Up to 16 s.h. required for a B.B.A. may be taken pass/nonpass with the consent of an advisor and the instructor. Students may not count more than 8 s.h. of pass/nonpass credit in the last 60 s.h. of course work. Students must be in good academic standing to be eligible for the pass/nonpass option. A maximum of two pass/nonpass courses may be taken in one semester.

Courses taken pass/nonpass may not be used to satisfy general education, core, or major business requirements. (Major business requirements include any course that fulfills a major course requirement or is offered by the major department.) Pass/nonpass registration must be completed during the first 10 days of a fall or spring semester or the first one-and-one-half weeks of a summer session, and it requires the approval of the advisor and the instructor. For courses taken pass/nonpass, an earned grade of C-minus or higher is recorded as a P; an earned grade of D-plus or lower is recorded as an N. Pass/nonpass credit is not included in g.p.a. calculations.

**Satisfactory/Fail and Satisfactory/Unsatisfactory**

Certain courses are offered satisfactory/fail (S/F) or satisfactory/unsatisfactory (S/U). All students registered for these courses receive one of these marks.

Special forms are not necessary to register for S/F or S/U courses, since all students enrolled in such courses automatically receive an S, an F, or a U.

Semester hours of S or U graded course work are not used in computing grade-point averages, but hours of F graded course work are used.

Semester hours of S graded course work are counted as semester hours earned toward graduation; semester hours of F or U graded course work do not count as semester hours earned toward graduation.

S graded course work may be applied toward the General Education Program and/or toward requirements of a major, minor, or certificate.

A maximum of 16 s.h. of S credit from The University of Iowa is accepted toward a bachelor’s degree.

**Second-Grade-Only Option**

The second-grade-only option is not available to junior and senior students in the Tippie College of Business, including those in combined degree programs. Students in the Early Admission Program are eligible to apply for the second-grade-only option before they earn 60 s.h.; they must follow the second-grade-only grading rules established by the College of Liberal Arts and Sciences. Effective Fall 2007, the second-grade-only option will be allowed only for courses in which the student has earned a grade of C- or lower. See the CLAS Student Academic Handbook or visit the college’s web site (http://www.clas.uiowa.edu).

**Incomplete Grades**

Instructors may report a mark of I (incomplete) only if the unfinished part of the student’s work in a course other than research, thesis, or independent study is small; if the work is unfinished for reasons acceptable to the instructor; and if the student’s standing in the course is satisfactory.

Courses may not be repeated to remove incomplete grades. Incomplete grades must be removed by completing the unfinished part of the work. Faculty and students are encouraged to state clearly in a written agreement how the incomplete is to be completed. Both the faculty member and the student should keep a record of the written agreement.

Failure to remove the incomplete before the end of the next full semester, excluding summer and winter sessions, results in replacement of the I with a grade of F, regardless of whether the student is enrolled during that semester. A grade change may be submitted to convert a grade of F to another letter grade, with the instructor’s approval.

**Guided Independent Study**

University of Iowa Guided Independent Study is counted as resident credit and may be applied to all requirements for graduation, subject to approval by the student’s major department. Guided Independent Study courses can be taken any semester, up to four courses at a time.

Pre-business students who have performed poorly in an on-campus course that also is offered
through Guided Independent Study may retake the course through Guided Independent Study for the second-grade-only option. Likewise, pre-business students who have performed poorly in a Guided Independent Study course may retake the course on campus for the second-grade-only option.

Probation and Dismissal

Students are placed on academic probation when their grade-point average in any of the following categories falls below 2.00: all course work undertaken, all course work undertaken at The University of Iowa, all business course work undertaken, all business course work undertaken at The University of Iowa, all course work taken to satisfy requirements for the major, and all course work taken at The University of Iowa to satisfy requirements for the major. In probation decisions, a 3 s.h. minimum is used to calculate the grade-point average for all course work taken to satisfy requirements for the major, and all course work taken at The University of Iowa to satisfy requirements for the major.

When all of the above grade-point averages equal or surpass 2.00, students are removed from probation. Students usually are allowed only one session to return to good academic standing. They are required to meet with an academic advisor and sign an academic probation contract. Students on academic probation who withdraw registration after the deadline for dropping courses may be dismissed.

Students may be dismissed from the college at any time for unsatisfactory scholarship. While some probationary period usually precedes a dismissal, students in good academic standing who complete a term with extremely unsatisfactory grades may be placed on academic probation or dismissed immediately. Students dropped from the college for poor scholarship may petition for permission to reregister, but usually only after one year following the end of the term in which they were dismissed.

Reinstatement

Students dismissed for unsatisfactory scholarship for the first time ordinarily are not permitted to register again for one year. Students dismissed for the second time may or may not be granted a second reinstatement. Requests for reinstatement must be made in writing and should be addressed to the associate dean in the Undergraduate Program Office. Arrangements for a reinstatement interview must be made with the Undergraduate Program Office. The interview must take place between March 1 and July 1 for reinstatement for fall semester, or between October 1 and December 1 for reinstatement for spring semester. Most reinstatements include a limit on the number of semester hours the student may take upon reinstatement. Late requests are deferred to the following semester.

Students who are permitted to register following dismissal are registered on academic probation and ordinarily are allowed two semesters to achieve good standing. Very poor academic work in the first semester of a reinstatement may result in dismissal at the close of that semester.

Returning for Baccalaureate Degrees

Returning for a Second Business Major

Graduates who have a B.B.A. from The University of Iowa and who are not enrolled in a graduate or professional program may complete the requirements for another business major except accounting (see “Reentry” earlier in this section). Those interested in pursuing a degree in accounting must be admitted to the Graduate College to earn the Master of Accountancy degree; see Accounting.

Students who return to The University of Iowa to complete another business major must meet the requirements for that major; they need not meet the residence requirement. It is their responsibility to notify the Office of the Registrar upon completion of the requirements for the second major so that a notation can be placed on their permanent record.

Students who hold a B.B.A. or equivalent degree from another college or university may not complete a second business major at The University of Iowa. They may apply for admission to complete an additional degree (see “Returning for an Additional Bachelor’s Degree”).

Returning for an Additional Bachelor’s Degree

Persons who hold a bachelor’s degree from another college at The University of Iowa and who are not enrolled in a graduate or professional program may return for an additional bachelor’s degree from the Tippie College of Business. They must satisfy all requirements for undergraduate admission to the business college. Once admitted, they must satisfy all requirements for the B.B.A. in their chosen major.
For information about pursuing an additional bachelor’s degree in accounting, see “Accounting as a Second Degree” below.

**Students with Baccalaureates From Other Institutions**

Students with a bachelor’s degree from another college or university may apply for admission to the University of Iowa to earn an additional undergraduate degree from the Tippie College of Business. The requirements are the same as those listed under “Returning for an Additional Bachelor’s Degree” above.

For information about pursuing an additional bachelor’s degree in accounting, see “Accounting as a Second Degree” below.

**Accounting as a Second Degree**

Graduates who have a non-business bachelor’s degree, either from The University of Iowa or from another college or university, may in some cases be considered for admission to the Tippie College of Business to pursue a second undergraduate major in accounting. Individuals interested in earning a second degree with a major in accounting should contact the Department of Accounting to discuss the B.B.A. or Master of Accountancy (M.Ac.); see Accounting in the Catalog.

Students may not earn a second major in accounting if they already have a B.B.A. from The University of Iowa or any undergraduate business degree from another college or university.

**Graduate Programs**

The Tippie College of Business offers two interdepartmental graduate programs: Master of Business Administration (M.B.A.) and Doctor of Philosophy (Ph.D.) in business administration. M.B.A. candidates may pursue a second graduate degree in another college.

The Master of Arts in business administration is a nonthesis degree awarded only to students who begin the Ph.D. program and decide not to continue. Incoming students may not elect to pursue an M.A.

**Doctor of Philosophy**

The Doctor of Philosophy in business administration is designed for students preparing for research positions in business and government or for research and teaching positions at academic institutions. The program is flexible, permitting students to choose a specialization area according to their interests. Course work and related experience enable students to achieve competence in economic theory, statistical methods, and behavioral science as well as expertise in a major and minor study area. Students also have opportunities to develop research and teaching skills.

The Ph.D. requires a minimum of 72 s.h., including accepted transfer credit. Ph.D. course work consists of prerequisites (as necessary), the Ph.D. core, major and minor study areas, and dissertation research, described in brief below. For more detailed information about Ph.D. requirements, contact the individual Tippie College of Business departments, visit their websites, or visit http://www.biz.uiowa.edu/phd.

**CORE COURSES**

Core courses develop research competence and provide background for specialized study. Graduate course requirements include behavioral sciences (3 s.h.), economics (6 s.h.), and research methods/statistics/quantitative analysis (12 s.h.).

Doctoral students consult with their advisors to develop a study plan that reflects the individual students’ background and interests and satisfies core requirements.

**MAJOR STUDY AREA**

At least 12 s.h. of approved doctoral-level courses must be completed in one of the following areas: accounting, finance, human resource management, management information systems, marketing, operations management, organizational behavior, or quantitative methods.

**MINOR STUDY AREA**

Students must complete a minimum of 9 s.h. of doctoral-level courses beyond the Ph.D. core course requirements in one of the major study areas listed above or in a concentration outside the Tippie College of Business.

**COMPREHENSIVE EXAMINATIONS**

Students must satisfactorily complete a comprehensive examination, consisting of written or oral parts or both, at the discretion of their major department.

**DISSERTATION**

Students must present a dissertation proposal at a forum attended by dissertation committee members and open to interested faculty members and graduate students, as established by the
student’s major department. Researching and writing the dissertation typically require two years of full-time effort.

**FINAL EXAMINATION**

Ph.D. candidates defend the dissertation in an oral examination attended by dissertation committee members and open to interested faculty members and graduate students.

**Admission**

Applicants to the Ph.D. program must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

Applicants must take the Graduate Record Examination (GRE) General Test or the Graduate Management Admission Test (GMAT) and have their scores sent to the University in order to be considered for admission. The Departments of Finance, Management and Organizations, Management Sciences, and Marketing accept test scores for either the GRE or GMAT. The Department of Accounting accepts only GMAT scores and the Department of Economics accepts only GRE scores. Required scores on these tests and their weight in admission decisions vary by department.

Applicants whose native language is not English must take the Test of English as a Foreign Language (TOEFL) and have their scores sent to the University.

Applicants must submit a completed Application for Graduate Admissions, official transcripts from all institutions attended, official test scores, and three letters of recommendation. Applications must be complete before admission decisions can be made.

**APPLICATION DEADLINES**

Admission is for fall entry. Applications should be submitted as early as possible and no later than the following deadlines.

- Accounting: January 31
- Economics: January 15
- Finance: January 31
- Management and Organizations: February 1
- Management Sciences: February 15
- Marketing: January 15

**Other Graduate Programs**

The college offers the Master of Accountancy (M.Ac.) degree and a Ph.D. in economics; see Accounting and Economics in the Catalog.

---

**Facilities**

The Henry B. Tippie College of Business is located in the John Pappajohn Business Building, at the heart of the campus. The Pappajohn Business Building contains seminar and conference rooms, a computer laboratory, two auditoriums, three computer classrooms, a behavioral laboratory, a restaurant (Pat’s Diner), the Marvin A. Pomerantz Business Library, and a variety of classroom facilities.

Extensive research materials for business and economics are maintained in the University’s Main Library, and the facilities of Information Technology Services are available to all students. The computer laboratory in the John Pappajohn Business Building serves the instructional programs of the college, and the staff maintains a current library of computational programs, CD-ROMs, and data tapes to accommodate users’ needs.

**Centers and Institutes**

**Hawkinson Institute of Business Finance**

The Hawkinson Institute of Business Finance facilitates career opportunities in the investment banking and financial services industries for Tippie College of Business students. It also links faculty, alumni, and students with the financial services sector.

The institute selects high-achieving undergraduates to train for positions in the financial services industry, works with top recruiters who do not typically recruit at Iowa, and supports finance research through faculty grants. It also presents instructional seminars and participates in outreach efforts to industry.

**Institute for Economic Research**

The Institute for Economic Research engages in and supports economic research and establishes a formal mechanism for providing interaction with and economic advice to industry and government. The institute’s main objectives are to provide economic information, forecasts, and advice to business and public agencies; to provide a state focal point for applied economic research; and to promote and enhance academic research and teaching in economics.
Institute for International Business

The Institute for International Business is dedicated to the development and advancement of knowledge related to international business. The institute coordinates and augments resources at the Henry B. Tippie College of Business to provide students at all levels with the education, experience, and skills they will need for success in the global marketplace. The institute seeks to strengthen links between academic research and Iowa corporations engaged in international activities. It also sponsors cultural events and seminars in the college.

Emmett J. Vaughan Institute of Risk Management and Insurance

The Tippie College of Business, in partnership with the Iowa insurance industry, has established the Emmett J. Vaughan Institute of Risk Management and Insurance to provide innovative education and research in modern risk management and insurance.

The institute collaborates with the Department of Finance to offer the Certificate in Risk Management and Insurance. The certificate program provides undergraduate students with a foundation for careers in corporate risk management, risk management consulting, employee benefits management, insurance brokerage, and underwriting. See Risk Management and Insurance in the Catalog.

RSM McGladrey Institute of Accounting Education and Research

The RSM McGladrey Institute of Accounting Education and Research fosters educational excellence in accounting at The University of Iowa and encourages high-quality research by Iowa accounting faculty members. The institute sponsors varied educational initiatives and activities, including an annual national speaker series. It helps faculty members initiate research projects and disseminate the findings to the academic, business, government, and professional accounting communities.

John Pappajohn Entrepreneurial Center

The John Pappajohn Entrepreneurial Center (JPEC) has developed a comprehensive, interdisciplinary program that combines advanced course work with experiential learning for University of Iowa students. The program prepares students to create new ventures and apply entrepreneurship concepts in their careers.

The entrepreneurship curriculum incorporates experiential learning opportunities in which students apply their knowledge and skills in their own ventures or in emerging or growing Iowa companies. JPEC’s Bedell Entrepreneurship Learning Laboratory is dedicated to student entrepreneurs pursuing the creation of new ventures.

Undergraduate students in several University of Iowa colleges may earn the Certificate in Entrepreneurship in addition to their bachelor’s degrees; see Entrepreneurship in the Catalog. Advanced entrepreneurship courses are available to all graduate and professional students across campus, and M.B.A. students may pursue an entrepreneurship concentration; see Master of Business Administration Program in the Catalog.

JPEC also offers the Certificate in Entrepreneurship through distance education. University of Iowa students or nonstudents who have 60 s.h. of college credit may enroll in the program. Participants may choose from a variety of course delivery options, including introductory course work offered through a collaboration with Iowa community colleges, online course work that incorporates regular interactive sessions with Iowa faculty and students, and local experiential learning projects. Students may earn the certificate alone or in conjunction with the Bachelor of Applied Studies or the Bachelor of Liberal Studies.

The center offers several programs for entrepreneurial businesses and individuals, including student field study projects, training, mentoring, seminars, and conferences. It provides training and a specialized curriculum to Iowa high school teachers in an effort to foster the development of innovative, creative, and entrepreneurial young Iowans. JPEC also partners with Iowa community colleges to deliver entrepreneurship training statewide.
Small Business Development Center

Since 1981, The University of Iowa Small Business Development Center has played an important role in helping enterprising Iowans manage or start their own businesses successfully. The center provides support for small business owners and entrepreneurs. Its personnel are trained to meet the various needs of small business management, including market, business, and financial planning, cash flow analysis, human resource planning, product commercialization, market research and analysis, strategic planning, international trade, and advertising and public relations.

Judith R. Frank Business Communications Center

The Judith R. Frank Business Communications Center offers a comprehensive program of training in written and oral communication to undergraduates in the Tippie College of Business. The center’s staff includes graduate students with expertise in writing and undergraduate peer tutors who have completed a peer tutor training course.

The center provides one-on-one tutoring on written papers, projects, and case studies. Its oral communications center offers consultations on oral presentations and interviewing skills.

The center’s course-dedicated consulting program helps faculty and students in courses that require writing projects. The center’s staff works closely with faculty members to study assignments, develop handouts, make targeted presentations, and respond individually to student writing.

The team and collaborative writing initiative focuses on team assignments, which are a critical part of the Tippie College of Business curriculum. The initiative trains students to become final project editors and share documents throughout the writing process.

The Business Communications Center also sponsors a series of credit courses for undergraduates, including 06B:110 Successful Business Presentations, 06B:115 Technical and Professional Editing, 06B:140 Business Writing, Corporate Communications (offered through 06B:101 Topics in Business), and the peer tutor training course, 06B:130 Business Communications Internship I.

Pomerantz Career Center

Career development and on-campus recruiting services are provided by the Marvin A. and Rose Lee Pomerantz Career Center. The center’s career advisors and online seminars provide University undergraduate students and alumni with help on résumés, cover letters, career choice, internship and job searches, employer research, interviewing skills, and negotiation of job offers. The center also presents fall and spring semester career fairs. Employer recruiting is facilitated through web-based software. Contact the Pomerantz Career Center for more information.

Alumni Relations

Relationships with alumni are maintained by staff in the Undergraduate Program Office and the Tippie School of Management Office and by the college’s director of communication and external relations. The college circulates its magazine, BI (Business at Iowa), to individuals who support the college, and each semester it hosts alumni events ranging from individual visits to receptions on campus and in cities nationwide and worldwide. Members of the Business Student Ambassadors, an undergraduate student organization, serve as hosts and guides for alumni who visit the college. The Young Alumni Board works to strengthen ties between the college and younger alumni.

Courses

Interdepartmental Undergraduate Courses

06B:005 1DB Summer Business Institute 0 s.h.
Advanced math, writing, speaking, and computer instruction; case studies, visits to area corporations. Prerequisite: admission to Iowa Diversity in Business Initiative.

06B:010 Early Admission Program Seminar 2 s.h.
Business majors, research opportunities, and preprofessional academic enrichment activities. Prerequisite: Early Admission Program enrollment.

06B:030 Diversity Awareness for Business 1 s.h.
Opportunity to develop awareness and appreciation of multiculturalism and diversity; importance of diversity in the workplace; development of skills for working in a diverse environment; development of cultural competencies through classroom activities, discussions, group projects, readings, and personal reflections.

06B:040 Academic Leadership Seminar 1 s.h.
Orientation to service learning; service learning project, professional enrichment activities, academic skill enhancement; for students living on the Leadership Community in Business and Entrepreneurship Learning Community Floor.
### 06B:050 Competitive Intelligence Resources 1 s.h.
Search concepts and sources specific to business information; print, CD-ROM, online search services, the Internet.

### 06B:060 Tippie Senate 1 s.h.
For elected student representatives on the Tippie Senate. Prerequisite: consent of Undergraduate Program Office.

### 06B:070 Academic Success in Business 1 s.h.
Academic skills for students, targeted at graduation; help removing probationary status; learning styles, motivation, adjustment issues, time management, classroom and study skills.

### 06B:080 Business Student Ambassador Seminar 1 s.h.
Experiences as a Business Student Ambassador providing tours of the John Pappajohn Building, acting as hosts at college functions, providing information and assistance to visiting groups, assisting student recruitment activities. Prerequisite: admission to Tippie College of Business and acceptance as a Business Student Ambassador.

### 06B:100 Foundations of Business 3 s.h.
Concepts associated with the competitive business environment and skills for attaining professional employment, developing a successful career within an organization, and expanding a career within an industry; career search, persuasive communication, team building.

### 06B:101 Topics in Business arr.

### 06B:105 Administrative Practicum arr.
Development and implementation of projects and programs for the business college’s undergraduate program, such as curriculum issues, marketing of academic and nonacademic programs, assisting in development and preparation for teaching courses. Repeatable. Prerequisite: admission to Tippie College of Business.

### 06B:106 Technical and Professional Editing 1-3 s.h.
Introduction to editorial skills required for production of high-quality professional and technical documents; hands-on workshop.

### 06B:107 Web Portfolio: Bizfolio Project 1 s.h.
Design and implementation of an electronic portfolio web site; introduction to a web authoring software package. Prerequisite: admission to Tippie College of Business.

### 06B:110 Successful Business Presentations arr.
Oral presentation skills in business settings.

### 06B:115 Business Communication Internship I arr.
Opportunity for student to earn academic credit for serving as a peer tutor, an orientation and training assistant, or an administrative intern in the Judith R. Frank Business Communications Center. Repeatable. Prerequisite: consent of instructor.

### 06B:116 Business Communication Internship II 3 s.h.
Continuation of 06B:115; opportunity for students to earn academic credit for serving as a peer tutor, an orientation and training assistant, or an administrative intern in the Judith R. Frank Business Communications Center. Prerequisites: 06B:115 and consent of instructor.

### 06B:120 Business Writing 3 s.h.
Development of communication and analytical skills; cover letter and résumé preparation, interviewing techniques, editing and proofreading, research, presentations, entrepreneurship, creative problem solving; group business plan presentation, individual written business plan.

### 06B:194 Honors Seminar 1-3 s.h.
Research topics and methods in business. Prerequisites: business honors standing and consent of business honors director.

### 06B:195 Honors Project 3 s.h.
Independent research project for seniors in business.

### 06B:199 Academic Internship arr.
Professional internship experience with associated academic content (e.g., paper, course work). Repeatable. Prerequisite: consent of associate dean, undergraduate program.

### Nondepartmental Graduate Courses

#### 06B:300 Seminar on Teaching arr.
Education objectives, syllabus preparation, instruction methods, classroom management, instructor and student misbehavior, evaluation.
Accounting

Chair: W. Bruce Johnson
Director, Professional Program in Accounting:
   Lynn M. Pringle
Director, RSM McGladrey Institute of Accounting Education and Research: Ramji Balakrishnan
Director, Master of Accountancy program: Lynn M. Pringle
Professors: Ramji Balakrishnan (Ernst and Young Research Professor), Daniel W. Collins (Henry B. Tippie Research Chair in Accounting), Douglas V. DeLong (John F. Murray Professor), W. Bruce Johnson (Sidney G. Winter Professor of Accounting), Mark C. Penno, Albert A. Schepanski
Professor emeritus: Valdean C. Lembke
Associate professors: Joyce E. Berg, Paul Hribar, Sonja Olhoft Rego
Associate professors emeriti: Richard A. Grimlund, Richard M. Tubbs
Assistant professors: Cristi A. Gleason, Haidan Li, Ryan J. Wilson
Clinical assistant professor: Lynn M. Pringle
Lecturers: Amy An, Thomas J. Carroll, Robert J. Hartman
Undergraduate degree: B.B.A. in Accounting
Graduate degrees: M.Ac.; Ph.D. in Business Administration
Web site: http://www.biz.uiowa.edu/acct

The Department of Accounting offers a broad education that prepares undergraduate and graduate students for careers in public accounting, private industry, government, nonprofit organizations, and academia.

Professional Program in Accounting

The Professional Program in Accounting draws on curricula that provide a strong base of traditional technical subject matter and the skills needed for solving complex business problems. This framework of study enables students to continue professional growth over the entire span of their careers. The program emphasizes communication skills and provides the academic background required for leadership positions in business, government, and public accounting. It also qualifies students to take the Certified Public Accountant (CPA) and Certified Management Accountant (CMA) examinations.

The Professional Program in Accounting leads to a Bachelor of Business Administration in accounting, which requires 120 s.h. of credit (see “Undergraduate Program” below), and the Master of Accounting, which requires 30 s.h. of graduate credit (see “Graduate Programs” later in this section). Students are granted the B.B.A. upon successful completion of the junior and senior years of the Professional Program in Accounting, and the M.Ac. after successful completion of 30 s.h. beyond the B.B.A.

Undergraduate Program

The Department of Accounting offers the Bachelor of Business Administration in accounting for students admitted to the Professional Program in Accounting.

Undergraduate accounting majors are subject to the probation and dismissal rules described in the Tippie College of Business section of the Catalog and are governed by the Tippie College of Business Honor Code.

The B.B.A. is not sufficient preparation for CPA licensure in states that have passed a 150 hour law (all states except California, Colorado, New Hampshire, and Vermont).

Bachelor of Business Administration

Undergraduate students admitted to the Professional Program in Accounting work toward the B.B.A. in accounting, which requires at least 25 s.h. in the major. Course work in the program provides concentrated coverage of professional accounting subjects and closely related topics in commercial law, business, and information systems.

To enter the Professional Program in Accounting, undergraduates must complete 60 s.h. of course work at The University of Iowa (or equivalent course work at another institution) and must be admitted to the Tippie College of Business. Students already admitted to the business college who wish to declare accounting as a major are automatically admitted to the professional program if they have a University of Iowa g.p.a. of at least 3.00, a cumulative g.p.a. of at least 3.00, and a B-minus average in 06A:001 Introduction to Financial Accounting and 06A:002 Managerial Accounting. Students who wish to declare accounting as a major but do not
satisfy the automatic admission requirements may still apply to the professional program; applications are reviewed case-by-case.

Students must complete the following prerequisite courses before admission to the Professional Program in Accounting.

- **06A:001 Introduction to Financial Accounting** 3 s.h.
- **06A:002 Managerial Accounting** 3 s.h.
- **06E:001 Principles of Microeconomics** 4 s.h.
- **06E:002 Principles of Macroeconomics** 4 s.h.
- **22M:017 Calculus and Matrix Algebra for Business** 4 s.h.
- **22S:008 Statistics for Business** 4 s.h.

Professional Program in Accounting requirements for the junior and senior years are as follows.

**JUNIOR YEAR**

**Fall Semester**
- **06A:131 Income Measurement and Asset Valuation** 3 s.h.
- **06A:133 Introduction to Taxation** 3 s.h.
- **06A:150 Professional Orientation Seminar Series** (must be taken during first or second semester in the professional program) 1 s.h.
- **06B:100 Foundations of Business** (taken first semester after admission to the college) 1 s.h.
- Two business core requirements 6 s.h.

The business core requirements (06F:100, 06J:047, 06J:048, 06K:100, 06M:100) may be taken in any sequence, preferably before the senior year; 06J:047 is a prerequisite to 06A:148, so it should be taken before spring semester of the senior year. Students must complete 06B:100 Foundations of Business during their first semester after admission to the Tippie College of Business.

**Spring Semester**
- **06A:130 Valuation of Financial Claims** 3 s.h.
- **06K:180 Applied Information Systems** 3 s.h.
- Two business core requirements 6 s.h.
- Elective 3 s.h.

Due to the overlap in course content, accounting majors may not receive degree credit for 06A:120 Financial Accounting and Reporting and 06A:113 Taxes and Business Decisions.

**SUMMER: GMAT AND ADMISSION TO THE M.AC.**

Students who intend to continue in the Professional Program in Accounting after receiving the B.B.A. should take the Graduate Management Admission Test (GMAT) during the summer before their senior year, as preparation for applying to the Master of Accountancy program.

Students who plan to earn 3-6 s.h. of internship credit for 06A:190 Experiential Learning during the spring semester of their senior year must be admitted to the M.Ac. program by December 1 of their senior year. Those who do not participate in 06A:190 may apply to the M.Ac. program after December 1 of their senior year. See “Application Deadlines” below.

**SENIOR YEAR WITH INTERNSHIP**

Seniors who wish to include a formal accounting internship in their program take 06A:190 Experiential Learning during spring semester of their senior year. To earn 3-6 s.h. of credit for the internship, they must be admitted to the M.Ac. Program (the fifth year of the Professional Program in Accounting) by December 1 of their senior year and must have departmental approval before the beginning of their internship semester.

Students who participate in the internship normally must attend a summer session before or after their senior year in order to complete the B.B.A. requirements.

Students who choose the internship option should pursue the following study plan.

**Fall Semester**
- **06A:130 Accounting for Management Analysis and Control** 3 s.h.
- **06A:144 Auditing** 3 s.h.
- **06A:148 Business Law** (or summer if offered) 3 s.h.
- One business core requirement 3 s.h.
- One of these:
  - **06A:141 Advanced Tax Topics** 3 s.h.
  - **06A:145 Advanced Financial Accounting** 3 s.h.

**Spring Semester**
- **06A:190 Experiential Learning** 3-6 s.h.

**Summer Session**
- **06A:148 Business Law** (if not already taken) 3 s.h.
- Electives 6 s.h.

**SENIOR YEAR WITHOUT INTERNSHIP**

Students who do not wish to include the internship program (06A:190) during their senior year pursue the following study plan.

- **06A:130 Accounting for Management Analysis and Control** 3 s.h.
- **06A:144 Auditing** 3 s.h.
- **06A:148 Business Law** (or summer if offered) 3 s.h.
- One business core requirement 3 s.h.
- One of these:
  - **06A:141 Advanced Tax Topics** 3 s.h.
  - **06A:145 Advanced Financial Accounting** 3 s.h.
- **Spring Semester**
- **06A:190 Experiential Learning** 3-6 s.h.
- **Summer Session**
- **06A:148 Business Law** (if not already taken) 3 s.h.
- Electives 6 s.h.
Students must choose one of the following accounting electives during their senior year.

06A:141 Advanced Tax Topics 3 s.h.
06A:145 Advanced Financial Accounting 3 s.h.

**Fall Semester**

06A:144 Auditing 3 s.h.
One accounting elective 3 s.h.
One business core requirement 3 s.h.
Two electives 6 s.h.

**Spring Semester**

06A:130 Accounting for Management 3 s.h.
06A:148 Business Law 3 s.h.
One accounting elective (if not taken fall semester) 3 s.h.
Two or three electives 6-9 s.h.

**OPTIONAL ACCOUNTING ELECTIVE**

All undergraduates, whether admitted to the M.Ac. program or not, may take 06A:199 Academic Internship for 1 s.h. in fall, spring, or summer. Department consent is required.

**Graduate Programs**

The Department of Accounting offers the Master of Accountancy (M.Ac.) and a Doctor of Philosophy (Ph.D.) in business administration. Ph.D. requirements are described under “Graduate Programs” in the Tippie College of Business section of the Catalog and on the Department of Accounting web site.

The department also offers a joint M.Ac./J.D. with the College of Law; see Juris Doctor in the College of Law section of the Catalog.

Applicants to the graduate programs in accounting must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog. Application materials must include the applicant’s score on the Graduate Management Admission Test (GMAT).

Graduate students in accounting are subject to the probation and dismissal rules of the Graduate College and are governed by the Tippie College of Business Honor Code.

**Master of Accountancy**

The Master of Accountancy (M.Ac.) is a nonthesis program that permits students to specialize in accounting areas according to their interests and objectives. It builds on the technical skills acquired in the undergraduate program, broadens students’ perspectives of the role of accounting in organizations and decision making, and further develops written and oral communication skills.

M.Ac. coursework focuses on the conceptual and economic foundations of accounting with applications to current and emerging problems of professional practice. It also provides an opportunity to acquire expertise in one of four areas of specialization: financial accounting/auditing, management information systems, taxation, and managerial accounting.

Students from a variety of academic backgrounds enter the M.Ac. program. Those who enter with an undergraduate degree in accounting can expect to complete the degree in 12 months. Those who enter with a nonaccounting undergraduate degree typically require four semesters to complete the M.Ac. Study plans are adjusted to reflect each student’s particular academic background; see “Course Work for Students Without Undergraduate Degrees in Accounting” later in this section.

The M.Ac. requires a total of 30 s.h. beyond the B.B.A. At least 12 s.h. must be earned in graduate-level accounting courses, and at least 21 s.h. must be earned in 200-level courses.

Courses leading to specialization areas and those required for the core program are as follows. Because of the cross-disciplinary nature of the subject matter included in the specialization areas, courses in a number of other departments are included.

**SPECIALIZATION IN FINANCIAL ACCOUNTING/AUDITING**

**Accounting Courses**

Total of 12 s.h.

All of these:
06A:221 Financial Reporting: Theory and Practice 3 s.h.
06A:230 Advanced Auditing 3 s.h.
06A:245 Financial Information and Capital Markets 3 s.h.

One of these:
06A:220 Design and Use of Cost Management Systems 3 s.h.
06A:231 Taxes and Business Strategy 3 s.h.

**Finance Courses**

Total of 6 s.h.

06N:225 Managerial Finance (requires consent of M.B.A. office) 3 s.h.
One additional 200-level finance course 3 s.h.
Management Information Systems Courses
Total of 3-6 s.h.
06K:226 Visual Basic Programming (if not already taken) 3 s.h.
06K:230 Database Systems 3 s.h.

General Electives
Total of 6-9 s.h.

SPECIALIZATION IN MANAGEMENT INFORMATION SYSTEMS
Due to the timing of course offerings, students who do not begin the M.Ac. program in the summer session should take a computer programming course while they are undergraduates. This decreases the number of required management information systems courses and increases electives by 3 s.h. in the M.Ac. program.

Accounting Courses
Total of 12 s.h.
06A:220 Design and Use of Cost Management Systems 3 s.h.
Two of these:
06A:221 Financial Reporting: Theory and Practice 3 s.h.
06A:230 Advanced Auditing 3 s.h.
06A:231 Taxes and Business Strategy 3 s.h.
One of these (not already taken):
06A:221 Financial Reporting: Theory and Practice 3 s.h.
06A:230 Advanced Auditing 3 s.h.
06A:231 Taxes and Business Strategy 3 s.h.
06A:241 Tax Research 3 s.h.
06A:245 Financial Information and Capital Markets 3 s.h.

Management Information Systems Courses
Total of 9-12 s.h.
06K:226 Visual Basic Programming (if not already taken) 3 s.h.
Three 200-level information systems courses (06K or 22C) 9 s.h.

General Electives
Total of 6-9 s.h.

SPECIALIZATION IN TAXATION
Accounting Courses
Total of 9 s.h.
Two of these:
06A:220 Design and Use of Cost Management Systems 3 s.h.
06A:221 Financial Reporting: Theory and Practice 3 s.h.
06A:230 Advanced Auditing 3 s.h.
06A:220 Design and Use of Cost Management Systems 3 s.h.
06A:221 Financial Reporting: Theory and Practice 3 s.h.
06A:230 Advanced Auditing 3 s.h.
06A:241 Tax Research 3 s.h.
06A:245 Financial Information and Capital Markets 3 s.h.

Management Information Systems Courses
Total of 3-6 s.h.
06K:226 Visual Basic Programming (if not already taken) 3 s.h.
06K:230 Database Systems 3 s.h.

Nonaccounting Business Electives
Two 200-level business electives 6 s.h.
**General Electives**
Total of 6-9 s.h.

**CORE PROGRAM COURSE REQUIREMENTS**
Students who do not wish to pursue a specialization area must complete 30 s.h. beyond the B.B.A. At least 15 s.h. must be earned in graduate-level accounting courses and at least 21 s.h. must be earned in 200-level courses. The following courses are required.

**Accounting Courses**
Total of 15 s.h.
06A:220 Design and Use of Cost Management Systems (taken spring semester) 3 s.h.
06A:221 Financial Reporting: Theory and Practice (taken fall semester) 3 s.h.
06A:230 Advanced Auditing (taken spring semester) 3 s.h.
06A:231 Taxes and Business Strategy (taken fall semester) 3 s.h.
One of these (not already taken):
06A:241 Tax Research 3 s.h.
06A:245 Financial Information and Capital Markets 3 s.h.

**Management Information Systems Courses**
Total of 3-6 s.h.
06K:226 Visual Basic Programming (if not already taken) 3 s.h.
06K:230 Database Systems 3 s.h.

**General Electives**
Total of 9-12 s.h.

**Course Work for Students Without Undergraduate Degrees in Accounting**
Courses taken by students who enter the program with a nonaccounting bachelor’s degree are determined by each student’s background and interest area. In addition to meeting the core program requirements for the M.Ac., students typically take a combination of undergraduate and M.B.A. courses to remove academic deficiencies in quantitative methods, business, and accounting. Students with a bachelor’s degree in another area of business typically are required to take 45-51 s.h. in order to complete the M.Ac. program. Those with degrees outside of business and with no accounting courses typically are required to take 57-60 s.h.

**CPA Examination and the Iowa Accountancy Act**
The Iowa Accountancy Act that became effective in January 2001 requires individuals who wish to take the CPA examination to have a bachelor’s degree, 24 s.h. of business course work, and 24 s.h. of accounting course work beyond 06A:001 Introduction to Financial Accounting.

**Admission**
Admission to the M.Ac. program is competitive. The admissions committee reviews applications individually, considering quantitative aspects (grade-point average and GMAT scores) and qualitative aspects of each applicant’s background and professional experience (if applicable) to assess the applicant’s potential for academic success and professional growth.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

University of Iowa undergraduate accounting students are encouraged to take the Graduate Management Admission Test (GMAT) the summer before their senior year. Those who participate in the formal accounting internship during their senior year (06A:190 Experiential Learning) must apply to the M.Ac. early enough to ensure admission by December 1 of their senior year. Students who do not participate in 06A:190 may apply to the M.Ac. after December 1 of their senior year. See “Application Deadlines” below.

Application materials must include the following: an Application for Graduate Admissions; official transcripts of all undergraduate and graduate course work submitted by each institution the applicant has attended; official scores on the Graduate Management Admission Test (GMAT); a supplemental application form with essay responses; a résumé and cover letter; and at least three letters of reference from former instructors or employers. (B.B.A. accounting students at The University of Iowa are not required to provide letters of reference.)

Applicants whose first language is not English must score at least 600 (paper-based) or 250 (computer-based) on the Test of English as a Foreign Language (TOEFL).

For complete information about application procedures, contact the University’s Office of Admissions or the Department of Accounting.
APPLICATION DEADLINES

The Department of Accounting admissions committee reviews completed M.Ac. application files (which must include official GMAT scores) on five dates: March 1, April 15, July 15, October 1, and December 1. Applications are reviewed on these dates regardless of whether the applicant plans to begin the M.Ac. program in the fall semester (August), spring semester (January), or summer session (June). Final Graduate College application deadlines are as follows.

Fall semester entry: July 15 (April 15 for international students)

Spring semester entry: December 1 (October 1 for international students)

Summer session entry: April 15 (March 1 for international students)

Students who wish to apply for a teaching assistantship must apply to the M.Ac. program no later than March 1.

Joint M.Ac./J.D.

The Department of Accounting and the College of Law offer the joint Master of Accountancy/Juris Doctor. The joint M.Ac./J.D. requires a minimum of 18 s.h. of graduate course work in accounting. Students in the program may count up to 12 s.h. of College of Law courses as electives for the M.Ac., and up to 12 s.h. of graduate accounting courses as electives for the J.D.

Separate application to each program is required. Applicants must be accepted to each program before they may enroll in the joint program.

Doctor of Philosophy

Students majoring in accounting may earn a Ph.D. in business administration. Ph.D. requirements are described under “Graduate Programs” in the Tippie College of Business section of the Catalog and on the Department of Accounting web site.

Faculty

The department’s faculty members stay current in their discipline by producing and disseminating accounting-related knowledge. They keep abreast of the latest developments in the field of education and the profession by participating in educational conferences and seminars and publishing in leading academic journals.

Courses

Primarily for Undergraduates

06A:001 Introduction to Financial Accounting 3 s.h. Accounting and financial reporting procedures used by business and not-for-profit entities; emphasis on accounting concepts and use of accounting information in making economic decisions. Prerequisite: sophomore or higher standing.

06A:002 Managerial Accounting 3 s.h. Basic topics in cost behavior, measurement, accumulation; use of cost data for relevant analysis, budgeting, performance evaluation. Prerequisites: 06A:001, 06E:001, and 22M:017.

06A:020 Accounting for Nonbusiness Students 3 s.h. Financial and managerial accounting: financial statements—their elements, format, interrelationship, interpretation, and uses; analysis of corporate annual reports; cost/volume/profit relationships; decision analysis, performance evaluation.

For Undergraduate and Graduate Students

06A:101 Directed Readings in Accounting arr. Individual guided readings in accounting topics. Prerequisite: admission to Professional Program in Accounting.

06A:113 Taxes and Business Decisions 3 s.h. Tax concepts; emphasis on recognizing tax-planning opportunities, pitfalls inherent in common management decisions. Prerequisites: 06A:002 or equivalent, and nonaccounting major or consent of advisor.

06A:120 Financial Accounting and Reporting 3 s.h. External financial reporting practices in context of decisions by management, current and potential stockholders, financial analysts; emphasis on interpretation, use of financial statements. Prerequisites: 06A:002 or equivalent, and nonaccounting major or consent of advisor.

06A:130 Accounting for Management Analysis and Control 3 s.h. Advanced topics in cost estimation, measurement, accumulation; use of cost data for decision making, performance evaluation in multi-unit organizations. Prerequisites: 06E:071, 06K:070, and admission to Professional Program in Accounting.

06A:131 Income Measurement and Asset Valuation 3 s.h. Accounting rules that determine how economic events and transactions are described in published financial reports; emphasis on revenue and expense recognition, asset valuation, accrual accounting model. Prerequisite: admission to Professional Program in Accounting or pre-accounting major.

06A:133 Introduction to Taxation 3 s.h. Federal income taxation; individual, corporate, partnership income tax laws, regulations; emphasis on developing a broad perspective on structure, administration, rationale of federal income tax system. Prerequisite: admission to Professional Program in Accounting or pre-accounting major.

06A:141 Advanced Tax Topics 3 s.h. Taxation of corporations, partnerships from organization through liquidation; relative merits of conducting business through partnership, corporation, proprietorship, S corporation; introduction to tax research. Prerequisites: 06A:133, 06K:180, and senior standing.
06A:144 Auditing 3 s.h.
General framework underlying auditing, role of audit standards in
planning and conduct of audits, effect of regulation, ethics,
liability on audit practices. Prerequisites: 06A:132, 06A:150,
06K:180, and senior standing.

06A:145 Advanced Financial Accounting 3 s.h.
Accounting and reporting standards for business combinations,
including mergers, consolidations, and multinational enterprises;
accounting for partnerships, business segments, transactions
denominated in foreign currency, including hedges using foreign
currency derivative instruments; reporting standards for interim
financial statements and fund accounting applied to government
and nonprofit entities. Prerequisites: 06A:132 and senior
standing.

06A:148 Business Law 3 s.h.
Contracts, sales, debtor-creditor relations, business organizations,
other aspects of law applied to business. Prerequisites: 06J:047
and senior standing.

06A:150 Professional Orientation Seminar Series 1 s.h.
Accounting careers, advising, curriculum, M.Ac. program,
internships, CPA examination, Beta Alpha Psi, UI Employment
Expo. Offered fall semesters. Corequisite: 06A:131 or 06A:132.

06A:170 Special Topics in Accounting arr.
Prerequisite: consent of instructor.

06A:190 Experiential Learning 3-6 s.h.
Professional internship experience with related course work
(papers, oral presentation). Prerequisites: admission to M.Ac.
program and consent of undergraduate accounting advisor.

06A:199 Academic Internship arr.
Professional internship experience. Prerequisite: consent of
undergraduate accounting advisor.

06A:240 Financial Accounting Standards and
Analysis 3 s.h.
Accounting model, underlying measurement concepts, valuation
rules for assets, liabilities, related issues of income determination;
emphasis on economic substance of transactions, evaluation and
interpretation of financial data. Prerequisite: 06N:215.

06A:241 Tax Research 3 s.h.
Deciding what research is needed, evaluating tax materials,
developing facility with electronic and printed tax materials.
Prerequisite: 06A:141 for undergraduates.

06A:245 Financial Information and Capital Markets 3 s.h.
Use of corporate financial statements for investment and lending
decisions; emphasis on financial analysis techniques, valuation,
business analysis, cash flow projections, credit scoring, related
research evidence. Prerequisite: 06A:240 or equivalent.

06A:246 Corporate Governance 3 s.h.
How to evaluate and implement mechanisms for good corporate
governance; to ensure returns for investors and firms' access to
capital markets on reasonable terms; perspectives of investor, firm,
regulator.

06A:286 Seminar in Accounting Research arr.
Forum on current research in accounting, related disciplines;
faculty, student, guest papers, Ph.D. dissertation proposals.
Prerequisite: Ph.D. enrollment.

06A:287 Seminar in Selected Accounting Topics arr.
Individual study, research paper preparation. Prerequisites: Ph.D.
enrollment and consent of instructor.

Prerequisites: Ph.D. enrollment and consent of instructor.

Primarily for Graduate
Students

06A:220 Design and Use of Cost Management
Systems 3 s.h.
Development of cost accumulation and reporting systems that
complement a firm's strategy and structure; how activity-based
cost management systems increase competitiveness by helping a
firm manage its costs, processes, people. Prerequisite: 06A:130 or
06A:235 or consent of instructor.

06A:221 Financial Reporting: Theory and Practice 3 s.h.
Corporate accounting choices in framework of traditional
accounting theory, economic consequences, firm valuation.
Prerequisites: 06A:132 and graduate standing in business.

06A:230 Advanced Auditing 3 s.h.
Advanced issues such as ethics, independence, regulation and
litigation, audit evidence, models of audit testing. Prerequisites:
06A:144 and graduate standing in business.

06A:231 Taxes and Business Strategy 3 s.h.
Effect of taxes on business decisions, including investment
strategies, financial policies; emphasis on tax planning, evaluating
tax consequences of business decisions. Prerequisites: 06N:215 or
equivalent or consent of instructor, and graduate standing in
business.

06A:235 Strategic Cost Analysis 3 s.h.
Introduction to cost accumulation, reporting, cost management
systems; managerial and divisional performance evaluation;
appropriate use of cost data for short- and long-run decisions;
product costing in manufacturing and service industries.
Prerequisite: 06N:215 or consent of instructor.
Economics

Chair: Raymond G. Riezman
Professors: Gabriele Camera, Gary C. Fethke (Leonard A. Hadley Professor of Leadership), John W. Fuller, John F. Geweke (Harlan E. McGregor Professor of Economic Theory), Srihari Govindan, Martlynne Beth Ingram (C. Woody Thompson Professor), Forrest D. Nelson, George R. Neumann (George Daly Professor of Economics), Harry J. Paarsch, B. Ravikumar (Henry B. Tippie Research Professor of Economics), Raymond G. Riezman (Henry B. Tippie Research Professor of Economics), N.E. Savin, Charles H. Whiteman (Stanley M. Howe Chair in Leadership)
Associate professors: Matthew F. Mitchell, John L. Solow, Gustavo J. Ventura
Associate professor emeritus: Michael S. Balch
Assistant professors: April M. Franco, Ayca Kaya, Fernando Leiva, Elena Pastorino, Galina Vereshchagina, Yuzhe Zhang

Undergraduate degrees: B.A., B.S., B.B.A. in Economics
Undergraduate nondegree program: Minor in Economics
Graduate degrees: M.A., Ph.D. in Economics
Web site: http://www.biz.uiowa.edu/economics

Economics is the study of how societies allocate limited resources to achieve competing ends. Using both empirical and deductive methods, economics analyzes incentives, constraints, organizational forms, and market forces to understand patterns of production, exchange, and consumption of goods and services. It treats diverse issues such as wealth and poverty, government expenditures and taxation, prosperity and depression, inflation and unemployment, relations between management and labor, economic growth, environmental protection, health care delivery, the war on drug abuse, free trade versus protectionism, U.S. competitiveness in international markets, and the quality of American education.

The Department of Economics offers degree programs for undergraduates and graduate students.

Undergraduate Programs

The department offers three undergraduate degrees in economics: a Bachelor of Arts (B.A.) and a Bachelor of Science (B.S.) in economics awarded by the College of Liberal Arts and Sciences, and a Bachelor of Business Administration (B.B.A.) in economics awarded by the Henry B. Tippie College of Business.

The B.A. is designed to achieve a balance between economic theory, mathematical tools, and field applications. The B.S. maintains a similar balance but emphasizes development of analytic tools; it prepares students for graduate work in economics or related business and technical fields. The B.B.A. emphasizes economic foundations of business fields: accounting, finance, marketing, business law, and management.

Each program provides an excellent educational background for a variety of positions in business and government. Graduates find employment in banking, financial institutions, industrial firms, and trade organizations and in federal, state, and local government agencies dealing with economic policy, regulation, and analysis. Economics also provides excellent preparation for the study of law and for graduate study in fields such as business management, public administration, hospital and health administration, urban and regional planning, transportation, journalism, political science, and statistics.

Bachelor of Arts

The Bachelor of Arts in economics requires 32 s.h. in the major. Students should pay close attention to the order in which they take courses, since some courses are prerequisites for others.

The Handbook for Economics Majors, available from the department, offers help in developing a study plan.

The following courses are required.

All of these:
06E:071 Statistics for Strategy Problems 3 s.h.
22M:017 Calculus and Matrix Algebra for Business (students who have taken 22M:025 or 22M:031 may use that class) 4 s.h.
22S:008 Statistics for Business 4 s.h.
A total of 21 s.h. in 100-level economics theory and field courses, as follows.

All of these:
- 06E:104 Microeconomic Theory 3 s.h.
- 06E:105 Macroeconomics 3 s.h.
- Two advanced field courses chosen from 06E:171 through 06E:189 6 s.h.
- Three additional courses chosen from 06E:111 through 06E:189 9 s.h.

Unless otherwise approved by the director of undergraduate studies, no more than 6 of the 21 s.h. required in 100-level economics courses may be satisfied by transfer or correspondence credit. Students should take 06E:104 and 06E:105 at The University of Iowa.

PREREQUISITES
Prerequisites for most 100-level courses in economics: 06E:001 and 06E:002, or consent of instructor
Prerequisites for 06E:104: 06E:001 and 22M:017, or consent of instructor
Prerequisites for 06E:105: 06E:002, 06E:104, and 22M:017
Prerequisite for 06E:071: 22S:008
Prerequisites for courses numbered 06E:171 and above: 06E:104 and 06E:105

Bachelor of Science

The Bachelor of Science in economics requires a minimum of 33 s.h. in the major. Students should pay close attention to the order in which they take courses, since some courses are prerequisites for others. The Handbook for Economics Majors, available from the department, offers help in developing a study plan.

The following courses are required.
This sequence:
- 22M:025-22M:026 Calculus I-II 8 s.h.
One of these:
- 22S:120 Probability and Statistics 4 s.h.
- 22S:130-22S:131 Introduction to Mathematical Statistics I-II 6 s.h.
A total of 21 s.h. in 100-level economics theory and field courses, as follows.

All of these:
- 06E:104 Microeconomic Theory 3 s.h.
- 06E:105 Macroeconomics 3 s.h.
- 06E:184 Introduction to Econometrics 3 s.h.

Two additional advanced field courses numbered from 06E:171 through 06E:189 6 s.h.
Two additional courses chosen from 06E:111 through 06E:189 6 s.h.

Unless otherwise approved by the director of undergraduate studies, no more than 6 of the 21 s.h. required in 100-level economics courses may be satisfied by transfer or correspondence credit. Students should take 06E:104 and 06E:105 at The University of Iowa.

For students planning to pursue a graduate degree in economics, 22S:130 and 22S:131 are recommended in place of 22S:120.

PREREQUISITES
Prerequisite for 22S:120 and 22S:130: 22M:026 or 22M:032
Prerequisites for most 100-level courses in economics: 06E:001 and 06E:002, or consent of instructor
Prerequisites for 06E:104: 06E:001 and 22M:017, or consent of instructor
Prerequisites for 06E:105: 06E:002, 06E:104, and 22M:017
Prerequisites for courses numbered 06E:171 and above: 06E:104 and 06E:105
Prerequisite for 06E:184: 22S:120 or 22S:131

Bachelor of Business Administration

The Bachelor of Business Administration in economics requires 21 s.h. of economics course work, including the business core course 06E:071 Statistics for Strategy Problems (3 s.h.), and 18 s.h. in 100-level economics courses, including the following. Students should take 06E:104 and 06E:105 at The University of Iowa. Students should pay close attention to the order in which they take courses, since some courses are prerequisites for others. The Handbook for Economics Majors, available from the department, offers help in developing a study plan.

All of these:
- 06E:104 Microeconomic Theory 3 s.h.
- 06E:105 Macroeconomics 3 s.h.
- Two field courses numbered from 06E:171 through 06E:189 6 s.h.
- Two additional courses numbered from 06E:111 through 06E:189 6 s.h.
PREREQUISITES

Prerequisites for most 100-level courses in economics: 06E:001 and 06E:002, or consent of instructor

Prerequisites for 06E:104: 06E:001 and 22M:017, or consent of instructor

Prerequisites for 06E:105: 06E:002, 06E:104, and 22M:017

Prerequisite for 06E:071: 22S:008

Prerequisites for courses numbered 06E:171 and above: 06E:104 and 06E:105

Four-Year Graduation Plan

Bachelor of Arts, Bachelor of Science

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

These checkpoints apply to both the Bachelor of Arts and the Bachelor of Science.

Before the third semester begins: at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: at least one-half of the semester hours required for graduation, 06E:001 and 06E:002, and the math component of quantitative courses required for major

Before the seventh semester begins: three-quarters of the semester hours required for graduation, 06E:104 and 06E:105, and one 100-level economics course

Before the eighth semester begins: three 100-level economics courses, including one advanced course (numbered 06E:171 through 06E:189), and the statistics component of the quantitative course requirement

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Honors

Bachelor of Arts, Bachelor of Science

Students in the College of Liberal Arts and Sciences working toward a B.A. or B.S. in economics are encouraged to take part in the honors program in economics, which provides opportunities for high-achieving students to pursue special research interests. Honors students in economics must be members of the University of Iowa Honors Program, which requires students to maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University of Iowa Honors Program for more information).

To enter the honors program in economics, students must complete 06E:104 Microeconomic Theory and 06E:105 Macroeconomics before the senior year. Honors students typically register for 06E:194 Honors Seminar in the fall of the senior year. Then they define and complete a research project under the guidance of a supervising
faculty member, earning up to 6 s.h. in 06E:195 Senior Thesis in Economics. The thesis is presented orally to a committee of three faculty members, typically the undergraduate honors advisor, the student’s research supervisor, and a third faculty member agreed upon by the student and the honors advisor.

Interested students should consult the honors advisor by the second semester of their junior year.

**Bachelor of Business Administration**

The Tippie College of Business offers qualified B.B.A. students the opportunity to pursue honors study. For more information, contact the Undergraduate Program Office or see “B.B.A. with Honors” in the Tippie College of Business section of the Catalog.

**Minor**

The minor in economics requires at least 15 s.h. in economics with a g.p.a. of at least 2.00; 12 of the 15 s.h. must be taken at The University of Iowa in courses numbered above 06E:100.

**Course Work for Nonmajors**

Students in the College of Liberal Arts and Sciences may wish to use economics courses as part of other majors or the General Education Program. The introductory courses 06E:001 Principles of Microeconomics and 06E:002 Principles of Macroeconomics are approved for General Education in social sciences; they introduce the field of economics and the specialized topics of upper-division courses. The intermediate theory courses 06E:104 Microeconomics Theory and 06E:105 Macroeconomics provide a deeper foundation in the core theories and methods of the discipline. They serve as preparation for upper-division field courses or as terminal courses in an economics study plan.

Course work in economics can be related to majors in many other fields. For example, history majors might take 06E:178 American Economic History; political science majors could elect 06E:119 Economics of the Government Sector and 06E:125 International Economics; global studies majors, 06E:133 Environmental and Natural Resource Economics; pre-law students, 06E:171 Antitrust: Legal and Economic Analysis and 06E:172 Law and Economics; mathematics and engineering majors, 06E:104 Microeconomic Theory and 06E:187 Introduction to Mathematical Economics; and statistics majors, 06E:184 Introduction to Econometrics. The *Handbook for Economics Majors* lists economics courses that complement studies in other fields.

Some students combine related interests by pursuing double majors in economics and another field, such as computer science, geography, global studies, history, mathematics, political science, sociology, or statistics.

**Undergraduate Economics Forum**

Students are invited to join the undergraduate Economics Forum. The group sponsors programs to help students plan for careers or graduate study and holds social events, special lectures, and round-table discussions. It provides opportunities for students to meet other economics majors and department faculty members.

**Graduate Programs**

The department offers a Master of Arts and a Doctor of Philosophy in economics. It also offers a joint Doctor of Philosophy/Juris Doctor with the College of Law; see “Joint Ph.D./J.D.” later in this section.

**Master of Arts**

The Master of Arts is offered only to students working toward a Ph.D. in economics.

**Doctor of Philosophy**

The Doctor of Philosophy in economics requires a minimum of 72 s.h. of graduate credit. The program provides rigorous training in economic theory, econometrics, and applied economics. It has six components: a coordinated sequence of core courses, a qualifying examination, a research paper, a set of major field courses, a dissertation proposal and comprehensive examination, and a dissertation.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog. Application deadline for admission and financial support is January 15 for fall semester entry.
Special Seminar

Each year the department offers a seminar program that brings eminent economists from other universities and from government agencies to The University of Iowa campus. Presentations by Department of Economics faculty members and students also are featured.

Courses

Primarily for Undergraduates

Note: 06E:001 and 06E:002 may be taken in either order or simultaneously. They are approved for General Education in social sciences for B.A. and B.S. students.

06E:001 Principles of Microeconomics 3-4 s.h.
Organization, workings of modern economic systems; role of markets, prices, competition in efficient allocation of resources and promotion of economic welfare; alternative systems; international trade. GE: social sciences (except for B.B.A. students).

06E:002 Principles of Macroeconomics 3-4 s.h.
National income and output, employment and inflation; money, credit; government finance; monetary, fiscal policy; economic growth, development; international finance. GE: social sciences (except for B.B.A. students).

06E:071 Statistics for Strategy Problems 3 s.h.
Continuation of 22S:008; working knowledge of statistical techniques, scientific data-based approach to problem formulation and solution, statistical techniques in the context of real data analysis, assessment of defects in statistical analyses, using data for making business decisions, choosing appropriate statistical procedures, developing skill in communicating statistical results to audiences without knowledge of statistics. Prerequisites: 22M:017 and 22S:008.

06E:104 Microeconomic Theory 3 s.h.
Economic theory of the behavior of consumers, producers, and other economic agents; role of markets in coordinating economic activity, conditions that markets require for efficient allocation of resources; market imperfections; strategic behavior of economic actors. Prerequisites: 06E:001 and 22M:017, or consent of instructor.

06E:105 Macroeconomics 3 s.h.
Measurement of macroeconomic indicators; economic growth and business cycles; use of macroeconomic models to study the role of government fiscal and monetary policies. Prerequisites: 06E:002, 06E:104, and 22M:017; or consent of instructor.

06E:111 Labor Economics 3 s.h.
Microeconomic analysis of labor markets, related institutions; labor supply decisions made by workers, labor demand decisions made by firms, market equilibrium; economic analysis of unions; returns to education; family decisions. Prerequisites: 06E:001 and 06E:002, or consent of instructor; closed to students who have taken or are taking 06E:175.

06E:113 Health Economics 3 s.h.
Structure of America’s health care industry, economic analysis applied to its problems of production, pricing, distribution; cost-effectiveness, financing of medical costs, role of government. Prerequisites: 06E:001 and 06E:002, or consent of instructor.
06E:117 Money, Banking, and Financial Markets 3 s.h.
Role of money; institutions in determination of income, employment, prices in domestic and world economy. Prerequisites: 06E:001 and 06E:002, or consent of instructor.

06E:119 Economics of the Government Sector 3 s.h.
Economic functions of government in modern economies; economic decision making; budgetary processes; effects of government expenditures, taxation on allocation of resources, distribution of income, economic growth, stability. Prerequisites: 06E:001 and 06E:002, or consent of instructor.

06E:125 International Economics 3 s.h.
Modern theories of international trade and investment; role of tariffs and other restrictions of international trade; foreign exchange markets, international monetary arrangements, international economic policy. Prerequisites: 06E:001 and 06E:002, or consent of instructor.

06E:129 Economic Growth and Development 3 s.h.
Determinants of rising living standards; accumulation of physical and human capital; predictions of economic growth models compared to observed changes in living standards. Prerequisites: 06E:001 and 06E:002, or consent of instructor.

06E:133 Environmental and Natural Resource Economics 3 s.h.
Environmental and resource use problems; efficient mechanisms and other policies for environmental protection, management of common property resources. Prerequisites: 06E:001 and 06E:002, or consent of instructor.

06E:135 Regional and Urban Economics 3 s.h.
Theory of location and regional development; central place theory; why cities exist and trade with one another; models of land use patterns, rents; empirical tests of models; policy applications. Prerequisites: 06E:001 and 06E:002, or consent of instructor.

06E:141 Economics of American Industries 3 s.h.
Structural evolution; imperfect competition, resource allocation; development of public policy on monopoly; selected industries. Prerequisites: 06E:001 and 06E:002, or consent of instructor.

06E:145 Introduction to the Economics of Transportation 3 s.h.
Transportation markets—intercity, rural, urban; transportation modes—rail, highway, air, water, pipeline; issues in environmental and economic regulation, finance, policy, planning, management, physical distribution. Same as 044:133, 102:133.

06E:160 Economics of Families and Households 3 s.h.
Micro- and macroeconomic theory applied to economic decisions of families, households; practical and theoretical issues in income generation, spending and saving decisions, risk management and asset allocation, investments, and intergenerational wealth transfers. Prerequisites: 6 s.h. of 100-level economics courses and junior or senior standing, or consent of instructor.

06E:164 Economies in Transition 3 s.h.
Emerging markets and newly industrialized nations in Asia, Latin America, the former Soviet Union; developments in these regions over past decades—financial crises, industrialization, economic reform, privatization, impact of globalization, development of human capital, income distribution; role of institutions in the transition from poor to rich nation. Prerequisites: 06E:001 and 06E:002, or consent of instructor.

06E:169 Introductory Topics in Economics arr.
Topics vary.

06E:171 Antitrust: Legal and Economic Analysis 3 s.h.
Topics in federal antitrust policy; merger policy, monopolization, predatory pricing, collusion, vertical restrictions, resale price maintenance, enforcement; case law, economics literature. Prerequisite: 06E:104 or 091:208 or consent of instructor.

06E:172 Law and Economics 2-3 s.h.
Law examined through analytic tools of microeconomics; impact of legal rules on resource allocation, risk bearing, distribution of economic well-being. Prerequisites: 06E:104 and 06E:105, or consent of instructor.

06E:173 Advanced International Economics 3 s.h.
Neoclassical model of international trade, imperfect competition and international trade and investment, role of trade barriers; regional trade agreements and the World Trade Organization. Prerequisites: 06E:104 and 06E:105, or graduate standing.

06E:174 Monetary Economics 3 s.h.
Demand for and supply of money; money’s role in economy; empirical studies of money’s impact; problems with monetary control. Prerequisites: 06E:104 and 06E:105, or consent of instructor.

06E:175 Economic Analysis of Labor Markets 3 s.h.
Labor supply and demand; investments in human capital, compensating wage differentials, discrimination, long-term contracts, occupational choice, family decisions, unions, immigration. Prerequisites: 06E:104, 06E:105, elementary calculus and statistics.

06E:176 Public Sector Economics 3 s.h.
Economic functions of government; budgetary processes; effects of government expenditures, taxation on resource allocation, income distribution, economic growth and stability. Prerequisites: 06E:104 and 06E:105, or consent of instructor.

06E:177 Industrial Organization 3 s.h.
Market structure; effects of business practices, informational problems on market structure; appraisal of antitrust policies, government regulation of business. Prerequisites: 06E:104 and 06E:105.

06E:178 American Economic History 3 s.h.
Emphasis on role of population, technology. Prerequisites: 06E:104 and 06E:105 for economics majors; 06E:001 and 16A:061 for non-economics majors. Same as 16A:144.

06E:179 History of Economic Thought 2-3 s.h.
Evolution of economics as a social science; ideas of Smith, Ricardo, Malthus, Marx, Marshall, Keynes, and their major critics. Prerequisites: 06E:104 and 06E:105.

06E:183 Natural Resource Economics 3 s.h.
Economics of natural resources; interaction between economic theory, empirical evidence, and public policy; land, water, fish, trees, minerals; externalities. Prerequisites: 06E:104, 06E:105, and understanding of intermediate economics, microeconomic theory.

06E:184 Introduction to Econometrics 3 s.h.
Single equation linear statistical models, estimation and hypothesis testing; serial correlation, heteroscedasticity, generalized least squares estimation; specification analysis; errors in variables; emphasis on interpretation, application of econometric models, methods, use of computers. Prerequisite: 22S:120 or equivalent.

06E:187 Introduction to Mathematical Economics 3 s.h.
Mathematical structure of economic principles, problems, systems; may include constrained optimization, choice under uncertainty, general equilibrium and welfare economics, dynamical systems and control theory, game theory. Prerequisites: 06E:104 and 06E:105, or consent of instructor.

06E:189 Advanced Topics in Economics arr.
Topics vary. Prerequisites: 06E:104 and 06E:105, or consent of instructor.
For Advanced Undergraduates

06E:194 Honors Seminar 3 s.h.
Preparation for writing the senior honors thesis. Prerequisite: consent of instructor.

06E:195 Senior Thesis in Economics arr.
Independent research leading to the senior honors thesis. Prerequisite: consent of instructor.

06E:196 Readings and Independent Study in Economics arr.

06E:199 Internship arr.
Participation in approved internship programs (e.g., Washington Center Internships). Prerequisite: consent of instructor.

Primarily for Graduate Students

With consent of the department chair, qualified undergraduates may enroll in courses listed for graduate students.

06E:200 Economic Analysis I 3 s.h.
Basic metric topology, convex analysis, function spaces, measure theory and integration.

06E:201 Economic Analysis II 3 s.h.
Behavior under uncertainty, macroeconomic models; dynamic programming, asset pricing, saving, consumption.

06E:203 Microeconomics I 3 s.h.
Consumer choice theory, producer theory, choice under uncertainty, basic game theory. Offered fall semesters. Prerequisite: 06E:200 or consent of instructor.

06E:204 Macroeconomics I 3 s.h.
Economic growth, business cycles, money and inflation. Offered fall semesters. Prerequisite: 06E:201 or consent of instructor.

06E:205 Microeconomics II 3 s.h.
General equilibrium and welfare analysis, adverse selection, the principal-agent problem, social choice, mechanism design. Offered spring semesters. Prerequisite: 06E:203 or consent of instructor.

06E:206 Macroeconomics II 3 s.h.
Dynamic macroeconomic models; stochastic macroeconomics; time consistency equilibrium business cycle theory. Offered spring semesters. Prerequisite: 06E:204 or consent of instructor.

06E:211 Mathematical Economics I 3 s.h.
Convex analysis in economic theory; ordinal and cardinal preference relations; quasiconcave, concave numerical representations; separation principle for convex sets—linear programming, concave programming; Brouwer fixed point theorem; existence of competitive equilibrium. Prerequisite: 06E:205 or consent of instructor.

06E:212 Mathematical Economics II 3 s.h.
Theories of n-person games, noncooperative or cooperative; applications to general economic equilibrium analysis. Prerequisite: 06E:211.

06E:221 Econometrics 3 s.h.
Statistical inference in single and multiple equation stochastic models, models with nonindependent or nonidentically distributed error structure, dynamic models; OLS, GLS, IV, ML estimation; asymptotic distribution theory; exact, asymptotic hypothesis tests. Prerequisite: 22S:154 or equivalent.

06E:222 Applied Econometrics 3 s.h.
Empirical problems; multiple linear regression, nonlinear regression, maximum likelihood, hazard functions, univariate and multivariate time series, flexible functional forms. Prerequisite: 06E:221.

06E:223 Econometric Theory I 3 s.h.
Inference from data and theory in economic models; emphasis on decision making and simulation methods. Prerequisite: 06E:222 or consent of instructor.

06E:234 International Business—M.B.A. 3 s.h.
Problems in international business; how to export, how to deal with import competition, international joint ventures; country studies. Prerequisite: consent of instructor.

06E:235 International Trade Theory 3 s.h.
The theory of international trade, including basic models of international trade; capital and labor mobility and trade; protection of international trade; the political economy of international trade; empirical applications of international trade. Prerequisite: consent of instructor.

06E:241 Macroeconomics III 2-6 s.h.
Current research in macroeconomics; development of research topics with emphasis on theoretical and empirical analysis. Prerequisites: 06E:205 and 06E:221.

06E:245 Monetary Theory 2-3 s.h.
Research at the frontier of monetary theory and policy; overlapping generations models, search models of money, representative agent monetary models, intermediation and banking theory, and financial contracts.

06E:250 Labor Economics 3 s.h.
Problems and models, including intertemporal models of labor markets; uncertainty and labor market activity; retirement decisions, economic theories of fertility; economics of discrimination; job search models; economic models of unions; bargaining and strikes, public sector labor markets; determinants of income distribution; emphasis on empirical verification of theory. Prerequisites: 06E:205, and 06E:184 or 06E:221.

06E:271 Industrial Organization 2-4 s.h.
The firm, monopolistic competition, oligopoly and workable competition; industrial organization, nature of equilibrium under uncertainty. Prerequisites: 06E:205 and 06E:211.

06E:272 Economics of Organization 2-4 s.h.
Theoretical design of mechanisms for achieving efficient allocations within organizations, and development of empirical frameworks to implement such mechanisms; applications to problems in industrial organization and labor economics. Prerequisite: 06E:205.

06E:299 Contemporary Topics in Economics 3 s.h.
Topics not offered in other courses. Repeatable. Prerequisite: consent of instructor.

06E:300 Readings in Economics arr.
Prerequisite: consent of instructor.

06E:301 Thesis in Economics arr.
Prerequisite: consent of instructor.

Advanced Graduate Seminars

06E:310 Seminar in Economic Theory arr.
Prerequisite: consent of instructor.

06E:311 Seminar in Economic Theory II arr.

06E:321 Workshop in Microeconomics 1 s.h.
Prerequisite: consent of instructor.

06E:322 Workshop in Macro and Monetary Economics 1 s.h.
Prerequisite: consent of instructor.
Chair: Paul A. Weller
Professors: David S. Bates, Jarjisu Sa-Aadu (Chester A. Phillips Professor of Business Finance and Real Estate), Anand M. Vijh (Marvin and Rose Lee Pomerantz Chair in Finance), Paul A. Weller (John F. Murray Professor)
Professors emeriti: Charles E. Marberry, Robert M. Soldofsky, Richard A. Stevenson
Clinical professor: John H. Spitzer
Associate professors: Matthew T. Billett, Jon A. Garfinkel, Puneet Handa, Erik Lie, Thomas A. Rietz, Gerry L. Suchanek, Ashish Tiwari
Associate professor emeritus: G. Carl Schweser
Assistant professors: Philip R. Davies, Satadru Hore, Todd I. Houge, James T. Leverty, Yiming Qian
Lecturers: Chesca Colloredo-Mansfeld, Larry Hershberger, Heidi Lie, Sarah Rogers

Undergraduate degree: B.B.A. in Finance
Undergraduate nondegree program: Certificate in Risk Management and Insurance
Graduate degrees: M.B.A.; Ph.D. in Business Administration
Web site: http://www.biz.uiowa.edu/finance

The Department of Finance is committed to delivering undergraduate and graduate degree programs that integrate the technology and analytics of today's global financial community. The department's goal is to provide students with the technical skills they will need to enhance their managerial effectiveness, whether they work in large corporations, small organizations, or private consulting.

Undergraduate Program

The department offers a Bachelor of Business Administration in finance. The program provides a balance of theory, applications, and financial information technology that facilitates students' transition from classroom to workplace. Through fundamental finance principles and state-of-the-art financial market information technologies, students develop analytical abilities to interpret financial market data, implement the latest trading and investment strategies, and make effective managerial decisions in national as well as international settings.

The program stresses learning by doing, partnership with industry, and internships, with the goal of enhancing students' career development. Students receive a balanced education consistent with the globalization of business and the explosion in financial markets and information technology.

Careers for students majoring in finance include corporate treasury operations, cash management, mergers and acquisitions, investment banking, sales and security trading, security analysis, commercial banking and financial services, credit analysis, mortgage lending, financial planning, consulting, public administration, and venture capital.

The department also offers the undergraduate Certificate in Risk Management and Insurance.

Bachelor of Business Administration

The Bachelor of Business Administration in finance requires 20 s.h. in the major, as follows.

06A:120 Financial Accounting Reporting 3 s.h.
06F:110 Financial Information Technology 2 s.h.
06F:111 Investment Management 3 s.h.
06F:117 Corporate Finance 3 s.h.
Three of these:
*06F:102 Principles of Risk Management and Insurance 3 s.h.
*06F:103 Property and Liability Insurance 3 s.h.
*06F:104 Corporate and Financial Risk Management 3 s.h.
*06F:105 Life and Health Insurance 3 s.h.
*06F:106 Employee Benefit Plans 3 s.h.
06F:112 Applied Equity Valuation 3 s.h.
06F:113 Fixed Income Securities 3 s.h.
06F:114 Commercial Banking 3 s.h.
06F:115 Investment Banking 3 s.h.
06F:116 Futures and Options 3 s.h.
06F:118 Advanced Corporate Finance 3 s.h.
06F:126 Real Estate Process 3 s.h.
06F:130 International Finance 3 s.h.

*Students may count only two of these courses toward the finance major.

Certificate in Risk Management and Insurance

The Department of Finance and the Emmett J. Vaughan Institute of Risk Management and Insurance offer the Certificate in Risk Management and Insurance.
Management and Insurance. The certificate program provides undergraduate students with a foundation for careers in corporate risk management, risk management consulting, employee benefits management, insurance brokerage, and underwriting. See Risk Management and Insurance in the Catalog.

Graduate Program

The Department of Finance offers the Doctor of Philosophy in business administration. Ph.D. requirements are described under “Graduate Programs” in the Tippie College of Business section of the Catalog and on the Department of Finance web site.

The Master of Arts in business administration is a nonthesis degree awarded only to students who begin the Ph.D. program and decide not to continue. Incoming students may not elect to pursue the M.A.

For information about the M.B.A., see Master of Business Administration Program in the Catalog or contact the Tippie School of Management.

Courses

Primarily for Upper-Division Undergraduates

06F:100 Introductory Financial Management 3 s.h.
Financial management goals and decision making; valuation of bonds and stocks, risk and return analysis, portfolio diversification, market efficiency, asset pricing, cost of capital, agency theory, capital budgeting, financial planning. Prerequisites: 06A:002, 06E:001, 06E:002, and junior standing.

06F:101 Directed Readings in Finance arr.
Individually guided readings in selected topics. Prerequisite: consent of instructor.

06F:102 Principles of Risk Management and Insurance 3 s.h.
Introduction to risk and insurance; risk identification and evaluation, demand for insurance, effects of limited liability, theory of moral hazard and adverse selection; business and personal risk; insurance as a risk management tool. Corequisite: 06F:100 or consent of instructor.

06F:103 Property and Liability Insurance 3 s.h.
Fundamentals of commercial property and liability insurance; commercial property and liability contracts, functions of property and liability insurers; regulation and financial analysis of property and liability insurers; marketing, underwriting, rate making, claim settlements. Prerequisite: 06F:102.

06F:104 Corporate and Financial Risk Management 3 s.h.
Analysis and treatment of pure and financial risks faced by business organizations; development and implementation of the risk management process, application of varied risk management techniques to identified exposures; how businesses manage risk and how insurance is used to manage the cost of risk; case studies. Prerequisite: 06F:102. Corequisite: 06F:110.

06F:105 Life and Health Insurance 3 s.h.
Types of life insurance and annuity contracts and their uses; regulation of life and health insurers; development of financial plans using life insurance products; Social Security, group, and individual health insurance products, including major medical, disability income, long-term care policies; marketplace analysis; contractual provisions, determination of human life values, mathematics of life contingencies and pricing. Prerequisite: 06F:102.

06F:106 Employee Benefit Plans 3 s.h.
Management of employee benefit plans (e.g., group life and health insurance, retirement programs); design, administration, and financing of employee benefits; federal administration of employee benefit plans; funding requirements, financial alternatives; funding and vesting of retirement annuities; design and management of health care plans, including “cafeteria” approach and nonqualified deferred compensation arrangements; economic effects and financing employee benefits and retirement plans in private and public sectors. Prerequisite: 06F:102.

06F:108 Topics in Finance I 1-3 s.h.
Contemporary issues in finance. Prerequisite: 06F:100.

06F:109 Topics in Finance II 1-3 s.h.
Contemporary issues in finance. Prerequisite: 06F:100.

06F:110 Financial Information Technology 2 s.h.
Applications of commonly used financial software and data systems reviewed by student teams. Corequisite: 06F:100.

06F:111 Investment Management 3 s.h.
Investment in marketable securities in domestic and international markets; financial markets, securities trading, evaluation of risk/return trade-off, formulation and implementation of investment strategies, efficient portfolio formation. Prerequisite: 06F:100. Corequisite: 06F:110.

06F:112 Applied Equity Valuation 3 s.h.
Valuation of financial securities using cases and financial information technology: macroeconomic and industry analysis, regulatory analysis, financial statement analysis, technical analysis, trading securities, active portfolio management, performance evaluation. Prerequisites: 06F:111 and UI cumulative g.p.a. of at least 2.80.

06F:113 Fixed Income Securities 3 s.h.
Theories of fixed income securities, term structure of interest rates; asset pricing models, valuation of fixed income securities and contingent claims, fixed income portfolio management, immunization strategies, yield curve analysis. Prerequisite: 06F:100 or consent of instructor. Corequisite: 06F:110.

06F:114 Commercial Banking 3 s.h.
Management of commercial banks and financial service firms; asset and liability management, credit policy, capital risk, liquidity planning, use of swaps and derivatives to hedge interest rate risk, global banking, investment strategies. Prerequisite: 06F:100. Corequisite: 06F:110.

06F:115 Investment Banking 3 s.h.
How investment bankers interact with clients in access to growth capital, sales, trading, and investment banking; role of investment bankers through varied perspectives, including those of the client (e.g., corporate CFO, treasurer, corporate development officer) and service provider (e.g., investment banking professional). Prerequisites: 06F:100, and 06F:117 or consent of instructor.

06F:116 Futures and Options 3 s.h.
Use of options, futures, and other derivative securities in financial markets; trading technology; applications of risk management and speculation; pricing relations with underlying securities. Prerequisite: 06F:111.

06F:117 Corporate Finance 3 s.h.
Advanced managerial decision making; corporate financial policy, dividend policy, agency theory, corporate restructuring, capital
structure strategies, mergers and acquisitions, option pricing fundamentals, convertible debt, callable debt, warrants. Prerequisite: 06F:100. Corequisite: 06F:110.

06F:118 Advanced Corporate Finance 3 s.h.
Issues relevant to financial management, payout policy, financial distress and bankruptcy, restructuring, market for corporate control; recent research and cases from the corporate arena; other topics (e.g., bankruptcy) to broaden application and understanding of finance theory. Prerequisite: 06F:117.

06F:126 Real Estate Process 3 s.h.
Fundamentals of real estate finance and investments; economic base analysis, asset analysis, market analysis, mortgage markets, underwriting, alternative mortgages, mortgage-backed securities, real estate securitization, land development, valuation principles, investment analysis, tax consideration, portfolio management. Prerequisite: 06F:100. Corequisite: 06F:110.

06F:130 International Finance 3 s.h.
International monetary systems, exchange rate determination, use of currency derivative in hedging and risk management, currency swaps, foreign direct investment, international corporate finance, international capital budgeting, international portfolio investment, Third World debt, privatization, joint ventures. Prerequisite: 06F:100. Corequisite: 06F:110.

06F:190 Hawkinson Scholar Seminar 1 s.h.
Advanced skill and understanding required for pursuit of investment banking, management consulting careers; specialized résumé and interview training, industry presentations, relevant case assignments. Repeatable. Prerequisite: consent of Hawkinson Institute of Business Finance director.

06F:191 Hawkinson Scholar Seminar: Topics in Finance 0 s.h.
Subsets in the financial services industry, including hedge funds, investment banking, commercial banking; valuation techniques used in real-world mergers, acquisitions, equity offerings, debt financing, and so forth.

06F:199 Academic Internship 1-3 s.h.
Professional internship experience with associated academic content. Repeatable. Prerequisite: consent of department chair.

Primarily for Graduate Students

06F:201 Directed Readings in Finance—M.B.A. arr.
Prerequisite: consent of instructor.

06F:202 M.A. Research Report 1 s.h.
Prerequisites: nonthesis M.A. enrollment and consent of instructor.

06F:205 Contemporary Topics in Finance arr.

06F:208 Structured Finance—Securitization 3 s.h.
Securitized assets such as mortgages, asset-backed securities (e.g., credit cards, auto loans, trade receivables), collateralized debt obligations, institutional structures, credit risk, valuation, cost of capital, corporate finance, accounting; legal, tax, and regulatory issues associated with securitization; how to design, value, and implement structured-financed products that create value from stakeholders' perspectives. Prerequisite: 06N:225.

06F:209 Investment Banking 3 s.h.
Overview of industry consolidation, underwriting of securities, merger valuation options, legal and regulatory considerations, IPOs, private equity; industry-specific case studies, student/practitioner discussion of issues facing industry. Prerequisite: 06N:225 for graduate students; consent of instructor for undergraduates.

06F:210 Financial Information Technology 1 s.h.
Applications of commonly used financial software and data systems reviewed by student teams.

06F:212 Investment Management 3 s.h.

06F:213 Futures and Options 3 s.h.
Use of options, futures, and other derivative securities in financial management; types of derivative securities, markets, trading technology; applications of risk management and speculation; pricing relations with underlying securities. Prerequisite: 06N:225. Corequisite: 06F:210.

06F:214 Real Estate Finance and Investments 3 s.h.

06F:215 Corporate Finance 3 s.h.
Structured problems and cases in corporate financial policy decisions; financial decision models, current and fixed asset administration, cost of capital, capital budgeting, dividends, cash flow projections, cash management, mergers and acquisitions. Prerequisite: 06N:225. Corequisite: 06F:210.

06F:216 Fixed Income Securities 3 s.h.
Theories of fixed income securities, term structure of interest rates; asset pricing models, valuation of fixed income securities, valuation of contingent claims, fixed income portfolio management. Prerequisite: 06N:225. Corequisite: 06F:210.

06F:218 Advanced Corporate Finance 3 s.h.
Applied management; financial instruments and innovations, IPOs, SEOs, mergers and acquisitions, leveraged buyouts, capital structure, dividend policy, corporate restructuring, treasury operations, risk, real options, corporate control, executive compensation. Prerequisite: 06N:225. Corequisite: 06F:210.

06F:219 Finance for Entrepreneurs 3 s.h.
Same as 06F:233.

06F:220 Commercial and Investment Banking 3 s.h.
Overview of commercial and investment banks; principles of underwriting securities, IPOs, mergers and acquisitions, commercial lending, funding sources, asset liability management, capital management. Prerequisite: 06N:225. Corequisite: 06F:210.

06F:221 Applied Securities Management I 3 s.h.
Hands-on approach to portfolio management; setting goals, trading securities, developing programs to evaluate fund performance. First of a two-semester sequence; must be followed by 06F:222. Prerequisites: 06N:225 and consent of instructor.

06F:222 Applied Securities Management II 3 s.h.
Continuation of 06F:221. Prerequisites: 06F:221 and consent of instructor.

06F:223 International Finance 3 s.h.
Impact of international financial markets on business and financial decisions in foreign environments; global finance, foreign exchange, Eurocurrency markets, currency derivatives, risk hedging, international bond and equity markets, privatization, joint ventures. Prerequisites: 06N:225 and two years experience, or consent of instructor. Corequisite: 06F:210.

06F:224 Security Analysis 3 s.h.
Valuation of financial securities (primarily equities) using discounted cash flow model; industry, regulatory analysis;
financial statement analysis; active portfolio management; value-based management techniques; valuation of firms outside the United States. Prerequisite: 06N:225.

**06F:225 Finance Theory I** 3 s.h.
Consumption-based models of asset pricing; arbitrage, contingent claims; market efficiency and information economics, behavioral models; emphasis on theory. Prerequisite: Ph.D. enrollment.

**06F:226 Seminar in Corporate Finance** 3 s.h.
Valuation (DCF and CAPM); valuation under certainty, uncertainty; financial structure, cost of capital; dividend policy; firm investment in perfect, imperfect capital markets; options pricing theory; state preference model. Prerequisite: Ph.D. enrollment.

**06F:227 Finance Theory II** 3 s.h.
Continuous time theories of financial markets, including connection between an arbitrage-free pricing system and martingales; pricing of contingent claims, general equilibrium and term structure theory. Prerequisite: Ph.D. enrollment.

**06F:228 Advanced Empirical Finance** 3 s.h.
Market efficiency and term structure theory tests; tests of asset pricing models, dividend policy and financial structure issues. Prerequisites: Ph.D. enrollment and consent of instructor.

**06F:229 Seminar in Finance** 0 s.h.
Prerequisite: Ph.D. enrollment.

**06F:288 Directed Readings in Finance—Ph.D.** arr.
Prerequisites: Ph.D. enrollment and consent of instructor.

**06F:290 Thesis in Business** arr.
Prerequisite: consent of instructor.
The Department of Management and Organizations offers study of human resource management; individual, team, and organizational behavior; employment law and ethics; leadership and personal development; negotiations; training and development; and organizational design.

**Undergraduate Program**

The department offers a Bachelor of Business Administration in management. The program is designed to give students a thorough background in the department’s study areas as well as an understanding of their application to real-life situations. Specific courses, research projects, and other experiences, such as simulations, are blended to include both theoretical and pragmatic aspects of the field.

The program prepares students for a variety of line, staff, and professional positions in business, consulting firms, government, nonprofit institutions, and education. Graduates find employment opportunities in general management, sales, human resource management, strategic reward systems, staff benefits, organizational staffing, training and development, career management, and employment law. Many graduates pursue further study in law, human resources, industrial and organizational psychology, or labor relations.

**Bachelor of Business Administration**

The Bachelor of Business Administration in management requires 21 s.h. in the major, as follows.

- 06J:125 Entrepreneurial Strategy 3 s.h.
- 06J:130 Individuals, Teams, and Organizations 3 s.h.
- 06J:131 Strategic Human Resource Management 3 s.h.
- 06J:132 Law and Ethics in Management 3 s.h.
- 06J:156 Dynamics of Negotiations 3 s.h.

Two of these:
- 06J:140 Competitive Strategy 3 s.h.
- 06J:145 Training and Developing Human Resources 3 s.h.
- 06J:146 International Business Environment 3 s.h.
- 06J:147 Nonprofit Organizational Effectiveness I 3 s.h.
- 06J:148 Nonprofit Organizational Effectiveness II 3 s.h.
- 06J:159 Introduction to the U.S. Health Care System 3 s.h.
- 06J:160 Staffing Organizations 3 s.h.
- 06J:162 Leadership and Personal Development 3 s.h.
- 06J:168 Topics in Management 3 s.h.
- 06J:171 Strategic Reward Systems 3 s.h.
- 06T:192 Entrepreneurship: Business Consulting 3 s.h.

**Graduate Programs**

The Department of Management and Organizations offers the Doctor of Philosophy in business administration. Ph.D. requirements are described under "Graduate Programs" in the Tippie College of Business section of the Catalog and on the Department of Management and Organizations web site.

The Master of Arts in business administration is a nonthesis degree awarded only to students who begin the Ph.D. program and decide not to continue. Incoming students may not elect to pursue the M.A.

For information about the M.B.A., see Master of Business Administration Program in the Catalog or contact the Tippie School of Management.
Courses

Primarily for Upper-Division Undergraduates

06J:020 Career Preparation arr.

06J:047 Introduction to Law 3 s.h.
General history, structure of law; law’s action in guiding changing economic, social patterns. Prerequisite: sophomore standing.

06J:048 Introduction to Management 3 s.h.
Principles of management, organizational structure, decision making, leadership, line-staff relationships, administration of organizations. Prerequisite: sophomore standing.

06J:101 Directed Readings in Management and Organizations arr.
Prerequisite: consent of instructor.

06J:125 Entrepreneurial Strategy 3 s.h.
The synergistic effect of entrepreneurial attributes (e.g., innovation, creativity, opportunity recognition) and managerial attributes (e.g., strategic management, planning, budgeting) on profit and nonprofit organizations.

06J:130 Individuals, Teams, and Organizations 3 s.h.
Theories of organizational behavior applied to current business trends for individuals, teams, organizations; personality, managing diversity, work-family conflict, self-managed teams, charismatic leadership, work motivation, managing conflict, organizational culture. Prerequisites: 06J:047 and 06J:048.

06J:131 Strategic Human Resource Management 3 s.h.
People management activities, policies, and practices that promote effective organizations; how changes in technology, business restructuring, legal and social concerns, other issues affect human resource management. Prerequisites: 06J:047 and 06J:048.

06J:132 Law and Ethics in Management 3 s.h.
Laws affecting employers and employees, such as regulatory health and safety policies, unemployment and retirement benefits, and employment discrimination including hiring, termination, testing issues. Prerequisites: 06J:047 and 06J:048.

06J:140 Competitive Strategy 3 s.h.
How top managers plan and execute strategies that enable businesses to compete in local and global markets; analytical skills for coping with organizational uncertainties and business realities from the perspective of a senior manager; case studies. Prerequisite: 06J:048. Recommended: senior standing.

06J:145 Training and Developing Human Resources 3 s.h.
Concepts, practices in training and development; strategic issues affecting the design, implementation, and evaluation of training programs and of career management and organizational development activities. Prerequisite: 06J:131.

06J:146 International Business Environment 3 s.h.
Differences in international and domestic business; cultural, legal, political factors for managers. Prerequisite: junior or higher standing.

06J:147 Nonprofit Organizational Effectiveness I 3 s.h.
Operational and financing aspects of nonprofit management; mission and governance of organization; strategic planning for effective management, including finance, budget, income generation, fund-raising. Same as 024:147, 025:176, 032:127, 042:157, 049:175, 096:168.

06J:148 Nonprofit Organizational Effectiveness II 3 s.h.
Qualities for leadership of nonprofit organizations, including relationships with staff and volunteers; relationship of nonprofit and outside world; marketing, public relations, advocacy strategies for nonprofits. Same as 024:148, 025:177, 032:128, 042:158, 049:176, 096:169.

06J:156 Dynamics of Negotiations 3 s.h.
Predictable aspects and dynamics of bargaining experiences; simulations, experiential exercises to foster skills needed for effective negotiation in almost any situation. Prerequisite: senior standing.

06J:159 Introduction to the U.S. Health Care System 3 s.h.
Same as 174:102.

06J:160 Staffing Organizations 3 s.h.
Staffing processes; external influences such as labor markets, the legal environment; support activities such as job analysis, employment planning; staffing activities such as internal and external recruiting, selection. Prerequisite: 06J:131.

06J:162 Leadership and Personal Development 3 s.h.
Practical development and application of leadership and managerial skills to enhance individual and organizational effectiveness. Prerequisites: 06J:130, 06J:131, and senior standing.

06J:168 Topics in Management 3 s.h.
Topics not regularly offered in other courses. Prerequisites: 06J:047 and 06J:048.

06J:171 Strategic Reward Systems 3 s.h.
Role of pay and other rewards on organizational objectives; compensation’s impact on employee behavior and performance; mix of pay and benefits in compensation systems; legal environment regulating pay and benefits; nonmonetary forms of reward. Prerequisite: 06J:131.

06J:199 Academic Internship arr.
Professional internship experience with associated academic content. Repeatable. Prerequisite: consent of department chair.

Primarily for Graduate Students

06J:201 Directed Readings in Management and Organizations arr.

06J:202 M.A. Research Report 1 s.h.
Prerequisite: nonthesis M.A. enrollment.

06J:205 Contemporary Topics in Management and Organizations arr.
Ph.D. seminar; research topics in human resources and organizational behavior.

06J:232 Legal Environment of Business 3 s.h.
Legal issues surrounding start-up and day-to-day management of a business; contract law, standard business formations, tort law, employment law, business ethics, alternative dispute resolution. Prerequisite: 06N:212.

06J:235 Maximizing Team Performance 3 s.h.
Current approaches to implementing effective teams within organizations; team selection and formation, group dynamics, facilitation skills, performance and obstacle management.

06J:242 Managing and Preventing Conflict 3 s.h.
Skills for management of high-conflict situations in the workplace and for long-term business success and job satisfaction; experience developing mediation-based skills and communication techniques to prevent and resolve workplace conflicts.
06J:243 Dynamics of Consulting 3 s.h.
Consulting models, trends, processes; characteristics of internal versus external consulting services; integration of behavioral and organizational principles into organizational change programs. Prerequisite: 06N:212.

06J:244 Managing Organizational Performance 3 s.h.
Concepts and practices for effective management, measurement, and improvement of organizational performance; establishing and communicating organizational expectations, the manager as coach and motivator; measurement and methodologies, performance improvement methods. Prerequisite: 06N:212 or management course.

06J:245 Strategic Employee Development 3 s.h.
Concepts, practices in training and development; strategic issues affecting the design, implementation, and evaluation of training programs and of career management and organizational development activities. Prerequisite: 06N:212.

06J:246 International Management 3 s.h.
Management issues encountered in international business settings; assessing international politico-economic and sociocultural environments; managing a multicultural workforce; forming international structures and alliances; developing international business strategy.

06J:247 Nonprofit Organizational Effectiveness I 3 s.h.

06J:248 Nonprofit Organizational Effectiveness II 3 s.h.
Qualities for leadership of nonprofit organizations, including relationships with staff and volunteers; relationship of nonprofit and outside world; marketing, public relations, advocacy strategies for nonprofits. Same as 021:265, 024:248, 028:258, 032:229, 042:248, 091:322, 174:248.

06J:256 Dynamics of Negotiations 3 s.h.
Predictable aspects and dynamics of bargaining experiences; simulations, experiential exercises to foster skills needed for effective negotiation in almost any situation. Prerequisite: M.B.A. enrollment or consent of instructor.

06J:257 Legal Issues in Human Resource Management 3 s.h.
Laws, regulations governing human resource management policies, practices; employee discipline, termination, layoffs, privacy, involvement programs; occupational safety and health; workers' compensation; discrimination. Prerequisite: 06N:212.

06J:260 Staffing Organizations 3 s.h.
Staffing processes; external influences such as labor markets, the legal environment; support activities such as job analysis, employment planning, staffing activities such as internal and external recruiting, selection. Prerequisite: 06N:212.

06J:261 Managing Through Motivation 3 s.h.
Contemporary motivation theories and their application; role of intrinsic motivation, justice, incentive pay, job design, goals, feedback, social influence, attitudes, creativity. Prerequisites: 06N:212 and 06N:227.

06J:262 Leadership and Personal Development 3 s.h.
Major theories; determinants of leader effectiveness, personal and career success; practical development of leadership, managerial skills to enhance individual, organizational effectiveness. Prerequisite: 06N:212.

06J:263 Strategic Management of Change 3 s.h.
How congruence in organizational strategy, structure and culture, job design, and employee characteristics produce effective organizations; emphasis on managing organizational change, implementing and working in teams, project management. Prerequisite: 06N:212.

06J:267 Organizational Theory Ph.D. 3 s.h.
Organizational theory; effect of changing environment and technological factors on organizational structure and effectiveness; resource dependency and power, conflict, interorganizational network, population ecology, economic theories of organization, institutional theory.

06J:268 Seminar in Management 3 s.h.
Topics vary.

06J:269 Meta-Analysis in Behavioral and Social Sciences (Ph.D.) 3 s.h.
Methods for quantitative integration of findings in behavioral and social sciences; overall effect size or correlation, whether conflicting findings documented in research literature are due to moderators (interactions) or statistical and measurement artifacts.

06J:270 Research Methods in Management and Organizations (Ph.D.) 3 s.h.
Methods commonly used in behavioral research; critical evaluation of research; research process from idea generation to publication; practice in generating hypotheses, drafting surveys, analyzing data, reviewing manuscripts.

06J:271 Strategic Reward Systems 3 s.h.
Role of pay and other rewards on organizational objectives; compensation’s impact on employee behavior and performance; mix of pay and benefits in compensation systems; legal environment regulating pay and benefits; nonmonetary forms of reward. Prerequisite: 06N:212.

06J:272 Training and Careers (Ph.D.) 3 s.h.
Research-based examination of training and development programs; emphasis on societal, legal, organizational factors that affect training program design, implementation, evaluation; systemic relationships among training, careers, organizational development management.

06J:273 Measurement Theory and Methods in the Behavioral and Social Sciences (Ph.D.) 3 s.h.
Classical measurement theory, methods applied to psychological tests, questionnaires, ratings of work-related and other performances, behaviors; reliability theory and methods, instrument construction and item analysis, criterion construction, validity, combining and weighting instruments, cross-validation. Prerequisite: basic statistical methods course.

06J:274 Staffing Organizations (Ph.D.) 3 s.h.
Aspects of selection, including professional and legal standards, job analysis techniques, validation strategies, criterion development, selection techniques (e.g., psychological tests, interviews, biographical data, assessment centers), ethical issues.

06J:275 Group Processes and Conflict (Ph.D.) 3 s.h.
Understanding and implementing work groups in organizations; social influence and group processes, including communications, conflict, intergroup relations.

06J:276 Leadership (Ph.D.) 3 s.h.
Understanding and implementing leadership in organizations; focus on reading and analysis of basic research-related leadership theories; “great person” theories in contrast to traditional behavioral and situational theories.

06J:277 Motivation and Attitudes (Ph.D.) 3 s.h.
Motivational processes, attitudes, communication and interorganizational networks; emphasis on motivational antecedents and consequences, theoretical implications for models of work performance.

06J:278 Reward Systems and Performance Evaluation (Ph.D.) 3 s.h.
Compensation systems, government influences, equity in compensation and individual wage determination; research-based examination of performance evaluation and appraisal, theories of work performance.
06J:279 Individual Differences in Traits/Abilities
(Ph.D.) 3 s.h.
Research on individual and group differences in intelligence, personality, interests, values, other traits; findings related to performance in work world.

06J:290 Thesis in Management and Organizations arr.

06J:295 Mentored Research arr.
Management research conducted by doctoral students under faculty supervision; culminates in second-year research paper.
Management Sciences

Chair: Kurt M. Anstreicher
Professors: Kurt M. Anstreicher (Henry B. Tippie Research Professor of Management Sciences), Warren J. Boe, Gary C. Fethke (Leonard A. Hadley Professor of Leadership), Raj Jagannathan, Philip C. Jones (Clement T. and Sylvia H. Hanson Chair in Manufacturing Productivity), Johannes Ledolter (C. Maxwell Stanley Professor of International Operations Management), Timothy J. Lowe (Chester A. Phillips Professor of Operations Management), Padmini Srinivasan
Professor emeritus: Colin E. Bell
Associate professors: Samuel Burer, Ann M. Campbell, Renato E. de Matta, W. Nick Street
Associate professor emerita: Eleanor M. Birch
Assistant professors: Faiz Currim, Jeffrey W. Ohlmann, Barrett Thomas
Lecturers: Kevin Felker, Yvonne Galusha

Undergraduate degree: B.B.A. in Management Information Systems
Graduate degrees: M.B.A.; Ph.D. in Business Administration
Web site: http://www.biz.uiowa.edu/mansci

Bachelor of Business Administration

The Bachelor of Business Administration in management information systems requires 22 s.h. in the major, as follows.

- 06K:126 Visual Basic Programming 3 s.h.
- 06K:176 Managerial Decision Models 3 s.h.
- 06K:182 Applications Database Management Systems 3 s.h.
- 06K:183 Systems Analysis and Design Communications 3 s.h.
- 06K:184 Introduction to Data Communications 3 s.h.
- 22C:016 Computer Science I 4 s.h.
- One additional course from approved list of management sciences courses 3 s.h.

Graduate Programs

The Department of Management Sciences offers the Doctor of Philosophy in business administration. Ph.D. requirements are described under “Graduate Programs” in the Tippie College of Business section of the Catalog and on the Department of Management Sciences web site.

The Master of Arts in business administration is a nonthesis degree awarded only to students who begin the Ph.D. program and decide not to continue. Incoming students may not elect to pursue the M.A.

For information about the M.B.A., see Master of Business Administration Program in the Catalog or contact the Tippie School of Management.

Courses

Primarily for Undergraduates

- 06K:070 Computer Analysis 3 s.h.
The computer and its uses in organization operation, management; computer systems terminology, programming, management information systems, use of applications software.

For Undergraduate and Graduate Students

- 06K:100 Operations Management 3 s.h.
Strategic, tactical, operational issues that arise in management of production and service operations; product and process design, facilities planning, quality management, materials management,
operations planning and scheduling, emerging technologies in production and service management. Prerequisite: junior standing. Pre- or corequisite: 06K:070.

**06K:101 Directed Readings**
Prerequisite: consent of instructor.

**06K:126 Visual Basic Programming**

**06K:128 Web and Multimedia**
How multimedia tech is accomplished; tools used with each tech and modifications needed to function efficiently on the web; projects culminating in a web site.

**06K:170 Managerial Decision Models**
Mathematical programming, including linear, nonlinear, and dynamic programming, with applications in economics and management; classical optimization techniques, transportation, network flow problems. Prerequisite: 06K:070.

**06K:180 Applied Information Systems**
Application of computer technology to accounting and transaction processing systems; information systems infrastructure and trends; problem solving with microcomputer spreadsheets, databases; accounting cycle operations using accounting software. Prerequisites: 06A:001, 06A:002, 06E:071, and 06K:070.

**06K:182 Applications Database Management Systems**
Design and implementation of a database using relational DBMS; emphasis on issues of logical and physical design, database administration, concurrency control, maintenance. Prerequisite: 06K:070.

**06K:183 Systems Analysis and Design**
Design and implementation of an information system; student projects in determination of information needs, system design, information plan development; construction of prototype information system. Prerequisite: B.B.A. senior standing. Corequisite: 06K:182 or consent of instructor.

**06K:184 Introduction to Data Communications**
Computer communications: computer-communication system, hardware, data transmission principles; examples of existing communication networks; related managerial issues. Prerequisites: 06K:070 and B.B.A. senior standing.

**06K:185 MIS Capstone Project**
Individual or team senior project incorporating knowledge and skills from management information science curriculum; projects from real-world customer, such as a software system, security system, or network design; outcomes including written documentation, presentation, project report. Prerequisite: 06K:183. Corequisite: 06K:184 or consent of instructor.

**06K:186 Database Management II**
Advanced conceptual and logical design, in-depth SQL, DB administration, concurrency control, web database access; theory and practice. Prerequisite: 06K:182 or equivalent.

**06K:188 Computer and Network Security**
Network-based attacks and how to respond to them; access control, authentication methods, encryption, Public Key Infrastructure, operating system hardening, security policy practices.

**06K:189 E-Commerce Technology**
Technical tools for building e-commerce web sites; Dot Net versions of active server pages, VB, C#; student project to build prototype of an e-commerce site. Prerequisite: 06K:070.

**06K:190 Network Design and Performance**
Computer software as central to the study of network facilities selection, performance metrics; skill development through work with the telecommunications hierarchy’s layered structure. Prerequisite: 06K:184.

**06K:191 Business Consulting**
Organizational consulting; emphasis on integration of strategy, business processes, technology, and change management through case-based learning techniques; proposal simulation. Prerequisite: 06K:070.

**06K:199 Academic Internship**
Professional internship experience with associated academic content. Repeatable. Prerequisite: consent of department chair.

**Primarily for Graduate Students**

**06K:201 Directed Readings**
Prerequisite: consent of instructor.

**06K:217 Data and Decisions II**
Advanced quantitative analysis techniques with management applications; multiple regression, time series, monte-carlo simulation, and linear, nonlinear, and discrete optimization; emphasis on spreadsheet-based modeling. Prerequisite: 06N:216 or consent of instructor.

**06K:220 Introduction to Information Systems**
Effective ways for business firms to harness the power of information technology for strategic purposes; conventional and emerging architectures of information systems; integrated perspective on structural relationships among IT components; emphasis on case studies.

**06K:223 Management of E-Commerce Systems**
Benefits, capabilities, and related information technologies that compose the current state of electronic commerce; how to design, develop, and operate electronic commerce transaction processing-based applications; focus on web-based e-commerce systems and associated business models.

**06K:226 Visual Basic Programming**

**06K:227 Introduction to Modeling with VBA**
Introduction to programming Visual Basic for Applications in Excel; case studies in finance, marketing, operations, accounting. Prerequisite: 06N:216.

**06K:228 Web and Multimedia**
How multimedia tech is accomplished; tools used with each tech and modifications for efficient function on the web; projects culminating in a web site. Prerequisite: 06K:070.

**06K:230 Database Systems**
Theories and methodologies for semantic, logical, and physical database design; entity/relationship diagrams and their mapping to database schemas; normalization; languages for relational database systems, including relational algebra, Structured Query Language, query by example; query optimization and index selection; database and view creation, query and update processing; form and report design; practice with commercial DBMS products; integrity, security, concurrency control, transaction recovery.

**06K:233 Text Retrieval**
Theories and models for automatic text representation and retrieval using large text databases; methods for evaluating retrieval algorithms; alternative query models—Boolean, extended Boolean, probabilistic, vector, fuzzy and rough set models; vocabulary normalization; architecture of World Wide Web search engines and metadata. Prerequisite: 06K:230. Same as 021:230.

**06K:234 Information and Knowledge Management**
Methods to determine where the ability to capture and reuse organizational knowledge will prove most profitable to companies; how to design processes and technologies to use this information. Same as 021:234.
Data mining and knowledge discovery as applied to marketing, with emphasis on customer relationship management; predictive modeling, data reduction, association rules.

Advanced topics in database management systems.

Knowledge discovery process, including data reduction, cleansing, transformation; advanced modeling techniques from classification, prediction, clustering, association; evaluation and integration. Prerequisite: consent of instructor. Same as 22C:141.

Prerequisite: consent of instructor.

Techniques for mining the web and other unstructured or semistructured, hypertextual, distributed information repositories; crawling, indexing, ranking, filtering algorithms.

A firm’s strategic use of operations for competitive advantage through decisions on facility size, degree of vertical integration, process technology selection, proper approach to quality, productivity, and technology.

Preparation for managing projects and project portfolios; project selection, project planning and budgeting, scheduling, resource allocation, project control; integration of project planning tools, including project management software.

Mathematical programming models; linear and integer programming, transportation models, large-scale linear programming, network flow models, convex separable programming. Prerequisites: calculus and linear algebra courses. Same as 056:270.

Introduction to modeling and solving discrete optimization problems; integer programming, network flows, dynamic programming. Prerequisite: 06K:286 or consent of instructor.

Network-based attacks and how to respond to them; access control, authentication methods, encryption, Public Key Infrastructure, operating system hardening, security policy practices.

Technical tools for building e-commerce web sites; Dot Net versions of active server pages, VB, C#; student project to build prototype of an e-commerce site.

Prerequisites: Ph.D. enrollment and consent of instructor.

Design, operation, and management of a supply chain; supplier and customer contracting and partnering, inventory, transportation and logistics. Prerequisite: 06N:229.

Lean principles across the enterprise; real-world applications in manufacturing and service sectors; taught in conjunction with LAI Lean Academy.

Hands-on experience working on rapid continuous improvement (RCI) teams sponsored by industrial affiliates of the business college involved in using RCI. Offered spring break. Prerequisite: consent of instructor.
Marketing

Chair: Catherine A. Cole
Professors: Catherine A. Cole, Gary J. Gaeth (Cedar Rapids Area Business Chair), Thomas S. Gruca (Henry B. Tippie Research Professor of Marketing), Irwin P. Levin, Gary J. Russell (Henry B. Tippie Research Professor of Marketing), Randall L. Schultz, Doyle L. Weiss
Professors emeriti: Carol C. Fethke, Peter C. Riesz
Associate professor: John P. Murry
Associate professor emeritus: E. John Kottman
Assistant professors: Sri Devi Duvvuri, Dhananjay Nayakankuppam, Lopo L. Rego, Jing (Alice) Wang
Lecturers: David E. Collins, Francis C. Rydzewski
Undergraduate degree: B.B.A. in Marketing
Graduate degrees: M.B.A.; Ph.D. in Business Administration
Web site: http://www.biz.uiowa.edu/mrktg

The Department of Marketing offers programs that follow business trends and lead business practice.

Undergraduate Program

The department offers a Bachelor of Business Administration in marketing. The program is designed to provide undergraduate students with an understanding of the business, social, and economic roles of marketing and to prepare them for marketing careers.

Several decades ago, the study of marketing dealt almost exclusively with business activities involved in the flow of goods from production to consumption. Today it includes principles that are more widely applicable; they are as relevant to the success of arts, sports, and social programs as they are to firms selling goods and services. A major in marketing includes study in the behavioral sciences, communications, statistical analysis, and computer methods as well as marketing decision making.

Graduates find employment opportunities as market analysts, merchandise managers, buyers, purchasing agents, advertising managers, brand managers, and sales representatives in a variety of profit and nonprofit organizations.

Bachelor of Business Administration

The Bachelor of Business Administration in marketing requires 15 s.h. in the major, as follows.

06M:134 Marketing Research 3 s.h.
06M:135 Consumer Behavior 3 s.h.
06M:147 Marketing Management (must be taken in senior year) 3 s.h.

Two of these:
06M:105 Web Business Strategy 3 s.h.
06M:107 Retail Strategies 3 s.h.
06M:125 Direct Marketing Strategies 3 s.h.
06M:137 Advertising Theory 3 s.h.
06M:139 Sales Management 3 s.h.
06M:151 International Marketing 3 s.h.
06M:190 Contemporary Topics in Marketing 3 s.h.
06M:197 Field Studies in Marketing 3 s.h.

Graduate Programs

The Department of Marketing offers a Doctor of Philosophy in business administration. Ph.D. requirements are described under “Graduate Programs” in the Tippie College of Business section of the Catalog and on the Department of Marketing web site.

The Master of Arts in business administration is a nonthesis degree awarded only to students who begin the Ph.D. program and decide not to continue. Incoming students may not elect to pursue the M.A.

For information about the M.B.A., see Master of Business Administration Program in the Catalog or contact the Tippie School of Management.

Courses

Primarily for Upper-Division Undergraduates

06M:100 Introduction to Marketing Strategy 3 s.h.
Philosophy and activities of marketing; marketing environment of an organization; strategies with respect to marketing decisions, buyer behavior; spreadsheet analysis of marketing problems.
Prerequisites: 06E:001 and junior standing.
For Undergraduate and Graduate Students

06M:101 Directed Readings in Marketing arr.
Prerequisite: consent of instructor.

06M:105 Web Business Strategy 3 s.h.
Introduction to World Wide Web business and marketing; concepts, methods, and applications associated with doing business on the web; web page construction and design; case studies and/or entrepreneurial projects. Prerequisite: 06M:100.

06M:107 Retail Strategies 3 s.h.
Strategies for retail site selection, store design, supply chain management, customer relationship management/customer service; merchandising management strategies for planning merchandise assortments, buying systems, buying merchandise, pricing, promotion. Prerequisite: 06M:100.

06M:125 Direct Marketing Strategies 3 s.h.
Principles and processes of direct and database marketing; insight into the requirements for building a customer-based marketing strategy. Prerequisite: 06M:100.

06M:134 Marketing Research 3 s.h.
Marketing, research methods; role of marketing research information as a tool in management decision making. Prerequisites: 06E:071 and 06M:100.

06M:135 Consumer Behavior 3 s.h.
Behavioral and social aspects of marketing; research methods and findings from behavioral sciences, their relation to production, consumption, and marketing of products, services. Prerequisite: 06M:100.

06M:137 Advertising Theory 3 s.h.
Advertising as a promotional force; emphasis on theory, planning, resulting strategic and tactical decisions made by advertising executives. Prerequisite: 06M:100.

06M:139 Sales Management 3 s.h.
Personal selling, management of sales force; emphasis on recruitment, selection, training of sales representatives; problems in allocation of sales effort, supervision, control. Prerequisite: 06M:100.

06M:147 Marketing Management 3 s.h.
Marketing problems of organizations; emphasis on marketing manager's role in developing, presenting goal-oriented marketing strategies and marketing mix decisions; development of marketing plan for non-U.S. environments. Prerequisite: 06M:100.

06M:151 International Marketing 3 s.h.
Differences in global environment: how cultural considerations, political, legal, and economic conditions affect market entry strategies and marketing mix decisions; development of marketing plan for non-U.S. environments. Prerequisite: 06M:100.

06M:190 Contemporary Topics in Marketing 3 s.h.
Topics not regularly offered in other courses. Prerequisites: 06M:100 and consent of instructor.

06M:197 Field Studies in Marketing 3 s.h.
Experience in planning, designing, carrying out, reporting on a marketing research project for a profit or nonprofit client organization; communication with managers, application of marketing research, meeting deadlines, converting research findings into action recommendations for management. Prerequisites: 06M:100, 06M:134, and consent of instructor.

06M:199 Academic Internship arr.
Professional internship experience with associated academic content. Repeatable. Prerequisite: consent of department chair.

Primarily for Graduate Students

06M:201 Directed Readings in Marketing arr.
Prerequisite: consent of instructor.

06M:205 Web Business Strategy 3 s.h.
Introduction to World Wide Web business and marketing; concepts, methods, and applications associated with doing business on the web; web page construction and design; case studies and/or entrepreneurial projects. Prerequisite: 06N:211.

06M:223 Brand Management 3 s.h.
Strategies for building, leveraging, and defending brands; principles of consumer behavior, how they relate to building brand identity and equity; branding of consumer goods and services. Prerequisite: 06N:211.

06M:225 Direct Marketing Strategies 3 s.h.
Principles and processes of direct and database marketing; insight into requirements for building a customer-based marketing strategy. Prerequisite: 06N:211.

06M:227 Category Management 3 s.h.
Marketing strategy related to manufacturing product line interactions, retailer product assortment, consumer response; category definition, product line pricing and branding, cross-category promotions, channel coordination, efficient consumer response, loyalty programs, database marketing. Prerequisite: 06N:211.

06M:229 Customer Relationship Management 3 s.h.
Analytical approaches to customer relationship management; issues, techniques and terminology associated with database marketing and data mining; analysis of customer databases; assessing lifetime valuation (LTV) of customers, identifying “high potential” customers, estimating return on marketing investment, building predictive models to estimate the probability of response to a marketing campaign. Prerequisite: 06N:211.

06M:230 Marketing Research Methods 3 s.h.
Managerial applications of marketing research techniques, including methods of design, analysis, interpretation of marketing research studies; assessing value of information, sampling, sources of bias, instrument construction, interpretation of scanner data, geodemographic data, applications of integrated research systems. Prerequisites: 06N:211 and 06N:216.

06M:231 Business to Business Marketing 3 s.h.
Industrial buyer behavior, buyerseller relationships, interactive product policy and market segmentation, distribution and selling systems; skill development in market strategy formulation for industrial products and services, and in solving problems and making decisions about industrial marketing. Prerequisite: 06N:211.

06M:232 Buyer Behavior 3 s.h.
Behavior of consumers and industrial buyers; research methods and findings from behavioral sciences applied to production, consumption, and marketing of products and services; application of consumer behavior concepts to managerial decision making. Prerequisite: 06N:211.

06M:233 Service Marketing 3 s.h.
Production, consumption, and marketing of services; solutions to problems faced by service managers; development of an organizational marketing system for delivery of quality service. Prerequisite: 06N:211.

06M:234 Product Management 3 s.h.
Techniques of new product development; idea generation, concept screening, product design, market testing, forecasting, brand management strategies within the firm. Prerequisites: 06N:211 and 06N:216.
06M:235 International Marketing 3 s.h.
Domestic versus international perspective; identification and evaluation of opportunities and risks in non-U.S. markets; research problems in global markets; effects of international organizations, foreign exchange, macroeconomic policies, local law, and cultural differences on consumer behavior and marketing decisions; multinational versus global marketing strategies (entry, product adaptation, channel logistics, pricing, promotion); emphasis on practical applications. Prerequisite: 06N:211.

06M:236 Advertising and Promotion Strategy 3 s.h.
Marketing communications as dialogue between producers and consumers, how promotional mix evolves; emphasis on advertising, sales promotion, branding. Prerequisite: 06N:211.

06M:237 Field Studies in Marketing 3 s.h.
Experience in planning, designing, carrying out, reporting on a marketing research project for a profit or nonprofit client organization; communication with managers, application of marketing research, meeting deadlines, converting research findings into action recommendations for management. Repeatable. Prerequisites: 06N:211 and 06N:216. Recommended: 06M:230.

06M:238 Contemporary Topics in Marketing 1-3 s.h.
Topics not regularly offered in other courses. Prerequisites: 06N:211 and graduate standing.

06M:242 Seminar in Marketing Models—Ph.D. 3 s.h.
Theoretical, operational models in marketing, with emphasis on recent advances; in-depth criticism of models, participation in model development project. Prerequisite: consent of instructor.

06M:243 Seminar in Consumer Behavior—Ph.D. 3 s.h.
Key facets of consumer behavior—information processing, perception, memory, learning, attitude formation, attitude change, decision making, emotion; behavioral research methods. Prerequisite: consent of instructor.

06M:245 Seminar in Research Topics—Ph.D. arr.
Individual research topics. Prerequisite: consent of instructor.

06M:247 Directed Readings in Marketing—Ph.D. arr.
Prerequisite: consent of instructor.

06M:290 Thesis in Marketing arr.
Prerequisite: consent of instructor.
Master of Business Administration Program

The Henry B. Tippie School of Management offers a Master of Business Administration (M.B.A.) program that provides students with a foundation for future growth and flexibility in professional management. The program, which is fully accredited by AACSB—the Association to Advance Collegiate Schools of Business, enables students to build broad-based personal portfolios of analytical skills, knowledge, leadership, and professional experience. The curriculum is rigorous, yet learning takes place in a collaborative environment that builds teamwork skills and encourages independent problem solving.

Students in the Tippie M.B.A. program come from every region of the United States and from countries worldwide. They represent a variety of backgrounds, undergraduate majors, and professional experience. The curriculum is designed for college graduates in any field; previous business course work is not required. However, full-time work experience is required for admission. Contact the Tippie School of Management for a brochure listing complete program requirements.

Full-Time, On-Campus M.B.A.

The full-time, on-campus M.B.A. program requires 60 s.h., including a minimum of 12 s.h. in a concentration area. Students may transfer up to 9 s.h. from another AACSB-accredited institution.

Full-Time M.B.A. Study Plan

First Semester

- 06N:199 M.B.A. Competitive Prep: 1 s.h.
- 06N:201 Tippie M.B.A. Leadership Series: 2 s.h.
- 06N:211 Marketing Management: 3 s.h.
- 06N:215 Corporate Financial Reporting: 3 s.h.
- 06N:216 Data and Decisions: 3 s.h.
- 06N:225 Managerial Finance: 3 s.h.

Second Semester

- 06N:212 Management in Organizations: 3 s.h.
- 06N:213 Managerial Economics: 2 s.h.
- 06N:229 Operations Management: 3 s.h.
- 06N:230 Seminar in Strategic Management I: 1 s.h.
- Concentrations/Electives: 6 s.h.

Third Semester

- 06N:228 International Economic Environment of the Firm: 2 s.h.
- 06N:240 Strategic Management and Policy: 3 s.h.
- 06N:241 Mastering Operational Strategy: 1 s.h.
- Concentrations/Electives: 9 s.h.

Fourth Semester

- Concentrations/Electives: 15 s.h.

Concentration Options

During their first year in the program, M.B.A. students choose an individual concentration area which consists of at least 12 s.h. in a specific discipline. Primary concentration areas include corporate finance, accounting, marketing, product and category management, investments, strategic management and consulting, and operations management. Specialty concentrations include entrepreneurship, nonprofit management, and international business. Individual students may develop their own concentration area, subject to approval by the Tippie School of Management.

Electives

Each student chooses 18 s.h. of graduate-level electives, in addition to their concentration course work; up to 6 s.h. may be earned in nonbusiness electives. Students must have prior approval to take courses outside the Tippie School of Management.

Admission

Applicants to the M.B.A. program must submit a complete application file, including the following:

- a completed Tippie School of Management application form and fee;
- official transcripts of all undergraduate and graduate course work, which must be submitted to the Office of Admissions by each institution attended;
official Graduate Management Admission Test (GMAT) scores;
the completed supplemental application form with essay responses, and a résumé and cover letter; and
three completed recommendation forms.

Applicants whose first language is not English must score at least 600 (paper-based) or at least 250 (computer-based) on the Test of English as a Foreign Language (TOEFL). For TOEFL registration information, contact the University of Iowa Office of Admissions.

APPLICATION DEADLINES
The full-time, on-campus M.B.A. program admits students only for fall entry. Application deadlines are as follows.

International applicants: April 15
U.S. citizens and permanent residents (priority deadline): April 15
U.S. citizens and permanent residents: July 1
Applications received after April 15 are considered on a space-available basis.

M.B.A. for Professionals and Managers
The M.B.A. for Professionals and Managers (M.B.A.-P.M. program) requires 45 s.h. of graduate credit. The program is tailored for working professionals building on the synergies of working and concurrent learning. It prepares graduates for a professional career in business or in the public sector. The curriculum is designed for students with varied backgrounds, undergraduate majors, and professional experience. Previous course work in business is not required.

Courses are offered each semester during evening hours in Cedar Rapids at the college’s Cedar Rapids Center; in Des Moines at the W.A. Krause Center for Entrepreneurial Education and the Pappajohn Education Center; and in the Quad Cities at the Kahl Educational Center. M.B.A.-P.M. students also may enroll in full-time M.B.A. courses in Iowa City when space is available.

M.B.A.-P.M. Study Plan
The M.B.A.-P.M. program requirement of 45 s.h. includes a business core of 10 courses, which develops competency in general management skills and key functional business areas, and five business electives. The elective courses, which contribute to the development of an area of expertise and foster a deeper understanding of management and business practices, are offered in marketing, finance, and management, with a smaller number offered in management information systems/operations management, accounting, and entrepreneurship. Students earn the M.B.A. in three years by completing two courses each fall and each spring semester and one course during the summer. There is some flexibility in course sequence and length of time allowed to complete the program. Following is a sample study plan.

FIRST YEAR
06N:211 Marketing Management 3 s.h.
06N:212 Management in Organizations 3 s.h.
06N:215 Corporate Financial Reporting 3 s.h.
06N:216 Data and Decisions 3 s.h.
Business elective (summer session) 3 s.h.

SECOND YEAR
06N:213 Managerial Economics 3 s.h.
06N:225 Managerial Finance 3 s.h.
06N:227 Human Resource Management 3 s.h.
06N:229 Operations Management 3 s.h.
Business elective (summer session) 3 s.h.

THIRD YEAR
06N:228 International Economic Environment of the Firm 3 s.h.
06N:240 Strategic Management and Policy 3 s.h.
Business electives 6 s.h.
Business elective (summer session) 3 s.h.

Admission
The M.B.A.-P.M. program admits students for fall or spring entry; applications are accepted throughout the year. Admission decisions are based on the quality of work experience, undergraduate grade-point average, GMAT score, letters of reference, and completed application materials. Applicants should have a minimum of two years of postbaccalaureate professional work experience before admission.

APPLICATION DEADLINES
Applicants who meet the priority deadlines are assured of an admission decision before the registration period for admitted students; those admitted to the program receive student registration priority. The University must receive GMAT scores by the following application deadlines.
Priority deadline for fall (August): April 2
Final deadline for fall (August): July 2
Priority deadline for spring (January): November 1
Final deadline for spring (January): December 4

Enrollment in Courses Before Formal Admission

With permission, individuals not yet admitted to the program may enroll in M.B.A.-P.M. courses over three semesters within a 12-month period, for a maximum of 9 s.h. One of the three courses must include 06N:215 Corporate Financial Reporting or 06N:216 Data and Decisions. Credit is applied to the degree once the applicant is admitted to the program. Individuals who request their first registration in an M.B.A. course must first submit their résumé and transcript to the Tippie School of Management for approval. To be considered for nonadmitted status, applicants should have at least one and one-half years of postbaccalaureate professional work experience.

Executive M.B.A. Program

The Executive M.B.A. program leads to the Master of Business Administration. Admission is limited to experienced executives who want to broaden their management skills without interrupting their professional careers. Applicants should have at least 10 years of postgraduate managerial experience. Previous academic work in business is not required.

Course work is presented over 21 months. The program begins in mid-August with a five-day residency in Iowa City, followed by classes one day each week on alternating Fridays and Saturdays. Each entering class progresses through the program as a group.

Classes for the Executive Engineer Dual Master’s Degree Program are held at the Cedar Rapids Area Education and Conference Center. Classes for the Iowa City Executive M.B.A. Program are held on campus in the Pomerantz Center. The Tippie School of Management also offers the Executive M.B.A. Program to students in Hong Kong.

Executive M.B.A. Study Plan

The executive M.B.A. requires 48 s.h. Degree requirements include two 5-day residency periods (one at the beginning of each academic year), an international business seminar (7-10 days during spring semester of the second year), 14 core courses, and two electives selected and taken by all members of the class.

Joint Degree Programs

Joint degree programs allow students to pursue two degrees concurrently, earning both more quickly than if they pursued each degree separately. The Tippie School of Management collaborates with several other University of Iowa academic units to offer joint degrees: an
M.B.A./J.D. with the College of Law; an M.B.A./M.A. with the School of Library and Information Science (Graduate College); an M.D./M.B.A. with the Carver College of Medicine; an M.B.A./M.S.N. with the College of Nursing; and an M.B.A./M.H.A. with the College of Public Health.

Separate application to each college is required. Applicants must be admitted to both colleges before they can be admitted to the joint degree program.

Accelerated Professional Track

Highly qualified undergraduate students in the College of Liberal Arts and Sciences, the College of Engineering, or the Tippie College of Business may be admitted to the Accelerated Professional Track (APT) program. These students begin taking M.B.A. core courses as electives in their undergraduate program so they can earn a bachelor’s degree and an M.B.A. more quickly than if they pursued each degree separately. APT students must complete an internship while in the program.

To enter the APT program, students must complete 90 s.h. of undergraduate study, have a g.p.a. of at least 3.50, have clearly defined career goals, and indicate their intent to pursue both degree programs on a full-time basis. Students also must have a professional background similar to that of students enrolled in the M.B.A. program.

Courses

See the course lists for individual departments for descriptions of M.B.A. electives.

06N:000 M.B.A. Internship 0 s.h.  
Prerequisite: consent of Tippie School of Management.

06N:199 M.B.A. Competitive Prep 1 s.h.  
Professional development, career strategies for successful competition in the M.B.A. marketplace. Prerequisite: consent of M.B.A. program associate.

06N:200 Directed Readings—M.B.A. 1-3 s.h.  
Prerequisite: consent of associate dean for graduate programs.

06N:201 Tippie M.B.A. Leadership Series 0-3 s.h.  
Seminars in developmental areas of leadership, including communications, social responsibility, and personal development. Prerequisite: graduate standing.

06N:202 M.B.A. Case Competition 1-3 s.h.  
Students represent Tippie School of Management in a case competition; internal case work, presentation and case analysis training. Prerequisite: M.B.A. student standing.

06N:210 Advanced Models for Decision Support 3 s.h.  
Quantitative techniques in decision making, including identifying controllable decision variables, setting decision objectives, defining choice-limiting constraints, developing computer solutions in contemporary business. Prerequisite: 06N:216.

06N:211 Marketing Management 3 s.h.  
Concepts, principles, models of marketing management; focus on strategic planning, management decision making, and implementation of marketing programs. Prerequisite: graduate standing.

06N:212 Management in Organizations 3 s.h.  
How to explain, predict, and influence behavior in organizations; decision making, leadership, communication, group skills in management positions; motivation, leadership, teams, organizational culture, organizational design, individual differences, organizational change. Prerequisite: graduate standing.

06N:213 Managerial Economics 1-3 s.h.  
Models of consumer and firm behavior with applications; market equilibrium and structure; pricing decisions. Prerequisite: graduate standing.

06N:215 Corporate Financial Reporting 3 s.h.  
Contemporary financial reporting practices in the United States; how alternative accounting treatments affect the usefulness of financial information in applied decision settings. Prerequisite: graduate standing.

06N:216 Data and Decisions 3 s.h.  
Quantitative modeling techniques and statistical analysis for management decision making; use of Excel for spreadsheet analysis; decision analysis, statistical inference, regression, linear programming, probability. Prerequisite: graduate standing.

06N:217 Ethics 1-2 s.h.

06N:225 Managerial Finance 3 s.h.  
Time value of money, applications of present value techniques; stock and bond valuation, capital budgeting, cost of capital calculation, portfolio formation and efficient market analysis, financial statement analysis, pro forma analysis, hedging financial risks. Pre- or corequisite: 06N:215.

06N:227 Human Resource Management 2-3 s.h.  
Systematic approach to managing human resources through practices consistent with validated theories and empirical research; human resources practices and business strategies; human resources strategy, recruitment and selection, training and development, employment law, international human resources, career management, compensation. Prerequisite: graduate standing.

06N:228 International Economic Environment of the Firm 1-3 s.h.  
Basic determinants of aggregate output, employment, wages, unemployment, consumption, investment, international trade flows, interest rates, exchange rates, prices and inflation in open economies; sources and nature of economic growth; effects of domestic and foreign monetary, fiscal policies; effects of trade, exchange rate policies. Prerequisite: 06N:213 or consent of instructor.

06N:229 Operations Management 3 s.h.  
Planning and decision-making activities for managing an organization’s operations; trade-offs associated with operations management decisions, tools and techniques for helping operations managers implement decisions and reach goals; production and service delivery strategy, capacity planning, product and process design, total quality management, demand management, production and service planning, scheduling, materials control, emerging production and service technologies. Prerequisite: 06N:216.
06N:230 Seminar in Strategic Management I 1-3 s.h.
Introduction to strategic management; the role of marketing, operations, and finance in strategic planning; case studies. Prerequisite: graduate standing.

06N:231 Seminar in Strategic Management II 1-3 s.h.
Strategic management integrating all aspects of business; computer simulation, lectures, case studies, readings.

06N:235 Seminar in International Business 0-6 s.h.
Issues and challenges facing organizations doing business in international markets; social, economic, political factors, business policies and customs in the global environment; may include travel, study abroad. Repeatable. Prerequisite: M.B.A. enrollment.

06N:240 Strategic Management and Policy 3 s.h.
Firm’s competitive strategy from a manager’s perspective; key strategic frameworks; integration of concepts learned throughout M.B.A. program, previous work experience. Prerequisites: 06N:211, 06N:215, 06N:225, and 06N:229.

06N:241 Mastering Operational Strategy 1-3 s.h.
Student teams run an operational business simulation, conduct organizational/industry analysis, assess market opportunities, define strategic direction, compete for company profitability and market share. Prerequisites: 06N:211, 06N:215, 06N:225, and 06N:229.
Entrepreneurship

**Director:** David Hensley  
**Undergraduate nondegree programs:** Certificate in Entrepreneurship, Technological Entrepreneurship  
**Web site:** [http://www.iowajpec.org/students/undergradprogram.html](http://www.iowajpec.org/students/undergradprogram.html)

## Certificate in Entrepreneurship

The Tippie College of Business and the John Pappajohn Entrepreneurial Center offer University of Iowa students the opportunity to earn a Certificate in Entrepreneurship while pursuing their undergraduate degrees. The Colleges of Engineering and Liberal Arts and Sciences and the UI health science colleges also collaborate in the certificate program.

The certificate program helps prepare students to start and lead their own companies and expands their understanding of how entrepreneurial firms operate. It encourages innovation and creativity, develops skill in recognizing and seizing opportunity, and teaches strategic business planning—all necessary for entrepreneurs and successful business leaders.

The program was named the 2004 National Model Undergraduate Entrepreneurship Program by the United States Association for Small Business and Entrepreneurship.

Entrepreneurship students learn from a select team of faculty members and business leaders distinguished by their ability to teach, model, and inspire the entrepreneurial process. They gain understanding of the entrepreneurial approach to acquiring and managing resources; acquire team-building skills critical to both small and large companies; and develop sound business planning skills necessary for launching new ventures and products and for leading growing organizations.

The program includes networking opportunities with successful entrepreneurs and other business leaders, and experiential learning opportunities.

Students may begin working toward the Certificate in Entrepreneurship in their sophomore year. Entrepreneurship courses (prefix 06T) are counted as semester hours earned in business on the degree evaluation.

Undergraduate students in the Tippie College of Business, the College of Liberal Arts and Sciences, and the UI health sciences colleges must declare their intention to pursue the certificate. Forms are available from the John Pappajohn Entrepreneurial Center and the Undergraduate Program Office in the Tippie College of Business. The Certificate in Entrepreneurship is noted on the student’s permanent record when the undergraduate degree is added to the transcript.

## Requirements

The Certificate in Entrepreneurship requires a minimum of 18 s.h. in entrepreneurship-related course work. Students may apply up to 9 s.h. of transfer credit toward the certificate, with approval of the entrepreneurship program director. Required courses are as follows.

- **06T:120** Entrepreneurship and New Business Formation 3 s.h.  
  or  
- **06J:125** Entrepreneurial Strategy (for B.B.A. in management) 3 s.h.

- **06T:133** Capital Acquisition and Cash Flow Management 3 s.h.
- **06T:134** Entrepreneurial Marketing 3 s.h.
- **06T:150** Managing the Growth Business 3 s.h.

Nonbusiness students also must take **06T:116** Basics of Small Business Marketing (1 s.h.) or **06M:100** Introduction to Marketing Strategy (3 s.h.) or an approved college-level marketing class; and **06T:113** Basics of Small Business Accounting (1 s.h.) or **06A:001** Introduction to Financial Accounting or **06A:020** Accounting for Nonbusiness Students (3 s.h.) or another approved college-level accounting course.

Students earn an additional 6 s.h. in elective courses chosen from the following list. Students who wish to use a course not on the list must consult with the Pappajohn Entrepreneurial Center staff.

- **06T:101** Directed Readings in Entrepreneurship arr.
- **06T:141** Technology Applications for Entrepreneurs 3 s.h.
- **06T:142** Innovation and Change 3 s.h.
- **06T:145** Legal Aspects of Entrepreneurship 3 s.h.
- **06T:146** Strategic Management of Technology and Innovation 3 s.h.
06T:110 Directed Readings in Entrepreneurship arr.
Independent study; topics and assignments approved by instructor. Prerequisite: consent of instructor.

06T:113 Basics of Small Business Accounting 1 s.h.
Duplicates 06A:001; financial statements of small companies; basics of balance sheets, income statements, cash flow statements; development of assumptions for projections; simple comparative analysis. Prerequisite: closed to business and pre-business students.

06T:116 Basics of Small Business Marketing 1 s.h.
Duplicates 06M:100; basic marketing concepts for nonbusiness majors; traditional and guerrilla marketing strategies; focus on marketing information required in a business plan. Prerequisite: closed to business and pre-business students.

06T:117 Writing a Successful Business Plan 1 s.h.
The business planning process; components of a business plan, strategies for writing a successful plan; how potential investors evaluate business plans.

06T:120 Entrepreneurship and New Business Formation 3 s.h.
The entrepreneurial process from conception to birth of a new venture; attributes of successful entrepreneurs, innovation and creativity, opportunity recognition, venture screening, identification of resources, feasibility analysis. Corequisite: 06A:001 or 06A:020 or 06T:113.

06T:125 New Ventures in the Arts 3 s.h.
Same as 049:111, 145:111.

06T:133 Capital Acquisition and Cash Flow Management 3 s.h.
Understanding the process of capital acquisition and cash flow management; techniques, projections, and measurements used in valuing and funding new and growing ventures; sources and strategies for raising capital. Prerequisite: 06T:120.

06T:134 Entrepreneurial Marketing 3 s.h.
Practical marketing concepts for determining market potential of a business; developing a marketing plan, identifying markets, creating products, designing promotions and sales programs, assessing ongoing customer service needs. Prerequisite: 06T:120. Corequisite: 06M:100 or 06T:116.

06T:141 Technology Applications for Entrepreneurs 3 s.h.
Current technology applications for creating web sites; use of technology for managing and disseminating business information; development of basic e-commerce strategy; hands-on course. Prerequisites: 06T:120, and 06T:133 or 06T:134.

06T:142 Innovation and Change 3 s.h.
Environment necessary for innovation; innovation applied to products, services, processes; strategies for regaining competitive advantage; management of stress created by innovation and change. Prerequisites: 06T:120, and 06T:133 or 06T:134.

06T:145 Legal Aspects of Entrepreneurship 3 s.h.
Areas of law significant to new and emerging businesses; legal system pitfalls, constraints, opportunities; overview. Prerequisites: 06T:120, and 06T:133 or 06T:134.

06T:146 Strategic Management of Technology and Innovation 3 s.h.
Role of technology in creation, growth, and survival of industries; process, risks, and rewards of technological innovation, commercialization; successful approaches to developing technological strategy and products. Prerequisites: 06T:120, and 06T:133 or 06T:134.

06T:150 Managing the Growth Business 3 s.h.
Issues faced by new, rapidly growing businesses; adapting organizational structure as business expands, building a management team, hiring new employees, managing strategic growth; case studies, particularly in technology sector. Prerequisites: 06T:120, 06T:133, and 06T:134.

06T:190 Seminar in Entrepreneurship 2-3 s.h.
Topics such as franchising, business acquisition, real estate development, e-commerce, technology transfer. Repeatable. Prerequisites: 06T:120, and 06T:133 or 06T:134; or consent of instructor.

06T:192 Entrepreneurship: Business Consulting 3 s.h.
Experience on teams providing consulting services to start-up and early-stage companies; the consulting process—proposal development, data collection and analysis, final report preparation and presentation; projects—marketing studies, financial projections, strategic planning. Prerequisites: 06T:120, 06T:133, and 06T:134; or consent of instructor.

06T:194 Entrepreneurship: Advanced Business Planning 3 s.h.
Mentoring for individuals in final stages of preparing to launch their own business. Prerequisites: 06T:120, 06T:133, and 06T:134; or consent of instructor.

06T:199 Academic Internship arr.
Professional internship experience with academic credit (e.g., paper, course work). Repeatable. Prerequisite: consent of department chair.

06T:210 Developing Professional Service Business 2-3 s.h.
Use of professional skills and functional knowledge in creating a specialized service business. Same as 053:210.

Certificate in Technological Entrepreneurship

The College of Engineering and the Tippie College of Business offer a joint program leading to the Certificate in Technological Entrepreneurship. See College of Engineering in the Catalog or contact engineering’s Student Development Center for details.

Major in Performing Arts Entrepreneurship

The Division of Performing Arts (College of Liberal Arts and Sciences) collaborates with the John Pappajohn Entrepreneurial Center to offer a B.A. with a major in Performing Arts Entrepreneurship. Contact the Division of Performing Arts for details.

The Henry B. Tippie College of Business and the College of Liberal Arts and Sciences offer the Certificate in International Business. The program includes study of international business and economics, international relations and institutions, a foreign language, and the contemporary art, literature, culture, and/or politics of the related geographical area.

Certificate in International Business

The Certificate in International Business requires 29 s.h. and satisfaction of the foreign language requirement.

The program is designed not only for undergraduate students who intend to pursue careers in international business but for any undergraduate interested in gaining a better understanding of the global economy and a broader awareness of the political, historical, and social environment in which international business operates. The range of courses in the program permits students to tailor areas of specialization suited to their individual interests and to complement majors in both liberal arts and sciences and in business.

When students complete the certificate requirements and graduate, the notation “Certificate in International Business” is added to their transcript. Direct questions to the Tippie College of Business Undergraduate Program Office or the CLAS Academic Programs & Services office.

Application

Undergraduate students pursuing a degree from The University of Iowa are eligible to work toward the Certificate in International Business. Students who already have earned a baccalaureate degree from The University of Iowa may return to complete or earn a certificate in international business if they are not enrolled in a graduate or professional program. Holders of baccalaureate degrees from other institutions who are not enrolled in a graduate or professional program may enroll at The University of Iowa to complete a Certificate in International Business. Contact the Office of Admissions.

Interested students must declare their intention to pursue the certificate with an international business certificate advisor and must submit a plan of study. Students admitted to the Tippie College of Business or advised at the college’s Undergraduate Program Office should consult the advising staff in that office. Students in the College of Liberal Arts and Sciences should consult an international business certificate advisor in the Academic Advising Center.

Requirements

The certificate requires 29 s.h. of course work plus satisfaction of the foreign language requirement (required credit varies according to language studied). Students must maintain a g.p.a. of at least 2.00 on all international business certificate course work. Courses used to satisfy the certificate may not be taken pass/nonpass. A course may not be used to satisfy more than one certificate requirement.

A minimum of 20 s.h. of certificate course work (other than language courses) must be completed at The University of Iowa or in approved study abroad programs. Students who want to use credit earned while studying abroad should consult an international business certificate advisor before leaving campus. University of Iowa Guided Independent Study (correspondence study) is accepted toward the certificate.

The certificate requires course work in international business, international relations and institutions, foreign language, and area studies, as follows.

INTERNATIONAL BUSINESS

These courses provide students with an essential understanding of economics, which is central to all business operation. They also help students develop knowledge of the functional areas of international business.

Both of these:
06E:001 Principles of Microeconomics 3-4 s.h.
06E:002 Principles of Macroeconomics 3-4 s.h.
Three of these (total of 9 s.h.):
06E:125 International Economics 3 s.h.
06E:129 Economic Growth and Development 3 s.h.
06E:173 Advanced International Economics 3 s.h.
06F:130 International Finance 3 s.h.
06j:146 International Business Environment 3 s.h.
06M:151 International Marketing 3 s.h.
091:282 International Business Transactions 3 s.h.
091:287 International Trade Law: Basic Norms and Regulation 3 s.h.

INTERNATIONAL RELATIONS AND INSTITUTIONS

These courses familiarize students with comparative politics, social geography, foreign policy, and issues related to world population and the environment—topics relevant to decision making in the international business world.

Two of these (total of 6 s.h.):
16A:152 United States in World Affairs 3 s.h.
16W:138/152:138 History of International Health 3 s.h.
019:156 Comparative Communication Systems 3 s.h.
030:040 Introduction to the Politics of Industrial Democracies 3 s.h.
030:041 Introduction to the Politics of Russia and Eurasia 3 s.h.
030:042 Introduction to the Politics of Developing Areas 3 s.h.
030:043 Introduction to Politics in the Muslim World 3 s.h.
030:060 Introduction to International Relations 3 s.h.
030:061 Introduction to American Foreign Policy 3 s.h.
030:130 Consequences of War 3 s.h.
030:137 Introduction to Political Economy 3 s.h.
030:142 European Integration 3 s.h.
030:149 Problems in Comparative Politics 3 s.h.
030:150 Comparative Administrative Politics 3 s.h.
030:151 Political Leadership 3 s.h.
030:155 Social Movements and Collective Action 3 s.h.
030:156 Ethnic and Religious Conflict in the Muslim World 3 s.h.
030:161 International Organization and World Order 3 s.h.
030:162 American Foreign Policies 3 s.h.
030:163 Chinese Foreign Policy 3 s.h.
030:165 International Conflict 3 s.h.
030:166 Global Political Communication 3 s.h.
030:167 Politics and the Multinational Enterprise 3 s.h.
030:168 Politics of Terrorism 3 s.h.
030:169 Problems of International Politics 3 s.h.
030:170 The Politics of International Economics 3 s.h.
030:173 Voluntary Organization and Politics in Comparative Perspective 3 s.h.
030:177 Globalization 3 s.h.
030:178 Causes, Consequences, Management of Civil War 3 s.h.
030:179 Human Rights and Asian Values 3 s.h.
034:159 Families in Comparative Perspective 3 s.h.
036:042/042:042 Intercultural Communication 3 s.h.
044:010 The Contemporary Global System 4 s.h.
044:011 Population Geography 3 s.h.
044:015 Introduction to Political Geography 3 s.h.
044:030 The Global Economy 3 s.h.
044:035 World Cities 3 s.h.
044:172 Development Planning and Policy 3 s.h.
044:176 Social Consequences of Global Change 3 s.h.
044:194 Geographic Perspectives on Development 3 s.h.
091:193 Human Rights in the World Community 3 s.h.
091:195 Introduction to Public International Law 3 s.h.
113:010 Anthropology and Contemporary World Problems 3 s.h.
113:134 Gender and Indian Diaspora 3 s.h.
113:143 Environment and Culture 3 s.h.
113:144 Culture and Consumption 3 s.h.
113:145 Economic Anthropology of the Third World 3 s.h.

FOREIGN LANGUAGE

This component enables students to develop an intermediate level of competence in a second language. Through language study, students not only gain insight into the culture of another region of the world, they also develop a deeper understanding of their own language and culture.

Students must complete an approved foreign language sequence. For questions about languages not listed below or about study abroad course work, see an international business certificate advisor.
Chinese
All of these:
039:008-039:009 First-Year Chinese: First and Second Semesters 10 s.h.
039:105-039:106 Second-Year Chinese: First and Second Semesters 10 s.h.

French
One of these sequences:
009:001-009:002 Elementary French I-II 8 s.h.
009:010 First-Year French Review 5 s.h.
All of these:
009:011-009:012 Intermediate French I-II 8 s.h.
One course for which 009:012 is prerequisite (may include Iowa Regents Program credit)

German
One of these:
013:011-013:012 Elementary German I-II (both courses) 8 s.h.
013:014 First-Year German Review 5 s.h.
Both of these:
013:021 Intermediate German I 4 s.h.
013:022 Intermediate German II 4 s.h.
One course for which 013:022 is prerequisite

Hindi
039:123 First Year Hindi: First Semester 5 s.h.
039:124 First Year Hindi: Second Semester 5 s.h.
039:126 Second Year Hindi: First Semester 4 s.h.
039:127 Second Year Hindi: Second Semester 4 s.h.

Italian
One of these:
018:001-018:002 Elementary Italian I-II (both courses) 8 s.h.
018:103 Intensive Elementary Italian 6 s.h.
All of these:
018:011-018:012 Intermediate Italian I-II 8 s.h.
One course for which 018:012 is prerequisite

Japanese
One of these sequences:
39j:010 & 39j:012 First-Year Japanese: First and Second Semesters 10 s.h.
Both of these:

Portuguese
One of these:
038:100-038:101 Accelerated Elementary Portuguese and Accelerated Intermediate Portuguese (both courses) 0-10 s.h.
038:102 Portuguese for Spanish Speakers 3 s.h.
One course for which 038:101 or 038:102 is prerequisite

Russian
All of these:
041:001-041:002 First-Year Russian I-II 8 s.h.
041:003-041:004 Second-Year Russian I-II 8 s.h.
One course for which 041:004 is prerequisite

Spanish
One of these:
035:001-035:002 Elementary Spanish I-II (both courses) 8 s.h.
035:005 Elementary Spanish Review 5 s.h.
One of these:
035:011-035:012 Intermediate Spanish I-II (both courses) 8 s.h.
035:013 Accelerated Intermediate Spanish 6 s.h.
One course for which 035:012 is prerequisite

Swahili
All of these:
103:125-103:126 Elementary Swahili I-II 8 s.h.
103:127-103:128 Intermediate Swahili I-II 8 s.h.

AREA STUDIES
These courses help students learn about the culture, contemporary history, art, literature, and politics of the geographic region in which their second language is spoken. They cover topics critical to understanding sociocultural influences on individuals with whom students share the world, and with whom they may conduct business.

Students complete 6 s.h. from one geographic area. The area should be appropriate to the language the student chooses for the language requirement.
Asia

Appropriate for these languages: Chinese, Hindi, or Japanese

01H:016/039:016 Asian Art and Culture 3 s.h.
008:132 Literature of the Indian Subcontinent 3 s.h.
016:005/039:055 Civilizations of Asia: China 3 s.h.
016:006/039:056 Civilizations of Asia: Japan 3 s.h.
16W:194/039:134 Imperialism and Modern India 3 s.h.
16W:196/039:154 Modern China 1600s to 1920s 3 s.h.
16W:198/039:196 China Since 1927 3 s.h.
026:144/032:174 Indian Philosophy 3 s.h.
026:145/032:175 Buddhist Philosophy 3 s.h.
030:042 Introduction to the Politics of Developing Areas 3 s.h.
030:143/039:178 Government and Politics of the Far East 3 s.h.
030:148 Government and Politics of China 3 s.h.
030:163 Chinese Foreign Policy 3 s.h.
032:004/039:064 Living Religions of the East 3 s.h.
032:006/039:006 Introduction to Buddhism 3 s.h.
032:008/039:018 Asian Humanities: India 3 s.h.
032:009/039:019 Asian Humanities: China 3 s.h.
032:177/039:136 Indian Literature 3 s.h.
039:015 Introduction to Chinese Culture 3 s.h.
039:020/032:007 Asian Humanities: Japan 3 s.h.
039:057/016:007 Civilizations of Asia: South Asia 3 s.h.
039:122/113:129 Language/Politics of Culture in South Asia 3 s.h.

The Department of Finance and the Emmett J. Vaughan Institute of Risk Management and Insurance offer the Certificate in Risk Management and Insurance. The certificate provides students in business and in other majors with a foundation for careers in corporate risk management, risk management consulting, employee benefits management and insurance consulting, insurance brokerage, and underwriting. It also may be of interest to students seeking professional designations, such as Chartered Life Underwriters (CLU) and Chartered Property and Casualty Underwriter (CPCU).

B.B.A. students majoring in finance can concentrate in risk management and insurance (RMI), or they can supplement their corporate finance and investment courses with one or more courses in risk management and insurance.

B.B.A. students enrolled in other Tippie College of Business majors or in other University of Iowa colleges can take risk management and insurance courses to enhance their understanding of related financial services or learn about employment opportunities in the industry.

College of Liberal Arts and Sciences students pursuing a B.A. or B.S. in mathematics, program C, take RMI courses as part of the major when they elect risk management and insurance as their area of application. Students in the Department of Statistics and Actuarial Science can take insurance courses to help prepare for their actuarial exams.

**Certificate in Risk Management and Insurance**

The Certificate in Risk Management and Insurance requires 24 s.h. The program is designed to provide an understanding of the many aspects of risk management and insurance. It concentrates on value creation and asset protection, including pure insurance and risk management, as well as on corporate and financial risk management. It also addresses the financial and economic characteristics of potential exposures to loss that business organizations and individuals face, and the techniques available for hedging the risks and minimizing the costs associated with these exposures.

The certificate requires the following courses. Students may take 06F:100 and 06F:102 in the same semester; they are prerequisites for all RMI courses.

**CORE COURSES AND COREQUISITES**

- 06F:100 Introduction to Financial Management 3 s.h.
- 06F:102 Principles of Risk Management and Insurance (RMI core) 3 s.h.
- 06F:104 Corporate and Financial Risk Management (RMI core) 3 s.h.

**ELECTIVES**

All students choose two of these (6 s.h.):
- 06F:103 Property and Liability Insurance (offered spring) 3 s.h.
- 06F:105 Life and Health Insurance (offered fall) 3 s.h.
- 06F:106 Employee Benefit Plans (offered spring) 3 s.h.

Finance majors choose three of these (9 s.h.):
- 06F:113 Fixed Income Securities 3 s.h.
- 06F:114 Commercial Banking 3 s.h.
- 06F:116 Futures and Options 3 s.h.
- 06F:126 Real Estate Process 3 s.h.
- 06J:156 Dynamics of Negotiations 3 s.h.
- 06J:162 Leadership and Personal Development 3 s.h.
- 06M:139 Sales Management 3 s.h.
- 056:054 Engineering Economy (engineering students) 3 s.h.

Non-finance majors choose three of these (9 s.h.):
- 06A:120 Financial Accounting Reporting 3 s.h.
- 06F:111 Investment Management 3 s.h.
- 06F:113 Fixed Income Securities 3 s.h.
- 06F:114 Commercial Banking 3 s.h.
- 06F:116 Futures and Options 3 s.h.
- 06F:117 Corporate Finance 3 s.h.
- 06F:126 Real Estate Process 3 s.h.
- 056:054 Engineering Economy (engineering students) 3 s.h.
**Admission**

Admission to the Certificate in Risk Management and Insurance program requires enrollment in an undergraduate degree program; junior standing; a cumulative g.p.a. of at least 2.75; 06F:102 Principles of Risk Management and its corequisite, 06F:100 Introductory Financial Management with a grade of B-minus or higher; completion of 06F:110 Financial Information Technology and all prerequisites; and a grade of C or higher in all other risk management and insurance courses.

**Affiliated Courses**

The Department of Finance offers five courses affiliated with the Emmett J. Vaughan Institute of Risk Management and Insurance that are included in the Certificate in Risk Management and Insurance curriculum. See Finance in the Catalog for course descriptions and prerequisites.

- 6F:102 Principles of Risk Management and Insurance 3 s.h.
- 6F:103 Property and Liability Insurance 3 s.h.
- 6F:104 Corporate and Financial Risk Management 3 s.h.
- 6F:105 Life and Health Insurance 3 s.h.
- 6F:106 Employee Benefit Plans 3 s.h.
The College of Dentistry is an integral part of The University of Iowa and its health sciences campus. Its mission, which embraces the University's academic values as well as the ethical responsibilities implicit in educating future members of a profession, rests on a foundation representing every aspect of collegiate activity: education of students as general practitioners and specialists; research into all aspects of oral and dental disease and the delivery of health care; and service to the community, the state, and the profession.

Faculty members, D.D.S. students, and specialty residents provide oral health care to patients at clinics in the Dental Science Building, the Center for Disabilities and Development, and dentistry clinics at University of Iowa Hospitals and Clinics and Veterans Affairs Iowa City Health Care System. Faculty, staff, and students participate in interdisciplinary research and training activities involving the University's five health science colleges as well as other University colleges and departments.

Dentistry at The University of Iowa began in 1882 as a single department. In 1900 the University underwent general reorganization and the Dental Department became the College of Dentistry. Today the college is Iowa's only provider of dental education and ranks as a leader in dental education nationwide.

The college and its educational programs are accredited by the Commission on Dental Accreditation of the American Dental Association, an independent tripartite commission authorized and recognized by the Commission on Post-Secondary Education.

Programs offered by the college cover the full spectrum of dentistry and closely integrated fields. They include the Bachelor of Science in oral health science, a degree completion program for individuals holding an A.A.S. degree in dental hygiene; the Doctor of Dental Surgery program (D.D.S.), which prepares general dentists; advanced education programs in all dental specialties, each of which may lead to certification in a dental specialty; several

advanced education programs in other areas of dentistry, including the oral science program, which offers M.S. and Ph.D. degrees; post-D.D.S. residency programs in general dentistry and hospital-based dentistry; and a wide variety of continuing education programs for dental and allied professions.

Professional Program (D.D.S.)

Doctor of Dental Surgery

The basic program leading to the Doctor of Dental Surgery (D.D.S.) consists of a minimum of three years of preprofessional study and four years of study in the College of Dentistry.

Course work during the first and second years of study integrates the biomedical sciences with preclinical and clinical disciplines. The biomedical sciences include gross anatomy, biochemistry, general histology, microbiology, pathology, pharmacology, and physiology. Students also study topics specific to dentistry, such as principles of occlusion, anesthesia and pain control, operative dentistry, periodontics, prosthodontics, cariology, and preventive dentistry. During the latter part of the first year, students are introduced to their first clinical patient-treatment situation.

The second-year program continues the study of biomedical sciences and preclinical courses, with additional patient treatment experiences in restorative and preventive dentistry. Students also are introduced to esthetic and implant dentistry.

Third-year dental students rotate through a series of clerkships that expose them to seven clinical disciplines.

Fourth-year dental students deliver comprehensive dental care in conditions that closely approximate those in private dental practice. They also are exposed to various community dentistry health programs throughout Iowa and other states that include hospitals, nursing homes, and the Special Care Clinic. They may choose to participate in the Colorado Migrant Worker Program, the Indian Health Service Program, or the Foreign Dental School Exchange Program. The community dentistry programs provide exposure to facets of dentistry usually not observable in an academic setting.

Biomedical Sciences in the Dental Curriculum

The following science courses are offered by the University of Iowa departments outside the College of Dentistry and are a required part of the D.D.S. curriculum.

- 060:101 Human Gross Anatomy for Dental Students 6 s.h.
- 060:112 General Histology for Dental Students 4 s.h.
- 061:113 Dental Microbiology 3 s.h.
- 069:133 Introduction to Human Pathology arr.
- 071:111 Pharmacology for Dental Students 5 s.h.
- 072:152 Human Physiology for Dental Students 4 s.h.
- 099:161 Biochemistry for Dental Students 4 s.h.

College of Dentistry nondepartmental courses are listed under “Nondepartmental Courses” at the end of this section. Courses offered by the college’s departments are listed in each department’s General Catalog section.

Combined Bachelor’s Degree/D.D.S.

Students who are enrolled in a baccalaureate program at The University of Iowa may be allowed to use course work from their first year of dentistry to complete their elective semester-hour requirement toward the bachelor’s degree.

The provision for acceptance by the College of Liberal Arts and Sciences of 30 s.h. of elective credit earned in any other college of the University allows College of Dentistry students to obtain a bachelor’s degree from the College of Liberal Arts and Sciences after successfully completing the first year of dentistry. To take advantage of this plan, students must fulfill all specific requirements for the bachelor’s degree, including the General Education Program requirements and the requirements for a major. Students also must satisfy the College of Liberal Arts and Sciences residence requirement before enrolling in the College of Dentistry. Contact the College of Liberal Arts and Sciences for more information.
Promotions, Graduation

Student promotions and graduation are determined by the collegiate academic and professional performance committee, which is made up of individuals appointed by the dean from the biomedical, preclinical, and clinical sciences and from other academic areas of the college. The performance committee may recommend to the dean that a student withdraw from the college or repeat specific courses when the student is deemed generally unprepared to be promoted or to enter the dental profession.

Committee for Appeals

When a student has been asked to withdraw from the college or wants special consideration of problems concerning promotion or graduation, he or she may appeal to the dean. All appeals are heard by an ad hoc committee appointed by the dean. The ad hoc committee investigates new information that has not been available previously or that has not been discussed as fully as the student feels it should have been. The committee determines whether this new information, or important new insights that may have been gained, could have influenced the collegiate academic and professional performance committee’s decision. The recommendation of the appeals committee is submitted to the dean for final action.

Dentistry Licensure Examination

Iowa, Colorado, Illinois, Kansas, Minnesota, Missouri, Nebraska, North and South Dakota, Washington, Wisconsin, and Wyoming belong to the Central Regional Dental Testing Service, which serves as the testing agency for clinical examinations for licensure in these states. Examinations are administered at several testing sites located at schools of dentistry within the region. A separate license application is then filed with the individual state board of dentistry.

For licensure, all states also require the National Boards, conducted by the American Dental Association. Many states, including Iowa, also require a jurisprudence examination.

Student Organizations

All dental students are members of the American Student Dental Association through its local chapter. The American Dental Education Association, the American Association of Dental Research, the American Association of Women Dentists, the American Academy of Pediatric Dentistry, the American Society for Geriatric Dentistry, the Student National Dental Association, and the Hispanic Dental Association also have local chapters.

Students who rank in the upper 12 percent of their senior class are eligible for election to Omicron Kappa Upsilon, a national scholastic honorary dental society.

The national dental professional fraternities Delta Sigma Delta and Psi Omega have chapters at Iowa. Both fraternities provide academic and social activities for students and their spouses.

Expenses

The College of Dentistry maintains the Supply-Instrument Management System (SIMS), which provides students with instruments and supplies necessary throughout their dental training. The SIMS usage fee for the D.D.S. is payable in installments over the four-year program.

A fee for expendable laboratory supplies is charged each of the first two years. A $100 breakage fee also must be deposited; the deposit is refundable upon graduation or termination of enrollment.

Admission

Applicants must submit a completed AADSAS (Associated American Dental Schools Application Service) application form to the American Dental Education Association (ADEA). The AADSAS application must be completed online at the American Dental Education Association web site (http://www.adea.org).

Applications are accepted beginning June 1 of the year before the year of entry. Completed applications must be on file at ADEA by November 1. Applicants should apply as early as possible. Notifications of acceptance are sent beginning December 1.

Prospective dental students are encouraged to embark on an educational program that leads to a standard bachelor’s degree. This ensures that students receive a well-rounded education.

Predental Studies

The basic academic requirement for admission to the College of Dentistry is completion of at least
90 s.h. of academic study at an accredited college. No more than 60 s.h. of credit is accepted from a junior college or two-year institution. The predental program of study should include the following.

**English:** satisfactory accomplishment in English composition, rhetoric, and speech commensurate with the academic requirements for a bachelor's degree at the college attended.

**Physics:** one year (equivalent to 8 s.h.), of which one-fourth must be laboratory work.

**Chemistry:** two years (equivalent to 16 s.h.), of which one year (equivalent to 8 s.h.) must be in organic chemistry; one-fourth of each year’s study must be laboratory work.

**Biochemistry:** highly recommended.

**Biological science:** one year (equivalent to 8 s.h.), which must include appropriate laboratory work; the requirement may be satisfied by a one-year course in principles of biology, with instruction in cell biology, metabolism, organismic biology, animal biology, genetics, development, ecology, and evolution. Preference is given to applicants who have completed more than 8 s.h. Courses in human anatomy and cell physiology are strongly recommended.

**Gross anatomy:** highly recommended.

**Electives:** sufficient course work in the social sciences, philosophy, psychology, history, foreign languages, business, and mathematics to provide a well-rounded educational background.

**Grade-Point-Average Requirement**

Applicants should have a cumulative g.p.a. of at least 2.50 on a 4.00 scale (a g.p.a. above 3.25 is preferred). The admissions committee gives special consideration to the quality of applicants’ course work in the predental sciences, in addition to the cumulative grade-point average.

**Interviews**

Personal interviews are required of applicants for admission to the College of Dentistry. Applicants are contacted to arrange an interview, usually after the AADSAS application is received by the admissions office.

**Required Dental Admission Test**

All applicants must complete the Dental Admission Test (DAT) sponsored by the Council on Dental Education of the American Dental Association. A computerized DAT is available throughout the year at designated Prometric Centers.

Applicants are required to take the test by August 1, one year before entering dental school. Test application forms are available online (http://www.ada.org) and from the American Dental Association, 211 East Chicago Avenue, Chicago, Illinois 60611.

**Deposit by Accepted Applicants**

Applicants accepted before February 1 are required to submit a $500 deposit within 30 days after notification of admittance. Applicants admitted after February 1 must submit the deposit within two weeks after notification of admittance. This deposit is not refundable but is credited toward the first fee payment. Applicants who fail to make the deposit within the time specified forfeit their place in the entering class.

**Additional Admission Considerations**

Fulfillment of the specific requirements listed for admission does not ensure admission to the College of Dentistry. From applicants meeting minimum requirements, the admissions committee selects those who appear best qualified for the study and practice of dentistry. The committee considers applicants’ academic averages, science averages, DAT scores, letters of recommendation, the interview, and other factors.

**Early Admission**

The College of Dentistry’s Deferred Admit Program (DAP) allows academically motivated students who are residents of Iowa and are interested in a dental career to be admitted to the College of Dentistry as early as the end of their first year of undergraduate study. Students postpone matriculation to the College of Dentistry until they have earned the amount of credit required for their undergraduate degree. As undergraduates, they are engaged in a liberal arts and sciences curriculum that incorporates the dental prerequisite courses. Once selected for the program, students must maintain a specified level of academic achievement to assure matriculation to the College of Dentistry.

**Financial Support**

Financial assistance for dental students is based on need. Dental students who demonstrate need
are eligible for Health Professions Loans, Perkins Loans, and Stafford/Ford Loans. Students applying for loans must submit the Free Application for Federal Student Aid (FAFSA). Interest on many of these loans may be deferred while the student is in school, and the loans are repayable over an extended period of time after the course of study is completed.

Short-term and long-term loans are available through the financial aid coordinator at the College of Dentistry.

Academic awards are given each year to qualified entering dental students. The Academic Research and Resource Support Awards provide financial support up to $15,000 per year for as many as four years, if the student maintains an appropriate level of performance.

Financial assistance (grants and loans) is available to disadvantaged students who qualify under The University of Iowa’s Educational Opportunity Program and the Opportunity at Iowa Program.

Information on financial assistance for dental students is available from the University’s Office of Student Financial Aid.

**Undergraduate Program**

**Bachelor of Science in Oral Health Science**

The College of Dentistry’s Bachelor of Science in oral health science is a degree completion program for students who hold an Associate in Applied Science (A.A.S.) from an accredited dental hygiene program.

Graduates of dental hygiene programs are allowed up to 60 s.h. of credit for their A.A.S. degree. Each applicant is evaluated, taking into consideration educational background and experience.

The flexible format, designed to accommodate the needs of returning adult students, provides for considerable individualization of the program of study.

**Admission**

Applicants should have a cumulative g.p.a. of at least 2.50 on a 4.00 scale. They must apply for admission to the University and to the B.S. program in oral health science, and interview at the College of Dentistry. Official transcripts, including degrees conferred, from each college or university attended must be submitted along with the application to the University’s Office of Admissions.

For more information about the B.S. in oral health science, contact the University’s Office of Admissions.

**Graduate Programs, Postgraduate Study**

Programs of study leading to the Master of Science are offered by the Departments of Operative Dentistry; Oral and Maxillofacial Surgery; Oral Pathology, Radiology, and Medicine; Orthodontics; and Preventive and Community Dentistry. Admission to these graduate programs requires satisfaction of all requirements for admission to the Graduate College, the Doctor of Dental Surgery degree or its equivalent (or a bachelor’s degree for dental hygienists applying to the Department of Preventive and Community Dentistry), and departmental approval. For graduate program descriptions, see the appropriate College of Dentistry department sections of the Catalog.

Several dentistry departments also offer postgraduate programs designed as preparation for clinical specialty practice (Endodontics; Operative Dentistry; Oral and Maxillofacial Surgery; Oral Pathology, Radiology, and Medicine; Orthodontics; Pediatric Dentistry; Periodontics; and Prosthodontics). These programs do not lead to an academic degree; certificates are awarded upon satisfactory completion of the programs. See the appropriate sections of the Catalog.

**Faculty**

Iowa’s dental faculty is predominantly full-time. In addition, 97 part-time adjunct faculty members assist with clinical teaching in the D.D.S. and advanced residency programs. Approximately 88 percent of the college’s faculty members hold D.D.S. or D.M.D. degrees and 12 percent represent other disciplines. The vast majority of faculty dentists have advanced education past the D.D.S., generally with master’s degrees in specialty areas; about one-fifth hold a Ph.D.

The College of Dentistry is committed to the principle that diversity is essential to a strong educational environment—one that prepares new generations of dentists to provide high-quality care to patients from many backgrounds. The college’s full-time faculty reflects that commitment.
Facilities

The College of Dentistry is located in the Dental Science Building on the University of Iowa health sciences campus, in proximity to the Roy J. and Lucille A. Carver College of Medicine, College of Nursing, College of Pharmacy, College of Public Health, and University of Iowa Hospitals and Clinics. The Bowen Science Building and the Hardin Library for the Health Sciences also are nearby.

The south wing of the Dental Science Building is devoted to clinical teaching. There are 268 operatories in departmental clinics, student laboratories, clinical research space, and a cafeteria. The north wing houses the simulation clinic and technique bench teaching laboratory, the electronic classroom, college administrative offices, educational media service, computer support services, the academic Department of Preventive and Community Dentistry, and the research laboratories and faculty offices of the Dows Institute for Dental Research.

Dental Education and Patient Care

Patient care is integral to dental education. Students and faculty members deliver oral health care in clinics on the health sciences campus and at several off-campus sites, including nursing homes. More than 25,000 people receive oral health care yearly in the college’s clinics. Patients from throughout Iowa as well as from western Illinois and northern Missouri account for most of the 110,000 patient visits each year.

Interdisciplinary Centers

Dows Institute for Dental Research

Established in 1976, the Dows Institute for Dental Research occupies the fourth floor of the Dental Science Building’s north wing. Laboratories are equipped to support a wide variety of research projects reflecting the complex nature of modern health care needs. Research in the area focuses on soft tissue and oral cancer; cariology and microbiology; epidemiology, behavior, health policy, and outcomes; and biomaterials, bone, and tissue engineering. Research also is carried out at the Dental Clinical Research Center.

Although research is concentrated in these program areas, one of the unit’s strengths has been the consistent level of interaction and collaboration among individuals and programs across the college and the University.

Dental Clinical Research Center

For nearly two decades, the Dental Clinical Research Center has offered the oral health care industry a multidisciplinary setting for product testing and development directed by experienced faculty scientists in laboratory or clinical settings. Center researchers have broad experience in designing tests of therapeutic claims and product safety that meet the criteria of the ADA’s Council on Scientific Affairs and the Food and Drug Administration Clinical Trials.

Center for Oral and Maxillofacial Implants

Through integrated research, education, and clinical programs, the Center for Oral and Maxillofacial Implants facilitates the development of implants and their use as a therapeutic modality in dentistry. The center integrates basic and clinical research with technology transfer to the clinical setting, enhancing predoctoral, postgraduate, and continuing education and expanding treatment options available to patients served by the college. The center also provides vital coordination of dental specialties that participate in this treatment modality.

Nondepartmental Courses

112:100 Transfer Credits Accepted

112:118 Experiential Learning I
Problem-based learning, case studies, simulations, communication projects, small group seminars, ethics, research and treatment planning activities integrating information addressed concurrently in the dental curriculum.

112:119 Experiential Learning II
Continuation of 112:118.

112:120 First-Year Continuing Session

112:145 Introduction to Geriatric Dentistry
2 s.h.
Biological, psychological, social aspects of aging; normal aging, disease processes, pathological changes that affect oral health, treatment of dental diseases and patient management. Prerequisite: D.D.S. enrollment or completion of dental hygiene program. Same as 153:145.

112:150 Second-Year Continuing Session
112:155 Introduction to Comprehensive Care/Experiential Learning III 1 s.h.
Comprehensive dental diagnosis and treatment planning; small group discussion of students' own patient cases.

112:167 Introduction to Quality Assurance 2 s.h.
Patient management, quality assurance concepts; students coordinate treatment, patient relations, issues of quality assurance for a group of patients; ethical, moral dilemmas in relation to dental practice.

