Studies 3 s.h.
171:241 Applied Categorical Data Analysis 3 s.h.
173:140 Epidemiology I: Principles (web-based course cannot be used) 3 s.h.
173:160 Introduction to Epidemiologic Data Analysis with Computers 2 s.h.
173:240 Epidemiology II: Advanced Methods 3 s.h.
173:241 Epidemiology II: Advanced Methods Lab 2 s.h.
One of these:
069:133 Introduction to Human Pathology 4 s.h.
069:270 Pathogenesis of Major Human Diseases 3 s.h.

One of these:
173:255 Epidemiology of Infectious Diseases 3 s.h.
173:260 Epidemiology of Chronic Diseases 3 s.h.

One of these:
172:150 Health Behavior and Health Education 3 s.h.
173:280 Introduction to Health Care Organization and Policy 3 s.h.
175:197 Environmental Health 3 s.h.

One of these:
173:195 Preceptorship in Epidemiology (for nonthesis students) 3 s.h.
173:300 Thesis/Dissertation (for thesis students, may be taken twice) 3 s.h.

EPIDEMIOLOGY ELECTIVES
Two of these (total of 5 s.h.):
173:111 International Health 3 s.h.
173:155 Diagnostic Microbiology for Epidemiology 3 s.h.
173:199 Practicing Evidence-Based Public Health 3 s.h.
173:225 Genetics and Epidemiology 4 s.h.
173:235 Nutritional Epidemiology 2 s.h.
173:245 Epidemiology of Physical Activity 3 s.h.
173:251 Injury Epidemiology 3 s.h.
173:255 Epidemiology of Infectious Diseases 3 s.h.
173:256 Hospital Epidemiology 2 s.h.
173:260 Epidemiology of Chronic Diseases 3 s.h.
173:261 Epidemiology of Aging 1 s.h.
173:262 Neuroepidemiology 1 s.h.
173:263 Epidemiology of Reproductive Diseases 2 s.h.
173:265 Cardiovascular Disease Epidemiology 3 s.h.
173:267 Psychiatric Epidemiology 3 s.h.
173:270 Cancer Epidemiology and Control 3 s.h.
173:285 Outcomes Research 2 3 s.h.
173:290 Intervention and Clinical Trials 3 s.h.
173:291 Pharmacoepidemiology 3 s.h.

OTHER ELECTIVES
Students work with their adviser to select at least 2 s.h. of course work appropriate to their educational goals and emphasis area. They may choose from any course not already taken from the list of epidemiology electives, other College of Public Health courses, or other University of Iowa graduate-level courses.

Doctor of Philosophy
The Ph.D. program prepares graduate students for careers as scientists, teachers, and practitioners of epidemiologic methods. Employment opportunities exist in academic institutions; local, state and federal health agencies; and in commercial enterprises.

The Ph.D. requires a minimum of 75 s.h. of course work. Doctoral students must maintain a g.p.a. of at least 3.00. Those who receive a grade of C on 7 s.h. or more of course work may be dismissed from the program.

All doctoral students must successfully complete a qualifying examination, a comprehensive examination, and a dissertation—a substantial scholarly treatise. The research topic and content, which vary depending on the program of study, must be approved by the student’s dissertation committee. Other degree requirements include approved electives chosen from Department of Epidemiology courses and other University of Iowa courses.

Students are required to attend departmental seminars and journal club. They also must present one scientific poster at an international, national, regional, state, university, or department poster session.

The following courses are required.

REQUIRED COURSES
072:151 Intermediate Physiology 4 s.h.
171:161 Introduction to Biostatistics 3 s.h.
171:162 Design and Analysis of Biomedical Studies 3 s.h.
171:164 Research Data Management Analysis 3 s.h.
171:241 Applied Categorical Data Analysis 3 s.h.
171:242 Applied Survival and Cohort Data Analysis 3 s.h.
173:140 Epidemiology I: Principles (web-based course cannot be used) 3 s.h.
173:160 Introduction to Epidemiologic Data Analysis with Computers 2 s.h.
173:205 Research in Epidemiology 3 s.h.
173:210 Writing a Research Protocol 3 s.h.
173:240 Epidemiology II: Advanced Methods 3 s.h.
173:241 Epidemiology II: Advanced Methods Lab 2 s.h.
173:340 Epidemiology III: Theories 3 s.h.

One of these:
069:133 Introduction to Human Pathology 4 s.h.
069:270 Pathogenesis of Major Human Diseases 3 s.h.

At least 3 s.h. from these:
173:225 Genetics and Epidemiology 4 s.h.
173:235 Nutritional Epidemiology 2 s.h.
173:245 Epidemiology of Physical Activity 3 s.h.
173:251 Injury Epidemiology 3 s.h.
173:255 Epidemiology of Infectious Diseases 3 s.h.
173:256 Hospital Epidemiology 2 s.h.
173:260 Epidemiology of Chronic Diseases 3 s.h.
173:261 Epidemiology of Aging 1 s.h.
173:262 Neuroepidemiology 1 s.h.
173:263 Epidemiology of Reproductive Diseases 2 s.h.
173:265 Cardiovascular Disease Epidemiology 3 s.h.
173:267 Psychiatric Epidemiology 3 s.h.
173:270 Cancer Epidemiology and Control 3 s.h.

**ELECTIVES**

Each student must declare an emphasis area and, working with the emphasis area coordinator, develop a plan of study that ensures the student will develop knowledge in a specific area sufficient to support important original research. At the discretion of the emphasis area coordinator and study plan committee, the student may organize emphasis area course work into required emphasis area course and electives.

**DISSERTATION**

All doctoral students must successfully complete a Ph.D. thesis.
173:300 Thesis 10-18 s.h.

**Admission**

For detailed information about Graduate College policies, including application requirements and procedures, see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

The epidemiology faculty considers several factors when evaluating applications for admission, including GRE scores, grade-point average, letters of recommendation, intent and motivation for graduate study, and research interests. A student with deficiencies in one area may be admitted if all other components of his or her application are very strong.

All M.S. program applicants must hold a baccalaureate degree and have a cumulative g.p.a. of at least 3.00. Undergraduate preparation must include two semesters of biological sciences, and mathematics through algebra.

Ph.D. program applicants must hold a baccalaureate degree (an M.S. or M.P.H. usually is required), and must have a cumulative g.p.a. of at least 3.00. Courses in the biological, physical and mathematical sciences provide important background; one semester of calculus and two semesters of biological sciences are highly recommended. Computing skills also are desirable.

All applicants to the M.S. or Ph.D. program must have taken the Graduate Record Examination (GRE) General Test.

International applicants who do not hold a baccalaureate degree from an accredited college or university in the United States, the United Kingdom, Canada (except Quebec), Australia, or New Zealand must score at least 600 (paper-based) or at least 250 (computer-based) on the Test of English as a Foreign Language (TOEFL). International applicants who score 550-599 (paper-based) or 213-249 (computer-based) are required to take English fluency courses. Applicants who score below those ranges are not considered for admission.

All M.S. and Ph.D. applicants and students are required to have strong written and oral communication skills.

**M.S. APPLICATION DEADLINES**

Fall entrance: July 1 for U.S. citizens; April 15 for international applicants
Summer entrance: April 15 for U.S. citizens; March 1 for international applicants
There is no spring entrance.

**PH.D. APPLICATION DEADLINES**

Fall entrance: April 1
Spring entrance (not encouraged): October 1
Financial Support
A limited number of graduate research assistantships are available for advanced M.S. and Ph.D. students; for information, consult the department. For information on financing education through jobs, grants, and loans, contact the Office of Student Financial Aid.

Opportunities for funded postdoctoral fellowships are available. Funded positions sponsored by federal agencies are available only to U.S. citizens.

Resources
Department of Epidemiology resources and activities include the State Health Registries of Iowa, the Preventive Intervention Center, the Lipid Research Clinic, the Health Effectiveness Research Center, and the Center for Emerging Infectious Diseases.

The State Health Registries of Iowa, which encompasses the Iowa Cancer Registry and the Iowa Registry for Congenital and Inherited Disorders, works in cooperation with the Iowa Department of Public Health to collect medical data on Iowans. It is one of 10 registries nationwide that report data to the National Cancer Institute.

The Preventive Intervention Center conducts population-based intervention trials to prevent occurrence and recurrence of disease and to promote wellness, with a focus on elderly men and women. The Lipid Research Clinic specializes in research promoting prevention of cardiovascular disease and provides an interdisciplinary approach to risk factor interventions. The Health Effectiveness Research Center is a collaborative research enterprise with the College of Pharmacy that studies whether particular health care treatments or services are over- or underutilized. The Center for Emerging Infectious Diseases employs epidemiological methods, laboratory technologies, and clinical evaluations to achieve a better understanding of emerging infectious diseases.

Courses
173:111 International Health 3 s.h.
Urgent health problems in the developing world and among disadvantaged populations in developed countries; biological, social, cultural, political aspects of international health problems; applications of research methods from epidemiology, environmental health, social sciences. Offered fall semesters. Same as 152:111, 175:111.

173:140 Epidemiology I: Principles 3 s.h.
Epidemiological concepts and methods; design of descriptive and analytic studies, such as aggregate, case series, cross-sectional, case-control, cohort studies; application of epidemiology to public health practice; communication and dissemination of epidemiological findings.

173:145 Public Health Data 2 s.h.
Concepts and methods of obtaining and using public health data in community settings; how public health data are used for epidemiologic investigations and prevention programs. Offered spring semesters. Pre- or corequisites: 171:161 and 173:140.

173:150 Introduction to Clinical Epidemiology 2 s.h.
Epidemiologic applications and methods used in clinical settings to evaluate clinical medicine and other health professions disciplines, including health measurement, health outcome determination, diagnostic process, risk assessment and communication, prognosis, study design, patient surveys, clinical trials, decision analysis and meta-analysis, health services research. Offered fall semesters. Pre- or corequisites: 171:161 and 173:140.

173:151 Patient-Oriented Research Didactic 3 s.h.
Same as 050:220.

173:152 Clinical Research Career Development 1 s.h.

173:155 Diagnostic Microbiology for Epidemiology 3 s.h.
Introduction to microbiological culture, antigen detection, immunological, and molecular amplification laboratory techniques for bacteria, viruses, parasites, fungi. Offered spring semesters. Prerequisite: 061:103 or 061:112 or 061:157 or 061:164.

173:157 Zoonotic Diseases 2 s.h.
Introduces public health students to the epidemiology and control of zoonotic diseases; emphasizes zoonoses endemic to the midwestern United States. Prerequisite: 061:103 or 061:112 or 061:157 or 061:164 or 173:155 or 173:255.

173:160 Introduction to Epidemiologic Data Analysis With Computers 2 s.h.
Organization, collection, management, and analysis of epidemiological data using computer programs. Offered fall semesters. Pre- or corequisites: 171:161 and 173:140.

173:161 Patient-Oriented Research Data Analysis 3 s.h.

173:163 Seminar in Clinical Research 1 s.h.
Presentation of ongoing clinical research projects, grant applications, and methodological articles, with emphasis on works in progress.

173:170 Injury Prevention and Control 3 s.h.
Theory, research, and practice of injury control; unintentional and intentional injuries; local, national, international injury issues. Offered fall semesters. Same as 175:170.

173:175 Research Methods in Disaster Studies 3 s.h.
Epidemiologic study of disasters and their health consequences; research to identify and reduce health effects, research in context of response and preparedness. Offered spring semesters. Same as 175:175.
173:190 Problems and Special Topics in Epidemiology 3 s.h. Didactic material in epidemiology; may include tutorial, seminar, faculty-directed independent work (e.g., literature search, project, short research project).

173:194 Practicing Evidence-Based Public Health 3 s.h. How epidemiologic and other scientific studies underlie public health practice; relationship between evidence and action; controversies at interface of science and policy. Offered spring semesters.

173:200 Independent Study in Epidemiology 3 s.h. In-depth pursuit of an area of special interest in epidemiology requiring substantial creativity and independence. Repeatable.

173:205 Research in Epidemiology 3 s.h. Research that may lead to a dissertation. Repeatable.

173:210 Writing a Research Protocol 3 s.h. Small group projects to develop research protocols using epidemiological study designs; presentation and defense of proposals before faculty site visitors. Offered fall semesters. Prerequisites: 171:161, 173:140, and 173:240.

173:225 Genetics and Epidemiology 4 s.h. Basic human genetic and population genetics principles; methods of integrating genetic principles into epidemiological studies; analytical methods for family data. Offered spring semesters. Prerequisites: 171:161 and 173:140, or consent of instructor. Same as 185:270.

173:230 Principles of Dietary Assessment 1 s.h. Overview of current dietary assessment methods; evaluation of dietary records, dietary recall, food frequency questionnaires, brief dietary scans, nutrient database, nutrient intake standards. Offered spring semesters. Prerequisite: 3 s.h. of college nutrition courses.

173:235 Nutritional Epidemiology 2 s.h. Application of nutrition study designs to nutritional variables and chronic disease; analysis of nutrition epidemiologic studies; research protocol design. Offered spring semesters. Recommended: a basic nutrition course.

173:236 Nutrition Intervention in Clinical Trials Research 2 s.h. Nutrition interventions in clinical trials; disease-related nutrition variables; research that links effects of diet on chronic diseases. Offered fall semesters. Recommended: a basic nutrition course.

173:237 Nutrition Intervention in Research Lab 3 s.h. Development, demonstration of group counseling skills in ongoing nutrition research projects at The University of Iowa. Offered fall semesters. Pre- or corequisite: 173:230 or consent of instructor.

173:240 Epidemiology II: Advanced Methods 3 s.h. Epidemiologic study design and analysis; bias; confounding; effect modification; case-control studies; cohort studies; field methods; measurement principles; exposure and disease classification; acute and chronic disease examples. Offered spring semester. Prerequisites: 171:161 and 173:140.

173:245 Epidemiology of Physical Activity 3 s.h. Same as 028:249.

173:251 Injury Epidemiology 3 s.h. How epidemiology can be applied to injury prevention and control; epidemiology literature, specific methodological problems involved in the epidemiology of injuries, critical evaluation of research articles. Offered spring semesters of odd years. Prerequisite: 173:140 or consent of instructor. Same as 175:251.

173:253 Epidemiology of Occupational Injuries 3 s.h. Epidemiological literature on occupational injuries and their prevention; focus on research methods. Offered spring semesters of even years. Prerequisite: 173:140 or consent of instructor. Same as 175:253.

173:255 Epidemiology of Infectious Disease 3 s.h. Underlying epidemiological concepts of infection disease, including causation and surveillance; prevention and control; case studies. Offered fall semesters. Prerequisite: 173:140 or equivalent. Same as 152:257.

173:256 Hospital Epidemiology 2 s.h. Infectious and noninfectious adverse outcomes of medical care and appropriate investigative methods; surveillance, resistant organisms, molecular epidemiology, tuberculous control, device-associated infections, latex allergies, isolation, construction, sterilization, regulatory agencies. Offered spring semesters of odd years. Prerequisite: 173:140 or equivalent.

173:260 Epidemiology of Chronic Diseases 3 s.h. Chronic disease epidemiology; survey and biological methods for exposure measurement in epidemiologic studies; leading chronic diseases, measurement of disease, lifestyle, nutrition, occupation, family history. Offered spring semesters. Prerequisite: 173:140 or consent of instructor.

173:261 Epidemiology of Aging 1-2 s.h. Epidemiologic methods for studying health and social problems of older persons; applications including research and public health practice and policy. Offered spring semester. Prerequisite: 173:140. Same as 153:261.

173:262 Neuropathology 1 s.h. Basic epidemiologic concepts applied to neurologic disease, concepts, methods, examples of neuropsychology; various diseases, methods. Offered spring semesters. Prerequisite: 173:140.

173:263 Epidemiology of Reproductive Diseases 2 s.h. Evaluation of methodological issues and current findings for reproductive diseases and conditions; etiological mechanisms, including behavioral and genetic. Offered fall semesters. Prerequisite: 173:140.

173:265 Cardiovascular Disease Epidemiology 3 s.h. Natural history of atherosclerotic disease and human factors affecting its development; atherosclerotic disease in varied populations worldwide and in men and women of varied ages; clinical trials to delay onset, reduce incidence, improve outcome of cardiovascular disease. Offered fall semesters. Prerequisite: 173:160.

173:267 Psychiatric Epidemiology 3 s.h. Population-based studies of psychiatric disorders and associated etiologic factors; diagnostic criteria used in psychiatric research, common structured interviews and rating scales; recent research relevant to common psychiatric disorders; experience writing a research idea using NIH PHS grant form. Offered spring semesters. Prerequisite: 173:140 or consent of instructor. Recommended: 173:240 or two years of resident training in psychiatry. Same as 073:255.

173:270 Cancer Epidemiology and Control 3 s.h. Incidence, mortality, survival; risk factors, cancer control options for major cancer sites; principles and methods of cancer registration in Iowa. Offered spring semesters of even years. Prerequisites: 171:161 and 173:140.
173:276 Health Care Utilization Outcomes 3 s.h.
Research tools to assess changes in health care use and cost as outcomes of treatment; evidence-based medicine, meta-analysis, decision trees, cost-of-illness analysis, cost effectiveness models. Offered fall semesters. Same as 174:268.

173:280 Introduction to Health Care Organization and Policy 3 s.h.
Basic arrangements of services in the United States; social, political, psychological, economic forces that shape health services; determinants of use, amounts, types of health resources available, financing methods, government regulation; current issues. Offered fall semesters. Same as 174:200.

173:285 Outcomes Research 2-3 s.h.
Conceptual underpinnings and collection of valid outcomes and data, use of outcomes data in clinical care and population based care management; intricacies of research methodology and health related quality-of-life assessment. Offered spring semesters. Prerequisite: introductory research methods (e.g., 173:140).

173:290 Intervention and Clinical Trials 3 s.h.
Methodologic introduction to rationale, design, conduct, analysis, and presentation of clinical trials; basics of clinical trial design, variety of designs, examples from clinical trials; biostatistical methods, including sample size determination. Offered fall semesters. Prerequisites: 171:161 and 173:140, or equivalents. Same as 171:267.

173:291 Pharmacoepidemiology 3 s.h.
Drug approval process, methods for identification and attribution of adverse drug events, current understanding of the epidemiology of adverse drug events; study designs, data sources for pharmacoepidemiology, pharmacoeconomics. Offered fall semesters of even years. Prerequisite: 173:140.

173:295 Clinical Research Ethics 2 s.h.
Ethical and regulatory aspects of clinical research; historical background, current regulations, institutional review board requirements related to human subjects protection issues. Prerequisite: K30 training grant or enrollment in degree program with clinical research project.

Repeatable.

173:320 Teaching in Epidemiology 3 s.h.

173:340 Epidemiology III: Theories 3 s.h.
How epidemiology fits into the wider context of scientific inquiry. Offered fall semesters of odd years. Prerequisites: 171:241, 173:140, and 173:240.
Health Management and Policy

Interim head: Barry R. Greene
Professors: Joanne Dochterman (Nursing), Josephine Gitter (Law), Barry R. Greene, Arthur J. Hartz (Family Medicine), Charles Helms (Internal Medicine), Diane Huber (Nursing), Michael Kienzle (Medicine), Samuel Levey, James L. Price (Sociology), Gary E. Rosenthal (Internal Medicine), Gerard Rushion (Geography), Frederic D. Wolinsky
Adjunct professors: R. Edward Howell, Henri R. Manasse Jr.
Clinical professors: Christopher Atchison, Mary Gilchrist, Donna Katen-Bahensky, Lawrence D. Prybil
Associate professors: John Brooks (Pharmacy), Franklin Dexter (Anesthesiology), Thomas E. Vaughn, Marcia M. Ward
Associate professors (clinical): James Babensky, Michelle Robnett (Nursing), Tanya Uden-Hotman
Adjunct associate professors: Anthony DeFurio, Ellen Guacher, William W. Hesson, Ann Madden Rice, Richard B. Murphy, William D. Petasnick, Peter Roberts, John H. Staley, Peter Wallace
Assistant professors: Rachel L. Anderson, Brian Kaskie, John E. Schneider, Julie Urmie (Pharmacy)
Assistant professor (clinical): Jorg Westermann
Adjunct assistant professors: Lee Carmen, Shane Cerone, Mark Moser, Ralph Wilmoth
Graduate degrees: M.H.A., Ph.D. in Health Management and Policy
Web site: http://www.public-health.uiowa.edu/hmp

The Department of Health Management and Policy educates health care executives to assume leadership roles in an increasingly complex and dynamic health care system. Graduates hold key positions in all areas of health management and policy, both in the United States and abroad.

The department’s degree programs rank among the foremost in the field. They include the Master of Health Administration (M.H.A.) and a Ph.D. in health management and policy. The M.H.A. program is accredited by the Commission on Education of Healthcare Management Education. The department’s faculty presents the policy and administration subtrack of the college’s Master of Public Health (M.P.H.), which prepares students to lead public health organizations.

The Ph.D. program offers core training in health services research and specialization in a choice of four concentrations: health economics, health outcomes, health policy, or management and organizations.

The department also offers joint degree programs with the Tippie College of Business (M.H.A./M.B.A.), the College of Law (M.H.A./J.D.), and the department of Urban and Regional Planning (M.H.A./M.A.). See “Joint Master’s Degrees” in this section.

Master of Health Administration

The M.H.A. program prepares students for a wide variety of positions in health care management. The curriculum is designed to help students attain a comprehensive understanding of issues involved in patient-centered service organizations, and strong business skills.

The M.H.A. requires 60 s.h. of graduate credit (usually two academic years of full-time study). Transfer credit and course waivers may be accepted, but all students are expected to complete a minimum of 54 s.h. during their course of study.

Students work with their advisers to create a plan of study that incorporates required courses and their career goals. Through elective course work, students may develop an emphasis in interest areas such as operations management, managed care, financial management, or aging.

During the first year, students are introduced to the social, political, economic, and financial environments of health care organizations. The concepts, tools, and techniques of effective managerial decision making, planning, and control also are presented.

During the second year, students pursue in-depth applications of management concepts and develop skills in areas relating to their special interests and career objectives.

Core courses in management, economics, law, managerial finance, and financial accounting provide students with necessary business skills. Students also may take course work in other
areas, such as business, urban and regional planning, and aging studies.

**REQUIRED COURSES**

- 06N:215 Corporate Financial Reporting 3 s.h.
- 06N:216 Data and Decisions 3 s.h.
- 06N:225 Managerial Finance 3 s.h.
- 171:161 Introduction to Biostatistics 3 s.h.
- 173:140 Epidemiology I: Principles 3 s.h.
- 174:100 Executive Seminar Series 0 s.h.
- 174:200 Introduction to Health Care Organization and Policy 3 s.h.
- 174:201 Health Care Management 3 s.h.
- 174:203 Strategic Planning and Marketing 3 s.h.
- 174:204 Quantitative Management in Health Care 2 s.h.
- 174:205 Issues in Health Management and Policy 3 s.h.
- 174:208 Health Services Information Systems 2 s.h.
- 174:212 Health Economics I 3 s.h.
- 174:216 Financial Management of Health Institutions 3 s.h.
- 174:218 Topics in Health Administration 1 s.h.
- 174:221 Evaluation and Outcomes in Health Care 2 s.h.
- 174:223 Seminar in Health Care Ethics 2 s.h.
- 174:224 Human Resources for Health Organizations 2 s.h.
- 174:237 Legal Aspects of Health and Medical Care 3 s.h.
- 174:243 Health Policy 1-3 s.h.

**ELECTIVES**

Students choose 12 s.h. of course work, which must include 6 s.h. in Department of Health Management and Policy courses.

**Summer Internships, Fellowships, Residencies**

The department facilitates placement of M.H.A. students in optional summer internships between the first and second years of study. Internships offer opportunities for practical experience outside the classroom, observing and interacting with executives in a health care setting. Internships are full-time positions that usually last 10-12 weeks. Students normally receive a salary or stipend, and in some cases, assistance with living arrangements. Internships may carry up to 3 s.h. of credit.

Many M.H.A. students complement their academic training with a postgraduate fellowship or residency. Such experiences provide opportunities to observe, develop, and demonstrate practical management techniques and skills and to develop connections with colleagues. The department takes an active role in helping students identify and secure fellowship and residency positions.

**Joint Master’s Degrees**

Students who wish to pursue an integrated program combining an M.H.A. with a master’s degree in another field should discuss their plans with both academic units and indicate their interest when they apply to the M.H.A. program.

**Business**

Students interested in combining the traditional strengths of health management and policy with greater exposure to advanced management techniques should consider the joint master’s degree program with the Tippie College of Business.

This combination leads to an M.H.A. in health management and policy and an M.B.A. in business administration. It requires 75 s.h. and can be completed in two-and-a-half years. Separate admission to each degree program is required.

**Law**

The joint program with the College of Law is highly individualized, allowing students to gain in-depth exposure to and training in both health care management and law.

The program leads to an M.H.A. in health management and policy and a J.D. in law. It requires a minimum of 126 s.h. and usually takes four years to complete, although students who enroll in the accelerated law program may complete it in less time. Separate admission to each degree program is required. Students register only for law courses during their first year.

**Urban and Regional Planning**

Students interested in developing special expertise in community and health planning may pursue a joint master's degree with the program in Urban and Regional Planning. The M.A. in urban and regional planning prepares students to develop public policy alternatives that help improve the quality of life in cities and throughout regions.

The program leads to an M.H.A. in health management and policy and an M.A. in urban and regional planning. It requires 76 s.h.
Separate admission to each degree program is required.

**Doctor of Philosophy**

The Ph.D. program, established in 1950, was the nation’s first doctoral program in health care management. Students earn a Ph.D. in health management and policy, which prepares them for careers in health services research, education, and policy leadership in universities, government agencies, and health organizations. The program’s faculty members are committed to interdisciplinary scholarly inquiry and research. Individual plans of study allow students to prepare for specific careers, and small class size encourages frequent student-faculty interaction, including participation in research projects as well as scholarly publications.

The program is oriented toward applied, interdisciplinary research. Students develop mastery of theories and research methodologies necessary to study the complex American health system.

The Ph.D. requires at least 90 s.h. Students may apply up to 30 s.h. of transfer credit earned for master’s degree work toward the Ph.D.

**REQUIRED COURSE WORK**

Ph.D. students take course work in core content areas covering health care systems, health care management, health economics, and health policy. Courses in research design and statistical analysis are required. Students may waive specific courses, depending on their background.

**CONCENTRATIONS**

Ph.D. students choose one of four concentrations: health economics, health outcomes, health policy, and management and organization studies. In special circumstances, students may design their own concentrations, subject to faculty approval.

**EXAMINATIONS**

All Ph.D. students must pass a preliminary examination that tests the student’s mastery of core material covered during the first year in the department, including American health systems and health services research methods.

The comprehensive examination focuses on the courses in the student’s chosen concentration, with emphasis on the student’s specific area of research and theoretical interest. Students take the comprehensive exam at or near the end of their formal course work.

**DISSERTATION**

Doctoral candidates prepare dissertations based on original research that tests, extends, or applies concepts or principles to a problem in health care. Students may choose to complete a traditional dissertation or may complete a dissertation based on three publishable papers.

**Admission**

For detailed information about Graduate College policies, including application requirements and procedures, see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

Students from a variety of academic backgrounds are admitted to the department’s graduate programs. Applicants to the M.H.A. program should hold a bachelor's degree from an accredited college or university. No specific undergraduate major is required, but prospective applicants are strongly advised to complete introductory courses in accounting, economics, and statistics and to gain facility in using spreadsheet and presentation software. A cumulative g.p.a. of at least 3.00 is required.

M.H.A. program applicants must submit scores on the Graduate Record Exam (GRE) General Test (a combined verbal and quantitative score of 1100 or above is preferred) or the Graduate Management Admission Test (a score of 600 or above is preferred); official MCAT, VAT, LSAT, or DAT scores are accepted in place of GRE or GMAT scores. Previous work experience in health care is preferred.

Applicants to the Ph.D. program should have a bachelor’s or master’s degree. Experience in health care and a master’s degree in health administration, public health, or health planning are excellent preparation for the program. A graduate degree in social science, management, or law is acceptable, depending on the applicant’s background and study concentration. Finance, economics, and statistics course work is recommended. A cumulative g.p.a. of at least 3.25 is usually required. All Ph.D. applicants must submit GRE scores (a combined verbal and quantitative score of 1100 or above is preferred).

All applicants must submit academic transcripts, three letters of recommendation, and a statement of objectives form (contact the Department of Health Management and Policy). Applicants to the Ph.D. program also are required to submit a sample of scholarly writing.

International applicants to the M.H.A. or Ph.D. program who do not hold a baccalaureate degree
from an accredited college or university in the United States, the United Kingdom, Canada (except Quebec), Australia, or New Zealand must score at least 600 (paper-based) or at least 250 (computer-based) on the Test of English as a Foreign Language (TOEFL). International applicants who score 550-599 (paper-based) or 213-249 (computer-based) are required to take English fluency courses. Applicants who score below those ranges are not considered for admission.

Students begin the program in fall semester. Campus visits are encouraged and personal interviews are required before admission. The admissions committee conducts telephone interviews with applicants unable to interview on campus.

Financial Support

Every effort is made to provide financial support to students who demonstrate need and maintain satisfactory academic standards. Some awards are offered in recognition of outstanding scholarship and experience, regardless of need. A variety of financial assistance is available, including scholarships and awards, student loans, and research assistantships.

Research assistantships generally are awarded each academic year on the basis of student merit and the department’s need. Assistantships afford valuable experience in health services research and management projects. Research assistants work 10-20 hours per week and must apply for reappointment each year. Research assistantships provide a stipend and entitle students to resident tuition.

Opportunities also exist for part-time employment both on and off campus. For information and financial aid application forms, contact the Office of Student Financial Aid.

Alumni Association

An active alumni association supports the program in a number of ways, including scholarships, consultation on curriculum, continuing education, research, and fund development. The association also functions as a network for graduates entering the profession. Alumni serve as visiting faculty, consultants, mentors, and preceptors for summer internships, residencies, and fellowships.

Graduates maintain their Iowa connection and learn about news of their classmates, the department, and faculty members and students through the Alumni Newsletter. The department’s alumni association also publishes the Alumni Directory.

The Department of Health Management and Policy and its alumni association jointly sponsor the Annual Health Care Executive Symposium each fall. Renowned speakers from across the country present a variety of symposium topics. Health care leaders, alumni, educators, students, and friends of the department attend the symposium, which offers students a high quality educational experience in addition to the opportunity to network with faculty and alumni.

Center for Health Policy and Research

The Center for Health Policy and Research is the research arm of the Department of Health Management and Policy and a University-wide interdisciplinary research facility. Faculty members from the Tippie College of Business, the Carver College of Medicine, and the Colleges of Dentistry, Liberal Arts and Sciences, Nursing, Pharmacy, and Public Health serve as investigators in a variety of studies. Students may have the opportunity to work on ongoing research projects.

The center promotes collaboration among health organizations through frequent exchanges with professional and provider associations, policy and planning groups, insurance organizations, health delivery institutions, and other members of the health services research community. It also sponsors weekly seminars on current topics in health services and policy.

Courses

174:100 Executive Seminar Series 0 s.h.
Issues in the health care industry; talks by executives from academic health centers, health-related associations, multihospital systems, government agencies, health maintenance organizations, community hospitals, health insurance industry. Prerequisite: consent of instructor.

174:102 Introduction to the U.S. Health Care System 3 s.h.
The U.S. health care system; socioeconomic, political, and environmental forces that influence the organization, financing, and delivery of personal and public health services; health services, policy, concepts, terminology. Same as 06J:159.

174:140 Mental Health Services and Policy I 3 s.h.
Contemporary mental health services and policy; characteristics of mental health services, historical background, evolution, future prospects. Same as 096:100.

174:144 Medicare and Medicaid Policy 3 s.h.
Health policies most pertinent to Americans over age of 65. Same as 153:144.
174:170 Health Care and Health Reforms in Russia 3 s.h.
Same as 041:104, 152:170.

174:200 Introduction to Health Care Organization and Policy 3 s.h.
Organization of U.S. health care system, health policies that shape its development; historical, socioeconomic, political, environmental forces that influence the organization, financing, and delivery of personal and public health services; health services, policy concepts, and terminology, including health determinants, access to care, system integration, policy development, federalism. Same as 173:280.

174:201 Health Care Management 3 s.h.
Application of basic management principles such as leadership, goal setting, decision making, human resource management, to health care organizations. Prerequisite: consent of instructor.

174:202 Hospital Organization and Management 2-3 s.h.
Role of hospitals, governance, organizational structure, medical staff organization, departmental operations. Prerequisites: 174:200 and 174:201, or consent of instructor.

174:203 Strategic Planning and Marketing Management, Marketing. Prerequisite: 174:201.

174:204 Quantitative Management in Health Care 2-3 s.h.
Quantitative analysis techniques used by managers in health care settings to assist with planning, decision making, resource allocation. Prerequisite: consent of instructor.

174:205 Issues in Health Management and Policy 3 s.h.
Integration and application of theories, concepts, principles, case studies. Prerequisite: 174:201 and consent of instructor.

174:206 Leadership in Health Care Organizations 2-3 s.h.
Management and leadership concepts and their application in health care organizations. Prerequisite: 174:201.

174:207 Group Practice and Ambulatory Care Administration 3 s.h.
Delivery of ambulatory health care services, for-profit, and not-for-profit organizations; emphasis on payment mechanism, compensation, structures, effects of managed care, other internal issues. Prerequisites: 174:200, 174:201, and 174:202; or consent of instructor.

174:208 Health Services Information Systems 2-3 s.h.
Conceptual, practical aspects of analysis, development, and use of computer-based information systems; emphasis on application to the health sciences environment.

174:212 Health Economics I 3 s.h.
Microeconomic principles applied to health care, health insurance, information and uncertainty, models of physician and hospital behavior, theory of the firm, market structure, regulation, competitive reform, managed care. Prerequisite: consent of instructor.

174:213 Health Economics II 3 s.h.
Economic theory and its application to health behavior, markets for health care and health insurance, public policy related to health. Prerequisite: 174:212 or consent of instructor.

174:214 Financial Accounting for Health Care Organizations 3 s.h.
Introduction to financial accounting practices in health care delivery organizations.

174:215 Managerial Finance 3 s.h.
Asset valuation, capital structure, capital budgeting under uncertainty, incremental efficiency, mergers and acquisitions.

174:216 Financial Management of Health Institutions 3 s.h.
Issues in working capital management, capital financing, cost analysis and rate setting, budgeting, reimbursement, managed care contracting and health reform initiatives; emphasis on use of information from accounting, financial management systems. Prerequisite: consent of instructor.

174:217 Health Insurance and Managed Care 3 s.h.
History and theory of insurance, comparative health systems, health systems and networks, HMOs, public health insurance, care for uninsured; emphasis on public policy. Prerequisites: 046:263 or 174:212 or equivalent health economics course, and 174:200 or equivalent U.S. health care system course, or consent of instructor. Same as 152:217.

174:218 Topics in Health Administration 1-3 s.h.
Topics related to contemporary problems that concern health care students, administrators. Repeatable.

174:220 Advanced Topics in Managed Care 3 s.h.
Skill development for managed care; risk management, rate setting, contracting, equity evaluation, mergers and acquisitions, regulatory issues; for advanced students. Prerequisite: 174:216 or consent of instructor.

174:221 Evaluation and Outcomes in Health Care 2 s.h.
Qualitative and quantitative methods for evaluating health care quality, effectiveness; program evaluation, health outcomes, clinical and cost effectiveness, evaluation across health care delivery systems. Prerequisite: 174:102 or 174:200 or consent of instructor.

174:223 Seminar in Health Care Ethics 2-3 s.h.
Biomedical and organization ethics in the contemporary health care environment; ethical concepts and principles, ethical issues that confront executive, clinical, and governance leaders in context of complex health organizations. Prerequisite: consent of instructor.

174:224 Human Resources for Health Organizations 2-3 s.h.
Overview of human resource management theories and practices for health care organizations; strategic human resource management, equal employment, staffing, training and development, appraisal, compensation. Prerequisite: 174:201 or consent of instructor.

174:225 Topics in Health Care Information Systems 3 s.h.
Use of information technology in the health care system; computerized patient records, community health networks, patient confidentiality requirements, software for medical centers, current issues facing information systems executives. Prerequisite: consent of instructor.

174:226 Health Informatics I 3 s.h.
Technological tools that support health care administration, management, and decision making. Prerequisite: graduate standing or consent of instructor. Same as 06K:225, 021:275, 050:283, 051:187, 056:186, 074:191, 096:283.

174:228 Cost Effectiveness and Decision Analysis 3 s.h.
Methods of cost-effectiveness analysis and decision analysis; applications to resource allocation decisions in public health and medicine.

174:234 Administrative Internship arr.

174:235 Administrative Residency/Fellowship arr.

174:236 Administrative Practicum 3 s.h.
Experience with operational and planning matters in a health care setting. Second-year standing required. Prerequisite: g.p.a. of at least 3.00 for two consecutive semesters.

174:237 Legal Aspects of Health and Medical Care 3 s.h.
Statutory, common law frameworks applicable to health care system; court decisions that illustrate applications of general legal doctrines in hospital, health settings. Prerequisite: consent of instructor.
174:242 Federalism and Health Policy 3 s.h.
How American government's organization shapes development and implementation of health policy, programs, services.

174:243 Health Policy 1-3 s.h.
Policy process, policies and programs that shape provision of health care in the United States; health policies such as Medicare, Medicaid, Older Americans Act.

174:245 Seminar in Health Policy 3 s.h.
Contemporary health policy issues, theoretical and applied perspectives. Prerequisite: 174:242 or consent of instructor.

174:247 Nonprofit Organizational Effectiveness I 3 s.h.

174:248 Nonprofit Organizational Effectiveness II 3 s.h.
Qualities for leadership of nonprofit organizations, including relationships with staff and volunteers; relationship of nonprofits to outside world; marketing, public relations, advocacy strategies for nonprofits. Prerequisite: 061:247 or 024:247 or 174:247. Same as 061:248, 021:265, 024:248, 028:258, 032:228, 042:248, 091:322.

174:251 Planning and Market Research for Health Systems 3 s.h.
Conceptual framework, empirical base for analyzing organization and delivery of medical care; literature, policy regarding accessibility, productivity, program benefits, quality, assessment of need and supply. Prerequisites: 174:200 or equivalent, and consent of instructor.

174:252 Advanced Organizational Behavior in Health Care 3 s.h.
Key concepts of organizational behavior and their application in health organizations; theoretical writings, empirical studies. Prerequisites: knowledge of human services organizations and consent of instructor.

Case studies highlighting management as the primary integrative force in health organizations; major areas of executive action in the development of policy, organization, planning, information systems, control. Prerequisite: 174:251.

174:254 Advanced Organizational Theory in Health Care 3 s.h.
Key concepts and their application to health care organizations and health services; perspectives from theoretical writings, empirical studies. Prerequisite: consent of instructor.

174:255 Seminar in Contemporary Health Issues 0 s.h.
Review of relevant literature on methodological substantive issues in health care, presentations by researchers on health services and policy research. Prerequisite: consent of instructor.

174:259 Design Issues in Health Service Research 3 s.h.
Design and causal inference reliability and validity in measurement; rules of evidence; research design for randomized-control trials, observational studies, meta-analysis. Prerequisite: graduate standing.

174:260 Ph.D. Independent Research 1-3 s.h.
Experience in empirical research through one or more substantive research experiences, with faculty mentor; authorship or coauthorship of at least one manuscript suitable for publication in peer review journal. Prerequisite: satisfactory completion of Ph.D. preliminary exams.

174:261 Analytic Issues in Health Services Research I 3 s.h.
Analytic tools used in health services research; focus on applications in nonexperimental research settings, such as analyses using administrative claims data or preexisting public use data sets. Prerequisite: 171:162 and consent of instructor. Same as 046:261.

174:262 Analytic Issues in Health Services Research II 3 s.h.
Continuation of 174:261; advanced applications, including panel data and qualitative response models. Prerequisite: 174:261. Same as 046:262.

174:266 Advanced Case Management: An Interdisciplinary Approach 3 s.h.
Management of health care outcomes for cost, quality, advanced topics in health care coordination, interdisciplinary case management; managed care; financial, legal, ethical considerations; outcomes of case management practice. Prerequisite: 096:170 or consent of instructor. Same as 096:266.

174:268 Health Care Utilization Outcomes 3 s.h.
Research tools to assess changes in health care use and cost as outcomes of treatment; evidence-based medicine, meta analysis, decision trees, cost-of-illness analysis, cost-effectiveness models. Prerequisite: consent of instructor. Same as 173:276.

174:270 Seminar in Health Research and Instruction 1-3 s.h.
Opportunity for Ph.D. students to develop research and teaching skills through presentations, readings, workshops. Prerequisites: Ph.D. student standing and satisfactory completion of Ph.D. preliminary exams.

174:280 Independent Study and Research arr.
Supervised tutorial. Prerequisite: consent of instructor.

Research for preparation of dissertation; seminar presentation. Prerequisite: consent of instructor.
Occupational and Environmental Health

Head: Craig Zwerling  
Professors: Peter Blanck (Law/Psychology), Thomas Cook (Physical Therapy/International Programs), Kelley Donham (Nursing), Laurence Fuortes (Internal Medicine/Epidemiology/International Programs), Fredric Gerr (Internal Medicine), James Merchant (Internal Medicine/Nursing), Gene Parkin (Civil and Environmental Engineering), Corrine Peek-Asa (Epidemiology/Nursing), Larry Robertson (Radiation Oncology), Jerald Schnoor (Civil and Environmental Engineering), Nancy Sprince (Internal Medicine/Nursing), Peter Thorne (Civil and Environmental Engineering), Craig Zwerling (Internal Medicine/Epidemiology)  
Professors emeriti: Clyde Berry, William Hausler, L.W. Knapp Jr., Keith Long, Donald Morgan  
Adjunct professors: Vijay Goel, John Frederic Green, Nelson Moyer  
Clinical professor: Mary Gilchrist (Health Management and Policy)  
Associate professors: Kenneth Culp (Nursing), William Field (Epidemiology), William Heitbrink, Paul James (Family Medicine), Joel Kline (Internal Medicine), John Lee (Mechanical and Industrial Engineering), Patrick O’Shaughnessy (Civil and Environmental Engineering), Wayne Sanderson (Epidemiology), Thomas Schnell (Mechanical and Industrial Engineering), David Wilder (Biomedical Engineering)  
Associate professor emeritus: Franklin Kilpatrick  
Adjunct associate professors: Burton Kross, James McComb, Kenneth McMains, Michael Rossmann  
Clinical associate professors: Craig Bainbridge, Henri Cuddith (Internal Medicine), Monty Menhuesen (Anesthesiology), David Osterberg (Geography)  
Assistant professors: Daniel Anton (Physical Therapy), Gabriele Ludewig, Thomas Peters  
Adjunct assistant professors: Chandran Achutan, Gregory Couer, Christine Deighan, Gregory Flamee, Dian Gottlob, Daniel Hoib, Martin Jones, Kevin Kelley, Frank LaMarte, Hans-Joachim Lehmler, Murray Madsen, Shannon Marquez, John Rosecrance, Donald Simmons, Laurie Taylor, Roberta Till-Retz, John Vargo, Peter Weyer, Michael Wichman, Catherine Zeman  
Clinical assistant professor: Risto Rautiainen  
Graduate degrees: M.P.H., M.S., Ph.D. in Occupational and Environmental Health  
Web site: http://www.public-health.uiowa.edu/oeh

The Department of Occupational and Environmental Health focuses on assessment of risk factors in the physical environment and their relationship to disease—particularly health problems of agricultural and industrial workers. Students are guided by faculty members whose research interests include rural health care delivery, agricultural health, environmental health, occupational medicine, occupational lung disease, mammalian toxicology, inhalation toxicology, ergonomics, indoor air quality, occupational injury, injury epidemiology, injury prevention programs, aerosol physics, air and water quality, environmental chemistry, analytical toxicology, and environmental health in developing countries.

Graduate Programs

The department offers three graduate degrees: Master of Public Health; and Master of Science and Doctor of Philosophy in occupational and environmental health. All degrees include an optional emphasis in industrial hygiene and ergonomics. The department also offers a joint M.S./M.A. with the Graduate College’s Urban and Regional Planning Program.

Individuals who are not enrolled in one of the department’s degree programs but wish to take departmental courses may apply for professional improvement status. The department also offers an occupational medicine residency training program.

Master of Public Health

See Master of Public Health (M.P.H.) in the Catalog.

Master of Science

The M.S. requires 38 s.h. All master’s degree students are required to complete a thesis.

REQUIRED COURSES

All of these:  
171:161 Introduction to Biostatistics 3 s.h.  
173:140 Epidemiology I: Principles 3 s.h.  
175:180 Occupational and Environmental Health Seminar (taken three times, twice for 0 s.h. and once for 1 s.h.) 1 s.h.  
175:197 Environmental Health 3 s.h.  
175:230 Occupational Health 3 s.h.  
175:260 Environmental Toxicology 3 s.h.  
One of these:  
069:133 Introduction to Human Pathology 4 s.h.
Joint M.S./M.A. Degree

The Department of Occupational and Environmental Health and the Urban and Regional Planning Program offer a joint master's degree program. Students who choose this option earn an M.S. in occupational and environmental health and an M.A. in planning. Separate admission to each program is required. The combined degree requires a minimum of 65 s.h. of course work.

Doctor of Philosophy

The Ph.D. program prepares students for professional and academic careers in environmental and occupational health.

The Ph.D. requires 72 s.h. All doctoral students must complete a dissertation—a substantial scholarly treatise. Ph.D. requirements are as follows.

REQUIRED COURSES

All of these:

- 171:161 Introduction to Biostatistics 3 s.h.
- 171:162 Design and Analysis of Biomedical Studies 3 s.h.
- 173:140 Epidemiology I: Principles 3 s.h.
- 175:180 Occupational and Environmental Health Seminar (taken three times, twice for 0 s.h. and once for 1 s.h.) 1 s.h.
- 175:197 Environmental Health 3 s.h.
- 175:230 Occupational Health 3 s.h.
- 175:231 Industrial Hygiene I: Recognition 3 s.h.
- 175:232 Industrial Hygiene II: Evaluation 4 s.h.
- 175:233 Industrial Hygiene III: Control 3 s.h.
- 175:260 Environmental Toxicology 3 s.h.

One of these:

- 069:133 Introduction to Human Pathology 4 s.h.
- 096:114 Human Pathophysiology: Organ Systems 3 s.h.
- 096:115 Human Pathophysiology: Cellular/Neurology/Immunology 3 s.h.

ELECTIVES

Students must earn a minimum of 24 s.h. in non-research-related courses, including classroom courses or equivalent web-based courses. Students work with their advisers to select courses appropriate for their professional goals.

RESEARCH CREDIT

Students earn the remaining credit for the Ph.D. by completing any combination of the following courses or other classroom courses.
Industrial Hygiene Emphasis

The Ph.D. with industrial hygiene emphasis provides doctoral students with specialized knowledge in industrial hygiene in addition to their expertise in the broad field of occupational and environmental health.

The following courses are required.