112:168 Dental Therapeutics 1 s.h.
Patients' medications and their implications for dental treatment; clinical use of medications that dentists may prescribe; guidelines for dental prescribing.

112:170 Third-Year Continuing Session arr.

112:180 Fourth-Year Lectures and Clinics arr.

112:185 Clinical Admissions Emergency 1 s.h.
Clinical evaluation, diagnosis, and treatment of patients with dental emergencies; patient assessment and referral to appropriate department for treatment.

112:189 Advanced Topics in Quality Assurance 2 s.h.
Quality assurance from viewpoint of practicing dentist, dental educator, dental epidemiologist, court system; analysis of senior dental practice in relation to quality assurance criteria.

112:190 Dental Student Research Honors Program arr.
Prerequisites: D.D.S. enrollment and consent of mentor and program director.

112:199 Advanced Clinical Comprehensive Dentistry 0 s.h.
Clinical experience for professional improvement. Prerequisite: dental degree.
Endodontics

Head: William T. Johnson
Professors: David R. Drake, William T. Johnson, Richard E. Walton
Professor emeritus: Arne M. Bjorndal
Associate professor: Bruce C. Justman
Assistant professor: Anne E. Williamson
Clinical assistant professor: Manuel R. Gomez
Graduate degrees: M.S., Ph.D. in Oral Science
Graduate nondegree program: Certificate in Endodontics
Web site: http://www.dentistry.uiowa.edu

Professional Program

Course work and clinical experiences in endodontics are of vital importance in the overall education of a D.D.S. student.

Preclinical endodontics, taught during the sophomore year, includes a didactic and a laboratory component. In clinical endodontics, taught during the junior year, students study both normal and pathological conditions of the dental pulp and periradix. Diagnosis of pulpal and periradicular disease and various specialized aspects of endodontic treatment are emphasized. Students treat endodontic patients under direct supervision of faculty and staff.

Graduate Programs

Graduate programs offered by the Department of Endodontics are designed to provide qualified dentists with the scientific knowledge and clinical skills needed to practice endodontics and/or pursue a career in dental education and research.

The department offers several types of graduate programs, which have similar clinical experiences but different didactic experiences. Each program satisfies training requirements for eligibility for certification by the American Board of Endodontics. Students who complete the programs are encouraged to seek board certification. Various activities throughout the courses of study prepare the candidates for the board examination process.

The goal of each program is to develop competent diagnosticians and clinicians. Students learn the scientific and clinical basis of endodontics; develop clinical skills; gain knowledge of and experience in the educational process in order to function confidently as dental educators; and develop skills in designing, conducting, reporting, and publishing the results of original research. Students in the M.S. and Ph.D. programs also gain in-depth knowledge in a scientific training discipline as preparation for an academic/research career.

Master of Science

The Master of Science requires a minimum of 30 s.h. of graduate-level work, taken over 36 months. An original research project and thesis are required. Students follow a plan of study outlined by the Department of Endodontics in compliance with basic Graduate College regulations for graduate programs in dentistry. Under most circumstances, the degree granted is a Master of Science in oral science, although master’s degrees are available in other disciplines. Following successful completion of the program requirements, students are granted a Master of Science degree and a Certificate in Endodontics.

Certificate

The Certificate in Endodontics requires a minimum of 24 months of full-time formal training. The program has the same clinical but fewer didactic course requirements than the combined M.S./certificate program, and it requires no formal thesis. Students are expected to complete an original research project in the area of endodontics and to write a scientific paper for submission to a refereed journal.

Other Graduate Programs

Other graduate programs are available, such as a certificate in combination with a Ph.D. Upon completing original research and successfully defending a dissertation, students are granted a Ph.D. in a basic science area. Such programs are available by special arrangement, depending on the candidate’s experience and goals.

Graduate Program Policies

Grade-Point Average

Students in each graduate program must maintain a g.p.a. of at least 3.00 to receive the
certificate and/or degree. Students who fall below this average are allowed one semester to raise their g.p.a. to at least 3.00. The circumstances of the grade-point average deficiency receive careful consideration.

**Dental Practice Privileges**

Students accepted and enrolled in any graduate program are not permitted to involve themselves in private dental practice enterprises outside the college. Failure to adhere to this policy may result in dismissal from the program.

**Program Interruption**

Whenever possible, students should complete the graduate program without interruption. Students who demonstrate need to discontinue the program temporarily should limit their time away to a maximum of one calendar year. Students must have permission from the endodontic graduate program director in order to interrupt their study.

**Admission**

Application for the M.S. and certificate programs are accepted from both U.S. and international graduates (or from those about to graduate).

Applicants to either the M.S. or certificate programs must be graduates of (or graduating from) an accredited college of dentistry or a foreign equivalent. M.S. and Ph.D. applicants must meet the admission requirements of the Graduate College. A cumulative g.p.a. of at least 2.50 or equivalent is necessary for consideration for admission to any of the graduate programs.

**Application**

Application forms for the M.S. and certificate programs are available online on the Office of Admissions web site (http://www.uiowa.edu/admissions/graduate/colleges/graduate.htm).

Application forms for the Ph.D. program are available from and should be returned to the office of the associate dean for research and graduate studies in the College of Dentistry. Applications are forwarded to the Department of Endodontics.

Applications for all programs must include the completed application form, official transcripts from all undergraduate and graduate institutions attended, three letters of recommendation, National Board Examination Scores (at least Part I, and Part II if available), an updated curriculum vitae, a personal statement, and a recent photograph.

Applicants to the M.S. program are not required to take the Graduate Record Examination. International applicants whose first language is not English must present a satisfactory score on the Test of English as a Foreign Language (TOEFL).

**APPLICATION DEADLINE**

All advanced programs begin on July 1. Applications should be submitted no later than September 1 of the year preceding the anticipated date of enrollment. Finalists for each program are asked for a personal interview in October or early November. Final decisions generally are made before the last week of November.

**Financial Support**

Applicants to the M.S. and certificate programs must be able to support themselves financially until they complete the program. Prospective students should plan to pay living expenses, tuition, and costs for books, specialized equipment (e.g., surgical operating microscope, notebook computer, and ultrasonic system), instrument usage, and thesis expenses. Stipends are determined on a yearly basis and depend on availability of funding.

**Courses**

**For D.D.S. Students**

- 083:140 Endodontics Preclinical Didactic 1 s.h.
  Basic principles, concepts, technical procedures for treatment of pulpal problems.

- 083:141 Endodontics Preclinical Laboratory 1 s.h.
  Basic technical procedures for treatment of pulpal problems.

- 083:160 Clinical Endodontic Practice arr.
  Clinical experience in diagnosis and treatment of routine pulpal and periradicular pathology; emergency diagnosis; treatment of patients.

- 083:165 Clinical Endodontic Seminar 1 s.h.
  Tooth pain, anesthesia, pulpal and periradicular reactions, endodontic radiologic interpretation, trauma diagnosis and treatment, surgical endodontics, endodontic implants, bleaching, retreatment, apexification/apexigenesis.

**For Graduate Students**

Also see courses listed under the Oral Sciences Program.

- 083:200 Update in Endodontics 1 s.h.
  Recent advances in diagnosis, treatment planning, clinical techniques.
083:225 Endodontic Literature Review I 2 s.h.
Current and historical research.

083:226 Endodontic Literature Review II 2 s.h.
Continuation of 083:225.

083:227 Endodontic Literature Review III 2 s.h.
Continuation of 083:226.

083:228 Endodontic Literature Review IV 2 s.h.
Continuation of 083:227.

083:255 Practice Teaching in Endodontics arr.

083:300 Endodontic Certificate Program 0 s.h.
Advanced endodontic clinical and didactic education; nondegree program toward eligibility for board certification in endodontics.
Family Dentistry

Head: David C. Holmes  
Professors: Ana Diaz-Arnold, John V. Doering, James M. Leary  
Professors emeriti: Charles Sabiston Jr., Vincent D. Williams, Gene A. Zach  
Associate professors: Larry J. Squire, Marcos Vargas  
Assistant professors: Cheryl Morarend, Michael Spector, Philip L. Tan, Richard Williamson  
Web site: http://www.dentistry.uiowa.edu

The Department of Family Dentistry reinforces and refines the comprehensive approach to managing patients’ oral health care needs.

Professional Program

The senior year integrates basic science knowledge, clinical skills, and dental laboratory experiences acquired during the first three years of dental school into a systematic approach to providing patient care.

Students who complete their education in Family Dentistry should:

• understand the principles of comprehensive dental treatment planning;
• know the medical, ethical, and legal issues involved in patient care;
• be able to recognize the need for specialty consultation;
• be competent in coordinating and sequencing patient treatments;
• be effective members of the dental team;
• be prepared to enter general practice; and
• appreciate the importance and value of lifelong learning.

Students spend five days a week in a clinical setting, where they gain experience in total patient management and care. Their didactic course work builds on their previous education. All areas of clinical and didactic instruction, patient awareness, and sensitivity to patients’ needs are stressed.

The department’s practice management curriculum prepares students to evaluate practice locations and manage the business aspects of a dental practice.

Courses

114:184 Dental Practice Management 2 s.h.  
Principles of dental practice management; delivery of comprehensive dental treatment in a simulated group-practice clinical setting, with chairside dental assistants.

114:187 Clinical Experiences—Comprehensive Care arr.  
Clinical experiences in diagnosis, treatment planning, and delivery of integrated, comprehensive dental care.

114:188 Clinical Competencies—Comprehensive Care arr.  
Refinement of clinical skills, judgment, and critical self-evaluation in the delivery of integrated, comprehensive dental care.

114:194 Topics in Family Dentistry 3 s.h.  
Current techniques, findings; applications for general practitioner and graduate specialty programs.

114:195 Treatment Planning and Sequencing 2 s.h.  
Documentation of diagnostic procedures used in developing a treatment plan and sequence for selected clinical patients; student presentations.
Head: Kirk L. Fridrich
Division directors: Cynthia K. Christenson, Kirk L. Fridrich (Oral and Maxillofacial Surgery), Jeffery Markt (Prosthodontics), Patricia K. Meredith (Family Dentistry), James Wheeler (Orthodontics)
Associate professors: Janet M. Guthmiller, William T. Johnson, Michael J. Kanellis, Patricia K. Meredith, William J. Synan

The College of Dentistry operates a hospital dentistry clinical service at University of Iowa Hospitals and Clinics. The service includes divisions of general dentistry, maxillofacial prosthetics, oral and maxillofacial surgery, orthodontics, and pediatric dentistry, and it interacts with the college’s specialties of orthodontics, periodontics, endodontics, diagnosis, oral pathology, and prosthodontics.

The Hospital Family Dentistry Program offers a one-year general practice residency.

Residency Program

The residency program in general practice prepares dentists for a broader scope of private practice in general dentistry. The program combines clinical and didactic training on an individual basis and meets fundamental requirements of the Commission on Dental Accreditation of the American Dental Association.

The residency covers one year of hospital-based training. Through postdoctoral clinical, didactic, and hospital experience, residents prepare to meet the oral health needs of a wide range of ambulatory and nonambulatory patients.

Residency training includes use of hospital resources, management of ambulatory patients, inpatients, same-day surgery patients, and emergency medical and dental patients. Residents participate in consultations with other hospital services and are assigned to appropriate hospital services to fulfill the objectives of the training program. They are appointed to the hospital’s house staff and have the same privileges and responsibilities as residents in other professional education programs.

Applicants must be graduates of an accredited college of dentistry and must be licensed to practice dentistry in the United States. Selection is made through a postdoctoral dental matching program sponsored by the American Dental Education Association.

The application deadline is November 1 for admission the following July 1. Applicants are appointed after the results of the match have been received and the staff takes official action.
Operative Dentistry

Head: Gerald Denehy
Professors: Gerald Denehy, Satish Khera
Professors emeriti: James Fuller, Wallace Johnson, Devore Killip
Adjunct professor: Robert Margeas
Associate professors: Steve Armstrong, Murray Bouschlicher, Yvonne Chalkley, Deborah Cobb, Thomas Schulein
Assistant professors: Sandra Guzmán-Armstrong, Marcela Hernández
Adjunct assistant professors: Stephanie Barquist, Stephen Bender, Terry Donnelly, Richard Grunder, Mark Kampe, Stephanie Nowysz-Ward, Jon Ryder, Jeremy Tu
Adjunct instructors: Ed Fung, Lynn Griebahn, Alan Swett, Chadwin Wagener

Graduate degree: M.S. in Operative Dentistry
Graduate nondegree program: Certificate in Operative Dentistry

Professional Program

Course work and clinical experiences in operative dentistry are fundamental to dental students’ overall education. The operative dentistry curriculum is designed so that didactic material relates closely to laboratory and clinical experiences. The program prepares D.D.S. students to proceed independently in operative dentistry during the fourth year of training.

Graduate Program

The Department of Operative Dentistry offers advanced training designed to prepare dentists for teaching, research, and practice. Since the American Dental Association does not recognize operative dentistry as a specialty area, graduate students have the opportunity to take courses that particularly interest them. Students earn a Master of Science and a Certificate in Operative Dentistry.

Requirements for the M.S. include satisfactory completion of 52 s.h. of graduate-level courses, preparation of an acceptable thesis based on original research, and a formal thesis defense. Students must provide their own financial support for the graduate program, including research and thesis expenses.

Applicants to the program must be graduates of recognized schools of dentistry and must meet the admission requirements of the Graduate College. The department may request an interview with an applicant.

Courses

For D.D.S. Students

082:120 Dental Anatomy 3 s.h.
Basic dental terminology and nomenclature, human tooth morphology, creation of tooth crowns with wax.

082:122 Operative Dentistry I 6 s.h.
Principles, design of cavity preparations; placement of restorative materials; clinical simulation on dental mannequins.

082:140 Operative Dentistry II 1 s.h.
Principles, design of cavity preparations, restoration of teeth, patient management, pain control.

082:141 Operative Dentistry II Clinic 0, 3 s.h.
Procedures performed on operative clinic patients; based on biological principles for preparation of cavities, restoration with appropriate materials.

082:142 Esthetic Dentistry 1 s.h.
Principles of esthetic dentistry; tooth bleaching, tooth recontouring, esthetic buildups with composite resin; exercises on mannequins in the simulation clinic.

082:160 Operative Dentistry III Clinic arr.
Patient treatment; amalgam, composite resin, gold; emphasis on physiological, esthetic importance of restorative treatment.

082:165 Operative Dentistry III Seminar 1 s.h.
Clinical problems, restorative dental materials, treatment methods.

For Graduate Students

Discipline Studies

082:224 Graduate Restorative Materials 2 s.h.

082:225 Operative Dentistry I Seminar 1 s.h.
Basic concepts of cavity preparation, material placement.

082:226 Operative Dentistry Seminar II 1 s.h.
Direct resin systems, bonding technology; their use in dental esthetic treatment.

082:227 Operative Dentistry Seminar III 1 s.h.
Use of indirect techniques in bonded esthetic restorations.

082:228 Operative Dentistry Seminar IV 1 s.h.
Principles for health professions educators.
Research Program

082:230 Operative Dentistry Research I 3 s.h.
Thesis topic selection, committee selection, literature review.

082:231 Operative Dentistry Research II 2 s.h.
Thesis protocol, research.

082:232 Operative Dentistry Research III 3 s.h.
Thesis research, data gathering, writing.

082:233 Operative Dentistry Research IV 3 s.h.
Thesis completion, defense.

082:234 Selected Applications of Operative Dentistry arr.
Advanced techniques.

Clinical Studies

082:240 Operative Dentistry Advanced Clinic I arr.
Materials, techniques; restoration procedures on a mannequin.

082:241 Operative Dentistry Advanced Clinic II arr.
Patient treatment in operative clinic; basic operative procedures.

082:242 Operative Dentistry Advanced Clinic III arr.
Patient treatment in operative clinic; direct-bonded esthetic restorative procedures.

082:243 Operative Dentistry Advanced Clinic IV arr.
Patient treatment in operative clinic; advanced esthetic restorative procedures.

082:244 Operative Dentistry Advanced Clinic V arr.
Patient treatment in operative clinic; advanced esthetic restorative procedures.

082:245 Clinical Demonstrating arr.
Teaching undergraduate dental students in laboratory, clinic.

082:300 Operative Dentistry Certificate Program 0 s.h.
Advanced dental clinical, didactic education; nondegree program toward eligibility for board certification in operative dentistry.
Oral and Maxillofacial Surgery

Head: Kirk L. Fridrich
Assistant head: Richard G. Burton
Director, graduate studies: Teresa A. Morgan
Professors: Richard G. Burton, Kirk L. Fridrich, Daniel Lew, Charles L. Ringgold
Professor emeritus: John Montgomery
Associate professor: William J. Synan
Associate professor emeritus: Sherwood Wolfson
Assistant professor: Teresa A. Morgan
Graduate degree: M.S. in Oral and Maxillofacial Surgery

The Department of Oral and Maxillofacial Surgery combines clinical and didactic training to fit the individual interests, abilities, and development of students. Its predoctoral program is based in the College of Dentistry, with some clinical assignments in the oral and maxillofacial surgery division at University of Iowa Hospitals and Clinics. Graduate study is based primarily in the residency training program at University of Iowa Hospitals and Clinics.

Professional Program

The professional curriculum is designed to develop a foundation of professional knowledge, coupled with surgical skills, that will enable D.D.S. students to diagnose and manage surgical problems related to general dentistry practice. The program emphasizes high ethical standards and development of good surgical concepts and judgment.

The clinical portion of the curriculum allows students to develop surgical skills and apply the theoretical knowledge acquired in didactic courses. Theory and application of anesthesia-analgesia, intravenous sedation, and nitrous oxide analgesia techniques are presented through didactic and clinical experiences.

Residency Program

The residency program in oral and maxillofacial surgery combines clinical and didactic training to prepare dentists for specialty practice. Every effort is made to adapt the program to the individual interests, abilities, and development of students, but it is essential that all students meet certain fundamental requirements.

The recommendations of the Council on Dental Education of the American Dental Association, the Committee on Graduate Training of the American Society of Oral and Maxillofacial Surgeons, and the American Board of Oral and Maxillofacial Surgery have been considered carefully in planning the structure and scope of training.

The residency period covers four years of hospital training, providing an orientation to hospital procedures, integration of basic and clinical sciences, acquisition of surgery principles, and familiarization with varied aspects of health services.

Competence in clinical oral and maxillofacial surgery requires knowledge of the basic medical sciences related to the specialty. So in addition to hospital and clinical training, residents take advanced course work in subjects such as applied pharmacology, surgical anatomy, pathology, physiology, and microbiology. They also review closely related disciplines such as roentgenology, anesthesiology, physical diagnosis, and laboratory procedures.

The assumption of increased responsibility and the opportunity for clinical and operating room experience are important aspects of residency training.

Residents gain clinical training in anesthesiology through an assigned rotation in the Department of Anesthesiology. Previous advanced training in physical diagnosis, physiology, pharmacology, and pathology take on greater clinical significance, and increased responsibility in the operating room as first assistant and surgeon further develops surgical judgment and skills.

Development and implementation of a research project under staff supervision enhance the value of the residency training.

Senior residents may be given responsibility for major oral and maxillofacial surgical cases during rotations at University of Iowa Hospitals and Clinics and at the Veterans Affairs Iowa City Health Care System. Each fourth-year resident is assigned to a rotation as a clinical and didactic coordinator and assumes responsibility to qualify for examination by the American Board of Oral and Maxillofacial Surgery.
Admission

Students begin the four-year program only on July 1. Applicants are selected through a post-D.D.S. dental matching program sponsored by the American Association of Oral and Maxillofacial Surgeons. The application deadline for the match in oral and maxillofacial surgery is September 1 for admission the following July. Appointments are made after the match results are revealed and the staff elects to take official action. Appointments are offered on or before February 1 for the following July.

Applicants must have graduated from an accredited college of dentistry, should be in the upper one-third of their graduating class, must be licensed to practice dentistry in the United States, and must take the Graduate Record Examination (GRE) General Test. Applicants must meet the admission requirements of the Graduate College.

They must submit an application for graduate study in oral and maxillofacial surgery; an applicant appraisal form from the applicant’s references; transcripts; and letters of recommendation from the dean of the dental college from which the applicant graduated, and from two professional references.

Once applicants have been matched, they must submit Graduate College admission forms by March 1 for admission in July. To obtain forms, contact the Office of Admissions or visit its web site.

Graduate Program

Master of Science

The M.S. program is a four-year course of integrated didactic and clinical study, including a research project and preparation of a thesis. Students complete M.S. requirements during residency. See Residency Program above.

Facilities

The University of Iowa Health Sciences Campus has outstanding basic and clinical science departments that stimulate and support scholarly research and superior clinical practice. The University of Iowa Hospitals and Clinics, the College of Dentistry, and the Roy J. and Lucille A. Carver College of Medicine provide appropriate environments for residency training in oral and maxillofacial surgery, as does the Veterans Affairs Iowa City Health Care System.

Courses

For D.D.S. Students

087:115 Anesthesia and Pain Control I 1 s.h.
Principles, techniques of complete medical history, head and neck examination, cardiovascular and respiratory examination; neuroanatomical, psychophysiological aspects of pain; pharmacologic action and techniques for using local anesthetics.

087:130 Basic Oral and Maxillofacial Surgery 2 s.h.
Principles; indications, contraindications for extractions; evaluation of patient’s related medical history; techniques of extraction, minor oral surgery procedures.

087:145 Anesthesia and Pain Control II 1 s.h.
Theory, application, instrumentation of nitrous oxide sedation; emphasis on cardiovascular, respiratory physiology; evaluation of patients, practical techniques for nitrous oxide sedation.

087:155 Advanced Oral and Maxillofacial Surgery 1 s.h.
History, examination, diagnosis, treatment of diseases and traumatic injuries of oral cavity.

Clinical experience at the College of Dentistry, University of Iowa Hospitals and Clinics, Veterans Affairs Iowa City Health Care System.

For Graduate Students

087:201 Hospital Procedures 1 s.h.
Hospital rules, regulations; patient, department records; information concerning hospitalized patients.

087:202 Basic Science Review 4 s.h.
Head, neck anatomy; dissection; microbiology, pathology, physiology.

087:207 Surgical Anatomy 1 s.h.
Head, neck structures in major oral surgery procedures; emphasis on maxillofacial problems, surgical emergencies; may include animal surgery.

087:208 Pain and Anxiety Control 1-3 s.h.
Nitrous oxide; intravenous, oral, intramuscular anxiety and pain control; pharmacology of agents; complications, their management.

087:209 Principles of Anesthesia 2 s.h.
General anesthesia; agents and their effects on respiratory, cardiovascular systems; literature.

087:211 Literature Seminars and Journal Club 1 s.h.

087:212 Surgical Case Reports 1 s.h.

087:214 Roentgen Interpretation 2 s.h.
Theory, technique.

087:215 Physical Diagnosis 2 s.h.

087:218 Oral Pathology Conference 1 s.h.
Current clinical specimens.

087:225 Oral and Maxillofacial Surgery Seminar I 1 s.h.

087:226 Oral and Maxillofacial Surgery Seminar II 1 s.h.

087:227 Oral and Maxillofacial Surgery Seminar III 1 s.h.

087:230 Oral and Maxillofacial Surgery Research I 2 s.h.
Thesis topic and review committee selection, literature review.
087:231 Oral and Maxillofacial Surgery Research II  3 s.h.
Thesis protocol, research.

087:232 Oral and Maxillofacial Surgery Research III  3 s.h.
Thesis research complete; data gathering.

087:233 Oral and Maxillofacial Surgery Thesis  3 s.h.
Thesis and defense; comprehensive examination.

Specialty and technical seminars, patient treatment; clinical practice on assigned patient problems.

Specialty and technical seminars, patient treatment; clinical practice on assigned patient problems.
Oral Pathology, Radiology, and Medicine

Head: Steven D. Vincent
Professors: Michael W. Finkelstein, Axel Ruprecht, Christopher A. Squier, Steven D. Vincent, Philip W. Wertz
Professors emeriti: Harold L. Hammond, William J. Hausler
Adjunct professors: Eva Dahl, Thomas P. Williams
Adjunct professor emeritus: Daniel L. Hall
Clinical professor: John W. Hellstein
Associate professor: Karen A. Baker
Associate professors (clinical): Ronald D. Elvers, Cindy L. Marek, Carrie McKnight, Patricia K. Meredith
Assistant professor: Zoya B. Kurago
Assistant professors emeriti: George C. Kienzle, Francis H. Sippy
Assistant professors (clinical): Ruth D. Spieker, Sherry R. Timmons
Adjunct assistant professors: Marcello G.P. Cavalcanti, John A. Maxwell, Dennis Rose, Daniel S. Sarasin
Graduate degree: M.S. in Stomatology
Graduate nondegree programs: Certificate in Oral and Maxillofacial Pathology, Certificate in Oral and Maxillofacial Radiology
Web site: http://www.dentistry.uiowa.edu

Professional Program

The department teaches D.D.S. and other health care students about diseases that manifest in and about the oral cavity. Students learn about the clinical, radiographic, laboratory, histopathologic, and therapeutic features of these diseases as well as their etiology and natural history. They also study identification of systemic diseases through physical evaluation of patients.

Graduate Programs

The department offers a Master of Science in stomatology with two tracks: oral and maxillofacial pathology, and oral and maxillofacial radiology. It also offers a certificate in each of the two tracks.

The graduate programs are diverse and flexible, allowing students to obtain advanced clinical, didactic, and research-related education while pursuing a Master of Science.

Students also may choose to apply for acceptance to the College of Dentistry graduate programs in oral science (see Oral Science in the Catalog).

Master of Science, Certificates

Stomatology is the science of structure, function, and disease of the oral cavity. Study methods include examination of related histories, evaluation of clinical signs and symptoms, and use of biochemical, microscopic, and radiologic procedures to establish a diagnosis and plan for therapeutic management.

The Master of Science requires a minimum of 30 s.h. of graduate credit. Students choose one of two tracks—oral and maxillofacial pathology, or oral and maxillofacial radiology. All M.S. students pursue comprehensive study of basic biologic and health sciences in preparation for teaching and research. All M.S. candidates prepare and submit a thesis based on the results of research conducted during their course of study.

Students also may pursue a joint program, earning a Master of Science in stomatology and a certificate in their M.S. track area (M.S. in stomatology and Certificate in Oral and Maxillofacial Pathology, or M.S. in stomatology and Certificate in Oral and Maxillofacial Radiology). Each joint program combines the minimum requirements of the M.S. and the certificate; completion time usually is 36 to 48 months. The educational requirements of each certificate program meet the requirements for preparation of dental specialists set by the Commission on Dental Education of the American Dental Association and the American Board of Oral and Maxillofacial Pathology.

All graduate students must complete the core courses below. They also must complete the basic science and departmental courses appropriate to their track, as listed below.

CORE COURSES

068:199 Basic Otolaryngologic Science arr.
069:205 Medical Pathology I 5 s.h.
069:206 Medical Pathology II 5 s.h.
086:200 Stomatology Literature Review arr.
086:226 Physical, Laboratory, and Historical Features of Disease arr.
086:230 Research in Oral Pathology, Radiology, and Medicine arr.
Admission

Applicants must have successfully completed an accredited program leading to the D.D.S. or D.M.D., or a foreign equivalent, and must meet the admission requirements of the Graduate College. They must have a cumulative g.p.a. of at least 3.00 (or foreign equivalent) to be considered for admission.

All applicants must take the Graduate Record Examination (GRE) General Test. International applicants whose first language is not English must present a satisfactory score on the Test of English as a Foreign Language (TOEFL).

The department’s faculty makes final decisions on acceptance of applicants who meet the requirements for admission. A personal interview may be required.

Facilities

Facilities reserved for the Department of Oral Pathology, Radiology, and Medicine include a radiology special procedures area, an interpretation room, seminar rooms, a surgical oral pathology laboratory, and a clinical pathology laboratory.

In addition, the College of Dentistry has joint-use research laboratories that are well equipped and staffed for conducting research involving histology, histochemistry, materials technology, radiobiology, ultrastructure, and electron probe analysis and quantification.

Courses

For D.D.S. Students

086:120 Fundamentals of Oral Radiology 1 s.h.  
Methods of clinical, radiographic examination, record keeping; correlation of basic, clinical sciences.

086:135 Oral Pathology 4 s.h.  
Diseases involving orofacial organs.

086:145 Introduction to Clinical Oral Radiology 1 s.h.  
Principles, techniques of diagnosis, radiology, clinical pathology in clinical practice.

086:155 Systemic Disease Manifestations 1 s.h.  
Clinical medicine for dental students; basic information for patient evaluation.

086:160 Clinical Oral Diagnosis 1 s.h.  
Diagnosis of orofacial diseases by clinical, laboratory, radiographic and treatment planning methods; clinical case analysis.

Making and processing intraoral, extraoral radiographs; principles of radiographic interpretation.

086:165 Clinical Oral Pathology 1 s.h.  
Oral and maxillofacial diseases: integration of the clinical, historical, radiographic features; therapeutic management.

For Graduate Students

086:200 Stomatology Literature Review arr.  
Current literature in oral and maxillofacial pathology and radiology; presentation of graduate student research; development of lectures or seminars for D.D.S. or graduate students, or continuing education for peers and practicing dentists.

086:225 Manifestations of Oral and Paraoral Disease arr.  
Clinical experience in diagnosing, managing patients.

086:226 Physical, Laboratory, and Historical Features of Disease arr.  
Head and neck diseases, abnormalities.

086:227 Surgical Oral Pathology 1 s.h.  
Experience in day-to-day operations of surgical oral pathology laboratory; advanced training in histopathologic diagnosis of oral and maxillofacial diseases. Repeatable. Prerequisite: consent of instructor. Pre- or corequisite: 086:240.

086:228 Introduction to Surgical Oral Pathology 1 s.h.  
Day-to-day operations of surgical oral pathology laboratory; histopathologic diagnosis of oral and maxillofacial diseases. Repeatable. Prerequisite: consent of instructor.

086:230 Research in Oral Pathology, Radiology, and Medicine arr.  
Includes thesis preparation.

Oral Science

Director: Christopher Squier
Graduate degrees: M.S., Ph.D. in Oral Science
Web site: http://www.dentistry.uiowa.edu

Graduate Programs

The College of Dentistry offers programs of study leading to the Master of Science and the Doctor of Philosophy in oral science. Both programs require that students complete courses from a core curriculum and conduct independent research leading to a thesis. They are intended to prepare graduates for careers in teaching and research.

Master of Science

The M.S. in oral science requires 30 s.h. of graduate credit, including a minimum of 21 s.h. of course work, independent research leading to a dissertation, and a final examination. M.S. students must spend at least two years of full-time residence (primarily in research labs or seeing clinic patients at the Dental Science Building). Students also involved in an advanced clinical program of two years’ duration should complete the M.S. and certificate programs by the end of a third or fourth year of study.

Students pursuing the M.S. also must be enrolled in a clinical training program offered by a College of Dentistry department.

Doctor of Philosophy

The Ph.D. in oral science requires a minimum of 72 s.h. of graduate credit including advanced course work and original research that culminates in successful defense of a dissertation. Students must pass a comprehensive examination, prepare and gain approval of a research prospectus, and complete and successfully defend a dissertation that describes the results of the research. Completion of the program usually requires at least four years of full-time study.

Admission

Applicants to the M.S. and Ph.D. programs must hold a dental degree and must meet the admission requirements of the Graduate College. They should have a cumulative g.p.a. of at least 3.00. Applicants whose first language is not English must score at least 550 (paper-based) or 213 (computer-based) on the Test of English as a Foreign Language (TOEFL); they also may be asked to take the Test of Spoken English.

Programs normally begin July 1 each year.

Applicants to the Ph.D. program are asked to submit a statement describing past research experience and current research interests, and stating how completion of the Ph.D. program fits their career goals.

A personal interview may be requested for either program.

Courses

151:200 Seminars in Dental Research 1 s.h.
151:210 Dental Sciences Research Methodology 2 s.h. Practical, experimental procedures in dental research; literature and design; writing of research protocols.
151:215 Research Design in Dentistry 2 s.h. Types of studies used in dentistry; design validity; sampling methodologies; major descriptive and experimental designs used in dental research; application of statistical tests to these designs.
151:220 Pathophysiology of Skin and Oral Mucosa 2 s.h. Biology of skin, oral mucosa; changes in behavior of the tissues in a variety of physiological, pathological conditions. Offered fall semesters of odd years. Prerequisite: 151:210.
151:230 Pathophysiology of Salivary Glands and Saliva 2 s.h. Innervation, structure, function of glands; their secretions in health and disease, their role in oral environment. Offered spring semesters of odd years. Prerequisite: 151:210.
151:240 Pathophysiology of the Pulp-Dentin Complex arr. Biology of tissue; emphasis on pathological changes. Offered spring semesters of even years. Prerequisite: 151:210.

Orthodontics

Head: Thomas E. Southard
Professors: Samir E. Bishara, John S. Casko, Karin A. Southard, Thomas E. Southard, Robert N. Staley
Professors emeriti: Richard M. Jacobs, William Olin
Associate professor: Andrew C. Lidral
Graduate degree: M.S. in Orthodontics
Graduate nondegree program: Certificate in Orthodontics
Web site: http://www.dentistry.uiowa.edu

Professional Program

The professional program in orthodontics prepares general practitioners of dentistry to competently recognize, diagnose, and treat limited malocclusions of the teeth.

Lecture courses guide D.D.S. students in learning basic concepts of dental and facial growth, as well as treatment-oriented subject matter. In a laboratory course, students take and evaluate diagnostic records and fabricate treatment appliances. The department supervises a program for clinical treatment of selected patients.

Graduate Program

The department offers a Master of Science in orthodontics and a Certificate in Orthodontics.

The graduate program in orthodontics educates competent individuals to practice orthodontics and dentofacial orthopedics. The program’s objectives are to provide students with an in-depth education in biological and biomechanical principles related to orthodontics; to teach students to diagnose, plan, and deliver comprehensive orthodontic health care service; and to develop students’ research and service skills.

Opportunities are available for research and independent study in the department, and there are special facilities for research in biomechanics and craniofacial growth. Interaction with other departments provides learning and research opportunities in surgical orthodontics, cleft lip and palate treatment, speech pathology, animal experimentation, and human growth.

Master of Science and Certificate

Satisfactory completion of 24 months of intensive study, including lecture courses, seminars, clinical practicum, and a research paper, qualifies students to receive a Certificate in Orthodontics.

The Master of Science requires a minimum of 30 s.h. of graduate credit. Students must satisfactorily complete a thesis based on an original research project to qualify for an M.S. in addition to the Certificate in Orthodontics.

Admission

Applicants must have a D.D.S. or equivalent and must meet the admission requirements of the Graduate College. Application deadline is September 1 for entry the following July 1. Applicants are required to come to the University for interviews with department faculty.

The Department of Pediatric Dentistry instructs D.D.S. and graduate students in the prevention and treatment of dental diseases in children. Instruction combines didactic, laboratory, and clinical experiences and gives special consideration to reviewing current literature and managing dental problems of children with special health care needs. It also emphasizes efficient treatment through proper use of dental auxiliary personnel and record management.

**Professional Program**

All third-year D.D.S. students participate in a clerkship, which includes a lecture course and a clinical course. During their fourth year, they treat patients in the department’s outreach clinics.

**Graduate Program**

Graduate study in pediatric dentistry leads to a Certificate in Pediatric Dentistry (two-year program) or the certificate and a Master of Science in dental public health (three-year program). Both programs give special emphasis to preparation for certification by the American Board of Pediatric Dentistry. In addition, the three-year program in dental public health prepares students for certification by the American Board of Dental Public Health. Both programs are fully accredited by the Commission on Dental Accreditation of the American Dental Association.

**Master of Science and Certificates**

The Master of Science requires a minimum of 30 s.h. of graduate credit.

Graduate students are trained in all phases of pediatric dentistry and have career choices in practice, education, or research. Special emphasis is placed on development of leadership skills and strategies for serving vulnerable populations. Approximately 50 percent of the graduate program is devoted to advanced clinical activity, 30 percent to didactic courses and practice teaching, and 20 percent to original research. The program includes a core of didactic, clinical, and research-oriented courses supplemented by electives determined by students’ individual interests. Development of a minor subject area is recommended.

Close associations with the Department of Pediatrics in the Roy J. and Lucille A. Carver College of Medicine, the Center for Disabilities and Development, and University of Iowa Hospitals and Clinics permit emphasis on oral rehabilitation under general anesthesia, instruction in physical diagnosis, and management of children with developmental disabilities.

**Admission**

Prospective students apply through the American Dental Education Association PASS program (http://www.adea.org/pass).

Applicants must meet the admission requirements of the Graduate College.

**Financial Support**

Stipends for residents in the three-year program are available to qualified students through a grant from the Office for Maternal and Child Health, Bureau of Community Health Services, Department of Health and Human Services.
Stipends for the two-year program are provided by other federal sources.

**Research Opportunities**

Clinical and laboratory research projects have financial support from federal agencies and other sources. Major research areas include cariology, dental materials, dentistry for persons with special health care needs, growth and development, fluoride therapy, child behavior management, prevention, and access to care.

**Faculty**

Faculty members hold numerous national and state offices, committee memberships, consultancies, and honors in professional organizations. They serve as reviewers for professional journals and federal granting agencies. They also participate regularly in continuing education programs for dentists and other health science personnel. Eight of the department’s professors are diplomates of the American Board of Pediatric Dentistry.

**Courses**

**For D.D.S. Students**

090:140 Pediatric Dentistry Diagnosis and Treatment 3 s.h.
Growth and development, behavior management, diagnostic-preventive-restorative techniques for pediatric patients.

090:160 Clinical Pediatric Dentistry arr.
Comprehensive clinical management of pediatric patients.

090:165 Clinical Seminar in Pediatric Dentistry 1 s.h.
Patient management, case histories, treatment philosophies, issues in contemporary dentistry for children.

**For Graduate Students**

090:220 Social, Cultural, and Public Health Issues in Pediatric Dentistry 1 s.h.

090:300 Pediatric Dentistry Certificate Program 0 s.h.
Advanced dental clinical and didactic education; nondegree program toward eligibility for board certification in pediatric dentistry.
Periodontics

Head: Georgia K. Johnson
Professors: Kim Brogden, Lewis Humbert, Georgia K. Johnson
Associate professors emeriti: Paul J. Collins, Benny F. Hawkins
Assistant professor: Ali Fakhry
Assistant clinical professors: Steven H. Clark, Kumar Neppalli, Paula Weistroffer
Adjunct clinical assistant professors: Guy Bilek, James Fili, Ann Romanowski, Frank A. Wingrove, Karen Wolf
Assistant-in-instruction: Nancy A. Slach
Graduate degree: M.S. in Oral Science
Graduate nondegree program: Certificate in Periodontics
Web site: http://www.dentistry.uiowa.edu

Professional Program

The professional periodontal program for D.D.S. students combines didactic, laboratory, and clinical experience and applies the biological concepts of periodontology to the comprehensive clinical management of patients who have periodontal diseases.

Graduate Programs

Master of Science

Graduate students can pursue an M.S. in oral science in conjunction with the Certificate in Periodontics.

The program requires a minimum of 36 months of full-time study, including satisfactory completion of required and elective courses, preparation and defense of an acceptable thesis based on original research, and satisfactory completion of comprehensive written and oral examinations.

Certificate

The program leading to a Certificate in Periodontics provides a sound foundation for the clinical practice of periodontics. It also meets eligibility requirements for certification by the American Board of Periodontology.

The program requires 36 months of full-time study, including satisfactory completion of required and elective courses, satisfactory completion of comprehensive written and oral examinations, and an acceptable literature review or research paper.

Opportunities are provided for experience in clinical and basic research.

Admission

Applicants to graduate study in periodontics must have a D.D.S. or equivalent and must meet the admission requirements of the Graduate College. National Dental Board Examination scores, if available, are required. Interviews are encouraged but not mandatory.

Financial Support

Applicants must be financially prepared for uninterrupted studies.

Facilities

The department has 20 modern, well-equipped operatories devoted exclusively to periodontics. Hospital experience is available to students in the nearby University of Iowa Hospitals and Clinics and the Veterans Affairs Iowa City Health Care System.

Research facilities include collegiate laboratories in histology, microscopy, biomaterials, quantitation, tissue culture, molecular biology and biochemistry, and microbiology, as well as animal facilities. These collegiate facilities are in addition to those available by arrangement with University of Iowa Hospitals and Clinics, Eckstein Medical Research Building, Medical Laboratories, and the Veterans Affairs Iowa City Health Care System.

Professional Program

Programs in preventive, community, and geriatric dentistry are designed to increase D.D.S. students’ awareness of preventive dental practices, aspects of dental practices affected by community factors, and care of compromised adult patients.

Community dentistry programs give students opportunities to interact with health care teams and the public in Iowa and worldwide. The department conducts off-site community programs statewide, nation-wide, and worldwide. It also operates the Special Care Clinic, which is housed in the Dental Science Building.

Using the community dentistry programs as the classroom, D.D.S. students observe and participate in a variety of activities that nurture their awareness of the societal obligations they must assume in order to become effective practitioners.

Graduate Program

Master of Science

The Master of Science in dental public health requires 40 s.h. of course work and is designed to be completed in two academic years of full-time study. It prepares dentists and dental hygienists to be specialists in dental public health. The program emphasizes research and requires a research project culminating in the completion and defense of a thesis. Successful dentist graduates meet the educational requirements for eligibility for the certifying examination of the American Board of Dental Public Health.

Applicants must meet the admission requirements of the Graduate College.

Courses

For D.D.S. Students

111:116 Fundamentals of Clinical Dentistry 1 s.h.
Identification of health and disease in the mouth; practical methods of disease control; philosophy of preventive dentistry; patient assessment, clinical diagnosis.

111:117 Cariology and Preventive Therapies 2 s.h.
Multifactorial etiology of dental caries; support data for use of fluorides, sealants, antimicrobials, and plaque control mechanisms in prevention of caries. Prerequisite: 111:116.

111:118 Preventive Dentistry, Communication, and Patient Care 3 s.h.
Patient oral assessment, communication, patient management skills; oral hygiene instruction for collegiate recall patients; skills in instrumentation for detection, removal of calculus deposits. Prerequisite: 111:117.

111:145 Clinical Preventive Dentistry 0, 2 s.h.
Experience providing complete prophylaxis and preventive services for college patients; application of nutrition principles and communication skills in a clinic setting. Prerequisite: 111:118.

111:160 The Practice of Dentistry in the Community I 1-2 s.h.
Dental public health, history of dentistry, dental personnel, organized dentistry, professional issues, evaluation of scientific research.

111:161 The Practice of Dentistry in the Community II 1-2 s.h.
Factors that affect profession, practice of dentistry: legal and malpractice issues, supply and demand, types and practice organization, financing and quality of care.

111:185 Broadlawns Medical Center arr.
Experience providing dental care to low-income patients in a metropolitan hospital-based clinic; community-related assignments, on-call assignments in hospital, emergency department; student team experience in Des Moines.

111:186 Colorado Migrant Program arr.
Experience providing primary dental care and outreach services to a migrant population; broad understanding of needs, resources for migrant, low-socioeconomic populations.

Adjunct associate professor: Michael J. Lattner

Clinical associate professors: Robert J. Luebke, Jeffrey C. Markt

Assistant professors: Emad Estafanous, David G. Gratton, Yong-Joon Ko

Adjunct assistant professors: David R. Fritz, John W. Helscher

Clinical assistant professor: Lawrence R. Huber

Adjunct instructors: Frederick R. Drexler, Maria T. Locher-Claus

Graduate degree: M.S. in Oral Science

Graduate nondegree program: Certificate in Prosthodontics

Web site: http://www.dentistry.uiowa.edu

Prosthodontics is the dentistry specialty involving crowns, fixed partial dentures (bridges), removable partial dentures, complete dentures, maxillofacial prostheses, and implant prostheses.

Professional Program

The professional program provides D.D.S. students with the basic principles, practices, and concepts of prosthodontics required for the practice of general dentistry, through laboratory projects and treatment of patients with differing prosthodontic needs.

Graduate Programs

The department offers a Master of Science in oral science and a Certificate in Prosthodontics. The primary purpose of the M.S. program is to train and prepare dentists for careers in prosthodontic education and/or research. The certificate program is designed primarily for individuals who want to prepare for private practice in prosthodontics. Both programs require 34 months of study and satisfy the educational requirements for eligibility to take the American Board of Prosthodontics examination.

Master of Science

Students who wish to pursue a Master of Science in oral science enroll through the Graduate College. They must meet all the requirements for the master’s degree as outlined in the Manual of Rules and Regulations of the Graduate College.

Students complete a core curriculum, which includes basic sciences, research methodology, and a thesis based on the student’s original research, with the aid of an advisor and thesis committee. In addition, students are required to satisfactorily complete an oral and/or written examination on their thesis and on prosthodontics.

Certificate

The certificate program may provide more clinical experience than the M.S. program and does not require a thesis. Students must complete a core curriculum, which includes basic sciences, research methodology, and clinical practice—fixed, removable, maxillofacial, implant prosthodontics, and occlusion.

Admission

Applicants to either program must meet the admission requirements of the Graduate College. In addition, applicants must hold a D.D.S. or D.M.D. or a foreign equivalent. An interview may be requested. Both programs usually begin July 1. Application deadline is September 1 for the following July.

Courses

For D.D.S. Students

| 084:140     | Fixed Prosthodontic Lecture I 2 s.h.
|             | Basic biomechanical principles of fixed prosthodontics; metal, single-unit, multiple-unit fixed prostheses; diagnosis and treatment planning for the partially edentulous patient, including occlusion and esthetic concerns. |
| 084:141     | Fixed Prosthodontic Patient Simulation I 2 s.h.
|             | Laboratory exercises in fabrication of single-unit metal, provisional restorations; preparations for fabrication of a three-unit fixed partial denture. |
| 084:142     | Fixed Prosthodontics Lecture II and Removable Partial Denture Lecture 2 s.h.
|             | Principles, clinical steps, materials, and laboratory procedures necessary for fixed and removable partial dentures; lecture format. |
| 084:143     | Fixed Prosthodontics Lab II and Removable Partial Denture Lab 2 s.h.
|             | Participation in projects and seminars simulating the clinical and laboratory steps in fixed and removable partial denture fabrication. |
| 084:146     | Introduction to Implant Dentistry 2 s.h.
|             | Fundamental principles of osseointegration, diagnosis and treatment planning, surgical and prosthodontic protocols, laboratory communications introduced through patient simulation. |
| 084:160     | Prosthodontic Clinic arr.
|             | Experience supplemented by individual supervision, demonstration. |
| 084:165     | Prosthodontic Seminar 2 s.h.
|             | Knowledge in biological, basic sciences and technique applied to clinical fixed and removable prosthodontics procedures. |
|             | **For Graduate Students** |
| 084:220     | Fixed Prosthodontics Literature Review I arr.
|             | Fixed prosthodontic procedures; assigned readings, discussion of related research. |
| 084:221     | Fixed Prosthodontics Literature Review II arr.
|             | Porcelain-fused-to-metal and ceramic restorations, color science and esthetics; assigned readings, discussion of related research. |
| 084:222     | Implant Literature Review arr.
|             | Implant prosthodontics; assigned readings, discussion of related research. |
| 084:223     | Occlusion Seminar arr.
|             | Occlusion and the temporomandibular system; assigned readings and discussion of related research. |
| 084:224     | Graduate Restorative Materials 2 s.h.
|             | Dental materials science: mechanical, physical, and chemical properties of restorative materials; selection and manipulation. Same as 082:224. |
| 084:225     | Complete Denture Literature Review arr.
|             | Complete denture prosthodontics; assigned readings, discussion of related research. |
| 084:226     | RPD Literature Review arr.
|             | Removable partial denture prosthodontics; assigned readings, discussion of related research. |
| 084:231     | Thesis Preparation: Prosthodontics 3 s.h.
|             | Thesis preparation, defense. |
| 084:300     | Prosthodontic Certificate Program 0 s.h.
|             | Advanced dental clinical, didactic education; nondegree program toward eligibility for board certification in prosthodontics. |
The nation’s first university-level professorial chair in education was established at The University of Iowa in 1872. The department became the School of Education in 1907; and the College of Education, structured largely as it is today, was founded in 1913. Since then, the college’s growth has mirrored the growth of the University.

Over the years, College of Education faculty members have been leaders in a variety of educational fields. Particularly noteworthy have been their contributions in the fields of educational testing and measurement. These contributions helped lay the foundation for today’s testing and measurement industry, making Iowa City one of the best-known centers for this educational specialty.

The college has four departments: Counseling, Rehabilitation, and Student Development; Educational Policy and Leadership Studies; Psychological and Quantitative Foundations; and Teaching and Learning.

Teacher Education Programs

The College of Education at The University of Iowa offers two major teacher preparation programs based on baccalaureate degrees. Elementary education is a College of Liberal Arts and Sciences major leading to either a Bachelor of Arts or a Bachelor of Science degree. The secondary education programs combine a specific liberal arts and sciences academic major with teacher preparation course work leading to a Bachelor of Arts or a Bachelor of Science degree.

The college also provides numerous specialized elementary and secondary teaching endorsement programs.

Preparation for special education teaching is offered primarily at the graduate level. In addition, an undergraduate instructional strategist program is available for elementary education students admitted to this program. A limited number of undergraduate special
education courses are open to all students who are interested in this area, to those from other Teacher Education Programs, and to those planning to pursue graduate degrees in special education.

Undergraduate students admitted to a Teacher Education Program (TEP) must complete all College of Liberal Arts and Sciences General Education Program requirements for the Bachelor of Arts or Bachelor of Science. The quantitative or formal reasoning component must be satisfied with a college-level mathematics course.

The Office of Teacher Education and Student Services provides information on Teacher Education Programs; offers assistance with admission, student field experiences, and teacher licensure/certification; and serves as a liaison with other University units and external agencies. For more information, visit the office’s web site (http://www.education.uiowa.edu/tess).

Undergraduate Admission to Teacher Education Programs

Undergraduate applicants to The University of Iowa who wish to become teachers indicate their interest in the elementary major or a specific secondary-level teaching endorsement program on their application for admission. This results in an “Elementary Interest” (7EP) or a “Secondary Interest” (7SP) notation on the student’s official records. Application materials are available from the Office of Teacher Education and Student Services or on the office’s web site.

Acceptance to a Teacher Education Program is prerequisite to registration for most College of Education undergraduate courses.

Application Deadlines

Application deadlines for all Teacher Education Programs are as follows.

Summer session and fall semester: March 15
Spring semester: October 15
Late applications are not accepted.

General Requirements

Admission to Teacher Education Programs is competitive. Admission requirements may vary by program area. Faculty members in each program area review and select students to be admitted to their program. In order to be considered for admission to a Teacher Education Program, an undergraduate student must satisfy the following requirements:

- admission to The University of Iowa;
- completion of 40 s.h. of college-level work before application to the Teacher Education Program;
- a g.p.a. of at least 2.70 on all college course work as well as course work completed at The University of Iowa;
- application for admission to a Teacher Education Program [includes a criminal check waiver];
- submission of PRAXIS I test scores that meet the minimum score requirements; and
- verification of having completed a 10-hour voluntary experience in a K-12 regular classroom setting.

Postbaccalaureate or Graduate Admission

Students who have completed a baccalaureate degree may be admitted to a teacher preparation program as graduate students or as postbaccalaureate students with senior standing. They may apply to the Graduate College and state their objective as “certification only.” In some programs they may apply for a master’s degree objective, either a Master of Arts in Teaching (M.A.T), or in selected majors, a Master of Arts (M.A.). Students who choose to pursue a graduate-level teacher preparation program must satisfy the following requirements:

- eligibility for admission to the Graduate College;
- submission of an official Graduate Record Examination (GRE) General Test score report, with scores that meet the minimum score requirements; and
- a g.p.a. of at least 3.00 on all previous college course work.

They also must apply to the appropriate Teacher Education Program, following the graduate admission procedure, and must meet the general requirements for graduate admission; see Graduate and Professional Admissions on the Office of Admissions web site (http://www.uiowa.edu/admissions).

Students also may apply to the College of Liberal Arts and Sciences as postbaccalaureate students with senior standing. Students who choose this
option must apply to the appropriate Teacher Education Program, following the undergraduate admissions procedure, and must meet the general requirements for undergraduate admission; see Undergraduate Admissions on the Office of Admissions web site (http://www.uiowa.edu/admissions).

Application deadlines for graduate students and postbaccalaureate students with senior standing are March 15 and October 15.

TEP Standards and Policies

Students in the Teacher Education Program must meet grade-point average requirements each semester. Students who do not meet the requirements are placed on probation; those who fail to meet the requirements in a successive semester may be removed from the Teacher Education Program or denied admission to student teaching. For more information on standards and policies, consult the Office of Teacher Education and Student Services.

Electronic Portfolio

Students in the Teacher Education Program document their achievement of professional standards on ePortfolio, a web-based program in which they collect instructional artifacts and performances assigned in all their courses. Students receive instruction on the ePortfolio requirement beginning with the required course 07E:102/07S:102 Technology in the Classroom.

Student Teaching

The final phase of the Teacher Education Program is the professional semester, devoted to supervised student teaching and directed observation in a variety of situations. Faculty members, professional staff, and advanced graduate students who are experienced teachers serve as supervisors.

Periodic seminars provide for discussion and evaluation of student teachers’ experiences. The student teaching requirement may not be met by transfer credit except under unusual circumstances and with advance approval.

To be admitted to the student teaching semester, students must submit a separate application to the Office of Teacher Education and Student Services in the College of Education. All course work in education, for the major, and for the degree must be completed before the student teaching semester. Applications are submitted during the calendar year before the student teaching semester. The deadline is November 15 for students planning to student teach the following fall semester and February 15 for students planning to student teach the following spring semester.

Admission to student teaching requires program area faculty approval as well as verification of satisfactory progress in meeting both College of Education professionalism standards and program area standards, which are set at the time of admission to the TEP. In some programs, standards are higher than the college’s required g.p.a. of at least 2.70. Students should consult with their advisors regarding specific requirements for the program areas.

For more information, contact the Office of Student Field Experiences.

Waivers

Students who have completed courses that they wish to substitute for program requirements should consult with their advisors.

Urban Student Teaching

Students who want to advance their educational interests through student teaching in an urban setting may apply through the Office of Student Field Experiences. The urban districts include Clark County, Nevada (Las Vegas area); Chicago Public Schools; Adams County School Districts (Denver area); Aldine, Texas (Houston area); and Rialto, California (Los Angeles area). These options are open to all education majors who meet the requirements established for these student teaching sites. For more information about this and other programs, contact the Office of Student Field Experiences.

International Student Teaching

International student teaching experiences are available primarily through the Foundation for International Education. Sites include Australia; China; Costa Rica; England and Wales; India; Ireland; Kenya; New Zealand; Scotland; Russian Federation; and Spain.

Interested students must meet the regular requirements for student teaching and must have the approval of their advisor and the appropriate program coordinator. In most locations, students are assisted with housing by the on-site coordinator.

International assignments are for eight weeks. Students complete an eight-week assignment in a
stateside placement followed by an eight-week assignment in an international placement. Secondary education students in some program areas (for instance, English education) are required to complete a full semester of student teaching in the United States before student teaching at an international site.

For more information about international student teaching opportunities, contact the Office of Teacher Education and Student Services.

**Teacher Licensure/Certification**

The Iowa Board of Educational Examiners issues teacher, support service, and administrator licenses on the recommendation of Iowa colleges and universities whose programs have been approved by the Iowa Department of Education. All University of Iowa preparation programs have Iowa Department of Education approval.

Licensure/certification requirements across the nation are subject to change. Students who plan to seek employment in a state other than Iowa should make every effort to be informed about current requirements in that state. Many states require some type of competency testing. Generally, students who apply out-of-state should first secure Iowa licensure.

To be recommended by The University of Iowa, applicants must complete all requirements of the appropriate approved program. A minimum of 20 s.h. of course work applied to meet program requirements must be earned at The University of Iowa. Fingerprinting is required for all new applicants for Iowa licensure; the State of Iowa has outlined specific procedures for the fingerprinting process.

A passing PRAXIS II score for the elementary content test is required for all students seeking elementary licensure in Iowa and for satisfaction of an approved Teacher Education Program. No test is currently required for secondary or K-12 Iowa licensure applicants.

The College of Education Office of Teacher Education and Student Services provides Iowa application forms, fingerprinting procedures, and licensure/certification assistance to all students completing approved programs offered by the college. It also provides assistance to individuals interested in adding endorsements to their Iowa license based on completion of State of Iowa minimum licensure requirements.

**State Requirements**

All students seeking an Iowa teaching license must complete a course in human relations and mainstreaming for exceptional learners. These requirements can be met by completing 07B:180 Human Relations for the Classroom Teacher and 07U:100 Foundations of Special Education. Human relations courses offered through community colleges are not accepted. In the State of Iowa, applicants must be at least 21 years old to be granted a teaching license. Applicants who have been found guilty of a felony are barred from receiving an Iowa teaching license. Appeals may be filed directly with the Iowa Board of Educational Examiners.

**Undergraduate Programs**

**Honors in Education**

The College of Education Honors Opportunity Program is open to sophomores, juniors, and seniors who have maintained a g.p.a. of at least 3.50. Students with lower grade-point averages who have demonstrated research potential also may be accepted based on the recommendations of faculty members and the education honors advisor. Honors Opportunities Program students must take 07X:100 Honors Seminar in Education and 07X:101 Senior Honors Project. Successful completion of the program results in an honors designation on the diploma. The Honors Opportunities Program is housed in and administered by the Connie Belin and Jacqueline N. Blank International Center for Gifted Education and Talent Development.

**Minors**

The College of Education offers two minors, one in educational psychology and one in human relations, for students who wish to be better informed about education. The minors may help support students’ future career objectives and help students prepare to be better informed as parents, as taxpayers, or as future members of local boards of education. Contact the Office of Teacher Education and Student Services for more information about the minors.

**Graduate Programs**

Graduate study in the College of Education is guided by the policies of the Graduate College, with additional requirements set by College of
Education faculty members. Graduate students in education register in the Graduate College and receive their degrees from that college. See the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

Graduate programs are available in the following areas of study.

**COUNSELING, REHABILITATION, AND STUDENT DEVELOPMENT**

M.A., Ph.D.
Counselor Education and Supervision—Ph.D.
Rehabilitation Counseling—M.A., Ph.D.
School Counseling—M.A.
Student Affairs Administration and Research—Ph.D.
Student Development in Postsecondary Education—M.A.

**EDUCATIONAL POLICY AND LEADERSHIP STUDIES**

M.A., Ed.S., Ph.D.
Educational Administration—M.A., Ed.S., Ph.D.
Higher Education—M.A., Ed.S., Ph.D.
Social Foundations of Education—M.A., Ph.D.
Special Education Administration—Ed.S.
Student Affairs Administration and Research—Ph.D.

**PSYCHOLOGICAL AND QUANTITATIVE FOUNDATIONS**

M.A., Ed.S., Ph.D.
Counseling Psychology—Ph.D.
Educational Measurement and Statistics—M.A., Ph.D.
Educational Psychology—M.A., Ph.D.
School Psychology—Ed.S., Ph.D.

**TEACHING AND LEARNING**

M.A.T., M.A., M.S., Ph.D.
Art Education—Ph.D.
Curriculum and Supervision—M.A., Ph.D.
Developmental Reading—M.A.
Elementary Education—M.A., Ph.D.
English Education—M.A.T., M.A.
Foreign Language Education—M.A.T., M.A.
Foreign Language and English as a Second Language—Ph.D.
Language, Literacy, and Culture—Ph.D.
Mathematics Education—M.A., Ph.D.
Science Education—M.S., M.A.T., Ph.D.
Social Studies Education—M.A., Ph.D.
Special Education—M.A., Ph.D.

**Master of Arts in Teaching**

The M.A.T. program is designed for academically superior liberal arts and sciences graduates who completed few or no professional education courses in their undergraduate program. It is a nonthesis program with requirements that range from 45 to 67 s.h. See Teaching and Learning in the Catalog.

The program leads to a master’s degree and licensure as a secondary teacher in the fields of English, foreign languages, and science education. Admission to the program requires a g.p.a. of at least 3.00 in undergraduate course work. The program includes 18 s.h. of graduate course work in the student’s teaching field. Students must complete a minimum of 20 s.h. of graduate work in education to satisfy licensure requirements.

A Master of Arts program with a secondary education major in social studies leads to initial teacher licensure. See “M.A. in Social Studies Education”/“Program B Requirements” in the Teaching and Learning section of the Catalog.

**Master of Arts**

The College of Education offers an M.A. with or without thesis. The nonthesis program usually provides more specialized course work than does the thesis program. Although the nonthesis program is not necessarily a terminal program, students who expect to continue their studies in a doctoral program are urged to select the M.A. thesis program since it offers more experience in research procedures. Students who complete a nonthesis M.A. and are admitted to a Ph.D. program may be asked to submit evidence of writing and research skills to their advisor or department during the early part of their doctoral program. For information about programs that offer a thesis option, see the program descriptions under “Graduate Programs” in College of Education department sections of the Catalog.

Course credit earned more than 10 years before the session in which the degree is to be conferred do not count toward requirements for any master's degree. Students must earn at least 24 s.h. in University of Iowa courses after formal admission to a master's degree, and they must complete at least 8 s.h. on campus.

**Master of Science**

Thesis and nonthesis programs are available for M.S. students in science education. The degree requirements are similar to those for a Master of Arts.
Specialist in Education

The Ed.S. is granted upon completion of a prescribed two-year postbaccalaureate program designed for students preparing for professional work in fields such as administration and supervision, and special services. Of the minimum 60 s.h. required for the degree, 28 s.h. must be in the specialization area; the rest may be earned in cognate fields, supervised experience, research, and elective courses. The research must culminate in a written report.

Other requirements for the Ed.S. are the same as for the master’s degree, except that an Ed.S. requires students to complete 15 s.h. of resident work on campus in one 12-month period or in two summer sessions. Course work completed 10 years before the final examination must be evaluated to determine the amount of credit that may be accepted toward program requirements.

Doctor of Philosophy

The Ph.D. is the most advanced academic degree. It is conferred upon students who have demonstrated superior scholarship and mastery of research skills in course work as well as in the preparation and defense of a dissertation.

Professional Improvement

Some students are admitted to professional improvement status in a College of Education department rather than to degree candidacy. This option is appropriate only for persons who wish to update their knowledge or who are temporarily undecided about career plans. Students should file a change of status stating a specific program objective at the earliest opportunity.

Extramural Education

Through the Division of Continuing Education, selected College of Education courses are offered at off-campus sites and hours outside the traditional schedule. If taken after formal admission to a specific program, some of these courses may be applied to meet residency requirements for degrees.

Special regulations govern such course work. Students should obtain prior approval from their program advisor before registering in extramural courses. Students not regularly admitted to The University of Iowa also may register in extramural courses, but credit earned before admission does not count toward residency requirements.

Support Units and Resources

Advanced Studies in Measurement and Assessment Center

The Center for Advanced Studies in Measurement and Assessment (CASMA) pursues interdisciplinary research initiatives that advance the methods and practice of educational measurement and assessment. CASMA’s aim is to be a premier interdisciplinary center that performs, promotes, fosters, and disseminates high-quality research in measurement and assessment. CASMA devotes considerable resources to development of open-source computer programs for equating scores on tests.

Every other year, CASMA co-sponsors a national conference on current challenges in educational testing. Periodically, the center’s staff produces research reports that are available on CASMA’s web site (http://www.education.uiowa.edu/casma). Recent reports have discussed topics in generalizability theory, institutional selectivity in undergraduate education, revolutions and evolutions in educational testing, decision consistency with complex assessments, and equating models.

Assistive Technology Education and Research Center

The Iowa Center for Assistive Technology Education and Research (ICATER) helps to ensure equal access and opportunities for persons with disabilities by advancing assistive technology through research, education, and service. The center collaborates with University and community programs to provide technical assistance that enhances the services and resources available to educators, service providers, and persons with disabilities. It also sponsors workshops and education programs. The center’s assistive technology laboratory is available for student use, demonstrations, consultations, and research.
Belin-Blank Center for Gifted Education

The Connie Belin and Jacqueline N. Blank International Center for Gifted Education and Talent Development conducts research, training, and service in gifted education. It also gathers and disseminates information on the education of gifted students.

The center is located in the Blank Honors Center. Its programs and services include the Belin-Blank Fellowship Program in Gifted Education; the Honors Opportunity Program; Invent Iowa; the Henry B. and Jocelyn Wallace National Research Symposium on Talent Development; the Wallace Assessment and Counseling Clinic; practicum and internship experiences; course work in gifted education (including state endorsement); academic talent searches for students in grades 2-9; a number of precollege programs for gifted students in grades 2-12; and programs for international students. The center also administers the Iowa Online Advanced Placement Academy.

The Belin-Blank center administers two University-level student programs: the Iowa Talent Project, developed for minority students from gifted programs in Des Moines, Iowa; and the National Academy of Arts, Sciences, and Engineering, a highly selective early-entrance program for students who have completed their junior year in high school.

The center also provides practicum and internship experiences for undergraduate and graduate students and coordinates course work for the Iowa Talented and Gifted Endorsement.

The Belin-Blank center houses the Institute of Research and Policy on Acceleration (IRPA), which is dedicated to the study of curricular acceleration for academically talented children.

For more information, contact the Belin-Blank Center for Gifted Education and Talent Development or visit its web site (http://www.education.uiowa.edu/belinblank).

Curriculum Resources Laboratory

The Curriculum Resources Laboratory provides a large collection of circulating classroom materials for students and faculty members interested in early childhood, elementary, secondary, and special education. The collection includes books for children and young adults, K-12 textbooks, curriculum guides and activity books, and nonprint materials such as DVDs, CD-ROMs, CDs, games, pictures, kits, and manipulatives. Access to the online catalog is available at http://www.education.uiowa.edu/curr.

Educational Placement

The Educational Placement Office helps students and alumni pursuing careers in teaching, research, and education leadership. The office’s professional staff is available for individual conferences with students to critique a résumé or curriculum vitae, discuss job search strategies, or assist with other career matters. Workshops, seminars, and special programs related to educational employment and the job search are offered regularly. University of Iowa students and alumni can establish a placement file consisting of letters of recommendation to be submitted to potential employers in support of employment applications.

Current information about services and career resources is available through the office’s web site (http://www.education.uiowa.edu/edplac). The site provides links to information about employment opportunities in schools, colleges, and related organizations. It also provides job search assistance, including curriculum vitae, résumé, and letter writing tips and samples; preparation for the job search; sample interview questions; portfolio examples; and employer advice for educators seeking jobs in K-12 environments, college and university settings, and in international locations.

Education Technology Center

The Education Technology Center (ETC) provides computer services to College of Education faculty, staff, and students. The ETC offers technical assistance to faculty and staff and maintains all computers in the college. Students use ETC lab facilities to work on assignments and to conduct research. The center maintains four...
student computer labs, three of which are suitable for a classroom environment.

The Education Technology Center provides a variety of application software as well as World Wide Web and multimedia production tools. Faculty and staff members and students may check out digital cameras, computer projectors, wireless laptops, and other AV equipment. The ETC also provides assistive technologies for College of Education students with disabilities.

The ETC’s ePortfolio Support Center guides faculty and students on the creation of electronic portfolios. Center staff members consult with the faculty on identifying and linking classroom work to adopted College of Education standards. They also help students produce and upload compliant web-based ePortfolios.

The ETC partners with the University’s Information Technology Services to maintain a video lab facility used for professional video production. ETC staff members help faculty members produce online course materials and support staff members who maintain the college’s web site. ETC also manages the Iowa Communications Network fiber-optic classroom located in the College of Education.

Evaluation and Assessment Center

The Center for Evaluation and Assessment conducts evaluations, research studies, and professional development initiatives. The center’s mission is to improve the quality of evaluation theory and practice, promote the sound use of assessment results, provide high-quality evaluation theory and practice; promote the sound use of assessment results; provide high-quality training activities for graduate students, contribute to research on program evaluation and assessment, and provide high-quality services to clients.

The center is a resource for University faculty members, school systems, other organizations in Iowa and nationwide, educational policy makers, and others who use assessments to make important decisions regarding individuals or organizations. Services provided by the center include consultation on evaluation and assessment design, data collection, and data analysis techniques. The center also conducts program evaluations, research studies, applied measurement investigations, and metaevaluations.

Center activities include program and project evaluations in a broad range of areas (e.g., minority recruitment and retention; educational project and curriculum evaluation; professional development; learning communities, especially in health care educational settings; delivery of social and human services; postsecondary curriculum and professional training in engineering, technology, and health care; and the impact of public policy on PK-12 education). The center also has developed and implemented professional development programming related to evaluation design and decision making and the use of assessments in K-12 education.

Iowa Testing Programs

Iowa Testing Programs provides assessment expertise to schools in the State of Iowa. Its faculty and staff develop standardized educational tests, such as the widely used Iowa Tests of Basic Skills and Iowa Tests of Educational Development, for use in elementary and secondary schools, as well as other assessment tools to support instruction and learning. Iowa Testing Programs also conducts research studies in educational measurement and evaluation, publishes the results of these studies, sponsors lectures and symposia, provides consulting services to school systems, and provides training experience for graduate students in evaluation and measurement.

Libraries

The University’s Main Library and the Psychology Library provide books, periodicals, reference works, videos, ERIC microfiche, tests, and a reserved book room for students and faculty.

REACH Program

The University of Iowa’s REACH (Realizing Educational and Career Hopes) is a two-year postsecondary certificate program that focuses on meeting transitional needs of students with multiple learning difficulties (MLD) in an inclusive university setting. The program emphasizes life skills for independent living and features learning in small groups coupled with career coaching in real work settings. Courses on academic skill building, career preparation, life skills, and socialization are taught by faculty members from the College of Education and other academic units on campus. Career field placements also are offered.

Support services are available to promote student success in all educational and career settings.
REACH students live in a University of Iowa residence hall, where they receive support from specially trained resident assistants enrolled in College of Education graduate programs. A fully inclusive college environment provides students with age-appropriate community opportunities and interactions with other University of Iowa students.

For more information, consult the REACH web site (http://www.education.uiowa.edu/reach/).

Research on Undergraduate Education Center

The Center for Research on Undergraduate Education (CRUE) is dedicated to the study of undergraduate education in America, from how academic and social experiences affect students to the methods schools use to improve students’ chances for success in the classroom and beyond graduation. CRUE brings a methodologically balanced approach to the study of undergraduate education.

Research Support

The College of Education dean’s office, through the Grant and Research Services Center (GRSC), provides grant and research-related support services for the college’s faculty, staff, and students. GRSC staff members help identify internal and external funding sources, prepare and submit grant proposals and application materials, provide grant accounting services, and help in the preparation of applications for Human Subjects/Institutional Research Board review. The college also provides limited funds for faculty research, professional development, and travel.

Teacher Education and Student Services

The Office of Teacher Education and Student Services assists students, faculty, staff, and the general public in graduate and undergraduate admission, Graduate College examinations, student field experiences, and teacher licensure/certification. It also serves as a liaison with other University units, including the Graduate College, the College of Liberal Arts and Sciences, the Office of Admissions, and the Office of the Registrar, and with external agencies, including the Iowa Department of Education, out-of-state teacher licensure/certification departments, and school district personnel in Iowa and outside of the state.

A variety of application and information materials are available at the office and on the office’s web site (http://www.education.uiowa.edu/tess).

Financial Support

Students interested in employment opportunities in the college’s support units and special resources should contact the director of each facility and indicate their interests, their academic and experience records, and their career or degree goals at The University of Iowa. Some assistantships are listed in a reference available from the Office of Teacher Education and Student Services.

Graduate Assistantships

Individual academic programs provide opportunities for teaching, research, or service assistantships as well as for fellowships and related employment opportunities. Inquiries should be addressed to the chair of the department or the director of the program in which the student believes he or she can provide service or achieve an outstanding academic record. Assistantship appointments are usually, but not always, made by the program area.

Special Graduate Assistantships in Education

The Iowa Testing Programs provides funds to support a limited number of special graduate assistantships in education, in which students do research work under the direction of a faculty member of their choice. Students must be enrolled for at least 6 s.h. but not more than 12 s.h. per semester; assistantships are for the academic year and are renewable for a limited number of years. Students admitted to or pursuing any advanced degree program offered by the College of Education are eligible to apply, provided they are committed to a professional career in the United States.

Candidates must submit transcripts of all completed college work (undergraduate and graduate), recommendation forms specific to the assistantship, and scores on the Graduate Record Examination (GRE) General Test. For assistantship application forms, contact the Iowa Testing Programs director. Application deadline is late February.

Student Financial Aid

Several scholarships are available to students for their student teaching semester. The scholarships include...
are based on need, grade-point average, and future plans for teaching.

Scholarships are available each year for experienced teachers who are working toward licensure or an advanced degree in educational administration. The scholarships are based on the student’s record as an effective teacher and promise as a school administrator; students must have completed four years of teaching experience and must be planning to work as elementary or secondary administrators.

Scholarships and awards are based on available funding.

For more information, see College of Education Scholarships and Awards on the college’s website (http://www.education.uiowa.edu/scholarships). For application forms, contact the administrative assistant in the College of Education Office of the Dean.

College of Education Awards

Awards are presented to outstanding students in the College of Education at a spring semester ceremony.

The Duane D. Anderson Scholarship is awarded to a transfer student from an Iowa community college who is enrolled in a College of Education program. The award is based on promise and need.

The Jack Bagford Elementary Education Award is presented to an outstanding elementary education student who is an Iowa resident. The student should be scheduled to do student teaching the academic year following the award.

The David and Connie Belin Honors Award is for graduating seniors in the Teacher Education Program who have completed all requirements for the Honors Opportunity Program.

The Blommers-Hieronymus-Feldt Fellowship is awarded to a doctoral student in the field of educational measurement and statistics; nominees must have completed at least one full year in the graduate program at The University of Iowa. The award is based on academic performance in graduate course work and professional promise in measurement and statistics; it supplements the recipient’s teaching or research assistantship each year until graduation, to a maximum of two years.

Barry Bratton Award for Achievement in Design of Instructional Processes is given to an outstanding student who has completed course work that reflects a commitment to the systematic design and improvement of instructional processes and materials.

The Debra Clausen Memorial Award is given to a qualified undergraduate or graduate student who will work at the Center for Disabilities and Development to evaluate and develop learning programs for students with mental disabilities, including Down Syndrome.

The T. Anne Cleary Psychological Research Scholarship is awarded to an outstanding doctoral student engaged in research on the psychological or quantitative foundations of education. The award may be presented to one international student and one permanent resident of the United States each year.

The John Leonard Davies Memorial Award is given to an outstanding graduate student majoring in education whose specialization is adult and continuing education.

The Harvey H. Davis Award is given to an outstanding candidate for an advanced degree in higher education or educational administration, particularly a student interested in the financing of education.

The Terry Ganshaw Memorial Award is given to an outstanding Ph.D. student in college student personnel.

The Emma Bauman Holmes Education Scholarship is awarded to an outstanding student in any undergraduate or graduate College of Education program who is in the top 20 percent of his or her class.

The Albert Hood Promising Scholar Award is given to an outstanding student in the Department of Counseling, Rehabilitation, and Student Development who is in the process of developing a prospectus for master’s or doctoral research. The award is based on academic performance, quality of the research proposal, the research’s likely impact, and the student’s service to the program and the University.

The Howard R. Jones Achievement Award is given to an outstanding graduate student who has made a noteworthy scholarly presentation at a national professional conference or has published a significant scholarly article in a reputable professional journal or other substantial printed work.

Loetscher Science Education Scholarship is awarded to a student in secondary science education, with preference given to those pursuing a chemistry emphasis.
The Perry Eugene McClenahan Award is given to the outstanding candidate for an advanced degree in educational administration.

The Leonard A. Miller Memorial Award is given to an outstanding first-year M.A. student majoring in rehabilitation counseling.

Minority Student Award is given to an outstanding College of Education undergraduate or graduate minority student who works with equity issues in the college and has made positive contributions to the life of the college.

The Melvin R. Novick Award is presented to a third- or fourth-year student enrolled in the doctoral program in educational measurement and statistics who has shown outstanding academic performance and promise of the highest level of achievement in research in this field.

Paul Opstad Scholarship is awarded to a graduate student in the College of Education whose career or scholarly interests focus on the concerns and needs of international students. The scholarship is based on academic performance and commitment to working with international students.

Guy and Gladys Peterson Award is given to an outstanding student who has been admitted to and has completed at least 12 s.h. of course work in the Teacher Education Program.

Pi Lambda Theta Awards—Senior, M.A., and Ph.D. levels are given to outstanding students of high scholarship who show promise in the professional areas of research, teaching, or writing and who exhibit striking personal qualities.

The Betty Piercy Scholarship Award is given to an outstanding student in reading who is expected to benefit the field in some direct way.

The John E. Quinn Memorial Scholarship is awarded to an outstanding undergraduate liberal arts student from eastern Iowa who has been admitted to the Teacher Education Program and is pursuing secondary school teaching licensure in history.

The Rolland Ray Dissertation Fellowship is awarded to a doctoral student in the Department of Teaching and Learning whose dissertation addresses the measurement of educational objectives.

The Lloyd Smith Scholarship is awarded to an outstanding student in elementary social studies.

The Franklin Stone International Student Award is given to an outstanding international student pursuing a Ph.D. in education.

The James and Coretta Stroud Fellowship for Doctoral Study in Educational Psychology, Measurement, or Statistics is awarded to an outstanding graduate student in the Department of Psychological and Quantitative Foundations who is entering the dissertation phase of study.

The Edgar M. and Evelyn Benzler Tanruther Scholarship is awarded to an outstanding graduate student in elementary education.

The U-High Innovative Developments in Education Award is given to students who have completed or will complete student teaching during the school year. The award is based on outstanding performance as a student teacher, particularly for innovation and creativity shown during the experience.

The Erwin and Louise Wasta International Scholarship is awarded to an international student enrolled in a College of Education program. The award is based on promise and need.

For more information, see College of Education Scholarships and Awards on the College’s website (http://www.education.uiowa.edu/scholarships).

Faculty

All tenure-track faculty members hold earned doctorates in their teaching fields, and many have had teaching or administrative experience in the public schools. Several hold joint appointments in the College of Liberal Arts and Sciences.

Interdepartmental Courses

07X:029 First-Year Seminar 1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Prerequisite: first- or second-semester standing.

07X:100 Honors Seminar in Education 1 s.h.
Research in education and related professions in collaboration with a College of Education faculty member of student’s choice; preparation for senior honors project.

07X:101 Senior Honors Project 1-2 s.h.
Collaboration with a faculty member on research project; written report. Prerequisite: 07X:100.
The Department of Counseling, Rehabilitation, and Student Development generates and disseminates knowledge, develops skills, and promotes attitudes about effective professional practices that foster human development across the life span. The department prepares practitioners and scholars primarily at the graduate level, through degree programs in counselor education and supervision, rehabilitation counseling, rehabilitation counselor education, school counseling, and student affairs. It also offers basic courses in interviewing and interpersonal skills for students in other professional and graduate programs.

Upon completing a degree in the department, students are evaluated and are expected to have awareness, knowledge, and skills in these areas:

- current definitions, professional standards, and appropriate professional practices regarding multiculturalism;
- what it means to be a multiculturally competent helping professional;
- integration of feedback into practice and professionalism in interpersonal interactions;
- personal limitations and strengths that could ultimately support or harm a client or student;
- a personal plan for future practice in the field regarding multicultural relationships.

Prospective students must meet admission requirements for the individual programs as well as the department’s general admission requirements (see “Admission” later in this section).

Student Affairs

The department offers a Master of Arts in student development in postsecondary education and a Doctor of Philosophy in student affairs administration and research.

M.A. in Student Development in Postsecondary Education

The Master of Arts emphasizes theory and practice. It prepares students for a wide variety of entry- and mid-level positions in colleges and universities, including admissions and orientation, student activities, career planning, academic planning, residence halls, international student programs and advising, and community college counseling. M.A. students are required to pass written comprehensive examinations. A thesis is optional.

The program is accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP).

ADMISSION

Applicants who meet the following criteria are given preference for admission: an undergraduate g.p.a. of at least 3.00, significant undergraduate leadership experience, writing ability, and fit with the program.
The admissions committee considers each applicant’s entire application portfolio. Personal interviews are encouraged and may be required. All applications must include complete application forms; three letters of reference and/or completed recommendation forms; a written statement of goals, interests, and experiences relevant to graduate study in student development at The University of Iowa; official Graduate Record Exam (GRE) General Test scores; and official transcripts for previous postsecondary course work.

Applications are considered for fall semester and are due by February 1. Applicants who submit their materials by February 1 receive preference for fellowship and assistantship opportunities.

Campus visit days, held each March and/or April, give admitted M.A. applicants the opportunity to interview for assistantships and meet current students. Prospective students also may arrange campus visits at other times.

**REQUIREMENTS**

The M.A. in student development and postsecondary education requires 48 s.h. of graduate credit. It is designed for two years of full-time study (9-12 s.h. per semester), although some students study part-time toward the degree.

The curriculum is based on theories of student learning and development; theories of organization and administration; knowledge of higher education contexts; research on college students, student affairs, and higher education; counseling and helping skills; student affairs administration; and connections among research, theories, and practice.

**Experiential Components**

The program requires a practicum and an internship. This experiential course work provides professional development experiences for the program’s students. Practical experiences include developmental work with individual students; program planning, implementation, and evaluation; administration and supervision; exposure to diverse clientele; use of assessment and evaluation tools; familiarity with electronic technologies for communication and teaching; and application of ethical guidelines.

M.A. students must complete at least one eight-hour-per-week practicum in a student services office, usually during the second semester of the first year. An M.A. site supervisor and program faculty members supervise the practicum, which includes a weekly seminar (07C:333 Practicum in Student Services).

After successfully completing the practicum, students are eligible to begin a required internship in an approved student services site. The internship helps students integrate theory and standards into practice and develop a professional identity in the field. Interns must complete 600 clock hours under the supervision of an M.A. supervisor. Most students complete this requirement in half-time graduate assistantships over two semesters during the second year. Regular evaluations are required. Students meet weekly with their classmates and faculty supervisor in 07C:363 Capstone Seminar in Student Services.

In addition to practicums and internships on campus, there are field site opportunities at several nearby colleges. Cornell College, Mount Mercy College, Coe College, and Kirkwood Community College are within a 20-mile drive from Iowa City. Grinnell College, Saint Ambrose University, Muscatine Community College, and Iowa Wesleyan College are within a 90-minute drive.

**Sample Course Schedule**

First year, fall semester:
- 07C:278 Applied Microcounseling 3 s.h.
- 07C:330 Introduction to Student Services 3 s.h.
- 07C:331 College Students and Their Environments 3 s.h.
- 07C:334 College Student Learning and Cognitive Development 3 s.h.

First year, spring semester:
- 07C:203 Career Development 3 s.h.
- 07C:250 Multiculturalism in the Helping Professions 3 s.h.
- 07C:333 Practicum in Student Services 3 s.h.
- One elective 3 s.h.

Second year, fall semester:
- 07B:206 Research Process and Design 3 s.h.
- 07C:335 Administration of Student Services 3 s.h.
- 07C:363 Capstone Seminar in Student Services 3 s.h.

Second year, spring semester:
- 07B:100 Issues and Policies in Higher Education 3 s.h.
- 07C:332 College Student Psychosocial and Identity Development 3 s.h.
- 07C:363 Capstone Seminar in Student Services 3 s.h.
- Electives 3-6 s.h.
Ph.D. in Student Affairs Administration and Research

The interdepartmental Doctor of Philosophy in student affairs administration and research is offered by the Department of Counseling, Rehabilitation, and Student Development and the Department of Educational Policy and Leadership Studies. The program provides in-depth preparation for leadership positions in student affairs administration, graduate student affairs preparation programs, and/or research about college students and student affairs practice.

ADMISSION

Applicants who meet the following criteria are given preference for admission: a master’s degree in student personnel, higher education, counselor education, or a related field; an undergraduate or graduate g.p.a. of at least 3.00; significant work experience in student affairs, community organizations, or successful related work; writing ability; and fit with the program.

The admissions committee considers each applicant’s entire application portfolio. Personal interviews are encouraged and may be required. All applications must include complete application forms; three letters of reference and/or completed recommendation forms; a written statement of goals, interests, and experiences relevant to graduate study in student development at The University of Iowa; official Graduate Record Exam (GRE) General Test scores; and official transcripts for previous postsecondary course work.

Applications are considered for fall enrollment. Application deadline is January 1.

REQUIREMENTS

The Ph.D. in student affairs administration and research typically requires 90 s.h. of graduate credit (approximately 60 s.h. beyond the master’s degree), although a student’s academic and experiential backgrounds, needs, and interests help determine the required credit. Decisions are made case-by-case in collaboration with the student and his or her advisory committee.

Educational foundations covered in the curriculum include college student learning and development, student affairs administration, integrative experiences, research tools, and minor area courses. A nine-hour written comprehensive examination must be completed successfully before the student can be admitted to candidacy for the Ph.D.

Requirements are as follows.

MINOR AREA
Ph.D. students earn 9 s.h. in minor area courses taken outside the College of Education. Disciplines such as sociology, psychology, anthropology, history, management and organizational studies, and law inform student affairs administration and research and provide deeper and broader understanding of student affairs practice and scholarship. Leaders in student affairs benefit from the varied perspectives that other disciplines can provide.

DISSERTATION
Students must complete a research dissertation, for a total of 12 s.h.

Rehabilitation Counseling

M.A. in Rehabilitation Counseling
The Master of Arts in rehabilitation counseling prepares professional counselors to provide assistance in employment, independent living, and personal or economic development to persons with disabilities and other individuals who encounter barriers in meeting their functional needs. It also prepares professionals in the mental health counseling/psychiatric rehabilitation specialization to obtain licensure as counseling professionals who provide services in community mental health settings.

Rehabilitation counselors work in a variety of settings, including public agencies such as state vocational rehabilitation programs and Veterans Affairs vocational rehabilitation programs; independent living centers; community-based rehabilitation centers and supported employment programs; private for-profit worker’s compensation and insurance rehabilitation agencies; and mental health agencies. They provide interventions designed to help persons with disabilities adapt to the demands of their environments. They also prepare the environments to accommodate the individual’s needs. Assessment, personal and vocational counseling, development of rehabilitation and treatment plans, case management, service coordination, psychosocial adjustment, job development, placement, and follow-up are typical services that rehabilitation counselors provide.

The M.A. program in rehabilitation counseling is accredited by the Council on Rehabilitation Education (CORE). The program also is accredited in community counseling by the Council for Accreditation of Counseling and Related Educational Programs (CACREP).

Graduates of the M.A. program are eligible for certification by the Commission on Rehabilitation Counselor Certification (CRC) and the National Board for Certified Counselors. By completing the mental health/psychiatric rehabilitation specialization course work, students also complete the courses they must take in order to apply for licensure as mental health professionals in Iowa.

ADMISSION
No specific undergraduate major area of study is required, but a major in one of the social sciences is considered good preparation for the M.A. in rehabilitation counseling. Applicants should have a good academic record and relevant experience, such as assisting individuals with disabilities.
Postbaccalaureate work experience relevant to the field of rehabilitation counseling is preferred. The program encourages applications from persons traditionally underrepresented in the field, particularly those with a disability and/or members of minority or ethnic groups. Applicants also must meet the department’s admission requirements (see “Admission” later in this section). A personal interview is required, either in person or by telephone.

Applications for full-time study are accepted for summer session (June) entry. Application deadline for full-time study is April 1 for U.S. applicants, March 1 for international applicants. Applications for part-time study are accepted for fall and spring semesters. Applicants who submit their materials by February 1 receive preference and have maximum access to the Rehabilitation Services Administration Scholars Program.

REQUIREMENTS
The M.A. in rehabilitation counseling requires a minimum of 60 s.h. of graduate credit, including a 12 s.h. specialty emphasis area of the student’s choice. Full-time students can complete the program in two academic years (four semesters plus two summer sessions, approximately 21 months).

The curriculum blends academic work with supervised clinical experiences. Students take three semesters of practicum concurrently with academic courses. The program concludes with a full-time internship (40 hours per week) during a spring semester. Students are assigned to rehabilitation and community mental health agencies or facilities that meet CORE and CACREP accreditation standards and that have programs or clientele who match the student’s interests and educational objectives. Some placements may require background checks.
Supervised practicums, internships, and comprehensive examinations are not offered during summer sessions. Requirements are as follows.

**Department Requirements**

- 07B:206 Research Process and Design 3 s.h.
- 07C:202 Introduction to Group Counseling 3 s.h.
- 07C:221 Theories of Counseling and Human Development Across the Life Span 3 s.h.
- 07C:250 Multiculturalism in Helping Professions (or equivalent) 3 s.h.
- 07C:270 Issues and Ethics in Counseling 3 s.h.
- 07C:278 Applied Microcounseling 3 s.h.

Clinical practice (see “Clinical Practice,” below) 16 s.h.

**Program Requirements**

- 07C:201 Introduction to Counseling and the Counseling Profession 1 s.h.
- 07C:210 Rehabilitation Client Assessment 3 s.h.
- 07C:241 Introduction to Rehabilitation Counseling and Case Management 3 s.h.
- 07C:247 Medical Aspects of Disability 3 s.h.
- 07C:249 Psychiatric Disorders and Interventions 3 s.h.
- 07C:341 Job Development, Placement, and Follow-Up 3 s.h.
- 07C:342 Psychosocial and Developmental Aspects 3 s.h.

**Clinical Practice**

All of these:

- 07C:348 Prepracticum in Rehabilitation Counseling and Case Management 3 s.h.
- 07C:349 Practicum in Rehabilitation Counseling and Case Management 3 s.h.
- 07C:352 Internship in Rehabilitation Counseling and Case Management 9-12 s.h.

One of these:

- 07C:350 Advanced Practicum in Rehabilitation Counseling and Case Management 3 s.h.
- 07C:351 Advanced Practicum in Mental Health and Substance Abuse 3 s.h.

**SPECIALIZATION**

With their advisor’s approval, students select a specialization area. Specialization areas may include aging and rehabilitation, brain injury rehabilitation, law and disability, mental health/substance abuse counseling, mental health counseling/psychiatric rehabilitation, case management, correctional rehabilitation, multiculturalism, assistive technology, and Spanish-English emphasis. Students choose 12 s.h. of course work in their area. The specialization must include 9 s.h. of didactic course work and 3 s.h. of professional practice appropriate to the specialty at the practicum or internship level.

**COMPREHENSIVE EXAMINATION**

In addition to the departmental comprehensive examination, a three-hour written examination on the process and practice of rehabilitation and community counseling is required. Exams are offered only during fall and spring semesters.

**Ph.D. in Rehabilitation Counselor Education**

The Doctor of Philosophy in rehabilitation counselor education prepares professionals for leadership roles in rehabilitation counselor education, research, administration, and service delivery systems. It provides rehabilitation counselors the opportunity to master knowledge; clinical, teaching, and supervisory skills; and research competencies at the most advanced levels.

Ph.D. students focus on three areas of advanced development: rehabilitation counselor education and supervision, research, and professional practice. The program is flexible, permitting students to pursue individualized plans of study within the required curriculum. Ph.D. graduates are expected to have sufficient knowledge and skill to teach at colleges and universities, supervise other professionals, and provide clinical services to clients. They also should have competencies to engage in and evaluate theoretical, qualitative, and empirical research.

**ADMISSION**

Applicants should have a master’s degree in rehabilitation counseling or a related area and a graduate g.p.a. of 3.00 or higher. One year of full-time work experience in rehabilitation or a related field is strongly encouraged. Applicants should include a written statement of purpose for pursuing the Ph.D. in rehabilitation counselor education and personal career objectives, official score on the Graduate Record Exam (GRE) General Test, and three letters of recommendation. A personal interview is required.

Applications are accepted for fall, spring, or summer entry; fall entry is strongly advised. Faculty consideration of applications begins January 15 for fall entry, November 15 for spring entry, and April 1 for summer entry.
REQUIREMENTS

The Ph.D. in rehabilitation counseling education requires a minimum of 90 s.h. of graduate credit. Most students complete their course work in three years and take a fourth year to complete the dissertation. Students who have not completed a master’s degree in rehabilitation counseling must take appropriate masters-level courses or their equivalents. This combination of master’s and doctoral course work ensures exposure to vocational rehabilitation as well as to independent living rehabilitation and community-based counseling processes, concepts, programs, and services.

Each student is required to submit a curriculum plan. The rehabilitation counseling faculty reviews each student annually. To continue in the program, students must meet the department’s requirements for maintaining candidacy.

Requirements are as follows.

MINOR AREA

Students plan a minor area in collaboration with their major advisor and curriculum plan committee. The minor area must be outside the department. Students select a minimum of 9 s.h. of course work in the minor area, in collaboration with their minor advisor and with the approval of their curriculum plan committee.

COMPREHENSIVE EXAMINATION

The comprehensive examination consists of three exams that total nine hours. They cover the department core comprehensive (three hours), rehabilitation counseling—theory, practice, and research (three hours), and the minor area (three hours).

DISSERTATION

The dissertation is a major research study planned in collaboration with the student’s major advisor. At least two rehabilitation counseling faculty members serve on the dissertation committee; one of them chairs or co-chairs the committee.

07C:493 Ph.D. Thesis 10-15 s.h.

School Counseling

M.A. in School Counseling

The Master of Arts in school counseling prepares individuals to work effectively as counselors in K-12 school settings. The program is accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP). Successful graduates are eligible for elementary (K-8) and/or secondary (5-12) school counselor licensure in Iowa and for national counselor...
certification by the National Board for Certified Counselors.

School counseling students are strongly encouraged to earn an endorsement in talented and gifted education or a certificate from the Belin-Blank Center for Gifted Education.

ADMISSION

Applicants should have an undergraduate g.p.a. of 3.00 or higher and one year of teaching experience or successful experiences with children and/or adolescents. Graduate Record Examination (GRE) General Test scores must be on file at the University.

Applications are accepted for summer entry. Applicants for fall entry may be accepted for an extended three-year study plan. Applications should be submitted by March 1 for U.S. applicants, February 1 for international applicants.

REQUIREMENTS

The M.A. in school counseling requires a minimum of 54 s.h. of graduate credit. The program emphasizes gifted education. During the first few semesters, students take core cognate courses, including course work on gifted education, and the microcounseling clinical skills laboratory. Then they enter a counseling practicum followed by an internship. Students who enter without teaching licensure are required to take additional course work in education (07E:100 Foundations of Education, 07U:100 Foundations of Special Education, and 07P:200 Educational Psychology or equivalent) to meet school counselor licensure standards. Students are expected to complete at least 100 clock hours in practicum and 600 clock hours in internship activities in an approved school setting, under the supervision of an experienced licensed school counselor and a University faculty supervisor.

Students must complete program and department core courses as outlined on the Department of Counseling, Rehabilitation, and Student Development web site before enrolling in 07C:300 Practicum in School Counseling for the summer session of their last year in the program. All students are required to complete a background check the spring before they enroll in the practicum. Students who are not licensed teachers must complete course work in education before enrolling in the practicum.

Each student’s progress is reviewed periodically by the program faculty. Students who have successfully completed all prerequisites for 07C:300 Practicum in School Counseling, which is offered only in summer sessions, are reviewed in the spring before they take the practicum, to assure that they are prepared for it. During the fall, students are evaluated to assure their readiness for the internship 07C:321 Internship in Elementary School Counseling or 07C:322 Internship in Secondary School Counseling, which requires assignment in approved schools for the fall and/or spring semesters.

Suggested Plan of Study

The following plan of study suggests classes for six sessions of study. Students who do not have teacher licensure are required to complete at least three additional courses in education before the second year of classes.

First year, summer session:
07C:137 Introduction to Educating Gifted Students 3 s.h.
07C:204 School Culture and Classroom Management for School Counselors 2 s.h.

First year, fall semester:
07C:200 Professional School Counselor 3 s.h.
07C:221 Theories of Counseling and Human Development Across the Life Span 3 s.h.
07C:250 Multiculturalism in Helping Professions 3 s.h.
07C:278 Applied Microcounseling 3 s.h.

First year, spring semester:
07B:206 Research Process and Design 3 s.h.
07C:202 Introduction to Group Counseling 3 s.h.
07C:203 Career Development 3 s.h.
07C:223 Counseling Gifted and Talented Students 3 s.h.

Second year, summer session:
07C:222 Counseling Children and Adolescents in Schools 3 s.h.
07C:300 Practicum in School Counseling Electives Courses not completed during first year 3 s.h.

Second year, fall semester:
07C:230 School Counseling Program Leadership and Management 3 s.h.
07C:254 Action Research I: Assessment/Appraisal 3 s.h.
07C:321 Internship in Elementary School Counseling (300 hours) 3 s.h.
07C:322 Internship in Secondary School Counseling (300 hours) 3 s.h.
07U:140 Characteristics of Disabilities 3 s.h.
Second year, spring semester:

COMPREHENSIVE EXAMINATION

All students are required to take comprehensive exams for counseling, rehabilitation, and student development and for school counseling during their final semester of internship. Comprehensive exams include a written six-hour exam in counseling, rehabilitation, student development, and school counseling. An oral exam also is required unless waived by the comprehensive exam committee.

Counselor Education and Supervision

Ph.D. in Counselor Education and Supervision

The Doctor of Philosophy in counselor education and supervision prepares students with knowledge and skills related to counseling, teaching, consulting, supervising counselors, and conducting research. Graduates enter professional work as counselors, counselor supervisors, counselor educators, researchers and/or consultants, or work in other positions requiring expertise in human relations. Students may choose an emphasis in gifted and talented education, school counseling, professional leadership, or student development.

Counselor education and supervision graduates are prepared to teach the knowledge and skills required of professional counselors and to supervise beginning and advanced counselors; perform counseling interventions with individuals and groups; and teach human relations skills in colleges or universities. They provide professional consultation with counseling practitioners and policy makers about counseling program development and evaluation. They also may perform research that contributes to knowledge about counseling, supervision, and counselor education.

The program is accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP). The American Counseling Association (ACA) and the Association for Counselor Education and Supervision (ACES) are the professional organizations most related to program activities.

ADMISSION

In addition to the department’s admission requirements (see “Admission” later in this section), Ph.D. applicants must provide evidence of successful experience in counseling or a closely related profession. Applicants without experience may be admitted if their credentials indicate exceptional strengths.

Applications are accepted for fall and spring semesters and summer session. Applications from U.S. citizens should be submitted by July 15 for fall, December 1 for spring, and April 15 for summer. Applications from international applicants should be submitted by April 15 for fall, October 1 for spring, and March 1 for summer.

REQUIREMENTS

The Ph.D. in counselor education and supervision requires 90 s.h. of graduate credit. Students complete required courses in counseling and in research tools and applications, an optional emphasis area, and a minor outside the department. They also take comprehensive examinations and complete a dissertation.

Most students complete their course work in three years and take a fourth year to complete the dissertation. Students who have not completed a master’s degree program approved by the Council for Accreditation of Counseling and Related Educational Programs (CACREP) may need to remedy deficiencies by taking appropriate master’s-level course work.

07C:465 Internship in Counselor Education (at least 240 hours) 3 s.h.
07P:385 Teaching and Learning in Higher Education 3 s.h.
At least one course in human development 3 s.h.
At least one advanced course in psychological or educational measurement 3 s.h.

Research Tools and Applications

The following are minimum requirements. Students are expected to master research tools and applications beyond the minimum requirements in order to develop research skills consistent with their professional goals.

07C:338 Essentials of Qualitative Inquiry 3 s.h.
07C:394 M.A. Equivalency Research (for students without an approved M.A./M.S. thesis) 1-3 s.h.
07C:460 Seminar: Research in Counseling 3 s.h.
07C:493 Ph.D. Thesis 10-15 s.h.
07P:243 Intermediate Statistical Methods 4 s.h.
At least one course in quantitative research methods chosen from these (at least 3 s.h.):
07P:244 Correlation and Regression 4 s.h.
07P:245 Applied Multivariate Analysis 3 s.h.
07P:246 Design of Experiments 4 s.h.
07P:252 Introduction to Multivariate Statistical Methods 3 s.h.

Minor Area

Students take a series of courses (typically a minimum of three) in an area of study outside the Department of Counseling, Rehabilitation, and Student Development. They select course work in collaboration with their minor area advisor, a faculty member from the area, and with approval of the curriculum plan committee.

Master’s Thesis Project or Equivalency

Students are required to submit a master’s thesis project for approval or to complete a master’s thesis equivalency within their first two years in the program or before they complete 30 s.h. in the program.

COMPREHENSIVE EXAMINATION

The comprehensive examination consists of three 3-hour exams and an oral defense, including a department comprehensive exam, a counselor education and supervision program comprehensive exam, and an exam on the minor area. The comprehensive exam may be taken during the student’s final semester of course work, which typically includes internship.

DISSERTATION

The major research project culminating in the doctoral thesis may be on any topic related to counseling and counselor education. The thesis advisor and the examining committee approve the topic and procedures at a formal prospectus meeting. The final oral examination on the thesis is conducted by the examining committee. Students usually earn 10 s.h. for dissertation work, but in some instances they may earn up to 15 s.h.

Admission

All M.A. and Ph.D. applicants must submit the following:

- a completed graduate application form;
- copies of official transcripts of all previous undergraduate and graduate college work;
- official report of Graduate Record Examination (GRE) General Test verbal and quantitative scores;
- a statement of the applicant’s reasons for seeking an advanced degree in the department, including a statement of personal career objectives;
- three current letters of recommendation from persons in a position to assess both the applicant’s prospects for completing either the M.A. or Ph.D., and his or her commitment to the profession.

The department may request a personal or telephone interview.

The following admission standards are considered for individual program admission decisions.

M.A. applicants should have an undergraduate g.p.a. of at least 3.00.
Ph.D. applicants should have an undergraduate g.p.a. of at least 3.00, or if they hold a graduate degree, a graduate g.p.a. of at least 3.00.

Typically, doctoral students are not admitted unless they have completed a master’s degree in counseling or a related field. Relevant work experiences are important. Students who are accepted without a related master’s degree must complete core master’s-level course work before taking advanced Ph.D. courses. Required
remedial courses and experiences are determined in consultation with the advisor and are included in a student's curriculum plan.

Visit the Department of Counseling, Rehabilitation, and Student Development web site for details about admission and program requirements.

INTERNATIONAL APPLICANTS
International applicants must score at least 550 (paper-based) or at least 213 (computer-based) on the Test of English as a foreign language (TOEFL). The department may require applicants with lower TOEFL scores to complete University of Iowa course work in English language fluency. TOEFL scores must be submitted with the application for admission.

Final Decision, Special Requirements
The criteria listed above are minimum standards for admission. Final admission decisions are made by faculty committees. Some programs may have special admission requirements due to licensure/certification standards. Special admission requirements are listed with individual program information.

Conditional Admission
Applicants who do not meet the requirements for regular admission may be admitted on conditional status if the faculty determines that they show strengths and promise warranting conditional admission. Applicants admitted on conditional status must satisfy the following requirements in order to achieve regular status.

M.A. students admitted on conditional status must complete at least 12 s.h. of core courses (approved by an advisor) over two consecutive sessions and earn a cumulative g.p.a. of at least 3.00.

Ph.D. students admitted on conditional status must complete at least 12 s.h. of core courses (approved by an advisor) over two consecutive sessions and earn a cumulative g.p.a. of at least 3.00.

Maintaining Candidacy
All graduate students must meet the following standards in order to maintain their candidacy for a degree:
- maintain a g.p.a. of at least 3.00;
- successfully complete a practicum, internship, or equivalent professional experience;
- maintain professional behavior consistent with the American Counseling Association code of ethics and any additional code of professional ethics adhered to in any agency in which the student completes a practicum or internship;
- demonstrate progress toward the degree through successful completion of semester hours specified in the curriculum plan and active registration each session (exceptions may be approved by the advisor).

Each student’s academic and professional progress is reviewed annually. A written report is provided to the student and a copy is placed in his or her department file.

Probational Status
M.A. and Ph.D. students who earn a cumulative g.p.a. lower than 3.00 are placed on probational status and are notified in writing. Students on probational status have two consecutive sessions to raise their grade-point average to the established standard. If that requirement is not met, the student may be removed from the program. Each student is allowed one probational status during his or her program of study.

Application
For application materials, visit the Department of Counseling, Rehabilitation, and Student Development web site.

Applications must be complete before they can be reviewed. Applicants are responsible for providing a complete application dossier; to check on whether an application dossier is complete, contact the College of Education Office of Teacher Education and Student Services.

Application forms are available on the web.

Applicants are notified in writing after their applications have been reviewed. Applicants who are accepted must reply in writing in order to maintain their admission status.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

Financial Support
Depending on federal funding, graduate training fellowships may be available for M.A. and Ph.D. students entering rehabilitation counseling through the Rehabilitation Services Administration Scholars Program. There is a wide
variety of graduate assistantships for students in the department. For example, many of the University’s student service units award part-time assistantships. Applicants for assistantships should contact the department or the coordinator of the particular graduate program they plan to enter.

Applicants seeking fellowships or assistantships should complete their applications as early as possible.

Facilities

An on-campus counseling suite serves as a laboratory for training. In addition, a wide variety of supervised clinical experiences are available in community agencies, schools, and colleges, as well as throughout the University. Internships may be completed at approved sites nationwide.

Courses

07C:030 Belin-Blank Center First-Year Seminar 1 s.h.
Presentations and discussions by University resource experts and Belin-Blank Center for Gifted Education staff. Prerequisite: Belin-Blank Center student standing.

07C:081 Making a Vocational-Educational Choice 2 s.h.
Vocational decision-making process, self-evaluation, exploration of the world of work; for students who are uncertain about their educational and vocational goals.

07C:119 Family Issues in Giftedness 1 s.h.
Family dynamics and issues that arise when one or more children are identified as gifted; parent/child, sibling, school/family relationships.

07C:120 Psychology of Giftedness 3 s.h.
Theories of learning, child development, motivation; issues unique to gifted education. Same as 07P:120.

07C:121 Assessment of Giftedness and Academic Talent 3 s.h.
Interpretation of standardized tests and other measurement instruments used to identify academic talent and program effectively for grades K-12; ability, aptitude, achievement tests; current issues in the uses of various instruments. Same as 07P:121.

07C:123 Gender Issues and Giftedness 1 s.h.
Effect of gender on development of giftedness; differential needs of girls, boys; strategies for effective teaching, gender equity.

07C:124 Ethnic and Cultural Issues and Giftedness 1 s.h.
Effect of ethnicity and culture on development of giftedness; special needs of Black, Hispanic, Native American, and Asian gifted students; strategies for identification, programming.

07C:125 Counseling and Psychological Needs of the Gifted 1 s.h.
Psychological aspects of giftedness, counseling techniques appropriate for gifted children, adolescents; socio-emotional concerns, career development, underachievement. Same as 07P:125.

07C:126 Cognitive and Affective Needs of Underachieving Gifted 1 s.h.
Diagnostic strategy for identifying types of underachievement, teaching and counseling interventions appropriate for each. Same as 07P:126.

07C:127 Research and Theory in Talent/Giftedness 1 s.h.
Biennial research symposium. Same as 07P:127.

07C:128 Advanced Leadership Seminar in Gifted Education 1 s.h.
Development of administrative policies and programming based on empirical research; for experienced leaders in gifted education.

07C:129 Creativity: Issues and Applications in Gifted Education 1 s.h.
Theories that underpin contemporary definitions of creativity; instruments developed to measure creativity; activities in the school environment that enhance or inhibit student creativity. Same as 07P:129.

07C:130 Human Sexuality 3 s.h.
How young adults experience, discuss, and engage in sex; short essays.

07C:137 Introduction to Educating Gifted Students 3 s.h.
Fundamental issues such as curriculum, counseling, family issues, gender and minority issues. Same as 07U:137.

07C:145 Marriage and Family Interaction 3 s.h.
Contemporary American marriage, family relationships; mate selection.

07C:162 Introduction to Marriage and Family Counseling and Psychotherapy 3 s.h.
Evolution of the family therapy movement and issues related to functional and dysfunctional family systems; significant models of family therapy and specific techniques.

07C:178 Microcounseling 1-3 s.h.
Basic skills of listening, responding, empathy, focus; advanced skills of meaning, confrontation, reframing, directives, action skills.

07C:180 Topical Seminar for Helping Professionals arr.
Topics for the continuing education of counselors and related professionals.

07C:182 Workshop for Helping Professionals 1-2 s.h.
One-week workshop; students choose a topic for community practitioners working with or interested in counseling individuals, groups, families, organizations.

07C:185 Introduction to Substance Abuse 3 s.h.
Theories of addiction and pharmacology of psychoactive drugs; legal, familial, biological, multicultural, historical issues related to substance use and misuse.

07C:187 Introduction to Assistive Technology 3 s.h.
How assistive technology can be used for attainment of goals in education or work. Same as 07U:187.

07C:188 Practicum in Teaching and Curriculum Development in Gifted Education 1-6 s.h.
Experience in developing course materials for classes offered through the Belin-Blank Center for Gifted Education. Same as 07E:188, 07S:188, 07U:188.

07C:190 Group Processes for Related Professions 3 s.h.
Small-group procedures for personal and organizational development in educational settings; discussions of theoretical and ethical issues, multicultural considerations, and research findings supplemented with demonstrations; participation in a personal growth group.

07C:192 Group Leadership in Human Sexuality 0-3 s.h.
How to teach human sexuality; how to help students achieve an open-minded yet responsible attitude toward their own and others’ sexuality. Prerequisite: 07C:130.

07C:193 Individual Instruction—Undergraduate arr.
Prerequisite: consent of instructor.
07C:194 Interpersonal Effectiveness 3 s.h.
Paradigms and techniques that enhance interpersonal relationship skills.

07C:199 Counseling for Related Professions 3 s.h.
Counseling theories and techniques; ethical and multicultural considerations; small-group discussions, demonstrations, lectures.

07C:200 Professional School Counselor 3 s.h.
Professional identity of school counselors, K-12 school counseling program delivery systems, legal and ethical issues. Prerequisite: admission to school counseling program or consent of instructor.

07C:201 Introduction to Counseling and the Counseling Profession 1 s.h.
Overview of the counseling profession and standards of practice for counselors-in-training.

07C:202 Introduction to Group Counseling 3 s.h.
Research, theory, ethics, planning, and practice in group counseling; leadership styles and multicultural considerations; group participation. Prerequisites: 07C:221, counseling, rehabilitation, and student development enrollment; and consent of instructor. Corequisite: 07C:278.

07C:203 Career Development 3 s.h.
Preparation for counselors and student affairs professionals; career development concepts and theories, family and work, career counseling goals and objectives, exemplary techniques and materials, career program planning, evaluation procedures. Prerequisite: counseling, rehabilitation, and student development enrollment or consent of instructor.

07C:204 School Culture and Classroom Management for School Counselors 2 s.h.
American public elementary and secondary schools and the school counselor's role; classroom management for school counselors.

07C:210 Rehabilitation Client Assessment 3 s.h.
Process and practice of assessing persons with disabilities for rehabilitation plan development and decision making; multicultural and ethical considerations.

07C:221 Theories of Counseling and Human Development Across the Life Span 3 s.h.
Philosophical bases, ethical considerations, processes, issues, multicultural and human-life-span developmental considerations in counseling theories and techniques. Prerequisite: counseling, rehabilitation, and student development enrollment or consent of instructor.

07C:222 Counseling Children and Adolescents in Schools 3 s.h.
Theory and practice of school-based counseling interventions; child and adolescent development; prevention; special topics. Prerequisite: 07C:221 or 07C:278 or consent of instructor.

07C:223 Counseling Gifted and Talented Students 3 s.h.
Learning theories and best practices related to school counseling of gifted and talented students; academic, career, and personal/social development.

07C:230 School Counseling Program Leadership and Management 3 s.h.
Comprehensive K-12 school counseling program components and structures; program leadership, planning, accountability; behavioral consultation and collaboration; ethical, multicultural, family considerations. Corequisites: 07C:321 or 07C:322.

07C:237 Seminar in Gifted Education 2-3 s.h.
Teaching and counseling needs of gifted students K-12; intensive 10-day residential program. Prerequisites: work as teacher with Belin Fellowship and consent of instructor.

07C:238 Advanced Seminar in Gifted Education 1 s.h.
Supervisory, administrative, and research issues; fellowships for seminar participants. Prerequisites: 07C:237 and consent of instructor.

07C:241 Introduction to Rehabilitation Counseling and Case Management 3 s.h.
Historical, philosophical, legislative, societal, and multicultural overview of rehabilitation process and practice in community-based settings; roles of rehabilitation professionals, nature of rehabilitation agencies, resources, contemporary issues and ethics.

07C:247 Medical Aspects of Disability 3 s.h.
Medical evaluation as part of the rehabilitation process; body systems, medical terminology, medical description of disabilities; functional limitations; projection of potential for rehabilitation applied to planning and placement.

07C:248 Diagnosis and Treatment Planning for Psychiatric Rehabilitation 3 s.h.
Psychiatric conditions, their diagnostic criteria, treatment planning considerations; medical and psychiatric rehabilitation models, interrelationship in providing services to persons with psychiatric disabilities; functional assessment and client-driven rehabilitation planning for community reintegration. Prerequisite: counseling, rehabilitation, and student development enrollment or consent of instructor.

07C:249 Psychiatric Disorders and Interventions 3 s.h.
Graduate-level course covering the description, classification, and theoretical perspectives related to psychiatric disorders; models of intervention in community-based settings.

07C:250 Multiculturalism in Helping Professions 3 s.h.
Theory and application of multicultural competency in the helping professions; ethical treatment of clients in the context of a multiculturally diverse society; knowledge, skill, self-awareness components relevant for helping practitioners.

07C:254 Action Research I: Assessment/Appraisal 3 s.h.
Didactic experiences related to individual and group assessment and appraisal; for school professionals.

07C:255 Advanced Career Development and Counseling 3 s.h.
Major concepts and research evidence about life-span vocational behavior; theories of vocational choice, adjustment, development in a multicultural world.

07C:256 Action Research II: School-Based Field Research 3 s.h.
Field-based research experiences in school settings; students conceptualize, design, conduct, and articulate school-based research findings. Prerequisite: 07C:254 or consent of instructor.

07C:262 Marriage and Family Counseling and Psychotherapy 3 s.h.
Introduction to counseling theory, ethics, and techniques as applied to problems of marriage and the family over the life span; multicultural considerations. Prerequisites: advanced graduate standing and consent of instructor. Recommended: 07C:178 and 07C:221.

07C:263 Consultation Theory and Practice 2-3 s.h.
Analysis of various consultation models, such as behavioral and mental health; ethical and multicultural considerations. Same as 07P:263.

07C:270 Issues and Ethics in Counseling 3 s.h.
Ethical standards and decision making; current issues; ethical, legal, and multicultural considerations for counseling in agencies and schools; emphasis on professional practice.

07C:278 Applied Microcounseling 3 s.h.
Development of basic and advanced counseling skills; preparation for work in education and community settings.

07C:280 Topical Seminar in CRSD arr.
Special topics dealing with contemporary problems of concern to counselors in specific settings. Repeatable.
07C:281 Introduction to Computer Technology in the Helping Professions 1 s.h.
Prerequisite: counseling, rehabilitation, and student development M.A. enrollment or consent of instructor.

07C:293 Individual Instruction—Graduate arr.
Prerequisite: consent of instructor.

07C:300 Practicum in School Counseling 3 s.h.
Supervised experience counseling and consulting in elementary and secondary school settings. Prerequisite: completion of school counseling core courses.

07C:311 Practicum in Counseling and Psychological Services for Gifted Students 1-6 s.h.
For graduate students who have had course work in counseling education, counseling psychology, school psychology, educational psychology, or related fields. Prerequisites: 07C:178 or equivalent and consent of instructor. Same as 07P:311.

07C:321 Internship in Elementary School Counseling 3 s.h.
Supervised placement in an elementary school setting; performance of tasks, responsibilities of an elementary school counselor. Prerequisites: 07C:300, all required school counseling courses, and consent of instructor.

07C:322 Internship in Secondary School Counseling 3 s.h.
Supervised placement in a secondary school setting; performance of tasks, responsibilities of a secondary school counselor. Prerequisites: 07C:300, all required school counseling courses, and consent of instructor.

07C:330 Introduction to Student Services 3 s.h.
Foundations of student affairs work; overview of institutional cultures, legal issues, ethical principles, standards of practice in student affairs.

07C:331 College Students and Their Environments 2-3 s.h.
Characteristics of college students and issues they face; students' institutional, social, cultural environments; impact of environments on student learning, development.

07C:332 College Student Psychosocial and Identity Development 3 s.h.
Theoretical models of psychosocial and identity development in college students; applications to student affairs work. Prerequisite: 07C:331 or equivalent.

07C:333 Practicum in Student Services arr.
Supervised experience in college student service agencies. Repeatable.

07C:334 College Student Learning and Cognitive Development 3 s.h.
Learning and development in college students; theoretical models of learning, cognitive development, moral development; applications to student affairs work. Prerequisite: 07C:331 or equivalent.

07C:335 Administration of Student Services 3 s.h.
Administrative structures and processes, contexts and principles of effective student services practice, research and assessment in student services. Prerequisite: 07C:330 or equivalent.

07C:336 Impact of College on Students 3 s.h.
Introduction to literature; career and economic returns, values and attitudes, learning and cognitive development, assessment and methodological issues of studying college outcomes. Prerequisite: 07B:206 or equivalent or consent of instructor.

07C:337 Administration Theory in Student Affairs 3 s.h.
Issues and problems in student affairs administration; theories of organization, administration, leadership. Prerequisite: 07C:335 or consent of instructor, and enrollment in student affairs administration and research Ph.D. program.

07C:338 Essentials of Qualitative Inquiry 3 s.h.
Principles, processes of qualitative research in education; methods of design, data collection and analysis, interpretation, trustworthiness. Prerequisites: Ph.D. enrollment, introductory research course, and consent of instructor.

07C:341 Job Development, Placement, and Follow-up 3 s.h.
Obtaining appropriate jobs for individuals with disabilities who have received rehabilitation services; client, counselor, employer, job specifications. Prerequisite: consent of instructor.

07C:342 Psychosocial and Developmental Aspects 3 s.h.
Dynamics of adjustment and coping for persons with chronic illness or those with disabilities through the life span; somatopsychological, psychosocial, and developmental perspectives on disability.

07C:347 Home/School/Community: System Interventions 3 s.h.
Interventions used by school and support system personnel; focus on work with parents, siblings. Same as 07P:347.

07C:348 Prepracticum in Rehabilitation Counseling and Case Management arr.
Counseling laboratory to promote knowledge, skills, and awareness of effective and ethical counseling methods, and fundamentals of case management. Prerequisites: 07C:221 and 07C:278.

07C:349 Practicum in Rehabilitation Counseling and Case Management arr.
Experience in a community agency serving individuals with disabilities, supervised by agency and University personnel. Prerequisite: 07C:348.

07C:350 Advanced Practicum in Rehabilitation Counseling and Case Management 3 s.h.
Experience to enhance competency in agencies and with persons represented in the student's specialty area. Prerequisite: 07C:349.

07C:351 Advanced Practicum in Mental Health and Substance Abuse 3 s.h.
Supervised experience counseling clients with substance-related and/or mental health problems; practical application of theory and ethics through individual, group, family, community counseling. Prerequisites: 07C:349 and consent of instructor.

07C:352 Internship in Rehabilitation Counseling and Case Management arr.
Full-time clinical experience in rehabilitation settings; training in wide range of rehabilitation activities, under supervision of certified rehabilitation counselor (CRC). Prerequisite: 07C:350 or 07C:351.

07C:353 Advanced Counseling and Psychotherapy 3 s.h.
Theories, techniques, and ethics of counseling clients with personal and interpersonal problems; ethical and multicultural considerations. Prerequisite: consent of instructor.

07C:357 Advanced Group Counseling and Psychotherapy 3 s.h.
Theories and techniques of group counseling and psychotherapy; integration of theory, experience, and research in group counseling; ethical and multicultural considerations. Prerequisite: consent of instructor.

07C:360 Advanced Practicum in Counseling arr.
Supervised practice in counseling; intensive analysis of counselor ethics, styles, methods. Advanced graduate standing in counselor education and consent of instructor required. Prerequisites: 07C:221 or equivalent, counseling introductory practicum, and Ph.D. enrollment.

07C:363 Capstone Seminar in Student Services 3 s.h.
Synthesis, integration, and application of prior course work on college students and their environments, student learning and
development, student affairs administration, counseling and helping skills; focus on program development and implementation, environmental and needs assessment, program evaluation, student group advising, transition to professional student affairs roles; internship supervision; for advanced M.A. students in student development in postsecondary education. Repeatable. Prerequisites: 07C:250, 07C:333, and consent of instructor.

07C:369 Advanced Seminar in Rehabilitation Counseling and Psychology 3 s.h.
Philosophy, theory, research base, practice of rehabilitation counseling, psychology; ethical and multicultural considerations; relationship to disability studies; psychological aspects of disability, client assessment, history, systems, contemporary issues.

07C:380 Practicum in College Teaching arr.
Supervised college teaching experience in counselor education courses; teaching in collaboration with faculty, observation and critiques of teaching, participation in course planning and evaluation procedures; ethical and multicultural considerations. Prerequisites: graduate standing and consent of instructor.

07C:393 M.A. Thesis arr.
Prerequisite: consent of instructor.

07C:394 M.A. Equivalency Research 1-3 s.h.
Preparation for comprehensive examination. Prerequisite: consent of instructor.

07C:400 Seminar: Ethics and Issues in Counseling 3 s.h.
Ethical, professional, and contemporary issues in counseling practice, education, and research. Prerequisite: counseling, rehabilitation, and student development Ph.D. enrollment or consent of instructor.

07C:431 Seminar: Research on College Students 3 s.h.
College student learning and development, outcomes, persistence. Prerequisites: 07C:330 or consent of instructor, and enrollment in student affairs administration and research Ph.D. program.

07C:432 Seminar: Student Affairs Practice 3 s.h.
Institutional cultures, student affairs leadership, organizational structures. Prerequisites: 07C:335 or consent of instructor, and enrollment in student affairs administration and research Ph.D. program.

07C:433 Seminar: Current Issues in Student Affairs 3 s.h.
Critical and current issues in student affairs professional practice. Prerequisites: 07C:335 or consent of instructor, and enrollment in student affairs administration and research Ph.D. program.

07C:450 Advanced Social Psychology of Disability 3 s.h.
Disability issues from individual and societal perspectives; psychosocial aspects of disability and disability studies; seminar. Prerequisite: Ph.D. enrollment.

07C:451 Advanced Multiculturalism 3 s.h.
Impact of culture, race, ethnicity, and intersections of identity on counseling in higher education and student affairs settings. Prerequisite: 07C:250 or consent of instructor.

07C:454 Supervision Theory and Practice 3 s.h.
Conceptual models, ethics, multicultural considerations, research, and program design for counselor supervision and consultation.

07C:455 Supervising the Counseling Practicum arr.
Supervision of students enrolled in counseling practicum. Prerequisite: consent of instructor. Pre- or corequisite: 07C:454 or equivalent.

07C:456 Seminar: Research in Rehabilitation Counselor Education 3 s.h.
Opportunity to acquire skills in varied aspects of research and scholarly work.

07C:457 Seminar: Professional Orientation to Counselor Education and Supervision 3 s.h.
Professional orientation issues in counselor education and supervision; related documents, bylaws, professional expectations.

07C:458 Seminar: Current Issues and Trends in Counselor Education and Supervision 3 s.h.
Recent trends, including debates and findings in literature related to best practices for the profession.

07C:459 Seminar: Leadership and Advocacy in Counselor Education and Supervision 3 s.h.
Leadership principles and theories, including applications to counselor education; student leadership potential and skills explored through self-reflective model.

07C:460 Seminar: Research in Counseling 3 s.h.
Methods, examples, ethics, multicultural issues, problems of counseling research. Prerequisite: Ph.D. enrollment or consent of instructor.

07C:461 Practicum in Research arr.
Experience designing and implementing research relevant to student’s plan of study, under supervision of counseling, rehabilitation, and student development faculty member. Repeatable. Prerequisite: consent of instructor.

07C:465 Internship in Counselor Education 1-3 s.h.
Supervised experience in professional counseling, counselor supervision, consultation, teaching counseling; field placement and seminar. Prerequisite: consent of instructor.

Prerequisite: consent of instructor.
Chair: Larry D. Bartlett  
Program coordinator, educational administration: Marcus J. Haack  
Program coordinator, higher education: Christine A. Ogren  
Program coordinator, social foundations of education: Scott F. McNabb  
Professors: Larry D. Bartlett, David B. Bills, Sandra B. Damico, Lelia B. Helms, Alan B. Henkin, Ernest T. Pascarella, Michael B. Paulsen, Elizabeth J. Whitt  
Professors emeriti: George A. Chambers, Walter J. Foley, Jerry N. Kuhn, Bradley M. Loomer, H. Bradley Sagen  
Associate professors: Christine L. McCarthy, Scott F. McNabb, Christine A. Ogren, Chet S. Rzonca, Katrina Sanders Cassell, Carolyn L. Wanat, Donald B. Yarbrough  
Associate professors emeriti: William E. Duffy, Robert E. Engel, Ray A. Muston, Sara C. Wolfson  
Clinical associate professors: Marcus J. Haack, Susan M. Lagos Lavenz  
Assistant professors: Elizabeth Hollingworth, Paul Umbach  
Adjunct assistant professor: Dorothy M. Persson  
Adjunct assistant professors emeriti: Wendell C. Boersma, Charles M. Mason  
Lecturer: Noga Admon  
Graduate degrees: M.A., Ed.S., Ph.D.  
Web site: http://www.education.uiowa.edu/epls/  

Educational Policy and Leadership Studies

The Department of Educational Policy and Leadership Studies offers programs that prepare administrators, professional personnel, teachers, and researchers in the fields of educational administration, higher education, and social foundations. The academic programs in the department reflect this diversity of purpose.

Graduate Programs

The department offers an M.A., Ed.S., and Ph.D. in educational administration; an Ed.S. in special education administration; an M.A. and Ph.D. in social foundations of education; and an M.A., Ed.S., and Ph.D. in higher education. Each degree program is described below, with information about degree requirements and application for admission.

Graduate Programs

The Department of Educational Policy and Leadership Studies offers programs that prepare administrators, professional personnel, teachers, and researchers in the fields of educational administration, higher education, and social foundations. The academic programs in the department reflect this diversity of purpose.

Educational Administration

Study in educational administration prepares individuals for leadership positions. The department offers the M.A., Ed.S., or Ph.D. in educational administration as well as administrative licensure. It also offers joint programs with other College of Education departments and with other colleges at the University.

Licensure

To be eligible for recommendation by The University of Iowa for licensure in Iowa as a principal or superintendent, students must complete the appropriate program. The specific requirements for each program are available from the Department of Educational Policy and Leadership Studies and the Office of Teacher Education and Student Services.

Students who hold an M.A. must satisfy all core requirements and must complete at The University of Iowa the minimum semester-hour program for each licensure level they seek. Because each administrative licensure has specific requirements, candidates are required to plan their program with their advisor’s approval.

M.A. in Educational Administration

The Master of Arts in educational administration prepares individuals for appointments as school principals and office administrators, and for positions in area education agencies and state departments of education. It is a nonthesis program that requires a minimum of 36 s.h. of graduate credit.

ADMISSION

Applicants must meet the admission requirements of the Graduate College. Admission decisions are made through a faculty review process. Factors considered include
recommendations, grade-point average, Graduate Record Examination (GRE) General Test scores, an aptitude survey, an essay demonstrating writing ability, and other evidence of academic ability and professional promise.

**CORE REQUIREMENTS**

With the aid of an advisor, each M.A. student prepares a plan of study that includes the following core requirements.

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>07B:200</td>
<td>Educational Leadership Technology</td>
<td>1</td>

</tr>
</tbody>
</table>

For Iowa licensure as a principal, students must meet the human relations requirement of the State of Iowa. Students must complete the core requirements listed above and required clinical courses (07B:400, 07B:401, 07B:402, and 07B:403). Candidates may choose electives approved by the advisor.

**COMPREHENSIVE EXAMINATION**

The M.A. comprehensive examination consists of either two 3-hour examinations, one in educational administration and one in a specialized area in either educational administration or a related field; or one 3-hour examination and a presentation of the student’s ePortfolio. Students must be registered in the Graduate College during their comprehensive examination semester if they plan to graduate at the end of that semester.

**Ed.S. in Educational Administration**

The Educational Specialist in educational administration prepares candidates for administrative appointments in school districts, area education agencies, state departments of education, and the U.S. Department of Education. It also helps school administrators upgrade their administrative skills to the level of superintendent of schools. Students seeking licensure plan a program approved by an advisor to meet State of Iowa licensure requirements.

**ADMISSION**

Applicants must meet the admission requirements of the Graduate College. Admission decisions are made through a faculty review process. Factors considered include recommendations, grade-point average, Graduate Record Examination (GRE) General Test scores, and other evidence of academic ability and professional promise.

**ELECTIVES**

Students choose electives to complete the 62 s.h. required for the Ed.S. They may choose electives for specialization in fields such as staff personnel,
business affairs, instruction, theory, legal aspects, curriculum, and information systems.

RESEARCH

All Ed.S. students must complete a formal research paper (4 s.h.) that deals with a specific problem in school administration or instruction.

COMPREHENSIVE EXAMINATION

The Ed.S. comprehensive examination consists of two 3-hour examinations: one in educational administration and the other in a specialized area of educational administration or a related field. Students must be registered in the Graduate College during their comprehensive examination semester if they plan to graduate at the end of that semester.

Ed.S. in Special Education Administration

The Education Specialist program in special education administration is offered jointly with the Department of Teaching and Learning.

The program provides sufficient training and experience to enable graduates to obtain entry-level positions in special education administration. The career focus of the program is on middle management positions such as supervisor and assistant director. The program requires a minimum of 62 s.h. of graduate credit. Successful completion qualifies the student for Iowa licensure as a special education director (State of Iowa Endorsement 239). It also qualifies the student for general administration licensure (State of Iowa Endorsement 171).

Admission to the program is limited by available resources. Three to five new students are admitted each year. Applicants must meet the admission requirements of the Graduate College. They must hold a master’s degree, licensure in an area of teaching exceptional children, qualification for a consultant’s endorsement, and classroom teaching experience or equivalent.

Ph.D. in Educational Administration

The Doctor of Philosophy in educational administration prepares students for leadership positions at all levels of education and administrative practice (school administration, college and university teaching and research). The program is flexible, with individually designed study plans that include course work in related disciplines and research pursuits. Integration of theory and practice is emphasized.

Ph.D. students are expected to achieve competence in educational program planning, finance and governance, leadership theory, evaluation, and research methodologies that include statistical methods. They also must gain expertise in areas of specialized program and personnel policy analysis.

The Ph.D. in educational administration requires a minimum of 90 s.h. of graduate credit. Course content includes prerequisites, a core of common competencies, at least one specialization in the administrative field, cognate study outside the college, research skill development, and a research dissertation.

Common specialization areas are general administration, elementary school administration, secondary school administration, systems analysis and research, school finance, curriculum, legal aspects, theory, and school personnel. Students must demonstrate proficiency in two research tool areas.

ADMISSION

Applicants must meet the admission requirements of the Graduate College. Admission decisions are made through a faculty review process. The program admits a maximum of 10 students each fall semester or preceding summer session. Admission is based on several factors, including recommendations from college or university faculty that speak to the candidate’s scholarship and potential for academic success; cumulative grade-point average; Graduate Record Examination (GRE) General Test scores; and a written statement addressing one of several topics (personal philosophy of education, steps in the professionalization of teaching, current educational issues and their administrative impact, or the role of administration in educational organizations).

Admission is for summer or fall entry; application deadline is December 1. Applicants are notified of admission decisions by February 15.

CORE COURSES

Core courses provide the background necessary for further study, including research in specialized areas. They also develop competencies common to the functional areas of school administration. The four core courses integrate planning of educational personnel programs, analysis of the politics and economics of governance and the financing of public education, evaluation of administrative leadership theories, and options in research methodology and quantitative analysis.
Each core course carries 3 s.h. of credit, is open only to Ed.S. and Ph.D. students, and requires the development and practice of interaction, reading, and writing skills.

Seminars designed primarily for doctoral candidates are offered to supplement each functional core area. Student scholarship is reflected in writing, reading, and research in doctoral seminars.

**COGNATES**

Students who specialize in administration must complete a 9 s.h. cognate outside the College of Education with the advisor’s approval.

**COMPREHENSIVE EXAMINATION**

Ph.D. students must satisfactorily complete a six-hour comprehensive examination in the six common areas of educational administration and a three-hour examination based on the student’s specialization areas and approved by the student’s advisor and the department chair. To be eligible to take the Ph.D. comprehensive examination, students must be completing or must have completed the doctoral core courses and the research tool requirements. Students must be registered in the Graduate College during their comprehensive examination semester. They may not register for more than 3 s.h. of Ph.D. thesis credit that semester, and they may not earn dissertation credit before that semester. No Ph.D. comprehensive examinations are held during summer sessions.

Students pursuing doctoral programs in areas other than educational administration who want to use some aspect of the educational administration program as a concentration area for a comprehensive examination should consult with an advisor in the Department of Educational Policy and Leadership Studies early in their program of study.

Any specialization area open to doctoral students in educational administration is open to other doctoral students who meet the necessary prerequisites for specific courses. Students should complete approximately 12 s.h. in one specialization area before requesting a comprehensive examination. If the student decides to use a field within educational administration as a related comprehensive area, he or she should plan to complete approximately 18 s.h. of diversified course work in educational administration.

**RESEARCH DISSERTATION**

All students must write a formal dissertation prospectus and submit it for approval first by their dissertation advisor and then by their doctoral committee. The student and advisor determine when the prospectus is complete. The prospectus committee meets to make a final evaluation of the prospectus and to decide whether to grant the student approval to proceed. Dissertation prospectus meetings are not held during summer sessions.

Students must accumulate 10 s.h. of dissertation research credit. The doctoral program culminates with final oral defense of the dissertation. Students must be registered at The University of Iowa during the session in which they graduate.

**RESIDENCY**

Each doctoral student must successfully complete two semesters (minimum of 9 s.h. on campus) to fulfill the residency requirement. The following sample Ph.D. program is based on the required minimum of 90 s.h. and assumes that students enter with an M.A. and 36 s.h. of graduate credit.

**Core Requirements**

- 07B:206 Research Process and Design 3 s.h.
- or
- 07B:370 Quantitative Methods for Policy Analysis 3 s.h.
- 07B:224 Organizational Theory and Administrative Behavior 3 s.h.
- or
- 07B:297 Administrative Leadership Theory 3 s.h.
- 07B:291 Administration of Educational Programs and Personnel 3 s.h.
- 07B:294 Politics and Economics of Financing Public Education 3 s.h.

**Other Required Courses**

- Cognate courses selected with approval of advisor 9 s.h.
- Research design and/or statistics and/or qualitative research 6 s.h.
- Thesis 10 s.h.
- Electives chosen to permit specialization (typically two or more doctoral seminars and 12 s.h. or more in a special area)

**Social Foundations of Education**

Social foundations of education is an interdisciplinary program designed to enhance students’ ability to analyze the influence of social, historical, and philosophical forces on the formal educational enterprise. Major areas of
specialization are comparative/international education, history of education, philosophy of education, policy studies, and sociology of education.

Applicants must meet the admission requirements of the Graduate College. A personal interview with one or more members of the social foundations faculty may be required. An undergraduate and/or graduate emphasis in philosophy, the humanities, or the social sciences is strongly recommended. Students must maintain an overall g.p.a. of at least 3.00 to remain in the program.

M.A. in Social Foundations of Education

The Master of Arts in social foundations of education requires a minimum of 32 s.h. of graduate credit. Students complete at least 18 s.h. in social foundations, which should include at least two courses each in three of the five areas of specialization. The remainder of the required course work must be in a concentration area appropriate to the student’s career and academic goals. For example, students interested in philosophy of education usually take courses offered by the Department of Philosophy. Students are not required to write a thesis.

M.A. students must satisfactorily complete a six-hour comprehensive examination covering their three areas of study in the social foundations program and their outside area. The examining committee may elect to hold an oral examination after the exam.

Ph.D. in Social Foundations of Education

The Doctor of Philosophy in social foundations of education requires a minimum of 90 s.h. of graduate credit. Students are required to take a minimum of 24 s.h. in social foundations, which must include at least 12 s.h. in the major specialization area and a minimum of 6 s.h. from each of two additional areas. In addition, students must take at least 9 s.h. of related course work in a concentration area.

Approximately one-third to one-half (30-45 s.h.) of each student’s program is devoted to in-depth course work in disciplines such as history, philosophy, political science, or sociology. These sequences are individually planned by the student with the aid of his or her advisor and suggestions from the appropriate department(s).

Five required research courses are chosen in accordance with the student’s research interests and program. The first must be in quantitative methodologies (e.g., graduate-level statistics, microcomputing, demographic analysis); the second must be in qualitative analysis (e.g., philosophy of science, philosophy of social science, historiography, qualitative or case study methodologies, foreign language); and the third in either quantitative methodologies or qualitative analysis. All students must successfully complete 07B:155 Critical Thinking and 07B:206 Research Process and Design.

Students usually earn 12-15 s.h. for dissertation research.

COMPREHENSIVE EXAMINATION

Ph.D. students must satisfactorily complete an extensive comprehensive examination, including three examinations. The first is in the major area of study; the second is in the other two concentration areas; and the third is in the outside area of study and is prepared by faculty members outside the social foundations program. The exams are followed by an oral examination.

RESEARCH DISSERTATION

All Ph.D. students must write a formal dissertation prospectus and submit it for approval first by their advisor and then by the members of their doctoral committee. Students and their advisors determine when the prospectus is complete.

Students must earn 12 s.h. of dissertation research credit. The doctoral program culminates with a final oral defense of the dissertation. Students must be registered at The University of Iowa during the session in which they graduate.

RESIDENCY

Each doctoral student must successfully complete two semesters (a minimum of 9 s.h. per semester) on campus to fulfill the residency requirement.

Higher Education

Postsecondary and continuing education in the United States represents an extensive and complex set of phenomena. The academic programs in higher education encompass that complexity. Degrees are offered at all levels, with emphasis on both research and practice. Preparation for either teaching or administration is available. The teaching, research, and service activities of the faculty and the work of the graduates of the several degree programs illustrate that education beyond the high school level continues in a variety of ways for all ages and in many different settings.
M.A. in Higher Education

The Master of Arts in higher education prepares students for entry- and mid-level administrative, management, and policy positions in two- and four-year institutions. It is appropriate preparation for positions such as assistant dean, assistant to the president, director, in-service director, and department or program chair in selected areas. It is a nonthesis program.

ADMISSION

Applicants must meet the admission requirements of the Graduate College. Admission is based on grade-point average, Graduate Record Examination (GRE) General Test scores, and promise for professional growth. Transcripts, GRE scores, three letters of recommendation, and a statement of educational goals are required.

Applications must be submitted well in advance of the intended semester of admission.

REQUIREMENTS

The M.A. in higher education requires a minimum of 32 s.h. of graduate credit. Students take six hours of written examinations based on the core, concentration, and specialization, according to the plan of study developed individually for each student.

Concentration areas in which exams may be written include administrative practices, policy studies, and specializations developed in consultation with the advisor. Students majoring in another field who want to complete a related field in higher education and to be eligible to write a related-field examination should consult with a higher education faculty member early in their study. Plans of study are developed individually.

Ed.S. in Higher Education

The Educational Specialist in higher education provides advanced graduate study in administration, policy studies, and specializations developed in consultation with the advisor. The Ed.S. also may be awarded upon completion of a joint program of graduate work in higher education and an academic field, or upon completion of a higher education sequence following a master’s degree program.

ADMISSION

Applicants must meet the admission requirements of the Graduate College. Admission is based on grade-point average, GRE General Test scores, and promise for professional growth. Transcripts, GRE scores, three letters of recommendation, and a statement of educational goals are required.

Applications must be submitted well in advance of the intended semester of admission.

REQUIREMENTS

The Ed.S. in higher education requires 60 s.h. of graduate credit. The program of study must include at least 18 s.h. in professional education and related fields, including an appropriate structured internship determined in consultation with the advisor; at least 28 s.h. in the student’s specialization area and 10 s.h. of electives, all approved by the advisor; and 4 s.h. of research credit in 07B:395 Educational Specialist Research.

COMPREHENSIVE EXAMINATION

The comprehensive examination consists of two 3-hour written exams: one covering the field of higher education and one covering the student’s concentration area. The written exams may be followed by an oral exam.

RELATED FIELD

Students majoring in another field who want to complete a related field in higher education should consult with a higher education faculty member early in their study. Plans of study are developed individually.

TEACHING INTERNSHIP

Program participants teach half-time for a full semester at a cooperating community college under the supervision of an experienced faculty member in that college and with field supervision from The University of Iowa. Interns participate in the academic life of the host community college, and they often gather data for their Ed.S. research project during the internship. Participants must be willing to travel to a community college and reside there for the one-semester program.

Ph.D. in Higher Education

The Doctor of Philosophy in higher education is designed for students interested in serving as administrators, specialists, researchers, or faculty members in postsecondary institutions or related public or private agencies. The program offers concentrations in administration, policy studies, and specializations designed in consultation with the advisor.

ADMISSION

Applicants must meet the admission requirements of the Graduate College. Admission
is based on grade-point average, GRE General Test scores, and promise for professional growth. Transcripts, GRE General Test scores, three letters of recommendation, and a statement of educational goals are required. Ph.D. applicants are considered for admission as completed application materials are received. Admission is for fall or spring entry.

REQUIREMENTS
The Ph.D. in higher education requires 90 s.h. of graduate credit. Each student must complete a series of core courses (22-24 s.h.) and 16-24 s.h. in a concentration area of his or her choice. Students also earn at least 12 s.h. in a related field or up to 30 s.h. in a minor, a requirement that may be met by appropriate previous M.A. course work that complements the student’s concentration area. The dissertation (12-15 s.h.) involves research related to the concentration area.

These four components—core, concentration, minor and/or related fields, and dissertation research—constitute a major part of the typical doctoral program and give students the opportunity to specialize in one or more areas of interest.

In addition, students are required to develop research skills appropriate to their dissertation project. Students may take supplementary course work outside the department related to their program of study.

COMPREHENSIVE EXAMINATION
The Ph.D. comprehensive examination covers the field of higher education and the candidate’s mastery of research skills appropriate to his or her proposed dissertation topic.

Before taking the comprehensive exam, each Ph.D. student prepares a qualifying paper. The paper is a preliminary research proposal that demonstrates the student’s ability to identify a scholarly study topic, formulate a conceptual framework for addressing the topic based on relevant scholarly literature, and set forth a detailed research methodology. The qualifying paper may constitute a preliminary draft of the first three chapters of the dissertation proposal.

Student Affairs Administration and Research
The Doctor of Philosophy in student affairs administration and research provides in-depth preparation for leadership positions in student affairs administration, graduate student affairs preparation programs, and research on college students and student affairs practice. The Ph.D. is offered jointly by the Department of Counseling, Rehabilitation, and Student Development and the Department of Educational Policy and Leadership Studies. For more information, see Counseling, Rehabilitation, and Student Development in the Catalog.

Courses are cross-listed with the College of Business and Department of Counseling, Rehabilitation, and Student Development. For more information, see Counseling, Rehabilitation, and Student Development and the Department of Counseling, Rehabilitation, and Student Development in the Catalog.
07B:134 Education and the World of Work 2-3 s.h.
Relationship between education and work in individual and organizational behavior; and between educational and economic systems; economics, psychology, sociology, education.

07B:150 Gender and Education 3 s.h.
Relationships between the construct of gender and the educational process, gender as a basis of social differentiation, gender and school performance, and gender and educational policy.

07B:153 American Contribution to Educational Philosophy 2 s.h.
American philosophy and its influence on American public education.

07B:154 Education, Race, and Ethnicity 2-3 s.h.
Role of education in ethnic and racial stratification in the United States and other nations; influence of variations in family structure, stratification patterns, institutional constraints in formation of educational aspirations and achievement levels. GE: cultural diversity.

07B:155 Critical Thinking 3 s.h.
Formal and informal logic and probabilistic reasoning; focus on construction and critical analysis of arguments; introduction for students planning research in social foundations.

07B:156 Philosophies of Education 2, 3, 5 s.h.
Principal educational philosophers and philosophies that have influenced Western education; emphasis on how philosophical ideas and conflicts have shaped the educational scene.

07B:157 Ethics in Education 3 s.h.
Major theories of the nature of ethical action and of value judgment; theoretical accounts related to the practical decision making contexts of teaching.

07B:158 John Dewey and Education 2-3 s.h.
Dewey's philosophy of instrumentalism, with emphasis on his theories of knowledge, valuation, aesthetics, especially as applied to educational theory and practice.

07B:165 Introduction to Program and Project Evaluation 3 s.h.
Models, designs, and data collection techniques that guide program evaluation; current issues, controversies. Same as 07P:165.

07B:171 The Community College 2-3 s.h.
Character of community college as a postsecondary institution; functions, students, faculty, control, financing, administration, historical evolution.

07B:175 Introduction to the Economics of Education 3 s.h.
Economic perspective on the education industry and its educational processes; relationships between education and the economy.

07B:176 Demographic Techniques for Educational Research 3 s.h.
Basic demographic concepts, techniques, resources; life table analysis, enrollment projections, demographic measurement, shift-share analysis.

07B:180 Human Relations for the Classroom Teacher 3 s.h.
Influence of social factors such as discrimination, diversity, equity, racism, sexism, and ethnic and socioeconomic pluralism on American schools and classrooms; for teacher education candidates. GE: cultural diversity.

07B:190 Introduction to Postsecondary Teaching 2 s.h.
Current trends and topics in postsecondary occupational education: instruction evaluation, legislation, licensure, curriculum development, professionalism.

07B:195 Research in Cross-Cultural Settings 3 s.h.
Cultural, psychological, logistical issues in conducting research in foreign settings; development of a research plan, recent debates in ethnographic research literature.

07B:200 Educational Leadership Technology 1 s.h.
Foundation and skill practice in technology tasks relevant to educational leadership; experience formulating an education leader's ePortfolio.

07B:201 Foundations of School Administration 3 s.h.
Organization and administration of American public education; principles and concepts of leadership and organizations; socioeconomic, political, and professional factors relating to education and school administration.

07B:202 Information Resources 3 s.h.
Research strategies, information literacy skills, University of Iowa Libraries and other sources for research.

07B:205 Collective Bargaining in Education 3 s.h.
Current status of public sector bargaining in the U.S. collective bargaining system viewed through analysis of historical, legal, institutional perspectives; emphasis on union and management structures.

07B:206 Research Process and Design 3 s.h.
Research process, with emphasis on fundamentals of experimental design, internal and external validity, correlational designs, and statistical inference.

07B:209 Survey Research and Design 3 s.h.
Survey design and implementation; writing and evaluation of survey questions; error in survey research; techniques to reduce error; sampling; postcollection processing of survey data. Prerequisite: 07B:206 or 07P:143 or consent of instructor. Same as 07P:209.

07B:210 Education and Social Change 2-3 s.h.
Role of educational institutions, in connection with political and economic structures, in the process of social change; illumination of theories of social change through case studies of educational systems in both less-developed and industrialized nations. Same as 034:310.

07B:212 Individualized Instruction, Supervision arr.
Readings, special projects, and/or studies that reflect joint instructor/student interest in area of supervision. Prerequisites: consent of advisor and instructor.

07B:213 Individualized Instruction, Finance arr.
Readings, special projects, and/or studies that reflect joint instructor/student interest in area of finance. Prerequisites: consent of advisor and instructor.

07B:214 Individualized Instruction, Law arr.
Readings, special projects, and/or studies that reflect joint instructor/student interest in area of law. Prerequisites: consent of advisor and instructor.

07B:216 Finance in Higher Education 2-3 s.h.
Theory, research, policy, and practice related to public and private funding of higher and postsecondary education.

07B:217 Theory and Practice of Leadership 2-3 s.h.
Theory-based literature and critiques of leadership as applied to educational institutions.

07B:218 The Law and Higher Education 3 s.h.
The role of law as it affects postsecondary institutions; analysis of case law in specific areas of concern to administrators, faculty, staff, students.

07B:220 History and Philosophy of Postsecondary Education 3 s.h.
Major themes and developments in American higher education; ideologies, people, movements that have influenced those developments.
07B:222 Introduction to Policy Analysis and Evaluation 3 s.h.
Theoretical and technical approaches to analysis and evaluation of contemporary public policies.

07B:224 Organizational Theory and Administrative Behavior 3 s.h.
Theories and concepts of organizational behavior applied in structural, organizational, and administrative contexts of American education.

07B:225 Introduction to Public Policymaking 2-3 s.h.
Overview of public policy making and the tools used to create and deliver policy benefits to constituents.

07B:226 Educational Management 2-3 s.h.
Literature and research on management; emphasis on American education.

07B:228 Policy Design and Implementation 2-3 s.h.
Review of literature, emphasis on policy drafting skills for administration and management in education and other settings.

07B:230 Alternative Models of Schooling 2-3 s.h.
Popular alternatives to K-12 and postsecondary education; homeschooling, boarding schools, charter schools, magnet schools; construction of a conceptual framework for understanding alternatives.

07B:236 Administration of Students with Special Needs 3 s.h.
Foundation for and skill practice in tasks performed by directors of special education and others administering to needs of special education students, and economically and socially deprived students; for prospective school administrative personnel. Same as 07U:236.

07B:240 Topics in Education arr.
Seminar for intensive study of one problem, issue, or work field. Repeatable.

07B:242 Research for Effective School Leaders 3 s.h.
Fundamental language of contemporary research; identification and application of basic research components to contemporary educational leadership problems; applicability of research toward effective decision making.

07B:245 The American Professoriate 3 s.h.
Research on college and university faculty members; perspectives on faculty careers, values, beliefs, role in shared governance; tenure process and policies; issues unique to faculty members of color and women faculty members.

07B:260 Contemporary Management Strategies for the K-12 Principal 3 s.h.
Leadership skills and management techniques for daily operation and organization of schools; emphasis on climate, communication, group processes, conflict resolution, curriculum management.

07B:275 Development Policy and Planning in the Third World 3 s.h.
Cross-cultural and interdisciplinary analysis of problems associated with urbanization and development in developing nations. Same as 034:275, 042:275, 044:275, 102:275, 113:275.

07B:285 School and Community Relationships 3 s.h.
Community analysis, politics and education, power groups and influences, school issues and public responses, public relations strategies.

07B:290 Master's Project arr.
Research for the nonthesis program; topic approved by advisor.

07B:291 Administration of Educational Programs and Personnel 3 s.h.
Personnel and program planning examined against statements of educational purpose; interrelationships and internal consistencies of program and staff administration from perspectives of philosophy, psychology, learning theory, sociology, curriculum theory.

07B:293 Individualized Instruction arr.
Readings, special projects, and/or studies that reflect joint instructor/student interest. Prerequisite: consent of instructor.

07B:294 Politics and Economics of Financing Public Education 3 s.h.
Theories, models, research relating to educational governance and finance considered with issues in policy development, analysis, appraisal, planning; their interrelation in American public education.

07B:295 Financial Management of Local School Systems 3 s.h.
School business administration; emphasis on fiscal management, including budgetary procedures, short- and long-range fiscal and facilities planning, management techniques.

07B:297 Administrative Leadership Theory 3 s.h.
Administrative leadership theory drawn from social psychology, sociology, political science, communications, business, and their applications; analysis and formulation of strategies for performing leadership functions in educational administration.

07B:298 Legal Aspects of School Personnel 3 s.h.
Teacher and student: liability, negotiations, rights, privileges, responsibilities of school personnel; principles of law derived from court decisions; constitutional and statutory provisions; for teachers and administrators.

07B:299 Legal Aspects of School Administration 2-3 s.h.
Nonpersonnel concepts in education: organization, property, finance, religion, discrimination, intergovernmental relations; use of constitutional and statutory provisions plus court decisions; primarily for administrators but applicable to teachers.

07B:306 Education in China 2-3 s.h.
Educational development in modern China from social, political, literary perspectives; analysis of post-1949 educational policy shifts.

07B:311 Seminar: Research Topic in Education 2-3 s.h.
Topic submitted by students, faculty. Repeatable.

07B:333 Practicum arr.
Small-scale research projects; supervised experience in planning, design, management, analysis, reporting of research activities; assignments to current and personal faculty research projects; student assumes major responsibility. Prerequisite: consent of instructor.

07B:358 Seminar in the Philosophy of John Dewey 3 s.h.
John Dewey and education; extensive reading of the works of Dewey and of contemporary authors who comment on, interpret, or employ Deweyan philosophy. Prerequisite: 07B:158.

07B:367 Seminar: Current Issues in Special Education Administration arr.
New developments in administration; new content each year. Repeatable. Prerequisites: 07B:236 and consent of instructor.

07B:370 Quantitative Methods for Policy Analysis 3 s.h.
Methodological strategies of quantitative researchers; secondary data analysis for investigation of educational problems and policies; interpretation of results, communication of policy considerations. Prerequisites: 07P:143 and 07P:243, or equivalents; or consent of instructor.

07B:373 Qualitative Research Design and Methods 3 s.h.
Theory and practice of qualitative research design and methodology; exploratory field experience in collection and analysis of data; individual and group observation. Prerequisite: Ph.D. standing.
07B:381 Analysis and Appraisal of Curriculum 3 s.h.
Comprehensive investigation of systematic procedures and resources for identifying and evaluating essential features and constituent elements of a given school district’s curricular offering; state and federal requirements of the curricular program; for persons in administration, curriculum, and supervision programs or positions.

07B:383 Supervision and Evaluation 3 s.h.
Data collection and management skills; data-driven leadership; coaching and feedback techniques; teacher quality legislation; research and best practice regarding teacher evaluation, supervision; teaching standards.

07B:385 Teaching and Learning in Higher Education 3 s.h.
Current theoretical and empirical literature on teaching and learning in higher education; focus on development of effective teaching practice. Same as 07P:385, 650:385.

07B:395 Educational Specialist Research arr.
Individual instruction in the design, research, and writing of a research project of significant quality for upper-level graduate work. Prerequisite: consent of advisor.

07B:400 Early Childhood Leadership Clinical 2-3 s.h.
Classroom instruction and supervised experience with problems in early childhood educational administration; organization, planning, evaluation, decision making. Prerequisite: consent of instructor.

07B:401 Elementary Leadership Clinical 1-3 s.h.
Supervised experience working with problems in educational administration, including organization, planning, evaluation, decision making; individual project in a school setting. Prerequisite: consent of instructor.

07B:402 Secondary Leadership Clinical 1-3 s.h.
Supervised experience working with problems in educational administration, including organization, planning, evaluation, decision making; individual project in a school setting. Prerequisite: consent of instructor.

07B:403 Special Education Leadership Clinical 1-3 s.h.
Supervised experience working with problems in educational administration, including organization, planning, evaluation, decision making; individual project in a school setting. Prerequisite: consent of instructor.

07B:404 Central Administration Clinical 1-3 s.h.
Supervised experience working with problems in educational administration, including organization, planning, evaluation, decision making; individual project in a school setting. Prerequisite: consent of instructor.

Supervision of research, design, and writing of Ph.D. thesis; individual instruction. Prerequisite: consent of advisor.
The Department of Psychological and Quantitative Foundations offers programs in four areas: educational measurement and statistics, counseling psychology, educational psychology, and school psychology. These programs have two general goals: to help students acquire the knowledge and skills necessary to function effectively in settings that require the application of psychological and quantitative principles, and to extend knowledge and understanding of the teaching/learning process as it occurs in a variety of settings. The major emphasis in the M.A. and Ed.S. programs is on the first of these goals; that in the Ph.D. programs is on the second. However, there is some emphasis on both goals in all programs.

**Undergraduate Program**

The department offers a minor in educational psychology. It also offers a course approved for the quantitative or formal reasoning area of the College of Liberal Arts and Sciences General Education Program.

**Minor**

The minor in educational psychology provides an enriched background in educational psychology, education testing, and research methods in education. It does not lead to certification for public school teaching.

The minor requires 15 s.h., including 12 s.h. earned in 100-level courses. Students select a department advisor, who helps them choose appropriate course work.

Contact the Office of Teacher Education and Student Services for more information about the minor.

**General Education Program**

One of the General Education Program requirements for graduation from the College of Liberal Arts and Sciences is successful completion of a course designed to develop skills in quantitative or formal reasoning; 07P:025 Elementary Statistics and Inference may be used to satisfy this requirement.

**Graduate Programs**

The Department of Psychological and Quantitative Foundations offers an M.A. and Ph.D. in educational measurement and statistics; a Ph.D. in counseling psychology; an M.A. and Ph.D. in educational psychology; and an Ed.S. and Ph.D. in school psychology. Each program is described below, with information about degree requirements and application for admission.

Applicants for admission to University of Iowa graduate degree programs must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.
Educational Measurement and Statistics

M.A. in Educational Measurement and Statistics

The Master of Arts in educational measurement and statistics provides students with basic knowledge of educational measurement and research methodology. Graduates find employment in large school systems, state departments of education, test publishing organizations, and research centers. The program also is appropriate for students who wish to broaden their knowledge of measurement and research methodology for personal development or professional improvement.

ADMISSION

Applicants must meet the admission requirements of the Graduate College. They should have a combined verbal and quantitative score of at least 1000 on the Graduate Record Examination (GRE) General Test. Completion of at least one college mathematics course and experience as a teacher or researcher are desirable. Applicants who do not meet these requirements but who show offsetting evidence of superior ability may be granted conditional admission.

Applicants must submit a statement of purpose that explains how the educational measurement and statistics program will help them accomplish their educational and vocational goals.

For information about admission dates, contact the educational measurement and statistics program coordinator.

REQUIREMENTS

The M.A. in educational measurement and statistics with thesis requires a minimum of 30 s.h. of graduate credit (at least 28 s.h. of course work plus 2-4 s.h. of thesis credit); the nonthesis option requires a minimum of 32 s.h. All students must complete a core of courses (approximately 26 s.h.) that includes a graduate-level survey course in educational psychology, elementary and intermediate courses in statistical methods, a course in educational research methodology, and courses in the development and use of evaluation instruments. Students who already have completed equivalent courses at another institution may add more advanced courses to the core.

The six-hour comprehensive examination typically includes three-hour examinations in educational measurement and in applied statistics. With the approval of the M.A. committee, a student may take two-hour examinations in these fields plus a two-hour examination in educational psychology or a substitute area. Three-hour examinations assume a minimum of three courses in the area; two-hour examinations assume a minimum of two courses in the area.

Ph.D. in Educational Measurement and Statistics

The Doctor of Philosophy in educational measurement and statistics prepares students for senior professional positions in educational measurement, evaluation, and statistical methods. Graduates find employment in colleges and universities, state and federal agencies, large public and private school systems, test publishing firms, and research centers.

ADMISSION

Applicants must meet the admission requirements of the Graduate College. They must have a combined verbal and quantitative score of at least 1000 on the Graduate Record Examination (GRE) General Test. They also must hold an M.A. from an accredited institution. At least one year of professional experience in teaching, research, or a related field is desirable. Applicants who expect to concentrate in statistics should have training in college mathematics through differential and integral calculus. Applicants who do not meet these requirements but who show offsetting evidence of superior ability may be granted conditional admission.

Applicants must submit a statement of purpose that explains how the educational measurement and statistics program will help them accomplish their educational and vocational goals.

For information about admission dates, contact the educational measurement and statistics program coordinator.

REQUIREMENTS

The Ph.D. in educational measurement and statistics requires a minimum of 90 s.h. of graduate credit, including at least 12 s.h. of thesis credit.

During the first year of graduate study, the student and his or her advisor plan a program of study appropriate for the student’s interests and vocational objectives. The typical program involves advanced work in educational measurement, data analysis methods, research methodology, and educational psychology. Work
in other departments of the University is encouraged.

Students who concentrate in statistics and intend to teach at the college level take courses in the mathematical theory of statistics. Those who concentrate in educational measurement and evaluation take appropriate courses in curriculum, counseling, or higher education.

All students are required to develop familiarity with computer programming techniques and equipment.

Students who enter the program without completing an M.A. thesis must complete a substitute project before taking the Ph.D. comprehensive examinations.

After completing most of their course work, students take the comprehensive examination, which typically consists of three 3-hour written examinations on educational measurement, applied statistics, and program evaluation, or approved substitute areas, such as educational psychology or mathematical statistics, in which the student has completed at least 9 s.h. of course work. In place of one written examination, the student's committee may assign a project involving analytical and evaluative skills, or research creativity. The written examinations are followed by an oral examination in which the committee seeks further evidence of the student's command of the three fields. A single decision is made on all aspects of the comprehensive examination.

Counseling Psychology

Ph.D. in Counseling Psychology

The Doctor of Philosophy in counseling psychology was granted full accreditation by the American Psychological Association in 1983. Full accreditation was renewed in 2005.

The program’s goal is to prepare counseling psychologists who will promote psychology as a science and contribute to the advancement of the profession. No master’s degree is offered in counseling psychology. The faculty endorses a scientist/practitioner model of training and expects students to become competent researchers and proficient practitioners. Graduates find positions in a variety of settings, including higher education, counseling centers, clinics, private practice settings, and hospitals.

ADMISSION

Applicants must meet the admission requirements of the Graduate College. Preference is given to applicants who have an undergraduate g.p.a. above 3.00 and a graduate g.p.a. above 3.50; an undergraduate major, minor, or substantial course work in psychology; a combined verbal and quantitative score above 1200 on the Graduate Record Examination (GRE) General Test; and previous research and counseling experience.

Application materials must include a Graduate College application form; official transcripts of all previous college work; an official report of GRE General Test scores (the GRE advanced test in psychology is recommended but not required); a personal statement outlining career goals and reasons for seeking advanced training in counseling psychology; and three letters of recommendation from individuals qualified to assess the applicant’s potential for completing the doctoral program. The faculty encourages applications from minorities, women, and persons from a wide range of backgrounds and academic preparation. The program typically accepts between five and eight students each year.

Admission is for fall entry. Application deadline is January 1. Admissions decisions usually are made by March 15. Applicants are invited to campus for interviews before final selection. All students must study full-time.

REQUIREMENTS

The Ph.D. in counseling psychology requires a minimum of 96 s.h. of graduate credit.

Basic Psychology

All students are required to have a thorough grounding in the basic discipline of psychology. This may be achieved through a minimum of 3 s.h. of credit in each of the following four areas: biological bases of behavior, cognitive-affective bases of behavior, social bases of behavior, and history and systems. Students complete an additional 6 s.h. in the area of individual differences.

Statistics and Research Design

Counseling Psychology Core

07P:223/07P:225 Introduction to Counseling Psychology Practice/Research I-II 6 s.h.
07P:235 Multicultural Counseling 3 s.h.
07P:305 Psychotherapy I: Dynamic and Phenomenological Approaches 3 s.h.
07P:306 Psychotherapy III: Career Interventions 3 s.h.
07P:309 Personality Assessment 3 s.h.
07P:310 Intelligence Assessment 3 s.h.
07P:312 Psychological Diagnosis 3 s.h.
07P:356 Processes and Outcomes in Counseling and Psychotherapy 3 s.h.
07P:365 Psychotherapy II: Cognitive and Behavioral Approaches 3 s.h.
07P:434 Practicum in Counseling Psychology 3 s.h.
07P:453 Advanced Practicum in Counseling Psychology (repeatable) 1-3 s.h.
07P:465 Issues and Ethics in Professional Psychology 3 s.h.

Students must enroll in practicums to reach a specified level of client contact, supervision, and additional experience hours. The first practicum’s site typically is University Counseling Service. Subsequent placements at other sites must have prior approval of the counseling psychology faculty. Students must successfully complete one semester of 07P:434 Practicum in Counseling Psychology before enrolling in 07P:453 Advanced Practicum in Counseling Psychology.

Other Requirements

Elective courses are determined in collaboration with the major advisor.

The dissertation research study is planned in collaboration with the doctoral student’s major advisor. Dissertation credit can range from 12 to 15 s.h.

Students spend a calendar year in an internship setting approved by the counseling psychology faculty. The faculty determines student readiness to apply for the internship based on completion of all or almost all required course work, satisfactory progress toward completion of the portfolio requirement, and successful completion of practicum requirements. Internships usually require geographic relocation.

Comprehensive examinations are written in counseling psychology ethics and issues. The comprehensive examination is structured as a component of the portfolio review. For more information, contact the program coordinator.

Students must show appropriate levels of emotional balance and interpersonal skills and act within the American Psychological Association Ethical Principles of Psychologists. For more information, contact the program director.

Educational Psychology

M.A. in Educational Psychology

The Master of Arts in educational psychology is designed to help students become more effective practitioners by enhancing their ability to make responsible and creative decisions about how to help all of their students learn. By providing a broad historical perspective on instructional approaches that work, it also addresses the emphasis on teachers’ accountability for choosing empirically supported approaches.

The M.A. in educational psychology is designed for working educators. Many of the program’s courses are offered in late afternoons, evenings, and summers.

Full-time M.A. students are expected to complete the degree in two years or less. Each student’s progress is evaluated by the faculty after one academic year (two semesters) of study and during subsequent years. Students who do not make satisfactory progress may be required to withdraw from the program.

ADMISSION

Applicants must meet the admission requirements of the Graduate College, including minimum grade-point average. They must have a combined verbal and quantitative score of at least 1000 on the Graduate Record Examination (GRE) General Test; successful applicants usually score higher. Those who majored in psychology as undergraduates are advised to take the GRE advanced test in psychology. International applicants whose first language is not English must submit acceptable scores on the Test of English as a Foreign Language (TOEFL). Teaching experience is desirable but not required.

Application deadline for fall semester entry is February 1. Review of applications for fall semester begins January 1, when applicants who wish to be considered for fellowships and other awards are screened. Application deadline for spring semester entry is October 1. Admission decisions are announced approximately one month after the application deadlines.

Applicants who accept admission or financial aid and do not relinquish either one on or before April 15 are committed not to solicit or accept another offer. Offers made by the program after April 15 include the provision that the offer is
void if the applicant has accepted and continues to hold a previous offer from another program listed in the American Psychological Association publication *Graduate Study in Psychology and Associated Fields*. This policy is consistent with standards set by the association’s Board of Educational Affairs.

**REQUIREMENTS**

The M.A. in educational psychology requires a minimum of 30 s.h. of graduate credit. A thesis is not required. Students develop a program of study in consultation with their advisors.

Students complete a required common core, select educational psychology courses and electives appropriate to their professional goals, and complete a capstone portfolio project. The two core courses, which are taken during the first year, prepare students for the M.A. program. Educational Psychology for Effective Teaching (07P:221) introduces them to a broad sampling of topics in educational psychology (e.g., development, cognition, motivation). Also during the first year, students begin their portfolios, which they continue to build throughout the program and complete during their final M.A. semester.

Full-time M.A. students typically take at least 9 s.h. each semester, with the option of additional summer session work; they usually complete the program in four semesters. Part-time M.A. students take 3-6 s.h. each semester; they usually complete the degree in two or three years.

Students may apply to substitute equivalent course work from another institution or department for required or recommended courses.

**Required Core**

07P:202 Understanding Educational Research 3 s.h.
07P:221 Educational Psychology for Effective Teaching 3 s.h.

**Educational Psychology Courses**

Five of these:
07P:106 Child Development 3 s.h.
07P:111 Motivation 3 s.h.
07P:201 Adapting Instruction to Individual Differences 3 s.h.
07P:203 Learning, Technology, and Effective Teaching 3 s.h.
07P:205 Design of Instruction 3 s.h.
07P:208 Designing Educational Multimedia 3 s.h.
07P:281 Cognitive Theories of Learning 3 s.h.

**Electives**

Students select two electives (6 s.h.) based on their interests and in consultation with their advisors. Electives typically are chosen from areas outside educational psychology.

**Portfolio Project**

The program’s capstone project is a portfolio. Students enroll in 07P:299 M.A. Project: The Portfolio (3 s.h.) during their final M.A. semester.

The portfolio is a creative and highly individual project. Each student’s portfolio reflects his or her own unique learning and synthesis of knowledge. Students begin building the portfolio during their first year, making an entry as they complete each course throughout the M.A. program. Portfolio entries vary widely. For example, the entry for a technology course might include a web site the student developed for the course, while the entry for a development course might detail an intervention program the student constructed to address problems of student aggression.

During enrollment in 07P:299, the student revises and reflects on the portfolio’s contents, then presents the portfolio as the culmination of his or her work throughout the program. The portfolio’s goal is to show how understanding and practical application of educational psychology can help the student become a more effective educator.

**Ph.D. in Educational Psychology**

The Doctor of Philosophy in educational psychology is designed to help students master the core content and methods of educational psychology and acquire the depth of knowledge and methodological sophistication necessary for original research that contributes to the discipline.

Ph.D. students are reviewed annually by the faculty. Students must complete a second-year project by the end of their second academic year in the program. Those who do not fulfill this requirement or who otherwise fail to make satisfactory progress may be required to withdraw.

Students who enter the Ph.D. program without having completed an M.A. thesis are required to complete the independent research course sequence and its assigned research project in either their first or second year. Students who have completed an empirical M.A. thesis that is acceptable to the faculty may omit the independent research sequence and second-year project.
ADMISSION

Applicants must meet the admission requirements of the Graduate College, including minimum grade-point average. They must have a combined verbal and quantitative score of at least 1000 on the Graduate Record Examination (GRE) General Test; successful applicants usually score higher. Those who majored in psychology as undergraduates are advised to take the GRE advanced test in psychology. International applicants whose first language is not English must submit acceptable scores on the Test of English as a Foreign Language (TOEFL). Applicants who do not meet all admission requirements may be granted conditional admission on the basis of other evidence, such as high grade-point average, strong academic preparation, and highly supportive recommendations. Conditional admission is rare.