**REQUIRED COURSES**

171:161 Introduction to Biostatistics 3 s.h.
173:140 Epidemiology I: Principles 3 s.h.
175:180 Occupational and Environmental Health Seminar (taken three times, twice for 0 s.h. and once for 1 s.h.) 1 s.h.
175:190 Occupational Ergonomics I 3 s.h.
175:192 Occupational Safety 3 s.h.
175:197 Environmental Health 3 s.h.
175:209 Rural Health and Agricultural Medicine 3 s.h.
175:230 Occupational Health 3 s.h.
175:231 Industrial Hygiene I: Recognition 3 s.h.
175:232 Industrial Hygiene II: Evaluation 4 s.h.
175:233 Industrial Hygiene III: Control 3 s.h.
175:252 Environmental Health Policy 3 s.h.
175:260 Environmental Toxicology 3 s.h.

Two courses from the specialty areas of advanced biostatistics and specialized epidemiology

**DISSERTATION**

Students may earn up to 12 s.h. for the doctoral thesis.

**Admission**

For detailed information about Graduate College policies, including application requirements and procedures, see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

The occupational and environmental health faculty takes several factors into consideration when evaluating applications for admission, including Graduate Record Exam (GRE) General Test scores, grade-point averages, letters of recommendation, intent and motivation for graduate study, and research interests. A student with deficiencies in one area may be admitted if all other components of his or her application are very strong.

All M.P.H., M.A., and Ph.D. program applicants must hold a baccalaureate degree and have a cumulative g.p.a. of at least 3.00 (M.P.H. and M.A. applicants) or at least 3.25 (Ph.D. applicants). All applicants must have taken the GRE General Test. A minimum GRE score of 1050 (verbal plus quantitative) is recommended for master's applicants, 1100 for doctoral applicants.

International applicants who do not hold a baccalaureate degree from an accredited college or university in the United States, the United Kingdom, Canada (except Quebec), Australia, or New Zealand must score at least 600 (paper-based) or at least 250 (computer-based) on the Test of English as a Foreign Language (TOEFL). International applicants who score 550-599 (paper-based) or 213-249 (computer-based) are required to take English fluency courses. Applicants who score below those ranges are not considered for admission.

Undergraduate preparation for M.P.H. and M.A. applicants must include course work in mathematics, biological sciences, chemistry, and either physical sciences or engineering, depending on the applicant's chosen specialty area.

M.S. applicants who intend to pursue the industrial hygiene subtrack also must have taken physics and mathematics through calculus; course work in biological sciences, microbiology, and computer programming is highly recommended.

Completion of the M.S. program before beginning Ph.D. study is recommended. Undergraduate preparation for doctoral applicants must include at least two semesters of chemistry, one semester of physics, and one semester of calculus. Course work in biological sciences, microbiology, and computer programming are highly recommended, particularly for students interested in some specialized areas.

**APPLICATION DEADLINES**

Fall entrance: July 1 for U.S. citizens and permanent residents, April 1 for international applicants

Spring entrance: December 1 for U.S. citizens and permanent residents, October 1 for international applicants
Financial Support
Several graduate student awards, including tuition and stipend support, are available for individuals interested in industrial hygiene, agricultural safety and health, ergonomics, or occupational injury prevention. Both stipend and tuition support are available for all occupational medicine residents. Full-time graduate students in good academic standing (those not admitted on conditional status) are eligible for a stipend and tuition support. All other students are eligible for tuition support only; requests are considered case-by-case. All recipients must be U.S. citizens or permanent residents.

Postdoctoral Positions
The Environmental Health Sciences Training Program at the University of Iowa College of Public Health offers postdoctoral positions in environmental health/toxicology. Appointments are made for two years with the possibility of an additional year. Applicants must be U.S. citizens or permanent residents.

Occupational Medicine Residency
In cooperation with University of Iowa Hospitals and Clinics, the department offers residency training in occupational medicine for physicians seeking specialty training in occupational medicine. For information contact the director of the Occupational Medicine Residency Program.

The Heartland Center
The Heartland Center for Occupational Health and Safety provides training, education, and outreach as a center of excellence for federal region VII (Kansas, Missouri, Nebraska, and Iowa). It is one of 16 education and research centers funded by the National Institute of Occupational Safety and Health (NIOSH) and the first to serve the region. Its program areas are occupational health nursing, industrial hygiene, occupational medicine, ergonomics, agricultural safety and health, occupational injury prevention research, and continuing education/outreach.

Facilities
The Department of Occupational and Environmental Health is housed on the University’s Oackdale Research Campus in the Institute for Rural and Environmental Health. College of Public Health-based laboratory facilities give researchers and students access to cutting-edge technologies for the study of occupational and environmental health.

The Inhalation Toxicology Facility (ITF), provides a full array of inhalation toxicology, aerosol science, and bioaerosol assay services. A primary focus of the ITF is the study of toxicants found in the agricultural environment and related exposure situations. The facility is particularly well-equipped for studying organic dusts and bioaerosols.

The Occupational Hygiene Laboratory (OHL) provides expertise and equipment for exposure assessment in occupational settings. The OHL provides a range of sample collection capabilities and an extensive inventory of sampling equipment. The field and laboratory services available through the laboratory support exposure-response studies and control technology development studies in a variety of occupational arenas, including agriculture, construction, and indoor environments (home and office).

A computer laboratory is available for student use, and a library collection is located in the Institute for Rural and Environmental Health.

Courses
175:101 Health, Work, and the Environment 3 s.h. Current topics in occupational and environmental health; how the United States protects workers, protects people from environmental agents, and reduces environmental harm. Same as 044:174.

175:111 International Health arr. Urgent health problems in the developing world and among disadvantaged populations in developed countries; biological, social, cultural, political aspects of international health problems; applications of research methods from epidemiology, environmental health, social sciences. Offered fall semesters. Same as 152:111, 173:111.

175:136 Applied Anthropology 3 s.h. Practical health, environmental, and social problems viewed through an anthropological framework; how anthropological approaches are used to recognize, understand, and address applied problems; studies. Offered spring semesters. Same as 113:136.

175:170 Injury Prevention and Control 3 s.h. Theory, research, and practice of injury control; unintentional and intentional injuries; local, national, international injury issues. Same as 173:170.
175:171 Problems in Occupational and Environmental Health 3 s.h.
Didactic material in occupational and environmental health; may include tutorial, seminar, faculty-directed independent work (e.g., literature search, project, short research project).

175:172 Independent Study in Occupational and Environmental Health 3 s.h.
In-depth pursuit of an area in occupational and environmental health requiring substantial creativity and independence.

175:175 Research Methods in Disaster Studies 3 s.h.
Epidemiologic study of disasters and their health consequences; research to identify and reduce health effects, research in context of response and preparedness. Same as 173:175.

175:180 Occupational and Environmental Health Seminar 0-1 s.h.
Contemporary topics in occupational health, agricultural and comparative medicine, environmental health.

175:185 Occupational Health Research Seminar 2 s.h.
Tools necessary for making critical assessment of published scientific research reports from a methodological perspective; examples from recently published research studies in occupational and environmental health. Corequisites: 171:161 and 173:140.

175:190 Occupational Ergonomics I 2-3 s.h.
Principles of ergonomics, with focus on physical capabilities of workers and their interactions with their work environment; physiological basis of work, patterns of work, occupational risk factors for musculoskeletal and neuromuscular disorders, workplace and equipment design, integration of ergonomics in manufacturing processes.

175:192 Occupational Safety 3 s.h.
Principles and practices of occupational safety; applications in industrial and other occupational settings; interactions with other disciplines. Offered fall semester.

175:193 Environmental Health Law 3 s.h.
Legal foundation of environmental health protection; federal, state, local regulation; police powers; tort liability; investigations and inspections, air and water pollution, biotechnology. Prerequisite: 175:197 or consent of instructor.

175:195 Global Environmental Health 2 s.h.
Current problems, including transboundary movement of pollutants, vectors of infectious agents, global warming and climatic change. Prerequisite: 175:111 or 175:197 or consent of instructor.

175:196 Agricultural Safety: Theories and Practice 2 s.h.
General theories and practice of injury prevention from varied fields, including industrial safety, engineering, regulation, education, epidemiology, social psychology; strategic application in agriculture.

175:197 Environmental Health 3 s.h.
Survey of the field; assessment of contemporary human health issues associated with biological, chemical, physical factors of environment; critical review of environmental factors that affect health; public policies governing recognition, intervention, control. Offered fall semester.

175:198 Solid and Hazardous Wastes 3 s.h.
Sources, characterizations, collection and disposal of solid and hazardous wastes; environmental impacts of hazardous waste management, resource recovery systems. Offered spring semester. Prerequisite: 175:197 or consent of instructor. Same as 053:158.

175:199 Principles of Risk Assessment 3 s.h.
Research that may lead to a dissertation. Repeatable.

175:201 Research in Occupational and Environmental Health 0-9 s.h.
Work experience using knowledge and skills acquired in the classroom; arranged in conjunction with departmental or collegiate activities or with governmental agencies or private industry. Repeatable.

175:203 Preceptorship in Occupational and Environmental Health 0-9 s.h.
Clinical orientation of specific health problems of rural residents, agricultural workers; rural health care delivery, socioeconomic issues in agriculture and their effects on health and safety of the agricultural population; occupational health problems, environmental health hazards in rural areas. Offered spring semester. Prerequisite: 173:140 or medicine enrollment or consent of instructor.

175:210 Current Topics in Agricultural Health 1 s.h.
Issues that affect the health of agricultural populations, such as agro-terrorism, antibiotic resistance, genetically modified organisms; current scientific literature.

175:220 Environmental and Occupational Epidemiology 3 s.h.
Environmental and occupational epidemiologic study designs; basic and novel methods of exposure assessment; methodologies to improve study validity. Prerequisite: 173:140. Corequisites: 171:161 and 175:197.

175:221 Aerosol Technology 3 s.h.
Particle statistics and physics of aerosols, including inertia, diffusion, nucleation, evaporation, condensation, optics, electrical properties; relationship to fields such as agriculture, nanotechnology, environmental and occupational health, atmospheric chemistry, drug delivery.

175:230 Occupational Health 3 s.h.
Principles, practice of occupational medicine, fundamentals of industrial hygiene and safety, occupational health management, ergonomics, occupational health nursing. Offered fall semester.

175:231 Industrial Hygiene I: Recognition 3 s.h.
Principles with emphasis on recognition of chemical health hazards, physical health hazards at work. Offered fall semester. Pre- or corequisite: 175:230.

175:232 Industrial Hygiene II: Evaluation 4 s.h.
Theory, methods of air sampling for evaluation of occupational, environmental exposures to chemical, physical, biological agents. Offered spring semester. Prerequisite: 175:230.

175:233 Industrial Hygiene III: Control 3 s.h.
Concepts from physical sciences applied to control of individual hygiene hazards; focus on engineering ventilation controls, nonventilation controls, program management issues and skills. Offered spring semester. Prerequisite: 175:230 or 175:231 or consent of instructor.

175:251 Injury Epidemiology 3 s.h.
How epidemiology can be applied to injury prevention and control; specific methodological problems involved in the epidemiology of injuries; methodology literature, critical evaluation of research articles. Offered spring semesters of odd years. Prerequisite: 173:140 or consent of instructor. Same as 173:251.

175:252 Environmental Health Policy 3 s.h.
Major concerns in environment and human health, legislation enacted to deal with these concerns; emphasis on contemporary issues. Offered fall semesters of odd years. Prerequisite: 175:197 or consent of instructor. Same as 053:204, 152:252.

175:253 Epidemiology of Occupational Injuries 3 s.h.
Epidemiological literature on occupational injuries. Offered spring semesters of even years. Prerequisite: 173:140 or consent of instructor. Same as 173:253.

Public Health Genetics

Head: Veronica Vieland
Professors: Trudy Burns, Deborah Dawson (Preventive and Community Dentistry), Jian Huang, Michael Jones (Biostatistics), Alberto Segre (Computer Science), Veronica Vieland
Associate professor: Kai Wang
Assistant professors: Andrew George, Mark Logue
Adjunct assistant professor: Jeffrey O’Connell
Graduate degree: Ph.D. in Statistical Genetics
Graduate nondegree program: Certificate in Statistical Genetics
Web site: http://www.public-health.uiowa.edu/pphg

The Program in Public Health Genetics focuses on statistical genetics with applications to medical research, especially mapping and understanding genes related to common, complex human diseases. It also focuses on public health implications of genetics and genetics research.

Graduate Programs
The program offers a Ph.D. degree and a graduate certificate, both in statistical genetics.

Doctor of Philosophy
The Ph.D. in statistical genetics prepares students for professional and academic careers in statistical genetics. It provides training in the development and evaluation of new statistical methods for analyzing human genetic data, and the application of those methods to discovering and understanding the genes underlying human disease. The program also prepares students to contribute to collaborative clinical research by providing them with training in genetics and with opportunities to participate in research involving collaboration with molecular and clinical geneticists and genetic epidemiologists.

The Ph.D. requires a minimum of 82 s.h. of course work. Students complete a 42 s.h. core; 9-12 s.h. in a concentration area outside statistical genetics (biostatistics/statistics, computer science/bioinformatics, biology/bioinformatics, or epidemiology/biostatistics); up to 25 s.h. of elective course work chosen in consultation with the student’s adviser; and at least 6 s.h. of dissertation credit. They also must successfully complete a comprehensive examination and a dissertation—a substantial scholarly treatise for which they must earn at least 6 s.h. The dissertation research topic and content must be approved by the student’s dissertation committee.

Ph.D. requirements are as follows.

REQUIRED CORE
All Ph.D. students must complete the following courses (42 s.h.).

<table>
<thead>

<tr>
<td>127:191 Human Molecular Genetics</td>
<td>3 s.h.</td>
</tr>
</tbody>
</table>
Computer Science/Bioinformatics
All of these:
002:170 Bioinformatics 3 s.h.
06K:272 Advanced Database Analysis 3 s.h.
06K:275 Knowledge Discovery 3 s.h.

Epidemiology/Biostatistics
Both of these:
173:140 Epidemiology I: Principles 3 s.h.
171:241 Applied Categorical Data Analysis 3 s.h.
One of these:
173:255 Epidemiology of Infectious Diseases 3 s.h.
173:265 Cardiovascular Disease Epidemiology 3 s.h.
173:267 Psychiatric Epidemiology 3 s.h.
173:270 Cancer Epidemiology and Control 3 s.h.

ELECTIVES
Students select up to 25 s.h. of elective courses from this list. They also may substitute other courses with written approval of the program’s director and their advisers.
22S:138 Bayesian Statistics 3 s.h.
22S:161 Applied Multivariate Analysis 3 s.h.
22S:255 Linear Models 4 s.h.
22S:256 Multivariate Analysis 3 s.h.
171:201 Survival Data Analysis 3 s.h.
171:202 Analysis of Categorical Data 3 s.h.
171:204 Longitudinal Data Analysis 3 s.h.
185:101 Introduction to Genetics and Public Health 3 s.h.
185:103 Statistics in Bioinformatics 3 s.h.
185:281 Independent Study in Statistical Genetics arr.
185:282 Special Topics in Statistical Genetics arr.

DISSERTATION
Students must earn at least 6 s.h. for the dissertation and must be in residence a minimum of two years.
185:300 Dissertation in Statistical Genetics 6 s.h.

Certificate
The Certificate in Statistical Genetics prepares students for careers as data analysts on research projects involving human genetic data. The certificate is designed to complement an M.S. in biostatistics or a related field, such as statistics. It can be completed either in conjunction with or after completing an M.S. The certificate cannot be awarded before completion of an M.S. The certificate requires the following course work (16 s.h.) with a g.p.a. of at least 3.00.
070:110 Medical Genetics 2 s.h.
185:102 Introduction to Genetic Data Analysis 3 s.h.
185:270 Genetics and Epidemiology 4 s.h.
185:276 Statistical Genetics Laboratory 3 s.h.
* 185:280 Preceptorship in Statistical Genetics 3 s.h.
185:285 Clinical Genetics Practicum 1 s.h.
* The preceptorship in statistical genetics must be approved by the head of the Program in Public Health Genetics.

Admission
For detailed information about Graduate College policies, including application requirements and procedures, see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

Applicants to the Ph.D. program in statistical genetics must hold a B.S. or B.A. and have a g.p.a. of at least 3.00. Undergraduate training should include two semesters of calculus and a course in linear algebra. Additional training in statistics, computer science, and the biological sciences is recommended but not required.

Applicants must submit academic transcripts, at least three letters of recommendation, a curriculum vita, and a statement of purpose for Ph.D. study in statistical genetics. They also must submit scores on the Graduate Record Exam (GRE) General Test. A combined verbal and quantitative score of 1050 or higher is preferred.

International applicants who do not hold a baccalaureate degree from an accredited college or university in the United States, the United Kingdom, Canada (except Quebec), Australia, or New Zealand must score at least 600 (paper-based) or at least 250 (computer-based) on the Test of English as a Foreign Language (TOEFL). International applicants who score 550-559 (paper-based) or 213-249 (computer-based) are required to take English fluency courses. Applicants who score below these ranges are not considered for admission.

Applicants who do not meet all admission criteria may be admitted on conditional status. They must achieve regular student status within two semesters by satisfying conditions stated by the
Program in Public Health Genetics (e.g., taking remedial courses or maintaining a specified grade-point average).

**APPLICATION DEADLINE**

Fall semester: July 15 for U.S. citizens; April 15 for international applicants

Students are admitted for fall. Availability of financial aid decreases after the April 15 application deadline.

For more information about admission, contact the graduate program coordinator for the Program in Public Health Genetics.

**Financial Support**

The program offers research assistantships, which provide financial support, resident tuition, and valuable research training. Consideration for research assistantships is part of the application process. Opportunities also exist for funded postdoctoral fellowships. For information about research assistantships and postdoctoral fellowships, contact the graduate program coordinator for the Program in Public Health Genetics.

**Resources**

The Center for Statistical Genetics Research supports research on complex human inherited disease through basic methodological work in statistical genetics and promotion of interdisciplinary, collaborative, clinical-genetic research. The center provides opportunities for graduate students and postdoctoral fellows to be involved in research throughout their training.

**Courses**

185:101 Introduction to Genetics and Public Health 3 s.h.
Interface between current research in genetics and public health practice; genetic concepts; screening, diagnosis, treatment of diseases. Offered spring semesters. Prerequisite: basic understanding of biostatistics and probability.

185:102 Introduction to Genetic Data Analysis 3 s.h.
Analysis of genetic data using current statistical techniques; focus on applied aspects of genetic analysis. Offered fall semesters. Corequisite: 22S:153.

185:103 Statistics in Bioinformatics 3 s.h.
Basic statistical principles and techniques used in bioinformatics, including analysis of microarray gene expression data. Offered spring semesters. Prerequisite: 22S:101 or 171:161 or consent of instructor. Same as 22C:104.

185:104 Introduction to Informatics 3 s.h.
Computing principles and fundamental aspects of computer science; history of computing, basic computer architecture and operating system concepts, fundamentals of relational databases, algorithmic idioms, computational complexity, introductory programming concepts in Perl. Offered fall semesters. Prerequisite: closed to computer science students. Same as 22C:104.

185:270 Genetics and Epidemiology 4 s.h.
Review of basic human genetic and population genetics principles; methods of integrating genetic principles into epidemiological studies; analytical methods for family data. Offered spring semesters. Prerequisites: 171:161 and 173:140, or consent of instructor. Same as 173:225.

185:272 Population and Quantitative Genetics 3 s.h.
Fundamentals of population genetics; statistical modeling for quantitative genetic traits, including regression and components-of-variance methods; parametric and nonparametric likelihood theory in genetic modeling. Offered fall semesters of odd years. Prerequisites: 22S:153, 22S:154, and 185:270.

185:274 Theory of Statistical Genetics 3 s.h.
Theoretical development underlying core statistical genetics methods; focus on use of likelihood-based methods in segregation and linkage analysis in human genetics. Offered spring semesters. Prerequisites: 22S:153, 22S:154, and 185:102; or consent of instructor.

185:276 Statistical Genetics Laboratory 3 s.h.
In-depth discussion of data analytic problems that arise in genetic investigations of complex disorders in humans; hands-on experience in genetic data analysis; class projects. Repeatable. Offered fall and spring semesters. Prerequisite: 185:102.

185:278 Computing Algorithms in Statistical Genetics 3 s.h.
Computational methods in statistical genetics, including methods of multipoint linkage analysis, algorithms for pedigree calculations, Monte Carlo simulation techniques. Offered fall semesters of even years. Prerequisite: 185:274.

185:280 Preceptorship in Statistical Genetics 3 s.h.
Individual work experience using statistical genetics knowledge and skill acquired in classroom. Prerequisite: consent of instructor.

185:281 Independent Study in Statistical Genetics 3 s.h.
In-depth pursuit of an area of special interest in statistical genetics requiring substantial creativity and independence. Prerequisite: consent of instructor.

185:282 Special Topics in Statistical Genetics 3 s.h.
Didactic material in statistical genetics that may include tutorial, seminar, or faculty-directed independent work. Prerequisite: consent of instructor.

185:285 Clinical Genetics Practicum 1 s.h.
Clinical case conferences, participation in clinical genetics journal club. Prerequisites: 650:270 and statistical genetics Ph.D. student standing. Corequisite: 070:110.

185:290 Statistical Genetics Seminar 1 s.h.
Research that may lead to a dissertation. Prerequisite: consent of instructor.

185:300 Dissertation in Statistical Genetics 3 s.h.
Work on Ph.D. dissertation with dissertation adviser. Prerequisite: consent of adviser.

University College is home to a wide range of programs for University of Iowa students and precollege students. It includes major college-level programs such as the University Honors Program, Study Abroad, and study at Iowa Lakeside Laboratory. Some of its college-level programs are designed to smooth entering students’ transition to college life, such as the Undergraduate Initiatives program, or to provide opportunities for populations underrepresented in the sciences and engineering, such as Iowa Biosciences Advantage and Alliance Graduate Education Professoriate.

Special courses for student orientation advisers, residence hall assistants, Greek community leaders, and students who design web sites for University departments and offices are offered through University College, as are Lifetime Leisure Skills courses in a broad range of sport and fitness activities.

Each year the college’s International Writing Program draws writers and poets from around the world for several months of residency activities at the University, including teaching, attending classes, and presenting readings in Iowa City and other Iowa communities.

The University’s Reserve Officer Training Corps Programs, Aerospace Military Studies (Air Force ROTC) and Military Science (Army ROTC), reside in University College.

Several precollege programs also are under University College’s wing: the Belin-Blank Center for Gifted Education, the Iowa Young Writers’ Studio, Opportunity at Iowa, and the Upward Bound Project.

Courses offered through University College programs are taught by University of Iowa faculty and staff members.

Dean: Lola Lopes (Management and Organizations/ Psychology)
The Aerospace Military Studies Program administers the Air Force Reserve Officer Training Corps (AFROTC) at The University of Iowa. AFROTC educates highly qualified students who are working toward a degree and a commission as an officer in the United States Air Force.

AFROTC is voluntary, with courses open to all undergraduate and graduate students. The amount of AFROTC academic credit that may be applied toward a degree varies from college to college at the University. The College of Liberal Arts and Sciences, for example, accepts a maximum of 20 s.h.

In order to receive a commission, AFROTC cadets must complete all University requirements for a degree as well as courses specified by the U.S. Air Force.

AFROTC offers one-, two-, three-, and four-year programs. Joining the program early gives students the opportunity to try AFROTC without obligation. It also can give them an advantage in the scholarship selection process.

The AFROTC program’s three main components are the general military course, the professional officer course, and field training.

**General Military Course**

The general military course (GMC) consists of a 1 s.h. course and a leadership laboratory taken each semester of two years. Any student who meets AFROTC qualifications and is in good academic standing with the University is eligible to participate in the GMC. Students may apply for the GMC up to the time they earn 60 s.h.

**Professional Officer Course**

The professional officer course (POC) consists of four 3 s.h. AFROTC courses. Students accepted into the POC make a commitment to serve a minimum of four years as U.S. Air Force officers. To enter the POC, students must be selected to attend and must successfully complete field training. Students generally take the POC during their last 60 s.h.

**Field Training**

All POC applicants must successfully complete field training at a U.S. Air Force base during a summer, usually between the second and third years. There are two types of field training: a four-week course for cadets who have completed all GMC requirements and a six-week course for all other applicants.

Field training consists of aircraft, aircrew, career, and survival orientation; junior officer training; physical training; small arms training; human relations education; and equal opportunity training. The six-week field training provides 60 hours of academic work that a student normally would have taken in the GMC.

Students receive authorized pay and allowances when they attend field training.

**Special Activities**

The Cadet Corps sponsors many social events, including informal parties, formal dinners, and a military ball. The advanced training program is a voluntary program in which selected cadets may go on active duty for two or three weeks during the summer following their third year. Cadets get hands-on experience and receive authorized pay and allowances. Selected AFROTC cadets may attend airborne training and upon completion wear the Army parachute jump wings.

**Financial Aid**

Scholarships are available, based on merit, for one, two, and three years of study. They provide full tuition, a stipend for books, laboratory fees, and $250-400 per month, tax-free. Applicants are selected on both objective and subjective factors. Students should apply directly to the head of aerospace studies.

All cadets in the last two years of AFROTC are eligible for some financial assistance. They receive $350-400 per month, tax-free. Uniforms are furnished as well as all books for AFROTC classes.
**Education Delay**

Cadets may request an education delay to postpone entry to active duty until after completion of an advanced degree or professional training program.

Alliance Graduate Education Professoriate

Director: Philip Kutzko (Mathematics)
Web site: http://www.agep.iastate.edu/
iowasummer.asp

The Iowa Alliance Graduate Education Professoriate (AGEP) summer research program prepares students to pursue graduate education in engineering and in the mathematical, physical, and life sciences. The eight-week program offers early experience with research by matching students with University of Iowa faculty mentors in the students’ interest areas. It also provides an opportunity to experience the life of a graduate student at a large university.

Students are required to participate in weekly seminars and in social, cultural, and educational activities. They also tour facilities both on and off campus. A final report/project is required. The program ends with a research symposium at which students make oral and poster presentations of their research.

Students accepted to the AGEP program receive a $2,500 stipend, on-campus room and board, and round-trip airfare to Iowa.

Applicants must be U.S. citizens or permanent residents, and members of an underrepresented minority (African American, Hispanic, or American Indian). They must be undergraduate students pursuing a degree in science, technology, engineering, or mathematics. To enter the program, applicants must have completed their sophomore year in college and have a cumulative g.p.a. of at least 3.00. Graduating seniors are not eligible.

The University of Iowa Marvin A. and Rose Lee Pomerantz Career Center administers the University's Career Center Programs. The center helps students explore and plan careers, search for employment and internship opportunities, and prepare for job interviews. Students may register with the Pomerantz Career Center at any time during their academic careers, but the center encourages entering first-year and transfer students to register soon after they arrive on campus and to make use of all of the center's services throughout their study at Iowa.

The center offers workshops throughout the year on a variety of topics, including résumé writing, job search techniques, employer research, and interviewing skills. It hosts a career fair each fall and a job and internship fair each spring. Both offer students the opportunity to talk with prospective employers.

The Pearson Library contains career-related books, periodicals, and videotapes—some broad in scope, others targeted to specific careers or jobs. Corporate annual reports and employer recruiting brochures join information on salaries, geographical cost of living, resources for jobs and internships, graduate schools, and other topics.

The Pomerantz Career Center facilitates job interviewing with a wide range of employers—local, national, and international; profit and nonprofit; state and federal government. Employers conduct on-campus job interviews at specific times during the year, and many post immediate openings year-round. On-campus recruiting and job postings are available via the World Wide Web.

The center also helps students find internships in Iowa, the Midwest, nationwide, and sometimes in other countries. For a list of discipline-related internships (all require course registration), see “Courses”/“Internships” below.

For more information about the center's services and facilities, contact the Pomerantz Career Center.

Intercollegiate Athletic Participation

Students who are members of University of Iowa intercollegiate athletics teams and are certified to participate in their sport may register for 408:021. The course offers specific sections for the intercollegiate sports; students register for the appropriate section. Registration requires approval from the director of athletic student services. Qualified students may take the course two times. Members of University of Iowa sport clubs are not eligible to enroll in 408:021.

Courses

408:021 Intercollegiate Athletic Participation 1 s.h.
International Writing Program

Director: Christopher Merrill
Web site: http://www.uiowa.edu/~iwp

The International Writing Program is a unique residency program for established writers from other countries. IWP participants range from emerging talents to writers who are among their countries’ leading literary figures and writers of world stature.

Each fall the International Writing Program assembles a community of poets, fiction writers, essayists, playwrights, and journalists. For most of them, the IWP is their first, or their first extended, stay in the United States. At the University they live and interact with each other while working on writing and translation projects, and they participate in 181:191 International Literature Today throughout their residency. They also interact with the public through a series of readings, panel discussions, and other presentations.

Since 1967, nearly a thousand writers from 115 countries have participated in the program.

International Writing Program writers are supported by the U.S. Department of State, through bilateral agreements with many countries, by grants from cultural institutions and governments abroad, and by private funds. The program does not provide grants for writers.

For more information, contact the International Writing Program or visit the program’s web site.

Courses

Directed readings in contemporary world literature.

181:152 America in Other Words 1-3 s.h.
Current idea of America in its imaginary form: post-1989 world fiction, poetry, and film in original language, in translation, and via online translation resources.

181:191 International Literature Today 1, 3 s.h.
Same as 008:191.

181:260 Translation Workshop 1-3 s.h.
Same as 08W:260, 048:260.
Iowa Biosciences Advantage

Director: Sarah K. England (Physiology and Biophysics)
Web site: http://www.uiowa.edu/iba/

The Iowa Biosciences Advantage (IBA) is a highly competitive undergraduate research and academic enrichment program funded by the National Institutes of Health. The program’s aim is to increase diversity in the biomedical sciences.

The Iowa Biosciences Advantage provides undergraduate students with opportunities to work in research laboratories with faculty mentors during the course of their undergraduate careers. The program’s faculty represents a broad range of disciplines in the basic and biomedical sciences. IBA students also benefit from specialized course work, career workshops, and academic advising for biomedical and bioscience careers.

Students selected for IBA must maintain good standing in academics and research. Good academic standing requires a g.p.a. of at least 3.00 and is evaluated at the end of each semester. Good research standing is determined by the student’s research mentor.

Students work with their mentors throughout the academic year and summer. They may present their research in August at the Annual IBA Scholar Research Symposium.

STUDENTS ACCEPTED FROM HIGH SCHOOL

Students admitted to IBA from high school spend their first year at The University of Iowa establishing good academic standing and conducting laboratory rotations.

During fall semester, IBA students enroll in a special section of 407:001 The College Transition (2 s.h., graded satisfactory/fail), which covers topics such as defining college culture, discovering University resources, refining study skills, taking tests, and setting goals. They also take 010:005 Rhetoric of Scientific Inquiry (4 s.h.), which satisfies the University rhetoric requirement for students who qualify for placement in 010:003 Accelerated Rhetoric. The course introduces students to communication skills required for study in the sciences.

During spring semester, IBA students enroll in two courses. They take 168:041 IBA Student Development Seminar (1 s.h.), an extension of subject matter introduced in The College Transition. They also take a special section of 168:047 IBA Research in Biomedical Science (0 s.h.) and complete two research rotations. The rotations, which are set up by IBA staff, introduce students to laboratory research at the University.

At the end of the first year, each student is evaluated for admission to the IBA Scholar Program. Students selected as IBA scholars remain on campus for the eight-week summer session. They earn wages for laboratory work with their research mentors, live in the IBA Summer Learning Community, and participate in IBA events.

STUDENTS ACCEPTED FROM COLLEGE

Applications also are accepted from current University of Iowa undergraduates majoring in the sciences as well as students transferring to Iowa as sophomores or juniors. Students accepted to IBA during their first, second, or third year of college join the appropriate class of IBA scholars. During their first semester of participation, new undergraduates complete several lab rotations and establish good academic standing. They also enroll in the IBA Student Development Seminar (168:041). Once students are matched with a research mentor, they earn wages for their laboratory work during summer and the academic year.

Admission

Students apply to the Iowa Biosciences Advantage during their senior year of high school or once they are undergraduate students.

Applicants must:
- have a strong interest in scientific research;
- demonstrate interest in diversity;
- have a qualifying academic major;
- be in good academic standing (grade-point average of at least 3.00); submit an IBA application, including short essays and a release for IBA to obtain the applicant’s transcripts; and
- submit one letter of recommendation from a science or math instructor.
Admission requires an interview. Admission decisions are made throughout the year.

Faculty

Faculty members from the University's broad range of basic and biomedical science disciplines serve as teachers and mentors to IBA students. They represent many departments, including anatomy and cell biology, biochemistry, biological sciences, biomedical engineering, chemistry, exercise science, microbiology, neuroscience, pharmacy, physiology and biophysics, and psychology.

Courses

168:039 Introduction to Laboratory Techniques 2 s.h.
Exercises that teach basic laboratory techniques through experimentation with biological materials; preparation for conducting research in the mentor’s laboratory.

168:041 IBA Student Development Seminar 0-1 s.h.
Academic and professional development; presentations by faculty researchers, admissions representatives, or students in graduate bioscience programs; discussions about succeeding at the University; talks by professional educators on topics such as effective study skills.

168:047 IBA Research in Biomedical Science arr.
Registration in a section taught by the student’s research mentor. Prerequisite: enrollment in IBA.
Iowa Lakeside Laboratory

**Interim directors:** Bonnie S. Bowen (Iowa State University), Cory Peterson (Iowa State University Extension)

**University of Iowa coordinator:** Diana Horton (Biological Sciences)

**Iowa State University participating faculty:** Bonnie S. Bowen (Ecology, Evolution, and Organismal Biology), Lee Burras (Agronomy), C. Arthur Croyle (Art and Design), Charles D. Drewes (Ecology, Evolution, and Organismal Biology), Steven M. Hermstad (Art and Design), Clay A. Fierce (Natural Resource Ecology and Management), Lois H. Tiffany (Ecology, Evolution, and Organismal Biology), Arnold van der Valk (Ecology, Evolution, and Organismal Biology)

**University of Iowa participating faculty:** John F. Doehrnik (Anthropology)

**University of Northern Iowa participating faculty:** Laura L. Jackson (Biology), David R. Mercer (Biology), Michael J. Shott (Sociology, Anthropology, and Criminology), Davy D. Smith (Native Roadside Vegetation Center)

**Web site:** http://www.lakesidelab.org

Iowa Lakeside Laboratory is a field station run cooperatively by the Iowa Lakeside Laboratory Consortium, whose members include The University of Iowa, Iowa State University, the University of Northern Iowa, and Drake University. Iowa Lakeside Laboratory courses can be taken for credit through all consortium member schools. Students should check with their advisers to determine whether Iowa Lakeside Laboratory courses can be used to satisfy major or minor requirements of their major or minor, or college or university general education requirements.

The laboratory was established in 1909 for the conservation and study of the rich flora and fauna of northwest Iowa, especially the numerous lakes, wetlands, and prairies of the Iowa Great Lakes region. The campus is located on approximately 140 acres of restored prairie, wetland, and gallery forest along the west shore of West Okoboji Lake. Lakeside's mission is to provide undergraduate and graduate students an opportunity for hands-on experience in a variety of natural and human environments through its field-oriented summer courses, and to provide research facilities and support for graduate students and faculty members working on research projects in northwestern Iowa.

Each summer Iowa Lakeside Laboratory offers students a unique educational experience—small, full-immersion, field-oriented courses in the natural sciences (archaeology, ecology, environmental science, evolution, geology, hydrology, soils, taxonomy). All courses meet all day Monday through Friday. The majority of courses run four weeks. Enrollment in most courses is limited to eight to ten students. Courses are taught at the undergraduate level (sophomore and junior) and the senior/graduate level. Students earn 1 s.h. for each week (40 hours) in class. One- and two-week courses also are available, including courses designed especially for teachers.

Weather permitting, students normally spend at least part of each day doing fieldwork, either as part of their class work or for individual or group projects. Because some courses are offered alternate summers, the current Iowa Lakeside Laboratory Bulletin or the University of Iowa’s summer course offerings on ISIS (Iowa Student Information Services) should be consulted for the courses being offered in a particular summer session. The Iowa Lakeside Laboratory Bulletin also contains additional information about the Iowa Lakeside Laboratory and about each course being offered.

Research projects by undergraduates, graduate students, and faculty members can be completed either on the campus or at many nearby natural areas. Undergraduate and graduate students are strongly encouraged to do independent projects at Iowa Lakeside Laboratory, and graduate students are welcome to use Lakeside as a base for their thesis and dissertation research. Laboratory space and other facilities are available for long-term or short-term research projects.

Teaching and research facilities include eight laboratory buildings, a library, and a lecture hall. Living accommodations include cottages, motel-style units, and a large mess hall. All students are encouraged to stay at Lakeside while they are taking courses to derive full advantage of its educational, professional, and social life.

**Registration**

Students can enroll in Iowa Lakeside Laboratory courses only by submitting an Iowa Lakeside Laboratory Registration and Scholarship Form and the Lakeside housing form to the Iowa Lakeside Laboratory Administrative Office. These
forms are included in the Iowa Lakeside Laboratory Bulletin, which also contains current information on course offerings, and in The University of Iowa’s online course schedule (ISIS). The Iowa Lakeside Laboratory Bulletin is available on the Iowa campus from the Department of Biological Sciences, the Department of Chemistry, and the Department of Geoscience. The entire Iowa Lakeside Laboratory Bulletin is also on Lakeside’s web site.

Early registration is advisable. Because enrollment in Iowa Lakeside Laboratory courses is limited, students should register before May 1 for the following summer session. Housing is limited at Lakeside. When students register for courses, they must either apply for housing or state that they plan to live off campus.

### Financial Support

Iowa Lakeside Laboratory scholarships are available to undergraduates and graduate students. All scholarships cover room and board. Information about how to apply for Iowa Lakeside Laboratory scholarships is included in the Iowa Lakeside Laboratory Bulletin. Students also should consult the Office of Student Financial Aid for information about other scholarships, work-study, and loan programs.

The University of Iowa provides Thomas H. Macbride Scholarships in Natural Science for qualified graduate students attending Lakeside. The scholarships cover Iowa Lakeside Laboratory tuition costs. Application deadline is April 1.

### Courses

- **00L:005 Flora of the Iowa Lakes Region** 2 s.h.
- **00L:015 Introduction to the Life Sciences** 1 s.h.
- **00L:031 Ecology** 4 s.h.
- **00L:035 Physical Geology** 4 s.h.
- **00L:040 Archaeology** 4 s.h.
- **00L:043 Illustrating Nature—Sketching** 2 s.h.
- **00L:044 Illustrating Nature—Photography** 2 s.h.
- **00L:045 Field Mycology** 4 s.h.
- **00L:050 Undergraduate Internship** 1-5 s.h.
- **00L:064 Biology of Aquatic Plants** 4 s.h.
- **00L:100 Techniques for Biology Teaching** 1-2 s.h.
- **00L:101 Iowa Natural History** 4 s.h.
- **00L:102 Plant-Animal Interactions** 4 s.h.
- **00L:103 Aquatic Ecology** 4 s.h.
- **00L:104 Ecology and Systematics of Diatoms** 4 s.h.
- **00L:105 Plant Taxonomy** 4 s.h.
- **00L:106 Plant Identification** 4 s.h.
- **00L:107 Aquatic Plants** 4 s.h.
- **00L:108 Field Mycology** 4 s.h.
- **00L:109 Freshwater Algae** 4 s.h.
- **00L:110 Project WET** 1-2 s.h.
- **00L:111 Undergraduate Independent Study** 1-4 s.h.
- **00L:112 Undergraduate Independent Study** 1-4 s.h.
- **00L:113 Undergraduate Independent Study** 1-4 s.h.
- **00L:114 Field Mycology** 4 s.h.
- **00L:115 Field Mycology** 4 s.h.
- **00L:116 Ecology and Systematics of Diatoms** 4 s.h.

The University of Iowa provides Thomas H. Macbride Scholarships in Natural Science for qualified graduate students attending Lakeside. The scholarships cover Iowa Lakeside Laboratory tuition costs. Application deadline is April 1.

- **00L:115 Field Mycology** 4 s.h.
- **00L:116 Ecology and Systematics of Diatoms** 4 s.h.
00L:119 Evolution 4 s.h.
Mechanisms and patterns in microevolution, macroevolution; field exercises emphasizing studies of natural selection, adaptation, genetic variation, and population genetics of local plant, animal populations.

00L:120 Freshwater Invertebrates 4 s.h.
Field-oriented introduction to identification, life history, and ecology of common, free-living freshwater invertebrates of north-temperate lakes, rivers, wetlands; emphasis on invertebrates' role in aquatic food chains and litter processing. Prerequisite: an ecology course.

00L:121 Plant Ecology 4 s.h.
Principles of plant population, community, and ecosystem ecology illustrated through studies of native vegetation in local prairies, wetlands, forests, group or individual projects.

00L:122 Prairie Ecology 4 s.h.
Basic patterns, underlying physical and biotic causes of regional and local distributions of North American prairie plants and animals; field and laboratory analysis and projects. Prerequisite: familiarity with basic principles of biological sciences and ecology.

00L:124 Wetland Ecology 4 s.h.
Ecology, classification, creation, restoration, and management of wetlands; field studies on composition, structure, and function of local natural wetlands, restored prairie pothole wetlands; individual or group projects. Prerequisite: 00L:031.

00L:126 Ornithology 4 s.h.
Biology, ecology, and behavior of birds; emphasis on field studies of focal avian species or groups with focus on techniques of population analysis and methodology for population studies.

00L:127 Introduction to Insect Ecology 4 s.h.
Insects; their diversity and life history; emphasis on ecology and behavior, field, laboratory study. Offered summer sessions of odd years.

00L:128 Fish Ecology 4 s.h.
Basic principles of fish interaction with biotic and abiotic environments; field methods, taxonomy, and biology of fish with emphasis on the fish fauna of northwestern Iowa. Offered summer sessions of even years.

00L:129 Vertebrate Ecology and Evolution 4 s.h.
Field and laboratory study of representative vertebrates of northwestern Iowa; observations and experimentation emphasize ecological histories by integrating concepts of functional morphology, behavioral ecology, evolutionary biology.

00L:130 Natural History Workshop 1-2 s.h.
A specific aspect of the upper Midwest's natural history, or techniques for studying natural history; amphibians and reptiles, birds and birding, nature photography, mushrooms and other fungi, Iowa's trees and forests, fish biology, prairies, common algae, common insects, aquatic plants, life in rivers, life in lakes, mosses and liverworts, natural history of Iowa Great Lakes region, field archaeology, scuba diving, nature sketching, five-day, nontechnical introductions.

00L:141 Statistical Methods for Field Biologists 4 s.h.
Design and implementation of ecological and environmental field studies and statistical analyses; interpretation, presentation of field data; fundamentals of experimental design, hypothesis testing with continuous and discrete data, simple and multilinear regression and correlation, introduction of analysis of variance, data presentation. Offered summer sessions of odd years.

00L:142 Watershed Hydrology and Surficial Processes 4 s.h.
Effects of geomorphology, soils, and land use on transport of water and materials (nutrients, contaminants) in watersheds; fieldwork emphasizing investigations of the Iowa Great Lakes watershed. Prerequisites: four courses in physical or biological sciences or engineering.

00L:144 Ecosystems of North America 2-4 s.h.
Extended field trip for study of an ecosystem type (e.g., prairie, coastal wetland, forest, Alpine, coral reef) or the ecosystems of a specific region (e.g., Rocky Mountains, Gulf Coast, Appalachian Mountains, deserts of the Southwest, Central America); pre-trip orientation, post-trip review and synthesis. Field trip fee. Prerequisites: an ecology course and consent of instructor.

00L:145 Introduction to Environmental Planning 4 s.h.
Environmental planning theories and methods, emphasis on environmental planning using geographic information system (GIS) modeling approaches and public participation in the planning process; individual or group environmental planning projects. Offered summer sessions of even years. Recommended: basic familiarity with ArcView and database programs.

00L:150 Watershed Modeling and GIS 4 s.h.
Geographic information system (GIS) techniques for watershed hydrologic and water quality modeling, water resource management; approaches to watershed analysis, modeling, management; analytical tools for modeling watershed hydrology, water quality; case studies in modeling and managing rural and urban watersheds. Offered summer sessions of odd years.

00L:151 Analysis of Environmental Data 2 s.h.
Theory and application of statistical techniques for analysis of ecological and paleoecological data.

00L:156 Advanced Field Ornithology 2 s.h.
Field study of birds of the upper Midwest; extended field trip to Minnesota, Wisconsin; individual or group project. Field trip fee. Corequisite: 00L:126.

00L:160 Restoration Ecology 4 s.h.
Ecological principles for restoration of native ecosystems; establishment (site preparation, selection of seed mixes, planting techniques) and management (fire, mowing, weed control) of native vegetation; evaluation of restorations; emphasis on prairie restoration, wetland vegetation. Offered summer sessions of even years. Prerequisite: an ecology course.

00L:161 Introduction to GIS 4 s.h.
Descriptive and predictive geographic information system (GIS) modeling techniques, spatial statistics, map algebra; application of GIS modeling techniques to environmental planning and resource management.

00L:163 Conservation Biology 4 s.h.
Population- and community-level examination of factors influencing viability of plant and animal populations from demographic and genetic perspectives; assessment of biodiversity; design, management of preserves. Offered summer sessions of even years. Prerequisite: 00L:031.

00L:165 Behavioral Ecology 4 s.h.
Ecological and evolutionary theories of animal behavior examined through field studies of animal coloniality, courtship, territoriality, predator defense, habitat selection, foraging, mating systems, parental care. Offered summer sessions of even years. Prerequisites: two biological sciences courses.

00L:166 Amphibians and Reptiles 4 s.h.
Ecology, behavior, and conservation biology of amphibians and reptiles, with focus on their anatomy, morphology, temperature and water regulation, locomotion, life history, reproduction, population and community ecology, conservation. Offered summer sessions of even years. Prerequisites: two biological sciences courses.

00L:170 Vegetation Restoration and Management 4 s.h.
Theoretical and practical considerations for development and implementation of vegetation management plans; hands-on experience with varied techniques for restoring and managing natural vegetation, including mowing, burning, grazing, thinning, mechanical and chemical weeding, planting techniques. Offered summer sessions of odd years. Prerequisite: an ecology course.
00L:175 Soil Genesis and Landscape Relationships 4 s.h.
Relationships between soil formation, geomorphology, environment; soil description, classification, geography, mapping, interpretation for land use. Offered summer sessions of even years. Prerequisite: 00L:142.

00L:199 Undergraduate Research 1-4 s.h.
Prerequisites: junior or senior standing and consent of instructor.

00L:213 Graduate Independent Study 1-4 s.h.
Prerequisites: graduate standing and consent of instructor.

00L:217 Ecology and Systematics of Diatoms 4 s.h.

00L:240 Natural History Workshop 1-3 s.h.
An aspect of the upper Midwest's natural history, or techniques for studying natural history. Prerequisite: consent of instructor.

00L:250 Graduate Internship 1-5 s.h.
Experience as interpreters, rangers, technicians, and teachers through placement with county conservation boards, camps, parks, schools, other agencies. Prerequisites: graduate standing and consent of instructor.