Admission is for fall entry. Application deadline is January 1; late applications might not be considered. Review of applications begins January 1, when applicants who wish to be considered for fellowships and other awards are screened. Admission decisions are announced approximately six weeks after the application deadline.

Applicants who accept admission or financial aid and do not relinquish either one on or before April 15 may not solicit or accept another offer. Offers made by the program after April 15 include the provision that the offer is void if the applicant has accepted and continues to hold a previous offer from another program listed in the American Psychological Association publication Graduate Study in Psychology and Associated Fields. This policy is consistent with standards set by the association’s Board of Educational Affairs.

REQUIREMENTS

The Ph.D. in educational psychology requires a minimum of 72 s.h. of graduate credit. Students develop a plan of study in consultation with their advisors. Some of the required courses listed below encompass substantive areas within educational psychology. Other required courses include a research practicum, in which students assist with and eventually design and carry out original research, and several courses in measurement and statistics.

Some requirements may be waived for students who begin the Ph.D. program with a master’s degree or with course work from another program.

Course requirements are as follows.

Required Courses:
- All of these (or equivalents):
  - 07P:200 Educational Psychology
  - 07P:201 Adapting Instruction to Individual Differences
  - 07P:205 Design of Instruction
  - 07P:220 Quantitative Educational Research Methodologies
  - 07P:230 Research in Educational Psychology
  - 07P:281 Cognitive Theories of Learning
  - 07P:283 Cognitive Development
  - 07P:335 Advanced Motivation: Laboratory and Classroom Investigation
  - 07P:493 Ph.D. Thesis in Psychological and Quantitative Foundations
- 07P:257 Educational Measurement and Evaluation
- 07P:281 Cognitive Theories of Learning
- 07P:283 Cognitive Development
- 07P:335 Advanced Motivation: Laboratory and Classroom Investigation
- 07P:493 Ph.D. Thesis in Psychological and Quantitative Foundations

Recommended Courses:
- At least four of these:
  - 07P:212 Advanced Life-Span Development
  - 07P:265 Program Evaluation
  - 07P:269 Advanced Personality
  - 07P:270 Cognitive Psychology of Reading
  - 07P:275 Constructivism and Design of Instruction

Electives:
- At least two of these (or equivalents):
  - 07P:243 Intermediate Statistical Methods
  - 07P:244 Correlation and Regression
  - 07P:245 Applied Multivariate Analysis
  - 07P:246 Design of Experiments
  - 07P:247 Nonparametric Statistical Methods
  - 07P:252 Introduction to Multivariate Statistical Methods

Minor Area

Students must complete a minimum of 12 s.h. that constitute a coherent program of course work outside educational psychology and beyond the courses listed above. The minor area may be from a foundation discipline, such as psychology, or in another area of education, such as mathematics education, educational philosophy, or program evaluation. Course work must be at or above the 200-level, may span departments and colleges, and must reflect a plan approved by the student’s advisor.
Second-Year Research Project
As part of their participation in 07P:230 Research in Educational Psychology, Ph.D. students are required to complete a research project of modest scope under the direction of a faculty member. They must present the work in both oral and written form to the program’s faculty and students. First-year Ph.D. students may assist second-year students with data collection and other research activities, and students may design and conduct projects in collaboration with other students. The written report must be completed by the end of the student’s second academic year in the program. Students may re-enroll in this course beyond their second year.

Students who enter the Ph.D. program holding an M.A. or M.S. with an acceptable empirical thesis are exempt from 07P:230 and the project.

COMPREHENSIVE EXAMINATION
The Ph.D. comprehensive examination emphasizes competence and depth in one or more narrowly defined areas of research and theory. Students choose from three options in consultation with their advisor and with the approval of the examining committee, which is made up of five faculty members and is not necessarily the same as the dissertation committee. The options are a review article, an extended research activity, or a traditional comprehensive examination. For details of each option’s requirements, see http://www.education.uiowa.edu/edpsych/doctoral.htm or contact the Department of Psychological and Quantitative Foundations.

School Psychology
The graduate program in school psychology is designed for students seeking a Doctor of Philosophy. All prospective students must apply to the Ph.D. program. Doctoral students may receive an Education Specialist degree when they complete the Ed.S. requirements.

Ed.S. in School Psychology
The Educational Specialist in school psychology provides course work and supervised field experience in education and psychology, enabling graduates to qualify for Iowa licensure as school psychologists (State of Iowa Endorsement 40).

ADMISSION
Applicants must meet the admission requirements of the Graduate College and the school psychology program.

REQUIREMENTS
The Ed.S. in school psychology requires a minimum of 60 s.h. of graduate credit (the total depends on students’ previous course work). It includes courses in psychological foundations, psychoeducational foundations, school psychology, and research methods. Other requirements include a written comprehensive examination and a research paper prepared in conjunction with 07P:342 Research Project in School Psychology (1-6 s.h.).

Ed.S. in School Psychology by Distance Education
The University of Iowa and the University of Northern Iowa Ed.S. in school psychology by distance education is not accepting applicants for 2007-08.

Ph.D. in School Psychology
The Doctor of Philosophy in school psychology was granted full accreditation by the American Psychological Association in 1992; full accreditation was renewed in 2005. The program’s goal is to prepare doctoral-level school psychologists who will promote psychology as a science and contribute to the advancement of the profession. The faculty members endorse a scientist/practitioner model of training and expect students to become competent researchers and proficient practitioners.

ADMISSION
Applicants must meet the admission requirements of the Graduate College. Preference is given to applicants with an undergraduate major in psychology or education, a g.p.a. above 3.00, and combined verbal and quantitative scores above 1000 on the Graduate Record Examination (GRE) General Test. The faculty also encourages applications from individuals with an M.A. or Ed.S. and experience as psychologists or other human service providers.

Applications must include three letters of recommendation, a personal statement of interest and goals, and a writing sample. Complete application materials, including transcripts and test scores, must be received by January 1 to be considered for fall semester admission. Admission decisions usually are made by March 15. The program admits from six to eight students each year.
**Requirements**

The Ph.D. in school psychology requires a minimum of 103 s.h. of graduate credit. All students are required to have a thorough grounding in the basic discipline of psychology, which may be achieved through earning a minimum of 3 s.h. of credit in each of the following areas: biological bases of behavior, cognitive/affective bases of behavior, social bases of behavior, individual differences, and history and systems.

The plan of study is developed by students and their academic advisors. Students are required to complete a portfolio with examples of their work; write comprehensive examinations; carry out a research project equivalent in scope to an M.A. thesis; participate in an internship; and complete a doctoral dissertation, earning a minimum of 10 s.h. in 07P:493 Ph.D. Thesis in Psychological and Quantitative Foundations.

The following courses constitute the school psychology core.

- 07P:224 Prepracticum/Professional Seminar in School Psychology 3 s.h.
- 07P:237 Practicum in School Psychological Service (minimum 150 hours) 3 s.h.
- 07P:238 Assessment of Learning Difficulties (taken with 07P:237) 3-4 s.h.
- 07P:251 Individual Intelligence Testing (taken with 07P:237) 3 s.h.
- 07P:263 Consultation Theory and Practice (taken with 07P:337) 3 s.h.
- 07P:313 Psychopathology in Childhood 3 s.h.
- 07P:315 Psychodiagnosics: Children and Adolescents 3 s.h.
- 07P:337 Advanced Practicum in School Psychology (minimum 750 hours) 12 s.h.
- 07P:352 Seminar: Behavioral Assessment and Evaluation 3 s.h.
- 07P:367 Organizations as Social Systems 3 s.h.
- 07P:380 Practicum in College Teaching (optional) 1-3 s.h.
- 07P:390 Supervision of School Psychology Practicum/Internship 1 s.h.
- 07P:437 Internship in School Psychology (one year full-time or two years half-time, total of 1800 hours) 3 s.h.

Program course work in evaluation is required.

Students must enroll in practicums to reach a specified level of client contact, supervision, and additional experience hours. Placements must have prior approval of the school psychology faculty. Students must successfully complete one semester of 07P:237 Practicum in School Psychological Service before enrolling in 07P:337 Advanced Practicum in School Psychology. Students must adhere to the most recent ethical principles and standards of the American Psychological Association.

**Courses**

*Students may receive credit for only two of these three courses: 22S:002, 22S:008, and 22S:025 (same as 07P:025). Credit for 22S:002 is given only if the course is taken before 22S:008 or 22S:025 (same as 07P:025).*

- **07P:025 Elementary Statistics and Inference** 3 s.h.
  - Graphical techniques for presenting data; descriptive statistics; sampling distribution models; logic of statistical inference; interval estimation procedures; tests of significance; correlation and prediction. GE: quantitative or formal reasoning. Prerequisite: 22M:001 or equivalent. Same as 22S:025.
- **07P:075 Educational Psychology and Measurement** 3 s.h.
  - Principles and classroom applications of cognitive development, social development, learning, cognition, individual differences, motivation, testing, assessment.
- **07P:101 Methods of Student Assessment** arr.
  - Development, use, evaluation of student assessment methods: written tests, performance and product assessments, observation, oral questioning, checklists; grading and reporting; administration and use of standardized tests of achievement and other cognitive abilities.
- **07P:106 Child Development** 3 s.h.
  - Theories and research findings about typical course of child development, differences in development. Prerequisite: junior standing or consent of instructor.
- **07P:111 Motivation** 3 s.h.
  - Principles of motivation and their application to applied settings, especially to the classroom as teachers try to motivate students.
- **07P:115 Introduction to Counseling Psychology** 3 s.h.
  - Historical and philosophical foundations of counseling psychology; theories, application, and work of counseling psychologists.
- **07P:120 Psychology of Giftedness** 3 s.h.
  - Theories of learning, child development, motivation; issues unique to gifted education. Same as 07C:120.
- **07P:121 Assessment of Giftedness and Academic Talent** 3 s.h.
  - Interpretation of standardized tests and other measurement instruments used to identify academic talent and program effectively for grades K-12; ability, aptitude, achievement tests; current issues in the uses of various instruments. Same as 07C:121.
- **07P:122 Math Programming for High Ability Students** 1 s.h.
  - Unique challenges and opportunities confronted by teachers of high-ability students; theory and practice, development of program outlines for implementation. Same as 07S:122.
- **07P:125 Counseling and Psychological Needs of the Gifted** 1 s.h.
  - Psychological aspects of giftedness, counseling techniques appropriate for gifted children, adolescents; socio-emotional concerns, career development, underachievement. Same as 07C:125.
- **07P:126 Cognitive and Affective Needs of Underachieving Gifted** 1 s.h.
  - Diagnostic strategy for identifying types of underachievement, teaching and counseling interventions appropriate for each. Same as 07C:126.
07P:127 Research and Theory in Talent/ Giftedness 1 s.h.
Symposium. Same as 07C:127.

07P:128 Neuroscientific Implications for Gifted 1 s.h.
Neurology of behavior and neurodegenerative disease; the
psychology of learning and memory, its application to gifted
education.

07P:129 Creativity: Issues and Applications in Gifted Education 1 s.h.
Same as 07C:129.

07P:133 The Adolescent and Young Adult 3 s.h.
Psychological and social aspects of adolescence and young
adulthood; emphasis on theory, research, practical applications.

07P:134 Parent-Teacher Communication 1-3 s.h.
Realities of working with parents; interpersonal skills; options
for parent support services. Same as 07E:134, 07U:134.

07P:136 Home/School/Community Partnerships 3 s.h.
Issues related to collaboration among families, educators,
community members in implementing school programs. Same as

07P:143 Introduction to Statistical Methods 3 s.h.
Analysis, interpretation of research data; descriptive statistics;
introduction to probability, sampling theory, statistical inference
(binomial, normal distribution, t-distribution models); linear
correlation, regression. Same as 22S:102.

07P:148 Bayesian Statistics 3 s.h.
Bayesian statistical analysis with focus on applications;
comparison of Bayesian and frequentist methods; Bayesian model
specification, choice of priors, computational methods; hands-on
Bayesian data analysis using appropriate software; interpretation,
presentation of analysis results. Prerequisite: 22S:120 or
Equivalent. Same as 22S:138.

07P:150 Introduction to Educational Measurement 3-4 s.h.
Test development procedures, reliability, validity, item writing,
evaluation of item and test characteristics; classroom assessment
methods; interpretation of scores from standardized achievement
and aptitude tests; no background in statistics assumed.

07P:165 Introduction to Program and Project Evaluation 3 s.h.
Skills and knowledge required for conducting evaluations of
products, projects, and programs; recent scholarship on evaluation
and project management. Same as 07B:165.

07P:193 Special Readings and Projects arr.
Supervised individual study. Prerequisites: senior standing and
consent of instructor.

07P:199 Topical Workshop in Psychological and Quantitative Foundations arr.
School, educational, and counseling psychology and allied
disciplines; for professionals and graduate students in education,
mental health, social services, related fields. Repeatable.

07P:200 Educational Psychology 3 s.h.
Psychology of the teaching/learning process; developmental
concepts, social processes, language and thought; individual
differences in abilities and achievements; theory and research on
reading, writing, mathematics, thinking, studying.

07P:201 Adapting Instruction to Individual Differences 3 s.h.
Principles of adapting instruction to meet learners’ needs;
cognitive, personality, and motivational differences that moderate
the effectiveness of instructional arrangements; instruction that
meets the needs and goals of learners.

07P:202 Understanding Educational Research 3 s.h.
Issues that underlie the validity of educational research; varied
approaches to research.

07P:203 Learning, Technology, and Effective Teaching 3 s.h.
Theories and issues in technology’s use in learning and teaching;
project to design a technology-supported learning solution for an
educational problem.

07P:205 Design of Instruction 3 s.h.
Introduction to processes used to design, develop, implement,
and evaluate effective instruction; projects.

07P:206 Advanced Child Development 3 s.h.
Theories of social and cognitive development; in-depth study of
several current controversies in the field. Prerequisite: 07P:106 or
equivalent or consent of instructor.

07P:207 Evaluation of Children with ADHD and LD arr.
Same as 07O:245.

07P:208 Designing Educational Multimedia 3 s.h.
Theory, design, and evaluation of instructional software.

07P:209 Survey Research and Design Same as 07B:209.
3 s.h.

07P:210 Social Psychology of Disability 3 s.h.
Social psychology of disability; issues in mental/physical disability
from individual, societal perspective; advanced research seminar
with emphasis on clarifying research, theoretical strategies in
psychology of disability. Prerequisites: Ph.D. standing and consent
of instructor. Same as 07O:250.

07P:212 Advanced Life-Span Development 3 s.h.
Selected theories and research in development across the life
span, especially from adolescence through adult life; focus
on relevance for instruction and counseling.

07P:215 Web-Based Learning 3 s.h.
Theory and practice of designing web sites to support or deliver
instruction; student team project to create an instructional web
site that integrates the theory and principles from class readings.
Prerequisites: 07P:208 and consent of instructor.

07P:217 Seminar in College Teaching 1-3 s.h.
Preparation for college teaching; for graduate students planning to
teach.

07P:220 Quantitative Educational Research Methodologies 3 s.h.
Procedures for planning, conducting, reporting research;
evaluation of current methods in educational research;
quantitative methods. Prerequisite: 07P:143.

07P:221 Educational Psychology for Effective Teaching 3 s.h.
How educators use educational psychology theories and research
to develop expertise in teaching and learning; cognition,
motivation, technology, individual differences.

07P:223 Introduction to Counseling Psychology Practice/Research I 3 s.h.
Historical, theoretical, professional, scientific traditions associated
with counseling psychology; professional ethical principles.
Prerequisite: consent of instructor.

07P:224 Prepracticum/Professional Seminar in School Psychology 3 s.h.
Preparation for practice; historical look at school psychology;
current rules; overview of issues, ethics. Prerequisite: consent of
instructor.

07P:225 Introduction to Counseling Psychology Practice/Research II 3 s.h.
Learning and performance of basic helping skills; integration of
these skills with counseling theories, broader counseling
strategies; laboratory-based. Prerequisite: consent of instructor.
07P:230 Research in Educational Psychology 1-3 s.h.
Experience in conducting or assisting in educational psychology empirical research project; activities from conceptualization through data generation; preparation and presentation of research report. Repeatable. Prerequisite: graduate standing in educational psychology or consent of instructor.

07P:234 Advanced Multimedia Design 3 s.h.
Theory and development of multimedia programs that use video, CD-ROM, computer animation, digital audio; emphasis on team-development of software. Prerequisite: consent of instructor.

07P:235 Multicultural Counseling 3 s.h.
Theoretical and practical aspects of the cultural adaptation process; implications for interventions in diverse populations; issues. Prerequisite: counseling skills introductory course.

Supervised practicum in psychological and educational evaluation in school settings. Repeatable. Prerequisites: 07P:238, 07P:251, and consent of instructor.

07P:238 Assessment of Learning Difficulties 3-4 s.h.
Same as 07U:238.

07P:242 Selected Applications of Statistics 3 s.h.
Application and interpretation of correlation techniques, chi-square, t- and F-tests, interval estimation, simple cases of analysis of variance. Prerequisite: 07P:143.

07P:243 Intermediate Statistical Methods 4 s.h.
Foundation for more advanced applied courses; logic of statistical inference, chi-square, and other tests of statistical hypotheses; small sample error theory, interval estimates, introduction to analysis of variance, selected nonparametric methods. Prerequisite: 07P:143 or equivalent. Same as 22S:157.

07P:244 Correlation and Regression 4 s.h.
Correlation techniques; selected bivariate procedures, multiple, partial, curvilinear correlation; multiple linear regression; sampling theory applied to regression analysis and correlation coefficients; simple causal models. Prerequisite: 07P:243 or equivalent. Same as 22S:157.

07P:245 Applied Multivariate Analysis 3 s.h.
Multivariate analyses of variance, discriminant analysis, factor analysis; use of multivariate statistical computer packages. Prerequisites: 22S:152 and 22S:158, or equivalents; and facility with matrix algebra. Same as 22S:161.

07P:246 Design of Experiments 4 s.h.
Theory and methods in the planning and statistical analysis of experimental studies; testing of hypotheses about linear contrasts among means in single-factor and multifactor, completely randomized, and repeated measurement designs. Prerequisite: 07P:243 or equivalent. Same as 22S:159.

07P:247 Nonparametric Statistical Methods 3 s.h.
Selected nonparametric methods; one- and two-sample location tests and estimation methods, measures of association, analyses of variance; emphasis on relationships to classical parametric procedures. Prerequisite: 07P:243 or 22S:102 or consent of instructor. Same as 22S:163.

07P:249 Factor Analysis and Structural Equation Models 3 s.h.
Foundations of exploratory and confirmatory factor analysis methods; least squares and maximum likelihood approaches; problems in factor extraction, rotation, interpretation; structural equation models via LISREL; assumptions and limitations of alternative approaches. Prerequisite: 07P:252 or equivalent or consent of instructor.

07P:250 Computer Packages for Statistical Analysis 2-3 s.h.
Computer programs and systems designed to execute statistical analysis (SAS, SPSS, BMDP, and others); lectures on regression techniques, analysis of variance, multivariate techniques; practice in entering data, calling up desired programs, interpreting computer output. Prerequisites: 07P:243 or equivalent, and elementary knowledge of computer programming.

07P:251 Individual Intelligence Testing 3 s.h.
Administration of individual intelligence tests; interpretation of test results; issues in psychological testing; factors that influence performance. Prerequisites: 07P:143 or 07P:150, and consent of instructor.

07P:252 Introduction to Multivariate Statistical Methods 3 s.h.
Selected topics in multivariate analysis, including multivariate significance tests, principal components and factor analysis, discriminant analysis, canonical correlation, multivariate analysis of variance (MANOVA). Prerequisite: 07P:244 or consent of instructor.

07P:255 Construction and Use of Evaluation Instruments 3 s.h.
Design and construction of measures used in educational evaluation; achievement tests, attitude scales, performance measures, questionnaires; emphasis on methods of instrument development and evaluation of instrument characteristics. Prerequisites: 07P:143 and 07P:257, or equivalents.

07P:257 Educational Measurement and Evaluation 3 s.h.
Evaluation and use of standardized tests and inventories in individual and group assessment; analyzing reliability, validity, normative data; interpreting measures of achievement, intelligence, aptitude, interests, attitudes, personality; current issues; for counselors, administrators, teachers, measurement specialists. Corequisite: 07P:143 or equivalent.

07P:258 Theory and Technique in Educational Measurement 3 s.h.
Mathematical foundations, principal results, and applications of classical test theory; perspectives on conditional error variance; binomial error model and applications; introduction to generalizability theory; advanced measurement topics. Prerequisite: 07P:243 or 07P:257 or consent of instructor.

07P:259 Scaling Methods 3 s.h.
Unidimensional and multidimensional scaling techniques; introduction to available computer programs for scaling; applications in educational and psychological research. Prerequisite: 07P:252 or equivalent. Recommended: 07P:249.

07P:262 Item Response Theory 3 s.h.
Theoretical foundations and practical applications; mathematical models and estimation techniques; emphasis on current applications and issues in testing; computer estimation programs. Prerequisites: 07P:243 and 07P:257.

07P:263 Consultation Theory and Practice 2-3 s.h.
Same as 07C:263.

07P:265 Program Evaluation 3 s.h.
Theoretical issues and considerations in evaluation of educational and social programs; evaluation design, methodology; metaevaluation; evaluation utilization.

07P:269 Advanced Personality 3 s.h.
Current research and research methods in the psychology of personality; emphasis on individual differences in personality that have implications for teaching, learning, well-being.

07P:270 Cognitive Psychology of Reading 3-4 s.h.
Theories and models of the reading process, of its development, and of individual and cross-language differences; review of selected research studies from recent, current literature. Prerequisite: consent of instructor.

07P:275 Constructivism and Design of Instruction 3 s.h.
Theoretical foundations of constructivism; application of constructivist principles to the design of instruction.
07P:281 Cognitive Theories of Learning 3 s.h.  
Theories of learning and cognition as they relate to education;  
application of cognitive research to subject matter learning  
(mathematics, science, reading, writing). Prerequisite: 07P:200 or  
equivalent.

07P:283 Cognitive Development 3 s.h.  
Information-processing, dynamic systems, social-contextual, and  
neo-Piagetian theories of cognitive development and their  
educational implications; individual differences in cognitive  
development.

07P:285 Instructional Computer Simulations 3 s.h.  
Theory and development of computer-based simulations, games;  
research on design characteristics and effectiveness; design,  
development, evaluation of simulation software by student teams.  
Prerequisites: 07P:234 and consent of instructor.

07P:292 Supervised Research in Educational Psychology 1-3 s.h.  
Identification of research problems, development of research  
designs and materials, conducting of research studies;  
faculty-guided activity or seminars. Prerequisite: consent of  
instructor.

07P:293 Individual Instruction in Psychological and Quantitative Foundations arr.  
Prerequisite: consent of instructor.

07P:299 M.A. Project: The Portfolio 3 s.h.  
Individual project; reflection, revision, and presentation of  
portfolio entries to show how the student translates educational  
psychology content into his or her own effective teaching.

07P:301 Human Abilities 3 s.h.  
Psychology of abilities required by or developed through  
schooling; theories of cognitive abilities, age, sex, ethnic  
differences; cultivation of intelligence through schooling.  
Prerequisite: 07P:143.

07P:305 Psychotherapy I: Dynamic and Phenomenological Approaches 3 s.h.  
Major psychodynamic and existential-phenomenological theories  
of personality; emphasis on implications for psychotherapy.

07P:306 Psychotherapy III: Career Interventions 3 s.h.  
Foundations of career interventions; emphasis on major  
assessment instruments (vocational interests, values,  
abilities/skills, personality) and career counseling processes, skills,  
techniques.

07P:309 Personality Assessment 3 s.h.  
Standardized and projective techniques for personality  
assessment; preparation for competent administration and  
interpretation of varied tests and measures.

07P:310 Intelligence Assessment 3 s.h.  
Standardized intelligence testing; preparation to administer and  
interpret intelligence tests for children and adults.

07P:311 Practicum in Counseling and Psychological Services for Gifted Students 1-6 s.h.  
Educational, personal, and family issues. Prerequisites: 07C:178  
or equivalent, and consent of instructor. Same as 07C:311.

07P:312 Psychological Diagnosis 3 s.h.  
DSM IV categories, related diagnostic issues. Prerequisite: consent  
of instructor.

07P:313 Psychopathology in Childhood 3 s.h.  
Current theories regarding the development of psychopathology  
in children and adolescents; current approaches to treatment for  
disorders in children and adolescents.

07P:315 Psychodiagnosics: Children and Adolescents 3 s.h.  
Link between personality theory, child and adolescent assessment;  
interpretation, integration of assessment information; record  
reviews, interviews, objective tests, projective techniques.  
Prerequisites: 07P:238 and 07P:251, or equivalents.

07P:316 Psychopathology in Childhood 3 s.h.  
Descriptions and theories regarding development of  
psychopathology in children and adolescents; current empirically  
related interventions for specific disorders. Prerequisite: consent  
of instructor.

07P:320 History and Systems of Psychology 3 s.h.  
Philosophical underpinnings of psychology, early systems in  
psychology, developments in the 20th century.

07P:331 Seminar: Educational Psychology I: Current Topics arr.  
Intensive investigation of a specific research topic. Prerequisite:  
consent of instructor.

07P:335 Advanced Motivation: Laboratory and Classroom Investigation 3 s.h.  
Contemporary theories of motivation, with focus on theory and  
application; in-depth study concentrating on one approach to  
motivation; student project.

07P:337 Advanced Practicum in School Psychology arr.  
Supervised experience in psychological interventions,  
consultation, counseling in school and clinic settings.  
Prerequisites: 07P:237, 07P:238, 07P:251, and consent of  
instructor.

Experience in research facilities on campus; writing research  
questions, planning a research study, writing a research article.  
Prerequisite: consent of instructor.

07P:345 Seminar in Psychoeducational Interventions I 3 s.h.  
Interventions used by school and support system personnel to  
address academic skill deficits among children, adolescents;  
instructional design and delivery problems associated with  
deficits.

07P:346 Seminar in Psychoeducational Interventions II 3 s.h.  
Interventions used by school and support system personnel to  
address behavioral and social/emotional status of children,  
adolescents.

07P:347 Home/School/Community: System Interventions 3 s.h.  
Interventions used by school and support system personnel; focus  
on work with parents, siblings. Same as 07C:347.

07P:348 Family Interventions 3 s.h.  
Theoretical and research literature on interventions with families  
of school-age children; opportunities to engage in intervention  
activities.

07P:350 Seminar in Evaluation 2-3 s.h.  
In-depth examination of selected topics. Prerequisites: two  
courses in evaluation, including 07P:265; or consent of instructor.

07P:352 Seminar: Behavioral Assessment and Evaluation 3 s.h.  
Same as 07U:252.

07P:354 Seminar: Experimental Approaches in Counseling Research arr.  
Application of experimental methodology to study of counseling  
and vocational phenomena. Repeatable. Prerequisite: consent of  
instructor.

Critical examination of current issues and problems of the  
professional worker in the field of educational measurement and  
evaluation as reflected in research literature, other professional  
communication media.
07P:356 Processes and Outcomes in Counseling and Psychotherapy 3 s.h.
Advanced knowledge of the state of process and outcome research on psychotherapeutic procedures. Prerequisites: Ph.D. candidacy in appropriate field and consent of instructor.

07P:358 Equating and Scaling of Educational Tests 3 s.h.
Designs and methods, including linear, equipercentile, and item response theory methods; emphasis on concepts, applications to testing programs, research. Prerequisites: 07P:243 and 07P:257, or consent of instructor.

07P:365 Psychotherapy II: Cognitive and Behavioral Approaches 3 s.h.
Major cognitive and behavioral theories of personality and psychotherapy; emphasis on implications for clinical practice. Prerequisite: consent of instructor.

07P:367 Organizations as Social Systems 3 s.h.
Social aspects of behavior in organizations; behavioral science theory and research on organizations, system change, transformation, leadership.

07P:375 Topics in Educational Measurement and Statistics 1-3 s.h.
Repeatable.

07P:380 Practicum in College Teaching arr.
Supervised college teaching experience in courses related to major academic areas, in collaboration with faculty course instructors.

07P:385 Teaching and Learning in Higher Education 3 s.h.
Current theoretical and empirical literature on teaching and learning in higher education; emphasis on development of effective teaching practice. Same as 07B:385, 650:385.

07P:390 Supervision of School Psychology Practicum/Internship arr.
Experience supervising school psychology practicum or internship students. Prerequisites: Ph.D. student standing and consent of instructor.

07P:393 M.A. Thesis in Psychological and Quantitative Foundations arr.
Prerequisite: consent of instructor.

07P:394 Supervised Research in Counseling Psychology 1-3 s.h.

07P:434 Practicum in Counseling Psychology 3 s.h.
Supervised practice in counseling services. Prerequisites: 07P:223 and 07P:225, or equivalents; and consent of instructor.

07P:437 Internship in School Psychology arr.
Supervised internship for Ph.D. students in school psychology. Prerequisites: completion of required courses and consent of instructor.

07P:450 Practicum in Program Evaluation arr.
Supervised experience in designing and implementing components of program evaluations. Prerequisites: two courses in program evaluation, including 07P:265; and consent of instructor.

07P:453 Advanced Practicum in Counseling Psychology 1-3 s.h.
Supervised work in counseling services. Repeatable. Prerequisites: 07P:434 or equivalent, and consent of instructor.

07P:455 Generalizability Theory 3 s.h.
Analysis of variance methods applied to estimation of components of various types of measurement error variance; basic concepts, mathematical foundations, models, assumptions, designs, applications; relationships with other measurement theories. Prerequisite: 07P:246 or 07P:258 or consent of instructor.

07P:465 Issues and Ethics in Professional Psychology 3 s.h.
Professional ethics; issues in professional practice of psychology.

Prerequisite: consent of instructor.

Instructional Design and Technology

07W:293 Independent Study: Instructional Design for Majors arr.

Prerequisite: consent of instructor.
Chair: Gary M. Sasso
Professors: Don D. Coffman, Anne DiPardo, Greg Hamot, Brian Hand, Jo M. Hendrickson, Peter Hilebowitch, Edward L. Pizzini, Paul M. Retish, Gary M. Sasso, Bonnie Sunstein, Steve Thunder-McGuire, Rahima C. Wade, Kathryn Whitmore
Associate professors: Richard T. Cary, Carolyn Colvin, Michael E. Everson, Bruce Fehn, Linda G. Fielding, L. Kathy Heilenman, Geoffrey Hope, Carlos X. Rodriguez, Leslie L. Schrier, Rachel Williams
Clinical associate professors: John D. Dunkhase, Ellen Herman
Assistant professors: Alicia Alonzo, Cos Fi, Soonhye Park, Bill Therrien
Clinical assistant professors: Vickie Burketta, Pamela Ries, Amy Shoults
Undergraduate degrees: B.A., B.S. (granted through College of Liberal Arts and Sciences)
Graduate degrees: M.A.T., M.A., M.S., Ph.D.
Web site: http://www.education.uiowa.edu/teach

Department of Teaching and Learning programs prepare graduates for positions in public schools, local and state education agencies, clinical settings, and institutions of higher education. All licensure programs are approved by the Iowa Department of Education. Undergraduate students pursuing a major in elementary education must meet the College of Liberal Arts and Sciences requirements for the Bachelor of Arts or Bachelor of Science; see the CLAS Student Academic Handbook.

Teacher Education and Licensure/Certification

Before taking required professional education courses, undergraduate students must be admitted to the Teacher Education Program (TEP). The application for admission should be submitted to the College of Education Office of Teacher Education and Student Services. Deadlines for application are March 15 and October 15 for admission to restricted course work in the following semester. Each program reviews applications and chooses a limited number of students for admission.

In order to be considered for admission, students must have completed a minimum of 40 s.h. of course work with a University of Iowa and cumulative g.p.a. of at least 2.70 at the time of application. For some subject areas, applicants must meet additional criteria. A limited number of applicants are accepted into each Teacher Education Program, so a 2.70 g.p.a. does not ensure admission. Admission decisions are based on grade-point average in the major and other criteria relevant to teaching success.

The application process includes submission of an application form, a writing sample, two letters of recommendation, and an Iowa criminal history check request form. Applicants are required to submit PRAXIS I test scores in mathematics, reading, and writing. Scores from either the PRAXIS computer-based tests (CBT) or the PRAXIS Pre-Professional Skills Tests (PPST) are accepted. Applicants must have a composite score of at least 522, with a minimum score of 170 on any single portion of the test. Applicants must also submit verification of completion of a 10-hour volunteer experience in a K-12 classroom setting.

If at any time after admission a student’s University of Iowa and/or cumulative g.p.a. falls below 2.70, he or she is placed on probation for one semester. Students who do not attain a 2.70 g.p.a. during the probationary semester are dropped from the TEP. Students should consult a College of Education advisor in their program area, or the Office of Teacher Education and Student Services for more information on admission criteria.

Graduate students who apply to the Graduate College for a teacher licensure program must apply separately for admission to the Teacher Education Program. Deadlines for application to either program are October 15 or March 15 for admission to restricted course work in the following semester. Graduate and postbaccalaureate students may submit Graduate Record Exam (GRE) General Test scores instead of PRAXIS I scores. A combined verbal and quantitative score of at least 900 is required.
A limited number of applicants are accepted into each Teacher Education Program, so meeting the Graduate College admission requirements does not ensure admission. Admission decisions are based on grade-point average in the undergraduate major and other criteria relevant to teaching. Upon admission to the TEP, students are assigned an education advisor.

**Admission to Student Teaching**

Admission to the student teaching semester requires a separate application. Applications must be submitted one year before the student teaching semester. Applicants’ credentials and academic and professional progress are reviewed to ensure that the student is qualified for placement in the profession. Verification that the student meets all specific program area requirements is made when the student applies for student teaching.

Consult a College of Education advisor or the Office of Teacher Education and Student Services for information about admission and requirements for student teaching in specific licensure programs.

**Elementary Education**

The undergraduate elementary education program is designed to prepare students to teach kindergarten through grade 6. In Iowa, the elementary specialization areas are designated as kindergarten through grade 8.

The College of Liberal Arts and Sciences and elementary education requirements total 113-139 s.h. Students who meet or test out of the General Education Program requirements in rhetoric, foreign language, mathematics, and other areas may be able to complete their program requirements with as few as 113 s.h.

A passing Praxis II score on the elementary content test is required for all students seeking elementary licensure in Iowa and for satisfaction of requirements for an approved Teacher Education Program.

**FOUNDATION COURSES**

These four courses must be completed before methods courses (Block A/B below) are begun.

- **07E:090 Orientation to Elementary Education** 1-2 s.h.
- **07E:100 Foundations of Education** 3 s.h.
- **07E:102/07S:102 Technology in the Classroom** 2 s.h.
- **07P:075 Educational Psychology and Measurement** 3 s.h.

**METHODS COURSES**

**Block A**

Three courses taken concurrently:
- **07E:123 Reading and Responding to Children’s Literature** 2 s.h.
- **07E:160 Methods: Elementary School Language Arts** 3 s.h.
- **07E:164 Methods: Elementary School Reading** 3 s.h.

**Block B**

Three courses taken concurrently:
- **07E:161 Methods: Elementary School Social Studies** 3 s.h.
- **07E:162 Methods: Elementary School Science** 3 s.h.
- **07E:163 Methods: Elementary School Mathematics** 3 s.h.

**Methods Practicum**

Students complete a semester-length practicum and classroom management in their area of specialization after completing the appropriate methods block.

- **07E:170 Classroom Management** 2 s.h.
- **07E:172 Reading Instruction: Teaching Practicum** 4 s.h.
- **07E:174 Elementary Education: Practicum** 4 s.h.

**OTHER REQUIREMENTS**

- **07B:180 Human Relations for the Classroom Teacher** 3 s.h.
- **07E:127 Physical Education and Health for Elementary Teachers** 2 s.h.
- **07U:100 Foundations of Special Education** 3 s.h.
- **07E:120 Methods and Materials: Music for the Classroom Teacher** 2 s.h.
  or
- **07E:122 Methods and Materials: Art for the Classroom Teacher** 2 s.h.
- **22M:006 Logic of Arithmetic** 3 s.h.
  or
- **22M:012 Theory of Arithmetic** 3 s.h.

**AREA OF SPECIALIZATION**

Students must complete a minimum of 24 s.h. in one of the following areas of specialization: art, English language arts, ESL, hearing impaired, history, mathematics, music, reading, science, speech communication/theatre, or social science. Courses in the area of specialization may be taken pass/nonpass if they are offered with the pass/nonpass option.
The special education Instructional Strategist I: Mild/Moderate (K-8) area of specialization requires separate admission. Applicants must already be admitted to the elementary education program. Applications for the specialization program are due July 15. Twenty-four students are admitted each year.

Requirement lists for each K-8 area of specialization are available from the Department of Teaching and Learning office.

**STUDENT TEACHING**

Students seeking initial licensure must complete a minimum of 14 s.h. of student teaching.

- 07E:190 Supervised Teaching in the Elementary School: Interactive Phase 7 s.h.
- 07E:191 Supervised Teaching in the Elementary School: Pre- and Post-Active Phase 7 s.h.

**TRANSFER STUDENTS**

Before they student teach, transfer students must complete 07E:090; 07E:102; two courses chosen from 07E:123, 07E:160, 07E:161, 07E:162, 07E:163, and 07E:164 at The University of Iowa; and a practicum. Transfer students must follow the normal application procedures. In addition, they are asked to complete a disclosure statement describing all practicum experiences they have taken at other institutions and a release statement allowing the College of Education Office of Teacher Education and Student Services to contact all institutions where they have done professional preparatory work.

**ADDING ENDORSEMENTS TO LICENSES**

As an addition to the K-6 Iowa endorsement, students may complete requirements for an Iowa subject area endorsement (see “Area of Specialization,” above). This option is not open to students who choose the Strategist I area of specialization.

The University of Iowa also offers an added endorsement in talented and gifted education.

**Secondary Education**

Undergraduate students seeking secondary school licensure/certification are degree candidates in the College of Liberal Arts and Sciences. They must complete the requirements for the Bachelor of Arts, Bachelor of Science, Bachelor of Music, or Bachelor of Fine Arts degrees; see the CLAS Student Academic Handbook.

Graduate students may be admitted to a program leading to teacher licensure/certification as “certification only” candidates in the Graduate College. They are subject to all Graduate College policies; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog. Eligible graduate students also may complete initial teacher licensure/certification requirements by pursuing an M.A.T. in English education, foreign language education, or science education, or an M.A. in social studies (program B).

Licensure/certification requires a major of at least 30 s.h. of course work in a subject area taught in the secondary school. Course requirements for each major are available from the Department of Teaching and Learning office. Candidates for secondary school teaching licensure/certification also may receive approval to teach in additional subject areas by completing an approved program of 12-24 s.h. or more of course work in those areas.

Secondary school teacher preparation programs are provided in the following areas:

- Art
- *Coaching
- English
- *English as a second language
- Foreign languages—Chinese, French, German, Italian, Japanese, Latin, Russian, Spanish
- *Hearing impaired
- *Journalism
- Mathematics
- Music
- *Reading
- Science, including *physical science, biological sciences, chemistry, *general science, physics, earth science, and 9-12 all science
- Social science, including anthropology, economics, geography, history, political science, psychology, and sociology
- *All social sciences
- *Talented and gifted
- *Available as an additional approval area only; a major in one of the other areas is required for licensure.

An Iowa secondary teaching license qualifies holders to teach in grades 5-12. Students planning to teach art or music typically complete a program that prepares them for both elementary- and secondary-level licensure.

Secondary teacher preparation programs in mathematics and foreign language also offer a program that leads to licensure/certification as a subject matter specialist in grades K-6. This K-6 licensure/certification is available only in the same subject area as the secondary certification.
For more information and the name of an advisor, contact the Department of Teaching and Learning.

**REQUIREMENTS**

Undergraduates working toward licensure/certification to teach in secondary schools must complete the following requirements, in addition to the requirements of their major. All course work must be completed before student teaching.

- One introduction to teaching course 2-3 s.h.
- 07B:180 Human Relations for the Classroom Teacher 3 s.h.
- 07E:102/07S:102 Technology in the Classroom (must be taken during student’s first semester in the college) 2 s.h.
- 07P:075 Educational Psychology and Measurement 3 s.h.
- 07S:100 Foundations of Education 3 s.h.
- 07S:190 Orientation to Secondary Education (must be taken during student’s first semester in the college) 1 s.h.
- 07S:195 Teaching Reading in Secondary Content Areas (must be taken during student’s first semester in the college) 1 s.h.
- 07U:100 Foundations of Special Education 3 s.h.
- One or more methods of teaching courses in the major field 3-9 s.h.
- One college-level mathematics course (except 22M:001, 22M:002, and 22M:003) 12 s.h.

For initial licensure in all subject areas, student teaching must be an all-day, full-semester experience. Most students are placed in a district within a 60-mile radius of Iowa City. Placements outside this area require special approval and are considered on an individual basis. Special programs provide experience in districts with diverse populations, including Aldine, Texas (Houston area); Adams County, Colorado (Denver area); Rialto, California; and Clark County, Nevada (Las Vegas area). In most program areas, students also may apply to student teach at international sites for the second half of the semester.

Special Education

Students may be admitted to the Graduate College for the purpose of obtaining a master’s degree in special education. This degree typically includes certification in an area or areas selected by the student. See “Admission” under “Special Education” below.

**TRANSFER STUDENTS**

Transfer students must complete 07S:102, 07S:190, 07S:195, appropriate methods classes, a practicum at The University of Iowa, and all course work in the major before they student teach. Transfer students must follow the normal application procedures. In addition, they are asked to complete a disclosure statement describing all practicum experiences they have taken at other institutions and a release statement allowing the College of Education Office of Teacher Education and Student Services to contact all institutions where they have done professional preparatory work.

**Graduate Programs**

The Department of Teaching and Learning offers graduate programs in elementary education, secondary education, and special education.

Elementary education programs include M.A. and Ph.D. in elementary education; M.A. in developmental reading; and Ph.D. in language, literacy, and culture.

Secondary education programs include M.A. and Ph.D. in art education; M.A. and Ph.D. in curriculum and supervision; M.A. and M.A.T. in English education; M.A. and M.A.T. in foreign and second languages education; Ph.D. in foreign language and ESL education; a program leading to ESL endorsement; Ph.D. in language, literacy, and culture; M.A. and Ph.D. in mathematics education; M.S. in mathematics with education option; M.A. and Ph.D. in music education; M.A.T., M.S., and Ph.D. in science education; and M.A. and Ph.D. in social studies education.

Special education programs include M.A. and Ph.D. in special education; Ed.S. in special education administration; and a program leading to special education consultant authorization.

Applicants for admission to University of Iowa graduate degree programs must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.
Elementary Education

M.A. in Elementary Education

The Master of Arts in elementary education is designed to prepare students to serve as team leaders, grade level or subject area supervisors, curriculum consultants, or master teachers.

ADMISSION

Applicants must meet the admission requirements of the Graduate College. They must have completed an undergraduate teacher preparation program in either early childhood or elementary education.

REQUIREMENTS

The M.A. in elementary education with thesis requires a minimum of 30 s.h. of graduate credit; the M.A. without thesis requires a minimum of 32 s.h. Students must take 24 s.h. in University of Iowa courses and complete 8 s.h. on campus. Course work completed 10 or more years before admission does not count toward the M.A.

Elementary Education Graduate Core

All of these (9 s.h.):
07B:120 Teaching in a Culturally Diverse Society (or equivalent approved by advisor) 3 s.h.
07E:267 Inquiry-Based Curriculum Development in Early Childhood and Elementary Education 3 s.h.
07E:300 Design and Organization of Curriculum 3 s.h.

Instructional Cluster

Students take three courses (9 s.h.) that deal with instructional issues in the elementary classroom. The courses are drawn from one or more of the following areas: art education, music education, social studies education, science education, math education, special education, other acknowledged specialization areas. Students must choose courses outside their specialization area.

Specialization

Students take three courses (9 s.h.) in their specialization area, chosen in consultation with their advisor.

Electives

Students choose 6 s.h. of elective course work.

COMPREHENSIVE EXAMINATION

M.A. students are expected to pass a comprehensive exam that covers the course work in the graduate core, course work in the specialization area, and additional course work deemed appropriate by their advisor.

M.A. in Developmental Reading

The Master of Arts in developmental reading prepares graduate students for positions as reading specialists in kindergarten and grades 1-12. The required course work develops the skills, knowledge, and competence needed for supervisory, curricular, and remedial teaching positions in reading. The program also builds a background in reading for students who want to specialize further in the area and eventually to teach and/or conduct research at a college or university.

Successful completion of this program, combined with one year of successful teaching experience that includes teaching reading as a significant part of the responsibility, qualifies the student for certification as a reading specialist.

ADMISSION

Applicants must meet the admission requirements of the Graduate College. They must have an undergraduate g.p.a. of at least 3.00; hold an early childhood, elementary, or secondary school teaching certificate; and show evidence of completing two years of successful teaching experience.

REQUIREMENTS

The M.A. in developmental reading with thesis requires a minimum of 33 s.h. of graduate credit; the M.A. without thesis requires a minimum of 35 s.h. Students must complete the following courses.

07E:171 Reading and Writing: Processes and Instruction 3 s.h.
07E:264 Early Literacy Development and Instruction 2-3 s.h.
07E:265 Reading and Writing Across Intermediate Grades 3 s.h.
07E:271 Advanced Reading Clinic Techniques 2-3 s.h.
07E:272 Advanced Reading Clinic Practicum 2-3 s.h.
07E:308 Seminar: Research and Current Issues (Reading) 3 s.h.
07S:194 Methods: High School Reading 2-3 s.h.

One of these:
07P:106 Child Development 3 s.h.
07P:133 The Adolescent and Young Adult 3 s.h.
07P:200 Educational Psychology 3 s.h.
One of these:
07P:150 Introduction to Educational Measurement 3 s.h.
07U:238 Assessment of Learning Differences 3-4 s.h.
An approved literacy assessment course
One of these:
07E:267 Inquiry-Based Curriculum Development in Early Childhood and Elementary Classrooms 3 s.h.
07E:300 Design and Organization of Curriculum 3 s.h.
07S:186 Curriculum Foundations 2-3 s.h.
07S:291 Secondary School Curriculum 2-3 s.h.
One of these:
07B:383 Supervision and Evaluation 3 s.h.
07E:280 Supervision of Instruction and Staff Development 2-3 s.h.
07E:365 Reading Clinic: Supervision arr.
Thesis (if relevant)—one of these:
07E:393 M.A. Thesis arr.
07S:393 M.A. Thesis arr.

Electives
Students, in consultation with their advisor, may select the remaining required semester hours as electives from areas such as curriculum, supervision, language arts, testing and evaluation, linguistics, or speech pathology.

COMPREHENSIVE EXAMINATION
The comprehensive examination consists of two 3-hour exams. Each three-hour exam is based on an aspect of reading or literacy. With agreement of the student’s advisor and committee, a comprehensive project may be substituted for the written examination in one or both areas.

Ph.D. in Elementary Education
The Doctor of Philosophy in elementary education prepares students for college and university teaching and research positions in elementary education, and for research, curriculum, supervisory, or administrative positions in public school systems and government education agencies.

ADMISSION
Applicants must meet the admission requirements of the Graduate College. Application materials should include a statement of purpose explaining the applicant’s reasons for pursuing graduate study and describing his or her future goals; transcripts of all undergraduate and graduate course work; Graduate Record Exam (GRE) General Test scores; a sample of academic writing; and three letters of recommendation.

REQUIREMENTS
The Ph.D. in elementary education requires a minimum of 90 s.h. of graduate credit, including 10-15 s.h. of dissertation credit. Each student prepares an individual plan of study in consultation with an advisor. The final plan must be approved by the advisor and the department chair.

To remain in the program, students must maintain the grade-point average required by the Graduate College.

Ph.D. Core
All of the following are required (18 s.h.).

Foundations component:
07E:304 Schooling in the United States 3 s.h.
07S:333 Seminar on Teacher Education 3 s.h.
Research component:
07P:202 Understanding Educational Research 3 s.h.
Three other research courses chosen in consultation with advisor 9 s.h.

Elementary Education Graduate Core
All of these (9 s.h.):
07B:120 Teaching in a Culturally Diverse Society (or equivalent approved by advisor) 3 s.h.
07E:267 Inquiry-Based Curriculum Development in Early Childhood and Elementary Education 3 s.h.
07E:300 Design and Organization of the Curriculum 3 s.h.

Instructional Cluster
Students take two courses (6 s.h.) that deal with instructional issues in the elementary classroom. The courses are drawn from one or more of the following areas: art education, music education, social studies education, science education, math education, special education, another acknowledged area of specialization. Students must choose courses outside their specialization area.

Specialization
Students take four courses (12 s.h.) in their specialization area, chosen in consultation with their advisor.
Electives
Students choose 6 s.h. of elective course work.

COMPREHENSIVE EXAMINATION
Students are expected to pass a comprehensive exam that covers the course work in the Ph.D. core, course work in the instructional cluster, and course work in the specialization area.

DISSERTATION
Dissertation work ranges from 10 to 15 s.h.

Ph.D. in Language, Literacy, and Culture
The Doctor of Philosophy in language, literacy, and culture brings together scholarly traditions and contemporary theory in literacy and cultural studies. Course work provides both a broad background in relevant theoretic and research literature and opportunities to conduct original studies that explore the nature of literacy practices both in and out of school. Graduates find employment in university and college teaching, research, curriculum development, and administration of literacy programs.

ADMISSION
Applicants must meet the admission requirements of the Graduate College. They should have at least two years of experience teaching or tutoring language or literacy (reading, writing, English, language arts) and should have earned a master's degree or have completed a significant amount of graduate course work in a literacy-related field. Application materials should include a statement of purpose explaining the applicant's reasons for pursuing graduate study and describing his or her future goals; transcripts of all undergraduate and graduate course work; Graduate Record Exam (GRE) General Test scores; a sample of academic writing; and three letters of recommendation.

Applications for admission and for financial aid are reviewed by January 10 each year.

REQUIREMENTS
The Ph.D. in language, literacy, and culture requires a minimum of 88-90 s.h. of graduate credit. Course work includes an introductory seminar in language, literacy, and culture; at least 9 s.h. of additional doctoral seminars in the program; 6 s.h. of a required sequence of courses in curriculum and instruction; at least 6 s.h. of course work in research methodology; and 9-12 s.h. of graduate course work outside the Department of Teaching and Learning (6 s.h. of that outside the College of Education). Students also earn 10-12 s.h. of dissertation credit.

COMPREHENSIVE EXAMINATION AND DISSERTATION
As students near the completion of their course work, they identify several key strands for review and synthesis. With guidance from their advisors, students prepare for written and oral exams in two areas of literacy and submit a substantive issues paper, typically a report of an exploratory study or a review of research literature on a topic of special interest. They also design a syllabus for a literacy course and write a reflective commentary that demonstrates understanding of the relationship between theory and practice.

Following successful completion of all components of the comprehensive exam, students work with a faculty member to develop a proposal for a study that will make an original contribution to the understanding of some aspect of literacy. After the proposal has been approved, students conduct research and report their findings under the primary guidance of a dissertation chair.

For detailed information on the Ph.D. in language, literacy, and culture, see Our Programs on the Department of Teaching and Learning web site.

Secondary Education
The Department of Teaching and Learning offers, or jointly administers with departments in the College of Liberal Arts and Sciences, advanced degree programs in the following fields of professional interest: art education, curriculum and supervision, developmental reading, English education, foreign language education, mathematics education, music education, science education, and social studies education.

In some fields, only master's-level programs are offered; in others, Ph.D. programs also are offered. All degrees are described below.

M.A. in Art Education
The Master of Arts in art education is administered by the School of Art and Art History (College of Liberal Arts and Sciences) in cooperation with the College of Education. Application should be made to the School of Art and Art History.

The program prepares highly qualified teachers of art for elementary and secondary schools and community colleges. The program's strong academic emphasis helps teachers who are
creative artists to become highly literate in the history and language of art.

**ADMISSION**

Applicants must meet the admission requirements of the Graduate College. They must have completed the equivalent of the minimum course work in art required for a University of Iowa B.A. or B.F.A. in art and must have a license/certificate to teach art. Applications must include a representative portfolio of the applicant’s work, consisting of eight slide reproductions of artwork and one example of written work, which may be a paper previously written for a course or an original paper. Deficiencies in undergraduate art or courses recommended for teacher licensure/certification are evaluated following admission so that students can make up required course work concurrent with work for the degree.

**REQUIREMENTS**

The M.A. in art education requires a minimum of 38 s.h. of graduate credit. The plan of study includes a total of 18 s.h. in studio art and art history (either 12 s.h. of studio art and 6 s.h. of art history, or 12 s.h. of art history and 6 s.h. of studio art); a total of 8 s.h. in 07S:367 Seminar: Current Issues in Art Education; and a total of 12 s.h. in additional course work, specified after the student begins the program.

M.A. students also must complete a studio thesis or a written thesis.

**Ph.D. in Art Education**

The Doctor of Philosophy in art education is administered by the College of Education with the cooperation of the School of Art and Art History (College of Liberal Arts and Sciences). Application should be made to the College of Education.

The program prepares college teachers and researchers in art education and supervisors of community-based art learning programs in state departments of education and school systems. It also provides students with an opportunity to continue inquiry and creative work in art history and in studio.

**ADMISSION**

Applicants must meet the admission requirements of the Graduate College. They must have an M.A. in art education or an M.F.A. from The University of Iowa, or an equivalent degree from an accredited degree-granting college or university. Applications must include a representative portfolio of the applicant’s work, consisting of 12 slide reproductions of artwork and two examples of written work, which may consist of papers previously written for a course or original papers. The portfolio should be submitted to the art education office in the School of Art and Art History.

In the case of course work deficiencies, students must register for appropriate remedial courses. Two years of successful teaching experience in an elementary or secondary school is required before admission to or completion of the doctoral program.

**REQUIREMENTS**

The Ph.D. in art education requires at least 60 s.h. of graduate credit beyond the M.A., including at least 15 s.h. in the School of Art and Art History, 15 s.h. in art education seminars, 15 s.h. in a related area (e.g., aesthetics, anthropology, higher education, early childhood education, psychology, sociology), and 15 s.h. in thesis and tool courses. Introduction to Research in Art Education (07E:306) is also required. Students plan the course of study with their advisors.

Students admitted to any Ph.D. program in the Department of Teaching and Learning must complete at least two of the following three core courses.

- 07E:304 Schooling in the United States 3 s.h.
- 07P:202 Understanding Educational Research 3 s.h.
- 07S:333 Seminar on Teacher Education 3 s.h.

**COMPREHENSIVE EXAMINATION**

The comprehensive examination includes both oral and written exams. The written exam consists of an in-depth research problem assigned by the examining committee, to be completed within 14 days. An oral exam on the project is then held. The written portion of the exam is not intended to relate directly to the dissertation proposal.

**DISSERTATION**

Students must satisfactorily complete a written dissertation that constitutes a contribution to scholarship, for at least 12 s.h. The student is expected to prepare a dissertation proposal and defend it before the dissertation committee. An oral examination on the dissertation is the Ph.D. final examination.
**M.A. in Curriculum and Supervision**

The Master of Arts in curriculum and supervision prepares teachers and administrators for positions as consultants, directors, and coordinators in curriculum development. It is offered with thesis and nonthesis options.

**ADMISSION**

Students must meet the admission requirements of the Graduate College. Teaching experience is desirable.

**REQUIREMENTS**

The M.A. in curriculum and supervision with thesis requires a minimum of 30 s.h. of graduate credit; the nonthesis option requires a minimum of 32 s.h.

**Common Curriculum Core**

Total of 15 s.h., as follows:

- 07S:186 Curriculum Foundations 3 s.h.
- 07E:300 Design and Organization of Curriculum 3 s.h.

Three of these:

- 07B:222 Introduction to Policy Analysis and Evaluation 3 s.h.
- 07B:381 Analysis and Appraisal of Curriculum 3 s.h.
- 07E:132/07S:132 Middle School Curriculum and Methods 3 s.h.
- 07E:267 Inquiry-Based Curriculum Development in Early Childhood and Elementary Education 3 s.h.
- 07P:203 Learning Technology and Effective Teaching 3 s.h.
- 07P:205 Design of Instruction 3 s.h.
- 07P:255 Construction and Use of Evaluation Instruments 3 s.h.

**Research Core**

Students select two courses (total of 6 s.h.) in consultation with the advisor.

**Supervision Core**

Students select two courses (total of 6 s.h.) in consultation with the educational policy and leadership studies advisor.

**Cognates**

Students complete a total of 6 s.h. in a subject field such as social studies education or educational measurement.

**Thesis**

Students who elect a thesis program earn 2-4 s.h. in 07S:393 M.A. Thesis.

**COMPREHENSIVE EXAMINATION**

Two 3-hour comprehensive exams are required: one in curriculum and one in a related field in education or in a cognate field; or three 2-hour examinations.

**Ph.D. in Curriculum and Supervision**

The Doctor of Philosophy in curriculum and supervision is administered by the College of Education. It prepares students for leadership positions in curriculum for elementary, middle, and secondary schools, state departments, intermediate systems, and college teaching.

**ADMISSION**

Applicants must meet the admission requirements of the Graduate College. They must hold a valid teaching license/certificate, and have at least two years of teaching experience. A faculty review committee makes admission decisions.

**REQUIREMENTS**

The Ph.D. in curriculum and supervision requires a total of at least 90 s.h. of graduate credit, including other approved graduate course work.

Students admitted to the Ph.D. program in curriculum and supervision must complete all three of the following core courses.

- 07E:304 Schooling in the United States 3 s.h.
- 07P:202 Understanding Educational Research 3 s.h.
- 07S:333 Seminar on Teacher Education 3 s.h.

**Common Curriculum Core**

Seven of these (21 s.h.):

- 07B:222 Introduction to Policy Analysis and Evaluation 3 s.h.
- 07B:381 Analysis and Appraisal of Curriculum 3 s.h.
- 07E:132/07S:132 Middle School Curriculum and Methods 3 s.h.
- 07E:267 Inquiry-Based Curriculum Development in Early Childhood and Elementary Education 3 s.h.
- 07E:300 Design and Organization of Curriculum 3 s.h.
- 07P:205 Design of Instruction 3 s.h.
07P:255 Construction and Use of Evaluation Instruments 3 s.h.
07P:257 Educational Measurement and Evaluation 3 s.h.
07S:186 Curriculum Foundations 2-3 s.h.

Research Core
A minimum of four research tools selected in consultation with advisor 12 s.h.

Supervision Core
A minimum of four courses in educational policy and leadership studies, selected in consultation with advisor 12 s.h.

Electives
Courses chosen in consultation with advisor 9-12 s.h.

Cognates
All doctoral candidates are required to complete at least 9-12 s.h. of cognate work in two areas selected in consultation with advisor. Suggested cognates include content-related instruction (math education, social studies education), educational foundations, educational measurement, and special education.

COMPREHENSIVE EXAMINATION
Candidates take three 3-hour comprehensive exams, one in secondary school curriculum and two in related fields in education or in a cognate field.

DISSERTATION
07S:493 Ph.D. Thesis 10-18 s.h.

M.A. in English Education
The Master of Arts in English education is intended for experienced teachers of English. It provides opportunities for professional development and preparation for department chairs, supervisors of English, and curriculum specialists for secondary schools. Application should be made to the College of Education.

ADMISSION
Applicants must meet the admission requirements of the Graduate College. They should have taken extensive course work in English and should have taught English for at least two years.

REQUIREMENTS
The M.A. in English education requires a minimum of 30 s.h. of graduate credit. Students must specialize in English education and in one or two other areas. The other area(s) may include reading, writing, curriculum, adolescent literature, or a literary area. Students and their advisors plan the program of study together. The only required course is 07S:315 M.A. Seminar: English Education. At the end of the program, students take a comprehensive examination in English education and in their chosen area(s).

M.A.T. in English Education
The Master of Arts in Teaching in English education is designed for students who have an undergraduate degree in English and few or no professional education courses. Successful completion of the program enables students to receive a credential to teach English in secondary schools.

ADMISSION
Applicants must meet the admission requirements of the Graduate College. They must have a B.A. in English or the equivalent, with an undergraduate g.p.a. of at least 3.00. They also must take the Graduate Record Exam and meet all TEP application requirements. Since the M.A.T. is a credentialing program, candidates must not have qualified previously for a credential. Applicants are expected to have no more than 6 s.h. of course work in professional education courses prior to admission.

REQUIREMENTS
The M.A.T. in English education requires a minimum of 45 s.h. of graduate credit, including the following courses.

English
07S:315/08P:405 M.A. Seminar: English Education arr.
08N:141 Approaches to Teaching Writing 3 s.h.
08P:182 Language and Learning 2-3 s.h.
08P:198 Reading and Teaching Adolescent Literature 3 s.h.

Students may take the following English courses as part of the M.A.T. program or as part of their undergraduate program.

A course in Shakespeare
Three courses in American literature
A course in British literature
A course in nonfiction or creative writing (in addition to 08N:141)
**Education**

07B:180 Human Relations for the Classroom Teacher 3 s.h.
07E:102/07S:102 Technology in the Classroom (must be taken during student's first semester in the college) 2 s.h.
07P:200 Educational Psychology 3 s.h.
07S:100 Foundations of Education 3 s.h.
07S:114 Introduction and Practicum: English and Speech (must be completed before enrollment in 07S:115 and 07S:194) 3 s.h.
07S:115 Methods: English 3 s.h.
07S:187 Seminar: Curriculum and Student Teaching 1-3 s.h.
07S:190 Orientation to Secondary Education 1 s.h.
07S:191 Observation and Laboratory Practice in the Secondary School arr.
07S:192 Observation and Laboratory Practice in the Secondary School arr.
07S:194 Methods: High School Reading 2-3 s.h.
07U:100 Foundations of Special Education 3 s.h.

**COMPREHENSIVE EXAMINATION**

The comprehensive examination involves a series of reflective projects supervised by English education faculty. The projects encompass issues explored throughout the course of study and involve integration of theory and practice.

**M.A.T. in Foreign and Second Languages Education**

The Master of Arts in Teaching in foreign and second languages education is designed for superior liberal arts and sciences graduates who have had few or no professional education courses. Successful completion of the program leads to elementary and/or secondary teacher licensure. The M.A.T. is available in Chinese, French, German, Japanese, Latin, Spanish, and Russian.

**ADMISSION**

Applicants must meet the admission requirements of the Graduate College. They must have a bachelor’s degree with a major or a strong concentration in a second language and an undergraduate g.p.a. of at least 3.00. They also must meet all TEP application requirements.

**REQUIREMENTS**

The M.A.T. in foreign and second languages education requires a minimum of 67 s.h. of graduate course work in the collaborating foreign language department and the following professional education courses.

**Professional Education**

07B:180 Human Relations for the Classroom Teacher 3 s.h.
07E:102/07S:102 Technology in the Classroom (must be taken during student’s first semester in the college) 2 s.h.
07P:200 Educational Psychology 3 s.h.
07S:100 Foundations of Education 3 s.h.
07S:190 Orientation to Secondary Education (must be taken during student’s first semester in the college) 1 s.h.
07S:195 Teaching Reading in Secondary Content Areas (must be taken during student’s first semester in the college) 1 s.h.
07U:100 Foundations of Special Education 3 s.h.

**Foreign Language Teaching**

All of these:
07E:183/07S:183 Second Language Classroom Learning 3 s.h.
07S:197 Principles of Course Design for Second Language Instruction 3 s.h.
07S:200 Fundamentals of Second Language Assessment 3 s.h.

Total of 21-27 s.h. from these:
07E:106/07S:106 Foreign Language Education Practicum I 3 s.h.
07E:107/07S:107 Foreign Language Education Practicum II 3 s.h.
07S:116 Learning to Teach Second Languages I 3 s.h.
07S:117 Learning to Teach Second Languages II 3 s.h.
07S:187 Seminar: Curriculum and Student Teaching 1 s.h.
07S:191 Observation and Laboratory Practice in the Secondary School arr.
07S:192 Observation and Laboratory Practice in the Secondary School arr.

**Optional for K-12 Licensure**

07S:189 Elementary School Special Subject Area Student Teaching 1-4 s.h.

**COMPREHENSIVE EXAMINATION**

A two-part comprehensive examination is required. One part covers issues in foreign language education related to theory and practice, the other covers knowledge of and proficiency in the language and/or literature of the candidate’s choice.
ESL Endorsement

An ESL endorsement enables an individual to teach English as a Second Language in K-12 in the state of Iowa. Because teaching endorsements are additional areas of expertise added to a teaching license, applicants must be current students in a TEP program or licensed inservice teachers.

ADMISSION

Applicants are admitted to the ESL endorsement program twice a year; application deadlines are October 15 and March 15. Each applicant must submit a one-page essay explaining why he or she wishes to teach ESL; a transcript of all university-level course work; and evidence of having completed two semesters of foreign language beyond the language component of the College of Liberal Arts and Sciences General Education Program or a documented score of "advanced plus" on the oral proficiency interview (OPI) given in the language department. Applicants whose first language is not English must provide evidence of scoring 55 or higher on the Test of Spoken English (TSE).

M.A. in Foreign and Second Languages Education

The Master of Arts in foreign and second language education is designed for students who would like to pursue a foreign language education specialization in teaching (kindergarten through college) or in related fields (e.g., language laboratory directors, instructional materials designers, or evaluation specialists). It also offers enrichment in foreign language pedagogical knowledge for practicing teachers. Students may design programs with a special focus.

ADMISSION

Applicants must meet the admission requirements of the Graduate College. They must be proficient in English and in another language and have earned at least 20 s.h. in undergraduate, upper-division foreign language course work. Applicants should submit a statement of purpose explaining their graduate study goals. A g.p.a. of at least 3.00 in undergraduate course work and some experience living, working, and/or studying in the applicant’s chosen target language culture are preferred. International applicants whose first language is not English must score at least 600 (paper-based) or at least 250 (computer-based) on the Test of English as a Foreign Language (TOEFL), and at least 5 on the Test of Written English (TWE).

REQUIREMENTS

The M.A. in foreign and second languages education requires a minimum of 33-36 s.h. of graduate credit. It offers three specializations: second languages education, a target language area (may subsume language, linguistics, literature, history, geography, or civilization), and a cognate area. The cognate area may be teacher education, reading, instructional design, measurement and statistics, or another area selected in consultation with the advisor.

Students take at least 15 s.h. in second language education course work, 9 s.h. in graduate language or linguistics, and 9 s.h. in a cognate area. Students must earn 9 s.h. in courses numbered 200 or above. They also complete a research project.

Students must maintain a g.p.a. of at least 3.00 while enrolled in the program. Candidacy for the master’s degree is reevaluated annually.

Suggested courses are as follows.

Foreign and Second Languages Education

Total of 15 s.h.

07E:183/07S:183 Second Language Classroom Learning 3 s.h.
07S:197 Principles of Course Design for Second Language Instruction 3 s.h.
07S:200 Fundamentals of Second Language Assessment 3 s.h.

At least 6 s.h. from these:
07S:180 Issues in Foreign Language Education 3 s.h.
07S:184 Reading in a Second Language 3 s.h.
07S:202 Second Language Program Management 3 s.h.
07S:203 Second Language Planning in Education 3 s.h.
07S:207 Reading in Non-Roman Scripts 3 s.h.
07S:208 Designing Materials for Second Language Instruction 3 s.h.

Target Language

In consultation with the advisor, students select at least 9 s.h. of graduate language courses in their area of interest.

Cognate Area

Students complete at least 9 s.h. of course work chosen in consultation with the advisor.

MASTER’S EXAMINATION

Students take a written exam during the semester in which they plan to graduate. The exam covers second language education and the
two study areas selected by the student. It is written by the graduate committee, which consists of at least three faculty members, two of whom must be from foreign and second languages education.

**Ph.D. in Foreign Language and ESL Education**

The Doctor of Philosophy in foreign language and ESL education provides students with the necessary content-area knowledge and research skills for independent research, program administration, and varied leadership positions in foreign language and ESL education. It is designed for individuals who have demonstrated success in foreign language and ESL teaching and who wish to prepare for positions in academia, government, or the private sector where in-depth knowledge of foreign language educational issues is required.

**ADMISSION**

Applicants must meet the admission requirements of the Graduate College. They should have at least two years of experience teaching foreign language or ESL and should hold a master’s degree or have completed a significant amount of graduate course work in a foreign language or foreign language education. Applicants must have a g.p.a. of at least 3.00 in graduate course work. International applicants whose first language is not English must score at least 600 (paper-based) or at least 250 (computer-based) on the Test of English as a Foreign Language (TOEFL).

Application materials should include a statement of purpose explaining the applicant’s professional goals, transcripts of all undergraduate and graduate work, Graduate Record Exam (GRE) General Test scores, a sample of academic writing, and three letters of recommendation.

**REQUIREMENTS**

The Ph.D. in foreign language and ESL education requires a minimum of 80 s.h. of graduate credit, which can include courses taken for the master’s degree. Most course work must be taken at the 200 level or above. At least 30 s.h. must be taken in the core area of foreign language education, at least 10 s.h. must be in specified courses in research methodology, and 9 s.h. must be in a cognate area to be determined in consultation with the advisor.

Students admitted to the Ph.D. program in foreign language and ESL must complete 07E:304 Schooling in the United States (3 s.h.). They also choose one of the following two core courses.

- 07P:202 Understanding Educational Research 3 s.h.
- 07S:333 Seminar on Teacher Education 3 s.h.

**COMPREHENSIVE EXAMINATION**

To qualify to take the comprehensive examination, students must successfully complete the required course work and either write a review article or carry out extended research activity. The final products of these activities must be presented formally by the student to members of the comprehensive examination committee in anticipation of preparing the article or research activity for publication and presentation at a national conference. After successful completion of the pre-exam activity, the student is eligible to sit for the comprehensive examination, which includes three 3-hour exams in foreign language education and the cognate area in education.

After passing the comprehensive examination, students consult with their advisor to choose a Ph.D. dissertation committee of at least five faculty members, who approve the dissertation proposal. The student then conducts research under the primary guidance of the advisor.

**Ph.D. in Language, Literacy, and Culture**

The Doctor of Philosophy in language, literacy, and culture brings scholarly traditions and contemporary theory together in literacy and cultural studies. Course work provides a broad background in relevant theoretic and research literature, and opportunities to conduct original studies that explore the nature of literacy practices both in and out of school. Graduates find employment in university and college teaching, research, curriculum development, and administration of literacy programs.

**ADMISSION**

Applicants must meet the admission requirements of the Graduate College. They should have at least two years of experience teaching or tutoring language or literacy (reading, writing, English, language arts) and should have earned a master’s degree or have completed a significant amount of graduate course work in a literacy-related field.

Application materials should include a statement of purpose explaining the applicant’s reasons for pursuing graduate study and describing his or her
future goals; transcripts of all undergraduate and graduate course work; Graduate Record Exam (GRE) General Test scores; a sample of academic writing; and three letters of recommendation.

Applications for admission and for financial aid are reviewed by January 10.

REQUIREMENTS
The Ph.D. in language, literacy, and culture requires a minimum of 88-90 s.h. of graduate credit. Course work includes an introductory seminar in language, literacy, and culture; at least 9 s.h. of additional doctoral seminars in the program; 6 s.h. of a required sequence of courses in curriculum and instruction; at least 6 s.h. of course work in research methodology; and 9-12 s.h. of graduate course work outside the Department of Teaching and Learning (6 s.h. of that outside the College of Education). Students also earn 10-12 s.h. of dissertation credit.

COMPREHENSIVE EXAMINATION AND DISSERTATION
As students near the completion of their course work, they identify several key strands for review and synthesis. With guidance from their advisors, students prepare for written and oral exams in two areas of literacy and submit a substantive issues paper, typically a report of an exploratory study or a review of research literature on a topic of special interest. They also design a syllabus for a literacy course and write a reflective commentary that demonstrates understanding of the relationship between theory and practice.

Following successful completion of all components of the comprehensive exam, students work with a faculty member to develop a proposal for a study that will make an original contribution to the understanding of some aspect of literacy. After the proposal has been approved, students conduct research and report their findings under the primary guidance of a dissertation chair.

For detailed information on the Ph.D. in language, literacy, and culture, see Our Programs on the Department of Teaching and Learning web site.

M.A. in Mathematics Education
The Master of Arts in mathematics education provides students with advanced specialization in mathematics and education as a better foundation for K-12 teaching.

ADMISSION
Applicants must meet the admission requirements of the Graduate College. Except in unusual cases, they should hold a professional license/certificate to teach school mathematics. A combined score of 1000 on the verbal and quantitative sections of the Graduate Record Examination (GRE) General Test is preferred.

REQUIREMENTS
The M.A. in mathematics education requires a minimum of 32 s.h. of graduate credit. Students take a minimum of 10 s.h. of course work in mathematics approved by the advisor. They also take a minimum of four courses in mathematics education, which must include 07S:235/07E:235 Current Issues in Mathematics Education (2-3 s.h.) and three courses chosen from the following.

\[\begin{align*}
07S:230/07E:230 \text{ Workshop in School } & \text{ Mathematics } \quad 1-3 \text{ s.h.} \\
07S:231/07E:231 \text{ Technology in School } & \text{ Mathematics } \quad 2-3 \text{ s.h.} \\
07S:234/07E:234 \text{ Foundations of } & \text{ Mathematics Education } \quad 2-3 \text{ s.h.} \\
07S:236 \text{ The Teaching of Geometry } & \quad 2-3 \text{ s.h.} \\
07S:239 \text{ The Teaching of Algebra } & \quad 2-3 \text{ s.h.} \\
07S:335/07E:335 \text{ Seminar: Mathematics } & \text{ Education } \quad 2-3 \text{ s.h.}
\end{align*}\]

Students choose a minimum of two courses from a cognate area; suggested areas are educational psychology, educational statistics and measurement, history or philosophy of education, pure or applied mathematics, instructional design and technology, counselor education, curriculum, administration, and special education. Courses are chosen in consultation with a faculty member from the cognate area.

Students also complete a sufficient number of electives in mathematics and education, chosen with the approval of the advisor, to complete 32 s.h. of credit.

COMPREHENSIVE EXAMINATION
Students take three 2-hour comprehensive exams: one in mathematics education, the second in mathematics, and the third in the cognate area.

M.S. in Mathematics with Education Option
The Master of Science in mathematics with education option prepares licensed/certified teachers with advanced specialization in mathematics and mathematics education. It is
administered by the Department of Mathematics (College of Liberal Arts and Sciences). Application should be made to the Department of Mathematics.

REQUIREMENTS

The M.S. in mathematics with education option requires a minimum of 32 s.h. of graduate credit. Students must earn a minimum of 24 s.h. in the Department of Mathematics, including the core master’s program for either pure mathematics or applied mathematics as described below. They also must complete two courses in mathematics education.

Pure Mathematics

One of these sequences:
22M:115-22M:116 Introduction to Analysis I-II 6 s.h.
22M:210-22M:211 Analysis I-II 6 s.h.

One of these sequences:
22M:120-22M:121 Abstract Algebra I-II 6 s.h.
22M:205-22M:206 Introduction to Algebra I-II 6 s.h.
22M:132 General Topology 3 s.h.

Applied Mathematics

22M:140 Continuous Mathematical Models 3 s.h.
22M:142 Nonlinear Dynamics with Numerical Methods 3 s.h.
22M:144 Partial Differential Equations with Numerical Methods 3 s.h.
22M:151 Discrete Mathematical Models 3 s.h.
22M:170 Numerical Analysis: Nonlinear Equations and Approximation Theory 3 s.h.
22M:171 Numerical Analysis: Differential Equations and Linear Algebra 3 s.h.
22M:174 Optimization Techniques 3 s.h.

COMPREHENSIVE EXAMINATION

Students take a comprehensive examination of six hours over the required courses in either pure mathematics or applied mathematics, and education. The examination assesses the candidate’s knowledge of mathematics and of the relevance of specific concepts in teaching secondary school mathematics.

Ph.D. in Mathematics Education

The Doctor of Philosophy in mathematics education prepares supervisors, teacher education personnel, community college personnel, and researchers in mathematics education. It is administered by the College of Education.

ADMISSION

Applicants must meet the admission requirements of the Graduate College. They must have an undergraduate major in mathematics or the equivalent; a master’s degree in mathematics, mathematics education, or education; a g.p.a. of at least 3.00; and, except in unusual circumstance, a current teaching license/certificate and at least two years of teaching experience.

REQUIREMENTS

The Ph.D. in mathematics education requires a minimum of 80-90 s.h. of graduate credit. Credit earned more than 10 years before admission to the program must be updated.

Students admitted to any Ph.D. program in the Department of Teaching and Learning must complete at least two of the following three core courses.

07E:304 Schooling in the United States 3 s.h.
07P:202 Understanding Educational Research 3 s.h.
07S:333 Seminar on Teacher Education 3 s.h.

Students must complete a minimum of 36 s.h. of graduate work in the Departments of Computer Science, Mathematics, and Statistics and Actuarial Science, including the requirements for the pure mathematics core, the applied mathematics core, or middle-grades mathematics, as follows. Electives are encouraged in the pure mathematics and applied mathematics sequences.

Pure Mathematics

22M:115-22M:116 Introduction to Analysis I-II 6 s.h.
22M:120-22M:121 Abstract Algebra I-II 6 s.h.
22M:132 General Topology 3 s.h.

Applied Mathematics

22M:142 Nonlinear Dynamics with Numerical Methods 3 s.h.
22M:144 Partial Differential Equations with Numerical Methods 3 s.h.
22M:170 Numerical Analysis: Nonlinear Equations and Approximation Theory 3 s.h.
22M:171 Numerical Analysis: Differential Equations and Linear Algebra 3 s.h.
22M:174 Optimization Techniques 3 s.h.

Middle-Grades Mathematics

For this option, no course work may replicate undergraduate work; at least five of these courses must be completed; 22M:126 and 22M:151 are required unless duplicated by previous course work.
22M:100 Introduction to Ordinary Differential Equations 2-3 s.h.
22M:104 Introduction to Matrix Theory 3 s.h.
22M:107 History of Mathematics 3 s.h.
22M:108 Philosophy of Mathematics 3 s.h.
22M:109 Classical Analysis 3 s.h.
22M:126 Elementary Theory of Numbers 2-3 s.h.
22M:127 Matrix Theory 3 s.h.
22M:151 Discrete Mathematical Models 3 s.h.
22S:120 Probability and Statistics 4 s.h.

Courses cross-listed in education do not fulfill this requirement. Students who completed their mathematics requirement at another institution must complete at least 6 s.h. of additional course work in mathematics at The University of Iowa, chosen with the advisor’s approval.

Students also must complete at least five courses in mathematics education, including 07S:235 Current Issues in Mathematics Education and continuous registrations in 07S:335 Seminar: Mathematics Education until the comprehensive examination is passed.

ADDITIONAL REQUIREMENTS

Students concentrate in two additional comprehensive examination areas in either the mathematical sciences or education. A minimum of three courses usually are required for a comprehensive examination area, but candidates should consult with faculty members in the areas selected to determine which courses they should take in order to adequately prepare for the examinations.

A minimum of two courses in data analysis and research design are required, including both quantitative and qualitative methods.

Students must demonstrate competence in computer programming.

Students must complete a total of at least 24 s.h. in College of Education courses; this includes the course work listed above.

Upon completing the program, the student must have a cumulative g.p.a. of 3.00 or higher on all graduate work in mathematics, all University of Iowa graduate work in mathematics, all graduate work, and all University of Iowa graduate work.

COMPREHENSIVE EXAMINATION

Students take three written comprehensive examinations, one in mathematics education and two in other fields of education or mathematics; an oral examination follows the written examinations. A partial list of potential cognate areas is available from the M.A. program in mathematics education.

DISERTATION

Students must earn 10 s.h. of dissertation credit in 07S:493 Ph.D. Thesis. Each candidate completes a dissertation on a research problem in mathematics education. A prospectus of the proposed research must be presented to the dissertation committee before the candidate undertakes the study. Upon completion of the dissertation, the candidate defends the dissertation in an oral examination.

M.A. in Music Education

The Master of Arts in music education provides students with deeper insights into music, the theory and practice of music education, and the role of music in the school curriculum. The degree is available with thesis (30 s.h. minimum) or without (33 s.h. minimum).

The program is administered by the School of Music (College of Liberal Arts and Sciences) in cooperation with the College of Education. Application is made to the School of Music.

Ph.D. in Music Education

The Doctor of Philosophy in music education prepares students for teaching, research, and administrative posts. Graduates find employment as college teachers of music education classes and activities; as band, chorus, and orchestra directors; and as administrators of music departments and schools of music. Some apply their skills in public schools as music supervisors, research and curriculum consultants, and directors of city or district school music programs.

The program is administered by the School of Music (College of Liberal Arts and Sciences) in cooperation with the College of Education. Application is made to the School of Music.

M.A.T. in Science Education

The Master of Arts in Teaching in science education is designed primarily for graduates of a bachelor’s degree program in science who decide that they would like to become teachers. It features advanced work in science along with the courses required for certification, enabling students to earn a master’s degree and teaching certification at the same time.

The program assumes students have completed considerable course work in science (at least 56 s.h.) as undergraduates, but no previous course work in education. Students’ science course work should be equivalent to that
required by the University of Iowa Science Education Program (College of Liberal Arts and Sciences).

ADMISSION

Applicants must meet the admission requirements of the Graduate College. They must have a bachelor's degree with a major or equivalent in one of the sciences. A g.p.a. of at least 3.00 is required for admission and must be maintained throughout the program. Applicants must meet all TEP application requirements.

REQUIREMENTS

The M.A.T. in science education requires a minimum of 48 s.h. of graduate credit.

Professional Education Sequence Foundation

07B:180 Human Relations for the Classroom Teacher 3 s.h.
07E:102/07S:102 Technology in the Classroom (must be taken during student's first semester in the college) 2 s.h.
07P:200 Educational Psychology 3 s.h.
07S:100 Foundations of Education 3 s.h.
07S:190 Orientation to Secondary Education (must be taken during student's first semester in the college) 1 s.h.
07S:195 Teaching Reading in Secondary Content Areas (must be taken during student's first semester in the college) 1 s.h.
07U:100 Foundations of Special Education 3 s.h.

Science education courses are taken in the following sequence.

07S:151 Science Teaching and Practice with Early Learners 3 s.h.
07S:152 Methods of Teaching Science 3 s.h.

These two taken concurrently:

07S:153 Instructional Issues in Teaching Science 3 s.h.
07S:179 Secondary School Science Practicum 2 s.h.

These taken concurrently:

07S:187 Seminar: Curriculum and Student Teaching 3 s.h.
07S:191 Observation and Laboratory Practice in the Secondary School 6 s.h.
07S:192 Observation and Laboratory Practice in the Secondary School 6 s.h.

Science Specialization

The following courses are required for the undergraduate degree in science education at The University of Iowa. They need not be repeated by M.A.T. candidates who need one or more advanced courses in their major science area, or by students from other interdisciplinary science discipline programs that prepare teachers for grades 6-9.

Both of these:
097:128 Meaning of Science 2 s.h.
097:130 Science in Historical Perspective 2 s.h.

Two of these (unless completed during undergraduate study):
097:102 Societal and Educational Applications of Earth Sciences and Environmental Sciences 3 s.h.
097:103 Societal and Educational Applications of Biological Sciences 3 s.h.
097:105 Societal and Educational Applications of Physical Sciences 3 s.h.
097:106 Societal and Educational Applications of Chemical Concepts 3 s.h.
097:140 Problems in Integrating the Teaching of Environmental Science 3 s.h.

Electives

A minimum of one graduate course in biology, chemistry, earth science, or physics is required. Students who have satisfied portions of the required science course work listed above must take additional science course work to meet the minimum requirement of 48 s.h.

COMPREHENSIVE EXAMINATION

Students complete the comprehensive examination before their student teaching semester. Two exams or projects, one in science education and one in a science specialization area, are required. They may not duplicate course examinations in these areas. The science education exam, under the guidance and supervision of the examining committee, consists of two parts, written and oral. Detailed requirements for the science education comprehensive examination are available from the Science Education office.

M.S. in Science Education

The Master of Science in science education is designed for teachers and supervisors (K-college); and professionals in related fields, such as medical education, college teaching, museum program management, textbook editing, and outreach programs (conservation boards, Iowa Department of Natural Resources).

ADMISSION

Applicants must meet the admission requirements of the Graduate College. They should hold an undergraduate major in a science
area (or combination of science areas), in science education, or in elementary education with a science emphasis. The department recommends that applicants have teaching licensure/certification unless they are preparing for careers in allied health, museums, or community colleges.

REQUIREMENTS

The M.S. in science education requires a minimum of 38 s.h. of graduate credit in four areas: science education, education, research, and science. Students’ individual programs of study are approved by the science education faculty.

Ph.D. in Science Education

The Doctor of Philosophy in science education is designed for individuals who aspire to positions as college and university science educators; major supervisors in national, state, and local systems; teachers in small liberal arts colleges; instructors of general education science courses at major universities; research directors in science education; and professionals in medical and/or allied health education.

ADMISSION

Applicants must meet the admission requirements of the Graduate College. They should have completed a bachelor’s degree in a science area (or combination of science areas), in science education, or in elementary education with a science emphasis; have a cumulative g.p.a. of at least 3.00 on undergraduate and graduate work; and have a combined score of at least 1000 on the verbal and quantitative portions of the Graduate Record Exam (GRE) General Test. Applicants must submit three letters of recommendation; a statement of purpose describing their reasons for pursuing graduate work and their goals for graduate study; and an example of their academic writing.

REQUIREMENTS

The Ph.D. in science education requires a minimum of 85 s.h. of graduate study. The following courses are required.

Science Education

07E:256/07S:256 Science Education: The Nature of Science 3 s.h.
07E:257/07S:257 Learning in the Science Classroom 2-3 s.h.
07E:258/07S:258 Writing in the Science Classroom 3 s.h.
07E:259/07S:259 Advanced Pedagogy 3 s.h.
160:250 Introduction to Rhetoric of Science 3 s.h.

Education

07E:304 Schooling in the United States 3 s.h.
07S:333 Seminar on Teacher Education 3 s.h.
07E:300 Design and Organization of Curriculum 3 s.h.
07P:200 Educational Psychology 3 s.h.
07P:275 Constructivism and Design of Instruction 3 s.h.

Research Methods

07C:338 Essentials of Qualitative Inquiry 3 s.h.
07E:451/07S:451 Advanced Qualitative Data Analysis 3 s.h.
07P:143 Introduction to Statistical Methods 3 s.h.
07P:202 Understanding Educational Research Methods 3 s.h.
07P:220 Quantitative Educational Research Methods 3 s.h.

Research

07S:350 Science Education Seminar 6 s.h.
07S:355 Research in Science Education 15 s.h.

Science

A family of courses in a major science area 12 s.h.

DISSENTATION

Ph.D. students earn 10 s.h. of thesis credit (07S:493 Ph.D. Thesis).

M.A. in Social Studies Education

The Master of Arts in social studies education provides an opportunity for interdisciplinary work in education, history, social science, or related areas for classroom teachers, high school department chairs, supervisors, and others interested in advancing their competence in history and the social sciences and greater proficiency in teaching and supervision.

Students choose one of two programs. Program A provides interdisciplinary study in education, history, social science, or related areas for classroom teachers or others interested in advancing their competence in instruction and their subject area. Program B is for individuals who have a bachelor’s degree in history or social sciences and who wish to obtain a teaching license/certificate while earning the M.A.
ADMISSION

Applicants must meet the admission requirements of the Graduate College. They should have a bachelor's degree in education, history, or one of the social sciences from an accredited institution; a cumulative g.p.a. of at least 3.00; a g.p.a. of at least 3.00 in history and/or social science courses; a combined verbal and quantitative score of at least 1000 on the Graduate Record Examination (GRE) General Test; and two letters of recommendation. Evidence of writing ability in a completed major paper or essay also is required. Typically, applicants to Program A are expected to hold a secondary teaching license/certificate.

After declaring a social studies education major, M.A. students must maintain a g.p.a. of at least 3.00.

PROGRAM A REQUIREMENTS

Program A of the M.A. in social studies education requires a minimum of 38 s.h. of graduate credit distributed among three concentration fields in history and social sciences (or related areas) and education, with at least 10 s.h. in each of three fields.

At least 9 of the total 38 s.h. must be earned in graduate courses numbered 200 or above distributed among the three concentration fields.

Students who choose the thesis option complete a research or investigative problem. If the thesis is research or investigation in history, social science, or a related area, the thesis director is a member of the appropriate department. If the thesis is an investigative problem in social studies education, the thesis director is a College of Education faculty member.

PROGRAM A COMPREHENSIVE EXAMINATION

The comprehensive examination consists of three 2-hour written exams: one on each of the three concentration fields.

PROGRAM B REQUIREMENTS

Program B of the M.A. in social studies education requires a minimum of 38 s.h. of graduate credit. Program B students should have completed considerable work in the social sciences and/or history as undergraduates. Students who have been accepted to the University of Iowa undergraduate or postbaccalaureate Teacher Education Program in secondary social studies education cannot apply credit they earned in required licensure courses as undergraduate or postbaccalaureate students to the required 38 s.h. for the M.A. in social studies education. However, such credit does count toward state teaching licensure.

Program B students who completed 07S:111 Introduction and Practicum: Social Studies and/or 07S:170 Methods: Social Studies as undergraduate or postbaccalaureate students at The University of Iowa are required to retake these courses during the M.A. program and immediately before student teaching. Required teaching licensure course work completed at other colleges or universities is reviewed on a case-by-case basis.

Program B students who were accepted to the undergraduate Teacher Education Program before they received a baccalaureate must complete a college-level math course.

For licensure, students admitted to the M.A. in social studies education must complete 30 s.h. in a history or social science area; the 30 s.h. may include previous undergraduate and/or graduate-level course work. Required professional education course work not completed as part of the baccalaureate degree must be completed for licensure.

Students also must complete 15 s.h. in an additional history or social science licensure area; previous undergraduate course work may apply. Students must complete all of the following courses, unless they completed some of them as part of their bachelor's degree. In such cases, the semester-hour requirement for Program B is reduced accordingly, but it never falls below 38 s.h. All students must take the course work required for meeting all Iowa Department of Education requirements for teacher licensure/certification.

Professional education courses:

- 07B:180 Human Relations for the Classroom Teacher 3 s.h.
- 07E:102/07S:102 Technology in the Classroom (must be taken during student’s first semester in the college) 2 s.h.
- 07P:200 Educational Psychology 3 s.h.
- 07S:100 Foundations of Education 3 s.h.
- 07S:111 Introduction and Practicum: Social Studies 3 s.h.
- 07S:170 Methods: Social Studies 3 s.h.
- 07S:187 Seminar: Curriculum and Student Teaching 3 s.h.
- 07S:190 Orientation to Secondary Education (must be taken during student’s first semester in the college) 1 s.h.
- 07S:191 Observation and Laboratory Practice in the Secondary School 6 s.h.
- 07S:192 Observation and Laboratory Practice in the Secondary School 6 s.h.
07S:195 Teaching Reading in Secondary Content Areas (must be taken during student’s first semester in the college) 1 s.h.
07S:233 History and Foundations of Social Studies Education 3 s.h.
07S:277 Seminar: Social Studies Education (History Teaching and Learning) 3 s.h.
07S:277 Seminar: Social Studies Education (Education for Social Justice) 3 s.h.
07U:100 Foundations of Special Education 3 s.h.

Subject area specialization courses: a minimum of 9 s.h. of course work in history or a social science is required; students should take at least one course taught by the instructor who will serve on the examining committee.

**PROGRAM B COMPREHENSIVE EXAMINATION**

The comprehensive examination consists of three 2-hour exams: one on the subject area specialization, one on general professional education, and one on social studies education.

**Ph.D. in Social Studies Education**

The Doctor of Philosophy in social studies education prepares secondary department chairs, supervisors, curriculum directors, teacher education personnel, and college instructors in the social sciences and in social studies education.

**ADMISSION**

Applicants must meet the admission requirements of the Graduate College. They must have a bachelor’s degree in history, the social sciences, or education; a master’s degree in history, the social sciences, or education; a cumulative g.p.a. of at least 3.00; and a combined verbal and quantitative score of at least 1200 on the Graduate Record Examination (GRE) General Test. At least two years of teaching experience is strongly preferred. Applicants who did not write a thesis as part of their M.A. must submit seminar papers or field research as equivalents.

**REQUIREMENTS**

The Ph.D. in social studies education requires a minimum of 90 s.h. of graduate credit, including course work and dissertation credit but not tool requirements. The 90 s.h. must be distributed among history, social sciences or related areas, and professional education, depending on the student’s background and goals. Students must complete at least 18 s.h. in one area of history or one of the social sciences.

Seminars and courses numbered 200 or above are required in each of the study areas that constitute the major. Students must take 9 s.h. of required courses in social studies education, including 07E:233/07S:233 History and Foundations of Social Studies Education (3 s.h.) and 6 s.h. of 07E:196/07S:196 Topics in Teaching and Learning (social studies emphasis) and/or 07E:277/07S:277 Seminar: Social Studies Education.

Students admitted to any Ph.D. program in the Department of Teaching and Learning must complete at least two of the following three core courses.

- 07E:304 Schooling in the United States 3 s.h.
- 07P:202 Understanding Educational Research 3 s.h.
- 07S:333 Seminar on Teacher Education 3 s.h.

Tool requirements are tailored to the individual student’s program and may consist of foreign languages or other requirements. Usually, statistics plus research techniques in one or more of the chosen fields or in a language is required.

**COMPREHENSIVE EXAMINATION**

Students take three 3-hour examinations, one in each of the study areas. Depending on the distribution of course work, the nine hours of written examinations may be rearranged.

The Ph.D. examining committee consists of five members, who are selected according to the nature of the student’s Ph.D. program and distribution of course work. An oral examination is conducted by the committee following the written exam.

**DISSERTATION**

Ph.D. candidates must complete a dissertation on a research problem in social studies education. The candidate must present a prospectus of the proposed research to the dissertation committee before undertaking the study. Upon completion, the candidate defends the dissertation in an oral exam.

**Special Education**

Special education programs are offered in K-6 and 7-12 Instructional Strategist I: Mild/Moderate, and K-12 Instructional Strategist II: BD/LD. These programs are designed to prepare graduates for positions in public schools, local and state education agencies, clinical settings, and institutions of higher education. All teacher licensure/certification programs are approved by the Iowa Department of Education.
A program leading to special education licensure/certification in Instructional Strategist I: Mild/Moderate (K-6) is available to undergraduates (see “Licensure and Teacher Education Certification”/“Elementary Education” at the beginning of this section). Undergraduates who wish to pursue careers in special education should contact the Department of Teaching and Learning.

**M.A. in Special Education**

The Master of Arts in special education prepares individuals to deliver appropriate levels of service to students with disabilities at the elementary and secondary levels, in either public or private settings. Applicants with a master's degree and special education certification may request admission for the purpose of obtaining an additional area of special education licensure/certification (i.e., professional improvement). Students admitted to the M.A. program typically receive licensure/certification in at least one area upon completing the program.

**ADMISSION**

Applicants must meet the admission requirements of the Graduate College. They must have an undergraduate g.p.a. of at least 3.00 (and/or at least 3.00 on a minimum of 12 s.h. of graduate course work). A combined verbal and quantitative score of at least 1000 on the Graduate Record Exam (GRE) General Test is preferred. International applicants whose first language is not English must score at least 600 (paper-based) or 250 (computer-based) on the Test of English as a Foreign Language (TOEFL).

Application materials must include a completed Graduate College application form; copies of official transcripts for all college course work; an official report of Graduate Record Examination test scores; three current letters of recommendation; and evidence of experience and/or teacher licensure/certification. An interview may be requested.

Final admission decisions are made by the special education graduate admissions committee.

**REQUIREMENTS**

The M.A. in special education requires a minimum of 32 s.h. of graduate credit. Contact the Department of Teaching and Learning for specific program requirements.

**Ed.S. in Special Education Administration**

The Ed.S. in special education administration is offered jointly with the Department of Educational Policy and Leadership Studies. See Educational Policy and Leadership Studies in the Catalog.

**Special Education Consultant Authorization**

The Special Education Consultant authorization program prepares consultants to serve in special education programs.

**ADMISSION**

Admission to the M.A. program or to a certification program in special education is required. Applicants must hold or meet the requirements for the special education teaching endorsement congruent with their desired consultant authorization. Teaching endorsements must be documented by copies of teaching credentials.

Applicants also must have completed four years of successful teaching experience, two of which must be congruent with their desired consultant authorization. They must provide evidence of successful teaching (e.g., written statements from school personnel documenting years of teaching, type of students served, and success as a classroom teacher).

Documentation of certifications and teaching experience should be submitted with the application for admission to the Graduate College.

**REQUIREMENTS**

The Special Education Consultant authorization program requires at least 38 s.h., including credit required for the M.A. and the teaching endorsement program.

Students who already hold an M.A. in special education and an endorsement congruent with their desired consultant authorization must complete the following three courses.

- **07E:300 Design and Organization of Curriculum** 3 s.h.
- **07P:263 Consultation Theory and Practice** 3 s.h.
- **07P:347 Home/School/Community: System Interventions** 3 s.h.

Students without an M.A. in special education must complete an M.A. and teaching endorsement program in special education.
congruent with their desired consultant authorization, plus the three courses listed above (07E:300, 07P:263, 07P:347), for a total of at least 38 s.h.

**Ph.D. in Special Education**

The Doctor of Philosophy in special education prepares students for teaching and research positions in higher education, and for curriculum, supervisory, and research positions in state and local education agencies. The program permits students to study and practice extensively in their special education interest area and in an interest area outside of special education.

**ADMISSION**

Applicants must meet the admission requirements of the Graduate College. They must have master’s degree or equivalent in special education; those without an M.A. thesis must have completed an equivalent project. Applicants should have a graduate g.p.a. of at least 3.50 and a combined verbal and quantitative score of at least 1000 on the Graduate Record Exam (GRE) General Test. International applicants whose first language is not English must score at least 600 (paper-based) or 250 (computer-based) on the Test of English as a Foreign Language (TOEFL). Applicants should have at least one year of full-time teaching experience with exceptional children; several years are preferred.

Application materials must include a completed Graduate College application form; copies of official transcripts for all college course work; an official report of Graduate Record Examination test scores; three current letters of recommendation; and evidence of experience and/or teacher licensure/certification. An interview may be requested.

Final admission decisions are made by the special education graduate admissions committee.

**REQUIREMENTS**

The Ph.D. in special education requires a minimum of 90 s.h. of graduate credit. The study plan includes an emphasis on research skills, all facets of special education, and at least one specialization area.

Students admitted to any Ph.D. program in the Department of Teaching and Learning must complete at least two of the following three courses.

- 07E:304 Schooling in the United States 3 s.h.
- 07P:202 Understanding Educational Research 3 s.h.
- 07S:333 Seminar on Teacher Education 3 s.h.

The research tool requirement for special education consists of a minimum of 16 s.h. in quantitative research skills (07P:143 Introduction to Statistical Methods, 07P:243 Intermediate Statistical Methods, 07P:246 Design of Experiments) as well as a seminar in single-subject design methodology. Students also complete an additional course in one of these areas: group design research, single subject research, measurement, or qualitative research methodology.

The core study area includes 6 s.h. of special education seminars in learning disabilities, behavioral disorders, or mental disabilities, plus the following three courses.

- 07U:343 Proseminar: Issues, Trends, and Research in Special Education 2-3 s.h.
- 07U:344 Proseminar: Issues, Trends, and Research in Special Education II 2-3 s.h.
- 07B:236 Administration of Students with Special Needs 3 s.h.

Students must complete an interdisciplinary minor in a discipline outside of special education (minimum of 12 s.h.).

Students also are required to write the comprehensive examination and complete a doctoral dissertation (07U:493 Ph.D. Thesis, minimum of 10 s.h.).

**Financial Support**

**Elementary Education**

A number of teaching assistantships are available for graduate students in early childhood and elementary education. Assignments vary. Some involve supervising undergraduate majors enrolled in practicums; others involve teaching sections of undergraduate methods courses and supervising student teachers. Most assistantships are classified as one-half-time, which permits students to register for a maximum of 12 s.h. of credit per semester. Graduate assistants must register for at least 6 s.h. per semester.

All assistantships are awarded on a competitive basis. Applicants must have been admitted to regular status in the Graduate College and to an advanced program in the College of Education. For information about assistantships, contact the chair of the Department of Teaching and Learning.

**Secondary and Special Education**

A limited number of assistantships are available for graduate students in secondary and special
education. Assignments vary. Some involve teaching undergraduate courses or supervising practicum experiences; others consist primarily of research activities. Graduate assistants may register for a maximum of 12 s.h. and a minimum of 6 s.h. per semester.

Graduate students in secondary education also may be eligible for assistanship in some College of Liberal Arts and Sciences departments. Students with appropriate credentials should apply directly to the specific department or consult the College of Education advisor in the appropriate field.

Traineeships in selected licensure/certification and master's degree programs are available to full-time special education students.

**Courses**

**Early Childhood and Elementary Education**

07E:021 Oral Interpretation 3 s.h.  
Same as 036:021.

07E:090 Orientation to Elementary Education 1-2 s.h.  
Overview of elementary education expectations, including options for student teaching; classroom observation, lesson planning, performance indicators, INTASC standards, classroom management, information about mandatory child abuse reporting, blood-borne pathogens, professional ethics. Eight-week course.

07E:100 Foundations of Education 3 s.h.  
Same as 07E:100.

07E:102 Technology in the Classroom 2 s.h.  
Same as 07E:102.

07E:104 Remedial Methods in Speech and Hearing 2 s.h.  
Emphasis on elementary grades. Usually taken in conjunction with 07E:192, which provides approximately 70 hours of supervised clinical practice in elementary schools. Primarily for speech pathology and audiology majors. Prerequisite: consent of instructor.

07E:106 Foreign Language Education Practicum I 3 s.h.  
Skill development for teaching languages in the early grades; curriculum design, test creation, microteaching with inservice teachers. Prerequisite: 07E:110 or 07S:110. Corequisite: 07S:116. Same as 07S:118.

07E:107 Foreign Language Education Practicum II 3 s.h.  
Practice in lesson design, classroom management techniques, evaluation skills during work with inservice foreign language teachers. Corequisite: 07S:117. Same as 07S:119.

07E:110 Teaching K-12 Second Language Learners 3 s.h.  
Second language learning and teaching in the multicultural classroom; influence of school setting, societal context. Prerequisite: admission to TEP. Same as 07S:110.

07E:114 Parent-Child Relationships 3 s.h.  
Roles and relationships within and between families, culture, society; identify [family] resources and concerns based on children’s development, abilities.

07E:118 ESL Practicum I 3 s.h.  
Skill development for teaching English as a second language; curriculum design, test creation, microteaching with inservice teachers. Prerequisite: 07E:110 or 07S:110. Corequisite: 07S:116. Same as 07S:118.

07E:119 ESL Practicum II 3 s.h.  
Practice in lesson design, classroom management techniques, evaluation skills during work with inservice English as a second language teachers. Prerequisite: 07E:110 or 07S:110. Corequisite: 07S:117. Same as 07S:119.

07E:120 Methods and Materials: Music for the Classroom Teacher 2-3 s.h.  
Development of music skills, techniques, knowledge of methods and materials for teaching music to young children; for elementary education majors. Prerequisite: admission to TEP.

07E:122 Methods and Materials: Art for the Classroom Teacher 2 s.h.  
Projects, techniques, processes in art for elementary and early childhood education majors; combination lecture and studio; painting, drawing, printmaking, sculpture, and crafts with materials and tools commonly available in the elementary schools. Same as 01E:195.

07E:123 Reading and Responding to Children’s Literature 2-3 s.h.  
Reading and teaching children’s literature in elementary classrooms for aesthetic, personal, social, and critical purposes; readings from a wide range of genres; approaches to teaching children’s literature; recent trends and issues. Prerequisite: admission to elementary TEP. Corequisites: 07E:160 and 07E:164.

07E:124 Differentiating Projects with Technology 1 s.h.  
Use of digital tools to enrich student presentations; PowerPoint slide shows, presentations uploaded to World Wide Web, interactive multimedia presentations via HyperStudio. Same as 07E:124.

07E:125 Differentiated Curriculum for the Gifted 1 s.h.  
Program options for K-12 gifted students; student abilities and needs linked with various curriculums; case studies, school materials. Same as 07E:125.

07E:126 Reading for High-Ability Students 1 s.h.  
Purposes and methods of reading instruction, with focus on developmentally appropriate needs of high-ability readers; genres of literature, enriched and accelerated reading curricula, role of reading in social and emotional development of gifted students. Same as 07E:126, 07U:126.

07E:127 Physical Education and Health for Elementary Teachers 2 s.h.  
Methods, curriculum. Prerequisite: admission to TEP.

07E:128 Differentiating through Advanced Technology 1 s.h.  
Multimedia and web-based tools and utilities that enrich classroom learning and facilitate presentations made by technologically advanced students; production and editing of digital video, computer graphics, advanced web-publishing and communication techniques; skill development. Same as 07E:128, 07U:128.

07E:129 Learning and Leadership for Gifted and Talented Students 1 s.h.  
Same as 07E:129, 07U:129.

07E:132 Middle School Curriculum and Methods 3 s.h.  
Junior high and middle school development compared; characteristics of exemplary programs, disciplinary and interdisciplinary trends; variety of teaching methods (group and individual); hands-on activities. Prerequisite: admission to TEP. Same as 07E:132.
07E:134 Parent-Teacher Communication 1-3 s.h.
Realities of working with parents; interpersonal skills; options for parent support services. Same as 07P:134, 07U:134.

07E:136 Home/School/Community Partnerships 3 s.h.
Issues related to collaboration among families, educators, community members in implementing school programs. Same as 07P:136, 07S:136, 07U:136.

07E:143 Methods: Art Workshops 3 s.h.
Application of studio methods to teaching children in Saturday Children’s Art Class Program. Prerequisite: 01E:196. Same as 01E:143.

07E:145 Methods and Materials: General Music 3 s.h.
Methods for teaching general music in elementary and secondary schools. Prerequisites: 07E:102 or 07S:102, 07S:190, and 07S:006.

07E:157 Methods: Early Childhood Education 3 s.h.
Current educational literature emphasizing developmentally appropriate methodology across all curricular areas and including health, safety, nutritional needs, play, creativity.

07E:160 Methods: Elementary School Language Arts 3 s.h.
Theoretical foundations and practical skills for designing and implementing effective language arts instruction and assessment, grades K-6. Prerequisite: admission to elementary TEP. Corequisites: 07E:123 and 07E:164.

07E:161 Methods: Elementary School Social Studies 2-3 s.h.
Objectives and content for grades K-6; integrated approaches, community-based learning. Prerequisite: admission to elementary TEP. Corequisites: 07E:162 and 07E:163.

07E:162 Methods: Elementary School Science 2-3 s.h.
Principles and concepts of science instruction in elementary school for preservice instruction of elementary education majors; emphasis on techniques that characterize new approaches to science. Prerequisite: admission to elementary TEP. Corequisites: 07E:161 and 07E:163.

07E:163 Methods: Elementary School Mathematics 2-3 s.h.
Content and techniques of teaching and means of assessment for K-6 mathematics. Prerequisite: admission to TEP Corequisites: 07E:161 and 07E:162.

07E:164 Methods: Elementary School Reading 3 s.h.
Theoretical foundations and practical skills for designing and implementing effective reading instruction and assessment, grades K-6. Prerequisite: admission to elementary TEP. Corequisites: 07E:123 and 07E:160.

07E:167 Observation and Assessment of Young Children 3 s.h.
Observation and application of developmentally appropriate assessments for children to age eight, including special needs and at-risk populations; play and creativity; practicum experience in diverse settings with varying age levels (infant/toddler, preprimary, primary); 20-hour practicum.

07E:170 Classroom Management 1-3 s.h.

07E:171 Reading and Writing: Processes and Instruction 3 s.h.
Factors that contribute to individuals’ ease or difficulty in learning to read and write; issues, techniques in classroom literacy instruction and assessment. Pre- or corequisites: 07E:160 and 07E:164 for elementary education majors.

07E:172 Reading Instruction: Teaching Practicum 3-4 s.h.

07E:173 Methods: Middle School Mathematics 3 s.h.
Same as 07S:134.

07E:174 Elementary Education: Practicum arr.
Experience conducting instruction for children; four schoolroom sessions and one on-campus meeting weekly. Prerequisite: completion of appropriate area of specialization methods block. Corequisite: 07E:170.

07E:175 Linguistic Diversity in the Classroom 3 s.h.
Topics related to linguistic diversity in the classroom grades 1-12; optimal teaching techniques for positive academic outcomes of linguistically diverse students. Same as 07S:175.

07E:176 Teaching Elementary School Science 3 s.h.
Special topics, activities in student-centered teaching/learning environments; standards, integrated curriculum, alternative assessments, classroom management, problem solving, action research.

07E:177 Workshop: Curriculum Evaluation and Selection 1-3 s.h.
For a specific curricular area, choosing or developing criteria for evaluating, reviewing, selecting, organizing materials and activities to suit specific curricular patterns. Repeatable for different areas (see ISIS for areas offered).

07E:178 Workshop: Curriculum Development and Implementation 1-4 s.h.

07E:179 Workshop: Teaching Methodology 1-3 s.h.
For a specific curricular area: review of teaching methods, theory, related research; planning, developing lessons; demonstrations, observations, simulations of teaching. Repeatable for different areas (see ISIS for areas offered).

07E:180 Drama in the Classroom 3 s.h.
Theories of community, culture, identity in relation to language arts teaching and learning; emphasis on incorporating multiple literacies, both oral and print, into language arts curricula; action research involving oral literacy. Same as 049:101.

07E:182 Language and Learning 2-3 s.h.
How language growth reflects and enables cognitive development; readings in psychology, anthropology, education; relationship of language theory to language instruction in schools. Same as 07S:182, 08P:182.

07E:183 Second Language Classroom Learning 3 s.h.
Synthesis of empirical findings on children’s and adult’s learning of a second or foreign language; emphasis on theoretical underpinnings of many approaches, methods, techniques in language teaching. Same as 07S:183, 039:177.

07E:186 Curriculum Foundations 2-3 s.h.
Elementary and secondary background developments in curriculum; definitions, historical perspective, philosophies, theories of knowledge, models, learning theories, directions of development and shaping forces; emphasis on development of a curriculum project. Same as 07S:186.

07E:187 Philosophy and Administration of Early Childhood Programs 3 s.h.
History and philosophy of developmentally appropriate practices and application to early childhood programs; managing inclusive early childhood education programs—licensing, budgeting, health and safety, food and nutrition, parent involvement, supervising staff, maintaining a quality program; implications of legislation and public policy that affect children with and without disabilities and their parents; 12-hour practicum.

07E:188 Practicum in Teaching and Curriculum Development in Gifted Education 1-6 s.h.
Experience in developing course materials for classes offered through the Belin Center. Same as 07C:188, 07S:188, 07U:188.
07E:190 Supervised Teaching in the Elementary School: Interactive Phase
Student teaching at the elementary level (K-9). Prerequisite: application to the Office of Teacher Education and Student Services. Corequisite: 07E:191.

07E:191 Supervised Teaching in the Elementary School: Pre- and Post-Active Phase
Prerequisite: application to the Office of Teacher Education and Student Services. Corequisite: 07E:190.

07E:192 Special Area Student Teaching
Supervised teaching and observation in specific areas of elementary curriculum (see ISIS for areas offered). Prerequisite: consent of instructor.

07E:193 Independent Study
Prerequisites: senior standing and consent of instructor.

07E:196 Topics in Teaching and Learning
Repeatable. Prerequisite: consent of instructor. Same as 07S:196, 07U:196.

07E:197 Supervised Teaching Early Childhood Center: Interactive Phase

07E:198 Supervised Teaching Pre- and Post-Active Phase
Prerequisite: application to the Office of Teacher Education and Student Services. Corequisite: 07E:197.

07E:204 Literature for Children II
Current theory, research, and practice in reading and responding to children’s literature; genre and topic vary. Same as 07S:204, 08P:204.

07E:205 Foundations of Education
Same as 07S:205.

07E:230 Workshop in School Mathematics
One- to three-week examination of and experience with recent developments in school mathematics teaching methods, curriculum. Same as 07S:230.

07E:231 Technology in School Mathematics
Methods, materials, issues, pedagogy, assessment; use and evaluation of mathematics software, other technology; implications for organization, development of course content. Same as 07S:231.

07E:233 History and Foundations of Social Studies Education
Historical, philosophical, social foundations of social studies education; recent debates over content and instructional processes; student research proposals. Same as 07S:233.

07E:234 Foundations of Mathematics Education
History of U.S. mathematics education; learning theory applied to teaching, learning mathematics; curriculum design; curriculum/standards and achievement patterns in the United States and other countries; equity, research literature. Same as 07S:234.

07E:235 Current Issues in Mathematics Education
Recent curriculum developments, experimental programs, research relevant to classroom instruction; education trends that may have a significant impact on mathematics programs. Same as 07S:235, 22M:195.

07E:251 Preparation of Curriculum Materials for School Science
Same as 07S:251.

07E:252 Designing Strategies for Science Instruction
Same as 07S:252.

07E:255 Science Education: Issues, History, and Rationale
Critical analysis of research reports, philosophical statements, synthesis studies, issue statements that characterize graduate study in science education. Offered fall semesters. Same as 07S:255.

07E:256 Science Education: The Nature of Science
Topics in philosophy, psychology, history, sociology of science that are related to research, practice, current issues in science education. Offered spring semesters. Prerequisite: 097:128. Same as 07S:256.

07E:257 Learning in the Science Classroom
Assumptions about learning and about learning theories and their impact on pedagogical actions; how some concepts are planned and implemented. Same as 07S:257.

07E:258 Writing in the Science Classroom
Literacy in the science classroom; theoretical and pedagogical perspectives; practical classroom activities that lead to effective writing and increased learning. Same as 07S:258.

07E:259 Advanced Pedagogy
Theoretical and practical perspectives on pedagogy; how to assess practice, provide feedback, and building learning pathways for teachers. Same as 07S:259.

07E:260 Restructuring Science Courses
Same as 07S:260.

07E:261 Leadership and Change in School Science
Same as 07S:261.

07E:264 Early Literacy Development and Instruction
Understanding of early reading and writing experiences; relationship of reading to other communication areas; knowledge of instructional approaches, techniques, materials, assessment procedures; interrelationship of home and school experiences; identification of current and crucial issues and relevant research.

07E:265 Reading and Writing Across Intermediate Grades
Reading with comprehension, provision for individual differences, research in reading, extension of skills taught in primary grades; for teachers, principals, supervisors.

07E:267 Inquiry-Based Curriculum Development in Early Childhood and Elementary Classrooms
Theoretical and practical organization of developmentally appropriate curricula and teaching methods to promote learning.

07E:271 Advanced Reading Clinic Techniques
Special instructional procedures for children with severe learning problems in reading; causes of reading disorders; educational prognosis for severely disabled readers. Prerequisite: 07E:164 or 07E:171 or 07E:174. Corequisite: 07E:272.

07E:272 Advanced Reading Clinic Practicum
Practice in selecting and using special instructional procedures; fitting clinical teaching techniques into a balanced developmental reading framework. Prerequisite: 07E:164 or 07E:171 or 07E:174. Corequisite: 07E:271.

07E:273 Reading Recovery I

07E:274 Reading Recovery II
Training for teachers; tutoring of first-grade children; effective moment-by-moment instructional decision making.

07E:275 Reading Recovery Assessment Training
How to administer and analyze Marie Clay’s Observation Survey; includes administration of the assessment to at least two first-grade children.

07E:277 Seminar: Social Studies Education
Periodical literature, trends, curricular developments, research. Same as 07S:277.
07E:280 Supervision of Instruction and Staff Development 2-3 s.h.
Teacher effectiveness research; formative and summative evaluation procedures, with emphasis on the supervision of student teachers; research on staff development and bringing about change in education. Same as 07S:285.

07E:293 Individual Instruction arr.
Prerequisite: consent of instructor.

07E:300 Design and Organization of Curriculum 3 s.h.
Major issues, modern selection, sequential arrangement, organization of content; relationship of time allotments to implementation; utilization of instructional equipment; appraisal procedures; staff participation in curriculum development.

07E:304 Schooling in the United States 3 s.h.
Governance, finance, and policy structures that have influenced teaching and learning in public schools.

07E:306 Introduction to Research in Art Education 3 s.h.
Methods of inquiry used for research in art education and related disciplines; methods of research design.

07E:308 Seminar: Research and Current Issues arr.
For a specific curricular area: review of the literature, critical analysis of reported research, study of current issues and problems (see ISIS for specific areas offered). Repeatable. Prerequisite: consent of instructor. Same as 07S:308.

07E:335 Seminar: Mathematics Education arr.
Analysis of current research, research methodology, curriculum developments in mathematics education. Repeatable. Same as 07S:335.

07E:340 Advanced Topics in Teaching and Learning arr.
Topics vary. Same as 07S:340, 07U:340.

07E:350 Seminar: Science Education 0-2 s.h.
National issues, program features, completed faculty and doctoral candidates' research. Same as 07S:350.

07E:355 Research in Science Education 2-3 s.h.
Same as 07S:355.

07E:365 Reading Clinic: Supervision arr.
Supervised experience in guiding and improving teacher performance in clinical practicums. Prerequisite: consent of instructor.

07E:370 Methods in Literacy Research 3 s.h.
Conceptual and practical exploration of selected research methods, including pilot data collection, analysis, and reporting. Repeatable. Same as 07S:370, 08P:300.

07E:385 Practicum in College Teaching arr.
Prerequisite: consent of instructor.

07E:391 Research Project arr.
Individual research projects in a specific curricular area; for advanced students. Repeatable. Prerequisite: consent of instructor.

07E:392 Field Service Project arr.
Individual field service project in a specific curricular area; for advanced students. Repeatable. Prerequisite: consent of instructor.

07E:393 M.A. Thesis arr.
Prerequisite: consent of instructor.

07E:400 Research in Art Education arr.
Individual research under supervision; applicable to thesis preparation and to doctoral prospectus development. Repeatable. Same as 01E:406, 07S:406.

07E:415 Ph.D. Seminar in Language, Literacy, and Culture arr.
Historical and recent research and theory in literacy education. Repeatable. Prerequisite: consent of instructor. Same as 07S:415, 08P:425.

07E:451 Advanced Qualitative Data Analysis 3 s.h.
Same as 07S:451.

Prerequisite: consent of instructor.

Secondary Education

07S:090 Introduction and Practicum: Art 2 s.h.
Experience observing and assisting art teachers and students in elementary or secondary schools; four to six hours per week in the school plus on-campus class meetings. Prerequisite: admission to TEP.

07S:095 Introduction and Practicum: Mathematics 3 s.h.
Experience designing and teaching lessons that have varying instructional intent and that use multiple instructional strategies; study and practice methods of managing the classroom learning environment; approximately 50 hours in cooperating schools, on-campus meetings. Prerequisite: admission to TEP.

07S:096 Introduction and Practicum: Music 2 s.h.
Experience observing and assisting music teachers and students in elementary or secondary schools; six hours per week in the school plus on-campus class meetings. Prerequisite: admission to TEP.

07S:100 Foundations of Education 3 s.h.
Overview of contemporary American education, preschool through secondary; including aims, history, philosophy of education, professional ethics, legal responsibilities; school curriculum, organization; school law, finance; political, social issues. Prerequisite: admission to TEP. Same as 07E:100.

07S:102 Technology in the Classroom 2 s.h.
Same as 07E:102.

07S:105 Secondary Methods: Art 3 s.h.
Art education theory and methods at elementary and secondary levels; art curriculum, unit, and lesson planning; evaluation, motivation, instructional materials; observational techniques.

07S:106 Foreign Language Education Practicum I 3 s.h.
Skill development for teaching languages in the early grades; curriculum design, test creation, microteaching with inservice teachers. Prerequisite: 07S:110. Corequisite: 07S:116. Same as 07E:106.

07S:107 Foreign Language Education Practicum II 3 s.h.
Practice in lesson design, classroom management techniques, evaluation skills during work with inservice foreign language teachers. Corequisite: 07S:117. Same as 07E:107.

07S:110 Teaching K-12 Second Language Learners 3 s.h.
Second language learning and teaching in the multicultural classroom; influence of school setting, societal context. Prerequisite: admission to TEP. Same as 07E:110.

07S:111 Introduction and Practicum: Social Studies 2-3 s.h.
Experience observing and assisting social studies teachers and students in secondary schools; four to six hours per week in the school plus on-campus class meetings. Prerequisite: admission to TEP.

07S:112 Introduction to Museology 3 s.h.
Introduction to history, philosophy, function, management of museums and related institutions; emphasis on American museums. GE: humanities. Same as 024:102, 097:115, 113:103.

07S:113 Methods: Secondary School Journalism 3 s.h.
Methods and materials for teaching high school journalism; publication policies, staff organization, production schedules, technology, the Internet, and techniques for advising student publications; experience in simulated teaching situations. Offered fall semesters. Same as 019:101.
07S:114 Introduction and Practicum: English and Speech 3 s.h.
Experience observing and assisting English or speech teachers and students in secondary schools; 12 hours per week in the school plus on-campus class meetings.

07S:115 Methods: English 3 s.h.
Organizational techniques, methods, materials for teaching high school English; experience in simulated teaching situations during laboratory sessions, integrated with lectures and discussions. Prerequisite: 07S:114. Same as 08P:190.

07S:116 Learning to Teach Second Languages I 3 s.h.
Approaches, methods, and techniques of teaching the modalities of listening, speaking, reading, and writing in a second language. Corequisite: 07E:106 or 07E:118 or 07S:106 or 07S:118.

07S:117 Learning to Teach Second Languages II 3 s.h.
Curriculum design, classroom management, student evaluation, technology, using context to teach culture in second languages. Prerequisite: 07E:110 or 07S:110. Corequisite: 07E:107 or 07E:119 or 07S:107 or 07S:119.

07S:118 ESL Practicum I 3 s.h.
Skill development for teaching English as a second language; curriculum design, test creation, microteaching with in-service teachers. Prerequisite: 07E:110 or 07S:110. Corequisite: 07S:116. Same as 07E:118.

07S:119 ESL Practicum II 3 s.h.
Practice in lesson design, classroom management techniques, evaluation skills during work with in-service English as a second language teachers. Prerequisite: 07E:110 or 07S:110. Corequisite: 07S:117. Same as 07E:119.

07S:121 Environmental Science for High Ability Students 1 s.h.
Environmental health research; principles of toxicology, process of environmental health risk assessment; experience collecting, organizing, and analyzing information.

07S:122 Math Programming for High Ability Students 1 s.h.
Unique challenges and opportunities confronted by teachers of high-ability students; theory and practice, development of program outlines for implementation. Same as 07P:122.

07S:124 Differentiating Projects with Technology 1 s.h.
Use of digital tools to enrich student presentations; PowerPoint slide shows, presentations uploaded to World Wide Web, interactive multimedia presentations via HyperStudio. Same as 07E:124.

07S:125 Differentiated Curriculum for the Gifted 1 s.h.
Program options for K-12 gifted students; student abilities and needs linked with various curriculums; case studies, school materials. Same as 07E:125.

07S:126 Reading for High-Ability Students 1 s.h.
Purposes and methods of reading instruction, with focus on developmentally appropriate needs of high-ability readers; genres of literature, enriched and accelerated reading curricula, role of reading in social and emotional development of gifted students. Same as 07E:126, 07U:126.

07S:128 Differentiating through Advanced Technology 1 s.h.
Multimedia and web-based tools and utilities that enrich classroom learning and facilitate presentations made by technologically advanced students; production and editing of digital video, computer graphics, advanced web-publishing and communication techniques; skill development. Same as 07E:128, 07U:128.

07S:129 Learning and Leadership for Gifted and Talented Students 1 s.h.
Same as 07E:129, 07U:129.

07S:130 Workshops for Secondary School Journalism and Communication Teachers 1-3 s.h.
Teaching journalistic writing and editing, photography, design, desktop publishing, current technology; web page design; developing curriculum and advising student publications; for teachers responsible for journalism publication programs or classes. Same as 019:102.

07S:132 Middle School Curriculum and Methods 3 s.h.
Junior high and middle school development compared; characteristics of exemplary programs, disciplinary and interdisciplinary trends; variety of teaching methods (group and individual); hands-on activities. Prerequisite: admission to TEP. Same as 07E:132.

07S:134 Methods: Middle School Mathematics 3 s.h.
Subject matter content, teaching and assessment techniques for grades 5-9 math; how students learn mathematics; mathematics curriculum planning for all students. Prerequisite: 07S:095 or consent of instructor. Same as 07E:173.

07S:135 Methods: High School Mathematics 3 s.h.
Subject matter content, teaching and assessment techniques for grades 9-12 math; how students learn mathematics; mathematics curriculum planning for all students. Prerequisite: 07E:095 or consent of instructor.

07S:136 Home/School/Community Partnerships 3 s.h.

07S:140 Band Methods and Materials 3 s.h.
High school and elementary school music methods required for teaching certificate; for instrumental music education majors. Prerequisites: 07E:102 or 07S:102, 07S:190, and 07S:096.

07S:141 Measurement and Evaluation in Music Education 3 s.h.
Measurement and evaluation techniques for music aptitude, achievement, preference; emphasis on developing teacher-made tests and on available standardized music tests.

07S:143 Instrumental Techniques 1-3 s.h.
Repeatable. Same as 025:105.

07S:144 Psychology of Music 2 s.h.
Cognition of music, affective response, aesthetic response, musical ability.

07S:145 Instrumental Conducting 2 s.h.
Advanced skills for instrumental conducting, score analysis, rehearsal techniques, literature selection. Prerequisite: 025:107. Same as 025:108.

07S:147 Choral Methods 3 s.h.
Organization, implementation of effective choral music programs for all ages. Prerequisites: 07E:102 or 07S:102, 07S:190, and 07S:096. Same as 025:109.

07S:148 Choral Conducting and Literature 3 s.h.
Advanced skills appropriate to choral conducting, analysis, literature selection studied and implemented to develop a secure approach to choral art; students preparing to teach in the elementary or secondary schools must register under 07S:148. Prerequisite: 07S:147. Same as 025:110.

07S:149 Introduction to Music Research 2-3 s.h.
Preparation for conducting research on music behavior.

07S:150 String Methods and Materials 3 s.h.
Prerequisites: 07E:102 or 07S:102, 07S:190, and 07S:096. Same as 025:112.

07S:151 Science Teaching and Practice with Early Learners 3 s.h.
Introduction to students, schools, the purpose of schooling children in science, learning theories, science curricula, contemporary science education issues, effective science teaching.
07S:152 Methods of Teaching Science 3 s.h.
Developing, writing, and orally defending a robust research-based framework for teaching science that includes student goals, student actions, content, materials, activities, teaching behaviors and strategies, contemporary learning theories, self-evaluation. Prerequisite: 07S:151.

07S:153 Instructional Issues in Teaching Science 3 s.h.
Articulating, experiencing, practicing a research-based framework for teaching science in the real world of students, schools, teaching. Prerequisite: 07S:152. Corequisite: 07S:179.

07S:155 Approaches to Teaching Writing 3 s.h.
Theories, practices, strategies, and history of writing and teaching writing. Same as 08N:141.

07S:170 Methods: Social Studies 3 s.h.
Analysis of the teaching-learning process; organization of social studies content for teaching purposes; evaluation of learning procedures and new strategies; practicum work includes microteaching, computer-assisted modules, lesson plan development, writing test items.

07S:172 Thinking Skills 1 s.h.
Factors involved in teaching thinking skills as a total concept; the relationship of critical and creative thinking; review of published programs.

07S:173 Programming/Curriculum for High Ability Students 1 s.h.
Programming and curriculum for K-12 students identified as gifted or highly able; in-class differentiations, special projects for pull-out programs, facilitating research projects, mentoring in advanced programming.

07S:175 Linguistic Diversity in the Classroom 3 s.h.
Topics related to linguistic diversity in the classroom grades 1-12; optimal teaching techniques for positive academic outcomes of linguistically diverse students. Same as 07E:175.

07S:178 Workshop in Teaching Communication and Forensics arr.
Methods, materials, progression, evaluation in teaching; supervision of students in courses and class activities; opportunities for observation, demonstration, practice in teaching discussion and debate, and in individual speech and forensic events. Repeatable. Same as 036:105.

Supervised teaching experience in a single subject; secondary school setting.

07S:180 Issues in Foreign Language Education 3 s.h.
Theoretical perspectives of pivotal research issues at the forefront of foreign language education; systems available to foreign language professionals for disseminating research.

07S:182 Language and Learning 2-3 s.h.
How language growth reflects and enables cognitive development; readings in psychology, anthropology, education; discussion of the relationship of language theory to schools of language instruction. Same as 07E:182, 08P:182.

07S:183 Second Language Classroom Learning 3 s.h.
Synthesis of empirical findings on children’s and adults’ learning of a second or foreign language; emphasis on theoretical underpinnings of approaches, methods, techniques in language teaching. Same as 07S:183, 039:177.

07S:184 Reading in a Second Language 3 s.h.
Current theory/research/practice in second language reading field; role of textual features and the reader in reading comprehension.

07S:185 Curriculum Foundations 2-3 s.h.
Elementary and secondary background developments in curriculum; definitions, historical perspective, philosophies, theories of knowledge, models, learning theories, directions of development and shaping forces; emphasis on development of a curriculum project. Same as 07E:186.

07S:187 Seminar: Curriculum and Student Teaching 1-3 s.h.
Discussions, role-playing, group and individual reports, analysis of critical incidents, classroom management, videotapes of student classroom performance pertinent to participants’ student teaching experiences. Corequisite: student teaching.

07S:188 Practicum in Teaching and Curriculum Development in Gifted Education 1-6 s.h.
Experience in developing course materials for classes offered through the Belin Center. Same as 07C:188, 07E:188, 07U:188.

07S:189 Elementary School Special Subject Area Student Teaching arr.
Supervised teaching experience in a single subject in grades 1-6.

07S:190 Orientation to Secondary Education 0-1 s.h.
Overview, including options for student teaching, classroom observation, lesson planning, classroom management, performance indicators, INTASC standards, blood borne pathogens, professional ethics.

07S:191 Observation and Laboratory Practice in the Secondary School arr.
Student teaching experience in performing the duties of regular classroom teachers under supervision of experienced personnel in secondary schools. Prerequisite: consent of instructor.

07S:192 Observation and Laboratory Practice in the Secondary School arr.
Continuation of 07S:191. Prerequisite: consent of instructor.

07S:193 Reading and Teaching Adolescent Literature 3 s.h.
Reading and evaluation of literature suitable for junior and senior high school students. Same as 08P:198.

07S:194 Methods: High School Reading 2-3 s.h.
Methods and materials used in teaching developmental reading in all junior and senior high school content areas. Prerequisite: 07S:114.

07S:195 Teaching Reading in Secondary Content Areas 1 s.h.
Integration of reading strategies into secondary content areas for teacher candidates in secondary education.

07S:196 Topics in Teaching and Learning arr.
Prerequisite: consent of Instructor. Same as 07E:196, 07U:196.

07S:197 Principles of Course Design for Second Language Instruction 3 s.h.
Contemporary views of second language curriculum design; guidelines necessary for the creation of prototypical curriculum units to be transposed into classroom-ready forms; for individuals interested in foreign language materials development.

07S:199 Independent Study arr.

07S:200 Fundamentals of Second Language Assessment 3 s.h.
How to write language tests; discussion of fundamental issues in development of new tests or selection of existing tests.

07S:201 Seminar: Current Topics in Music Education 2-3 s.h.
Major areas of professional and research interest. Repeatable.

07S:202 Second Language Program Management 3 s.h.
Preparation for supervising, administering foreign language programs at all levels; for precollege language teachers and graduate students.
07S:203 Second Language Planning in Education 3 s.h.
Sociology and politics of national policies involving language, internationally; development of a research-based policy perspective on language issues in the country in which the student intends to teach.

07S:204 Literature for Children II 3 s.h.
Current theory and research practice in reading and responding to children's literature; genre and topic vary. Same as 07E:204, 08P:204.

07S:205 Foundations of Education 3 s.h.
Same as 07E:205.

07S:206 Foundations of Music Education Curricula 3 s.h.
Curriculum development, instructional materials, analysis of current teaching methods and techniques in school music programs; historical foundations of music education.

07S:207 Reading in Non-Roman Scripts 3 s.h.
Theory and practice of reading in languages that use non-Roman alphabets, syllabary, logographic systems; reading in first and second language contexts; instructional and literacy development issues. Prerequisite: 07E:171 or 07P:270 or 07S:184 or equivalent. Same as 164:226.

07S:208 Designing Materials for Second Language Instruction 3 s.h.
Critical perspective on creating and using media for second language learning and teaching; research on materials design, development of media. Prerequisite: 07S:183.

07S:209 Cultural Curriculum 3 s.h.
Culture's role in foreign/second language teaching; definition, pedagogy, assessment, and materials that allow culture to be taught and learned. Same as 164:229.

07S:210 International Program Summer Institute for Teachers 3 s.h.
Same as 187:210.

07S:230 Workshop in School Mathematics 1-3 s.h.
Recent developments in school mathematics teaching methods and curriculum relevant to a selected issue; one to three weeks of intensive examination, experience. Same as 07E:230.

07S:231 Technology in School Mathematics 2-3 s.h.
Methods, materials, issues, pedagogy, assessment; use, evaluation of technology for mathematics teaching and learning; implications for organization, development of course content. Same as 07E:231.

07S:233 History and Foundations of Social Studies Education 3 s.h.
Same as 07E:233.

07S:234 Foundations of Mathematics Education 2-3 s.h.
History of U.S. mathematics education; learning theory applied to teaching, learning mathematics; curriculum design; curriculum/standards and achievement patterns in the United States and other countries; equity; research literature. Same as 07E:234.

07S:235 Current Issues in Mathematics Education 2-3 s.h.
Recent curriculum developments, experimental programs, research relevant to classroom instruction, trends in education that may have a significant impact on mathematics programs. Same as 07E:235, 22M:195.

07S:236 The Teaching of Geometry 2-3 s.h.
Current developments in teaching middle school/junior high and high school geometry; selection, organization of content; research on teaching and learning.

07S:239 Teaching of Algebra 2-3 s.h.
Current developments in curriculum and instructional methods in secondary school algebra; classroom use of the history of algebra, use of technologies, implications of current research for the algebra classroom.

07S:240 Creative Thinking in Music 2 s.h.
Review and analysis of creative literature about musical experience from theoretical and methodological perspectives; future trends for music instruction in composition, improvisation.

07S:241 Music Education Workshop 1 s.h.
Materials and innovative instructional procedures for teaching instrumental music in public schools and colleges. Repeatable. Same as 02S:220.

07S:244 Individual Projects in Music Education 1-2 s.h.
Projects of special concern to individual music teachers in the public schools.

07S:251 Preparation of Curriculum Materials for School Science 1-3 s.h.
Preparation of instructional materials for science courses. Repeatable. Same as 07E:251.

07S:252 Designing Strategies for Science Instruction 1-4 s.h.
Strategies and instructional models characterizing science instruction at the elementary, secondary, college levels. Offered spring semesters and summer sessions. Same as 07E:252.

07S:255 Science Education: Issues, History, and Rationale 2-3 s.h.
Intermediate topics in philosophy and psychology of science, implications for research and practice in science education. Offered fall semesters. Prerequisite: previous work in philosophy or psychology of science. Same as 07E:255.

07S:256 Science Education: The Nature of Science 3 s.h.
Historical and sociological understanding of the nature of science; applications of that understanding to problems and issues in science education. Offered spring semesters. Prerequisites: 097:128 and previous work in history or sociology of science. Same as 07E:256.

07S:257 Learning in the Science Classroom 2-3 s.h.
Assumptions about learning and about learning theories and their impact on pedagogical actions; how some concepts are planned and implemented. Same as 07E:257.

07S:258 Writing in the Science Classroom 3 s.h.
Literacy in the science classroom; theoretical and pedagogical perspectives; practical classroom activities that lead to effective writing and increased learning. Same as 07E:258.

07S:259 Advanced Pedagogy 3 s.h.
Theoretical and practical perspectives on pedagogy; how to assess practice, provide feedback, and build learning pathways for teachers. Same as 07E:259.

07S:260 Restructuring Science Courses 2-3 s.h.
Constructivist learning model applied to existing science courses; emphasis on student-centeredness. Repeatable. Same as 07E:260.

07S:261 Leadership and Change in School Science 2-3 s.h.
Developing leadership skills for science education reform. Repeatable. Same as 07E:261.

07S:266 Mentoring of Science Educators 2-3 s.h.
Self-analysis, interpersonal communication, leadership, and mentoring versus evaluation. Repeatable.

07S:268 Science Concepts Applied to Local Issues 2-3 s.h.
Science concepts as product of instructional process.

07S:277 Seminar: Social Studies Education arr.
Periodical literature, trends, curricular developments, research in various aspects of social studies education; for master's and doctoral candidates in social studies education. Same as 07E:277.

07S:279 Advanced Research in Music Education 3 s.h.
Design, performance, analysis, and reporting of music research.
07S:280 Workshop: Teacher Training for Advanced Placement Courses 1-2 s.h. Focus on a particular academic content area. Prerequisite: consent of instructor.

07S:285 Supervision of Instruction and Staff Development 2-3 s.h. Teacher effectiveness research; formative and summative evaluation procedures, with emphasis on the supervision of student teachers; research on staff development and bringing about change in education. Same as 07E:280.

07S:291 Secondary School Curriculum 2-3 s.h. Theory and development of secondary school curriculum; analysis of components of curriculum; emphasis on practices and issues in various subject areas since 1983.

07S:293 Individual Instruction Prerequisite: consent of instructor.

07S:300 Issues in Second Language Assessment 3 s.h. Theoretical and practical issues in assessment of English as an international language; factors that influence development and use of English as a second language assessment instruments worldwide. Prerequisites: 07S:200 and consent of instructor.

07S:306 Proposal Writing for Second Language Research 3 s.h. Procedures and techniques for writing research proposals at the doctoral level; written research proposal dealing with a question in second language teaching and learning. Prerequisite: consent of instructor.

07S:308 Seminar: Research and Current Issues Literature review, critical analysis of research, current issues and problems for a specific curricular area. Repeatable. Same as 07E:308.

07S:315 M.A. Seminar: English Education Significant developments in English education; primary and collateral readings. Prerequisite: consent of instructor. Same as 08P:405.

07S:333 Seminar on Teacher Education History, structure, and politics of teacher education; current practice and agendas for reform; new developments in teacher assessment.

07S:335 Seminar: Mathematics Education Analysis of current research, research methodology, curriculum developments in mathematics education; topics vary. Repeatable. Prerequisite: Ph.D. standing or consent of instructor. Same as 07E:335.

07S:342 Philosophies of Music Education Overview of 20th-century philosophies that have influenced music education, including recent emergence of postmodern philosophy.

07S:350 Seminar: Science Education Discussion of completed faculty and doctoral candidates’ research, national issues, program features. Same as 07E:350.

07S:355 Research in Science Education Same as 07E:355.

07S:368 Ph.D. Seminar: Current Research in Science Education Significant ongoing research programs in the field; emphasis on faculty research.

07S:370 Methods in Literacy Research Conceptual and practical exploration of selected research methods, including pilot data collection, analysis, and reporting. Repeatable. Same as 07E:370, 08P:300.

07S:385 Practicum in College Teaching Prerequisite: consent of instructor.

07S:393 M.A. Thesis Prerequisite: consent of instructor.

07S:407 Research: Science Education Planning of individual research projects by M.S. and Ph.D. students.

07S:415 Ph.D. Seminar in Language, Literacy, and Culture Historical, recent research and theory in literacy education. Repeatable. Prerequisite: consent of instructor. Same as 07E:415, 08P:425.

07S:445 Social and Psychological Factors in Music Education Social and psychological factors that affect curriculum and instructional practices in music. Prerequisite: music education Ph.D. student or consent of instructor.

07S:451 Advanced Qualitative Data Analysis Varied approaches to qualitative data analysis and philosophical foundations; analysis and interpretation of qualitative data; writing qualitative research findings. Prerequisite: 07B:373 or 07C:338 or 07E:370 or 07P:331 or 07S:370. Same as 07E:451.

07S:493 Ph.D. Thesis Prerequisite: consent of instructor.

Special Education

Courses at the 100 level are open to students in education and related disciplines.

07U:100 Foundations of Special Education 3 s.h. Students with disabilities, gifted and talented; strategies for effective treatment, collaboration between regular and special education teachers; remediation of academic, behavioral, social problems. Prerequisite: admission to TEP.

07U:101 Methods: Child/Adolescents with LD and BD 3 s.h. Strategies for effectively teaching elementary and secondary students with learning disabilities and behavioral disorders; emphasis is on practical, empirically verified techniques. Prerequisite: admission to TEP.

07U:110 Teaching Deaf and Hard of Hearing Students 3 s.h. How to recognize and respond to the deaf population and how they learn best and are taught; teaching varied subject matter that addresses diversity in small groups of deaf students; testing, use of technology, ethnic and cultural diversity, classroom management, educational program options. Taught in American Sign Language and English. Offered fall and spring semesters. Same as 158:110.

07U:115 Introduction: Strategist I (Elementary) 2 s.h. Teaching students with mild disabilities in elementary resource placements; current trends and issues, basic and theoretical approaches, implications of federal and state statutes, multidisciplinary team approaches to providing appropriate educational programming. Prerequisite: admission to TEP.
07U:116 Methods: Strategist I (Elementary)    2 s.h.
Methods and materials for students with mild to moderate disabilities in elementary resource placements; effective school collaboration; empirically validated strategies. Prerequisite: admission to TEP.

07U:121 Transition and Related Issues    3 s.h.
Curriculums, programs, and delivery systems that help persons with disabilities move from preschool to elementary, elementary to middle school, middle school to high school, and to postsecondary life; emphasis on ecological and task analysis, transition planning strategies, interagency collaboration, self-determination, access to resources and support services.

07U:122 Supervised Teaching: Elementary Strategist I    7 s.h.
Student teaching at the elementary level in a program for students with mild to moderate disabilities. Prerequisites: elementary education major and consent of instructor.

07U:126 Reading for High-Ability Students    1 s.h.
Purpose and methods of teaching reading, with focus on developmentally appropriate needs of high-ability readers; genres of literature, enriched and accelerated reading curricula, role of reading in social and emotional development of gifted students. Same as 07E:126, 07S:126.

07U:128 Differentiating through Advanced Technology    1 s.h.
Multimedia and web-based tools and utilities that enrich classroom learning and facilitate presentations made by technologically advanced students; production and editing of digital video, computer graphics, advanced web-publishing and communication technologies; skill development. Same as 07E:128, 07S:128.

07U:129 Learning and Leadership for Gifted and Talented Students    1 s.h.
Same as 07E:129, 07S:129.

07U:133 The Culturally Different in Diverse Settings    3 s.h.
Diversity in society; laws—past and present, experiences, incidents, how they affect society.

07U:134 Parent-Teacher Communication    1-3 s.h.
Realities of working with parents; interpersonal skills; options for parent support services. Same as 07E:134, 07P:134.

07U:136 Home/School/Community Partnerships    3 s.h.
Issues related to collaboration among families, educators, community members in implementing school programs. Same as 07E:136, 07P:136, 07S:136.

07U:137 Introduction to Educating Gifted Students    3 s.h.
History, identification, characteristics, programming, educational methods and materials for the gifted; discussion on readings, films, and guest speakers; practical project. Same as 07C:137.

07U:138 Assessment of Learning Problems    3 s.h.
Effective use of varied formal and informal assessment techniques for students with learning and behavior problems; techniques that inform teaching decisions. Prerequisite: admission to TEP.

07U:140 Characteristics of Disabilities    3 s.h.
Etiologies of mild/moderate disabilities; current educational trends; educational alternatives; importance of multidisciplinary team; psychological and social-emotional characteristics of individuals.

07U:148 Adaptations for Students with Multiple Disabilities    3 s.h.
Enhancing participation of persons with multiple disabilities; partial participation, individualized adaptations; positioning, handling techniques; integration of therapy with educational programs.

07U:187 Introduction to Assistive Technology    3 s.h.
Same as 07C:187.

07U:188 Practicum in Teaching and Curriculum Development in Gifted Education    1-6 s.h.
Includes experience in developing core courses for classes offered through the Belin Center. Same as 07C:188, 07E:188, 07S:188.

07U:190 Interdisciplinary Issues in Disabilities    1-3 s.h.
Critical issues related to interdisciplinary delivery of services to persons with developmental disabilities; observation and participation in staffing and consultation; opportunity for related community experiences.

07U:193 Independent Study    arr.
Specialized study of topics not included in other courses. Prerequisite: consent of instructor.

07U:196 Topics in Teaching and Learning    arr.
Prerequisite: consent of instructor. Same as 07E:196, 07S:196.

07U:201 Strategist II Methods - Elementary    3-4 s.h.
Methods and materials; strategies for assessing behavior, academic achievement, social skills; instructional resources; consultation with parents and peers; collaboration strategies; empirically validated strategies. Prerequisite: 07U:238.

07U:203 Strategist II Methods - Secondary    3-4 s.h.
Methods, materials, accommodations; practical skills for working in school/community settings; academic, affective, behavioral assessment; communication skills, management strategies, innovative program models, transition and career education; planning, empirically validated strategies. Prerequisite: 07U:238.

07U:206 Practicum with Exceptional Persons    arr.
Practicum experience with students with disabilities; experiences differ depending upon student’s program of study. Prerequisite: consent of instructor.

07U:209 Seminar: Graduate Supervised Teaching    1 s.h.
For students enrolled in graduate student teaching practicum. Prerequisites: special education major and consent of instructor.

07U:212 Characteristics and Programs: Persons with Autism    1-3 s.h.
Introduction to autism; definition, assessment, research information, communication skills, speech, language development of persons with autism. Prerequisite: consent of instructor.

07U:230 Behavioral and Social Interventions    3 s.h.
Individual behavioral management, behavioral change strategies, and social interaction strategies, methods, and techniques for individuals with exceptional learning needs.

07U:231 Strategist I Methods    4 s.h.
Methods and strategies K-12 that include models for providing curricular and instructional methodologies used in educating mildly and moderately disabled, collaboration and consultation models; empirically validated strategies.

07U:236 Administration of Students with Special Needs    3 s.h.
Provides a foundation for and skill practice in tasks performed by directors of special education; for prospective directors of special education and school administrative personnel. Same as 07B:236.

07U:238 Assessment of Learning Differences    3-4 s.h.
Administration of individual educational assessment instruments and interpretation of test results; supervised practice in assessment and planning. Prerequisite: consent of instructor. Same as 07P:238.

07U:250 Strategist I Student Teaching: K-6    arr.
Student teaching in a K-6 mild and moderate special education program.
07U:251 Strategist I Student Teaching: 7-12 arr.
Student teaching in a 7-12 mild and moderate special education program.

07U:252 Seminar: Behavioral Assessment and Evaluation 3 s.h.
Broadens skills of graduate students who engage in research with exceptional persons; research designs are usually taught in the Department of Psychological and Quantitative Foundations, but because of the nature of handicapping conditions and the low incidence of some handicaps, the single-subject design yields better research information. Same as 07P:352.

07U:253 Strategist II Student Teaching: K-6 arr.
Student teaching in K-6 learning disabilities or behavior disorders.

07U:254 Strategist II Student Teaching: 7-12 arr.
Student teaching in 7-12 learning disabilities or behavior disorders.

07U:275 Explicit Instruction 3 s.h.
Empirically supported methods for teaching reading and mathematics K-12 to students with mild-moderate disabilities; assessment and curricular adaptations to individual needs.

07U:293 Individual Instruction arr.
Permits specialized study of topics not included in other courses. Prerequisite: consent of instructor.

Topics vary. Same as 07E:340, 07S:340.

07U:343 Proseminar: Issues, Trends, and Research in Special Education 2-3 s.h.
Conceptual and practical development of research across special education and related disciplines; empirical review of the literature; focus on professional writing skills. Prerequisite: consent of instructor.

07U:344 Proseminar: Issues, Trends, and Research in Special Education II 2-3 s.h.
Recent research from a variety of special education areas reviewed by students; simulated comprehensive examinations. Prerequisite: 07U:343.

07U:345 Current Issues and Trends in Learning Disabilities 3 s.h.
Readings and discussions of current issues and trends in learning disabilities (e.g., definition, prevalence, interventions, subtyping, assessment).

07U:348 Contemporary Research in Behavioral Disorders 3 s.h.
In-depth analysis of current research in behavioral disorders; emphasis on evaluating its methodology and contribution to the field.

07U:353 Seminar: Single Subject Design Research 3 s.h.
Reviews of single subject research, development of student proposals; focus on special education, applied research.

07U:355 Seminar: Transition 3 s.h.
History, legal mandates, and practice of assisting persons with disabilities through the varied transitions of life.

07U:380 Practicum in College Teaching arr.
Supervised experience in teaching basic special education courses; for doctoral students majoring in teacher training. Prerequisite: consent of instructor.

07U:392 Field Service Project in Special Education Internship arr.
Part-time or full-time experience as an intern in school districts or area education agencies; develops skills in supervision and administration of special education. Prerequisite: consent of instructor.

Prerequisite: consent of instructor.
Engineering is defined by the Accreditation Board for Engineering and Technology as that profession in which knowledge of the mathematical and natural sciences gained by study, experience, and practice is applied with judgment to develop ways to use, economically, the materials and forces of nature for the benefit of mankind.

In short, engineering is the application of science and mathematics to solve problems for society.

The major aim of engineering is the creation of a new process, product, material, or system. This activity demands a high degree of creativity and problem solving ability coupled with a full understanding of engineering fundamentals, good judgment, and a practical sense of economics.

The College of Engineering prepares men and women for one or more of the many career opportunities in the engineering profession. Such opportunities include positions in design, production, development, research, management, and consulting. Engineers are employed in industrial organizations, governmental agencies, and private practice.

The College of Engineering’s mission is to develop, disseminate, transfer, and preserve technical knowledge that improves people’s lives. The college endeavors to:

• provide a well-rounded and superior engineering education that draws upon resources of a comprehensive research university to attract outstanding undergraduate and graduate students in selected engineering fields;

• conduct high-quality research in selected areas, enabling faculty members and students to keep pace with new developments and ensuring that the newest concepts are taught in its courses; and

• serve the needs of the University, industry, government, and the general populace by making its facilities and faculty expertise accessible.
College Organization

The College of Engineering has five departments and four research units. The Department of Biomedical Engineering, Department of Chemical and Biochemical Engineering, Department of Civil and Environmental Engineering, Department of Electrical and Computer Engineering, and Department of Mechanical and Industrial Engineering offer a total of six undergraduate programs and many graduate programs.

The research units are the Center for Bioinformatics and Computational Biology, the Center for Computer-Aided Design, the IIHR—Hydroscience & Engineering, and the Iowa Spine Research Center.

Undergraduate Programs

The College of Engineering offers the Bachelor of Science in Engineering (B.S.E.) in six major fields: biomedical engineering, chemical engineering, civil engineering, electrical engineering, industrial engineering, and mechanical engineering. The undergraduate programs are designed to attract the best and brightest students and prepare them to be engineers who will succeed in a workplace filled with diverse people, attitudes, and ideas; to compete in the global marketplace; to work effectively in multidisciplinary teams; and to confidently understand, use, and develop modern technology.

All six B.S.E. programs are accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology. Each has its own set of articulated educational objectives, and all are designed to ensure that graduates possess the following general attributes:

- ability to apply knowledge of mathematics, science, and engineering;
- ability to design and conduct experiments as well as to analyze and interpret data;
- ability to design a system, component, or process to meet desired needs;
- ability to function on multidisciplinary teams;
- ability to identify, formulate, and solve engineering problems;
- understanding of professional and ethical responsibility;
- ability to communicate effectively in oral, written, and graphical forms;
- broad education necessary to understand the impact of engineering solutions in a global and societal context;
- recognition of the need to engage in lifelong learning and the ability to do so;
- knowledge of contemporary issues; and
- ability to use the techniques, skills, and modern engineering tools necessary for successful engineering practice.

The University of Iowa B.S.E. programs distinguish the College of Engineering from other engineering colleges in the region. They draw on the University’s recognized strengths to offer unique opportunities for students who wish to pursue a wide range of career options and an education that goes beyond technology.

Each program emphasizes a broad understanding of fundamental principles common to all engineering disciplines and provides students with the opportunity to specialize in a selected engineering discipline. All build on the University’s research strengths. Program flexibility is provided by a curriculum in which each student develops engineering competency within a particular academic program and complements it with a tailored thematic option in support of chosen career objectives (e.g., engineering practice, project management, research and development).

Combined Degrees, Minors, Certificates

All of the college’s B.S.E. programs may be combined with a second B.S.E., a Bachelor of Business Administration (B.B.A.) in the Tippie College of Business, or a bachelor's degree in the College of Liberal Arts and Sciences; see “Two B.S.E. Degrees,” “Combined B.B.A./B.S.E.,” and “Combined B.S.E./Liberal Arts and Sciences Degree” later in this section. Contact the Student Development Center for details.

The College of Engineering and the University of Northern Iowa offer a dual degree program in which students earn a B.S. in applied physics from UNI and a B.S.E. from The University of Iowa; see “B.S./B.S.E. Dual Degree with Northern Iowa” later in this section. The college also offers a joint bachelor’s/master’s degree with the University’s Urban and Regional Planning Program; see “Joint B.S.E./M.A. or M.S. in Planning” later in this section.
Engineering students may earn a minor in the Tippie College of Business or in the College of Liberal Arts and Sciences; see “Minor in Business” and “Minor in Liberal Arts and Sciences” later in this section. Students also may pursue international business and technological entrepreneurship certificates; see “Certificate in International Business” and “Certificate in Technological Entrepreneurship” later in this section.

Bachelor of Science in Engineering

The Bachelor of Science in Engineering (B.S.E.) requires a minimum of 128 s.h. Students must be enrolled in the College of Engineering for at least the last 30 s.h. of work toward the degree, or 45 of the last 60 s.h., or a total of 90 s.h. They must have a g.p.a. of at least 2.00 on all college work used to satisfy degree requirements as well as on all work undertaken at The University of Iowa. All students must complete 22M:031 Engineering Mathematics I: Single Variable Calculus and 22M:032 Engineering Mathematics II: Multivariable Calculus, or their equivalents, with a grade of C- or higher in each course.

The faculty of each engineering program has established a curriculum—a set of required and elective courses that must be completed satisfactorily as part of the requirements for a B.S.E. in that program. The purpose of each program’s curriculum is to prepare students for the practice of engineering in that program. General guidelines for establishing course requirements in each program are provided by the national accrediting body, the Accreditation Board for Engineering and Technology (ABET).

Each B.S.E. student also must satisfy the requirements of his or her specific program, as described in the Catalog’s College of Engineering department sections: Biomedical Engineering, Chemical and Biochemical Engineering, Civil and Environmental Engineering, Electrical and Computer Engineering, and Mechanical and Industrial Engineering.

Curriculum Stems

The curriculum for each program is divided into four major curriculum stems: mathematics and basic sciences; engineering topics; elective focus area; and general education (humanities and social sciences). In addition to the four major stems, there are a few general background courses that fall outside of the stems. Students take these courses during the first year. They include 059:005-059:006 Engineering Problem Solving I and II and 010:003 Accelerated Rhetoric, which is a first-year course in writing, speaking, and critical reading. Engineering Problem Solving I-II covers a breadth of topics from engineering as a profession to team design projects to engineering computations and computer programming.

All of the courses in the curriculum stems are integrated and sequenced to help students understand the interrelationships and importance of each stem.

MATHEMATICS AND BASIC SCIENCES

The mathematics and basic sciences stem provides the foundation upon which the engineering courses in each engineering program are based. This stem includes a minimum of five courses in mathematics and statistics and one each in chemistry and physics. The faculty of each engineering program has specified at least one additional chemistry or physics course and other additional mathematics or science courses beyond these minimum requirements to provide a base appropriate for the program’s major.

ENGINEERING TOPICS

The second curriculum stem, engineering topics (science and design), builds upon the math and science stem, providing a bridge from fundamental principles to applications and creative practice.

The engineering science courses use the underlying principles learned in the mathematics and basic science courses to understand and predict the behavior of idealized models of real components or systems encountered in engineering. These courses include fundamentals of statics, thermodynamics, and electrical circuits, as well as other engineering courses relevant to each major.

Engineering design is the process of devising a system, component, or process to meet desired needs. It is a decision-making process, often iterative, in which the basic sciences, mathematics, and engineering sciences are applied optimally to convert resources to meet a stated objective. The design process includes the establishment of objectives and criteria, synthesis, analysis, construction, testing, and evaluation. Essential to the design process is the inclusion of realistic constraints such as economic factors, safety, reliability, aesthetics, ethics, and social and environmental impact.

ELECTIVE FOCUS AREA

In each undergraduate program, a pool of semester hours is set aside to enable students to
build strength in a technical focus area, pursue a formal minor, earn a multidisciplinary certificate, or pursue a tailored program of study. Each program has its own set of guidelines and constraints for the elective focus area. See “Elective Focus Area” below.

**GENERAL EDUCATION COMPONENT**

The fourth stem involves general education course work in the humanities and social sciences. This stem promotes understanding of and appreciation for society and culture. See “General Education Component” below.

**First and Second Years**

Approximately one-third of the course requirements in each engineering program are common to all engineering majors. These common course requirements constitute a core program. Students take most of the courses in the core program during the first and second years, along with a few program-specific courses. Hence, most students may postpone making a decision about which engineering major to pursue or may change their engineering major during their first three semesters with little or no loss of time or credit. The remaining curriculum for each engineering program is listed in the Catalog’s College of Engineering department sections.

The first- and second-year courses common to all majors are listed below. Not all students complete all of these courses in the first three semesters. Students who do not follow this three-semester plan may encounter a delay in graduation because of scheduling problems for courses that require sequencing or that are offered only once a year.

**First Semester**

- 004:011 Principles of Chemistry I (all majors) 4 s.h.
- 010:003 Accelerated Rhetoric (all majors) 4 s.h.
- 22M:031 Engineering Mathematics I: Single Variable Calculus (all majors) 4 s.h.
- 059:005 Engineering Problem Solving I (all majors) 3 s.h.
- 059:090 First-Year Engineering Seminar (all majors) 1 s.h.

**Second Semester**

- 004:012 Principles of Chemistry II (biomedical, chemical, and environmental majors) 4 s.h.
- 22M:032 Engineering Mathematics II: Multivariable Calculus (all majors) 4 s.h.
- 22M:033 Engineering Mathematics III: Matrix Algebra (all majors) 2 s.h.
- 029:081 Introductory Physics I (all majors) 4 s.h.
- 059:006 Engineering Problem Solving II (all majors) 3 s.h.

**Third Semester**

- 22M:034 Engineering Mathematics IV: Differential Equations (all majors) 3 s.h.
- 029:082 Introductory Physics II (biomedical, civil, electrical, industrial, and mechanical majors) 3-4 s.h.
- or General education component 1 (optional, chemical and environmental majors) 3 s.h.
- 059:007 Engineering Fundamentals I: Statics (all majors) 2 s.h.
- 059:008 Engineering Fundamentals II: Electrical Circuits (all majors) 3 s.h.
- 059:009 Engineering Fundamentals III: Thermodynamics (all majors) 3 s.h.

Students who do not meet the eligibility requirement for 010:003 Accelerated Rhetoric (4 s.h.) are required to complete the two-course sequence 010:001 and 010:002 Rhetoric I-II (total of 8 s.h.). Only 4 of the 8 s.h. may be applied toward the degree requirement for rhetoric.

Credit earned for courses below the level of the beginning courses specified in each engineering curriculum appears on a student’s grade report and permanent record but is not used to satisfy any course requirements (including electives) for an engineering degree. Examples of courses in this category include 010:001 Rhetoric I, 22M:009 Elementary Functions, and 004:009 Supplemental Chemistry Lab.

**General Education Component**

Students choose 15 s.h. of general education (humanities and social science) courses from approved department and college areas; at least 3 s.h. must be from the pool of courses designated by the College of Engineering as humanities courses, and at least 3 s.h. must be from the pool of courses designated by the college as social science courses. To ensure depth, at least 6 s.h. of general education credit should be earned in intermediate (100-level) courses. At least one of the 100-level courses should be taken in the same department as a lower-level course already completed.
Humanities and social science subject areas are defined by the College of Engineering; they may not correspond to the same general education area definitions used by the College of Liberal Arts and Sciences. Individual engineering programs may require further depth in one area and may include one or more of the general education requirements as part of a student’s elective focus area.

Courses that are primarily mathematical or scientific in nature and those designed specifically to develop art, music, or physical education skills are not accepted as social science or humanities electives.

Credit may be earned by examination; see “Undergraduate Academic Rules and Procedures”/“Academic Standards”/“Credit by Examination” later in this section.

Humanities and social science course work transferred to The University of Iowa by students with A.A. degrees who enter the College of Engineering directly from two-year schools is evaluated on the same basis as similar course work transferred by other students entering the college without a B.A. or B.S.

Students who enter the College of Engineering with a B.A. or B.S. are considered to have satisfied the general education (humanities and social science) requirement.

Students who enroll in a combined degree program in the College of Engineering and the College of Liberal Arts and Sciences or the Tippie College of Business are considered to have satisfied the College of Engineering’s general education requirement once they have completed all requirements for the liberal arts and sciences or business degree.

For details, see General Education Component (GEC) on the college’s web site (under Current Students/Engineering Student Records/Curriculum Guides).

**Elective Focus Area**

Students choose elective focus area courses in two broad categories: traditional career goals and nontraditional career goals. The degree plans students choose to pursue and the courses they take may affect the number and type of employment opportunities available to them after graduation. Program advisors help students develop coherent, well-focused plans that fit their goals.

Students who pursue a well-defined plan may replace up to 21 s.h. of traditional technical electives with course work toward a minor or certificate. Or with an advisor’s guidance, they may pursue a rigorous, well-focused, nontraditional program outside existing minor or certificate programs. Each College of Engineering undergraduate program is responsible for approving proposed plans of study, ensuring that the program’s ABET accreditation criteria are met and that students’ choices are consistent with their career aspirations and with the college’s educational mission.

To pursue one of these alternatives, a student must define and justify his or her career goal, obtain the program’s approval for the detailed plan of study before taking the courses, and then complete the plan as it has been defined.

Guidelines for elective focus areas vary by program. For details, see Engineering Curriculum Guides and EFAs on the college’s web site (under Current Students/Engineering Student Records/Curriculum Guides).

**Four-Year Graduation Plan**

College of Engineering students who choose to participate in the University’s Four-Year Graduation Plan must be admitted on schedule and must complete specified courses during the first year in order to stay on the plan. They must work closely with their advisors to make sure they know what requirements must be met and the appropriate sequences in which to take courses.

The agreement holds both the student and the University responsible for clearly defined actions to ensure graduation within four years. Since changes in a student’s interests may lead to changes in goals or majors, there is no penalty for withdrawing from the Four-Year Graduation Plan. For more information, contact the College of Engineering’s Student Development Center.

**Honors**

Outstanding undergraduate engineering students may qualify to participate in the Engineering Honors Program or the University of Iowa Honors Program. See “Undergraduate Academic Rules and Procedures”/“Academic Recognition”/“Honors Program” later in this section.

**Minors**

Students graduating from the College of Engineering may earn a minor in the Tippie
College of Business or a minor or minors in any degree-granting department or approved program in the College of Liberal Arts and Sciences. A minor in another college may be earned by satisfying requirements established by the college offering the minor. A notation of the minor is entered on the student’s permanent record.

College of Engineering programs generally allow use of a non-engineering minor to satisfy their elective focus area requirements. Students who pursue this option must work closely with program advisors to ensure compatibility with their engineering career aspirations.

Students must inform the Office of the Registrar of their fulfillment of minor requirements when they apply for a degree. This assures that the minor designation is included on their transcript. See “Undergraduate Academic Rules and Procedures”/“Application for Degree” later in this section.

**Minor in Business**

Engineering students who wish to earn a minor in business must complete the following courses.

- 06A:001 Introduction to Financial Accounting 3 s.h.
- 06A:002 Managerial Accounting 3 s.h.
- 06E:001 Principles of Microeconomics 4 s.h.
- 06E:002 Principles of Macroeconomics 4 s.h.
- 06F:100 Introductory Financial Management (engineering students may substitute 056:054) 3 s.h.
- 06J:047 Introduction to Law 3 s.h.
- 06J:048 Introduction to Management 3 s.h.
- 06K:070 Computer Analysis (engineering students may substitute 059:006) 3 s.h.
- 06M:100 Introduction to Marketing Strategy 3 s.h.
- 22M:017 Calculus and Matrix Algebra for Business (engineering students may substitute 22M:031) 4 s.h.
- 22S:008 Statistics for Business (engineering students may substitute 22S:039) 4 s.h.

Students must maintain a g.p.a. of at least 2.00 in courses for the minor. Courses for the minor may not be taken pass/nonpass. For a detailed description of certificate requirements, see International Business in the Catalog.

**Minor in Liberal Arts and Sciences**

Engineering students who wish to earn a minor offered by the College of Liberal Arts and Sciences must complete a minimum of 15 s.h. in the minor, including at least 12 s.h. in advanced courses taken at The University of Iowa and approved by the school, department, or program offering the minor. Students should confer with the academic unit offering the minor to identify acceptable courses. Students must have a g.p.a. of at least 2.00 in courses taken for the minor. Courses in the minor may not be taken pass/nonpass. See Minors offered by the College of Liberal Arts and Sciences (http://www.clas.uiowa.edu/departments/minors.shtml) for details.

**Certificate in International Business**

The Tippie College of Business and the College of Liberal Arts and Sciences offer the Certificate in International Business. The program is designed for University of Iowa undergraduates interested in broadening their understanding of the global economy and their awareness of the political, historical, and social environment in which international business operates.

Certificate students study international business and economics, international relations and institutions, a foreign language, and the contemporary art, literature, culture, and/or politics of the related geographical area. The certificate’s range of courses permits students to tailor areas of specialization that suit their individual interests and complement their majors.

The certificate requires 29 s.h.; a minimum of 20 s.h. must be completed at The University of Iowa or in approved study abroad programs. Guided Independent Study is accepted toward the certificate. Students must maintain a g.p.a. of at least 2.00 on all certificate course work. Certificate courses may not be taken pass/nonpass, nor may a single course be counted toward more than one certificate requirement.

Interested students must declare their intention to pursue the certificate with the international business certificate advisor in the Tippie College of Business; contact the Tippie Undergraduate Program Office for details.

For a detailed description of certificate requirements, see International Business in the Catalog.

**Certificate in Technological Entrepreneurship**

The College of Engineering and the Tippie College of Business offer a joint program leading
to the Certificate in Technological Entrepreneurship. The program entails study of the entrepreneurial process as it relates to technology.

The certificate program is designed not only for students who intend to start and/or operate their own business but for any student interested in gaining a better understanding of the entrepreneurial process. The program’s range of electives permits students to tailor areas of specialization to their individual interests.

Interested students must declare their intention to pursue the certificate with the College of Engineering technological entrepreneurship program faculty representative. To receive the certificate, students must be granted a degree in engineering; maintain a g.p.a. of at least 2.00 on all certificate course work; and take at least 12 s.h. of certificate course work at The University of Iowa or in approved study-abroad courses. Completion of the program results in the notation “Certificate in Technological Entrepreneurship” on the student’s transcript.

For details, see Certificate in Technological Entrepreneurship on the college’s web site (under Current Students/Academic Information). For application information, contact the College of Engineering Office of the Dean.

Cooperative Education and Internship Program

The Cooperative Education and Internship Program offers students the opportunity to explore engineering careers and develop engineering skills through periods of professional practice. Supervised professional engineering-related experiences in business, industry, education, or government expose students to the challenges and opportunities of the day-to-day life of an engineer. Students with co-op and/or internship experience are sought by employers and usually receive higher starting salaries upon graduation. A portion of registered co-op and/or internship experience before graduation can be credited toward the experience requirements for professional licensure in Iowa and some other states.

Qualified students may choose to alternate periods of on-campus study with full-time work experience, or they may elect to work half-time while taking at least 6 s.h. of classes. The co-op experience can cover one to three semesters, a series of summer placements, or a single summer. Students may apply to the program following their first year. Academic record and class status are considered in acceptance decisions. Interested students and employers or organizations must register on Employment Expo and contact the College of Engineering director of professional development. For details, see Engineering Professional Development on the college’s web site (under Current Students/Student Services).

Two B.S.E. Degrees

Current College of Engineering students and recent graduates may earn a second Bachelor of Science in Engineering. The second degree must include all courses required by the second engineering degree program, including the senior-level design course sequence and any specific social science elective requirements. Elective focus area courses selected for the second B.S.E. must be of a variety and level that permit students to meet at least the minimal level of competence usually expected of graduates of that program.

Students must file an academic study plan, which must be approved by the faculty of the second degree program, submitted to the Student Development Center, and placed in the student’s permanent file before the student may begin course work in the second B.S.E. The study plan should include a list of the courses to be taken in the second program along with a list of the courses already completed and yet to be completed for the first engineering degree program. Any changes in the plan must be approved by the student’s faculty advisor in the second program and by the department chair of that program (the college petition form may be used for this purpose), submitted to the Student Development Center, and placed in the student’s permanent file.

Combined B.B.A./B.S.E.

The College of Engineering and the Tippie College of Business offer a combined degree program in which students earn two University of Iowa bachelor’s degrees: a Bachelor of Business Administration (B.B.A.) from the Tippie College of Business and a Bachelor of Science in Engineering (B.S.E.) from the College of Engineering.

All students in the combined program must complete all General Education components and all other requirements for both majors. They must enroll in appropriate mathematics and engineering courses early in their course of study in order to complete the program in a timely way.
Because courses in natural sciences, mathematics, humanities, and social sciences count toward the B.B.A. and the B.S.E., students may count a single course toward both degrees. B.B.A./B.S.E. students usually meet the degree requirements of both colleges in about five years; time required depends on the student’s choice of major study areas.

Students may not use the second-grade option for courses in the combined program.

Students are assigned two advisors, one in the Tippie College of Business Undergraduate Program Office, the other in their College of Engineering major department.

Contact the College of Engineering Student Development Center or the Tippie College of Business Undergraduate Program Office for specific degree requirements.

**Combined B.S.E./Liberal Arts and Sciences Degree**

Students may earn two University of Iowa baccalaureate degrees in a combined program in the College of Engineering and the College of Liberal Arts and Sciences. Successful candidates are awarded a B.S.E. (Bachelor of Science in Engineering) by the College of Engineering and a B.A. (Bachelor of Arts), B.S. (Bachelor of Science), B.F.A. (Bachelor of Fine Arts), or B.M. (Bachelor of Music) by the College of Liberal Arts and Sciences.

Students in the combined program usually can meet the degree requirements of both colleges in about five academic years. The exact length of time necessary to complete the program is determined by the major areas of study selected in each college. Students who enter the combined degree program are assigned two faculty advisors, one in their major department in the College of Engineering and the other in their major department in the College of Liberal Arts and Sciences.

To enter the combined degree program, students must be admitted to both the College of Engineering and the College of Liberal Arts and Sciences and must have College of Engineering approval to enter the combined degree program. Those who enter the program are required to complete the general education components and all other requirements for both majors. Combined degree program applicants must meet the high school course or unit requirements for admission to each of the two colleges.

It is crucial that students enroll in the proper mathematics and engineering courses early in their course of study to expedite the completion of the program. The specific engineering courses taken by each student vary according to engineering major. Since courses in natural sciences, mathematics, humanities, and social sciences are accepted for credit by both colleges, students may be able to count a particular course toward both degrees.

Contact the Student Development Center for information about specific requirements.

**B.S./B.S.E. Dual Degree with Northern Iowa**

The 3+2 dual degree program leads to a B.S. in applied physics from the University of Northern Iowa (UNI) and a B.S.E. from The University of Iowa. It requires approximately three years of study at UNI followed by approximately two years of study at Iowa. There is no guarantee that students can complete the 3+2 degree in five years.

Students interested in the program are guaranteed admission to the University of Iowa portion of the program if they have a g.p.a. of at least 3.00 (B average) in all course work and in the chemistry, mathematics, and physics courses required by the University of Northern Iowa physics department.

During the first three years of the program, students complete at least 90 s.h. of course work at the University of Northern Iowa. They must successfully complete courses in each of the following areas: chemistry, mathematics through differential equations, physics to satisfy the applied physics major requirements, and courses to satisfy the General Education requirements.

Credit for courses passed with a grade of C or higher is transferred to The University of Iowa as credit for equivalent courses there.

At The University of Iowa, students complete the B.S.E. requirements that were current at the time of their admission to the UI College of Engineering. Course work completed at The University of Iowa is transferred to the University of Northern Iowa and applied toward the requirements for that institution’s B.S. in applied physics.

When transferring to Iowa from UNI, students must submit applications for admission, housing, and financial aid to The University of Iowa by the University’s established deadlines.
Joint B.S.E./M.S. or M.A. in Planning

The College of Engineering and the Urban and Regional Planning Program offer the joint Bachelor of Science in Engineering/Master of Arts or Master of Science for students who wish to pursue a career in planning in either the public or private sector. Planning encompasses the development of alternatives to improve the quality of life in cities and regions.

Graduates of the combined program are technically oriented professionals who have a clear understanding of policy development and implementation. They fill positions such as public works director, transportation engineer, and public utilities staff member. Their work involves a blend of civil and industrial engineering problems and policy analysis.

The joint program satisfies all requirements of both degrees. It requires a minimum of 152 s.h., including at least 45 s.h. of urban and regional planning graduate courses. Completion of the program takes five years—one fewer than would be required for consecutive completion of both programs.

Each student in the joint program has two advisors, one in engineering and one in urban and regional planning. Students enroll in the College of Engineering for their first four years in the program and in the Graduate College for their fifth year. Successful students receive a B.S.E. at the end of the fourth year and an M.A. or M.S. in planning at the end of the fifth year.

To join the combined degree program, students must first be admitted to the College of Engineering. During spring semester of their second year in engineering, they apply for admission to the joint program. Students admitted to the program apply for admission to the Graduate College at the end of their fourth year. Applicants must have completed all requirements for a B.S.E., have an undergraduate g.p.a. of at least 3.00, and earn a score on the Graduate Record Exam (GRE) General Test judged satisfactory by the urban and regional planning admissions committee.

While enrolled in the College of Engineering, students must maintain the overall grade-point average required by their engineering program. Students also must maintain a g.p.a. of at least 3.00 in planning courses in the joint program. If they do not, they may be placed on academic probation, and if they fail to satisfy the conditions of probation, they are dismissed from the joint program. Dismissal from the joint program does not affect a student’s standing in the College of Engineering.

Students in the joint program must maintain a cumulative g.p.a. of at least 3.00 in order to graduate with an M.A. or M.S. in planning.

Joint Program Curriculum

Students in the joint program follow the standard B.S.E. curriculum for their College of Engineering program during the first and second year. Urban and regional planning courses (prefix 102) are added in the third and fourth years. Students earn 15 s.h. of their required B.S.E. elective focus area credit in courses that also meet the requirements of the M.A. or M.S. in planning.

During the summer after the fourth year, most students in the joint program complete an approved internship.

The fifth year usually includes the remaining urban and regional planning core courses and electives. Students take the M.S. or M.A. comprehensive examination during spring of the fifth year.

A typical study plan calls for completion of the following planning courses during the third and fourth years (15 s.h. are applied to requirements of both the B.S.E. elective focus area and the planning courses).

Third year, fall semester:
102:202 Land Use Planning: Law and Practice 4 s.h.
102:205 Economics for Policy Analysis 3 s.h.

Third year, spring semester:
102:201 Analytic Methods in Planning II 2 s.h.

Fourth year, fall semester:
102:203 History and Theories of Planning 3 s.h.
Electives 3 s.h.

Fourth year, spring semester:
Electives 3 s.h.

During the fifth year and the preceding summer session, students take the remaining 30 s.h. of planning courses, as follows. This completes the 45 s.h. of planning course work required for the M.S. or M.A.

Summer before fifth year:
102:335 Internship 2 s.h.

Fifth year, fall semester:
102:208 Program Seminar in Planning Practice 1 s.h.
102:209 Field Problems in Planning I 1 s.h.
Electives 12 s.h.
Fifth year, spring semester:
102:210 Field Problems in Planning II 3 s.h.
Electives 11 s.h.

See Urban and Regional Planning (Graduate College) in the Catalog for course descriptions and information about the University’s Urban and Regional Planning Program.

**Undergraduate Admission**

Applicants for admission to the College of Engineering as first-year students for academic year 2007-08 must have successfully completed at least four years of English/language arts; four years of mathematics, which must include at least two years of algebra, one year of geometry, and one year of higher mathematics (trigonometry, analysis, calculus); two years of a single foreign language; three years of natural science, which must include at least one year of chemistry and at least one year of physics; and at least two years of social studies. A high school computer programming course is recommended but not required.

Applicants are guaranteed admission to the College of Engineering if they have an ACT composite score of 25 or higher and an ACT math score of 25 or higher; rank in the top 30 percent of their class; and have no high school unit deficiencies. Students who do not meet these requirements, or who attend a high school that does not rank its students, are encouraged to send recommendations from math and science teachers and a personal statement, which will be considered in an individual review by the College of Engineering.

Students who are admitted through the individual review process may be required to make up deficiencies by taking a lower-level course in their area of deficiency before enrolling in the first required course in that area. For example, students who have high math grades and standardized test scores, but who are deficient by one unit in mathematics, may be required to complete a course such as 22M:009 Elementary Functions before enrolling in the first engineering calculus course.

Incoming first-year and transfer students who do not meet the foreign language requirement may be admitted on conditional status for a maximum of four semesters in order to complete two semesters of an introductory college-level foreign language.

Students who are unsure whether to pursue a degree in engineering or a degree in liberal arts and sciences are strongly encouraged to begin in engineering if they meet the admission requirements.

For more information about admission to the College of Engineering, see http://www.uiowa.edu/admissions/undergrad/requirements/fy-eng.html on the University’s Office of Admissions web site.

**TRANSFER APPLICANTS**

Transfer applicants must have completed the same high school unit requirements as entering first-year students and must submit an official high school transcript as well as a transcript of college work undertaken at other institutions. To transfer to the College of Engineering, students must have demonstrated success in math, science, and engineering courses, ideally earning all As and Bs with no grade lower than a C in these foundation subjects. Transfer students must have completed calculus I and the equivalent of either 004:011 Principles of Chemistry I or 029:081 Introductory Physics I (the first semester of chemistry designed for majors, or the first semester of calculus-based physics). Overall grade-point average also is considered in transfer applications.

For more information about transfer admission to the College of Engineering, see http://www.uiowa.edu/admissions/undergrad/requirements/xfer-eng.htm on the University’s Office of Admissions web site.

**Undergraduate Academic Rules and Procedures**

**Academic Advising**

Undeclared engineering students are advised by the staff members in the Student Development Center. Engineering students who have declared an academic program are advised by faculty advisors assigned to that program. Students may request a change of advisor when it is deemed appropriate. All students are required to have a conference with their advisors before registering for classes each semester.

**Application for Degree**

Students who wish to be considered for graduation must file an Application for Degree with the Office of the Registrar before the deadline date during the session in which the degree is to be conferred.
Students who do not graduate on the date indicated in the Application for Degree must file another application for the next applicable session. Students do not need to be registered to apply for a degree.

See Application for Degree (http://www.registrar.uiowa.edu/graduation/degreeapp.aspx) on the University’s Office of the Registrar web site.

Academic Recognition

Engineering Honors Program
The College of Engineering Honors Program provides special recognition for outstanding undergraduate students who demonstrate exceptional accomplishment through research, directed independent study, teaching internships, or other approved nondegree enrichment activities. Engineering students who wish to graduate with honors must maintain a University of Iowa g.p.a. of at least 3.33, complete an honors project with a faculty member, and participate in a college-wide honors seminar with faculty members and other honors students. Successful completion of the honors program requirements leads to a B.S.E. with honors, which is recorded on the student’s University academic record.

First-year and sophomore students with a University of Iowa g.p.a. of at least 3.33 are automatically admitted to the University of Iowa Honors Program, which provides access to all of the services offered through the University’s Honors Center. Engineering students are encouraged to participate in honors activities. Engineering students are the second largest collegiate group in the University Honors Program.

For more information, contact the College of Engineering associate dean for academic programs.

Graduation with Honors
High scholastic achievement is certified in two ways; graduation with distinction based on grades only, and graduation with honors based on both grades and exceptional accomplishment. To be eligible for graduation with honors, students must be recommended by their major department, approved by a selected honors committee and the director of the honors program, and complete honors requirements.

Graduation with Distinction
The college awards degrees “with highest distinction” to students in the highest 2 percent of their graduating class, “with high distinction” to students in the next-highest 3 percent, and “with distinction” to students in the next-highest 5 percent. Ranking is based on students’ grade-point average for all college-level study undertaken up to their final registration.

To be eligible to graduate with distinction, students must take their final 60 s.h. of study in residence at the college and must have completed at least 45 s.h. in the college before their final registration. Students in the combined engineering/liberal arts and sciences program are eligible to graduate with distinction regardless of the college in which they complete their residency requirement.

Dean’s List
Students in the undergraduate Tippie College of Business, Colleges of Engineering, Liberal Arts and Sciences, and Nursing, and undergraduate programs in the Carver College of Medicine who achieve a grade-point average of 3.50 or higher on 12 s.h. or more of University of Iowa graded course work (including Guided Independent Study courses) during a semester (or summer session) and who have no hours of I (incomplete) or O (no grade reported) for that enrollment are recognized by inclusion on the Dean’s List for that semester (or session).

President’s List
University of Iowa undergraduate students who achieve a grade-point average of 4.00 on 12 s.h. or more of University of Iowa graded course work (including Guided Independent Study Courses) and who have no hours of I (incomplete) or O (no grade reported) for two consecutive semesters (including summer session) are recognized by inclusion on the President’s List.

Academic Standards

Maximum Schedule
Course schedules of more than 18 s.h. for a semester, 9 s.h. for a summer session, or 3 s.h. for a winter session require approval of the advising staff in the college’s Student Development Center. Permission to Register for Additional Hours forms are available on the college’s web site (under Current Students/Student Records Information/Forms).
Classification of Students

Students in the College of Engineering are classified by the number of semester hours of credit they have earned toward the Bachelor of Science in Engineering.

First-year: 0-29 s.h. earned toward the B.S.E.
Sophomore: 30-59 s.h. earned toward the B.S.E.
Junior: 60-89 s.h. earned toward the B.S.E.
Senior: 90 s.h. or more earned toward the B.S.E.

Grading System

The college uses a letter grading system. Plus and minus designate gradations of performance between letter grades. Numerical equivalents of letter grades are as follows.

<table>
<thead>
<tr>
<th>Grade</th>
<th>Grade points</th>
</tr>
</thead>
<tbody>
<tr>
<td>A+</td>
<td>4.33</td>
</tr>
<tr>
<td>A (superior)</td>
<td>4.00</td>
</tr>
<tr>
<td>A-</td>
<td>3.67</td>
</tr>
<tr>
<td>B+</td>
<td>3.33</td>
</tr>
<tr>
<td>B (above average)</td>
<td>3.00</td>
</tr>
<tr>
<td>B-</td>
<td>2.67</td>
</tr>
<tr>
<td>C+</td>
<td>2.33</td>
</tr>
<tr>
<td>C (average)</td>
<td>2.00</td>
</tr>
<tr>
<td>C-</td>
<td>1.67</td>
</tr>
<tr>
<td>D+</td>
<td>1.33</td>
</tr>
<tr>
<td>D (below average)</td>
<td>1.00</td>
</tr>
<tr>
<td>D-</td>
<td>0.67</td>
</tr>
<tr>
<td>F (failing)</td>
<td>0</td>
</tr>
</tbody>
</table>

This grading system is used for all students in both undergraduate and graduate engineering courses. Grades of D-minus are passing grades; that is, courses completed with grades of D-minus or higher count toward collegiate requirements, with the exception of 22M:031 and 22M:032 Engineering Mathematics I-II: Single and Multivariable Calculus, which have a minimum grade requirement of C-minus or higher. Grades of A-plus have a value of 4.33 in calculating grade-point averages, but averages displayed in University records are truncated so that they do not exceed 4.00.

Academic Probation and Dismissal

Students who do not achieve or surpass the following University of Iowa cumulative and semester minimum grade-point averages are placed on academic probation.

<table>
<thead>
<tr>
<th>Class</th>
<th>University of Iowa cumulative</th>
<th>University of Iowa semester</th>
</tr>
</thead>
<tbody>
<tr>
<td>First-year</td>
<td>1.80</td>
<td>1.80</td>
</tr>
<tr>
<td>Sophomore</td>
<td>1.90</td>
<td>1.90</td>
</tr>
<tr>
<td>Junior</td>
<td>1.95</td>
<td>2.00</td>
</tr>
<tr>
<td>Senior</td>
<td>2.00</td>
<td>2.00</td>
</tr>
</tbody>
</table>

Students on academic probation are restored to good standing when they successfully complete an additional 9 s.h. toward an engineering degree, either in one semester or cumulatively, and their University of Iowa cumulative and semester grade-point averages equal or exceed those designated above.

The college reviews academic records for all students at the end of the fall and spring semesters. There is no review at the end of the summer session. Students are placed on probation, dismissed for unsatisfactory progress (with or without previous probationary status), or restored to good standing only at the end of the fall and spring semesters. Students on academic probation are not permitted to continue their enrollment without written expectations for their future performance.

Students who do not make satisfactory progress may be dismissed from the college without an intervening probationary period. Students who are dismissed from the college for unsatisfactory academic progress due to circumstances beyond their control, such as a death in their immediate family or extended personal illness, may appeal for a revocation of the dismissal. A student dismissed in January must submit a written appeal by the second day of spring semester classes. A student dismissed in May must submit the written appeal by June 15.

Students dismissed from the college for poor scholarship may appeal to reenroll after an interval of at least one calendar year. A written appeal for reinstatement must be submitted to the Appeals Committee at the Student Development Center. Appeals must be submitted before June 15 for reinstatement in a fall semester or before December 1 for reinstatement in a spring semester.

For details about engineering academic probation and engineering academic appeal procedures, visit the College of Engineering web site (under Current Students/Student Procedures/Academic Standards, and Appeal Procedures).

Dropping and Adding Courses

Courses may be added with permission of the advisor and the instructor during the first two
Courses may be dropped with permission of the advisor and the instructor at any time during the first 10 weeks of the semester. Only under compelling circumstances may courses be dropped after the 10th week, in which case special approval must be granted by the advisor, the course instructor, and the dean’s office. Under no circumstance are students permitted to drop after the beginning of the scheduled final examination period.

Limits on Withdrawing from Courses

Undergraduates receive the mark of W for any course dropped after the second week of the semester or the first one-and-one-half weeks of the summer session. Students may not drop the same course with a mark of W more than twice. Special courses that may be repeated are exempt from this rule.

Students admitted to degree programs in the College of Engineering are limited to a total of five Ws while enrolled in the College of Engineering. First-year students entering the University directly from high school with no prior full-time college experience are permitted to exclude Ws received during their first two sessions of enrollment.

Students who have a legitimate reason for dropping a course (e.g., disabling illness, death of an immediate family member) and can document that reason are permitted to exclude that drop from the maximum, but the W is not removed from the record. Requests for such exclusions are made in the Student Development Center.

Withdrawal of Registration

Students who withdraw their entire registration must consult the staff at the Student Development Center. A student on scholastic probation who withdraws registration at any time without good cause may not be permitted to enroll for the following semester without specific approval from the Student Development Center staff. Withdrawal cards for students enrolled in the college are signed by the associate dean for academic programs.

Pass/Nonpass Option

A maximum of two courses taken pass/nonpass (P/N) may be applied toward satisfaction of the general education (humanities and social sciences) requirement. P/N registration must be approved by the student’s advisor and the instructor of the course and must be completed during the first three weeks of a semester or the first two weeks of a summer session. P/N registration may not be changed after the deadline for adding courses. The pass/nonpass option may not be used for courses taken to satisfy the rhetoric requirement. Guided Independent Study courses taken for humanities or social science credit may not be taken P/N.

Students enrolled in courses taught in the College of Engineering may choose to be graded pass/nonpass under the following conditions:

- the signatures of the advisor and instructor must be obtained on the proper form, and the completed form must be submitted to the registration center by the student within the time period established by University policy;
- the mark of P (pass) is awarded where the final course grade earned was C-minus or higher;
- the mark of N (nonpass) is given for grades of D-plus or below;

marks of P and N are not used in computing the grade-point average, and the mark of N does not count as earned credit.

No course work taken in the College of Engineering on the pass/nonpass option may be used to satisfy requirements for an engineering degree.

Second-Grade-Only Option

A student may elect to repeat a course with only the new grade being counted in his or her grade-point average. The option may be applied to no more than three courses, and it may be applied only once to a particular course. Transfer students may apply the option on a prorated basis.

A course may not be repeated under the second-grade-only option once it has been used as a prerequisite for a more advanced course that the student has completed successfully.

To exercise the second-grade-only option, students register as usual for the course that is to be repeated, then complete a Second Grade Option form at the Student Development Center; Second Grade Option forms are available on the college’s web site (under Current Students/Student Records Information/Forms). The form must be completed during the session in which the course is repeated, within the first 12 weeks of the fall or spring semester or the first six weeks of the summer session. Students must follow this procedure or both grades will be
counted in the University of Iowa grade-point average.

Under the second-grade-only option, the registrar marks the permanent record to show that a particular course has been repeated. Both grades remain on the permanent record, but only the second is used in calculating the grade-point average and semester hours earned. The course must be taken the second time under the same circumstances and with the same grade option as it was taken the first time.

The second-grade-only option cannot be used to remove a grade of incomplete, which must be removed in the usual manner. A student who holds a degree from The University of Iowa may not apply the second-grade-only option to a course taken before the degree was conferred.

**Satisfactory/Fail Courses**

The noncredit professional seminar courses required in each of the professional programs are offered only satisfactory/fail (S/F). No other engineering courses are offered on this basis. An F (failure) grade earned for such a class does not satisfy any portion of the professional seminar requirement.

**Incomplete and No Report Grades**

A mark of I (incomplete) that is not replaced by a final grade will automatically be converted to an F at the end of the next fall or spring semester (summer and winter sessions excluded), even if the student does not enroll after the session the incomplete was posted.

A mark of O (no grade reported) will remain on a student’s permanent record until a valid grade is submitted.

**Credit by Examination**

Students who have acquired knowledge in subject areas from sources other than formal course registrations may be granted credit toward graduation by examination, under the following conditions and limitations.

No more than 32 s.h. of credit by examination may be applied toward B.S.E. degree requirements.

College-Level Examination Program (CLEP) credit may be counted toward the lower-level General Education Component (humanities and social science) requirements. CLEP credit earned in natural science areas does not count toward the engineering degree. Credit also may be earned through Advanced Placement Exams. For details about CLEP and Advanced Placement Exam credit, visit the college’s web site (under Current Students/Student Records Information/Exam Credit).

Engineering students may earn credit for equivalent experience or former course work in any of the required common core courses through successful completion of examinations prepared and graded by the core course committees. Students who fail a core course are not permitted to earn credit by examination for the failed course. Students who wish to earn credit for core courses by examination must obtain approval from the associate dean for academic programs.

With approval of the departmental faculty, credit in three or fewer courses (totaling no more than 6 s.h.) may be awarded upon successful completion of final examinations in program elective courses.

**Foreign Language Incentive Program**

The University’s Foreign Language Incentive Program (FLIP) gives entering engineering students two options for earning college credit.

Option 1: Entering students who place into a fifth-semester language course and complete the course with a grade of B-minus or higher receive 4 s.h. of exam credit for the fourth-semester course. The credit is ungraded but may be counted toward the hours required for graduation. Incentive credit is not granted for college course work for which credit has been received.

Students are eligible for incentive credit only during their first and second registrations at The University of Iowa.

Option 2: Students may receive 2 s.h. of exam credit for earning a grade of B-minus or higher in a first-semester-level course in a foreign language different from the language used to satisfy the foreign language requirement. They may earn another 2 s.h. for completing the second-semester-level course in that language for a grade of B-minus or higher.

For details about FLIP for engineering students, visit the college’s web site (under Current Students/Student Records Information/Exam Credit). For more information on eligibility and restrictions, consult the Student Development Center.
Credit from Other Colleges

Course requirements in engineering may be satisfied with credit earned in courses taken in other University of Iowa colleges or at other accredited colleges or universities. When students apply for admission to the College of Engineering, they must submit official transcripts from each college attended along with their application for admission. After the credit has been certified by the Office of Admissions as college-level work from an accredited institution and after admission has been granted, the credit is evaluated by the Student Development Center either before or during the student’s first semester of enrollment in the college.

Satisfaction of engineering course requirements by transfer course work may be approved by the Student Development Center if, course-by-course, there is a match in the content and level of the transfer courses, and if the grades earned for such courses are C-minus or higher. Students who want to satisfy the engineering General Education Component (GEC) (social sciences and humanities) requirements or The University of Iowa rhetoric requirements by transfer work must follow the College of Engineering General Transfer Credit Guidelines.

Students planning to attend a two- or four-year institution before transferring to the College of Engineering should discuss the planned transfer with officials at both schools before embarking on a transfer program. The College of Engineering has recommended transfer course lists for most Iowa community colleges and some four-year colleges. Once students are enrolled in the College of Engineering, they must have prior approval for course work taken at other institutions.

For details about transfer credit for engineering students, including recommended transfer course lists and taking course work at other institutions, visit the college’s web site (under Current Students/Student Records Information/Transferring Credit to Iowa).

By policy of the Board of Regents, State of Iowa, a student may apply a maximum of 64 s.h. of transfer credit earned at a two-year college toward the 128 s.h. required for the B.S.E. However, transfer credit from a two-year school in excess of 64 s.h. is used in computing grade-point average and may be used to satisfy course requirements, even though the semester hours cannot be counted toward the total required for graduation. A grade of C-minus or higher is required in order for transfer credit to be applied toward a degree requirement.

Course Substitutions

For students in the College of Engineering, the substitution of an alternate course for a required course requires the approval of a petition. Permission for Course Substitution forms are available on the college’s web site (under Current Students/Student Records Information/Forms) or at the Student Development Center. The form must be completed by the student and must be approved by the student’s advisor and by the chair of the academic department in which the student is majoring.

If the petition involves a required engineering core course or a General Education Component (social sciences or humanities) course, then it also must be approved by the Student Development Center. Substitutions for required engineering core courses should be made infrequently and only under compelling circumstances. Substitutions of courses that are required by the student’s program are governed by the faculty of that program; approval of these course substitutions is needed only from the faculty advisor and the department chair. All petitions must be forwarded to the Student Development Center for inclusion in the student’s permanent file.

Auditing Courses

Students in the College of Engineering may register for a course for zero credit (audit) with the permission of the course instructor and the advisor. The mark of R is assigned to students registered for zero credit if attendance and performance in the course are satisfactory; if unsatisfactory, the mark of W is assigned. Courses completed with a mark of R do not meet any requirements nor do they carry any credit toward graduation. Auditing may not be used as a second-grade-only option.

To register for a course on an audit basis, students must obtain the instructor’s authorizing signature and their advisor’s signature and must register for 0 s.h. To change registration from audit to credit or from credit to audit, a drop-add form is used. These changes must be made during the first three weeks of a semester or the first one-and-one-half weeks of a summer session.

Misconduct, Complaints

Student Academic Misconduct

Policies regarding cases of cheating or plagiarism are outlined on the College of Engineering web site (http://www.engineering.uiowa.edu/current-students/academic-misconduct.html) and
are included in Policies and Regulations Affecting Students, on the University's Division of Student Services web site (http://www.uiowa.edu/~vpss/policies/index.html). In cases of cheating on an exam or quiz, the policy recommends that the instructor reduce the student’s grade, including the assignment of F for the course. When a course grade has been reduced to an F, the student may not drop the course or use the second-grade-only option to eliminate the failing grade.

At the beginning of each semester, course instructors individually announce and explain their policies on acceptable levels of collaboration between students on graded work, which includes homework assignments, and lab or design projects. When a policy is violated, a zero is assigned for the total portion of the course grade allocated to the requirement in which the violation occurs. The instructor sends a written report of any disciplinary action to the office of the dean and the report is placed in the student’s file. Students are notified by the office of the dean of any disciplinary action reported and are informed of appeal procedures.

Student Complaints Concerning Faculty Actions

In cases where complaints do not involve alleged student academic misconduct, students with complaints against engineering faculty members first should attempt to resolve the issue with the faculty member; see the college’s web site (under Current Students/Student Procedures). Lacking a satisfactory outcome, the student should discuss the matter with the chair of the faculty member’s department.

Students who are uncomfortable dealing directly with a faculty member or a department chair may seek assistance from the engineering faculty ombudsperson when attempting to resolve a complaint related to an engineering course. Students taking nonengineering courses should seek assistance from the University ombudsperson. However, grievances generally can be satisfactorily resolved most expeditiously at the faculty or chair level. If students are not satisfied with the outcome of this procedure, they should discuss their complaints with the dean of engineering.

Student Activities and Organizations

The College of Engineering student body is represented by the Engineering Student Council. The council plans and carries out activities involving the entire college, such as the student and faculty picnic and MECCA Week. The organization also acts on collegewide matters of general student interest.

Engineering students publish their own student journal, Hawkeye Engineer. The journal is staffed by students, with faculty members serving only in an advisory capacity.

The following engineering technical societies are represented by University of Iowa student chapters: American Institute of Chemical Engineers, American Society of Civil Engineers, American Society of Mechanical Engineers, Institute of Electrical and Electronics Engineers, Institute of Industrial Engineers, and National Society of Professional Engineers.

A student club of the Society of Automotive Engineers is open to all engineering majors, and a student society of biomedical engineers, which is formally recognized by the University, is open to biomedical engineering majors. The University chapter of Tau Beta Pi, a national honorary society for students in all engineering fields, gives special recognition to superior students in their junior and senior years. The work of students who are outstanding in their respective fields is recognized by Alpha Eta Mu Beta, honorary biomedical engineering society; Omega Chi Epsilon, honorary chemical engineering society; Chi Epsilon, honorary civil engineering society; Eta Kappa Nu, honorary electrical engineering society; Alpha Pi Mu, honorary industrial engineering society; and Pi Tau Sigma, honorary mechanical engineering society.

Student organizations dedicated to providing support and assistance in the development of more equitable enrollments of minorities and women in the college are the Multi-Ethnic Engineering Student Association and the student chapter of the Society of Women Engineers. A local chapter of Theta Tau, a national professional engineering fraternity, is active in service to the college and draws its membership from students throughout the college.

For more information about Engineering student organizations, see Current Students/General Information/Student Organizations on the college’s web site.

Professional Licensure

Licensure as a professional engineer is governed by the laws of each state. Most states’ minimum
requirements include graduation from an accredited engineering curriculum of at least four years, followed by at least four years of practical experience and successful completion of two major examinations.

The agency that controls and monitors the licensing procedure in Iowa is the Iowa Engineering and Land Surveying Examining Board. The first step in the procedure for students enrolled in an accredited program is to pass an examination on engineering fundamentals given near the time of graduation. Following graduation and the successful completion of the engineering fundamentals exam, graduates receive an Engineer-in-Training (EIT) certificate. The final step in the procedure is to pass the principles and practice exam in a specialty area following a minimum of four years of approved professional experience. At this point, the graduate engineer becomes a licensed Professional Engineer.

Graduate Programs

The College of Engineering offers the Master of Science and Doctor of Philosophy in biomedical engineering, chemical and biochemical engineering, civil and environmental engineering, electrical and computer engineering, industrial engineering, and mechanical engineering. For information about principal research and study areas, degree requirements, admission, and financial support for individual graduate programs, see the Catalog’s College of Engineering department sections: Biomedical Engineering, Chemical and Biochemical Engineering, Civil and Environmental Engineering, Electrical and Computer Engineering, and Mechanical and Industrial Engineering. Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

Student Development Center

The professional staff of the Student Development Center administers student services for the College of Engineering, including admission, advising, tutoring, and student records and scholarship. It also provides professional development services such as co-ops/internships, study abroad, and résumé and interviewing skills.

Engineering Professional Development

Engineering Professional Development (EPD) develops and promotes experiential education and professional opportunities for students in the College of Engineering. EPD programs and services include the Co-op and Internship Program, Study Abroad Programs, job shadowing, spring break programs, the fall Engineering Career Fair, and the spring Engineering Job and Internship Fair. EPD offers individual advising and class presentations on résumé preparation and interviewing skills as well as instruction on finding professional engineering positions and using electronic, print, and other resources in job searches. EPD also recruits employers and organizations interested in hiring engineering students and, in partnership with the Pomerantz Center, facilitates on-campus interviewing.

Lichtenberger Engineering Library

The Lichtenberger Engineering Library is a center of college activity. It maintains a collection of more than 100,000 volumes and provides access to more than 1,000 current journal titles. The library offers internet access to a wide array of indexes and abstracts and houses a significant collection of standards. Study space is provided for library users.
Hanson Technical Communication Center

The Hanson Center for Technical Communication (CTC) helps undergraduate engineering students develop and polish their written communication skills. The center’s coordinator and assistant coordinator supervise a staff of professional writing consultants and peer consultants.

CTC writing consultants are professional instructors who work in teams to help engineering faculty members present and evaluate writing-intensive assignments. They also provide individual feedback and assessment of students’ work throughout the writing process.

CTC peer consultants are engineering students who have strong writing skills. Peer consultants conduct one-on-one tutoring sessions at the center, helping their fellow students develop skills relating to organization, audience analysis, precise technical descriptions, and persuasive and logical narratives.

The CTC coordinator teaches an elective course, 059:004 Essentials of Technical Communication (2 s.h.), which uses a workshop approach to help students explore and practice communication genres practiced by engineers. Students deliver presentations, practice literature and patent searches, and work in teams to acquaint themselves with the reality of writing in the workplace. The course also uses selected readings and response papers to broaden students’ perspectives on the role of engineers in society.

Computer Systems Support

Engineering Computer Systems Support (CSS) provides for curricular computing at the College of Engineering. A large network of high performance Hewlett Packard color graphics UNIX workstations and XP workstations, along with extensive commercial and public domain software, support the full range of engineering college classes. The college provides the same type of computer hardware and software that students will use when they graduate and begin working as engineers. CSS updates hardware and software regularly to maintain the best educational environment.

Engineering and other students who take engineering courses are provided with an engineering computing account, which they keep during their tenure at the college. This account provides students with electronic mail and access to the Internet. The college’s computer labs provide students with more than 300 networked computers, and labs at the Seamans Center are open 24 hours per day. CSS provides support for student computing.

Engineering Design & Prototyping Center

The Engineering Design & Prototyping Center (EDPC) provides state-of-the-art technical resources to University and to private sector research and development groups for concept development, project design, full service machining, and rapid prototype modeling.

Engineering Electronics Shop

The Engineering Electronics Shop is a full-service electronics support facility for the College of Engineering. The shop provides design, construction, repair, calibration, and preventive maintenance services for both teaching and research laboratories. There also is an extensive electronics parts supply store and PC board facility for engineering students and researchers.

Research Units

Center for Bioinformatics and Computational Biology

The Center for Bioinformatics and Computational Biology facilitates development of new areas of study and expanded research opportunities in informatics areas related to the basic biological sciences and applied medical research.

The field of bioinformatics and computational biology (BCB) involves creation of methods for applying advanced mathematics and computation to problems of biological and biomedical interest, for example, understanding of the human genome, evolution of plants and animals, and relationships between microorganisms and higher-order life-forms. BCB is characterized by a diverse confluence of traditional academic disciplines. Biology and computing are joined by applied mathematics, biochemistry, biomedical and computer engineering, physics, probability and statistics, and others.

The Center for Bioinformatics and Computational Biology sponsors a seminar series, varied symposiums, and a seed grant program. It is affiliated with the University’s Carver Center for Comparative Genomics, Carver Family Center...
for Macular Degeneration, Coordinated Laboratory for Computational Genomics, DNA Facility, Holden Comprehensive Cancer Center, and Iowa Center for Gene Therapy.

Center for Computer-Aided Design

The Center for Computer-Aided Design is a College of Engineering research unit dedicated to the advancement and practical implementation of modeling and simulation research. The unit promotes multidisciplinary research, scholarship, and technology transfer with applications in design and optimization, kinematics and dynamics, human factors, and solid mechanics.

Among the technology applications currently under investigation at the center are meshfree methods for structural analysis and design sensitivity analysis, composite materials, probabilistic mechanics and reliability, reliability-based design optimization, topology optimization, multidisciplinary design optimization, advanced geometric modeling and CAD, human interaction with advanced technology and automation, human-computer interaction and virtual reality, computational modeling of human performance, mechanisms and robotics, and real-time dynamic simulation for haptic interfaces. CCAD research activities promote individual and multidisciplinary approaches to design and engineering analysis, engaging research participants from a variety of academic fields and interests.

Twelve faculty members currently are affiliated with CCAD, representing the Departments of Civil and Environmental Engineering, Mechanical and Industrial Engineering, and Mathematics (College of Liberal Arts and Sciences). Together, these faculty members supervise more than 50 graduate and undergraduate students. CCAD also employs 10 full-time professional staff members and three postdoctoral research scholars.

CCAD maintains a variety of high-performance computer systems. Its primary computing capability consists of a network of Hewlett-Packard HP C-, B-, and J-class workstations and servers and Silicon Graphics workstations. Most individual workstations incorporate high-performance graphics for general computing needs, including CAD/CAE, software development, virtual prototyping, and virtual environment development. More than 40 Windows NT workstations are connected to the HP/Silicon Graphics network, providing routine X windows access. A 16-processor HP Exemplar S-class supercomputer with 3 GB of main memory, more than 45 GB of local disk space, and two J6000 dual processor compute servers, each with 4 GB of memory, provide resources for extensive engineering analysis capabilities using a wide variety of industry-standard and locally developed software. A Network Appliance F520 file server with more than 200 GB of disk supports the storage needs of all center UNIX resources. Standard desktop, multimedia, and office productivity applications are hosted on a network of Dell and Micron personal computers running Windows 2000. Network-capable Hewlett-Packard Laserjet and Tektronix color printers support the center’s printing needs, and there is a variety of CD creation, video, and video production equipment for archival, dissemination, visualization, and presentation of center research.

Connecting all of this is a switched network using 10/100BaseT Ethernet via HP 4000M network switches connected via Gigabit Ethernet to the College of Engineering backbone. Each switch has its own dedicated connection to the Network Appliance file server and uses a mesh of 100BaseT connections to provide 400Mbps full-duplex connectivity between each pair of switches.

The center supports a wide range of commercially available scientific and engineering packages. For structural analysis, the center uses ABAQUS, ANSYS, and MSC Nastran, as well as pioneering software in the area of meshless analysis, ADAMS and DADS for dynamic analysis, and Altair HyperWorks and MSC Patran for preprocessing, meshing, and visualization. It uses PTC’s ProEngineer for CAD. Additional software tools include Mathematica, Matlab, IMSL, Xmath, and DOT.

Organizations supporting CCAD’s research program include the National Science Foundation, the National Aeronautics and Space Administration (NASA), the U.S. Departments of Transportation and Defense, the Iowa Department of Transportation, the Minnesota Department of Transportation, and industry leaders such as Caterpillar, 3M, Allsteel Inc., LG Digital Appliances, Maytag Corporation, Honda, General Motors, Nissan, and Rockwell International.

IIHR—Hydroscience & Engineering

IIHR—Hydroscience & Engineering (formerly the Iowa Institute of Hydraulic Research) is one of the nation’s premier and oldest fluids research
and engineering laboratories. Its activities encompass the broad spectrum of fluid mechanics, engineering and environmental hydraulics, and hydrometeorology.

Basic and applied engineering research programs are carried out at IIHR in nine modern, well-equipped laboratories. IIHR conducts teaching and research programs in fluid mechanics (turbulent shear flows, vortex dynamics, ship hydrodynamics, biofluid dynamics, and computational fluid dynamics); environmental hydraulics (river hydraulics, computational hydraulics, hydraulic structures, bioremediation, water quality dynamics, air-water exchange processes, ice-related river hydraulics, winter highway maintenance, and ice modeling); and water and air resources (hydrometeorology, hydroclimatology, hydrogeology, hydrology, remote sensing and water resources); and history of hydraulics and fluid mechanics.

IIHR maintains state-of-the-art research facilities, including a large low-turbulence wind tunnel, a vortex dynamics laboratory, a ship-model towing tank, extensive energy balance equipment, and radiometric and meteorological stations. It also has specialized equipment, such as a three-dimensional scanning elastic lidar, a differential absorption lidar, particle image velocimetry (PIV) and laser Doppler velocimetry (LDV) systems, and state-of-the-art computer resources.

IIHR has constructed a new research and education facility on the Mississippi River near Muscatine, Iowa. The Lucille A. Carver Mississippi Riverside Environmental Research Station provides opportunities for researchers and educators from around the world to study river processes in a multidisciplinary setting. The research station’s state-of-the-art facilities support study of diverse facets of the Upper Mississippi River and promote a better understanding of river ecosystems and their response to natural events and human activities.

High-level involvement of graduate students is a hallmark of most IIHR projects. IIHR is heavily involved in fluids engineering for industry and in fundamental research programs, providing graduate students and postdoctoral trainees with unique opportunities for valuable research and engineering experience. Undergraduates also have opportunities to participate in IIHR projects.

Iowa Spine Research Center

The Iowa Spine Research Center (ISRC) assesses clinical effectiveness and outcome in diagnosing and treating various spinal diseases. It also provides guidance in spinal research and patient care. The center, a unique collaboration between the College of Engineering and the Carver College of Medicine, involves teams of investigators that include engineers, economists, surgeons, research scientists, nurses, therapists, and students.

**Course Numbering System**

The title of each course offered by the College of Engineering is preceded by a three-digit prefix and a three-digit suffix separated by a colon.

The second digit of the prefix is 5, which identifies the course as one offered by the College of Engineering.

The third digit of the prefix identifies the College of Engineering program that offers the course as follows:

051—Biomedical engineering
052—Chemical and biochemical engineering
053—Civil and environmental engineering
055—Electrical and computer engineering
056—Industrial engineering
057—Engineering core (old curricula)
058—Mechanical engineering
059—Core engineering (new curricula)

The three-digit suffix of a course number identifies the level and type of course. Generally, suffix numbers below 100 designate courses primarily for undergraduates, numbers 100 to 199 designate courses for undergraduates and graduate students, and numbers 200 and above designate courses primarily for graduate students.

The courses offered by each department are listed in the department’s section by discipline area, starting with the lowest-level course and proceeding to the highest-level course.

A brief description is included for each course. Prerequisite and corequisite courses listed in course descriptions are University of Iowa courses. Students who have not taken the University of Iowa prerequisite but who have earned credit in equivalent course work from another institution should consult the course instructor if they have questions concerning their preparation for the course. They must obtain the instructor’s consent before registering for the course.
Engineering students may enroll in any course in the College of Engineering if they meet the course prerequisite and corequisite requirements. Undergraduates from other colleges may enroll in engineering courses only with consent of the College of Engineering director of admissions and Outreach; contact the Student Development Center. Consent for enrollment in an engineering course is based on space available as well as on whether the students have the mathematics, science, and engineering background considered necessary to undertake the course work.

Courses

Engineering Core

The college’s individual undergraduate programs and course requirements for each engineering major are described in the Catalog’s College of Engineering department sections.

Each undergraduate program builds upon a core program (see “Undergraduate Curriculum” earlier in this section). The following core program courses are offered by the college. Not all core courses are required for each engineering major.

Undergraduates from other colleges cannot register for core program courses without special permission from the college’s director of admissions and Outreach; contact the Student Development Center.

057:000 Cooperative Education Training Assignment: Engineering 0 s.h.
For engineering majors participating in the Cooperative Education and Internship Program. Prerequisite: consent of college’s internship and co-op director.

057:001 Engineering Honors Seminar 1 s.h.
Repeatable. Prerequisites: engineering honors and Junior or higher standing.

057:003 Accelerated Rhetoric for Engineers 4 s.h.
Rhetoric 010:001 and 010:002 combined in one semester. Prerequisite: admission to College of Engineering.

057:010 Dynamics 3 s.h.
Vector calculus, Newton’s laws, 3-D motion of particles and multiparticle systems, 2-D motion of rigid bodies applications. Prerequisites: 22M:031 and 059:007.

057:015 Materials Science 3 s.h.
Concepts and examples of selection and applications of materials used by engineers; mechanical, electrical, and thermal properties that govern a material’s suitability for particular applications; lectures supplemented by laboratory experiments. Prerequisite: 004:011. Corequisite: 22M:031.

057:017 Computers in Engineering 3 s.h.
Introduction to digital systems and engineering applications of microprocessor-based computers; C programming language; serial and parallel I/O; analog-to-digital and digital-to-analog conversion; system control using polling and interrupts; lab arranged. Prerequisites: 059:006 and sophomore standing.

057:018 Principles of Electronic Instrumentation 4 s.h.
Principles of analog signal amplification, signal conditioning, filtering; operational amplifier circuit analysis and design; principles of operation of diodes, bipolar transistors, field effect transistors; discrete transistor amplifier analysis and design; laboratory included. Prerequisites: 029:082 and 059:008.

057:019 Mechanics of Deformable Bodies 3 s.h.
Elementary theory of deformable bodies, stress, strain, axial, transverse, bending, torsion, combined and buckling loads; deflection of beam. Prerequisite: 059:007. Corequisite: 22M:034.

057:020 Fluid Mechanics 4 s.h.
Fluid properties; hydrostatics; transfer of mass, momentum, and energy in control-volume and differential forms; dimensional analysis and similarity; laminar and turbulent flow in conduits; flow past bluff bodies and airfoils; engineering applications; experimental laboratories, computer simulation projects. Prerequisites: 22M:037 and 057:010. Corequisite: 059:009.

057:030 Introduction to Engineering Design 3 s.h.
Problem-solving skills taught through a design-development process; use of solid-modeling computer design software to create, analyze, and communicate models of product solutions. Prerequisite: consent of UI Project Lead the Way director.

057:031 Principles of Engineering 3 s.h.
Introduction to engineering and engineering technology; exploration of varied technology systems and manufacturing processes to show how engineers and technicians use math, science, and technology to solve engineering problems and help people; concerns about social and political consequences of technological change. Prerequisite: consent of UI Project Lead the Way director.

057:032 Digital Electronics 3 s.h.
Applied logic, with focus on application of electronic circuits and devices; use of computer simulation software to design and test digital circuitry before circuits and devices are built. Prerequisite: consent of UI Project Lead the Way director.

057:033 Computer Integrated Manufacturing 3 s.h.
Builds on computer solid modeling skills developed in 057:030; application of robotics and automation principles; robotics in automated manufacturing, design analysis; uses CNC equipment to produce models of their 3-D designs. Prerequisite: consent of UI Project Lead the Way director.

057:034 Civil Engineering and Architecture 3 s.h.
Overview of civil engineering and architecture; interrelationship and dependence of each field on the other; roles of civil engineers and architects, project planning, site planning, building design, project documentation and presentation; students use state-of-the-art software to solve real-world problems and provide solutions for projects and activities. Prerequisite: consent of UI Project Lead the Way director.

057:035 Aerospace Engineering 3 s.h.
Experience applying scientific and engineering concepts to design materials and processes for aeronautics and flight; aerospace information systems, star sailing or astronautics rocketry, propulsion, physics of space science, space life sciences; habitat and crew systems with life support, biology of space science, principles of aeronautics, structures and materials, systems engineering. Prerequisite: consent of UI Project Lead the Way director.

057:036 Biotechnical Engineering 3 s.h.
Experiences from the fields of biotechnology, bioengineering, biomedical engineering, and biomolecular engineering; biomechanics, cardiovascular engineering, genetic engineering, agricultural biotechnology, tissue engineering, biomedical devices, human interface, bioprocess engineering, forensics, bioethics. Prerequisite: consent of UI Project Lead the Way director.
Engineering Design and Development 3 s.h.
Experience working in student teams to research, design, and construct a solution to an open-ended engineering problem, under a community mentor’s guidance; application of design and engineering concepts. Prerequisite: consent of UI Project Lead the Way director.

Stunning Concepts: Technology and Imagination 3 s.h.
How modern science and the artifacts of technology have transformed the work and consciousness of artists, poets, film makers, novelists, and historians; the paradox of engineering—ubiquitous yet invisible.

Experiential Design I arr.
Experiential Design II 3 s.h.
Prerequisite: 057:186.

Core Engineering

Essentials of Technical Communication 2 s.h.
Engineering as a real-world community of engineers working to increase their competence and confidence in the basic forms of technical communication.

Engineering Problem Solving I 3 s.h.
Development and demonstration of specific problem solving skills; directed project or case study involving actual engineering problems and their solutions.

Engineering Problem Solving II 3 s.h.
Engineering problem solving using computers; introduction to digital computations, problem formulation using a procedural high-level language; structured, top-down program design methodology; debugging and testing; introduction to use of software libraries; examples from numerical analysis and contemporary applications in engineering. Corequisite: 22M:031.

Engineering Fundamentals I: Statics 2 s.h.
Vector algebra, forces, couples, moments, resultants of force couple systems; friction, equilibrium analysis of particles and finite bodies, centroids; applications. Prerequisites: 22M:031 and 029:081.

Engineering Fundamentals II: Electrical Circuits 3 s.h.
Kirchhoff’s laws and network theorems; analysis of DC circuits; first order transient response; sinusoidal steady-state analysis; elementary principles of circuit design; laboratory experience with DC, AC, and transient circuits. Corequisites: 22M:034 and 029:082.

Engineering Fundamentals III: Thermodynamics 3 s.h.
Basic elements of classical thermodynamics, including first and second laws, properties of pure materials, ideal gas law, reversibility and irreversibility, and Carnot cycle; control volume analysis of closed simple systems and open systems at steady state; engineering applications, including cycles; psychrometrics. Prerequisites: 004:011, 22M:031, and 029:081.

First-Year Engineering Seminar 1 s.h.
Introduction to engineering student life; electronic resources; keys to and skills for success; coping with adversity; selecting a major; advising responsibilities; curriculum choices and career objectives; ethics; communication; internships and co-ops; job search skills. Prerequisite: first-semester standing.
The past four decades have seen a tremendous growth of technological activity in biology and medicine. As engineers increasingly have become involved with projects in the life and health sciences, there has been greater need for them to become more familiar with the fields of biology and medicine. Recognition of this need has led to the emergence of a new interdisciplinary engineering activity designed to bridge the gap between the life sciences and engineering—the biomedical engineering profession.

The Department of Biomedical Engineering fosters interdisciplinary activities across departments and colleges and maintains strong ties with the Carver College of Medicine. The department strives to provide a well-rounded and superior engineering education that attracts outstanding students at both the undergraduate and graduate levels; conduct high-quality research that enables faculty members and students to keep pace with and initiate new developments; and serve government, industry, and institutions worldwide by making the department’s facilities and faculty expertise accessible.

Several engineering faculty members have joint appointments in the Carver College of Medicine. Both biomedical engineering undergraduates and graduate students participate actively with college faculty members and their colleagues in the life and health sciences on projects of mutual interest.

Undergraduate Program

The department offers the Bachelor of Science in Engineering in biomedical engineering. The program provides a contemporary education in a multidisciplinary area. Its objective is to produce graduates who:

- have the ability to identify, formulate, and solve open-ended problems with medical relevance, including the design of devices, systems, and processes to improve human health;
- are able to pursue a wide range of career options, including those in industry, academia, and medicine; and
- are able to advance to leadership positions in their chosen field.

Students who complete the program may pursue career opportunities in biomedical industries, such as design and development of biomedical instrumentation, diagnostic aids, life-support systems, prosthetic and orthotic devices, and man-machine systems; or they may pursue traditional career opportunities in industry, such as those rooted in mechanical or electrical engineering disciplines. Other career options are available in government (Food and Drug Administration, Environmental Protection Agency, National Institutes of Health, Veterans Affairs). Some biomedical engineering graduates elect to continue formal education in engineering, medicine, or law.

Bachelor of Science in Engineering

The B.S.E. in biomedical engineering builds on the foundation provided by the College of Engineering core curriculum. It prepares students for the challenges and opportunities associated with careers in the biomedical engineering
profession. The program has been designed carefully to enable students to satisfy the entrance requirements of the Graduate College. Students whose choice of electives includes a three-course sequence in organic chemistry and an additional biology or biochemistry course may satisfy entrance requirements of the Carver College of Medicine, the College of Dentistry, or the allied health sciences.

The B.S.E. in biomedical engineering requires a minimum of 128 s.h. The curriculum covers four major stems: mathematics and basic sciences, engineering topics, elective focus area, and general education (15 s.h. of humanities and social science courses). All students take 059:005-059:006 Engineering Problem Solving I-II and 010:003 Accelerated Rhetoric. General education component courses must be selected to satisfy the requirements of the College of Engineering. See “Curriculum Stems” and “General Education Component” under “Bachelor of Science in Engineering” in the College of Engineering section of the Catalog.

Elective focus area courses must be selected according to guidelines established by the Department of Biomedical Engineering. See “Elective Focus Area” after the following curriculum list.

Some courses in the curriculum are prerequisites to others. Students who take courses in the order below satisfy the prerequisite requirements automatically. Students who do not follow this sequence still must satisfy all course prerequisites.

**FIRST YEAR**

**First Semester**

- 004:011 Principles of Chemistry I 4 s.h.
- 010:003 Accelerated Rhetoric (or 010:001-010:002) 4 s.h.
- 059:005 Engineering Problem Solving I 3 s.h.
- 059:090 First-Year Engineering Seminar 1 s.h.

**Second Semester**

- 004:012 Principles of Chemistry II 4 s.h.
- 22M:032 Engineering Mathematics II: Multivariable Calculus 4 s.h.
- 029:081 Introductory Physics I 4 s.h.
- 051:090 First-Year Forum 0 s.h.
- 059:006 Engineering Problem Solving II 3 s.h.

**SECOND YEAR**

**First Semester**

- 002:010 Principles of Biology I 4 s.h.
- 051:091 Professional Seminar: Biomedical Engineering 3 s.h.
- 059:007 Engineering Fundamentals I: Statics 2 s.h.
- 059:008 Engineering Fundamentals II: Electrical Circuits 3 s.h.
- 059:009 Engineering Fundamentals III: Thermodynamics 3 s.h.

**Second Semester**

- 027:130 Human Physiology 3 s.h.
- 051:030 Cell Biology for Engineers 2 s.h.
- 051:091 Professional Seminar: Biomedical Engineering 0 s.h.
- 051:130 Cell Biology for Engineering Lab 1 s.h.
- 057:017 Computers in Engineering 3 s.h.
- 057:019 Mechanics of Deformable Bodies 3 s.h.
- General education component course 3 s.h.

**THIRD YEAR**

**First Semester**

- 029:082 Introductory Physics II 4 s.h.
- 051:040 Biological Systems Analysis I 3 s.h.
- 051:050 Biomechanics: Theory and Design 3 s.h.
- 051:070 Biomaterials and Implant Design 3 s.h.
- 051:091 Professional Seminar: Biomedical Engineering 0 s.h.
- General education component course 3 s.h.

**Second Semester**

- 051:060 Data and Image Acquisition and Analysis 4 s.h.
- 051:075 Cell-Material Interactions 3 s.h.
- 051:080 Data Acquisition Design Laboratory 2 s.h.
- 051:091 Professional Seminar: Biomedical Engineering 0 s.h.
- 171:161 Introduction to Biostatistics 3 s.h.
- General education component courses 6 s.h.

**FOURTH YEAR**

**First Semester**

- 051:085 Biomedical Engineering Senior Design I 4 s.h.
- 051:092 Leadership and Resourcefulness 0 s.h.
- Four elective focus area courses 12 s.h.
Second Semester

051:086 Biomedical Engineering Senior Design II 4 s.h.
One general education component course 3 s.h.
Three elective focus area courses 9 s.h.

Elective Focus Area

The biomedical engineering program offers a variety of elective focus area options, including standard focus areas developed and maintained by the program and flexible focus areas tailored to individual student interests. For more detailed information about elective focus areas, see “Bachelor of Science in Engineering”/“Elective Focus Area” in the College of Engineering section of the Catalog. For a list of standard biomedical engineering elective focus area options and guidelines for tailored elective focus areas, contact the Department of Biomedical Engineering or visit its web site.

Combined B.S.E./M.S.

Students who wish to complete a Bachelor of Science in Engineering and a Master of Science in biomedical engineering at The University of Iowa can apply to the fast-track B.S.E./M.S. program. Fast-track students receive a B.S.E. in biomedical engineering once they have completed all of the requirements for the B.S.E. They normally complete the required course work for the M.S. one year later.

To be admitted to the program, students must have completed at least 80 s.h., must have a cumulative g.p.a. of at least 3.50, and must submit a letter of application to the chair of the Department of Biomedical Engineering stating the intended area of specialization and the name of the M.S. advisor.

Graduate Programs

The department offers a Master of Science and a Doctor of Philosophy in biomedical engineering. The aim of graduate study at both levels is to educate students more deeply and broadly than is possible at the undergraduate level. The goal is to enable students to use contemporary methods at an advanced level during a professional career in engineering design, development, and research.

Each student’s course of study is based on individual background and career objectives, and sound academic practice. Department faculty members have teaching and research expertise in areas related to cardiovascular and fluid biomechanics, musculoskeletal biomechanics, biomaterials and tissue engineering, bioinstrumentation, biosystems, biomedical imaging, biological signal analysis, bioinformatics and computational biology, and other allied fields.

An individual program for each student may be developed from courses offered by the biomedical engineering department and other departments, especially mechanical engineering, electrical engineering, physiology, mathematics, and biological sciences. M.S. students who want a more general program may combine emphases, while those who want some specialization in any particular field may accommodate these preferences through the combination of departmental courses and appropriate electives from other departments of the College of Engineering and the University.

Ph.D. programs may center on any one of the previously described areas through the choice of appropriate course work and research topic.

Master of Science

The Master of Science in biomedical engineering requires a minimum of 30 s.h. of graduate credit and is offered with or without thesis. Students who choose the nonthesis program must earn at least 6 s.h. of 200-level courses. Those who choose the thesis program may count no more than 6 s.h. of thesis research and writing credit toward the degree. The M.S. is designed to be a terminal degree or a step toward the Ph.D.

A tentative plan of study for each student is determined through consultation with an advisor. An M.S. committee of at least three graduate faculty members, including at least two on the biomedical engineering faculty, is appointed by the dean of the Graduate College. The student’s plan of study is reviewed by the committee before the student has completed 18 s.h. of course work. The plan of study then is submitted for review to the department chair.

To earn the M.S., students are required to attain a g.p.a. of at least 3.00 on a minimum of 30 s.h. of graduate work and successfully complete the final examination administered by their committee.

Candidates for the M.S. (thesis or nonthesis) must complete the following courses or their equivalents with a grade of B or higher.

Advanced mathematics
Human physiology (027:130)

Individual study plans should include as much advanced work as individual aptitude and previous preparation permit.
Doctor of Philosophy

The Doctor of Philosophy in biomedical engineering requires a minimum of 72 s.h. of graduate work, including acceptable transfer credit. At least 42 s.h. must be earned in formal course work taken after the B.S. is awarded, and at least 12 s.h. must be earned for research and thesis. For students entering with an M.S., at least 18 s.h. of formal course work must be completed beyond the M.S., and at least 12 s.h. must be earned for research and thesis. Based on research progress, examination results, or other measures, the student’s graduate committee may require additional formal course work to strengthen perceived areas of weakness.

Admission to the Ph.D. program is conditional until students successfully complete a qualifying examination. The biomedical engineering faculty administers the exam and decides whether the student’s performance on it is adequate for admission to the Ph.D. program.

Admission to Ph.D. candidacy requires a g.p.a. of at least 3.25 on all graduate work done at The University of Iowa. Upon completion of the course work specified in the plan of study and with the required grade-point average and the advisor’s recommendation, students are admitted to the comprehensive examination by their committee.

Having satisfactorily completed these examinations, students usually have only to complete and defend their dissertation at the final examination. Requirements for the Ph.D. generally can be completed in about three years beyond the master’s degree.

Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

Applicants who have earned a baccalaureate or postbaccalaureate degree in engineering or in the mathematical or physical sciences, with a g.p.a. of at least 3.00, and who have a combined verbal and quantitative score of 1250 on the Graduate Record Examination (GRE) General Test are eligible to be considered for admission to the Master of Science program in biomedical engineering. Students with a lower grade-point average or GRE General Test scores may be considered for conditional admission. They must achieve regular standing within 8 s.h. of initial registration by attaining a g.p.a. of at least 3.00 at The University of Iowa and regular acceptance by the department faculty. Students who do not meet these requirements are subject to dismissal.

Reference letters, research interests, previous graduate grade-point average, and other factors may be considered in making admission decisions.

Admission to the Doctor of Philosophy in biomedical engineering is conditional until students successfully complete a qualifying examination.

Financial Support

Students are encouraged to apply for fellowships and assistantships. Contact the chair of the Department of Biomedical Engineering.

Facilities and Laboratories

Required Undergraduate Laboratories

Five dedicated undergraduate teaching laboratories are associated with the required and elective courses in biomedical engineering: Biomaterials and Tissue Engineering Laboratory, Biomeasurements and Systems Laboratory, Biomechanics Laboratory, Biomedical Imaging Laboratory, and Cell Biology for Engineers Laboratory.

BIOMATERIALS AND TISSUE ENGINEERING

The Biomaterials and Tissue Engineering Laboratory is equipped to test mechanical and thermal properties of biomaterials, thin sectioning of hard tissues, and prostheses for histology. It also is equipped for basic tissue engineering experiments. The laboratory is used for 051:070 Biomaterials and Implant Design; elective courses in biotransport processes, biomaterials, and tissue engineering; senior design projects; and demonstrations in 051:030 Cell Biology for Engineers.

BIOMEASUREMENTS AND BIOSYSTEMS

The Biomeasurements and Biosystems Laboratory is equipped to measure biomedical variables of clinical and physiological interest, design and build electronic instrumentation, and conduct modeling experiments in physiology. It is used for 051:040 Biological Systems Analysis I and 051:080 Data Acquisition Design Laboratory, elective courses in biomeasurements and
biological systems analysis, senior design projects, and demonstrations in 051:030 Cell Biology for Engineers.

BIOMECHANICS

The Biomechanics Laboratory is equipped to perform experiments in biological flow analysis and in human musculoskeletal systems. The laboratory houses a pulse duplicator for simulating physiological pulsatile flow, a flow visualization set-up to analyze flow past stenosis and aneurysms, blood pressure and flow measurement devices, digital still and video cameras for kinematic analysis, a ski binding tester, a drop tower for impact testing, a four-channel EMG amplifier system, and a table-top material testing machine. The laboratory is used for 051:050 Biomechanics: Theory and Design, elective courses in cardiovascular and skeletal biomechanics, other elective courses, senior design projects, and demonstrations in 051:030 Cell Biology for Engineers.

BIOMEDICAL IMAGING

The Biomedical Imaging Laboratory has state-of-the-art computer hardware and software for teaching the fundamentals of medical imaging and image analysis required in 051:060 Data and Image Acquisition and Analysis. It also is used for elective courses in physics and in analysis of medical imaging, the medical imaging practicum course, and demonstrations in 051:030 Cell Biology for Engineers.

CELL BIOLOGY FOR ENGINEERS

The Cell Biology for Engineers Laboratory trains students in cell culture and biochemical analysis techniques as a foundation for future studies in quantitative cell-based studies. Students learn basic cell culture techniques, protein and nucleic acid analysis, adenovirus-mediated gene transfer techniques, microarray and analysis, and polymerase chain reaction (PCR) analysis of nucleic acids. They also are introduced to bioinformatics techniques used in cell biology. Major equipment in the lab includes laminar flow hoods, cell culture incubators, centrifuges, an ultracold freezer, protein and nucleic acid electrophoresis equipment, thermal cyclers, microscopes, an automated microplate reader, and varied support apparatuses used in cell-based studies. The lab is used for 051:075 Cell-Material Interactions, 051:130 Cell Biology for Engineering Lab, and 051:177 Graduate Cell Material Interactions.

Research Facilities and Laboratories

BIOMATERIALS LABORATORY

The Biomaterials Laboratory is equipped to characterize implant materials and biological tissues for their mechanical and thermal properties. Hard tissue histological slide preparations, for both microradiograph and optical, can be made for the study of interactions between bone and implant interactions. Metallographic sample preparations can be made and analyzed under optical microscopes.

The laboratory contains MTS (model 812) materials testing machine with recorder and controller; automatic data acquisition and process computer dedicated to the MTS machine; differential scanning calorimeter (Perkin-Elmer DSC-4 model); Omega x-ray generator with microradiographic attachment; Bronwill thin sectioning saw; Buehler Isomet thin sectioning
saw; Buehler metalographic and petrographic grinding and polishing wheels; IR, polarizing, reflection research type microscopes; temperature-controlled bath; Lindberg tube furnace; strain gage attachment and measurement devices; videotape and play equipment; and conventional and vacuum oven with a diffusion pump.

**CARDIOVASCULAR BIOMECHANICS LABORATORY**

The Cardiovascular Biomechanics Laboratory houses an EMS Whitest uniaxial tension/compression testing system, a pulse-duplicating apparatus with flow loop, a spectrophotometer, silicone prototype fabrication utilities, high-speed/high-resolution cameras, a Sun Solaris workstation, and personal computers. The lab is equipped for soft tissue tensile/compression testing and viscoelastic creep/relaxation testing; simulation of flow through fabricated, anatomically realistic, patient-specific models of vasculature and heart valves; quantification of protein content in soft tissues; fabrication of realistic, compliant prototypes of human organs; and computational modeling of hemodynamics and tissue mechanics of normal and pathological cardiovascular organs.

**IMAGE PROCESSING LABORATORY**

The Image Processing Laboratory is equipped to perform sophisticated image processing procedures required for varied investigations. Its equipment centers around a cluster of workstations, a video graphics copy device, a video camera that is used as a densitometer, and various other peripherals. The cluster is connected to the University-wide broadband communications system through which data can be transferred from the Iowa Computer-Aided Engineering Network (ICAEN), all Academic Computing machines, all hospital computers, and off-campus computers (such as the national supercomputer system).

Many investigators use this facility to analyze cardiac images obtained from cine-CT or ultrasound, and for cross-section of human spines, dental specimens, and so forth.

**IOWA SPINE RESEARCH CENTER BIOMECHANICS LABORATORY**

The Iowa Spine Research Center Biomechanics Laboratory is fully equipped to perform studies of tissue and/or specimen response to mechanical loads. An MTS Bionix machine (with extended columns) servohydraulic testing machine permits application of uniaxial tension or compression in concert with axial torsion under displacement (rotation) or load control. In addition, the laboratory has a large base plate with T-slots, grips, an environmental chamber, and an independent controller with specialized test control and data acquisition and analysis routines. An MTS Model 810 servohydraulic testing machine permits uniaxial tension or compression under displacement, load, or strain control. A bank of fatigue testing machines is planned. An apparatus for testing spinal motion segments for their balance point and buckling behaviors also is available.

**JOLT/VIBRATION/SEATING LABORATORY**

The Jolt/Vibration/Seating Laboratory is equipped for investigation of the biomechanics of the spine, particularly problems related to low back pain due to the interaction between people and equipment in jolt (impact) and vibration environments. Three shakers are available to simulate impact and vibration environments. Human responses are measured using equipment including load cells, electromyography, accelerometry, position sensors, and pressure pads. Portable sensors and data recorders are used to evaluate impact and vibration environments in the field and compare them to domestic and international guidelines and standards.

**LARGE-SCALE DIGITAL CELL ANALYSIS LABORATORY**

The Large-Scale Digital Cell Analysis Laboratory is involved in development of the large-scale digital cell analysis system (LSDCAS) and model-based approaches to problems of general biological interest. The facilities include the Real-Time Cell Analysis Laboratory, in the Seamans Center, with 10 Linux workstations, a Power Mac, printers, and scanners; and Real-Time Cell Analysis Data Center, also in the Seamans Center, with two Itanium servers (36 GB RAM/144 GB RAID storage), a fiber channel RAID storage system (2 terabytes), two dual-Pentium servers (2 MB RAM/36 GB disk storage), dual 30 amp/240 volt uninterruptible power supplies, 30-slot DLT tape library, fiber channel switch, fiber channel/SCSI bridge, rack-mount monitor/keyboard, and KVM switch. The Quantitative Real-Time Cell Analysis Research Facility, located in the Medical Education and Research Facility, has a LSDCAS system consisting of three automated microscope systems capable of performing real-time single-cell analysis experiments, located in a dedicated darkroom to regulate illumination conditions. Each microscope system is controlled by a microcomputer interfaced to a digital camera.
and a microscope controller. This facility also includes a small tissue culture support laboratory containing a cell incubator, and access to tissue culture hoods, freezers, refrigerators, and other equipment. The Biomedical Research Laboratory, in the Medical Education Building, has a tissue culture hood, dual-chamber incubator, Coulter cell counter, protein and nucleic acid gel electrophoresis and blotting apparatus, refrigerators, freezers, and a variety of tools used for biochemistry, cell biology, and molecular biology.

ORTHOPAEDIC BIOMECHANICS LABORATORY

The Orthopaedic Biomechanics Laboratory occupies 20 rooms on the ground floor of Westlawn. It is configured primarily for macroscopic-level physical testing of musculoskeletal constructs (e.g., bones, articular joints, orthopaedic implants) and for corresponding computational modeling. The physical testing area includes a multipurpose wet lab, a multipurpose dry lab, a surgical preparation room, a mechanical testing room, a machine shop, and a specimen storage area. The computational modeling area is arranged around eight separate workstation seats in two adjoining partially partitioned areas. Adjacent to these core operational areas are offices for faculty, research staff, students, and fellows; a secretarial/reception area; a conference room; and a library.

SPINE BIOMECHANICS AND ERGONOMICS LABORATORY

Located at University of Iowa Hospitals and Clinics, the Spine Biomechanics and Ergonomics Laboratory is equipped for investigation of the biomechanics of the spine, particularly problems related to production and treatment of low back pain. For example, electromyography equipment, accelerometry, a motion capture system, and a force plate are used to study response to sudden loads. A stadiometer is used to evaluate how varied activities affect shrinkage (creep) in the spine. A pressure pad is used to study interface pressures between people and chairs or beds.

SPINE RESEARCH LABORATORY

The Spine Research Laboratory is equipped for interdisciplinary research. The laboratory’s MTS Bionix (with extended columns) servohydraulic testing equipment permits application of uniaxial tension or compression together with axial torsion under displacement or load control. The laboratory also has a fully automated 3-D motion measuring system. These devices are used to test mechanical properties of biomechanical joints and tissues, and for biomechanical evaluation of the performance of surgical treatment modalities. Other equipment includes digital cameras, surgical tools, and sensors (i.e., LVDTs, six-degrees-of-freedom load cell, pressure transducers, digital inclinometers).

A biaxial biomechanical culture system is available for application of controlled compression and/or shear forces onto the intervertebral disc during culture, in order to investigate the disc’s biological responses to mechanical loads. This culture system is used in conjunction with an incubator in which cells and tissues can be cultured. Basic equipment for histology and immunohistochemical analyses includes a microtome, ovens, a microscope, and glassware for chemical processes.

TISSUE ENGINEERING LABORATORY

The Tissue Engineering Laboratory is outfitted with a fume hood, sink, laboratory counters, tables, and major tissue culture equipment, including a Baker SG3 laminar flow hood, a NuAir water jacked incubator, an autoclave, a vacuum pump, a Zeiss Axiovert S-100 phase contrast and bright field microscope with a computer interface, computer-controlled peristaltic pumps, a computer-controlled water bath, and a refrigerator and freezer.

The inverted microscope has an image capture system interfaced to a computer workstation with image processing software. A variety of sensors for performing temperature, pressure, and flow measurements also are available. The laboratory’s computers are equipped with software for graphical, numerical, image analysis, word processing, and symbolic computation. Liquid nitrogen dewars, and CO2 and N2 tanks have been installed. An Ussing chamber with electrodes and a high impedance Keithley electrometer also are available.

UPPER EXTREMITY BIOMECHANICS LABORATORY

The Upper Extremity Biomechanics Laboratory is configured for image analysis, upper extremity physical testing, and radiographic archives. A two-sensor Optotrak system, coupled with The MotionMonitor software package, is used to collect upper-extremity kinematic data.

Property-structure relationship of ceramics and glasses used to fabricate implant materials; their interactions in vivo. Prerequisite: 051:070 or equivalent.

051:175 Tissue Engineering 3 s.h.
Principles of tissue engineering; cell/material interactions, cellular scaffolding, material design for tissue-engineered devices, genetic engineering for tissue engineering, in vitro and in vivo models. Same as 046:290, 052:227.

051:176 Biomaterials Laboratory 3 s.h.
Practical experience in design, fabrication, and testing of biomaterials and devices; mechanical testing, tissue response, design to optimize response. Basic understanding of materials required. Prerequisite: 051:070.

051:177 Graduate Cell Material Interactions 3 s.h.
Current thought and techniques in the engineering and assessment of biomaterials; companion course to 051:070 and 051:075. Prerequisite: senior or graduate standing.

051:215 Interfacial Engineering for Biological Systems 3 s.h.
Survey of current literature on interfacial engineering for biomedical engineering; student presentation and discussion of articles. Prerequisite: organic or polymer chemistry or consent of instructor.

051:248 Elastic Waves in Solids 3 s.h.
Same as 053:248, 058:271.

Biomechanics/Biofluids

051:140 Graduate Biomechanics 3 s.h.
Understanding the human body from an engineering mechanics perspective; challenges of applying engineering principles to living systems, illustrated through real-world examples. Repeatable. Prerequisite: 057:019.

051:150 Musculoskeletal Biomechanics 3 s.h.
Principles of solid mechanics applied to analytical, experimental investigation of biological systems; emphasis on applications in kinesiology of human musculoskeletal system. Prerequisites: 057:019 and graduate standing.

051:151 Intermediate Mechanics of Deformable Bodies 3 s.h.
Application of equilibrium analysis, strain-displacement relations, constitutive relationships to practical structural systems and elementary plane elasticity problems. Offered fall semesters. Prerequisite: 057:019. Same as 053:140, 058:150.

051:152 Ergonomics of Occupational Injuries 3 s.h.
Epidemiology, surveillance systems, ergonomics, biomechanics, physiology, psychology, legal aspects, and cost control. Prerequisite: 051:050 or 051:150.

051:154 Cardiac and Vascular Mechanics 3 s.h.
Bio-solid mechanics of the cardiovascular system; mechanical properties of ventricles, valves, and blood vessels, their normal function, how they are affected by disease states; design of artificial organs, prostheses. Prerequisite: 057:019.

051:155 Cardiovascular Fluid Mechanics 3 s.h.

051:157 Introduction to Applied Biomedical Finite Element Modeling 3 s.h.
Introduction to finite element modeling as applied to biomechanics-related applications. Prerequisite: 051:050. Corequisites: 051:150 and 058:115.

051:158 Biomechanics of Orthopaedic Implants 3 s.h.
Design and function of hip, knee, ankle, shoulder, elbow, and wrist replacements and of fracture stabilization devices; fixation modalities, stress analysis, tissue adaptation, failure mechanisms. Prerequisites: 051:050, 057:019, 059:007, and 059:008.

051:253 Spine Mechanics 3 s.h.
Biomechanics applied to mechanics of the human spine; clinical aspects; state-of-the-art in spine research; basic engineering principles for biomechanical analysis. Prerequisite: 051:150.

051:254 Advanced Vascular Mechanics 3 s.h.
Topics in vascular solid mechanics; study of vascular tissue from theoretical (constitutive modeling), experimental, and computational perspectives. Prerequisite: 051:154.

051:255 Advanced Biofluid Mechanics 3 s.h.
Hydrodynamic theories of atherosclerosis, Womersley models, steady and unsteady flows in curvilinear, bifurcation and branching arterial segments, flow dynamics past prosthetic implants, experimental and computational models, particulate and mass transport simulations in human circulation. Prerequisite: 051:155.

051:257 FE Analysis in Orthopaedic Biomechanics 3 s.h.
Finite element modeling techniques applied to musculoskeletal (orthopaedic) biomechanics; use of ABAQUS finite element software. Prerequisite: 051:150. Corequisites: 051:158 and 058:115.

Bioelectrical Engineering

051:141 Graduate Biological Systems Analysis 3 s.h.
Application of principles of linear system (control) theory to analysis of biological systems; development of computer-simulation techniques to study dynamic response of physiological systems. Prerequisite: graduate standing.

051:148 Digital Image Processing 3 s.h.
Same as 055:148.

051:161 Graduate Data and Image Acquisition and Analysis 4 s.h.
Acquisition and analysis of data collected from living systems; concepts of analog and digital circuit design, with emphasis on circuits data collection for biomedical applications using operational amplifiers, active filters, conversion, and microcomputer interface; patient safety, clinical circuits, data analysis using time domain, spatial domain, Fourier domain techniques; time domain and spatial domain sampling, Nyquist sampling theorem; physics, acquisition, and analysis of medical images, with emphasis on X-ray, CT, MR, ultrasound. Prerequisite: 027:130 or equivalent. Corequisites: 051:141 and 051:181.

051:181 Graduate Data Acquisition Design Laboratory 2 s.h.
Corequisite laboratory for 051:161; practice in designing and building electronic circuits to measure, acquire, and analyze biosignals; and in acquiring and analyzing images obtained from the human body. Prerequisites: a basic electronics course and graduate standing. Corequisite: 051:161.
051:182 Biomedical Signal Processing 3 s.h.
Application of signal processing methods (e.g., Fourier, Laplace, z-transforms) to biomedical problems, such as analysis of cardiac signals, circadian rhythm, the breathing cycle; computer simulation lab. Prerequisite: 051:080.

051:185 Medical Imaging Physics 3 s.h.
Physics and data acquisition techniques of major medical imaging modalities (X-ray, CT, MR, ultrasound, PET, SPECT); physical interactions of energy with living tissue; principles and methods for acquiring imaging data and subsequent image construction; how individual modalities influence image quality; MATLAB programming required. Second in a medical imaging sequence. Prerequisites: background in physics and computers, and anatomy or biology or physiology.

051:186 Multidimensional Medical Imaging Process 3 s.h.
Algorithms developed to process and analyze large volumetric data sets; physics of CT, MRI, ultrasound, 3-D convolution and filtering, geometric transformations, shape features, surface segmentation, regional segmentation, surface tiling, surface reconstruction, volumetric registration. Third in a medical imaging sequence. Prerequisite: 051:185.

051:187 Health Informatics I 3 s.h.

051:188 Imaging Practicum 3 s.h.
Real-world problems in medical imaging; team approach leading to publication in scientific literature. Prerequisite: 051:060 or 051:185 or 051:186 or equivalent.

051:189 Health Informatics II 3 s.h.

051:280 Functional Magnetic Resonance Imaging 2-3 s.h.
Introduction to basic and advanced fMRI methods used in cognitive neuroscience; hands-on design and analysis of fMRI data. Same as 132:250.

051:286 Contemporary Topics in Medical Imaging 3 s.h.
Presentation of recent research results and clinical applications of medical imaging techniques. Prerequisites: 051:185, and 051:186 or equivalent.

051:287 Insight into Images 3 s.h.
Advanced image processing algorithms applied to analysis of medical images; image segmentation (level sets, watershed, active contours) and image registration (mutual information, Thirion Demons, B Spline algorithms); development and application of these algorithms using ITK Toolkit. Prerequisites: 051:158 and 051:186.

**Graduate Seminars, Advanced Topics, Research**

051:191 Seminar in Biomedical Engineering 0 s.h.
Presentation of recent advances in biomedical engineering. Prerequisite: graduate standing.

051:198 Individual Investigations: Biomedical Engineering arr.
Individual projects for biomedical engineering graduate students, such as laboratory study, engineering design project, analysis and simulation of an engineering system, computer software development, research. Prerequisites: graduate standing and consent of advisor.

051:199 Research: Biomedical Engineering M.S. Thesis arr.
Experimental and/or analytical investigation of an approved topic for partial fulfillment of the requirements for the M.S. with thesis in biomedical engineering. Prerequisites: graduate standing and consent of advisor.

051:298 Advanced Individual Investigations in Biomedical Engineering arr.
Advanced individual projects such as laboratory study, engineering design projects, analysis and simulation of an engineering system, computer software development, research. Prerequisite: graduate standing.

051:299 Research: Biomedical Engineering Ph.D. Dissertation arr.
Experimental and/or analytical investigation of an approved topic for partial fulfillment of requirements for Ph.D. with thesis in biomedical engineering. Prerequisite: consent of advisor.
Chemical and Biochemical Engineering

Chair: John M. Wiencek

Professors: Gregory R. Carmichael, Vicki Grassian, David W. Murhammer, David G. Rethwisch, Alec B. Scranton, Venkiteswaran Subramanian, John M. Wiencek

Professor emeritus: J. Keith Beddow

Associate professors: Gary Aurand, Chris Coretsopoulos, Umran Dogan, C. Allan Guymon, Stephen K. Hunter, Tonya L. Peeples, Ramaswamy Subramanian

Assistant professors: S.-Y. Barry Hu, Julie L.P. Jessop, Aliasger Salem, Charles Stanier

Lecturer: Audrey Butler

Undergraduate degree: B.S.E. in Chemical Engineering

Graduate degrees: M.S., Ph.D. in Chemical and Biochemical Engineering

Web site: http://www.cbe.engineering.uiowa.edu/

Chemical and biochemical engineers work in a wide range of industries; petroleum and specialty chemical production, polymer or plastic production, food processing, microelectronics production, biochemical processing, and environmental compliance are just a few. Potential jobs include production, process development, plant design and construction, and fundamental research. Many experienced chemical and biochemical engineers move through management ranks to high-level administrative positions.

Undergraduate Program

The department offers the Bachelor of Science in Engineering in chemical engineering. The program’s objective is to produce graduates who have:

- a strong foundation of scientific and technical knowledge and are equipped with problem-solving, teamwork, and communication skills that will serve them throughout their careers;
- the ability to pursue careers as practicing chemical engineers in fields such as pharmaceuticals, microelectronics, chemicals, polymers/advanced materials, food processing, or environmental engineering;
- the ability to pursue advanced studies in disciplines such as chemical engineering, environmental engineering, medicine, law, or business; and
- the ability to assume professional leadership roles.

The program uses the following methods and strategies to achieve its educational objectives:

- foster a personalized, supportive environment for all students by taking advantage of the unique combination of a small college atmosphere in a major research university;
- enrich the undergraduate experience through cultural diversity, and international opportunities or experiential learning;
- provide a solid foundation and understanding of the fundamental principles of mathematics, science, and engineering;
• provide students with experience in learning and applying tools (e.g., computer skills) to the solution of theoretical and open-ended chemical engineering problems;
• provide students with opportunities to participate in multidisciplinary teams, and to develop and practice written and oral communication skills, both within the team and to a broader audience;
• provide students with opportunities to design and conduct chemical engineering experiments, and to design systems, components, and chemical processes to meet specific needs and constraints; and
• provide a contemporary grounding in professional responsibility, including ethics, the global and societal impact of engineering decisions, and the need for lifelong learning.

Bachelor of Science in Engineering

The B.S.E. in chemical engineering program provides a broad education at the leading edge of technology. It emphasizes fundamental concepts, problem solving, laboratory techniques, and communication skills. Biological science joins physics, chemistry, and mathematics as foundation disciplines for chemical engineering. The sophomore, junior, and senior years emphasize chemical engineering courses such as engineering flow and heat exchange, mass transfer and separations, chemical reaction engineering, chemical process safety, chemical engineering laboratories, process dynamics and control, and process design. Experience in instrumentation, analysis, and design is obtained through an integrated laboratory program. Routine use is made of computer-based data analysis, simulation, and design.

Students are required to participate in at least one enriching activity, which may include a research experience, a cooperative education or internship experience, study abroad, completion of the Certificate in Technological Entrepreneurship, or other approved experiences. Chemical engineering students may gain depth of knowledge related to a career path through their selection of physical science, engineering, humanities, and social science electives. Several preapproved elective focus areas may help students define potential careers.

The B.S.E. in chemical engineering requires a minimum of 128 s.h. The curriculum covers four major stems: mathematics and basic sciences, engineering topics, elective focus area, and general education (15 s.h. of humanities and social science courses). All students take 059:005-059:006 Engineering Problem Solving I-II and 010:003 Accelerated Rhetoric. General education component courses must be selected to satisfy the requirements of the College of Engineering. See “Curriculum Stems” and “General Education Component” under “Bachelor of Science in Engineering” in the College of Engineering section of the Catalog.

Elective focus area courses must be selected according to guidelines established by the Department of Chemical and Biochemical Engineering. See “Elective Focus Area” after the following curriculum list.

Some courses in the curriculum are prerequisites to others. Students who take courses in the order below satisfy the prerequisite requirements automatically. Students who do not follow this sequence still must satisfy all course prerequisites.

052:092 Senior Enriching Activities Seminar 0 s.h.
052:186 Chemical Engineering Process Design 3 s.h.
Advanced chemical science electives 6 s.h.
Elective focus area course 3 s.h.
General education component course 3 s.h.

Elective Focus Area

The elective focus area enables students to gain depth of knowledge in a career path. Students meet with their chemical engineering academic advisor to discuss career options and develop a plan for choosing electives based on their career interests. The department offers preapproved elective focus areas in biochemical engineering, chemical process engineering, polymers, energy and environment, engineering and physical sciences, pre-medicine, business, and entrepreneurship.

Students may prefer to develop an individualized elective focus area, which is subject to approval by the department’s curriculum committee. See the Department of Chemical and Biochemical Engineering web site for detailed descriptions of preapproved elective focus areas, guidelines for tailored elective focus areas, and typical four-year study plans based on elective focus areas.

Graduate Programs

The Department of Chemical and Biochemical Engineering offers a Master of Science and a Doctor of Philosophy. Through course work and research, graduate students gain an understanding of the principles of engineering science and use those principles in contemporary applications related to energy, the environment, biotechnology, and materials. The department emphasizes research, since most opportunities for graduates are in research and development.

Research and Study Areas

Current research strengths of the Department of Chemical and Biochemical Engineering are in the areas of global and regional atmospheric modeling, biomaterials medical engineering, cellular engineering, photopolymerization, biocatalysis, and biofuels.

BIOCHEMICAL AND BIOLOGICAL SEPARATION PROCESSES

Research in this area is devoted to developing a better understanding and new techniques of separation, especially for biochemistry and fermentation. The department’s long-standing research strengths are fundamentals and applications of membrane-based separations. Membrane separation research in the department involves fundamentals of ultrafiltration and microfiltration, reversible and irreversible fouling of membranes by protein molecules, the role of transmembrane pressure pulsing in reducing concentration polarization, demulsification via crossflow microfiltration, application of supported emulsion liquid membranes for extractive fermentation and perfusion, membrane fabrication to produce photoresponsive gas separation devices, and enzymatic membrane reactors for resolution of racemic mixtures.

Another core separation research area is the crystallization of biological macromolecules. Using a variety of environmental parameters such
as pressure and temperature, researchers are evaluating the role of growth rate control on crystal quality. Other studies focus on improved crystallization screening protocols and crystal handling for subsequent structural determination via X-ray diffraction.

**BIOCHEMICAL ENGINEERING**

Biochemical engineering involves the industrial application of enzymes, microorganisms, cells, and tissues for production of chemicals, pharmaceuticals, and other materials of commercial value.

The department is working to solve problems with the use of insect cell culture for recombinant protein and viral insecticide production. Research is being conducted to improve the quality and quantity of recombinant proteins produced in large-scale bioreactors. In addition, a continuous viral insecticide production system is being developed for the large-scale production of these environmentally safe alternatives to chemical insecticides. The insect cell/baculovirus system is being used as a model system to investigate the role of oxidative stress in viral cytotoxicity.

CO2 accumulation, which commonly occurs in large-scale bioreactor systems, affects insect cell growth; the department’s researchers are investigating the related baculovirus infection process.

Because cells generally adapt to the cell culture environment, they acquire properties significantly different from those of the tissue from which they were isolated, thereby diminishing the applicability of using cell culture to study in vivo conditions such as cancer. Department researchers are exploring methods to retain in vivo properties in cell culture.

The department works to design technologies for the characterization and use of extremophiles, organisms that possess unusual abilities to survive in harsh chemical environments. In these studies, novel bioreactor systems that can withstand extremes of temperature, pressure, pH, and salinity are being developed. Extremophile strategies for survival also are being studied, with the aim of discovering unique enzymes for industrial application as well as evaluating molecular interactions that govern protein stability under extreme conditions.

In addition to the study of natural extremophiles, efforts to engineer stability in biocatalysts for industrial processing are under way. Novel solvent-tolerant enzymes and organisms for environmentally beneficial chemical reactions are being generated using molecular biology tools. Combinations of chemical and biological processing are being used to produce valued chemicals from renewable feedstocks. This work contributes to the interdisciplinary training of engineers and scientists to address the challenges of minimizing and cleaning up environmental pollution, while maximizing the economic benefits of chemical processing.

The integration of biotechnology with traditional chemical engineering has led to an interdisciplinary area involving other engineering departments and the Departments of Chemistry, Biological Sciences, Biochemistry, and Microbiology, and the College of Pharmacy. This focus includes involvement in the University’s Center for Biocatalysis and Bioprocessing, whose fermentation capabilities are highlighted by its 1,500-liter fermentor.

**BIOMEDICAL RESEARCH**

Chemical engineering-based biomedical and biomaterials research is an interdisciplinary effort with the Carver College of Medicine to investigate medical problems that may be solved through chemical and biochemical engineering practices. A current project with the Department of Ophthalmology involves development of biodegradable stent materials to alleviate a serious eye disease induced by a blood clot in the central retinal vein. Research with the Department of Otolaryngology—Head and Neck Surgery is exploring the development of photo-patterned surfaces for directed growth of cells, to improve cochlear implants for those who suffer hearing loss and deafness.

Students involved in animal research have access to the University’s Office of Animal Resources, which is adjacent to the University of Iowa Hospitals and Clinics.

**ENERGY AND ENVIRONMENT**

Environmental contamination is a major problem facing engineers today. The Department of Chemical and Biochemical Engineering has an active research program in the environmental areas of air pollution, biofuels, atmospheric chemistry, atmospheric CO2 fluxes, environmental change, bioremediation, and the design of new environmentally compatible technologies. Particular emphasis is placed on the chemistry and physics of local, regional, and global air-pollution problems. Research in support of this activity includes high-speed computing and detailed sensitivity analysis.

This work involves three centers and institutes on campus. The Center for Global and Regional
Environmental Research brings together University scientists and scholars from more than 20 disciplines, including chemistry, civil and environmental engineering, geography, geology, law, and medicine. The center's chief area of concern is environmental change. Chemical and biochemical engineering researchers interact with scientists at IIHR—Hydroscience & Engineering, a research institute focusing on applied fluid mechanics; their collaborations involve environmental fluid mechanics and air pollution field studies. The Nanoscience & Nanotechnology Institute at UI provides an interdisciplinary home for chemical and biochemical researchers working on the development, application, and environmental and health effects of nanomaterials.

**PHOTOPOLYMERIZATION**

Photopolymerizations are chain reactions in which a liquid monomer is converted to a solid, durable polymer in a process triggered by light of the appropriate wavelength. The use of light, rather than heat, to drive a polymerization reaction offers advantages in developing new processes or products.

Photopolymerizations provide both spatial control and temporal control of reactions, since light can be directed to locations of interest in the system and is easily shuttered on or off. Photopolymerizations also provide solvent-free formulations, which reduce the emissions of volatile organic pollutants, and they exhibit extremely rapid reaction rates. These advantages have led to tremendous growth in the application of photopolymerizations in the private sector, but much of this growth has occurred without a fundamental understanding of the underlying chemical processes.

The department’s research in this area focuses on comprehensive characterization of the kinetics, mechanisms, structure, and properties of photopolymerizations. Work includes the following types of studies: characterization of the photochemical processes by which polymerizations may be initiated; kinetic characterization of cationic photopolymerization; development of methods for photopolymerization of thick polymers and composites; development of photopolymerization systems based upon agricultural feedstocks; new methods for monitoring high-speed photopolymerization reactions; nanostructured materials through photopolymerization; biomedical devices formed by photopolymerization; and influence of order on photopolymerization reactions.

**Master of Science**

The Master of Science in chemical and biochemical engineering requires a minimum of 30 s.h. of graduate credit and is offered with or without thesis. All M.S. students must earn at least 24 s.h. in approved graduate-level course work; courses numbered below 100 may not be used to satisfy this requirement. Students who choose the thesis program earn 6 s.h. in 052:199 M.S. Thesis Research: Chemical and Biochemical Engineering. Nonthesis students earn 6 s.h. in additional approved course work and must complete and pass a final written exam on the basic core material.

M.S. students must have a graduate g.p.a. of at least 3.00 in order to graduate. Each student must pass a final M.S. examination.

There is no foreign language requirement.

Graduate students who receive assistantships, fellowships, or other financial support awarded with the understanding that they will pursue an advanced degree with thesis are not eligible to elect the nonthesis option.

Graduate students in the nonthesis program may petition for entry into the thesis program or the Ph.D. program by requesting a change of status through the Graduate College. The request is reviewed by the graduate admissions committee. If it is approved by the committee, it is forwarded to the chemical and biochemical engineering faculty for final approval. Students then are assigned to research advisors as though they were newly admitted graduate students. For a detailed description of program requirements, see the Department of Chemical and Biochemical Engineering web site.

**Doctor of Philosophy**

The Doctor of Philosophy in chemical and biochemical engineering requires a minimum of 72 s.h. of graduate credit. However, the degree is granted primarily on the basis of achievement rather than on the accumulation of semester hours. Candidates usually are expected to have completed three academic years in residence, or two years if they already hold a recognized master's degree. All candidates must complete a core course requirement, which consists of a course in transport phenomena, a course in reaction engineering, a course on proposal writing, and a thermodynamics course, as well as six additional courses (30 s.h.).

Ph.D. candidates are expected to maintain a g.p.a. of at least 3.25.
All doctoral students are required to satisfy a qualifying requirement and pass a comprehensive examination before they can become candidates for the degree. The Ph.D. comprehensive examination is the presentation and defense of the candidate’s Ph.D. research proposal. These examinations are arranged by members of the examining committee and may be repeated at the committee’s discretion. Comprehensive examination policies are published in the Manual of Rules and Regulations of the Graduate College (see the Graduate College in the Catalog). There is no foreign language requirement. A final examination, which is a defense of the thesis, completes the doctoral program. For a detailed description of program requirements, visit the Department of Chemical and Biochemical Engineering web site.

Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

Applicants should have a B.S. in chemical engineering, with satisfactory grades, from a recognized American college or university, and a g.p.a. of at least 2.80. Students who do not meet these requirements may be granted conditional admission, with the department chair’s approval. Graduates of foreign universities may be accepted, depending on evaluation of their records.

Applicants must submit their verbal and quantitative scores on the Graduate Record Examination (GRE) General Test with their applications.

Graduate courses in chemical and biochemical engineering are designed for students who have an undergraduate background in chemical engineering. Exceptional students from other areas also may apply for admission to the M.S. or the Ph.D. program in chemical and biochemical engineering. If admitted, they may be required to take specific undergraduate courses to prepare them for graduate course work.

Financial Support

A number of fellowships, assistanships, and scholarships are awarded on a competitive basis to graduate students who qualify.

Graduate students have the opportunity to receive interdisciplinary research training in several fellowship programs administered through the Center for Biocatalysis and Bioprocessing (CBB). The program provides research training in areas that combine basic and applied research. Each year the center offers fellowships to doctoral students in biotechnology. These are funded by grants from the National Institute of General Medical Sciences, National Institutes of Health (NIH), National Science Foundation (NSF), and the CBB with funding from the State of Iowa. Through these programs, chemical and biochemical engineering students interact with students and faculty members from biochemistry, biological sciences, chemistry, civil and environmental engineering, medicinal and natural products chemistry, and microbiology.

Facilities and Laboratories

Undergraduate Core

MATERIALS SCIENCE LABORATORY

The Materials Science Laboratory is equipped with optical microscopes and facilities for metallographic preparation. Mechanical tensile testing instruments, heat treatment and sintering furnaces, and hardness testing machines also are available. Teaching aids include metallography specimen kits and crystallography packages.

Required Undergraduate Laboratories

CHEMICAL ENGINEERING LABORATORY

The Chemical Engineering Laboratory provides instruction for undergraduate students. It is equipped for experimentation in transport phenomena, heat transfer, fluid flow, chemical engineering unit operations, and reaction kinetics and catalysis. The laboratory includes pilot plant equipment, such as a distillation column, wiped film evaporator, shell-and-tube heat exchanger, jacketed kettle, and agitated extractor. Other equipment includes a packed-bed catalytic reactor, concentric tube heat exchanger, reciprocating plate extractor, membrane gas separator, and a tangential flow filtration system. Analytical equipment includes gas chromatographs, UV/visible spectrophotometers, and high-performance liquid chromatography.

The laboratory is continuously updated to reflect advances at the forefront of chemical engineering technology. Additionally, a wide array of small equipment is available to support laboratory projects and demonstrations in chemical engineering courses and for use by students performing independent investigations.
CHEMICAL PROCESS SAFETY LABORATORY

The Chemical Process Safety Laboratory is an integral part of 052:187 Chemical Process Safety. It is equipped with two flash-point testers, a reactive system screening tool (RSST), a flammability limits tester, a Hartmann tube, a Van de Graaff generator, a high impedance electrometer, a field meter, a Faraday cage, and relief sizing software. This equipment is used in a series of experiments to demonstrate the principles of flammability, reactivity, explosions, relief valve sizing, and electrostatics relevant to industry.

PROCESS CONTROL LABORATORY

The Process Control Laboratory is a modern, computer-based instructional laboratory that is integral to the senior process control course. The laboratory consists of computer control of a shell-and-tube heat exchanger, a stirred-tank reactor, and a three-tank flow process. Additional laboratories include instruction in the use of analog controllers.

The Computer Control Laboratory offers an ensemble of learning experiences with the same equipment, to provide analogies and better insight into the control process. Topics include determination of the gain and time constants for single capacitance systems; determination of gain, time constant, and damping factor of second-order processes; determination of the open-loop and closed-loop response to step and ramp changes in input for single capacitance and multicapacitance processes; approximations of multicapacitance systems as first-order and second-order processes with dead-time through experimental evaluation; analysis of instrumentation characteristics and transfer functions; tuning and optimization of feedback control parameters (P, PI, and PID); system identification through frequency response methods; determination of system stability; and development of feed-forward control schemes.

Experimental arrangements in the laboratory are simple enough in design to be easily understood, yet complicated enough to help students appreciate system characteristics inherent in industrial processes (e.g., large time lags, error in parameter estimation).

GRADUATE FACILITIES AND LABORATORIES

The department offers a wide variety of facilities to support and develop research activities.

AIR POLLUTION COMPUTATIONAL, FIELD, AND LABORATORY STUDIES

The department maintains extensive facilities for computational, field, and laboratory studies of air pollution, carbon cycle gases, aerosols, and nanoparticles at the Center for Global and Regional Environmental Research (CGER). The center occupies 5,000 square feet of laboratory and office space on the fourth floor of the Iowa Advanced Technology Laboratories.

CGER houses one R2 ImmersaDesk Portable Large Scale Visualization System and is linked on campus to two more R2 ImmersaDesk units.

The center’s computer laboratory for environmental and spatial data analysis provides numerous Windows and UNIX workstations, sophisticated software packages, and workstations and a file server necessary to run intensive visualization programs. The network backbone is University supported with high-speed wireless throughout. A variety of digital environmental databases and an extensive library of documentation and related references are available. There are 4 Beowulf Linux clusters on site and Linux clusters of 4, 16, 18, and 20 nodes for large computations and data assimilation. CGER retains 15 TB of redundant storage and 50 TB of total storage; local storage space is scalable and expandable. A variety of software packages and programming languages are available for data analysis and display, including Arc/Info, Arcview, NCAR Graphics, Matlab, S-Plus, and Vis5d, as well as geographical information software. The ESRI software suite is part of a University-wide site license.

Laboratory and field equipment includes aerosol samplers, including scanning mobility particle sizers for aerosols from 3 nm to 1 micron with time resolution to 30 seconds; aerosol particle sizers for aerodynamic measurements of in situ particles with time resolution to 1 second; and varied condensation particle counters for measuring total particle counts. Several hygroscopic tandem differential mobility analyzers are used, as well as varied aerosol generation devices and unique aerosol inlets for RH and temperature modification and control. Cloud droplet number can be measured in the lab or in the field using a Droplet Measurement Technologies cloud condensation nuclei detector. Advanced computer control of instruments is available through Labview.

Selected instruments are field deployable in a custom air conditioned trailer. Through collaboration with the IIHR—Hydroscience & Engineering, access to micrometeorology sensors, 1-D and 2-D elastic and Raman LIDAR, and gas...
sensors is available, including multichannel ammonia monitors (Pranalytica Nitrolux 200).

**BIOCHEMICAL ENGINEERING**

Facilities in the Biochemical Engineering Laboratory include three-liter agitated bioreactors and a 6-liter airlift fully controlled bioreactor, gas and liquid chromatographs, UV-Vis spectrophotometers, centrifuges, carbon dioxide incubators, Class II-A safety cabinets, microscopes, Vi-Cell cell counter, rotary shaker, autoclave, 2-D gel electrophoresis equipment, and laboratory computers.

Through collaborative research agreements, graduate students also have access to specialized facilities for electron microscopy, protein structure, and recombinant DNA research; the Flow Cytometry Facility; the High Resolution Mass Spectrometry Facility; the Large-Scale Fermentation Facility; and the Tissue Culture/Hybridoma Core Facility.

**COMPUTER FACILITIES**

The departmental computer facilities contain a variety of graphics workstations, printers, and microcomputers. The department is supported by the college’s Computer Systems Support (CSS). CSS maintains a large network of high performance UNIX and Windows XP workstations along with extensive commercial and public domain software. The department also has access to the University’s central research facility in high-speed vector computation. This facility has SGI Power Challenger minisupercomputers and provides nodes for external links for access to supercomputers.

**CRYSTALLIZATION STUDIES**

Equipment for crystallization studies includes a dedicated Rigaku RU300 rotating anode generator and RAXIS-II area detector for conducting X-ray diffraction studies, an ALV dual static/dynamic laser light scattering goniometer, an ALV DRI differential refractometer, a high precision Bellingham & Stanely Abbe refractometer, three microscopic digital imaging systems, a CSC isothermal titration calorimeter, a CSC differential scanning calorimeter, a Perkin-Elmer Pyris cryogenic calorimeter, and typical protein chemistry tools (e.g., liquid chromatography, gel electrophoresis, centrifuges, and so forth).

**FUNDAMENTALS AND APPLICATIONS OF PHOTOPOLYMERIZATION**

The Photopolymerization Center was established to advance fundamental understanding of the kinetics and mechanisms of photopolymerizations. To this end, the center provides unique opportunities for collaborations by industrial and academic investigators to explore photopolymerization processes and develop novel applications based on photopolymerizations.

The center provides equipment and instrumentation for the characterization of photopolymerization systems on the molecular, microscopic, and macroscopic levels. Center researchers pursue understanding of fundamental photophysical and photochemical processes involved in the photoinitiation reaction; characterization of high-speed propagation and termination kinetics that lead to the polymer structure; and evaluation of material properties through the course of the photopolymerization reaction. Both radical and cationic photopolymerizations are studied with state-of-the-art experimental techniques to elucidate the complex chemical and physical mechanisms that control the initiation, propagation, and termination of the active centers.

**SEPARATION AND BIOSEPARATION PROCESSES**

Equipment available for purification of biological molecules and the study of separation processes includes an ultra speed centrifuge; a microfluidizer; a French pressure cell homogenizer; an Amicon DC 30 ultrafiltration system; a small-scale hollow fiber and spiral wound membrane pilot system; membrane permeability measurement apparatus; immobilized reactor-separators; and facilities for the fabrication of membranes. The laboratory is supported by additional gas and liquid chromatographs, several UV-Vis scanning spectrophotometers, computerized data acquisition systems, and other analytical equipment. The department also has pilot plant equipment for the study of filtration, distillation, extraction, and other equilibrium stage processes.

**Courses**

**General Topics**

**052:000 Cooperative Education Training Assignment:** Chemical Engineering 0 s.h.

Chemical engineering students participating in the Cooperative Education Program register for this course during work assignment periods; registration provides a record of participation in the program on the student’s permanent record. Prerequisites: admission to Cooperative Education Program and consent of co-op faculty advisor.

**052:029 First-Year Seminar** 1 s.h.

Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities, field trips). Prerequisite: first- or second-semester standing.
052:041 Process Calculations  3 s.h.
Solutions of industrial problems using material and energy balances; stoichiometric and nonstoichiometric chemical reactions, changes of state, solutions, mixing problems; computer applications. Prerequisite: 22M:031 or equivalent.

052:090 CBE Departmental Seminar  0 s.h.
Introduction to the profession; presentations, visits to laboratories, industries.

052:091 Professional Seminar: Chemical Engineering  0 s.h.
Professional aspects of chemical engineering presented through lectures and discussions by guest speakers, field trips, films, panel discussions. Prerequisites: 052:041 and sophomore standing.

052:092 Senior Enriching Activities Seminar  0 s.h.
Experiences to develop multidisciplinary team skills and increase understanding of the impact of engineering practice both locally and globally; written and oral discussion of student enrichment. Prerequisite: senior standing.

052:098 Individual Investigations: Chemical Engineering  0 s.h.
Individual projects for chemical engineering undergraduate students, as laboratory study, engineering design project, analysis and simulation of an engineering system, computer software development, research. Prerequisite: consent of faculty advisor.

052:103 Chemical Engineering Thermodynamics  3 s.h.
Applications of thermodynamic principles to chemical and physical processes; prediction of material properties; phase equilibria and chemical equilibrium applied to mixtures and reacting systems. Prerequisites: 052:041 and 059:009.

052:107 Sustainable Systems  3 s.h.
New and emerging concepts in sustainable systems design and assessment. Same as 053:107.

052:109 CEBC Colloquium  1 s.h.
Sustainable development issues addressed by guest speakers from chemical industries; process economics, environmental impact assessment.

052:117 Intermediate Thermodynamics  3 s.h.
Fundamental principles of thermodynamics as applied to phase equilibria; properties of fluids, first and second law, variable composition systems, behavior of real fluids, mathematical techniques for solution thermodynamics. Prerequisite: 052:103 or 058:040 or graduate standing. Same as O58:140.

052:118 Mathematical Methods in Engineering  3 s.h.
Same as O53:113, O58:113.

052:171 Thermodynamics/Transport Laboratory  3 s.h.

052:172 Chemical Reaction Engineering/ Separations Laboratory  2 s.h.
Experimental design, data collection techniques, report writing, oral presentations; laboratory investigations of chemical reaction engineering and separations; experiments with plug flow and batch reactors, CSTRs, distillation, extraction, evaporation. Prerequisites: 052:161 and 052:171. Corequisite: 052:105.

052:173 Senior Laboratory Experience  2 s.h.
Experimental design, emphasis on communication skills; open-ended independent laboratory projects consistent with elective focus area. Prerequisite: 052:172.

052:187 Chemical Process Safety  3 s.h.
Application of transport phenomena, thermodynamics, chemical kinetics to study of safety, health, loss prevention; government regulations, toxicology/industrial hygiene, relief sizing, runaway reactions, toxic release and dispersion models, source models, fires and explosions, risk assessment, hazard identification, case studies and accident investigation, incorporation of safety into design; laboratory experiments. Prerequisites: 052:151 and 052:161. Corequisite: 052:105.

052:192 Special Topics  1 s.h.
Research techniques for graduate students in chemical and biochemical engineering. Prerequisite: graduate standing or consent of instructor.

052:195 Contemporary Topics: Chemical and Biochemical Engineering  arr.
Research techniques for graduate students in chemical and biochemical engineering. Prerequisite: graduate standing or consent of instructor.

052:196 Photopolymerization Topics  1 s.h.
Seminars presented by faculty members, research assistants, students.

052:215 Introduction to Literature Review and Proposal Writing  3 s.h.
Tools for reviewing literature, skills for critical reading of publications, training in successful proposal writing; experience drafting a proposal that can be used as a starting point for the Ph.D. comprehensive.

052:224 Teaching College-Level Engineering and Science  1 s.h.
Critical examination of course content and teaching strategies; preparation of courses that address learning needs of diverse student populations; participation in weekly inclass workshops and symposia on the practice of unit design and delivery; participation in a teaching practicum experience, faculty sponsor for each student.

Biochemical Engineering

052:108 Introduction to Biochemical Engineering  3 s.h.
Biochemistry, cellular biology, recombinant DNA and hybridoma technologies; emphasis on engineering aspects of biotechnology, including enzyme kinetics, cell growth kinetics, transport phenomena in bioreactors, bioreactor design, bioseparations, formulation and sterilization of growth media, commercial applications of biotechnology. Prerequisite: 052:105.

052:181 Bioseparations  3 s.h.
Introduction to separation/purification techniques in biochemical engineering; filtration, centrifugation, chromatography, extraction, electrophoresis, crystallization, cell disruption for intracellular product recovery. Prerequisite: 052:161.

052:222 Advanced Biochemical Engineering  3 s.h.
Advanced concepts in the behavior of biological systems used in modern technologies (e.g., food processing, pharmaceutical production, environmental remediation, chemical synthesis); application of biochemical engineering principles to design, development, and analysis of processes that use biocatalysis. Prerequisite: 052:108.

052:223 Introduction to Biocatalysis  3 s.h.
Applications of biological catalysis in varied industries; potential of biological catalysis to address future challenges in science and engineering.

052:225 Biotechnology of Extremophiles  3 s.h.
Evolution and engineering of biocatalysis under extreme conditions; physiological, kinetic, and molecular behavior of systems that perform under extremes of temperature, pH, salinity, pressure, solvent concentrations.
052:226 Engineering Aspects of Animal Cell Culture  3 s.h.
Applications of animal cell culture (insect and mammalian) in biochemical engineering, with emphasis on recombinant protein synthesis; special considerations of animal cell cultures (e.g., sensitivity to hydrodynamic stress), scale-up of attachment-dependent and attachment-independent cell cultures, medium development, hybrid cell cultures, protein processing in animal cells. Prerequisite: 052:108.

052:227 Tissue Engineering  3 s.h.
Introduction to tissue engineering; scaffolds, fundamentals, principles. Same as 046:290, 051:175.

052:275 Perspectives in Biocatalysis  1-3 s.h.
Applied enzymology, protein design, structure-activity relationships, biosensor technology, microbial transformations, biodegradation of environmental pollutants. Repeatable. Prerequisite: graduate standing. Same as 004:275, 046:275, 053:275, 061:275, 099:275.

Environmental Engineering

052:231 Environmental Chemistry I  3 s.h.
Principles of general, physical, organic chemistry applied in water and air systems; emphasis on qualitative and quantitative understanding of chemical kinetics and equilibrium; acid-base reactions, complex formation, precipitation, dissolution, oxidation-reduction reactions, organic nomenclature. Prerequisite: 004:012. Same as 053:152.

052:235 Air Pollution Control Technology  3 s.h.
Sources, environmental and health impacts, regulations and modeling of air pollution; processes and alternative strategies for control; global climate considerations. Prerequisite: 053:050 or consent of instructor. Same as 053:159.

052:236 Atmospheric Chemistry and Physics  3 s.h.
Principal chemical and physical processes affecting atmospheric trace gas and pollutant cycles; emphasis on atmospheric photochemistry, aerosol science, major sources, removal processes. Prerequisite: 052:105. Same as 053:161.

052:237 Green Chemical Engineering  3 s.h.
Strategies for pollution prevention for chemical processes studied at the macroscale (industrial sector), the mesoscale (unit operations), and the microscale (molecular level); case studies. Prerequisite: 052:105. Corequisite: 052:187.

Reaction Engineering

052:105 Chemical Reaction Engineering  3 s.h.
Application of chemical reaction kinetics to design of chemical reactors: batch reactors, mixed flow reactors, plug flow reactors; reversible and irreversible single reactions; parallel, series, and mixed reactions; temperature and pressure effects on reactor design; heterogeneous catalysis; transport in porous catalysts. Prerequisite: 052:161.

052:211 Intermediate Chemical Reaction Kinetics  3 s.h.
Stoichiometry and equilibria of multiple reactions, kinetics of elementary and composite reactions, heterogeneous catalytic kinetics, transition-state theory, linear free-energy relations, reactor analysis, transport in porous catalysts. Prerequisite: 052:105.

Transport Phenomena

052:151 Engineering Flow and Heat Exchange  3 s.h.
Fundamentals of fluid flow and heat transfer; fluid rheology, boundary layer theory, potential flow, dimensional analysis, laminar and turbulent flow in pipes, flow through packed beds, fluidized beds, pumps, flow measurement, filtration, heat exchanger design, evaporator design, and conductive, convective, and radiative heat transfer. Prerequisite: 052:041.

052:161 Mass Transfer and Separations  3 s.h.
Mechanisms of diffusional and convective mass transfer; solution of industrial problems, including the design of distillation, extraction, absorption, leaching, humidification, adsorption, drying, and chromatography processes; mechanical separations. Prerequisites: 052:103 and 052:151.

052:217 Transport Phenomena I  3 s.h.
Unified treatment of momentum, mass, energy transport in chemical engineering problems; use of vector and tensor notations in expressing equations of continuity, motion, energy.

052:272 Diffusive Transport  3 s.h.
Diffusive transport of heat, mass, and momentum; phenomenological laws and analogies, analytical and numerical solution techniques, inverse heat conduction, multiphase and multicomponent systems. Prerequisite: 058:145 or consent of instructor. Same as 058:245.

Materials Science

052:140 Polymer Fundamentals  1 s.h.
Basic knowledge of polymers required as a foundation for other UI courses on polymers: basic polymer terminology, polymer groups, polymerization mechanisms, molecular weight determination. Five weeks. Same as 051:168.

052:141 Polymer Science and Technology  3 s.h.
Uses, properties of industrially important polymeric materials; polymer chemistry, polymer structure, characterization, polymer processing. Prerequisite: 004:122. Corequisite: 052:105.

Materials Science

Theory, operation, application of scanning electron microscopy and X-ray microanalysis for advanced students, staff, investigators who use these techniques in their research. Same as 012:156, 000:156.

052:241 Polymer Science and Technology  3 s.h.
Prerequisite: 004:122. Corequisite: 052:105.

052:242 Polymer Chemistry  3 s.h.
Monomer reactivity and polymerization reactions; step, radical, ionic, and ring-opening polymerizations. Prerequisite: 004:122.

Process Dynamics, Design, Analysis

052:185 Process Dynamics and Control in Design  3 s.h.
Theory and application of process dynamics to the design of chemical process control systems; mathematical models of unit operations, transfer functions, feedback and feed-forward control, stability, instrumentation, digital control systems; computer methods, including simulation and commercial software use; laboratory focus on process analysis and design. Prerequisite: 052:105.

052:186 Chemical Engineering Process Design  3 s.h.
Design of chemical process plants, including application of process calculations, thermodynamics, kinetics, process synthesis, energy efficiency in separations, heat-exchanger network synthesis, physical property estimation, safety, computer-aided design, unit operations theory, process control, economics, economic optimization. Prerequisites: 052:185 and 052:187.
Graduate Seminars, Advanced Topics, Research

052:191 Seminar in Chemical and Biochemical Engineering 1 s.h.
Presentation and discussion of recent advances and research in chemical and biochemical engineering by guest lecturers, faculty, and students. Prerequisite: graduate standing.

052:198 Individual Investigations: Chemical and Biochemical Engineering arr.
Individual projects for chemical and biochemical engineering graduate students; may include laboratory study, engineering design project, analysis and simulation of an engineering system, computer software development, research. Prerequisites: graduate standing and consent of supervising faculty advisor.

052:199 M.S. Thesis Research: Chemical and Biochemical Engineering arr.
Experimental and/or analytical investigation of an approved topic for partial fulfillment of requirements for M.S. with thesis in chemical and biochemical engineering. Prerequisites: graduate standing and consent of faculty advisor.

052:299 Research: Chemical and Biochemical Engineering Ph.D. Dissertation arr.
Experimental and/or analytical investigation of an approved topic for Ph.D. in chemical and biochemical engineering. Prerequisite: consent of advisor.
Civil and Environmental Engineering

Chair: Robert Ettema
Professors emeriti: Dan E. Branson, Forrest M. Holly Jr., Subhash C. Jain, Harrison Kane, Wayne L. Paulson
Adjunct professors: Konstantine P. Georgakakos, Tatsuaki Nakato
Adjunct associate professors: Louis A. Licht, Marian Muste, John Nestler
Assistant professors: George Constantinescu, Paul Hanley, Walter Illman, Tim Mattes
Adjunct assistant professors: Craig Just, Ken Lloyd, Doug Schnoebelien
Adjunct lecturer: Don Guckert
Undergraduate Program

Civil and Environmental Engineering is one of the three largest fields of engineering. It traditionally has been concerned with infrastructure facilities that are both large in scale and essential to modern life. Civil and environmental engineering projects include transportation systems and their components, such as bridges, highways, public transit systems, railways, harbors, airports, seaports, and even spaceports; large-scale structures and office buildings that provide enclosed working and living space; environmental and hydraulic systems that provide clean water and air, including filtration plants and distribution systems for municipal and industrial water supplies, wastewater treatment plants, dams, levees, and irrigation systems.

Growth areas of civil and environmental engineering include infrastructure development, construction management, computer-aided design, hazardous waste management, and engineered environmental systems. In the future, civil and environmental engineers will be called upon to design structures for earth and outer space, prevent erosion and sedimentation of our rivers, predict effects of global climate change on the environment, provide modern and efficient transportation systems, and ensure the quality of our air and our surface waters and groundwaters.

In planning and design, civil and environmental engineers work with other engineers, architects, landscape architects, planners, economists, financiers, sociologists, lawyers, and other specialists as members of the design team. Some civil engineers work in engineering offices; others may be called upon to construct or supervise outdoor projects they have designed. These field assignments, many of which are in remote and fascinating parts of the world, are particularly appealing to many civil and environmental engineers. There also is significant potential for entrepreneurial work by civil and environmental engineers as they start their own companies.

Undergraduate Program

The department offers the Bachelor of Science in Engineering in civil engineering. The program’s objective is to provide a well-rounded, superior engineering education that:

- provides students with appropriate proficiency in the civil engineering subdisciplines of structures and materials, water-resources engineering, transportation systems, and environmental engineering;
- ensures that students are knowledgeable about the importance, procedures, and benefits of professional licensure and continuing education;
- offers design experiences that include projects in the curriculum that are offered by and guided in part by the professional community; and
- provides research opportunities to undergraduate students through the department’s connections with on-campus research entities including IIHR—Hydroscience and Engineering, the Center for Global and Regional Environmental Research, the Public Policy Center, the Center for Computer Aided Design, the Center for Biocatalysis and Bioprocessing, and the Center for Health Effects of Environmental Contamination.
Bachelor of Science in Engineering

The B.S.E. in civil engineering requires a minimum of 128 s.h. The curriculum covers four major stems: mathematics and basic sciences, engineering topics, elective focus area, and general education (15 s.h. of humanities and social science courses). All students take 059:005-059:006 Engineering Problem Solving I-II and 010:003 Accelerated Rhetoric. General education component courses must be selected to satisfy the requirements of the College of Engineering. See “Curriculum Stems” and “General Education Component” under “Bachelor of Science in Engineering” in the College of Engineering section of the Catalog.

Elective focus area courses must be selected according to guidelines established by the Department of Civil and Environmental Engineering. See “Elective Focus Area” after the following curriculum list.

Students choose one of two subtracks: civil, which provides breadth in the discipline, or environmental, which provides a concentration. Subtrack requirements are the same for the first semester of the first year but are different beginning with the second semester.

Some courses in the curriculum are prerequisites to others. Students who take courses in the order below satisfy the prerequisite requirements automatically. Students who do not follow this sequence still must satisfy all course prerequisites.

**FIRST YEAR**

**First Semester**

- 004:011 Principles of Chemistry I 4 s.h.
- 010:003 Accelerated Rhetoric 4 s.h.
- 059:005 Engineering Problem Solving I 3 s.h.
- 059:090 First-Year Engineering Seminar 1 s.h.

**Civil Subtrack**

**SECOND YEAR**

**First Semester**

- 029:082 Introductory Physics II 3-4 s.h.
- 053:015 Civil and Environmental Engineering Practice 2 s.h.
- 059:007 Engineering Fundamentals I: Statics 2 s.h.
- 059:008 Engineering Fundamentals II: Electrical Circuits 3 s.h.
- 059:009 Engineering Fundamentals III: Thermodynamics 3 s.h.

**Second Semester**

- 22S:039 Probability and Statistics for the Engineering and Physical Sciences 3 s.h.
- 053:020 CEE Sophomore Seminar 0 s.h.
- 053:050 Natural Environmental Systems 3 s.h.
- 053:105 Engineering Geology 3 s.h.
- 057:010 Dynamics 3 s.h.
- 057:019 Mechanics of Deformable Bodies 3 s.h.

**THIRD YEAR**

**First Semester**

- 053:030 Soil Mechanics 3 s.h.
- 053:033 Principles of Structural Engineering 3 s.h.
- 053:063 Principles of Transportation Engineering 3 s.h.
- 053:091 Professional Seminar: Civil Engineering 0 s.h.
- 057:020 Fluid Mechanics 4 s.h.
- Elective focus area course 3 s.h.

**Second Semester**

- 053:055 Principles of Environmental Engineering 4 s.h.
- 053:071 Principles of Hydraulics and Hydrology 3 s.h.
- 053:086 Civil Engineering Materials 3 s.h.
- 053:091 Professional Seminar: Civil Engineering 0 s.h.
- Elective focus area course 3 s.h.
- General Education component course 3 s.h.

**FOURTH YEAR**

**First Semester**

- 053:091 Professional Seminar: Civil Engineering 0 s.h.
- General education component course 3 s.h.
- Two elective focus area courses 6 s.h.
Two of these:
053:034 Structural Design I 3 s.h.
053:157 Environmental Engineering Design 3 s.h.
053:174 Water Resource Design 3 s.h.

Second Semester
053:084 Project Design and Management in Civil Engineering 3 s.h.
053:091 Professional Seminar: Civil Engineering 0 s.h.
General education component course 3 s.h.
Three elective focus area courses 9 s.h.

Environmental Subtrack
FIRST YEAR

Second Semester
004:012 Principles of Chemistry II 4 s.h.
22M:032 Engineering Mathematics II: Multivariable Calculus 4 s.h.
22M:033 Engineering Mathematics III: Matrix Algebra 2 s.h.
029:081 Introductory Physics I 4 s.h.
059:006 Engineering Problem Solving II 3 s.h.

SECOND YEAR
First Semester
22M:034 Engineering Mathematics IV: Differential Equations 3 s.h.
053:015 Civil and Environmental Engineering Practice 2 s.h.
059:007 Engineering Fundamentals I: Statics 2 s.h.
059:008 Engineering Fundamentals II: Electrical Circuits 3 s.h.
059:009 Engineering Fundamentals III: Thermodynamics 3 s.h.
General education component course 3 s.h.

Second Semester
22S:039 Probability and Statistics for the Engineering and Physical Sciences 3 s.h.
053:020 CEE Sophomore Seminar 0 s.h.
053:105 Engineering Geology 3 s.h.
053:050 Natural Environmental Systems 3 s.h.
057:010 Dynamics 3 s.h.
057:019 Mechanics of Deformable Bodies 3 s.h.
General education component course 3 s.h.

THIRD YEAR
First Semester
053:030 Soil Mechanics 3 s.h.
053:033 Principles of Structural Engineering 3 s.h.

053:063 Principles of Transportation Engineering 3 s.h.
053:091 Professional Seminar: Civil Engineering 0 s.h.
053:152 Environmental Chemistry 3 s.h.
057:020 Fluid Mechanics 4 s.h.

Second Semester
053:055 Principles of Environmental Engineering 4 s.h.
053:071 Principles of Hydraulics and Hydrology 3 s.h.
053:086 Civil Engineering Materials 3 s.h.
053:091 Professional Seminar: Civil Engineering 0 s.h.
Elective focus area course 3 s.h.
General education component course 3 s.h.

FOURTH YEAR
First Semester
053:091 Professional Seminar: Civil Engineering 0 s.h.
General education component course 3 s.h.
Two elective focus area courses 6 s.h.
Two of these:
053:034 Structural Design I 3 s.h.
053:157 Environmental Engineering Design 3 s.h.
053:174 Water Resource Design 3 s.h.

Second Semester
053:084 Project Design and Management in Civil Engineering 3 s.h.
053:091 Professional Seminar: Civil Engineering 0 s.h.
General education component course 3 s.h.
Three elective focus area courses 9 s.h.

Elective Focus Area
Civil engineering students may choose from several standard elective focus areas developed by the department, a focus area offered jointly with another engineering department, or an individual focus area tailored to the student’s interests.

Standard elective focus areas are offered in environmental engineering; hydraulics and water resources; structures, mechanics, and materials; transportation; urban and regional planning; and in the broad field of civil engineering. Elective focus areas offered jointly with other engineering departments cut across programs (e.g., computer-aided engineering, design and optimization, environmental processes).
Civil engineering students must take one general education component course related to their elective focus area.

For more detailed information about elective focus areas, see “Bachelor of Science in Engineering”/“Elective Focus Area” in the College of Engineering section of the Catalog. For a list of standard elective focus area options and guidelines for tailored elective focus areas in civil engineering, see the Department of Civil and Environmental Engineering web site.

**Combined B.S.E./M.S.**

Students who wish to complete a Bachelor of Science in Engineering and a Master of Science in civil and environmental engineering at The University of Iowa can apply to the fast-track B.S.E./M.S. program. Fast-track students receive a B.S.E. in civil engineering once they have completed all of the B.S.E. requirements, and they continue work toward the M.S.

Admission is based on the student’s academic record. Applicants must have completed at least 80 s.h. (typically by the end of the fifth semester of undergraduate study) and have a cumulative g.p.a. of at least 3.25. They must submit a completed fast-track program application form and a letter stating their proposed area of specialization and the name of a department faculty member willing to be their primary M.S. advisor. They also must identify a faculty sponsor who can guide them from at least the second semester of their senior year until they complete the M.S.

Applications are due by March 1.

**Graduate Programs**

The Department of Civil and Environmental Engineering offers a Master of Science and a Doctor of Philosophy. Both programs prepare students for professional careers and further study. The principal concentration areas are environmental engineering and science; global and regional environmental research; hydraulics, hydrology, and water resources; structures, mechanics, and materials; and transportation and infrastructure systems.

The department also cooperates in an interdisciplinary doctoral program with the Program in Applied Mathematical and Computational Sciences; see Applied Mathematical and Computational Sciences (Graduate College) in the Catalog.

**Research and Study Areas**

**ENVIRONMENTAL ENGINEERING AND SCIENCE**

The environmental engineering and science curriculum provides a comprehensive base of course work and research in the areas of air- and water-quality management, environmental chemistry and microbiology, natural systems modelling, and processes for water supply, pollution control, and solid and hazardous waste management. Interdisciplinary specialization and study are conducted with programs including IIHR—Hydroscience & Engineering, the Center for Global and Regional Environmental Research, the Center for Health Effects of Environmental Contamination, the Hazardous Substances Research Center, the Center for Biocatalysis and Bioprocessing, the Departments of Chemical and Biochemical Engineering, Geography, Geoscience, Microbiology, Occupational and Environmental Health; and the Urban and Regional Planning Program. New areas of interdisciplinary focus include groundwater contamination, biotechnology, global climate change, and hazardous substances.

**GLOBAL AND REGIONAL ENVIRONMENTAL RESEARCH**

The department has an active interdisciplinary research program in the environmental areas of air pollution, water pollution, groundwater remediation, global atmospheric change, and hazardous waste management. Particular emphasis is placed on the microbiology, chemistry, and physics of local, regional, and global air, soil, and water quality problems. Research includes sophisticated environmental quality analysis, high-speed computing, and detailed sensitivity analysis. The Department of Chemical and Biochemical Engineering and the Center for Global and Regional Environmental Research also collaborate in these endeavors.

**HYDRAULICS, HYDROLOGY, AND WATER RESOURCES**

The hydraulics, hydrology, and water resources curriculum is associated with IIHR—Hydroscience & Engineering, a world-renowned research institute. Senior staff members of the institute are professors in the program; they devote about half of their time to teaching.

IIHR offers unique opportunities for students to participate actively in the research, analysis, and design aspects of real-world problems. Considerable attention is given to the use of computers in mathematical modeling and in data acquisition and processing. IIHR high-speed
computer facilities and advanced graphics and communication software complement the hydrology, hydraulics, and water resources curriculum.

**STRUCTURES, MECHANICS, AND MATERIALS**

The structures, mechanics, and materials curriculum is designed for students who wish to gain knowledge and skill in the mechanics of solids and structures that they can apply to civil infrastructure systems and other fields. The program concentrates on developing appropriate methodologies for tackling broad, complex issues related to civil infrastructure systems, and on educating engineers in the implementation and application of methodologies to actual engineering projects. Faculty members have expertise in structural engineering, design optimization, solid mechanics, and computational methods.

**TRANSPORTATION AND INFRASTRUCTURE SYSTEMS**

The transportation and infrastructure systems curriculum aims at graduating students interested in developing specialized knowledge and skills applicable to diverse set of issues associated with transportation. Faculty members have expertise in traffic engineering, infrastructure management systems, pavement engineering, advanced construction materials, dynamic load and pavement simulation, optimal design, winter highway maintenance, real-time simulation, human factors, intelligent sensors, nondestructive testing, transportation planning, and travel demand modeling.

**Master of Science**

The Master of Science in civil and environmental engineering requires a minimum of 30 s.h. of graduate credit and is offered with or without thesis. The program is designed to permit further concentration in the area or areas of the student's choice. Graduates are placed in advanced technical positions in industry, consulting firms, or government, or they may continue their graduate study. Current and projected demand for M.S. graduates is excellent.

Students who choose the thesis program earn up to 6 s.h. for the thesis. Nonthesis students in the environmental engineering and science curriculum earn an additional 3 s.h.

With the approval of their advisor, students develop a study plan that satisfies the requirements of their chosen curriculum. All M.S. students must have a g.p.a. of at least 3.00, pass an oral examination, and in some program options, a written examination.

**Doctor of Philosophy**

The Doctor of Philosophy in civil and environmental engineering requires a minimum of 72 s.h. of graduate credit; the semester-hour requirements for some curriculum areas are higher. The doctoral degree is granted primarily on the basis of achievement rather than on a prescribed course of study. Students usually need at least three years of full-time graduate study to complete the degree. One year is devoted to the preparation of a dissertation that contributes to knowledge in the field. In some specialty areas, a qualifying examination may be required.

All doctoral students are required to pass a written and oral comprehensive examination before being formally admitted to candidacy for the degree. This examination usually is taken after all required course work has been completed.

The program culminates in a final examination, in which candidates must successfully defend their dissertation.

Ph.D. students must maintain a g.p.a. of at least 3.00 throughout the program.

**Admission**

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

Each of the program's curricula is flexible; students may be admitted from all disciplines of engineering as well as from the mathematical and basic sciences.

Applicants to the M.S. program should have a cumulative undergraduate g.p.a. of at least 3.00. Ph.D. applicants should have a graduate g.p.a. of at least 3.00. Applicants whose grade-point average is slightly lower should contact the department.

Applicants should have a combined verbal and quantitative score of at least 1100 on the Graduate Record Examination (GRE) General Test. Lower scores are considered with other evidence of academic promise (recommendation letters, grade-point average). GRE General Test scores also are used in financial aid decisions.
Financial Support
A significant number of research assistantships are available on a variety of research projects, as are a limited number of teaching assistantships. Selection of recipients usually is based on scholastic achievement and research interest.

Facilities and Laboratories

Undergraduate Core
The first-year engineering course 059:005 Engineering Problem Solving I includes an introduction to the college's Computer Systems Support (CSS). Students in the course use computer-aided design tools on engineering work stations. All civil engineering courses require knowledge of personal computers and contain significant computer content.

For information about laboratories affiliated with core courses coordinated by other engineering departments, see the Catalog section for each of the departments.

Required and Elective Undergraduate Laboratories

053:015 Civil Engineering Practice (2 s.h.), 053:063 Principles of Transportation Engineering (3 s.h.), 053:084 Project Design and Management (3 s.h.): use of a state-of-the-art laboratory for computer-aided design and drawing.

053:030 Soil Mechanics (3 s.h.): equipped for determining the classification, seepage characteristics, stress-strain properties, and strength of soils.

053:050 Natural Environmental Systems (3 s.h.): environmental chemistry and biology of air, water, and soil quality, air and water pollution, limnology, global atmospheric change, fate and transport of pollutants; hazardous substances, risk analysis, standard setting.

053:055 Principles of Environmental Engineering (4 s.h.): conducted at the University Water Treatment Plant and Iowa City Wastewater Plant for demonstrations of unit operations and processes of water and wastewater treatment, and applications in environmental chemistry and microbiology.

053:071 Principles of Hydraulics and Hydrology (3 s.h.): hydraulics of pressure conduits and open channels, dimensional analysis, flow measurements, hydraulic machinery, with laboratory.

053:153 Environmental Chemistry Laboratory (3 s.h.): experiments to demonstrate fundamental principles of aquatic chemistry and chemical analyses for characterization of water and wastewater quality, conducted in the Environmental Engineering Laboratories.

053:154 Environmental Microbiology (3 s.h.): typical microorganisms isolated and their physiology and metabolic characteristics studied in the Environmental Engineering Laboratories.

053:156 and 053:151 Physical/Chemical and Biological Treatment Processes course laboratory (both 3 s.h.): unit operations, processes studied in bench scale experiments; use of typical process analytical parameters; experiments conducted in the Environmental Engineering Laboratories, University Water Plant, and Iowa City Wastewater Treatment Plant.

Graduate Laboratories

ENVIRONMENTAL ENGINEERING AND SCIENCE LABORATORIES
The Environmental Engineering and Science Laboratories provide state-of-the-art facilities, equipment, and expertise to support both undergraduate and graduate-level instruction and research. The laboratories support research in contaminant fate and transport in various media (air, water, soil, plants, and microbes), drinking water disinfection and distribution, wastewater treatment, geochemical-contaminant interactions, bioremediation, and phytoremediation. They also provide resources for analytical chemistry, electrochemistry, molecular biology, microscopy, computer modeling, and simulated environments on the bench- and pilot-scale levels.

The Environmental Engineering and Science Laboratories are affiliated with the University’s Center for Health Effects of Environmental Contamination and its Center for Global and Regional Environmental Research, and with the UI Environmental Health Sciences Research Center, an affiliate of the National Institute of Environmental Health Sciences (NIEHS).

HYDRAULICS, HYDROLOGY, AND WATER RESOURCES LABORATORIES
The teaching and research functions of the department are closely connected to the research activities of IIHR—Hydroscience & Engineering. The institute houses some of the most modern
Research facilities in the world, including a 330-foot towing tank, several hydraulic flumes and wind tunnels, an array of field instrumentation for hydrologic experiments, extensive laboratory space for hydraulic modeling, a special low-temperature flow facility for investigation of ice phenomena, state-of-the-art instrumentation for flow measurement and visualization, and comprehensive computational facilities.

Research related to ecohydraulics and the environment takes place at the Lucille A. Carver Mississippi Riverside Environmental Research Station. Located on the Mississippi River near Muscatine, Iowa, the station provides engineers and biological scientists with an ideal facility in which to examine the multifaceted ecohydraulic processes of the upper Mississippi. The 500-square-foot facility is equipped with water-quality laboratories and a seminar room and is operated by IIHR—Hydroscience & Engineering.

STRUCTURES, MECHANICS, AND MATERIALS LABORATORIES

Facilities for computations, materials testing, geotechnical experiments, and small-scale structural testing are available for research and teaching. Faculty, staff, and students in structures, mechanics, and materials (SMM) have access to the computing resources of both Engineering Computer Systems Support and the Center for Computer-Aided Design (CCAD). Both centers continuously update their computing facilities to maintain pace with the rapidly changing field.

A wide range of experimental facilities is available for testing structural materials such as Portland cement concrete, asphalt, metals, timber, and composites. These facilities include several loading frames (purely uniaxial, purely torsional, and axial-torsional) that are available with computer-based control and data collection systems. Facilities for creep testing, triaxial soil testing, and high-cycle fatigue testing are also available. The laboratories have a variety of ovens and other facilities for preparation and treatment of test specimens.

Four well-equipped physical testing laboratories are dedicated to SMM teaching and research: the Civil Materials Laboratory, Soil Mechanics Laboratory, Plasticity Laboratory, and the Asphalt Laboratory. The Civil Materials Laboratory currently has a small-scale single-degree-of-freedom shaker table. Faculty, staff, and students have access to a small-scale six-degree-of-freedom shaker table through CCAD and a 12-camera Vicon motion-capture system.

TRANSPORTATION INFRASTRUCTURE SYSTEMS LABORATORY

The department’s Asphalt Laboratory is equipped with a set of SuperPave testing equipment and new Interlaken Simple Performance Testing Equipment, which measures dynamic modulus and dynamic creep of asphalt mixtures. The laboratory’s Wirtgen asphalt foaming equipment can be used for mix design of cold in-place recycled asphalt using foamed asphalt; equipment for Marshall mix design, indirect tensile strength test, and volumetric analysis of asphalt mixtures is also available. The laboratory is one of the department’s group of laboratories for materials testing the strength behavior of other materials.

Courses

Special Topics

053:000 Cooperative Education Training Assignment: Civil Engineering 0 s.h.
Civil engineering students participating in the Cooperative Education Program register in this course during work assignment periods; registration provides a record of participation in the program on the student’s permanent record card. Prerequisites: admission to the Cooperative Education Program and consent of faculty advisor.

053:010 CEE First-Year Seminar 0 s.h.
Introduction to civil and environmental engineering curriculum and profession; presentations by senior undergraduate students, graduate students, faculty; laboratory visits. Prerequisite: first-year standing.

053:015 Civil and Environmental Engineering Practice 2 s.h.
Concepts of the built environment and the natural environment; infrastructure life cycle; engineering communication (plans, engineering drawings and information systems, computer-aided drafting); field trip to major city. Prerequisite: sophomore standing in civil engineering.

053:020 CEE Sophomore Seminar 0 s.h.
Introduction to civil and environmental engineering curriculum and profession; presentations by senior undergraduate students, graduate students, faculty; laboratory visits. Prerequisite: sophomore standing.

053:083 Surveying and Remote Sensing 3 s.h.
Engineering surveying measurements, methods, computations. Prerequisite: 059:005.

053:084 Project Design and Management in Civil Engineering 3 s.h.
Design of civil engineering systems, individual and team design projects oriented toward the solution of local problems, project management, construction management, contracts, budgeting, bidding. Prerequisites: 053:033, 053:050, 053:063, 053:071, and senior standing.

053:091 Professional Seminar: Civil Engineering 0 s.h.
Professional aspects of civil engineering presented through lectures and discussions by guest speakers, field trips, films, panel discussions. Prerequisite: junior standing.
053:098 Individual Investigations: Civil Engineering arr.
Individual projects for civil engineering undergraduate students: laboratory study, engineering design project, analysis and simulation of an engineering system, computer software development, research. Prerequisite: consent of faculty advisor.

053:101 International Business and Infrastructure 3 s.h.
Differences between international and domestic businesses; how differences in infrastructure in the international environment influence business operations; effects of infrastructure on international commerce and business practices; case studies, site visits.

053:107 Sustainable Systems 3 s.h.
New and emerging concepts in sustainable systems design and assessment. Same as 052:107.

053:111 Numerical Calculations 3 s.h.
Development of algorithms for functional approximations, numerical differentiation, integration; solution of algebraic and differential equations, with emphasis on digital computations; initial and boundary value problems. Prerequisite: 22M:034. Same as 058:111.

053:112 Engineering Design Optimization 3 s.h.
Engineering design projects involving modeling, formulation, and analysis using optimization concepts and principles; linear and nonlinear models, optimality conditions, numerical methods. Prerequisites: 22M:033, 059:007, and junior standing. Same as 058:112.

053:113 Mathematical Methods in Engineering 3 s.h.

053:115 Computer-Aided Engineering 3 s.h.
Fundamentals of computer graphics, visualization of engineering design and analysis data, solid modeling, window-based user interface development; applications of these techniques to engineering problems. Prerequisite: working knowledge of FORTRAN or Pascal. Same as 058:110.

053:126 International Perspectives: Xicotepec 2 s.h.
Same as 046:126.

053:168 Civil Infrastructure 3 s.h.
Analytical methods for developing Infrastructure Management Systems (IMS); evaluation of infrastructure condition, performance modeling, rehabilitation optimization, development of the IMS; basic concepts of information technology applied in solving civil infrastructure management problems. Prerequisite: 053:015.

053:182 Statistics for Engineers 3 s.h.
Application of statistical techniques for evaluation and optimization of engineering designs; use of spreadsheets, statistical software; design and analysis of experiments; regression analysis; system optimization; modeling deterministic and stochastic systems. Prerequisite: 22S:039 or equivalent.

053:210 Developing Professional Service Business 2-3 s.h.
Exposes broad range of engineering, medical, and business students to the unique challenges of creating a specialized business; how professional skills and functional knowledge can be combined in a customer-oriented enterprise. Prerequisite: open only to M.B.A., engineering, or health science enrollment or consent of instructor. Same as 06T:210.

053:214 Analytical Methods in Mechanical Systems 3 s.h.
Functional analysis applied in mechanics and dynamics; calculus of variations; variational methods, such as Ritz and Galerkin methods; ordinary differential equations; boundary and initial value problems; stability theorem; perturbation of linear systems. Prerequisite: 053:113. Same as 058:214.

**Structures, Mechanics, and Transportation**

053:030 Soil Mechanics 3 s.h.
Identification and classification of earth materials; hydraulic and mechanical properties of soils; soil improvement; laboratory testing. Prerequisite: 057:019.

053:033 Principles of Structural Engineering 3 s.h.
Fundamental principles of structural analysis applied to statically determine and indeterminate structures, continuous beams, trusses, and frames; external and internal equilibrium; compatibility of deformation, influence lines, virtual work; parallel use of classical and matrix formulation; slope deflection, flexibility and stiffness methods; use of computers. Prerequisite: 057:019.

053:034 Structural Design I 3 s.h.
Fundamental analysis and design of reinforced concrete members and structures, flexure, shear, bond, continuity, beams, one-way slab system; columns. Prerequisite: 053:033.

053:063 Principles of Transportation Engineering 3 s.h.
History of transportation modes, new transport technologies, traffic operations and control, economic evaluation of transport alternatives, transportation planning, roadway design and construction, route location, preventive maintenance strategies. Prerequisite: 22S:039.

053:086 Civil Engineering Materials 3 s.h.

053:130 Construction Materials 3 s.h.
Structure, strength and failure, durability, deformation, practice, and processing for primary construction materials systems including steel, aluminum, concrete, asphalt, fiber-reinforced composites, masonry, timber. Prerequisites: 053:030, 057:015, and 057:019.

053:132 Fundamentals of Vibrations 3 s.h.
Fundamental aspects of the vibration of linear discrete and continuous mechanical and structural systems; harmonic, periodic, arbitrary excitation; modal analysis; applications. Prerequisite: 057:019. Same as 058:153.

053:133 Finite Element I 3 s.h.
One- and two-dimensional boundary value problems; heat flow, fluid flow, tension of bars; trusses and frames; isoparametric mapping; higher order elements; elasticity problems; use of commercial software. Prerequisite: 057:019. Same as 058:115.

053:134 Structural Design II 3 s.h.
Concepts and procedures in steel design; LRFD (load and resistance factor design) methodology for beams/columns; analysis and design of indeterminate structures. Prerequisite: 053:033.

053:138 Prestressed Concrete Structures 3 s.h.
Initial and time-dependent deformation of concrete structures; analysis and design of statically determinate and indeterminate prestressed concrete structures; flexure, shear, tension, deflections; beams, slabs, composite members, columns, tension members, buildings, bridges, tanks, shells; use of computers. Prerequisite: 053:034.

053:139 Foundations of Structures 3 s.h.
Application of soil mechanics to analysis of structural foundations; slope stability analysis; bearing capacity and settlement of shallow and deep foundations; retaining structures, braced cuts, reinforced earth structures; usage of computational models; subsurface exploration methods. Prerequisite: 053:030.
053:140 Intermediate Mechanics of Deformable Bodies 3 s.h.
Application of equilibrium analyses, strain-displacement relations and constitutive relationships to practical structural systems and elementary plane elasticity problems. Prerequisite: 057:019. Same as 051:151, 058:150.

053:148 Fatigue/Durability in Design 3 s.h.
Macro- and micromechanisms of fatigue, behavior, design of engineering materials/components/structures subjected to cyclic loading, with emphasis on metals; stress-life, strain-life, linear elastic fracture mechanics approach to fatigue crack growth; safe-life, fail-safe, damage tolerant design; constant, variable amplitude life predictions; notches, residual stress, corrosion, temperature, multiaxial, weldments. Prerequisite: 051:085 or 058:055 or 058:150 or equivalent. Same as 058:158.

053:149 Fracture Mechanics 3 s.h.
Definition and criteria for failure, yield phenomena, linear elastic fracture mechanics, plane stress and plane strain fracture toughness, J-integral, COD, fatigue, safe-life, fail-safe, damage tolerant design, corrosion, creep-repair design. Prerequisite: 051:085 or 058:055 or 058:150 or equivalent. Same as 058:159.

053:162 Design of Transportation Systems 3 s.h.
Application of CAD/CAE tools to transportation systems design; review of CAD tools, derivation of standards for geometric design, roadway design software, cross-sectional and longitudinal geometric design of highways, applications to visualization and animation. Prerequisite: 053:063 or graduate standing.

053:163 Traffic Engineering 3 s.h.
Design of traffic control devices; evaluation and analysis of intersections and transportation networks using appropriate computer software.

053:164 Winter Highway Maintenance 3 s.h.
Aspects of winter highway maintenance; current and innovative practices and the theory that underpins them.

053:165 Pavement Analysis and Design 3 s.h.
Fundamental design principles, including pavement analysis and characterization and testing of asphalt and concrete pavement materials. Prerequisite: 053:063.

053:166 Infrastructure Management System 3 s.h.
Aspects of infrastructure management system development; data collection, analysis methodology, graphic outputs. Prerequisite: 053:063.

053:194 Graduate Seminar: Transportation 0 s.h.
Recent advances and research in transportation engineering. Prerequisite: senior or graduate standing.

053:233 Finite Element II 3 s.h.
Computer implementation; plate and shell elements; mixed and hybrid formulations; nonlinear analysis; recent development; introduction to boundary element method. Prerequisite: 053:133. Same as 058:215.

053:235 Applied Optimal Design 3 s.h.
Optimal design problem formulation; optimality conditions; linear, quadractic, convex, and nonlinear programming; Lagrangian duality; numerical algorithms for unconstrained and constrained design problems, design sensitivity analysis, engineering applications. Prerequisites: 053:113 or equivalent, and senior standing.

053:236 Optimization of Structural Systems 3 s.h.
Advanced topics; optimization of structural topology, shape, and material; finite dimensional dynamic response optimization, sensitivity analysis, distributed parameter systems; projects. Prerequisite: 053:235.

053:241 Continuum Mechanics and Elasticity 3 s.h.
Cartesian tensors and geometrical foundations; concept of stress, strain, motion; fundamental physical laws; constitutive equations and finite elasticity; equations of linear elasticity, elastic extension, torsion and bending of bars. Prerequisite: 057:019. Corequisite: 053:113 or graduate standing. Same as 058:279.

053:243 Computational Inelasticity 3 s.h.
Computational techniques and implementations for elastic, hyperelastic, elasto-plastic, visco-elastic, and viscoplastic material models; development of sound numerical integration algorithms from rate constitutive equations. Prerequisite: 053:241. Same as 058:251.

053:244 Energy Principles in Structural Mechanics 3 s.h.
Principles of virtual work, stationary and minimum potential energy; calculus of variations; Ritz method, Galerkin’s method; beams and plates; Hamilton’s principle; elastic stability; extremum principle of plasticity. Prerequisites: 053:113 and 053:140. Same as 058:254.

053:245 Micromechanics of Solids 3 s.h.
Local micromechanics and Eshelby’s inclusion theory; homogenization procedures of heterogeneous materials; effective elastic, visco-elastic, and plastic behavior of composites; micromechanics of other advanced materials; computational micromechanics. Prerequisite: 053:241 or 058:279. Same as 058:270.

053:246 Continuum Mechanics and Plasticity 3 s.h.
Finite strain measures and rate of deformation; principles of isotropy and materials indifference; constitutive equations of elastic and inelastic materials; internal variable theory of thermodynamics; endochronic theory of plasticity. Prerequisite: 053:241 or equivalent. Same as 058:258.

053:247 Advanced Continuum Mechanics 3 s.h.
Same as 058:252.

053:248 Elastic Waves in Solids 3 s.h.
Propagation mechanisms of elastic waves in solids; tools used to detect oil and gas deposits and earthquake activities, study the Earth’s geological structure; test, design, and control structural and mechanical components, diagnose medical phenomena in human body. Prerequisite: 053:132 or 053:140 or 053:241. Same as 051:248, 058:271.

053:249 Multiscale Modeling 3 s.h.
Same as 058:255.

053:250 Advanced Fracture Mechanics 3 s.h.
Same as 058:250.

053:252 Transportation Demand Analysis 3 s.h.
Application of city planning procedures and traffic engineering techniques to solution of transportation problems; travel characteristics, forecasting methods, trip generation, distribution, assignment models. Prerequisite: 225:039. Same as 102:262.

053:263 Application Simulation to Transportation 3 s.h.
Transportation system management and traffic engineering; application of real-time simulation and visualization. Prerequisite: 053:063 or 053:163. Same as 102:263.

Environmental Engineering and Science

053:050 Natural Environmental Systems 3-4 s.h.
Environmental chemistry and biology of air, water, and soil quality, air and water pollution, limnology, global atmospheric change, fate and transport of pollutants; hazardous substances, risk analysis, standard setting. Prerequisite: 004:011.

053:055 Principles of Environmental Engineering 4 s.h.
Water supply and treatment processes; wastewater treatment processes; processes for air pollution control, groundwater remediation; solid and hazardous waste management. Prerequisite: 053:050 or consent of instructor. Same as 152:162.
053:102 Groundwater 3 s.h.
Groundwater quality and quantity; Darcy's Law, 2-D flow equation, unsaturated zone, contaminant transport, redox reactions, drinking water quality, bioremediation; laboratories in permeability testing, porous media grain size analysis, pump testing, monitoring well installation. Prerequisite: engineering graduate standing.

053:104 Groundwater Modeling 3 s.h.
Principles and equations of groundwater flow and contaminant transport in aquifers; analytical solutions, numerical methods, stochastic approaches, applications of groundwater modeling software. Prerequisites: 22M:026 and 012:166. Same as 012:184.

053:105 Engineering Geology 3 s.h.
Prerequisite: engineering sophomore standing. Same as 012:179.

053:141 Design for the Developing World 3 s.h.
Sustainable design for the developing world principles and practice; water resources, sanitation, energy, food security.

053:151 Biological Treatment Processes 3 s.h.
Applied microbiology and fundamental principles of aerobic and anaerobic biological wastewater treatment processes; sludge processing and advanced wastewater treatment and bioremediation; lectures and laboratory. Prerequisites: 053:050, 053:152, and 053:154. Corequisites: 053:055 and 053:156.

053:152 Environmental Chemistry I 3 s.h.
Principles of general, physical, organic chemistry applied in water and air systems; emphasis on qualitative and quantitative understanding of chemical kinetics and equilibrium; acid-base reactions, complex formation, precipitation, dissolution, and oxidation-reduction reactions; organic nomenclature. Prerequisite: 004:012. Same as 052:231.

053:153 Environmental Chemistry Laboratory 3 s.h.
Laboratory experiments to demonstrate important concepts in environmental chemistry and to familiarize students with procedures used to characterize water and wastewater and evaluate certain treatment processes. Prerequisite: 004:016 or equivalent. Corequisite: 053:152.

053:154 Environmental Microbiology 3 s.h.
Fundamentals of microbiology and microbial ecology with application in water quality and biodegradation of priority pollutants; lectures and laboratory. Corequisite: 053:152.

053:156 Physical-Chemical Process Fundamentals 3 s.h.
Theory of physical and chemical operations and processes in water and wastewater treatment, including fundamental aspects of process dynamics; lectures, laboratory. Prerequisites: 053:050 and 053:152. Corequisite: 053:055.

053:157 Environmental Engineering Design 3 s.h.
Application of physical, chemical, and biological operations and processes to the design of water and wastewater treatment systems; applications in solid and hazardous waste treatment. Prerequisites: 053:050, 053:071, and 053:055.

053:158 Solid and Hazardous Wastes 3 s.h.
Sources, characteristics, collection, disposal and management of solid and hazardous wastes; environmental impacts of hazardous waste management; resource recovery systems. Prerequisite: 053:050. Same as 175:198.

053:159 Air Pollution Control Technology 3 s.h.
Sources, environmental and health impacts, regulations, modeling of air pollution; processes and alternative strategies for control; global climate considerations. Prerequisite: 053:050 or consent of instructor. Same as 052:235.

053:161 Atmospheric Chemistry and Physics 3 s.h.
Principal chemical and physical processes affecting atmospheric trace gas and pollutant cycles; emphasis on atmospheric photochemistry, aerosol science, major sources and removal processes. Prerequisite: consent of instructor. Same as 052:236.

053:204 Environmental Health Policy 3 s.h.
Major concerns about environment and human health and basis on which legislation has been enacted to deal with these concerns; emphasis on contemporary legislation that has major effects on environmental policy. Prerequisite: 053:050. Same as 152:252, 175:252.

053:225 Environmental Processing of Organic Chemicals 3 s.h.
Environmental organic chemistry, with focus on toxic and persistent organic compounds; bioaccumulation in food webs; chemical diagenesis in air, water, sediment and biotransformations, global/regional transport mechanisms. Prerequisite: 053:152 or 053:252 or consent of instructor.

053:251 Environmental Systems Modeling 3 s.h.
Mathematical modeling of environmental systems, including rivers, lakes, estuaries, treatment systems for conventional and toxic pollutants. Prerequisites: 053:050, 053:055, and 053:152; or consent of instructor.

053:252 Environmental Chemistry II 3 s.h.
Solid-liquid interface problems, heterogenous equilibria, environmental organic chemistry, modeling chemical equilibrium and kinetics, redox chemistry, atmospheric chemistry. Prerequisite: 053:152.

053:274 Foundations in Bioremediation 3 s.h.
Xenobiotic degradation mechanisms with focus on the relationship between chemical structure and biochemical reactivity; process optimization through engineered control of the environment; bioremediation case studies emphasizing site characterization, system selection, design, operation, trouble-shooting. Prerequisite: 053:151 or equivalent.

053:275 Perspectives in Biocatalysis 1-3 s.h.

Hydraulics, Hydrology, and Water Resources

053:071 Principles of Hydraulics and Hydrology 3 s.h.
Hydraulics of pressure conduits and open channels, dimensional analysis, flow measurements, hydraulic machinery, laboratory. Prerequisite: 057:020.

053:103 Water Quality 3 s.h.
Sources, availability, uses, characteristics, criteria, best management practices for surface waters; protection of waters impaired by eutrophication, soil erosion and sedimentation; pathogenic organisms, habitat destruction, wastewater discharges, contaminated sediments, atmospheric deposition, watershed development, invasive species, irrigation return flows, stormwater discharges, nonpoint sources, agricultural runoff; laboratory component, measurement of water quality characteristics in the field.

053:116 Probabilistic Methods in Hydroscience 3 s.h.
Common probabilistic models used in hydrology, hydraulics, and water resources; derived distributions; multivariate models and estimation of model parameters; analysis of data and model building uncertainty analysis. Prerequisites: 22M:034 and 22S:039.

053:117 Remote Sensing 3 s.h.
Fundamentals of electromagnetic waves, atmospheric radiative transfer, passive remote sensing, weather radar; hydrologic application of remote sensing. Prerequisite: 053:116 or consent of instructor.
053:128 Fluvial Geomorphology 3 s.h.
Hydrological principles; stream channel processes; fluvial geomorphology within the drainage basin system; spatial and temporal variations in water distribution; analyses of hydrological data; flow mechanisms, sediment transport; forecasting procedures; hydrograph construction, and modeling. Prerequisite: consent of instructor. Same as 012:138.

053:169 Intermediate Mechanics of Fluids 3 s.h.
Basic concepts and definitions; pressure distribution in a fluid; governing equations and boundary conditions; integral and differential analysis; dimensional analysis and similarity; experimental analysis; laminar and turbulent internal and external flows; potential flows; engineering applications. Prerequisite: 057:020. Same as 058:167.

053:170 Flow in Open Channels 3 s.h.
Energy and momentum principles in open channel flow; uniform flow; gradually varied flow; rapidly varied flow; unsteady flow; flood routing. Prerequisite: 053:071.

053:171 Water Resources Engineering 3 s.h.
Planning and economics of water resources projects; stochastic basis of design; flood control; river navigation works; hydraulic machinery; hydroelectric power systems; classification, functions of hydraulic structures; hydraulic design of spillways, energy dissipators, gates, outlet works; design of canal, of water conveyance structures; design of municipal and industrial outfall structures. Prerequisite: 053:174.

053:172 Experimental Methods in Fluid Mechanics and Heat Transfer 3 s.h.
Review of theory; importance of experiments; modeling and scaling laws; experimental environment and facilities; measurements at full scale and on scaled models; use of wind and water tunnels, towing tanks, hydraulic flumes; instruments for measuring pressure, temperature, velocity, turbulence; error analysis; data acquisition and processing; laboratory demonstrations, hands-on experiments, project. Prerequisite: 058:080 or equivalent. Same as 058:162.

053:173 Mechanics of Sediment Transport/Alluvial Channel Hydraulics 3 s.h.
Laws governing fall velocity, applications to particle-size analysis; incipient motion, bed forms, bed load, suspended load, natural river processes; theory and practice of movable-bed model experiments. Prerequisite: 053:170.

053:174 Water Resource Design 3 s.h.
Storage reservoirs, design of dams and control works, water and wastewater transfer systems; computer applications. Prerequisites: 22S:039 and 053:071.

053:175 Environmental Fluid Dynamics 3 s.h.
Same as 058:163.

053:177 Theory and Practice of Hydraulic Modeling 3 s.h.
Theoretical bases for hydraulic models developed from governing equations; theory of dimension analysis; practical aspects of construction and operation of Froude and Reynolds models; modeling of hydraulic machinery, rivers, tidal flows, heated discharges, ice phenomena; modern instrumentation and data-handling techniques. Prerequisite: 053:071.

053:178 Hydrometeorology 3 s.h.
Atmospheric thermodynamics; precipitation processes; evaporation; infiltration; surface runoff; hydrographs, runoff relations; runoff hydrography; storage problems; frequency, intensity, duration studies of storms, floods, droughts; hydrometeorological observations and network design; watershed modeling; urban hydrology climate.

053:179 Hydroclimatology 3 s.h.
Thermodynamic and flow characteristics of the atmosphere; occurrence of precipitation associated with mid-latitude weather systems, evaporation, measuring precipitation and evaporation, floods and droughts, regional precipitation climatology, atmospheric dynamics.

053:181 Vadose Zone Hydrology 3 s.h.
Same as 012:187.

053:183 Introduction to Comp Flow in Pipes and Channels 3 s.h.
General review of numerical methods in hydraulics (finite-difference, finite-element, and method of characteristics); stability and accuracy of numerical schemes; steady free surface flows; flow transients in pipelines and channels. Prerequisite: 053:169.

053:186 Contaminant Hydrogeology 3 s.h.
Same as 012:186.

053:270 Coastal Hydrodynamics 3 s.h.
Waves, tides, harbor oscillations; coastal structures, estuary dynamics, salinity intrusion, sediment transportation in estuaries; beach processes and evolution. Prerequisite: 053:169.

053:272 Environmental Dispersion Processes 3 s.h.
Review of classical diffusion theories; longitudinal dispersion, transverse and vertical mixing in free-surface turbulent shear flow; application to natural channels; selected topics including stream-tube models, mixing and dispersion of heated effluents. Corequisite: 053:169.

053:273 Computational Hydraulics 3 s.h.
Fundamentals of discretization techniques; 2-D depth averaged unsteady free surface flows; advective schemes for scalar transport, turbulence models; 2-D contaminant transport in free surface flows, effects of stratification, 3-D hydrostatic flow models used in river and coastal engineering. Prerequisite: 053:182.

053:276 Viscous Flow 3 s.h.
Equations of compressible viscous flow; classical exact analytical and numerical solutions; flow regimes and approximations; laminar boundary layers: equations, solution methods, applications; introduction to stability theory; incompressible turbulent flow: mean-flow and Reynolds-stress equations, modeling, solution procedures, and applications; compressible boundary layers. Prerequisite: 053:169. Same as 058:260.

053:277 Inviscid Flow 3 s.h.
Flow of an inviscid, incompressible fluid; steady and unsteady, two- and three-dimensional flows, rotational flows; forces and moments acting on bodies; conformal mapping; method of images; separation of variables; slender body theory; Green’s functions and integral equations; numerical methods; inviscid compressible flow; shock waves. Prerequisite: 053:169. Same as 058:262.

053:279 Advanced Computational Hydraulics and Environmental Fluid Mechanics 3 s.h.

053:280 Hydrosystems Design and Operation 3 s.h.
Spatial estimation of hydrologic variables; design of sampling networks; derived distributions of hydrologic variables; flood frequency analysis; real-time hydrometeorologic forecasting; statistical inference applications to surface and groundwater models; stochastic optimization and control of water resources systems; multobjective analysis. Prerequisites: 053:116 and 053:178.

Graduate Seminars, Advanced Topics, Research

053:190 Readings in Civil and Environmental Engineering 3 s.h.
For graduate nonmajors who want to earn credit in undergraduate civil and environmental engineering courses. Prerequisites: nonengineering graduate standing and consent of instructor.
053:191 Graduate Seminar: Structures, Mechanics, Materials 0 s.h.
Presentation and discussions of recent advances and research in structures, mechanics, and materials engineering by guest lecturers, faculty, students. Prerequisite: senior or graduate standing.

053:192 Environmental Engineering Seminar 0 s.h.
Presentation and discussion of current topics, case studies, and research in environmental science and engineering by students, guest lecturers, faculty. Prerequisite: senior or graduate standing.

053:193 Graduate Seminar: Hydraulics, Hydrology, and Water Resources 0 s.h.
Presentation and discussions of recent advances and research in hydraulics, hydrology, and water resources by guest lecturers, faculty, students. Prerequisite: senior or graduate standing.

053:195 Contemporary Topics in Civil and Environmental Engineering arr.
New topics or areas of study not formally offered in other civil and environmental courses; ice engineering, chaos and strange attractors, remote sensing, nonlinear dynamics of hydrologic processes, advanced water and wastewater treatment processes, hazardous waste control, global climate change, damage mechanics; based on faculty/student interest. Prerequisite: senior standing.

053:196 Advanced Subsurface Hydrology 3 s.h.
Same as 012:196.

053:198 Individual Investigations: Civil and Environmental Engineering arr.
Individual projects for civil and environmental engineering graduate students: laboratory study, engineering design project, analysis and simulation of an engineering system, computer software development, research. Prerequisites: graduate standing and consent of faculty advisor.

Experimental and/or analytical investigation of an approved topic for partial fulfillment of requirements for the M.S. with thesis in civil and environmental engineering. Prerequisites: graduate standing and consent of faculty advisor.

053:215 Hydrogeology Seminar 3 s.h.
Same as 012:210.

Experimental and/or analytical investigation of an approved topic for partial fulfillment of requirements for the Ph.D. in civil and environmental engineering. Prerequisite: consent of faculty advisor.
Electrical and Computer Engineering

Chair: Jon G. Kuhl
Professors emeriti: Earl D. Eyman, Adrianus Korpel, Norbert R. Malik
Associate professors: Mark S. Andersland, Gary Christensen, Anton Kruger, Punam Saha, Tom Schnell
Assistant professors: Michael Abramoff, Reinhard Beichel, Zhiqiang Liu, Daniel Thedens, Xiaodong Wu

Undergraduate degree: B.S.E. in Electrical Engineering
Graduate degrees: M.S., Ph.D. in Electrical and Computer Engineering
Web site: http://www.engineering.uiowa.edu/ece

Electrical engineers and computer engineers make vital contributions to nearly all facets of modern society through their work in areas such as computer systems, medical imaging, robotics, wireless communications, and fiber optics. From the World Wide Web to high-definition television, cellular telephones, and computer networks, the contributions of electrical and computer engineers are changing everyday life.

Many benefits that have sprung from electrical engineering technology now are taken for granted—noninvasive imaging of the brain and other internal organs, astonishing views of the solar system’s outer planets, and wireless telecommunications. Electrical engineers also play crucial roles in major emerging technologies, such as wireless Internet, optical communications, and mapping of the human genome.

As the United States strives to retain or enlarge its share of national and international markets, electrical engineers are certain to play an important role in improving productivity through automation, increased efficiency, and new technologies.

Electrical and computer engineers work in research, design, development, manufacturing, sales, market analysis, consulting, field service, and management. They are employed in computer, semiconductor, software, aerospace, telecommunications, medical, radio, television, and power industries.

Undergraduate Program

The department offers the Bachelor of Science in Engineering in electrical engineering. The program’s objective is to produce graduates who:

- contribute to society in a broad range of careers;
- function professionally in an increasingly international and rapidly changing world;
- effectively understand, use, and develop modern electrical and computer engineering technologies and concepts; and
- achieve success throughout their careers.

Bachelor of Science in Engineering

The electrical engineering curriculum provides technical depth and breadth as well as flexibility and the opportunity for students to customize their programs according to their own goals. Students complete a common core of electrical and computer engineering courses, then select one of three tracks. The electrical engineering track provides a broad background in electrical engineering concepts and practice, preparing students for careers in a wide range of industries and organizations. The computer engineering track provides focus and depth for students preparing for careers or graduate study in computer systems hardware or software engineering. The information engineering track prepares students for careers or advanced study in telecommunications or information technology.

The B.S.E. in electrical engineering requires a minimum of 128 s.h. The curriculum covers four major stems: mathematics and basic sciences, engineering topics, elective focus area, and general education (15 s.h. of humanities and social science courses). All students take 059:005-059:006 Engineering Problem Solving I-II and 010:003 Accelerated Rhetoric. General education component courses must be selected to satisfy the requirements of the College of Engineering. See “Curriculum Stems” and “General Education Component” under “Bachelor of Science in Engineering” in the College of Engineering section of the Catalog.
Elective focus area courses must be selected according to guidelines established by the Department of Electrical and Computer Engineering. See “Elective Focus Area” after the following curriculum list.

Electrical engineering students take five required track courses and two track electives. See “Track Breadth and Depth Electives” after the following curriculum list.

Some courses in the curriculum are prerequisites to others. Students who take courses in the order below satisfy the prerequisite requirements automatically. Students who do not follow this sequence still must satisfy all course prerequisites.

FIRST YEAR

First Semester
004:011 Principles of Chemistry I 4 s.h.
010:003 Accelerated Rhetoric (or 010:001-010:002) 4 s.h.
22M:031 Engineering Mathematics I: Single Variable Calculus 4 s.h.
059:005 Engineering Problem Solving I 3 s.h.
059:090 First-Year Engineering Seminar 1 s.h.

Second Semester
22M:032 Engineering Mathematics II: Multivariable Calculus 4 s.h.
22M:033 Engineering Mathematics III: Matrix Algebra 2 s.h.
029:081 Introductory Physics I 4 s.h.
059:006 Engineering Problem Solving II 3 s.h.
General education component course 3 s.h.

SECOND YEAR

First Semester
22M:034 Engineering Mathematics IV: Differential Equations 3 s.h.
029:082 Introductory Physics II 3-4 s.h.
059:007 Engineering Fundamentals I: Statics 2 s.h.
059:008 Engineering Fundamentals II: Electrical Circuits 3 s.h.
059:009 Engineering Fundamentals III: Thermodynamics 3 s.h.

Second Semester
22M:037 Engineering Mathematics V: Vector Calculus 3 s.h.
055:040 Linear Systems I 3 s.h.
057:017 Computers in Engineering 3 s.h.
057:018 Principles of Electronic Instrumentation 4 s.h.
General education component course 3 s.h.

THIRD YEAR

First Semester
22S:039 Probability and Statistics for the Engineering and Physical Sciences 3 s.h.
055:032 Introduction to Digital Design 3 s.h.
055:070 Electromagnetic Theory 3 s.h.
055:091 Professional Seminar: Electrical Engineering 0 s.h.
Two required track courses 6 s.h.

Second Semester
Three required track courses 9 s.h.
Two elective focus area courses 6 s.h.
General education component course 3 s.h.

FOURTH YEAR

First Semester
055:088 Principles of Electrical Engineering Design 3 s.h.
Track breadth elective 3 s.h.
Three elective focus area courses 9 s.h.
General education component course 3 s.h.

Second Semester
055:089 Senior Electrical Engineering Design 3 s.h.
Track depth elective 3 s.h.
Two elective focus area courses 6 s.h.
General education component course 3 s.h.

Required Track Courses

Each electrical engineering curriculum track requires five track courses, as follows.

COMPUTER ENGINEERING TRACK
22C:019 Discrete Structures 3 s.h.
22C:031 Algorithms 3 s.h.
055:033 Introduction to Software Design 3 s.h.
055:035 Computer Architecture and Organization 3 s.h.
055:036 Embedded Systems and Systems Software 3 s.h.

ELECTRICAL ENGINEERING TRACK
055:041 Electronic Circuits 4 s.h.
055:043 Linear Systems II 3 s.h.
055:050 Communication Systems 3 s.h.
055:060 Control Systems 3 s.h.
055:072 Electrical Engineering Materials and Devices 3 s.h.

INFORMATION ENGINEERING TRACK
055:043 Linear Systems II 3 s.h.
055:046 Digital Signal Processing 3 s.h.
**Elective Focus Area**

The elective focus area provides access to the broad range of course work in the department, the college, and the University. Each student works with his or her academic advisor to develop an elective focus area tailored to his or her own goals—for example, additional technical depth in one or more areas of electrical engineering, completion of a minor in a relevant area, completion of the Certificate in Technological Entrepreneurship, or pursuit of interdisciplinary experience.