00L:299 Research 1-4 s.h.
Lifetime Leisure Skills

Director: Wayne Fett
Web site: http://recserv.uiowa.edu/touchtheearth/classes/classes.htm

Lifetime Leisure Skills courses are open to University of Iowa undergraduate and graduate students. Undergraduates in the College of Liberal Arts and Sciences may count credit earned in Lifetime Leisure Skills toward the 120 s.h. required for a bachelor's degree. Students should consult with their academic advisers.

Courses

410:041 Scuba 1 s.h.
Basics of scuba diving. Taught in Field House pool. Six weeks.

410:042 Introduction to Rock Climbing 1 s.h.
Basics of rock climbing. Taught at Pictured Rocks County Park. Two days.

410:043 Bicycle Touring 1 s.h.
Basics of bicycle touring. Taught on Johnson County area roads.

410:044 Mountain Bicycling 1 s.h.
Basics of mountain bicycling. Taught on Sugar Bottom recreation trail system.

410:046 Tae Kwon Do 1 s.h.
Basics of Tae Kwon Do. Eight weeks.

410:047 Kick Boxing 1 s.h.
Basics of kick boxing. Eight weeks.

410:050 White-Water Canoeing 1 s.h.
Basics of white-water canoeing. Taught on rivers in Wisconsin, Missouri.

410:052 Intermediate Cross-Country Skiing 1 s.h.
Basics of cross-country skiing. Taught on trails in Wisconsin, Missouri.

410:054 Dog Sledding 1 s.h.
Basics of dog sledding, in a wood-heated cabin.

410:056 Hiking 1 s.h.
Basics of hiking. Taught at Governor Dodge State Park.

410:057 Backcountry Skiing and Snowshoeing 1 s.h.
Basics of backcountry winter travel, in a wood-heated cabin.

410:058 Basic Self-Defense 1 s.h.
Basics of self-defense.

410:059 Intermediate Tae Kwon Do 1 s.h.
Development of knowledge and skills learned in beginning Tae Kwon Do. Prerequisite: 410:046.

410:060 Ballroom Dancing 1 s.h.
Basics of ballroom dancing.

410:061 Downhill Skiing Instruction, Aspen, Colorado 1 s.h.
Eight 3-hour lectures, five days of instruction on mountain near Aspen, Colorado.

410:062 Trail Running 1 s.h.
Training, clothing, equipment, nutrition.

410:063 Introduction to Nature Photography 1 s.h.
Basics of outdoor photography (no darkroom requirement). Taught at Macbride Nature Recreation Area.

410:064 Basic Orienteering 1 s.h.
Basics of orienteering, including map and compass skills. Taught at Macbride Nature Recreation Area.

410:065 Low-Impact Camping 1 s.h.

410:066 Exploring the Loess Hills of Western Iowa 1 s.h.
History of the Loess Hills area of western Iowa; includes a weekend of hiking and camping in the Loess Hills area.

410:067 Team Building Challenge Course 1 s.h.
How to work in a group setting and be responsible group members.

410:068 Wilderness Appreciation 1 s.h.
Basics of wilderness appreciation; one overnight camping experience. Taught at Macbride Nature Recreation Area.

410:069 Basic Snowshoeing 1 s.h.
Basics of snowshoeing. Taught on trails in Wisconsin.
The Military Science Program administers the Army ROTC program. Although it does not grant degrees, its courses provide students with education in the military's role and instruction in leadership and management. The program gives students who wish to serve on active or reserve status in the armed forces the opportunity to earn commissions as Army officers. It also administers financial assistance and merit scholarships from the U.S. government to qualified students.

The program's course work is based on a curriculum of classroom lectures, experimental exercises, and direct feedback on leadership skills. The U.S. business community has singled out Army ROTC as the best leadership training program in America. The program's graduates are prepared to lead both in the military and in civilian life.

Courses are open to all students. Course credit that may be applied toward graduation varies. In the College of Liberal Arts and Sciences, up to 20 s.h. may be applied toward graduation.

**Basic Course**

The ROTC basic course is designed primarily for first- and second-year students. It provides the fundamentals of leadership and management and introduces the roles of the military as influenced by national and foreign policy. Students incur no obligation to the military for participation in the basic course. The following courses satisfy the basic course requirement.

- **023:101 Foundations of Officership**  MS101 1 s.h.
- **023:102 Basic Leadership**  MS102 1 s.h.
- **023:103 Individual Leadership Studies**  MS201 2 s.h.
- **023:104 Leadership and Teamwork**  MS202 2 s.h.

The basic course requirements may be taken over a one- or two-year period or during a four-week paid camp during the summer. Students with prior military training normally are exempt from the basic course requirements.

**Advanced Course**

The ROTC advanced course is open to any student who meets the prerequisites, but is designed primarily for students who wish to pursue a commission as a lieutenant in the U.S. Army upon graduation. It is open to both undergraduate and graduate students. Most students in the advanced course incur an obligation to the military that can be satisfied in the Active Army, Army Reserve, or Army National Guard.

A tax-free monthly stipend is provided to students who agree to serve in the armed forces. Additional financial assistance may be provided through scholarships or participation in training with an Army Reserve or Army National Guard unit.

To enter the advanced course, students must satisfy the basic course requirements, have earned a minimum of 54 s.h., and have a g.p.a. of at least 2.00. A four-week paid camp, normally completed the summer before the last academic year, is required for all students wishing to become Army officers. The following courses are the academic requirements for completion of the advanced course.

- **023:090 Leadership Lab**  0 s.h.
- **023:095 Advanced Military Fitness**  MS301 3 s.h.
- **023:105 Leadership and Problem Solving**  MS302 3 s.h.
- **023:106 Leadership and Management**  MS401 3 s.h.
- **023:107 Leadership and Teamwork**  MS402 3 s.h.

**Additional Course Work**

Students whose aim is a commission must complete at least one course in military history from the following list. This course may be the same as one used to complete the College of Liberal Arts and Sciences General Education
Program. Students earning a degree in nursing or engineering normally are exempt from this requirement.

016:011 Issues in Human History: The Vietnam War in Historical Perspective 3 s.h.
016:014 Issues in Human History: Europe’s Expansion Overseas 3 s.h.
16A:153 U.S.A. in a World at War 1931-1945 3 s.h.
16A:162 American Revolutionary Period 1740-1789 3 s.h.
16A:164 Civil War and Reconstruction 3 s.h.
16A:166 The Progressive Era in America 3 s.h.
16A:168 The Contemporary U.S. 1940-Present 3 s.h.
16W:182 The Vietnam War in Historical Perspective 3 s.h.

Other courses may be used to meet the requirement, with approval of the professor of military science.

Financial Aid

Military Science offers two, three, and four-year merit scholarships for students who wish to enter the ROTC program. These scholarships pay tuition at The University of Iowa, an allotment for books and supplies each year, all or most mandatory educational fees, and a tax-free subsistence allowance each month during the academic year. Scholarships also are available for nursing students who wish to become Army nurses. Additional financial assistance may be provided through participation in training with an Army Reserve or Army National Guard unit.

Courses

023:090 Leadership Laboratory 0 s.h.
Military skills and application of leadership; experience in water survival, land navigation, small-unit tactics; focus on values and ethical behavior required of officers.

023:095 Advanced Military Fitness Training 1 s.h.
Aerobics and running, muscular strength and endurance, flexibility, nutrition; experience designing a group fitness program, how to evaluate and measure fitness improvement; exercise, classroom instruction; developed around Army physical fitness training program.

023:101 Foundations of Officership MS101 1 s.h.
Military officership as a profession, fundamental components of service as an officer in the U.S. Army; specialized skills and expertise, leadership and managerial abilities; life skills, including fitness, communications theory and practice (written and oral), interpersonal relationships; adventure and physical training events. First in a four-course sequence.

023:102 Basic Leadership MS102 1 s.h.
Life skills development: problem solving, decision making, leadership; communication, critical thinking, problem solving methods, leadership theory, followership, group cohesion, goal setting, feedback mechanisms; adventure and physical training events. Second in a four-course sequence.

023:103 Individual Leadership Studies MS201 2 s.h.
Theoretical and practical leadership instruction, application of skill sets; communication and leadership concepts such as written and oral communication, effective listening, assertiveness, personality, adult development, motivation, organizational culture and change; major leadership and problem-solving case study; adventure and physical training events. Third in a four-course sequence. Recommended: 023:101 and 023:102.

023:104 Leadership and Teamwork MS202 2 s.h.
How to build successful teams, methods for influencing action, effective communication in setting and achieving goals, the importance of timing decisions, creativity in problem solving, and obtaining team buy-in through immediate feedback; adventure and physical training events. Last in a four-course sequence. Recommended: 023:103.

023:105 Leadership and Problem Solving MS301 3 s.h.
Cader preparation for Leadership Development Assessment Course; self-assessment of leadership style, development of a personal fitness regimen, how to plan and conduct individual/small unit tactical training while testing reasoning and problem-solving techniques; direct feedback on leadership abilities; case studies; principles of war, decision-making processes, planning models, risk assessment, motivational theory, role and actions of leaders, organizational communications; laboratory period. First in a two-course sequence. Prerequisites: 023:101, 023:102, 023:103, 023:104, Army ROTC contract, and commitment for service as officer in U.S. Army, Army Reserve, or Army National Guard; or completion of basic training or leaders training course.

023:106 Leadership and Ethics MS302 3 s.h.
Cader preparation for Leadership Development Assessment Course; role communications, values, and ethics in effective leadership; ethical decision making, consideration of others, spirituality in the military, Army leadership doctrine; emphasis on improving oral and written communication skills; individual leader development, planning and execution of small unit operations, individual and team development, the Army as a career choice; laboratory period. Second in a two-course sequence. Prerequisites: 023:101, 023:102, 023:103, 023:104, Army ROTC contract, and commitment for service as officer in U.S. Army, Army Reserve, or Army National Guard; or completion of basic training or leaders training course.

023:107 Leadership and Management MS401 3 s.h.
Integration of previous leadership and management instruction; proficiency in planning and executing complex operations, functioning as a member of a staff, mentoring subordinates; training management, methods of effective staff collaboration, development, training and evaluation of subordinates, management of personnel, management systems, staff assignments; how to prepare, conduct, and evaluate decision and information briefings, planning, preparation, and execution of training during laboratory period. Prerequisites: 023:105, 023:106, Army ROTC contract, and commitment for service as officer in U.S. Army, Army Reserve, or Army National Guard.

023:108 Officership MS402 3 s.h.
Integration of previous leadership and management instruction; case study analysis of military law; how to establish an ethical command climate; leadership project to plan, organize, collaborate, analyze, and demonstrate leadership skills; management subjects prerequisite to the Officer Basic Course, including training management, organizations and missions of the U.S. Army, personnel management, logistics systems, staff assignments, how to prepare, conduct, and evaluate decision and
information briefings; planning, preparation, and execution of training during laboratory period. Prerequisites: 023:105, 023:106, Army ROTC contract, and commitment for service as officer in U.S. Army, Army Reserve, or Army National Guard.

023:121 Readings in Contemporary Military Issues 1-3 s.h.
Readings tailored to meet students’ needs and explore a specific area of the military; topics determined by student and instructor. Prerequisites: 023:101, 023:102, 023:103, and 023:104; or consent of instructor.
The University of Iowa holds orientation sessions, presented by orientation staff, for all incoming undergraduates. Parents and guardians are invited to attend separate but concurrent programs.

Orientation Training offers the following courses for all student employees who assist the regular staff in presenting orientation programs. Student orientation advisers are required to take 412:077. Parent program assistants are required to take 412:078.

### Courses

- **412:077 Workshop in Orientation Services** 2 s.h.
  - Preparation for the role of student adviser in the Office of Orientation Services; knowledge of academic requirements, policies, and procedures at The University of Iowa; development of leadership, group facilitation, presentation, and academic advising skills. Prerequisite: consent of instructor.

- **412:078 Orientation Services Parent Training** 1 s.h.
  - Preparation for the role of parent program assistant in the Office of Orientation Services; understanding the needs of parents who attend orientation programs; enhancement of communication, problem solving, and conflict management skills; knowledge of resource units on campus. Prerequisite: consent of instructor.
Patient Care Practicum

Director: Lola Lopes (Management and Organizations/Psychology)

The Patient Care Practicum prepares students for work and/or internships at University of Iowa Hospitals and Clinics (UIHC). Students complete required online training modules through the University's course management system. Once the training modules are completed, students are certified to work at UIHC.

Courses

414:198 UIHC Compliance Training 0 s.h.
Residence Services

Director: Lola Lopes (Management and Organizations/Psychology)
Web site: http://housing.uiowa.edu/

Residence Services courses are designed to help students involved in the resident assistant (RA) program develop into effective RAs. Students learn how to establish healthy student communities in the residence halls, how to confront crises and emergencies, and how to develop leadership skills. Enrollment is open only to students who have been selected to serve as resident assistants.

Student Information Technology Skills

Director: Mark Hale (Chief Information Officer)
Web site: http://cio.uiowa.edu/events/SITS

Student Information Technology Skills is an intensive program for students interested in creating and maintaining web sites for University departments or administrative units. Students are graded on their final project and participation in online and face-to-face discussions. Enrollment requires the instructor's consent. Stipends may be available.

Courses

416:100 Creating Web Sites 2 s.h.
HTML, CSS fundamentals, Dreamweaver software, and graphics; examination and critique of UI and non-UI web pages; guidance in understanding how to work effectively with campus web customers.

416:101 Topics in Institutional Computing 2 s.h.
Key topics in providing support for institutional computing, networking and network services, security, authentication and authorization, roles and responsibilities of IT workers.

416:102 Core IT Support Skills 2 s.h.
Knowledge and hands-on skills necessary for supporting computers in an institutional setting; basic hardware, operating system, application and networking support topics.
Student Services

**Director:** Lola Lopes (Management and Organizations/Psychology)

**Web site:** [http://www.uiowa.edu/~vpss/index2.html](http://www.uiowa.edu/~vpss/index2.html)

Student Services offers an organizational management workshop designed for current and future leaders of the University's Greek community (fraternities and sororities). Students learn through lectures, small- and large-group interactive learning activities, and discussion. Enrollment is limited to current and future officers of Iowa's Greek community.

Study Abroad

Director: Janis Perkins
Web site: http://www.uiowa.edu/~uiabroad

The University of Iowa sponsors or cosponsors a wide variety of study abroad programs in more than 40 countries. Students may choose from summer, semester, academic year, and winter session programs that complement and extend the University’s academic programs across the curriculum.

Students also may participate in study abroad programs sponsored by other accredited U.S. and foreign institutions. They should obtain advance approval of all transfer credit by completing a Study Abroad Credit Approval Form.

Information on University of Iowa and other study abroad programs is available at the Office for Study Abroad.

Courses

165:105 International Student Exchange Program  arr. Study on reciprocal exchange at foreign universities worldwide; some instruction in English. Year-long, one semester, and summer options. Prerequisites: 40 s.h. of credit, g.p.a. of at least 3.00, and in some cases, command of a foreign language.

165:106 UK Exchange Program  arr. Regular degree course work at the Universities of Hull and Lancaster (England) and the University of Strathclyde and Aberdeen (Scotland); humanities, social sciences, physical sciences, business, engineering. Prerequisites: 40 s.h. of credit and g.p.a. of at least 3.00.

165:107 Global Engineering Education Exchange  arr. 165:108 Japan Exchange Program  arr. Seven levels of Japanese language and area studies at Nanzan University’s Center for Japanese Studies, Nagoya; business and engineering classes, taught in English, at Tokyo Denki University, School of Information Environment, full, language and area studies at Nagoya University of Foreign Studies, year or spring; degree course work at Meiji University; language and culture classes at Kanda University of International Studies, Tokyo. Prerequisites vary by program.

165:112 The Iowa Exchanges  arr. Choice of several institutions. University of Iceland: anthropology, Icelandic literature, linguistics, foreign languages; semester or year-long program. University of Nijmegen: European studies, American studies, English literature, and linguistics; all taught in English; language, literature, and cultural studies, all taught in German; semester or year-long. Universidad de las Americas: liberal arts, business, international relations; taught in Spanish; semester or year-long. Fachhochschule Giessen-Friedberg: engineering and related course work, taught in German; semester or academic year. Korean exchanges: choice of six universities in Republic of Korea offering Korean language and/ or Asian studies courses, taught in English; regular university course work in full range of disciplines, taught in Korean; semester or academic year; course offerings vary by university. Jistent Amila University, Sorges, Hungary; Hungarian language, Hungarian and East-Central European studies, taught in English; regular university course work in liberal arts and sciences taught in Hungarian; semester or academic year. Denmark Aalborg Exchange—Aalborg University; regular university course work in communication studies, European studies emphasizing economics and politics, taught in English; semester or year-long. Eötvös Loránd University, Budapest, Hungary: regular university course work in communication studies, European studies emphasizing economics and politics, taught in Hungarian; semester or academic year. Denmarks: graduate and advanced undergraduate course work in business; semester or academic year; proficiency in French and appropriate academic background required. Budapest University of Economic Science and Public Administration (BUESPA) Exchange, Budapest, Hungary: business, economics, and political science courses taught in English, Hungarian language courses. Tilburg University, The Netherlands: accounting, applied microeconomics, finance, management, international marketing, electronic commerce, and other subjects; taught in English; semester or academic year. Crosscurrents in Journalism exchange, taught in Spanish, at partner institutions in Mexico (University of Colima, National Autonomous University of Guadalajara) and Canada (Mount Royal College, Calgary; Humber College, Toronto); Joetsu exchange, graduate study and research in education at Joetsu University of Education, Japan.

165:117 Frankfurt Exchange Program  arr. Regular degree course work in business and economics at Johann Wolfgang Goethe University; courses taught in German. Academic year. Arranged through Tippie College of Business. Prerequisites: two years of college German or equivalent, and relevant academic background.

165:119 Vienna Exchange Program  arr. Regular degree course work in business administration and economics at Wirtschaftsuniversität in Vienna, Austria; taught in English and German. Arranged through Tippie College of Business. Recommended: one year of college German, or equivalent.

165:500 Study Abroad 0 s.h. Students participating in study abroad programs at other U.S. or foreign universities maintain their status at The University of Iowa by registering for this course.

165:501 Study Abroad  arr.

165:510 Field Research Abroad  arr. Research projects abroad.

165:520 Ghana Internship Program  arr. Internships in areas related to the student’s academic and career objectives; professional experience working in the cultural environment of a developing country.

165:805 CIEE Spain Program  arr. Several programs in Seville, Alicante, Barcelona, and Alcala addressing specific language proficiency levels and academic interests. Prerequisites vary.

165:810 CIEE Spain Program  arr.
165:811 USAC Studies in Spain
Intensive Spanish language at beginning level; advanced language, civilization, literature at third-year level; intensive Basque language; some courses taught in English; program sites include Bilbao, San Sebastian, Madrid, Alcaniz. Prerequisite: g.p.a. of at least 2.50.

165:812 CIEE France Program
Two programs. Contemporary French studies program: language skills for students taking courses on French culture and contemporary civilization; one semester of French required. Critical studies program: critical approach to contemporary French thought in literature, film, philosophy, art, aesthetics, proficiency in French required. Prerequisite: g.p.a. of at least 3.00.

165:813 CIEE China Program
Three programs in the People's Republic of China, one program in Taiwan. Mandarin Chinese, Chinese civilization, and area studies. Summer, semester, or academic year. Prerequisites and sessions vary.

165:816 CIC Latin American Health and Nutrition Program
Interdisciplinary and field-based study with course work in Spanish language, medicine, social sciences, humanities, independent study. Summer and/or fall. Prerequisites: one year of Spanish (summer), or two years of Spanish (summer and fall), or three years of Spanish (fall), and g.p.a. of at least 2.50.

165:817 CIC Program in Mexico
University of Guanajuato, Spanish language, Latin American literature, art, history, anthropology, film, political science, homestays with Mexican families. Summer. Prerequisites: five semesters of Spanish and g.p.a. of at least 3.00.

165:818 CIC Program in Quebec
Laval University, French language, Quebec literature and culture; home-stays with Francophone families or dormitory accommodations. Summer. Prerequisites: one year of college-level French and g.p.a. of at least 3.00.

165:820 Semester at The Queen's University of Belfast
Courses at The Queen's University of Belfast, Northern Ireland; nearly 100 subjects, including social sciences and humanities from Irish and Northern Irish perspectives. Prerequisite: g.p.a. of at least 3.00.

165:825 Semester in Venezuela, Universidad de los Andes

165:826 Summer Art Program in Italy
Printmaking and drawing courses in collaboration with the Scuola Internazionale di Grafica, cultural and artistic introduction to Venice and surrounding area; for students at all levels of artistic accomplishment.

165:827 Asia Study Tour
Introduction to history, culture, society, economics, and politics of one or more Asian countries.

165:828 ACTR Program Russia
Russian language programs at institutions in Moscow, Leningrad. One semester of academic year or summer. Prerequisite: three years of college-level Russian or equivalent.

165:829 London Performance Study
Selected theater productions, lectures, performances, discussions, written exercises, workshops, cultural activities. Credit may be applied toward a University of Iowa major in English or theatre arts. Summer.

165:831 Elementary Student Teaching Abroad
Supervised student teaching in an overseas school.

165:832 Secondary Student Teaching Abroad
Supervised student teaching in an overseas school.

165:833 Academic Year in Freiburg
Combination of special program classes, German for foreigner, and regular degree course work in most liberal arts subjects at Albert-Ludwigs University, Freiburg, Germany. Academic year. Prerequisite: at least four semesters college German or equivalent with g.p.a. of at least 3.00.

165:834 Environmental Studies in Slovenia
Short-term course at the School of Environmental Sciences, Nova Gorica, Slovenia; topics vary; taught in English. Offered summer session.

165:836 Semester in South India
Indian civilization and culture; science, technology, and sustainable development; women's studies; Kannada, Hindi or Sanskrit; internship or independent research project. Based in Mysore. Fall semester.

165:837 Iowa Regents Semester in Australia
Regular course work in humanities, social sciences, business, engineering, and physical sciences at the University of Newcastle, Newcastle, Australia. Fall and spring semesters. Prerequisites: sophomore standing and g.p.a. of at least 2.50.

165:838 Irish Writing Program
Dublin, Ireland; writing workshops directed by Irish writers, literature courses taught by faculty. Summer.

165:839 International Student Exchange Program Direct
Study at some ISEP member institutions in Brazil, Chile (summer Valparaiso), Costa Rica, Estonia, Ghana, India, Malta, The Netherlands, New Zealand, South Africa, Thailand, the United Kingdom; fields and duration vary. Group fee options.

165:840 Archaeological Field Work Abroad
Major salvage archaeology projects in the Netherlands excavating sites from 1000 B.C. to 1950 C.E.

165:841 International Perspectives: Engineering
Exploration of historical, cultural, social, economic, ethical, environmental, and/or political conditions that may affect engineering projects in a specific country or world region; location and topics vary.

165:842 Cross-Cultural Nursing Experience
Practical experience to build understanding of nursing roles and responsibilities in different cultures and health care systems; for advanced nursing students.

165:847 Japan Summer Language Institute
Strong communication skills, cultural awareness developed through intensive language study, cultural immersion; location varies. Prerequisite: one semester college-level Japanese or equivalent.

165:848 University of KwaZulu-Natal Exchange
Introduction to South African culture from varied academic perspectives, summer session. Enrolment in regular University courses, fall and spring semesters.

165:849 Social Work International Travel/Study Seminar
Impact of socio/political economy on family and community systems in the country visited; seminar, guest speakers, field visits. Prerequisite: 042:143 or consent of instructor.