The elective focus area must include at least 15 s.h. of technical course work, at least 6 s.h. of which must be earned in 100-level electrical and computer engineering courses. Students earning a minor in business or a Certificate in Technological Entrepreneurship may apply up to 6 s.h. of the required technical course work to the minor or certificate. All students must demonstrate an ability to work on multidisciplinary teams.

All elective focus area plans must be approved in advance by the department.

For more detailed information about elective focus areas, see “Bachelor of Science in Engineering”/“Elective Focus Area” in the College of Engineering section of the Catalog. For more information about the department’s elective focus area guidelines, see the Department of Electrical and Computer Engineering web site.

**Research and Study Areas**

**BIOINFORMATICS AND COMPUTATIONAL GENOMICS**

The Coordinated Laboratory for Computational Genomics (CLCG) is a collaborative effort of the Department of Electrical and Computer Engineering and the Carver College of Medicine. The laboratory’s joint research projects include clustering and cDNA/EST sequencing, web-based tools for genetic linkage analysis, gene discovery and mapping, microarray hybridization, gene expression, and high-throughput genotyping. This lab is recognized worldwide for its contribution to the Human Genome Project.

The CLCG’s computational infrastructure consists of more than 126 computing systems, 178 CPUs, 100+ gigabytes of RAM, and 2.5 terabytes of disk space. The laboratory has four separate dedicated server clusters of 36, 32, 18, and 8 CPUs running Linux operating systems. This includes four dedicated, dual fiber channel, redundant disk storage systems (RAID) of 412 GB usable. CLCG is wired for 10- and 100-megabit Ethernet networking.

**COMPUTER SYSTEMS AND VLSI CIRCUITS**

Research emphasis is directed toward design and test of very-large-scale integrated (VLSI) circuits, high-performance computing and networking, and intelligent agent systems. Research in the VLSI area involves development of techniques and algorithms that assist in synthesis and testing of large-scale logic circuits, and incorporation of these techniques into computer-aided design tools. Current projects include new pattern sources for built-in-test, efficient test pattern generation, generation of compact test sets, and methods for reducing test data volumes.
High-performance computing research involves development of collaborative and parallel computing environments and associated software tools, and use of these facilities and tools in varied application domains, including image processing and computational biology. Current work in networking focuses on protocols and layer-integration schemes that support high-performance wireless networking, and on control and coordination of mobile ad hoc networks. Current research facilities in these areas include several large cluster computers and an experimental asynchronous transfer mode (ATM) network.

Agent technologies research is directed toward development of autonomous software and robotic agents capable of engaging in distributed collaborations that support varied application domains. Current work focuses on development of methods to reconcile diverse agent ontologies and application of agent technologies to medically related problems, including collaborative classification of macular degeneration characteristics and computer engineering education.

Departmental facilities that support this work include a network of SUN, HP, SGI, and Linux workstations, and high-speed network connections to collegiate, University, and national facilities, including an NSF-funded, dedicated ATM network of high-performance workstations, the college’s Computer Systems Support (CSS), the University’s Information Technology Services, national supercomputer centers, federal laboratories, and facilities at other universities.

**CONTROL SYSTEMS AND ROBOTICS**

Current research emphasizes optimal, adaptive, digital, robust and stochastic control and the control of discrete event dynamical systems. Recent work has concerned the estimation, identification, and robust control of linear and nonlinear dynamical systems; set membership identification, control over wireless communication channels; coordinated fault tolerant control of unmanned vehicles; use of control theory to analyze distributed computing, communications, and manufacturing systems; interplay between communications and control; design of fast digital controllers using subband coding; and multirate control systems.

**SIGNAL AND IMAGE PROCESSING**

Research in image processing and basic and applied signal processing is supported by a digital signal processing laboratory and an image analysis laboratory. Collaborative research with faculty in the Departments of Radiology, Neurology, Psychiatry, Internal Medicine, and Biomedical Engineering is directed at quantitative analysis of medical images.

In the area of signal processing, current projects include analysis and design of efficient adaptive algorithms for signal processing, efficient coding and transmission of speech, speech processing aids for the hearing-impaired, robust equalization of uncertain channels, application of neural networks to communications systems, multirate signal processing, and subband coding and channel equalization.

Current projects in image processing include automated detection of vessel borders and coronary trees in angiograms using artificial intelligence techniques, detection and tracking of cardiac motion from magnetic resonance images, analysis of cardiac motion patterns, automated analysis of intravascular ultrasound images, semantic approaches to segmentation of three-dimensional brain images based on genetic optimization algorithms, knowledge-based techniques for identification of pulmonary airway trees from CT images, and three-dimensional segmentation techniques for quantification of lung disease.

Additional projects include medical image registration using deformable shape models; modeling normal versus abnormal anatomical shape as imaged via MRI, CT, and PET; tracking growth and regression of cancer tumors before and after treatment; 3-D measurement and visualization of normal and abnormal infant skull shape; development of parallel algorithms to reduce computation time; and novel sampling and reconstruction techniques for magnetic resonance imaging acquisitions.

The E.C.E. Medical Image Analysis Laboratory is a specialized facility for digital image processing equipped with state-of-the-art equipment. It is equipped with two Silicon Graphic Onyx, three Alpha Linux, and 15 high-end dual-CPU Windows XP and Linux computers with 4 GB of RAM each. High-quality I/O devices for image digitization and visualization are available. High-capacity computer storage disk arrays offer more than 900 GB online hard disk space.

**WAVES AND MATERIALS**

Research in this area is carried out primarily in the Iowa Advanced Technology Laboratories, a well-equipped, modern facility two blocks from the Engineering Building, and in Van Allen Hall. Current research topics are optical and electronic properties of semiconductors, semiconductor devices, electro-optics, nonlinear optics,
nonlinear wave propagation in plasmas, nanotechnology, and medical devices.

Much work is done in collaboration with other University of Iowa departments, including the Departments of Physics and Astronomy, Chemistry, Internal Medicine, and Neurosurgery. Facilities include two molecular beam epitaxy reactors (in physics and astronomy), a microfabrication laboratory with micrometer resolution capabilities, electrical characterization capability to 22 GHz, several Ti:sapphire lasers, a mid-infrared optical parametric oscillator, and plasma equipment for nonlinear wave plasma interaction studies.

Examples of current projects are the design and fabrication of diode lasers based on the bandgap engineering of antimony and arsenic-based III-V compound semiconductors, phase control of laser arrays, development of an all-optical power equalizer, characterization of quantum well devices, nonlinear waveguide devices, development of a noncontact method to measure transport properties, plasma and optical soliton excitation and propagation, development of cellular probes, and a noninvasive glucose sensor for medical research.

WIRELESS COMMUNICATION SYSTEMS

Current research activities in communication systems focus on design and analysis of receivers for digital wireless communications, especially on the development of effective and practical receivers for multi-user wireless cellular systems in multipath channels. Projects include the removal of intersymbol interference by blind identification/equalization, multi-user detection in CDMA without power control, receiver structures for 3G wireless cellular systems, ad hoc wireless networks, space time coding; resource allocation in OFDM systems; and scheduling in wireless networks. Fundamental theoretical issues and practical implementation are emphasized.

Master of Science

The Master of Science in electrical and computer engineering is offered with or without thesis; either option may precede Ph.D. study. The thesis option requires 30 s.h. of graduate credit, including at least 12 s.h. from an approved list of electrical and computer engineering courses and 6 s.h. in 055:199 Research: Electrical and Computer Engineering M.S. Thesis. The nonthesis option requires 36 s.h. of graduate credit, including at least 18 s.h. from an approved list of electrical and computer engineering courses; nonthesis students may count no more than 3 s.h. of independent study toward the degree. Courses required for the B.S.E. in electrical engineering do not count toward the M.S. requirements.

M.S. students must successfully complete a final examination, which is conducted by a committee of at least three faculty members. One part of the final examination for thesis students consists of an oral defense of the thesis. In order to graduate, M.S. students must have a cumulative g.p.a. of at least 3.00.

M.S. Subtrack in Software Engineering

A Master of Science subtrack in software engineering is available to both thesis and nonthesis students. Successful completion of the subtrack results in the designation “with specialization in software engineering” on the student’s transcript.

The M.S. with software engineering subtrack requires the same amount of graduate credit as the standard M.S.: a minimum of 30 s.h. for the thesis option, and 36 s.h. for the nonthesis option. Both options require the following course work.

All of these:

055:180 Fundamentals of Software Engineering 3 s.h.
055:181 Formal Methods in Software Engineering 3 s.h.
055:182 Software Engineering Languages and Tools 3 s.h.
055:183 Software Engineering Project 3 s.h.

At least three of these:

22C:162 Advanced Operating Systems 3 s.h.
055:131 Introduction to VLSI Design 3 s.h.
055:132 High Performance Computer Architecture 3 s.h.
055:133 Graph Algorithms and Combinatorial Optimization 3 s.h.
055:134 Computer Communications 3 s.h.

The thesis option requires an additional 3 s.h. of course work from the approved list of electrical and computer engineering courses; the nonthesis option requires an additional 6 s.h. All rules for additional credit and the M.S. final examination are the same as for the nonsubtrack M.S.

Doctor of Philosophy

The Doctor of Philosophy in electrical and computer engineering requires at least 72 s.h. of graduate credit. At least 45 s.h. must be earned
in formal course work (not thesis or other independent study), including 30 s.h. from an approved list of electrical and computer engineering courses. Each Ph.D. student’s study plan must be approved by the student’s advisor and by the graduate committee.

Ph.D. students take a Ph.D. qualifying examination and a Ph.D. comprehensive examination. Then they must successfully complete a research program that includes a minimum of 18 s.h. of Ph.D. research and culminates in the preparation of a thesis. Finally, the candidate must present a successful oral defense of the thesis.

Ph.D. students must maintain a cumulative g.p.a. of 3.25 or higher in all graduate course work. Acceptance to the Ph.D. program requires successful completion of the Ph.D. qualifying examination. This all-day written exam is given once a year, late in the spring semester. It covers four areas chosen by the student from a list of six. Students normally are expected to take the qualifying examination within the first 30 s.h. of graduate studies. A cumulative g.p.a. of at least 3.25 is required for admittance to the exam. In the event of failure, the examination may be retaken only once, the next time it is offered.

Following successful completion of the Ph.D. qualifying examination and invitation to the Ph.D. program, a student must complete a three-part Ph.D. comprehensive examination that consists of a take-home exam set by the student’s advisor and Ph.D. committee, preparation of a written thesis proposal, and an oral exam that includes presentation and defense of the proposal. A minimum of six months must separate completion of the first and last portions of the comprehensive examination. The final requirement for completion of the Ph.D. program is the preparation and successful defense of the Ph.D. thesis. This must be completed no sooner than six months but no longer than three years after completion of the comprehensive examination.

**Financial Support**

A number of fellowships, traineeships, assistantships, scholarships, and industrial grants are available to graduate students who qualify. These are awarded on a competitive basis.

**Facilities and Laboratories**

**Undergraduate Core**

Electrical and computer engineering provides core instruction for the college in electrical circuits, electronics, instrumentation, and computers. A key part of this core teaching responsibility lies in providing students with an early opportunity to use engineering laboratory instrumentation.

**Undergraduate Laboratories**

The undergraduate laboratories include facilities for the study of electrical and electronic circuits, signals and systems, microprocessor-based computers and systems, measurement automation, communication systems, control systems, computer-aided design of VLSI circuits, image processing, robotics, and optics.

An electronic classroom devoted to image acquisition, processing, transmission, and analysis is the newest addition to the list of state-of-the-art facilities available for undergraduate and graduate education. It is equipped with high-end Hewlett Packard UNIX workstations. Class material is taught in a collaborative learning environment in which students participate during lectures, acquiring practical hands-on experience.
Graduate Facilities and Laboratories

The department has laboratories intended primarily for graduate research in the areas of parallel processing, image processing, CAD for VLSI circuits, software engineering, electro-optics, plasma physics, control systems, cardiovascular image processing, and wireless communication. A network of SUN, IBM, and HP workstations and server nodes provides departmental computing support. This network is tied to the College of Engineering facilities, which consist of more than 100 Hewlett-Packard workstations. Connections are provided to central University facilities and national networks. Through cooperative arrangements, advanced computing facilities at national supercomputing centers, federal laboratories, and other universities are available for graduate research.

Courses

Special Topics

055:000 Cooperative Education Training Assignment: Electrical Engineering 0 s.h.
Electrical engineering students participating in the Cooperative Education Program register in this course during work assignment periods; registration provides a record of participation in the program on the student’s permanent record. Prerequisites: admission to Cooperative Education Program and consent of cooperative faculty advisor.

055:088 Principles of Electrical Engineering Design 3 s.h.
Design problems requiring integration of subject matter from other required electrical and computer engineering courses. Prerequisite: senior standing.

055:089 Senior Electrical Engineering Design 3 s.h.
Individual or team project; demonstration of completed project and formal engineering report. Prerequisite: senior standing. Corequisite: 055:088.

055:090 Electrical Engineering Orientation Seminar 0 s.h.
Introduction to the electrical and computer engineering curriculum and profession; ethics and professionalism in the classroom and workplace. Prerequisite: first-year standing.

055:091 Professional Seminar: Electrical Engineering 0 s.h.
Professional aspects of electrical engineering presented through lectures and discussions by guest speakers, field trips, films, panel discussions. Repeatable. Prerequisite: junior standing.

Individual projects for electrical engineering undergraduate students: laboratory study, engineering design project, analysis and simulation of an engineering system, computer software development, research. Prerequisite: consent of supervising faculty instructor.

Digital Systems, Computers, Software Engineering

055:032 Introduction to Digital Design 3 s.h.
Modern design and analysis of digital switching circuits; combinational logic; sequential circuits and system controllers; interfacing and busing techniques; design methodologies using medium- and large-scale integrated circuits; lab arranged. Prerequisite: sophomore standing.

055:033 Introduction to Software Design 3 s.h.
Design of software for engineering systems; algorithm design and structured programming; data structures; introduction to object-oriented programming in JAVA; applications to engineering problems; lab arranged. Prerequisite: 057:017.

055:035 Computer Architecture and Organization 3 s.h.
Basic concepts; computer evolution, register transfer level design, simulation techniques, instruction sets (CISC and RISC), assembly language programming, ALU design, arithmetic algorithms and realization of arithmetic functions, hardwired and microprogrammed control, memory hierarchies, virtual memory, cache memory, interrupts and DMA, input/output; introduction to high-performance techniques, pipelining, multiprocessing; introduction to hardware description languages (Verilog, VHDL); students design and simulate a simple processor. Offered fall semesters. Prerequisites: 055:032 and 057:017.

055:036 Embedded Systems and Systems Software 3 s.h.
Microprocessors and microcontroller as components in engineering systems; embedded system design processes; microcontroller/microprocessor architecture; interrupts and traps; memory and device interfacing; low-level and high-level software design for embedded systems; examples of embedded system architecture and design; fundamentals of operating systems; tasks and processes; context switching and scheduling; memory and file management, interprocess communication; device drivers. Prerequisite: 057:017. Corequisite: 055:035.

055:121 Introduction to Bioinformatics 4 s.h.

055:122 Computational Genomics 3 s.h.
Same as 002:169, 051:121.

055:130 Switching Theory 3 s.h.
Switching algebra; combinational circuits—hazards, minimization, multiple-output networks; sequential circuits—critical races, essential hazards, fundamental-mode, pulse-mode, synchronous circuits-state assignment, state reduction; input-output experiments. Prerequisite: 055:032.

055:131 Introduction to VLSI Design 3 s.h.
MOS devices and circuits; MOS transistor theory, MOS processing technologies, MOS device models; timing and power considerations; performance issues; scaling; various logic schemes; circuit techniques; clocking strategies; I/O structures; design styles; ASIC design; MOS subsystem design; system case studies, use of electronic design automation tools; introduction to hardware description languages, design synthesis, design projects; lab. Prerequisites: 055:032 and 055:041.

055:132 High Performance Computer Architecture 3 s.h.
Problems involved in designing and analyzing current machine architectures using hardware description language (HDL) simulation and analysis, hierarchical memory design, pipeline processing, vector machines, numerical applications, multiprocessor architectures and parallel algorithm design techniques; evaluation methods to determine relationship between computer design and design goals. Prerequisite: 22C:112 or 22C:113 or 055:035. Same as 22C:160.
055:133 Graph Algorithms and Combinatorial Optimization 3 s.h.
Combinatorial optimization problems; time complexity; graph theory and algorithms; combinatorial optimization algorithms; complexity theory and NP-completeness; approximation algorithms; greedy algorithms and matroids. Prerequisite: 055:033 or equivalent.

055:134 Computer Communications 3 s.h.
Computer networks, ISO model, network topology, communication; digital data, data link control errors and error control; point-to-point networks; broadcast networks, local network architecture; transport services; wireless networking, internetworking; user services. Prerequisite: 22C:118 or 055:054 or equivalent. Same as 22C:168.

055:138 Testing Digital Logic Circuits 3 s.h.
Logic models for faults; fault detection in combinational and sequential circuits; fault-diagnosis; design for testability; random testing, compressed data testing, built-in testing. Prerequisite: 055:032.

055:180 Fundamentals of Software Engineering 3 s.h.
Problem analysis, requirements specification, design, implementation, testing/maintenance, integration, project management; human factors; management and technical communication; design methodologies; software validation and verification, group project. Prerequisites: 22C:022 or 055:033, and senior standing in electrical and computer engineering or computer science. Same as 22C:180.

055:181 Formal Methods in Software Engineering 3 s.h.
Formal models and methods and their application in software engineering processes; operational, algebraic, model-based and property-based specification methods; verification of consistency and completeness of specifications; verification of properties of software; specification construction and verification using method-based tools. Prerequisite: grade of C- or higher in 22C:180 or 055:180. Same as 22C:181.

055:182 Software Engineering Languages and Tools 3 s.h.
Object-oriented programming concepts (objects, classes, single and multiple inheritance, polymorphism and dynamic binding); object-oriented languages and environments such as JAVA and Eiffel; introduction to design patterns and software architectures such as Model-View-Controller and application frameworks; component-based software development; use of standard component frameworks such as CORBA and COM/DCOM. Prerequisites: 22C:180 or 055:180, experience with an object-oriented programming language, and consent of instructor. Same as 22C:182.

055:183 Software Engineering Project 3 s.h.
Team software development project using concepts and methodologies learned in earlier software engineering classes; practical aspects of large-scale software development. Prerequisites: 22C:180 and 22C:182, or consent of instructor. Same as 22C:183.

055:230 Advanced Logic Synthesis 3 s.h.
Synthesis of multiple output circuits; finite state machines; algebraic factoring; testability preserving transformations; design verification; high-level synthesis. Prerequisites: 055:130 and 055:131, or consent of instructor.

**Signal Processing**

055:040 Linear Systems I 3 s.h.
Introduction to continuous and discrete time signals and systems with emphasis on Fourier analysis; examples of signals and systems; notion of state and finite state machines; causality; linearity and time invariance; periodicity; Fourier transforms; frequency response; convolution; IIR and FIR filters, continuous and discrete Fourier transforms; sampling and reconstruction; stability. Prerequisites: 22M:034 and 059:008.

055:041 Electronic Circuits 4 s.h.
Design and analysis of FET and BJT amplifiers; low, midrange, high-frequency analysis; difference amplifiers; feedback amplifiers; SPICE simulation; power amplifiers; digital logic families. Prerequisites: 055:040 and 057:018.

055:043 Linear Systems II 3 s.h.
Continuation of 055:040, emphasis on Laplace and Z-transform analysis; unilateral and bilateral Laplace transform; region of convergence; stability; block diagram algebra; first- and second-order continuous and discrete time systems; Bode plots. Prerequisite: 055:040.

055:046 Digital Signal Processing 3 s.h.
Theory and techniques used in representation, analysis, and design of discrete-time signals, system concepts in frequency and sampling domains; discrete-time processing of continuous-time signals; FIR and IIR digital filter theory, design and realization techniques; theory and application of Fourier transforms. Prerequisite: 055:043.

055:143 Linear Integrated Electronics 3 s.h.
Advanced topics in linear integrated circuits; active load concepts, noise models; analog voltage multipliers, phase-locked loops; case studies of op amps, regulators; MOS amplifier design. Prerequisite: 055:041.

055:144 Digital Integrated Electronics 3 s.h.
Principles of operation of digital integrated circuits; logic families; use of four-state transistor models; sources of propagation delay; advanced design concepts; SPICE modeling; transmission line effects. Prerequisite: 055:041.

055:145 Pattern Recognition 3 s.h.
Mathematical foundations and practical techniques of pattern recognition; adaptation, learning, description; statistical pattern recognition; syntactic pattern recognition, neural networks for recognition; fuzzy logic for recognition; nonstandard and combined pattern recognition approaches. Prerequisite: 055:040.

055:146 Digital Signal Processing 3 s.h.
Theory, techniques used in representing discrete-time signals; system concepts in frequency and sampling domains; FIR and IIR digital filter theory, design and realization techniques; theory, application of discrete Fourier transforms/FFT. Prerequisites: 055:043 and 055:046.

055:148 Digital Image Processing 3 s.h.
Mathematical foundations and practical techniques for digital manipulation of images; image sampling, compression, enhancement, linear and nonlinear filtering and restoration; Fourier domain analysis; image segmentation. Prerequisites: 051:040 or 055:040, and 051:060 or 055:043. Same as 051:148.

055:245 Magnetic Resonance Imaging Systems 3 s.h.
Mathematical foundations and practical implementation for magnetic resonance imaging (MRI); principles of image formation using Fourier and projection techniques, non-Cartesian sampling, tomographic image reconstruction, sources of artifacts and their correction. Prerequisites: 055:146 and 055:148, or equivalents.

055:247 Image Analysis and Understanding 3 s.h.
Mathematical foundations and practical techniques of digital image analysis and understanding; image segmentation (from edges and regions), object description (from boundaries, regions, scale, scale insensitive descriptions, 3-D shape, texture) pattern recognition (statistical and syntactic methods, cluster analysis), image understanding (knowledge representation, control strategies, matching, context, semantics), image analysis and understanding systems; lab arranged. Prerequisites: 055:146 and 055:148.

055:248 Advanced Digital Image Processing 3 s.h.
Visual perception of images (light perception, monochrome vision model, color vision model); advanced image transforms (DCT, Hadamard, Haar, Karhunen-Loeve transforms); image restoration (modeling, spatial restoration techniques, spectral image restoration techniques); geometrical image modification; 3-D
Communication and Information

**055:050 Communication Systems** 3 s.h.
Fourier transform review, Hilbert transforms; narrow band signals, bandpass filters; amplitude and angle modulation systems; random processes, stationarity, ergodicity; noise, noise figure, noise analysis of CW systems; pulse analog modulation; design principles; lab arranged. Prerequisites: 22S:039 and 055:043.

**055:051 Randomness and Information** 3 s.h.
Introduction to random sequences and processes and their use in modeling information bearing signals and noise; basic concepts from probability theory; random variables and vectors; discrete, continuous, and conditional distribution and density functions; independence; expectation; random sequence and process properties and examples; stationarity, correlation, and power spectral density; linear filtering; source coding; signal quantization, waveform coding. Prerequisite: 22S:039. Corequisite: 055:050.

**055:054 Communication Networks** 3 s.h.
Communication networks, layered network architectures, applications, network programming interfaces (e.g., sockets), transport, congestion, routing, data link protocols, local area networks, emerging high-speed networks, multimedia networks, network security, Internet protocol; technology examples. Prerequisite: 057:017. Corequisite: 22S:039.

**055:150 Communication Theory** 3 s.h.
Random processes, source coding, digital transmission at baseband, optimum receiver design for Gaussian noise, error probability and power spectrum analysis, signal design for bandlimited channels, digital carrier modulation, bandwidth/energy/error probability tradeoffs, coding for error detection and correction. Prerequisites: 055:050 and 055:051.

**055:152 Introduction to Information and Coding Theories** 3 s.h.
Quantitative measure of information; source encoding; error detecting codes; block and convolutional codes, design of hardware and software implementations; Viterbi decoding. Prerequisite: 055:050.

**055:060 Control Systems** 3 s.h.
Fundamental concepts of linear feedback control, mathematical modeling, transfer functions, system response, feedback effects, stability, root-locus and frequency response analysis and design, compensation, lab arranged. Prerequisite: 055:040.

**055:160 Control Theory** 3 s.h.
State space approach; controllability, observability, canonical forms; design of Luenberger observers; feedback control via pole placement; stability, minimal realization; advanced topics. Prerequisite: 055:060. Same as 058:133.

**055:163 Random Processes: Control and Communication** 3 s.h.
Probability, vector random variables, expectations and transformations; random sequences and limit theorems; discrete and continuous random processes; Poisson and multivariate Gaussian processes, Markov chains; spectral analysis, estimation, reliability, other applications. Prerequisites: 055:050 and 055:051.

**055:164 Computer-Based Control Systems** 3 s.h.
Discrete and digital control systems; application of computers in control; sampling theorem; discrete time system models; analysis and design of discrete time systems; control design by state variable and input/output methods; advanced topics in digital controls; lab. Prerequisite: 055:060. Same as 058:134.

Waves and Materials

**055:070 Electromagnetic Theory** 3 s.h.
Electric and magnetic forces, Maxwell’s equations, wave propagation; applications, including radiation, transmission lines, circuit theory. Prerequisites: 22M:037 and 029:082.

**055:072 Electrical Engineering Materials and Devices** 3 s.h.
Fundamentals of semiconductor physics and devices; principles of the p-n junction diode, bipolar transistor, field effect transistor. Prerequisites: 029:082 and 055:041.

**055:170 Advanced Electromagnetic Theory** 3 s.h.
Time varying fields; plane wave propagation, reflection, refraction; waves in anisotropic media transmission lines, impedance matching, Smith chart; metallic and dielectric wave guides; resonators; antennas, antenna arrays. Prerequisite: 055:070.

**055:172 Solid State Physical Electronics** 3 s.h.
Semiconductor physics, semiconductor devices; elementary quantum mechanics, statistics; transport; bipolar, MOS transistors; physics of device operation as it relates to circuit design. Prerequisites: 029:083 and 055:072.

**055:173 Introductory Solid State Physics** 3 s.h.
Phenomena associated with solid state; classification of solids and crystal structures, electronic and vibrational properties in solids; thermal, optical, magnetic, dielectric properties of solids. Same as 029:191.

**055:177 Introductory Optics** 3 s.h.
Geometrical and physical optics; interference; diffraction, polarization; microscopic origins of macroscopic optical properties of matter; optical activity; electro-optical, magneto-optical, acousto-optical phenomena; spontaneous Brillouin, Raman, Rayleigh scattering. Prerequisite: 029:130 or equivalent. Same as 029:180.

**055:178 Optical Signal Processing** 3 s.h.
Linear systems description of optical propagation; diffraction and angular plane wave spectrum; lenses as Fourier transformers, lens configurations as generalized optical processors; lasers, coherence, spatial frequency analysis; holography; convolvers, correlators, matched filters; synthetic aperture radar; optical computing. Prerequisite: 055:070. Same as 029:184.

**055:179 Electro-Optics** 3 s.h.
Wave equation solutions; optical birefringence; finite beam propagation in free space, dielectric waveguides and fibers; optical resonators; nonlinear phenomena; electro-optic, acousto-optic modulation; optical detection, noise; application to communication systems. Prerequisite: 055:070. Same as 029:182.

**055:272 Quantum Electronics** 3 s.h.

**055:273 Semiconductor Physics** 3 s.h.

**055:274 Laser Principles** 3 s.h.
Laser theory, stimulated emission, dispersion theory, broadening mechanisms, rate equations, gain saturation, optical resonators, mode-locking, Q-switching techniques, survey of laser types, modes of operation. Prerequisite: 055:170 or equivalent. Same as 029:224.

**055:276 Nonlinear Optics** 3 s.h.
Principally classical treatment of second- and third-order optical nonlinearities; phase matching, harmonic generation, three- and four-wave mixing, self-focusing, self-phase modulation, stimulated scattering of light, applications. Prerequisite: 029:130 or 055:170 or equivalent. Same as 029:222.
Graduate Seminars, Advanced Topics, Research

055:191 Graduate Seminar: Electrical and Computer Engineering 0 s.h.
Presentation and discussion of recent advances and research in electrical and computer engineering by guest lecturers, faculty, students. Prerequisite: graduate standing.

055:195 Contemporary Topics in Electrical and Computer Engineering arr.
New topics or areas of study not offered in other electrical and computer engineering courses; based on faculty/student interest; not available for individual study. Prerequisite: senior standing.

Individual projects for electrical and computer engineering graduate students; laboratory study, engineering design project, analysis and simulation of an engineering system, computer software development, research. Prerequisites: graduate standing and consent of faculty advisor.

Experimental and/or analytical investigation of approved topic for partial fulfillment of requirements for M.S. degree with thesis in electrical and computer engineering. Prerequisites: graduate standing and consent of faculty advisor.

Discussion of current research. Prerequisite: consent of instructor. Same as 029:261.

055:295 Advanced Topics in Electrical and Computer Engineering arr.
Discussion of current literature in electrical and computer engineering. Prerequisite: consent of instructor.

Experimental and/or analytical investigation of approved topic for partial fulfillment of requirements for Ph.D. in electrical and computer engineering. Prerequisite: consent of faculty advisor.
Mechanical and Industrial Engineering

Chair: Lea-Der Chen
Program coordinator, industrial engineering: Geb W. Thomas
Program coordinator, mechanical engineering: H.S. Udaykumar
Associate professors: Ching-Long Lin, Thomas Schnell, Geb W. Thomas, H.S. Udaykumar
Assistant professors: Linda N. Boyle, Yong Chen, Nagi Gebraeel, Pavlo Krokhmal, Jia Lu, Albert Ratner, Shaoping Xiao
Undergraduate degree: B.S.E. in Industrial Engineering, Mechanical Engineering
Graduate degrees: M.S., Ph.D. in Industrial Engineering, Mechanical Engineering
Web site: http://www.mie.engineering.uiowa.edu/

The Department of Mechanical and Industrial Engineering offers distinct undergraduate and graduate degrees and research programs in industrial engineering and in mechanical engineering.

Industrial Engineering

Industrial engineering is concerned with analysis, design, and implementation of systems through optimal use of resources—human, material, energy, information, and financial. Systems may range from small units to extremely large operations. In order to accomplish these activities, the industrial engineer must be skilled in mathematics, physical sciences, management, and human relations as well as manufacturing, computer systems, economics, optimization, human behavior, and systems analysis and design.

Industrial engineers have many opportunities for employment and service in industrial, government, research, and public service organizations. Employment opportunities are among the most varied in the engineering field. Industrial engineers hold positions as advisors to management or may participate directly in management decisions. Representative job titles include industrial engineer, manufacturing engineer, systems analyst, quality specialist, operations research analyst, internal consultant, human factors specialist, supervisor, and manager. Industrial engineers are employed by manufacturing firms, government agencies, and service organizations such as airlines, banks, hospitals, and consulting companies.

Mechanical Engineering

Mechanical engineering is broadly concerned with energy, manufacturing, and design of machines. Mechanical engineers conceive, plan, design, and direct the manufacture, distribution, and operation of a wide variety of devices, machines, and systems—including complex human-machine systems—for energy conversion, biofuel production, environmental control, materials processing, transportation, materials handling, and other purposes. Major subspecialties of mechanical engineering include thermal-fluids engineering and mechanical systems engineering.

Thermal-fluid phenomena occur in many engineering systems and devices, such as aircraft; automobiles; off-road vehicles; ships; gas turbines; heat exchangers; material processes; heating, ventilating, air-conditioning, and refrigerating systems; hydraulic turbines; airbag inflators; fuel cells; biofuel processes; environmental control devices; and biomedical systems. Mechanical systems and machines are the foundations of human technology. Examples are found in manufacturing equipment, medical equipment, automobiles, tractors, aircraft, ships, home appliances, packaging machinery, and robots.

Mechanical engineers find a wide variety of career opportunities in industry, government, and education. Mechanical engineers form an integral part of most industries, including aerospace firms, energy companies, automobile manufacturers, health care providers, food- and metal-processing industries, petroleum refineries, electronic and computer manufacturers, heavy construction and agricultural vehicle manufacturers, thermal comfort equipment firms, farm equipment firms, and consulting companies.
Undergraduate Programs

The department offers a Bachelor of Science in Engineering in industrial engineering, and a Bachelor of Science in Engineering in mechanical engineering.

Industrial Engineering

The objective of the B.S.E. program in industrial engineering is to produce graduates who:

• have a strong foundation of mathematical, scientific, and technical knowledge and are equipped with skills in problem solving, teamwork, and communication that will serve them throughout their careers;
• are able to pursue successful careers as practicing industrial engineers in manufacturing industries, medical institutions, and engineering consulting firms;
• are able to successfully pursue advanced studies in industrial engineering; in other engineering disciplines; or in diverse nontechnical fields such as medicine, law, or business; and
• are able to assume professional leadership roles.

Mechanical Engineering

The objective of the B.S.E. program in mechanical engineering is to produce graduates who:

• have a strong foundation of knowledge in mathematics, science, and mechanical engineering and are equipped with skills in problem solving, design, teamwork, and communication that will serve them throughout their careers;
• are able to pursue successful careers as practicing mechanical engineers in manufacturing industries, energy and utility companies, and engineering consulting firms;
• are able to successfully pursue advanced studies in mechanical engineering; in related technical areas such as physics, applied mathematics, and other engineering disciplines; and in other professional fields; and
• are able to assume professional leadership roles.

B.S.E. in Industrial Engineering

The undergraduate program in industrial engineering requires a strong foundation of courses in engineering science, mathematics, design, manufacturing, social science, and humanities. Advanced work includes specialty courses in human factors and ergonomics, management, information systems, concurrent engineering, production, manufacturing, quality control, reliability, and operations research. Design is an integral part of the undergraduate program; all students complete a comprehensive design experience.

The B.S.E. in industrial engineering requires a minimum of 128 s.h. The curriculum covers four major stems: mathematics and basic sciences, engineering topics, elective focus area, and general education (15 s.h. of humanities and social science courses). All students take 059:005-059:006 Engineering Problem Solving I-II and 010:003 Accelerated Rhetoric. General education component courses must be selected to satisfy the requirements of the College of Engineering. See “Curriculum Stems” and “General Education Component” under “Bachelor of Science in Engineering” in the College of Engineering section of the Catalog.

Elective focus area courses must be selected according to guidelines established by the Department of Mechanical and Industrial Engineering. See “Elective Focus Area” after the following curriculum list.

Some courses in the curriculum are prerequisites to others. Students who take courses in the order below satisfy the prerequisite requirements automatically. Students who do not follow this sequence still must satisfy all course prerequisites.

FIRST YEAR

First Semester

004:011 Principles of Chemistry I 4 s.h.
010:003 Accelerated Rhetoric 4 s.h.
22M:031 Engineering Mathematics I: Single Variable Calculus 4 s.h.
059:005 Engineering Problem Solving I 4 s.h.
059:090 First-Year Engineering Seminar 3 s.h.
029:081 Introductory Physics I 4 s.h.

Second Semester

22M:032 Engineering Mathematics II: Multivariable Calculus 4 s.h.
22M:033 Engineering Mathematics III: Matrix Algebra 2 s.h.
029:081 Introductory Physics I 4 s.h.
056:010 Industrial Engineering First-Year Seminar
059:006 Engineering Problem Solving II
General education component course

SECOND YEAR

First Semester
22M:034 Engineering Mathematics IV: Differential Equations
029:082 Introductory Physics II
031:001 Elementary Psychology
056:020 Industrial Engineering Sophomore Seminar
059:007 Engineering Fundamentals I: Statics
059:008 Engineering Fundamentals II: Electrical Circuits
059:009 Engineering Fundamentals III: Thermodynamics

Second Semester
22S:039 Probability and Statistics for the Engineering and Physical Sciences
056:020 Industrial Engineering Sophomore Seminar
056:054 Engineering Economy
057:015 Materials Science
057:017 Computers in Engineering
Elective focus area course

THIRD YEAR

First Semester
056:032 Design for Manufacturing
056:091 Professional Seminar: Industrial Engineering
056:144 Human Factors
056:171 Operations Research
Elective focus area course
General education component course (100 level)

Second Semester
22S:030 Statistical Methods and Computing
056:091 Professional Seminar: Industrial Engineering
056:131 Manufacturing Systems
056:147 Ergonomics
056:150 Information Systems Design
056:178 Digital Systems Simulation
General education component course (100 level)

FOURTH YEAR

First Semester
056:091 Professional Seminar: Industrial Engineering
056:134 Process Engineering
056:162 Quality Control
056:166 Stochastic Modeling
Elective focus area course
General education component course (100 level)

Second Semester
056:160 Operational Systems Design
Elective focus area courses (including math/science elective)

Elective Focus Area

The industrial engineering program offers a variety of elective focus area options, including standard focus areas developed and maintained by the program and flexible focus areas tailored to individual student interests. For more detailed information about elective focus areas, see “Bachelor of Science in Engineering”/“Elective Focus Area” in the College of Engineering section of the Catalog. For a list of standard industrial engineering elective focus area options and guidelines for tailored elective focus areas, see the Department of Mechanical and Industrial Engineering web site.

Combined B.S.E./M.S. in Industrial Engineering

The combined Bachelor of Science in Engineering/Master of Science program enables qualified industrial engineering undergraduate students to complete the M.S. in industrial engineering in two or three semesters after completing the B.S.E. Students in the combined program may take up to 12 s.h. in 100- or 200-level graduate courses and may count up to 6 s.h. of this credit toward both the B.S.E. and the M.S. They also may attend an industrial engineering graduate seminar in place of the undergraduate seminar. Students may begin working with a faculty member on an M.S. thesis project during their fourth year. Once they complete all requirements for the B.S.E., they are granted the degree and then become regular graduate students in the M.S. program.

To be admitted to the program, students must have completed at least 80 s.h., must have a cumulative g.p.a. of at least 3.25, and must submit a letter of application to the chair of the
Department of Mechanical and Industrial Engineering.

Some students in undergraduate majors other than industrial engineering may be admitted to the combined program; they must meet the same admission requirements as industrial engineering majors. In some cases, they may be required to take additional course work to meet the prerequisite requirements for upper-level courses.

**B.S.E. in Mechanical Engineering**

Mechanical engineering students acquire a foundation in the basic disciplines of mathematics, physics, and chemistry and in the engineering sciences of statics, dynamics, thermodynamics, mechanics of deformable bodies, mechanics of fluids and transfer processes, materials science, and electrical sciences. An understanding of these sciences enables mechanical engineers to design parts of systems and understand whole systems, plan the production and use of energy, plan and operate industrial manufacturing facilities, and design automatic control systems for machines and other mechanical systems. Students also gain an appreciation of social and humanistic issues relating to business, environment, government, history, language, religion, and international relations.

The B.S.E. in mechanical engineering requires a minimum of 128 s.h. The curriculum covers four major stems: mathematics and basic sciences, engineering topics, elective focus area, and general education (15 s.h. of humanities and social science courses). All students take 059:005-059:006 Engineering Problem Solving I-II and 010:003 Accelerated Rhetoric. General education component courses must be selected to satisfy the requirements of the College of Engineering. See “Curriculum Stems” and “General Education Component” under “Bachelor of Science in Engineering” in the College of Engineering section of the Catalog.

Elective focus area courses must be selected according to guidelines established by the Department of Mechanical and Industrial Engineering. See “Elective Focus Area” after the following curriculum list.

Upper-level students work on team projects in a senior capstone design course, 058:086 Mechanical Engineering Design Project. Participation in established research projects may be arranged.

Some courses in the curriculum are prerequisites to others. Students who take courses in the order below satisfy the prerequisite requirements automatically. Students who do not follow this sequence still must satisfy all course prerequisites.

Elective Focus Area

The mechanical engineering program offers a variety of elective focus area options, including standard focus areas developed and maintained by the program and flexible focus areas tailored to individual student interests. For more detailed information about elective focus areas, see “Bachelor of Science in Engineering”/“Elective Focus Area” in the College of Engineering section of the Catalog. For a list of standard mechanical engineering elective focus area options and guidelines for tailored elective focus areas, see the Department of Mechanical and Industrial Engineering web site.

Combined B.S.E./M.S. in Mechanical Engineering

Qualified mechanical engineering undergraduate students who plan to earn a master’s degree in mechanical engineering may enroll in the program’s combined Bachelor of Science in Engineering/Master of Science program, which enables students to complete the master’s degree in two or three semesters after completing the bachelor’s degree. Students enter the program after the junior year and are allowed to take up to 12 s.h. of courses for graduate credit. Of these, up to 6 s.h. of 100- or 200-level courses can be counted toward both the B.S.E. and the M.S., with approval of the student’s graduate advisor.

To be admitted to the program, students must have completed at least 80 s.h., must have a cumulative g.p.a. of at least 3.25, and must submit a letter of application to the chair of the Department of Mechanical and Industrial Engineering.

Graduate Programs

The Department of Mechanical and Industrial Engineering offers a Master of Science and a Doctor of Philosophy in industrial engineering, and a Master of Science and a Doctor of Philosophy in mechanical engineering.

Research and Study in Industrial Engineering

Graduate study in industrial engineering is tailored individually. Each student’s study program is based on his or her background and career objectives and is designed according to sound academic practice. The curriculum is highly flexible; the goal is academic excellence.

The program offers six principal academic focus areas: design and manufacturing, human factors engineering and ergonomics, engineering management, reliability and production systems, operations research and applied statistics, and information systems. Graduate students participate in research in their academic concentration areas.

MANUFACTURING

Ongoing manufacturing research consists of flexible manufacturing systems, optimum control of processes, and reliability assessment. Manufacturing courses, denoted by the 30 series, delve into selecting appropriate manufacturing methods, planning processing operations, devising control strategies, and designing products and manufacturing systems. Contemporary topics include computer-aided process planning, computer-aided design, computer-controlled manufacturing, concurrent engineering, and applications of artificial intelligence in manufacturing.
HUMAN FACTORS AND ERGONOMICS

Current research in human factors and ergonomics includes investigation of the effects of visual and auditory displays on human information processing and development of computer systems that ease the challenges of controlling complex medical and robotic systems. This work examines how engineers should shape information technology to enhance productivity, safety, and customer satisfaction. Industrial engineering faculty members and students work to improve the effectiveness of robot systems for exploration of Mars and the Moon, to improve driving safety, and to design new cockpit interfaces. The department has several medical, flight, and driving simulators. It also conducts research in other facilities, including National Advanced Driving Simulator, the most advanced simulation facility in the world.

Human factors and ergonomics studies concentrate on designing systems compatible with human capabilities and limitations. Human factors engineering integrates components from the fields of psychology, cognitive sciences, physiology, statistics, and technical sciences to address issues of human-interface design and human-systems design. Specific considerations include human cognitive abilities and limitations, visual performance, error reduction, workload assessment and mitigation, design of jobs in the industrial environment, information acquisition and processing, choice of action, operator performance measurement, and economic concerns. This area is covered by courses in the 40 series.

OPERATIONS RESEARCH AND APPLIED STATISTICS

Ongoing research in operations research and applied statistics deals with the application of optimization techniques for informed decision making in the public and private sectors. The primary focus of this work is modeling, simulating, and optimizing the design and operation of systems such as logistics, communications, health care, and manufacturing. Studies in operations research and applied statistics concentrate on mathematical programming, statistical, and computer sciences for modeling, analyzing, and optimizing systems. Various methodologies in this area include mathematical programming, heuristic optimization, statistical analysis, and digital systems simulation. This area is covered by courses in the 70 series.

INFORMATION SYSTEMS

Studies in information systems concentrate on system design. Design problems involve devising information systems that meet a diverse set of requirements. Contemporary topics include network-based systems, client/server systems, internet systems, and medical informatics.

Research and Study in Mechanical Engineering

The graduate programs in mechanical engineering educate students in more depth and breadth than is possible at the baccalaureate level. This prepares the graduate to use contemporary methods at advanced levels in professional careers in engineering design, development, teaching, and research. Each student’s plan of study is based on his or her background and career objectives, and is designed according to sound academic practice. Faculty members in the program have teaching and research expertise in energy and power conversion, fluid and thermal sciences, solid mechanics, mechanical systems, and related areas.

Students may develop programs emphasizing fluid mechanics, thermodynamics, heat transfer, fatigue and fracture mechanics, and mechanical systems. Some may pursue more general programs that combine emphases. Others may specialize in interdisciplinary areas (e.g., energy engineering, materials engineering, automatic control, chemical processes), which involve a combination of departmental courses and appropriate electives from other departments of the College of Engineering and the University. Ph.D. programs may center on any one of these areas through choice of appropriate course work and research topic.
For more information, see the Mechanical Engineering Graduate Student Handbook, available from the department.

The mechanical engineering program offers the following research and study areas.

**FLUID MECHANICS**

The graduate program in fluid mechanics provides a rigorous and broad foundation in theoretical, numerical, and experimental aspects of the subject. It is especially suitable for those seeking careers in teaching and/or research in academic and industrial organizations. The program focuses on fundamental principles and techniques of solving problems in the varied fields of fluids engineering. It emphasizes computer use, both in mathematical modeling of flow phenomena and in acquisition and processing of experimental data.

Although most of the relevant courses are offered by the Department of Mechanical and Industrial Engineering, students are strongly encouraged to take applied mathematics and classical mechanics courses offered by the Departments of Mathematics and Physics and Astronomy in the College of Liberal Arts and Sciences and by other College of Engineering departments.

Current research projects include computational modeling of viscous and turbulent flows; vortex dynamics; unsteady flows; pulmonary flow; flow separation and control; atmospheric flows; environmental flows; ship hydrodynamics; thin liquid films; viscous flow around ships; propulsor flow and propulsor-body interactions; free-surface effects; nonlinear wave theory; hydraulic turbines; quantitative flow visualization and image processing; computational fluid dynamics; LDV and thermal anemometry for flow analysis; and uncertainty analysis.

**THERMAL SCIENCES**

The graduate program in thermal sciences and systems is designed to provide students with a rigorous and broad foundation in theoretical and experimental aspects of the subject. It prepares future graduates for careers in industry, teaching, and government. The program emphasizes fundamentals of thermodynamics and heat transfer, and associated analytical, numerical, and experimental methods used in energy systems.

Areas of concentration include fluid mechanics, thermodynamics, heat transfer, combustion, and fuel cell.

Most courses relevant to the specialization areas are offered by the Department of Mechanical and Industrial Engineering. Students are encouraged to supplement these with courses from other areas, such as mathematics and physics, and courses offered by other College of Engineering departments in order to balance their programs.

Current research projects include analytical, numerical, and experimental investigations of convective heat transfer; turbulent flames; combustion of biomaterials; alternative and renewable fuels; natural convection; spray atomization and combustion; microgravity diffusion flames; transport modeling of fuel cells; transport phenomena in materials processing, melting, and solidification; optimal control of thermal systems; and flow visualization of complex convection processes.

**MECHANICAL SYSTEMS**

The graduate program in mechanical systems is designed to provide students with a broad, strong background in theoretical, computational, experimental, and applied aspects of the subject. It prepares future graduates for careers in industry, teaching, and government. The program emphasizes fundamental principles, computational techniques, multiscale modeling and simulation, and experimentation used to analyze and design mechanical systems. Areas of concentration include nanotechnology, tissue mechanics, machine and vehicle dynamics, optimal design, structural optimization, computational solid mechanics, probabilistic mechanics and reliability, reliability-based design and optimization, and fatigue and fracture mechanics.

Although most courses relevant to the specialization areas are offered by the Department of Mechanical and Industrial Engineering, students are encouraged to consider appropriate courses from other areas, such as mathematics, statistics, physics, and other College of Engineering departments.

Current research projects include design sensitivity analysis of rigid and flexible mechanical systems; computer-aided design; mechanism and manipulator workspace analysis; real-time dynamic simulation; vehicle system dynamics; finite element and meshfree methods for nonlinear mechanics, tissue mechanics, multiphysics, and multiple-scale problems; stochastic meshfree and finite element methods; design sensitivity analysis of nonlinear structural systems; reliability-based design optimization; shape optimal design of elastoplastic materials; optimal design of metal stamping process; multibody dynamics; probabilistic and elastic-plastic fracture mechanics; damage-tolerant design; and fatigue behavior and
life prediction under constant and variable amplitude loading.

**M.S. in Industrial Engineering**

The Master of Science in industrial engineering is offered with and without thesis. The thesis option requires a minimum of 30 s.h. of graduate credit, including a maximum of 6 s.h. of research credit. The non-thesis option requires a minimum of 36 s.h. of graduate credit, with no research credit. The required credit for either option must include 21 s.h. earned in graduate-level industrial engineering courses (including research credit for the thesis option).

Students who intend to pursue a Ph.D. should select the thesis option; those who hold research or teaching assistantships may be required to select the thesis option.

M.S. students must earn a minimum of 9 s.h. in 200-level industrial engineering courses. They must complete at least one 100- or 200-level course from each of three focus areas: human factors, operations research, and reliability and systems design. Thesis students who plan to pursue a Ph.D. may choose to take two 200-level courses in each of the three focus areas in order to complete their Ph.D. breadth requirement before entering the doctoral program. Students select other courses in consultation with their advisors; choices are documented in the student’s plan of study.

All graduate students must register for 056:191 Graduate Seminar: Industrial Engineering (1 s.h.) each semester of enrollment. They may not substitute seminar credit for regular course work or research credit.

M.S. students must maintain a g.p.a. of at least 3.00 on all graduate work at The University of Iowa and must pass a final comprehensive examination as specified by their examining committees.

Entering students must have strong verbal and written skills in English and a background in computer programming (e.g., C++, C, VB), probability, statistics, and mathematics equivalent to that required by accredited undergraduate engineering programs. Students with insufficient academic background must remedy deficiencies by taking appropriate courses beyond those normally required for the study plan.

Entering students are advised by the department chair or by a designated faculty advisor. The department chair or the graduate program coordinator assigns an advisor to each student during his or her first regular semester in residence.

During that semester, the student and the advisor prepare a study plan, which they submit to the department chair for approval. Once the plan is approved, it is filed with the student’s record. It is the student’s responsibility to assure that the study plan is submitted to the department chair.

M.S. students must pass a final comprehensive examination, as specified by their examination committees. Examination committees consist of at least three Graduate College faculty members and must be approved by the department chair.

The comprehensive examination may consist of both oral and written parts. Its purpose is to assess the adequacy of the student’s defense of thesis and/or course preparation. The final study plan, approved by the Graduate College dean, is prerequisite to the exam. The student should consult with his or her advisor on the composition of the advisory/examination committee and the time and place for the exam.

It is the student’s responsibility to submit a degree application to the Graduate College by the college’s deadline.

For more detailed information about M.S. program requirements, including a list of focus area courses, see the Industrial Engineering Graduate Handbook or link to industrial engineering graduate programs on the Department of Mechanical and Industrial Engineering web site.

**M.S. Concentration in Wind Power Management**

M.S. students in industrial engineering may concentrate in wind power management. They must meet all regular requirements for the M.S. in industrial engineering. In addition, thesis option students must take three courses (9 s.h.) from the list of recommended courses. Nonthesis option students must take four courses (12 s.h.) from the list of recommended courses and one course (3 s.h.) from the list of electives. Students’ course selections must be approved by their advisors.

**WIND POWER MANAGEMENT RECOMMENDED COURSES**

- 053:107 Sustainable Systems 3 s.h.
- 053:117 Remote Sensing 3 s.h.
- 053:251 Environmental Systems Modeling 3 s.h.
- 056:134 Process Engineering 4 s.h.
- 056:162 Quality Control 3 s.h.
056:166 Stochastic Modeling 3 s.h.
056:171 Operations Research 3 s.h.
056:178 Digital Systems Simulation 3 s.h.
058:143 Computational Fluid and
Thermal Engineering 3 s.h.
058:147 Fuel Cells 3 s.h.
058:195 Contemporary Topics in
Mechanical Engineering 3 s.h.
058:255 Multiscale Modeling 3 s.h.
058:268 Turbulent Flows 3 s.h.

WIND POWER MANAGEMENT ELECTIVES
06K:176 Managerial Decision Models 3 s.h.
06K:226 Visual Basic Programming 3 s.h.
06K:228 Web and Multimedia 3 s.h.
06K:234 Information Knowledge
Management 3 s.h.
012:114 Energy and the Environment 3 s.h.
22C:144 Database Systems 3 s.h.
044:127 Environmental Quality: Science,
Technology, and Policy 3 s.h.
044:135 Urban Geography 3 s.h.
056:176 Applied Linear Regression 3 s.h.
175:192 Occupational Safety 3 s.h.

Ph.D. in Industrial Engineering

The Ph.D. in industrial engineering requires a minimum of 72 s.h. It is granted upon demonstration of comprehensive knowledge and scholarly work at the highest level.

A maximum of 36 s.h. earned toward the M.S. may be counted toward the 72 s.h. required for the Ph.D. Students must spend at least two semesters in residence at The University of Iowa. They also must maintain a g.p.a. of at least 3.25 on all graduate work done at the University.

The degree requires broad academic background with considerable depth in at least one area of specialization that clearly demonstrates the student’s capability to do high-level research. Ph.D. students must complete a series of written and oral examinations and a written dissertation based upon the results of an original investigation.

Students without a Master of Science in industrial engineering or a closely allied area must satisfy all requirements for the M.S. in industrial engineering before they may be admitted to the Ph.D. program.

Entering students are advised by the department chair or by a designated faculty advisor. During the student’s first regular semester in residence, an advisor is assigned by the department chair or the graduate program coordinator. Students are expected to identify an industrial engineering family member willing to serve as their advisor by the end of their first regular semester in the program.

Once the student is assigned an advisor, he or she works with the advisor to prepare a study plan, which is submitted to the department chair for approval. Once the plan is approved by the department chair, it is filed with the student’s record. At the beginning of each academic year, the industrial engineering faculty reviews the study plan and gives the student feedback regarding progress toward his or her degree objective. It is the student’s responsibility to assure that the study plan is submitted to the program chair.

Admission to degree candidacy requires a g.p.a. of at least 3.25 on all graduate work taken at The University of Iowa, demonstration of capacity for individual research achievement (typically a dissertation research proposal), and successful completion of the comprehensive examination given by the examining committee.

The comprehensive examination is scheduled with approval of the student’s advisor and the industrial engineering program coordinator or the graduate coordinator once the student’s study plan is essentially completed. The examining committee determines the composition of the exam, including written and oral parts, and determines whether the student is ready to begin dissertation research.

For more detailed information about Ph.D. program requirements, see the Industrial Engineering Graduate Handbook or link to industrial engineering graduate programs on the Department of Mechanical and Industrial Engineering web site.

All Ph.D. students must satisfy the following requirements.

Graduate students must register for 056:191 Graduate Seminar: Industrial Engineering (1 s.h.) each semester of enrollment. They may not substitute seminar credit for regular course work or research credit.

INDUSTRIAL ENGINEERING BREADTH REQUIREMENT

Each Ph.D. student must pass at least two 200-level industrial engineering courses in each of three focus areas: human factors, operations research, and reliability and systems design. Students who have earned an M.S. in the program may already have satisfied this requirement.
QUALIFYING EXAM
Each student must satisfy the qualifying exam requirement in two of the three focus areas. The requirement for a focus area can be satisfied by passing a written qualifying exam in the focus area or by earning a grade of A-minus or higher in each of two 200-level industrial engineering courses in the focus area.

FOCUS AREA STUDY
Students select one of the three focus areas and take additional course work in that area. They fulfill the minimum requirement of the focus area, completing at least two additional 200-level industrial engineering courses in the area.

COMPREHENSIVE EXAMINATION
Each student must demonstrate his or her ability to carry out creative individual research by completing and defending his or her dissertation research proposal in a comprehensive examination. The exam includes written and oral parts and is conducted by an examining committee of at least five industrial engineering and Graduate College faculty members. It is scheduled after the qualifying examination requirement has been satisfied. The examining committee determines whether the student is ready to begin dissertation research. Once the student has completed the comprehensive examination satisfactorily, he or she is accepted as a candidate for the Ph.D.

FINAL EXAMINATION (THESIS DEFENSE)
Each student must defend his or her completed dissertation in the final examination, which is conducted by the examining committee.

Ph.D. Concentration in Wind Power Management
Ph.D. students who concentrate in wind power management must meet all regular requirements for the doctoral degree. In addition, they must gain sufficient breadth and depth of domain knowledge in their study area by taking energy-related courses.

Health Informatics Certificate
Graduate students in industrial engineering may elect to earn the Certificate in Health Informatics. The certificate program is an interdisciplinary collaboration among the health sciences, engineering, computer science, information science, management science, and statistics. Students in the program are trained to analyze health care data, evaluate information and knowledge, and study health care research, education, and practice. Certificate students complete a minimum of 20 s.h., including 056:186 and 056:287 Health Informatics I-II and approved electives. The certificate may be earned in conjunction with the M.S. or Ph.D., or as postgraduate study. Completion of the Certificate in Health Informatics is noted on the student’s transcript.

M.S. in Mechanical Engineering
The M.S. in mechanical engineering requires a minimum of 30 s.h. and is offered with and without thesis. Thesis students may count 6-9 s.h. earned for thesis research and writing toward the degree. Each student determines a study plan in consultation with an advisor and submits the plan to the department chair for approval.

All M.S. students must register for 058:191 Graduate Seminar: Mechanical Engineering each semester.

To earn the M.S., the student must maintain a g.p.a. of at least 3.00 on graduate work used to satisfy the degree requirements and must be successful in the final examination. This examination is administered by the student’s committee, which consists of at least three faculty members, including at least one with primary appointment in the Department of Mechanical and Industrial Engineering.

The requirements for the M.S. may be completed within one calendar year. However, students with assistantship duties or other constraints may take up to two calendar years to complete the degree.

Ph.D. in Mechanical Engineering
The Ph.D. in mechanical engineering requires 72 s.h. beyond the baccalaureate, including at least 54 s.h. in course work (excluding thesis research) and at least 12 s.h. earned for Ph.D. thesis research. Students must pass the qualifying examination administered by the program to be formally admitted to the doctoral program.

Each student takes the comprehensive examination after passing the qualifying examination and when the course work specified in the study plan is nearly completed; in any case, the comprehensive examination should be taken no later than 28 months after the first
registration in the Ph.D. program. To be admitted to the comprehensive examination, a student must be in good academic standing and must be recommended by his or her advisor. The exam is administered by the student's committee. Admission to Ph.D. candidacy is recognized upon successful completion of the comprehensive examination.

Having satisfactorily completed the exam, the student usually has only to complete and defend the dissertation at the final examination.

Requirements for the Ph.D. usually can be completed in three to four years beyond the M.S.

**Admission**

Applicants must meet the admission requirements of the Graduate College; for detailed information about Graduate College policies, see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

**Industrial Engineering**

Reference letters, student research interests, grade-point average for previous graduate study, and factors such as faculty availability are considered in admission decisions.

M.S. applicants may be admitted from an ABET, Inc.-accredited baccalaureate curriculum in any engineering discipline, or in the mathematical sciences, the physical sciences, or the computer sciences with a g.p.a. of at least 3.00 and an acceptable score on the Graduate Record Examination (GRE) General Test. Applicants from institutions outside the United States must meet equivalent conditions for regular admission. Students with lesser qualifications may be considered for conditional admission.

Students from business or social science programs who have mathematical preparation similar to that of engineering students are considered for regular or conditional admission. Students on conditional status must achieve regular status within two sessions of their first registration by attaining an acceptable grade-point average and gaining regular acceptance by the industrial engineering program faculty; otherwise, they are dismissed. Admissions may be limited by available resources.

Ph.D. applicants may be admitted from an ABET, Inc.-accredited baccalaureate curriculum or a postbaccalaureate curriculum in any engineering discipline or in the mathematical sciences, computer science, or physical sciences with a g.p.a. of at least 3.25 and an acceptable GRE General Test score. Applicants from outside the United States must meet equivalent standards for regular admission as determined by The University of Iowa. Students also may be admitted from business or social science programs as determined individually.

Applicants who intend to pursue a Ph.D. and who have a B.S. or an M.S. without thesis usually are admitted first to the M.S. program. All admissions to the Ph.D. program are reviewed by the graduate studies committee.

**Mechanical Engineering**

Applicants who have earned a baccalaureate or master's degree in engineering curriculum or in the mathematical or physical sciences are eligible to be considered for admission to graduate study in mechanical engineering. In order to be considered for regular admission, applicants must have a g.p.a. of at least 3.00 on all previous college-level work and Graduate Record Examination (GRE) General Test scores of at least 500 verbal, 750 quantitative, and 4.5 analytical writing. Students whose first language is not English must score at least 550 (paper-based) or at least 213 (computer-based) on the Test of English as a Foreign language (TOEFL).

Applicants with a lower grade-point average and/or GRE or TOEFL test scores may be considered for conditional admission, under exceptional circumstances. Applicants admitted conditionally must achieve regular standing within one semester (excluding summer sessions) after admission by attaining a g.p.a. of at least 3.00 on their first 9 s.h. at The University of Iowa. The Graduate College cancels registration for the subsequent semester for students who have not submitted their GRE and/or TOEFL scores by the end of the first semester after admission.

**Financial Support**

**Industrial Engineering**

A number of one-quarter-time and one-half-time teaching and research assistantships are available for graduate students. Awards are based on students' academic records and assessment of their potential contribution to the research and teaching goals of the program. Advanced graduate students also may qualify for appointments as graduate teaching fellows. Contact the chair of the Department of Mechanical and Industrial Engineering for details.
Mechanical Engineering

Financial support is available to M.S. and Ph.D. students, primarily through teaching and research assistantships from the Department of Mechanical and Industrial Engineering, the Center for Computer-Aided Design, IIHR—Hydroscience and Engineering, and the National Advanced Driving Simulator. These awards may be made on a semester, academic year, or calendar year basis. Awards and reappointments are competitive and are based on the student’s potential contribution to the teaching and research goals of the department. Students who fulfill their assistantship responsibilities and continue to make satisfactory progress toward their degree objective receive preference in new assistantship awards. All applications for financial support should be submitted directly to the department chair.

M.S. students with assistantship appointments of one-quarter-time or more are required to register for a minimum of 9 s.h. during fall and spring semesters until they have completed 30 s.h. of course and research work beyond the baccalaureate degree. Ph.D. students with assistantship appointments of one-quarter-time or more must register for a minimum of 9 s.h. during fall and spring semesters until they have completed 72 s.h. of course and research work beyond the baccalaureate degree. Once they meet these minimums, graduate students must register for a graduate seminar each semester until they have successfully completed their final examination or thesis defense. All registrations should accurately reflect the amount and type of work undertaken, the use of University facilities, and the amount of consultation with the faculty.

Facilities and Laboratories

Industrial Engineering: Undergraduate and Graduate Facilities

For information about laboratories affiliated with core courses coordinated by other College of Engineering departments, see the departments' Catalog sections.

ACTIVE LEARNING FACILITY

The Active Learning Facility (ALF) uses a project-oriented, team-based, hands-on approach to education. The facility provides NT servers, personal computers, and remote plug-ins for students’ laptops. It also offers a variety of software for project management, presentations, and data analysis and reporting.

ADVANCED SYSTEM LABORATORY

The Advanced Systems Laboratory houses research on development and implementation of computational algorithms for the optimization of complex systems.

COGNITIVE SYSTEMS LABORATORY

The Cognitive Systems Laboratory is devoted to examining the safety, performance, and user acceptance implications of technology insertion into complex systems. The laboratory has networked computers, a video editing workstation, a process control simulation, and a low-cost driving simulator. The simulator is equipped with five cameras, instrumentation to record all driver activity, and an eye tracking system. The Cognitive Systems Laboratory shares the driving simulator and an instrumented vehicle with the Operator Performance Laboratory. The equipment supports class projects, system development, and undergraduate and graduate research.

GROK LABORATORY

The GROK Laboratory develops computer software and mechanical devices to improve human performance with complex tasks. The laboratory has developed technologies used by NASA to control robots exploring South America and Mars. It also designs and develops microsurgery and dental simulators to train new surgeons and dentists.

OPERATOR PERFORMANCE LABORATORY

Research in the Operator Performance Laboratory (OPL) focuses on determining human performance in a variety of situations, with particular emphasis on driving and flight deck environments. Much of the research is performed in the field using a state-of-the-art instrumented vehicle that is equipped with five cameras, eye movement equipment, two computers, video equipment, and a suite of sensors. The OPL also features a scale Boeing 737-400 fixed-base flight simulator with six channels of visuals. The flight simulator is equipped with a remote eye-tracking device that allows the activation of selected virtual controls in the flight deck. A specially designed stimulus presentation booth is used for color research and for photometry applications. Computer models of operator performance are designed based on the data obtained in the laboratory and field research.
E-COMMERCE LABORATORY

The E-Commerce Laboratory provides a facility for advanced research on Internet technologies and educational programs in key Internet subjects. The laboratory contains the full facilities necessary for a strong Internet capability, including Windows NT workstations, PCs and Macs, UNIX workstations, Internet server software for each platform, Java, VRML, JavaScript, ActiveX and VBScript programming facilities, videoconferencing cameras and group collaboration software, CAD systems software, and database systems.

Activities at the E-Commerce Laboratory include working with companies to improve their use of the Internet; providing assistance in advanced uses of the World Wide Web; providing seminars and workshops to improve Internet education; and carrying out research in key Internet technologies.

Research is under way in a number of key areas, including videoconferencing using the Internet; rapid product development through Internet links with suppliers and customers; virtual reality over the Internet; use of remote databases to access corporate data; use of the Internet to support team-based activities; security of Internet-based activities; and CAD file viewing and manipulation through the World Wide Web.

COMPUTER NUMERICAL CONTROL MACHINING LABORATORY

The Computer Numerical Control (CNC) Machining Laboratory gives undergraduate and graduate students hands-on experience in programming and operating a CNC lathe, a CNC milling machine, and a coordinate measuring machine. CNC programs can be developed through the machine control keyboard or downloaded via RS232C data link from the college’s network. Research on the machinability of metals for cutting tool and machining parameters are conducted in the lab. A machine vision system is used to evaluate tool wear patterns.

INTELLIGENT SYSTEMS LABORATORY

The Intelligent Systems Laboratory provides facilities for research in computational intelligence leading to applications in industry, service organizations, and health care. Research in the laboratory is funded by government agencies and industrial corporations. Solutions to practical problems and enhancement of engineering education are emphasized. Most of the laboratory’s recent projects concentrate on development of software tools for product development, manufacturing, and health care applications.

The Intelligent Systems Laboratory is furnished with the latest computer technology to support research on numerous computing platforms. Diverse software is available for modeling, design, and construction of intelligent systems—for example, data mining software, neural networks, expert systems, and simulation software.

Mechanical Engineering: Undergraduate Instruction

ENGINEERING CORE

The laboratories for fluid flows and transport processes contain a wind tunnel; a water flume; a water table; four water channels with porous media; three air-jet tables; various air, water, and oil flow devices; and facilities for numerous small-scale experiments to demonstrate the principles of mass, momentum, and energy transfer.

For information about laboratories affiliated with core courses coordinated by other College of Engineering departments, see the departments’ Catalog sections.

REQUIRED AND ELECTIVE COURSE LABORATORIES

The mechanical engineering laboratory for experimental engineering provides undergraduate students with exposure to contemporary measurement theory, sensors, signal conditioners, instrumentation, and computer-aided data acquisition systems.

The laboratory for mechanical engineering design projects provides for either team or individual project activities in mechanical engineering design, construction of mechanisms, and testing.

The thermal and heat transfer laboratory is equipped with data acquisition systems to process data online on computers. Experiments in heat transfer measurements are made in this laboratory.

Mechanical Engineering: Graduate Facilities

FLUID MECHANICS

The program in fluid mechanics is conducted in close collaboration with IIHR—Hydroscience & Engineering. The equipment available to graduate students includes several wind tunnels and hydraulic flumes, an environmental flow
facility, a towing tank, two special low-temperature flow facilities for investigation of ice phenomena, hot-wire and laser anemometer systems, particle-image velocimetry systems, and computer-based data acquisition systems.

Facilities available in the department include a flow visualization and imaging system with CCD (charge-coupled devices) camera, and a low-speed wind tunnel. IIHR and College of Engineering shops provide the necessary support. In addition to using in-house workstations and computers, the department's faculty members and students make extensive use of supercomputers at national centers.

**THERMAL SCIENCES**

Facilities for research in the thermal sciences and systems consist of a low-pressure combustion chamber, a high-pressure continuous flow combustion chamber, a high-pressure chamber for atomization study, a test rig for heat transfer to near supercritical fluids, a diffusion flame test rig, an enclosed laminar flame test rig, a 20-liter explosion vessel, an airbag inflator test rig, an air atomization spray apparatus, test stands for melting and solidification studies, various optical measurement systems, and two fuel cell test rigs. Laser-based diagnostics (e.g., laser-induced fluorescence, imaging, and laser Doppler anemometry) are available for solidification, turbulent flow, heat transfer, and combustion studies. Flow visualization and imaging by CCD camera are available for the study of complex fluid motion and heat convection, and combustion flows.

**MECHANICAL SYSTEMS**

Experimental facilities for the department's fatigue and fracture mechanics study include access to a scanning electron microscope, a field computer data acquisition system, state-of-the-art computer controlled servo-hydraulic closed-loop fatigue test equipment, and equipment for characterization of material properties. Conventional strength of materials test equipment also is available.

Computer-based simulation research activities in the mechanical systems area are carried out mainly in the Center for Computer-Aided Design (CCAD). CCAD maintains a variety of high-performance computer systems in support of its technology research and development efforts. General computing services are supported by a number of UNIX and Windows applications servers connected to centralized file servers. CAD/CAE, software development, virtual prototyping, and virtual environment development applications are hosted on numerous high-performance workstations. Standard desktop, multimedia, and office productivity applications are hosted on a network of more than 40 workstations.

056:134 Process Engineering 4 s.h.
Methodologies, algorithms, and tools for processing modeling, analysis, and reengineering; modeling issues in product and component design, product and process modularity, quality, reliability, agility. Offered spring semesters. Prerequisite: 056:171.

056:235 Computational Intelligence 3 s.h.
Concepts, models, algorithms, and tools for development of intelligent systems; data mining, expert systems, neural networks for engineering, medical and systems applications. Prerequisite: 056:171. Same as 096:313.

056:237 Operational Issues in Supply Chain Management Engineering 3 s.h.
Probabilistic approaches, supply chain disruption analysis, human decision making in supply chains, auctions and electronic commerce in supply chains. Prerequisite: graduate standing.

056:238 Evolutionary Computation 3 s.h.
Evolutionary computation, genetic programming, development of evolutionary systems for applications in industry, medicine, and nonstructured environments; case studies. Prerequisite: 056:171.

Human Factors and Ergonomics

056:144 Human Factors 3 s.h.
Design of human-machine systems; development of optimum work environments by applying principles of behavioral science and basic knowledge of human capacities and limits. Offered fall semesters. Prerequisite: 031:001.

056:147 Ergonomics 3 s.h.
Ergonomic design of jobs and products in an industrial and consumer market setting; principles of good design, examples of poor design; consequences of poor job and product design; principles of work sampling, usability studies, performance rating, sizing and planning of workstations, hand tool design, ergonomic design in transportation; related group project.

056:148 Human-Centered System Design 3 s.h.
Design strategies for creating customer-centered systems; interview and observation techniques for gathering customer requirements and creating work models; tools for restructuring work and prototype development. Prerequisite: 056:144.

056:240 Human Performance in Engineering Systems 3 s.h.
Human performance limits and capabilities relevant to design of engineering systems; focus on cognitive limits associated with information processing. Prerequisites: 056:144 and 056:147.

056:241 Research Methods in Human Factors Engineering 3 s.h.
Logic and methods for research and for analysis and evaluation of complex human-machine systems; advanced techniques for enhancement of human interaction with advanced information technology; emphasis on cognitive task analysis techniques for innovative design, understanding of how technology affects safety, performance, user acceptance. Prerequisite: 056:240 or intermediate statistics course or consent of instructor.

056:242 Human/Computer Interaction 3 s.h.
Development of projects using human factors principles in the design of computer interfaces.

056:243 Modeling Operator Performance 3 s.h.
Modeling techniques that support design and analysis of the human role in complex systems; process and concepts associated with model development and application. Corequisite: 056:240 or consent of instructor.

056:244 Human Factors in Transportation 3 s.h.
Human capabilities and limitation in transportation context; human factors design from automobiles to spacecraft, transportation environment, air traffic control, crew resource management; related semester project. Corequisite: 056:240 or 056:241 or consent of instructor.

056:245 Human Factors in Aviation 3 s.h.
Measuring, modeling, and optimizing human visual performance; display design for optimal legibility, research in visibility, legibility, conspicuity, and camouflage; visibility model development. Corequisite: 056:240 or 056:241 or consent of instructor.

056:246 The Design of Virtual Environments 3 s.h.
Development of techniques for designing and creating three-dimensional representations of information for simulation, scientific visualization, and engineering; emphasis on human factors issues, software. Corequisite: 056:240 or consent of instructor.

056:248 Analytical Methods in Human Factors Engineering 3 s.h.
How analytical techniques can be used to analyze human factors data, how techniques complement each other; techniques used across disciplines (e.g., behavioral science, civil and industrial engineering, economics, epidemiology, marketing); case studies; experience designing a survey and using statistical analysis software to analyze survey data. Prerequisites: 22S:039 and 056:144.

Engineering Management

056:054 Engineering Economy 3 s.h.
Basic concepts of engineering economy: time value of money, cash flow equivalence, depreciation, tax considerations, continuous cash flows, cost accounting overview; main analysis techniques—present worth, uniform annual cost, rate of return, benefit/cost ratio, replacement and break-even analysis. Corequisite: 22S:039.

056:056 Leadership in Engineering 1 s.h.
How to balance aspects of college life, explore a personal mission, and set priorities. Prerequisite: consent of instructor.

056:150 Information Systems Design 3 s.h.
Structure and design of computer-based information systems; concepts of information systems, decision making; computer hardware, software, data structures; methods for determining system requirements; designing, implementing, evaluating, managing information systems; applied projects. Prerequisite: 057:017.

056:153 Engineering Administration I 3 s.h.
Current readings, cases in engineering management; methods for organizing, planning, funding, controlling engineering efforts; nature of the engineering and management function. Offered fall semesters. Prerequisite: 056:054.

Quality Control and Production Systems

056:160 Operational Systems Design 4 s.h.
Projects involving the design of products and related operational systems in an industrial or service organization, including associated entrepreneurial or intrapreneurial planning. Offered spring semesters. Prerequisites: 056:054, 056:134, and senior standing.

056:161 Enhanced Design Experience 3 s.h.
Real-world, in-depth design experience in student teams, working with engineers at major companies in the region; application of industrial engineering knowledge and skills to design products and related operational systems. Prerequisite: senior standing.

056:162 Quality Control 3 s.h.
Basic techniques of statistical quality control; application of control charts for process control variables; design of inspection plans and industrial experimentation; modern management aspects of quality assurance systems. Offered fall semesters. Prerequisite: 22S:030 or 22S:039. Same as 22S:133.
056:166 Stochastic Modeling 3 s.h.
Models for design and operation of manufacturing systems; equipment selection, machine layout, group technology, process planning, production planning and scheduling, just-in-time concepts, concurrent engineering, intelligent systems. Offered fall semesters. Prerequisites: 22S:039 and 056:032.

056:268 Reliability Theory and Applications 3 s.h.
Fundamental topics in reliability engineering, including system reliability modeling, statistical inference of lifetime data, basic preventive maintenance models; statistics and random process models, including Poisson processes, renewal processes, Markov processes. Prerequisites: 22M:033, and 22S:039 or equivalent.

Operations Research and Applied Statistics

056:171 Operations Research 3 s.h.
Operations research models and applications emphasizing both deterministic and probabilistic models: linear programming, duality, parametric analysis, dynamic programming, Markov chains, queueing theory. Offered fall semesters. Prerequisites: 22M:033 and 22S:039.

056:170 Applied Linear Regression 3 s.h.
Regression analysis with focus on applications; model formulation, checking, selection; interpretation and presentation of analysis results; simple and multiple linear regression; ANOVA; hands-on data analysis with SAS software. Prerequisite: 22S:030 or 22S:039 or 22S:120 or equivalent. Same as 22S:152.

056:178 Digital Systems Simulation 3 s.h.
Simulation modeling and analysis; emphasis on construction of models, interpretation of modeling results; input and output analysis; modeling discrete, continuous and hybrid systems; construction of model-related databases—hands-on usage of ARENA simulation software, manufacturing, health care, and service applications. Offered spring semesters. Prerequisite: 22S:030 or 22S:039 or graduate standing.

056:181 Internet Systems Design 3 s.h.
The Internet’s background; how the net operates and can be used; design of Internet-based systems, programming in an Internet-based environment. Corequisite: 057:017 or consent of instructor.

056:186 Health Informatics I 3 s.h.
Technological tools that support health care administration, management, and decision making. Prerequisite: graduate standing or consent of instructor. Same as 021:280, 050:283, 051:187, 074:191, 096:283, 174:226.

056:270 Linear Programming 3 s.h.
Formulation and solution of linear optimization problems; duality, sensitivity analysis, decomposition methods; simplex and interior algorithms; extensions to semidefinite and second-order cone optimization. Prerequisite: 056:171 or equivalent. Same as 06K:286.

056:271 Nonlinear Optimization 3 s.h.
Mathematical models, theory, algorithms for constrained and unconstrained optimization; nonlinear, geometric, quadratic, dynamic programming; optimality conditions; aspects of duality theory. Prerequisite: 056:171 or equivalent.

056:272 Integer Programming and Network Flows 3 s.h.
Theory, applications, algorithms for combinatorial optimization problems, including integer and mixed-integer mathematical programming problems as well as problems formulated in a network or graph setting, including routing of vehicles, location of facilities in networks and scheduling. Offered fall semesters. Prerequisite: 056:171 or equivalent.

056:273 Stochastic Systems 3 s.h.
Probabilistic operations research models and algorithms, with emphasis on applications in manufacturing and production planning; random processes; Markov chains and applications; probabilistic dynamic programming; Markov decision problems; queueing models. Prerequisites: 056:171 and an introductory course in probability models.

056:274 Stochastic Optimization 3 s.h.
General tools and approaches used in decision making under uncertainties; modeling of uncertainties and risk; changes that uncertainties bring to the decision process; difficulties of incorporating uncertainties into optimization models, common techniques for solving stochastic problems.

056:275 Statistical Pattern Recognition 3 s.h.
Fundamental mathematical tools for multivariate statistical analysis and decision-making processes in pattern recognition. Prerequisites: 22M:033 and 22S:039.

056:287 Health Informatics II 3 s.h.
Journal articles on health informatics topics reviewed in seminar format with several faculty members; student group projects. Prerequisite: 056:186. Same as 021:280, 051:189, 074:192, 096:289.

Graduate Seminars, Advanced Topics, Research

056:191 Graduate Seminar: Industrial Engineering 1 s.h.
Recent advances and research in industrial engineering presented by guest lecturers, faculty, students. Prerequisite: graduate standing.

056:195 Contemporary Topics in Industrial Engineering arr.
New topics or areas of study not offered in other industrial engineering courses; topics based on faculty/student interest. Prerequisite: senior standing.

Individual projects for industrial engineering graduate students; laboratory study, engineering design, analysis and simulation of an engineering system, computer software development, research. Prerequisites: graduate standing and consent of advisor.

Experimental and/or analytical investigation of an approved topic for partial fulfillment of requirements for M.S. with thesis in industrial engineering. Prerequisites: graduate standing and consent of advisor.

056:295 Advanced Topics in Industrial Engineering arr.
Discussion of current literature in industrial engineering. Prerequisite: consent of instructor.

056:298 Special Topics in Industrial Engineering arr.
Prerequisite: consent of instructor.

Experimental and/or analytical investigation of an approved topic for partial fulfillment of requirements for Ph.D. in industrial engineering. Prerequisite: consent of advisor.

Mechanical Engineering

Special Topics

058:000 Cooperative Education Training Assignment: Mechanical Engineering 0 s.h.
Mechanical engineering students participating in the Cooperative Education Program register in this course during work assignment.
058:020 Mechanical Engineering Sophomore Seminar 0 s.h.
Introduction to the mechanical engineering profession and curriculum; ethics and professionalism in classroom and workplace; mentorship program and professional societies; visits to laboratories and local companies. Prerequisite: sophomore or transfer standing.

058:080 Experimental Engineering 4 s.h.

058:086 Mechanical Engineering Design Project 3 s.h.
Application of mechanical, thermal, fluid systems design; student or team design projects initiated at various levels in the design process and carried through to higher levels; emphasis on synthesis, written and oral communication. Corequisite: 058:048 or 058:055.

058:090 Mechanical Engineering First-Year Seminar 0 s.h.
Introduction to the mechanical engineering curriculum, profession; visits to laboratories, industries. Prerequisite: first-year or transfer standing.

058:091 Professional Seminar: Mechanical Engineering 0 s.h.
Professional aspects of mechanical engineering; presentations, student/faculty interaction, professional society involvement, panel discussions, plant trip. Prerequisite: junior standing.

Individual projects for mechanical engineering undergraduate students; laboratory study; engineering design project; analysis, synthesis, simulation of an engineering system; computer software development, research. Prerequisite: consent of advisor.

058:110 Computer-Aided Engineering 3 s.h.
Computational engineering modeling and simulation, geometric modeling, grid generation, finite-element and finite-volume methods, uncertainty analysis, optimization, engineering applications. Prerequisites: 057:019 and 058:052, or equivalent. Same as 053:115.

058:111 Numerical Calculations 3 s.h.
Development of algorithms for functional approximations, numerical differentiation and integration; solution of algebraic and differential equations, with emphasis on digital computations; initial and boundary value problems. Prerequisite: 22M:034. Same as 053:111.

058:112 Engineering Design Optimization 3 s.h.
Same as 053:112.

058:113 Mathematical Methods in Engineering 3 s.h.

058:115 Finite Element I 3 s.h.
One- and two-dimensional boundary value problems; heat flow, fluid flow, torsion of bars; trusses and frames; isoparametric mapping; higher order elements; elasticity problems; use of commercial software. Prerequisite: 057:019. Same as 053:133.

058:131 Manufacturing Systems 3 s.h.
Manufacturing as systems consisting of computer and microprocessor-based control systems; part design and manufacture using CAD/CAM, Pro/E; technical, quality, and economic trade-offs regarding the design, selection, and implementation of various degrees of computer aiding in manufacturing systems; computer numerical control (CNC) machining, automated material handling, automated assembly, flexible manufacturing systems. Offered spring semesters. Prerequisites: 056:032 and 056:171, or consent of instructor. Same as 056:131.

058:180 Enhanced Design Experience 3 s.h.
Experience working in teams on industry-sponsored design and product development projects scheduled for production; emphasis on practical experience with the complete design process, from conceptualization through prototyping, evaluation, testing, and production; written and oral communication. Prerequisites: 058:086 and consent of instructor.

058:214 Analytical Methods in Mechanical Systems 3 s.h.
Vector and function spaces; functionals and operators in Hilbert spaces; calculus of variations and functional analysis with application to mechanics; Ritz and Galerkin methods. Prerequisite: 058:113. Same as 053:214.

058:215 Finite Element II 3 s.h.
Computer implementation; plate and shell elements; mixed and hybrid formulations; nonlinear analysis; recent development; introduction to boundary element method. Prerequisite: 053:133. Same as 053:233.

Thermal Engineering and Fluids

058:040 Thermodynamics II 3 s.h.
Power and refrigeration cycles; mixtures of gases, psychometric mixtures; availability; thermodynamics of combustion and chemical equilibrium. Prerequisite: 059:009.

058:045 Heat Transfer 3 s.h.
Principles of heat transfer by conduction, convection, radiation; analytical and numerical methods of solution; applications to engineering problems. Prerequisites: 22M:034 and 057:020.

058:048 Energy Systems Design 4 s.h.
Principles and design of energy conversion systems, including solar, wind, and geothermal power systems; design of thermal-fluid system components, modeling and simulation of systems, optimization techniques; design projects. Prerequisites: 058:040 and 058:045.

058:140 Intermediate Thermodynamics 3 s.h.
Thermodynamics principles applied to phase equilibrium; properties of fluids, first and second law, variable composition systems, behavior of real fluids, mathematical techniques for thermodynamics. Prerequisite: 052:103 or 058:040. Same as 052:117.

058:143 Computational Fluid and Thermal Engineering 3 s.h.
Governing equations of fluid flow and heat transfer; basic numerical techniques for solution of the governing equations; estimation of accuracy and stability of the approximations; boundary conditions; grid generation; applications to flows and heat transfer in engineering systems; familiarity with software for analysis and design of thermo-fluids systems. Prerequisite: 058:045.

058:145 Intermediate Heat Transfer 3 s.h.
Steady and unsteady conduction; forced and natural convection; surface and gaseous radiation; condensation and evaporation; analytical and numerical methods and applications. Prerequisite: 058:045.
058:146 Modeling of Materials Processing 3 s.h.
Manufacturing processes for metals, polymers, semiconductors; processing by casting, solidification, crystal growth, polymer molding and extrusion, welding, heat treating, application of optical (laser) and electromagnetic energy; processes that use momentum, heat, mass transfer principles; measurement and instrumentation for materials processing; current topics in materials processing. Prerequisite: 058:045 or consent of instructor.

058:147 Fuel Cells 3 s.h.
Introduction to fuel cell designs and performance evaluation; thermodynamics, transport phenomena, and reaction fundamentals essential to understanding of the processes and phenomena that pose limits on fuel cell performance. Prerequisites: 058:040 and 058:045.

058:148 Combustion and Propulsion Engineering 3 s.h.
Chemical kinetics, thermodynamic equilibrium, transport equations; thermodynamics of fluid flows; laminar flames; basic gas turbine cycles; propulsion systems—open gas turbine cycles, turboprop, turbofan, turbojet, ramjet; supersonic inlets; nozzle flows; contemporary propulsion concepts. Prerequisite: 058:040 or graduate standing.

058:160 Intermediate Mechanics of Fluids 3 s.h.
Basic concepts and definitions; pressure distribution in a fluid; governing equations and boundary conditions; integral and differential analysis; dimensional analysis and similarity; experimental analysis; laminar and turbulent internal and external flows; potential flows; engineering applications. Prerequisites: 057:020 and 058:040. Same as 053:169.

058:162 Experimental Methods in Fluid Mechanics and Heat Transfer 3 s.h.
Review of theory; importance of experiments; modeling and scaling laws; experimental environment and facilities; measurements at full scale and on scaled models; use of wind and water tunnels, towing tanks, and hydraulic flumes; instruments for measuring pressure, temperature, velocity, turbulence; error analysis; data acquisition and processing; laboratory demonstrations, hands-on experiments; project. Prerequisite: 058:080 or equivalent. Same as 053:172.

058:163 Environmental Fluid Dynamics 3 s.h.
Environmental fluid flows in atmosphere, oceans, lakes, and rivers; contaminant transport; mixing, reaction and particle dispersion processes; application to natural and engineering systems. Prerequisite: 057:020. Same as 053:175.

058:165 Elements of Gas Flows 3 s.h.
Thermodynamics of compressible fluid flow, with applications of continuity, momentum, energy equations; normal and oblique shock waves; Prandtl-Meyer expansion waves; flow with variable and constant state; Fanno flow; compressible flow with and without heat transfer. Prerequisites: 057:020 and 058:040.

058:245 Diffusive Transport 3 s.h.
Diffusive transport of heat, mass, and momentum; phenomenological laws and analogies; analytical and numerical solution techniques; inverse heat conduction; multiphase and multicomponent systems. Prerequisite: 058:145. Same as 052:272.

058:248 Combustion Theory 3 s.h.
Laminar flame theory; turbulent combustion; spray combustion; thermal ignition; pollutant formation, oxidation; combustion diagnostics. Prerequisites: 058:145, 058:160, and graduate standing.

058:260 Viscous Flow 3 s.h.
Equations of viscous flow; classical analytical and numerical solutions; flow regimes and approximations; laminar boundary layers—equations, solution methods, applications; stability theory and transition; incompressible turbulent flow—mean-flow and Reynolds-stress equations, modeling, turbulent boundary layers and free shear flows. Prerequisite: 058:160. Same as 053:276.

058:262 Inviscid Flow 3 s.h.
Derivation of governing equations for fluid flow; general theorems for motion of inviscid, incompressible flows; solution techniques for two- and three-dimensional irrotational flows; forces and moments acting on immersed bodies; inviscid flow with vorticity; inviscid compressible flow; numerical methods for solution of inviscid flows. Prerequisite: 058:160. Same as 053:277.

058:264 Vortex Dynamics 3 s.h.
Dynamics of vorticity transport in incompressible flows; vortex patches, sheets, rings; vortex filament models; viscous vortex flows; vorticity-based computational methods; vortex reconnection, breakdown; applications to wake flows, turbulent coherent structures and aerodynamics. Prerequisite: 058:262.

058:266 Interfacial Flows and Transport Processes 3 s.h.
Physics of fluid interfaces and numerical techniques to simulate interface dynamics; interfacial flow coupled with thermal-fluid transport, from molecular interactions to continuum approximations; development of computer code segments to track and represent interface-flow interactions. Prerequisites: 058:145 and 058:160.

058:267 Multiphase Flow and Transport 3 s.h.
Thermodynamic and mechanical aspects of interfacial phenomena and phase transitions; nucleation, phase-change, species transport, particulate flows, liquid-vapor systems, solidification, porous media. Prerequisites: 058:145 and 058:160.

058:268 Turbulent Flows 3 s.h.
Origin; need for modeling, averages, Reynolds equations, statistical description; experimental methods and analysis; turbulence modeling; free shear layers and boundary layers; complex shear flows; development of computational strategies; recent literature on theory and applications, chaos phenomena. Prerequisite: 058:160.

058:269 Computational Fluid Dynamics and Heat Transfer 3 s.h.
Development of numerical and algebraic approximations for elliptic, parabolic, hyperbolic partial differential equations; finite-volume, spectral, pseudo-spectral, Galerkin techniques; stability of numerical methods; CFL condition; stiff problems; adaptive grid generation and boundary-fitted coordinates; numerical solutions for one- and two-dimensional compressible and incompressible fluid flow and heat transfer problems. Prerequisites: 058:111, 058:160, and graduate standing.

Thermodynamics, fluid mechanics, heat and mass transfer, related experimental and analytical techniques; selection of subject and content determined by instructor/student interest. Prerequisite: graduate standing.

Mechanical Systems

058:032 Design for Manufacturing 3 s.h.
Fundamentals of design, engineering graphics, and manufacturing processing; computer graphics using Pro/ENGINEER for CAD and CAM; typical industrial processes, including casting, welding, machining, forming; laboratory exercises and projects. Same as 051:062, 056:032.

058:052 Mechanical Systems 3 s.h.
Topics in stress, deflection, stiffness, statistics, reliability, material behavior, manufacturing processes, static and variable loads, fatigue strength in design analysis of mechanical systems; introduction to finite element analysis using established software. Prerequisite: 057:019. Corequisites: 225:039, 057:015, and 058:032.
058:055 Mechanical Systems Design 4 s.h.
Design considerations for mechanical engineering systems; strength, deformation, durability of mechanical elements; safe-life, fail-safe, damage-tolerant design; standards, products liability, ethics in design; data-acquisition/life-prediction experiment. Prerequisite: 058:052.

058:133 Control Theory 3 s.h.
State space approach; controllability, observability, canonical forms, Luenberger observers, feedback control via pole placement, stability, minimal realization and optimal control. Prerequisite: 055:060. Same as 055:160.

058:134 Computer-Based Control Systems 3 s.h.
Discrete and digital control systems; application of computers in control, sampling theorem, discrete time system models, analysis and design of discrete time systems, parameter estimation, examples of optimal and adaptive controls; lab arranged. Prerequisite: 055:060. Same as 055:164.

058:136 Digital Human Modeling and Simulation 3 s.h.
Same as 051:162.

058:150 Intermediate Mechanics of Deformable Bodies 3 s.h.
Application of equilibrium analyses, strain-displacement relations, and constitutive relationships to practical structural systems and elementary planar elasticity problems. Prerequisite: 057:019. Same as 051:131, 053:140.

058:152 Vehicle Dynamics and Simulation 3 s.h.
Vehicle dynamic response; suspension, steering, braking, and powertrain system design; computer-aided system simulation; tire modeling; acceleration and steady-state turning performance. Prerequisite: 057:010.

058:153 Fundamentals of Vibrations 3 s.h.
Vibration of linear discrete and continuous mechanical and structural systems; harmonic, periodic, and arbitrary excitation; modal analysis; applications. Prerequisite: 057:019. Same as 053:132.

058:154 Intermediate Kinematics and Dynamics 3 s.h.
Kinematic and dynamic analysis of unconstrained and constrained planar mechanical systems; computational kinematics, variational and Lagrangian dynamics, constrained dynamics. Prerequisite: 057:010. Corequisite: 058:052.

058:156 Mechanics of Robotics 3 s.h.
Introduction to robot components, types, power systems, mechanics, and control; homogeneous transformations, Denavit-Hartenberg formulation for serial kinematic chains, direct and inverse kinematics of serial manipulators, differential rotations and translations, manipulator Jacobian and inverse Jacobian, trajectory planning, position and force control of manipulators. Prerequisites: 22M:034, 057:010, and consent of instructor.

058:158 Fatigue/Durability in Design 3 s.h.
Macro- and micromechanisms of fatigue behavior, design of engineering materials/components/structures subjected to cyclic loading, emphasis on metals; stress-life, strain-life, linear elastic fracture mechanics approach to fatigue crack growth; safe-life, fail-safe, damage tolerant design; constant and variable amplitude life predictions; notches, residual stress, corrosion, temperature, multiaxial, weldments. Prerequisite: 051:085 or 058:055 or 058:150 or equivalent. Same as 053:148.

058:159 Fracture Mechanics 3 s.h.
3-D stress states, definition and criteria for failure, nominal and local yield phenomena, linear elastic and elastic plastic fracture mechanics, plane stress and plane strain fracture toughness, J-Integral, crack opening displacement, environmental assisted cracking, fatigue crack growth, fail safe, and damage tolerant design. Prerequisite: 051:085 or 058:055 or 058:150 or equivalent. Same as 053:149.

058:250 Advanced Fracture Mechanics 3 s.h.
Fracture of modern engineering materials; linear-elastic fracture; computational methods; functionally graded materials; elastic-plastic fracture; multiscale fracture and fatigue crack initiation. Prerequisites: 058:113, 058:115, and 058:159. Same as 053:250.

058:251 Computational Inelasticity 3 s.h.
Computational techniques and implementations for elastic, hyperelastic, elasto-plastic, visco-elastic, and visco-plastic material models; development of sound numerical integration algorithms from rate constitutive equations. Prerequisite: 053:241. Same as 053:243.

058:252 Advanced Continuum Mechanics 3 s.h.
Continuum mechanics of fluids and solids, balance laws, invariance restrictions, continuum thermodynamics, constraint theory, mixtures, materials with microstructure. Prerequisite: 058:262 or 058:279. Same as 053:247.

058:253 Computational Methods in Dynamics 3 s.h.
Computational methods for three-dimensional multirigid body systems; spatial kinematics and dynamics; constrained and recursive dynamics for closed-loop multi-chain systems. Prerequisite: 058:154.

058:254 Energy Principles in Structural Mechanics 3 s.h.
Principles of virtual work; stationary and minimum potential energy; calculus of variations; Ritz method, Galerkin’s method; beams, plates; Hamilton’s principle; elastic stability; extremum principle of plasticity. Prerequisites: 058:113 and 058:150. Same as 053:244.

058:255 Multiscale Modeling 3 s.h.
Computational modeling of engineering materials ranging from molecular to continuum scales, molecular dynamics and Monte Carlo methods, nanoscale continuum modeling, scale-coupling methods. Prerequisite: 058:115 or 058:143. Same as 053:249.

058:256 Computational Solid Mechanics 3 s.h.
Advanced computational methods for nonlinear and dynamic analysis of solids, structures; new space and time discretization methods for problems including highly nonlinearities, large deformation, contact/impact conditions. Prerequisites: 058:113 and 058:115, or equivalents.

058:257 Probabilistic Mechanics and Reliability 3 s.h.
Stochastic and reliability analysis of mechanical systems; computational methods for structural reliability; random eigenvalue problem; random field and stochastic finite element methods. Prerequisites: 058:113 and 058:115.

058:258 Continuum Mechanics and Plasticity 3 s.h.
Finite strain measures and rate of deformation; principles of isotropy and material indifference; constitutive equations of elastic and inelastic materials; internal variable theory of thermodynamics; endochronic theory of plasticity. Same as 053:246.

058:259 Mechanical Design in Structures 3 s.h.
Discrete and continuum variational equilibrium equations, discrete design sensitivity analysis for static responses and eigenvalues, interactive design workstation, continuum sizing design sensitivity analysis for static responses and eigenvalues, design sensitivity analysis of structural dynamics, differentiability theory, shape optimal design, shape design sensitivity analysis, design sensitivity of nonlinear structural systems. Prerequisites: 058:113, 058:115, and 058:150.

058:270 Micromechanics of Solids 3 s.h.
Local micromechanics and Eshelby’s inclusion theory; homogenization procedures of heterogeneous materials; effective elastic, visco-elastic, and plastic behavior of composites; micromechanics of other advanced materials; computational micromechanics. Prerequisite: 053:241 or 058:279. Same as 053:245.
058:271 Elastic Waves in Solids  3 s.h.
Same as 051:248, 053:248.

058:279 Continuum Mechanics and Elasticity  3 s.h.
Cartesian tensors and geometrical foundations; concept of stress, strain, motion; fundamental physical laws; constitutive equations and finite elasticity; equations of linear elasticity, elastic extension, torsion and bending of bars. Prerequisite: 057:019. Corequisite: 058:113 or graduate standing. Same as 053:241.

058:295 Advanced Topics in Mechanical Systems  3 s.h.
Advanced contemporary topics in mechanical systems engineering not covered in other courses and determined by student/faculty interest.

**Graduate Seminars, Advanced Topics, Research**

058:191 Graduate Seminar: Mechanical Engineering  0 s.h.
Presentation and discussion of recent advances and research in mechanical engineering by guest lecturers, faculty, students. Prerequisite: graduate standing.

058:195 Contemporary Topics in Mechanical Engineering  arr.
New topics in fluid and thermal sciences and mechanical systems not covered in other courses; topic and coverage determined by student/faculty interest. Prerequisite: junior standing.

Individual project in mechanical engineering, for department graduate students; laboratory study, engineering design project, analysis and simulation of an engineering system, computer software development, research. Prerequisites: graduate standing and consent of advisor.

Experimental and/or analytical investigation of an approved topic for partial fulfillment of requirements for M.S. thesis in mechanical engineering. Prerequisites: graduate standing and consent of advisor.

Experimental and/or analytical investigation of an approved topic for partial fulfillment of requirements for Ph.D. in mechanical engineering. Prerequisite: consent of advisor.

Web site: http://www.grad.uiowa.edu

The University of Iowa has been a leading center of advanced study for more than a century. Presently, the Graduate College accounts for nearly one-fifth of the University’s total enrollment. This high ratio reflects the breadth of the University’s graduate programs and resources, the strength of a graduate faculty with a long tradition of personal and professional concern for students, and the opportunities afforded graduate students for involvement, recognition, and support.

The Graduate College is responsible for the review and approval of proposals for new graduate programs and for the periodic survey and evaluation of existing programs. Through its administration of scholarship, fellowship, and research assistantship funds, the college encourages research and strengthening of departments. In cooperation with the Office of the Vice President for Research, it offers assistance to individual faculty members in finding the resources necessary for research projects, and it works with the other colleges and departments of the University to formulate policies concerning selection, supervision, and support of graduate students.

The faculty of the Graduate College is made up of all University tenure-track faculty members at the ranks of assistant professor, associate professor, and professor. A 17-member Graduate Council, elected from and by the graduate faculty and the Graduate Student Senate, is the executive committee of the graduate faculty and is advisory to the dean of the Graduate College.

Degrees Offered

The Graduate College confers the Master of Arts (M.A.), Master of Science (M.S.), Master of Accountancy (M.Ac.), Master of Arts in Teaching (M.A.T.), Master of Computer Science (M.C.S.), Master of Fine Arts (M.F.A.), Master of Health Administration (M.H.A.), Master of Physical Therapy (M.P.T.), Master of Public Health (M.P.H.), Educational Specialist (Ed.S.), Master of Science in Nursing (M.S.N.), Master of Social
Work (M.S.W.), Doctor of Philosophy (Ph.D.),
Doctor of Musical Arts (D.M.A.), Doctor of
Physical Therapy (D.P.T.), and Doctor of
Audiology (Au.D.) degrees.

The college currently confers degrees in the
following major fields.

Accounting—M.Ac.**
African American World Studies—M.A.*
American Studies—M.A.*, Ph.D.
Anatomy and Cell Biology—M.S., Ph.D.
Anthropology—M.A.*, Ph.D.
Applied Mathematical and Computational
Sciences—Ph.D.
Art—M.A.*, M.F.A.
Art History—M.A.*, Ph.D.
Asian Civilizations—M.A.*
Astronomy—M.S.*
Biochemistry—M.S., Ph.D.
Biology—M.S.*, Ph.D.
Biomedical Engineering—M.S.*, Ph.D.
Biostatistics—M.S.*, Ph.D.
Business Administration—M.A.*, Ph.D.
Chemical and Biochemical Engineering—M.S.*, Ph.D.
Chemistry—M.S.*, Ph.D.
Civil and Environmental Engineering—M.S.*, Ph.D.
Classics—M.A.**, Ph.D.
Clinical Investigation—M.S.*
Communication Studies—M.A.*, Ph.D.
Community and Behavioral Health—M.S., Ph.D.
Comparative Literature—M.A.*, Ph.D.
Comparative Literature-Translation—M.F.A.
Computer Science—M.S.*, M.C.S.**, Ph.D.
Counseling, Rehabilitation, and Student
Development—M.A.*, Ph.D.
Dance—M.F.A.
Dental Public Health—M.S.
Economics—M.A.*, Ph.D.
Educational Policy and Leadership
Studies—M.A.*, Ed.S.**, Ph.D.
Electrical and Computer Engineering—M.S.*, Ph.D.
English—M.A.*, M.F.A., Ph.D.
Epidemiology—M.S.*, Ph.D.
Exercise Science—M.S.*, Ph.D.
Film and Video Production—M.A.*, M.F.A.
Film Studies—M.A.*, Ph.D.
Free Radical and Radiation Biology—M.S.*, Ph.D.
French—M.A.*, Ph.D.
Genetics—Ph.D.
Geography—M.A.*, Ph.D.
Geoscience—M.S.*, Ph.D.
German—M.A.*, Ph.D.
Greek—M.A.**
Health and Sport Studies—M.A.*, Ph.D.
Health Management and Policy—M.H.A.**, Ph.D.
Health Services and Policy—Ph.D.
History—M.A.*, Ph.D.
Human Toxicology—M.S., Ph.D.
Immunology—Ph.D.
Industrial Engineering—M.S.*, Ph.D.
Informatics—M.S.*, Ph.D.
Integrative Physiology—Ph.D.
Journalism—M.A.*
Latin—M.A.**
Leisure Studies—M.A.*
Library and Information Science—M.A.*
Linguistics—M.A.*, Ph.D.
Mass Communications—Ph.D.
Mathematics—M.S.*, Ph.D.
Mechanical Engineering—M.S.*, Ph.D.
Microbiology—M.S., Ph.D.
Molecular and Cellular Biology—Ph.D.
Molecular Biology—Ph.D.
Molecular Physiology and Biophysics—M.S.*, Ph.D.
Music—M.A.*, M.F.A., D.M.A., Ph.D.
Neuroscience—Ph.D.
Nursing—M.S.N.*, Ph.D.
Occupational and Environmental Health—M.S.*, Ph.D.
Operative Dentistry—M.S.
Oral and Maxillofacial Surgery—M.S.
Oral Science—M.S., Ph.D.
Orthodontics—M.S.
Pathology—M.S.
Pharmacology—M.S., Ph.D.
Pharmacy—M.S.*, Ph.D.
Philosophy—M.A.*, Ph.D.
Physical Rehabilitation Science—Ph.D.
Physical Therapy—M.A.*, D.P.T.
Physics—M.S.*, Ph.D.
Physiology and Biophysics—M.S.*, Ph.D.
Political Science—M.A.*, Ph.D.
Preventive Medicine and Environmental
Health—M.S.*, Ph.D.
Psychological and Quantitative
Foundations—M.A.*, Ed.S.**, Ph.D.
Psychology—M.A.*, Ph.D.
Public Health—M.P.H.**
Religious Studies—M.A.*, Ph.D.
Russian—M.A.***
Science Education—M.S.*, M.A.T.**, Ph.D.
Second Language Acquisition—Ph.D.
Social Work—M.S.W.*, Ph.D.
Sociology—M.A.*, Ph.D.
Spanish—M.A.*, Ph.D.
Speech and Hearing Science—Ph.D.
Speech Pathology and Audiology—M.A.*, Au.D.
Statistical Genetics—Ph.D.
Statistics—M.S.*, Ph.D.
Stomatology—M.S.
Teaching and Learning—M.A.*, M.A.T.**, Ph.D.
Interdisciplinary Degree Programs

The Graduate College participates in a number of University of Iowa interdisciplinary degree programs. Detailed information about the following master’s and doctoral degree programs is provided later in this section of the Catalog: Applied Mathematical and Computational Sciences, Genetics, Human Toxicology, Immunology, Informatics, Library and Information Science, Molecular and Cellular Biology, Neuroscience, Second Language Acquisition, Translational Biomedicine, and Urban and Regional Planning.

Interdisciplinary Master’s and Doctoral Programs

In addition to the degree programs listed above, the graduate faculty has authorized the awarding of interdisciplinary master’s and doctoral degrees. Students seeking approval for interdisciplinary master’s and doctoral programs must previously have been admitted to and enrolled in a departmental program in the Graduate College. See sections X.A. and XII.D. in Manual of Rules and Regulations of the Graduate College on the college’s web site or in this section of the Catalog.

Joint Degree Programs

Joint Law and Graduate Degrees

Joint programs under which students can pursue degrees simultaneously in the College of Law and the Graduate College have been developed with the law college and a number of departments in the Graduate College. See College of Law in the Catalog.

Joint Programs Offered Through the Graduate College

Various joint programs have been developed whereby students work simultaneously toward two advanced degrees. Consult the appropriate Catalog sections for more information. Established joint programs include business administration/library and information science; health management and policy/business administration; health management and policy/urban and regional planning; social work/urban and regional planning; occupational and environmental health/urban and regional planning; public health/nursing; public health/medicine; and business administration/nursing.

Joint B.S.E./M.S. in Biomedical Engineering

The Graduate College and the College of Engineering offer a joint B.S.E./M.S. program in biomedical engineering. The program allows students to take a limited number of courses that count toward both the B.S.E. and M.S. degree requirements, to attend and participate in the departmental graduate seminar, and to work on a master’s thesis or research project before they have been awarded a baccalaureate degree. See Biomedical Engineering in the Catalog.

Joint B.S.E./M.S. in Civil and Environmental Engineering

The Graduate College and the College of Engineering offer a joint B.S.E./M.S. program in civil and environmental engineering. The program allows students to take a limited number of courses that count toward both the B.S.E. and M.S. degree requirements, to attend and participate in the departmental graduate seminar, and to work on a master’s thesis or research project before they have been awarded a baccalaureate degree. See Civil and Environmental Engineering in the Catalog.

Joint B.A./M.C.S. or B.S./M.C.S.

The Graduate College and the College of Liberal Arts and Sciences offer a joint B.A./M.C.S. or B.S./M.C.S. program in computer science. The
program allows students to count 12 s.h. of course work, typically advanced technical courses and electives, toward both the bachelor’s and the M.C.S. degree requirements. See Computer Science (College of Liberal Arts and Sciences) in the Catalog.

**Joint B.A./M.A. in German**

The Graduate College and the College of Liberal Arts and Sciences offer a joint B.A./M.A. program in German. The program permits students to take 12 s.h. of course work that fulfills both B.A. and M.A. degree requirements and provides an opportunity for early entrance to advanced courses in German. See German (College of Liberal Arts and Sciences) in the Catalog.

**Joint B.S.E./M.S. in Industrial Engineering**

The Graduate College and the College of Engineering offer a joint B.S.E./M.S. program in industrial engineering. The program allows students to begin earning graduate credit (6 s.h. may be applied toward both the B.S.E. and M.S. degree requirements), to attend one of the department's graduate seminars, and to work on master's thesis research before they have been awarded a baccalaureate degree. See Mechanical and Industrial Engineering in the Catalog.

**Joint B.A./M.A. in Linguistics**

A joint B.A./M.A. program in linguistics with a specialization in Teaching English as a Second Language (TESL) is offered by the Graduate College and the College of Liberal Arts and Sciences. The program permits students to take a limited number of courses that fulfill both B.A. and M.A. degree requirements and provides for early entrance to advanced courses in linguistics. Joint B.A./M.A. students also may gain experience teaching ESL at the college level early in their graduate careers. See Linguistics (College of Liberal Arts and Sciences) in the Catalog.

**Joint B.S.E./M.S. in Mechanical Engineering**

The Graduate College and the College of Engineering offer a joint B.S.E./M.S. program in mechanical engineering. The program allows students to begin earning graduate credit (6 s.h. may be applied toward both the B.S.E. and M.S. degree requirements), to attend a graduate seminar, and to participate in master's research before they have been awarded a baccalaureate degree. See Mechanical and Industrial Engineering in the Catalog.

**Joint B.S.N./M.S.N. or RN-B.S.N./M.S.N.**

The Graduate College and the College of Nursing offer a joint B.S.N./M.S.N. or RN-B.S.N./M.S.N. program that provides an avenue for exceptional B.S.N. students to progress rapidly toward completion of the M.S.N. degree. The joint program permits students to count 12 s.h. of course work, typically the four M.S.N. core courses, toward both the B.S.N. and the M.S.N. degree requirements. See College of Nursing in the Catalog.

**Joint D.V.M./M.P.H.**

The University of Iowa Graduate College and the College of Public Health, in collaboration with Iowa State University's College of Veterinary Medicine, offer the joint D.V.M./M.P.H. program. This dual degree requires students to be accepted into the D.V.M. program as a condition of acceptance into the combined degree program. Once admitted, a student may use course work credit to fulfill elective requirements in both programs. Students may apply 18 s.h. of public health course work toward the D.V.M. degree (which requires a total of 150 s.h.), and 9 s.h. of veterinary medicine degree course work toward the M.P.H. degree (which requires a total of 39 s.h.). The degrees generally are awarded conjointly. See Master of Public Health Program in the Catalog.

**Joint M.D./M.P.H.**

The Graduate College, the Carver College of Medicine, and the College of Public Health offer the M.D./M.P.H. degree program. Students in the program earn credit toward the Master of Public Health while pursuing the Doctor of Medicine. The degrees are awarded conjointly. See Carver College of Medicine and Master of Public Health Program in the Catalog.

**Joint M.S.N./M.P.H.**

The Graduate College, the College of Nursing, and the College of Public Health offer the joint M.S.N./M.P.H. program for students interested
in preparing for professional activities in nursing and public health. In addition to core and elective course work, students are required to complete work in one of four M.S.N. focus areas and to participate in a capstone experience. The M.S.N. and M.P.H. degrees are awarded conjointly. See College of Nursing and Master of Public Health Program in the Catalog.

**Joint Pharm.D./M.P.H.**

The Graduate College, College of Pharmacy, and College of Public Health offer the joint Pharm.D./M.P.H. program. The joint program provides formal education and training in public health for pharmacy students, enabling them to develop expertise in public health related to pharmacotherapy, health promotion, disease prevention, and medication safety. See College of Pharmacy and Master of Public Health Program in the Catalog.

**Joint M.A./Certificate in Library and Information Science and Book Studies**

The joint M.A. in library and information science and Certificate in Book Studies/Book Arts and Technologies prepares students for careers in special collections librarianship. The 51 s.h. program trains individuals to manage varied types of special collections, such as rare books, manuscripts, archives, graphics, music, and ephemera. Successful completion of the program is noted on the student’s transcript. See Center for the Book and Library and Information Science (both Graduate College) in the Catalog.

**Joint M.D./Ph.D. in the Medical Scientist Training Program**

The Medical Scientist Training Program (MSTP) is an interdisciplinary M.D./Ph.D. program offered jointly by the Carver College of Medicine and the Graduate College. See Medical Scientist Training Program (Carver College of Medicine) in the Catalog.

**Certificate Programs**

The Graduate College participates in a number of University of Iowa certificate programs. See Rhetorics of Inquiry and Transportation Studies (both Graduate College) in the Catalog for detailed information about certificates in those programs.

**Advanced Practice Nursing**

The post-master’s degree Certificate in Advanced Practice Nursing allows for advanced clinical training in four specialty tracks: pediatric nurse practitioner, adult/gerontology nurse practitioner, family nurse practitioner, and psychiatric/mental health nursing. Certificate requirements include advanced clinical core courses and a sequence of specialty courses. Successful completion of the specialty sequence qualifies a student to sit for certification as a nurse practitioner and/or a clinical nurse specialist. Completion of the certificate program is noted on the student’s transcript. See College of Nursing in the Catalog.

**Aging Studies**

The Aging Studies Program is a multidisciplinary nondegree certificate program administered by the College of Liberal Arts and Sciences in cooperation with other University of Iowa colleges. The 21 s.h. program is designed to complement graduate degree programs for students with academic, professional, research, or service career interests in aging. Successful completion of the Certificate in Aging Studies is noted on the student’s transcript. See Aging Studies (College of Liberal Arts and Sciences) in the Catalog.

**American Indian and Native Studies**

The American Indian and Native Studies Program offers an interdisciplinary certificate program focusing on the histories, cultures, languages, arts, crafts, beliefs, political and social organizations, economies, geographies, literatures, and contemporary legal and political concerns of Native Americans of the United States as well as other indigenous peoples of the Western Hemisphere. Successful completion of the Certificate in American Indian and Native Studies is noted on the student’s transcript. See American Indian and Native Studies (College of Liberal Arts and Sciences) in the Catalog.

**Book Studies/Book Arts and Technologies**

The Certificate in Book Studies/Book Arts and Technologies offers an interdisciplinary approach to study of the relationship between the book in
culture and the arts and technologies of book production. It also provides opportunities for artistic and craft-based studio, laboratory, or academic investigations. The certificate may be earned in conjunction with graduate degrees in art, English, history, library and information science, and other disciplines. Successful completion of the program is noted on the student’s transcript. See Center for the Book (Graduate College) in the Catalog.

Clinical Investigation

The Certificate in Clinical Investigation is designed for clinicians who seek advanced training in clinical methodology and applied patient-oriented research skills. Certificate requirements include didactic course work, clinical research preceptorships, and clinical research seminar participation. Students in the certificate program must be practicing academic clinicians who have completed doctoral training. Successful completion of the program is noted on the student’s transcript. See Carver College of Medicine and College of Public Health in the Catalog.

Global Health Studies

The interdisciplinary Global Health Studies Program emphasizes international health problems and solutions in the developing and developed worlds, including the United States. Requirements for the Certificate in Global Health Studies include core courses, electives, foreign study and/or internship, a research project, and foreign language skills. Students do not need special health science courses to participate. Completion of the certificate program is noted on the student’s transcript. Both the College of Liberal Arts and Sciences and the Graduate College award a Certificate in Global Health Studies. See Global Health Studies (College of Liberal Arts and Sciences) in the Catalog.

Graduate Teaching

The Certificate in Graduate Teaching provides overarching administration and structure that complements discipline-oriented graduate teaching preparation programs. The 12 s.h. program has three parts: course work, teaching experience, and preparation of a teaching portfolio. It is open only to graduate students enrolled in degree programs. Formal application is made through the Graduate College. Completion of the certificate is noted on the student’s transcript.

Informatics

The Certificate in Informatics is an interdisciplinary collaboration that offers formal subtracks in health informatics, information science, and bioinformatics and computational biology. Graduate students working toward a degree may earn the certificate, which requires a minimum of 18 s.h., including 9 s.h. earned in foundations of informatics and 9 s.h. earned in disciplinary applications of informatics. Completion of the certificate program is noted on the student’s transcript. For more information, see Informatics (Graduate College) in the Catalog.

Nursing Informatics

The Certificate in Nursing Informatics focuses on data, information, and knowledge of management in nursing. It familiarizes students with the development, support, and evaluation of applications, tools, processes, and structures that help nurses manage data in direct patient care and administrative and management support systems. The program is available for master’s, post-master’s, doctoral, and postdoctoral students. Completion of the certificate program is noted on the student’s transcript. See College of Nursing in the Catalog.

Nursing Service Administration

The Certificate in Nursing Service Administration is designed to upgrade the skills and expertise of nurses practicing in management and nursing administration. Certificate requirements include advanced nurse manager core courses and related support courses. The program is open to postbaccalaureate, master’s, post-master’s, and doctoral students. Completion of the certificate program is noted on the student’s transcript. See College of Nursing in the Catalog.

Sacred Music

The Certificate in Sacred Music is an interdisciplinary program with course offerings in sacred music, choral conducting/literature, keyboard, voice, religion, and art and art history. Students may earn the 25 s.h. certificate while working toward a graduate degree; or with prior admission to the Graduate College and consent of the faculty advisor for the certificate, they may complete the certificate apart from pursuit of a graduate degree. Successful completion of the certificate program is noted on the student’s
transcript. See Music (College of Liberal Arts and Sciences) in the Catalog.

**Statistical Genetics**

The Certificate in Statistical Genetics prepares master’s-level students to conduct genetic data analyses. The program may be completed in conjunction with or following receipt of a master’s degree in biostatistics or a related field. Certificate requirements include five courses and a preceptorship, for a total of 16 s.h., with a g.p.a. of 3.00 or higher. Successful completion of the program’s requirements is noted on the student’s transcript. See Public Health Genetics in the Catalog.

**Film and Critical Studies in Paris**

The University of Iowa is one in a consortium of 21 colleges and universities associated with the Council on International Educational Exchange (CIEE), which sponsors the Film Studies Program and the Contemporary Criticism and Culture Program. These are two unique academic opportunities offered at the Centre Universitaire Américain du Cinéma et de la Critique à Paris.

The Film Studies Program is designed to explore film theory and analysis—not to train filmmakers or technicians. The curriculum provides courses and seminars in film theory, formal structures, history, and ideology. Participants study the relationships between film and other art forms, film culture, film and language, and film and psychoanalysis. Students discuss the evolution of the early cinema; the silent films of Griffith, Lang, Eisenstein, and Keaton; the classic Hollywood film; French cinema during and after the transition to sound; and European and American avant-garde cinemas. Participants study the works of Metz, Freud, Barthes, Lacan, Althusser, Foucault, and others to gain an understanding of contemporary French culture, mass media, and the visual arts.

The Contemporary Criticism and Culture Program focuses on recent developments in French political thought and social institutions, linguistics, social sciences, and literary theory. It draws on recent theoretical concepts in the fields of linguistics, psychoanalysis, anthropology, history, and philosophy to analyze verbal and audiovisual representations in literature, painting, photography, film, and television. The interdisciplinary nature of this program makes it relevant not only to French majors but also to students of other disciplines concerned with the problems of criticism and culture. It is of particular value to those who want to explore the applicability of modernist French theory to a variety of disciplines.

The program also permits specialization in history, characterized by the application to historical research of insights from other fields, such as linguistics, cultural geography, anthropology, sociology, and economics. Particularly distinctive in the French historical approach has been a preoccupation with the long-term evolution of populations and the social, economic, and cultural development of groups of ordinary people, seen in their urban or regional contexts.

Students may concentrate in one of these programs entirely or develop an individual program combining elements from both study center components.

Participating students are registered in the University of Paris III—Censier and are eligible to take selected courses within the University of Paris as well as those sponsored directly by the center. The program is open to both undergraduate and graduate students from The University of Iowa. For more information, contact the Department of Cinema and Comparative Literature.

**Women in Science and Engineering**

Women in Science and Engineering (WISE) is dedicated to expanding and improving educational and professional opportunities for women in STEM disciplines (science, technology, engineering, and mathematics). The program aims to provide academic support, promote professional development, facilitate research opportunities, engage in community outreach, and encourage global cooperation.

WISE provides academic support by promoting activities that motivate and encourage undergraduate and graduate students to complete degrees and pursue careers in scientific and technical fields. It supports the recruitment and retention of women students, staff, and faculty and the full participation of women and precollege girls in gender-equitable educational programs that focus on science and engineering. The program facilitates professional development by promoting activities that empower women scientists, engineers, mathematicians, and health professionals to achieve success and assume leadership positions in their careers.

WISE encourages global cooperation by supporting activities that prepare women to enter
the international STEM workforce, that support academic partnerships with foreign institutions, and that encourage scholarship and professional development of foreign women in STEM disciplines on the University of Iowa campus.

For more information on WISE goals and activities, visit the Women in Science and Engineering web site (http://www.uiowa.edu/wise).

**WISE Learning Community**

The WISE Learning Community is open to first- and second-year women students with majors in STEM disciplines. It provides a quiet living space and a built-in support system for making a seamless transition from high school to college.

WISE offers social support programs, free tutoring for difficult classes, opportunities to shadow professionals on the job, and community building events such as Sunday night dinners with guest speakers.

**WISE Ambassadors**

The WISE Ambassadors are graduate and undergraduate women who perform volunteer service projects that focus on service, leadership, and professional development. The ambassadors plan career exploration programs in STEM disciplines, such as tours of varied companies, industries, and health organizations; engage in community outreach activities; and participate in programs with organizations such as Girl Scouts.

**Eunice Beam WISE Travel Grants**

The WISE travel grant program awards funds that enable doctoral students to present their work at meetings, symposia, conferences, and other professional and academic gatherings. For information on eligibility and application, visit the Women in Science and Engineering web site (http://www.uiowa.edu/wise).

**Professional Development Workshops**

Women in Science and Engineering collaborates with University of Iowa departments and programs to offer professional development workshops keyed to the needs of doctoral candidates and postdoctoral fellows. Topics include developing a research statement and teaching philosophy; negotiating a first tenure-track faculty position; collegiality; creating inclusive classrooms; preparing ePortfolios in science and engineering disciplines; and responding effectively to reviewer comments.

**WISE Resource Library**

Women in Science and Engineering sponsors a library that houses books, reports, periodicals, CDs, and DVDs. The collection includes materials on mentoring, two-career couples, gender-equitable curricula, the digital divide, and chilly climate. It also contains books on women scientists and engineers, Nobel Prize winners, and career exploration.

**WISE Newsletter**

The WISE newsletter features articles, interviews, updates on WISE programs, and information about new initiatives. Current and back editions are available on the Women in Science and Engineering web site (http://www.uiowa.edu/wise).

**Research Resources**

Many of the University’s diverse research activities are centrally administered by the Office of the Vice President for Research, which has a cooperative relationship with the Graduate College.

**Financial Support**

Approximately half of the University’s graduate students receive some form of University-administered financial assistance. For eligibility requirements and application procedures, see “Section VII. Graduate Appointments” in the Manual of Rules and Regulations of the Graduate College. The following are the primary sources of assistance.

**Teaching and Research Assistantships**

Teaching and research assistantships are available in most departments. Assistantship stipends typically range between $16,277 for a half-time academic-year appointment and $19,894 for a half-time fiscal-year appointment; assistants also are eligible for tuition scholarships. Assistants (one-quarter-time or more) are classified as residents for fee purposes.

**Iowa Arts Fellowships**

Iowa Arts Fellowships are for first-year University of Iowa graduate students entering M.F.A. programs. Typical stipends are $15,000 for the academic year, with all tuition and fees paid, for as many as two years (the second year being contingent on demonstrated exceptional progress.
toward completion of the M.F.A.]. There are no departmental service obligations.

**Iowa Performance Fellowships**

Iowa Performance Fellowships are for first-year D.M.A. candidates in a performance area of music. Recipients are nominated by the School of Music. Awards include academic-year fellowships ($15,000 year one, $7,993 years two and three), summer fellowships ($2,000 years one and two), and all tuition and fees. The School of Music provides a 25 percent teaching or research assistantship ($7,993) in years two and three.

**Dean’s Graduate Fellowships**

Dean’s Graduate Fellowships are awarded to first-year graduate students from underrepresented ethnic minority groups. Doctoral students receive a 12-month stipend of $21,000 plus tuition and fees for the academic year; master’s students receive a 10-month stipend of $16,000 plus tuition and fees for up to two academic years.

**Presidential Graduate Fellowships**

Presidential Graduate Fellowships provide five-year awards for doctoral students on a year-round basis. Typical stipends are $23,000 per year plus full tuition and fees for as many as four years; in their final year, awardees receive $25,000 with all tuition and fees paid. Recipients have no assignments and are free to pursue their own studies, research, and writing full-time for two of the five years and all summers.

**Graduate College Summer Fellowships**

Graduate College Summer Fellowships are for advanced doctoral students who have academic-year appointments and have completed at least two years in a graduate program at The University of Iowa at the time of application for the award. Priority is given to postcomprehensive students. Awards provide a summer stipend of $3,000 plus tuition and standard fees for up to 2 s.h. Awardees must enroll for the six-week or eight-week summer session; enrollment in the three-week summer session does not qualify.

**T. Anne Cleary International Research Fellowships**

The T. Anne Cleary International Research Fellowships are for doctoral students who have completed their comprehensive examinations. They are to be used for dissertation research outside the United States. The awards vary from $500 to $15,000 and are meant to supplement other research funds. Doctoral students in any discipline may apply.

**Seashore and Ballard Dissertation Fellowships**

Seashore and Ballard Dissertation Fellowships are for doctoral students in the humanities and social sciences who have completed all doctoral degree requirements except their dissertation. Recipients are nominated by their departments. Fellowships provide up to 12 months of funding, including $1,500 per month plus tuition for up to 2 s.h., fees, and a health insurance allowance.

**Scholarships**

Scholarships provide up to full tuition and fees.

**GRADUATE STUDENT TRAVEL AWARDS**

Graduate student travel awards provide reimbursement for travel by students who present research and scholarship results to professional conferences. Awards are competitive across disciplines and vary from $200 to $400. Funds are administered by the Graduate Student Senate and the Graduate College.

**Other Sources**

For other sources of financial support, contact the Office of Student Financial Aid.

Many departments offer additional support through traineeships, part-time employment in research, or part-time teaching appointments. The Office of the Vice President for Research maintains a library of information on public and private agencies that provide funds for research and graduate study. Much material has been collected concerning awards for overseas study.

**Graduate Student Senate**

The Graduate Student Senate is the University graduate student body representative organization. Representatives are elected annually from each University department that has a graduate degree program. The senate’s primary purpose is to serve the interests of the graduate student body in matters affecting its welfare. The senate advises the dean of the Graduate College on matters pertaining to the college.
Manual of Rules and Regulations of the Graduate College

The following text is from the Manual of Rules and Regulations of the Graduate College. The most up-to-date version of this manual is available online; see “Current Students” on the Graduate College web site.

The Academic Program

Section I. Admission to the Graduate College

A. APPLICATION PROCEDURE

All students seeking to register for the first time in the Graduate College of The University of Iowa must secure formal admission from the director of Admissions. Applicants may obtain the proper forms from the Office of Admissions. Prospective students may also download the application or apply online from the admissions web site.

In addition to these forms, official transcripts, test scores, and other supporting material must be submitted by the designated deadline prior to the session in which admission is expected. Specific deadline dates will be established by the dean of the Graduate College and the director of Admissions and printed in the Catalog and elsewhere.

B. ADVANCED MEASUREMENT TESTS

Beginning with the fall 2007 semester, each graduate program will determine which, if any, advanced measurement test(s) will be required of the applicants to the program. Examples of such examinations include the General (Aptitude) Test of the Graduate Record Examination (GRE), the GRE Subject (Advanced) Tests, and the Graduate Management Admission Test (GMAT). For those departments or programs that choose to require an examination, the examination must be required for all students; there cannot be exempt categories. Additionally, a final admission decision will not be made by the Office of Graduate Admissions until the student’s scores have been received. The judgment of acceptable levels of performance on these tests, and the weight of such scores in the overall decision-making process, is left to the department or program.

C. ENGLISH FOR INTERNATIONAL STUDENTS

Prior to consideration for admission, international student applicants whose native language is other than English must take and pass TOEFL (Test of English as a Foreign Language), unless they have received a degree from an accredited college or university in the United States, the United Kingdom, Canada (except Quebec), Australia, or New Zealand. The examination is given at various times of the year and in many centers throughout the world. Inquiries should be addressed to the director, TOEFL, Educational Testing Service, Princeton, New Jersey 08541.

International students transferring from unfinished degree programs of other universities in the United States who have not taken this examination, or who have received a score lower than the minimum established by the Graduate College dean, must take the TOEFL examination and receive a passing score prior to consideration for admission.

Students who barely pass the established minimum on the TOEFL will be required to sit for an English evaluation upon arrival in Iowa City. The Graduate College will require these students to take and pass recommended course work in English usage at The University of Iowa designed especially for international students.

D. EARLY ADMISSION

A student who is within 6 s.h. of having satisfied all the requirements for the bachelor’s degree at The University of Iowa or any other accredited college may be given provisional admission.

E. CANDIDACY

Admission to the Graduate College is not the equivalent of acceptance as a candidate for an advanced degree, which must be earned through work successfully completed at The University of Iowa. (See “Section X. Master’s Degrees” and “Section XII. Doctor’s Degrees.”)

F. DECLARATION OF MAJOR AND DEGREE

Every applicant for admission must indicate on the application form the department or program of major interest and the degree, certificate, or professional objective he or she intends to pursue. The only exceptions to this regulation are the limited number of applicants registered as nondegree (“special”) students. (See definition of nondegree status in next section.) Changes in the major or degree status may be made in the course of a student’s graduate study with the approval of the department to which the transfer is proposed. To initiate such action, the student
must file a change of major or degree status in the Office of Admissions.

**G. ADMISSION REQUIREMENTS AND STATUS**

Graduates of any college or university accredited by regional accrediting associations may be admitted to the Graduate College if their academic records meet the required standards. Upon admission, all students fall into one of the following three categories:

1. **Regular**—For students who have met the minimum requirements for admission and who have been accepted by a department, or interdepartmental degree program, for work leading to a graduate degree or certificate or for professional improvement. The minimum g.p.a. for admission as a regular student to all graduate programs is 3.00.

Departments or programs may petition the Graduate College dean for admission of a student whose g.p.a. is lower than 3.00, if there is sufficient evidence of the student’s academic and/or professional achievement indicating his/her potential for success in a graduate program.

Departments, or committees in charge of interdepartmental degree programs, may, and often do, set higher minimum admission requirements than those set forth above for the Graduate College as a whole. Information concerning departmental or program requirements may be obtained directly from the executive of the department concerned.

2. **Conditional**—Students who are interested in working toward a graduate degree or certificate but who are required by a department to demonstrate their ability to do satisfactory graduate work before being admitted to regular status. To be admitted on a conditional basis, the student must be recommended by a department, which will assume responsibility for advising him or her. The student on conditional status must achieve regular status within two sessions of registration in the Graduate College by attaining a g.p.a. of at least 3.00 and acceptance by the major department, or be dismissed.

3. **Nondegree (Special)**—Students with a valid bachelor’s degree and at least a 2.50 g.p.a. are eligible to register for a total of no more than two courses per semester. In addition, a nondegree student may not accumulate more than two courses within a given department/program under this classification. These students must be approved for admission by the Graduate College and the Office of Admissions. Nondegree graduate students are not eligible for a graduate degree.

**H. ADMISSION OF FACULTY MEMBERS TO GRADUATE STUDY**

Persons who hold faculty rank of assistant professor (including clinical assistant professor) or above at The University of Iowa may be admitted as nondegree students. (See “Section G” above.) A person holding faculty rank as specified above may petition the Graduate College dean for permission to enter a departmental program for work leading to an advanced degree, certificate, or professional improvement except in the department of his or her appointment or a closely related department. Such petitions must have prior approval of the department of appointment, dean of the college of appointment, the department in which study is to be pursued, and the Graduate College.

**I. READMISSION**

Students who are admitted to and enroll in the Graduate College, but who then fail to register for a period of 36 months or more, must apply for readmission. Their acceptance is dependent upon departmental approval for the session in which readmission is desired. Consideration of the application for readmission will be governed by the departmental and Graduate College admissions standards in effect at the time of reapplication.

**Section II. Registration**

**A. STANDARD SCHEDULE**

Students registered in the Graduate College may register for no more than 15 s.h. in all courses eligible for graduate credit (100-level or above). In a schedule of mixed graduate and undergraduate courses, two hours of undergraduate credit may be substituted for 1 s.h. of graduate credit, with registration limited to a total of 18 s.h. This equivalency applies to the calculation of academic load only. Graduate credit is not given for courses numbered under 100. The maximum for the eight-week summer session is 8 s.h. Corresponding maximums for the three-week summer and winter sessions and the six-week summer session are 3 or 6 s.h., respectively.

The maximum semester-hour registration for work scheduled outside of the regular eight-week summer session will be arranged on a basis proportionate to that stated above with the approval of the Graduate College dean. In the regular semester, 9 s.h. constitutes full-time registration. (Fellows are required to carry at least 9 s.h. during a semester as a condition of their appointments.) One-quarter-time and
one-third-time appointees are permitted to register for the maximum 15 s.h. per semester and 8 s.h. during the eight-week summer session.

B. COURSES NOT INCLUDED IN FULL REGISTRATION

In addition to a full schedule, a graduate student may register for offered courses carrying 0 s.h. of credit.

C. CHANGES IN ANNOUNCED CREDIT

Graduate students may not register for more credit than that offered for any course, but may register for less credit, or no credit, by permission of the instructor. The number of courses a graduate student may take for limited or no credit is subject to the consent of the advisor and the approval of the dean of the Graduate College.

D. REDUCED SCHEDULES FOR TEACHING AND RESEARCH ASSISTANTS AND OTHER APPOINTEES

1. One-half-time appointees may register for not more than 12 s.h. during a semester or 6 s.h. during the eight-week summer session.
2. Five-eighths-time appointees may register for not more than 10 s.h. during a semester or 5 s.h. during the eight-week summer session.
3. Two-thirds- and three-quarter-time appointees may register for not more than 9 s.h. during a semester or 5 s.h. during the eight-week summer session.
4. Seven-eighths-time appointees may register for not more than 7 s.h. during a semester or 4 s.h. during the eight-week summer session.
5. Full-time appointees, including full-time instructors, may register for not more than 6 s.h. during a semester or 3 s.h. during the eight-week summer session.

E. RETROACTIVE REGISTRATION

No form of retroactive registration is permitted.

F. REGISTRATION FOR PART OF A SESSION

A graduate student may register at any time during the semester or the eight-week summer session for not more than 1 s.h. of credit for each of the remaining weeks of classes (not including the examination period) in the term. The total registration may not exceed the 15 s.h. permitted for a semester and the 8 s.h. permitted for the eight-week summer session. Registration after the last day of the second week of a semester or the third day of the second week of a summer session is permitted only in courses involving special projects, readings, individual study, thesis, or research, with the signed approval of the instructor concerned and the Graduate College dean. Proportional credit limitations and deadlines for the three-week and six-week summer sessions will be established on a prorated basis.

G. EXTRAMURAL REGISTRATION

After admission to a departmental program in the Graduate College, registration for work done off campus may be accepted for residence credit under the following circumstances:

1. Traveling Scholar Program of the Committee on Institutional Cooperation (see “Section III”).
2. Research at approved locations under the direction of members of the graduate faculty of The University of Iowa.
3. Fieldwork as part of a regularly scheduled course or research program.
4. Courses taught off campus by members of the graduate faculty (see “Section X.D” and “Section XII.C” for minimum semester hours required on campus for the master's and doctor's degrees).
5. Residence graduate credit from another Iowa Regents’ university (see “Section V.B”).
6. As many as 9 s.h. of graduate work taken at the Quad Cities Graduate Center from faculty other than faculty of the Iowa Regents' universities, provided the work is acceptable to the student’s major department for the specified degree.

Extramural registration does not count toward residence credit in the following circumstances:

1. Course work transferred from another institution,
2. Guided Independent Study courses.

H. GUIDED INDEPENDENT STUDY (GIS) COURSES

Guided Independent Study (GIS) credits do not count as residence credits. Not more than 9 s.h. of graduate GIS work can be applied toward an advanced degree; such credit must be acceptable for the student’s plan of study. A graduate student may not register for GIS courses without the approval of the executive of his or her major department.

I. SYSTEM OF COURSE NUMBERS

Courses primarily for graduate students are numbered 200 or above in each department. Courses open to and carrying credit for both graduate and undergraduate students are numbered from 100 to 199. A student must be enrolled in the Graduate College in order to earn
graduate credit for course work numbered 100 or above. Courses below 100 are not accepted for graduate credit irrespective of a student’s classification. Graduate credit may not be earned for taking courses numbered below 100 by registering in such courses as readings, special projects, or independent study having course numbers of 100 or above.

J. AUDITING OF COURSES

Upon approval of the instructor and the advisor, graduate students may audit courses for zero credit. Fee assessment for auditing courses is based on the number of hours for which the course is offered, with a minimum of 1 s.h. Auditing is permitted only for a student who is currently registered. See “Section VI.C” for the marking system.

K. DROPPING OF COURSES

All graduate students who drop courses after the deadline date established by the dean of the Graduate College for each session and published by the registrar shall receive the grade of F unless the entire registration is withdrawn. This regulation may be waived by the Graduate College dean only on the recommendation of the Student Health director or the Counseling Service. If a student withdraws registration after the deadline date, the student must obtain permission from the dean of the Graduate College before being permitted to reregister.

Section III. Traveling Scholar Program

A. PURPOSE

The program, under the auspices of the Committee on Institutional Cooperation representing 12 universities in the Midwest, enables a doctoral student to take advantage of special resources available on another campus but not available on his or her own campus: special course offerings, research opportunities, unique laboratories, and library collections.

B. PROCEDURE

1. A CIC Traveling Scholar first must be recommended by his or her own graduate advisor, who will approach an appropriate faculty member at the possible host institution in regard to a visiting arrangement.

2. After agreement by the student’s advisor and the faculty member at the host institution, graduate deans at both institutions will be fully informed by the advisor and have the power to approve or disapprove.

3. A CIC Traveling Scholar will be registered at the home university, and fees will be collected and kept by that institution.

4. Credit for the work taken will be recorded at the home university.

5. Those desiring additional information should inquire at the office of the Graduate College.

C. CONDITIONS

CIC Traveling Scholars will normally be limited to two semesters or three quarters on another campus. Each university retains its full right to accept or reject any student who wishes to study under its auspices.

Section IV. Academic Standing, Probation, and Dismissal

A. NONDOCTORAL STUDENTS

A nondoctoral departmental (master’s, professional improvement, certificate) student, except one on conditional status, shall be placed on probation if, after completing 8 s.h. of graduate work, the student’s cumulative grade-point average on graduate work done at The University of Iowa falls below 2.75. If, after completing 8 more s.h. of graduate work at this University, the student’s cumulative grade-point average remains below 2.75, the student shall be denied permission to reregister within any departmental program; otherwise the student shall be restored to good standing.*

Nondoctoral, nondepartmental (nondegree, extension, workshop) students shall be evaluated for probation and dismissal purposes based on the same semester-hour sequence as stated above, at a minimum cumulative grade-point average of 2.50.

*This requirement shall apply to students entering nondoctoral departmental programs beginning with the fall 2001 semester. A minimum cumulative grade-point average of 2.50 is required of nondoctoral departmental students admitted prior to that session.

B. DOCTORAL STUDENTS

A doctoral student on regular status shall be placed on probation if, after completing 8 s.h. of graduate work, the student’s cumulative grade-point average on graduate work done at The University of Iowa falls below 3.00. If, after completing 8 more s.h. of graduate work at this University, the student’s cumulative grade-point average remains below the required level, the student shall be dropped from the program and
denied permission to reregister unless the student applies and is accepted for a nondoctoral degree or certificate program. If, after completing the second 8 s.h., the cumulative grade-point average is at least 3.00, the student is returned to good standing.*

*This requirement shall apply to students entering doctoral programs beginning with the fall 1979 semester. A minimum cumulative grade-point average of 2.70 is required of students admitted to doctoral programs prior to that session.

C. RESTRICTION ON STUDENTS ON PROBATION

A student on probation shall not be permitted to take comprehensive or final examinations leading to any degree or certificate, nor may the student receive any graduate degree or certificate.

D. DEPARTMENTAL REGULATIONS AND DISSEMINATION OF INFORMATION

In addition to the above University-wide requirements, departments may establish further requirements which then determine the individual student’s standing with regard to probation and dismissal. To this end, each department or program shall compile a written list of standards and procedures for work in that area. These documents shall be on file in each departmental office and the office of the Graduate College dean. Copies are to be available for students in the departmental office, and departments shall make all reasonable efforts to inform students. Subsequent changes in standards or procedures shall be communicated by the department to each student and the Graduate College dean. Whenever departments revise standards for a given program, the new regulations will not apply retroactively to the disadvantage of those already in the program. In addition to notifying students that they are subject to the rules of the Graduate College as set forth in the Manual of Rules and Regulations, any standards established by the department more stringent than the general Graduate College requirements shall be stated. Information shall be provided outlining required courses applicable to the various departmental programs of study, examination procedures and other formal evaluations, departmental policies with regard to awarding and renewing assistantships, time limits on programs of study, departmental registration policies, departmental grade-point requirements, requirements for changing from one degree program to another within the department—especially from the master’s to the doctor’s—departmental probation and dismissal policies and procedures (see “E” following), and other matters as are appropriate. The nature of the departmental advisory system shall be explained to incoming students.

E. ACADEMIC PROGRESS, DEPARTMENTAL PROBATION, AND DISMISSAL PROCEDURES

If a student is failing to meet departmental standards, the department shall warn the student of this fact in writing. The notification shall specify in what way(s) the student is failing to meet the standards. The student shall be provided a reasonable amount of time to meet the standards prior to departmental dismissal. If conditions such as conditional admission or probation are imposed, the department shall give, at the time of its imposition, written explanation of this status and its time limits.

A student who will not be permitted to reregister for failure to meet standards shall be notified of this fact in writing with reasons for the action provided. Such dismissal may follow failure to meet conditions of admission, conditions of probation, pre-announced departmental grade-point requirements or other standards, or failure of a regularly scheduled examination or formal evaluation. If a student judges the dismissal decision improper, the student has a right to review. Each department shall establish procedures for handling such reviews. The procedures are to be approved by the Graduate College dean and shall afford a fair and expeditious review. A description of these procedures shall be included in the departmental regulations described above. (See “Section IV.D.”)

F. PLAGIARISM BY GRADUATE STUDENTS

The Online Oxford English Dictionary (http://dictionary.oed.com/cgi/entry/50180578) defines “plagiarize” as follows, “To practice plagiarism upon; to take and use as one’s own the thoughts, writings, or inventions of another.” In practice, the exact definition of “plagiarize” or “plagiarism” is dependent upon the unique attributes of the creative work of a particular discipline. Thus, it is understood that different academic disciplines and cultures may have different interpretations as to the actual actions which constitute plagiarism. With this in mind, the Graduate College will operate in the following manner when a program or department discovers an act or acts of plagiarism on the part of a graduate student.

1) If the faculty members of a program or department determine that the transgression is not major, or else feel that there is a misunderstanding of the acts which constitute
plagiarism, the program or department may wish to work with the student so as to prevent future occurrences of plagiarism on the part of that student. Written notification of the offense and the remediation for the offense must be sent to the Graduate College for inclusion in the student’s file.

2) If the faculty members of a program or department discover an act (or acts) of plagiarism that is (are) sufficiently egregious that expulsion from the program is warranted, the student will be terminated from his or her graduate program for reasons of plagiarism. In this case, the student will be simultaneously terminated from the Graduate College of The University of Iowa. The program or department must notify the student of his or her termination in writing. All relevant facts, as well as the process for appealing the decision, must be contained in the termination letter. The Graduate College must receive a copy of the termination letter.

The appeal process for students accused of academic misconduct is specified in The University of Iowa document, “Policies and Regulations Affecting Students, C. Academic Misconduct,” which states: “Questions of academic dishonesty arising within the colleges of Medicine, Law, Pharmacy, and Dentistry, and the Graduate College are treated on an individual basis.” “In the Graduate College, the questions are handled at the departmental level. If the departmental decision is appealed, the dean may appoint an appeals committee of faculty and students from a slate of nominees prepared by the Graduate Council and the Graduate Student Senate to recommend an appropriate course of action.”

The appeal process must be initiated by the student. If the student wishes to appeal the department’s or program’s action, that appeal must be lodged with the Associate Dean for Academic Affairs of the Graduate College within 30 days of program or departmental dismissal.

G. GRADUATE COLLEGE REVIEW OF DEPARTMENTAL DISMISSAL

Questions involving judgment of performance will not be reviewed beyond the department level. If, however, the student feels there has been unfairness or some procedural irregularity concerning dismissal, the student may pursue a grievance according to the Academic Grievance Procedure (AGP) established by the Graduate College. The AGP is available in the Graduate College. The student should consult with the Graduate College prior to initiating an academic grievance.

Section V. Credits

A. TRANSFER OF GRADUATE CREDIT

Graduate work at other institutions will be entered on the student’s permanent record by the Office of Admissions and a report of this action will be sent to the student and to his or her major department. Credit for these courses toward an advanced degree at Iowa must have the approval of the major department and the dean of the Graduate College. (See “Section X.E.” and “Section XII.E.”, Reduction of Old Credits.)

B. RESIDENCE TRANSFER CREDIT

After admission to a departmental program in the Graduate College, residence graduate credit from another Iowa Regents’ university may be counted as residence credit at this institution, provided such work is acceptable to the student’s major department on the basis of the department’s determination of its applicability toward the degree. (See “Sections X.D.” and “XII.C” for minimum semester hours required on campus for the master’s and doctor’s degrees, and “Sections X.E. and XII.E.”, Reduction of Old Credits.)

C. GRADUATE CREDIT FOR VETERANS

Credit may be granted for studies pursued in war and military situations under such regulations as may be formulated by the national educational agencies and under such adaptation of standing rules as the Graduate Council may authorize from time to time to meet group or individual situations. The value of such credit in satisfying requirements for a degree will be determined by the major department with the approval of the dean.

D. WITHDRAWAL OF REGISTRATION AND PROPORTIONAL CREDIT FOR STUDENTS ENTERING MILITARY SERVICE

1. Students who leave within the first six weeks of the semester receive no credit.

2. Students who leave within the period of seven to nine weeks receive one-half credit.

3. Students who leave within the period of 10 to 12 weeks receive two-thirds credit.

4. Grade reports for the one-half and two-thirds credit periods: (a) Instructors report grades only as satisfactory or unsatisfactory. (b) Credit is to be assigned on the basis of total registration minus thesis and seminar. (c) Courses are to be counted toward specific degree requirements only after the student returns and then only with the department’s approval.
5. Students who complete the twelfth week receive full credit.

6. Grade reports for the full-credit period:
   (a) Grades are to be reported only at the end of the semester. (b) Credit is to be reported in specific courses.

7. In each instance, the instructor reports the student’s credit, grade, and date of withdrawal. No credit is granted unless the student’s work is satisfactory at the time of leaving.

8. The amount of credit in thesis and research registration is to be reported by the registrar by individual instructors on the above basis except that less or zero credit may be assigned.

Section VI. Marking System

A. MARKS CARRYING GRADUATE CREDIT

B. MARKS CARRYING NO GRADUATE CREDIT
These are D+, D, D-, F, I—incomplete, W—withdrawn without discredit, R—registered, and U—unsatisfactory.

C. AUDIT
R is assigned when a student registered for zero credit attends as an auditor throughout the course; if the student fails to meet the instructor’s requirements for class attendance, W is assigned.

D. INCOMPLETE
The grade of I is to be used only when a student’s work during a session cannot be completed because of illness, accident, or other circumstances beyond the student’s control. In registrations for thesis, research, or independent study, the satisfactory/unsatisfactory grades may be applied. (See next paragraph, “E”.) An incomplete will automatically be converted to an F at the end of the next full semester (summer and winter sessions excluded), even if the student does not enroll after the session the I was posted.

The specific deadline for the faculty’s report on I grades to the registrar will be set by the Graduate College dean for each session and printed in the academic calendar. Courses may not be repeated to remove incompletes; removal of an I is accomplished only through completion of the specific work for which the mark is given.

E. THESIS, RESEARCH, READINGS, INDEPENDENT STUDY, AND SPECIAL PROJECTS
Grades of S and U may be used for registrations in thesis, research, readings, independent study, and special projects. S—satisfactory means that the student receives credit for the work; U—unsatisfactory means that he or she receives no credit. Neither S nor U is used in computing grade-point averages. At a later date, the instructor may change the S to a letter grade. In addition, departments may ask the Graduate College dean for permission to use grades of S and U as described above for courses which, because of their special or experimental nature, are judged to be more appropriate for such grading. The type of grading system to be used in the above cases should always be mutually understood by the instructor and student.

F. GRADES OF S AND U
S and U may be used for courses taken by a graduate student outside the major department or interdepartmental degree program provided that the instructor of the course and the student’s departmental advisor approve the registration. Arrangements for satisfactory/unsatisfactory grading in these courses are accomplished by filing a card with appropriate signatures in the Registrar’s Office at the time of registration, or no later than the last day of the second week of a semester or the third day of the second week of a summer session. No changes from letter grades to satisfactory/unsatisfactory grades or vice versa will be allowed after these dates.

It is not the policy of the Graduate College to abandon the traditional letter grades described in this section; however, in certain exceptional instances, departments having several areas of concentration involving widely differing types of effort may request the permission of the Graduate Council to allow students majoring in one area to register in courses in another area within the same department or program on a satisfactory/unsatisfactory basis. In these instances, satisfactory/unsatisfactory cards will be used as described in the preceding paragraph.

G. COMPUTED GRADE-POINT AVERAGE
This is based only upon graduate work graded A+=4.33, A=4.00, A-=3.67, B+=3.33, B=3.00, B-=2.67, C+=2.33, C=2.00, C-=1.67, D+=1.33, D=1.00, D-=0.67, and F=0. Although a grade of A+ has a value of 4.33 in computing a student’s g.p.a., the cumulative average is truncated so as not to exceed 4.00.
Section VII. Graduate Appointments

A. SCHOLARSHIPS

Scholarships are competitive and are awarded on merit.

1. Eligibility for graduate scholarships and fellowships will include but will not be exclusive to: (a) registration in the Graduate College; (b) cumulative g.p.a. of at least 3.00; (c) a satisfactory rate of progress in completing the program for the degree.

2. Preference will be given to candidates for the doctoral degree.

3. Recommendations for graduate scholarships may be made to the Graduate College by the appropriate department executive, director, or dean. A graduate scholarship may be awarded whether or not a student holds an assistantship. The amount of scholarship for the academic year may vary, but in no case exceed the comprehensive fee assessed. Scholarships will be credited to the student’s University account.

B. GRADUATE COLLEGE FELLOWSHIPS

Fellowships are awarded by the Graduate College upon recommendation by departments to students with outstanding academic records. Fellows must be registered as full-time students. The primary purpose of the awards is to permit an advanced student to complete his or her dissertation or creative project and take the degree. Other terms of the award will be established by the Graduate College dean in consultation with the Graduate Council.

C. FACULTY RESEARCH ASSISTANTSHIPS

Faculty research assistantships are awarded to qualified graduate students and serve two purposes: to provide research service to professorial members of the academic staff and to provide apprenticeship experience for graduate students who are in training in research. Not more than 20 hours of service per week are required of a half-time assistant. Other part-time service is scaled in proportion, and a limited academic schedule is permitted (see “Section II.D”). Appointments ordinarily are made for the nine-month academic year, but appointments may be made for other periods of time by special arrangement. Stipends vary with the qualifications of the appointee and the amount of service rendered.

D. GRADUATE TEACHING ASSISTANTSHIPS

These assistantships serve two purposes: assistance in the instructional program of the University and the preparation of future college teachers. In order to achieve both aims, scholastically superior graduate students who show exceptional promise as teachers are selected for graduate teaching assistantships. All appointments are made by the dean of the appropriate college on recommendation of the department.

E. ELIGIBILITY FOR SCHOLARSHIPS, FELLOWSHIPS, AND RESEARCH ASSISTANTSHIPS

Scholars, fellows, and faculty research assistants on the Graduate College budget must be registered as regular students in good standing in order to hold such appointments. Appointments will be terminated when registration and/or student status is terminated. In no instance may a student be promised or tendered an appointment until after approval for admission to the Graduate College by the director of Admissions.

F. CREDIT

No academic credit is allowed for the teaching or research service for which the student receives payment as a graduate assistant.

G. LOANS

Graduate students requiring financial assistance may apply for loans at the Office of Student Financial Aid.

H. OTHER FORMS OF SUPPORT

Many departments offer financial assistance in the form of traineeships, part-time employment on research programs, or part-time teaching. Inquiries should be addressed directly to the major department.

Section VIII. Advanced Programs Offered in the Graduate College

The major areas in which the Graduate College offers degree programs are listed under “Degree Programs” at the beginning of this section of the Catalog.

Section IX. General Requirements for Advanced Degrees

A. APPLICATION FOR DEGREE

The student must file an application for an anticipated degree with the registrar by the deadline date printed in the Graduate College
academic calendar for the session in which the degree will be conferred. The student must have the application signed by his or her advisor. Failure to file the application by the deadline date established by the Graduate College dean will result in postponement of graduation to a subsequent session.

B. ENROLLMENT IN FINAL SESSION

The student must be enrolled during the session in which the degree is to be conferred. Students who are away from the University campus during that session may meet this requirement by registering for independent study, research, or thesis hours according to the practice in the various departments. Doctoral candidates who have completed all work except the final examination may register for Doctoral Final Registration described in “Section XII.L” if such registration is appropriate. Master's candidates who have completed all work except the final examination may register for Master's Final Registration if such registration is appropriate. Both the Doctoral Final Registration and Master's Final Registration require a 2 s.h. tuition/fee payment, and may be repeated if the degree requirements are not completed in this session. Registration in a Guided Independent Study course or in a course for which tuition/fees are not assessed (Cooperative Education Internship, for example) will not satisfy this requirement.

Section X. Master's Degrees

A. KINDS OF DEGREES

The University of Iowa offers programs leading to the Master of Arts (M.A.) degree, Master of Science (M.S.) degree, and several professional master's degrees.

M.A. and M.S. degrees require mastery of methodologies and practices of research and scholarship of the discipline. A thesis describing original scholarship or research may be required. M.A./M.S. degrees may be designed either as preparation for entry into doctoral degree programs or to provide advanced study and accomplishment that serves a variety of career and other purposes. Degrees are awarded in many fields of study, or majors, consistent with conventions of the discipline (e.g., M.A. in Art, English, Psychology; M.S. in Chemistry, Mathematics, Physiology). (For complete list, see Section VIII.) M.A. and M.S. degrees require a minimum of 30 s.h., a final examination and, in some fields, a thesis.

Professional master's degrees provide knowledge, perspectives, and skills required for professional practice. Some programs may include introduction to research or scholarship sufficient to allow application of current literature to practice. Professional master's degrees generally are indicated by a three- or four-letter designation; examples include the Master of Fine Arts (M.F.A.), Master of Social Work (M.S.W.), Master of Public Health (M.P.H.), Master of Science in Nursing (M.S.N.), Master of Accountancy (M.Ac.). (For complete list, see Section VIII.) Professional master's degrees require a minimum of 30 s.h. Some may require a final examination as well as a thesis, papers, projects, colloquia, internships, or other experiential-based activity typical of preparation for practice in the field.

A student may prepare a proposal for an interdisciplinary course of study, including the plan of study defining course work, examination requirements, a research plan, and a committee of at least three faculty members, with either the department most directly concerned or the Graduate College designated as the sponsor. Final approval of such individual programs is granted by the Graduate College dean, who may add members to the student's supervising committee from other closely related departmental faculties or from the Graduate Council. The degree will be awarded in interdisciplinary studies (master's) stipulated in the approved graduate program and, parenthetically, the name of the sponsoring department.

B. PLAN OF STUDY

The applicant for a master's degree must file a plan of study approved by the advisor and the departmental executive with the Graduate College within the session in which the degree is to be granted and by the deadline date printed in the Graduate College academic calendar. If the session in which a student takes his or her final exam is earlier than the session in which the degree is to be granted, the Plan of Study must be filed prior to the administration of the student's final examination. The plan shall meet the requirements for the degree approved by the graduate faculty. (See also “Section IV.D. Departmental Regulations and Dissemination of Information.”)

C. MAJOR AND RELATED FIELDS

The plan of study should provide for reasonable concentration in the major field of interest and, subject to the approval of the major department, may include related subjects from other departments.
D. ACADEMIC RESIDENCE REQUIREMENT

Of the minimum of 30 s.h. required for the degree, at least 24 s.h. must be completed under the auspices of The University of Iowa after admission to a graduate department/program. Various forms of extramural registration may qualify toward fulfillment of the aforementioned 24-hour residence requirement (see “Section II.G. Extramural Registration”) in addition to regular on-campus registration. Students who have elected or who are required to write a thesis for conferral of their master’s degrees, must complete at least 8 semester hours of the 24-hour, academic residence requirement on campus. At the discretion of the department, the 8-semester hour, on-campus requirement may be waived for nonthesis master’s programs. Election of the waiver option is to be applied programmatically, and not on a student-by-student basis, and must be formally conveyed to the Graduate College.

E. REDUCTION OF OLD CREDITS

Credits for a master’s degree dating back more than 10 years from the session in which the degree is to be conferred are not counted toward fulfillment of degree requirements. This rule may be waived by the dean in cases affected by military service.

F. LIMIT ON PROFESSIONAL COURSES

Work taken by a student in the Colleges of Dentistry, Law, or Medicine while enrolled for a professional degree may be credited to a graduate program leading to a master’s degree if it is taken after the student has earned a bachelor’s degree or has completed work equivalent to that required for a bachelor’s degree at The University of Iowa. The work accepted from the professional college must be directly related to the student’s major field of study in the Graduate College and be approved as a part of the plan of study by the student’s advisor and the major department. Work completed while registered for a professional degree in law, medicine, or dentistry will be counted as part of the residence requirement for nondoctoral degrees in the Graduate College only when the student is registered in an appropriate joint degree program.

G. TWO MASTER’S DEGREES

The granting by this university of two master’s degrees simultaneously or in succession requires the satisfaction of all requirements for each degree separately, including two theses where a thesis is required for each, and two examinations, with a minimum combined total of 60 s.h. of graduate credit.

H. MASTER’S DEGREE WITH THESIS

Not more than 9 s.h. of credit for thesis research and writing shall be counted in satisfying the 30 s.h. minimum requirement. The thesis may be a scholarly study or an artistic production.

One copy of the thesis, complete and in final typed form, must be presented to the Graduate College for a check of formal characteristics by the first-deposit deadline date in the session in which the degree is to be conferred. (See the Graduate College Thesis Manual.) After approval by the Graduate College and by the thesis committee, two copies of the thesis must be deposited with the Graduate College by the final-deposit deadline date in the graduation session. Failure to submit the first and final deposits of the thesis by the deadline dates established by the Graduate College will result in the postponement of graduation to a future session.

If the thesis is in some nonprint form (e.g., painting, statue, performance in music) the librarian will help the student and faculty advisor work out an appropriate method of preparing the work, if such help is needed. Once the accompanying manuscript is accepted, it is treated the same as any other thesis.

Nonrefundable fees are charged each thesis candidate to cover processing and publication costs of the thesis.

The thesis committee shall consist of at least three members of the graduate faculty and may or may not be identical to the final examination committee. (The final examination committee for the master’s degree shall consist of at least three members of the graduate faculty, at least two of whom are from the major department. See “X.K. Examining Committee.”)

I. MASTER’S DEGREE WITHOUT THESIS

A master’s degree without thesis, consisting of at least 30 s.h. of graduate work, may be awarded upon the completion of a curriculum prescribed by a department and approved by the Graduate Council.

J. FINAL EXAMINATION

The requirements for master’s degrees may include a final examination which, at the discretion of the major department, may be written or oral or both. Such an examination will not duplicate course examinations. It will be evaluated by the examining committee as satisfactory or unsatisfactory, with two unsatisfactory votes making the committee report unsatisfactory. The report of the final
examination is due in the Graduate College not later than 48 hours after the examination, and by the deadline date established by the Graduate College.

If the department so recommends, a candidate who fails the examination may present himself or herself for reexamination, but not sooner than the next regularly scheduled examination period in the following session.

The examination may be repeated only once.

A student must graduate within one calendar year after passing the final examination for a master’s degree; failure to meet this deadline will require reexamination of the student.

Upon recommendation of a department, the comprehensive examination for a doctoral degree may be substituted for the master’s examination.

Some master’s programs do not require a final exam. Students are responsible for checking the specific requirements of their individual degree programs.

K. EXAMINING COMMITTEE

The examining committee for the master’s degree consists of at least three members of the graduate faculty, appointed by the Graduate College dean upon recommendation of the major department or program, at least two of whom are from the major department. If the examination covers work in another department, one member of the committee must be from that department. Upon recommendation of the major department, the dean may appoint additional qualified persons (not necessarily members of the graduate faculty) to serve as voting members of the examining committee, and, at his or her discretion, the Graduate College dean may add a member to the committee.

Section XI. Graduate Certificate Programs

Graduate certificate programs reflect specialization, either within a field or in an area of study, research, or training. Some graduate certificate programs may be open only to students seeking degrees in related fields; others may be offered as independent programs. Graduate certificate programs are designed to enhance skills, to provide professional development and career advancement opportunities, to broaden career options, and for other purposes, both for traditional, full-time students and for those with full-time employment.

Graduate certificate programs usually require a minimum of 15 s.h. of specified course work and may, in addition, require papers, projects, or experiential learning components designed for specific cohorts. Certificate programs generally require two to three semesters to complete.

Examples include the graduate certificates in aging studies, American Indian and native studies, informatics, and advanced nurse practitioner. Requirements for each graduate certificate are included in The University of Iowa General Catalog.

Section XII. Doctor’s Degrees

A. CHARACTER OF DEGREE

The Graduate College offers doctoral programs leading to the Doctor of Philosophy (Ph.D.), the highest degree awarded by the university; the Doctor of Musical Arts (D.M.A.); the professional Doctor of Physical Therapy (D.P.T.) and the professional Doctor of Audiology (Au.D.). The Doctor of Philosophy degree indicates marked excellence in original research or other creative work, and superior comprehension in the discipline. The Doctor of Musical Arts degree indicates marked excellence in performance and pedagogy. The Doctor of Physical Therapy degree indicates marked excellence in physical therapy differential diagnosis and clinical integration. The Doctor of Audiology degree indicates marked excellence in theoretical and advanced clinical skills.

B. PREREQUISITES

The candidate must present evidence of having completed a satisfactory amount of undergraduate work in the subject proposed for investigation or, in the case of deficiency, must register for prerequisite courses.

C. RESIDENCE REQUIREMENT

The doctorate is granted primarily on the basis of achievement rather than on the accumulation of semester hours of credit; however, the candidate is expected to have completed at least three years of residence in a graduate college. At least part of this residence must be spent in full-time involvement in one’s discipline, at this university, beyond the first 24 s.h. of graduate work; this requirement can be met either by: (1) enrollment as a full-time student (9 s.h. minimum) in each of two semesters; or (2) enrollment for a minimum of 6 s.h. in each of three semesters during which the student holds at least a one-quarter-time assistantship certified by the department as contributing to the student’s doctoral program. (For purposes of record and assessment of fees, student registration should reflect accurately the
amount and kind of work undertaken in the Graduate College. All doctoral programs, including acceptable transfer credit, will contain a minimum of 72 s.h. of graduate work.)

D. INTERDISCIPLINARY STUDIES PROGRAMS

A student may prepare a proposal for an interdisciplinary course of study, including the plan of study defining course work, examination requirements, research plan, and a committee of at least five faculty members with either the department most directly concerned or the Graduate College, designated as the sponsor. Final approval of such individual programs is granted by the Graduate College dean, who may add members to the student’s supervising committee from other closely related departmental faculties or from the Graduate Council. The degree will be awarded in interdisciplinary studies (doctorate) stipulated in the approved graduate program and, parenthetically, the name of the sponsoring department.

E. REDUCTION OF OLD CREDITS

Courses taken 10 or more years prior to the comprehensive examination will be evaluated by the major department in order to determine the amount of credit that shall be allowed for such work. Evaluation of such old credits will be reported to the Graduate College by the departmental executive at the time of submission of the plan of study.

F. LIMIT ON PROFESSIONAL COURSES

Work taken by a student in the Colleges of Dentistry, Law, or Medicine while enrolled for a professional degree may be credited to a graduate program leading to a doctoral degree if it is taken after the student has earned a bachelor’s degree or has completed work equivalent to that required for a bachelor’s degree at The University of Iowa. The work accepted from the professional colleges must be directly related to the student’s major field of study in the Graduate College, and the plan of study must be approved by the student’s advisor and the major department. Work completed while registered for a professional degree in law, medicine, or dentistry will be counted as part of the one academic year which must be spent in residence as a doctoral student only when the student is registered in a formally established joint degree program.

G. JOINT PROGRAM FOR MASTER’S AND DOCTORAL DEGREES

Those students who expect to continue their training through the doctoral degree may pursue a joint program for the master’s and doctor’s degrees. The master’s examination may be combined with the comprehensive examination for the doctorate for these candidates. The examining committee will file separate reports of its actions on the final examination for the master’s degree and for the comprehensive examination. Upon recommendation of the department and approval of the Graduate College dean, students who are well qualified by previous training may submit a plan of study that leads directly to the doctoral degree without earning the master’s degree as an intervening part.

H. REQUIREMENT IN FOREIGN LANGUAGES

There is no general Graduate College requirement in foreign languages. Those departments that do require competence in one or more foreign languages establish standards as to the extent and level of competence, as well as methods of testing. Specific requirements will be found in the departmental statements of standards and procedures (see “Section IV.D.”).

Specifications of departmental requirements in foreign languages are filed in the Graduate College office and may be changed upon the initiative of the departments.

I. REQUIREMENTS FOR THE DOCTOR OF PHYSICAL THERAPY (D.P.T.) AND DOCTOR OF AUDIOLOGY (Au.D.)

Students enrolled in professional D.P.T. and Au.D. programs do not take comprehensive and final examinations and do not deposit a thesis with the Graduate College. The departments will be required to submit a doctoral plan of study to the Graduate College during the session of degree conferral. The plan will provide a listing of all graduate courses taken that apply toward the degree and a listing of courses in progress. The plan is to be filed no later than the deadline date printed in the Graduate College academic calendar.

J. PLAN OF STUDY

The development of a plan of study at the doctoral level is the responsibility of the student working together with his or her advisor. A formal plan of study must accompany the departmental request to the Graduate College for permission to conduct the comprehensive examination. The plan will provide a listing of all graduate courses taken that apply toward the degree and a listing of courses in progress or to be completed after the comprehensive examination.
K. COMPREHENSIVE EXAMINATION

The candidate must satisfactorily complete a comprehensive examination, consisting of written or oral parts or both at the discretion of the major department. Admission to the comprehensive examination is granted upon the recommendation of the major department, the filing of the plan of study, and the approval of the dean of the Graduate College. A student must be registered in the Graduate College at the time of the comprehensive examination, which must be satisfactorily completed not later than the session prior to the session of graduation. This examination, administered only on campus, is intended to be an inclusive evaluation of the candidate’s mastery of the major and related fields of study, including the tools of research in which competence has been certified.

The comprehensive examination is not a deferred qualifying examination. It is intended to evaluate the candidate’s mastery of the subject at or near the end of his or her formal preparation and prior to the completion of the dissertation. The comprehensive examination and the final examination, which is concerned chiefly with defense of the thesis and related subjects, are the two principal examinations for the Ph.D. and D.M.A. doctoral degrees.

The comprehensive examination will be evaluated by a convened meeting of the committee. Each committee member will sign the examination report as satisfactory, reservations, or unsatisfactory. The completed exam warrant will be submitted to the Graduate College office within 14 days after the completion of the examination. Two “unsatisfactory” votes will make the committee report unsatisfactory.

A vote of “reservations” should only be used when a faculty member feels that the deficiencies displayed by the student were modest, and can be readily rectified. In the event of a report with two or more votes of “reservations,” the actions required of the student, by the committee, that are necessary to correct the deficiencies must be recorded and submitted to the Graduate College with the examination report form. Copies of the written statement of necessary actions should be kept by: the appropriate departmental executive, the chair of the examination committee, and the student. The statement must specify the time allowed for completion of the aforementioned actions. The language describing the actions must be specific. For instance, if additional course work is required, a list of suitable courses must be presented. If the candidate needs to rewrite his or her research prospectus, the deficient areas must be identified, etc. If the candidate satisfies the required actions in the specified period of time, the appropriate departmental executive will send a written report to the Graduate College indicating the date for which the examining committee considers the actions to have been satisfied. Upon approval of the dean of the Graduate College, the comprehensive exam will be recorded as “satisfactory” as of that date. If the actions are not satisfied on time, or if the actions are not of sufficient quality, the appropriate departmental executive will send a written report to the Graduate College indicating that fact. Upon approval of the dean of the Graduate College, the comprehensive exam will be recorded as “unsatisfactory” as of that date. The candidate will not be admitted to the final oral examination of the dissertation until a grade of “satisfactory” has been recorded for the comprehensive exam.

In case of a report of unsatisfactory on a comprehensive examination, the committee may grant the candidate permission to present himself or herself for reexamination not sooner than four months after the first examination. The examination may be repeated only once, at the option of the department.

L. CONTINUOUS REGISTRATION AFTER COMPLETION OF THE COMPREHENSIVE EXAMINATION

The student is required to register each fall and spring semester after satisfactorily completing the comprehensive examination until the degree is awarded. If a student fails to register, the student may not be readmitted to candidacy until the student has submitted an application that has been approved by the student’s advisor, the departmental executive, and the Graduate College dean.

In order to maintain continuous registration, doctoral students may register (1) for required and/or elective courses, research, and thesis hours to complete the plan of study, or (2) for Doctoral Continuous Registration (DCR). DCR requires a 2 s.h. tuition/fee payment. If a temporary lapse in a student’s academic program is required due to military service, medical leave, maternity leave, or personal/family leave, a student may petition the Graduate College to be allowed to register for Ph.D. Postcomprehensive Registration (PCR), which allows for the assessment of a special minimum fee. If a petition is granted, it is to be understood that a student will not make significant use of university resources, or engage in significant consultation with the faculty. In the final semester, doctoral students may register for Doctoral Final Registration (DFR), which requires a 2 s.h.
tuition/fee payment, or appropriate course work. The DFR may be repeated if the degree requirements are not completed in this session.

Under no circumstances may courses for which tuition/fees are not assessed (Cooperative Education Internship, for example), be used to satisfy the continuous registration or final registration requirement of the Graduate College.

No registration for the summer or winter sessions is required. The exceptions are when the student is taking a degree at the end of the summer session, or when enrollment is required by the student’s department.

**M. DISSERTATION FOR THE DOCTORAL DEGREE**

One copy of the dissertation, complete and in final form, must be presented at the office of the Graduate College by the first-deposit deadline date in the session in which the degree is to be conferred.

Two copies of the approved dissertation must be deposited at the office by the final-deposit deadline date in the graduation session. The final deposit can be no later than the end of the semester (summers excluded) following the session in which the final examination is passed; failure to meet this deadline will require reexamination of the student. Failure to submit the first and final deposits of the thesis by the deadline dates established by the Graduate College will result in the postponement of graduation to a future session.

Regulations regarding preparation of the dissertation copy shall be promulgated by the dean of the Graduate College. Dissertations will be microfilmed and thus made available on a permanent basis. An abstract of the dissertation, not to exceed 350 words of text, is to be deposited with the dissertation. The abstract must be approved and signed by the dissertation advisor. The abstract is published in the journal of Dissertation Abstracts International. One copy of the dissertation is bound and indexed at the University’s Main Library.

If the dissertation is in some nonprint form (e.g., painting, statue, performance in music) the librarian will help the student and faculty advisor work out an appropriate method of preparing the work, if such help is needed. Once the accompanying manuscript is accepted, it is treated the same as any other thesis.

Dissertations shall be made available to all members of the examining committee not later than two weeks before the date of the examination.

**N. DISSERTATION FEES**

Nonrefundable fees are charged each doctoral candidate to cover processing and publication costs of the dissertation and abstract.

**O. FINAL EXAMINATION**

The work for the degree culminates in a final oral examination administered on campus. This examination should include: a critical inquiry into the purposes, methods, and results of the investigation—not a mere recapitulation of the procedures followed—and intensive questioning on areas of knowledge constituting the immediate context of the investigation.

The final examination may not be held until the next session after the student satisfactorily completes the comprehensive examination; however, a student must pass the final examination no later than five years after satisfactorily completing the comprehensive examination. Failure to meet this deadline will result in a reexamination of the student to determine his or her qualifications for taking the final examination. The procedures to be followed are the same as those for the comprehensive examination. (See “XII.K. Comprehensive Examination.”)

Final examinations for the doctorate are open to the public. Members of the faculty of the Graduate College are especially invited to attend and, subject to the approval of the chair, to participate in the examination.

The report of the final examination is due in the Graduate College office not later than 48 hours after the examination. The final examination will be evaluated as satisfactory or unsatisfactory. Two unsatisfactory votes will make the committee report unsatisfactory. In case of a report of unsatisfactory in the final examination, the candidate may not present himself or herself for reexamination until the next session. The examination may be repeated only once, at the option of the major department.

**P. EXAMINING COMMITTEES**

The comprehensive and final examinations are conducted by committees of no fewer than five members of the graduate faculty appointed by the Graduate College dean upon recommendation of the major department, at least two of whom are from the major department. Departments may request the dean’s permission to replace one of the five members of the graduate faculty by a recognized scholar of professorial rank from another academic institution. A member of the graduate faculty from outside the major
A department is required in those cases where a related field outside the major department is included in the comprehensive examination. For the final examination, one member of the committee must be a member of the graduate faculty from outside the major department, whether that department is on campus or off campus.

Upon recommendation of the major department, the Graduate College dean may appoint additional qualified persons (not necessarily members of the graduate faculty) to serve as voting members of the examining committees. However, four members of doctoral committees (two members for master’s committees) must come from the regular (tenure and tenure-track faculty) graduate faculty. A voting member may be added at the discretion of the Graduate College dean.

**Section XIII. Exceptions**

Petitions to waive these regulations may be made for appropriate and justifiable reasons on behalf of any graduate student through the departmental executive to the dean and the Graduate Council.

**Nondepartmental Courses**

- **650:300 Writing for Learned Journals**
  - 1-4 s.h.
  - Help for graduate students in bringing written work to publishable form; analysis of target journals’ audiences and interests; submission, response to criticism. Same as 08N:340, 160:300.

- **650:313 Digital Rhetorics**
  - 3 s.h.
  - Persuasive and ethical implications of meta-information (e.g., hypertext) in electronic data; rhetoric of digital research within and between disciplines; methodological perspectives of participants’ disciplines. Same as 008:313, 160:313.

- **650:385 Teaching and Learning in Higher Education**
  - 3 s.h.
  - Development of a web- or paper-based teaching portfolio; sample syllabi, statement of teaching philosophy, samples of student work assignments, essays on issues in higher education teaching. Prerequisite: admission to Certificate in Graduate Teaching program.

- **650:601 Postdoctoral Research Scholar**
  - 0 s.h.
  - Repeatable. Prerequisite: postdoctoral standing.

- **650:602 Postdoctoral Research Fellow**
  - 0 s.h.
  - Repeatable. Prerequisite: postdoctoral standing.

- **650:604 Responsible Conduct in Research**
  - 0 s.h.
  - Current topics and ethical issues; misconduct and fraud, proper handling of data, responsible authorship, conflict of interest, research on animals and humans. Repeatable. Prerequisites: postdoctoral standing and consent of course director.

- **650:605 Writing for Learned Journals**
  - 0 s.h.
  - Help for graduate students in bringing written work to publishable form; analysis of target journals’ rhetoric; submission, response to criticism. Prerequisite: postdoctoral standing.

- **650:606 Survival Skills for a Research Career**
  - 0 s.h.
  - Nonlaboratory skills necessary for pursuing a scientific research career, including scientific writing, presentation, manuscript review, curriculum vitae preparation, and so forth. Repeatable. Prerequisite: postdoctoral standing.

- **650:607 AGEP Scholar Nongraduate Level**
  - 0 s.h.
  - Introduction and orientation to Alliances for Graduate Education and the Professoriate and the University of Iowa graduate school experience. Prerequisite: GAAN, AGEP scholar, or STEM enrollment.

Woodworth (Statistics and Actuarial Science), Chun-Fang Wu (Biological Sciences), Yangbo Ye (Mathematics), Hantao Zhang (Computer Science)

Doctor of Philosophy

The Doctor of Philosophy in applied mathematical and computational sciences requires a minimum of 72 s.h. of graduate credit. The Ph.D. program is autonomous, broadly based, and interdisciplinary, and is designed to help students achieve a command of theoretical and applied mathematics and obtain basic knowledge in another area (engineering, medicine, or one of the behavioral, biological, physical, or social sciences).

The program is flexible; students can concentrate on applied mathematics, such as differential equations and numerical analysis, or on other applicable techniques in mathematics. Scientific computing is an important part of applied mathematics, so it is often a part of student training and dissertation research.

Prospective students should have a desire to apply a mathematical science (mathematics or statistics) to relevant problems in another area.

PLAN OF STUDY

Faculty members help each student plan a course of study that is consistent with the student’s background, interests, and goals.

These individual programs are designed to help students develop expertise in methods of applied mathematics and build a good foundation in related topics of theoretical mathematics. The individual programs also provide sufficient knowledge in an outside area to enable students to use mathematical techniques in that area.

Students can arrange their study plans to earn a master’s degree from another department after they complete part of their plan. Students find suitable thesis problems and supervisors with the help of the faculty.

QUALIFYING AND COMPREHENSIVE EXAMINATIONS

Students take a qualifying examination over three of the four core course sequences required for the Ph.D. (analysis, differential equations, numerical analysis, and topology). They also take a comprehensive examination over the chosen outside area.

One program objective is to have each student’s dissertation research include many of the activities of an applied mathematical scientist. For

Applied mathematical scientists formulate scientific concepts and problems in mathematical terms; solve the resulting mathematical problems using analytical and computational methods; and discuss, interpret, and evaluate the solutions. They explore areas of mathematical application and develop mathematical theories in new areas.

Career opportunities for applied mathematicians include positions in colleges, universities, governmental laboratories, business, industry, and consulting firms.
example, a student might formulate a model, do a quantitative analysis of the model, and interpret the results.

**Admission**

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog. To be prepared for graduate-level course work in mathematics and an additional area, applicants should have a bachelor’s or master’s degree with a strong mathematics component and some background in the additional area.

Applications for fall admission are due on January 15. For application forms and more information about the academic program, contact the chair of the Program in Applied Mathematical and Computational Sciences.

**Financial Support**

Fellowships and research and teaching assistantships are available to qualified applicants. Fellowship support is available during summers. Applications for financial support should be submitted at the same time as applications for admission.

Director: Andrew F. Russo
Affiliated faculty: Paul Abbas (Speech Pathology and Audiology/Otolaryngology—Head and Neck Surgery), Francois Abboud (Internal Medicine), Harold Adams (Neurology), Lee-Ann Allen (Internal Medicine), Michael Anderson (Molecular Physiology and Biophysics), Steven Anderson (Neurology), Nancy Andreassen (Psychiatry), Michael Apicella (Microbiology), Mark Arnold (Chemistry), Nikolai Artemyev (Molecular Physiology and Biophysics), Mario Ascoli (Pharmacology), Robert Ashman (Internal Medicine), Zuhair Ballas (Internal Medicine), Botond Banli (Anatomy and Cell Biology), Christopher Benson (Internal Medicine), Ramesh Bhalla (Anatomy and Cell Biology), Debashish Bhattacharya (Biological Sciences), Jackie Bickenbach (Anatomy and Cell Biology), Gail Bishop (Microbiology), Daniel Bonthius (Pediatrics), Terry Braun (Biomedical Engineering), Timothy Brennan (Anesthesiology), Garry Buettner (Radiation Oncology), John Butler (Microbiology), Kevin Campbell (Molecular Physiology and Biophysics), Donald Cannon (Chemistry), Thomas Casavant (Electrical and Computer Engineering), Martin Cassell (Anatomy and Cell Biology), Mark Chapleau (Internal Medicine), Chi-Lien Cheng (Biological Sciences), Steven Clegg (Microbiology), Michael Cohen (Pathology), Kelly James Cole (Integrative Physiology), John Colgan (Internal Medicine), Josep Comeron (Biological Sciences), Robert Cornell (Anatomy and Cell Biology), Charles Cox (Microbiology), Joseph Cullen (Surgery), Michael Dailey Biological Science, Morris Dailey (Pathology), Warren Darling (Integrative Physiology), Beverly Davidson (Internal Medicine), Deborah Dawson (Preventive and Community Dentistry), Kris DeMali (Biochemistry), Jeffrey Denburg (Biological Sciences), Natalie Denburg (Neurology), Frederick Domann (Radiation Oncology), John Donelson (Biochemistry), Jonathan Doorn (Pharmacy), Ken Dornfeld (Radiation Oncology), Michael Duffel (Pharmacy), Adam Dupuy (Anatomy and Cell Biology), Daniel Eberl (Biological Sciences), Adrian Elcock (Biochemistry), Hatem El-Shanti (Pediatrics), John Engelhardt (Anatomy and Cell Biology), Sarah England (Molecular Physiology and Biophysics), Frank Faraci (Internal Medicine), Jan Fassler (Biological Sciences), Michael Feiss (Microbiology), Robert Felder (Internal Medicine), Elizabeth Field (Internal Medicine), R. William Field (Occupational and Environmental Health), Rory Fisher (Pharmacology), Robert Franciscus (Anthropology), Joseph Frankel (Biological Sciences), Sonya Franklin (Chemistry), John Freeman (Psychology), George Frestad (Chemistry), Ernesto Fuentes (Biochemistry), Laurence Fuortes (Occupational and Environmental Health), Minnetta Gardinier (Pharmacology), Lei Geng (Chemistry), Frederic Gerr (Occupational and Environmental Health), Pamela Geyer (Biochemistry), James Glor (Chemistry), Harold Goff (Chemistry), Pedro Gonzalez-Alegre (Neurology), Jean Gordon (Speech Pathology and Audiology), Prabhat Goswami (Radiation Oncology), Thomas Grabowski (Neurology), Steven Green (Biological Sciences), Thomas Griffith (Urology), Gary Gussin (Biological Sciences), Lilach Hadany (Biological Sciences), Amanda Haes (Chemistry), Gregory Hageman (Ophthalmology), Donna Hammond (Anesthesiology), John Harty (Microbiology), Eliot (Richard) Hazeltine (Psychology), Paul Heidger (Anatomy and Cell Biology), Donald Heistad (Internal Medicine), Johannes Hell (Pharmacology), Stephen Hendrix (Biological Sciences), Michael Henry (Molecular Physiology and Biophysics), Jonathan Hesel (Pathology), Raymond Hohl (Internal Medicine), Keri Hornbuckle (Civil and Environmental Engineering), Mary Horne (Pharmacology), Alexander Horswill (Microbiology), Diana Horton (Biological Sciences), Bruce Hostager (Pediatrics), Dougats Houston (Biological Sciences), Jon Houtman (Microbiology), Matthew Howard (Neurosurgery), Richard Hurtig (Speech Pathology and Audiology), Fiorena Ianzini (Radiology), Erin Irish (Biological Sciences), Toshiki Itoh (Pathology), Jean Jew (Anatomy and Cell Biology), Alan Kim Johnson (Psychology), William Johnson (Microbiology), Wayne Johnson (Molecular Physiology and Biophysics), Bradley Jones (Microbiology), Barry Kasson (Pharmacology), Masataka Kawai (Anatomy and Cell Biology), Alan Kay (Biological Sciences), Shahram Khadem (Biochemistry), John Kirby (Microbiology), Toshihiro Kitamoto (Anesthesiology), Joel Kline (Internal Medicine), Al Klingelhutz (Microbiology), C. Michael Knudson (Pathology), Amnon Kohan (Chemistry), John Koland (Pharmacology), Ulla Kopp (Internal Medicine), David Kusner (Internal Medicine), Tomomi Kuwana (Pathology), Michel Ladouceur (Integrative Physiology), Kathryn Lamping (Internal Medicine), Gloria Lee (Internal Medicine), Kevin Legge (Pathology), Steven Lentz (Internal Medicine), Andrew Lidral (Orthodontics), Jack Lilien (Biological Sciences), Nancy Lill (Pharmacology), Jim (Chung-Jung) Lin (Biological Sciences), John Logsdon (Biological Sciences), David Lubaroff (Urology), Gabrielle Ludewig (Occupational and Environmental Health), Vince Magnotta (Radiology), Rama Mallampalli (Internal Medicine), Robert Malone (Biological Sciences), Claudio Margulis (Chemistry), Brian Martin (Microbiology), Wendy Maury (Microbiology), Bryant McAllister (Biological Sciences), Anton McCaffrey (Microbiology), Linda McCarter (Microbiology), Paul McCray (Pediatrics), Stephen McGowan (Internal Medicine), Jeffrey Meier (Internal Medicine), John Menninger (Biological Sciences), Lou Messerle (Chemistry), Francis Miller (Internal Medicine), Steven Moore (Pathology), Craig Morita (Internal Medicine), David Moser (Psychiatry), Scott Moye-Rowley (Molecular Physiology and Biophysics), David Murhammer (Chemical and Biochemical Engineering), Jeffrey Murray (Pediatrics), Peter Nagy (Pathology), William Nauseef (Internal Medicine), Peggy Nopoulos (Psychiatry), Larry Oberley (Radiation Oncology), Sue O’Dorisio (Pediatrics), Daniel O’Leary (Psychiatry), Nicholas Pantazis (Anatomy and Cell Biology), Sergio Paradiso (Psychiatry), Shivanand Patil (Pediatrics), Jane Paulsen (Psychiatry), Stanley Perlman (Pediatrics), Robert Philibert (Psychiatry), Robert Piper...
Graduate Program

The Biosciences Program provides graduate students the freedom to explore research in any of 14 University of Iowa biosciences research departments and programs: the Departments of Anatomy and Cell Biology, Biochemistry, Biological Sciences, Chemistry, Microbiology, Molecular Physiology and Biophysics, Pharmacology, and Speech Pathology and Audiology; and the Programs in Free Radical and Radiation Biology, Genetics, Human Toxicology, Immunology, Molecular and Cellular Biology, and Neuroscience. The program leads to a Ph.D. degree in one of the biosciences disciplines.

Biosciences students enjoy the flexibility of investigating several disciplines through research rotations in the laboratories of Biosciences Program faculty members. Following completion of their first year in the program, students select a research laboratory and program affiliation and decide on a thesis project that will lead to a Ph.D.

Semester hour requirements for the doctorate vary by program, but all Ph.D. degrees at Iowa require at least 72 s.h. of graduate credit. For detailed information on Graduate College policies, see the Manual of Rules and Regulations of the Graduate College.

Curriculum

During their first year in the program, students perform three 10-week research rotations in Biosciences Program departments and programs of their choice. They also take a principles course (156:201), a seminar course (156:265), and one or more electives.

Biosciences students are advised on course selection, research rotations, and registration by a faculty member closely related to the student’s research and academic interests. As research rotations are assigned, the faculty advisor works in consultation with the student’s rotation advisors until the end of the first year.

Biosciences students provide a short oral presentation following each research rotation to an audience of their primary advisor, research advisor(s), and other biosciences students. Rotation advisors provide rotation reports, and rotations are evaluated by the student’s primary advisor. The student’s primary advisor also confers with the student on course grades, subsequent rotations, and the student’s selection of a department or program and lab for thesis research.

Web site: http://www.medicine.uiowa.edu/biosciences
In addition to laboratory rotations, all biosciences students take 156:201 Principles in Molecular and Cell Biology, which provides a foundation for understanding basic principles of molecular and cell biology relevant to all bioscience disciplines and teaches students how to evaluate literature critically.

The Biosciences Seminar (156:265) dovetails with current seminar series offered by the Biosciences Program's departments and programs. At the beginning of each semester, biosciences students meet to choose approximately 12 seminars that they all will attend. Students choose seminars under advisement from the course instructor, who ensures that all students contribute to the selection process. During the first semester, student groups are formed and each group selects a paper from a chosen speaker to present. During the second semester, individual students select and present a paper.

Overall student progress is monitored by the student's primary advisor, rotation advisor(s), and program director, who meet at the end of each semester to review the student's progress. At the end of the second semester, the primary advisor, in cooperation with the rotation advisor(s), makes a recommendation to the Biosciences Program director whether the student should continue in the Ph.D. program. University guidelines, such as maintaining a cumulative g.p.a. of 3.00 or higher, are considered, along with performance in rotations.

During the second semester, Biosciences Program students meet with prospective mentors regarding thesis proposals and openings available in the mentors' laboratories. Students identify which program and laboratory they would like to join. Two weeks before the spring semester ends, students submit their choice of graduate programs and faculty mentors to the Biosciences Program office, which coordinates each student's transfer to his or her chosen program. From that point on, the department or program advises the student and evaluates his or her performance.

Most participating departments and programs require that students take a comprehensive exam at the end of the second year and no later than the third year. Following successful completion of the exam, students advance to Ph.D. candidacy.

**REQUIRED COURSES**

All Biosciences Program students must complete the following course work. Students earn at least 12 s.h. each semester.

### Fall Semester

- 156:201 Principles in Molecular and Cell Biology... 4 s.h.
- 156:265 Biosciences Seminar... 1 s.h.
- 156:302 Biosciences Research (10-week research rotations).... arr.
- One elective

### Spring Semester

- 156:265 Biosciences Seminar... 1 s.h.
- 156:302 Biosciences Research (10-week research rotations).... arr.
- 650:270 Responsible Conduct in Research... 1 s.h.
- Two electives

**Admission**

The program accepts students with a variety of backgrounds in the biological and physical sciences. Entering students must hold a baccalaureate degree from an accredited college or university and should have completed courses in biology, chemistry, physics, and calculus consistent with requirements for a baccalaureate degree in the sciences. An undergraduate g.p.a. of at least 3.00 is required.

Applicants must submit their scores on the Graduate Record Examination; a combined verbal and quantitative score of 1200 and an analytical writing score of 4.5 or higher are preferred. Applicants whose first language is not English must score above 600 (paper-based), 250 (computer-based), or 100 (Internet-based) on the Test of English as a Foreign Language (TOEFL).

Other indicators of academic accomplishments, such as research experience and letters of recommendation, are considered.

Information about graduate training and application materials are available from the Biosciences Program office.

**Financial Support**

Graduate students receive stipend and tuition support from The University of Iowa and other sources. Students promoted to the second year in the program receive support from their graduate departments and programs. The Biosciences Program also helps some students apply for competitive national awards for outstanding academic and research achievement.
Facilities

The basic science and clinical departments of the Carver College of Medicine are clustered on the west campus of the University, primarily in the Bowen Science Building, Carver Biomedical Research Building, Eckstein Medical Research Building, Medical Education and Biomedical Research Facility, Medical Laboratories, and University of Iowa Hospitals and Clinics. Nearby are the Hardin Library for the Health Sciences and the Veterans Affairs Iowa City Health Care System.

The Departments of Anatomy and Cell Biology, Biochemistry, Microbiology, Molecular Physiology and Biophysics, and Pharmacology are housed in the Bowen Science Building. Laboratories of clinical departments are located primarily in the Medical Laboratories and the Medical Research Center. The Eckstein Medical Research Building houses major core facilities for microscopy, image analysis, flow cytometry, protein structure, and monoclonal antibody production, as well as research laboratories for basic investigators with interdisciplinary approaches to cancer, molecular biology, genetics, and immunology. The geographic proximity of these facilities promotes interchange among clinical and basic science faculty members and students and maximizes use of the University’s extensive core facilities for biomedical research.

Integral to the University’s research environment are the Alzheimer’s Disease Research Center, Holden Comprehensive Cancer Center, Iowa Cardiovascular Center, Clinical Research Center, Cooperative Human Linkage Center, Craniofacial Anomalies Research Center, Diabetes-Endocrinology Research Center, Digestive Diseases Core Center, Iowa Child Health Research Center, University of Iowa Cystic Fibrosis Center, Iowa Specialized Center for Pulmonary Research, Lipid Research Clinic, Iowa Mental Health Clinical Research Center, Schizophrenia Research Center, Iowa Center for Gene Therapy, and Specialized Centers for Congenital Heart Disease and Hypertension and for Occupational and Immunological Lung Disease.

In addition to the University’s extensive facilities for research support, the Carver College of Medicine and the College of Liberal Arts and Sciences operate a variety of research support facilities. Tissue culture, autoclaving, purified water, darkrooms, counters, and a variety of general-use equipment and services are available on a shared basis.

Courses

156:201 Principles in Molecular and Cell Biology 4 s.h. Introduction to critical reasoning as applied to fundamental principles of molecular and cellular biology; recent scientific literature. Repeatable.

156:265 Biosciences Seminar 1 s.h. Focus on a journal article relevant to a weekly biosciences seminar series. Repeatable. Prerequisite: consent of instructor. Same as 002:270, 072:342.

Center for the Book

Director: Matthew P. Brown (English/Center for the Book)
Professors: Ed Folsom (English/Center for the Book), Judith Pascoe (English/Center for the Book), Katherine Tachau (History/Center for the Book), Jonathan Wilcox (English/Center for the Book)
Associate professors: Matthew P. Brown (English/Center for the Book), Robert Glasgow (Art and Art History/Center for the Book), James Snitzer (Art and Art History/Center for the Book)
Lecturers: Kathleen Kamerick (History/Center for the Book), Julia Leonard (Center for the Book/Art and Art History)
Graduate nondegree program: Certificate in Book Studies/Book Arts and Technologies
Web site: http://www.uiowa.edu/~ctrbook

The University of Iowa Center for the Book represents a community of faculty, staff, students, and local book specialists with interests in all facets of book production, distribution, and use. Some members of the center actively research the history and circulation of the book, examining books’ role in cultural and historical processes. They also look at how changes in book production affect the way books are viewed as artifacts. Specialists in book arts and technologies study the history and technique of book crafts, including letterpress and offset printing, typography, calligraphy, papermaking, and bookbinding. Others engage in the conservation or production of books, including artists’ books and literary fine press publications.

The center offers classes; sponsors lectures, seminars, and workshops; and encourages the exchange of ideas among individuals with interests in the book. Associated faculty, staff, and graduate students in the Schools of Art and Art History and Library and Information Science; the Departments of History, English, and Computer Science; University of Iowa Libraries; the Iowa Writers’ Workshop; and other areas offer a wide range of perspectives on the book as an aesthetic, cultural, and historical artifact. This interdisciplinary membership and the center’s facilities combine to provide an exceptional environment for studying the history of the book, its evolution, and its future.

The center collaborates with the Graduate College to offer a certificate program at the graduate level. Undergraduate students can add dimension to their majors in English, art, journalism, history, and other disciplines by taking Center for the Book courses in book crafts and book studies. They also may include an emphasis on book arts or on cultural and historical aspects of the book in the interdepartmental studies major.

Graduate Program

Certificate

The center offers the Certificate in Book Studies/Book Arts and Technologies through the Graduate College.

The program’s principal objectives are:

- to place the interdisciplinary study of book history, arts, and technologies in academic and aesthetic contexts;
- to provide a structured program in art, English, history, library and information science, and other departments for graduate students who are seriously interested in book studies; and
- to give nondegree, graduate-level students who wish to study the book a framework for their study.

Students have two options in pursuing the certificate. Graduate students enrolled in a degree program at Iowa may work concurrently toward the certificate and an M.A., M.F.A., or Ph.D. Students who wish to pursue the certificate but not a graduate degree may do so with nondegree status in the Graduate College.

The certificate requires 24 s.h. of course work. At least 6 s.h. must be taken from the academic course list and 6 s.h. from the arts and technologies course list. Required course work also includes a final project—a substantial work supervised by a committee chosen by the student (see the center’s publication Final Project Guidelines). For more information, contact the Center for the Book or visit its web site.

Admission

Admission requires active standing in the Graduate College. Applicants submit a statement of purpose and evidence of scholarly or creative work to the center. For more information about admission, contact the Center for the Book.
Financial Support

Students may secure support from University of Iowa sources (contact the Office of Student Financial Aid) or from outside funding agencies. Working assistantships are available at the center's professional production workshops. Internships and part-time work are available to qualified student and nonstudent professionals, especially in the areas of bookbinding, papermaking, and letterpress printing.

Courses

108:100 Special Project for Undergraduates  arr.
Independent study.

108:110 Papermaking  3 s.h.
History and fundamental techniques of Western and Eastern hand papermaking; projects in traditional sheet forming, basic paper chemistry, paper coloring. Offered fall semesters. Prerequisite: consent of instructor. Same as 01X:110.

Topics in the history and technique of papermaking.

108:132 Papermaking History and Technique  3 s.h.
Traditional Eastern and Western sheet forming techniques, history, aesthetics; emphasis on fiber selection and preparation. Offered spring semesters. Prerequisite: consent of instructor. Same as 01X:120.

108:135 Offset Productions Workshop  3 s.h.
Same as 01L:135.

108:140 Calligraphy: Gothic Hands  3 s.h.
The basic tool (broad-edged nib); disciplines and use of calligraphy, with the Fraktur hand as model; emphasis on proper methods of practice. Same as 01Z:140.

108:141 Calligraphy: Expressive Forms  3 s.h.
Adaptation of historical Western-style letterforms to contemporary format; brush, broad-edged pen. Prerequisites: 108:140 or equivalent, and consent of instructor. Same as 01Z:141.

108:142 History of Western Letterforms  3 s.h.
History of Western letterforms, with focus on tools, materials, techniques; the major hands, their place in history, their influence on modern times; creation of letterforms using appropriate tools; hands-on approach with emphasis on understanding rather than mastery. Same as 01Z:142.

108:143 Calligraphy: Foundational Hands  3 s.h.
Fundamental calligraphic skills using Roman majuscule, Humanistic minuscule, Italic; basic layout and color theory incorporated into letter practice. Same as 01Z:143.

108:144 Calligraphy: Italic and Script Hands  3 s.h.
Hands-on instruction in italic and pressure pen scripts; historical relationships, effects on modern letterforms. Same as 01Z:144.

108:145 Calligraphy: Blackletter Hands  3 s.h.
Development of proficiency in various hands, from vertical Textura to floridly gothic cursive; blackletter's historical connections with other disciplines.

108:146 Studies in Letter Arts  3 s.h.
Special topics and advanced projects in calligraphy and letter arts. Prerequisite: 108:140 or 108:141 or 108:142 or 108:143 or consent of instructor. Same as 01Z:146.

108:150 Bookbinding I: Materials and Techniques  3 s.h.
Hands-on introduction to materials and techniques commonly used in bookbinding. Same as 01Y:150.

108:151 Bookbinding II  3 s.h.
Build on skills acquired in 108:150; projects to complete six bindings based on historical and contemporary models; sewing styles, board attachments, endband types; nonadhesive and case-bound structures, varied materials and binding styles, their effects on structure, aesthetic considerations, further development of solid binding skills; historical development of particular binding practices. Prerequisite: 108:150 or consent of instructor. Same as 01Y:151.

108:152 Bookbinding III  3 s.h.
Five bookbindings based on historical and contemporary models; differences in various binding practices, how these differences affect function, why the styles developed; experience choosing appropriate structures for particular uses; emphasis on fine tuning skills and techniques required for advanced binding practices; sewn endbands, rounding and backing, sewing on varied supports, board attachments, and covering methods. Prerequisites: 108:150 and 108:151, or consent of instructor. Same as 01Y:152.

108:153 Studies in Bookbinding  3 s.h.
Topics related to hand bookbinding. Prerequisite: consent of instructor. Same as 01Y:153.

108:154 Artists’ Books  3 s.h.
Nontraditional binding structures; emphasis on innovative techniques and how parts of the book function. Prerequisite: 01Y:150 or 108:150 or consent of instructor. Same as 01Y:154.

108:155 Historical Book Structures  3 s.h.
Historical development of book structures examined through surviving examples, construction of historical models. Prerequisite: 01Y:150 or 108:150 or consent of instructor.

108:156 Boxes and Enclosures  3 s.h.
Hands-on techniques for a variety of book enclosures; appropriateness, aesthetic issues concerning box design; Japanese wraparound case, drop-spine box, hinged and lidded boxes, slipcase; technical skill development. Prerequisite: 108:150 or consent of instructor. Same as 01Y:156.

108:157 Moveable/Sculptural Books  3 s.h.
Varied formats for moveable and/or sculptural books; history; readings, hands-on model making. Same as 01Y:157.

108:158 Pop-up Book Structures  3 s.h.
Hands-on exploration of varied aspects of paper engineering for bookmaking; historical and modern models studied and executed. Prerequisite: 108:150 or consent of instructor. Same as 01Y:158.

108:160 Introduction to Letterpress Printing  3 s.h.
Mechanics of letterpress printing, basic elements of typographic design as applied to letterpress edition printing; hand setting and printing from metal type on Vandercook proof presses; printing text and illustration from photopolymer plates; historical aspects of printing, early development of printing technologies, evolution of letterpress printing through 20th century. Same as 01P:160.

108:161 Handprinted Book: Design and Production  3 s.h.
Exploration of problems in hand-printing books—choice of manuscript, editing, design, typography, proofreading, printing and binding; histories of printing and of the book, emphasis on 20th-century book design and literature. Prerequisite: consent of instructor. Same as 01P:161, 008:187.

108:163 Digital to Letterpress Book Design  3 s.h.
Digital typesetting and book design; chapbook production using photopolymer plates and Vandercook presses; text and content, book typography, practical and aesthetic considerations. Prerequisite: consent of instructor. Same as 01P:163.

108:164 Digital Design for Artists’ Books  3 s.h.
Introduction to concepts, techniques, and technologies used to design and produce artists’ books with personal computers and graphic design software. Same as 01P:164.
108:165 Innovative Letterpress 3 s.h. 
Creation of the visual book using letterpress printing; narrative, serialization, type as graphic, physical structure of the book; traditional letterpress printing, monoprinting, nontraditional letterpress techniques using technology ranging from metal to digital. Same as 01P:165.

Topics such as book design, printing, paper arts, letterforms, typography.

108:181 Literature and the Book 3 s.h. 
Same as 008:130.

108:182 The Book in the Middle Ages 3 s.h. 
Relation of text, decoration, function, creators, and audience in different genres of medieval manuscript books 400-1500 A.D. Prerequisite: 01H:005 or 16E:110 or consent of instructor. Same as 16E:120.

108:183 The Transition from Manuscript to Print 3 s.h. 
Western manuscripts and books 1200-1600; changes in production and distribution methods and in how texts were used, in cultural context. Same as 16E:118, 021:258.

108:185 Introduction to Book Studies 3 s.h. 
Theory and practice of book studies; meanings of word and image in the book format; comparative study of other media, applied study of the codex as physical artifact. Same as 008:134.

108:186 Topics in Book History 3 s.h. 
Authorship, publishing, and reading within specific historical and cultural contexts. Same as 008:190.

108:200 Special Project for Graduate Students arr. 
Independent study.

108:201 Book Studies Workshop 1 s.h. 
Discussion of issues central to book studies; workshop approach to current projects.

108:205 Final Project arr. 
Project for graduate certificate.

108:210 Individual Instruction in Papermaking / Paperworks arr. 
Traditional papermaking or creation of works of art using paper pulp as the medium; independent projects.

Prerequisite: consent of instructor.

Bookbinding and artists' book works; independent projects.

108:216 Individual Instruction in Printing arr. 
Prerequisite: consent of instructor.

108:220 History of Readers and Reading 3 s.h. 
The social nature of reading practices in America from Colonial times to present; theories and contexts of reading; reading communities; dimensions of gender, age, class, religion, race, ethnicity; examples of recent scholarship; use of primary sources; seminar. Same as 021:256.

108:222 Topics: Policy/Planning 1-3 s.h. 
Same as 021:279.

108:224 Electronic Publishing 3 s.h. 
Same as 021:224.

108:230 Topics in Book Studies 1-3 s.h. 
Same as 021:249.

108:496 The Poetics of the Book 3 s.h. 
Same as 08C:496.
Genetics

Chair: Debashish Bhattacharya (Biological Sciences)
Affiliated faculty: Michael Anderson (Molecular Physiology and Biophysics), Debashish Bhattacharya (Biological Sciences), Terry Braun (Electrical and Computer Engineering), Kevin Campbell (Molecular Physiology and Biophysics), Thomas Casavant (Electrical and Computer Engineering), Chi-Lien Cheng (Biological Sciences), Josep Comeron (Biological Sciences), Robert Cornell (Anatomy and Cell Biology), Beverly Davidson (Internal Medicine), Deborah Dawson (Preventive and Community Dentistry), John Donelson (Biochemistry), Adam Dupuy (Anatomy and Cell Biology), Daniel Eberl (Biological Sciences), Hatem El-Shanti (Pediatrics), Jan Fassler (Biological Sciences), Michael Feiss (Microbiology), Joseph Frankel (Biological Sciences), Pamela Geyer (Biochemistry), Pedro Gonzalez-Alegre (Neurology), Gary Gussin (Biological Sciences), Lilach Hadany (Biological Sciences), Michael Henry (Molecular Physiology and Biophysics), Doug Houston (Biological Sciences), Erin Irish (Biological Sciences), Wayne Johnson (Molecular Physiology and Biophysics), Bradley Jones (Microbiology), Toshihiro Kitamoto (Anesthesiology), Al Klingelhutz (Microbiology), Andrew Lidral (Orthodontics), Jim Jung-Ching Lin (Biological Sciences), John Logsdon (Biological Sciences), Robert Malone (Biological Sciences), Bryant McAllister (Biological Sciences), Anton McCaffery (Internal Medicine), Paul McCray (Pediatrics), John Menninger (Biological Sciences), W. Scott Moye-Rowley (Molecular Physiology and Biophysics), Jeff Murray (Pediatrics), Peter Nagy (Molecular Physiology and Biophysics), Shivanand Patil (Pediatrics), Robert Piper (Molecular Physiology and Biophysics), Michael Rebagliati (Anatomy and Cell Biology), Andrew Russo (Molecular Physiology and Biophysics), Brian Schutte (Pediatrics), Alberto Segre (Computer Science), Val Sheffield (Pediatrics), Ming-Che Shih (Biological Sciences), Curt Sigmund (Internal Medicine), Diane Slusarski (Biological Sciences), Richard Smith (Otolaryngology—Head and Neck Surgery), Edwin Stone (Ophthalmology and Visual Sciences), Lori Wallrath (Biochemistry), Thomas Wassink (Psychiatry), David Weiss (Microbiology), Marcia Willing (Pediatrics), Mary Wilson (Internal Medicine), Chun-Fang Wu (Biological Sciences), Xing Yi (Internal Medicine)

Graduate Program

The program offers a Doctor of Philosophy in genetics.

Doctor of Philosophy

The Doctor of Philosophy in genetics requires a minimum of 72 s.h. of graduate credit. The Ph.D. program is designed to promote collaborative investigation and intellectual interaction among students and faculty participants affiliated with several different departments.

Students who enroll in the program are encouraged to obtain a broad background in genetics, including molecular, population, and human genetics. Within this context, course requirements are flexible enough to permit students to tailor their formal course work to their individual needs.

Students have the option to declare a Ph.D. emphasis in computational genetics.

All students enrolled in the program are required to take the following courses.

All of these:
127:150 Genetic Analysis of Biological Systems 3 s.h.
127:200 Special Topics in Genetics (seminar course) 1 s.h.
156:270 Principles in Molecular and Cell Biology 4 s.h.

One of these:
002:171 Molecular Genetics 4 s.h.
142:210 Advanced Prokaryotic Molecular Biology 3 s.h.

One of these:
002:131 Evolution 4 s.h.
002:168 Genes and Development 3 s.h.
127:191 Human Molecular Genetics 3 s.h.

All of these:
650:270 Responsible Conduct in Research 1 s.h.
Elective coursework in molecular and microbial genetics, cell and development genetics, human genetics, or computational genetics 8 s.h.
Seminar courses approved by the program 5 s.h.

Graduate degree: Ph.D. in Genetics
Web site: http://genetics.grad.uiowa.edu
Even more important than formal course work is the opportunity to do significant research in genetics. Research interests of the participating faculty include virtually all areas of genetics, ranging from bacteriophage genetics to human medical genetics. In each area of genetics, there is a group of faculty members who have closely related interests.

The University is also strong in several related disciplines, including microbial physiology, enzymology, virology, protein biochemistry, computational genetics, and developmental and cell biology, all of which contribute significantly to the overall training program.

In addition to completing research and course work, students must pass a comprehensive examination, usually at the end of their second year in the program.

**Medical Scientist Training Program**

Students may combine study toward an M.D. and a Ph.D. in genetics. See Medical Scientist Training Program (Carver College of Medicine) in the Catalog.

**Dental Scientist Training Program**

Students with a D.D.S. degree may be candidates for advanced training programs in dentistry. For information, contact the College of Dentistry.

**Admission**

Prospective doctoral students in genetics should have a strong undergraduate background in science, including courses in general genetics, organic chemistry, biochemistry, introductory physics, and mathematics, as well as a strong commitment to genetic research and teaching. Students can make up deficiencies in a particular area during their first year of graduate study.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

Admission to the program is based on assessment of applicants’ undergraduate academic records, performance on the Graduate Record Examination (GRE) General Test, and letters of recommendation. Admission requirements are not rigid. Most students working toward a Ph.D. in genetics at the University have an undergraduate g.p.a. above 3.50, and GRE Aptitude Test scores (verbal and quantitative) above 1250. Students with lower grade-point averages or GRE scores may be admitted, depending on prior research experience and other indications of academic potential.

Students generally begin graduate work in the fall semester.

**Financial Support**

All genetics graduate students receive a financial stipend of $23,000 (academic year 2007-2008) plus tuition. Financial support comes from training grants, research assistantships, teaching assistantships, scholarships, individual research grants, or other departmental or college funds. All students are required to do some teaching as part of their development as future scientists and faculty members.

**Associated Courses**

The following courses provide credit toward the Ph.D. in genetics. Not all courses are offered every year.

- 002:131 Evolution 4 s.h.
- 002:168 Genes and Development 3 s.h.
- 033:153 Hard Cases: Science, Policy, and Values—Implications of the Human Genome Project 3 s.h.
- 061:268 Biology and Pathogenesis of Viruses 2 s.h.
- 070:110 Medical Genetics 2 s.h.
- 072:245 Developmental Neurobiology 3 s.h.
- 099:237 Topics in Molecular and Cell Biology 1 s.h.
- 127:170 Bioinformatics 3 s.h.
- 127:173 Computational Genomics 3 s.h.
- 142:210 Advanced Prokaryotic Molecular Biology 3 s.h.
- 142:215 Molecular Biology of Gene Expression 3 s.h.
- 142:220 Mechanisms of Cellular Organization 3 s.h.
- 142:225 Mechanisms of Cell Growth and Development 3 s.h.
- 185:274 Theory of Statistical Genetics 3 s.h.
- 185:276 Statistical Genetics Laboratory 3 s.h.
- 650:270 Responsible Conduct in Research 1 s.h.
Courses

127:150 Genetic Analysis of Biological Systems  3 s.h.
Genetic techniques and approaches for analysis of biological processes; comparison of strengths, weaknesses of a variety of experimental systems.

127:170 Bioinformatics  3 s.h.
Overview of bioinformatics and genomics. Prerequisites: working knowledge of basic genetics and molecular biology concepts and grade of B+ or higher in 002:128, or consent of instructor. Same as 002:170.

127:173 Computational Genomics  3 s.h.
Same as 002:174, 051:122, 055:122.

127:176 Microarray Analysis and Statistics in Bioinformatics  3 s.h.
Same as 002:176, 171:185, 185:103.

127:191 Human Molecular Genetics  3 s.h.
Molecular genetic approaches to human disease; the human genome project, linkage analysis, candidate gene screening, special features of inbred populations, triplet repeat expansions, mitochondrial genetics, genetics of complex traits. Prerequisites: fundamental genetics and molecular biology, or consent of instructor.

127:200 Special Topics in Genetics  1 s.h.
Current research in a selected field of genetics; different topic each year. Companion to a genetics seminar series.

127:301 Graduate Research in Genetics  arr.
Human Toxicology

**Director:** Larry W. Robertson (Occupational and Environmental Health/Free Radical and Radiation Biology/Radiation Oncology)

**Associate director:** Peter Thorne (Occupational and Environmental Health/Civil and Environmental Engineering)

**Affiliated faculty:** Garry Buettner (Free Radical and Radiation Biology/Radiation Oncology), Frederick Domann (Free Radical and Radiation Biology/Radiation Oncology), Jonathan Doorn (Pharmacy), Ken Dornfeld (Free Radical and Radiation Biology/Radiation Oncology), Michael Duffel (Pharmacy), R. William Field (Occupational and Environmental Health/Epidemiology), Laurence Fuortes (Occupational and Environmental Health), Frederic Gerr (Occupational and Environmental Health), Prabhath Goswami (Free Radical and Radiation Biology/Molecular and Cellular Biology/Radiation Oncology), Keri Hornbuckle (Civil and Environmental Engineering), Joel Kline (Immunology/Internal Medicine), Hans-Joachim Lehmler (Occupational and Environmental Health), Gabriele Ludewig (Occupational and Environmental Health), Paul McCray (Pediatrics/Genetics), David Murhammer (Chemical and Biochemical Engineering), Larry Oberley (Free Radical and Radiation Biology/Radiation Oncology/Integrative Physiology), Jerald Schnoor (Civil and Environmental Engineering), Douglas Spitz (Free Radical and Radiation Biology/Radiation Oncology), Jerrold Weiss (Immunology/Internal Medicine/Microbiology), Dale Wurster (Pharmacy)

**Graduate degrees:** M.S., Ph.D. in Human Toxicology

**Web site:** [http://toxicology.grad.uiowa.edu/](http://toxicology.grad.uiowa.edu/)

Toxicology is the study of how biological, chemical, physical, and radiological agents affect living organisms and the ecosystem, and how to prevent or lessen the adverse effects of those agents. The Human Toxicology Program prepares toxicologists to identify and assess environmental exposures, identify mechanisms by which toxicants affect homeostasis or induce disease, identify interventions to prevent adverse effects, and estimate acceptable levels of exposure to protect public health.

The program is interdisciplinary, involving the Graduate College, the Carver College of Medicine, and the Colleges of Engineering, Liberal Arts and Sciences, Pharmacy, and Public Health.

**Graduate Programs**

The Human Toxicology Program offers a Master of Science and a Doctor of Philosophy in human toxicology.

**Master of Science**

The Master of Science in human toxicology requires a minimum of 39 s.h. of graduate credit; a thesis is required. The program is designed for students who wish to pursue a master’s degree as a second degree or through part-time study, particularly those who perform toxicologists’ functions in their jobs and who need additional training.

Entering students should have backgrounds in the biological, engineering, and physical sciences and should have completed courses in introductory chemistry and biology, and organic chemistry.

After entering the program, students work with their assigned mentors to choose an advisory committee, which meets at least once a semester to help the student explore his or her research interests. The committee also provides consultation on course work and research activities and serves as the committee for the final examination (thesis defense).

The Human Toxicology Program is flexible. Students work with their advisory committees to plan a course of study tailored to their individual interests and goals within the field of toxicology.

All M.S. students must successfully complete a first course in toxicology, 175:260 Environmental Toxicology (3 s.h.) or 046:214 Pharmaceutical and Chemical Toxicology (3 s.h.); and an advanced course, 175:265 Advanced Toxicology (4 s.h.).

All toxicology graduate students are required to register for 198:180 Toxicology Research Seminar each semester of their enrollment in the program.

Upon successful completion of all requirements, including the thesis and its oral defense, students are awarded a Master of Science.

**Doctor of Philosophy**

The Doctor of Philosophy in Human Toxicology requires a minimum of 72 s.h. of graduate credit. The program is designed for students with backgrounds in the biological, engineering, and physical sciences. Entering students should have solid training in science, including courses in introductory chemistry and biology, and organic
chemistry; knowledge of biochemistry and molecular biology is also useful. Students may remedy deficiencies by taking appropriate courses during their first year of graduate study.

Students begin the program with three 2-month rotations in the laboratories of participating faculty members, in order to identify a mentor. The mentor assumes financial responsibility for the student. With advice from their mentors, students choose an advisory committee, which meets at least once a semester to help the student explore his or her research interests. The committee also provides consultation on course work and research activities and serves as the committee for the comprehensive examination and the final examination (dissertation defense).

The Human Toxicology Program is flexible. Students work with their advisory committees to plan a course of study tailored to their individual interests and goals within the field of toxicology.

All Ph.D. students must successfully complete a first course in toxicology, 175:260 Environmental Toxicology (3 s.h.) or 046:214 Pharmaceutical and Chemical Toxicology (3 s.h.); and an advanced course, 175:265 Advanced Toxicology (4 s.h.).

All toxicology graduate students are required to register for 198:180 Toxicology Research Seminar each semester of their enrollment in the program and to successfully complete 650:270 Responsible Conduct in Research within the first two years of graduate study.

After successfully completing the comprehensive examination, usually at the end of the second year of graduate study, students advance to Ph.D. candidacy. They devote all of their time to dissertation research and writing. Upon successful completion of all requirements, including the dissertation and its oral defense, students are awarded a Doctor of Philosophy.

Financial Support

Doctoral students in human toxicology receive stipends and tuition support from University of Iowa sources, including Presidential Graduate Fellowships and graduate research assistantships, and from non-University sources, such as training grants from the National Institutes of Health.

Training Opportunities

The Human Toxicology Program is supported by an Iowa Superfund basic research program grant that supports six research projects and seven support cores, including a training core. Human toxicology faculty members are supported by the Environmental Health Sciences Research Center, a National Institute of Environmental Health Center of Excellence.

Facilities

Training is conducted primarily in laboratories and teaching facilities of the departments and colleges of Human Toxicology Program faculty members. These are among the best-equipped laboratories on campus. Together with the University’s central research facilities, they provide access to the most up-to-date research equipment and expertise.

Associated Courses

For course descriptions and prerequisite information, see the course listings in the College of Pharmacy (prefix 046) and Department of Occupational and Environmental Health (prefix 175) sections of the Catalog.

Courses

198:171 Special Problems in Toxicology
Didactic material that may include tutorial, seminar, or faculty-directed research work; or a special topic. Prerequisite: consent of advisor.

198:173 Toxicology Journal Club
Current topics in toxicology literature. Prerequisite: consent of advisor.

198:180 Toxicology Research Seminar
Contemporary research topics.

198:201 Toxicology Research
Research that constitutes part of the thesis. Prerequisite: consent of advisor.

198:300 Thesis/Dissertation
Thesis or dissertation research; seminar preparation. Prerequisite: consent of advisor.
The Immunology Program provides interdisciplinary training in the concepts and methodologies of basic and applied immunology. Faculty members are involved in a variety of research projects dealing with the immune system at all levels—structural, functional, cellular, biochemical, and molecular. Students take coursework in immunology and related disciplines and are involved directly in laboratory research throughout their study.

**Graduate Program**

**Doctor of Philosophy**

The Doctor of Philosophy in immunology requires a minimum of 72 s.h. of graduate credit. The program is quite flexible, accommodating students with a wide range of backgrounds in course work as well as practical experience in the biological and physical sciences. Entering students generally are expected to have strong records in biology, chemistry, biochemistry, microbiology, genetics, and mathematics. An introductory course in immunology is desirable. Deficiencies in specific areas often can be remedied through appropriate coursework taken during the first year of graduate studies.

The curriculum consists of a sequence of required and elective courses that provide training in the conceptual and methodologic aspects of immunology. There is ample opportunity for study in a variety of fields that interface with immunology.

Students take the following courses.

Electives (approved by advisor) 6 s.h.

After successfully completing the comprehensive examination, usually by the end of the second year of graduate study, students advance to candidacy for the Ph.D. They devote most of their time to research and writing their dissertation. They also must satisfy a one-semester teaching requirement, which can be met by teaching a course from one of a variety of disciplines. Upon successful completion of all requirements, including the dissertation and its oral defense according to the Manual of Rules and Regulations of the Graduate College, students are awarded a Ph.D. in immunology.

**Admission**

For information regarding admission and application procedures, contact the Immunology Program or visit its web site.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

**Financial Support**

All students in the Immunology Program receive stipends and tuition support, which comes from a variety of sources, including training grants from the National Institutes of Health, University of Iowa fellowships and graduate research assistantships, and individual faculty research grants.
## Facilities

Training is conducted in laboratories and teaching facilities of the Carver College of Medicine Departments of Internal Medicine, Pathology, Microbiology, Pediatrics, Pharmacology, and Urology. Faculty laboratories and central research core facilities provide students with access to state-of-the-art research equipment.

Informatics

Director: John C. Keller (Graduate College)
Affiliated faculty: Paul Abramowitz (Pharmacy), Michael Anderson (Molecular Physiology and Biophysics), Jose Assouline (Biomedical Engineering), William Ballard (Biological Sciences), Debashish Bhattacharya (Biological Sciences/Genetics), Warren Boe (Management Sciences), Shannon Bradshaw (Management Sciences), Terry Braun (Biomedical Engineering/Ophthalmology and Visual Sciences), Gregory Carmichael (Chemical and Biochemical Engineering), Thomas Casavant (Electrical and Computer Engineering/Genetics/Biomedical Engineering), Kathryn Chaloner (Biostatistics), Josep Comeron (Biological Sciences), Mary Cowles (Statistics and Actuarial Science), James Cremer (Computer Science), Beverly Davidson (Genetics/Molecular and Cellular Biology), Isabel Darcy (Mathematics), Deborah Dawson (Preventive and Community Dentistry), Frederick Domann (Radiation Oncology), John Donelson (Biochemistry), David Eichmann (Library and Information Science/Computer Science), Adrian Elcock (Biochemistry), James Emborg (Library and Information Science), John Engelhardt (Anatomy and Cell Biology), Jan Fassler (Biological Sciences/Genetics), James Flanagan (Internal Medicine), Robert Forsythe (Economics), Lilach Hadany (Biological Sciences), Stephen Hendrix (Biological Sciences), Juan Hourcade (Computer Science), Jian Huang (Statistics and Actuarial Science/Biostatistics), Mark Janis (Law), Michael Jones (Biostatistics), Patricia Katopol (Library and Information Science), Joe Kearney (Computer Science), Michael Kienzl (Internal Medicine), Al Klingelhutz (Microbiology), Andrew Kusiak (Mechanical and Industrial Engineering), Ramon Lawrence (Computer Science), Yi Li (Mathematics), Mark Light (Linguistics/Library and Information Science/Computer Science), Jack Lilien (Biological Sciences), Jim Lin (Biological Sciences/Genetics), John Logsdon (Biological Sciences/Genetics), Der-Fa Lu (Nursing), Michael Mackey (Biomedical Engineering), Bryant McAllister (Biological Sciences), Paul McCray (Pediatrics/Genetics), Geoffrey McLennan (Internal Medicine), Colleen Mitchell (Mathematics), Peter Nagy (Pathology), Andrew Norris (Pediatrics), Joseph Reinhardt (Biomedical Engineering), John Robinson (Electrical and Computer Engineering), Tom Rocklin (Psychological and Quantitative Foundations), Andrew Russo (Molecular Physiology and Biophysics/Genetics/Biosciences), Todd Scheetz (Ophthalmology and Visual Sciences/Biomedical Engineering), Jerry Schnoor (Civil and Environmental Engineering/Occupational and Environmental Health), Alberto Segre (Computer Science/Public Health Genetics), Val Sheffield (Pediatrics/Genetics), Ming-Che Shih (Biological Sciences/Genetics), Curt Sigmund (Internal Medicine), Richard Smith (Otolaryngology—Head and Neck Surgery/Genetics), David Soll (Biological Sciences), Bernard Sorofman (Pharmacy), Padmini Srinivasan (Library and Information Science/Management Sciences/Computer Science/Nursing), Jack Stapleton (Internal Medicine), John Stokes (Internal Medicine), Edwin Stone (Ophthalmology and Visual Sciences/Genetics), Nick Street (Management Sciences/Computer Science), Ramaswamy Subramanian (Biochemistry), Luke Tierney (Statistics and Actuarial Science), Tanya Uden-Holman (Health Management and Policy/Nursing), Douglas Wakefield (Health Management and Policy), Thomas Wassink (Psychiatry), Kai Wang (Biostatistics/Public Health Genetics), George Weiner (Internal Medicine), Michael Welsh (Molecular Physiology and Biophysics), Stephen Wieting (Sociology), Hwanjo Yu (Computer Science/Nursing), Ying Zhang (Biostatistics)

Graduate degrees: M.S., Ph.D. in Informatics
Graduate nondegree program: Certificate in Informatics
Web site: http://informatics.grad.uiowa.edu

The field of informatics springs from the intersection of computational disciplines related to the humanities, the arts, and the biological, health, natural, and social sciences. As the rapid development of information technology transforms the world of human pursuits, informatics offers ways to solve new problems and to examine existing problems from new perspectives.

The Informatics Program provides students the opportunity to study informatics in the broadest sense. The program is interdisciplinary, involving the Graduate College, the Carver College of Medicine, and the Colleges of Engineering, Liberal Arts and Sciences, Nursing, and Public Health.

Graduate Programs

The Informatics Program offers a Master of Science and a Doctor of Philosophy in informatics, and the graduate Certificate in Informatics.

Master of Science

The Master of Science in informatics requires a minimum of 32 s.h. of graduate credit. It is offered with tracks in health informatics and information science. Students working toward a Doctor of Philosophy in informatics may be granted the Master of Science upon completion of the M.S. requirements.
The required 32 s.h. includes 9 s.h. in foundations of informatics and at least 9 s.h. in disciplinary applications of informatics.

Students select an advisor from their subtrack’s affiliated faculty members. In consultation with their advisors, students prepare a study plan, which is reviewed at least once a year. Students who do not already hold an M.S. from The University of Iowa may request that one be granted to them at the doctoral comprehensive exam. A final master’s examination, not related to the Ph.D. comprehensive exam, may be required.

Doctor of Philosophy

The Doctor of Philosophy in informatics requires a minimum of 72 s.h. of graduate credit. It is offered with subtracks in health informatics and information science.

Students select an advisor from their subtrack’s affiliated faculty members. In consultation with their advisors, students prepare a study plan, which is reviewed by their mentors and curricular advisory committees at least once a year. Ph.D. students must pass a comprehensive examination at or near completion of their course work requirements. The exam may be written, oral, or both, depending on the structure of the student’s subtrack or the decision of the student’s committee. Upon successful completion of all requirements, including the dissertation and its oral defense, students are awarded a Doctor of Philosophy.

Certificate

The Certificate in Informatics requires a minimum of 18 s.h. of graduate credit and is offered with subtracks in health informatics, information science, and bioinformatics and computational biology. The program is designed for students who wish to complement their graduate degree programs with knowledge of informatics.

The 18 s.h. required for the certificate includes 9 s.h. in the foundations of informatics and at least 9 s.h. in disciplinary applications of informatics. Work toward the Certificate in Informatics may not completely substitute for courses or examinations required for the student’s graduate degree program.

Admission

Applicants to the M.S. or Ph.D. program should apply to the degree subtrack of their choice. The subtrack programs make independent admission decisions.

Applicants to the certificate program should apply to the subtrack of their choice. They must be in good academic standing in their graduate degree program.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

Courses

200:201 Leadership and Management in Complex Health Care Systems 3 s.h.
Introduction to complex systems theory in the biological, physical, and social sciences; applications in decision-making processes, change management, organizational effectiveness, and implementation of technology; interdisciplinary approach. Prerequisite: graduate standing.
The International Writing Program is a unique residency program for established writers from outside the United States. IWP participants range from emerging talents to writers who are among their countries’ leading literary figures and writers of world stature.

Each fall the International Writing Program assembles a community of poets, fiction writers, essayists, playwrights, and journalists. For most of them, the IWP is their first, or their first extended, stay in the United States. At the University they live and interact with each other while working on writing and translation projects. Throughout their residency, they participate in 181:191 International Literature Today and in 181:205 International Translation Workshop. They also interact with the public through readings, panel discussions, and other presentations.

Since 1967, more than 1,000 writers from 115 countries have participated in the program.

International Writing Program participants are supported by the U.S. Department of State, through bilateral agreements with many countries, by grants from cultural institutions and governments abroad, and by private funds. The program does not provide grants for writers.

For more information, contact the International Writing Program or visit the program’s web site.

Courses

181:001 Readings for Writers 1 s.h.
Introduction to the Iowa City writing community; attendance at readings by professional, faculty, and student writers; students keep journals about readings.

Directed readings in contemporary world literature.

181:152 America in Other Words 1-3 s.h.
Current idea of America in its imaginary form: post-1989 world fiction, poetry, and film in original language, in translation, and via online translation resources. Same as 048:152.

181:191 International Literature Today 1, 3 s.h.
Same as 008:191.

181:205 International Translation Workshop 1-3 s.h.
International writers pair with University of Iowa translators to write new works of poetry and fiction in English; second-language fluency not required for international writers. Same as 048:205.

181:247 Crossing Borders Seminar 2-3 s.h.

181:260 Translation Workshop 1-3 s.h.
Same as 08W:260, 048:260.
Library and Information Science

**Director:** James Elmborg  
**Professor:** Padmini Srinivasan  
**Professors emeritae:** Esther Bierbaum, Velva Jeanne Osborn  
**Adjunct professor:** Nancy L. Baker  
**Associate professors:** David Eichmann, James Elmborg  
**Associate professor emeritus:** Carl Orgren  
**Adjunct associate professor:** Jean Donham  
**Assistant professors:** André Brock, Haowei Hsieh, Patricia Katopol, Jennifer Burek Pierce, Joan Bessman Taylor  
**Graduate degree:** M.A. in Library and Information Science  
**Web site** http://www.slis.uiowa.edu

Today’s age is defined by the intersection of information, technology, and human creativity. In this context, library and information science is dedicated to understanding the nature of information, the interaction between information and communication technologies, the relationship between information and knowledge, the cognitive and affective aspects of knowledge acquisition, and the interface between people and information. It offers new knowledge, technological benefits, and professional expertise for every dimension of human affairs.

Library and information professionals take on many challenges in serving the needs of their constituencies—children and teachers, members of academic communities, employees of profit and nonprofit organizations, and the public at large—constituencies that range from information poor to information rich. They work in the contexts of issues such as information and communication technology, public and private information policy, managerial policy, and regional, national, and international economics.

The School of Library and Information Science prepares professionals to meet these diverse challenges. It offers a graduate-level program of preparation for careers in all types of libraries and information centers, providing students with a strong, well-rounded education in an environment that supports individuals from all segments of a multicultural, multiethnic, and multilingual society. Its curriculum reflects the profession’s immediate and long-range needs and prepares students to be leaders in a changing field.

By promoting excellence in research, the school contributes to the base of theoretical and practical knowledge in library and information science and helps develop an understanding of how to meet the varied and changing information needs of individuals and society. It also provides public service through continuing education programs, selective consulting services for library and information centers, and participation in professional organizations.

The school strongly encourages its students, faculty members, and alumni to shape the future of the profession by filling key roles in organizations involved in all aspects of the information cycle.

**Graduate Programs**

The school offers a Master of Arts in library and information science. It offers the joint J.D./M.A. with the College of Law, the joint M.B.A./M.A. with the Tippie College of Business, and the joint M.A./Certificate in Book Studies/Book Arts and Technologies with the Center for the Book. Library and information science students also may earn the Certificate in Informatics.

The Master of Arts in library and information science has held continuous accreditation from the American Library Association since 1971.

Library science graduates have many options for employment. Alumni hold positions in public, school, special, and academic libraries as well as other information settings. They serve in varied roles, such as information consultant, database manager, library administrator, webmaster, network coordinator, cataloger, children’s librarian, school library media specialist, and archivist.

**Master of Arts**

The Master of Arts in library and information science requires 36 s.h. of graduate credit. A thesis option is available for students who seek additional research experience.

Students pursuing the master’s degree gain an understanding of the foundations of the library and information profession, including the history of the field, ethical and philosophical concerns, the information cycle, principles and procedures for dealing with a variety of information carriers,
and the theory and practice of strategic management. They examine future trends, with emphasis on cutting-edge technological concerns. They study the discipline's research base, gaining heightened awareness of the synergism between library and information science and other disciplines, as well as the close relationship between research and practice. Finally, students become knowledgeable about the factors that underlie users’ information needs and appropriate strategies to satisfy those needs.

Students typically complete the program in a year and a half to two years. The maximum allowable load for graduate students is 15 s.h. during regular semesters and 8 s.h. during summer sessions, but most full-time students carry fewer semester hours than the maximum. It also is possible to complete the program on a part-time basis.

Requirements include 9 s.h. in three required, introductory-level courses; 12 s.h. in secondary-level courses; 15 s.h. in electives; and the successful completion of a portfolio. Students must maintain a g.p.a. of at least 3.00.

The curriculum has three tiers. The first tier consists of three required courses that provide a solid grounding for all successive course work: 021:101 Cultural Foundations, 021:120 Computing Foundations, and 021:122 Conceptual Foundations. The second tier includes eight courses, of which students must take a minimum of four. Courses in the third tier are electives. This three-tier arrangement allows each student to concentrate in an area that most closely matches his or her professional goal.

**TIER I**

All of these:

- 021:101 Cultural Foundations 3 s.h.
- 021:120 Computing Foundations 3 s.h.
- 021:122 Conceptual Foundations 3 s.h.

**TIER II**

Four of these:

- 021:124 Database Systems 3 s.h.
- 021:141 Reference and Information Services 3 s.h.
- 021:202 Research Methods 3 s.h.
- 021:222 Beginning Cataloging and Classification 3 s.h.
- 021:240 Collection Management 3 s.h.
- 021:242 Search and Discovery 3 s.h.
- 021:248 Information Literacy 3 s.h.

No more than one of these:

- 021:260 Strategic Management 3 s.h.
- 021:262 School Library Media Administration 3 s.h.

- 021:263 Nonprofit Organizational Effectiveness I 3 s.h.

**TIER III**

- 021:123 User Education: Multimedia 3 s.h.
- 021:143 Resources for Children 3 s.h.
- 021:144 Resources for Young Adults 3 s.h.
- 021:145 Resources for Adults 3 s.h.
- 021:223 Advanced Cataloging and Classification 3 s.h.
- 021:224 Electronic Publishing 3 s.h.
- 021:226 Digital Libraries 3 s.h.
- 021:228 Hypertext Systems 2 s.h.
- 021:230 Text Retrieval 3 s.h.
- 021:234 Information Knowledge Management 3 s.h.
- 021:239 Topics: Conceptual Structures/Systems 1-3 s.h.
- 021:244 Government Information Resources 3 s.h.
- 021:249 Topics in Book Studies 1-3 s.h.
- 021:254 Analysis of Scholarly Domains 3 s.h.
- 021:256 History of Readers and Reading 3 s.h.
- 021:258 The Transition from Manuscript to Print 3 s.h.
- 021:259 Topics: Resources/Services 1-3 s.h.
- 021:265 Nonprofit Organizational Effectiveness II 3 s.h.
- 021:270 Public Libraries 3 s.h.
- 021:271 College and University Libraries 3 s.h.
- 021:272 Special Libraries 3 s.h.
- 021:275 Health Informatics I 3 s.h.
- 021:278 Information Policy 2 s.h.
- 021:279 Topics: Policy/Planning 1-3 s.h.
- 021:280 Health Informatics II 3 s.h.
- 021:282 Practicum in Libraries and Information Centers 2-3 s.h.
- 021:284 School Library Media Practicum 3 s.h.
- 021:289 Seminar in Library and Information Science 3 s.h.
- 021:290 Capstone 1 s.h.

**Transfer Credit**

Up to 9 s.h. of graduate credit in library and information science or related areas may be accepted in transfer from another institution, subject to the approval of the transfer credit committee. Approval is given course-by-course and is determined by the course’s content, currency, and applicability to the student’s program.

**Specializations**

Students earn 15 s.h. in elective courses selected with the guidance of their advisors. Students’ programs often are designed around particular career goals. Following are examples of possible specializations.
PUBLIC LIBRARIES
Public libraries provide informational, educational, and recreational materials and a wide range of services for a diverse clientele. Although public libraries receive the bulk of their funding from local taxes, they also may be organized on a regional or statewide cooperative basis. The variety of uses, services, materials, and organizational structures of public libraries makes this a challenging area of librarianship. Public librarians need to develop skills in analyzing the communities they serve, designing comprehensive marketing plans to meet their needs, implementing the plans in a cost-effective way, and evaluating the success of their efforts.

ACADEMIC LIBRARIES
The academic library, whether in a community college, a four-year college, or a university, provides information services in support of the parent institution’s teaching, research, and public service missions. These services include instruction in the use of the library and its resources. Management skills and subject or language competence often are required. Since librarians in this setting usually are considered academic faculty members, possession of a second master’s or other advanced degree is desirable.

SPECIAL LIBRARIES AND INFORMATION CENTERS
Special libraries serve corporations, private companies, government agencies, technical and academic institutions, museums, medical facilities, and information management consulting firms. They are organized to anticipate and quickly respond to the specific information needs of their users. Special librarians are information resource experts who collect, analyze, evaluate, package, and disseminate information to facilitate accurate decision making. Knowledge of information technology and the ability to design services suitable to the parent organization are professional necessities. In addition, substantial subject expertise may be required.

SCHOOL LIBRARY MEDIA CENTERS
The school library media center makes available to students and teachers a wide range of library and instructional materials in a variety of formats. The work of the library media specialist includes providing instruction to students in accessing, evaluating, and using information, collaborating with teachers on the use of resources in instruction, providing leadership in the use of instructional and information technologies, offering reading guidance, providing reference service, and managing the library media center. The University of Iowa offers a state-approved program leading to endorsement as school media specialist K-12. In order to fulfill state requirements for this endorsement, students must hold or be eligible for a teaching license and must complete a designated sequence of courses, which leads both to certification and to the M.A. degree.

INFORMATION SCIENCE
The multidisciplinary field of information science is influenced by the rapid growth in digital information collections and technologies. This specialization offers expertise in retrieval, dissemination, and use of information. In addition to libraries and information centers, many for-profit organizations are finding that information is a valuable commodity in today’s competitive world and are employing information management personnel. The curriculum offers opportunities to study information science aspects, such as digital libraries, electronic publishing, and automated systems design.

Joint Master’s Degrees
The School of Library and Information Science has established joint degree programs with the Tippie College of Business and the College of Law. The primary goal of these joint programs is the integration of the two areas of study. Separate admission to each degree program is required. Up to 9 s.h. in business or law may be applied toward the M.A. in library and information science; up to 9 s.h. in library and information science may be applied toward the M.B.A., and 12 s.h. may be applied to the J.D.

In addition to these formal joint programs, arrangements can be made for joint programs between departments on an ad hoc basis. A minimum of 60 s.h. of graduate work is required for a joint master’s degree program.

For more information on joint degrees, see College of Law or Master of Business Administration Program in the Catalog.

Joint M.A./Book Studies Certificate
Students interested in special collections, book arts, or museum librarianship may pursue an M.A. in library and information science in conjunction with a graduate Certificate in Book Studies/Book Arts and Technologies. The joint
program also may be appropriate for students interested in book studies scholarship and those seeking careers in publishing, graphic arts, or book-related industries that require a similar blend of subject and technical knowledge.

The joint program requires a total of 51 s.h. At least 27 s.h. must be earned in the M.A. program, at least 15 s.h. must be earned in the certificate program, and the remaining 9 s.h. may be earned in either program.

To enroll in the joint program, students must be admitted both to the School of Library and Information Science and to the Center for the Book, and must fulfill the basic requirements of each program.

Informatics Certificate

Students interested in careers involving health science libraries or hospital information centers may earn a Certificate in Informatics with the optional health informatics subtrack. The certificate is offered by the Graduate College together with several other University colleges and departments. Its health informatics subtrack emphasizes the organization, management, and use of health care information; health care research, education, and practice; and information technology developments in the socioeconomic context of health care.

The certificate requires at least 18 s.h. of course work, including 021:275 Health Informatics I, 021:280 Health Informatics II, and approved electives. Students may earn the Certificate in Informatics with the health informatics subtrack in conjunction with their M.A. in library and information science. Visit http://www.uiowa.edu/health-informatics for more information.

Facilities, Resources

The School of Library and Information Science is housed in the south wing of the University’s Main Library, in a setting that promotes community among students, faculty, and staff. Facilities are provided for the varied instructional and research activities of the school.

Technology Laboratory

The school houses a state-of-the-art technology laboratory with current Windows and Macintosh computers. The computers are networked to the campus backbone and provide access to a rich variety of relevant software. The laboratory is used primarily by students for course assignments and to gain experience with specialized software. In addition, the classrooms are equipped with networked machines that allow faculty members to use teaching technologies in their courses. An Apple X Serve is used to deliver and maintain a common software environment. Students have access to Dialog, LexisNexis, OCLC databases, Westlaw, and a wide variety of library automation products. They also are given an account for file storage.

Research Laboratory

The facilities of the school’s research laboratory are used by faculty members and students to investigate current problems, such as distributed information retrieval, cross-language information retrieval, and information filtering. They are available for student-based research investigations.

University Libraries

All of the resources of the University of Iowa Libraries are available to the school’s students and faculty. The system contains more than 4 million volumes in the Main Library and 11 departmental libraries.

The web-based catalog provides access to books and periodicals, electronic indexes, and full-text databases held by University Libraries. In addition, the InfoHawk Catalog to online resources provides access to selected Internet and CD-ROM resources arranged by subject and academic discipline. Wireless Internet access is available in many areas of the Main Library.

Students also have full access to the Information Arcade, which facilitates integration of new information and multimedia technologies with learning and research. Here students find a variety of electronic resources for learning advanced information skills and for gaining access to information in various formats and through various networks, including the Internet. The Arcade also houses an electronic classroom.

The third floor of the Main Library houses the map collection and Special Collections & University Archives, including the Iowa Women’s Archives.

Other Libraries

Students have access to a variety of libraries through field trips, practicum experience, and personal use: the State Historical Society of Iowa
library in Iowa City; the Iowa City, Coralville, and Cedar Rapids public and school libraries; the Augustana, Coe, Cornell, Mount Mercy, and Grinnell College libraries; and the Herbert Hoover Presidential Library and Museum in West Branch.

Other Resources

Lindquist Center, across the street from the Main Library, houses the College of Education Curriculum Resources Laboratory and Education Technology Center. The Curriculum Resources Laboratory contains an extensive collection of book and nonbook instructional materials for children in preschool through grade 12. It is especially valuable for students interested in school or public library work.

Lindquist Center also houses the academic technologies and campus services departments of the University’s Information Technology Services. It provides instructional and research computing facilities and services for the University community. All University students, staff, and faculty may use the center’s computers for University-related research, thesis preparation, and class work. Instructional Technology Centers provide campuswide access to the University’s academic computing resources and the Internet.

Student Activities

All students in the program are automatically members of LISSO, the Library and Information Science Student Organization, which also serves as the student chapter of the American Library Association. In addition, there are student chapters of the American Society for Information Science and Technology and Special Libraries Association. These student-run organizations sponsor various activities such as speaker series, workshops, brown bag lunches, and picnics. The associations provide students with significant opportunities for professional and extracurricular growth. Students also are encouraged to join other state and national professional organizations.

Honor Society

The Beta Beta Theta Chapter of Beta Phi Mu, the international honor society for library and information science, is located at The University of Iowa. Each year new members are chosen from the top 25 percent of the preceding year’s graduating classes. To be eligible for membership, graduates must achieve a g.p.a. of at least 3.75, demonstrate professional promise, and be recommended by the faculty.

Placement

The school provides active placement assistance to its graduates through printed and electronic announcements, seminars on Internet job searching, résumé writing and interviewing, and personal counseling. The University’s Educational Placement Office issues a regular listing of job openings and provides a credential file service.

According to the annual placement survey in Library Journal, Iowa’s placement rate consistently ranks among the highest for ALA-accredited programs. Iowa graduates find positions in all types of libraries. The placement distribution for six recent years was: academic libraries, 38 percent; public libraries, 28 percent; special libraries, 17 percent; and school libraries, 17 percent. Iowa graduates currently work in libraries in 46 states and 9 foreign countries. Strong personal and academic qualifications, job flexibility, and geographic mobility are important factors in obtaining a position.

Admission

Applicants for admission to the M.A. program are required to have a g.p.a. of at least 3.00 on a 4.00 scale and are required to have a verbal and quantitative score of at least 1000 and an analytical writing score of at least 4 on the Graduate Record Examination. The admissions committee also considers each applicant’s letters of recommendation, statement of purpose, and other appropriate criteria. Each entering class is selected on a competitive basis.

International applicants whose first language is not English must score at least 600 (paper-based), 250 (computer-based), or 100 (Internet-based) on the Test of English as a Foreign Language (TOEFL).

Applicants begin the admission process by contacting the School of Library and Information Science. The process requires a completed application form, transcripts of all academic work, a written statement of purpose and goals, and three letters of recommendation.

Completed applications should be received by the school by February 1 for consideration for fall admission. Decisions of the admissions committee are announced four to six weeks after the deadline. Late applications are considered if places are still available. Financial aid often is not
available for late applicants. Admitted students are immediately assigned a faculty advisor for program planning.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

Financial Support

The School of Library and Information Science awards partial-tuition scholarships and one-quarter-time graduate assistantships. To be considered for scholarships or assistantships, applicants should have an undergraduate g.p.a. of at least 3.00 and a combined score (verbal, quantitative, and analytical) of 1700 on the old Graduate Record Examination (GRE) General Test, or 1100 (verbal and quantitative) and 4.5 (analytical writing) on the new GRE. Prospective students are urged to apply for these awards before February 1. For information on student loans, work-study eligibility, or other financial assistance, contact the Office of Student Financial Aid. For information on national scholarships, contact the School of Library and Information Science or visit its web site. Part-time employment usually is available in the University Libraries and other campus units.

Courses

021:090 Information Handling 3 s.h.
Gathering, evaluating, and employing information from library and nonlibrary sources, including multimedia and electronic systems. Prerequisite: undergraduate standing.

021:101 Cultural Foundations 3 s.h.
The role of libraries and information agencies in society; major issues, including information policy, professional ethics, literacy, diversity, technology, pedagogy. Prerequisite: admission to library and information science or consent of instructor.

021:120 Computing Foundations 3 s.h.
Introduction to analysis, specification, and design of automated systems; review of the software life cycle; testing, deployment, and evaluation of large, computer-based software. Prerequisite: admission to library and information science or consent of instructor.

021:122 Conceptual Foundations 3 s.h.
Theory, principles, and standards in organization of information; function of catalogs, indexes, bibliographic networks; introduction to metadata descriptions, name and title access, subject analysis, controlled vocabularies, classification systems. Prerequisite: admission to library and information science or consent of instructor.

021:123 User Education: Multimedia 3 s.h.
Learning theory as it relates to design of multimedia products for user education; presentation of information using multimedia technology in a Macintosh environment; development of user education products in linear and nonlinear forms.

021:124 Database Systems 3 s.h.
Theory and methodologies for semantic, logical, and physical database design; languages for query and manipulation of information; normalization, optimization, processing of concurrent transactions. Prerequisite: 021:120.

021:141 Reference and Information Services 3 s.h.
Resources and services; essential reference services and experience using a variety of print and electronic resources to answer specific reference questions.

021:143 Resources for Children 3 s.h.
Evaluation and use of books, magazines, electronic media, and other sources of information and recreation in relation to youth development. Prerequisite: 021:101 or consent of instructor.

021:144 Resources for Young Adults 3 s.h.
Topics related to populations served by youth services departments (e.g., societal issues, informational needs); seminar. Prerequisite: 021:101 or consent of instructor.

021:145 Resources for Adults 3 s.h.
Role of libraries in meeting adults’ informational and recreational needs; popular culture materials, Reader’s Advisory services, lifelong learning. Prerequisite: 021:101 or consent of instructor.

021:202 Research Methods 3 s.h.
Concepts and methods for research in library and information science; emphasis on design of qualitative and quantitative research; data collection techniques appropriate to information professions; examination and evaluation of research in the professional literature.

021:222 Beginning Cataloging and Classification 3 s.h.
Systems for describing materials and information in catalogs and organizing them for effective retrieval in libraries, museums, and other information centers; AACR2 descriptive principles, Dewey and Library of Congress classifications, Sears and LC subject headings, cataloging networks and services. Prerequisite: 021:122.

021:223 Advanced Cataloging and Classification 3 s.h.
Special problems in description of materials; authority work; file structures, serials, other nonmonographic materials; Library of Congress, other classifications; subject retrieval, reclassification, other administrative issues; international bibliographic criteria; online cataloging experience. Prerequisite: 021:222.

021:224 Electronic Publishing 3 s.h.
Modes and methods for building electronic journals, books, thematic collections; new genres for publishing, including blogs, wikis, comics, short stories on the web; social, political, and economic forces that shape electronic publishing; XML-based project. Prerequisite: 021:101. Same as 108:224.

021:226 Digital Libraries 3 s.h.
Methods and models for building digital libraries; organization with metadata; standards such as those for object identifiers, open access, building cross-linkages between collections; automatic harvesting of content. Prerequisite: 021:120.

021:228 Hypertext Systems 2 s.h.
Theory, design, and implementation of hypertext-based information systems; access mechanisms, including navigation, browsing, search; issues in representation of information, user interfaces; case studies of representation systems, including the World Wide Web. Prerequisite: 021:120.

021:230 Text Retrieval 3 s.h.
Text representation and retrieval models; query models, including Boolean, probabilistic, fuzzy; text ranking models; web search engines; applications founded on text retrieval systems. Prerequisite: 021:120. Same as 06K:233.

021:234 Information Knowledge Management 3 s.h.
Issues in distributed, networked, heterogeneous, and dynamic information environments (intranets, web); hypertext, XML, CGI, and scripting languages; algorithms for coping with information...
021:239 Topics: Conceptual Structures/Systems 1-3 s.h.
Special topics relevant to conceptual structures (e.g., knowledge, representation, manipulation schemes) and systems (e.g., intelligent OPACS, user interface technologies). Repeatable. Prerequisite: 021:120.

021:240 Collection Management 3 s.h.
Collection management of print and electronic resources; selection and management principles, policies, procedures in various settings; production and distribution of resources; intellectual freedom.

021:242 Search and Discovery 3 s.h.
Search system architecture; information needs and queries; search models; concepts in relevance and repositories, archives, web-based systems; information quality measures.

021:244 Government Information Resources 3 s.h.
Emphasis on federal documents as an information resource; state, local, foreign, international materials; special concerns of organizing and administering document collections. Prerequisite: 021:141.

021:248 Information Literacy 3 s.h.
Design of information literacy curriculum and teaching strategies relevant to libraries; theory and research in learning and cognitive development; practice teaching strategies in library settings.

021:249 Topics in Book Studies 1-3 s.h.
Topics relevant to book studies and special collections. Prerequisite: admission to library and information science. Same as 108:230.

021:254 Analysis of Scholarly Domains 3 s.h.
Information transfer in academic disciplines; scientific method, other means of knowledge construction, resulting literatures; reference tools used to control literature for a variety of audiences; emphasis on humanities, social sciences, or sciences. Prerequisite: 021:141. Same as 160:230.

021:256 History of Readers and Reading 3 s.h.
Cultural nature of reading practices in historic and contemporary contexts of reading; reading communities; dimensions of gender, age, class, religion, race, ethnicity; examples of recent scholarship; use of primary resources; seminar. Prerequisite: 021:101 or consent of instructor. Same as 108:220.

021:258 The Transition from Manuscript to Print 3 s.h.
Same as 16E:118, 108:183.

021:259 Topics: Resources/Services 1-3 s.h.
Current topics in types of information resources and services.

021:260 Strategic Management 3 s.h.
Management and administration of all types of libraries; basics of leadership and teamwork; management issues, and skills in context of the organization.

021:262 School Library Media Administration 3 s.h.
Design of library media programs for the major functions of teaching and learning, information access, and program administration; focus on curricular and teaching responsibilities of school librarians and media specialists, development of philosophy, examination of roles and responsibilities, and program evaluation.

021:263 Nonprofit Organizational Effectiveness I 3 s.h.

021:265 Nonprofit Organizational Effectiveness II 3 s.h.

021:270 Public Libraries 3 s.h.
Historical development of public libraries; current issues in public library management and policy making, including intellectual freedom; readers advisory service and genres of popular materials for adults.

021:271 College and University Libraries 3 s.h.
Objectives, organization, unique functions and services of academic libraries; educational environment in which academic libraries function; examination of issues and problems affecting academic libraries.

021:272 Special Libraries 3 s.h.
Management, organizational structures, collections, client services in special libraries; site visits to a variety of special libraries, information centers; projects that apply theoretical principles.

021:275 Health Informatics I 3 s.h.
Technological tools that support health care administration, management, and decision making. Prerequisite: graduate standing or consent of instructor. Same as 050:283, 051:187, 056:186, 074:191, 096:283, 174:226.

021:278 Information Policy 2 s.h.
Development of policy based on ethical and legal issues in library and information professions; intellectual freedom, intellectual property, privacy, equity.

021:279 Topics: Policy/Planning 1-3 s.h.
Current topics in national and international policies, their impact on planning. Repeatable. Prerequisite: 021:260. Same as 108:222.

021:280 Health Informatics II 3 s.h.

021:282 Practicum in Libraries and Information Centers 2-3 s.h.
Supervised field experience in selected libraries and information centers; emphasis on application of theory to practice; at least 80 hours of fieldwork. Prerequisite: consent of instructor.

021:284 School Library Media Practicum 3 s.h.
Supervised field experience in library media centers at elementary and secondary school levels; emphasis on application of theory to practice; at least 80 hours of fieldwork. Prerequisites: 021:262 and consent of instructor.

021:286 Research Practicum 1-3 s.h.
Student research conducted in conjunction with a faculty member's research. Prerequisites: 021:202 and consent of instructor, advisor, and director.

021:289 Seminar in Library and Information Science 3 s.h.
Contemporary issues in library and information science; student presentations, guest speakers. Prerequisite: consent of instructor.

021:290 Capstone 1 s.h.
Opportunity for students to synthesize their learning in the program, to reflect on their professional education as they prepare for graduation, and to form goals. Prerequisite: 27 s.h. earned in library and information science.

021:292 Independent Study 1-3 s.h.
Formal contract between student and faculty member. Prerequisites: formal proposal and consent of instructor.

021:299 Thesis 0-3 s.h.
The Molecular and Cellular Biology Program provides interdisciplinary training in the concepts and methodologies fundamental to the investigation of biological mechanisms at the molecular level. Faculty members are involved in a variety of research projects related to gene expression and regulation.

Graduate Program

Doctor of Philosophy

The Doctor of Philosophy in molecular and cellular biology requires a minimum of 72 s.h. of graduate credit. The program is sufficiently flexible to accommodate students with a wide range of backgrounds in the biological and physical sciences. Entering students are expected to have a solid background in science, including introductory biology and chemistry, organic chemistry, physical chemistry, calculus, genetics, and biochemistry. Students can remedy deficiencies in particular areas by taking appropriate courses during the first year of graduate study.

The curriculum consists of a sequence of required, core, and elective courses that provide didactic training in molecular and cellular biology and that ensure comprehensive exposure to concepts and experimental methodologies in the field. Students engage in laboratory research immediately upon enrollment and progress rapidly to original thesis projects that lead to the Ph.D.

Because of the diversity of biological research problems that can be pursued by employing molecular and cellular approaches, the program provides a variety of options for specialization in particular areas of interest.

REQUIRED COURSES

All students must take the following courses. Precomprehensive students register for 142:280 every semester; postcomprehensive students participate in a journal club of their choice. All students register for 142:290 Seminar in Molecular and Cellular Biology every semester.

156:201 Principles in Molecular and Cell Biology (fall) 4 s.h.
One of these (fall or spring):
142:210 Advanced Prokaryotic Molecular Biology 3 s.h.
142:215 Molecular Biology of Gene Expression 3 s.h.

One of these (fall or spring):
142:220 Mechanisms of Cellular Organization 3 s.h.
142:225 Mechanisms of Cell Growth and Development 3 s.h.

One of these (fall or spring):
Biochemistry/chemistry core (see list below) 3 s.h.
Pharmacology/physiology core (3 s.h. minimum, see list below) 3 s.h.

All of these:
142:280 Topics in Molecular and Cellular Biology (fall and spring) 1 s.h.
142:290 Seminar in Molecular and Cellular Biology 1 s.h.
650:270 Responsible Conduct in Research 1 s.h.

CORE REQUIREMENT
Biochemistry/Chemistry:
004:211 Chemical Catalysis in Biology 3 s.h.
099:241 Biophysical Chemistry I 3 s.h.
099:242 Biophysical Chemistry II 3 s.h.

Pharmacology/Physiology:
071:135 Principles of Pharmacology 3 s.h.
072:153 Graduate Physiology 6 s.h.

In addition, all students are required to complete at least 6 s.h. chosen from the approved elective courses.

After successfully completing the comprehensive examination, usually at the end of the second year of graduate study, students advance to candidacy for the Ph.D. degree. They devote all of their time to completing thesis research and writing their Ph.D. dissertation. Upon successful completion of all requirements, including the dissertation and its oral defense according to the Manual of Rules and Regulations of the Graduate College, students are awarded a Ph.D. in molecular and cellular biology.

Admission

For application materials and information about graduate training in molecular and cellular biology, contact the Molecular and Cellular Biology Program or visit its web site.

Applicants must meet the admission requirements of the Graduate College or the Graduate College section of the Catalog.

Financial Support

Graduate students in the Molecular and Cellular Biology Program receive stipends and tuition support from institutional and extramural sources, including University of Iowa fellowships and graduate research assistantships, and training grants from the National Institutes of Health.

Facilities

Training is conducted primarily in laboratories and teaching facilities of the Carver College of Medicine Departments of Anatomy and Cell Biology, Biochemistry, Dermatology, Internal Medicine, Microbiology, Molecular Physiology and Biophysics, Neurology, Ophthalmology and Visual Sciences, Pathology, Pediatrics, Pharmacology, and Radiation Oncology; the College of Dentistry Department of Orthodontics; and in the College of Liberal Arts and Sciences Departments of Biological Sciences and Chemistry. Faculty laboratories and central research facilities available to students provide access to the most up-to-date research equipment.

Courses

142:210 Advanced Prokaryotic Molecular Biology 3 s.h.
Mechanism and regulation of DNA, RNA, and protein synthesis in bacteria. Prerequisites: 156:201, or 002:128 and 099:130; and consent of instructor. Same as 061:210.

142:215 Molecular Biology of Gene Expression 3 s.h.
Principles and techniques for investigating mechanisms of controlling eukaryotic gene expression; basic genome organization, chromatin structure, transcription, RNA processing, translation; cloning methods, use of electronic sequence databases, footprinting, chromatin immunoprecipitation, in vivo and in vitro transcription assays, DNA microarray analysis, information retrieval. Prerequisite: 156:210.

142:220 Mechanisms of Cellular Organization 3 s.h.
Integration of concepts of cell biology, original research data concerning structure, chemistry, function of cellular organelles and their assembly; emphasis on relation of cellular structure, function from macromolecular to organelle-cellular levels of organization; plasma membrane, endoplasmic reticulum, cytoskeleton, centriole and centrosome; Golgi apparatus, lysosome, mitochondria, nucleus. Prerequisite: 099:130 or equivalent. Same as 060:216, 072:220.

142:225 Mechanisms of Cell Growth and Development 3 s.h.
Molecular mechanisms that control cell proliferation and differentiation, cancerous transformation, and normal embryonic development; current understanding of intracellular signaling processes, cell cycle control, oncogenes and tumor suppressor genes, mechanisms of apoptosis (programmed cell death), and cellular senescence (aging). Prerequisite: 156:201 or consent of instructor. Same as 060:225, 072:225.

The Neuroscience Program provides an interdisciplinary and interdepartmental approach to graduate education and research training in the structure, function, and development of the nervous system and its role in cognition and behavior. Students obtain training at all levels of the nervous system, from cellular/molecular to behavioral/cognitive.

**Graduate Program**

**Doctor of Philosophy**

The Doctor of Philosophy in neuroscience requires a minimum of 72 s.h. of graduate credit. The program’s curriculum is designed around three tracks: molecular/cellular, developmental/systems, and cognitive/behavioral. Following broad-based instruction in a core curriculum, students specialize in one of the tracks.

Within a framework of core, track-specific, and elective courses, each student pursues a program of study individually designed according to his or her undergraduate training and graduate research goals. After enrolling in the Neuroscience Program, entering students consult with the advisory committee regarding their level of preparation for the program’s required courses.

The Student Advisory Committee meets with all first- and second-year graduate students once each semester, helping each student explore his or her research interests and select faculty mentors for the required laboratory rotations. Each student is expected to complete three rotations in faculty laboratories before selecting a thesis advisor. Rotations ordinarily last 12 weeks but may last from 8 to 16 weeks. Under special circumstances, two rotations may be in the same laboratory, an arrangement that permits the student to learn a variety of techniques and approaches before settling down to work on the dissertation project. Students usually choose a dissertation lab at the end of their first year.

**BACKGROUND REQUIREMENTS**

Students are expected to demonstrate competency, through prerequisites or course work, in each of four fields: biochemistry, general physiology, cell biology, and statistics. These requirements ordinarily should be fulfilled by the
end of the first year of graduate study. Waivers of background course requirements may be requested by students who have taken equivalent courses before entering the neuroscience program.

**NEUROSCIENCE CORE**

The following courses form the core of the neuroscience graduate curriculum.

- 132:180 Fundamental Neurobiology 4 s.h.
- 132:181 Neurophysiology 3-4 s.h.
- 132:234 Medical Neuroscience 4 s.h.
- 132:240 Topics in Cognitive Neuroscience (cognitive track) 3 s.h.
- 132:246 Developmental Neurobiology 3 s.h.
- 156:201 Principles in Molecular and Cell Biology (molecular track) 4 s.h.
- 650:270 Responsible Conduct in Research 1 s.h.
- A statistics course 3-4 s.h.

In addition, students register for the following two courses each semester.

- 132:265 Neuroscience Seminar 0-1 s.h.
- 132:305 Neuroscience Research arr.

**ELECTIVES**

Elective requirements may be met with three or more courses from a list of courses offered by the Departments of Anatomy and Cell Biology, Biological Sciences, Molecular Physiology and Biophysics, Pharmacology, Psychology, and other departments as appropriate. Students must take electives in at least two of the program’s three tracks, ensuring that they receive advanced training both in their area of specialization and in related areas of neuroscience. With permission of the Student Advisory Committee, students may satisfy the elective requirement wholly or in part by registration in 132:301 Directed Study in Neuroscience.

**Admission**

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

For information about pre- and postdoctoral training opportunities in neuroscience, contact the Neuroscience Program or visit its web site.

**Financial Support**

Full-time Neuroscience Program students receive stipends and full tuition scholarships through fellowships and research assistantships. Awards are renewed annually, based on continued satisfactory progress and availability of funds. For 2007-08, the standard stipend for graduate students is $23,000.

The Neuroscience Program is committed to supporting its graduate students for their entire training period. Students normally are supported in the first year by the program. After that, support is expected to come from the student’s primary research mentor. Occasionally, advanced students are supported through teaching assistantships. Tuition is paid for all students.

**NIH Training Grant**

The Neuroscience Program is supported by a training grant from the National Institutes of Health. The grant provides stipend and tuition support for a select group of first- and second-year graduate students.

**Facilities**

Training is conducted primarily in the laboratories and teaching facilities of the Carver College of Medicine graduate Departments of Anatomy and Cell Biology, Biochemistry, Molecular Physiology and Biophysics, and Pharmacology; clinical Departments of Internal Medicine, Neurology, and Psychiatry; and the College of Liberal Arts and Sciences graduate Departments of Biological Sciences, Integrative Physiology, Psychology, and Speech Pathology and Audiology. Students use faculty laboratories and central research facilities for ultrastructural analysis; histochemistry and immunocytochemistry; electrophysiology; fluorescence-activated cell sorting; cellular and subcellular biochemistry; cell, tissue, and organ culture; operant and classical conditioning; molecular biology; behavioral genetics; neural substrates of complex behavior; brain-behavior relationships in humans; neuropsychology; and functional neuroimaging (PET, fMRI).

**Courses**

- **132:180 Fundamental Neurobiology** 4 s.h.
  Functioning of nervous systems at molecular and cellular levels; expressions of brain activity such as perception; experimental approaches of varied disciplines, including neurophysiology, molecular neurobiology, neuroanatomy, developmental neurobiology; their contributions to field. Offered fall semesters. Same as 002:180.
- **132:181 Neurophysiology** 3-4 s.h.
  Physiological properties of nerve cells and nervous systems; axonal conduction, synaptic transmission, sensory transduction, integrative processes, higher functions. Offered spring semesters. Prerequisites: 002:180, 22M:025 or equivalent, and 029:012; or consent of instructor. Same as 002:181.
132:209 Receptors and Signal Transduction 3 s.h.
Major receptor families: G-protein coupled receptors, ligand-regulated transmembrane enzymes, ligand-regulated ion channels, the steroid receptor superfamily; emphasis on description, interpretation of specific experiments, experimental strategies that underlie current research. Prerequisites: medical physiology course and consent of instructor. Same as 071:209, 072:209.

132:230 Methods in Neuroscience 2 s.h.

132:234 Medical Neuroscience 4 s.h.
Basic principles of neurophysiology, neuroanatomy; emphasis on human central nervous system; laboratory emphasis on anatomical study of spinal cord, brain. Offered spring semesters. Prerequisite: consent of course director. Same as 060:234.

132:235 Neurobiology of Disease 3 s.h.
Broad, thematic understanding of disease mechanisms in neurobiological disorders.

132:240 Topics in Cognitive Neuroscience 3 s.h.
Key topics in the neural basis of human cognition; research literature. Recommended: graduate courses in basic neuroscience, cognitive psychology. Same as 064:240.

132:241 Fundamentals of Behavioral Neuroscience 3 s.h.
Concepts, methods, and findings in behavioral and cognitive neurosciences; emphasis on principles of neuroscience; sensation, motivation, emotion. Same as 031:241.

132:242 Fundamentals of Learning and Behavior 3 s.h.
Concepts, methods, and findings in behavioral and cognitive neurosciences; emphasis on principles of comparative psychology, motor control, learning. Prerequisite: consent of instructor. Same as 031:242.

132:246 Developmental Neurobiology 3 s.h.
Major developmental systems, their application in neurobiology; neurogenesis, synapse formation, axonal guidance, the cellular/molecular aspects of neural differentiation; literature-based approach. Prerequisite: consent of course director. Same as 002:246, 072:245.

132:250 Functional Magnetic Resonance Imaging 2-3 s.h.
Basic physics principles of functional magnetic resonance imaging and approaches to data acquisition, including BOLD imaging, arterial spin labeling, and magnetic source imaging; data analysis strategies; paradigm design and development. Same as 051:280.

132:265 Neuroscience Seminar 0-1 s.h.
Research presentations. Offered fall and spring semesters. Prerequisite: consent of instructor. Same as 002:265, 031:265, 060:265, 072:265.

132:277 Mechanisms of Pain Transmission 3 s.h.
Same as 071:277, 101:277.

132:301 Directed Study in Neuroscience arr.

132:305 Neuroscience Research arr.
Prerequisites: neuroscience graduate standing and consent of instructor.
The Project on Rhetorics of Inquiry (POROI) is an interdisciplinary program that explores how scholarship and professional discourse are conducted through argument, how paradigms of knowledge are sensitive to social-political contexts, and how the presentation of scholarly and professional findings is an audience-sensitive process.

POROI seeks to improve academic inquiry and scholarly writing in the arts, humanities, sciences, and professions, especially at the intersections between disciplines. It offers classes, seminars, workshops, conferences, and a peer-reviewed online journal, *Poroi: An Interdisciplinary Journal of Rhetorical Analysis and Invention*. Together with the Graduate College, POROI offers the graduate Certificate in Rhetorics of Inquiry.

**Certificate**

Students may pursue the Certificate in Rhetorics of Inquiry in conjunction with a graduate degree in any field. The certificate program gives students the opportunity to enhance their abilities to argue in oral, written, and multimedia forms within their own disciplines, and to enhance their understanding of the similarities and differences among various fields.

The program’s objectives are to:

- help students cultivate habits of interdisciplinary study and research through reading, writing, and conversation;
- encourage students to cross conceptual and institutional boundaries that often appear to separate the arts, humanities, and professions from each other and from the social, natural, and formal sciences;
- improve students’ awareness of the rhetorical dimensions of argumentation and inquiry; and
- certify that students who have completed the program are prepared to do rhetorical and cross-disciplinary work after they graduate.

**Requirements**

In order to earn the Certificate in Rhetorics of Inquiry, students must complete four courses approved by POROI, including 160:200 Introduction to Rhetorics of Inquiry.

**Admission**

Master's and doctoral candidates in good standing are eligible to register for the certificate program. To register, contact the Project on Rhetorics of Inquiry.

**Courses**

POROI courses are open to certificate students and to those not enrolled in the certificate program.

- **160:160 Issues in Rhetoric and Culture** 3 s.h.
  Rhetorical theory and criticism as culturally embedded practices; rhetorical production of selves and social difference; relationships between rhetoric and literature, philosophy, popular texts. Same as 008:181, 010:160, 036:146, 048:160.

- **160:162 African American Literary/Rhetorical Criticism II** 3 s.h.
  Same as 008:166, 010:133, 129:131.

- **160:165 Feminism and Philosophy** 3 s.h.
  Same as 131:155.

- **160:170 Philosophy of the Body** 3 s.h.
  Same as 131:170.

- **160:176 Modes of Translation Studies** 3 s.h.
  Same as 048:176.

- **160:180 Literature and Translation** 3 s.h.
  Same as 041:180, 048:180.

- **160:182 Honors Seminar on Political Theory** 3 s.h.

- **160:183 Invention** 3 s.h.
  Invention techniques and strategies of published writers; practice of these techniques and strategies in writing exercises; imitation of forms, voices, points of view; unconventional juxtapositions of form and content; parody; forms of “free writing.” Same as 08N:183.

- **160:200 Introduction to Rhetorics of Inquiry** 2-4 s.h.
  How discussions in academic and professional disciplines are conducted through the art of argumentation, including its ethical, logical, and emotional aspects; rhetorical ways in which the boundaries between disciplines are constructed and maintained. Same as 036:210.

- **160:210 Independent Study Rhetorics of Inquiry** arr.
  Repeatable.

- **160:216 Conflict, Negotiation, and Planning** 3 s.h.
  Conflict as a fundamental part of planning practice; how planners work through conflicts and transform them into productive and often innovative forms of thought and action. Same as 102:216.

</table>
Second language acquisition (SLA) is a multidisciplinary field whose goal is to understand the processes that underlie non-native language learning. The Second Language Acquisition Program draws from varied academic disciplines, among them linguistics, psychology, psycholinguistics, sociology, sociolinguistics, discourse analysis, conversation analysis, and education.

**Graduate Program**

**Doctor of Philosophy**

The Doctor of Philosophy in second language acquisition is interdisciplinary. Students interested in pursuing the Ph.D. must hold an M.A. in an appropriate field (e.g., linguistics, foreign language education, English as a second language), or they must have equivalent academic experience.

Doctoral students may specialize in one of three areas: linguistics, language program direction, or technology. Students may pursue their interdisciplinary interests in courses offered by the College of Liberal Arts and Sciences Departments of Asian and Slavic Languages and Literatures, French and Italian, German, Linguistics, Rhetoric, Spanish and Portuguese, and Speech Pathology and Audiology, and the College of Education Departments of Psychological and Quantitative Foundations, and Teaching and Learning.

The Ph.D. in second language acquisition requires 72 s.h., including a maximum of 33 s.h. earned in work toward the master's degree. The program is divided into foundation courses (13 courses, or 39 s.h.); specialization courses (5 courses, or 15 s.h.), and dissertation work (18 s.h.). A course may be used to fulfill only one requirement course.

**FOUNDATION COURSES**

All of these:

- 164:201 Second Language Acquisition Research and Theory I 3 s.h.
- 164:202 Second Language Acquisition Research and Theory II 3 s.h.
- 164:211 Multimedia and Second Language Acquisition 3 s.h.
- 07S:184 Reading in a Second Language (or 164:226, but not both) 3 s.h.
- 164:221 Topics in Second Language Acquisition: Speaking 3 s.h.
- 164:223 Topics in Second Language Acquisition: Listening 3 s.h.
- 164:225 Grammar in Second Language Teaching and Learning 3 s.h.
- 164:226 Reading in the Non-Roman Scripts (or 07S:184, but not both) 3 s.h.
- 164:227 Topics in Second Language Acquisition: Writing 3 s.h.
- 164:229 Cultural Curriculum 3 s.h.

Two of these:

- 07S:184 Reading in a Second Language (or 164:226, but not both) 3 s.h.
- 164:221 Topics in Second Language Acquisition: Speaking 3 s.h.
- 164:223 Topics in Second Language Acquisition: Listening 3 s.h.
- 164:225 Grammar in Second Language Teaching and Learning 3 s.h.
- 164:226 Reading in the Non-Roman Scripts (or 07S:184, but not both) 3 s.h.
- 164:227 Topics in Second Language Acquisition: Writing 3 s.h.
- 164:229 Cultural Curriculum 3 s.h.

To complete the foundation requirement, students select one course from each of the following eight areas, in consultation with their advisor. With the advisor’s approval, students may use courses not listed here to fulfill the requirement.

**Curriculum**

- 07E:300 Design and Organization of Curriculum 3 s.h.
- 07S:186 Curriculum Foundations 2-3 s.h.
- 07S:197 Principles of Course Design for Second Language Instruction 3 s.h.

One of these:
103:211 Generative Second Language Acquisition 3 s.h.
An alternate course on linguistic theory and second language acquisition
One of these:
031:122 Language Development 3 s.h.
031:218 Cognitive Development 3 s.h.
An alternate course on parsing/psycholinguistic mechanisms

Language Program Direction Specialization

Students who choose the language program direction specialization take five of the following courses (chosen from those not taken to satisfy the foundation requirements).

075:180 Issues in Foreign Language Education 3 s.h.
075:183 Second Language Classroom Learning 3 s.h.
075:184 Reading in a Second Language 3 s.h.
075:197 Principles of Course Design for Second Language Instruction 3 s.h.
075:202 Second Language Program Management 3 s.h.
075:208 Designing Materials for Second Language Instruction 3 s.h.
39J:258 Second Language Acquisition of Japanese 3 s.h.
164:205 Analysis of L1 and L2 Data 3 s.h.
164:221 Topics in Second Language Acquisition: Speaking 3 s.h.
164:222 Advanced Japanese Pedagogy 3 s.h.
164:223 Topics in Second Language Acquisition: Listening 3 s.h.
164:224 Second Language Acquisition of Japanese 3 s.h.
164:225 Grammar in Second Language Teaching and Learning 3 s.h.
164:226 Reading in the Non-Roman Scripts 3 s.h.
164:227 Topics in Second Language Acquisition: Writing 3 s.h.
164:228 Special Topics in Japanese Linguistics 3 s.h.
164:229 Cultural Curriculum 3 s.h.
Some students may include an internship experience as part of the specialization.
164:230 Internship arr.

Technology Specialization

Requirements for the technology specialization are as follows.

A three-course sequence in psychological and quantitative foundations:

One of these:
07P:205 Design of Instruction 3 s.h.
07P:275 Constructivism and Design of Instruction 3 s.h.
Both of these:
07P:208 Designing Educational Multimedia 3 s.h.
07P:215 Web-Based Learning 3 s.h.

Students choose their remaining specialization course work from the following (others may be approved by the student’s advisor).

07P:203 Learning, Technology, and Effective Teaching 3 s.h.
021:120 Computing Foundations 3 s.h.
021:220 Programming for Text Manipulation 3 s.h.
22C:104 Introduction to Informatics 3 s.h.
103:157 Electronic Corpora and Linguistic Analysis 3 s.h.
164:212 Practicum in CALL Software Development 1-4 s.h.
164:214 Advanced CALL Curriculum Development 3 s.h.
A practicum course 3 s.h.

Either of these (if not taken for the three-course sequence in psychological and quantitative foundations, above):

07P:205 Design of Instruction 3 s.h.
07P:275 Constructivism and Design of Instruction 3 s.h.

*Either of these:
07P:293 Independent Instruction in Psychological and Quantitative Foundations 3 s.h.
164:302 Special Projects in Language Acquisition 3 s.h.

*May be taken after students have completed the core design and technology courses (07P:205 or 07P:275, 07P:208, 07P:215).

Thesis

All candidates must complete a thesis (164:303 Ph.D. Thesis), for which they may earn up to 18 s.h.
OPTIONAL COURSE WORK

Students may include the following optional course work in their degree programs.

164:300 Special Topics in Second Language Acquisition arr.

Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog. Strong applicants hold a master's degree in a related area, have a cumulative g.p.a. of at least 3.50 in master's degree work, and speak and write English and another language at a professional level. Applicants must submit a writing sample that demonstrates their ability to synthesize and analyze information using standard academic English.

Financial Support

Teaching assistantships are available through the Foreign Language Acquisition Research and Education Program (FLARE). Assistantships usually involve teaching elementary or intermediate language courses. FLARE also offers a limited number of research assistantships. Contact the Second Language Acquisition Program for details.

Courses

164:081 Autonomous Language Learning 1-3 s.h.
The art and science of self-directed language study in conjunction with work on a less-commonly-taught language; independent study; for experienced language learners. Prerequisite: consent of instructor. Same as 187:081.

164:101 Intensive Less-Commonly-Taught Languages 4-6 s.h.
Intensive study in varied less-commonly-taught languages; emphasis on speaking, listening, and reading in preparation for academic study or research abroad. Prerequisite: completion of GE foreign language component. Same as 187:101.

164:201 Second Language Acquisition Research and Theory I 3 s.h.
Theories regarding success and failure in acquisition of second or subsequent languages; research, issues. Same as 009:237, 035:201, 039:200, 39J:201.

164:202 Second Language Acquisition Research and Theory II 3 s.h.
Continuation of 164:201. Prerequisite: 164:201 or consent of instructor. Same as 035:202, 039:201.

164:205 Analysis of L1 and L2 Data 3 s.h.
Issues in qualitative and quantitative analysis of first- and second-language data; data collection, analytical frameworks and approaches. Prerequisite: 164:201 or consent of instructor. Same as 039:205.

164:207 Sociolinguistics 3 s.h.
Topics such as discourse and conversation analyses, linguistic pragmatics, linguistic variations, issues of language and gender. Prerequisite: 103:100 or equivalent. Same as 039:207.

164:211 Multimedia and Second Language Acquisition 3 s.h.
Foreign language multimedia in the context of current second language acquisition theories and research; readings on interactivity, interface design, feedback, learner control, and acquisition of vocabulary, grammar, and culture; multimedia development project. Prerequisite: foreign language teaching methodology course or consent of instructor. Same as 009:238, 013:253, 035:212.

164:212 Practicum in CALL Software Development 1-4 s.h.
Supervised experience in an applied setting involving development of computer-assisted language learning (CALL) software. Repeatable. Prerequisites: 164:211, faculty sponsor, and consent of instructor.

164:214 Advanced CALL Curriculum Development 3 s.h.
Advanced instruction in a variety of software and hardware tools for development of multimedia computer-assisted language learning (CALL) courseware; students develop software for a General Education Program or third-year language course in collaboration with course supervisor. Prerequisite: 164:212. Same as 009:239, 013:254, 035:214.

164:221 Topics in Second Language Acquisition: Speaking 3 s.h.
Theory, pedagogy, research, and assessment in second language speaking. Same as 009:236, 035:228.

164:2222 Advanced Japanese Pedagogy 3 s.h.
Same as 39J:203.

164:223 Topics in Second Language Acquisition: Listening 3 s.h.
Theory, pedagogy, research, and assessment in second language listening. Same as 039:223.

164:224 Second Language Acquisition of Japanese 3 s.h.
Same as 39J:258.

164:225 Grammar in Second Language Teaching and Learning 3 s.h.
Same as 009:209.

164:226 Reading in the Non-Roman Scripts 3 s.h.
Theory and practice of reading in languages that use non-Roman alphabets, syllabary, logographic systems; reading in first- and second-language contexts; instructional and literacy development issues. Prerequisite: 07E:171 or 07P:270 or 07S:184 or equivalent. Same as 075:207.

164:227 Topics in Second Language Acquisition: Writing 3 s.h.
Theory, pedagogy, research, and assessment in second language writing. Same as 010:275, 035:227.

164:228 Special Topics in Japanese Linguistics 3 s.h.
Same as 39J:239.

164:229 Cultural Curriculum 3 s.h.
Same as 07S:209.

164:230 Internship arr.
Prerequisite: consent of instructor.

Translational Biomedicine

Chair: Gary W. Hunnninghake (Internal Medicine)
Executive committee: John Engelhardt (Anatomy and Cell Biology/Internal Medicine), William Haynes (Internal Medicine), Val Sheffield (Pediatrics), James Torner (Epidemiology)

Affiliated faculty: Francois M. Abboud (Internal Medicine/Molecular Physiology and Biophysics), Nancy C. Andreasen (Psychiatry), Michael A. Apicella (Microbiology), Gale A. Bishop (Microbiology/Internal Medicine), Joseph A. Buckwalter (Orthopaedics and Rehabilitation), Garry R. Buettner (Free Radical and Radiation Biology), Trudy L. Burns (Biostatistics), Kevin P. Campbell (Molecular Physiology and Biophysics), Francois-M. C. Cohen (Pathology), Beverley L. Davidson (Internal Medicine), Gerald F. Gebhart (Pharmacology), E. Peter Greenberg (Microbiology), Gregory S. Hageman (Ophthalmology and Visual Sciences), Donald H. Heistad (Internal Medicine/Pharmacology), Eric A. Hoffman (Radiology/Biomedical Engineering), Matthew A. Howard III (Neurosurgery), Ronald M. Lauer (Pediatrics), Steven R. Lentz (Internal Medicine), Andrew J. Lotery (Ophthalmology and Visual Sciences), Charles F. Lynch (Epidemiology), Alyn L. Mark (Internal Medicine), Paul B. McCray (Pediatrics), Geoffrey McLennan (Internal Medicine), Larry W. Oberley (Free Radical and Radiation Biology), M. Sue O’Dorisio (Pediatrics), Henry L. Paulson (Neurology), Stanley Perlman (Pediatrics/Microbiology), Timothy L. Ratliff (Urology), Andrew F. Russo (Molecular Physiology and Biophysics), D. Michael Shasby (Internal Medicine), Curt D. Sigmund (Internal Medicine/Molecular Physiology and Biophysics), Richard J.H. Smith (Otolaryngology), M. Bento Soares (Pediatrics/Biochemistry), Richard D. Sontheimer (Internal Medicine), Arthur A. Spector (Biochemistry/Internal Medicine), Jack T. Stapleton (Internal Medicine), John B. Stokes, III (Internal Medicine), Edwin M. Stone (Ophthalmology and Visual Sciences), William T. Talman (Neurology), James C. Torner (Epidemiology), Veronica Vieland (Biostatistics/Psychiatry), Robert B. Wallace (Epidemiology/Internal Medicine), George J. Weiner (Internal Medicine), Joel V. Weinstock (Internal Medicine), Jerrold P. Weiss (Internal Medicine), Michael J. Welsh (Internal Medicine/Molecular Physiology and Biophysics), Mary E. Wilson (Internal Medicine/Microbiology), Joseph Zabner (Internal Medicine)

Graduate degrees: M.S., Ph.D. in Translational Biomedicine

Web site: http://www.medicine.uiowa.edu/gptbr/

Students in the program are trained to conduct rigorous, original clinical investigations using basic biological and physiological principles. They receive didactic training and engage in substantial mentored research opportunities in the areas of disease mechanisms, or etiology; new clinical insights into diagnosis or natural history of disease; objective assessment and outcome of therapeutic intervention; medical informatics; and development of new approaches to therapeutics.

Graduate Programs

The program offers a Master of Science and a Doctor of Philosophy in translational biomedicine.

Master of Science

The Graduate College requires a minimum of 30 s.h. of graduate credit for a Master of Science. However, Translational Biomedicine Program course work and research requirements over a three-year span are equivalent to 60 s.h. Each student’s plan of study is based on his or her chosen discipline. All students take background courses in epidemiology, study design, and statistics as well as advanced courses in basic sciences relevant to their individual research areas.

Students also must write a proposal for a K23 Mentored Patient-Oriented Research Career Development Award from the National Institutes of Health. For M.S. students, the K23 proposal replaces the thesis. A draft of the K23 proposal must pass an internal review by the end of the student’s second year.

Students may choose to pursue research areas in any of the health sciences disciplines, and they enjoy considerable flexibility in scheduling course work and beginning research.

The following courses are required. All students must register for 050:224 and 050:225 each semester in the program.

050:224 Seminar in Translational Biomedicine 1 s.h.
050:225 Translational Biomedical Research arr.

The Translational Biomedicine Program prepares skilled clinicians to pursue new knowledge about health and disease through patient-based research. The program’s goal is to support the medical research enterprise in its efforts to advance the prevention, treatment, and cure of disease.
050:270 Responsible Conduct in Research 0 s.h.
060:204 Survival Skills for a Research Career 1 s.h.
171:161 Introduction to Biostatistics 3 s.h.
171:162 Design and Analysis of Biomedical Studies 3 s.h.
171:241 Applied Categorical Data Analysis 3 s.h.
173:140 Epidemiology I: Principles 3 s.h.
173:160 Introduction to Epidemiology Data Analysis with Computers 2 s.h.
173:240 Epidemiology II: Advanced Methods 4 s.h.

SAMPLE SCHEDULE

First Semester
050:224 Seminar in Translational Biomedicine 1 s.h.
060:204 Survival Skills for a Research Career 1 s.h.
171:161 Introduction to Biostatistics 3 s.h.
173:140 Epidemiology I: Principles 3 s.h.
173:160 Introduction to Epidemiology Data Analysis with Computers 2 s.h.

Second Semester
050:224 Seminar in Translational Biomedicine 1 s.h.
050:225 Translational Biomedical Research arr.
050:270 Responsible Conduct in Research 0 s.h.
171:162 Design and Analysis of Biomedical Studies 3 s.h.
171:241 Applied Categorical Data Analysis 3 s.h.
173:240 Epidemiology II: Advanced Methods 4 s.h.

Third and Following Semesters
050:224 Seminar in Translational Biomedicine 1 s.h.
050:225 Translational Biomedical Research arr.

Doctor of Philosophy
The Graduate College requires a minimum of 72 s.h. of graduate credit for a Doctor of Philosophy. For information about the Ph.D., contact the Translational Biomedicine Program.

Admission
The Translational Biomedicine Program welcomes students with diverse educational and scientific backgrounds and varied research interests. Applicants to the program should have strong interest and background in a health science profession and knowledge of basic sciences and medicine. They should hold an advanced degree in one of the health sciences (e.g., M.D., D.O., D.D.S., D.V.M., M.S.N., Pharm.D., Ph.D.).

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

Admission is based on applicants' undergraduate and graduate academic achievement, performance on the Graduate Record Examination (GRE) General Test, and letters of recommendation. Applicants whose first language is not English must take the Test of English as a Foreign Language (TOEFL).

The program helps applicants find suitable mentors. All prospective students, and their mentors, must guarantee that once accepted to the program, applicants will be able to devote essentially all of their time over a three-year period to training. For instance, a fellow in the Carver College of Medicine could spend no more than two months each year working on clinical assignments (e.g., two months of inpatient assignments or one month of inpatient assignments and one-half day per week in a clinic).

Financial Support
Funding of tuition and salaries or stipends is available from a number of sources. Contact the Translational Biomedicine Program for information.

Facilities
Training is conducted mainly in the laboratories and teaching facilities of the Carver College of Medicine and the College of Public Health. The University of Iowa Clinical Research Center is available for research training. The program also is linked with the Carver College of Medicine's graduate training program in clinical research.

Associated Courses
050:224 Seminar in Translational Biomedicine 1 s.h.
050:225 Translational Biomedical Research arr.
Transportation Studies

Director: Paul F. Hanley
Affiliated faculty: Marc P. Armstrong (Geography), M. Asghar Bhatti (Civil and Environmental Engineering), Linda N. Boyle (Mechanical and Industrial Engineering), Robert Ettema (Civil and Environmental Engineering), David J. Forkenbrock (Civil and Environmental Engineering), John W. Fuller (Urban and Regional Planning/Economics), Paul F. Hanley (Urban and Regional Planning), Jon G. Kuhl (Electrical and Computer Engineering), Hosin David Lee (Civil and Environmental Engineering), John D. Lee (Mechanical and Industrial Engineering), Wilfrid A. Nixon (Civil and Environmental Engineering), Gerard Rushton (Geography/Health Management and Policy), Thomas Schnell (Mechanical and Industrial Engineering), James W. Stoner (Civil and Environmental Engineering/Urban and Regional Planning)
Graduate nondegree program: Certificate in Transportation Studies
Web site: http://ppc.uiowa.edu

Transportation is vital to modern society. The United States, like other nations, faces many critical transportation problems and issues. The highway system is reaching an advanced stage of its life cycle, public transit operating deficits are growing, the quality of transportation available to many citizens is unacceptably low, serious inequities exist between transportation modes, and extensive changes are called for in traditional transportation institutions. New approaches to financing the nation's road system are badly needed.

Transportation engineers and planners draw on a number of skills to respond to the challenges they face. They must analyze and forecast the movement of people and goods within and between cities; identify effective and efficient means for providing desired transportation services; price these services properly; and evaluate the impact that transportation changes have on land use, environmental quality, the local or regional economy, and various subgroups within society.

Certificate

No single academic discipline can supply all of the theories, principles, or methods needed to address the varied and complex problems in transportation. Recognizing this, the Department of Civil and Environmental Engineering and the Urban and Regional Planning Program participate in the interdisciplinary Transportation Studies Program, through which students in the participating units can earn the Certificate in Transportation along with their graduate degrees.

The Department of Mechanical and Industrial Engineering also participates in the transportation certificate program, offering courses in human factors and safety issues in transportation, and the Department of Geography offers courses in geographic information systems (GIS), location theory, and other related areas.

The Certificate in Transportation is coordinated by the Public Policy Center in conjunction with the Graduate College. Completion of the certificate requirements is noted on the student's transcript. The certificate is awarded in conjunction with the established degree requirements of the individual academic units.

Students who enroll in a course of study leading to the certificate also may wish to participate in faculty-led transportation research, which may explore topics such as system planning, traffic operations and engineering, spatial data systems and analysis, simulation applications, and policy issues.

Certificate with M.S. or Ph.D. in Civil and Environmental Engineering

The Department of Civil and Environmental Engineering offers transportation degrees at both the Master of Science and Doctor of Philosophy levels. The M.S. requires a minimum of 30 s.h. of graduate credit and may be earned either with or without thesis. Thesis students may count up to 6 s.h. of credit for thesis research toward the 30 s.h. required for the degree. Nonthesis students usually are required to complete a research paper based on independent study and to defend the paper in an oral examination.

Students who wish to complete the M.S. in a single academic year must complete 15 s.h. during both the fall and spring semesters.

The Ph.D. degree requires a minimum of 72 s.h. of graduate credit; up to 18 s.h. may be earned for dissertation research. A minimum of one year of campus residency is required. For detailed information on the residency requirement, see section XII.C of the Manual of Rules and Regulations of the Graduate College.
Individuals with degrees in other transportation-related disciplines are encouraged to apply to the Transportation Studies Program. Depending on a student’s background, additional course work in statistics, computer programming, simulation, mathematics, and operations research may be required for the certificate. Credit earned in these courses may not be applicable to the student’s degree program.

The following courses are required.

Six courses in transportation:
053:162 Design of Transportation Systems 3 s.h.
053:163 Traffic Engineering 3 s.h.
053:165 Pavement Analysis and Design System 3 s.h.
053:166 Infrastructure Management System 3 s.h.
053:262 Transportation Demand Analysis 3 s.h.
102:267 Transportation Policy Analysis 3 s.h.

One general core course:
053:115 Computer-Aided Engineering 3 s.h.

A typical master’s certificate program in civil and environmental engineering includes the following courses.

**First Semester**

053:115 Computer-Aided Engineering 3 s.h.
053:162 Design of Transportation Systems 3 s.h.
053:166 Infrastructure Management System 3 s.h.
102:269 Transportation Program Seminar 1 s.h.

**Second Semester**

053:163 Traffic Engineering 3 s.h.
053:165 Pavement Analysis and Design 3 s.h.
053:262 Transportation Demand Analysis 3 s.h.
Technical elective 3 s.h.

**Third Semester**

102:267 Transportation Policy Analysis 3 s.h.
Technical electives 6 s.h.

Technical electives are advanced courses in engineering operations research, information technology computer-aided design, urban and regional planning, business, or economics. Specific course requirements are sufficiently flexible to conform to a student’s graduation schedule and area of specialization.

Technical electives include the following.

053:133 Finite Element I 3 s.h.
053:164 Winter Highway Maintenance 3 s.h.

Applications should be made through the Graduate College and the Department of Civil and Environmental Engineering.

**Certificate with M.A. or M.S. in Urban and Regional Planning**

The graduate Urban and Regional Planning Program offers Master of Arts and Master of Science degrees with a transportation concentration. Both degrees require 50 s.h. of graduate credit. During the first year, students complete an integrated core curriculum (20 s.h.) consisting of courses in planning economics and public finance, analytic methods, planning theory, and law. Beginning in the second semester, students take courses in an area of concentration (minimum of 9 s.h.), such as transportation, where core concepts are applied to a selected specialization. The planning curriculum is intended to provide students with the capability to examine policy in transportation, devise workable options, evaluate these optional courses of action, and work toward the implementation of policy solutions.

Electives complete the remaining credit. Students who select the thesis option may register for up to 6 s.h. of thesis credit and 8 s.h. of readings. Students may apply 3 s.h. of readings to the area of concentration requirement and substitute the thesis for the portfolio.

The transportation major in urban and regional planning typically includes the following courses.

**First Semester**

102:200 Analytic Methods in Planning I 3 s.h.
102:202 Land Use Planning: Law and Practice 4 s.h.
102:203 History and Theories of Planning 3 s.h.
102:205 Economics for Policy Analysis 3 s.h.
102:208 Program Seminar in Planning Practice 1 s.h.

**Second Semester**

102:201 Analytic Methods in Planning II 3 s.h.
102:260 Transportation Policy and Planning 2 s.h.
Planning elective 4-5 s.h.

**Third Semester**

102:209 Field Problems in Planning I 1 s.h.
102:265 Transportation Regulation and Finance 3 s.h.
102:267 Transportation Policy Analysis 3 s.h.
102:269 Transportation Program Seminar 1 s.h.

Fourth Semester

102:210 Field Problems in Planning II 3 s.h.
102:262 Transportation Demand Analysis 3 s.h.

Two of these:
102:263 Applied Simulation to Transportation 3 s.h.
102:264 Transportation Planning Process 3 s.h.
Planning elective 3 s.h.

Students select optional transportation courses according to their individual interests. Electives typically include 102:295 Economic Development Policy (3 s.h.).

Applications should be made through the Graduate College and the Urban and Regional Planning Program.
Urban and Regional Planning

Chair: Alan H. Peters
Professors: Peter S. Fisher, John W. Fuller, Alan H. Peters, James A. Throgmorton
Associate professors: Jerry A. Anthony, Paul F. Hanley, Heather I. MacDonald, James W. Stoner
Assistant professors: Richard Funderburg, Lucie Laurian
Adjunct lecturers: Douglas Boothroy, Garth Frable, Rick Havel, Teresa McMahon, Dan Swartzendruber, David Swenson, John Yapp
Graduate degrees: M.A., M.S. in Urban and Regional Planning
Web site: http://www.urban.uiowa.edu

Urban and regional planning encompasses the development and implementation of public policies that improve the quality of life in cities and regions. Today’s planners find themselves in demand for such diverse jobs as transport planner, zoning administrator, environmental analyst with a natural resources agency, economic development planner, regional solid waste management coordinator, state public health planner, neighborhood planner, state legislative analyst, and transportation consultant.

Graduate Programs

The Urban and Regional Planning Program offers a Master of Arts and a Master of Science in urban and regional planning. It also offers several joint degree programs with other academic units: B.S.E./M.A. or M.S. with the College of Engineering; J.D./M.A. with the College of Law; M.H.A./M.A. and M.S./M.A. with the College of Public Health; and M.S.W./M.A. with the School of Social Work. Students also may pursue the Certificate in Transportation Studies in conjunction with an M.A. or M.S. in planning. Joint programs and the certificate are described later in this section.

The Master of Arts and Master of Science are two-year degree programs fully accredited by the Planning Accreditation Board. Each is built on the premise that planners must be educated in methods of policy analysis and that there is a common body of knowledge, represented in the core curriculum, that provides a solid foundation for all specializations in the field.

A wide range of educational backgrounds provide good preparation for graduate study in urban and regional planning. Students with undergraduate majors such as geography, economics, English, political science, engineering, architecture, sociology, urban studies, and history currently study in the program. Usually up to 50 full-time and a few part-time students are enrolled. About half of them are women, and about 10 percent are international students.

The common core of courses and the design of the facilities allow students to get to know each other quickly. Students interact closely with faculty members in the classroom, in informal conversation, and while working on research projects.

Recent graduates of the program have taken positions with city, metropolitan, and regional planning agencies, state and federal government, nonprofit organizations, and private consulting firms. They work in all geographic regions of the United States and in several countries around the world.

Master of Arts,
Master of Science

The Master of Arts and Master of Science require 50 s.h. of graduate credit, including 21 s.h. of core courses, 9 s.h. of courses in an area of concentration, and 20 s.h. of electives. Students may earn 2 s.h. for completion of an approved internship with a planning agency during summer or the academic year.

All students, including those in joint degree programs, must complete a minimum of 35 s.h. of planning courses (prefix 102). Up to 15 s.h. of course work from other departments can be counted toward the planning degree. Students must earn a grade of B- or higher in all core and concentration area courses and must maintain an overall graduate g.p.a. of at least 3.00.

The curriculum is based on the philosophy that planners must develop the theoretical and analytic skills that will permit them to analyze social problems and evaluate public policies. Planners also must cultivate professional skills such as report writing, oral presentation, computer use, and team management in order to work effectively in various organizational and political environments.
CORE CURRICULUM

The core curriculum helps students develop an understanding of the institutions—social, economic, political, administrative, and legal systems—that provide the context for policy analysis and constrain public choices. It also promotes development of the ability to identify social goals and normative criteria for evaluating public policies, as well as the analytic skills to perform such investigations. In total, the core accounts for 21 s.h. (14 s.h. in the first fall semester, 3 s.h. in the spring semester, and 4 s.h. in the second year).

Courses in the first semester are drawn primarily from traditional disciplines, particularly economics and statistics, together with an introduction to theories and practice of planning and to land use planning. As students proceed through the curriculum, increasing emphasis is placed on the development of critical judgment and insight, achieved through the application of theory and methods to realistic planning problems and case studies.

Core curriculum courses and required semester hours are noted in the following typical class schedule.

Students may request a waiver of selected core courses on the basis of previous course work.

First Semester

102:200 Analytic Methods in Planning I 3 s.h.
102:202 Land Use Planning: Law and Practice 4 s.h.
102:203 History and Theories of Planning 3 s.h.
102:205 Economics for Policy Analysis 3 s.h.
102:208 Program Seminar in Planning Practice 1 s.h.

Second Semester

102:201 Analytic Methods in Planning II 3 s.h.
Electives and area of concentration courses 9 s.h.

Third Semester

102:209 Field Problems in Planning I 1 s.h.
Electives and area of concentration courses 9 s.h.
Internship 2 s.h.

Fourth Semester

102:210 Field Problems in Planning II 3 s.h.
Electives and area of concentration courses 9 s.h.

CONCENTRATION AREA

Beginning in the second semester of the program, students develop an area of concentration by applying the concepts and skills developed in the core to a specific field of planning. Currently, there are four areas of concentration supported by faculty and course offerings in the planning program: transportation planning, housing and community development, economic development, and land use and environmental planning.

Students complete at least 9 s.h. of courses in their area of concentration. Courses offered by other University departments may supplement those offered by the planning program.

Students may combine two areas of concentration. Examples of combined areas are environmental and economic development planning, and transportation and community development planning. Students also may design other areas of concentration, subject to faculty approval. For example, students can specialize in health services planning with appropriate course work in the Department of Health Management and Policy or Occupational and Environmental Health, or in human services planning with courses in the School of Social Work.

PORTFOLIO

Students must complete a portfolio of papers that are approved by the final exam committee.

Options

THESIS

A thesis is not required, although students may petition to write one. Students may register for up to 6 s.h. of thesis credit. In addition, they may take up to 8 s.h. of readings to develop a thesis topic and prepare a literature review. Students may apply 3 s.h. of readings to the area of concentration requirement and substitute the thesis for the portfolio.

INTERNSHIP

Students are encouraged to complete an internship in a planning agency or related organization. To earn 2 s.h. of credit for the internship, students must submit a brief paper summarizing and evaluating their experience. Internships usually are paid staff positions and are completed during the summer between the first and second years or during the academic year.
PRACTICUM

An extended internship, consisting of at least five months of full-time employment in a planning-related organization, may qualify as a practicum. A practicum generally takes place during the summer and into the fall semester of the second year. It carries 5 s.h. of credit and substitutes for the required field problems courses, 102:209 Field Problems in Planning I and 102:210 Field Problems in Planning II, and the internship.

INTERNATIONAL THEME

Many of the program’s elective courses have an international component. Moreover, each year the program offers a seminar covering international planning issues and a course in comparative aspects of planning. It is possible to register for summer courses through Iowa State University’s College of Design in Rome, Italy.

Joint B.S.E./M.A. in Planning

Students pursuing a B.S.E. in civil and environmental engineering may apply for admission to the joint program with urban and regional planning, beginning in their junior year. Graduates of the joint program with engineering have technical skills and an understanding of policy development and implementation, a combination of skills that prepares them for employment as public works directors, city engineers, transportation engineers, or in public utilities.

The B.S.E. requires 128 s.h. The joint program reduces the total semester hours required for both degrees from 178 to 152. Students earn 117 s.h. in engineering courses and 35 s.h. in graduate planning courses. In their junior year they begin taking required and elective planning courses that count toward the secondary area of focus requirement for the B.S.E.

Separate admission to each degree program is required. See Civil and Environmental Engineering (College of Engineering) in the Catalog.

Joint J.D./M.A. in Planning

The joint J.D./M.A. requires a minimum of 113 s.h. of graduate credit, including 78 s.h. for the J.D. and 35 s.h. for the M.A. It normally is completed in four years, but students who enter the accelerated law program may earn both degrees in three years, including two summers. Completion of both programs separately requires a total of 140 s.h. and five years.

Separate admission to each degree program is required. See College of Law in the Catalog.

Joint M.H.A./M.A. in Planning

Students interested in community and health planning may pursue a joint master’s degree offered by the Urban and Regional Planning Program and the Department of Health Management and Policy in the College of Public Health. This three-year program requires 76 s.h. of graduate credit and leads to an M.A. in planning and an M.H.A. (Master of Health Administration). Completing the joint program takes one year less than completion of the two programs separately. Separate admission to each degree program is required.

The health management and policy degree enables students to strengthen their credentials as health planners or expand their job options to include administrative positions in the health field as well as health planning jobs. Graduates of the joint program typically find employment in hospitals, state departments of health, and other private, nonprofit, or public health agencies. See Health Management and Policy (College of Public Health) in the Catalog.

Joint M.S. in Occupational and Environmental Health/M.A. in Planning

Students interested in environmental health may elect to pursue a joint master’s degree offered by the Urban and Regional Planning Program and the College of Public Health. This option results in an M.A. in planning and an M.S. in occupational and environmental health. The joint program requires 65 s.h. of credit, including 35 s.h. earned in urban and regional planning and 30 s.h. earned in occupational and environmental health. The program can be completed in five semesters. Separate admission to each degree program is required.

Graduates of the program typically find employment in the public health field, with state
Joint M.S.W./M.A. in Planning

For those interested in a career in social service delivery or human services planning, a joint program is offered by urban and regional planning and the School of Social Work, leading to an M.A. in planning and an M.S.W. in social work. Up to 12 s.h. earned in one discipline can be applied to the other. It is possible to complete the program in three years, although some students may require an additional semester. Separate admission to each degree program is required.

Graduates of this joint program find careers as human services planners for local planning agencies, nonprofit social service agencies, and state governments. See Social Work (College of Liberal Arts and Sciences) in the Catalog.

M.A. or M.S. in Planning/Certificate in Transportation

Urban and regional planning students who satisfactorily complete a prescribed set of transportation courses can earn the Certificate in Transportation Studies. The certificate program includes courses in urban and regional planning, engineering, and economics. Completion of the certificate is noted on the student’s transcript.

The Transportation Studies Program is administered through the University’s Public Policy Center. See Transportation Studies (Graduate College) in the Catalog.

Admission

Admission to the Urban and Regional Planning Program is open to students from any undergraduate major or area of concentration.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

Admission is based on Graduate Record Examination (GRE) General Test scores (verbal, quantitative, and analytical writing), letters of recommendation, previous academic performance, and a written statement of purpose. International applicants whose first language is not English are required to submit official TOEFL scores.

Applicants should submit the application form, GRE General Test scores, TOEFL score (for international students), recommendation letters, statement of purpose, and transcripts. For fall admission, applications should be submitted to arrive early in the year (preferably by January 15), although applications are accepted until July 15 (April 15 for international students). Applications for spring admission should be received by October 1 and no later than December 1. Fall admission is strongly preferred. Students applying for financial aid should submit their materials by January 15.

Financial Support

Students in the Urban and Regional Planning Program receive financial support from the program primarily in the form of teaching or research assistantships and contract or grant-funded assistantships. Assistantships typically require 10 hours of work per week under the direction of a faculty member. A few full or partial tuition scholarships also are available.

Students initiate applications for financial support, and awards are made on the basis of merit, experience, and interests. Assistantships may be renewed for a total of up to four semesters. The planning program has been successful in providing support to the majority of its students.

Students applying for financial support are encouraged to submit application materials and requests for support by January 15. Students who apply after that date are considered only as remaining funds permit. Financial support usually is not available for students beginning the program in the spring semester.

Courses

102:055 The Splendor of Cities 3 s.h.
Evolution of city structure in response to social, cultural, political, and economic forces; cities through time and across continents; varied resource materials, including video, novels, texts. Same as 033:056.

102:101 Planning Livable Cities 3 s.h.
Development of livable cities in the United States; economic, physical, environmental, and political forces that shape their growth; impact of planning, how it shapes the future of cities. Same as 044:136.
102:112 The City: Narrative and Design 3 s.h.
History, culture, and built environment of a major city (e.g., Berlin, Germany); how storytelling and city building interact to create the city as it currently exists and as it might exist in the future; films, novels, physical plans, histories, social science texts. Same as 033:112.

102:125 Environmental Impact Analysis 4 s.h.
Fundamental concepts underlying measurement, assessment, and evaluation of environmental impacts; case studies in cost-benefit analysis; risk assessment, resource allocation, social impact assessment, public participation, management information systems; field trips to environmental control facilities. Same as 044:125.

102:133 Introduction to Economics of Transportation 3 s.h.
Overview of transportation markets—intercity, rural, urban; transportation modes—rail, highway, air, water, pipeline, transit; issues in finance, policy, planning, management, physical distribution, and environmental, economic, and safety regulation. Same as 06E:145, 044:133.

102:158 Storytelling and Urban Engagement 3 s.h.
Storytelling's social role linked to the professional practice of urban planning; hands-on interaction with neighborhoods in Iowa City. Same as 008:158, 045:163.

Prerequisite: consent of instructor.

102:200 Analytic Methods in Planning I 1-3 s.h.
Methods used in planning and policy analysis; emphasis on application of statistical techniques and quantitative reasoning to planning problems; use of computers and data systems in planning analysis.

102:201 Analytic Methods in Planning II 2-3 s.h.
Integration of methods with the planning process; application of multiple regression, population estimation and projection, survey methods, time series analysis, industrial growth and change; presentation of results to decision makers and the public.

102:202 Land Use Planning: Law and Practice 4 s.h.
Legal, social foundations of land use planning; comprehensive planning, zoning and subdivision review; legal aspects of land use, environmental planning; ordinance drafting; staff report writing; citizen participation.

102:203 History and Theories of Planning 3 s.h.
History of urban planning in America as a reflection of social and economic forces; alternative planning philosophies, roles, and ethical choices open to planners.

102:205 Economics for Policy Analysis 1-3 s.h.
Principles of economics for planners; concepts and techniques of microeconomic analysis; issues in inequality; the role of government in the economy; tax and pricing policy; project evaluation; externalities.

102:208 Program Seminar in Planning Practice 1 s.h.
Planning process, roles of planners, professional ethics and standards. Repeatable.

102:209 Field Problems in Planning I 1 s.h.
Experience working on a two-semester project involving a current planning issue, usually for a client. Prerequisite: urban and regional planning graduate standing.

102:210 Field Problems in Planning II 3 s.h.
Continuation of 102:209. Prerequisites: 102:209 and urban and regional planning graduate standing.

102:214 Land Use Policy and Planning 1-3 s.h.
Environmental preservation, site development concepts, downtown revitalization, historic preservation, brownfields.

102:215 Applied GIS for Planners 2-3 s.h.
Spatial matrices, routing, network flows, partitioning and clustering, facility location models; three-dimensional GIS analysis; statistical analysis in spatial context. Prerequisite: consent of instructor.

102:216 Conflict, Negotiation, and Planning 3 s.h.
Conflict within communities, and planners' responses; networking, negotiating, mediating, coalition building, consensus building; case studies, role playing. Prerequisite: 102:203 or consent of instructor. Same as 160:216.

102:217 Spatial Analysis in Planning 2-3 s.h.
Data bases, GIS, planning support systems; spatial model building and use of spatial statistics; applications to substantive problems in transportation, environment, housing, economic development. Prerequisite: 102:215 or consent of instructor.

102:218 Applied GIS 1 s.h.
Development, maintenance, and operation of an enterprise-wide Geographic Information System (GIS); implementation of a parcel-based data system model common to government entities; practical experience using data for land-use planning analysis. Prerequisite: consent of instructor.

102:219 Practicum 5 s.h.
Full-time internship of at least five months with a planning-related organization. Prerequisite: urban and regional planning graduate standing.

102:220 Virtual Reality and Urban Development 2-3 s.h.
Creation of terrain models from DEMs and CAD-based site plans, panoramas, incorporation of existing and proposed buildings into virtual reality models; use of VRML and presentation strategies, including digital movies. Pre- or corequisite: 102:215.

102:221 Poverty, Planning, and Public Policy 1-3 s.h.
Who and where the poor are in the United States; consequences of poverty; competing explanations of poverty; historical survey and critique of antipoverty policies at federal, state, and city levels; role of urban development policies. Prerequisites: 102:200, 102:203, and 102:205; or consent of instructor.

102:223 Financing Local Government 3 s.h.
Financing of local government infrastructure through property taxes, bonding, impact fees, pricing, tax increment financing; institutional alternatives—downtown improvement districts, special districts, homeowners' associations; fiscal disparities and regional finance; case studies. Prerequisite: 102:205 or consent of instructor.

102:224 Spatial Patterns, Networks, and Dynamics 3 s.h.
Basic tools for understanding if, when, and how reliability of information is affected by spatial considerations; examples drawn from the spatial organization of businesses, communities, spatial inequalities, environmental quality, health, and mobility; focus on visualization and applied analysis. Prerequisites: introductory statistics and geographic information systems.

102:226 The Planning Process 3 s.h.
The planning process; evaluation of plans and their quality, implementation, and outcomes; public participation mechanisms and issues; understanding of the planning process developed through study of actual planning projects and processes.

102:230 Land Use Administration 1 s.h.
Process of administering zoning and other land use regulations at the local government level; personnel, management, enforcement issues.

102:233 The Land Development Process 2-3 s.h.
How land is developed; analysis of site suitability, preparation of subdivision plan, site plan review, development approval process, infrastructure and site preparation, negotiating local development politics; field trips. Prerequisite: 102:202 or consent of instructor.
102:235 Growth Management 3 s.h.
Causes and consequences of urban sprawl, shortfalls in conventional land use planning; local and state growth management policies, techniques of policy implementation, positive and negative impacts of such policies; Smart Growth; emerging challenges. Prerequisite: 102:202.

102:240 Environmental Processes and Institutions 1-3 s.h.
Natural and engineered environmental processes and institutions within the United States; physical, chemical, and biological processes associated with pollution control systems; land, water, and air; environmental institutions—past and present structure, their efforts to reduce environmental pollution through political and legal means.

102:242 Planning for Sustainable City—Regions 3 s.h.
Understanding and improving the practice of urban environmental planning; techniques and politics of planning drinking water supply, sewage treatment, natural areas conservation. Same as 011:232.

102:243 Healthy Cities and the Environment 3 s.h.
Foundations of environmental planning for healthy cities and communities; how urban form, air and water quality, and natural hazards affect environmental planning and health.

102:244 Global Perspectives on Environmental Planning 3 s.h.
Environmental issues such as sprawl, loss of open space, metropolitan traffic congestion, inefficient resource management, limited use of renewable energy, natural disaster mitigation and preparedness; solutions drawn from international planning practice.

102:245 Special Topics in Environmental Planning 1 s.h.
Aspects of environmental planning and the most recent environmental management practices; perspectives from local, county, and state professionals; environmental planning field trips. Repeatable.

102:246 Environmental Policy 3 s.h.
Environmental policy formation and politics; comparative international perspective on the United States' experience. Prerequisite: consent of instructor.

102:247 Environmental Management 3 s.h.
Environmental best management practices for sustainable management of natural resources; open space and habitat protection, prairie and wetland restoration, water supplies management, natural hazard mitigation, farmland protection.

102:260 Transportation Policy and Planning 2 s.h.
Institutional setting for transportation planning, evolution of domestic transportation policy, international influences, transportation modes and markets, current sources of transportation planning information, emerging policy issues.

102:262 Transportation Demand Analysis 3 s.h.
City planning procedures and traffic engineering techniques applied to transportation problems; trip generation, distribution, assignment, mode choice models; travel surveys, data collection techniques; arterial flow, intersection performance, parking; transit system analysis. Same as 053:262.

102:263 Applied Simulation to Transportation 3 s.h.
Same as 053:263.

102:264 Transportation Planning Process 2-3 s.h.
Technical issues, political interface, citizen involvement, intermodal questions, public versus private roles; review and critique of transportation plans.

102:265 Planning Sustainable Transportation 1-3 s.h.
Theories and methods of exerting public control over passenger and freight transportation; social and environmental regulation; effects of changing finance, regulation, and pricing policies, including privatization, tolls, impact fees. Same as 044:265.

102:266 Transportation and Land Use Planning 3 s.h.
Policies and interactions between transportation and land use; location theories and practices; transportation infrastructure, land use, travel behavior modeling; current policies that influence travel behavior and urban form.

102:267 Transportation Policy Analysis 2-3 s.h.
Applied methods for analyzing practical problems in transportation planning and policy; facility investment analysis, pricing of public services, social equity and redistributive effects, impacts of alternative financing approaches.

102:269 Transportation Program Seminar 1 s.h.
Transportation finance, safety and economic regulation, planning processes, government policy issues at federal, state, and local levels. Repeatable.

102:271 Housing Policy 3 s.h.
Recent housing policy initiatives at federal, state, and local levels.

102:273 Community Development 1-3 s.h.
Community Development Corporation involvement in housing and neighborhood revitalization; infill housing development and preservation; comprehensive community development initiatives.

102:275 Development Policy and Planning in the Third World 3 s.h.
Cross-cultural and interdisciplinary analysis of problems associated with urbanization and development in Third World countries. Same as 078:275, 034:275, 042:275, 044:275, 113:275.

102:277 Affordable Housing Finance 3 s.h.
Financing development or rehabilitation of affordable housing; low-income housing tax credits, the housing finance system and current regulatory issues, mortgage discrimination, improving financing for rental housing.

102:290 Economic Impact Assessment 2-3 s.h.
Economic impact and growth analysis, including economic base, income expenditure, input-output analysis; use of economic impact analysis in a cost-benefit context; industrial location and mobility theory with statistics applications. Prerequisite: 102:205 or consent of instructor.

102:295 Economic Development Policy 2-3 s.h.
Analysis of policies and programs at national, regional, state, and local levels that address problems of economic growth, development, decline. Prerequisite: consent of instructor.

102:297 Community Development Finance 3 s.h.
Financial statements and small business finance; local revolving loan funds for small businesses; evaluation of loan proposals; community development agency financing of commercial redevelopment; case studies of community development lending. Prerequisite: 102:205 or consent of instructor.

102:300 Special Topics in Planning 1-3 s.h.

102:301 International Seminar 1-2 s.h.

102:305 Readings arr.

102:315 Independent Study in Planning 1-6 s.h.
Research and analysis of a special planning problem; opportunity for student to apply knowledge in area of specialization.

102:335 Internship 2 s.h.
Work in a planning or related agency or nonprofit organization. Prerequisite: consent of instructor.
The University of Iowa College of Law, founded in 1865, is the oldest law school in continuous operation west of the Mississippi River. More than 650 students and a full-time faculty of around 50 are engaged at the college in a cooperative study of law, legal institutions, professional ethics, the role of law in public policy matters, and the intersection of law and other disciplines.

The college’s student/faculty ratio of 12.82-to-1 is one of the best in American legal education. Four members of the law faculty hold Ph.D. degrees in law-related disciplines.

Through traditional Socratic classes, research seminars, closely supervised writing exercises, ambitious professional skills training programs, and clinical experiences, the college seeks to produce public-spirited leaders who will be rigorous thinkers, trusted advisors, forceful advocates, creative policy makers, and innovative scholars.

The college conducts its programs in the Boyd Law Building, a 200,000-square-foot facility that opened in 1986. Its spacious library, three courtrooms, clinic suite, building-wide audiovisual system, and extensive computer technologies are recognized as outstanding features in an educational facility specially designed for modern legal training.

The college is home to one of the nation’s premier law libraries. The Law Library has the largest collection of legal volumes and volume equivalents among all public law schools. Its staff numbers 32.5 full-time-equivalent library professionals and other personnel, and it provides comfortable seating for more than 700 patrons, with 441 private study carrels, each equipped with its own data port. The library boasts a fully computerized information retrieval system. WESTLAW and LEXIS are available at numerous terminals for training and research activities, and the online electronic card catalog provides instant information about all cataloged materials. The library also is on the University’s wireless network.
The college celebrates diversity. Its faculty includes seven full-time professors from minority backgrounds, including African American, Asian American, and Hispanic American. In 1967 the college undertook one of the nation’s first and most aggressive affirmative action programs aimed at attracting a more racially and ethnically diverse student body. Its success in this continuing effort has resulted in a minority student population that makes up approximately 17 percent of the law college’s current student body (the state of Iowa’s minority population is around 5 percent).

The college offers a challenging curriculum that is carefully balanced between substantive courses, perspective offerings, examination of ethical values and professionalism, and skills-training programs, including a highly active in-house legal clinic. Iowa’s writing program—one of the strongest among law schools nationwide—is an integral part of all students’ academic experience. During both semesters of their first year, students take one small section class taught by a full-time professor.

The college also requires four additional writing units at the upper level, a requirement that must be fulfilled with at least two credits of faculty-supervised written work. The remaining two may be satisfied through a range of options, including writing for one of the school’s four law journals, participating in the clinical program, completing exercises in appellate advocacy, or enrolling in specific seminars or independent writing projects.

The Writing Resource Center supports and builds upon classroom writing instruction and assists students with a broad range of writing tasks (see “Resources”/“Writing Resource Center” later in this section). The center and the writing program as a whole exemplify the personalized attention and dedication to individual learning for which the college is renowned in legal circles.

The college is proud of its four student-run scholarly journals. The Iowa Law Review has served as a scholarly legal journal since 1915, analyzing developments in the law and recommending new paths for the law to follow. It frequently is ranked among the top 20 legal periodicals in the country, based on the frequency with which it is cited.

The Journal of Corporation Law is the nation’s oldest and top-rated student-run legal periodical specializing in corporate law. It provides the legal and academic communities with high-quality articles on corporate issues and business law.

Transnational Law & Contemporary Problems, which began publication in 1991, addresses legal issues confronting the global community. It has earned an excellent reputation based on its symposiums on issues such as world food policy and global environmental regulation.

The Journal of Gender, Race & Justice hosts a symposium at the college each fall, attracting nationally renowned legal scholars and practitioners who discuss topics such as criminal justice, education, and critical race feminism. The journal publishes the papers presented at the symposium.

In keeping with its educational mission of encouraging the acquisition of broad social awareness and technical professional competence, the University of Iowa College of Law offers a strong program of study in the rapidly expanding fields of international and comparative law. It does so for three reasons: in an era of global interdependence, an effective lawyer must understand international law and foreign legal systems; as professionals and community leaders, lawyers familiar with international and comparative law are crucial to the formulation of public policy at all levels of society; and the study of international and comparative law provides an essential theoretical foundation for all lawyers by affording unique insight into the nature of law and legal process.

All College of Law students benefit from international exposure through association with students in the college’s Master of Laws program in international and comparative law. LL.M. students take most of their classes with J.D. students. In addition, each year foreign-trained law professors and jurists pursue research in the Law Library; they also may audit or speak in classes.

The journal Transnational Law & Contemporary Problems offers students a law review experience dedicated to international issues. The college also fields a team every year in the Philip C. Jessup International Moot Court Competition, and there are opportunities for students to get involved with two faculty-run centers, the University of Iowa Center for Human Rights and the University of Iowa Center for International Finance and Development, as well as student groups such as the International Law Society and the Iowa Coalition for Human Rights.

Over the years, the college has enjoyed great success in preparing women and men to be professional and civic leaders. In the 20th century, Iowa graduates served as U.S. senators and representatives, state governors, and
presidents of the American Bar Association, of major universities, and of the country’s largest corporations. Iowa also has been a leader in preparing American law teachers. The college is resolved to continue its traditional role of training future lawyers for positions of professional and community leadership in the 21st century.

Professional Programs

The College of Law offers the Juris Doctor (J.D.), and the Master of Laws (LL.M.) in international and comparative law. It also collaborates with a variety of University of Iowa graduate programs to offer joint J.D./graduate degree programs. See “Joint J.D./Graduate Degrees” later in this section.

Full-Time Policy

The faculty believes that students receive a better legal education when they devote substantially all of their time to educational pursuits. For this reason, students are expected to pursue their law training full time. This policy is consistent with the accreditation standards of the American Bar Association and the Association of American Law Schools.

In extraordinary circumstances, it may be possible for students to enroll for fewer than 10 s.h. per semester. Students who believe they may be unable to attend full time should contact the dean’s office before registering for classes.

Entrance Dates

The college offers two starting dates to entering students: a class of around 30 students enters mid-May (at the beginning of the college’s summer session) and approximately 195 students enroll in late August (at the beginning of the college’s fall semester). All attend courses full time during fall and spring semesters and may attend the summer term at any point during their academic careers. Mid-May entrants can expect to graduate no earlier than 27 months after beginning law study.

The summer term consists of two periods of five-and-a-half week sessions, during which four to five upperclass and three to four first-year courses usually are offered. Generally, students may attend either or both periods. Students who enter in May attend the entire 11-week session during their first summer.

Admission to the Iowa Bar

A rule adopted by the Iowa Supreme Court requires all law students who intend to apply for admission to the Iowa Bar to register that intention with the court by November 1 of the year they begin law school. Details are available from the College of Law registrar or the clerk of the Iowa Supreme Court.

Juris Doctor

The Juris Doctor requires 90 s.h., including required and elective courses. All entering students are expected to take all courses designated as first-year courses and may not register for different courses or fewer semester hours without permission of the associate dean. No student may be enrolled during any fall or spring semester for more than 18 s.h. applicable to the J.D., or for more than 13 s.h. during any two adjacent summer sessions.

To be eligible for the J.D., a student must:

- receive course credit for 90 s.h.;
- take and complete all required courses;
- satisfy the writing requirements;
- complete the course of study required for the degree in no fewer than 27 months after commencing law study at the College of Law or at a law school from which transfer credit has been accepted; and
- achieve a cumulative g.p.a. of at least 2.10, a C average.

Receiving credit in a course is dependent upon successful completion of a final examination, or all assigned work, or both. In order to take the final examination, students must satisfy all requirements established by the instructor, including class attendance, written work, special readings, oral reports, and so forth.

First-Year Curriculum

One of the distinctive benefits of law study at Iowa is the College of Law’s focus on providing students with a foundation in basic skills that will support more advanced study and professional work. The first-year curriculum emphasizes careful reading, essential writing skills, legal research, and argumentation. Students concentrate on developing analytical skills (for example, reading and understanding judicial opinions), gain a sense of the role of legal institutions in society, and focus on developing good writing and research skills.
All first-year students take 091:130-091:131 Legal Analysis, Writing, and Research I-II (LAWR), a two-semester, 4 s.h. course designed to equip them with effective skills in oral and written communication, legal research, and analysis. LAWR is staffed by full-time faculty members with expertise in teaching legal research and writing. Class size is small, with around 20 students in each section of the course.

LAWR helps students develop legal analysis skills gradually. It teaches the value of critical reading, how to analyze facts and frame legal issues, how to determine which facts are legally significant, and how to extract legal rules from judicial opinions. As the year progresses, students learn how to generate arguments and counter arguments, and how to interpret facts in order to predict the likely outcome of a client’s case. They also learn varied methods of legal analysis, including precedential analysis and analysis by analogy.

The first-year program emphasizes writing in small increments, with short assignments, frequent feedback, and revisions of written assignments. Because students will eventually practice in a range of legal settings, the program exposes them to varied forms of written documents, such as memoranda, trial briefs, client letters, motions, and appellate briefs, and provides instruction in appropriate formats for the varied documents (e.g., questions presented, argument headings).

LAWR uses peer review, requiring students to assess, discuss, and critique their peers’ writing assignments. This cooperative process helps students gain insight into their own legal writing abilities and learn to appreciate different approaches to the same task. It also prepares them for the experience of collaborating as practicing lawyers.

Students begin to learn about research early in the first year, completing increasingly complex research tasks as the year progresses. LAWR reinforces research techniques covered in the classroom by integrating them into written assignments. It also teaches students the fundamentals of legal research by requiring hands-on library workshops.

First-year courses are as follows. Entering first-year students are expected to take all first-year courses and may not register for different courses or fewer hours without the associate dean’s permission.

### Fall Semester
- 091:102 Introduction to Law and Legal Reasoning 1 s.h.
- 091:120 Contracts and Sales Transactions 4 s.h.
- 091:130 Legal Analysis, Writing, and Research I 2 s.h.
- 091:132 Property 4 s.h.
- 091:364 Torts 4 s.h.

### Spring Semester
- 091:104 Civil Procedure 4 s.h.
- 091:116 Constitutional Law I 3 s.h.
- 091:124 Criminal Law 3 s.h.
- 091:131 Legal Analysis, Writing, and Research II 2 s.h.
- Legal bibliography
- One elective 3 s.h.

A mandatory curve is applied to the grade distribution in all first-year courses.

### Upperclass Curriculum
In the second and third years, students take courses in a broad array of substantive areas of the law, with focus on fact gathering, interviewing, counseling, drafting, transaction planning, negotiation, and litigation. They also concentrate course work or writing and research opportunities in particular areas of interest.

Very few common requirements exist in the second and third years. All students must take 091:232 Constitutional Law II and a course in professional ethics.

### Writing Requirement
All students must earn four upper-level writing units in order to graduate. At least two of the four units must be earned under direct faculty supervision, in courses, seminars, research projects, or legal clinical work. The remaining two may be earned through a combination of courses and activities that carry writing credit, including 091:402 Moot Court Board, advanced appellate advocacy activities, and journals, including the Iowa Law Review, The Journal of Corporation Law, The Journal of Gender, Race & Justice, and Transnational Law & Contemporary Problems.

### Concentrated Study Opportunities
Students may pursue their interest in a particular subject area by selecting appropriate course work and independent research projects. For example, in the intellectual property and competition law focus area, students may take several courses:
Independent Research

A student may sign up for 1-3 s.h. in 091:500 Independent Research Project after obtaining authorization from the faculty member who agrees to supervise the student’s project. When independent research involves a paper, the work must include research and the submission of at least one draft to the faculty member for comments; a second draft generally is required, and the faculty member may require additional drafts. Students may earn additional credit for longer papers. Generally, each 1 s.h. of credit requires 20 pages of double-spaced text, excluding footnotes. Exceptions may be made for projects that involve substantial empirical work.

Students who wish to pursue independent research should contact one of the professors who have been designated to supervise a limited number of student writing and research projects during that semester; the designated professors are listed in the semester’s registration materials.

Students may not register for more than 3 s.h. for a single research project. They also may apply no more than 6 s.h. of independent research toward the J.D., and they may take no more than 4 s.h. under the supervision of the same faculty member, unless the limit is waived by the dean or the dean’s delegate.

Papers produced for independent research may be eligible for entry in competitions sponsored by varied groups. Cash prizes frequently are available. Competition announcements are posted on the bulletin boards outside the college’s Writing Resource Center.

Supplementary Writing

In Supplementary Writing (091:502), a faculty member supervises one or more students in connection with a substantive course taught by the faculty member and for which the student has registered. The writing project builds on or proceeds from the materials covered in the related course and entails work beyond the course’s content. At the faculty member’s discretion, students may take Supplementary Writing during the same semester as the substantive course or during the following semester. Supplementary Writing projects are graded separately from the related course. Registration materials typically include the names of faculty members offering the course, and for each faculty member, the number of writing units available, and reasonable details specified for structuring the writing.

Directed Research and Writing

In Directed Research and Writing (091:501), a faculty member supervises a student in a research and writing project unrelated to any substantive course. Each faculty member who plans to teach Directed Research and Writing lists the general subject area and/or specific topics he or she will supervise and may specify other details about how the writing supervision will be structured (e.g., topic selection, submission dates, required outlines, preliminary submissions). Students may register for the course without the faculty member’s prior consent. Registration materials typically include the names of faculty members offering the course, and for each faculty member, the subject matter (a general category or detailed topics, at the faculty member’s discretion), the number of writing units available, and reasonable details specified for structuring the writing.

Writing Tutorial

The Writing Tutorial (091:503) combines features of 091:504 Tutorial and 091:501 Directed Research and Writing. A faculty member lists the subject matter and/or specific topics he or she will supervise and provides the writing supervision in a group setting. The faculty member also specifies the subject and the general approach for group meetings and decides how the group members will interact in connection with the writing project (for instance, group members may work on separate parts of a single project, or on separate but related projects). Enrollment in Writing Tutorial is limited by the number of writing units the faculty member offers. Students earn the same number of semester hours and writing units for their work in a Writing Tutorial. Registration materials typically include the names of faculty members offering the course, and for each faculty member, the subject matter (a general category or more...
detailed topics, at the faculty member’s discretion), the number of writing units available, and reasonable details specified for structuring the writing and the tutorial’s group process.

**Seminars**

Students should direct questions about a seminar’s requirements to the College of Law registrar or the instructor before the seminar begins, because they may not be permitted to drop the class after it meets the first time.

Seminars usually offer up to 4 s.h., including up to 2 writing units. Seminar formats vary widely; consult the College of Law Guide to Courses and semester registration materials for details. Students are graded on the basis of a research paper, and at the instructor’s discretion, for class participation and other seminar requirements.

A common seminar format consists of a class portion for 2 s.h. (usually in the fall), and a writing portion for 2 s.h. (usually in the spring). The total 4 s.h. must be allocated between the semesters as best accommodates the student’s schedule. Reduction of credit for seminars requires the instructor’s consent. In some seminars, the instructor may permit the student to enroll for the class portion but not the writing portion. The students’ performance in the class portion is evaluated on the same basis as for other courses—by examinations, papers, class participation, or other methods at the faculty member’s discretion. Students must obtain the instructor’s consent before registering.

Papers produced for seminars may be eligible for entry in competitions sponsored by varied groups. Cash prizes frequently are available. Competition announcements are posted on the bulletin boards outside the college’s Writing Resource Center.

**Tutorial**

A student may sign up for 1-3 s.h. for work in 091:504 Tutorial after obtaining authorization from the faculty member who agrees to supervise the student’s project. Tutorials may involve different types of pedagogical techniques, such as discussion sessions, assignments of problems, or short papers. In all tutorials, the student and faculty member must meet for at least five hours for each 1 s.h. the student earns. No writing units are awarded for tutorials. To register, students must submit a form that confirms the arrangement with the faculty member; forms are available from the College of Law registrar.

**Clinical Programs, Internships, Clerkships**

Students who have completed the equivalent of three semesters toward their J.D. degrees (summer entrants may count the first full summer session as one semester) are eligible to apply their theoretical knowledge to real cases under the supervision of faculty members and other attorneys through participation in the College of Law’s Clinical Law Programs.

Some 30 students participate each semester in the in-house programs. They may represent individual and organizational clients in a variety of areas including immigration, domestic violence, criminal defense, consumer/bankruptcy, disability, nonprofit organizations, civil rights, employment law, and general civil practice.

Other students may enroll in externships in Iowa City and the surrounding area, where they act as staff attorneys, assisting in all phases of the legal process. Typical placements include Student Legal Services, Iowa Legal Aid (Iowa City and Cedar Rapids), HELP Legal Services (Davenport), the City Attorney’s Office (Iowa City), Kids First (Cedar Rapids), the federal public defender (Cedar Rapids), the United States Attorney’s Offices (Cedar Rapids and Rock Island, Illinois), and several federal judges, including the U.S. Bankruptcy Court (Cedar Rapids). A clinical semester also is available, in which students spend an entire semester in the Iowa Attorney General’s Office, the U.S. Attorney’s Office, the Youth Law Center, or the federal court, all in Des Moines.

Students may earn a total of up to 15 s.h. in the Clinical Law Programs and up to 20 s.h. for clinic and nonlaw courses offered in other University of Iowa colleges.

The College of Law also is involved in programs that do not carry academic credit. Each summer it participates in the County Attorney Internship Program, through which students work as paid employees for county attorneys throughout the state and in the Poverty Law Internship Program, placing students in Iowa Legal Aid offices. The college also helps place students in a variety of unpaid clerkships and internships nationwide that provide insight into the workings of the legal system.

**Joint J.D./Graduate Degrees**

The college has developed joint degree programs with a number of University graduate programs through the Graduate College, under which
students pursue degrees simultaneously in both colleges.

Joint degree candidates may count up to 12 s.h. earned for the graduate degree toward the 90 s.h. required for the J.D., providing the courses are relevant to both degrees and the 12 s.h. are earned after admission to the combined degree program and after matriculation at the College of Law.

Separate admission to each program is required. Applicants to graduate programs must meet the admission requirements of the Graduate College; see Manual of Rules and Regulations of the Graduate College or Graduate College in the Catalog.

Graduate departments establish their own requirements for the joint degree program, including the number of semester hours taken for the J.D. that may be counted toward the graduate degree.

The College of Law offers joint graduate programs with the Tippie College of Business, the Carver College of Medicine, and the College of Public Health; the Schools of Journalism and Mass Communication, Library and Information Science, and Social Work; the Departments of Accounting, American Studies, Anthropology, Chemistry, Computer Science, Educational Policy and Leadership Studies, English, History, Health Management and Policy, Management and Organizations, Philosophy, Political Science, Religious Studies, Sociology, Spanish and Portuguese, Urban and Regional Planning; and Counseling, Rehabilitation, and Student Development; and other academic units.

Many departments have advisors for the joint program. For more information, consult the associate dean of the College of Law and the individual graduate departments.

Master of Laws in International and Comparative Law

The Master of Laws (LL.M.) in international and comparative law is an important component of the College of Law’s international approach to legal education. The program is designed for graduates of J.D. programs in the United States who wish to deepen their understanding of international and comparative law, including the law pertaining to international business transactions, and for foreign-trained jurists who wish to receive advanced training in these areas or a comparative orientation to and specific training in U.S. law and legal institutions.

The LL.M. program admits around 15 students per year, allowing each student to receive substantial attention from the faculty. Admission is competitive.

The LL.M. requires a minimum of 24 s.h. earned in College of Law courses that include a strong focus on international and comparative law. With their advisor’s approval, LL.M. students may count toward the degree up to 6 s.h. of law study abroad, or non-law graduate-level courses or externships.

LL.M. students take courses (except 091:504 Tutorial and 091:657 LL.M. Seminar) together with J.D. students, from the law school’s rich offerings on U.S., international, and comparative law. This method of instruction ensures that the foreign-trained students have an effective comparative experience through broad contact with U.S. law students and professors, and the U.S. students benefit similarly from close contact with the foreign-trained lawyers.

LL.M. applicants who are graduates of U.S. law schools must have been granted a J.D. from a school that is a member of the Association of American Law Schools or is approved by the American Bar Association. Graduates of foreign law schools must have completed the basic course of university studies that qualifies them to sit for the bar examination (e.g., the French maîtrise, the German first state bar examination). If the home country bar exam does not require a specific degree, applicants should be experienced members of the bar or have completed at least the first university degree in law. Applicants without a degree from a four-year English-language university must score at least 580 (paper-based), 237 (computer-based), or 92 (Internet-based) on the Test of English as a Foreign Language (TOEFL); those with scores lower than 600 (paper-based), 250 (computer-based), or 100 (Internet-based) may be required to take English course work upon entering the University. The college accepts International English Testing System (IELTS) scores of 7.0 or higher, with no subscore below 6.0, in place of TOEFL scores.

All applicants must present evidence of high academic potential, such as high class rank in their previous law studies; strong recommendations, especially from law professors who supervised their work in classes or seminars; and challenging professional work experience. The College of Law relies heavily on academic references to assess applicants’ credentials. Because U.S. applicants and all others with first-language fluency in English are required to produce a substantial publishable paper in the
Cocurricular Programs

As many as 7 of the 90 s.h. required for the J.D. may be earned through participation in the college’s rich cocurricular program offerings.

Client Counseling

In the Client Counseling Program, students interview and counsel clients and witnesses. They gain experience in recognizing and resolving legal, nonlegal, and ethical issues arising in the context of those activities.

Moot Court

The Moot Court appellate advocacy programs familiarize students with writing appellate briefs, acquaint them with citation form, develops research skills, and strengthens persuasive ability in oral argument at the appellate court level.

Each academic year, the Moot Court office administers 091:210 Appellate Advocacy I in one semester, and three Moot Court competitions in the other semester. Students who rank in the top scoring positions of Appellate Advocacy I are eligible for the advanced competitions according to their rank. Advanced competitions include 091:404 Van Oosterhout Moot Court Competition, 091:405 Baskerville Moot Court Competition, and 091:430 Jessup International Moot Court Competition.