165:850 USAC Studies in Costa Rica
Intensive beginning level Spanish language; advanced language, literature, civilization at third-year level; tropical ecology. Two program sites—Heredia and Puntarenas. Some courses taught in English. Prerequisite: g.p.a. of at least 2.50.

165:851 USAC Studies in Chile
Intensive beginning level Spanish language; advanced language, literature, civilization at third-year level; area studies. Some courses taught in English. Prerequisite: g.p.a. of at least 2.50.
Exercises in creative writing, memoir, drawing, collage, and storytelling to help participants learn how to catch moments of inspiration and develop them, combat writer's block, and trust their individual voices.

Study of the international business environment in one of the world’s financial capitals. Course can be counted toward undergraduate business major or international business certificate. Winter and summer. Prerequisites: junior and good academic standing.

Study of Spanish language and culture in Valladolid, Spain. Six weeks in summer. Prerequisite: four semesters of college-level Spanish or equivalent.

Classroom-based instruction with field-based research opportunities; enrollment in Field Research Seminar and two other courses chosen from Culture, People and the Environment, Regional and Economic Development, and Spanish Communication Skills. Summer.

Hybrid aspects of cultural, economic, and social life in present-day island settings of the post-Colonial English-speaking Caribbean. Winter break. Prerequisite: 16W:051 or appropriate background and interest.

Relationship between values, ideologies, and symbolic contents in development of areas in which practices of African origin have diversified and enriched Brazilian culture. Summer.

Winter session program in Chengdu, China, led by a University of Iowa professor of audiology; lectures, observation, clinical practicum experiences in several hospital settings. Prerequisite: speech and hearing science major.

Study of French language and culture in Lyon, France. Seven weeks in summer. Prerequisites: four semesters of college-level French and g.p.a. of at least 2.75.

Regular course work in all disciplines at University College Cork in Ireland. Full and spring semesters. Prerequisites: sophomore standing and g.p.a. of at least 3.00.

Undergraduate studies in varied academic disciplines (business administration, history, international relations, psychology, fine arts, literature, philosophy) at the American College of Thessaloniki. Taught in English.

Course work in social sciences at the FLACSO institutes in Chile or Argentina; humanities curriculum at the Universidad de Buenos Aires and Universidad Catolica de Argentina in Argentina, or at the Universidad de Chile, Universidad Catolica de Chile, or Universidad de Santiago in Chile. Prerequisites: Spanish proficiency and g.p.a. of at least 2.75.
Summer Undergraduate MSTP Research

Web site: http://www.medicine.uiowa.edu/mstp/sumr

The Medical Scientist Training Program (MSTP) offers the Summer Undergraduate MSTP Research program, an intensive eight-week experience for undergraduates interested in pursuing combined M.D./Ph.D. training. Participants gain experience in research laboratories and exposure to clinical medicine and medically relevant research in preparation for careers as physician-scientists.

Students conduct research in the laboratory of a biomedical sciences faculty member, shadow physician-scientists in clinical settings, participate in career development seminars, and attend a weekly seminar series focusing on the intersection of science and medicine.

Participants receive a stipend for the program and live on campus in University housing.

Applicants should be U.S. citizens or permanent residents who have completed their sophomore or junior year in a bachelor's degree program in the biological or physical sciences. Applicants should submit an application form (available on the program's web site or from the MSTP office); an official college transcript; and two letters of recommendation. Application deadline is early February for the following summer.

Contact the Medical Scientist Training Program, Carver College of Medicine, for more information.
Undergraduate Initiatives

The Undergraduate Initiatives program offers courses designed to help first-year and entering transfer students succeed at The University of Iowa. Undergraduate initiatives courses include a traditional first-year experience course, a transition course for transfer students, a web-based course offering an introduction to electronic tools and resources at The University of Iowa, and a course for first-year students who have been placed on academic probation.

The Undergraduate Initiatives Program is administered by the associate provost for undergraduate education. For more information about Undergraduate Initiatives courses, contact the Academic Advising Center. Other programs designed especially for first-year students at Iowa include Courses in Common (contact the Academic Advising Center), First-Year Seminars (contact the College of Liberal Arts and Sciences), and Learning Communities (contact the Office of the Provost).

Courses

407:001 The College Transition 2 s.h.
College culture, University of Iowa resources, refinement of study skills, test taking, identification of personal values, self-motivation, goal setting; taught in small sections with emphasis on classroom discussion. Prerequisite: entering first-year student standing.

407:002 College Success Seminar 1 s.h.
Skills, habits, and attitudes essential for college success; self-assessment, goal setting, problem solving, motivation, time management, study skills, preparing for and taking tests; campus resources, including the Pomerantz Career Center, University Counseling Service; emphasis on class participation and completion of assignments related to course topics. Prerequisite: selected students with first-year standing in the College of Liberal Arts and Sciences.

407:007 Online at Iowa 1 s.h.
Web-based introduction to electronic tools and resources at The University of Iowa; web sites, e-mail, databases, how to research courses, register for classes, and review grades; computer security, virtual campus tour.

407:011 The Transfer Transition 2 s.h.
University of Iowa resources, career and major selection, identification of personal values, self-motivation, goal setting, study and test-taking skills; small sections with classroom discussion. Prerequisite: first-year transfer student standing.
The Department of Microbiology offers the Undergraduate Research Fellowship Program (403:030), a nine-week summer program for qualified undergraduate students who are studying microbiology or other biological sciences and are interested in pursuing careers in science. Participants conduct research on a project they select, under the direct supervision of a faculty member.

Each participant receives a stipend to pay for housing and food.

Applicants must be U.S. citizens or permanent residents who have completed their sophomore or junior year in a bachelor’s degree program in the biological sciences. Applications should include a completed application form and two letters of recommendation. Deadline to apply is mid-February for the following summer.

Visit the program’s web site or contact the Department of Microbiology, Carver College of Medicine, for more information.
The University Honors Program is dedicated to the academic and personal enrichment of outstanding University of Iowa undergraduates in all colleges and majors. This enrichment is accomplished through special academic opportunities and cocurricular programs in which honors students are invited to participate.

University Honors Program (UHP) professional and student staff members help honors students create their own personal honors curricula and explore interests inside and outside the classroom. Honors students enjoy additional course options in research, writing, teaching, and independent study, as well as opportunities to work closely with professors and other honors students in existing courses. Cocurricular activities in foreign relations, the arts, volunteering, and more provide students with important experiences outside the classroom. By offering these academic opportunities and cocurricular programs, the University Honors Program strives to be a community of opportunity.

Students entering the University directly from high school are admitted automatically to the University Honors Program based on their high school rank and ACT or SAT score. National Merit Scholars, Presidential Scholars, Old Gold Scholars, and National Achievement Scholars also are admitted automatically to the honors program.

Entering students who are not admitted automatically may gain admission via a parallel process. This process requires a high school transcript, a letter of recommendation from a teacher, and a personal letter describing how the student would gain from the honors program.

Entering transfer students must have a cumulative g.p.a. of at least 3.50 and a total of at least 24 s.h. of college credit in order to be admitted to the University Honors Program. Transfer students with fewer than 24 s.h. of college credit are considered for honors program membership on the same basis as students entering the University directly from high school.

Membership in the University Honors Program is open to undergraduate students enrolled in the Tippie College of Business, and the Colleges of Education, Engineering, Liberal Arts and Sciences, and Nursing. A cumulative University of Iowa g.p.a. of at least 3.33 (B-plus) is required for entry and continued membership in the honors program. Current students are automatically admitted to the honors program if they achieve a g.p.a. of at least 3.33 before completing 72 s.h. of course work.

For more information on honors membership requirements, see Prospective Students/General Information on the honors program web site.

**Academic Opportunities**

The University Honors Program recognizes that students have different educational needs and goals. For this reason, the program offers a curriculum that is flexible, broad, and challenging. Honors course options begin as early as students’ first semester and continue through the last semester of the senior year. These options include a diverse set of academic courses as well as opportunities to work directly with faculty members as research assistants, teaching interns, and writing fellows for credit toward graduation.

While the choices are many, there are no required courses for students in the honors program. Students are free to design a curriculum that best suits their background and interests. They may select honors options to meet the requirements of the College of Liberal Arts and Sciences General Education Program, their major department(s), or elective credit. The Academic Advising Center, departmental honors advisers, and honors program staff members are all available to help students develop an appropriate study plan.

Each semester the program features a variety of honors seminars—introductory courses on exciting topics in the humanities, social sciences, and natural sciences. The seminars, which are small and highly interactive, cover new topics each semester. In addition to the honors seminars, individual departments offer courses in a wide range of subject areas for honors credit, from lab and discussion sections of introductory courses to specialized studies within individual students’ disciplines. Finally, students can turn any nonhonors course into an honors course.
through honors designation. This allows students to delve more deeply into a topic, under the instructor's guidance, by developing a plan of study that goes beyond the course requirements.

**Honors Commendation**

Students who complete at least 12 s.h. of honors course work with a grade of B or higher in each graded course before they have completed their second year or their first 59 s.h. (whichever comes last) receive Honors Commendation. Honors Commendation includes a certificate of commendation from the University Honors Program and the University president.

**Honors in the Major**

Most majors offer upper-level honors courses, honors seminars, independent research, and/or the opportunity to pursue an original senior honors thesis or project under the guidance of a faculty member. Each college and department determines its own requirements for graduation with honors, and faculty members in each department serve as honors advisers. After students declare a major in the College of Liberal Arts and Sciences or enter the Tippie College of Business or the Colleges of Education, Engineering, or Nursing, they should speak with their collegiate or departmental honors adviser about their academic program.

**Graduation with Honors**

Successful completion of all departmental and collegiate honors requirements leads to a baccalaureate degree with honors in the major. Requirements vary by department, but graduation with honors generally involves completion of a capstone project with a faculty mentor. Other requirements may include a higher grade-point average in the major and/or upper-level honors course work. Students who graduate with honors receive special recognition during commencement, and their achievement is noted on their permanent academic record.

**Cocurricular Programs**

University Honors Program professional and student staff members are dedicated to providing a rich variety of activities for students outside the classroom. Participation is not required, but many honors students find cocurricular programming a great way to meet people, get involved, and learn more about the world around them.

The **Arts Program** sends groups of honors students to attend music, dance, and theater events at the University and in the community. Students have the opportunity to interact with artists, faculty members, and other honors students through pre- and post-event discussions, lectures, and visits.

The **Iowa City Foreign Relations Council** hosts luncheon dialogues on relevant international issues. Past speakers include award-winning journalists; Nobel Peace Prize laureates; and seasoned diplomats, politicians, and analysts. Honors students have the unique opportunity to gain a more textured understanding of world affairs by hearing about them from expert speakers.

The **Volunteer Program** provides students with volunteer opportunities at various organizations in and around the Iowa City community. Students learn more about their community and its needs, often continuing to volunteer on their own.

The **Presidential Scholars Program** emphasizes community, cultural, and academic involvement while offering a unique team-building component. As part of the program, scholars may participate in cook-outs, Frisbee games, arts events, canoeing adventures, pizza parties, dinners with faculty members, a mentoring program, and volunteer projects.

The newsletter **Honorable Mention** is written, edited, and published four times a year by honors students. It informs, educates, and entertains honors students, their families, and University staff and faculty.

The **honors web site and electronic mailing list** are designed to provide resources for honors students and to inform them about past, present, and future honors activities, scholarships, course work, and opportunities.

The University Honors Program advises five major national and international **honor societies**: Phi Eta Sigma, National Society of Collegiate Scholars, Golden Key, Mortar Board, and Omicron Delta Kappa. These societies provide select students the opportunity to lead, serve their community, and cultivate academic excellence.

For more information about honors cocurricular programs, see Current Students/Getting Involved on the honors program web site.
Scholarship Advising
The University Honors Program helps students prepare to apply for a variety of scholarship awards and prizes. The program offers its own scholarships of $1,000 to $3,000 to selected continuing honors students in all colleges, as well as research grants for students working to complete senior honors theses or projects. These awards are made possible in part by a bequest from Professor Rhodes Dunlap, the program’s founder and director for more than 20 years. Announcements concerning honors program scholarships are made through the honors program newsletter and electronic mailing list. The program does not offer scholarships to incoming first-year or transfer students.

Students from the University Honors Program are awarded national and international scholarships each year. The program provides advising and nominations for Rhodes, Marshall, Gates Cambridge, Truman, Udall, Goldwater, and Jack Kent Cooke Scholarships.

Honors Learning Community
The Honors Learning Community offers a variety of cultural, academic, and social events for students living on honors floors in Daum Residence Hall. In addition to providing a convenient place for residents to socialize and study with each other, the community sponsors programs such as group outings to arts events, workshops on scholarship and research opportunities, volunteer activities, and dinners with faculty members. Daum Residence Hall also is connected to the Blank Honors Center by a skywalk.

The honors floors are open to first-year and transfer students. To learn more about the Honors Learning Community, see Prospective Students/Honors Living on the honors program web site.

Blank Honors Center
The University Honors Program is located in the Blank Honors Center, a new facility dedicated to fostering a sense of community among honors students. The Blank Honors Center offers extended hours, social areas, a kitchenette, quiet study areas, classrooms, a computer lab with 24 workstations, office space for honor societies, and administrative staff offices. The center also includes rooms for meetings, cultural or social events, and informational presentations. Honors program staff members are always on hand to help students.

Courses
Honors courses are open only to honors students.

143:040 Honors Studies  arc Independent study arranged with a faculty member who certifies satisfactory completion of plan of study and performance; subject matter not covered by other UI courses.

143:041 Honors Group Studies  arc Group independent study arranged with a faculty member who certifies satisfactory completion of plan of study and performance; subject matter not covered by other UI courses.

143:042 Honors Service Learning  arc Service learning project arranged with a faculty member who certifies satisfactory completion of plan of study and service.

143:043 Honors Group Service Learning  arc Group service learning project arranged with a faculty member who certifies satisfactory completion of plan of study and service.

143:050 Honors Seminar in Humanities  3 s.h. Small-class experience with a faculty member on a central topic. GE: humanities.

143:060 Honors Seminar in Social Sciences  3 s.h. Small-class experience with a faculty member on a central topic. GE: social sciences.

143:070 Honors Seminar in Natural Sciences  3 s.h. Small-class experience with a faculty member on a central topic. GE: natural sciences.

143:090 Honors Research Colloquium  1 s.h. A research area of interest to the professor; advanced readings.

143:100 Honors Research Practicum  1-3 s.h. Individual research performed in conjunction with a faculty member’s research.

143:101 Honors Teaching Practicum  3 s.h. Teaching internship in first- and second-year courses; may include providing tutorial assistance, conducting review sessions, and aiding in course organization.

143:102 Writing Fellows: Writing Theory and Practice  3 s.h. Preparation of honors students selected as writing fellows to serve as peer tutors in writing-intensive courses; theories of writing, evaluation of drafts, peer tutoring with students. Prerequisites: junior honors standing, admission to Writing Fellows Program, and availability to work as a writing fellow in subsequent semesters.

143:150 Honors Special Topics  3 s.h. Small-class experience with a faculty member on a central topic. Prerequisite: junior or senior honors standing.
Belin-Blank Center for Gifted Education

Director: Nicholas Colangelo
Web site: http://www.education.uiowa.edu/belinblank

The following programs are presented by the Connie Belin and Jacqueline N. Blank International Center for Gifted Education and Talent Development. For more information about the center's programs, contact the Belin-Blank Center or visit the center's web site.

Iowa Talent Project

The Belin-Blank Center and the Des Moines School District collaborate in the Iowa Talent Project (ITP) to identify underrepresented talented and gifted students who qualify to take upper-level or advanced courses as they progress through secondary school. The project's goal is to help students recognize their potential and take advantage of rigorous courses of study that challenge them.

Student participants attend a residential summer program at The University of Iowa, which focuses on Advanced Placement (AP) test-taking skills. They also enjoy recreational and cultural experiences while they are on campus. The cost of attending the session is covered by the University. Iowa Talent Project students also complete courses at the Des Moines Central Academy and take at least three AP exams.

Upon finishing high school, successful ITP students are admitted to The University of Iowa and are given financial aid based on need and merit. Once enrolled at the University, students must maintain a designated grade-point average while taking approved courses as full-time students and must meet other specified requirements.

166:008 Iowa Talent Project 0 s.h.

Academy for Creative Engineering

The Academy for Creative Engineering brings gifted high school students to the University of Iowa campus for two weeks of intensive study and teamwork on an engineering project that involves creative problem-solving skills. Participants work in project teams guided by an engineer, who leads them through an engineering design process that includes defining a problem; establishing objectives and criteria; conducting research; brainstorming; considering alternative strategies or solutions; analyzing, constructing, and testing prototypes; conducting simulations; and evaluating results. Students also attend lectures about the technical and social issues relevant to their project, take project-related field trips, visit varied research laboratories at the University, and participate in career counseling designed for high-ability students.

Cultural and recreational activities fill out the schedule. Participants have access to the University of Iowa Libraries, computer facilities, and study areas. Housing and meals are provided at University of Iowa residence halls.

To be eligible for the institute, students must have finished grade 9, 10, or 11, have an interest in engineering and an aptitude for creative problem solving, and meet specific Belin-Blank Center requirements. Financial support may be available.

The institute is a collaboration of the University of Iowa College of Engineering and the Belin-Blank Center.

166:009 Academy for Creative Engineering 0 s.h.

National Scholars Academy

Students in grade 9, 10, or 11 may attend the National Scholars Academy (NSA), a one-week summer residential academic program at The University of Iowa for Belin-Blank Center students. NSA consists of eight classes over two one-week sessions. Students take a single advanced course for the entire week and may apply for one or two sessions.

166:010 National Scholars Academy 0 s.h.

Blank Summer Institute

The Blank Summer Institute for the Arts & Sciences is a two-week residential summer program for gifted students. Institute participants engage in an intensive and advanced educational experience that enhances their intellectual and social growth. The plan of study complements the regular school curriculum and consists of six courses that cover advanced science, math
problem solving, social sciences, creative writing, invention and innovation, and the arts. Institute instructors include outstanding Iowa teachers and University of Iowa faculty and staff.

Cultural and recreational activities are part of the program, and participants have access to the University of Iowa Libraries, computer facilities, and study areas. Housing and meals are provided at University residence halls.

To be eligible for the institute, students must have finished grade 7 or 8 and must be nominated by their schools. Financial support is available.

166:012 Blank Summer Institute for the Arts and Sciences 0 s.h.

Junior Scholars Academy

Students in grade 6, 7, or 8 may attend the Junior Scholars Academy (JSA), a one-week summer residential academic program at The University of Iowa for Belin-Blank Center students. JSA consists of 12 classes over three one-week sessions. Students take a single advanced course for the entire week and may apply for one, two, or three sessions.

166:031 Junior Scholars Academy 0 s.h.

Iowa Governor’s Institute

The Iowa Governor’s Institute for the Gifted and Talented is a two-week residential summer program that provides exceptionally talented students with an intensive and advanced educational experience designed to enhance their intellectual and social growth. Participants enroll in one course, “Leadership for Students Who Want to Make a Difference.”

In addition to academic study, participants enjoy a variety of cultural and recreational activities. They also have access to the University of Iowa Libraries, computer facilities, and study areas. Housing and meals are provided at University residence halls.

To be eligible for the institute, students must have finished grade 7 or 8. A nomination packet is required, and financial support is available.

166:033 Iowa Governor’s Institute 0 s.h.

Advanced Placement Academy

Students in grade 9, 10, or 11 may attend the Advanced Placement Academy (APA), a three-week summer program at The University of Iowa for Belin-Blank Center students. The academy provides Advanced Placement courses in an intensive setting; participants may choose one course from those offered.

166:034 Advanced Placement Academy 0 s.h.

Environmental Health Sciences Institute

The Environmental Health Sciences Institute for Rural Youth is a one-week residential summer program that offers talented students an intensive and advanced educational experience designed to enhance their intellectual and social growth. The institute’s curriculum was developed by the University of Iowa’s Environmental Health Sciences Research Center. Instruction is provided by the center’s staff.

The institute’s program integrates environmental health sciences topics and research, and provides varied learning activities, including didactic sessions, small-group discussions, laboratories, and field exercises. Students also engage in team-building activities and practical experiences with information technology.

Cultural and recreational activities round out the schedule. Participants have access to the University of Iowa Libraries, computer facilities, and study areas. Housing and meals are provided at University residence halls.

Students from rural communities (population 5,000 or less) who have completed grade 9 are eligible to attend the institute. A nomination packet is required.

166:035 Environmental Health Sciences Institute for Rural Youth 0 s.h.

Wallace Summer Institute

The Wallace Summer Institute for Rural Scholars is a one-week residential summer program that offers gifted students an intensive and advanced educational experience designed to enhance their intellectual and social growth. The institute’s curriculum was developed by the University of Iowa (State) Hygienic Laboratory. Instruction is provided by the laboratory’s staff.

Institute participants assess an aquatic environment from both field and laboratory perspectives. They observe and participate in sampling water, fish, insects, and other
components of an area stream. They learn about types of samples necessary to determine water quality, what tests are done and why, how to perform the tests and interpret the results, and how to report significant findings effectively.

The week's schedule also includes cultural and recreational activities. Participants have access to the University of Iowa Libraries, computer facilities, and study areas. Housing and meals are provided at University residence halls.

Students from rural communities (population 5,000 or less) who have completed grade 10 or 11 are eligible to attend the institute. A nomination packet is required, and financial support is available.

**Asian and Pacific Studies Institute**

The Asian and Pacific Studies Institute is a one-week residential summer program for gifted Iowa students in grades 9-11. The institute, a collaborative program of the UI Center for Asian and Pacific Studies and the Belin-Blank Center, provides talented students with an intensive and advanced educational experience designed to enhance intellectual and social growth. It enriches students' understanding of the Asia-Pacific region through examination of key historical and contemporary events and exploration of how other Asian nations have responded to the opportunities and challenges of modernity.

**Academy for Legal Thought and Action**

The Academy for Legal Thought and Action is a two-week residential summer program for gifted high school students in grades 9-11. The academy, a collaborative program of the Belin-Blank Center and the UI College of Law, provides a unique opportunity for selected high school students to participate in a sophisticated law project. Students work as a team with faculty members and practicing professionals to solve an actual law problem. They develop technical skills and research knowledge, and learn team problem-solving skills. To be eligible to attend the institute, students must meet specific Belin-Blank Center guidelines.

**Foreign Language Summer Institute**

The Foreign Language Summer Institute (FLSI) is a one-week summer residential program at The University of Iowa for 16 gifted students in grade 9, 10, or 11. FLSI is a collaborative program between the University of Iowa International Programs and the Belin-Blank Center.
Iowa Young Writers’ Studio

Director: Trish Walsh
Web site: http://www.uiowa.edu/~iyws

The Iowa Young Writers' Studio is a two-week summer residential program for high school students who love to write. Students work with experienced writing teachers at the University and build a community of peers.

The studio offers three courses of study: poetry, fiction, and creative writing (a mix of poetry, fiction, and creative nonfiction). All include seminars and workshops. In seminars, students examine literature as writers. In workshops they share their own writing, get feedback from their classmates and teacher, and discuss issues of narrative and form.

The studio offers two sessions in June and July.

Young writers who have completed grade 10, 11, or 12 are eligible to attend the studio. Application materials include an application form, a creative writing sample, a statement of purpose, a high school transcript, and a letter of recommendation from an English teacher or another instructor familiar with the applicant's writing. For complete application information, contact the Iowa Young Writers’ Studio or visit its web site.
Opportunity at Iowa

Director: Marcella David
Web site: http://www.uiowa.edu/~provost/oi/
index.html

Opportunity at Iowa offers the following programs for precollege students.