The appellate advocacy program is administered by the Moot Court Board, which consists of student judges and an executive board.

Trial Advocacy

The Trial Advocacy Program (091:370 Trial Advocacy) is a student-run, faculty-supervised program in which students develop and refine skills used to prepare and try civil and criminal cases. The heart of the program is the two-semester-hour course in trial advocacy taught by law school faculty, federal and state judges, and experienced trial attorneys. Students are on their feet during most class sessions, practicing the arts of jury selection, opening statement, direct and cross examination, introduction of exhibits, use of expert testimony, and closing argument. The course culminates with a full-scale trial—from the filing of pretrial motions to the rendering of a jury verdict—conducted by student co-counsel before a visiting judge and a jury of laypersons.

The Stephenson Competition is named after Judge Roy L. Stephenson, a U.S. District Court and Eighth Circuit Court of Appeals judge and a 1940 graduate of the College of Law. Students who demonstrate superior ability in advocacy skills during the trial advocacy courses participate in a series of mock trials judged by local members of the bench and bar. Individuals selected from the competition represent The University of Iowa in the national trial competition.

Journals

IOWA LAW REVIEW

Since its inception in 1915, the Iowa Law Review has served as a scholarly legal journal, noting and analyzing developments in the law and suggesting future paths for the law to follow. Students have managed the Review since 1935, editing and publishing articles by professors and students. The Review is published five times annually and is staffed by second-year student writers and third-year editors. To learn more about the Iowa Law Review, visit its web site (http://law.uiowa.edu/journals/ilr).

TRANSNATIONAL LAW & CONTEMPORARY PROBLEMS

Transnational Law & Contemporary Problems (TLCP) is produced two times a year by Iowa law students. TLCP’s content includes matters that are of interest to the international and comparative law community and that are not commonly found in other journals and reviews. Past editions have featured symposiums with articles by distinguished legal scholars and practitioners; living history interviews with people of international accomplishment; and articles reviewing foreign legislative developments, treaties, conventions, and other international agreements. The journal also publishes articles written by Iowa law students and sponsors an internationally advertised student writing competition each year.

Law students who have completed at least two semesters may earn up to 2 s.h. of credit by writing for TLCP. Highly qualified students who complete the writing and secondary hour requirements may be chosen to fill an editorial position, for which they earn additional credit. They also may be eligible for a monetary stipend. To learn more about Transnational Law & Contemporary Problems, visit its web site (http://www.law.uiowa.edu/journals/tlcp).
THE JOURNAL OF CORPORATION LAW

The Journal of Corporation Law is a student-operated periodical that publishes articles relevant to modern business enterprise. The journal’s scope includes antitrust, intellectual property, labor law, securities, taxation, employment discrimination, insurance, products liability, and regulated industries, as well as traditional corporate topics. Selected articles submitted from practitioners and academics are published in each of four annual issues. Several student articles also are selected for publication.

All students who have completed two semesters of class work are eligible to write for the journal. Students who have achieved third-year status at the College of Law are eligible for selection to the journal’s editorial board and may receive additional academic credit. They also may be eligible for a monetary stipend. To learn more about The Journal of Corporation Law, visit its web site (http://www.law.uiowa.edu/journals-orgs/jcl.php).

THE JOURNAL OF GENDER, RACE & JUSTICE

The Journal of Gender, Race & Justice pushes at the boundaries of traditional legal scholarship and theory in its focus on social justice issues. Each spring the journal hosts a live symposium, bringing nationally renowned legal scholars and practitioners to the college to discuss topics such as race, gender, economic class, ability, and identity. The journal publishes the papers presented at the symposium. Each issue also includes articles written by Iowa law students.

All students completing two semesters are eligible to write for the journal. Students who have third-year standing at the College of Law are eligible for a position on the editorial board. To learn more about The Journal of Gender, Race & Justice, visit its web site (http://www.law.uiowa.edu/journals-grj).

Study Abroad

A consortium of seven American law schools, coordinated through The University of Iowa College of Law, offers an annual study-abroad program in which students attend a spring semester at Florida State University’s London study center. There they study American and English law with faculty from the American schools and the University of London. Students participating in the program register for 660:824 London Law Consortium.

The College of Law also offers up to 8 s.h. of credit for intensive course work at Arcachon, France, in conjunction with the University of Bordeaux. Courses are offered for four weeks in May and June and are taught in English by professors from Iowa and Bordeaux. Application deadline is February 1. Students participating in the program register for 660:823 Program in Comparative Law in Bordeaux, France.

Two Iowa law students may attend the Bucerius Law School in Hamburg, Germany, each fall semester in an exchange program with that school. Students earn 12-15 s.h. of credit through course work taught in English.

The International Law Society and the College of Law Career Services Office provide information on other study-abroad programs.

Academic Achievement Program

The College of Law Academic Achievement Program (AAP) helps students achieve their potential as they go from successful undergraduate careers to the unique challenges of law study. Although AAP focuses on helping first-year students, its programs are open to all.

AAP presents a variety of programs, including a fall-semester lecture series for new students. Examples of content areas include time management for law study, developing effective study groups, outlining and organizing class notes and course materials, taking essay exams, and answering multiple choice tests. Several weeks before exams, a pre-exam series focuses on exam readiness. AAP group programs for the summer entering class are geared especially to the needs of summer term students.

Spring semester programming responds to special challenges of the second semester, including reviewing and learning from fall exams, taking on complex writing projects, exam preparation, and other matters.

In addition to offering group programs, AAP provides individual help with study skills. When personal issues affect a student’s concentration or studying, the program provides direct help and refers students to University and community support resources.

Academic Honors

Order of the Coif

The Order of the Coif, a national legal honor society, has a chapter at The University of Iowa. The order is dedicated to scholarship and advancement of high ethical standards in the
legal profession. Membership is drawn from the top 10 percent of the graduating class. Initiates are selected by the faculty after graduation.

Prizes and Awards

Hancher-Finkbine Medallions are awarded each year by the University to outstanding graduates; honorees are chosen from nominations made by University departments and colleges based on learning, leadership, and loyalty.

The Philip G. Hubbard Human Rights Award is presented each year by the University to recognize outstanding contributions to human rights and equal opportunity, as described in the University’s Human Rights Policy.

The Sandy Boyd Prize is presented to the student who has demonstrated outstanding ability and creativity in the development of written legal scholarship.

The Alan I. Widiss Faculty Scholar Award is presented to the student who has made an especially outstanding and distinctive contribution to the development of written legal scholarship.

The Randy J. Holland Award for Corporate Scholarships is presented to the student who has written an outstanding scholarly paper in the area of corporate law.

The Robert S. Hunt Legal History Award is presented to a student who has written an outstanding scholarly paper in the field of legal history.

The Donald P. Lay Faculty Recognition Award is presented to the student who has made distinctive contributions to the College of Law’s cocurricular, community, or education programs.

The Iowa State Bar Association Prize is presented to the student who possesses the attitude, ability, and other qualities that indicate success as a future leader of the bar association.

The Antonia “D.J.” Miller Award for Advancement of Human Rights recognizes outstanding contributions by a student to the advancement of human rights in the law school community.

The Dean’s Achievement Award is presented each year to a student, who, through his or her achievements, has exemplified, promoted, or contributed to cultural, racial, or ethnic diversity in the law school.

The National Association of Women Lawyers Award is presented to a law student who contributes to the advancement of women in society and women in the legal profession and who also has attained high academic achievement.

The Erich D. Mathias Award for International Social Justice is presented to a student who has made an outstanding contribution or demonstrated commitment to attaining international social justice.

The John F. Murray Award recognizes the student with the highest academic standing in the graduating class.

The ALI-ABA Scholarship and Leadership Award is presented to a student who represents an outstanding combination of scholarship and leadership, the qualities embodied by the American Law Institute and the American Bar Association.

The Russell Goldman Award recognizes the student who has demonstrated the most improved academic performance after the first year.

The Iowa College of Law Appellate Advocacy Award is presented to a student for outstanding achievement in and service to the appellate advocacy program.

The Iowa Academy of Trial Lawyers Award is presented to a student for outstanding achievement in the Roy L. Stephenson Trial Advocacy Competition.

The International Academy of Trial Lawyers Award is presented to a student who has demonstrated distinction in trial advocacy skills.

The Michelle R. Bennett Client Representation Award recognizes outstanding service in the college’s clinical law programs.

The ABA/BNA Award for Excellence in the Study of Intellectual Property is presented to a student who has demonstrated excellence in the study of intellectual property law.

The American Bankruptcy Institute Medal for Excellence in Bankruptcy Studies is presented to a student who has demonstrated excellence in the field of bankruptcy.

The Joan Hueffner and Stephen Steinbrink Real Estate Law and Property Award is presented to a student who has demonstrated excellence and promise in the field of real estate law.
The Dillon Prize is presented to a student who has written an outstanding essay on legal history or on the intersection of law and another discipline.

Selection of Applicants

The college uses multiple criteria in evaluating applicants for admission. Part of the entering class is admitted under a “presumptive admit” process, in which the faculty admissions committee admits students primarily on the strength of their numbers, namely the cumulative undergraduate grade-point average and LSAT score. Before admission offers are made, each applicant’s complete file is reviewed to ensure that the overall record suggests the applicant’s suitability for admission, in keeping with the primary mission of the law school.

Although undergraduate academic record and performance on the LSAT are both important admission criteria, the college recognizes that in some circumstances they do not accurately reflect an applicant’s potential to succeed in the study of law, develop skills as a leader, enrich the learning environment of his or her fellow students, and serve the public interest as a lawyer.

To evaluate applicants’ total suitability for admission, the college has developed a “numbers-plus” admissions policy, under which part of each entering class is admitted. Under the “numbers-plus” policy, undergraduate record and LSAT scores are supplemented by nonquantifiable factors that may provide insight to an applicant’s overall potential for success in the study and practice of law.

For example, an applicant who can substantiate that his or her standardized test scores are not predictive of academic performance in law school may receive proportionately greater consideration from the committee for his or her grade-point average. Other factors the committee may consider include special academic or professional abilities not reflected in the grade-point average, disability or serious health factors that affected prior academic performance, extracurricular activities, exceptional school-year work commitments due to family financial circumstances, postbaccalaureate academic success (including graduate study), law-related employment experience, public service commitment, leadership in groups historically underrepresented in the legal profession, educational or socioeconomic disadvantage, native language other than English, unusual motivation or perseverance in overcoming obstacles to law study, and any other information the committee considers relevant to the applicant’s potential for law study.

Candidates who wish to bring such factors to the committee’s attention may do so by including

Admission

Undergraduate Education and Law School

Applicants for admission to The University of Iowa College of Law must complete all requirements for the baccalaureate degree before beginning law school.

Fulfillment of the basic requirements does not guarantee admission. The College of Law Admissions Committee selects applicants it deems best able to help the college fulfill its primary mission of providing a high quality legal education in a diverse and stimulating environment and preparing students to serve as leaders in their professional and civic communities. Preference is given to applicants who are residents of Iowa (approximately 55 percent of each entering class is drawn from Iowa residents).

The services that College of Law graduates are called upon to perform are so varied, and the possible fields of endeavor so broad and diverse, that the college prescribes no uniform undergraduate program for those planning to enter law school. With the assistance of faculty advisors, each student should develop an undergraduate program that explores and develops that student’s particular intellectual interests.

Iowa strongly endorses the three basic objectives recommended by a committee of the Association of American Law Schools: education for comprehension and expression in words; education for a critical understanding of the human institutions and values with which the law deals; and education for greater power in thinking. Anyone thinking of attending law school should keep these objectives in mind while planning an undergraduate course of study.

The association’s recommendations emphasize that undergraduate education of students for a full life through liberal education is far more important than education directed too pointedly toward later professional training and practice. Students are urged not to sacrifice broad perspective for detailed specialization.
addenda and other documentation with their applications.

**Entrance Dates**

Applicants may apply for either May or August admission, or both (with a preference indicated on the application). Admission to the May entering class does not guarantee admission to the August entering class, and vice versa. Students who enter in May have the opportunity to graduate in less than three years.

Applications for both entrance dates are accepted beginning September 1 of the year before admission, with an application deadline of March 1 in the year of admission. Because the college has a rolling admissions process, applicants are encouraged to submit their applications as soon as possible.

Each application must include an application fee, which is nonrefundable. Students from disadvantaged backgrounds who cannot afford the fee should apply for a waiver.

For additional information, contact the College of Law Office of Admissions and Financial Aid, c/o College of Law, The University of Iowa, Iowa City, IA 52242-1113. Applications are available online at http://www.law.uiowa.edu/admissions.

### Application Process

#### LSDAS Report and Transcripts

The University of Iowa College of Law participates in the Law School Data Assembly Service (LSDAS). Applicants must register for this service through the Law School Admission Council (LSAC); foreign-educated applicants are exempt from this requirement. Prospective law applicants find the information they need to complete their application for admission to the law school in the council's free, annual publication, *LSAT & LSDAS Information Book*, and on LSAC’s web site (http://www.lsac.org). It takes approximately three weeks from the time the College of Law requests the LSDAS report until it arrives.

Applicants whose fall course work does not appear on the Law School Data Assembly Service report should send an official transcript of that course work to the LSDAS.

Applicants are responsible for submitting an official transcript from each college or university they have attended to Law School Admission Council, Box 2000, Newtown, PA 18940-0998.

Each applicant’s undergraduate institution must forward the applicant’s class rank or the grade distribution for the applicant’s class to the College of Law, if such information is available. Information about class rank is helpful in the application process, but not required. Currently enrolled or former University of Iowa students need not provide this information.

Before classes begin, every applicant who accepts admission to the College of Law must file official transcripts showing conferral of degree with the University’s Office of Admissions.

#### Letters of Recommendation

The college requires applicants to submit at least one letter of recommendation. Recommendations from professors or others who can comment on the candidate’s critical thinking, writing skills, and potential for success in law school are particularly welcome. One letter of recommendation is required, but more than one is preferred. Applicants should not submit more than three letters of recommendation.

The college participates in the Letter of Recommendation Service offered by the Law School Admission Council. A letter of recommendation form can be downloaded at http://www.lsac.org. Recommenders should send letters of recommendation with the required forms, to Law School Admission Council, P.O. Box 8508, Newtown, PA 18940-8508.

#### Law School Admission Test

Applicants for admission must take the Law School Admission Test (LSAT). The test is given several times each year and may be taken at numerous locations in the United States and abroad. Test application forms may be obtained from the Law School Admission Council.

Applicants are urged to take the test no later than the fall preceding the fall semester or summer session for which they are applying. Applicants’ LSAT scores may not be available until approximately four weeks after their test date.

The February test date is the last one that the admissions committee can consider for applicants requesting admission the following summer or fall. Scores more than five years old are not accepted.

Applicants whose first language is not English also must take the Test of English as a Foreign Language (TOEFL) or the International English Testing System (IELTS) examination.
Deferrals
Admission is for the year of application; deferrals are granted only in extraordinary circumstances.

Deposit upon Acceptance
All applicants must make a nonrefundable deposit of $250 (U.S.). Summer entrants accepted before February 15 must submit the deposit by March 1; those accepted after February 15 have two weeks to submit the deposit. Fall entrants accepted before March 15 must submit the deposit by April 1; those accepted after March 15 have two weeks to submit the deposit.

Fall entrants must pay a second nonrefundable deposit of $150 (U.S.) by June 1.

For those who enroll, the deposit is credited toward tuition and fees. All accepted applicants, including recipients of scholarships, fellowships, and loans, are required to pay the deposit. Applicants who fail to make the deposit by the specified time forfeit their place in the entering class.

Financial Support
The College of Law administers its substantial financial aid program to advance the goals of its selective admission policy. Grants, scholarships, work-study funds, and loans are awarded on the basis of need or merit to provide access to legal education for the talented and diverse students admitted to the college. A number of part-time employment opportunities also are available to upper-level students.

Inquiries regarding financial aid should be directed either to the University’s Office of Student Financial Aid or to the College of Law Office of Financial Aid.

All financial aid information is subject to change without notice.

Application for Financial Aid
Eligibility for financial aid is based on need established by completion of the Free Application for Federal Student Aid (FAFSA) and the required supporting documents. The FAFSA should be completed online at www.fafsa.ed.gov after January 1 each year and should be completed as soon as possible thereafter, since some financial aid is subject to the availability of funds.

Although financial aid awards are not made until after applicants are admitted to the College of Law, applicants should not wait for the notice of admission before filing the FAFSA. Admitted students who provide the required documents are informed of their eligibility for financial aid on the award notification letter. Students must reapply for aid every year.

Applicants are urged to investigate other sources of aid. Public libraries, private and civic organizations, and the Internet are excellent sources for information about financial aid resources.

Scholarships, Fellowships

Merit-Based Support
All students admitted to the College of Law are considered for merit-based scholarships and fellowships based on their academic achievement. A separate application is not required. Recipients are notified by letter. Awards may range from $500 to full tuition with a research assistantship component in upper-level years.

Need-Based Scholarships
All admitted students who file a Free Application for Federal Student Aid (FAFSA) and required supporting documents are considered automatically for need-based scholarships. Recipients are notified by award letter. Awards may range from $500 to full tuition.

Iowa Law School Foundation Scholarships
The University of Iowa Law School Foundation Scholarships include scholarships based on need, merit, or a combination of need and merit. These scholarships are available to a limited number of students who meet the criteria established by the scholarship donors. All admitted students are considered for the merit-based scholarships, and all admitted students who file the FAFSA and required supporting documents are considered automatically for the need-based scholarships. A separate application is not required. Recipients are notified by award letter. Awards may range from $200 to full tuition.

Law Opportunity Fellowship
The College of Law is committed to affording opportunity for a legal career to persons historically underrepresented in the legal profession. The Law Opportunity Fellowship Program was established by the University to...
provide access to law school for students from groups and backgrounds historically underrepresented within the academic community. Among criteria considered in awarding the fellowships are educationally and/or socioeconomically disadvantaged backgrounds, existing educational debt load, leadership potential, academic merit, and importance of the fellowship award to the student’s financial ability to attend law school.

The Law Opportunity Fellowship may provide up to full tuition for three years and the opportunity to hold a research assistant position for the second and third years. All admitted students who file the FAFSA and required supporting documents are considered for the Law Opportunity Fellowship. A separate application is not required. Recipients are notified by award letter.

**Employment**

The College of Law does not employ students during their first year of law school, due to the intensive course schedule. In no event may a full-time student work more than 20 hours per week.

**Research Assistant Positions**

Research assistant positions are available with many faculty members for second- and third-year students. Students classified as nonresidents who hold quarter-time research assistantships (10 hours per week) automatically qualify for resident tuition status during the semester(s) in which they serve as research assistants.

**UI Part-Time Employment**

The University offers a variety of part-time employment positions for students. Students do not need to apply for financial aid in order to work in these positions. Information about part-time employment is available from the University’s Office of Student Financial Aid.

**College Work-Study**

Federal College Work-Study is a need-based employment opportunity for a limited number of students in their second and/or third year at the law college. College Work-Study may reduce the student’s William D. Ford Federal Direct Loan eligibility. Students must demonstrate financial eligibility for work-study through the FAFSA and its required documents.

**Loans**

All admitted students who file the FAFSA and required supporting documents are considered for the University of Iowa Law Foundation Loan, the Federal Perkins Loan, and the William D. Ford Federal Direct Loans.

**Iowa Law School Foundation Loan, Federal Perkins Loan**

These are low-interest loans based on exceptional financial need. Interest does not accrue and payments are not required until the student is no longer enrolled at least half-time in school.

**Federal Direct Ford/Stafford Loans and Federal Graduate/Professional PLUS Loans**

The Federal Direct Ford/Stafford Loans (subsidized and unsubsidized) and the Federal Graduate/Professional PLUS Loans are funded by the federal government. The three loan programs have different interest rates and interest subsidies based on eligibility as determined by the FAFSA and other required documents, and based on the annual maximum loan amounts. Interest on the Unsubsidized Direct Stafford Loan and the Graduate/Professional PLUS Loan accrues while a student is in school, but principal and interest payments may be deferred while a student is in school. Eligibility for the Graduate/Professional PLUS Loan also includes a determination that the applicant does not have an adverse credit history.

**Academic Policies and Procedures**

**Transfer Credit**

No more than 30 s.h. may be transferred to Iowa from another law school. To qualify for transfer credit, courses must have been completed at a law school accredited by the American Bar Association. Grades received at another law school are not counted in calculating the cumulative grade-point average.

**Courses Taken Before Admission to the College of Law**

Students may not count toward the J.D. credit earned in courses they took before matriculation at the College of Law, with the exception of transfer students from other law schools.
Courses Taken Outside the College of Law

Students who take courses outside the College of Law must first obtain permission from the associate dean. If “special permission of the instructor required” is indicated on ISIS (Iowa Student Information Services web site), the student also must obtain the instructor’s signature.

Students not enrolled in a joint degree program may apply toward the J.D. a maximum of 6 s.h. earned in courses outside the College of Law. Such courses are approved only if they contribute directly to the professional competence of an attorney or broaden the student’s understanding of law, the legal process, or any particular legal subject. More information about limitations on accreditation of non-College of Law courses is available from the associate dean.

Courses Taken at Another Law School After Enrollment at Iowa

With the permission of the dean, enrolled students may receive credit for courses taken and passed at other law schools accredited by the American Bar Association, up to a maximum of 30 s.h. Grades of C and higher are reflected on the student’s transcript as credit for the designated semester hours. Grades of D are reflected as 1.80-2.00 on the Iowa transcript.

Externships

Students may be able to arrange externships for academic credit with certain nonprofit organizations and government agencies. Most externships are established for the summer, for a maximum of 6 s.h. of credit. Externships also may be arranged for the fall or spring semester. All students who participate in externships must write a research paper. Externship credit counts toward the maximum allowable clinic credit.

Students have arranged recent externships with the U.S. Department of Justice, the Small Business Administration, U.S. district court judges, bankruptcy judges, and the American Civil Liberties Union, among others.

Grading Policy

The College of Law has adopted a numbering system for grading, effective for students who entered the college in May 2004 and later.

A numerical grade is assigned to each student in each course, except as otherwise provided (e.g., for courses graded pass/fail, for courses that continue the following term, for grades of incomplete). Grades are recorded in the University’s permanent record.

The highest grade awarded at the College of Law is 4.30, the lowest 1.50. No academic credit is given for grades below 1.80 or for grades of “fail.”

Numerical grades may be translated into a letter grade as follows.

- 4.30-4.20 = A+
- 4.10-3.90 = A
- 3.80-3.60 = A-
- 3.50-3.30 = B+
- 3.20-3.00 = B
- 2.90-2.70 = B-
- 2.60-2.40 = C
- 2.30-2.10 = C-
- 2.00-1.80 = D
- 1.70-1.50 = F

Professors may disenroll students for cause or reduce grades for inappropriate academic conduct, for example, plagiarism. Such measures are subject to appropriate due process.

With the dean’s permission, a student may retake a course in which he or she has received a failing grade. The second grade is recorded either as pass—a grade of 2.10 or higher—or fail and is not used in computing the student’s cumulative grade-point average. Rather, the first grade received for the course remains on the transcript and is used in computing the grade-point average.

If the course being retaken is sectioned, the dean designates the section to which the student will be assigned.

The faculty has adopted a mandatory grade curve for all courses.

Pass/Fail Grades

Credit for certain courses is offered only on a pass/fail basis. In the case of a failing academic performance in a pass/fail course, the faculty supervisor or instructor may assign a failing numerical grade, i.e., between 1.70 and 1.50. Individual faculty members may allow students to withdraw from a course rather than receive a failing grade.

Miscellaneous Grading Marks

Marks other than pass, fail, and numerical grades are as follows.

R means registered. It indicates that a student has completed the first half of a year-long program,
such as a seminar or journal, for which a grade cannot be assigned until the second half of the program has been completed.

W means withdrawn. It carries no course or residency credit and is not used in computing the cumulative grade-point average.

I means incomplete. It carries no course credit toward a degree until it is changed, nor is it used in computing the cumulative grade-point average. A mark of I may be reported only in exceptional cases and only if the unfinished part of the work is small and is unfinished for reasons acceptable to the instructor, and if the student's standing in the course is satisfactory. Students remove an incomplete by completing the unfinished work during their next period of residence.

Class Ranking

Students in the top 10 percent in each class may be informed of their exact rank; grade-point averages at the 87.5 percentile and 62.5 percentile are posted.

Students are ranked following the fall semester, spring semester, and summer session each year. Final class standing is determined each August and is available in September. It includes students who completed all graduation requirements in August, May, and the previous December. For purposes of ranking underclass students, the same system is used, based on the expected graduation date.

Release of Transcripts

A student's grades are not given to persons outside the College of Law, including prospective employers, without written permission of the student.

Class Attendance and Preparation

Students must be regular and punctual in attending classes and must be prepared to participate in class discussions. Students may be dropped from a course or failed, at the discretion of the instructor, for excessive absence or repeated lack of preparation. Students also are expected to attend special class meetings and be punctual in submitting course assignments, memos, and papers.

Examination Policy

One examination is given in each course, with few exceptions. Before taking an exam, each student is assigned an identification number for that exam. Instructors report final exam grades by each student's number to the dean's office, where the grades are kept on file for two years. After the grades are recorded, the dean's office gives the names corresponding to the students' numbers to the instructor, who then assigns final grades for the course. This permits the instructor to award credit for class participation and ensures anonymity in exam grading. Students and the Office of the Registrar receive only the final grades.

Students are offered the option of taking some exams on their personal laptops. Each course's instructor determines whether this option is available for his or her specific course.

Students who have more than one examination scheduled for the same day, two exams within 24 hours, or exams four days in a row may schedule a make-up time for one of the exams. Students who have exams three days in a row may reschedule one only with permission of the instructor.

Students usually reschedule exams on the Saturday morning immediately following the regularly scheduled exam. Whenever possible, the dean sets aside one to three days as an upperclass study period between the end of regular classes and the first regularly scheduled upperclass exam.

Extra Exam Time for Students Whose First Language Is Not English

Students who are at a substantial disadvantage in taking a timed exam because their first language is not English may receive additional time to complete the exam, commensurate with the extent of their disadvantage.

Students seeking additional time must make a written request in the dean's office by the deadline announced for the semester in which the exam is to be taken. An undergraduate degree from an English-speaking college or university is considered prima facie evidence that the student is not qualified for extra time.

Accommodations for Students with Disabilities

A physical or mental disability may put a law student at a substantial disadvantage in taking an examination. For purposes of the college's policy on exam accommodations for students with disabilities, a student with a disability is one who has a physical or mental impairment that
substantially limits one or more of the student's major life activities. Commensurate with the nature and extent of the disadvantage, the College of Law makes reasonable accommodations in exam conditions for students, while respecting faculty members' discretion to decide how to test the substantive knowledge and analytical skills essential to the course or the legal profession and preserving the fairness of exams for students without disabilities. Students who believe they may be entitled to exam accommodations are encouraged to consult with the associate dean as soon as possible after entering law school, even if they have not yet decided whether to request an exam accommodation. Whenever possible, instructors do not learn the identity of a student who requests or receives exam or instructional program accommodations.

In addition to exam accommodations, the college is committed to providing reasonable accommodations for students with disabilities for all instructional, cocurricular, and extracurricular activities it sponsors.

**Drop/Add Policy**

Students may add or drop a regularly scheduled course or seminar during the first two weeks it meets. Starting with the first day of class, students must have written consent of the instructor to add or drop a course.

A student may not drop a course once the final examination in the course has been distributed to the student. Individual instructors may set a policy of not permitting drops past a certain time limit, except in hardship cases; they are encouraged to distribute written notices of their policies during the first week of class.

A student who, after two weeks, drops an elective course for reasons not related to hardship may not reenroll in the course in a later semester without the instructor's permission.

Students who wish to drop the advanced appellate advocacy programs without showing cause may do so prior to the distribution of the problem and the finalization of participants in their rounds. After the problem has been distributed, only the faculty advisor may authorize a drop and then only upon show of cause.

**Withdrawal**

First-year students who withdraw during the academic year or who fail to reenroll for the second semester are not eligible to return to school. Instead, they must compete with other applicants for the year in which they wish to return. The reason for the withdrawal and the quality of work done prior to withdrawal or failure to reenroll are considered when students reapply.

Unless granted a leave of absence by the dean, second- and third-year students who fail to enroll for any semester during the academic year must obtain permission from the admissions committee if they wish to reenroll. (Students are considered first-year if they have fewer than 27 s.h. of credit at the time of withdrawal or failure to enroll.)

The associate dean may grant a second- or third-year student a leave of absence for up to one year, if the student shows good cause.

Students who withdraw from the College of Law after paying tuition are entitled to a pro rata refund.

**Audit**

Students may audit a class with the instructor's permission, provided the class is not filled within the preregistration period.

**Student Conduct**

Students are expected to act in a manner appropriate at a professional school. An act or omission that is dishonest or designed to take unfair advantage may subject a student to sanctions as serious as expulsion from school. Misconduct policies and procedures are published annually in the college's Student Handbook.

**Academic Advising**

The Associate dean for academic affairs works with the dean on academic programs and issues of the law school.

The Associate dean for student affairs provides academic advice and counseling to students; advocates for student concerns; offers information and makes referrals for students with professional, personal, or family problems; facilitates operation of the student discipline system; and arranges reasonable accommodations for disabled students. The associate dean also advises law students pursuing combined degrees in University of Iowa graduate programs and serves as the liaison with those programs.

Each faculty advisor advises five or six students on course selection, academic matters, and when necessary, other concerns.
Small section instructors advise students enrolled in their small sections during students’ first year of study.

Each year one or two tenured faculty members are selected by the Iowa Student Bar Association to serve as College of Law ombudspersons. Students who have a problem or grievance should seek an ombudsperson's help. All complaints are handled in strict confidence.

The College of Law registrar is in charge of student record keeping and should be students’ first recourse for information about course enrollment, scheduling, residence requirements, combined program status, student certification for various loan agencies and state bar applications, and progress toward graduation.

The Student Services Committee oversees coordination and periodic review of how the college provides academic and curricular counseling to law students. The committee reviews and coordinates the college’s efforts to provide information, offer services and programs, and make referrals regarding its students’ mental and emotional health. The committee has oversight for assignment of faculty academic advisors to law students, for matters of faculty/student collegiality, and for the Academic Achievement Program.

Resources

Iowa Law Library

The centerpiece of the Boyd Law Building is the University of Iowa Law Library, which occupies space on four floors and is one of the major repositories of legal materials in the United States.

Iowa’s collection currently is ranked second in the number of volumes and volume equivalents, and third in the number of titles among all U.S. law school libraries. It contains more than 1 million volumes and volume equivalents and covers a full range of Anglo-American, foreign, international, and comparative law. The library contains in-depth collections on law of the United States and of every state and territory. Its collection of early English legal source materials and its holdings of state documents are extensive. Since 1968 the library has been a selective Federal Documents Depository. An open-stack policy makes the collection accessible to all patrons, and a full staff of professional librarians serves students, faculty members, and other users.

The WESTLAW and LEXIS/NEXIS computerized information retrieval systems are available for training and research activities. Several CD-ROM and online data retrieval systems are available on workstations open to the public.

The entire collection of the law library is cataloged on the InfoHawk database, including the collection of U.S. government documents. The InfoHawk system also features an automated circulation system for checking materials out of the library.

The library uses both OCLC (Online Computer Library Center) and RLG (Research Libraries Group) for online cataloging, catalog card production, and interlibrary loans. OCLC's database contains the collections of most of the public and state historical libraries throughout the United States. RLG’s database includes the major research collections in the country and abroad.

Writing Resource Center

The Writing Resource Center is dedicated to strengthening law students’ command of writing skills central to the study and practice of law. The first writing center in the country established specifically for a law school community, the Writing Resource Center serves as an extension of the classroom and supplements the college’s first-year legal writing, analysis, and research program.

Members of the Writing Resource Center staff help law students with a broad range of writing, including class assignments, seminar papers, law journal articles, and symposium presentations. They also assist students with résumés, application letters, and writing samples.

In addition to helping students with general writing skills in one-on-one tutorial sessions, the center’s staff members train editors in editing skills, set up individualized programs of study, offer grammar and style workshops, and provide strategies for overcoming writer’s block and adapting material for various audiences.

The Writing Resource Center is staffed by writers, including second- and third-year law students, lawyers, and a director who holds a Ph.D. degree in the area of writing instruction.

Career Services Office

The College of Law Career Services Office provides career planning and job search assistance to law students. Each year the office sponsors a comprehensive series of programs on
career options and job search skills. It also maintains a library of resources and provides individual advising by professional staff. Job search assistance also is available to alumni.

The special rigor that characterizes Iowa’s distinctive brand of legal education attracts a wide variety and growing number of recruiters to campus each year. During a typical academic year, more than 200 employers send representatives to Iowa City to conduct job interviews, and many more firms use the college’s Career Services Office to search for prospective employees through written inquiries and off-campus interviews.

Iowa graduates traditionally have had excellent success in finding employment; usually, more than 98 percent are employed within a few months of graduation. The career services staff is happy to talk with prospective students regarding the college’s programs and the success of its graduates.

Research Centers

Research centers and outreach programs are an important part of the College of Law’s service to professional and civic communities. The College was home to the nation’s first Agricultural Law Center. Since that center’s closing, several new centers and institutes have been founded in diverse fields such as child and maternal health care, disability law and policy, human rights law, not-for-profit entities, public affairs, and public international finance. Located in and around the Boyd Law Building, these programs enjoy increasing national and international recognition for their specialized research projects and service activities. Several have enjoyed success in attracting competitive grants from state, federal, and private sources.

Link to the individual programs’ web sites via the college’s Research Centers web page (http://www.law.uiowa.edu/research/index.php).

Center for Human Rights

The University of Iowa Center for Human Rights was founded in 1999 as an outgrowth of the University’s year-long commemoration celebrating the 50th anniversary of the Universal Declaration of Human Rights. The center’s mission is to promote and protect human rights at home and abroad by providing distinguished multidisciplinary leadership in human rights research, education, and public service. Its focus includes all categories of human rights, from first-generation civil and political rights, to second-generation economic, social, and cultural rights, to third-generation solidarity or community rights.

Center for International Finance and Development

The University of Iowa Center for International Finance and Development is a project to help laypersons understand the often impenetrable world of international finance and development. The center’s web site features a 300-page e-book, written by a University of Iowa law professor and a group of his students, that explains the complex world of international finance and development in plain language. It also offers related news, issues discussions, briefing papers, frequently asked questions, and links to other useful sites.

Institute of Public Affairs

The Institute of Public Affairs provides services and information to help officials maintain and strengthen the effectiveness of Iowa’s state and local governments. The institute offers strategic planning for councils and boards, including facilitation and guidance for policy leadership groups. It provides training for newly elected mayors and city council members through a municipal leadership academy, and it publishes the Municipal Policy Leaders’ handbook for mayors and council members. It also holds the Iowa Municipal Management Institute for city and county administrators.

Larned A. Waterman Iowa Nonprofit Resource Center

The Larned A. Waterman Iowa Nonprofit Resource Center was created in 2000 to help nonprofit organizations throughout Iowa. The interdisciplinary center works to increase accessibility to educational and service programs focused on strengthening nonprofit organizations. It collaborates with government agencies, nonprofit organizations, and educational institutions. It also introduces students to the nonprofit sector and develops their sense of public and community service.

Law, Health Policy & Disability Center

The Law, Health Policy & Disability Center is an emerging leader in law, technology, education, and research. Its aim is to improve quality of life for persons living with disabilities. Based at the
University of Iowa College of Law, with offices in Washington, D.C., and elsewhere, the center concentrates on public policy and its impact on persons with disabilities, with emphasis on employment, self-determination, and self-sufficiency.

**National Health Law and Policy Resource Center**

The National Health Law and Policy Resource Center promotes laws and public policies that foster and facilitate accessible, affordable, high-quality health care for all Americans, particularly members of vulnerable and disadvantaged populations. It provides a nonpartisan forum for informed dialogue on health law and policy issues, based on the best available data and information, between academics, practitioners, and public policy makers.

**Facilities**

The Willard L. Boyd Law Building exemplifies Iowa’s continuing commitment to legal education and the legal profession. The large, circular structure reflects the special character of the Iowa law school and allows the college to operate in a physical environment in which every square foot of space is designed to promote the college’s academic and professional programs.

Classrooms in the Boyd Law Building provide an atmosphere conducive to the college’s goals. They are air conditioned, carpeted, and properly lit. Small seminar rooms, the clinic suite, and special-purpose learning areas are distributed throughout the building to permit students and faculty members to work together in close professional interaction. The largest classroom seats only 100 people. The student lounge, faculty lounge, and faculty offices are located on the same floor, encouraging interaction between students and faculty members.

**Student Services**

**Bookstore**

The College of Law has its own bookstore, which carries all assigned texts and materials for law classes. It also stocks a variety of professionally prepared outlines, hornbooks, and other study aids, as well as a limited selection of school supplies, including pens, notebook paper, binders, USB flashdrives, computer disks, exam software, stamps, and change.

Photocopied handouts and teaching materials assigned by course instructors are available through the bookstore.

Students may charge costs for books, class materials, and supplies directly to their University accounts. The bookstore does not accept credit cards.

**Computers and Word Processing**

Since electronic information technologies are vital in legal and business work, the College of Law encourages all law students to become proficient with computers. Access to word processing software also helps law students draft the many papers, articles, and other manuscripts that are a regular part of the law curriculum. The college has installed 41 personal computers attached to a local area network for use by its students. Students also are encouraged to purchase computers, if possible, and to use them in connection with their law school work.

The law college provides network and Internet access from all student library carrels. To participate, law students supply their own laptop computers, which must meet required specifications. Specifications are available from the Law Library computer support office.

Wireless Internet access is available in the Law Library, the fourth-floor student lounge, journal offices, and other areas of the law building.

The college’s computers are loaded with WordPerfect and Microsoft Word software and the college provides training for and access to the two major online computer research databases, West Publishing Company’s WESTLAW and Mead Data’s LEXIS. Once students complete the training, they have unlimited free access to these services at home via their own PCs and on the student and public workstations in the Law Library.

The Law Library also provides CD-ROM workstations that allow access to databases in CD-ROM formats. Some of the titles available are United Nations documents, complete from 1945; Index to Legal Periodicals; TIARA, a database containing treaties; and numerous U.S. government documents published on CD-ROM.

The University provides free e-mail accounts to its students, faculty, and staff through its Information Technology Services office (ITS). Students can sign up for e-mail accounts online or at the ITS offices in south Lindquist Center.

ITS advises University of Iowa students, faculty, and staff on computer hardware and software
needs and can provide information about educational discounts on some purchases. ITS also offers a wide variety of free computer short courses throughout the year. For information on computing resources at the University, consult Computing on the University of Iowa home page (http://www.uiowa.edu).

Copy Services

Copy machines are available on each floor of the law library. Students with a copy card can use any of the machines. Cards are available for purchase from the library’s circulation desk. Students also may use networked printers in the library and charge them to their University accounts.

For better quality and/or high-volume copying, there is a University-operated copy service on the first floor of the Boyd Law Building. Prices are comparable with those at commercial concerns, and students may charge copying to their University bills.

Student Activities and Organizations

Link to the student organizations' web sites via the college's Journals & Organizations web page (http://www.law.uiowa.edu/journals-orgs/index.php).

The American Constitution Society (ACS) is a new nonpartisan organization whose goal is to foster discussion of important issues of law and policy.

The Asian American Law Students Association (AALSA) seeks to instill greater awareness among law students of the needs of the Asian American community, and to encourage a greater commitment toward meeting those needs.

The Iowa chapter of the Black Law Students Association (BLSA) focuses on the relationship of black attorneys to the American legal structure and works to foster an attitude of professional competence. BLSA strives to promote the needs and goals of black law students, instill a greater awareness among law students of the needs of the black community, and encourage a greater commitment toward meeting those needs. The chapter seeks involvement in the local community and in recruitment programs. Membership is open to all students who support the association’s goals.

The Christian Legal Society maintains a Christian law fellowship at the College of Law whose mission is to enable its members to love their Lord and to love their neighbors as themselves.

The college’s Equal Justice Foundation (EJF), a chapter of the national foundation, supports public interest law concerns, with emphasis on promoting equal access and adequate representation in the courts and other forums for citizens and citizens' groups. The UI chapter's professional activities are aligned with those of the national organization. They include work in varied legal activities statewide; College of Law activities, including coordination with other student organizations to provide the college with a better public interest support base; promotion of public interest career opportunities; and provision of information about public interest activities and concerns. Membership is open to all College of Law students.

The Environmental Law Society provides an educational forum for environmental law topics. During spring semester, the organization sponsors a lecture series featuring professors and experts in environmental law. The group also provides limited legal research and counseling services for attorneys, organizations, and citizens who have questions concerning environmental law. Membership is open to all College of Law students.

The Federalist Society fosters critical thought and debate about the application of conservative and libertarian principles to the law. Its mission is to promote, advocate, and defend its founding principles and further their application through its activities, which are aimed at reordering the legal system’s priorities to place a premium on individual liberty and the rule of law, and restoring recognition of those principles among law students, faculty members, lawyers, and judges.

The Intellectual Property Law Society (IPLS) promotes exploration of traditional areas of intellectual property law (patent, trademark, copyright) and related areas such as antitrust and entertainment law. The society provides a forum for faculty and student discussion of contemporary issues relating to intellectual property law and its practice; fosters interaction between law students and intellectual property law practitioners through a mentor program that pairs members with intellectual property law practitioners; and offers symposia. All members of the University community are welcome to attend a Society meeting or symposium.
The Iowa Law Student Animal Legal Defense Fund (SALDF) is dedicated to providing a forum for education, advocacy, and scholarship aimed at protecting the lives and advancing the interests of animals through the legal system, and to raising the profile of the field of animal law. The organization has three goals: to educate the College of Law community about forms of institutionalized animal abuse, to foster awareness of litigation as a means to combat this abuse, and to provide opportunities for students to work with attorneys on litigation projects aimed at protecting animals' lives and interests.

The International Law Society aims to increase student and faculty awareness of international law and related issues. The society’s brown bag lunch lecture series and annual spring conference expose students and faculty to a wide variety of contemporary legal issues surrounding the study and practice of international law. Members also work to support the activities of the University of Iowa Center for Human Rights; promote the Iowa-Arcachon, France, summer program in comparative and international law; participate in the annual Philip C. Jessup International Moot Court Competition; and bring together faculty members and students who share an interest in international affairs.

The Iowa Campaign for Human Rights (ICHR) promotes human rights awareness and education at the College of Law, among University of Iowa students, and across the Iowa City community.

The Iowa Human Trafficking Awareness Project educates the public about human trafficking and human rights abuses inherent to the practice. The organization also lobbies for the creation of state and local laws that criminalize the act of human trafficking and advocates for the rights of human trafficking victims locally and globally.

The Iowa Student Bar Association (ISBA) acts as the College of Law’s student government. Governed by an executive council, the association provides a collective voice for the student body and a source of organization and funding for a variety of college activities and programs. Law students may get involved with the association by serving as class representatives or on faculty-student committees, which deal with admissions, curriculum, financial aid, placement, and so forth. The association presents speakers, sponsors events with other organizations, publishes a newsletter, and sponsors social events. Its legal guardian program assigns entering law students to upperclass students, who provide encouragement and information.

The J. Reuben Clark Law Society emphasizes three basic values and attitudes toward the practice of law and the place of law in modern society: public service, loyalty to the rule of the law and the Constitution of the United States, and appreciation for the religious dimension in American society and in lawyers’ personal lives.

The Latino/a Law Student Association (LLSA) promotes viable changes within existing legal institutions in order to develop constructive legal and community programs, produce competent and effective Latino and Latina attorneys, and utilize available resources—activities necessary to safeguard and advance the rights and opportunities of oppressed peoples. To achieve these goals, LLSA recruits for the law school. LLSA’s philosophy is that national unity is fundamental for the collective awareness needed to bring about progressive policies in legal education. The association welcomes all students.

Law Students for Choice is committed to increasing education and professional training in reproductive rights law. The society supports Iowa law student activism, advocacy, and networking in order to ensure that new lawyers can successfully defend and expand family planning rights and reproductive freedoms.

The Native American Law Students Association (NALSA) promotes awareness of legal, political, cultural, and social issues that affect Native Americans, Alaskan Natives, Native Hawaiians, and other indigenous peoples. NALSA also seeks to promote the study of federal Indian law and provides a forum for the exploration of issues in tribal sovereignty, natural resources, family law, trust obligations, and cultural identity.

The National Lawyers Guild (NLG) is dedicated to the use of law as a means to promote progressive social change. Iowa’s student chapter sponsors discussion panels on topics such as South African divestment and has cosponsored events with other student organizations. It also invites faculty members to speak in the college’s student lounge on topics ranging from the political aspects of selecting Supreme Court justices to employment discrimination. Membership in the Iowa chapter is open to all College of Law students. Membership in the national organization is optional.

The National Security and Law Society (NSLS) works to foster interest in and understanding of programs that address issues in national security and law. NSLS helps members who are pursuing careers in related fields and
contributes to the development of national security law.

The Organization for Women Law Students and Staff (OWLSS) aims to address the changing needs and problems of women in the legal profession and to develop, recommend, and implement new programs, especially those that meet the needs of women at the College of Law. It also sponsors programs of interest to the general law school community. OWLSS has sponsored fall recruitment of prospective women law students, a safety-in-numbers program, brown bag lunches with guest speakers, sponsorship of members to the annual National Women and the Law Conference, a support network, a regular newsletter, and joint programs with women student groups in medicine and dentistry. Membership is open to all College of Law students, faculty members, and staff members.

The Outlaws provides a common forum for gay, lesbian, bisexual, and transgendered persons interested in the law, and promotes a climate of mutual support, protection, and professional advancement. Membership is open to all College of Law students and faculty members.

Founded in 1902, Phi Alpha Delta (PADS) is the nation’s oldest and largest law fraternity. It was the first law fraternity to remove membership restrictions based on race, color, creed, national origin, and grade-point average. Iowa’s Hammond Chapter was established in 1908 and became the first PADS chapter to accept students of all races and religions. It participates in fund-raisers and other service projects to benefit local and national service organizations. Membership is open to all College of Law students.

The Pro Bono Society exists to reinforce the value of public service and volunteerism in the legal profession. Membership in the Pro Bono Society is earned through objectively measured activities during the academic year. Iowa law students who complete and report 15 hours of voluntary public service in each of two consecutive semesters are considered for membership. Time donated to a charitable or public service cause, which may be law-related or not, is considered voluntary public service; the requirement is interpreted broadly, so that students may volunteer in an area of interest to them. Members receive a certificate of membership and are invited to attend the annual recognition dinner. The society is a project of the Iowa Student Bar Association.

Activities

Parents and Partners Day

Each fall, the parents, spouses, and friends of all students are invited to the campus for activities sponsored by the Iowa Student Bar Association and the Iowa Law School Foundation. Past activities have included a simulated class, a brunch, a musical or auction, and a tour of the college. The weekend is a good opportunity for families and friends to see what the life of a law student is really like.

Supreme Court Day

The College of Law hosts the Iowa Supreme Court on The University of Iowa campus each fall. Third-year students present oral arguments in a moot case to the court, and faculty members host receptions at their homes for the justices, attorneys, and students, providing an opportunity for informal visits with members of the court.

Iowa Advocate

Iowa Advocate, the law school’s alumni magazine, is published twice a year. It features articles and news about the college and its alumni, faculty, and students.

Iowa Law School Foundation

During the three years that students spend at the College of Law, many of the classes, programs, and projects in which they participate are partially or totally supported by private gifts from law alumni and friends.

The Iowa Law School Foundation was created by the 1952 graduating class to promote close relations between the college and its alumni and to solicit gifts for scholarships, faculty support, and other projects that benefit the college.

Foundation funding benefits student scholarships, loans, and research assistantships; guest speakers; student orientation activities; the clinical law programs; Moot Court, Trial Advocacy, and Client Counseling programs; the student-edited law journals, and Iowa Advocate.

In order to support these programs and activities, the Iowa Law School Foundation actively solicits contributions from the college’s approximately 9,000 alumni.
Legal Aid

Students in need of legal assistance may consider turning to the University's Student Legal Services. The Legal Services Corporation of Iowa also provides civil representation to indigent clients.

Courses

The following list includes all approved College of Law courses. The college does not offer each course every year. For information on current course offerings, consult the College of Law registrar. The College of Law Guide to Courses contains a list of courses that have been offered within the past two academic years. It also lists courses the college expects to offer during the next academic year.

First Year

091:102 Introduction to Law and Legal Reasoning 1 s.h.
Basic concepts and intellectual skills necessary for understanding the first-year curriculum.

091:104 Civil Procedure 4 s.h.
Procedure before trial; commencement of a suit; subject matter jurisdiction; jurisdiction over the person and venue; pleadings, motion practice, including summary judgment, simple joinder of parties and claims in determining scope and size of the lawsuit; pretrial discovery procedures, the trial, claim and issue preclusion.

091:116 Constitutional Law I 3 s.h.
Constitutional allocation of governmental powers; doctrine of judicial review and nature of judicial function in constitutional cases; relationships among branches of national government; the federal system, including powers delegated to national government, powers reserved to states, and intergovernmental immunities; relationship between state and national governments.

091:112 Contracts and Sales Transactions 4 s.h.
Law that governs the otherwise unregulated sector of the economy; making and enforcement of promises, usually as part of a bargain; formation of agreements, consideration, invalidating causes, parole evidence and interpretation, conditions, and remedies; roles of promises and promissory exchanges in a modern economy; the law's limitations on freedom of contract; introduction to Uniform Commercial Code, Article 2.

091:124 Criminal Law 3 s.h.
Basic understanding of substantive criminal law; underlying premises of and justifications for criminal law; emphasis on general doctrines that dictate the minimum elements necessary to impose criminal liability, essential requirements of culpable conduct (an actus reus, or guilty act), blameworthy mental state (a mens rea or guilty mind); rape, homicide, causation, attempt, conspiracy, accomplice liability; various defenses to criminality, such as self-defense, duress, intoxication, insanity, diminished capacity.

091:130 Legal Analysis, Writing, and Research I 2 s.h.
Structured development of effective skills in legal analysis, writing, and research; first of a two-semester sequence.

091:131 Legal Analysis, Writing, and Research II 2 s.h.
Structured development of effective skills in legal analysis, writing, and research; second of a two-semester sequence.

091:132 Property 4 s.h.
Concept of private property as one of the legal system's basic foundations; historical development of Anglo-American property law examined in conjunction with changing currents of economic, social, and political thought; emphasis on understanding decision making by courts in the common-law tradition, and its interplay with legislative enactments intended to change common law; fundamental notions relating to the origins of property rights; relationship of possession and ownership, with emphasis on capacity of property law to recognize a wide range of interest configurations; impetus for promoting ease and reliability in conveyance of property interests, commercially and gratuitously; function of land title system in providing stability to transfers of interest in land; role of adverse possession and prescriptive use in curing defective titles and recognizing expectations based on long-standing property relationships; responsiveness of property law to social change as illustrated by modern reforms in landlord-tenant act.

091:364 Torts 4 s.h.
Development of tort principles; civil responsibility for harms to tangible personal and property interests; roles of legislatures, judges, juries; intentional harms, negligence, and strict liability from perspectives of jurisprudence, economics, and moral philosophy.

Second and Third Year

091:125 Criminal Procedure: Investigation 3-4 s.h.
Guarantees and rights of the Fourth, Fifth, and Sixth Amendments to the U.S. Constitution against police and prosecutorial practices designed to investigate and prove criminal cases; protection against unreasonable searches and seizures, guarantee against extraction of involuntary confessions, privilege against self-incrimination constraints upon securing confessions (i.e., Miranda doctrine), due process protection against unreliable suggestive identification procedures, right to counsel, protection against inculpatory admissions and identification practices; exclusionary rules and remedies that enforce guarantees and rights.

091:136 Property II 3 s.h.
Continuation of 091:132; limitations imposed on landowner's use of their property by private agreements, judicial actions, and public regulations; problem areas including restrictive and affirmative covenants, nuisance, eminent domain, constitutional limitations on governmental activities adversely affecting private property, zoning, other forms of local land use control; relative effectiveness of private ordering, judicial decisions, legislative enactments and administrative processes for resolving conflicts over use of land resources; relationships between law and other disciplines, particularly economics in forging solutions to land use issues; law's utility as an instrument for achieving societal objectives regarding land use.

091:192 Art, Law, and Ethics 3 s.h.
How law and ethics apply to the individuals and institutions concerned with the visual arts; historical focus; issues from 18th century to present; how to evaluate the ways in which law and ethics support and constrain the visual arts; development of vocabulary critical for recognizing and evaluating legal and ethical issues in the visual arts. Same as 011:182, 024:161, 033:175.

091:193 Human Rights in the World Community 1-3 s.h.
Human rights, their moral and legal basis, their promotion and protection through governments and international organizations; comparative and international analysis of equality and nondiscrimination; human rights issues that confront the contemporary world; how the world community enforces human rights at global, regional, and national levels and in the private sector.

091:195 Introduction to Public International Law 1-3 s.h.
Principles of law that determine rights and duties of nations in their dealings with each other, with focus on interests in the
Coercive state intervention through the juvenile justice and child welfare systems to protect children from maltreatment by parents and other caretakers; definitions of child abuse and neglect, reporting laws, civil child abuse and neglect proceedings, foster care and out-of-home placement of children, termination of parental rights, role of attorneys and guardians ad litem in child abuse and neglect proceedings.

091:198 Advanced Legal Research 2 s.h.
American legal resources, in-depth; nonlegal information sources; introduction to research resources of other legal jurisdictions and international law.

091:200 Agricultural Law 1 s.h.
Topics in agricultural law and policy, such as legal efforts to control the structure of agriculture (including payment limitations and legal restrictions on farm land ownership), agricultural cooperatives, commodity promotion boards, government price and income support programs, soil and water conservation regulations, control over location and operation of animal confinement facilities, mechanisms for regulating food sources and safety.

091:201 American Legal History 3 s.h.

091:202 Advanced Civil Procedure 3 s.h.
Complex civil litigation, personal and subject matter jurisdiction, discovery, intervention, mandatory joinder, interpleader, class actions, appellate jurisdiction, class actions.

091:203 Income Taxation of Estates and Trusts 2-3 s.h.
Income tax basis of property acquired by gift or devise, part-gift/part-sale transactions, income and deductions in respect of a decedent, allocation of receipts and expenditures between income and principal, income taxation of trusts and estates, treatment of distributions of cash and property to beneficiaries, administration of marital-deduction formula clauses. Prerequisite: 091:272. Corequisite: 091:378.

091:204 Administrative Law 3 s.h.
Formal and informal procedures, processes, and functions of state and federal administrative agencies; legislative, executive, and judicial control of their actions; nature and definition of administrative agencies; permissible delegation of authority to administrative agencies; scope of agency authority; agencies' right to obtain information from members of the public; citizens' right to obtain information in agencies' possession; definition and types of administrative rules; rule-making procedure; agency discretion to make law by rule or adjudication; right to a trial-type hearing before an agency; parties' specific rights in an administrative hearing, including notice, open or closed hearing, right to counsel, evidence, nature and exclusivity of the record; agency decision-making process, including role of hearing officers, separation of functions and bias of decision makers, nature of opinion required; judicial review of administrative action, including reviewability of agency action, primary jurisdiction of agencies, exhaustion of administrative remedies, standing, scope of judicial review, mechanics of judicial review.

091:206 Criminal Procedure: Adjudication 3-4 s.h.
Adjudicatory phases of the criminal justice system: indictments and the charging process, preliminary hearings, applications for release on bail and pretrial detention, processes of discovery, guilty pleas, jury selection, conduct of criminal trials, sentencing proceedings and post-trial motions, appellate review, collateral remedies; focus on constitutional rights, specifically the Fifth, Sixth, Eighth, and Fourteenth Amendments; statutory provisions, rules of criminal procedure.

091:207 Arbitration 2-3 s.h.
Arbitration's role in modern conflict resolution examined in context of various settings in which it is used; conceptual framework and explanatory theories for analysis of issues frequently encountered in arbitration; statutory and contractual grounds for arbitration in areas such as labor relations, commercial transactions; decision to use arbitration, selection of arbitrators, arbitration process, judicial enforcement of arbitration agreements and arbitration awards, role of lawyers in arbitration; practical and conceptual relationship between arbitration and litigation on one hand, and mediation and other nonadversary forms of dispute resolution on the other.

091:208 Antitrust Law 3 s.h.
Laws dealing with restraints of trade, monopolization and mergers; history of these laws and their development in the courts; current doctrine and its underlying legal and economic theories; analytical tools of trade: sufficiency of economic efficiency as the measure of justice.

091:209 Advanced Torts 3 s.h.

091:210 Appellate Advocacy I 0-1 s.h.
Experience based on an assigned fictitious case: writing an appellate brief asserting the client's position, and arguing the case before a panel of students, faculty, community attorneys.

091:211 Appellate Advocacy II 1 s.h.
Continuation of 091:210; increased complexity; for second-year students who want more experience in appellate advocacy.

091:212 Introduction to Appellate Advocacy 1-2 s.h.
Law and practice of appellate advocacy; legal and practical aspects—filing a notice of appeal, developing and analyzing appellate briefs, preparing and delivering appellate arguments; classroom component and moot court competition.

091:213 Business Reorganizations 3 s.h.
Reorganization of business under Chapter 11 of the federal bankruptcy code; commencement of proceedings, mechanisms for continuation or cessation of business operations, case administration, executory contracts and avoidance powers, determination of claims, formulation and confirmation of reorganization plans, discharge and other effects of a confirmed plan. Prerequisite: 091:214 (preferred) or 091:222 or 091:332.

091:214 Bankruptcy 3-4 s.h.
Rights of individuals and entities under the federal bankruptcy code, from perspectives of debtors and creditors; foundational topics from liquidation bankruptcy (chapter 7) to reorganization bankruptcy (chapters 11 and 13); consumer and business bankruptcies; advanced bankruptcy topics such as small business reorganizations, farm bankruptcies, ethical issues and bankruptcy law, international insolvencies. Prerequisite: 091:215 or 091:222.

091:215 Debt Transactions 4 s.h.
Laws and practices of modern lending; procedures for collection of unsecured debts, including enforcement of judgments, exemptions, prejudgment remedies, fraudulent conveyances, statutory liens; secured transactions that involve real property (mortgages) and personal property (security interests governed by Uniform Commercial Code, Article 9); consumer and commercial transactions, counseling creditor or debtor clients, understanding realities that shape enforcement of credit agreements.

091:217 Corporate Finance 1, 3 s.h.
Applications of modern financial theory to modern corporate law topics, including use of valuation techniques, portfolio theory, diversification strategies, financial statement analysis. Prerequisite: 091:241.

091:218 Corporate Crimes 3 s.h.
How corporations and their officers, directors, employees, and agents can violate criminal law; liability imposed under state and federal laws in the United States, criminal liability under laws of other countries; fundamentals of U.S. law; case studies of recent prosecutions involving American corporations.
091:219 Civil Procedure in Pretrial Theory and Practice arr.
The law of pleadings and other pretrial matters presented in 091:104; hypothetical case developed from interview to pleading to early pretrial stages; experience drafting relevant pleadings and motions. Prerequisite: 091:104.

091:222 Commercial Transactions 3-4 s.h.
Commercial and consumer transactions, with focus on use of negotiable instruments and personal property security interests; basic legal structure of articles 3, 4, and 9 of the Uniform Commercial Code; related provisions of the Bankruptcy Code.

091:224 Comparative Law 2-3 s.h.
Comparative study of origins, development, and characteristic features of the world’s main legal systems; common and civil law traditions; indigenous development of the main legal systems, their sources, ideologies, techniques; subjects important to international legal practice (e.g., international judicial assistance, application of foreign law in American courts, application of American law in foreign courts); in-depth study may include United States, Britain, France, Germany, China, Japan, Russia, South Africa, or Palestine. Same as 144:142.

091:225 Comparative Law in Post-Communist Countries arr.
Law and legal reforms in Russia, the newly independent states (NIS), and post-communist countries of eastern and central Europe.

091:227 Comparative Constitutional Law 2-3 s.h.
Comparative study of constitutional law; decision making and substantive results under a variety of different constitutional systems, including major Western and non-Western systems; forms of judicial review and separation of powers, forms of federalism and alternatives to federalism, conceptions of fundamental human rights.

091:228 Conflict of Laws 2-3 s.h.
Problems created when a transaction or relationship has associations with more than one jurisdiction; emphasis on selection of appropriate jurisdiction-selecting rules, recognition of other states' judgments; current evolution in theoretical approaches to these problems; limitations on American state courts by the federal constitution.

091:229 International Intellectual Property Law 3 s.h.
International instruments in intellectual property (e.g., TRIPS agreement, Berne Convention, Paris Convention) and key regional agreements (e.g., European Patent Convention); intellectual property regimes and doctrines of interest within those regimes. Prerequisite: an intellectual property course or consent of instructor. Recommended: 091:295.

091:230 Consumer Law 3 s.h.
Whether and how law should regulate rights of consumers and businesses to transact freely with each other; tension between laws that protect consumers from harmful consequences and principles of freedom to contract, caveat emptor, and free market economies that dominate traditional contract and tort law; state and federal consumer protection statutes, including Truth in Lending Act, Equal Credit Opportunity Act, Unfair and Deceptive Practices Acts; current topics in consumer law, including predatory lending, marketing fraud, arbitration clauses; realities faced by attorneys who advise businesses on compliance with consumer laws, competing concerns of plaintiffs' attorneys and government officials who seek to enforce consumer laws.

091:231 Antitrust Policy 3 s.h.
Federal antitrust policy concerning mergers, distribution restraint, franchising, government regulation.

091:232 Constitutional Law II 3, 5 s.h.
Limits on governmental power imposed by the national constitution for protection of individuals; protection of life, liberty, and property by due process and equal protection; freedom of expression and association; religious freedom and the guarantee against establishment of religion; 1st and 14th Amendments.

091:234 Commercial Contract Drafting 2-3 s.h.
Components of common commercial contracts, analytical and technical processes involved in drafting contracts for commercial purposes; settlement agreements, contracts for services, agency agreements, employment agreements, stock or asset purchase agreement, leases, problems associated with data processing contracts; trial drafting of appropriate clauses for contract problems in varied commercial settings. Prerequisite: third-year standing. Corequisite: 091:241.

091:236 Contemporary Russian Law in Historical Context 3 s.h.
Contemporary law and legal reforms in Russia, in context of Russian, Soviet, and European history; introduction to the current Russian legal system; similarities and differences in the contemporary Russian legal system and the traditional (pre-1917) and Soviet legal models; major legal issues of contemporary Russia; degree to which Russian law is characterized by continuity or change relative to laws of former Russian empire and USSR.

091:237 Comparative Criminal Law Issues: United States and United Kingdom 1-3 s.h.
Right of silence/right against self-incrimination in Britain and America; historical origins, recent development, and practical application of these rights; effects of capacity and age on the exercise of these rights, the prosecution’s obligation of disclosure and discovery, confessions, admissibility of evidence.

091:238 Comparative Law of Foreign Relations 3 s.h.
Comparison of legal foundations for external relations in the United States, the European Union, post-Communist states, and other countries; external powers and objectives; instruments, principles, and actors who determine and carry out external policies; legal effects of international agreements and other aspects of international law; basic questions of constitutionalism raised by foreign relations law (i.e., division of competencies, separation of powers, protection of fundamental rights, issues of democracy and legitimacy, judicial review).

091:239 Corporate Governance and Control 1-3 s.h.
Principal issues in creation of appropriate governance and control systems for large publicly-held corporations; questions of corporate structure, voting rights, duties of directors, derivative suits, indemnification and transfers of control from legal, economic, and societal perspectives; critical evaluation of current proposals for dealing with those matters. Recommended: 091:241.

091:240 Advanced Arbitration 1-2 s.h.
Advance of fundamental legal concepts explored in 091:207 through analysis in context of varied applications and hypothetical problems; stages of arbitration, from agreement to arbitrate and selection of arbitrators to final award; post-award remedies, judicial review. Prerequisite: 091:207.

091:241 Corporations I 3-4 s.h.
Structure, characteristics of both large publicly and closely held corporations; distribution of powers among management, directors, shareholders; fiduciary duties that limit those powers; enforcement of such duties by shareholder suits; may include basic principles of agency, partnership, and limited partnership law.

091:243 Taxation of Business Enterprise 3-4 s.h.
Income tax treatment of corporations, partnerships, and limited liability companies, with focus on closely held firms and their owners; choice of entity, the life cycle of the entity, corporate mergers and acquisitions. Prerequisite: 091:272. Corequisite: 091:241.

091:244 Introduction to Disability Law and Policy 1-3 s.h.
Overview of the Americans with Disabilities Act (ADA), and related federal and state disability laws; emphasis on understanding recent Supreme Court decisions interpreting the ADA, particularly its employment provisions; lawyers' roles in supporting equality of individuals with disabilities.
091:245 Domestic Abuse Law  
The law’s response to domestic abuse (i.e., the pattern of violent and coercive control used in adult intimate relationships); cultural contexts of domestic violence, legal and social reform efforts of the past decade and their impact on the administration of justice, use of common law and statutory injunctions, the criminal justice system’s response, constitutional and interspousal torts, mediation, federal legislation.

091:246 Family Law in the World Community  
Family law topics from an international and comparative law perspective; treatment of family law problems in various legal systems, application of international treaties and conventions to issues such as child custody, adoption, reproductive freedom, domestic violence. Prerequisite: 091:195 or 091:268 or consent of instructor.

091:248 Deposition Practice  
Actual practice of depositions; law of deposition practice, procedural prerequisites to a deposition, including drafting of necessary documents (e.g., subpoenas duces tecum); structure and strategies of taking and defending a position; students conduct depositions in varied circumstances (e.g., discovery of a party, perpetuation deposition of an expert). Prerequisite: 091:370.

091:250 Employment Law  
Rights of employers, employees in unorganized workplaces; legal issues that arise between employers and employees in nonunionized settings; hiring, discipline, termination, minimum wage, covenants not to compete, employment-related intellectual property issues, occupational safety and health, unemployment.

091:251 Introduction to Employee Benefits Law  
The basic act and its detailed implementing regulations; types of qualified plans, plan funding mechanisms, participation standards, permissible discrimination in benefits and contributions, vesting requirements, tax deductions to employers, taxation of distribution to employees, fiduciary concepts, IRAs, and plans for self-employed individuals. Prerequisite: 091:272.

091:252 Gender and the Law  
Same as 16A:175.

091:253 Employment Discrimination  
Legal prohibitions against discrimination in employment on the basis of race, sex, national origin, age; focus on Title VII of the Civil Rights Act of 1964; procedural and remedial problems, elementary issues of proof.

091:254 Education Law  
Law affecting governance of schools, with focus on public elementary and secondary schools; issues such as speech, association, privacy, procedural due process, curriculum control, special education, educational financing, religion, racial discrimination; allocation of power and discretion between federal and state authority; contrasting and complementing roles of legislator, educator, and judge; varied interests of state, teacher, parent, and student; related problems in private schools, state colleges and universities; interaction of law and educational policy. Corequisite: 091:232.

091:255 Environmental Law  
Role of the legal system in addressing problems of environmental disruption, with special emphasis on air, water, hazardous waste pollution.

091:256 Federal Criminal Practice  
Introduction to each step in the criminal process together with instruction in advocacy skills required for the effective practice of law; complete chronology of a typical federal criminal case, from grand jury investigation through post-trial motions; importance of strategic thinking. Prerequisite: 091:125.

091:257 Establishing a Business in the EU  
Legal and practical issues related to establishing and conducting businesses in the European Union; issues that affect how businesses are organized and run under the laws of the union and its member states; business organization, labor regulations, competition law issues, dispute resolution alternatives.

091:258 Arts and Entertainment Law  
The entertainment industry; issues affecting creative artists, financiers, producers, other participants in the world of theater, print publishing, motion pictures, television, music, fine arts; emphasis on the doctrine of right, moral, including the federal Visual Artist’s Rights Act and American courts’ treatment of the moral rights.

091:260 Foreign Relations Law  
Impact of the constitutional distribution of powers on the conduct of U.S. foreign relations; influence of separation of powers doctrines on conduct of foreign relations, status of international law in the U.S. legal system, role of courts in adjudicating issues affecting foreign relations, controversy over distribution of war powers between the president and Congress.

091:261 Health Law  
Major areas of concern in health law; tension between quality, access, costs; may include malpractice, quality control, health care financing, access (insurance, Medicare, and Medicaid), licensing, bioethics (end-of-life decisions, informed consent, surrogacy, organ transplantation).

091:262 Federal Regulations of Health Care Industry: Fraud and Abuse  
Impact of governmental regulation on business planning and transactions in application of federal fraud and abuse laws to organizational entities; False Claims Act and the Stark Law, corporate compliance programs, enforcement efforts. Prerequisite: 091:241 or consent of instructor.

091:263 Disability, Law, and Society  
Policy issues, statutes, and case law examined in legal, societal, and historical contexts; the role of families in supporting full participation in society by children and others with severe disabilities.

091:264 Survey of British and Commonwealth Legal History  
British legal history from 16th to early 20th century; development of law in the British colonies; history of the jury, changing roles of defense counsel and prosecutors, development of law of evidence and defendant’s rights, women and family, labor law, law and evolution of modern capitalism in the railway industry, legal education, family and labor law in the colonies.

091:265 Evidence  
Rules of evidence developed in common-law courts and under statutes; judicial notice; examination of witnesses; privilege and competence; remote and prejudicial evidence; hearsay; burden of proof and presumptions; roles of judge and jury.

091:266 European Union Law  
Law of the European Union; EU legal and institutional structure; role of the European Court of Justice in elaborating constitutional and administrative law for the EU on the basis of treaties and legislation; principle of free movement; progress of European integration.

091:267 Legal Externship  
Experience in nonprofit organizations, government agencies; unpaid; usually summer.

091:268 Family Law  
Creation, dissolution of marriage and parent-child relationships; lawyer’s practical approach to family law problems combined with a broader view of how the law might treat those problems in light of findings from social and behavioral sciences.

091:270 Health Care Quality  
Private law responses to quality-of-care and autonomy issues involving health care providers and their consumers; competing and overlapping liability models applied to health care providers,
and liability exposure of different provider groups; individual health care professionals, provider groups, third party payors, drug and device manufacturers; range of litigation issues, including expert and scientific evidence, causation, damages, insurance issues as they relate to health care providers; effect of statutory reforms, such as experts qualifications, limitations on certain types of damage recovery, mandated dispute resolution mechanisms.

091:272 Basic Federal Income Taxation 3-4 s.h.
Operation, policies, principles of federal income tax, including gross income, deductions, property dispositions, tax accounting, assignment of income among family members, time value of money, leveraging.

091:274 Federal Courts: Constitutional Litigation and the Dual Court System 3 s.h.
Dual court and dual law system in the United States; emphasis on constitutional tort litigation (actions against governmental officials for violations of the U.S. Constitution); supremacy of federal law, preemption, federal incorporation of state law, federal and state court jurisdiction over cases arising under federal law; judicial federalism (including various abstention doctrines), the 11th Amendment; constitutional tort litigation, including the scope of the plaintiff's rights in constitutional tort actions; immunities that may be invoked by a defendant; range of legal and equitable remedies potentially available to a successful plaintiff.

091:275 Federal Courts: The Structure and Jurisdiction of the Federal Judiciary 3 s.h.
Overview of federal courts' federal-question, diversity, supplemental, and appellate jurisdiction; venue, removal of cases from state to federal courts; other issues in powers of federal judiciary, such as Congress's power to alter the structure and jurisdiction of the federal courts, of forum non conveniens doctrine, federal habeas corpus petitions, transfer of cases, claim and issue preclusion, powers of legislative courts.

091:276 Private International Finance 3 s.h.
International banking and securities transactions; major national markets of the United States, Europe, and Japan, and offshore markets; major areas of international regulation and policy, such as capital adequacy, clearance, and settlement.

091:279 Immigration Law and the Workplace 3 s.h.
Intersection of immigration and employment law, with focus on the United States; employment rights and remedies of immigrant workers, including undocumented workers; issues relating to employment eligibility verification and antidiscrimination protections; workers' claim of unpaid wages, protection for day laborers, English-only rules, entitlement to benefits such as workers' compensation, human trafficking, coverage under antidiscrimination statutes, and the right to engage in collective bargaining; gender implications; some discussion of international perspectives. Prerequisite: 091:250.

091:280 Immigration 1-3 s.h.
Role of immigration, immigrants, immigration law in American culture; history of U.S. immigration policy, with emphasis on role of race and ethnicity in immigration laws, practices; various perspectives or ideas about immigration, including attitudes toward immigrants (such as nativism during Progressive Era), role of women and family life in households, tensions between immigrant and other laborers in the workplace; source, limits of federal power over immigration; immigration quotas and preferences; ground for exclusion and deportation; citizenship.

091:281 Interest-Based Negotiation for Lawyers 2-3 s.h.
Theory and practice of interest-based or problem-solving negotiation; acquisition and enhancement of the skills for this approach to negotiation; negotiation exercises.

091:282 International Business Transactions 1-3 s.h.
Legal and practical issues in international trade and investment; typical private transactions, such as the sale of goods (documentary sales transaction, INCOTERMS, letters of credit, agency, distribution), transfer of technology (franchising, licensing), and direct investment across national borders; how private international sales, investment, and licensing transactions are structured to permit private businesses to minimize and plan for the risks associated with conducting business on a global scale.

091:283 Copyrights 3-4 s.h.
Federal law of copyrights, primarily the Copyright Act of 1976; emphasis on copyright protections affecting new technologies, such as videotape, computer hardware and software, electronic data transfer, cable television rebroadcast; ability of legal concepts to keep pace with technological developments. Recommended: 091:286.

091:285 Foreign Comparative and International Legal Research 1 s.h.
Treaty research, locating and identifying documents from international organizations and tribunals, legal research in selected jurisdictions outside the United States; print and electronic sources and research methods in foreign and international law; project to complete a pathfinder on a foreign or international law topic.

091:286 Introduction to Intellectual Property Law 3-4 s.h.
Concept of intellectual property, survey of decisions in patents, trademark and unfair competition, copyright, trade secrets, related areas; issues arising from intersections of areas.

091:287 International Trade Law: Basic Norms and Regulations 3 s.h.
Basic norms and legal framework of international trade as expressed in the GATT/WTO regime and U.S. trade laws; issues raised by regional trade blocs such as NAFTA; controversies such as the economic and philosophical justifications for, and objections to, free trade from a variety of perspectives.

091:288 Jurisprudence 2-3 s.h.
Selected legal philosophies, with emphasis on legal positivism and natural law; relationship between law and morality. Same as 144:143.

091:290 Juvenile Delinquency and the Juvenile Justice System 1-3 s.h.
Juvenile criminal offenders ("juvenile delinquents"), juvenile status offenders (e.g., runaways and truants), and the juvenile justice system; law governing investigation of juvenile crimes, juvenile court delinquency procedures, juvenile corrections; role of attorneys in delinquency proceedings.

091:291 International Environmental Law 3 s.h.
Laws and institutions developed by the international community to deal with international environmental problems, including those of the atmosphere (acid rain, ozone depletion, radioactive fallout, climate change), hydrosphere (land-based sea pollution, sea-based vessel pollution, transboundary groundwater diversion), lithosphere (hazardous waste disposal, toxic pollutants, decertification), biosphere (driftnet fishing, endangered elephants, loss of tropical rainforests).

091:292 Labor Law 3-4 s.h.
Federal law and its enforcement by judicial, administrative, arbitral tribunals relating to unionized employees and private firms; rights of employees to organize and engage in concerted activities and collective bargaining.

091:294 International Civil Litigation 3 s.h.
Issues that arise in litigation between litigants located in different nation-states; choice of law and personal jurisdiction issues in context of international litigation; litigation-limiting doctrines and devices such as forum non-conveniens and lis pendens; international enforcement of judgments, sovereign immunity, international discovery.

Arbitration agreements, proceedings, and enforcement of awards in an international context; student role-playing experience as arbitrators, advocates, other participants in arbitration-related legal proceedings.
091:297 Law and Accounting
Accounting as the language of business; familiarization with the vocabulary of accounting, knowledge and skill development in using accounting information as an analytical tool; for students with no business background.

091:298 English Legal System
Taught in Spring London Law Consortium.

091:300 Land Use
Zoning, comprehensive planning, provision of services, subdivision development ordinances, and their role in construction of local community; mechanics of various procedural devices, including those for changing zoning restrictions through variances, rezonings, contract and conditional zonings, initiative and referendum process, agreements by cities and developers pursuant to platting processes; coordination of control efforts; theory and doctrinal investigations contrasted with actual problems and results. Prerequisite: 091:136.

091:302 Estate Planning
Practical planning and drafting of policy issues related to wills, trusts, and other components of estate plans. Corequisite: 091:360 or 091:378.

091:303 Federal Indian Law
Specialized body of law that allocates power and authority in Indian country and has grown up around Native American peoples and their reservations; sovereignty arrangements, jurisdiction, federal Indian policy, tribal self-government. Same as 149:178.

091:304 Law in Asia in Transition
Development and reform of law and legal institutions in selected Asian countries, with focus on Vietnam and China; changing role of socialist constitutions; law and the regulation of civil society nonprofit organizations, philanthropy, grassroots organizations and the state; procure and prosecution reforming socialist institutions and legal process; transformation of legal profession; struggle for authority of law in socialist transitional states; law and globalization of export labor; foreign models and donor support.

091:305 Mental Health Law
Legal implications of the current medical concepts of mental disease and disorder; application of these medical concepts to legal problems such as criminal and civil commitment, mental illness, dangerousness, competency to refuse medical treatment; use of psychiatric testimony in criminal settings.

091:306 The Law of Electronic Media
Legal and public policy issues in the operation and regulation of broadcasting, cable, and new technologies. Prerequisite: junior or senior standing.

091:307 Law in the Muslim World
International and comparative law issues relevant to countries in the Muslim world; legal cultures, institutions, rules, actors, processes of several jurisdictions including Afghanistan, Saudi Arabia, Iran, Iraq, Algeria, Nigeria, Palestine, Pakistan; Islamic sharia law as practiced in Sunni and Shiite countries; the role of church versus state, fundamentalism versus secularism, as manifested in the legal system; tension between communitarianism and individualism in modern constitutionalism; intertwining of customary and religious legal practices; first, second, and third generations of human rights; international law on issues such as terrorism, self-determination; women’s rights, including polygamy, divorce, child custody, inheritance. Prerequisite: junior or senior standing.

091:308 Professional Responsibility
Public and private professional responsibility of lawyers; organization of the profession; its economics, ethics, and sociology.

091:309 Law and Economics
Introduction to law and economics, including traditional and newer ways of using economic and other social science tools to study and solve legal problems; topics from first-year curriculum and others, including corporate law, insurance, family law, regulatory topics; how legal rules affect behavior and enhance social welfare; impact of legal rules on resource allocation, risk bearing, distribution of economic well-being; how legal rules are created. Recommended: microeconomics class.

091:311 Law of France and the European Union
Summer abroad program.

091:314 Legal Training in Spanish
Legal use of Spanish; for students who expect to use Spanish frequently in practicing law. Prerequisites: intermediate college Spanish and oral proficiency interview with instructor.

091:315 Mediation: Theory and Practice
Essential characteristics; comparison of mediation with litigation and other alternative dispute resolution processes; stages of mediation; confidentiality; enforceability of agreement; ethical problems, particularly lawyer-mediator; student role playing.

091:320 Nonprofit Organizational Effectiveness I

091:321 Alternative Dispute Resolution Methods
Introduction to theory and practice of nonadversarial dispute resolution; characteristics of negotiation, mediation, arbitration, other dispute resolution methods; student role-playing, videotapes, demonstrations.

091:322 Nonprofit Organizational Effectiveness II
Qualities vital for leaders of nonprofit organizations, including those affecting relationships with staff and volunteers; relationship of a nonprofit to the world—nonprofit’s community constituencies, governmental entities, professional associations, collaboration with other organizations; marketing, public relations, advocacy strategies for nonprofits. Prerequisite: 091:320 or consent of instructor. Same as 06:248, 021:265, 024:248, 028:258, 032:228, 042:248, 174:248.

091:323 Natural Resource Law
Disputes over use of natural resources for public lands; constitutional and statutory framework for public natural resource law, including mining, water, and forestry law; wildlife conservation.

091:324 Patent Law
All aspects of U.S. patent law; patent claims, adequacy of disclosure, statutory subject matter, validity, inequitable conduct, infringement, remedies, varied specialized doctrines; focus on recent pronouncements from the Court of Appeals for the Federal Circuit. Recommended: 091:295.

091:325 Philanthropy and the Law
Overview of law applicable to the American philanthropic sector; recent and controversial issues in the interface between philanthropy and the law; comparative and international aspects of the regulation of philanthropy and the nonprofit sector.

091:328 Presidential Power
The president’s constitutional power and how it is, or ought to be, subject to control by Congress or the judiciary; the president’s powers in historical and contemporary contexts; topics such as presidential control of the executive branch (the Unitary Executive Theory), the presidency’s protective power, the presidency’s role in foreign policy and national security.

091:329 Products Liability
In-depth liability for defective products based on negligence, warranty, and strict tort theories.

091:332 Real Estate Transfer and Finance
Modern real estate transactions, including problems of real estate brokers, land-sale contracts, mortgages, insurance, conveyancing practices, title examinations, financing techniques, organization of real estate development ventures.

</tbody>
</table>
|             | Experience on the *Iowa Law Review* editorial staff managing
production, overseeing business operations, administering student writing program, selecting and editing articles for publication, supervising student research and writing. Eligibility based on previous writing for the journal.

**091:402 Moot Court Board** 1-3 s.h.
Experience as member of the Moot Court Board administering the Appellate Advocacy Program, researching appellate cases used in the program, judging appellate arguments. Prerequisite: membership based on performance in 091:210 and 091:211.

**091:403 Chicago Moot Court Team** 1 s.h.
Student participation as College of Law representatives in Chicago Moot Court Competition. Fall of third year.

**091:404 Van Oosterhout Moot Court Competition** 1 s.h.
Single-elimination tournament culminating in the final four advocates arguing before a panel of judges; advocates write a portion of the brief, argue for and against the issue they briefed.

**091:405 Baskerville Moot Court Competition** 1 s.h.
Skill-building for student advocates, who write a portion of the brief and argue for and against the issue they briefed.

**091:406 Clinical Law Program—Internship** arr.
Experience working directly with faculty members on cases and in-house program; full participation in interviewing, fact investigation, negotiation, courtroom proceedings.

**091:407 Clinical Law Program—Externship** arr.
Experience representing clients through legal assistance offices in eastern Iowa, under supervision of faculty members and staff attorneys.

**091:408 National Moot Court Competition** 1 s.h.
Participation by third-year students as law school’s representatives in the regional Moot Court competition (fall semester), and in judging intramural Moot Court competitions (spring semester). Prerequisite: placement as one of four finalists in 091:404.

**091:409 Child and Family Advocacy Clinic** arr.
Experience working with faculty members on cases involving children with health problems and their families; representation of clients in connection with health insurance, social security disability, education, and public benefits (e.g., food stamps, school lunch programs, WIC, housing, fuel and utility assistance, income support); interviews, fact investigation, negotiation, administrative and courtroom proceedings; close work with Carver College of Medicine faculty members and residents who staff pediatric units at University of Iowa Hospitals and Clinics.

**091:410 Client Counseling I** 1-2 s.h.
Foundation for recognizing and resolving legal, nonlegal, ethical issues in the legal interview; interviewing and counseling skills developed through practice sessions, lectures, observation.

**091:412 Client Counseling Board** arr.
Coordination of client counseling program and Intraschul Client Counseling Competition under supervision of faculty advisor. Prerequisite: 091:410.

**091:413 Client Counseling Competition** 1 s.h.

**091:415 Journal of Corporation Law** 1-2 s.h.
Experience editing articles and writing commentaries for The Journal of Corporation Law, a student-operated scholarly publication that examines subjects of current importance to businesses and the bar.

**091:416 Student Journal Editor—Journal of Corporate Law** arr.
Experience on The Journal of Corporation Law editorial staff; managing production, overseeing business operations, administering student writing program, selecting and editing articles for publication, supervising student research and writing. Eligibility based on previous writing for the journal. Prerequisite: 091:415.

**091:420 Transnational Law and Contemporary Problems Journal** 1-2 s.h.
Experience researching and writing on issues in international and comparative law for the journal Transnational Law & Contemporary Problems. Prerequisite: second- or third-year law standing.

**091:421 Student Journal Editor—TLCP Journal** arr.
Experience researching, writing, and editing on issues in international and comparative law for the journal Transnational Law & Contemporary Problems. Prerequisite: second- or third-year law standing.

**091:425 Journal of Gender, Race and Justice** 1-2 s.h.
Academic year experience on The Journal of Gender, Race & Justice; writing two journal pieces, including a recent development and a note or a comment, and performing office duties. Prerequisite: second- or third-year law standing.

**091:426 Student Journal Editor—Gender, Race and Justice** arr.
Experience on The Journal of Gender, Race & Justice editorial staff; managing student writing program, overseeing business operations and production, selecting symposium topic and participants, selecting and editing all publications pieces; eligibility based on writing and editing experience.

**091:430 Jessup International Moot Court Competition** 1 s.h.
Participation by second-year students in intramural regional- and national-level moot court competition in international law; intensive criticism in appellate brief writing and oral argument. Prerequisite: 091:210.

**091:431 Jessup Moot Court Competition Team** 1-2 s.h.
Participation as team member in Jessup International Moot Court Competition; preparation of memorials in fall, travel to February regional rounds; travel to international competition in Washington, D.C., for top two teams.

**091:450 Corporate Law Practicum** arr.
One-semester externship with Justice Holland of the Delaware Supreme Court.

**091:455 Health Law and Policy Practicum** 1-3 s.h.
Opportunity to participate in research involving current health law and policy issues, in collaboration with organizations such as public health agencies, health professional organizations. Prerequisite: consent of instructor.

**091:460 Law Study Abroad at Bucerius** arr.
Exchange study student at Bucerius Law School, Hamburg, Germany. Fall semester.

**091:500 Independent Research Project** arr.
Work under faculty supervision.

**091:501 Directed Research and Writing** arr.
Research and writing project unrelated to any substantive course, supervised by a faculty member.

**091:502 Supplementary Writing** arr.
Supplemental writing project that is related to a student’s course, but goes beyond the requirements for the course, and is supervised by the faculty member who teaches the course.

**091:503 Writing Tutorial** arr.
Group writing project on a subject or topical area specified by the supervising faculty member; group meetings.

**091:504 Tutorial** 1-4 s.h.
Work under faculty supervision; may involve substantive area of the law of jurisprudential ideas as they appear in various intellectual spheres.
091:505 UI Center for International Finance and Development Tutorial  
Experience maintaining a globally-read web site that hosts the E-Book on International Finance and Development and posts issues on important topics in international finance and development; aspects of public international finance, with focus on the International Monetary Fund and the World Bank.

091:507 Banking Law Tutorial  
Constitutional theory and doctrine under the First Amendment, with focus on the free press guarantee and protection for news and journalism; prior restraints and injunctions against publication; libel; privacy; other communicative torts; commercial speech and news publications; public forum and time, place, and manner restrictions on the press and publishers; ownership, control, copyright, related intellectual property interests of the press; meaning of journalism, news, and news organizations; governmental control or sponsorship of news organizations; subsidies for the press; taxation of the press; access to the press; newspapering; press privileges; equality and press freedom; problems in the financial and regulated sectors, such as regulation of business news periodicals; control of advertising by news organizations; adverstorial practices and First Amendment freedoms; limits of press speech and journalism. Prerequisite: 091:232.

091:600 Abused, Neglected, and Dependent Children  
Laws relating to abused, neglected, and dependent children—those not receiving proper parental care and protection as defined by statutes and case law; history of child abuse, neglect, and dependency laws; jurisdiction of juvenile and family courts; abuse, neglect, dependency proceedings; termination of parental rights in abuse, neglect, and dependency cases.

091:601 Advanced Topics in Corporate Law  
Wide range of topics; theory of the firm, fiduciary duties, corporate counseling issues, history of corporate law, and so forth. Prerequisite: one law or business course in corporate law or consent of instructor.

091:602 Asian Americans and the Law  
Legal issues encountered by Asians and Asian Americans in the United States; how those issues have been addressed by Congress, state legislatures, the judiciary; the executive branch, the public, and the legal community.

091:603 Capital Punishment Seminar  
Overview of the death penalty in America; moral issues; long-term trends limiting the use of the death penalty in the United States and abroad; legal issues and Eighth Amendment jurisprudence that has developed since the 1960s regarding limits on the exercise of juror discretion, jury selection, proportionality, the execution of minors, racial discrimination, mens rea requirements, capital appeals and collateral attacks, death penalty lawyering, and so forth; critique of death penalty bills proposed in recent years for Iowa.

091:604 Patent Prosecution Seminar  
Drafting seminar on patent application preparation and prosecution; student drafting exercises and presentations on advanced patent law topics; administrative rules and procedures governing practice before the U.S. Patent and Trademark Office; for students who plan to practice patent law. Prerequisite: 091:324.

091:605 Advanced Problems in International Environmental Law  
Focus on the so-called trade and environmental debate.

091:606 Advanced Problems in International Business and Economic Relations  
Legal aspects of contemporary problems in transnational business and economic relations; year-long seminar. Prerequisite: 091:282 or consent of instructor.

091:607 Animals and the Law  
Issues concerning nonhuman animals and the laws that affect them; historic and philosophical rationales for conferring or refusing to confer legally cognizable rights upon nonhuman animals; topics such as laws governing use of animals (e.g., for scientific research, human consumption, companionship, entertainment), laws to preserve endangered species, laws governing international animal trafficking, laws governing efforts to establish standing in lawsuits aimed at improving animals’ welfare; how laws relating to animals intersect with issues of broader concern, such as the rights of children and persons with severe mental disabilities, respect owed to cultural differences when crafting laws regarding fundamental areas of human activity, evolution of modern thought regarding basic human rights.

091:608 Advanced Topics in Intellectual Property  
Opportunity to explore complex intellectual property issues with a focused topic area; for students experienced in intellectual property law. Prerequisite: one intellectual property course or consent of instructor.

091:611 Citizen Enforcement of Environmental Laws  
Implementation of the citizen suit—a novel, experimental feature of modern environmental statutes; simulated initiation, defense, and the legal community.

091:616 Family Law in the World Community  
Family law from an international and comparative law perspective; treatment of family law problems in varied legal systems; application of international treaties and conventions to issues such as child custody, adoption, reproductive freedom, domestic violence. Prerequisite: 091:195 or 091:268.

091:618 Cultural Property/Heritage  
Concept of cultural property, measures for its protection, impact of these measures on the transfer of cultural items; traditional art and architecture, biological and fossil material, human remains; contexts in which issues have arisen, such as stolen cultural property, property acquired during armed conflict and in colonial settings, and property collected in the field or excavated; international, national, and state law, including UNESCO convention on illicit transfer of cultural property, U.S. Archaeological Resources Protection Act, Native American Graves Protection and Repatriation Act; how developing professional ethics codes affect the concept of cultural property.

091:619 Farm Labor Regulation  
Farm labor regulation; seminar.

091:620 Law and Technology Seminar  
Production of a model statute addressing the range of issues in the selected subject area with suggested solutions; definition of statute’s scope, research projects to identify existing law and develop competing ideas and approaches; further definition and a vote on the statute’s scope and policies; further research memoranda as the statute takes shape; drafting of the statute with seminar review sessions; students work as a draft committee modeled after the Commission on Uniform State Laws.

091:622 Elder Law  
Qualification for Medicaid, elder abuse and neglect, discrimination in employment and elsewhere, retirement pension planning and taxation, elderly patients’ rights in nursing homes; conservatorships and guardianships.
091:623 Critical Race Theory arr. Social, political, and legal writings on aspects of race in development and evolution of American law; how race pervades the fabric of our society, how the law might be used to address social conditions involving commercial, constitutional, and criminal law.

091:624 Cyberspace Law Seminar arr. The wide range of legal and public policy issues created by the newly-emerging electronic technologies; focus on student research, writing, presentations, discussion.

091:626 Federal Antitrust Policy arr. Topics in federal antitrust laws; cartels and other horizontal restraints of trade, measurement of market power, exclusionary practices by dominant firms, vertical restraints, the Robinson-Patman Act, public and private enforcement, remedies, history of antitrust policy; antitrust enforcement in particular markets, such as health care, computer technology, the learned professions. Prerequisite: a law or business antitrust course or consent of instructor.

091:627 Seminar: Gender and Sexuality in U.S. Law arr. Same as 016:279.

091:628 History of Crime and Punishment arr. History of crime and punishment, mainly in America and Britain, also continental Europe; measurement of historical crime rates, decline and resurgence of violent crime, women’s crime, crime and class status, philosophies of punishment, death penalty, the penitentiary, parole system, development of public prosecution system.

091:629 History of Regulation of Smoking and Tobacco arr. Regulation of smoking and tobacco use; history, beginning with 19th and early-20th centuries; state statutes and case law; OSHA, EPA, and FDA regulations; class action litigation, involvement of law firms in formulating tobacco company strategies, use of medical studies, economic history of the tobacco industry.

091:630 History of the Legal Profession arr. History of Anglo-American legal profession; amateur lawyers and Anglicization of the American bar; why there are no barristers in the United States; 19th-century professional reform in Britain; lawyers and changing trial practice; rise of the large firm; 19th-century changes in legal education; growth of professional associations; rules to regulate conduct; Legal Realism and 20th-century changes in legal education; diversity and the bar; dilemmas of self-regulation, autonomy versus loyalty to clients, role of law education. Two semesters.

091:631 Intellectual Property Research and Writing arr. Opportunity to develop research and writing skills in intellectual property practice; basic intellectual property law research exercises; major drafting assignment, typically in intellectual property litigation. Recommended: 091:286.

091:632 Higher Education and the Law arr. Practice of law in and for a complex institution; problems confronting attorneys in higher education, doctrinal issues prevalent in a university setting; focus on real or hypothetical problems considered in light of background reading rather than doctrinal analysis.

091:633 International Criminal Law arr. How a single crime may occur in or harm more than one nation; questions addressed: which courts have jurisdiction, whose law governs; when countries may apply their criminal law extraterritorially; collaborative enforcement; the International Criminal Court.

091:640 Human Trafficking arr. Scope of international human trafficking; framework of international law; American law governing trafficking, involuntary servitude, and related offenses from 13th Amendment to the present, including recent statutory developments such as the Trafficking Act of 2000 and amended act of 2003; prosecution strategies used by the Departments of Justice and Labor, other executive agencies; the combined prosecution/prevention/protection model in the United States; civil litigation by trafficking victims against their traffickers; potential and limits of state antitrafficking legislation; relationship between trafficking law and labor law; the annual State Department Trafficking in Persons report’s role in U.S. foreign policy and its international law implications; varied legal issues involving trafficking and involuntary servitude.

091:642 Innovation, Business, and Law arr. Topics in antitrust, intellectual property, corporate, and securities law or the interfaces between those areas.

091:643 Freedom of Speech Seminar arr. Philosophical foundations—self-governance, pursuit of truth, self-realization, distrust of government; importance of these foundations in selected areas—national security, violence, commercial speech, obscenity, political spending, abortion counseling, government subsidies, academic freedom. Prerequisite: 091:232.

091:644 Non-Profit and Philanthropic Organizations arr. Legal regulation of philanthropic and nonprofit institutions; role, nature, and history of such institutions; tax exemption, tax treatment (including property and donor tax issues); political and legislative activities, and roles of members, directors, officers; problems of external regulation, accreditation, ethics; issues for community foundations, universities, development of philanthropic and nonprofit activity in selected Third World countries.

091:648 Law and Development arr. Use of law since the late 19th century to promote legal and economic development; spread of law reform in developing countries; role of foreign countries, multilateral agencies, bilateral agencies, other institutions in the law reform process; focus on American efforts abroad; activities by other countries, including developing countries.

091:650 Law and Colonialism arr. The role of law in colonial and imperial expansion, with focus on the history of Anglo-American empires; how importation of common law as part of the colonial enterprise changed indigenous societies (e.g., labor relations, property rights, family law, criminal justice); use of the rule of law to justify colonialism, law as a practical dilemma for administrators; how colonialism’s legal history fits into broader theories of imperialism; current globalization of common law.

091:652 Law and the Civil Rights Movement in Alabama 1955-65 arr. Alabama and civil rights, from the Montgomery Bus boycott to the Selma March, major civil rights organizations and their most visible leaders, fair hearings for constitutional challenges in the Alabama federal court, courageous local lawyers, and resistance to the dismantling of segregation embodied by George C. Wallace; significance of law and legal institutions in advancing or retarding a political movement of extraordinary significance, complexity,
and volatility; impact of legal developments arising from the Civil Rights Movement on other protest/reform movements in subsequent periods; perspectives from recent literature commemorating Brown v. Board of Education. Same as 016:286.

091:653 Law and Popular Culture
How law and popular culture influence each other; viewing of selected films and a TV series involving different aspects of law and legal institutions; readings related to each film that raise issues in cultural studies, and legal and film theory.

091:654 Law, Politics, and the Family
Issues raised under the U.S. Constitution regarding state regulation of families; family and individual privacy, right to marry, procreation rights, parents’ and children’s rights.

091:655 Law of War, Peace, and Military Affairs
Three aspects of law’s efforts to govern military affairs: international law of war, U.S. law regulating foreign commitment of the nation’s military forces, rights of individual soldiers (particularly women, homosexuals, religious observers).

091:656 Labor Standards Legislation
Two federal statutes designed to intervene in the free play of market forces in certain segments of the labor market: Fair Labor Standards Act, Migrant and Seasonal Agricultural Worker Protection Act.

091:657 LLM. Seminar
Basic research and analytical methodologies for the international and comparative law fields; workshop approach to project proposals, drafts.

091:658 Seminar on the First Amendment
Issues decided in the Supreme Court’s unfolding jurisprudence under the First Amendment religion guarantees; conduct as free exercise of religion; strict separation of church and state in contexts of education, public funding, and use of public space; claims of religion for exemption from general law (e.g. Yoder, Smith); school prayer and its legacy (pledge of allegiance, Ten Commandments in public spaces); evolution, creationism, intelligent design in public school curricula; relationship between free speech and free exercise of religion; vouchers and public funding of private religious schools, need- and merit-based scholarship funding; cases, historical sources, religious and philosophical views.

091:659 Law and Lawyers in Literature
Fundamental societal issues and ethical questions examined through discussion of literary works, including novels and plays by writers such as Camus, Coetzee, Dostoyevsky, Durrenmatt, Faulkner, Ibsen, Kafka, Melville, Schaffer, Thucydides.

091:660 Medical Tutorial for Law Students
Participation on medical and/or surgical rounds under supervision of attending physician; didactic sessions on legal, medical, and ethical issues arising from the clinical experience, and issues such as peer review, credentialing, quality assurance, cost containment, AIDS, reproductive technology; recent developments in medical technologies. Cosponsored by Carver College of Medicine. Prerequisite: 091:261 or equivalent.

091:661 Legal Issues: Intercollegiate Athletics
Legal issues affecting college and university athletics and athletes; includes drug testing, recruitment, gender equity (Title IX), NCAA regulations, endorsement contracts, coaching contracts, trademark licensing, and broadcasting rights.

091:662 Problems in International Law and Policy Research Seminar
American exceptionalism (U.S. unilateral conduct of foreign policy) during 20th and early 21st centuries; relevant treaties, conventions, and events; matters of legitimacy in law and policy.

091:663 Problems of International Law
Issues arising from contemporary problems of public international law; topics such as the law of use of force and armed conflict, international law relating to religious persecution, protection of minorities, the “girl child,” role of international organizations in peaceful settlement of disputes and in administration of justice.

091:664 Postconviction Remedies
Three postconviction remedies traditionally available to prisoners who wish to challenge their continued confinement: state postconviction relief, federal habeas relief, executive clemency.

091:665 National Security Law and Government Powers in Emergencies
National security powers of the federal government in national and international emergencies and crises; constitutional and statutory framework within which national security powers are exercised; conflicts between national security powers and individual rights, war powers and the rules of engagement, apprehension of foreign aliens through extradition or force; military tribunals and indefinite detentions of suspected terrorists, government practices in withholding information from the public and extracting critical information through extraordinary conduct, imposition of obligations on the United States under international law.

091:666 Notable American Trials: Trial Skills
Trial skills and strategy; real trial transcripts, contemporary accounts of the selected trials, secondary literature evaluating what actually happened in the courtroom and relevant history; skills of opening and closing argument, voir dire, direct and cross examination, witness selection, use of exhibits.

091:674 Poverty Law
Governmental responses to poverty in the United States; federal, state, and local social welfare programs for low-income persons; policy issues, history of welfare provision; state responses to federal welfare devolution, women and welfare, immigration.

091:676 Social Justice
Social justice and what is at stake in the context of fundamental rights jurisprudence and social legislation; five approaches to social justice—libertarianism, utilitarianism, intuitionism, justice as fairness, equality of resources; questions of public policy from each point of view—employment insurance, unconditional basic income, universal health insurance, educational grants.

091:680 Supreme Court Seminar
Supreme Court practice, procedure, jurisdiction; the art of opinion writing; in-depth analysis of cases on the court’s pending docket; writing briefs, conducting research, conferencing cases sitting as a mock Supreme Court, assigning and preparing opinions, soliciting votes of colleagues; preparation of two opinions.

091:683 Rethinking Public International Law
Major transformations of public international law; how to integrate human rights into a system designed to secure world peace; transformation of laws of war; emergence of new sites of authority (supranational, international); blurring of line between public international law and constitutional law; conflicts of interpretation in relations between major players (United States, European and Asian countries).

091:685 Special Topics in Employee Benefits Law
Remedies under ERISA—what equitable relief means after the Supreme Court’s decision in Great West Life; cases, articles, treaties on remedies and restitution.

091:690 Transnational Business Disputes
When representing or suing foreign enterprises, whose law applies to the case, when a judgment from one country is enforceable in another, how such issues affect choice of forum, and when a governmental defendant may assert sovereign immunity or act of state; questions that must be posed to foreign counsel, how the answers may be used.
Transitional Justice

How states resolve and manage tensions between objectives of social peace, justice, reconciliation (e.g., redress past abuses of basic rights); judicial and non-judicial responses, including criminal prosecution, truth-seeking initiatives, private lawsuits for compensation from wrongdoers, monetary reparations by states to victims, displacement of perpetrators from prominent positions; strengths and weaknesses of each approach and conditions under which an approach is suitable, examined through countries including South Africa, Peru, Chile, Argentina, Rwanda, Sierra Leone, former Yugoslavia; how methods increasingly are combined to achieve comprehensive societal remediation in aftermath of abuse.

Law Study Abroad

660:823 Program in Comparative Law in Bordeaux, France

Intensive course work in France taught by professors from Iowa and France. Five-week courses in May and June.

660:824 London Law Consortium

Study abroad program for students from seven law schools (Iowa, Georgia, Utah, Kansas, Missouri-Columbia, Indiana-Bloomington, Chicago-Kent); American and British law taught by faculty drawn from the seven schools and British universities; clinical law program, work with British barristers and solicitors.

Dean: Jean E. Robillard
Executive dean: Peter Densen
Interim senior associate dean for scientific affairs: Michael Apicella
Senior associate dean for clinical and translational sciences: Gary Hunninghake
Associate dean for student affairs and curriculum: Christopher Cooper
Associate dean for finance and administration: Patrick A. Thompson
Associate dean for faculty affairs and development: Lois J. Geist
Associate dean for veterans’ affairs: John S. Cowdery Jr.
Associate dean for communications and advancement: Steven Maravetz
Assistant dean for financial affairs: Mark Hingtgen
Assistant deans: Daniel S. Fick, James D. Henderson, Mark Hingtgen, Catherine Solow, Rams Subramanian, Roger D. Tracy
Director, facilities planning and management: James D. Henderson
Degrees: B.S., M.A., M.D., M.P.A.S., M.P.T., M.S., Ph.D.
Web site: http://www.medicine.uiowa.edu
The Roy J. and Lucille A. Carver College of Medicine is an integral part of The University of Iowa. It contributes to the education of several thousand University students, is home to groundbreaking research in a wide array of disciplines, and provides a statewide educational health care resource.

The Carver College of Medicine is the only college in Iowa that offers a curriculum leading to the Doctor of Medicine. It also is home to the Division of Associated Medical Sciences, which provides programs of education and training for physician assistants, clinical laboratory scientists, nuclear medicine technologists, physical therapists, and radiation sciences professionals.

The college participates in the education of students in the Colleges of Dentistry, Nursing, Pharmacy, and Public Health, and in the life-sciences and health-related programs of the College of Liberal Arts and Sciences, the College of Engineering, and the Graduate College.

Health professionals from throughout the Midwest take part in the college’s year-round program of continuing medical education. They update their knowledge and skills through refresher courses, clinics, and conferences.

Doctor of Medicine and other health science students have a number of opportunities to gain experience in private medical offices and community hospitals. M.D. graduates may pursue further training in the specialties of family medicine, internal medicine, surgery, and pediatrics at one of 10 University of Iowa-affiliated residency programs in six Iowa cities. They also have access to two transitional-year programs. The Carver College of Medicine also offers a variety of services in support of Iowa physicians and community hospitals.

In addition to its responsibilities for educating physicians, the college addresses broad public issues of distribution and organization of health care services. Its faculty members advise and serve on national, state, and regional health planning councils, health boards, and various health agencies; some faculty members also take part in the University’s Center for Health Services Research.

Accredited by the Liaison Committee on Medical Education of the American Medical Association and the Association of American Medical Colleges, the Carver College of Medicine meets the requirements of all state licensing boards. Its M.D. diploma admits the holder to all privileges granted to graduates of all medical colleges before such boards. All other professional programs administered by the college are accredited by their respective accrediting bodies.

**Professional Program (M.D.)**

**Doctor of Medicine**

The Carver College of Medicine accepts 148 first-year students annually into its four-year course of study leading to the Doctor of Medicine (M.D.).

**First and Second Years: Basic Medical Sciences and Clinical Foundations**

The first three semesters present a core of sciences basic to the study of medicine and introduce the student to the foundations of clinical practice.

**FIRST SEMESTER**

099:163 Medical Biochemistry presents concepts concerning structures of biological macromolecules, cellular metabolism, molecular biology and genetics, and extra- and intracellular signaling mechanisms. It uses clinical examples to illustrate how alterations in these molecules and pathways can lead to pathological conditions.

060:103 Medical Gross Human Anatomy includes complete dissection of the human body, stressing the relationship to the living system. Clinically relevant areas of anatomical radiology, surface anatomy, human embryology, and clinical correlations are included in lectures accompanying the dissection.

060:116 Medical Cell Biology presents concepts concerning the structure and function of the cell and its organelles at the molecular level. The course consists of basic science lectures and clinical correlations and relates basic cell biological concepts to the understanding and treatment of human disease.

070:110 Medical Genetics is integrated with ongoing classes in anatomy, biochemistry, and cell biology. It provides an overview of clinical and medical genetics, with particular emphasis on recent changes that affect clinical practice with respect to common diseases that have a genetic component.

050:162 Foundations of Clinical Practice I is the first semester of a sequential four-semester course that introduces clinical skills students need in order to become practicing primary care physicians.
The five major goals for students over the four-semester course are to develop knowledge, attitudes, and skills that are necessary for:

- maturation into a competent and confident clinician;
- maintaining a lifelong process of learning the practice of medicine;
- application of relevant basic science and clinical concepts and other scientific advances to the practice of medicine;
- application of the principles of health promotion and disease prevention to the practice of medicine; and
- increasing awareness of the ethical and social context in which medicine is practiced.

Through large group lectures, small case-based learning groups, and small-group skill building sessions, students focus on communication in the doctor-patient relationship, accessing and managing medical information, and applying basic principles of evidence-based medicine and medical ethics.

SECOND SEMESTER

060:234 Medical Neuroscience is a course for medical students, physical therapy students, and graduate students in the basic medical or related sciences. Through lectures, clinical correlate presentations, laboratories, and small group discussion sessions, the course emphasizes the interdisciplinary and integrated study of the human central nervous system. Its faculty is drawn from basic science and clinical departments.

148:251 Principles of Medical Immunology is offered by the interdisciplinary Immunology Program. Its goals are to teach basic components and mechanisms of the immune response as well as medical principles of normal and abnormal immunity. The course consists of lectures by Immunology Program faculty and small group case analysis sessions.

050:240 Human Organ Systems is an interdepartmental course that presents the normal structure (histology) and function (physiology) of human organ systems in a coordinated and integrated organ systems approach. The course is designed to emphasize structure/function relationships by integrating the microscopic anatomic and physiologic function of normal human organ systems. The course’s faculty includes members of basic science departments and clinical departments.

050:163 Foundations of Clinical Practice II is the second semester of a sequential, four-semester course that introduces clinical skills students need in order to become practicing primary care physicians (see 050:162 for overall course goals). In this semester, students continue to work toward course goals through small case-based learning groups, large-group lectures, and small-group skill acquisition sessions. They also are introduced to clinical medicine in a shadowing experience with health care providers. Principles of doctor-patient communication are reinforced and performance of the components of the general physical examination are taught and practiced. Multiculturalism, preventive medicine and health promotion, medical informatics, and the social context of medicine are included.

THIRD SEMESTER

071:105 Pharmacology for Health Sciences: Medical bridges the clinical and basic sciences and provides students with principles that must be understood in order to describe properly the actions of drugs in patients.

061:103 Principles of Infectious Diseases presents a comprehensive approach to the microbiology of infectious diseases, covering infectious agents at both the organismic and molecular levels. The molecular aspects of pathogenesis are presented as the basis for present and future preventive and therapeutic measures. The laboratory includes hands-on experiments ranging from principles of aseptic technique to the most modern molecular aspects of diagnostic microbiology.

069:205 Medical Pathology I starts with general principles of disease: cell injury, inflammation, immune mechanisms, neoplasia, and hemodynamic disorders, followed by etiology, pathogenesis, epidemiology, and major clinical and morphologic manifestations of disease by organ systems. The course combines lecture information, small group analytic skills, and observation of current laboratory procedures.

050:164 Foundations of Clinical Practice III is the third semester of a sequential, four-semester course that introduces clinical skills students need in order to become practicing primary care physicians (see 050:162 for overall course goals). This semester continues the knowledge, attitude, and skill acquisition begun in the preceding two semesters. Students continue to learn through small patient-centered learning groups as well as lecture and clinical skill-building small groups. Content areas include human sexuality, biomedical ethics, and
problem-specific medical history and physical exams. Students begin to apply clinical history taking and physical exam skills learned in preceding semesters by taking complete histories and performing physical exams on simulated and real patients.

Some elective courses are available to students during the first and second years. These normally carry 1 or 2 s.h. of credit. Topics include areas not specifically covered in the regular curriculum and areas related to medical practice and the role of the physician. Course offerings vary from year to year, but typical subject areas are global health issues, U.S. health care systems, and community health outreach.

**FOURTH SEMESTER**

069:206 Medical Pathology II is a continuation of 069:205 Medical Pathology I.

050:183 Health Care Ethics, Law, and Policy introduces M.D. and physician assistant students to health care ethics, law, and policy. Students learn to appreciate the inseparable relationship between medicine and ethics, recognize key ethical obligations and challenges common in medical practice, identify sources of ethical value commonly used in ethical reasoning, and apply a systematic approach to clinical ethical reasoning. They learn fundamental legal doctrines and theories that relate to business and professional aspects of the law pertaining to health care delivery. They also develop an understanding of the relationship and contrasts between ethics and law in medical practice, and they gain familiarity with the ways in which health policy influences medical practice.

050:165 Foundations of Clinical Practice IV is the final course in the foundation series. The fourth semester is devoted primarily to this major interdisciplinary course, which includes participation by a large proportion of the faculty and is vital in providing students with the tools for a lifetime of patient care.

Mornings are devoted to intensive review of the diagnostic and therapeutic aspects of organ-system-based clinical medicine. The reviews are presented by teams of specialty and subspecialty clinicians. Students spend afternoons acquiring and practicing the clinician’s skills in history taking and physical examination and in learning specialized exams. Small group learning and clinical case conferences take place throughout.

Each student is evaluated individually during the semester. Evaluations include the student’s approach to the patient, accuracy of history and physical examination, precision in communicating gathered data, ability to synthesize available data into a realistic differential diagnosis, and ability to apply the process of problem-based learning to the understanding of patient-based problems. Cognitive knowledge of topics covered in the morning lecture and small group sessions is assessed through computer-based multiple-choice examinations. Students who need further work receive guidance and assistance.

All M.D. students are required to pass Step 1 of the United States Medical Licensing Examination before they may be promoted to the third year of the curriculum.

**Third and Fourth Years: Clinical Training**

The clinical courses take place during the last two years of the medical curriculum. In order to qualify for graduation with the M.D., students must complete satisfactorily a total of 81 weeks of courses during the two clinical years:

- 69 weeks of required courses and 12 weeks of electives. Course distribution is 49 weeks in the first clinical year and 32 weeks in the second.

Clinical Beginnings (050:170), a required, 1 s.h. course, follows the first two years and precedes the start of clinical clerkships in the third year. Clinical Beginnings helps students make the transition between the first and the second two years of the curriculum by emphasizing the “four Cs”: Clinical reasoning and reflection; the core Competencies (patient care, medical knowledge, practice-based learning and improvement, interpersonal and communications skills, professionalism, and systems-based practice); interdisciplinary Collaboration and teamwork; and Critical appraisal of the literature and lifelong learning.

The required clerkships are as follows.

**Eight core clerkships:** internal medicine, obstetrics and gynecology, pediatrics, psychiatry, surgery, outpatient internal medicine, community-based primary care, and family practice preceptorship; each course includes a mix of inpatient and outpatient activities, introduces the student to a specific discipline or to the practice of medicine in the community, and presents the opportunity to develop and practice clinical skills.

**Required subspecialty clerkships:** anesthesia, dermatology, neurology, ophthalmology, orthopaedics, otolaryngology, radiology, and urology, and courses in laboratory medicine and electrocardiography.
Advanced clerkships: subinternship, in which the student assumes responsibility for managing patients in a variety of approved medical disciplines, supervised by a senior resident and a faculty physician; emergency room or intensive care rotation.

Three electives: electives chosen from clerkships listed in the course book distributed by the Carver College of Medicine.

FIRST CLINICAL YEAR COURSE REQUIREMENTS

All medical students must complete satisfactorily 49 weeks of courses, including 050:170 Clinical Beginnings (one week), 40 weeks of core clerkships, and 8 weeks of courses chosen from the required subspecialty clerkships.

SECOND CLINICAL YEAR COURSE REQUIREMENTS

All medical students must complete satisfactorily 32 weeks of clerkships chosen from those not completed in the first clinical year, including the required subspecialty clerkships, the advanced clerkships, and electives.

Although the primary venues for clinical training of medical students are the University of Iowa Hospitals and Clinics and the Veterans Affairs Iowa City Health Care System, the family practice preceptorship and the community-based primary care clerkship are off-campus rotations. Other courses may be assigned to off-campus sites, as well.

Admission to the M.D. Program

The Carver College of Medicine participates in the American Medical College Application Service (AMCAS), a nonprofit centralized application processing service for applicants to U.S. medical schools. AMCAS applications are available for completion in May of the year preceding the beginning of the class for which application is being made. Prospective students are urged to apply as early as possible. The deadline for AMCAS submission is November 1.

Secondary applications are forwarded to applicants whose AMCAS applications pass a review conducted by the college. A $60 fee must accompany the secondary application from all applicants.

Admitted applicants must have an official transcript from each college they have attended sent to the University’s Office of Admissions.

Technical Standards for Admission and Retention

The Carver College of Medicine seeks students who will serve the needs of society best, and it strives to graduate skilled and effective physicians. To achieve these goals, it applies the following principles and technical standards to candidates for admission and to continuing students.

PRINCIPLES

Technical standards refer to criteria that go beyond academic requirements for admission and are essential to meeting the academic requirements of the M.D. program.

Applicants to the Carver College of Medicine and students continuing in the college, with or without disabilities, are expected to meet the same requirements.

Matriculation and continuation in the college assume a certain level of cognitive and technical skill. Medical students with disabilities are held to the same fundamental standards as their nondisabled peers. Although not all students should be expected to gain the same level of proficiency with all technical skills, some skills are so essential that mastery must be achieved, with the assistance of reasonable accommodations where necessary.

Reasonable accommodations are provided to assist in learning, performing, and satisfying the technical standards.

Every reasonable attempt is made to facilitate the progress of students, providing that such efforts do not compromise collegiate standards or interfere with the rights of other students and patients.

TECHNICAL STANDARDS

Applicants for admission to the Carver College of Medicine and continuing students must possess the capability to complete the entire medical curriculum and be granted the degree. To this end, they must complete all courses in the curriculum successfully. In order to acquire the knowledge and skills to function in a broad variety of clinical situations and to provide a wide spectrum of patient care, M.D. students must have abilities and skills in five areas, including observation; communication; motor skills; intellectual, conceptual, integrative, and quantitative abilities; and behavioral and social attributes.

Technological compensation can be made for some disabilities in certain areas, but each...
student must meet the essential technical standards in such a way that he or she is able to perform in a reasonably independent manner. The use of a trained intermediary is not acceptable in many clinical situations, because it implies that the student’s judgment must be mediated by someone else’s power of selection and observation.

Observation: Students must have the functional ability to observe demonstrations and experiments in the basic sciences and must have sufficient use of the senses necessary to perform a physical examination.

Communication: Students must be able to relate reasonably to patients and establish sensitive, professional relationships with patients, colleagues, and staff. They are expected to communicate the results of the history and examination to the patient and to their colleagues with accuracy, clarity, and efficiency.

Motor: Students are expected to participate in basic diagnostic and therapeutic maneuvers and procedures. Those who cannot perform these activities independently should be able to understand and direct the methodology involved in such activities.

Intellectual, conceptual, integrative, and quantitative abilities: Students must be able to learn to analyze, synthesize, solve problems, and reach reasonable diagnostic and therapeutic judgments. Students are expected to be able to display good judgment in the assessment and treatment of patients. They must be able to learn to respond with prompt and appropriate action in emergency situations.

Behavioral and social attributes: Students are expected to be able to accept criticism and respond with appropriate modification of their behavior. Students also are expected to possess the perseverance, diligence, and consistency necessary to complete the M.D. curriculum and enter the independent practice of medicine in a reasonable period of time. They must demonstrate professional and ethical demeanor and behavior in all dealings with peers, faculty, staff, and patients.

Applicants who may not meet these standards are encouraged to contact the college’s admissions office.

Admission Requirements

Applicants for admission to the Carver College of Medicine must have a baccalaureate degree; or they must be enrolled in a baccalaureate degree program, have earned at least 94 s.h. of credit or the equivalent, and expect to receive their degree before enrolling in the Carver College of Medicine. They must have earned college credit in the following courses.

Physics: a complete introductory course (one year), including lab instruction.

Mathematics: college algebra and trigonometry; applicants who completed college algebra and trigonometry in high school must take a course in advanced college mathematics or in statistics.

Chemistry: a minimum of one complete introductory course in organic chemistry (one year), ordinarily following a complete introductory course in modern general chemical principles, each with the appropriate laboratories.

Biological sciences: a complete introductory course in the principles of biology, or zoology and botany (one year), each with the appropriate laboratories; and an advanced biology course (one semester or quarter); recommended advanced biology courses include biochemistry, molecular and cell biology, human physiology, genetics, and microbiology.

English: two courses (including composition and literature); the requirement may be waived if the applicant’s school has an integrated writing requirement in courses across its curriculum.

Social and behavioral sciences, and humanities: four courses; because writing skills are important in the study and practice of medicine, prospective applicants are encouraged to fulfill this requirement with courses that include a writing component; recommended courses include behavioral psychology, foreign language, and other courses that encourage appreciation for diversity and cultural competency.

Fulfillment of these requirements does not guarantee admission to the Carver College of Medicine. The college’s admissions committee selects applicants who appear to be best qualified to study and practice medicine.

Applicants must have a cumulative g.p.a. of at least 2.50 for all college work. Applicants should have taken the required science courses for a grade rather than electing pass/fail grading.

Preference is given to Iowa residents with high scholastic standing. Consideration also is given to outstanding nonresidents.

Applicants are required to take the Medical College Admission Test (MCAT) no earlier than five years before and no later than September of the year of application. MCAT registration is available on the AAMC web site (http://www.aamc.org).

Applicants for admission to the Carver College of Medicine must have a baccalaureate degree; or they must be enrolled in a baccalaureate degree program, have earned at least 94 s.h. of credit or the equivalent, and expect to receive their degree before enrolling in the Carver College of Medicine. They must have earned college credit in the following courses.

Physics: a complete introductory course (one year), including lab instruction.

Mathematics: college algebra and trigonometry; applicants who completed college algebra and trigonometry in high school must take a course in advanced college mathematics or in statistics.

Chemistry: a minimum of one complete introductory course in organic chemistry (one year), ordinarily following a complete introductory course in modern general chemical principles, each with the appropriate laboratories.

Biological sciences: a complete introductory course in the principles of biology, or zoology and botany (one year), each with the appropriate laboratories; and an advanced biology course (one semester or quarter); recommended advanced biology courses include biochemistry, molecular and cell biology, human physiology, genetics, and microbiology.

English: two courses (including composition and literature); the requirement may be waived if the applicant’s school has an integrated writing requirement in courses across its curriculum.

Social and behavioral sciences, and humanities: four courses; because writing skills are important in the study and practice of medicine, prospective applicants are encouraged to fulfill this requirement with courses that include a writing component; recommended courses include behavioral psychology, foreign language, and other courses that encourage appreciation for diversity and cultural competency.

Fulfillment of these requirements does not guarantee admission to the Carver College of Medicine. The college’s admissions committee selects applicants who appear to be best qualified to study and practice medicine.

Applicants must have a cumulative g.p.a. of at least 2.50 for all college work. Applicants should have taken the required science courses for a grade rather than electing pass/fail grading.

Preference is given to Iowa residents with high scholastic standing. Consideration also is given to outstanding nonresidents.

Applicants are required to take the Medical College Admission Test (MCAT) no earlier than five years before and no later than September of the year of application. MCAT registration is available on the AAMC web site (http://www.aamc.org).
Personal interviews are part of the admission process. Candidates invited for an interview are contacted by the admissions committee.

Applicants accepted on or before February 15 must submit an advance payment of $50 by March 1. Applicants accepted after February 15 must submit the $50 payment within two weeks after they receive notification of acceptance. The advance payment is credited toward tuition and fees.

All students who enter the Carver College of Medicine are required to comply with the pre-entrance and annual health screening program developed by the University’s Student Health Service in cooperation with University of Iowa Hospitals and Clinics.

All registered Carver College of Medicine students are required to maintain health insurance (or an equivalent care plan) that satisfies minimum standards of coverage. Insurance coverage must be maintained continuously throughout each year of attendance at The University of Iowa.

Academic Policies and Procedures

Student Promotion

The Carver College of Medicine has established promotion policies and procedures to ensure that each of its graduates has adequate skills, knowledge, judgment, ethical standards and personal integrity to assume the responsibilities of a medical doctor. The student promotions committee, made up of seven faculty members and two students, performs these duties with the cooperation, advice, and judgment of course directors, faculty members, students, and administrators.

The committee recommends specific actions to be taken when a student’s skills, knowledge, judgment, or ethical behavior is in any way considered consistently marginal or unsatisfactory. Possible recommendations include dismissal of the student from the college; suspension for a specified period of time; requiring the student to repeat all or any part of the curriculum on academic probation; and allowing the student to continue on academic probation with a full or partial course load. The committee’s recommendations are forwarded for action to the executive dean of the Carver College of Medicine.

Medical students have the right to appeal a promotion decision. They must submit the appeal in writing to the Carver College of Medicine’s executive dean within five days of notification of the decision. Appeals are considered by the Appeals Committee, made up of faculty representatives of the Medical Council and the Executive Committee, a medical student, a lay member, and the associate dean for student affairs (ex officio). Students may request an opportunity to appear before the Appeals Committee to make a statement and answer questions. The committee then makes its recommendation to the college’s dean, who is the final authority.

Specific information about student promotion policies and procedures is available from the Office of Student Affairs and Curriculum and is online in the Medical Student Handbook. See Office of Student Affairs and Curriculum/Student Handbook on the college’s web site.

Leaves of Absence, Withdrawal, Reinstatement

The Carver College of Medicine has established policies regarding leaves of absence, dropping courses, withdrawal from the college, and reinstatement to the college. Information about each of these policies is available at the college’s Office of Student Affairs and Curriculum and is published annually in the Medical Student Handbook.

Disputes and Complaints

Student complaints concerning actions of faculty members or departments are pursued first through mechanisms established in the Carver College of Medicine. These procedures allow the greatest flexibility for all concerned in resolving a conflict. They are intended for situations such as grading disputes, alleged academic dishonesty, alleged dishonesty during a clinical rotation, alleged unethical or unprofessional conduct, and perceived discrimination or harassment.

Complaints regarding sexual harassment are handled confidentially in accordance with University policy and procedures; see the University’s Policy on Sexual Harassment.

For information about the established informal mechanisms, contact the Office of Student Affairs and Curriculum or see the Medical Student Handbook.

Financial Aid

The Carver College of Medicine’s philosophy is that no student should be denied a medical education due to a lack of financial resources.
Admissions decisions at the Carver College of Medicine are made without consideration of financial need. Therefore, the Carver College of Medicine financial aid staff actively seeks financial aid sources so every student interested in a medical education can finance that education.

Financial assistance is provided by the Carver College of Medicine primarily on the basis of demonstrated financial need. Although a limited number of collegiate or institutional grants are available for the most economically disadvantaged students, most aid is in the form of loans. Examples of federal loan programs are the Federal Direct Stafford/Ford Student Loan, the Federal Direct Unsubsidized Stafford/Ford Student Loan, the Federal Perkins Loan, and the Primary Care Loan (PCL). Students also may qualify for Federal Direct Grad PLUS Loans or private loans to supplement their financial aid package.

In addition, the college supports scholarship and loan programs through permanent endowments and/or contributions from alumni and friends of the Carver College of Medicine. These funds are administered by the college’s financial aid office and are awarded as a part of a student’s total financial aid package. Funds to support short-term emergency loans are available for students with immediate financial need.

A small number of Dean’s Scholarships are awarded by the college’s admissions office to highly qualified candidates on the basis of their academic excellence, leadership abilities, and their potential to enrich the college. Dean’s Scholarships are included in the recipient’s overall financial aid package.

To learn more about financial aid, contact the Carver College of Medicine Office of Student Affairs and Curriculum financial services department.

**Interdisciplinary Biosciences Program**

The Graduate College and the Carver College of Medicine offer the interdisciplinary Biosciences Program, which gives graduate students the opportunity to become acquainted with basic molecular research in the Departments of Anatomy and Cell Biology, Biochemistry, Biological Sciences, Chemistry, Microbiology, Molecular Physiology and Biophysics, Pharmacology, Speech Pathology and Audiology, and the Programs in Free Radical and Radiation Biology, Genetics, Immunology, Molecular and Cellular Biology, and Neuroscience. The Biosciences Program offers graduate students flexibility during their first year of study, after which they select the department or program in which they will earn their Ph.D.

See Biosciences (Graduate College) for details.

**Medical Scientist Training Program**

The Medical Scientist Training Program (MSTP) is a joint M.D./Ph.D. program offered by the Carver College of Medicine and the Graduate College. The program prepares trainees for careers in academic medicine, with emphasis on basic and clinical research. It provides an effective means for integration of graduate education and doctoral research with the full complement of clinical studies necessary for the M.D. With few exceptions, requirements for the combined M.D./Ph.D. can be completed in seven to eight years of continuous study. See Medical Scientist Training Program for details.

**Translational Biomedicine**

The Carver College of Medicine and the Graduate College offer a program leading to an M.S. or Ph.D. in translational biomedicine. See Translational Biomedicine (Graduate College) for details.

**Joint Degree Programs**

Students who wish to pursue an M.D. in combination with a graduate degree must be admitted to both the M.D. program and the graduate program and must make arrangements with the graduate department and with the Carver College of Medicine associate dean for student affairs and curriculum. Examples of joint degree programs are the M.D./M.P.H. with the College of Public Health, M.D./M.B.A. with the
Tippie College of Business, and the M.D./J.D. with the College of Law.

**Faculty**

Nearly all Carver College of Medicine faculty members are full-time. Their work in practice and research is integral to their teaching. Many have earned national and international honors.

**Interdisciplinary Programs, Centers**

The college’s interdisciplinary programs and centers draw strength from college faculty members and the facilities available to them, without regard to departmental units or to the distinction between graduate and postgraduate training. For more information, contact the associate dean for research and graduate programs.

The following centers are subdivisions of the Carver College of Medicine.

**Alzheimer’s Disease Research Center**

The Alzheimer’s Disease Research Center studies Alzheimer’s disease and related neurological conditions from the viewpoint of neuroanatomy, neuroimaging, neuropsychology, and neurochemistry. The center’s purposes are to improve the diagnosis and treatment of these conditions, to disseminate information on new research to the public, and to contribute to a better understanding of the neural basis of cognition.

**Carver Family Center for Macular Degeneration**

The Carver Family Center for Macular Degeneration was organized to prevent the devastating consequences of macular degeneration in the majority of people at risk. For those already affected by the disease, the center works to develop sight-saving medical, pharmacological, and surgical treatments.

**General Clinical Research Center**

The Clinical Research Center is the focal point at The University of Iowa for interdisciplinary programs in clinical investigation. It provides a physical and intellectual environment in which clinical investigation can be conducted with maximum regard for patient welfare and safety. The center, which has been funded continuously for 43 years by the National Institutes of Health, is a discrete unit with research nurses and dietitians, biostatistical support, and a computer facility.

**Holden Comprehensive Cancer Center**

The Holden Comprehensive Cancer Center (HCCC) coordinates the efforts of University of Iowa faculty and staff in research, education, and demonstration programs related to all aspects of cancer. The HCCC is recognized by the National Cancer Institute as an NCI-designated cancer center and has “comprehensive” status, a designation that recognizes research scientists, physicians, and other health care professionals for their roles in treating and caring for patients with cancer.

**Iowa Cardiovascular Center**

The Iowa Cardiovascular Center coordinates research and training programs related to cardiovascular diseases. It encompasses several federally and nonfederally funded programs: Program—Project Grant on Integrative Functions in Neurovascular Control, the Specialized Center of Research (SCOR) in Coronary and Vascular Diseases, SCOR in Occupational and Immunologic Lung Disease, Program—Project Grant on Cerebral Blood Vessels, SCOR in Hypertension, SCOR in Congenital Heart Disease, SCOR in Cystic Fibrosis, Cystic Fibrosis Foundation Research and Development Program, Program—Project Grant on Gene Therapy for Cystic Fibrosis Lung Disease, Cystic Fibrosis Foundation Gene Therapy Center, and Training Center for Clinical Management of Lipid Disorders. It also coordinates several training programs and a coordinated program of other interdisciplinary research supported by a number of individual project grants.

The center occupies two floors of cardiovascular research laboratories and administrative offices in the Medical Research Center.

**Iowa Mental Health Clinical Research Center**

The major emphasis of the Iowa Mental Health Clinical Research Center is the study of schizophrenia. The center provides the facilities
for research linking the clinical picture of the illness with its underlying neurobiology. The center’s seven research units conduct the necessary integrative and interdisciplinary research to advance knowledge about the disease.

Facilities for Education and Patient Care

First- and second-year classes are taught in the Bowen Science Building, the Medical Education Building, the Medical Laboratories, and in classrooms and conference rooms of University of Iowa Hospitals and Clinics. The Medical Education and Research Facility houses the preclinical medical curriculum.

The Hardin Library for the Health Sciences is centrally located on the health sciences campus.

Students acquire clinical experience in the 762-bed University of Iowa Hospitals and Clinics, in the 93-bed Veterans Affairs Iowa City Health Care System (including observation beds), and in affiliated hospitals and ambulatory care centers throughout Iowa.

Faculty members of the Carver College of Medicine and the College of Dentistry make up the clinical staff at University of Iowa Hospitals and Clinics, whose 20 clinical services are directed by the heads of the corresponding academic departments in the two colleges. These faculty members also provide instruction for more than 700 resident physicians, dentists, and fellows who make up the house staff of University of Iowa Hospitals and Clinics, which provides facilities for teaching all major medical specialties, for residencies in all specialties, and for fellowships in a number of subspecialties.

University of Iowa Hospitals and Clinics serves as a tertiary care center for Iowa and portions of adjoining states. Many patients are referred to University of Iowa Hospitals and Clinics for care and treatment not readily available in their home communities.

Research Facilities

The Carver Biomedical Research Building (CBRB), which opened in fall 2005, greatly expands the college’s research space. It has 135,000 square feet and five floors of laboratories, and its lower level is home to a state-of-the-art nuclear magnetic resonance facility. Connected to CBRB is the Medical Education and Research Facility, which opened in 2001 with 220,000 square feet of education and biomedical research laboratory space.

The Eckstein Medical Research Building, which opened in 1989, was designed to provide spaces, mechanical systems, and support services that offer flexibility and adaptability for current and future research. The facility enables interdisciplinary groups of faculty scientists, each of whom is researching a human biology problem at the advancing edge of science, to conduct research in close proximity to other select researchers.

Other buildings that house research labs include Medical Laboratories, Bowen Science Building, Medical Education Building, Medical Research Facility, Medical Research Center, and buildings on the University’s Oakdale Campus.

A number of facilities that support the faculty’s research and teaching endeavors are administered through the Carver College of Medicine dean’s office. University of Iowa research facilities housed in the college include the Central Electron Microscopy Research and Learning Facility, the DNA Facility, the Flow Cytometry Facility, the Gene Targeting Core Facility, the Gene Transfer Vector Core Facility, the High Resolution Mass Spectrometry Facility, the Keck Dynamic Image Analysis Facility, the Large-Scale Fermentation Facility, the Molecular Analysis Facility, the Nuclear Magnetic Resonance Facility, the Tissue Culture/Hybridoma Core Facility, and the Transgenic Animal Facility.

The Office of Consultation and Research in Medical Education is made up of education specialists from a range of disciplines who serve the faculty, staff, and administration of all Carver College of Medicine programs. The office provides educational consultation, initiates and cooperates in educational research endeavors, and conducts faculty development activities.

Clinical research projects under University of Iowa faculty mentorship. Prerequisite: leave of absence from Carver College of Medicine.
050:147 End of Life Care for Adults and Families 2–4 s.h.
End-of-life issues faced by patients and families; epidemiology of
dying, care settings and systems, communication, pain and symptom management, well-being and quality of life; legal, ethical, and bereavement concerns. Prerequisite: consent of instructor. Same as 046:146, 096:147, 153:147.

050:162 Foundations of Clinical Practice I 5 s.h.

050:163 Foundations of Clinical Practice II 5 s.h.

050:164 Foundations of Clinical Practice III 5 s.h.
Experience practicing and expanding clinical skills and self-directed learning skills in clinical medicine; understanding medical practice in a social context. Prerequisites: 050:162, 050:163, and second-year M.D. enrollment.

050:165 Foundations of Clinical Practice IV ICD arr.
Basic diagnostic considerations in each of medicine’s clinical disciplines, as required of primary care providers. Prerequisites: 050:162, 050:163, 050:164, and second-year M.D. enrollment.

050:166 History of Medicine in Western Society 2 s.h.

050:168 Teaching of Physical Exam Skills 1–2 s.h.
Components of complete physical exam and educational techniques for teaching such skills: teaching of physical exam components to first-year students. Prerequisite: fourth-year M.D. enrollment.

050:169 Doctors in Film: Kildare to Sacks 2 s.h.
Development of the American hero literary figure through portraits of physicians in popular film.

050:170 Clinical Beginnings 1 s.h.
Orientation to third-year clerkships; technical skills, simulated patient activities, competence with the physical exam.

050:171 Women, Gender, and Medicine: Historical Perspective 4 s.h.
Women in medicine from two historical perspectives; women as patients, healers. Prerequisite: fourth-year M.D. enrollment.

050:174 Foundations of Clinical Practice for Physician Assistants 5 s.h.
Practice and expansion of clinical skills; development of broad understanding of the practice of medicine in social context; strengthening of self-directed learning skills in clinical medicine. Prerequisites: 117:101 and Physician Assistant Program enrollment.

050:175 Foundations of Clinical Practice IV for Physician Assistants arr.
Basic diagnostic considerations in each of medicine’s clinical disciplines, as required of primary care providers.

050:178 Facilitation of Patient-Centered Learning 1–2 s.h.
Experience in facilitating patient-centered learning groups; case discussion, critique of student presentations and assignments, clinical insight, evaluation of student performances.

050:180 Community-Based Primary Care arr.
Introduction; clinical activities, work with community agencies and resources, didactic and conferences. Prerequisite: M.D. enrollment.

050:183 Health Care Ethics, Law, and Policy 2 s.h.
Ethical and legal aspects of health care delivery.

050:185 The Examined Life: Writing and Medicine 1 s.h.
Literature, essays, poetry; discussion of participants’ writing; students prepare portfolios of their own writing.

050:190 Introduction to Medical Education at Iowa 0 s.h.
Introduction to first-year fall courses; advanced concepts in anatomy, biochemistry, cell biology, and clinical reasoning skills; for M.D. students.

050:195 Community Health Outreach I 0–1 s.h.
Presentations and practical experience working with agencies that provide health care and wellness promotion to communities; substance abuse; child, adolescent, and adult health; aging; interpersonal violence; homelessness.

050:196 Community Health Outreach II 1–2 s.h.
Presentations, patient-based learning groups, readings, and practical experience working with agencies that provide health care and wellness promotion to communities; substance abuse; child, adolescent, and adult health; aging; interpersonal violence; homelessness.

050:197 Community Health Outreach III 1–2 s.h.
Presentations, patient-based learning groups, readings, and practical experience working with agencies that provide health care and wellness promotion to communities; substance abuse; child, adolescent, and adult health; aging; interpersonal violence; homelessness.

050:203 Clinical Dietetics 1 s.h.
Nutritional aspects of health and disease, with emphasis on medical nutrition therapy; human nutrition in the clinical state as it relates to physiology and biochemistry.

050:211 MSTP Research arr.

050:212 MSTP Clinical Connections arr.
Experience with physician-scientist preceptor in medical interviewing, physical examination, patient presentation through direct patient interaction. Prerequisite: Medical Scientist Training Program graduate phase enrollment.

050:213 Interpreting Medical/Scientific Literature 1 s.h.
How to read, interpret, and present medical and scientific literature; students read and present representative papers from scientific and medical literature. Prerequisite: consent of instructor.

050:223 Seminar in Clinical Research 1 s.h.
Presentation of ongoing research projects and methodology in patient-oriented clinical research. Repeatable. Prerequisite: Clinical Investigation Training Program enrollment or consent of instructor.

050:224 Seminar in Translational Biomedicine 1 s.h.
Student research presentations, journal club, invited speakers.

050:225 Translational Biomedical Research arr.
Student research guided by mentor.

050:228 K30 Preceptorized Research arr.
Academic credit for the mentored research project required of trainees in the Graduate Training Program in Clinical Investigation. Prerequisite: consent of instructor.

050:240 Human Organ Systems 8 s.h.
Microscopic structure and function of major and specialized human organ systems; approach integrating normal microscopic anatomy and human physiology. Prerequisite: M.D. enrollment.

050:270 Responsible Conduct in Research 0 s.h.
Ethical issues; misconduct and fraud; proper handling of data; responsible authorship; conflict of interest; research on animals and human subjects. Prerequisite: consent of Carver College of Medicine.

050:280 Medicine, Narrative, and Poetics arr.
Insights, freedom, joy, responsibilities, and challenges of a life in medicine; reading, discussion, individual creative writing.

050:281 Global Health Issues—International 1 s.h.
Global health topics; theoretical structure for interpreting global health care issues; for medical students.

050:282 Global Cross-Cultural Clerkship arr.
Cross-cultural medical program at an international site; focus on health care problems of a specific community; individual educational objectives set in advance.
050:283 Health Informatics I 3 s.h. 
Technological tools that support health care administration, management, and decision making. Prerequisite: graduate standing or consent of instructor. Same as 021:275, 051:187, 056:186, 074:191, 096:283, 174:226.

050:284 Global Cross-Cultural Elective arr. 
Cross-cultural medical program with focus on health care problems of a domestic or international community; individually arranged.

050:285 Global Health Issues: Domestic Communities 1 s.h. 
Domestic health topics that illustrate health care needs of diverse domestic communities.

050:286 Introduction to U.S. Health Care System 1 s.h. 
Structure, function, and finance of U.S. health care system; access, cost, quality, finance mechanisms, reform process.

050:300 Teaching Skills for Medical Students 4 s.h. 
Practical teaching techniques; opportunity for students to develop teaching skills before they become medical residents.

050:701 Instructional Design and Technology 3 s.h. 
Skills and techniques necessary for analysis, design, development, implementation, and evaluation of effective instruction.

050:702 Clinical Teaching in Medical Education 3 s.h. 
Principles and methods for teaching individuals and small groups in outpatient and inpatient settings. Prerequisite: 050:701 or 07P:205. Recommended: educational psychology course.

050:703 Research Design and Evaluation in Medical Education 3 s.h. 
Research design and program evaluation; approaches relevant to medical education.

050:711 Teaching Methods in Medical Education 3 s.h. 
Principles and methods for teaching in large and small classrooms. Prerequisite: 050:701 or 07P:205. Recommended: educational psychology course.

050:712 Instruction to Educational Measurement in Medical Education 3 s.h. 
Classical test theory; overview of medical education assessment methods; practical information for designing and critiquing assessments.

050:713 Assessment in Medical Education 3 s.h. 
Medical education assessment methods; research methods and literature that support current practices; research project. Prerequisite: 050:712.

050:714 Current Issues in Medical Education 3 s.h. 
Selected issues, policies, and research.

050:720 Portfolio Project 3 s.h. 
Production of individual student portfolios used to integrate knowledge across courses; capstone activity. Prerequisite: consent of instructor.

050:721 Guided Independent Study in Faculty Development 3 s.h. 
Academic credit for approved project or other assigned activities for students in the Teaching Scholars program.

050:722 Independent Study arr. 
Repeatable.

050:995 Individual Project: Medical History arr. 

050:999 Special Study off Campus arr. 
Arranged by student with department’s approval.
673:911 Diagnostic Cardiac Sonography 0 s.h.
Principles, methods in using ultrasound; specialties including adult and stress echocardiography; six-month program; national certification examination required at completion of program.
Prerequisite: completion of an accredited medical sonography or vascular technology program.

673:912 Cardiac Sonography Clinical Course 0 s.h.
Using ultrasound as an imaging modality; specialties, including adult echocardiography, stress echocardiography; six-month program; national certification examination required at completion. Prerequisite: completion of an accredited medical sonography or vascular technology program.

674:806 Magnetic Resonance Imaging I 0, 8, 12 s.h.
Procedures and pathophysiologic, physics, advanced sectional anatomy, instrumentation, supervised clinical education; nine-month program; national recognition examination recommended at completion. Prerequisite: completion of radiologic technology program.

674:807 Magnetic Resonance Imaging II 0, 8, 12 s.h.
Prerequisites: 674:806 and completion of radiologic technology program.

674:808 Magnetic Resonance Imaging III 0, 8 s.h.
Procedures, pathophysiologic, physics, advanced sectional anatomy, instrumentation, supervised clinical education; nine-month program; national recognition examination recommended at completion of program. Prerequisites: 674:807 and completion of radiologic technology program.

675:808 Cardiovascular Interventional I 0, 8 s.h.
Imaging equipment, intervention, techniques, digital angiography, vascular anatomy and physiology, pharmacology, sterile techniques, cardiac monitoring; six-month program; national recognition examination recommended at completion.
Prerequisite: completion of radiologic technology program.

675:809 Cardiovascular Interventional II 0, 7 s.h.
Prerequisites: 675:808 and completion of radiologic technology program.

676:100 Sectional Anatomy for Imaging Sciences 3 s.h.
Sectional anatomy identifiable on computed tomography and magnetic resonance imaging, including transverse, coronal, and sagittal planes.

676:110 Pathology for Advanced Imaging 3 s.h.
Common pathological conditions found on computed tomography and magnetic resonance imaging, including protocol appearance variations.

676:120 Computed Tomography Procedures 5 s.h.
Computed tomography procedures, including positioning techniques, patient preparation, monitoring, and care; indications and contraindications for procedures and contrast media usage. Prerequisite: successful completion of primary ARRT certification in radiologic technology, nuclear medicine, or radiation therapy.

676:130 Computed Tomography Physical Principles and QC 4 s.h.
Computed tomography physics, including principles of data acquisition, image reconstruction and manipulation, image quality, radiation dose, spiral/helical CT, and QC tests for scanners. Prerequisite: successful completion of primary ARRT certification in radiologic technology, nuclear medicine, or radiation therapy; and demonstration of personal behaviors consistent with professional and employer expectations.

676:140 Computed Tomography Clinical Internship 3 s.h.
Computed tomography clinical internship completed at University of Iowa Hospitals and Clinics. Prerequisites: successful completion of primary ARRT certification in radiologic technology, nuclear medicine, or radiation therapy; and pre-acceptance into the CT internship. Pre- or corequisites: 676:120 and 676:130.

676:810 Computed Tomography I 0, 8 s.h.
Sectional anatomy, procedures and pathology, physics and imaging, introduction to multidetector CT, physiologic and 3-D imaging, CT simulation; six-month program; national recognition examination at recommended completion of program.
Prerequisite: completion of radiologic technology program.

676:813 Computed Tomography II 0, 7 s.h.
Prerequisites: 676:810 and completion of radiologic technology program.

677:101 Emergency Medical Technician—Paramedic I 0 s.h.
Preparation for role of entry-level paramedic: comprehension, application, and evaluation of the clinical role; demonstration of technical proficiency in all required skills; demonstration of personal behaviors consistent with professional and employer expectations. Prerequisite: certification as an emergency medical technician—basic.

677:102 Emergency Medical Technician—Paramedic II 0 s.h.
Preparation for role of entry-level paramedic: comprehension, application, and evaluation of the clinical role; demonstration of technical proficiency in all required skills; demonstration of personal behaviors consistent with professional and employer expectations. Prerequisite: 677:101.

677:103 Emergency Medical Technician—Paramedic III 0 s.h.
Preparation for role of entry-level paramedic: comprehension, application, and evaluation of the clinical role; demonstration of technical proficiency in all required skills; demonstration of personal behaviors consistent with professional and employer expectations. Prerequisite: 677:102.

678:816 Principles of Quality Management/PACS I 0, 8 s.h.
Administrative quality improvement techniques, equipment testing, and management of digital images. First of a two-semester sequence. Prerequisite: American Registry of Radiologic Technologists certification and acceptance to QM/PACS program.

678:817 Quality Management/PACS II 0, 7 s.h.
Quality control data analysis, mammography quality management, research methods; picture, archival, and communications systems administration, implementation, analysis. Second of a two-semester sequence. Prerequisite: 678:816. Recommended: national examination at completion.

679:915 Principles of Breast Imaging 3 s.h.
Comprehensive treatment of Mammography Quality Standards Act (MQSA) initial training requirements for X-ray technologists. Prerequisite: ARRT certification.
The Department of Anatomy and Cell Biology performs three major functions. It teaches human anatomy to students preparing for careers in the health care professions; provides advanced courses, teaching experience, and research training to graduate students preparing for careers in academic research and related scientific fields; and conducts original research on the biological basis of cellular functions and human disease processes.

Preclinical Study
The department contributes to the preclinical education of health care professionals by providing major courses in gross anatomy, cell biology, histology, and neuroscience. The department participates in the Carver College of Medicine's Medical Scientist Training Program and the Graduate College's Biosciences, Molecular and Cellular Biology, Immunology, Genetics, and Neuroscience Programs.

Graduate Program
Doctor of Philosophy
The Doctor of Philosophy requires a minimum of 72 s.h. of graduate credit. Students in the Ph.D. program work toward the doctorate without an intermediate master's degree program. They complete courses focused in one of three major areas—molecular medicine, cell and developmental biology, or neurobiology—in addition to related background and elective courses. Students also teach in lecture and laboratory courses under faculty supervision. The program may be completed in four to five years of intensive, full-time residence.

During the first year, students rotate through two or more faculty research laboratories. They choose a research area and become affiliated with a faculty member, who acts as their major advisor. By the end of the second year, students undertake the comprehensive examination, which assesses their ability to analyze, organize, and apply the information, concepts, and skills acquired in the first two years of the program. They define a research problem with their major advisor and formulate a research prospectus.

Subsequent years are devoted primarily to research.

The final Ph.D. examination consists of a public oral defense of the dissertation. The dissertation is based on original research conducted with the guidance of the major advisor and at least four other faculty members on the thesis committee.

Admission
Applicants to the Ph.D. program in anatomy and cell biology should have undergraduate preparation that includes college mathematics through calculus, one year of organic chemistry, one year of general physics, and at least two upper-level courses in biological sciences. Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog. In addition to taking the Graduate Record Examination (GRE) General Test, applicants are strongly encouraged to take the Graduate Record Examination Subject Test in Biology or their major undergraduate area.

Financial Support
Financial aid is awarded on a competitive basis to students admitted to the Ph.D. program. Applications for aid should be completed concurrently with the admissions application.
The department occupies more than 35,000 square feet in the Bowen Science Building on the health sciences campus. The building houses modern teaching facilities and well-equipped research laboratories. The most modern instrumentation is available, including facilities and equipment for digital microscopic imaging, confocal microscopy, molecular biological techniques, tissue culture, and protein chemistry. Through collaborative programs with the Holden Comprehensive Cancer Center and Iowa Cardiovascular Center, faculty and students also have access to outstanding research facilities throughout the University of Iowa health sciences campus.

060:229 Applications in Teaching Biomedical Science 1 s.h.
Participation in student-focused active learning experiences; may include lecture, discussion, video, reading. Prerequisite: enrollment in teaching certificate program.

060:230 Molecular Basis Vertebrate Development 2 s.h.
Fundamentals of human embryology, concepts in developmental biology; current literature. Offered fall semesters of odd years. Prerequisite: graduate standing or consent of instructor.

060:232 Advanced Human Anatomy arr.
Regions, systems relevant to specialty interests of student; dissection, discussion, reading, clinically relevant radiology. Offered spring semesters. Prerequisites: fourth-year M.D. enrollment or graduate standing, and consent of supervising faculty member.

060:234 Medical Neuroscience 4 s.h.
Basic principles of systems neuroscience with focus on structure and function of the human central nervous system; clinical applications of structural and functional neuroscience, and correlations with current research; neuroanatomical study of brain, spinal cord, and related structures in laboratory; self-directed learning in group discussions of neurological patient cases. Offered spring semesters. Prerequisite: M.D. or Physical Therapy and Rehabilitation Science Program enrollment or consent of course director. Same as 132:234.

060:265 Neuroscience Seminar 0-1 s.h.

060:270 Human Anatomy, Physiology, Pathophysiology, and Assessment for Advanced Practice Nursing 3, 6 s.h.
Interrelationships between anatomic structure and physiological function in health and disease; clinical assessment of functional integrity of organ systems; implications of pathophysiology for anesthesia. Prerequisite: admission to Anesthesia Nursing Program or consent of instructor. Same as 096:270.
Anesthesiology

Head: Michael M. Todd
Professors emeriti: Mohamed Ghoneim, Peter J.R. Jebson, Martin Sokoll
Associate professor emeritus: James G. Carter
Web site: http://www.anesth.uiowa.edu

Medical Student Training

The Department of Anesthesiology introduces second-year medical students to anesthesia as a specialty; helps third-year students develop concepts and technical skills related to resuscitation, airway management, and care of the unconscious patient; and offers fourth-year students intensive study in the specialty.

Nurse Anesthetist Program

The department coordinates the Anesthesia Nursing Program, a collaboration between the Carver College of Medicine and the College of Nursing. The program, open to nurses who hold a bachelor’s degree, prepares nurse anesthetists to serve rural hospitals in Iowa and nationwide. The curriculum provides intensive training in didactic and clinical anesthesia and includes diverse clinical experience as well as classroom instruction, seminars, and clinical case conferences.

Courses

116:006 Clinical Anesthesia 2 s.h.
Clinical instruction in perioperative care of the surgical patient; preoperative evaluation, consideration of co-existing medical problems, intraoperative care, postoperative management; basic airway management; introduction to clinical management of acute and chronic pain; case conferences, simulator training.

116:010 Clinical Anesthesia Senior arr.
Advanced clinical experience in anesthesia management of surgical patients with co-existing medical problems; clinical experience in various forms of anesthesia; general, regional (spinal, epidural, peripheral nerve block) anesthesia; practical experience in airway management; mask ventilation, endotracheal intubation, LMA placement, other alternative airway techniques; medical management of surgical patient under anesthesia; pharmacology, cardiovascular and pulmonary physiology; case conferences.

116:271 Chemical and Physical Principles of Anesthesia Practice 3 s.h.
Chemistry and physics, as applied to anesthesia. Prerequisite: admission to anesthesia nursing program or consent of instructor. Same as 096:271.

116:272 Pharmacology of Anesthesia Practice I 3 s.h.
Mechanism and action of drugs; focus on pharmacotherapeutic principles, including pharmacokinetics, pharmacodynamics, receptor binding, cell signaling; principles of uptake, distribution, elimination of anesthetic and adjunctive agents. Prerequisites: grade of 2.67 or higher in 116:271 or consent of instructor, and admission to anesthesia nursing program. Same as 096:272.

116:273 Pharmacology of Anesthesia Practice II 1 s.h.
Continuation of 116:272; vascular, hepatic, renal, GI, endocrine aspects; cellular mechanisms, electrolytes alterations. Prerequisites: grade of 2.67 or higher in 116:272 or consent of instructor, and anesthesia nursing program enrollment. Same as 096:273.
Overview of anesthesia as a nursing specialty; patient assessment, anesthetic planning and management, pertinent regulations; principles of general and regional anesthesia for surgical specialties. Prerequisite: grade of 2.67 or higher in 116:272 or consent of instructor. Corequisite: 116:273. Same as 096:274.

Special needs and intraoperative management of obstetric, pediatric, and neurological patients; emphasis on pathophysiology, monitoring, ancillary requirements. Prerequisites: grade of 2.67 or higher in 116:273 and 116:274, or consent of instructor. Same as 096:276.

Special needs and intraoperative management of patients in cardiac, vascular, thoracic, and other surgical specialties; focus on altered pathophysiology, anesthetic requirements; strategies for special surgical situations. Prerequisites: grade of 2.67 or higher in 116:273 and 116:274, or consent of instructor. Same as 096:277.

Acute and chronic pain management; anesthetic problems with concurrent multisystem disease, advanced age, altered physical and/or mental status. Prerequisites: grade of 2.67 or higher in 116:273 and 116:274, or consent of instructor. Same as 096:278.

Issues in contemporary anesthesia nursing practice: historical development; ethical, legal, and political aspects; evaluation; quality management; responsibilities; career expectations and development; role of professional organization. Prerequisite: anesthesia nursing program enrollment. Same as 096:279.

Anesthesia delivery systems, ancillary equipment, monitoring devices; correlation of applicable chemical and physical principles for use, safe operation, care, and cleaning of anesthesia-related equipment. Prerequisites: 116:271 and anesthesia nursing program enrollment. Same as 096:279.

Drugs specific to various specialty areas: tocolytics, vasoactive and cardioactive agents, drugs that alter clotting, chronic pain therapy agents. Prerequisites: grade of 2.67 or higher in 116:273 or consent of instructor, and anesthesia nursing program enrollment. Same as 096:287.

Initial anesthesia preceptorship under faculty supervision; development of basic clinical skills for work as a nurse anesthetist. Prerequisites: basic science core courses and anesthesia nursing program enrollment. Same as 096:290.

Supervised anesthesia clinical experience for general, orthopedic, gynecologic, pediatric, urologic, dental, EENT, ambulatory surgery, or invasive diagnostic procedures. Prerequisites: 116:290 and anesthesia nursing program enrollment. Same as 096:291.

Clinical anesthesia experience under faculty supervision at University Hospitals and Clinics, in surgical subspecialty rotations not completed in 116:291. Prerequisites: 116:291 and anesthesia nursing program enrollment. Same as 096:292.
Biochemistry

Head: John E. Donelson
Professors emeriti: Arthur Arnone, Thomas W. Conway, Rex Montgomery, Earle Stellwagen, Charles A. Swenson
Adjunct professors: Theresa Gioannini, Nancy C. Stellwagen, Joseph Walder
Associate professors: John Dagle, Adrian Elcock, Ramaswamy Subramanian, Lori Wallrath
Adjunct associate professor: Kenneth P. Murphy
Assistant professors: Kris DeMali, Ernesto Fuentes, Shahram Khademi, M. Todd Washington
Lecturer: Elisabeth Swain

Undergraduate degrees: B.A., B.S. in Biochemistry
Graduate degrees: M.S., Ph.D. in Biochemistry
Web site: http://www.biochem.uiowa.edu/

Biochemistry is the study of the basic chemical processes that occur in all living systems. It is one of the most active sciences, and it provides a foundation for other biosciences.

Biochemists generally work in laboratories and/or classrooms. Those with a bachelor’s degree are often employed as research assistants in industry, government, education, and health service, or in secondary school teaching, for which licensure is required.

Biochemists with advanced degrees—usually a doctorate—pursue teaching, research, and/or administrative careers in universities, medical schools, hospitals, private research agencies, government laboratories, biotechnology companies, and in food, drug, cosmetics, chemical, petroleum, and allied industries.

Undergraduate Programs

The College of Liberal Arts and Sciences administers undergraduate programs and grants undergraduate degrees in biochemistry. The Department of Biochemistry offers programs of study leading to the Bachelor of Science and the Bachelor of Arts. Requirements are outlined below.

Students choose advanced science electives to supplement biochemical studies or to satisfy requirements of a minor or a double major. In order to count science electives numbered below 100 toward the degree, students must have their advisor’s approval.

Transfer credit for biochemistry courses requires the approval of an undergraduate advisor in biochemistry.

Bachelor of Science

The B.S. program in biochemistry prepares students to work in positions that require a mastery of general biochemistry. It is also excellent preparation for graduate study in biochemistry and related sciences or for study toward a professional degree in the health sciences.

The B.S. in biochemistry requires 73 s.h. in the major in addition to completion of the College of Liberal Arts and Sciences General Education Program. Courses required for the B.S. are as follows.

All of these:
002:010-002:011 Principles of Biology I-II 8 s.h.
004:011-004:012 Principles of Chemistry I-II 8 s.h.
22M:025-22M:026 Calculus I-II 8 s.h.
029:081-029:082 Introductory Physics I-II 8 s.h.
099:001 Orientation and Introduction to the Field of Biochemistry 0 s.h.
099:101 Technical Communication in Biochemistry 1 s.h.
099:120 Biochemistry and Molecular Biology I 3 s.h.
099:130 Biochemistry and Molecular Biology II 3 s.h.
099:135 Research, Independent Study (required of all B.S. students and all honors students) 6 s.h.
Advanced science electives, chosen in consultation with advisor 9 s.h.

One of these sequences:
004:121-004:122 Organic Chemistry I-II 6 s.h.
004:123-004:124 Organic Chemistry for Majors I-II (preferred) 6 s.h.

Two of these:
004:131 Physical Chemistry I 3 s.h.
004:132 Physical Chemistry II 3 s.h.
099:241 Biophysical Chemistry I 3 s.h.
099:242 Biophysical Chemistry II 3 s.h.

One of these:
004:141 Organic Chemistry Laboratory 3 s.h.
004:142 Organic Chemistry Laboratory for Majors (preferred) 3 s.h.

*Students may register for 099:155 only if they have earned an average grade of B or higher in 099:120, 099:130, and 099:140 and a grade of B-minus or higher in each of 099:120, 099:130, and 099:140; or have consent of advisor and instructor. Students may register for 099:115 any time.

Students are encouraged to begin research by taking 099:115 Undergraduate Independent Study (may be taken for a total of 6 s.h.). There are no prerequisites. Students may arrange independently to take this course, or they may request assistance from an undergraduate advisor.

**Bachelor of Arts**

The B.A. in biochemistry requires 58 s.h. in the major in addition to completion of the College of Liberal Arts and Sciences General Education Program. The required courses are as follows.

All of these:
002:010-002:011 Principles of Biology I-II 8 s.h.
004:011-004:012 Principles of Chemistry I-II 8 s.h.
22M:025-22M:026 Calculus I-II 8 s.h.
099:011-029:012 College Physics 8 s.h.
099:001 Orientation and Introduction to the Field of Biochemistry 0 s.h.
099:101 Technical Communication in Biochemistry 1 s.h.
099:120 Biochemistry and Molecular Biology I 3 s.h.
099:130 Biochemistry and Molecular Biology II 3 s.h.
099:140 Experimental Biochemistry 4 s.h.
Advanced science electives, chosen in consultation with advisor 6 s.h.

One of these sequences:
004:121-004:122 Organic Chemistry I-II 6 s.h.
004:123-004:124 Organic Chemistry for Majors I-II (preferred) 6 s.h.

One of these:
004:131 Physical Chemistry I 3 s.h.
004:132 Physical Chemistry II 3 s.h.
099:241 Biophysical Chemistry I 3 s.h.
099:242 Biophysical Chemistry II 3 s.h.

In addition, B.A. students intending to go on to advanced degrees in the biological or health sciences are advised to include 4 s.h. or more of 099:115 Undergraduate Independent Study or 099:155 Research, Independent Study (senior research) in their programs.

**Teacher Licensure**

Biochemistry majors, especially those in the B.A. program, may qualify for teacher licensure by taking additional courses in teacher education. Consult the College of Education for details.

**Four-Year Graduation Plan**

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

**Bachelor of Science**

Before the third semester begins: 004:011 and 004:012, 22M:025, 099:001, and at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: the courses listed above, plus 002:010 and 002:011; 004:121, 004:122, and 004:141; 22M:026; and at least one-half of the semester hours required for graduation

Before the seventh semester begins: the courses listed above, plus 029:081 and 029:082, 099:120, 099:130, and 099:140, two science electives, and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: the courses listed above, plus 004:131 or 004:132 or 099:241 or 099:242, a science elective, and at least 3 s.h. of 099:155

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

**Bachelor of Arts**

Before the third semester begins: 004:011 and 004:012; math through 22M:026 or higher; 099:001; and at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: the courses listed above, plus 002:010 and 002:011, 004:121 and 004:122, and at least one-half of the semester hours required for graduation
Before the seventh semester begins: the courses listed above, plus 029:011 and 029:012, 099:120, 099:130, and 099:140, two science electives, and at least three-quarters of the semester hours required for graduation.

Before the eighth semester begins: the courses listed above, plus 004:131 or 004:132 or 099:241 or 099:242, and a science elective.

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate.

Honors

Qualified students may earn an honors degree in biochemistry. They must be members of the University of Iowa Honors Program, which requires students to maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University of Iowa Honors Program for more information). Honors students in biochemistry must complete 099:155 Research, Independent Study. They must present their research results in a report written in the form of a journal article and in an oral report presented at a special open departmental seminar.

Courses in Other Departments

Students, especially those in the B.A. program, may include courses from other disciplines, such as business, pre-law, psychology, or journalism. This prepares them for one of the many vocations on which biochemistry has an impact.

Graduate Program

The Carver College of Medicine and the Graduate College coordinate the graduate program in biochemistry and other biosciences; graduate degrees are granted through the Graduate College. See Carver College of Medicine and Graduate College in the Catalog for general information about study in medicine and graduate study at the University.

The Department of Biochemistry offers a program of study leading to the M.S. and Ph.D. The Master of Science in biochemistry requires a minimum of 30 s.h. of graduate credit. The Doctor of Philosophy requires a minimum of 72 s.h. of graduate credit.

Students admitted to the graduate program in biochemistry usually pursue the Ph.D. Qualified students may pursue a combined program leading to the M.D./Ph.D. (Medical Scientist Training Program).

The focus of the graduate program is on the individual student. Students choose from three curricula to satisfy requirements for the degree: standard, biophysical emphasis, or molecular emphasis.

In the first year, students engage in formal course work and tutorial laboratory experiences that serve as the basis for selecting a topic for thesis research. They spend half of their time in courses and the other half working in four different faculty laboratories (099:261 Research Techniques), where they learn research techniques in the context of ongoing research.

All biochemistry graduate students take the following courses.

- 099:282 Seminar 0-1 s.h.
- 156:201 Principles in Molecular and Cell Biology 4 s.h.

Graduate students in the standard curriculum also must take the following.

- 099:241-099:242 Biophysical Chemistry I-II 6 s.h.
- 142:215 Molecular Biology of Gene Expression 3 s.h.
- Electives 6 s.h.

Graduate students in the biophysical emphasis also must take the following.

- 099:241-099:242 Biophysical Chemistry I-II 6 s.h.
- Electives 9 s.h.

Graduate students in the molecular emphasis also must take the following.

- 099:241 Biophysical Chemistry I or 099:242 Biophysical Chemistry II 3 s.h.
- 142:215 Molecular Biology of Gene Expression 3 s.h.
- Electives 9 s.h.

Once students are promoted to a second year of study, they choose research laboratories for Ph.D. thesis research and begin their thesis projects. They take courses that supplement their interests and preparation, including the following required courses.

- 099:237 Topics in Molecular and Cell Biology 2 s.h.
- 099:238 Topics in Biophysical Chemistry 1-2 s.h.
- 099:282 Seminar 0-1 s.h.
- 650:270 Responsible Conduct in Research 1 s.h.
Research Biochemistry (099:292) and elective science courses numbered 100 or above in other departments satisfy the remaining course requirements.

Students take the comprehensive examination before the end of June in their second year, after which they are admitted formally to degree candidacy and begin to concentrate on thesis research. The program culminates in successful defense of completed thesis work before an examining committee.

In addition to meeting these requirements and those of the Graduate College, students are expected, as part of their training, to assist in teaching biochemistry for two or three semesters. Throughout the program, students are associated with faculty-directed research groups. They receive close personal attention from the biochemistry faculty members who serve as research advisors.

Admission

The graduate program in biochemistry is flexible enough to accommodate students with bachelor’s degrees in any of the biological, biochemical, or physical sciences. Appropriate preparation includes one-year, college-level courses in organic and physical chemistry, biology, physics, and mathematics through calculus. Students are expected to have had one or more introductory courses in biochemistry.

Applicants must have an undergraduate g.p.a. of at least 3.00 and must submit acceptable verbal, quantitative, and analytical scores on the Graduate Record Examination (GRE) General Test. Applicants are encouraged to submit their scores on the GRE Subject Test in Chemistry; Biology; or Biochemistry, Cell, and Molecular Biology.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

Financial Support

Students admitted to the Ph.D. program in biochemistry routinely receive a stipend and tuition support.

Research

The department’s current research interests include protein structure and function, protein folding, DNA bending, complex carbohydrate structure and function, regulation of gene expression, mechanisms of transcription and replication, enzyme reaction mechanisms, intracellular signaling, differentiation, and membrane determinants of cell shape and motility. Visit the Department of Biochemistry web site for details.

Facilities

Many of the Department of Biochemistry’s research and teaching facilities are located on a single floor in the Bowen Science Building, where the Departments of Anatomy and Cell Biology, Microbiology, Molecular Physiology and Biophysics, and Pharmacology also are located. Several of the department’s research groups are located in the adjacent Medical Education and Research Facility.

The University of Iowa maintains a number of central research support facilities and equipment that promote campuswide interactions between research groups. These include the facilities for electron microscopy, fermentation, image analysis, high field NMR, high resolution mass spectrometry, and academic computing (through Information Technology Services). Carver College of Medicine research facilities are available to biochemistry researchers for nuclear magnetic resonance, flow cytometry, DNA synthesis, tissue culture hybridoma, gene transfer, X-ray analysis, and transgenic and gene targeting.

Individual faculty research laboratories are well-equipped for modern research, and there are many common-use laboratories, including instrument rooms, a reading room, cold rooms, tissue culture areas, preparation rooms, and a stockroom. Research is supported by staff in instrument shops, animal quarters, photography and illustration service, and by office staff, stockroom supervisors, and a purchasing agent.

Together, the department and the central support facilities provide virtually all of the equipment required for modern biochemical research. Examples of such equipment include analytical and preparative ultracentrifuges; fluorescence, optical rotatory dispersion, high-field NMR, ultraviolet-visible, and rapid kinetic instruments; amino acid analyzers and protein sequencers, gas chromatographs, preparative high performance liquid chromatographs, liquid scintillation counters, electrophoresis equipment, instrumentation for protein X-ray crystallography and microcalorimetry, and automated DNA sequencers.
The department maintains a reading room stocked with primary books and journals used by biochemists. The Hardin Library for the Health Sciences is a large, complete library located on the Health Sciences Campus. Excellent resources also are provided by branches of the University of Iowa Libraries and by computer access to bibliographic retrieval services.

**Courses**

**099:001 Orientation and Introduction to the Field of Biochemistry**  
Biochemistry and its application to other areas of basic sciences; biochemical studies, research, careers.  

**099:101 Technical Communication in Biochemistry**  
Practical aspects of writing formal scientific papers and giving oral presentations on technical topics. Prerequisites: 099:120 or 099:130 or 099:140 or consent of instructor; and senior standing.  