Iowa First Nations
Web site: http://www.uiowa.edu/~provost/oi/ifn

The Iowa First Nations Comprehensive Enrichment Program was established to encourage Native Americans of secondary school age to aim for professional careers in the sciences, engineering, and related fields. The Iowa First Nations Program brings Native American students entering grades 9 or 10 to The University of Iowa for a three-week residential summer program that focuses on the environment, microbiology, and the relationship between science and Native American cultures. In addition to course work, students participate in varied social and recreational activities. For more information about Iowa First Nations, contact Opportunity at Iowa.

402:023 Iowa First Nations 0 s.h.

Life Science Summer Program
Web site: http://www.uiowa.edu/~provost/oi/lssp

The Life Science Summer Program (LSSP) provides students who have just completed the ninth grade the opportunity for hands-on laboratory training and classroom instruction covering a wide range of topics in developmental biology. The curriculum also incorporates health issues and current events. For more information, contact Opportunity at Iowa.

402:002 Life Science Summer Program 0 s.h.

Secondary Student Training Program
Web site: http://www.uiowa.edu/~provost/oi/sstp

The Secondary Student Training Program provides opportunities for high school students to conduct research under the guidance of a faculty mentor. The course 402:001 gives students the option of participating in the research experience without earning college credit. For more information about the program or about taking 402:001 for credit, contact Opportunity at Iowa.

402:001 Secondary Student Training Program 0 s.h.
Upward Bound Project

Director: Jeanne Meyer
Web site: http://upwardbound.uiowa.edu

The University of Iowa Upward Bound Project, a division of Support Service Programs, hosts a summer academic program for eligible high school students from five southeast Iowa communities. Upward Bound students who participate in the summer program reside on the University campus for six weeks. They take mathematics, science, language arts, and foreign language courses and participate in extracurricular activities and field trips. Bridge students (those who have graduated from high school) enroll in University course work for the eight-week summer session.

To be admitted to the Upward Bound Project, students must:

- reside in the target area;
- be in the ninth or tenth grade;
- have a family income that meets U.S. Department of Education low-income guidelines;
- be potential first-generation college students;
- and show need for Upward Bound Project services.

The Upward Bound Project provides services to students until they graduate from high school and enter a postsecondary education program of their choice. The University's Upward Bound Project is funded by a U.S. Department of Education grant. Participants receive all services at no cost.

Currently, the University of Iowa project serves students who attend target schools in Burlington, Columbus Junction, Davenport, Fort Madison, Muscatine, and West Liberty, Iowa. Other postsecondary institutions in Iowa also sponsor Upward Bound Projects. High school students who do not attend target schools located in the communities served by The University of Iowa project should ask their counselors whether an Upward Bound Project serves their area.

For more information, contact the Upward Bound Project, The University of Iowa.
The Division of Continuing Education increases access to the services and resources of The University of Iowa. In partnership with the University's colleges and departments, the division provides high-quality credit and noncredit courses, workshops, and programs to traditional and nontraditional learners. Using a variety of locations, schedules, and technologies, including audiovisual and video services, the division helps provide a University of Iowa learning environment beyond the physical borders of campus.

The division's organization and services include the following.

**Center for Conferences and Institutes**

**Director:** Jo Dickens  
**Web site:** http://www.uiowa.edu/~confinst

The Center for Conferences and Institutes (CCI) is the University's principal agency for initiating, coordinating, conducting, and supporting noncredit continuing education programs. The center also serves as the University of Iowa's Continuing Education Unit (CEU) database.

CCI coordinates conferences for University faculty, departments, colleges, administrative units, student groups and related academic societies, professional associations, and other groups sponsored by the University.

CCI provides logistical management and administration of conferences; program content is designed by the unit presenting the conference. The center uses conference facilities on the University of Iowa campus, as well as those located in Iowa City and Coralville, statewide, and nationwide. CCI also manages national and international programs for University faculty members and departments. For more information, visit the Center for Conferences and Institutes web site.

**Center for Credit Programs**

**Director:** Doug Lee  
**Web site:** http://www.continuetolearn.uiowa.edu/ccp

In cooperation with participating University colleges and departments, the Center for Credit Programs delivers University of Iowa credit courses in Iowa City, statewide, and beyond, in a variety of formats and systems. For more information, contact the center or visit its web site.

**Saturday & Evening Classes**

**Web site:** http://www.continuetolearn.uiowa.edu/ccp/sande

The Center for Credit Programs sponsors University courses on campus at times convenient for part-time or nontraditional students. Undergraduate and graduate course work is available in a wide range of academic disciplines. For more information, contact the Center for Credit Programs.

**Summer and Winter Sessions**

**Director:** Doug Lee  
**Web sites:**  
- http://www.continuetolearn.uiowa.edu/ccp/summer  
- http://www.continuetolearn.uiowa.edu/ccp/winter

The University of Iowa conducts a summer session through the Center for Credit Programs with terms of three, six, and eight weeks. Classes also are offered outside of these normal summer session terms. A three-week winter session is offered during the break between the fall and spring semesters.

During the summer and winter sessions, students can take undergraduate and graduate course work. Classes during these sessions are taught...
mainly by University of Iowa faculty members, so
students receive the same first-rate instruction
provided during the spring and fall semesters.
Courses are offered in a variety of formats both
on and off campus. They are open to University
of Iowa students and to persons not formally
admitted to a degree program.

Distance Education Programs
and Courses

Web site: http://www.continuetolearn.uiowa.edu/
ccp/de

The Center for Credit Programs sponsors courses
via several distance education formats.
Guided Independent Study courses are available
through some 40 University departments.
Students may enroll at any time, work at their
own pace, and take up to nine months to
complete a course. For a catalog providing course
listings (including courses offered via the World
Wide Web), procedures, and enrollment
information, contact the Center for Credit
Programs or visit the Guided Independent Study
web site.

University extension classes are scheduled where
they best serve off-campus students, at the
request of public school officials, and/or where
professional, business, industrial, or other
qualified groups express a need for instruction.
The center also sponsors courses via the Iowa
Communications Network, microwave
television, the Internet, and other technologies.
For more information, contact the Center for
Credit Programs or visit its web site.

Bachelor of Liberal Studies

Web site: http://www.continuetolearn.uiowa.edu/
ccp/bls

The Bachelor of Liberal Studies (B.L.S.) degree is
offered by each of the three Board of Regents,
State of Iowa universities (The University of
Iowa, Iowa State University, and the University
of Northern Iowa). It serves adults whose job,
family, geographic location, or other personal
circumstances prevent them from attending
college as full-time, on-campus students. The
program does not have a campus residence
requirement.

Students may earn credit toward the degree in
courses offered through the Center for Credit
Programs, via campus-based or distance
education formats, or through daytime
on-campus courses.

At The University of Iowa, the B.L.S. is awarded
by the College of Liberal Arts and Sciences and
administered by the Division of Continuing
Education. For a detailed program description,
see Liberal Studies (College of Liberal Arts and
Sciences) in the Catalog or visit the Center for
Credit Programs web site.

Center for Media
Production

Director: Daniel G. Lind
Web site: http://ui.media.uiowa.edu

The Center for Media Production provides
professional services for development of media
programs and materials that support the
University's educational and promotional needs.
It collaborates with University of Iowa faculty
and staff members, offering consultation,
planning, design, development, and marketing
services. The Center for Media Production has
received more than 40 major awards, including a
regional Emmy, CINE Golden Eagles, and New
York Festival World Medals.

Services are provided in the following areas:

Video: The center's staff designs and develops
video programs and promotional messages, and
authors interactive media (DVD and CD-ROM).
Services include film-style video production;
digitizing of video for web use; video editing,
special effects creation, electronic graphics, art,
and animation; transfer of 16mm film to video;
and videotape and DVD duplication, including
conversion to or from world television standards.

Photography: The Photo Service professional
staff provides location photography and printing
services for promotions, portraits, photos of
conference attendees, summer camps, University
administrators, visiting dignitaries, University
events, University construction projects, and
more. In-house processing and printing is
available for black-and-white images and for color
digital images of all sizes. Copy photography
services include copying and enhancement of
rare negatives and photos. Photo Services also
maintains an extensive archive of historical UI
photos.

Audio: The center offers a wide range of
professional services, including audio recording
on location or on a studio sound stage, editing
and sound mixing, audio noise reduction, and
duplication of audiotapes and CDs. Projects
include instructional and exam materials, radio
programs, video soundtracks, audio for web
courses and applications, and recording and
editing of student audition tapes and faculty solo performances.

**Graphics:** Professional artistic services are available for development of posters and portable displays; large permanent displays; web site enhancements; lamination, certificates, and maps; and creation of designs, calligraphy, illustrations, conference materials, and University signs. Portable display units are available for rent by traveling faculty and staff. Each year, the graphics staff designs and builds the University’s 1,200-square-foot Iowa State Fair exhibit.

**Media publishing and marketing:** The center markets and distributes media products originated at the University. Royalties are paid to sponsoring University departments and authors.

**Labor Center**

**Director:** Daniel J. Holub  
**Web site:** [http://www.continuetolearn.uiowa.edu/laborctr](http://www.continuetolearn.uiowa.edu/laborctr)

The University of Iowa Labor Center provides educational and research services to Iowa trade unionists. The center offers a wide range of continuing and distance education programs on citizenship, collective bargaining, economics, globalization and human rights, grievance and arbitration, labor and employment law, labor history, organization building and strategic planning, union leadership and administration, public policy, workplace health and safety, worker participation, and other areas relevant to union members. Courses are offered both on and off campus at times and locations convenient to working adults. The Labor Center also provides research assistance and technical information.

**Institute of Public Affairs**

The Institute of Public Affairs provides services and information to help officials maintain and strengthen the effectiveness of Iowa’s state and local governments. The institute offers the following educational programs, information, and publications for Iowa citizens and government leaders.

**Strategic planning for councils and boards:** facilitation and expert guidance for policy leadership groups determining goals and priorities

**Public management assistance:** review of city operations, policies, and fiscal conditions for smaller communities

**Municipal Leadership Academy:** an extensive training program for newly elected city council members and mayors

**Iowa Municipal Management Institute:** conference for city and county administrators

**Local Government Services Sharing Program:** help for local governments in identifying needs and creating shared service arrangements

**Municipal Policy Leaders’ Handbook:** basic guide for mayors and council members in Iowa
Board of Regents, State of Iowa

The Board of Regents, State of Iowa, governs The University of Iowa, Iowa State University of Science and Technology, the University of Northern Iowa, the Iowa Braille and Sight-Saving School, and the Iowa School for the Deaf. The Board consists of nine members.

President: Michael G. Gartner, Des Moines
Amir I. Arbisser, Davenport
Mary Ellen Becker, Oskaloosa
Tom W. Bedell, Spirit Lake
Robert N. Downer, Iowa City
Ruth R. Harkin, Cumming
Jenny Rokes, Cedar Falls
Rose Vasquez, Des Moines
Teresa Wahlert, West Des Moines

1040 Administrative Officers
Academic Personnel

The following persons held University of Iowa faculty appointments with the rank of instructor, assistant professor, associate professor, or professor AUGUST 3, 2005. In this listing, the year of first appointment follows the departmental identification, and the year of present appointment is given in parentheses.

Abdoo, Yvonne Marie, BSN MERCY COLLEGE OF DETROIT, 1970, MFA MICHIGAN, 1987; Adjunct Assistant Professor, Nursing, 2003

Abiose, Ademola K., MBBS Lagos, 1985; Assistant Professor (Clinical), Pediatrics, 2000 (2000)

Advani, Tiffany Sara, BA EXETER, 1988, BS LONDON, 1995, MS IOWA, 2003; Adjunct Instructor, Geoscience, 2004

Agwul, Yashpal D., MBBS Baroda, 1983, PHD Kuala Lumpur, 1987; Assistant Professor, Pathology, 2001 (2001)
Academic Personnel

Agar, Agustin, 1982; Assistant Professor, Clinical Surgery, 1982 (1982)

Agarwal, Agustin, 1987; Assistant Professor, Psychiatry, 1987 (1987)

Agarr, Jeffrey, 1988; Assistant Professor, Clinical Medicine, 1988 (1988)

Ahluwalia, Jatinder P., BS EMORY, 1978; MD Univ Autonoma de Guadalajara, 1982; Assistant Professor, Clinical Surgery, 1982 (1982)

Ahluwalia, Jatinder P., BSC MCGILL, 1984; MD JEFFERSON, 1994; Assistant Professor, Internal Medicine, 2000 (2000)

Ahn, Joong, MD SEOUL NATIONAL, 1989, MS SEOUL NATIONAL, 1994, PHD SEOUL NATIONAL, 1999;

Aljun, Nader, DO OSTEOPATHIC MEDICINE, 1985; Adj Clinical Asst Professor, Pediatrics, 1999 (1999)

Alkar, Raja M., MD KING EDWARD MEDICAL, 1971; Adj Clinical Asst Professor, Psychiatry, 1999 (1999)

Akridge, Jay Taylor, BS MURRAY STATE, 1982, MS PURDUE, 1983, PHD PURDUE, 1986;

Aksan, Nazan Suhelya, BS IOWA, 1993, PHD WISCONSIN, 2001;

Al-Shawwa, Baha’Uddin A., MD University of Jordan, 1995;

Albers, Gary Ronald, BS IOWA, 1975; Adjunct Instructor, Pharmacy, 1997 (1997)

Alderton, Megan Elaine, PHARM DRAKE, 2001; Adjunct Assistant Professor, Pharmacy, 2003

Alexander, Bruce, BS Drake, 1974, PHARM MINNESOTA, 1976; Professor/Clinical Pharmacy/Psychiatry, 1970 (2000)

Alexander, Saramma J., MBBS CHRISTIAN MED SCHOOL-JINDI, 1965; Adj Clinical Asst Professor, Internal Medicine, 1979 (1979)

Algan, Ece, BS ISTANBUL TEKNIK, 1994, MA MARMARA, 1996, PHD Ohio University, 2003; Assistant Professor, Communication Studies, 2002

Ali, Saba Rasheed, BS WEST VIRGINIA, 1992, MA LOLOYA, 1996; PHD OREGON, 2001; Assistant Professor, Psych & Quant Foundations, 2003

Allbaugh, Laurie Beth, BS IOWA, 1978; Adjunct Instructor, Pharmacy, 2002

Allen, Daniel P., MD IOWA, 1983; Adj Clinical Asst Professor, Internal Medicine, 1987 (1989)

Allyn, Jeffery Lynn, MD TULANE, 1985; Adj Clinical Asst Professor, Family Medicine, 2001 (2001)

Alton, Everett D., BA IOWA STATE TEACHERS, 1939, MSU IOWA, 1955; Associate Professor Emeritus, Electrical-Computer Engineering, 1955 (1967)

Amad, Paula T., BA MELBOURNE, 1990, MA MELBOURNE, 1990, PHD CHICAGO, 2002; Assistant Professor, Cinema & Comparative Literature, 2004

Amada, Kenneth, Professor Emeritus, Music, 1967 (1976)

An, Hyonggin, MD TULANE, 1985; Adj Clinical Asst Professor, Internal Medicine, 1987 (1989)

Andsager, Julie, BS Kansas State University, 1986; MS Kansas State University, 1990, PHD University of Tennessee, 1993; Associate Professor, Journalism & Mass Communication, 2003 (2003)

Ankney, John W., BA SIMPSON, 1974, DO COLLEGE OF OSTEOPATHIC ME, 1977; Adj Clinical Asst Professor, Family Medicine, 1982

Anton, Daniel Christophe, BS NORTHWESTERN, 1982, MS SAMUEL MERRITT, 1998, PHD IOWA, 2002; Assistant Professor, Occupational & Environmental Health/ Physical Therapy, 2003

Apicella, Michael A., AB College of the Holy Cross, 1959, MD SUNY-Buffalo, 1963; Professor, Microbiology, 1993 (1993)

Aquino, Steven A., BS STATE UNIV OF NY-BINGHAMTON, 1975, DDS NORTH CAROLINA, 1979, MS NORTH CAROLINA, 1982; Professor, Prosthodontics, 1982 (1993)

Arab, Siddig M., MBBS KING EDWARD MEICAL, 1955; Adj Clinical Asst Professor, Pediatrics, 1977 (1977)

Aravamudhan, Raman, ME Bharathiar Univ, India, 1980; Adjunct Instructor, Computer Science, 2003

Archer, Brad James, BA Northern Iowa, 1989, MD SOUTH DAKOTA, 1999;

Admission Rules Common to the Three State Universities

681—1.1(262) Admission of undergraduate students directly from high school

Students desiring admission must meet the requirements in this section and also any special requirements for the curriculum, school, or college of their choice.

Applicants must submit a formal application for admission, together with the appropriate application fee as approved by the state board of regents pursuant to Iowa Code subsection 262.9(18) and detailed in rule 681-1.7(262), and have their secondary school provide a transcript of their academic record, including credits and grades, rank in class, and certification of graduation. Applicants must also submit scores from the American College Test (ACT) or the Scholastic Aptitude Test (SAT), or the equivalent, as determined by each university. The Test of English as a Foreign Language (TOEFL) is required of foreign students whose first language is not English. Applicants may be required to submit additional information or data to support their applications.

1.1(1) Graduates of approved Iowa high schools who have the subject matter background as recommended by each university and who rank in the upper one-half of their graduating class will be admitted. Applicants who are not in the upper one-half of their graduating class may, after a review of their academic and test records, and at the discretion of the admissions officers:

a. Be admitted unconditionally,
b. Be admitted conditionally,
c. Be required to enroll for a tryout period during a preceding summer session, or
d. Be denied admission.

1.1(2) Graduates of accredited high schools in other states may be held to higher academic standards, but must meet at least the same requirements as graduates of Iowa high schools. The options for conditional admission or summer tryout enrollment may not necessarily be offered to these students.

1.1(3) Applicants who are graduates of nonapproved high schools will be considered for admission in a manner similar to applicants from approved high schools, but additional emphasis will be given to scores obtained on standardized examinations.

1.1(4) Applicants who are not high school graduates, but whose classes have graduated, may be considered for admission. They will be required to submit all academic data to the extent that it exists and achieve scores on standardized examinations which will demonstrate that they are adequately prepared for academic study.

Students with superior academic records may be admitted, on an individual basis, for part-time university study while enrolled in high school or during the summers prior to high school graduation.

In rare situations, exceptional students may be admitted as full-time students to a regent university before completing high school. Early admission to a regent university is provided to serve persons whose academic achievement and personal and intellectual maturity clearly suggest readiness for collegiate level study. Each university will specify requirements and conditions for early admission.

This rule is intended to implement Iowa Code section 262.9(3).
681—1.2(262) Admission of undergraduate students by transfer from other colleges

Students desiring admission must meet the requirements in this section and also any special requirements for the curriculum, school, or college of their choice.

Applicants must submit a formal application for admission, together with the appropriate application fee as approved by the state board of regents pursuant to Iowa Code subsection 262.9(18) and detailed in rule 681-1.7(262), and request that each college they have attended send an official transcript of record to the admissions office. High school academic records and standardized test results may also be required. The Test of English as a Foreign Language (TOEFL) is required of foreign students whose first language is not English.

1.2(1) Transfer applicants with a minimum of 24 semester hours of graded credit from regionally accredited colleges or universities, who have achieved for all college work previously attempted the grade point required by each university for specific programs, will be admitted. Higher academic standards may be required of students who are not residents of Iowa.

Applicants who have not maintained the grade point required by each university for specific programs or who are under academic suspension from the last college attended may, after a review of their academic and test records, and at the discretion of the admissions officers:

a. Be admitted unconditionally,

b. Be admitted conditionally,

c. Be required to enroll for a tryout period during a preceding summer session, or

d. Be denied admission.

1.2(2) Admission of students with fewer than 24 semester hours of college credit will be based on high school academic and standardized test records in addition to review of the college record.

1.2(3) Transfer applicants under disciplinary suspension will not be considered for admission until information concerning the reason for the suspension has been received from the college assigning the suspension. Applicants granted admission under these circumstances will be admitted on probation.

1.2(4) Transfer applicants from colleges and universities not regionally accredited will be considered for admission on an individual basis taking into account all available academic information.

This rule is intended to implement Iowa Code section 262.9(3).

681—1.3(262) Transfer credit practices

The regent universities endorse the Joint Statement on Transfer and Award of Academic Credit approved in 1978 by the American Council on Education (ACE), the American Association of Collegiate Registrars and Admissions Officers (AACRAO), and the Council on Postsecondary Accreditation (COPA). The current issue of Transfer Credit Practices of Selected Educational Institutions, published by the American Association of Collegiate Registrars and Admissions Officers (AACRAO), and publications of the Council on Postsecondary Accreditation (COPA) are examples of references used by the universities in determining transfer credit. The acceptance and use of transfer credit is subject to limitations in accordance with the educational policies operative at each university.

1.3(1) Students from regionally accredited colleges and universities

Credit earned at regionally accredited colleges and universities is acceptable for transfer except that credit in courses determined by the receiving university to be of a remedial, vocational, or technical nature, or credit in courses or programs in which the institution granting the credit is not directly involved, may not be accepted, or may be accepted to a limited extent.

Of the course work earned at a two-year college, students may apply up to one-half but no more than 65 hours of the credits required for a bachelor's degree toward that degree at a regent university. This policy became effective September 29, 1993.

1.3(2) Students from colleges and universities which have candidate status

Credit earned at colleges and universities which have become candidates for accreditation by a regional association is acceptable for transfer in a manner similar to that from regionally accredited colleges and universities if the credit is applicable to the bachelor's degree at the receiving university. This policy became effective September 29, 1993.
1.3(3) Students from colleges and universities not regionally accredited

When students are admitted from colleges and universities not regionally accredited, they may validate portions or all of their transfer credit by satisfactory academic study in residence, or by examination. Each university will specify the amount of the transfer credit and the terms of the validation process at the time of admission.

In determining the acceptability of transfer credit from private colleges in Iowa which do not have regional accreditation, the regent committee on educational relations, upon request from the institutions, evaluates the nature and standards of the academic program, faculty, student records, library, and laboratories.

In determining the acceptability of transfer credit from colleges in states other than Iowa which are not regionally accredited, acceptance practices indicated in the current issue of Transfer Credit Practices of Selected Educational Institutions will be used as a guide. For institutions not listed in the publication, guidance is requested from the designated reporting institution of the appropriate state.

1.3(4) Students from foreign colleges and universities

Transfer credit from foreign educational institutions may be granted after a determination of the type of institution involved and after an evaluation of the content, level, and comparability of the study to courses and programs at the receiving university. Credit may be granted in specific courses, but is frequently assigned to general areas of study. Extensive use is made of professional journals and references which describe the education systems and programs of individual countries.

This rule is intended to implement Iowa Code section 262.9(3).

Residence

681 — 1.4(262) Classification of residents and nonresidents for admission, tuition, and fee purposes

1.4(1) General

a. A person enrolling at one of the three state universities shall be classified as a resident or nonresident for admission, tuition, and fee purposes by the registrar or someone designated by the registrar. The decision shall be based upon information furnished by the student and other relevant information.

b. In determining resident or nonresident classification, the issue is essentially one of why the person is in the state of Iowa. If the person is in the state primarily for educational purposes, that person will be considered a nonresident. For example, it may be possible that an individual could qualify as a resident of Iowa for such purposes as voting, or holding an Iowa driver’s license, and not meet the residency requirements as established by the Board of Regents for admission, tuition, and fee purposes.

c. The registrar, or designated person, is authorized to require written documents, affidavits, verifications, or other evidence deemed necessary to determine why a student is in Iowa. The burden of establishing that a student is in Iowa for other than educational purposes is upon the student.

A student may be required to file any or all of the following:

(1) A statement from the student describing employment and expected sources of support;
(2) A statement from the student’s employer;
(3) A statement from the student’s parents verifying nonsupport and the fact that the student was not listed as a dependent on tax returns for the past year and will not be so listed in future years;
(4) Supporting statements from persons who might be familiar with the family situation;
(5) Iowa state income tax return.

d. Change of classification from nonresident to resident will not be made retroactive beyond the term in which application for resident classification is made.

e. A student who gives incorrect or misleading information to evade payment of nonresident fees shall be subject to serious disciplinary action and must also pay the nonresident fees for each term previously attended.

f. Review Committee. These regulations shall be administered by the registrar or someone designated by the registrar. The decision of the registrar or designated person may be appealed to a university review committee. The finding of the review committee may be appealed to the state board of regents.

1.4(2) Guidelines

The following guidelines are used in determining the resident classification of a student for admission, tuition, and fee purposes:
a. A financially dependent student whose parents move from Iowa after the student is enrolled remains a resident provided the student maintains continuous enrollment. A financially dependent student whose parents move from Iowa during the senior year of high school will be considered a resident provided the student has not established domicile in another state.

b. In deciding why a person is in the state of Iowa, the person’s domicile will be considered. A person who comes to Iowa from another state and enrolls in any institution of postsecondary education for a full program or substantially a full program shall be presumed to have come to Iowa primarily for educational reasons rather than to establish a domicile in Iowa.

c. A student who was a former resident of Iowa may continue to be considered a resident provided absence from the state was for a period of less than 12 months and provided domicile is reestablished. If the absence from the state is for a period exceeding 12 months, a student may be considered a resident if evidence can be presented showing that the student has long-term ties to Iowa and reestablishes an Iowa domicile.

A person or the dependent of a person whose domicile is permanently established in Iowa, who has been classified as a resident for admission, tuition, and fee purposes, may continue to be classified as a resident provided domicile is reestablished. If the absence from the state is for a period exceeding 12 months, a student may be considered a resident if evidence can be presented showing that the student has long-term ties to Iowa and reestablishes an Iowa domicile.

d. A student who moves to Iowa may be eligible for resident classification at the next registration following 12 consecutive months in the state provided the student is not enrolled as more than a half-time student (6 credits for an undergraduate or professional student, 5 credits for a graduate student) in any academic year term, is not enrolled for more than 4 credits in a summer term for any classification, and provides sufficient evidence of the establishment of an Iowa domicile.

e. A student who has been a continuous student and whose parents move to Iowa may become a resident at the beginning of the next term provided the student is dependent upon the parents for a majority of financial assistance.

f. A person who is moved into the state as the result of military or civil orders from the government for other than educational purposes, or the dependent of such a person, is entitled to resident status. However, if the arrival of the person under orders is subsequent to the beginning of the term in which the student is first enrolled, nonresident fees will be charged in all cases until the beginning of the next term in which the student is enrolled. Legislation, effective July 1, 1977, requires that military personnel who claim residency in Iowa (home of record) will be required to file Iowa resident income tax returns.

g. A person who has been certified as a refugee or granted asylum by the appropriate agency of the United States who enrolls as a student at a university governed by the Iowa state board of regents may be accorded immediate resident status for admission, tuition, and fee purposes where the person:

(1) Comes directly to the state of Iowa from a refugee facility or port of debarkation; or
(2) Comes to the state of Iowa within a reasonable time and has not established domicile in another state.

Any refugee or individual granted asylum not meeting these standards will be presumed to be a nonresident for admission, tuition, and fee purposes and thus subject to the usual method of proof of establishment of Iowa residency.

h. An alien who has immigrant status establishes Iowa residency in the same manner as a United States citizen.

i. At the regent institutions, American Indians who have origins in any of the original people of North America and who maintain a cultural identification through tribal affiliation or community recognition with one or more of the tribes or nations connected historically with the present state of Iowa, including the Iowa, Kickapoo, Menominee, Miami, Missouri, Ojibwa (Chippewa), Omaha, Otoe, Ottawa (Odawa), Potawatomi, Sac and Fox (Sauk, Meskwaki), Sioux, and Winnebago (Ho Chunk), will be assessed Iowa resident tuition and fees.
1.4(3) Facts

a. The following circumstances, although not necessarily conclusive, have probative value in support of a claim for resident classification:

(1) Reside in Iowa for 12 consecutive months, and be primarily engaged in activities other than those of a full-time student, immediately prior to the beginning of the term for which resident classification is sought.
(2) Reliance upon Iowa resources for financial support.
(3) Domicile in Iowa of persons legally responsible for the student.
(4) Former domicile in the state and maintenance of significant connections therein while absent.
(5) Acceptance of an offer of permanent employment in Iowa.
(6) Other facts indicating the student's domicile will be considered by the universities in classifying the student.

b. The following circumstances, standing alone, do not constitute sufficient evidence of domicile to effect classification of a student as a resident under these regulations:

(1) Voting or registration for voting.
(2) Employment in any position normally filled by a student.
(3) The lease of living quarters.
(4) Admission to a licensed practicing profession in Iowa.
(5) Automobile registration.
(6) Public records, for example, birth and marriage records, Iowa driver's license.
(7) Continuous presence in Iowa during periods when not enrolled in school.
(8) Ownership of property in Iowa, or the payment of Iowa taxes.

This rule is intended to implement Iowa Code section 262.9.

681—1.5(262) Registration and transcripts—general

A person may not be permitted to register for a course or courses at a state board of regents institution until any delinquent accounts owed by the person to an institution or any affiliated organization for which an institution acts as fiscal agent have been paid.

A state board of regents institution may withhold official transcripts of the academic record of a person until any delinquent accounts owed by the person to an institution or any affiliated organization for which an institution acts as fiscal agent have been paid.

This rule is intended to implement Iowa Code section 262.9.

Supplemental Specific Rules to The University of Iowa

681—1.6(262) College-bound program

1.6(1) Definitions.

“Accredited private institution” means an institution of higher education as defined in Iowa Code section 261.9, subsection 5.

“Commission” means the college aid commission.

“Financial need” means the difference between the student's financial resources, including resources available from the student's parents and the student, as determined by a completed parents' financial statement and including any non-campus-administered federal or state grants and scholarships, and the student's estimated expenses while attending the institution. A student shall accept all available federal and state grants and scholarships before being considered eligible for grants under the Iowa minority academic grants for economic success program. Financial need shall be reconsidered on at least an annual basis.

“Full-time student” means an individual who is enrolled at an accredited private institution or board of regents university for at least 12 semester hours or the trimester or quarter equivalent.

“Minority person” means an individual who is black, Hispanic, Asian, or a Pacific Islander, American Indian, or an Alaskan Native American.

“Part-time student” means an individual who is enrolled at an accredited private institution or board of regents university in a course of study including at least three semester hours or the trimester or quarter equivalent of three semester hours.

“Program” means the Iowa minority academic grants for economic success program established in this division.

1.6(2) Policy on college-bound program.

a. The regent institutions will cooperate with other state and local agencies, including the department of education, the college aid commission, and educational institutions in implementing the college-bound program.
b. The universities will develop programs for elementary, middle and secondary school students and their families in the following areas:
   (1) Encouragement to consider attending a postsecondary institution;
   (2) Enrichment and academic preparation;
   (3) Information about how to apply for admission.

c. College-bound program vouchers will be awarded to students on the basis of the participation of the student and the student’s family in the college-bound program. One voucher will be awarded for participation in each college-bound program sponsored by a university.
   (1) Each university will maintain records concerning those students who participate in the college-bound program, according to its established policies and procedures. The records will include information on those students who have received college-bound program vouchers which are described in Iowa Code section 262.92(2). The University of Iowa will maintain a central record on all students who have received college-bound program vouchers on behalf of all regent institutions and will make appropriate information available to the college aid commission.
   (2) College-bound program vouchers may be used by students enrolled at a regent institution or at a private college or university in Iowa.
   (3) A student holding vouchers and enrolling at a regent institution will receive priority in the award of funds under the Iowa minority academic grants for economic success (IMAGES) program. Awards under the IMAGES program are made on the basis of financial need. A student may be eligible for an additional award from the institution in which the student is enrolled.
   (4) A student holding vouchers and enrolling at a private college or university in Iowa will receive priority in the award of funds under the Iowa minority academic grants for economic success program as provided by the rules of the college aid commission.
   (5) The presidents, or their designees, will administer and coordinate the college-bound program at the universities. As part of the coordination, they will establish liaison with the appropriate state and local agencies, serve as the university contact and promote collaborative efforts among the regent universities and other appropriate agencies and institutions. Annual reports to the board of regents shall be prepared by each regent university. The reports shall contain relevant information as to the accomplishments of the program in the past year and a plan of action with goals and objectives for the forthcoming year. Reports shall be submitted to the board of regents on October 1 of each year. This rule is intended to implement Iowa Code section 262.92.

681—1.7(262) Application fees

Application fees required for admission to the University of Iowa, Iowa State University and the University of Northern Iowa are as follows:

University of Iowa
Undergraduate domestic student: $40
Undergraduate international student: $60
Graduate/professional domestic student: $60
Graduate/professional international student: $85
Re-entry fee: $20

681—2.1(262) Formal application for admission

All applicants for admission to any college of the University of Iowa must submit a formal application for admission with the required official transcripts and other supporting material as required to the director of admissions. Students may not be registered until they have been issued an admission statement by the director of admissions.

681—2.3(262) College of Business Administration

2.3(1) Application for admission

Applications for admission to the college of business administration should be submitted to the director of admissions.

Applicants are urged to apply as early as possible, since this will give the admissions committee more time to devote to each application. Closing dates for receiving applications will be announced well in advance of the opening date of any session.

2.3(2) Requirements for admission

For admission to the college of business administration an applicant must have—
   a. Completed specific course work as prescribed by the faculty of the college.
   b. Attained satisfactory scores on the university’s required admission examinations.
   c. Maintained a satisfactory grade-point average on all courses undertaken, and on all courses undertaken at the University of Iowa, and on all courses undertaken in business and economics.
Applications from students who have minor deficiencies in meeting grade-point requirements specified above will be reviewed by the admissions committee of the college, and upon favorable recommendation of the committee, such students may be granted conditional or probationary admissions.

Fulfillment of the minimal requirements listed above, however, does not assure admission to the college of business administration. From those applicants who meet the minimum requirements, the admissions committee will select the applicants who, in their judgment, appear to be best qualified.

681—2.4(262) College of Dentistry

2.4(1) Application for admission
Address all inquiries regarding admission to the Director of Admissions, University of Iowa.

Applicants are urged to apply as early as possible, since this will give the admissions committee more time to devote to each application. Closing dates for receiving applications will be announced well in advance of the opening date of any session.

Applicants for admission to dentistry are encouraged to complete a program leading to a baccalaureate degree before entering dentistry. Applicants should consider a combined program of liberal arts and dentistry which would qualify them for a baccalaureate degree upon the completion of the freshman year in dentistry. Preference will be given to students who have the baccalaureate degree or who have completed the requirements for the degree in a combined program.

Fulfillment of the specific requirements for admission listed does not ensure admission to the college of dentistry. From the applicants meeting the minimum requirements, the admissions committee will select the applicants who in their judgment appear to be best qualified for the study and practice of dentistry.

Each applicant must place on file in the office of the director of admissions the completed application form and an official transcript from each college attended.

The college work outlined below will suffice to meet the minimal academic requirements for admission to the college of dentistry.

The college curriculum must include at least three academic years of accredited work comprising not less than 96 semester hours and including specific required science courses as prescribed by the faculty of the college. Electives should be chosen so as to give the applicant a well-rounded educational background.

In order to meet minimum scholarship requirements, the applicant should attain a cumulative g.p.a. of 2.5. Since the quality of course work in predental science is basic to success in dentistry, special consideration to such college work is given by the admissions committee. The grade-point average is based upon the University of Iowa's marking system in which a grade of “A” is equivalent to four points. Other marking systems will be evaluated by the office of admissions and the committee on admissions of the college of dentistry.

Applicants who have completed the requirements for admission to dentistry five or more years prior to seeking admission to this college of dentistry will be considered by the admissions committee only under exceptional conditions.

Preference will be given to applicants who are residents of Iowa, but consideration will also be given to outstanding nonresidents.

Personal interviews will be required of applicants for admission to the college of dentistry. Applicants will be notified when they should appear for the required interviews with members of the admissions committee.

All applicants must complete the dental aptitude tests sponsored by the council on dental education of the American Dental Association. Tests are given three times annually. The University of Iowa is a testing center.

To facilitate early selection, applicants for admission to the college of dentistry are urged to complete the aptitude test no later than October to enable the admissions committee to begin its selection in December.

Accepted applicants are required to make the required deposit within two weeks after notification of favorable action on their applications. This deposit is not refundable but is credited toward the first fee payment. The applicant who fails to make the deposit within the time specified forfeits a place in the entering class.

Applicants accepted for admission are required to submit a satisfactory physical examination report to the university student health service within two weeks following notification of acceptance.

All applicants must also complete, through student health service, an X-ray film of the chest and a successful vaccination against smallpox prior to registration.
2.4(2) Advanced standing
Applications for admission with advanced standing are handled as individual cases.

681—2.5(262) College of Engineering
Address all inquiries regarding admission to the Director of Admissions, University of Iowa, Iowa City, Iowa.

Closing dates for receiving applications will be announced well in advance of the opening date of any session.

2.5(1) Admission of freshman students
The applicant must submit a formal application for admission and must have the secondary school provide a certificate of high school credits, including a complete statement of the applicant's high school record, rank in class, scores on standardized tests, and certification of high school graduation. The applicant must also submit any other evidence such as a certificate of health that may be required by this university.

Each applicant must have attained satisfactory scores on the university's required admission examinations, maintained a satisfactory cumulative grade-point average, achieved satisfactory rank in graduating class, and successfully completed all prerequisite courses. The university with the approval of the state board of regents shall establish and periodically review specific minimum requirements for admission to the college of engineering. Among the items to be so determined are test score, grade-point average, class rank and prerequisite courses. These specific determinations will be published in the university catalog.

From applicants who do not meet minimum admission requirements, the director of admissions may after a review of the applicant's record: (a) Admit unconditionally, (b) admit on probation, (c) require enrollment for a tryout period during a preceding summer session, or (d) deny admission.

2.5(2) Admission of undergraduate students by transfer
The applicant must submit a formal application and official transcript of college work. Each applicant should have:

- Maintained satisfactory progress in mathematics.
- Attained satisfactory scores on the university's required admission examinations.
- Maintained a satisfactory cumulative grade-point average on all college work undertaken.

From applicants who do not meet recommended requirements, the director of admissions will review individual records and may offer probationary admission.

681—2.6(262) Graduate College
Graduates of any college or university accredited by regional accrediting associations may if the academic record is satisfactory be admitted to the graduate college. Admission to the graduate college is not the equivalent of acceptance as a candidate for an advanced degree. Such acceptance is given usually after the completion in residence of work at the university and upon recommendation of the major department and approval by the dean of the graduate college. The acceptance of a student as a degree candidate is determined upon the merits of each individual case.

A student who is within 4 semester hours of having satisfied all the requirements for the bachelor's degree at the University of Iowa may be given a tentative admission to the graduate college.

681—2.7(262) College of Law
2.7(1) Application for admission
Address all inquiries concerning admission to the Director of Admissions, University of Iowa, Iowa City, Iowa. Beginning students may enter the college of law only in the summer session or the fall semester. Closing dates for receiving applications will be announced well in advance of the opening date of any session.

To be considered for admission, an applicant should have attained a cumulative g.p.a. of at least 2.3 on all college work undertaken. The grade-point average is based upon the University of Iowa's marking system in which a grade of “A” is equivalent to four points. Other marking systems will be evaluated by the office of admissions.

Applicants for admission must present a baccalaureate degree from an approved college or university prior to commencing work in the college of law.

Each applicant for admission must take the Law School Admission Test administered by the Educational Testing Service, Princeton, New Jersey, and have the score forwarded to the college of law. The test is given several times per year and may be taken at numerous locations in
the United States and throughout the world. Applicants are urged to take the test in the fall or winter preceding the fall semester for which they are making application. Except upon a showing acceptable to it, the admissions committee will not consider applications from students who fail to take the test prior to the June 1 preceding the fall semester in which they wish to enter.

Fulfillment of the specific requirements for admission listed above does not ensure admission to the college of law. From the applicants meeting the minimum requirements, the admissions committee of the college of law will select those applicants who, in their judgment, appear to be best qualified for the study and practice of law. The law admissions committee may require personal interviews of applicants.

2.7(2) Admission with advanced standing

A transfer student may be eligible for admission if the student (a) has attended a school approved by the Association of American Law Schools; (b) is in good standing at the time of withdrawal (evidenced by a letter from the dean of the school from which transferring); (c) meets the admission requirements for beginning students; and (d) has done substantially above average work in the law school the student attended.

Where an applicant has completed more than one year of law study, advanced standing will be permitted only in exceptional cases. Applicants for admission with advanced standing should comply with the procedures required for admission to the first-year class.

681—2.8(262) College of Medicine

2.8(1) Application for admission

Address all inquiries regarding admission to the Director of Admissions, University of Iowa.

Applicants are urged to apply as early as possible, since this will give the admissions committee more time to devote to each application. Closing dates for receiving applications will be announced well in advance of the opening date of any session.

Fulfillment of the specific requirements for admission listed below does not ensure admission to the college of medicine. From the applicants meeting the specific requirements, the admissions committee of the college of medicine will select those applicants who in their judgment appear to be best qualified for the study and practice of medicine.

Prior to entrance an applicant must:

a. Have received the baccalaureate degree; or

b. Have completed three years of a combined baccalaureate-medicine curriculum which qualifies the applicant to receive the baccalaureate degree on completion of the first year in medicine; or

c. Have completed three years of a baccalaureate program which includes the general graduation requirements of the college of liberal arts of the University of Iowa for the combined baccalaureate degree.

Each applicant must place on file in the office of the director of admissions the completed application form and an official transcript from each college attended.

The college work as outlined below will suffice to meet the minimal academic requirements for admission to the college of medicine.

Applicants who have completed the baccalaureate degree and required courses five or more years prior to seeking admission to this college of medicine will be considered by the admissions committee only under exceptional conditions.

The college curriculum must include at least three years (equivalent to 96 semester hours) including specific required science courses as prescribed by the faculty of the college.

Students planning to study medicine should bear in mind that other college work is required in addition to prerequisite sciences because it offers an opportunity to secure a well-rounded education, which is of special importance to those entering the medical profession. In the selection of applicants, preference will be given to those who give evidence of having obtained such a broad education.

To be considered for admission, an applicant must have attained a g.p.a. of at least 2.5 for all college work undertaken. As the quality of work in premedical science is very basic to success in medicine, special attention will be given by the admissions committee to grades in science. The grade-point average is based upon the University of Iowa’s marking system in which a grade of “A” is equivalent to four points. Other marking systems will be evaluated by the office of admissions and the committee on admissions of the college of medicine.

Preference will be given to applicants with high scholastic standing who are residents of Iowa, and consideration will also be given to outstanding nonresidents. Applicants for
admission are required to take the medical college admissions test which is administered for the Association of American Medical Colleges. Applicants are requested to complete this test in May or October of the year preceding that for which they are applying for admission. Students may make arrangements to apply for this examination through the university examination service, the University of Iowa.

Personal interviews will be required. Applicants will be contacted for the appointment for required interviews.

Applicants accepted for admission are required to submit a satisfactory physical examination report to the university student health service within two weeks following notification of acceptance.

All applicants must also complete, through student health service, an X-ray film of the chest and successful vaccination against smallpox prior to registration.

2.8(2) Admission to advanced standing

If their work preparatory to entering a college of medicine would have met entrance requirements of this college, students from other approved medical colleges may be admitted to advanced standing according to the following conditions:

Only applicants of high scholastic standing will be considered.

They must present certificates showing that they have satisfactorily completed courses equivalent to those already pursued by the class they wish to enter.

The committee on admission to advanced standing will decide in each case whether examinations in the various subjects will be required.

Applications will be considered only upon receipt of a statement from the dean or registrar of the college from which the applicant comes, showing the actual amount of time the student has spent in the study of medicine, the courses taken, and the grades received, together with a statement of the work preparatory to entering upon the course in medicine.

No advanced standing will be granted to students from other than approved medical schools. Students may be granted subject credit upon recommendation of the head of the department concerned, for work taken in other than medical schools.

2.8(3) Unclassified students

Applicants for admission to the college of medicine who are not candidates for a degree but who desire to register for special subjects, will be admitted to any lecture or laboratory course only upon complying with all the regular requirements for admission to such course or by action of the faculty upon recommendation of the professor in charge of the course.

681—2.9(262) College of Nursing

Applications for admission to the college of nursing should be submitted to the Director of Admissions, The University of Iowa, Iowa City, Iowa. Applicants for admission to the undergraduate program in nursing must present a minimum of 30 semester hours completed in an accredited college. For admission to the college of nursing an applicant must have:

1. Completed specific course work as prescribed by the faculty of the college. The director of admissions will provide a list of the course work required.

2. Completed the American College Tests.

3. Performed satisfactorily on all courses undertaken.

Applications from students who have minor deficiencies in meeting grade-point requirements specified above will be reviewed by the admissions committee of the college, and, upon favorable recommendation of the committee, such students may be granted conditional or probationary admissions.

Fulfillment of the minimum requirements listed above, however, does not assure admission to the college of nursing. From those applicants who meet the minimum requirements, the admissions committee will select the applicants who, in their judgment, appear to be best qualified.

681—2.10(262) College of Pharmacy

2.10(1) General basis for admission

Fulfillment of the specific requirements for admission does not ensure admission to the college of pharmacy. From the applicants meeting the specific requirements, the admissions committee will select those applicants who in their judgment appear to be best qualified.

Applicants for admission to pharmacy should have graduated from an approved high school or have an equivalent amount of training.
2.10(2) College work
The college work as outlined below will meet the minimum academic requirements for admission to the college of pharmacy. The minimum should include 32 semester hours of college level work exclusive of credit in military and air science and physical education. The 32 semester hours must include:

Communication skills. Applicants must have demonstrated satisfactory achievement in communication skills according to the requirements of the college of liberal arts at the state University of Iowa. Applicants from other institutions may meet this requirement by presenting 6 semester hours of credit in English composition and rhetoric and two semester hours of credit in speech or an eight-semester-hour year course in communication skills.

Inorganic chemistry and qualitative analysis, eight semester hours.

College mathematics, eight semester hours.

Physics or zoology, eight semester hours.

Students from other institutions may substitute a comparable eight-semester-hour course in biology in lieu of zoology.

Military or air science (if available), zero to two semester hours.

Students who present minor deficiencies in meeting the above requirements may be admitted to the college of pharmacy upon the recommendation of the dean of admissions and the college of pharmacy.

2.10(3) Scholarship and application deadline
To be considered for admission to the college of pharmacy, students must have earned a 2.0 or "C" average on all collegiate work undertaken. The minimum grade-point average of 2.0 is based on the state University of Iowa's marking system in which the grade of "A" is equivalent to four points. Applications for admission and the required official transcripts should be filed before March 1 for the class to enter pharmacy in September.

2.10(4) Required tests
Applicants for admission are required to take the American College Testing Program test.

2.10(5) Current requirements
Applicants who have completed work in a college of pharmacy accredited by the American Council on Pharmaceutical Education may if their college academic average is acceptable be admitted and granted advanced standing toward the degree of bachelor of science in pharmacy.

681—2.11(262) College of Liberal Arts
Applicants for admission to liberal arts must meet the rules that are common to the three state institutions in Iowa as listed in 681—1.1(262), 1.2(262) and 1.3(262).

681—2.12(262) College of Education
Students at the university desiring professional work in education are registered in the college of liberal arts and sciences or the graduate college. Requirements for permission to take teacher-training courses are listed in the university catalog.
The University of Iowa
General Catalog
2005-2006