**099:110 Biochemistry**  
Basic concepts in modern biochemistry and molecular biology; understanding of life processes in molecular terms. Prerequisites: one year each of college-level biology and chemistry. Recommended: one semester of organic chemistry. 

**099:115 Undergraduate Independent Study**  
Experience in an active biochemistry research lab, learning and performing experiments relevant to the current projects in that lab; exploration of scientific literature on topic of interest; arranged in advance by student and faculty member. Prerequisite: first-year, sophomore, or junior standing. 

**099:120 Biochemistry and Molecular Biology I**  
Physical and chemical foundations of biochemistry, structure of biological molecules, catalysis, transport, and oxidative reactions in biology; first course of two-semester sequence that concludes with 099:130. Prerequisites: two semesters of general chemistry and one of organic chemistry. Recommended: 002:010, 002:011, and an additional organic chemistry course. 

**099:130 Biochemistry and Molecular Biology II**  
Metabolism of lipids and nitrogen-containing compounds; regulation and integration of metabolism; information transfer in prokaryotes and eucaryotes; recombinant DNA techniques; chemistry and enzymology of replication, transcription, translation, cell transformation, and regulation of gene expression. Prerequisite: 099:120. 

**099:140 Experimental Biochemistry**  
Use of modern instruments and techniques to fractionate, identify, and characterize constituents of biochemical systems. Prerequisites: 004:016 or 004:020, and 099:120. 

**099:155 Research, Independent Study**  
Independent study and research in areas of interest to the student; arranged in advance by student and biochemistry honors advisor. Prerequisites: grade of B- or higher in 099:120, 099:130, and 099:140, and g.p.a. of B or higher in all three courses. 

**099:161 Biochemistry for Dental Students**  
Biochemical concepts and application to clinical problems. Prerequisites: 004:121 or consent of instructor, and D.D.S. enrollment or consent of instructor. Recommended: 004:122. 

**099:162 Biochemistry for Pharmacy Students**  
Biochemical concepts and application to clinical problems. Prerequisites: 004:121 and Pharm.D. enrollment, or consent of instructor. Recommended: 004:122. 

**099:163 Medical Biochemistry**  
Biochemical concepts and application to clinical problems. Prerequisite: M.D. enrollment. 

**099:164 Biochemistry for Physician Assistant Students**  
Aspects of general biochemistry necessary for understanding the biochemical basis of human disease; analysis of appropriate clinical cases. Prerequisite: 099:110 or equivalent biochemistry survey. 

**099:226 Enzyme Kinetics and Bioorganic Mechanisms**  
Principles and applications of steady-state and transient enzyme kinetics; mechanisms of catalysis of biochemical reactions. Prerequisite: 099:120 or consent of instructor. 

**099:237 Topics in Molecular and Cell Biology**  
Current topics in transcriptional regulation, chromatin structure and function, cell signaling pathways, regulation of development, molecular mechanisms of disease. Repeatable. Prerequisite: 156:201 or consent of instructor. 

**099:238 Topics in Biophysical Chemistry**  
Current topics in structure and function of membranes or proteins; DNA-protein interactions; computational biochemistry; applications of NMR, X-ray diffraction, calorimetry, or spectroscopy. Repeatable. Prerequisite: 099:241 or 099:242 or consent of instructor. 

**099:241 Biophysical Chemistry I**  
Experimental and theoretical techniques used to study structure and function of biological macromolecules; UV/Vis absorption, circular dichroism, and fluorescence spectroscopy; X-ray crystallography of proteins, ultrastructural application of thermodynamics to understand protein folding and protein-ligand binding. Prerequisites: one year of biochemistry and consent of instructor. Recommended: physical chemistry course. 

**099:242 Biophysical Chemistry II**  
Enzyme kinetics and mechanisms, macromolecular interactions and dynamics, NMR spectroscopy. 

**099:261 Research Techniques**  
Laboratory rotation for first-year graduate students in biochemistry. 

**099:275 Perspectives in Biocatalysis**  

**099:282 Seminar**  
How to evaluate reports of scientific investigations critically; techniques for presenting scientific information. 

**099:283 Thesis Seminar**  
Preparation and oral presentation of thesis proposal. Prerequisite: second-year graduate standing in biochemistry or consent of instructor. 

**099:292 Research Biochemistry**  
Thesis research.
The University of Iowa cardiothoracic surgery program is the third oldest program of its kind in the United States. Since its establishment in 1948 as the Division of Cardiothoracic Surgery, the program has advanced from providing operative interventions for patients with diseases of the chest to performing a broad range of the most current and innovative surgical procedures.

The Department of Cardiothoracic Surgery’s facilities are located at University of Iowa Hospitals and Clinics. Each year cardiothoracic surgeons at the hospitals perform more than 500 adult and pediatric heart surgeries, including coronary bypasses, transplants, and placement of mechanical cardiac assist devices; minimally invasive procedures such as mitral valve replacement and epicardial lead placement; and more than 600 general thoracic surgeries with emphasis on esophageal and lung diseases. Preparations are under way for providing coronary artery bypass grafting using robotics.

Medical Student Training

Residency Program

Iowa’s cardiothoracic surgery residency program was established in 1948 and is fully accredited by the Accreditation Council for Graduate Medical Education. It is the only cardiothoracic surgery training program in Iowa. Two residents are accepted into the two-year program each year.

Postbaccalaureate Training

The department plays a primary instructional role in University of Iowa Hospitals and Clinics’ 20-month postbaccalaureate Perfusion Technology Program; see the department’s perfusion technology courses (193:161 through 193:171) under “Courses” later in this section. For more information about the Perfusion Technology Program, contact the Department of Cardiothoracic Surgery or visit its web site.

Research

University of Iowa cardiothoracic surgeons are leaders in clinical research, particularly in oncologic surgery, diseases of the esophagus, artificial organs, pediatric cardiac surgery, and transplantation. Research also is under way in the sequence of mutations and in localization of genes predisposed to cancer.

Facilities

The Department of Cardiothoracic Surgery has specialty laboratories in gastric motility, analytical chemistry, transplantation, tissue culture, surgical bacteriology, shock, and cardiac bypass. These facilities permit study of experimental procedures such as heart valve replacement in large animals and heterotopic heart transplantation in mice and rats.

The laboratories also are used for supervised teaching exercises in surgical technique for medical students and junior residents, and for refinement of technique for senior residents and faculty members.

Courses

193:161 Instrumentation in Perfusion Technology 3 s.h.
Electrical circuitry, filters, pressure transducers, thermistors, cardiac output computers, fluid dynamics, intra-aortic balloon pumps, blood gas analyzers. Prerequisite: Perfusion Technology Program enrollment.

193:162 Pathophysiology of Perfusion Technology 5 s.h.
Hemostasis, acid base physiology, gas transfer, heart anatomy, heart embryology, congenital cardiac defects. Prerequisite: Perfusion Technology Program enrollment.

Clinical Laboratory Sciences

Director: Barbara Swanson
Clinical professor: Alan D. Junkins
Clinical associate professor: Mark A. Bowman
Lecturer: Pamela Roberts
Undergraduate degree: B.S. in Clinical Laboratory Sciences
Web site: http://www.medicine.uiowa.edu/clsp

The Clinical Laboratory Sciences Program is one of five academic units in the Division of Associated Medical Sciences. For information on the division’s general academic policies, see Associated Medical Sciences in the Catalog.

Clinical laboratory scientists and medical technologists perform the laboratory tests that provide physicians with information vital for accurate diagnosis and proper treatment of disease. They are in demand in hospital, private, and government laboratories; clinics; physicians’ offices; and industrial, pharmaceutical, biological, and environmental research laboratories. Clinical laboratory scientists and medical technologists are highly skilled health team members who use a battery of sophisticated procedures and instruments in their work and who possess specialized knowledge and skills acquired through completion of a formal program of academic and clinical study.

Undergraduate Program

The University of Iowa offers a Bachelor of Science in clinical laboratory sciences through a partnership with the University of Nebraska Medical Center (UNMC). The UNMC program is fully accredited by the National Accrediting Agency for Clinical Laboratory Sciences. All graduates are eligible for national certification examinations in clinical laboratory sciences and medical technology.

Bachelor of Science

The Bachelor of Science in clinical laboratory sciences requires 131 s.h., including 86 s.h. of preparatory study and the 45 s.h. professional (clinical) program, which consists of 12 months of didactic and practical instruction and clinical rotations. Bachelor of Science students who have completed all preparatory study (years one through three) begin the fourth-year professional program with an 11-week summer term of lecture and student laboratory courses at the University of Nebraska Medical Center, in Omaha. They return to the University of Iowa campus for the fall and spring semesters to do clinical rotations in the laboratories of University of Iowa Hospitals and Clinics and the Veterans Affairs Iowa City Health Care System. They also complete additional UNMC course work online during fall and spring.

University of Iowa students who successfully complete the 12-month professional program graduate with a Bachelor of Science from The University of Iowa and a letter of completion from the UNMC clinical laboratory sciences program.

Non-University of Iowa students may enroll in a clinical laboratory sciences certificate-only program if they hold a baccalaureate degree from an accredited institution of higher education or are enrolled at an affiliated institution that will grant them a baccalaureate at the completion of the certificate program. Contact the Clinical Laboratory Sciences Program for more information.

FOURTH YEAR (PROFESSIONAL PROGRAM)

The professional program requires the following course work. Students must have completed 86 s.h., including all prerequisites (see Admission below), in order to enter the professional program.

069:150 Clinical Laboratory Skills 6 s.h.
069:152 CLS Theory, Application, and Correlation 5 s.h.
069:154 Clinical Chemistry I 4 s.h.
069:155 Clinical Chemistry II 3 s.h.
069:156 Clinical Hematology I 4 s.h.
069:157 Clinical Hematology II 3 s.h.
069:158 Clinical Microbiology I 4 s.h.
069:159 Clinical Microbiology II 3 s.h.
069:160 Clinical Immunology and Molecular Diagnostics 1 s.h.
069:162 Clinical Immunohematology I 3 s.h.
069:163 Clinical Immunohematology II 2 s.h.
069:164 Phlebotomy 1 s.h.
069:166 Urine and Body Fluid Analysis 1 s.h.
069:170 Clinical Laboratory Management I 2 s.h.
069:171 Clinical Laboratory Management II 3 s.h.
Admission

Admission to the clinical laboratory sciences professional program is competitive; enrollment is limited to 10 students. Applications are reviewed yearly beginning October 15 for students planning to begin the program the following summer. Applications are accepted until the class is filled.

Applicants must have completed all of the following prerequisites and must have earned at least 86 s.h. of college credit by the beginning of the professional program (fourth year).

Biological sciences—must include
  microbiology (with lab), genetics, and immunology 16 s.h.
Chemistry—must include two semesters of general chemistry, one semester of organic chemistry I, and one semester of organic chemistry II or biochemistry 16 s.h.
Mathematics through precalculus level 3 s.h.
Statistics 3 s.h.
English 6 s.h.
Public speaking/oral communication 3 s.h.

University of Iowa students satisfy the English and public speaking requirements by completing the College of Liberal Arts and Sciences rhetoric requirement (General Education Program).

Applicants must have a cumulative grade point average of at least 2.70 both overall and in science. Students must satisfy any English as a Second Language requirements specified by the University before beginning the professional program. Those who intend to receive a Bachelor of Science from The University of Iowa must complete all College of Liberal Arts and Sciences General Education Program requirements before beginning the professional program. Students should consult with a Clinical Laboratory Sciences Program adviser as early as possible to plan preclinical studies that meet all requirements.

Expenses

Students are responsible for buying textbooks and paying University of Iowa tuition and student fees. Students who intend to receive a Bachelor of Science in clinical laboratory science from The University of Iowa at the end of the professional program must pay full-time study University tuition and fees. Students in the clinical laboratory sciences certificate-only program may pay reduced tuition and fees. Contact the Clinical Laboratory Science Program for more information.

Students must arrange and pay for their own meals and housing, including meals and lodging during the summer term in Omaha.

The Clinical Laboratory Sciences Program provides laboratory coats for professional program students.
Dermatology

Head: Janet A. Fairley
Professors: Christopher J. Arpey, Kathi C. Madison, Thomas L. Ray, Mary S. Stone
Professors emeriti: Richard M. Caplan, John S. Strauss
Adjunct clinical professors: Marc E. Boddicker, Roger I. Ceilley
Visiting professor: C. William Hanke
Adjunct clinical associate professors: Dan A. Bovenmyer, Robert F. Godwin, Susan Wall
Assistant professor: Marta J. Van Beek
Clinical assistant professors: Vincent Liu, Michael J. Messingham
Adjunct clinical assistant professors: Timothy G. Abrahamson, Mark G. Cleveland, David A. Davis, Randall R. Maharry, Gary Quinby, Kimberly K. Schulz
Web site: http://tray.dermatology.uiowa.edu

The Department of Dermatology instructs M.D. students and trains dermatology residents in the care of patients with skin diseases. It also provides researchers with an opportunity to develop their skills in dermatology.

Medical Student Training

The Carver College of Medicine is one of the few medical colleges in the country with a required dermatology rotation for students. Each third-year M.D. student spends two weeks in the clinic and attends about 10 one-hour lectures. Students see a good cross-section of patients, including those receiving primary or tertiary care at University of Iowa Hospitals and Clinics and a large number of patients referred from Student Health Service. Additional patients are seen at the nearby Veterans Affairs Iowa City Health Care System.

Varied electives are open to fourth-year M.D. students, including further clinical experience, dermatologic research, and special studies.

</table>
University of Iowa Hospitals and Clinics offers a Dietetic Internship Program that is fully accredited by the American Dietetic Association’s Commission on Accreditation for Dietetics Education. It qualifies graduates to take the exam for qualification as a Registered Dietitian (RD). Clinical dietitians and food service operation managers of the Department of Food and Nutrition Services at University of Iowa Hospitals and Clinics provide the teaching for the program. Graduate courses in the program are administered by the Carver College of Medicine and the College of Public Health. See “Associated Courses” below.

Students generally complete the program with 9 s.h. of graduate credit, which may be applied toward an advanced degree. Approximately half of the program’s graduates go on to complete advanced degree programs, typically a master’s degree in health promotion, public health, or business.

University of Iowa Hospitals and Clinics awards a certificate to the program’s graduates.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog. They also must complete a didactic program in dietetics that has approval of the ADA Commission on Accreditation for Dietetics Education.

Students enter the program in the fall semester. The postmark deadline for applications is February 15.

**Associated Courses**

For course descriptions, see “Nondepartmental Courses” in the Carver College of Medicine section of the Catalog and “Courses” in the Epidemiology section (College of Public Health).

050:203 Clinical Dietetics 1 s.h.
173:230 Principles of Dietary Assessment 1 s.h.
173:235 Nutritional Epidemiology 2 s.h.
173:236 Nutrition Intervention in Clinical Trials Research 2 s.h.
173:237 Nutrition Intervention in Research Lab 3 s.h.
The Division of Associated Medical Sciences includes five academic programs: the Clinical Laboratory Sciences, Nuclear Medicine Technology, Physical Therapy and Rehabilitation Science, Physician Assistant, and Radiation Sciences Programs. The division provides academic coordination for students in each program.

The Clinical Laboratory Sciences, Nuclear Medicine Technology, and Radiation Sciences Programs offer a Bachelor of Science in addition to a certificate of completion. Students in those programs usually enroll initially in the College of Liberal Arts and Sciences and are assigned a faculty advisor from the Division of Associated Medical Sciences.

The Physician Assistant Program and the Physical Therapy and Rehabilitation Science Program offer graduate degrees, which are awarded by the Graduate College: Master of Physician Assistant Studies (M.P.A.S.), Doctor of Physical Therapy (D.P.T.), Doctor of Philosophy (Ph.D.) in physical rehabilitation science, and Master of Arts (M.A.) in physical therapy (for students working toward the Ph.D. in physical rehabilitation science).

Although each program in the division has its own admission requirements, all require a similar foundation in the biological, chemical, and mathematical sciences. Physics, physiology, computer science, biochemistry, general statistics, and psychology are required by some programs and are highly recommended for others. Students should plan their study programs carefully to avoid conflicts in specifically required courses. It is imperative that students consult with their program advisor to assure the proper sequencing of courses.

The general academic policies described here govern all five of the division's programs. For descriptions of each program, summaries of each profession, curriculum outlines, prerequisite and admission requirements, and lists of courses, see Clinical Laboratory Sciences, Nuclear Medicine Technology, Physical Therapy and Rehabilitation Science, Physician Assistant Program, and Radiation Sciences in the Catalog.

Academic Rules and Procedures

Advising

When students declare their intended major to be one of the programs in the Division of Associated Medical Sciences, they are assigned to that program for academic advising.

Admission

Students are admitted to the Carver College of Medicine at the time of formal admission to a Division of Associated Medical Sciences program. Admission policies and procedures vary from program to program. See the individual program descriptions in the Catalog or contact the programs for details about admission. Students may be admitted as degree or nondegree candidates (special students). Nondegree candidates are subject to Carver College of Medicine rules for academic probation and dismissal.

To be considered for admission to a Division of Associated Medical Sciences program, applicants must have the cumulative grade-point average (all college work attempted) specified by the program: clinical laboratory sciences, at least 2.50 overall and 2.50 in math and science; nuclear medicine technology, at least 2.50; physical therapy, at least 3.00; physician assistant, at least 3.00; and radiation sciences, at least 2.50. Admission committees give special attention to grades in the sciences, particularly the prerequisite science courses required by the individual programs.

Health Insurance, Immunizations

All health professions students are required to provide proof of health insurance coverage when they register at The University of Iowa. Contact the University Benefits Office or see Insurance/Health/Graduate Student or Health Science Major on its web site (http://www.uiowa.edu/hr/benefits/healthinfo/index_grad.html) for details.
Students admitted to Division of Associated Medical Sciences programs must show proof that they have had a recent physical examination, including routine laboratory procedures and immunizations. For more information, contact Student Health Service.

Graduation Requirements for the Bachelor of Science

General Requirements

A Bachelor of Science at The University of Iowa requires a minimum of 120 s.h. of credit; specific degree programs may require more. The number of semester hours required after admission to a specific program varies from program to program. Students should consult the program description and/or program director for more specific information.

The general requirements for graduation include quality as well as quantity of work completed. Candidates must earn a g.p.a. of at least 2.00 in all college work attempted, all work undertaken at The University of Iowa, and all graded work attempted after admission to the Carver College of Medicine. Students enrolled in a program that uses the pass/fail/honors grading system must pass all courses required to complete the program.

The residence requirement may be met by earning the final consecutive 30 s.h. in residence, or 45 of the last 60 s.h. in residence, or an overall total of 90 s.h. in residence.

Nonresident instruction includes course work and correspondence study at other colleges, universities, and institutions; and course work in other undergraduate colleges at The University of Iowa. Some undergraduate course work in other University of Iowa colleges may count toward residency requirements; contact the individual Division of Associated Medical Sciences programs for information.

College of Liberal Arts and Sciences General Education Program requirements vary from program to program. Students must check the requirements of the specific Division of Associated Medical Sciences program or degree objective. Specific requirements for the major are listed in each program’s description.

Double Majors

Students may earn more than one major in the Carver College of Medicine by meeting the requirements for each major.

Two Bachelor’s Degrees

Students who want to earn two bachelor’s degrees, each from a different college, may do so under a combined degree program. They must have their combined course of study approved by the dean of the Carver College of Medicine and the dean of the other college to be eligible for a combined degree program.

Second Bachelor’s Degree

Students who already possess a bachelor’s degree and who want to earn an additional bachelor’s degree must complete at least 30 s.h. consecutively in the Carver College of Medicine. Students who hold a B.A. or B.S. are considered to have completed the College of Liberal Arts and Sciences General Education Program except for the foreign language component. Holders of other degrees must meet college and program degree requirements. Students with a B.A. or B.S. must satisfy the residence requirement for a bachelor’s degree at Iowa. Candidates for a second bachelor’s degree must apply for the degree through the University’s Office of Admissions.

Combined Bachelor’s Degree

Students may earn two University of Iowa bachelor’s degrees in a combined degree program in the Carver College of Medicine and the College of Liberal Arts and Sciences. Although students begin their academic program in the College of Liberal Arts and Sciences, they must be eligible for admission to the Carver College of Medicine Bachelor of Science program in clinical laboratory sciences, nuclear medicine technology, or radiation sciences.

Students who select the combined degree program must meet the bachelor’s degree requirements specified by both colleges. The exact length of time necessary to complete the program is determined by the major areas of study selected in each college. Students who enter the combined degree program are assigned two faculty advisors, one in the major department of the Carver College of Medicine and the other in the major department of the College of Liberal Arts and Sciences.

Students interested in the combined degree program should see the director of the Bachelor of Science program of their choice in the Carver College of Medicine.
Minors

Students graduating from the Carver College of Medicine may earn a minor or minors in any degree-granting department or program in the college outside of their major department or in another college of the University by meeting that department’s requirements for the minor. Generally, students must earn a minimum of 15 s.h. in the minor.

Application for Degree

Students who want to be considered for graduation must file an Application for Degree with the Office of the Registrar before the deadline for the session in which the degree is to be conferred. Students who want to have a minor listed on their transcript must indicate this on the degree application form so that completion of the requirements for the minor can be verified.

Duplication

Duplication occurs when students take the same course more than once or when they take a course that duplicates the content of a course they already have completed satisfactorily. Regression occurs when students take a course that is less advanced or at a lower level than one in the same subject that they already have completed satisfactorily. Duplication and regression are assessed by the registrar at the time of graduation analysis. Semester hours earned by duplication or regression do not count toward the number of semester hours required for graduation.

Graduation Honors

Approximately 10 percent of the division’s graduating students may be recognized for their scholastic achievement upon recommendation by the program and with the dean’s approval. Minimum criteria have been established for the following designations: distinction, high distinction, and highest distinction.

Registration and Grading

Information about tuition and fees, registration, and deadlines is available from the Office of the Registrar. Students who add or drop a course after registration or who register late are assessed a fee. Each course dropped after the deadline results in a W (withdrawal) on the transcript (see Changes in Registration below). Students are not allowed to register for full-semester courses after the second week of the semester or the first week of the summer session. Students must register for off-cycle courses before the first day of the course. The maximum permitted registration is 20 s.h. in a regular semester and 10 s.h. in the summer session. Students must obtain permission from the head of the division to register for more than the maximum semester hours allowed.

Changes in Registration

Courses may be added with the signatures of the advisor and the course instructor at any time during the first one-fifth of the course. They may be dropped at any time during the first two-thirds of the course. Approval is required from the head of the Division of Associated Medical Sciences for all other changes in registration and is granted only in extraordinary circumstances. Students are assigned a mark of W (withdrawn) for any course dropped after the first one-fifth of the course.

Students who have registered for courses offered for variable or arranged credit may change the number of semester hours with the signatures of the instructor, the advisor, and the head of the division at any time before the end of the first two-thirds of the course. Other changes in registration (such as to audit for zero credit) may be made only during the first one-fifth of the course.

It is the student’s responsibility to see that the change of registration form is approved by the necessary individuals and delivered to the Registration Center. Changes in registration become effective on the date the completed form is submitted to the Registration Center.

Withdrawal of Registration

Students may withdraw registration without academic penalty at any time before the end of the first four-fifths of the course, but no credit is given for the course. Later withdrawal results in automatic assignment of an F. Students who withdraw are not reinstated after the deadline for that session.

Grading Procedures

Grading procedures vary from program to program. Students should consult individual program policy statements for information.
Auditing Courses

Students may register to audit a course with approval of the appropriate program director and course instructor. In addition to obtaining these signatures, students must register for zero credit in the course to be audited. The mark of R (registered) is assigned if the student's attendance and performance are satisfactory; if they are unsatisfactory, the mark of W (withdrawn) is assigned. Courses completed with a mark of R do not meet any college requirement and carry no credit toward graduation. Auditing may not be used as a second-grade-only option.

Second-Grade-Only Option

Repeating courses for the second-grade-only option is allowed in extraordinary circumstances. To repeat a course for the second-grade-only option, students must obtain the signatures of the course instructor, the program director, and the dean on a special form obtained from the program office. The properly signed form must be presented to the Office of the Registrar before the end of the first one-fifth of the course. Both grades remain on the permanent record, but only the second one is used to calculate grade-point average and hours earned.

Incompletes

A grade of I (incomplete) may be reported if the reasons for inability to finish the course satisfactorily are acceptable to the program director and the course instructor. There also must be evidence that the course work will be finished within a reasonable length of time, usually by the end of the next academic session. Incompletes not removed by the deadline for submission of final grades for the next session result in the assignment of a grade of F. Changing the grade when an incomplete has been converted to an F requires the signature of the dean on a change of grade form.

Credit by Examination

The procedure for the acceptance of and the granting of credit by examination varies from program to program. Consult the program director for information.

Reports to Students

Instructors contact any student whose work falls below the minimum acceptable level once the problem is recognized. Grades are reported on the student's transcript, following University protocol. No formal midterm reports are given.

Courses Offered by Other University of Iowa Colleges

Division of Associated Medical Sciences students who enroll in courses offered by other University of Iowa colleges are governed by those colleges' rules in matters regarding the courses. See http://www.uiowa.edu/~provost/deos/crossenroll.doc for details.

Recognition for Academic Achievement

The University of Iowa and the Carver College of Medicine recognize academic achievement every fall and spring semester.

Dean’s List

Undergraduate students who have a grade-point average of 3.50 or higher on 12 s.h. or more of graded work during a given semester (excluding summer sessions) and who have no semester hours of I (incomplete) or O (no grade reported) during the same semester are recognized by inclusion on the Dean’s List for that semester.

President’s List

Undergraduate students who have a grade-point average of 4.00 on 12 s.h. or more of graded work for two consecutive semesters (excluding summer sessions) and who have no semester hours of I (incomplete) or O (no grade reported) during the same semesters are recognized by inclusion on the President’s List.

Academic Progress, Probation, Dismissal

Students are expected to maintain satisfactory academic and professional standards and to demonstrate reasonable progress toward the degree and certificate. Students who fail to maintain satisfactory academic progress or professional standards of behavior as determined by their program may be placed on probation or dismissed from the program. Probation serves as a warning that the student will not graduate unless his or her academic performance and/or professional behavior improves.

Students on probation are restored to good standing by the program director upon evidence that the problem has been corrected. Such action
is usually taken at the end of a semester or session. Entering students may be admitted on probation if they fail to meet the minimum stated standards for admission.

Continued unsatisfactory scholarship or unprofessional behavior may result in dismissal from a program. Students dismissed from a program must reapply for admission through the regular, established program admissions process, following review by the Division of Associated Medical Sciences executive committee, at least four months before the requested date of readmission.

Students placed on probation or dismissed from a program are notified in writing of these actions by the program director; copies are placed in their files.

Students are expected to attend classes regularly. Students who miss classes or examinations because of illness are expected to present evidence that they have been ill. Any other absences must be approved in advance by the course instructor.

Any offense against good order committed by a student in a classroom, clinical setting, or laboratory may be dealt with by the instructor or referred to the program director. The instructor reports in writing any disciplinary action taken against a student to the program director. Repeated or exceptional instances are reported to the dean.

**Academic Misconduct**

**Plagiarism and Cheating**

All cases of plagiarism and cheating in the Carver College of Medicine are reported to the dean with a statement of relevant facts. The program director and the instructor may submit recommendations for appropriate disciplinary action.

The individual instructor may reduce the student’s grade, including assignment of the grade of F in the course. A report of this action is sent to the student, the program director, and the dean.

The dean, or a faculty committee appointed by the dean, may impose the following or other penalties, as the offense warrants: disciplinary probation, requirement of additional hours for the degree, suspension from the program for a period of time, or recommendation of expulsion from the program.

**Appeals Procedure**

Students who want to appeal a decision should appeal in writing to the dean within two weeks after the date of receipt of the decision in writing.

**Financial Aid**

Students in Division of Associated Medical Sciences undergraduate programs are eligible to apply for undergraduate financial aid. Scholarships, grants, loans, and part-time job placement are administered by the University’s Office of Student Financial Aid and are awarded on the basis of demonstrated need. Part-time work in related areas is sometimes available.
Emergency Medicine

Director: Eric Dickson
Clinical professor: Mark Graber
Associate professors (clinical): Eric Dickson, Andrew Nugent
Assistant professors (clinical): Agustín Aguilar, Chris Buresh, Carlyn Christensen-Szalanski, Dana Collaguazo, Hans House, Harlo Hove, Jason Hughes, Charles Jennissen, Catherine Jones, Eric Nilles, Bobby Peters, Christopher Russi, Mike Takacs
Web site: http://www.uihealthcare.com/emergencymedicine

The Program in Emergency Medicine prepares new physicians to recognize and treat a variety of urgent and emergent conditions. The program fosters basic sciences and clinical research relevant to emergency medicine and is dedicated to the education and training of Emergency Medical Services (EMS) personnel through the Emergency Medical Services Learning Resources Center (EMSLRC).

Medical Student Training

Elective rotations for M.D. students are available at University of Iowa Hospitals and Clinics and at several other sites throughout Iowa, including St. Luke’s Hospital, Cedar Rapids; Great River Medical Center, Burlington; Covenant Medical Center, Waterloo; Broadlawns Medical Center, Des Moines; and Mercy Medical Center, Sioux City. Students also may arrange an off-service elective independently with established residency programs throughout the United States.

The program offers an annual introductory month to emergency medicine; advanced life support; and Wilderness Medicine, a rotation that includes a trip to the Death Valley and Mount Whitney areas of California.

Residency Program

The emergency medicine faculty directs the Iowa Emergency Medicine Residency, Iowa’s only emergency medicine residency. The residency is a three-year program that prepares residents for careers in diverse areas of emergency medicine, from rural practice to academics. The program emphasizes critical care training and rotations in a wide variety of specialties. Part of the clinical component is spent at St. Luke’s Hospital, Cedar Rapids.

Resources

The Emergency Treatment Center, located on the first floor of Roy Carver Pavilion, is a Level I Adult and Pediatric Trauma Center. It serves as a referral center for communities across Iowa.

Courses

184:220 Emergency Medicine: St. Luke’s, Cedar Rapids 4 s.h.
Preceptorship with full-time emergency department physicians. Prerequisite: completion of M.D. third year.

184:221 Emergency Medicine UIHC arr.
Preceptorship with residents and faculty; emphasis on principles of acute medicine. Prerequisite: completion of M.D. third year.

184:222 Emergency Medicine off Campus arr.
Preceptorship with residents and faculty; emphasis on principles of acute medicine. Prerequisites: completion of M.D. third year and consent of instructor.

184:223 Rural Emergency Medicine at Burlington, Iowa 4 s.h.
In-depth clinical experience in a busy rural hospital emergency department under supervision of residency-trained emergency physicians; lectures, skill labs, projects. Prerequisite: completion of M.D. third year.

184:224 Introduction to Advanced Life Support Skills 4 s.h.
Experience managing acute threats to life, including trauma, respiratory failure, poisoning, sepsis, stupor/coma, and acute MI, using ACLS and PALS courses and clinical manikin work with EMS staff. Prerequisite: completion of M.D. third year.

184:225 Wilderness Medicine 4 s.h.
Didactic and scenario training in physiology, diagnosis, and emergency treatment of heat- and cold-related illnesses, high altitude disorders, wilderness trauma, envenomations, and immersion injuries; travel to Death Valley and Mount Whitney, California. Prerequisite: completion of M.D. third year.

184:402 Emergency Medicine Des Moines 4 s.h.
Participation in acute emergency care, management of acute illnesses, follow-up care when possible; Broadlawns Hospital, Des Moines. Prerequisites: completion of M.D. third year and consent of department.

184:425 Emergency Medicine Waterloo 4 s.h.
Participation in acute emergency care, management of acute illnesses, follow-up care when possible; Covenant Medical Center, Waterloo. Prerequisite: completion of M.D. third year.

184:430 Emergency Medicine Sioux City 4 s.h.
Experience with a routine cross section of emergency problems in a regional trauma center and with functions of area resource hospitals (St. Luke’s Medical Center, Mercy Medical Center); option to accompany ambulance crews. Prerequisites: completion of M.D. third year and basic life support certification.

184:998 Emergency Medicine on Campus arr.
Clinical research experience with a mentor in the Emergency Treatment Center and the Department of Emergency Medicine; principles of design, methodology, basic statistics.
Head: Paul James
Professors: George R. Bergus, Arthur Hartz, Paul James, Gerald J. Jogerst
Professors emeriti: Reuben B. Widmer, Glenys O. Williams
Professor (clinical): Richard Dobyns
Adjunct clinical professor: John E. Sutherland
Associate professors (clinical): David Bedell, Daniel Fick, Robert Garrett, David Kearns, Steven Wolfe
Adjunct clinical associate professors: Gordon Baustian, Robert Friedman, Scott Henderson, Michael Jung, Gerald Loos, Lawrence Matthews, Gerald McGowan, Jay Mixdorf, Kurt Rosenkrans, Craig Whittenberg
Assistant professors: Elizabeth Clark, Cheryl Erwin
Assistant professors (clinical): Alison Abreu, Jill Endres, Adelaide Gurwell, Michael Jurgens, Matthew Lanternier, Michael Maharry, Britt Marcussen, Kelly Skelly, Anne Sullivan, Jason Wilbur
Adjunct assistant professor: Larry Shostrom
Adjunct instructor: Veronica Wieland

Associates: Oladipo Kukoy, Wendy Shen
Adjunct associates: Larry D. Beaty, Harriet Echternacht, Nicholas S. Galioto, Rayna Jobe, Dawn S. Lauridsen, Jason Powers
Web site: http://www.uihealthcare.com/familymedicine

The Department of Family Medicine trains primary care physicians. The department offers course work that is included throughout the four-year M.D. program. Twenty-five elective senior rotations give students opportunities for exposure to various Iowa communities through work in affiliated hospitals or connected facilities, in the department’s model office on the University campus, and in preceptorships with selected family physicians throughout the state. There also is opportunity for independent study during the fourth year.

Residency Program

The Department of Family Medicine directs a three-year residency program whose graduates are eligible for certification by the American Board of Family Medicine. The residency program trains physicians to provide continuous and comprehensive medical care to patients and their families. Residents are educated in all areas of family medicine—adult medicine, maternal and child health, behavioral science, surgical specialties, and community medicine. Training emphasizes the value of wellness and preventive medicine as well as curative medicine.

The program is organized as a progressive educational experience. It consists of formal teaching and clinical experiences on assigned rotations, structured conferences, and patient care in the Family Care Center. As residents develop clinical skills, medical judgment, and competence, their patient responsibilities increase. Some patients at the Family Care Center are assigned to residents, who provide medical care under faculty supervision. Each resident is responsible for his or her patients for the duration of the residency program.

Residents also learn the principles of practice management, including organizational and administrative decision making, patient record and bookkeeping procedures, and chart auditing methodologies.
Residents are expected to take responsibility for their learning environment, to avail themselves of the department’s diverse resources, and to collaborate with the faculty in order to have the best possible learning experience.

**Rural Track Residency**

The Family Practice Rural Track Residency Program is a collaboration of the Department of Family Medicine and the Pella Regional Health Center of Pella, Iowa. The program offers trainees the opportunity to acquire skills, knowledge, and values appropriate for family physicians practicing in rural communities. Residents spend the first year of the program in Iowa City and the second and third years in Pella. The program’s graduates are eligible for certification by the American Board of Family Medicine.

**Family Practice-Psychiatry Residency**

The Department of Family Medicine and the Department of Psychiatry cosponsor the combined Family Practice-Psychiatry Residency Program. The program’s residents acquire broad-based training in both disciplines, including focused training in geriatrics and geriatric psychiatry, substance and alcohol abuse, diagnosis and treatment of depression, delirium, eating disorders, panic disorders, and neurotic and somatizing behavior. Graduates are eligible for certification by the American Board of Family Medicine and the American Board of Psychiatry and Neurology.

**Facilities**

The Department of Family Medicine is located on the University of Iowa health sciences campus. Faculty offices are close to the Family Care Center, where patients are seen by appointment. The department also has community-based clinics in southeast Iowa City and North Liberty, Iowa, and a rural satellite office located in Lone Tree, Iowa.

**Courses**

115:203 Medical Education Community Orientation 0 s.h.
Experience in a local health care delivery system away from the University setting, between first and second year of M.D. program.

115:300 Preceptorship in Family Medicine arr.
One-on-one experience with a practicing physician in his or her office; exposure to illnesses, conditions often seen in primary care; realistic background for evaluation of family medicine as a career alternative.

115:401 Family Medicine Clerkship, Broadlawns Hospital, Des Moines Family Health Center 4 s.h.
Clinical experience in inpatient and outpatient care. Prerequisite: consent of department.

115:403 Lone Tree Family Medicine Clerkship 4 s.h.
Experience providing patient care in a rural setting; continuity of care for patients of all ages. Prerequisite: fourth-year M.D. enrollment.

115:404 Advanced Preceptorship in Family Medicine 4 s.h.
Experience in community practice of family medicine. Prerequisites: consent of individual preceptor and family practice advisor.

115:405 Subinternship in Family Medicine, University of Iowa 4 s.h.
Inpatient aspects of key components of family medicine; experience on the family medicine inpatient service.

115:406 Subinternship in Family Medicine, Iowa Lutheran 4 s.h.
Patient-oriented interactive experience in an inpatient family practice environment. Prerequisite: fourth-year M.D. enrollment.

115:407 Family Medicine, Iowa Lutheran arr.
Prerequisite: fourth-year M.D. enrollment.

115:408 U of I Family Medicine Clerkship 4 s.h.
Work with family practice residents, staff in day-to-day delivery of primary medical care in Family Practice Center; experience in the Family Stress Clinic observing family-centered counseling; nursing home visits, work with departmental social worker and sports medicine specialist.

115:409 Family Medicine, Mason City 4 s.h.
Work with family physicians on staff at Mercy or other affiliated community hospitals; management of all patients admitted by these physicians, participation in care rendered by involved consultants; primary care experience in family practice office. Prerequisite: consent of department.

115:410 Independent Studies arr.
Work with departmental researcher on investigation in family medicine, community medicine, health care delivery, health maintenance, similar areas. Prerequisite: consent of department.

115:411 Rural Preceptorship in Family Medicine 4 s.h.

115:412 CNS Management and Rehabilitation, Covenant Medical Center, Waterloo 4 s.h.

115:415 Subinternship in Family Medicine—Cedar Rapids 4 s.h.
Experience as a junior resident in all areas of inpatient family medicine, including maternity care, child and adolescent health, adult medicine.

115:416 Clerkship in Family Medicine—Cedar Rapids 4 s.h.
Experience as a junior resident in all areas of family medicine, including maternity care, child and adolescent health, adult medicine.

115:417 Continuity of Care—Family Medicine 4 s.h.
Longitudinal continuity of care experience for fourth-year M.D. students in an outpatient family medicine setting.

115:419 Family Medicine Clerkship, Davenport 4 s.h.
Assignment to problems commonly seen in family practice office; supervision by residents and faculty for history and physical evaluation and diagnostic workups and treatment of each specific problem; exposure to acutely ill patients in services of medicine, surgery, obstetrics, pediatrics. Prerequisite: consent of department.
115:420 Family Medicine Clerkship, Sioux City  4 s.h.
Methods common in family practice medicine; participation in care of patients seen by family practice physicians, residents. Prerequisite: consent of department.

115:423 Sub-Internship in Family Medicine, Waterloo  4 s.h.
Experience working as a member of family practice inpatient team at Allen Memorial Hospital and Covenant Medical Center, following patients from admission through discharge.

115:424 Family Medicine Clerkship, Waterloo  4 s.h.
Rotation at the Northeast Iowa Family Practice Center; work with patients from outpatient care through hospitalization; basic concepts of family practice, team concept in medical care.

115:426 Geriatrics Elective  arr.
Experience in monitoring and evaluating health and functional status of patients age 65 and older in the UI Geriatric Assessment Clinic and community settings. Same as 078:800.

115:429 Subinternship in Family Practice, Sioux City  4 s.h.
Experience as a junior resident in all areas of family medicine. Prerequisite: fourth-year M.D. enrollment.

115:999 Family Medicine off Campus  arr.
Clerkships, may include community hospitals.
The Free Radical and Radiation Biology Program provides in-depth training and research experience in the physical, chemical, and biological effects of radiation. It also focuses on free radical biology. Free radicals, which are generated in great number by radiation, play a major role in the interaction of radiation with biological systems. Free radicals are of great interest to basic researchers and clinicians because of their role in a variety of diseases and pathological states, including cancer. The program stresses the importance of all of these areas to scientific research, clinical medicine, and the general public’s health.

**Undergraduate Education**

Three courses, 077:103 Radiation Biology, and 077:107 and 077:108 Special Topics: Advanced Undergraduates, are open to University of Iowa undergraduates. Students who want an overview of the biological effects of radiation, including the role of free radicals, will find 077:103 especially appropriate. All three courses are appropriate for students who plan to enter medicine, nuclear medicine technology, environmental health, or related programs.

**Graduate Programs**

The Carver College of Medicine administers graduate programs in free radical and radiation biology; graduate degrees are granted through the Graduate College. See Carver College of Medicine and Graduate College in the Catalog for general information about study in medicine and graduate study at the University.

The Master of Science requires a minimum of 30 s.h. of graduate credit; the Doctor of Philosophy requires a minimum of 72 s.h. of graduate credit.

The M.S. and Ph.D. programs in free radical and radiation biology are open to graduate students with a background in physics, chemistry, mathematics, biology, health sciences, veterinary medicine, or engineering.

After completing the introductory course 077:103 Radiation Biology, students typically concentrate on a particular aspect of the field. Some students elect to focus on radiation biology, while others choose to emphasize free radical biology.

In addition to formal lectures and some structured laboratory exercises, plans of study for free radical and radiation biology students involve small-group conferences, discussions, and seminars. Students are encouraged to spend at least one semester as a teaching assistant, for which no registration is required and no academic credit is given.

**Postgraduate Training**

Postdoctoral training is available by arrangement with the program’s director and individual faculty members. Contact the Free Radical and Radiation Biology Program.

**Financial Support**

Graduate students are supported as graduate assistants from funds available through research grants and contracts or from departmental funds. Individual postdoctoral awards also may be available; the candidate and his or her faculty sponsor apply for them jointly.

**Facilities**

The Free Radical and Radiation Biology Program has a 300 kVp orthovoltage X-ray generator and
other radiation sources, including a kilo-Curie Cs-137 irradiator. Students and staff also have access to other radiation sources, such as the Co-60 gamma source and linear accelerators in the Department of Radiation Oncology.

The program has a number of radiation detectors and counters, including liquid scintillation counters. It also has ultraviolet/visible spectrophotometers; various types of equipment for densitometry, chromatography, and electrophoresis; molecular biology equipment, including thermal cyclers; an automatic cell counter and particle sizer; tissue culture facilities; Typhoon Phosphoimager; HPLC; Electron Spin Resonance Spectrometers; and nitric oxide analyzers.

**Clinical professors:** Daryl Granner, Patrick H. Henry, Nathan Josephson, Thomas J. McIntosh, Barbara A. Muller

**Associate professors emeriti:** James R. Flanagan, Jeanne M. Smith

**Clinical professor emeritus:** Oscar C. Beasley

**Adjunct assistant professors:** Sean P. Didion, Margaret LeMay, Mary S. Vaughan Sarrazin

Internal medicine is concerned with the diagnosis, prevention, and treatment of diseases of adults. The Department of Internal Medicine’s educational, patient care, and research activities cover all facets of the discipline, including general internal medicine and primary care as well as the specialized areas of allergy and immunology, cardiology, clinical pharmacology, endocrinology and metabolism, gastroenterology and hepatology, hematology, oncology, blood and marrow transplant, infectious diseases, nephrology, pulmonary, critical care, occupational medicine, and rheumatology.

Medical Student Training

The Department of Internal Medicine is committed to the complete spectrum of medical education, from didactic and clinical education of M.D. students to resident and fellowship training. The department’s faculty bears a major share of teaching first- and second-year M.D. students. In the first year, faculty members participate in 060:116 Medical Cell Biology, 050:240 Human Organ Systems, and 148:251 Principles of Medical Immunology. In the second year, they participate in 071:105 Pharmacology for Health Sciences: Medical and 061:103 Principles of Infectious Diseases. They are key participants in 050:162, 050:163, 050:164, and 050:165 Foundations of Clinical Practice I-IV.

Residency Program, Postgraduate Work

The department offers a three-year residency training program in internal medicine. In addition, most of the department’s specialty divisions offer two- and three-year clinical and research fellowships, in which fellows develop special knowledge and skills relevant to their specialties. Fellows who hold doctoral degrees may be accepted to programs whose major focus is laboratory research.

Facilities

Teaching takes place in the medical services and laboratories of University of Iowa Hospitals and Clinics and the Veterans Affairs Iowa City Health Care System, and in Des Moines at the Veterans Affairs Central Iowa Health Care System and Iowa Methodist Medical Center.

Courses

078:101 Inpatient Internal Medicine arr.
Development of knowledge, diagnostic and management skills vital to care of hospitalized patients; clinical responsibilities, educational conferences, independent study.

078:102 Outpatient Internal Medicine 3-4 s.h.
Development of knowledge, diagnostic and management skills in the outpatient clinical setting; clinical activities, discussion of problems, independent study.

078:199 Learning about Living from the Dying 1 s.h.
Hospice training, monthly classes, experience volunteering in the community; focus on writing for self-reflection or publication.

078:202 Subinternship in Internal Medicine 4 s.h.
Student responsibility for evaluating, treating, and following patients admitted to inpatient general medicine services. Prerequisite: fourth-year medical student standing.

The Medical Education Program is dedicated to providing medical faculty members with formal training in medical education. The program is coordinated through the Office of Consultation and Research in Medical Education.

**Graduate Program**

The program offers the Master in Medical Education (M.M.E.).

**Master in Medical Education**

The Master in Medical Education requires a minimum of 30 s.h. of graduate credit. The program is designed to prepare medical faculty members to educate health professionals. It offers an opportunity to specialize in theory and practice of curriculum design, effective teaching, assessment, and other aspects of medical education.

Graduates of the program should be able to:

- design evidence-based education programs and materials with appropriate scope, sequence, and focus for intended learners;
- deliver effective instruction to individuals and small or large groups in classroom, laboratory, or clinical settings;
- evaluate the effectiveness of educational instruction, using formative and summative methods;
- understand basic principles of educational measurement and be able to apply them to medical education;
- use assessments to promote learning and to assess learning progress and status; and
- understand basic principles of, and be able to interpret and use, educational research.

The program can be completed in as few as two years or as many as five. Some of the required courses are offered online or through Guided Independent Study, and traditional courses have evening meeting times.

Students can tailor content to their individual interests. They choose five core courses, a teaching methods course, and elective and independent study courses. All students take one semester of 050:714 Current Issues in Medical Education and complete a capstone portfolio project (050:720). Substantial advising and consultation is provided by the program’s faculty.

A typical study program is drawn from the following.

07P:200 Educational Psychology 3 s.h.
07P:205 Design of Instruction 3 s.h.
or
050:701 Instructional Design and Technology 3 s.h.
050:702 Clinical Teaching in Medical Education 3 s.h.
050:703 Research Design and Evaluation in Medical Education 3 s.h.
050:711 Teaching Methods in Medical Education 3 s.h.
050:712 Introduction to Educational Measurement in Medical Education 3 s.h.
050:713 Assessment in Medical Education 3 s.h.
050:714 Current Issues in Medical Education 3 s.h.
050:720 Portfolio Project 3 s.h.
Electives 6-9 s.h.

In 050:720 Portfolio Project, students integrate the materials they have developed over the course of the program into a document. Three faculty members review the project and evaluate the student’s participation in the program.

**Admission**

Applicants should hold an M.D. degree and must have performed satisfactorily on the Medical College Admission Test.

Applicants whose first language is not English must submit scores on the Test of English as a Foreign Language (TOEFL), unless they hold a bachelor’s or more advanced degree, or
equivalent, from an accredited university in the United States, English-speaking Africa, Australia, Canada (except Quebec), New Zealand, or the United Kingdom.

Application materials must include an official transcript showing medical course work and medical degree (current and former University of Iowa students do not need to request a UI transcript or transcripts previously submitted to the University); a letter of reference from the applicant’s department head and two additional letters of reference; and a 300-500 word essay describing the applicant’s interest in medical education and in the Master in Medical Education program.

Additional application information and forms are available on the Master in Medical Education web site. Application materials should be submitted to the University of Iowa Office of Admissions.

Application deadlines are July 15 for fall semester entry, November 15 for spring semester entry, and April 15 for summer session entry.
Medical Scientist Training Program

Codirectors: C. Michael Knudson (Pathology), Michael Welsh (Internal Medicine)
Web site: http://www.healthcare.uiowa.edu/mstp

Professional/Graduate Program

The Iowa Medical Scientist Training Program (MSTP) offers a joint Doctor of Medicine/Doctor of Philosophy. The program prepares trainees for careers in academic medicine, with emphasis on basic and clinical research.

Joint M.D./Ph.D.

The joint Doctor of Medicine/Doctor of Philosophy normally requires seven to eight years of continuous study. It provides an effective and efficient means to integrate graduate and clinical training, combining the scientific approach with clinical medicine.

In the first two years of the program, trainees enroll in the basic science and introductory clinical portions of the Carver College of Medicine Doctor of Medicine curriculum. This provides a broad exposure to the language and organizing concepts that form the foundation for a career as a physician scientist. Trainees begin the research component of the graduate phase of the program through summer laboratory rotations, research presentations by MSTP faculty and students, and a student-sponsored seminar series. They also participate in MSTP grand rounds, a forum for patient-based discussions that emphasize how science and medicine intersect.

The first-year curriculum addresses normal structure and function of human organ systems and emphasizes relationships among different disciplines. During the first semester, trainees take courses in biochemistry, gross anatomy, cell biology, and medical genetics. The second semester presents an integrated systemic core, which incorporates physiology, histology, and embryology and focuses on the development, structure, and function of human organ systems. Discipline-specific basic science instruction continues through the second semester with medical neuroscience and immunology courses.

The second-year curriculum emphasizes abnormal structure and function of human organ systems. Trainees take courses in pathology, microbiology, and pharmacology.

Throughout the first two years of study, students receive instruction in the foundations of clinical practice, including patient experience in medical history taking and physical examination. At the end of the second year, all trainees take Step One of the U.S. Medical Licensing Exam and then complete the basic core clinical clerkship in internal medicine. They gain broad exposure to the spectrum of human disease and experience with direct patient care before they enter the graduate phase of training.

At the beginning of the third year, trainees enroll in a graduate department or interdisciplinary graduate program.

The focus of the graduate years of study is engagement in academic and research experiences that promote the trainees' development into independent investigators. Clinical contact is maintained during this phase of training through participation in seminar programs, MSTP grand rounds, and 050:212 MSTP Clinical Connections, a course that provides the opportunity for mentored clinical experiences.

Upon completing the Ph.D. dissertation, trainees return to the Carver College of Medicine curriculum to complete the clinical clerkship requirements for the joint M.D./Ph.D. program. During this phase, trainees bring a sophistication in the scientific approach to problem solving that they apply to human disease. They renew and develop clinical skills acquired in their early training and reinforce their understanding of the scientific basis of disease through continued participation in MSTP grand rounds. Upon completion of the clinical curriculum, trainees are awarded the M.D. and Ph.D.

Most graduates of the program elect to enter residency programs in clinical medicine and embark on careers as medical school faculty members in clinical disciplines with opportunities for basic and applied research. Other graduates accept academic appointments in basic science departments and spend a major part of their professional activity in biomedical research and teaching.
Admission

Applicants must meet requirements for admission to the M.D. program in the Carver College of Medicine and the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

Applicants should have completed requirements for a bachelor’s degree at an accredited academic institution. In addition to outstanding academic credentials, including strength in biological, physical, and mathematical sciences, they must demonstrate aptitude for and commitment to scientific research through productive research experience during their undergraduate years or after. Admission normally is made for entry to the first year of the program, but applicants already enrolled in the Carver College of Medicine may request admission with advanced standing.

Application

The Carver College of Medicine participates in the American Medical College Application Service (AMCAS). Program applicants should select M.D./Ph.D. Program-Type on their AMCAS application and instruct AMCAS to forward their credentials to the Carver College of Medicine (IA131). Applications should be submitted as early as possible to allow careful review by the admissions committees of the Medical Scientist Training Program and the Carver College of Medicine.

All candidates must take the Medical College Admission Test (MCAT), according to Carver College of Medicine requirements. The Graduate Record Exam (GRE) is not required for admission.

Application to the Graduate College is not required before acceptance to the MSTP. Trainees admitted to the program receive assistance with Graduate College enrollment.

Financial Support

Trainees receive stipend and full tuition support from a National Institutes of Health MSTP training grant to The University of Iowa, supplemented by other institutional and individual awards. Students in the graduate phase of training receive support from their graduate departments and interdisciplinary programs. The program office also helps selected trainees apply for competitive national awards for outstanding academic and research achievement.

Courses

050:211 MSTP Research  arr.
Research experience. Prerequisite: Medical Scientist Training Program enrollment.

050:212 MSTP Clinical Connections  arr.
Experience with physician-scientist preceptor in medical interviewing, physical examination, and patient presentation through direct patient interaction. Prerequisite: participation in Medical Scientist Training Program graduate phase.

050:213 Interpreting Medical/Scientific Literature  1 s.h.
How to read, interpret, and present medical and scientific literature.
Microbiology

Head: Michael A. Apicella
Professors: Michael A. Apicella (Internal Medicine), Robert F. Ashman (Internal Medicine), Gail A. Bishop (Internal Medicine), John E. Butler, Steven Clegg, Charles D. Cox, Michael G. Feiss, John T. Harty, David M. Lubaroff (Urology), William Nauseef (Internal Medicine), Stanley Perlman (Pediatrics), Timothy L. Ratliff (Urology), Richard J. Roller, Paul Rothman (Internal Medicine), George V. Stauffer, Mark F. Stinski, C. Martin Stoltzfus, Jerrold P. Weiss (Internal Medicine), Mary E. Wilson (Internal Medicine)
Professors emeriti: John Cazin Jr., David T. Gibson, Louis G. Hoffmann, Erich W. Six, Donald P. Stahly
Associate professors: Lee-Ann Allen (Internal Medicine), Morris O. Dailey (Pathology), Bradley D. Jones, John R. Kirby, Al J. Klingelhutz, Wendy J. Maury, Linda L. McCarter, David S. Weiss, Timothy L. Yahr
Associate professor emeritus: Jose E. Rodriguez
Adjunct associate professor: Mary J. Gilchrist
Assistant professors: Alex Horswill, Jon Houtman, Brian K. Martin, Steven M. Varga, Howard Xue
Adjunct assistant professor: Marcia L. Cordts
Adjunct lecturers: Jennifer D. Boddicker, Linda M. Knudson
Undergraduate degree: B.S. in Microbiology
Undergraduate nondegree program: Minor in Microbiology
Graduate degrees: M.S., Ph.D. in Microbiology
Web site: http://www.medicine.uiowa.edu/microbiology

Study in the Department of Microbiology is dedicated to the branch of biological sciences that deals with the smallest living things: bacteria, archaea, fungi, algae, protozoa, and viruses. It is coupled with immunology, the study of the response of higher organisms to foreign substances.

Microbiology and immunology are at the forefront of the modern biological revolution. Microbes are often the experimental subjects of choice for examining basic genetic and biological phenomena because of their small size, rapid growth rate, and relative simplicity. A significant portion of contemporary biochemical research employs microbiological and immunological methods.

Current research is making theoretical and practical advances concerning microbial species and viruses that infect animals, including man, plants, and other microbes; the use of comparative genomics, gene expression profiling, and recombinant DNA methods to analyze basic biological processes and generate valuable products; the nature and occurrence of microbial life in extreme or unusual environments; microbial synthesis and modification of antibiotics and other natural products; the role of microbes in stabilization of the biosphere by recycling and detoxifying waste products; the genetics and regulation of metabolic processes; and the genetics and regulation of the immune response, including characterization of mechanisms used by bacteria to signal one another and characterization of interactions between different types of immune cells and their targets.

Undergraduate Program

The College of Liberal Arts and Sciences administers undergraduate programs and grants undergraduate degrees in Microbiology. The department offers a Bachelor of Science in Microbiology and a minor in Microbiology.

Microbiology is an excellent major for undergraduate students who want a good general education with emphasis on an important and interesting branch of biological sciences. Graduates find employment opportunities in government, hospitals, public health laboratories, research laboratories, and industrial laboratories (food, dairy, chemical, pharmaceutical, and genetic engineering companies). Those who pursue advanced degrees have more advanced career opportunities in these same areas as well as in college and university teaching.

Bachelor of Science

The Bachelor of Science in Microbiology requires a minimum of 64 s.h. in the major. Students must complete at least 21 s.h. in microbiology course work, including at least 12 s.h. taken at The University of Iowa. All University of Iowa microbiology courses must be chosen from those numbered 061:147 and above, except 061:164. No more than 2 s.h. of 061:161 (061:171 for honors students) and no more than 2 s.h. of 061:163 may be counted toward the required 21 s.h. of microbiology courses. Students may count 061:218, but not 061:220, toward the requirement.
Students may take microbiology courses more advanced than 061:157 General Microbiology only if they receive a grade of C or higher in 061:157 and have the instructor's consent for the courses. Mathematics and science courses required by the department for the B.S. may not be taken pass/nonpass.

Microbiology Seminar (061:163) should be taken for credit only once during the senior year. Students are encouraged to take the course for 0 s.h. during other semesters after they have taken 061:157.

All students must complete the College of Liberal Arts and Sciences General Education Program.

Students must take the following in addition to required microbiology courses.

002:010-002:011 Principles of Biology I-II 8 s.h.
004:011-004:012 Principles of Chemistry I-II 8 s.h.
004:121-004:122 Organic Chemistry I-II 6 s.h.
004:141 Organic Chemistry Laboratory 3 s.h.
029:011-029:012 College Physics 8 s.h.
099:120 Biochemistry and Molecular Biology I 3 s.h.
099:130 Biochemistry and Molecular Biology II 3 s.h.

One of these:
22M:016 Calculus for the Biological Sciences 4 s.h.
22M:025 Calculus I 4 s.h.
22M:031 Engineering Mathematics I: Single Variable Calculus 4 s.h.

In addition, the following courses may be recommended for some students.

08N:080 Nonfiction Writing 3 s.h.
*171:161 Introduction to Biostatistics 3 s.h.

*Some medical schools require a biostatistics course for admission.

**Four-Year Graduation Plan**

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

**Before the third semester begins:** 002:010; 004:011, and 004:012; an approved calculus class; and at least one-quarter of the semester hours required for graduation

**Before the fifth semester begins:** 002:011, 004:121, 004:122, and 004:141; 061:157; and at least one-half of the semester hours required for graduation

**Before the seventh semester begins:** five more courses in the major and at least three-quarters of the semester hours required for graduation

**Before the eighth semester begins:** another 10-12 s.h. of course work

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining required General Education courses, and a sufficient number of semester hours to graduate

**Honors**

Microbiology majors who are members of the University of Iowa Honors Program may enroll in the honors program in microbiology. Membership in the University Honors Program requires that students maintain a cumulative University of Iowa g.p.a. of at least 3.33. Microbiology honors students must also maintain a g.p.a. of at least 3.33 in microbiology courses. The program requires 25 s.h. of course work in microbiology, including 6 s.h. in 061:171 Honors Undergraduate Research in Microbiology, which constitutes an introduction to experimental research. At the end of the research, students present written and oral reports. Students who successfully complete these requirements receive the B.S. with honors.

**Minor**

An undergraduate minor in microbiology requires at least 15 s.h. of credit in microbiology courses with a g.p.a. of at least 2.00. Students must take at least 12 of the 15 s.h. at The University of Iowa. All courses must be chosen from those numbered 061:147 and above, except 061:164.

No more than 2 s.h. of 061:161 or 061:171 and 2 s.h. of 061:163 may be counted toward the 15 s.h. requirement. Students may count 061:218, but not 061:220, toward the minor.

**Graduate Programs**

The Carver College of Medicine administers graduate programs in microbiology; graduate degrees are granted through the Graduate College. See Carver College of Medicine and Graduate College in the Catalog for general information about study in medicine and graduate study at the University.
The department offers a Master of Science in microbiology and a Doctor of Philosophy in microbiology. Generally, students admitted to the graduate program pursue the Ph.D.

The objectives of the graduate programs in microbiology are to help students become highly qualified in microbiology research and teaching.

The program offers study in six subdisciplines: pathogenic bacteriology, microbial genetics, immunology, microbial physiology, animal virology, and bioinformatics. Several areas involve interdisciplinary training both within and outside the department, so students receive broad experience during their course of study. Students also may pursue interdisciplinary Ph.D. programs in genetics, immunology, and molecular and cellular biology.

During their first year, students rotate in three laboratories of their choice and are advised by the Graduate Student Advisory Committee. At the end of the first year, they choose a research supervisor who chairs their advisory committee. The committee provides intellectual and research guidance for the student’s training.

The Department of Microbiology cooperates with other University of Iowa departments to give students ample access to diverse course offerings, seminars, and research programs. For example, microbiology students may participate in courses and seminars in clinical laboratory microbiology, immunology, genetics, molecular and cellular biology, biocatalysis/biotechnology, and electron microscopy.

All students admitted to advanced degree programs are expected to assist in departmental teaching.

**Master of Science**

The Master of Science in microbiology requires a minimum of 30 s.h. of graduate credit. M.S. students are required to earn a minimum of 12 s.h. in microbiology courses chosen from three of the department’s six subdisciplines. They may substitute a course already taken (at The University of Iowa or elsewhere) for a course requirement, with the M.S. advisory committee’s approval. Additional course requirements depend on students’ interests and the advice of the examining committee. Students must write a thesis based on their own research and defend it satisfactorily in an oral examination. No more than 9 s.h. of credit for thesis research may be counted toward the 30 s.h. required for the Master of Science.

**Doctor of Philosophy**

The Doctor of Philosophy in microbiology requires a minimum of 72 s.h. of graduate credit. Ph.D. students are required to earn a minimum of 15 s.h. of credit in graduate-level microbiology courses. Students may substitute a course already taken (at The University of Iowa or elsewhere) for a course requirement, with the Ph.D. advisory committee’s approval. They also must pass a comprehensive examination before their sixth semester in the program and write a thesis based on their own research. The thesis must be defended satisfactorily in an oral examination.

**Admission**

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog. They should have a cumulative g.p.a. of at least 3.00 and must have completed courses in biological sciences, chemistry (inorganic and organic), mathematics including calculus, and physics. Those admitted with deficiencies must complete the relevant course work during their first year of graduate study. Admission is determined through a review and formal vote by the faculty. Preference is given to students applying for the Ph.D. program.

**Facilities**

The department shares the Bowen Science Building with the Departments of Anatomy and Cell Biology, Biochemistry, Molecular Physiology and Biophysics, and Pharmacology. Laboratory space and modern equipment are available for teaching and research.

Molecular Physiology and Biophysics

Head: Kevin P. Campbell
Executive associate head: W. Scott Moye-Rowley
Professors: François M. Abboud (Internal Medicine), Mark Anderson (Internal Medicine), Nikolai Artemyev, Michael Artman (Pediatrics), Kevin P. Campbell, Mark Chapleau (Internal Medicine), Beverly Davidson (Internal Medicine), Robert E. Fellows, Meredith Hay, Wayne Johnson, David Kusner (Internal Medicine), W. Scott Moye-Rowley, Paul Rothman (Internal Medicine), Andrew Russo, Thomas J. Schmidt, Deborah Segaloff, Curt Sigmund (Internal Medicine), Peter Snyder (Internal Medicine), Michael J. Welsh (Internal Medicine)
Professors emeriti: Gerald DiBona (Internal Medicine), G. Edgar Folk Jr., Charles C. Wunder
Visiting professors: Darryl Granner, Francisco Mora
Associate professors: Sarah England, Michael Henry, Robert Piper, Erwin F. Shibata, Mark Starnes
Assistant professors: Alessio Accardi, Michael Anderson, Benet Pardini (Pediatrics)
Graduate degrees: M.S., Ph.D. in Molecular Physiology and Biophysics
Web site: http://www.physiology.uiowa.edu

The Department of Molecular Physiology and Biophysics offers graduate study leading to the Master of Science and Doctor of Philosophy. It participates in interdisciplinary graduate programs, including the Medical Scientist Training Program, a combined M.D./Ph.D. program offered by the Graduate College and the Carver College of Medicine, and it provides instruction in molecular physiology and biophysics for M.D., D.D.S., pre-pharmacy, and other health professions students. The department also conducts a co-op exchange, a vigorous training program that gives undergraduate students the opportunity to develop as independent researchers in preparation for graduate studies.

The department’s principal research areas include cell biology, genetics, endocrinology, neuroscience, and membrane physiology and biophysics; the unifying theme is the understanding of signal transduction mechanisms involved in regulating function at the cellular and molecular levels.

Graduate Program

Graduate study in molecular physiology and biophysics provides students with fundamental knowledge of life processes at molecular, cellular, and integrative levels of biological function. It also imparts knowledge of modern research skills applicable to contemporary problems.

The program is designed for students whose degree objective is the Doctor of Philosophy. Students who are unable to complete the Ph.D. are granted the Master of Science if they satisfy all M.S. requirements and apply for the degree.

Students enter the graduate program through the Biosciences Program (Graduate College) or directly through the Department of Molecular Physiology and Biophysics. Those who enter directly are advised by the department’s director of graduate studies, who guides them in planning required course work and introduces them to research activities of the department’s faculty members.

Master of Science

The Master of Science in molecular physiology and biophysics requires a minimum of 30 s.h. beyond the bachelor’s degree and is offered with and without thesis. Thesis students complete laboratory research and write a thesis that fulfills the requirements of the Graduate College (see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog). Nonthesis students complete a library research report, and a written examination on the research report area and the graduate program in physiology.

Doctor of Philosophy

The Doctor of Philosophy in molecular physiology and biophysics requires a minimum of 72 s.h. beyond the bachelor’s degree. The core curriculum includes graduate-level courses in cell biology, molecular biology, human physiology, and neurophysiology. Advanced electives, offered by molecular physiology and biophysics and other departments, cover a wide range of topics, including receptors and signal transduction, and developmental neurophysiology.

After successful completion of required course work and the comprehensive examination, students devote full time to thesis research, which culminates in preparation of a doctoral dissertation and its defense in a final oral exam.
All degree candidates have experience as classroom instructors, under faculty supervision, as part of their training.

**Admission**

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog. They must have a bachelor's degree from an accredited institution, with an undergraduate major in one of the biological, chemical, physical, mathematical, or engineering sciences and one or more years of course work in biology, physics, biochemistry, and calculus. They also must have a cumulative science g.p.a. of at least 3.00 and a combined verbal and quantitative score above 1200 on the Graduate Record Examination (GRE) General Test.

**Financial Support**

All full-time students receive financial aid in the form of tuition and stipend support from the Department of Molecular Physiology and Biophysics. Support is renewed annually based on satisfactory progress in meeting degree requirements.

**Research**

Faculty research interests in the Department of Molecular Physiology and Biophysics encompass molecular and cellular endocrinology, cellular and developmental neurophysiology, and membrane structure and function. Within these, there are multiple areas of interest, including hormone receptors, reproductive endocrinology, signal transduction, regulation of gene expression, synaptic transmission, neuronal differentiation, membrane ion channels, regulation of excitability, and cardiovascular electrophysiology and regulation. Experimental models currently being investigated include rodents, yeast, drosophila, and cultured cell lines from a variety of species.

**Facilities**

Two floors of the Bowen Science Building are devoted to research and teaching in the Department of Molecular Physiology and Biophysics. Department faculty members also occupy laboratory facilities in the Eckstein Medical Research Building and the Carver Biomedical Research Building. In addition to specialized equipment in faculty research laboratories, the department provides equipment for fluorescence microscopy, isotope analysis, cell culture, and molecular biology. It also has access to the University network and the multimedia education facilities. Additional resources are available at the Hardin Library for the Health Sciences.

**Courses**

**072:152 Human Physiology for Dental Students** 4 s.h.
Principles of human physiology, organ systems, cell function. Offered fall semesters. Prerequisites: grade of C- or higher in 002:010, 004:121, and 004:122; D.D.S. enrollment; and consent of course director.

**072:153 Graduate Physiology** 6 s.h.
Principles of human physiology, organ systems, cell function. Offered fall semesters. Prerequisites: grades of C- or higher in 002:010, 004:121, and 004:122; graduate standing; and consent of course director.

**072:164 Human Physiology for Physician Assistant Students** 4 s.h.
Principles of human physiology, organ systems, cell function. Offered summer sessions. Prerequisites: grade of C- or higher in 002:010, 004:121, and 004:122; Physician Assistant Program enrollment; and consent of course director.

**072:184 Developmental Neurobiology** 3 s.h.
Major developmental systems, their application in neurobiology; neurogenesis, synapse formation, axonal guidance, the cellular/molecular aspects of neural differentiation; literature-based approach. Prerequisites: 002:180 and consent of course director. Same as 002:184, 132:184.

**072:199 Research, Independent Study** arr.
Prerequisites: consent of instructor; closed to molecular physiology and biophysics graduate students.

**072:209 Receptors and Signal Transduction** 3 s.h.
Major receptor families: G-protein coupled receptors, ligand-regulated transmembrane enzymes, ligand-regulated ion channels, the steroid receptor superfamily; emphasis on description and interpretation of specific experiments, experimental strategies that underlie current research. Prerequisites: 099:130 or equivalent, and consent of course director. Same as 071:209, 132:209.

**072:211 Biophysics of Excitable Membranes** 3 s.h.
Selected electrophysiological and biophysical topics from published research. Prerequisites: 027:130 and consent of course director.

**072:220 Mechanisms of Cellular Organization** 3 s.h.
Same as 060:216, 142:220.

**072:225 Mechanisms of Cell Growth and Development** 3 s.h.
Same as 060:225, 142:225.

**072:240 Physiology Workshop** 1 s.h.
Presentations by faculty, postdoctoral fellows, graduate students, and scientists. Repeatable. Prerequisite: graduate standing.

**072:250 Topics in Molecular Physiology** 1 s.h.
Current issues in molecular physiology; seminar. Prerequisite: 156:201.

**072:265 Neuroscience Seminar** 0-1 s.h.
072:270 Responsible Conduct of Research  1 s.h.
Ethical issues, including misconduct and fraud, proper handling of data, responsible authorship, conflict of interest, research on animals and human subjects. Prerequisite: consent of instructor.

072:302 Research Physiology and Biophysics  arr.
Prerequisite: molecular physiology and biophysics graduate standing.

072:342 Biosciences Seminar  1 s.h.
Focus on a journal article relevant to weekly biosciences seminar. Repeatable. Prerequisite: consent of instructor. Same as 002:270, 156:265.

Prerequisite: molecular physiology and biophysics Ph.D. candidacy.
Neurology

Head: Robert L. Rodnitzky
Professors: Harold P. Adams Jr., Adel Affi (Pediatrics/Anatomy and Cell Biology), Kevin Campbell (Molecular Physiology and Biophysics), Patricia Davis, Jun Kimura, Jane Paulsen (Psychiatry), Matthew Rizzo, Robert L. Rodnitzky, William Talman, Daniel Tranel (Psychology), Michael Wall (Ophthalmology and Visual Sciences), Thoru Yamada
Professors emeriti: William E. Bell (Pediatrics), Ramon Lim
Adjunct professors: Ralph Adolphs (Neurosurgery), Antonio Damasio, Hanna Damasio
Associate professors: Steven Anderson, Daniel Bonthius (Pediatrics), Beverly Davidson (Internal Medicine), M. Eric Dyken, Thomas Grabowski, Mark Granner, Matthew Howard (Neurosurgery), Robert D. Jones, Andrew Lee (Ophthalmology and Visual Sciences/Surgery), Katherine D. Mathews (Pediatrics), Henry Paulson, E. Torage Shivapour, Jon Tippin, James B. Worrell
Adjunct associate professor: Antoine Bechara
Assistant professors: Ed Aul, Natalie Denburg, Deema Fattal, Lynn Geweke, Pedro Gonzalez, Wes Houston, Shekar Raman, Erik St. Louis, Malcolm Yeh, Asgar Zaheer
Postdoctoral associates, fellows: Melissa Duff, Kevin Faber, David Rudrauf, Heidi Smith, Shana Vifian-Ray, Chad Yucus

Neurology is the branch of medical science concerned with diagnosis and management of disorders of the brain, spinal cord, peripheral nervous system, and muscle. The Department of Neurology’s hallmark is its history of carefully integrating patient care and the education of medical, postdoctoral, and graduate students.

Medical Student Training, Graduate Education

The department provides clinical and clinical research training to third- and fourth-year M.D. students. The department also offers research opportunities in various fields of neuroscience, including neuropsychology, neuroimaging, and neuroanatomy, to Ph.D. students in neuroscience and psychology.

Residency Program

An active, four-year approved residency program qualifying physician trainees for board certification in neurology is a major aspect of the department’s activity; experience in clinical electrophysiology, pediatric neurology, psychiatry, and neuropathology is part of this training.

Research

The faculty’s investigative interests center on cognitive neuroscience, degenerative diseases, cerebrovascular disease, neurogenetics, neuromuscular diseases, electrophysiological correlates of central and peripheral nervous system disease, growth factors in the nervous system, control and regulation of autonomic functions, neuro-ophthalmology, movement disorders, epilepsy, and pain management.

Courses

064:011 Clinical Neurology 2, 4 s.h.
Experience in clinical neurology through ward work and case-based conferences linked to required reading; focus on neurologic examination, diagnosis of neurologic problems; four-week clerkship.

064:238 Introductory Neuropsychological Assessment arr.
Standard behavioral assessment procedures; administration of neuropsychological tests under staff supervision; preparation of integrated reports on collected data; involvement in research project.

064:239 Advanced Neuropsychological Assessment arr.
Continuation of 064:238.

064:240 Topics in Cognitive Neuroscience 3 s.h.
Key topics in the neural basis of human cognition; research literature. Recommended: graduate courses in basic neuroscience, cognitive psychology. Same as 132:240.

064:302 Advanced Inpatient Neurology 4 s.h.

064:303 Advanced Outpatient Neurology 4 s.h.

064:310 Cerebrovascular Disease arr.
Experience in evaluation, management of patients with cerebrovascular diseases; conferences, clinical rounds.

064:998 Neurology on Campus arr.

064:999 Neurology off Campus arr.
Neurosurgery

**Head:** Matthew A. Howard III  
**Professors:** Patrick W. Hitchon, Matthew A. Howard III, Arnold H. Menezes, Vincent C. Traynelis, John C. VanGilder  
**Associate professor:** Timothy C. Ryken  
**Assistant professors:** Jeremy Greenlee, Hiroto Kawasaki, Hiroyuki Oya  
**Web site:** http://www.uihealthcare.com/depts/med/neurosurgery

The Department of Neurosurgery provides an experience oriented toward patient care and basic research concerning diseases and physiology of the nervous system. Students develop awareness of neurosurgery’s role in treating head and spine trauma, vascular disorders, brain and spinal cord tumors, pain and peripheral nerve abnormalities, degenerative spine pathology, and surgical treatment of epilepsy and movement disorders.

Clinical courses are designed around patient-centered discussions interwoven with operating room experiences. Lectures and conferences are scheduled on specific topics.

The department provides fourth-year M.D. students with access to special expertise in selected topics of investigation regarding the central nervous system and to a clinical course through special arrangements with the faculty.

**Faculty**

Neurology faculty strengths are centered in physiology of spinal cord trauma, epilepsy, auditory brain function and pain, primary brain tumor genetics, central nervous system tissue culture, spinal column biomechanics, and movement disorders. The department has expertise in clinical management across the spectrum of central nervous system diseases.

**Facilities**

Multiple, fully equipped laboratory space is available to support scientific research of the central nervous system. Faculty and technical assistance is available in all laboratories.

**Courses**

Neurosurgery courses are open only to M.D. and qualified associated health sciences students.

183:227 Subinternship in Neurosurgery 4 s.h.  
Advanced clinical clerkship in neurological surgery; emphasis on diagnosis and operative management of surgical neurological disease.

183:228 Research in Neurological Surgery arr.  
Laboratory investigation of spinal cord injury, spinal column biomechanics and instrumentation, electrophysiology of pain, epilepsy and hearing, molecular genetics and physiology of brain tumors.

183:999 Neurosurgery off Campus arr.  
Arranged by student with department approval.
The Nuclear Medicine Technology Program is one of five academic units in the Division of Associated Medical Sciences. For information on the division’s general academic policies, see Associated Medical Sciences in the Catalog.

Nuclear medicine technology is a medical specialty that uses radioactive tracers for diagnostic, therapeutic, and research purposes. Nuclear medicine technologists generally are employed in hospitals and clinics. They work hand-in-hand with nuclear medicine physicians, health physicists, radiopharmacists, and radiochemists as an integral part of a highly trained specialty team.

At the heart of nuclear medicine technology is the use of sophisticated detectors and computers to trace the movement and localization of radioactive tracers in the human body. Other job responsibilities include radiation safety; quality control testing; radiopharmaceutical preparation and administration; and general patient care.

**Undergraduate Program**

The Carver College of Medicine offers a Bachelor of Science in nuclear medicine technology. Upon satisfactory completion of the four-year program, students receive the degree and a certificate of training. Graduates are eligible for national certification as nuclear medicine technologists.

The Nuclear Medicine Technology Program is fully accredited by the Joint Review Committee on Educational Programs in Nuclear Medical Technology (JRCNMT). Fulfillment of the requirements established by the JRCNMT Accreditation Board involves three years of preclinical work in the College of Liberal Arts and Sciences and the Carver College of Medicine, and a minimum of 12 months of professional clinical experience, available at University of Iowa Hospitals and Clinics and the Veterans Affairs Iowa City Health Care System.

**Bachelor of Science**

The Bachelor of Science requires 124 s.h., including 30 s.h. in radiology course work (prefix 074). Required courses in the first and sophomore years emphasize the physical and biological sciences, which provide a basic background for further development in the junior year.

Applicants are strongly advised to pursue a course of study that is applicable to a baccalaureate degree, most commonly in biology, chemistry, biochemistry, or microbiology. In this way, students who are not admitted to the Nuclear Medicine Technology Program can complete a degree in their chosen area.

The following are recommended courses.

**FIRST YEAR**

- 004:011-004:012 Principles of Chemistry I-II 8 s.h.

**SOPHOMORE YEAR**

- 002:010-002:011 Principles of Biology I-II 8 s.h.

One of these:
- 22C:001 Computer Literacy 3 s.h.
- 22C:005 Introduction to Computer Science 3 s.h.
- 22C:016 Computer Science I 4 s.h.

**JUNIOR YEAR**

- 027:053 Human Anatomy 3 s.h.
- or
- 060:110 Principles of Human Anatomy 3 s.h.
- 029:011-029:012 College Physics 8 s.h.
One of these:
22S:101 Biostatistics 3 s.h.
22S:102 Introduction to Statistical Methods 3 s.h.
171:161 Introduction to Biostatistics 3 s.h.

Advanced courses in chemistry, biology, or physics based on alternative major, possible minors, interest, and career goals

**SENIOR YEAR**

The curriculum of the clinical year is organized in accordance with the JRCNMT Essentials of an Accredited Educational Program in Nuclear Medicine Technology. Courses are taught in the following areas: radiopharmacy, radiobiology, radiation safety, patient care, medical terminology, anatomic and physiologic bases of nuclear medicine procedures, physics and instrumentation, administration and management, medical and professional ethics, mathematics and statistics of nuclear medicine, and computer applications in nuclear medicine. Clinical rotations focus on nuclear and positron emission tomography (PET) imaging, clinical radiopharmacy, computer applications, and quantification of radioactivity in vivo and in vitro.

The clinical year consists of these courses.

- 074:101 Principles of Nuclear Medicine I 6 s.h.
- 074:102 Introductory Clinical Nuclear Medicine 6 s.h.
- 074:103 Principles of Nuclear Medicine II 3 s.h.
- 074:104 Intermediate Clinical Nuclear Medicine 9 s.h.
- 074:105 Advanced Clinical Nuclear Medicine 6 s.h.

For course descriptions, see Radiology in the Catalog.

**Admission**

Prerequisites for admission to the Nuclear Medicine Technology Program include the following:

- a minimum of 94 s.h. of college credit, with a cumulative g.p.a. of at least 2.50;
- completion of the College of Liberal Arts and Sciences General Education Program components in rhetoric, foreign language, interpretation of literature, humanities, historical perspectives, quantitative or formal reasoning, social sciences (sociology and psychology are recommended), and distributed general education;

a minimum of 20 s.h. in three science areas, including a complete introductory course with laboratory in chemistry, physics, and biology; and

a minimum of 3 s.h. in mathematics, including at least elementary functions.

Fulfillment of these basic admission requirements does not guarantee acceptance into the Nuclear Medicine Technology Program.

A new class begins every August. Application deadline is February 1. Personal interviews are scheduled in February, and the class is selected by March 15. Class size is limited to 10 students. Prospective students are encouraged to consult the Nuclear Medicine Technology Program office to plan an appropriate preprofessional program.
Medical Student Training

Courses in the Department of Obstetrics and Gynecology are designed to give M.D. students a comprehensive survey of reproductive medicine. This is done through a series of didactic lectures, inpatient and outpatient assignments, ward rounds, teaching seminars, and special elective courses.

The third-year clerkship (066:004 Clinical Obstetrics and Gynecology) gives students the core knowledge, skills, and attitudes needed to provide primary health care to female patients.

The department offers fourth-year medical students a variety of electives that provide advanced training in the special areas of obstetrics and gynecology. In addition to clerkships at University of Iowa Hospitals and Clinics, these electives include a rotation at the Gundersen Clinic in La Crosse, Wisconsin, and other arranged off-campus courses.

Residency Program

The department offers a four-year residency. Upon completion, graduates are eligible for the written and oral examinations leading to certification by the American Board of Obstetrics and Gynecology.

Residents are assigned to the various divisions and clinical services of the department; they care for both hospital inpatients and outpatients. Training is provided in normal and abnormal obstetrics, gynecologic surgery, office gynecology, ultrasound, reproductive endocrinology, gynecologic oncology, urogynecology, family planning, and endoscopic procedures.

Courses

066:004 Clinical Obstetrics and Gynecology arr. Proficiency in evaluation and management of core women’s health care relating to the reproductive tract; special history taking, physical examination, laboratory and imaging assessment of obstetric and/or gynecological patients, application of current concepts to well women’s health care and to management of diseases and pathologies; outpatient and inpatient obstetrics and gynecology; family planning, screening and early detection of cancer and other diseases.

066:006 High Risk Antepartum Obstetrics Subinternship arr. Experience in evaluating new patients in a high-risk obstetric clinic; continuing antepartum care; doing work-up, ordering diagnostic studies, and following course of complicated patients admitted to obstetric ward; assisting in diagnostic, therapeutic procedures such as fetal heart rate testing, amniocentesis, ultrasonography, intrauterine fetal transfusion.

066:010 Gynecologic Oncology Subinternship arr. Experience on a gynecologic oncology service, including operating room, inpatient and outpatient care; team management approach to gynecologic cancer patient, treatment and follow-up of invasive gynecologic malignancies, etiology and risk factors for gynecologic neoplasias, pre- and postoperative evaluation and treatment of surgical management of gynecologic neoplasia; research project encouraged.

066:013 Reproductive Endocrinology Subinternship arr. Experience evaluating new and returning patients in the Reproductive Endocrinology and Infertility Clinic; participation in preoperative, operative, and inpatient postoperative care; advanced gynecologic ultrasonography, in vitro fertilization services.

066:016 Advanced Obstetric-Gynecologic Clerkship: La Crosse, Wisconsin arr. Experience in a large professional obstetrics and gynecology practice group in a community setting; exposure to clinical obstetrics and gynecology.

066:998 Ob/Gyn on Campus arr.

066:999 Ob/Gyn off Campus arr.
Ophthalmology and Visual Sciences

Head: Keith D. Carter
Associate professors: Hilary A. Beaver, Karen M. Gehrs, Kenneth M. Goins, A. Tim Johnson, Patricia A. Kirby, Young H. Kwon, Thomas A. Oetting, Richard J. Olson, Mark E. Wilkinson
Assistant professors: Michael M. Abramoff, Terry A. Braun, Emily C. Greeleee, Brian R. Kirschling, Robert F. Mullins, Todd E. Scheetz, Christine W. Sindt, Nasreen A. Syed
Web site: http://webeye.ophth.uiowa.edu

Ophthalmology is a medical and surgical specialty concerned with the diagnosis and treatment of diseases of the eye and its adnexa. The Department of Ophthalmology and Visual Sciences combines postgraduate training with research and patient care in all aspects of the visual sciences. Subspecialties represented in the department include cataract surgery, comprehensive ophthalmology, cornea and external diseases, contact lens and refraction services, genetics and molecular biology, glaucoma, laser refractive surgery, neuro-ophthalmology, oculoplastics, ocular echography, ocular pathology, ocular vascular diseases, optometric services, pediatric ophthalmology and adult strabismus, vitreoretinal disorders, and vision rehabilitation.

Medical Student Training, Graduate Education

The department offers clinical and research training to M.D. students and limited graduate studies for Ph.D. students in Anatomy and Cell Biology, Molecular and Cellular Biology, and Genetics. A three-year residency program with clinical experience in the ophthalmic subspecialties is offered to physician trainees. Graduates qualify for the written and oral examinations leading to certification by the American Board of Ophthalmology. Postgraduate fellowships of one to two years are available for qualified ophthalmologists in most subspecialty areas.

Facilities

The department maintains research laboratories for cell biology, biochemistry, morphology, tumor diagnosis, pathology, electrophysiology, pupillography, molecular biology, and vascular disease. Clinical facilities in ophthalmology are available at University of Iowa Hospitals and Clinics in the Pomerantz Family Pavilion and at Veterans Affairs Iowa City Health Care System and the Veterans Affairs Central Iowa Health Care System in Des Moines. The department also manages an eye clinic at the Broadlawns Medical Center in Des Moines as well as outreach programs in other communities. The department houses the University of Iowa Carver Family Center for Macular Degeneration.

Continuing Education

The department sponsors clinical conferences open to community ophthalmologists in Iowa and surrounding states where physicians can earn continuing medical education credits. The department also sponsors an annual alumni meeting with participation by nationally and internationally recognized ophthalmologists and vision scientists.

Courses

067:100 Elective in Ocular Pathology 4 s.h.
Pathophysiology of eye disease; emphasis on use of Socratic method, self-study.

067:101 Elective in External Eye Disease 4 s.h.
Common diseases of eyelid, conjunctiva, cornea.

Visual, ocular motor dysfunction due to neurologic disease; patient work-up, readings, neuro-ophthalmology rounds.

Use of recombinant DNA, tissue culture, protein electrophoresis in study of inherited eye diseases. Prerequisite: consent of instructor.

067:111 Clinical Ophthalmology 2 s.h.
All aspects of clinical ophthalmology; patient rounds, lectures, case presentations; clinical duties with staff, residents, faculty in UIHC and VAMC ophthalmology clinics.

067:998 Ophthalmology on Campus arr.

067:999 Ophthalmology off Campus arr.
The Department of Orthopaedics and Rehabilitation offers training for residents and provides education for undergraduate students.

Residency Programs

The department offers two programs for postgraduate trainees. The first is a five-year integrated clinical program, in which interns and residents participate simultaneously in inpatient and outpatient care, surgery, and sciences related to the neuromusculoskeletal system. The second provides the same training as the first, but includes an additional one to two years of research.

Clinical Residency

Trainees enter this program directly from medical school through the National Internship Matching Plan.

During the first year, trainees gain experience not only in clinical orthopaedics but also in medicine, pediatrics, neurology, surgical specialties, intensive care, anesthesiology, and other services. During years two through five, residents gain experience in trauma, musculoskeletal oncology, children's orthopaedics, adult orthopaedics, neuromuscular disorders, rehabilitation, prosthetics and orthotics, rheumatology, and basic science related to orthopaedics. They take specialized courses in anatomy, bone histology, biochemistry, physiology, and pathology.

A weekly seminar covers biomechanics, kinesiology, and selected clinical subjects.

Residency with Research

In addition to the training described for the clinical program, this program includes an additional one or two years of research in a field that interests the resident and is related to the musculoskeletal system. The research may be done in one of the orthopaedic laboratories or in a basic science department.

Undergraduate Education

At the undergraduate level, the Department of Orthopaedics and Rehabilitation participates in the Bachelor of Science in athletic training, which is offered by the Department of Integrative Physiology (College of Liberal Arts and Sciences). Members of the orthopaedics and rehabilitation sports medicine faculty teach 076:187 Practicum in Athletic Training IV, a two-semester advanced clinical sequence (8 s.h.). Students who complete the program are eligible to apply for national certification in athletic training and pursue employment opportunities as health care professionals for sports medicine clinics and hospitals, as well as in academic settings.

Laboratories

The orthopaedics laboratories deal with problems in these major subject areas.

Biochemistry: the biochemistry of proteoglycans, collagens, and matrix proteins, both normal and altered in musculoskeletal disorders

Biomechanics: problems of the upper extremity; biomechanics of the spine, hip, and gait; total joint replacements (in conjunction with the College of Engineering)
Cell and molecular biology: studies of normal bone, cartilage, tendon, muscle, and tissues altered by experiment and disease

Facilities

The department is housed in the John Pappajohn Pavilion of University of Iowa Hospitals and Clinics and has an active service in the Veterans Affairs Iowa City Health Care System.

Facilities include 48 orthopaedic beds, five outpatient clinics, inpatient and outpatient operating rooms, a specialty library, a specialty radiology unit, and physical therapy and rehabilitation facilities.

Specialty clinics deal with disorders such as scoliosis, club feet, congenital dislocated hip, neuromuscular disease, metabolic disease, amputation, neoplasm, trauma, and neck, back, hip, foot, knee, and hand problems.

Physicians in the outpatient clinic see approximately 175 patients per day. Approximately 5,000 major operations are performed each year under the auspices of the department.

The department provides consulting service to the Center for Disabilities and Development, Child Health Specialty Clinics, and two state programs that serve people with mental retardation.

Courses

076:002 Clinical Orthopaedics
076:187 Practicum in Athletic Training IV 4 s.h.
076:201 Advanced Clinical Orthopaedics
076:202 Musculoskeletal Trauma
076:205 Physical Medicine and Rehabilitation 4 s.h.
076:998 Orthopaedics on Campus
076:999 Orthopaedics off Campus
The Department of Otolaryngology—Head and Neck Surgery is one of the most comprehensive otolaryngology departments in the world. Founded in 1922, it also is among the oldest in the United States. Its facilities are situated at University of Iowa Hospitals and Clinics. US News & World Report has consistently ranked the department’s program among the top three in the nation.

The department’s chief focus areas are education and training, patient care, and research. M.D. students in the Carver College of Medicine, residents, and fellows benefit from a faculty dedicated to providing thorough training in all aspects of otolaryngology and patient care. Patients in the otolaryngology clinic enjoy access to comprehensive care in any of five subspecialties: pediatric otolaryngology, otology/neurotology, general otolaryngology and rhinology, head and neck oncology, and facial plastic and reconstructive surgery. University of Iowa faculty members from ophthalmology and radiation oncology hold joint appointments in otolaryngology, adding depth to the department’s resources.

The department is home to prominent research programs in cleft palate and other craniofacial defects, head and neck oncology, cochlear implants, and molecular genetics. It also offers fellowships in otology/neurotology, pediatric otolaryngology, and head and neck oncology.

Residency Program

Each year the Department of Otolaryngology—Head and Neck Surgery accepts five applicants to its residency program, which is accredited by the Accreditation Council for Graduate Medical Education. Three residents are matched to the four-year clinical track, and two are matched to the six-year research track.

The clinical track provides four years of concentrated clinical study and application in all aspects of otolaryngology. Residents begin their training with a seven-week intensive basic science course divided into an anatomy component, which includes a supervised cadaver dissection, and a 100-hour lecture series that details the study of otolaryngology and related disciplines. Each resident also completes two research rotations in order to explore research areas that interest him or her.

The research track is a combined clinical-research program designed for residents interested in an otolaryngology research career. After an internship year, residents complete two years of research followed by four years of clinical training. The interaction of clinicians and basic scientists from several departments affords residents the opportunity for involvement in a wide spectrum of current research in areas such as electrophysiology of the auditory system, the genetics of head and neck cancer, and gene therapy.

Fellowships

The Department of Otolaryngology—Head and Neck Surgery offers two-year fellowships in otology/neurotology and in pediatric otolaryngology, which are accredited by the Accreditation Council for Graduate Medical Education, and a one- or two-year fellowship in head and neck oncology accredited by the Advanced Training Council of the American Head and Neck Society.

One applicant is admitted to the otology/neurotology fellowship program every two years. Otolaryngology fellows spend a minimum of 20 months on the clinical service. They attend all otology/neurotology clinics and neurotology cases in the operating room, and are responsible
for inpatient service. They also have one day of dedicated research time each week.

The pediatric otolaryngology fellowship program admits one applicant each year. Fellows spend a minimum of 18 months on the clinical service, where they have the opportunity to train with all pediatric otolaryngology faculty members. Each fellow also has six months of dedicated time for academic research.

One applicant is accepted as a head and neck oncology fellow each year. Training is largely clinical, allowing fellows the opportunity to participate in a variety of procedures, ranging from skull base resection to laryngeal rehabilitation. Fellows routinely perform 35 to 45 free-tissue transfers during one year of training. They also complete a clinical and/or basic science research project relating to head and neck oncology.

Pathology

Head: Michael B. Cohen
Professors emeriti: James A. Goeken, Thomas H. Kent, Richard G. Lynch, George D. Penick, Michael Pfaller, Charles E. Platz, Earl F. Rose, Marian Schwabauer
Adjunct clinical professors: Dorryl L. Buck, Oskar W. Rokhlin
Associate professors: Jackie R. Bickenbach, Leslie A. Bruch, Morris O. Dailey, Daniel Diekema, Ronald D. Feld, Thomas H. Haugen, Michael Henry, Chris Jensen, Patricia Kirby, Michael Knudson, Michael MacKey, Marcus Nashelsky, Tom Raife, Sandra Richter, Annette Schlueter, Robert D. Tucker
Adjunct associate professor: Julia C. Goodin
Adjunct clinical associate professor: Bradley Randall
Assistant professors: Aaron Bosler, Laila Dahmoush, Hasimu Hapahake, Jonathan Heusel, Florenza Ianzini, Michael Icardi, Toshiki Itoh, Tomomi Kuwana, Kevin Legge, Vincent Liu, David Meyerholz, Peter Nagy, Ramesh Nair, Vishala Neppalli, Nasreen Syed, Sergi Syrbu, Jamie Weydert, Thomas Winder
Adjunct assistant professor: Dennis Klein
Adjunct clinical assistant professors: Timothy Drevankyo, Jerri McLemore, L. Jeffrey Rissman
Graduate degree: M.S. in Pathology
Web site: http://www.medicine.uiowa.edu/pathology

The Department of Pathology offers basic pathology courses to health science students; a clinical training program for clinical laboratory scientists; a Master of Science in pathology; residency training programs leading to American Board of Pathology certification in anatomic pathology, clinical pathology, and neuropathology; fellowship training in pathology subspecialties; and postdoctoral research training in cellular and molecular pathology.

Graduate Program

The department offers a Master of Science in pathology.

Master of Science

The Master of Science in pathology requires a minimum of 30 s.h. of graduate credit, including 21 s.h. of classroom work and 9 s.h. earned for research. The program trains graduate students in cellular and molecular biology. Graduates work as research scientists in a range of academic and commercial laboratories, including those in the rapidly expanding biotechnology sector. Others advance to doctoral-level study.

M.S. students take a core curriculum in cell and molecular biology as well as electives suited to their individual interests. They acquire contemporary research skills by pursuing a laboratory thesis project under the guidance of a faculty member. Currently, there are active research programs in immunology, microbiology, neuroscience, signaling and apoptosis, inflammation and vascular biology, tumor biology and cancer, and virology.

Most M.S. students complete their course of study in three years.

The department encourages applicants with Bachelor of Science degrees in biology, chemistry, biochemistry, clinical laboratory science, microbiology, and zoology. Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog. They should have an undergraduate g.p.a. of at least 3.00 and a combined verbal and quantitative score of at least 1100 on the Graduate Record Exam (GRE) General test.

Clinical Education

See Clinical Laboratory Sciences and Division of Associated Medical Sciences in the Catalog.

Residency Program

The department offers 20 residency positions in pathology, covering a training span of up to four years. The patient populations of University of Iowa Hospitals and Clinics and Veterans Affairs Iowa City Health Care System are integral to the program.
Residents gain experience in systematic rotation through the varied laboratory services, including surgical pathology, autopsy pathology, neuropathology, cytology, clinical chemistry, clinical microbiology, hematology, immunopathology, and transfusion medicine. They also have the opportunity to pursue one to three years of additional fellowship training in most pathology subspecialties.

Medical Student Training

The department provides seven 12-month medical student fellowships and a varying number of clerkships for medical students in any of the areas of anatomical and clinical pathology. One of the fellowships is a full-time research position in some facet of experimental pathology; the other six are primarily in anatomic pathology.

Postgraduate Training

The Department of Pathology offers postgraduate clinical fellowship programs in hematopathology, transfusion medicine, clinical microbiology, cytopathology, molecular genetics pathology, and surgical pathology for physicians who have completed residency training in pathology. These fellowships consist of one to two years of diagnostic work and up to two years of laboratory research.

The department provides postdoctoral research training in immunology, neuropathology, apoptosis, cancer biology, and clinical microbiology as well as in other areas of cellular and molecular pathology. These positions are open to individuals with either a Ph.D. or M.D.

Facilities

The Department of Pathology is well-equipped to carry out the sophisticated technology of modern cellular and molecular pathology. It administers more than 90,000 square feet of clinical laboratories at University of Iowa Hospitals and Clinics and has individual research and core facility laboratories, including histopathology and laser capture microscopy for cellular and molecular pathology research, in the Medical Research Center, Medical Laboratories, and at the Veterans Affairs Iowa City Health Care System. Also available are Carver College of Medicine research facilities for nucleic acid chemistry, hybridoma production, flow cytometry, ultrastructural studies, protein structure, image analysis, electron spin resonance, mass spectroscopy, nuclear magnetic resonance, and laboratory animal care.

The department provides seven 12-month medical student fellowships and a varying number of clerkships for medical students in any of the areas of anatomical and clinical pathology. One of the fellowships is a full-time research position in some facet of experimental pathology; the other six are primarily in anatomic pathology.
069:128 Clinical Microbiology 0, 4 s.h.
Rotation through clinical microbiology laboratories. Prerequisites: 069:113 and 069:139.

069:129 Clinical Immunology and Molecular Pathology 0, 3 s.h.
Rotation through clinical immunology and molecular pathology laboratories. Prerequisites: 069:112, 069:122 and 069:124.

069:130 Clinical Laboratory Medicine for Physician Assistants 0-1 s.h.
Theory and practice of selected clinical laboratory techniques and procedures; emphasis on effective use of clinical laboratory in diagnosis and management of disease. Prerequisite: Physician Assistant Program enrollment.

069:131 CLS Professional Skills Seminar 0-2 s.h.
Prerequisite: Clinical Laboratory Sciences Program senior standing.

069:132 CLS Management Topics and Projects 0-2 s.h.
Theory and practice of clinical laboratory management. Prerequisite: Clinical Laboratory Sciences Program senior standing.

069:133 Introduction to Human Pathology arr.
Human disease; basic disease processes, organ-related and multisystem diseases; case analysis. Offered fall semesters.

069:135 Individual Study in Clinical Laboratory Science arr.
Management, education, or research theory and practice. Prerequisite: Clinical Laboratory Sciences Program enrollment.

069:136 Introduction to Clinical Laboratory Science 0-1 s.h.
Prerequisite: admission to Clinical Laboratory Sciences Program.

069:137 Clinical Immunohematology 0, 2 s.h.
Rotation through clinical immunohematology laboratories. Prerequisites: 069:110, 069:112, and 069:123.

069:138 CLS Body Fluids 0-1 s.h.
Laboratory science applied to body fluids, including cell identification and enumeration, and associated chemical analyses: theory and practice. Prerequisites: 069:112 and 069:124.

069:139 CLS Parasitology 0-1 s.h.

069:143 Hemostasis and Thrombosis for CLS 0-1 s.h.
Laboratory hemostasis and thrombosis; theory and practice. Prerequisite: 069:136.

069:150 Clinical Laboratory Skills 0, 6 s.h.
Summer clinical laboratory science instruction in Omaha, Nebraska. Prerequisite: acceptance to Clinical Laboratory Science Program.

069:152 CLS Theory, Application, and Correlation 0, 5 s.h.
Application, evaluation, and correlation of laboratory procedures used in diagnosis and treatment of common disease states; small-group clinical case discussions. Prerequisite: 069:150.

069:154 Clinical Chemistry I 0, 4 s.h.
Theory, practical application, technical performance, and evaluation of clinical chemistry laboratory procedures; correlation of laboratory data with diagnosis of disease. Prerequisite: 069:150.

069:155 Clinical Chemistry II 0, 3 s.h.
Advanced theory, practical application, technical performance, and evaluation of clinical chemistry laboratory procedures; correlation of laboratory data with diagnosis of disease. Prerequisite: 069:154.

069:156 Clinical Hematology I 0, 4 s.h.
Introduction to theory, practical application, technical performance, and evaluation of hemotological and hemostasis procedures; correlation of laboratory data with disease diagnosis. Prerequisite: 069:150.

069:157 Clinical Hematology II 0, 3 s.h.
Advanced theory, practical application, technical performance, and evaluation of hemotological and hemostasis procedures; correlation of laboratory data with disease diagnosis. Prerequisite: 069:156.

069:158 Clinical Microbiology I 0, 4 s.h.
Introduction to theory, practical application, technical performance, and evaluation of procedures for isolation, identification, and susceptibility testing of infectious disease organisms in humans. Prerequisite: 069:150.

069:159 Clinical Microbiology II 0, 3 s.h.
Advanced theory, practical application, technical performance, and evaluation of procedures for isolation, identification, and susceptibility testing of infectious disease organisms in humans. Prerequisite: 069:158.

069:160 Clinical Immunology and Molecular Diagnostics 0, 1 s.h.
Theory, application, and evaluation of immunological components, principles, and methodologies used to assess immune dysfunction; theory and application of molecular diagnostic tools. Prerequisite: 069:150.

069:162 Clinical Immunohematology I 0, 3 s.h.
Introduction to theory, practical application, technical performance, and evaluation of blood bank procedures required for storage and transfusion of blood and blood components. Prerequisite: 069:150.

069:163 Clinical Immunohematology II 0, 2 s.h.
Advanced theory, practical application, technical performance, and evaluation of blood bank procedures required for storage and transfusion of blood and blood components. Prerequisite: 069:162.

069:164 Phlebotomy 0, 1 s.h.
Theory, practical application, technical performance, and evaluation of procedures used in collecting, handling, and processing blood specimens. Prerequisite: 069:150.

069:166 Urine and Body Fluid Analysis 0, 1 s.h.
Theory, practical application, technical performance, and evaluation of procedures used in analyzing urine and other body fluids, including cerebrospinal, synovial, serous, and amniotic fluids. Prerequisite: 069:150.

069:170 Clinical Laboratory Management I 0, 2 s.h.
Theory, practical application, technical performance, and evaluation of laboratory management principles and associated models; critical thinking, problem solving, leadership skills. Prerequisite: 069:150.

069:171 Clinical Laboratory Management II 0, 3 s.h.
Advanced theory, application, technical performance, and evaluation of laboratory management principles and associated models; critical thinking, problem solving, leadership skills. Prerequisite: 069:170.

069:205 Medical Pathology I 5 s.h.
Mechanisms of disease, etiology, pathogenesis, epidemiology, major clinical manifestations of disease in organ systems. Prerequisite: M.D. enrollment, or graduate standing and consent of instructor.

069:206 Medical Pathology II 5 s.h.
Mechanisms of disease, etiology, pathogenesis, epidemiology, major clinical manifestations of disease in organ systems. Prerequisites: 069:205 and M.D. enrollment, or graduate standing and consent of instructor.

Medical Student Training

Didactic lectures and physical examination of the newborn, toddler, and older child provide M.D. students with their initial pediatric patient contact. This experience includes taking a history, performing a physical examination,
appraisal of growth and development, nutrition, and symptomatology of newborns, toddlers, and adolescents.

For junior and senior medical students, the inpatient service provides training in the complex problems of disease and critical illness. Students participate in daily rounds involving general pediatrics and all subspecialties. Challenging and interesting cases are presented for discussion of diagnosis and treatment.

Outpatient experience, available in the junior clerkship and fourth-year electives, stresses principles and practices required for the maintenance of children’s health, treatment of common general pediatric disorders, and the diagnosis and treatment of subspecialty ambulatory patients.

Residency Program, Fellowships

The department offers an accredited three-year residency program designed to prepare trainees for professional careers in general pediatrics or for further fellowship training. The program meets the eligibility requirements of the American Board of Pediatrics (ABP).

Fellowships are available in many pediatrics subspecialties. Fellowship programs encourage development of knowledge and skill through research and clinical orientations in the chosen discipline. Upon satisfactory completion of the program, fellows meet the ABP eligibility requirements in their subspecialty.

Facilities

The Department of Pediatrics is located in the Children’s Hospital of Iowa at University of Iowa Hospitals and Clinics, with inpatient and outpatient areas immediately adjacent to faculty offices and the pediatric library.

The pediatric inpatient service has approximately 120 beds, and more than 50,000 patients are seen each year in the general, specialty, continuity care, and field clinics and in the Emergency Treatment Center. The Center for Disabilities and Development provides resources for children with developmental disabilities, cerebral palsy, or mental retardation.

The department maintains laboratories that perform both clinical and research studies.

Courses

070:002 Clinical Pediatrics 6 s.h.
Principles, practices of health maintenance and treatment of acute and chronic illnesses in children; emphasis on diagnosis and evaluation, nutrition, behavior problems, disorders affecting children; patient care, daily rounds, ward work. Prerequisite: third-year M.D. enrollment.

070:013 Subinternship in Pediatrics: Blank Children’s Hospital, Des Moines arr.
Experience in the care of general pediatric inpatients; daily rounds and teaching by senior residents and faculty members; daily didactic conferences. Prerequisite: fourth-year M.D. enrollment.

070:014 Emergency Room Blank Children’s Hospital, Des Moines arr.
Pediatic emergencies and urgent care, proficiency in pediatric medicine procedures; expansion of basic knowledge. Prerequisite: fourth-year M.D. enrollment.

070:015 Neonatal Intensive Care Unit, Blank Children’s Hospital 4 s.h.
Experience equivalent to intern on neonatal intensive care unit teaching service at Blank Children’s Hospital, Des Moines; four-week rotation.

070:016 Pediatric Hematology/Oncology arr.
Basic concepts of clinical approach to hematologic and oncologic problems in children and adolescents; primarily outpatient experience. Prerequisite: fourth-year M.D. enrollment.

070:017 Pediatric Neurology arr.
Participation in outpatient and inpatient activities, teaching, morning ward rounds. Prerequisite: fourth-year M.D. enrollment.

070:019 Pediatric Cardiology arr.
Participation in clinical activities; observation of cardiac catheterization; experience in cardiac auscultation, ECG, radiography; emphasis on physical diagnosis, approach to heart disease and murmurs in children. Prerequisite: fourth-year M.D. enrollment.

070:023 Developmental and Behavioral Pediatrics 4 s.h.
Normal developmental sequence of gestation and early childhood, impact of environmental influences; antecedents of developmental disabilities; methods to detect cognitive and motor delays in preschool children; long-term consequences of developmental disabilities for children, their families; advantages of interdisciplinary teamwork. Prerequisite: fourth-year M.D. enrollment.

070:025 Child Abuse and Neglect 4 s.h.
Hospital- and community-based multidisciplinary responses to child abuse and neglect; experience developing diagnostic skills to recognize, assess, and report cases of child abuse and neglect. Prerequisite: fourth-year M.D. enrollment.

070:027 Neonatology (NICU) arr.
Experience caring for ill neonates, proficiency in using diagnostic tests and procedures; responsibility for care of several infants; reference and literature review, conferences, teaching, clinical rounds. Prerequisite: fourth-year M.D. enrollment.

070:028 Pediatric Inpatient Care Subinternship arr.
Experience on pediatric inpatient team caring for patients ranging from infants through adolescents; evaluation, formulation of differential diagnoses, diagnostic workups, appropriate therapy programs. Prerequisite: fourth-year M.D. enrollment.

070:029 Critical Care (PICU) 4 s.h.
Direct care of critically ill children in a multidisciplinary medical/surgical/cardiac intensive care unit, under supervision of pediatric residents and staff; participation in educational activities and formal clinical rounds. Prerequisite: fourth-year M.D. enrollment.

</table>
The Department of Pharmacology provides professional training in pharmacology for health science students and participates with other departments in educational and research activities such as the Medical Scientist Training Program, the Physician Scientist Training Program, the Molecular and Cellular Biology Program, the Neuroscience Program, the Holden Comprehensive Cancer Center, and the Iowa Cardiovascular Center.

The department was a pioneer in offering pharmacology to undergraduate students with little or no science background. The lecture and discussion sessions in 071:120 Drugs: Their Nature, Action, and Use emphasize the mechanisms of drug action and give students a background for rational decisions concerning use of drugs. Undergraduates interested in science careers may attend an eight-week summer research program that provides opportunities for outstanding students to conduct research in faculty laboratories.

Pre- and postdoctoral students can pursue research training in all areas of pharmacology in the department in preparation for career opportunities in academia, government, and industry.

**Graduate Programs**

The Department of Pharmacology offers graduate study programs leading to the M.S. and Ph.D. These programs include both didactic and research experience. Qualified students may pursue an M.S. in clinical pharmacology or a combined M.D./Ph.D. in the Medical Scientist Training Program.

**Master of Science**

The Master of Science in pharmacology requires a minimum of 30 s.h. of graduate credit. Core course requirements are as follows.

- 071:135 Principles of Pharmacology 3 s.h.
- 071:203 Pharmacology Research arr.
- 071:204 Pharmacology Seminar 1 s.h.
- 071:250 Advanced Problem Solving in Pharmacological Sciences 1 s.h.
- 071:302 Pharmacology for Graduate Students 6 s.h.
- 072:153 Graduate Physiology 6 s.h.
- 156:201 Principles in Molecular and Cell Biology 4 s.h.

Students also are expected to gain maximum experience in laboratory research while completing their course work. Satisfactory preparation and oral defense of a thesis based on the student’s own research are required for completion of the program.

**Doctor of Philosophy**

The Doctor of Philosophy in pharmacology requires a minimum of 72 s.h. of graduate credit. Core course requirements are as follows.

- 071:135 Principles of Pharmacology 3 s.h.
- 071:203 Pharmacology Research arr.
- 071:204 Pharmacology Seminar 1 s.h.
- 071:209 Receptors and Signal Transduction 3 s.h.
- 071:250 Advanced Problem Solving in Pharmacological Sciences 1 s.h.
- 071:302 Pharmacology for Graduate Students 6 s.h.
- 072:153 Graduate Physiology 6 s.h.
- 156:201 Principles in Molecular and Cell Biology 4 s.h.

Individual faculty research advisors may require additional courses.

During the first semester in the program, students are required to work in two different faculty laboratories before selecting a laboratory in which to pursue thesis research. Students then are expected to gain maximum laboratory
research experience while completing course work. The Ph.D. comprehensive examination (written and oral) is given at the end of the fourth semester. Satisfactory preparation and oral defense of the thesis complete the program.

There is no departmental foreign language requirement.

Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog. They should have a g.p.a. of at least 3.00 and a combined verbal and quantitative score of at least 1200 on the Graduate Record Examination (GRE) General Test. They should have completed undergraduate courses in chemistry, biology, biochemistry, and mathematics.

Admission to the graduate programs is determined by the faculty after receipt of a completed formal application and interview (if appropriate) by faculty members or other designated individuals. Each application is reviewed individually. Some standard admission criteria may be set aside for applicants who possess outstanding credentials in other areas.

Financial Support

The department provides all Ph.D. students and some M.S. students with financial support in the form of stipends and tuition support. Support is renewed annually based on satisfactory progress toward meeting degree requirements.

071:105 Pharmacology for Health Sciences: Medical
Principles of pharmacology, pharmacologic actions of drugs, correlation with therapeutic uses. Offered fall semesters. Prerequisites: 050:240 and 099:163, or equivalents; and M.D. enrollment.

071:111 Pharmacology for Dental Students
Principles of pharmacology, pharmacologic actions of drugs, correlation with therapeutic uses. Offered spring semesters. Prerequisites: 072:152 and 099:161, or consent of instructor; and D.D.S. enrollment.

071:115 Pharmacology for Health Sciences—Nurse Anesthetist
Principles of pharmacology; pharmacologic actions of drugs, correlation with therapeutic uses. Offered fall semesters. Prerequisites: 060:270 or 096:270 or equivalents, and enrollment in Anesthesia Nursing Program.

071:120 Drugs: Their Nature, Action, and Use
Principles of drug action, toxicity; sedatives, stimulants, hallucinogens, narcotics, over-the-counter agents, antibiotics, oral contraceptives. Offered spring semesters. Prerequisite: closed to Pharm.D. students.

071:125 Pharmacology for Health Sciences: Physician Assistant Students
Principles of pharmacology, pharmacologic actions of drugs, correlation with therapeutic uses. Offered fall semesters. Prerequisites: 072:164 and 099:164, or consent of instructor; and Physician Assistant Program enrollment.

071:130 Drug Mechanisms and Actions
Introduction to principles of pharmacology, pharmacologic actions of drugs. Offered spring semesters. Prerequisites: undergraduate biochemistry and physiology courses, or consent of instructor; and science background.

071:135 Principles of Pharmacology
Principles of drug action, disposition; statistical analysis. Offered spring semesters. Prerequisite: consent of instructor.

071:180 Pharmacology for Pharmacy Students I
Principles of pharmacology, toxicology; drug and toxic mechanisms; systemic and organ-specific pharmacologic and toxic responses. Offered spring semesters. Prerequisite: first-year Pharm.D. enrollment, or graduate standing and consent of instructor.

071:181 Pharmacology for Pharmacy Students II
Continuation of 071:180. Offered fall semesters. Prerequisite: second-year Pharm.D. enrollment, or graduate standing and consent of instructor.

071:182 Neurotransmitter Receptors and Ion Channels
Biochemistry, cell biology, physiology, and pharmacology of ionotropic and metabotropic neurotransmitter receptors and ion channels, neuronal excitability, and synaptic transmission. Offered spring semesters. Prerequisite: consent of instructor.

071:203 Pharmacology Research
Prerequisite: consent of department head.

071:204 Pharmacology Seminar
Prerequisite: consent of department head.

071:209 Receptors and Signal Transduction
Major receptor families: G-protein coupled receptors, ligand-regulated transmembrane enzymes, ligand-regulated ion channels, the steroid receptor superfamily; emphasis on description, interpretation of specific experiments, experimental strategies underlying current research. Offered spring semesters. Prerequisites: 072:153 and 156:201, or equivalents. Same as 072:209, 132:209.

071:210 Special Topics in Pharmacology
Prerequisite: consent of department head.

071:215 Topics in Neuropharmacology
Recent advances in neuropharmacology, developmental neurobiology, neuroendocrinology, related neurosciences. Prerequisite: consent of instructor.

071:225 Topics in Molecular Pharmacology
Recent advances in molecular pharmacology; receptor, postreceptor events in stimulus coupling. Prerequisite: consent of instructor.

071:235 Topics in Pain and Analgesia
Recent advances in pain research, therapy. Prerequisite: consent of instructor.
071:250 Advanced Problem Solving in Pharmacological Sciences  1 s.h.
Discussion of methodologies, strategies, and approaches commonly used to solve pharmacological sciences problems; use of interpersonal problem-solving skills to develop experimental study plans for solving contemporary scientific problems in pharmacology.

071:277 Mechanisms of Pain Transmission  3 s.h.
Anatomical, physiological, and pharmacological mechanisms that underlie central neuronal processing of pain; emphasis on neuronal changes during pathological conditions such as inflammation/arthitis, peripheral neuropathy. Offered fall semesters of even years. Same as 101:277, 132:277.

071:302 Pharmacology for Graduate Students  6 s.h.
Principles of pharmacology, pharmacologic actions of drugs, correlation with therapeutic uses. Offered fall semesters. Prerequisites: 072:153 and 156:201, or equivalents; and consent of instructor.

**Professors emeriti:** David H. Nielsen, Gary L. Smidt

**Associate professor:** H. John Yack

**Assistant professors:** Laura Frey Law, Glenn N. Williams

**Lecturer:** Byron Bork

**Associates:** Lisa Ainsworth, James Holte, Karla Laubenthal, Erin Pazour, David Reese III, Kelly Sass, Carol Vance, David Williams

**Affiliated faculty:** Annunziato Amendola (Orthopaedics and Rehabilitation), Daniel Anton (Occupational and Environmental Health), David Asprey (Physician Assistant Program), Rhonda Barr, Kathryn Bewyer, Joseph Chen (Orthopaedics and Rehabilitation), Kelly Cole (Integrative Physiology), Thomas Cook (Occupational and Environmental Health), Warren Darling (Integrative Physiology), Kim Eppen, Julie Fitzpatrick, Douglas Geraets (Pharmacy), Melanie House, Patrick Johnston, Carol Kelderman, Janine Kelly, Lisabeth Kestel, Ken Leo, Katherine Mellen, Mary Milavetz, Bruce Miller, Mark Moser, David Rubsam, Donald Shurr, Elayne Sexsmith, Brian R. Wolf (Orthopaedics and Rehabilitation)

**Graduate degrees:** D.P.T.; M.A. in Physical Therapy, Ph.D. in Physical Rehabilitation Science

**Web site:** [http://www.healthcare.uiowa.edu/PhysicalTherapy](http://www.healthcare.uiowa.edu/PhysicalTherapy)

The Physical Therapy and Rehabilitation Science Program is one of five academic units in the Division of Associated Medical Sciences. For information on the division’s general academic policies, see Associated Medical Sciences in the Catalog.

Physical therapists provide services to patients and clients who have impairments, functional limitations, disabilities, pain, or changes in physical function resulting from injury, disease, or other causes. Physical therapists practice and collaborate with a variety of health professionals. In the area of health promotion and wellness, they provide screening examinations, prescribe fitness programs, and educate the public regarding healthy lifestyles. Research, teaching, consultation, and administration also are parts of a physical therapist’s professional role.

A wide variety of opportunities exist for professional practice in inpatient, outpatient, and community-based settings. Examples include practice in general or specialized hospitals, programs for children with disabilities, private physical therapy clinics, extended care facilities, nursing homes, community and governmental agencies, rehabilitation centers, the armed forces, foreign service, home health agencies, school systems, fitness centers, and athletic facilities. Research and teaching careers in academic institutions are available for those who earn a Ph.D. in rehabilitation science.

The Physical Therapy and Rehabilitation Science Program is located in the Carver College of Medicine on the University of Iowa health sciences campus, which includes University of Iowa Hospitals and Clinics, one of the nation’s largest university-owned teaching hospitals. The program has eight state-of-the-art independent research laboratories and is well equipped for classroom and laboratory instruction and innovative research. Students have access to faculty members in the basic sciences and medicine, basic sciences courses, clinical specialty expertise, and innovative learning experiences associated with a medical college environment.

**Graduate Programs**

The Physical Therapy and Rehabilitation Science Program offers the Doctor of Physical Therapy (the entry-level professional degree), Doctor of Philosophy in physical rehabilitation science, and Master of Arts in physical therapy (for students working toward the Ph.D.). The D.P.T. program admits 36 students each year. Around 20 physical therapists are enrolled in the Ph.D. program each year.

Applicants for admission to University of Iowa graduate degree programs must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

**Doctor of Physical Therapy**

The Doctor of Physical Therapy (D.P.T.) professional program requires a minimum of 101 s.h. and is completed in two and one-half years. The program is fully accredited by the Commission on Accreditation in Physical Therapy Education. Satisfactory completion of the professional program qualifies candidates to take the National Physical Therapy Examination for licensure to practice. The minimum passing score on the exam is the same in all jurisdictions.
Technical Standards for Graduation

Doctor of Physical Therapy graduates must possess and demonstrate the physical and cognitive skills and character attributes required to provide physical therapy services in a broad variety of clinical situations and environments. All D.P.T. candidates must perform, with or without reasonable accommodation, the following skills safely, effectively, efficiently, and in compliance with the legal and ethical standards set by the American Physical Therapy Association Code of Ethics and Standards of Practice.

- communicate effectively through appropriate verbal, nonverbal, and written communication with patients, families, and others;
- demonstrate ability to apply universal precautions;
- utilize appropriate tests and measures in order to perform a physical therapy examination; examples include, but are not limited to, examination and evaluation of cognitive/mental status, vital signs, skin and vascular integrity, wound status, endurance, segmental length, girth, volume, sensation, strength, tone, reflexes, movement patterns, coordination, balance, developmental stage, soft tissue, joint motion/play, cranial and peripheral nerve function, posture, gait, functional abilities, assistive devices fit/use, psychosocial needs, and the pulmonary system;
- demonstrate the ability to reach diagnostic and therapeutic judgments through analysis and synthesis of data gathered during patient/client examination in order to develop an appropriate plan of care;
- perform fully, or in a reasonably independent manner, physical therapy interventions appropriate to the patient’s status and desired goals;
- apply teaching/learning theories and methods in health care and community environments;
- accept criticism and respond by appropriate behavior modification;
- possess the perseverance, diligence, and consistency to complete the physical therapy curriculum and enter the practice of physical therapy.

Applicants with health conditions or disabilities who need accommodation to meet the technical standards for graduation should contact the University’s Student Disability Services office.

Requirements

D.P.T. students complete a minimum of 101 s.h. The following courses are required.

Summer Session

- 101:140 Introduction to Physical Therapy Practice 2 s.h.
- 101:141 Principles of Physical Therapy I 2 s.h.
- 101:205 Health Promotion and Wellness 3 s.h.

First Semester

- 060:108 Human Anatomy 5 s.h.
- 069:133 Introduction to Human Pathology 4 s.h.
- 101:120 Professional Issues and Ethics 1 s.h.
- 101:142 Principles of Physical Therapy II 2 s.h.
- 101:189 Clinical Education I 1 s.h.
- 101:209 Surface Anatomy 1 s.h.
- 101:210 Kinesiology and Pathomechanics 4 s.h.
- 101:235 Case-Based Learning I 1 s.h.

Second Semester

- 060:234 Medical Neuroscience 4 s.h.
- 101:131 Therapeutic Physical Agents 2 s.h.
- 101:185 Musculoskeletal Therapeutics I 3 s.h.
- 101:190 Clinical Education II 1 s.h.
- 101:201 Applied Clinical Medicine 2 s.h.
- 101:206 Cardiopulmonary Therapeutics 3 s.h.
- 101:236 Case-Based Learning II 1 s.h.
*Elective (optional) 1 s.h.

Summer Session

- 101:119 Physical Therapy Management and Administration I 2 s.h.
- 101:143 Selected Topics in Physical Therapy Practice 2 s.h.
- 101:176 Pharmacology for Physical Therapists 3 s.h.
- 101:194 Clinical Internship 3 s.h.

Third Semester

- 101:122 Psychosocial Aspects of Patient Care 1 s.h.
- 101:133 Pain Mechanisms and Treatment 2 s.h.
- 101:134 Physical Therapy Management of Integumentary System 2 s.h.
- 101:170 Prosthetics and Orthotics 2 s.h.
- 101:202 Musculoskeletal Therapeutics II 3 s.h.
- 101:224 Principles of Motor Control 4 s.h.
- 101:237 Service Learning I 1 s.h.
- 101:248 Research in Physical Therapy 2 s.h.
*Elective (optional) 1 s.h.
**Fourth Semester**

101:121 Physical Therapy Management and Administration II 1 s.h.

101:151 Progressive Functional Exercise 2 s.h.

101:172 Radiology/Imaging for Physical Therapists 2 s.h.

101:173 Differential Diagnosis in Physical Therapy 2 s.h.

101:191 Clinical Education III 1 s.h.

101:200 Pediatric Physical Therapy 1 s.h.

101:203 Musculoskeletal Therapeutics III 4 s.h.

101:225 Neuromuscular Therapeutics 3 s.h.

101:238 Service Learning II 1 s.h.

101:251 Critical Inquiry in Physical Therapy I 2 s.h.

*Elective (optional)* 1 s.h.

*The curriculum allows students the option to earn a total of 3 s.h. in electives.

**Summer Session**

101:194 Clinical Internship 7 s.h.

**Fifth Semester**

101:194 Clinical Internship 5 s.h.

101:252 Critical Inquiry in Physical Therapy II 1 s.h.

**Admission**

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog. They must have completed a baccalaureate degree from an accredited institution in the United States, or anticipate completing the degree before enrolling in the D.P.T. program. They must have a cumulative g.p.a. of at least 3.00 and must have completed the following prerequisite course work, preferably with a g.p.a. of at least 3.00. All science courses must include the appropriate laboratory instruction. The prerequisite courses must have been taken for a letter grade. Credit awarded through advanced placement testing may be applied only to the mathematics requirement.

**Biological sciences:** a complete introductory course in principles of general biology or zoology, and advanced course work in biology or zoology (for which an introductory course is prerequisite) equivalent to 12 s.h.

**Physics:** a complete introductory course equivalent to 8 s.h.

**Chemistry:** a complete introductory course equivalent to 8 s.h.

**Physiology:** a systemic human physiology course equivalent to 3 s.h.

**Psychology:** courses equivalent to 6 s.h.

**Mathematics:** a college-level mathematics course, at the level of trigonometry or higher, equivalent to 3 s.h.

**Statistics:** a college-level statistics course equivalent to 3 s.h.

The program recommends that applicants have a combined verbal and quantitative score of at least 1000 on the Graduate Record Examination (GRE) General Test. They must take the test early enough for their scores to be received by the University in time for the December 1 application deadline.

Applications must include three letters of recommendation, which should be sent to the Physical Therapy and Rehabilitation Science Program.

Personal interviews are required of applicants selected for consideration by the admissions committee. Interviews are conducted at The University of Iowa. The physical therapy admissions committee selects applicants who appear to be best qualified for the study and practice of the profession. Some preference is given to Iowa residents.

Applications are accepted from September 1 to December 1 for entry the following summer. Prospective students should apply as early as possible.

**EARLY ADMISSION**

The Doctor of Physical Therapy early admission plan is available to outstanding applicants. Generally, applicants have a g.p.a. of 3.75 or higher and a combined verbal and quantitative score above 1100 on the Graduate Record Examination (GRE) General Test. Application materials are the same as those for regular admission. Application deadline is October 1; applicants are notified of admission by December 1. Those who are interviewed but are not selected for early admission are automatically placed in the final general applicant pool. Contact the Physical Therapy and Rehabilitation Science Program for more information.

**Background Checks**

Enrollment in the Doctor of Physical Therapy program is contingent on a successful criminal background check. Drug screening may be required for some clinical rotations.
Expenses

Applicants admitted to the D.P.T. program must make an advance tuition payment of $300, which is forfeited if the applicant does not enroll. In addition to paying University tuition and fees, students are assessed a laboratory fee for the human anatomy course and are responsible for purchasing lab coats, patient evaluation kits, and course syllabi.

All students are required to comply with the pre-entry and periodic health screening program developed by Student Health Service in cooperation with University of Iowa Hospitals and Clinics. Students must pay for the health screenings. Students also are required to have health insurance.

Ph.D. in Physical Rehabilitation Science

The Doctor of Philosophy in physical rehabilitation science requires a minimum of 72 s.h. of graduate credit. The program is designed to advance the student’s ability to independently develop and carry out research that establishes the scientific basis for prevention, evaluation, and treatment of impairments, functional limitations, and disability. The curriculum is flexible enough to accommodate research focusing on basic, applied, or clinical studies in the rehabilitation sciences. Students have access to the program’s research laboratories (see “Research Facilities” later in this section).

Graduates who complete the program are prepared for academic appointments that emphasize research, scholarship, and teaching. They possess:

- theoretical and scientific knowledge to perform basic, applied, or clinical-level original research that leads to scientific presentations, publication in peer-reviewed journals, and competition for extramural funding through scientific grant writing;
- breadth of knowledge in exercise physiology, biomechanic, neuroscience, or motor control specialty areas as they relate to impairment, functional limitation, and disability; and
- theoretical and practical skills required for college or university teaching at the professional entry and advanced graduate levels.

Requirements

Ph.D. students complete a minimum of 72 s.h. beyond the baccalaureate. Each student and his or her faculty advisor develop an individualized study plan. A preliminary study plan is developed within the first 9 s.h. of graduate study; a final plan is submitted to the Graduate College when the Ph.D. comprehensive examination is scheduled.

To ensure breadth of knowledge, all students complete specific scientific area core courses. Each student also must take a minimum of 20 s.h., excluding research, in his or her defined specialty area. Elective courses are selected to provide in-depth study of the specialty; they are complemented by an advanced seminar course specific to the student’s specialty and taken in preparation for the comprehensive examination. Other requirements include specific core tools and practicum courses, which provide background knowledge and skill acquisition for research and teaching.

Students must satisfactorily complete the comprehensive examination, which is taken after all required course work is completed. Doctoral study culminates with 12 s.h. of thesis research and an oral examination.

GENERAL CORE REQUIREMENTS

101:212 Biomedical Instrumentation and Measurement 4 s.h.
101:220 Seminar in Rehabilitation Science 4 s.h.

Two approved courses in statistics (prerequisite to master’s-level course work):
22S:102 Introduction to Statistical Methods and 22S:148 Intermediate Statistical Methods 7 s.h.
or
171:161 Introduction to Biostatistics and 171:162 Design and Analysis of Biomedical Sciences 6 s.h.
07P:385 Teaching and Learning in Higher Education (or an equivalent approved teaching methods course) 3 s.h.
101:280 Teaching Practicum 3 s.h.
101:300 Rehabilitation Research Capstone Project 4 s.h.

Research requirements (all of these, total of 10 s.h.):
101:284 Practicum in Research arr.
101:325 Independent Study arr.
101:327 Research in Rehabilitation Science arr.
Both of these:
101:301 Thesis: Rehabilitation Science (Ph.D.) (thesis proposal must be approved before data are collected) 12 s.h.
101:326 Scientific Writing in Rehabilitation Science 3 s.h.

**SCIENTIFIC CONTENT CORE AND SPECIALTY FOCUS REQUIREMENTS**

Students take one first-level course from each of the three specialty areas, and one second-level course from two of the three specialty areas (courses outside the department may be substituted when appropriate, with the advisor’s consent). Specialty focus courses include:

101:214 Advanced Seminar in Rehabilitation Science (a specialty-oriented seminar taken in preparation for the Ph.D. comprehensive exam) and elective specialty courses to provide at least 20 s.h. in the student’s specialty area.

**Exercise Physiology**

First-level courses:
- 027:141 Exercise Physiology 3 s.h.
- 101:206 Cardiopulmonary Therapeutics (with lab) 3 s.h.

Second-level course:
- 101:260 Advanced Health Promotion and Cardiopulmonary Therapeutics 3 s.h.

An advanced exercise physiology laboratory (respiratory and cardiovascular)

Specialty focus courses:
- 101:214 Advanced Seminar in Rehabilitation Science 3 s.h.
- Elective specialty courses 10 s.h.

**Biomechanics**

First-level courses:
- 027:197 Biomechanics of Human Motion 4 s.h.
- 101:210 Kinesiology and Pathomechanics (with lab) 4 s.h.

Second-level courses:
- 027:155 Skeletal Muscle Biology 3 s.h.
- 053:190 Readings in Civil and Environmental Engineering 2 s.h.
- 101:285 Biomechanical Analysis in Rehabilitation 3 s.h.
- 175:190 Occupational Ergonomics I 3 s.h.
- 175:294 Occupational Ergonomics II 3 s.h.
- 175:295 Clinical Ergonomics 3 s.h.

Specialty focus courses:
- 101:214 Advanced Seminar in Rehabilitation Science 3 s.h.
- Elective specialty courses 9-11 s.h.

**Neuroscience and Motor Control**

First-level course:
- 101:224 Principles of Motor Control 4 s.h.

Second-level courses:
- 027:155 Skeletal Muscle Biology 3 s.h.
- 027:314 Seminar in Motor Control 2 s.h.
- 060:234 Medical Neuroscience 4 s.h.
- 071:182 Neurotransmitter Receptors and Ion Channels 3 s.h.
- 101:275 Analysis of Sensori-Motor Systems in Health and Disease 3 s.h.
- 101:277 Mechanisms of Pain Transmission 3 s.h.
- 101:295 Applied Electromyography 3 s.h.
- 132:180 Fundamental Neurobiology 4 s.h.

Specialty focus courses:
- 027:197 Biomechanics of Human Motion 4 s.h.
- 101:214 Advanced Seminar in Rehabilitation Science 3 s.h.

**Electives**

The requirement varies.

**Admission**

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog. They should have a cumulative g.p.a. of at least 3.00 and a combined verbal and quantitative score of at least 1100 on the Graduate Record Exam (GRE) General Test. A minimum of two years of clinical experience is desirable.

International applicants whose first language is not English must score at least 600 (paper-based) or 250 (computer-based) on the Test of English as a Foreign Language (TOEFL).

Application materials must include a complete Graduate College application form, test scores, transcripts, three letters of recommendation, and a statement of purpose. Completed applications should be sent to the Physical Therapy and Rehabilitation Science Program.

Personal interviews are required of all applicants selected for consideration by the admissions committee. On-campus interviews are preferred, but telephone interviews may be substituted when necessary.

Application deadlines are October 15 for spring semester entry (notification by December 15); March 15 for summer entry (notification by May 15); and May 15 for fall semester entry (notification by July 15).
Financial Support

A number of teaching and research assistantships are available for Ph.D. students. Faculty advisors provide guidance for students seeking external scholarship support through foundations and federal programs that support Ph.D. training.

Research Facilities

The program’s state-of-the-art research facilities include the Orthopedic Gait Analysis Laboratory and a spinal cord research laboratory at University Hospitals and Clinics; the Neuromuscular Research/Motor Control Laboratory; the Musculoskeletal Biomechanics and Sports Medicine Research Laboratory; the Neuropsychology of Pain Laboratory; the Applied Neuromuscular Physiology Laboratory; and the Neuromuscular Biomechanics Laboratory. Use of other laboratories may be arranged.

Courses

101:119 Physical Therapy Management and Administration I 2 s.h.
The changing U.S. health care system; access to physical therapy services, reimbursement to health care providers, mechanisms for controlling costs while providing quality care; clinical vignettes, small group problem solving.

101:120 Professional Issues and Ethics 1 s.h.
Evolution of physical therapy and rehabilitation science as a profession; contemporary issues in education and practice; ethical theory and approaches to analyzing and acting on ethical problems; professional and peer relationships.

101:121 Physical Therapy Management and Administration II 1 s.h.
Principles of management in physical therapy practice; historical perspective, current health care environment; business principles; marketing, managing risk, medical/legal concerns, preparing for the future.

101:122 Psychosocial Aspects of Patient Care 1 s.h.
Emotional reactions to disability, psychosocial aspects of disability as they relate to patient-physical therapist interaction; specific problems of the angry, non-compliant, or chronic-pain patient; complementary roles of other health professionals; cultural competence in professional behavior and patient treatment; importance of holistic health care.

101:131 Therapeutic Physical Agents 2 s.h.
Theoretical and practical applications for safe, effective use of physical agents (superficial and deep heat, cold, hydrotherapy), electrotherapeutic modalities (biofeedback, NMES, TENS, iontophoresis); massage and soft tissue mobilization; emphasis on problem solving, clinical decision making. Prerequisite: Physical Therapy and Rehabilitation Science Program enrollment.

101:133 Pain Mechanisms and Treatment 2 s.h.
Introduction to basic science mechanisms, assessment, and management of pain; basic science mechanism involved in transmission and perception of painful stimuli after tissue injury, assessment and physical therapy management of pain; emphasis on scientific principles and published literature to support treatment techniques. Prerequisite: Physical Therapy and Rehabilitation Science Program enrollment.

101:134 Physical Therapy Management of the Integumentary System 2 s.h.
Overview of physical therapy examination and management of the integumentary system; wound pathology, diagnosis associated with the integumentary system, inflammation and repair, examination and reexamination techniques, documentation, clinical decision making, lecture and laboratory formats; interventions, including patient/client information, physical agents, electrotherapy, wound dressing. Prerequisite: Physical Therapy and Rehabilitation Science Program enrollment.

101:140 Introduction to Physical Therapy Practice 2 s.h.
Lectures, case presentations, and group activities using the Guide to Physical Therapist Practice; elements of the patient/client management model, concepts of the disablement model, preferred practice patterns as applied in clinical problems; importance of professionalism, professional socialization; introduction to evidence-based practice; competence in medical terminology.

101:141 Principles of Physical Therapy I 2 s.h.
Patient management skills: documentation, basic assessment, preambulatory activities, joint range of motion, strength assessment, patient transfers, gait assessment and training, negotiation of architectural barriers.

101:142 Principles of Physical Therapy II 2 s.h.
Continuation of 101:141; expansion of previously learned skills; new skills in documentation, assessment of joint range of motion/goniometry, manual muscle testing, preambulatory intervention strategies, postural assessment, gait analysis, performance of musculoskeletal, neuromuscular, and integumentary systems review. Prerequisite: 101:141.

101:143 Selected Topics in Physical Therapy Practice 2 s.h.
Specialty topics in physical therapy, such as women’s health, aquatic therapy, patient care across the lifespan, alternative or new treatments; guest lectures, lab component. Prerequisite: Physical Therapy and Rehabilitation Science Program enrollment.

101:151 Progressive Functional Exercise 2 s.h.
Therapeutic exercise options (e.g., isometrics, isotonics, isokinetics, plyometrics, endurance exercises, stretching exercises) and training principles; application to functional activities, including those of daily living, work, recreation, and sport; laboratory component. Prerequisite: Physical Therapy and Rehabilitation Science Program enrollment.

101:170 Prosthetics and Orthotics 2 s.h.
Physical therapy management and assessment of patients in need of prosthetic and orthotic devices; principles and components of prosthetic and orthotic design and use.

101:172 Radiology/Imaging for Physical Therapists 2 s.h.
Basic principles and procedures for acquisition and interpretation of radiology and imaging in clinical practice and research; plain film radiographs, CT, MRI, other common imaging modalities; case-based, multidisciplinary approach.

101:173 Differential Diagnosis in Physical Therapy 2 s.h.
Use of physical therapy examination and evaluation skills to diagnose physical therapy problems; focus on use of good clinical decision-making skills when analyzing a patient’s history and administering physical therapy tests and measures to confirm or rule out differential diagnoses; components of the medical examination; importance of collaboration between therapists and other health professionals; interactive case studies presented by clinical experts.

101:176 Pharmacology for Physical Therapists 3 s.h.
Contemporary pharmacology; overview of basic pharmacokinetic and pharmacodynamic principles; relation of drug therapy to therapeutic interventions provided by physical therapists; small group clinical case presentations.
101:185 Musculoskeletal Therapeutics I 3 s.h.
Musculoskeletal techniques and biomechanical principles applied to assessment and evaluation of common orthopedic problems of the spine; problem solving, case-study approach to clinical methods, skill acquisition.

101:189 Clinical Education I 1 s.h.
Integrated clinical experiences in area physical therapy clinics; overview of the diverse nature of practice through half- or full-day experience; basic skills in examination, intervention, documentation.

101:190 Clinical Education II 1 s.h.
Continuation of 101:189; integrated half-day clinical experiences. Prerequisite: 101:189.

101:191 Clinical Education III 1 s.h.
Two-week, full-time clinical experience in physical therapy clinics in Iowa, under the guidance of physical therapists; theory and practice of physical therapy procedures, competence building in basic skills. Prerequisite: 101:190.

101:192 Clinical Education IV 1 s.h.

101:194 Clinical Internship 1 s.h.
Full-time clinical education divided among varied settings; development of competence in independent examination, evaluation, and treatment of patients under supervision of clinical faculty.

101:200 Pediatric Physical Therapy 2 s.h.
Preparation for physical therapy practice in pediatric settings using interdisciplinary family-centered practice; normal and abnormal development, standardized assessment, service delivery settings, interventions, management strategies specific to pediatrics.

101:201 Applied Clinical Medicine 2 s.h.
Pathological disorders frequently encountered by physical therapists in clinical practice, addressed by physicians and health professionals who are not physical therapists; physical therapy management.

101:202 Musculoskeletal Therapeutics II 3 s.h.
Pathology, assessment, management of orthopedic disorders of the upper quarter; problem-solving approach to evaluation and management of patients with musculoskeletal conditions.

101:203 Musculoskeletal Therapeutics III 4 s.h.
Pathology, assessment, management of orthopedic disorders of the lower quarter; problem-solving approach to evaluation and management of patients with musculoskeletal conditions.

101:205 Health Promotion and Wellness 3 s.h.
Overview of health promotion, fitness, and wellness strategies, with background information on applied physiology (energy metabolism and physiological responses to exercise), exercise testing and training guidelines, body composition assessment, diet, body weight management; laboratories, development of individual weight management and exercise training programs.

101:206 Cardiopulmonary Therapeutics 3 s.h.
Cardiorespiratory anatomy, physiology, and application of basic concepts, techniques in management of patients with acute and chronic cardiac, pulmonary disorders; laboratories.

101:209 Surface Anatomy 1 s.h.
Laboratory teaching activities that parallel the human anatomy course; observation, palpation, and problem solving skills; upper- and lower-limb, head and neck, thorax, and abdomen.

101:210 Kinesiology and Pathomechanics 4 s.h.
Normal and pathological movement based on understanding of muscle mechanics, segment and joint mechanics, muscle function; instructor- and student-centered learning experiences; EMG laboratories.

101:212 Biomedical Instrumentation and Measurement 4 s.h.
Introduction to biomedical instrumentation and measurement, with focus on understanding sources of error and noise in biomedical research applications; basic circuit analysis, calibration of measurement tools, A/D conversion, digital filtering; lab components. Offered fall semesters of even years.

101:214 Advanced Seminar in Rehabilitation Science 1 s.h.
Current status of research for biological, mechanical, psychological components pertinent to cardiopulmonary, musculoskeletal, neuromuscular areas of rehabilitation science; preparation for comprehensive exam.

101:220 Seminar in Rehabilitation Science 1 s.h.
Exploration of research related to rehabilitation science; lectures by faculty, graduate students, and guest scholars with expertise in areas relevant to rehabilitation science (e.g., neuroscience, physiology, medicine, engineering, pharmacology, integrated physiology).

101:224 Principles of Motor Control 4 s.h.
Sensorimotor mechanisms involved with normal and abnormal neuromuscular systems function; skeletal muscle properties/plasticity, muscle fatigue, neural mechanisms of muscle strengthening, spinal circuitry, simple and complex reflexes, spasticity, rigidity, posture control/balance, motor learning, applied neurological assessment of pathological conditions, such as stroke, SCI. Prerequisite: Physical Therapy and Rehabilitation Science Program enrollment.

101:225 Neuromuscular Therapeutics 3 s.h.
Techniques used in evaluation, treatment of persons with nervous system dysfunction; methods of identifying and scientific rationale for abnormal sensorimotor activity and movement; normal, abnormal motor development; techniques used to provide comprehensive institutional and home rehabilitation programs for conditions such as stroke, traumatic brain injury, multiple sclerosis, Parkinson’s disease, cerebral palsy, vestibular disorders, spinal cord injury. Prerequisite: 101:224.

101:235 Case-Based Learning I 1 s.h.
Small-group seminars and simulated patient-instructor clinical assessment labs; two clinical cases per semester; clinical problems coordinated with concurrent course work; student-centered, problem-based learning format with emphasis on evidence-based practice objectives. First in a four-course sequence.

101:236 Case-Based Learning II 1 s.h.
Small-group seminars and simulated patient-instructor clinical assessment labs; two clinical cases per semester; clinical problems coordinated with concurrent course work; student-centered, problem-based learning format with emphasis on evidence-based practice objectives. Second in a four-course sequence. Prerequisite: 101:235.

101:237 Service Learning I 1 s.h.
Social responsibility, advocacy, and professionalism as they relate to disabled and geriatric populations; students choose one of four community partners to work with as they develop their learning goals and a service learning project to meet their goals. First in a two-course series.

101:238 Service Learning II 1 s.h.
Students carry out service learning projects designed in 101:237; evidence of learning demonstrated with papers, reflective journals, evaluation by the service learning community partner, and a poster presentation. Second in a two-course series.

101:248 Research in Physical Therapy 2 s.h.
Topics relevant to evidence-based practice and research design; identification of appropriate questions for research and clinical applications, location and evaluation of available evidence, identification of issues that affect validity of research designs, interpretation of basic statistical analyses. Prerequisite: Physical Therapy and Rehabilitation Science Program enrollment.
101:251 Critical Inquiry in Physical Therapy I 2 s.h.
Experience conducting group research projects under faculty supervision; data collection and analysis, manuscript preparation, oral defense of research findings during a formal poster presentation. Prerequisites: 101:248 and Physical Therapy and Rehabilitation Science Program enrollment.

101:252 Critical Inquiry in Physical Therapy II 1 s.h.
Principles and procedures learned in 101:248 and 101:251 applied to a clinical setting; students write and present a case report with an evidence-based practice focus, using a clinical case from their final internships.

101:260 Advanced Health Promotion and Cardiopulmonary Therapeutics arr.
Anatomical, physiological principles applied to health care continuum, including wellness programs, cardiac and pulmonary rehabilitation; emphasis on body composition and weight control, exercise and cardiorespiratory adaptations to training, laboratories. Offered spring semesters.

101:275 Analysis of Sensori-Motor Systems in Health and Disease 3 s.h.
Neurophysiological mechanisms underlying posture, movement in normal and pathologic conditions; systems approach to neuromuscular system function, including skeletal muscle plasticity, muscle fatigue, neurological adaptations to strengthening, spinal circuitry, complex reflexes, spasticity, rigidity, posture/balance, motor learning; specific applications to CNS disease states (SCI, stroke, degenerative diseases). Offered fall semesters. Prerequisite: consent of instructor.

101:277 Mechanisms of Pain Transmission 3 s.h.
Anatomical, physiological, and pharmacological mechanisms underlying peripheral and central neuronal processing of pain; emphasis on neuronal changes that occur during pathological conditions such as inflammation/arthritis, peripheral neuropathy. Offered fall semesters of even years. Same as 071:277, 132:277.

101:280 Teaching Practicum arr.
Individual instruction, observation, experimentation in teaching, guidance, analysis of evaluation processes in Physical Therapy and Rehabilitation Science Program.

101:282 Clinical Educational Practicum arr.
Individualized clinical experience in selected physical therapy setting; instructor-student development of objectives, learning contract.

101:284 Practicum in Research arr.
Laboratory experiences connected with investigative process; individual instruction, observation, activities in methodological development, data acquisition, data analysis aspects of research.

101:285 Biomechanical Analysis in Rehabilitation 3 s.h.
Assessment of pathological movement through human movement analysis techniques, including link segment modeling and analysis, mechanical energy and power analysis, electromyography and muscle modeling.

101:295 Applied Electromyography 3 s.h.
Physiological bases of electromyographic signals; intramuscular/surface electrode techniques performed in laboratory; temporal and frequency analysis of the signal; introduction to EMG/force relationship, motor unit activity, muscle fatigue. Offered spring semesters of odd years. Prerequisite: consent of instructor.

101:300 Rehabilitation Research Capstone Project arr.
Specific phases of the research process; development of a research question and associated hypotheses, collection and analysis of data, interpretation and discussion of the information’s meaning; presentation to sponsoring mentor’s laboratory/program, and written document.

101:325 Independent Study arr.
Problem-solving experience in physical therapy; commensurate with student's interest, ability.

101:326 Scientific Writing in Rehabilitation Science 3 s.h.
Knowledge of and experience related to scientific writing, critical review of scientific literature, publication in the biomedical sciences, thesis/dissertation writing, grant writing, scientific presentation, writing used in academic and scientific careers.

101:327 Research in Rehabilitation Science arr.
Placement of physical therapy on sound scientific base; therapy; initiation, refinement, establishment of methods in physical therapy evaluation, treatment; direct clinical and laboratory approach, philosophical treatise, or research proposal.
Physician Assistant Program

Director: David P. Asprey
Medical director: Daniel Fick
Assistant director: Richard W. Dehn
Director of curriculum and evaluation: Theresa Hegmann
Director of clinical education: Anthony Brenneman
Clinical professor: Richard W. Dehn
Associate professor: David P. Asprey
Assistant professors (clinical): Anthony Brenneman, Theresa Hegmann
Graduate degree: M.P.A.S.
Web site: http://www.medicine.uiowa.edu/pa/

The Physician Assistant Program is one of five academic units in the Division of Associated Medical Sciences. For information on the division’s general academic policies, see Associated Medical Sciences in the Catalog.

The physician assistant profession is one of the newest and most exciting in health care. Physician assistants (PAs) are licensed to practice medicine with physician supervision. They are responsible for making medical decisions and providing a broad range of diagnostic and therapeutic services.

Physician assistants work in a variety of settings, including medical offices, hospital emergency rooms, nursing homes, rural satellite clinics, health maintenance organizations, and patients’ homes.

In the traditional office setting, PAs see patients, obtain histories, perform physical examinations, and order necessary laboratory and/or radiological studies. Based on this information, the PA establishes a diagnosis, develops an appropriate management plan, and initiates treatment that may include prescribing medications. The physician is consulted as needed and remains ultimately responsible for the care provided by the physician/PA team. PAs also are involved in both patient and community health education.

Graduate Program

The Physician Assistant Program offers the Master of Physician Assistant Studies (M.P.A.S.). The program emphasizes primary care medicine, particularly family medicine. It also offers elective clinical rotations in selected medical subspecialties.

Students who complete the program are eligible to take the National Certifying Examination for Primary Care Physician Assistants, which they must complete successfully in order to register as physician assistants in the United States.

The Physician Assistant Program is accredited by the Accreditation Review Commission on Education for the Physician Assistant, Inc., and is a member of the Physician Assistant Education Association.

Master of Physician Assistant Studies

The Master of Physician Assistant Studies requires a minimum of 104 s.h. The curriculum spans 25 months and is divided into two phases: didactic and clinical. Both phases emphasize primary health care delivery and the physician assistant’s role as a member of the health care team. The program is integrated with teaching at the Carver College of Medicine, permitting interdisciplinary activities between Doctor of Medicine and health care professions students. Physician assistant students complete approximately 65 percent of the curriculum’s didactic phase with second-year M.D. students.

The first phase is conducted on the University’s Health Sciences Campus. It begins in late May with seven months of course work in a number of basic science areas, including anatomy, biochemistry, infectious disease, pathology, pharmacology, and physiology. Whenever appropriate, related subjects are integrated to provide sequential lecture and laboratory experience. This session also includes courses in clinical decision making and an introductory course on taking a medical history and performing a physical examination.

The program’s patient assessment curriculum couples a sequence of didactic instruction with practical experiences involving simulated and real patients. The level and intensity of patient interactions increase throughout the curriculum as the student gains confidence and clinical competence.

The spring semester of the first phase consists of 050:175 Foundations of Clinical Practice IV for Physician Assistants, an 18-week course. Three interrelated courses focus on the application of
basic science knowledge to understanding clinical-pathologic correlations of common and/or catastrophic disorders encountered in clinical medicine’s major disciplines. The courses continue with instruction in obtaining a problem-oriented medical history and performing a physical examination. The semester also includes continuation of the clinical decision-making course and a short course in clinical pathology.

Before clinical rotations begin, students complete 117:110 Introduction to Clinical Skills, which includes instruction in several skill areas (e.g., suturing, injections, prescription writing, medical orders). They also complete the Advanced Cardiac Life Support Program and a seminar course, in which they research and discuss professional issues that will affect their practice as physician assistants.

The program’s second phase concentrates on clinical education. In 117:201 Clinical Decision Making III, students select a pertinent health question and apply an evidence-based medicine review of the data. They give a PowerPoint presentation of their findings to their colleagues, write a paper for submission to a journal, or prepare a poster presentation for a conference.

Students complete a 42-week core of required primary-care clinical rotations, including six weeks each of family medicine I, family medicine II, general internal medicine, pediatrics, and surgery; and four weeks each of emergency medicine, gynecology, and psychiatry. Students also select six-week electives, which may include geriatrics, cardiology, dermatology, and orthopaedics.

The primary-care clinical rotations are designed to provide instruction and experience in caring for patients in a way that enables students to integrate the knowledge, skills, behaviors, and attitudes they learned in the program’s didactic phase. Clinical training is provided at University of Iowa Hospitals and Clinics, the Veterans Affairs Iowa City Health Care System, the Veterans Affairs Central Iowa Health Care System and Broadlawns Medical Center in Des Moines, and other affiliated hospitals throughout Iowa. In elective rotations, students gain additional clinical experience through placement with selected preceptors involved in office-based practices, typically in medically underserved rural areas.

The curriculum is as follows.

### FIRST YEAR (PHASE I)

#### Summer and Fall

- **050:174 Foundations of Clinical Practice for Physician Assistants** 5 s.h.
- **060:111 Gross Human Anatomy for Physician Assistant Students** 6 s.h.
- **061:104 Principles of Infectious Diseases for Physician Assistant Students** 4 s.h.
- **069:133 Introduction to Human Pathology** 4 s.h.
- **071:125 Pharmacology for Health Sciences: Physician Assistant Students** 6 s.h.
- **072:164 Human Physiology for Physician Assistant Students** 4 s.h.
- **099:164 Biochemistry for Physician Assistant Students** 3 s.h.
- **117:104 Clinical Decision Making II** 1 s.h.

#### Spring

- **050:175 Foundations of Clinical Practice IV for Physician Assistant Students** 13 s.h.
- **050:183 Healthcare Ethics, Law, and Policy** 2 s.h.
- **069:130 Clinical Laboratory Medicine for Physician Assistant Students** 1 s.h.
- **117:104 Clinical Decision Making II** 1 s.h.

### SECOND YEAR (PHASE II)

- **117:107 Seminar for Physician Assistant Students** 1 s.h.
- **117:110 Introduction to Clinical Skills** 1 s.h.
- **117:201 Clinical Decision Making III** 1 s.h.

The following are required clinical rotations.

- **117:300 Emergency Medicine for Physician Assistant Students** 4 s.h.
- **117:301 Gynecology for Physician Assistant Students** 4 s.h.
- **117:302 Family Practice I for Physician Assistant Students** 6 s.h.
- **117:303 Family Practice II for Physician Assistant Students** 6 s.h.
- **117:304 General Surgery for Physician Assistant Students** 6 s.h.
- **117:305 Internal Medicine for Physician Assistant Students** 6 s.h.
- **117:306 Pediatrics for Physician Assistant Students** 4, 6 s.h.
- **117:307 Psychiatry for Physician Assistant Students** 4 s.h.
Elective clinical rotations are selected from the following.

117:321 Dermatology Elective for Physician Assistant Students
117:322 Neurology Elective for Physician Assistant Students
117:323 Obstetrics for Physician Assistant Students
117:324 Ophthalmology Elective for Physician Assistant Students
117:325 Otolaryngology Elective for Physician Assistant Students
117:326 Pediatric Elective for Physician Assistant Students
117:327 Radiology Elective for Physician Assistant Students
117:328 Pediatric Elective (Bone Marrow Transplant) for Physician Assistant Students
117:329 Pediatric (Cardiology) Elective for Physician Assistant Students
117:330 Psychiatry Elective for Physician Assistant Students
117:331 Surgery Elective for Physician Assistant Students
117:332 Surgery Elective (Transplant/Organ Retrieval) for Physician Assistant Students
117:333 Surgery Elective (Burn Unit) for Physician Assistant Students
117:334 Surgery Elective (Cardiac Surgery) for Physician Assistant Students
117:335 Orthopedics Elective for Physician Assistant Students
117:336 Internal Medicine Elective for Physician Assistant Students
117:337 Internal Medicine (Cardiology) Elective for Physician Assistant Students
117:338 Internal Medicine (EKG) Elective for Physician Assistant Students
117:339 Internal Medicine (Gastroenterology) Elective for Physician Assistant Students
117:340 Internal Medicine (Oncology) Elective for Physician Assistant Students
117:341 Internal Medicine (Geriatrics) Elective for Physician Assistant Students
117:342 Internal Medicine (Pulmonary) Elective for Physician Assistant Students
117:343 Internal Medicine (Hospice) Elective for Physician Assistant Students
117:344 Internal Medicine (Infectious Disease) Elective for Physician Assistant Students
117:345 Internal Medicine (Correctional Medicine) Elective for Physician Assistant Students
117:347 Urology Elective for Physician Assistant Students
117:348 Family Practice Elective for Physician Assistant Students
117:349 Gynecology Elective (Women’s Health) for Physician Assistant Students
117:350 Migrant Health Elective for Physician Assistant Students
117:351 Occupational Medicine Elective for Physician Assistant Students
117:352 Pediatrics (Neonatology) Elective for Physician Assistant Students
117:353 Internal Medicine (Rheumatology) for Physician Assistant Students
117:354 Medical Intensive Care for Physician Assistant Students
117:355 International Medicine for Physician Assistant Students
117:356 Interventional Radiology for Physician Assistant Students
117:357 Gynecologic Oncology Elective for Physician Assistant Students

Admission

Applicants must meet the admission requirements of the Physician Assistant Program. They also must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

Applicants must have taken the Graduate Record Examination (GRE) General Test within the last 10 years. They must hold a baccalaureate degree from an accredited institution in the United States and have a cumulative g.p.a. and a science g.p.a. of at least 3.00 on the last 40 semester hours of college-level work. They must have completed preparatory science courses in organic and inorganic chemistry, introductory animal biology or zoology, and general statistics or biostatistics. They also must have completed upper-level courses in human or animal physiology (lower-level combined anatomy/physiology courses do not satisfy this requirement); three upper-level courses in endocrinology, microbiology, histology, and/or related disciplines; and an introductory biochemistry course (combined
organic/biochemistry courses do not satisfy this requirement). Courses in cell biology, cell physiology, genetics, immunology, molecular biology, neurobiology, and parasitology are recommended.

Applicants must have at least 1,200 hours of health care experience.

The admissions committee gives special attention to applicants’ performance in science courses. Some successful applicants have had a cumulative and science g.p.a. of at least 3.70; up to 141 s.h. of college credit, including at least 81 s.h. in the sciences; and more than 3,000 hours of clinical and/or research experience.

Satisfaction of the basic admission requirements does not ensure acceptance to the program. The admissions committee selects the applicants it considers best qualified. Previous health care experience involving direct patient contact is preferred. The committee requests interviews with the most qualified applicants.

Applications are accepted from April 1 to November 1 for entry the following May. Each applicant must complete the Physician Assistant Education Association centralized application, which includes three letters of recommendation, GRE scores, and transcripts. The majority of prerequisite course requirements must be completed by the November 1 application deadline.

**Expenses**

In addition to University of Iowa tuition and fees, Physician Assistant Program students must purchase their medical uniforms and diagnostic equipment, an expense of approximately $1,700. Microscopes are not required.

**Courses**

117:001 Physician Assistant Clinical Second Year  arr.

117:107 Seminar for Physician Assistant Students  1 s.h.
Professional issues that affect the physician assistant’s practice of medicine.

117:110 Introduction to Clinical Skills  1 s.h.
Suturing, injections, prescription and order writing, medical records, patient confidentiality, Iowa Law governing physician assistant practice, completion of the American Heart Association’s Advanced Cardiac Life Support Program. Prerequisites: completion of physician assistant curriculum phase I.

117:201 Clinical Decision Making III  1 s.h.
Asking appropriate clinical questions in the course of patient care; gathering information from multiple sources to answer questions.

117:300 Emergency Medicine for Physician Assistant Students  arr.
Obtaining and recording pertinent historical data, obtaining indicated laboratory studies, assessing the results, arriving at a diagnosis, formulating a treatment plan, implementing appropriate therapy.

117:301 Gynecology for Physician Assistant Students  4 s.h.
Opportunity to develop proficiency in history and physical exams of gynecological patients; outpatient, family planning, gynecological cancer, concepts of diagnostic techniques and therapy.

117:302 Family Practice I for Physician Assistant Students  6 s.h.
Obtaining and recording complete history and physical exams; formulation of differential diagnosis and problem list; ordering, obtaining, and interpreting lab and diagnostic studies; implementation of therapeutic procedures and treatment plans.

117:303 Family Practice II for Physician Assistant Students  6 s.h.
Opportunity to participate in delivery of ambulatory primary care; at a different site from 117:302.

117:304 General Surgery for Physician Assistant Students  6 s.h.
Preparation for work as an assistant to the generalist; outpatient and inpatient surgical services, including surgical procedures and management of postoperative course.

117:305 Internal Medicine for Physician Assistant Students  6 s.h.
Eliciting a medical history, doing a pertinent physical exam, obtaining indicated lab studies, assessment of results, formulation of management plan and implementation of appropriate therapy for common internal medicine problems.

117:306 Pediatrics for Physician Assistant Students  arr.
Knowledge and skills required for providing appropriate medical care to infants, children, and adolescents; initiation and promotion of interpersonal relationships.

117:307 Psychiatry for Physician Assistant Students  4 s.h.
Training in history and physical exams of psychiatry patients, including individual and family therapy, vocational testing and guidance, development of interviewing skills.

117:321 Dermatology Elective for Physician Assistant Students  arr.
Recognizing dermatologic diseases and disorders, instituting appropriate management of patients with dermatologic problems.

117:322 Neurology Elective for Physician Assistant Students  arr.
Performing general and neurological exams, establishing diagnosis, recommending lab studies, instituting appropriate management of common neurological diseases and disorders, recognizing the need for urgent treatment.
Appropriate treatment.

Proficiency in recognizing ophthalmology problems; how to institute appropriate management of these conditions.

Proficiency in recognizing otolaryngology problems; how to institute appropriate management of these conditions; opportunity for involvement in varied surgical procedures.

Experience working with children and adolescents.

Proficiency in systematic evaluation of normal and abnormal routine radiologic examinations; listing indications for special exam procedures, including details of prepping the patient.

Basic clinical knowledge and skills for diagnosis, treatment, and management of pre- and post-bone-marrow transplant patients.

Cardiovascular assessment and problem management of pediatric patients; experience with a range of acute, chronic, common, and rare cardiology diseases.

Training in evaluation and treatment of psychiatry patients.

Experience working with children and adolescents.

Development of basic clinical knowledge and skills for diagnoses, treatment, and management of infectious diseases.

Development of basic clinical knowledge and skills for diagnoses, treatment, and management of pulmonary diseases.

Familiarity with broad spectrum of medical conditions among the elderly; experience in history and physical exams, diagnosis of geriatric patients along with follow-up visits.

Development of basic clinical knowledge and skills for diagnoses, treatment, and management of pulmonary diseases.

Work on a hospice care team performing evaluation, treatment, and education of patients with terminal illnesses; dealing with the prospect of death.

Development of basic clinical knowledge and skills for diagnoses, treatment, and management of infectious diseases.

Experience with ambulatory medicine in a correctional institution; management of acute and chronic diseases, including HIV, hepatitis B&C, psychiatric conditions; focus on confidentiality, security.

Proficiency in managing patients with urologic conditions; skill in taking a urologic history, performing physical exams, interpreting laboratory studies and data.

Proficiency in delivering ambulatory primary care.

Experience in annual gynecologic exams, PAP screening, gynecology problems, contraception issues, STD screening and counseling, common gynecologic procedures.

Basic clinical knowledge and skills for diagnosis, treatment, and prevention of diseases, injuries, and conditions related to environmental exposure in migrant worker populations.
117:351 Occupational Medicine Elective for Physician Assistant Students arr.
Basic clinical knowledge and skills for diagnosis, treatment, and prevention of work-related diseases, injuries, and conditions related to environmental exposure.

Basic clinical knowledge and skill for diagnosis, treatment, and management of critically ill infants.

117:353 Internal Medicine (Rheumatology) for Physician Assistant Students arr.
Basic clinical knowledge and skills for diagnosis, treatment, and management of rheumatologic diseases.

117:354 Medical Intensive Care for Physician Assistant Students arr.
Basic clinical knowledge and skills for diagnosis, treatment, and management of critically ill patients.

117:355 International Medicine for Physician Assistant Students arr.
Basic clinical knowledge and skills for diagnosis, treatment, and prevention of diseases, injuries, and conditions relevant to international medicine. Repeatable.

117:356 Interventional Radiology for Physician Assistant Students arr.
Basic clinical knowledge and skills for diagnosis and treatment of conditions requiring interventional therapy. Repeatable.

117:357 Gynecologic Oncology Elective for Physician Assistant Students arr.
Experience developing diagnostic skills in clinical gynecologic oncology, learning methods of staging specific cancers; and assisting in therapy and outpatient management of patients with varied cancers.
The Department of Psychiatry teaches M.D. students, principally during their third year, and trains resident physicians for academic and clinical careers in psychiatry. It offers no degree program.

Residency Programs

The department maintains a four-year training program approved by the Residency Review Committee of the American Medical Association. Training experiences are available at University of Iowa Hospitals and Clinics and at the Veterans Affairs Iowa City Health Care System. Additional experiences are available at affiliated institutions: Broadlawns Medical Center in Des Moines, the Iowa Medical and Classification Center at Oakdale, the Mid-Eastern Iowa Community Mental Health Center in Iowa City, and the Independence Mental Health Institute (Iowa Department of Human Services).

The department also offers an approved two-year residency in child psychiatry. Fellowships in geriatrics and psychosomatic medicine are available after residency training.

Research

Department of Psychiatry staff members are involved in genetic and family studies of psychiatric disorders, and research in genetic and biological psychiatry, neurochemistry, neuroimaging, neurophysiology, neuropsychiatry, and psychosocial aspects of behavior.

Many research opportunities in psychiatry are available to students and residents, and the basic science areas of neurochemistry, neurophysiology, and electrophysiology offer additional opportunities. The clinical areas of psychology, child psychiatry, and psychotherapy also offer opportunities to a limited number of students for research and further study.

Courses

073:255 Psychiatric Epidemiology 3 s.h.
Same as 173:267.

For Medical Students

073:005 Clinical Psychiatry 4 s.h.
Prerequisite: third-year M.D. enrollment.

073:031 General Hospital Psychiatry arr.
Supervised evaluation of patients at General Hospital Psychiatry, University Hospitals and Clinics. Prerequisite: M.D. enrollment.

073:033 Adult Psychiatry, Pappajohn Pavilion arr.
Prerequisite: M.D. enrollment.

Roles of child psychiatry as a consultation service. Prerequisite: M.D. enrollment.

073:045 Adult Outpatient Psychiatry and Psychotherapy 4 s.h.
Diagnostic assessment, evaluation, treatment of psychiatric patients; exposure to both psychotherapeutic, psychopharmacologic treatments. Prerequisite: M.D. enrollment.
073:105 Research Psychiatry
Experience, training in practical application of scientific methodology; work with research project at Psychiatric Service or affiliated cooperating research centers. Prerequisite: fourth-year M.D. enrollment.

073:835 Subinternship in Medical Psychiatry 4 s.h.
Hands-on experience in evaluation and treatment of patients with combined medical and psychiatric disease; decisions regarding appropriate consultations, diagnostic tests, treatment; etiology and pathophysiology. Prerequisite: M.D. enrollment.

073:998 Psychiatry on Campus
Arranged by student with departmental approval. Prerequisite: M.D. enrollment.

073:999 Psychiatry off Campus
Prerequisite: M.D. enrollment.
Radiation Oncology

Head: John Buatti
Professors: John Buatti, Garry R. Buettner, Frederick E. Domann Jr., Larry W. Oberley, Douglas R. Spitz
Professor emeritus: James W. Osborne
Associate professors: John E. Bayouth, Prabhat Goswami, Geraldine Jacobson
Associate professor emeritus: J. Fred Doornbos
Assistant professors: Sudershan Bhatia, Mark W. Dion, Kenneth Dornfeld, Joseph Modrick, R. Alfredo C. Siochi, Mark C. Smith
Associates: Edward Pennington, Timothy J. Waldron

Radiation oncology specializes in the delivery of radiation treatments for cancer patients. It includes treatments with linear accelerators as well as isotopes and temporary and permanent surgically implanted sources. Radiation oncologists also use these methods to treat some benign diseases, such as Graves’ ophthalmopathy and trigeminal neuralgia.

The Department of Radiation Oncology is dedicated to educating graduate students, radiation therapy technology students, physics students, and medical residents. Its faculty members provide instruction for Master of Science and Doctor of Philosophy students in the Free Radical and Radiation Biology Program, through their participation in 077:103 Radiation Biology, 077:211 Medical Physics, 077:222 Free Radicals in Biology and Medicine, and 077:288 Molecular and Cellular Biology of Cancer. The faculty also provides instruction for Carver College of Medicine students.

The department’s professional staff provides training in radiation therapy technology for undergraduate students in the Radiation Sciences Program (Division of Associated Medical Sciences) by teaching courses 672:803 and 672:804 Radiation Therapy I-II.

The department provides a four-year physician residency training program in radiation oncology that includes clinical care and education. It also has a residency program in medical physics. M.D. students can elect a two- or four-week radiation oncology rotation. Nursing students, dental residents, and fellows in gynecologic oncology and in adult and pediatric hematology and oncology do rotations in the department.

The department also offers specialized research projects and sponsors postdoctoral students in biology, physics, and clinical disciplines by arrangement with the instructor or mentor.

Courses

186:202 Radiation Oncology 4 s.h.
Integration of clinical oncology, physics, and cancer biology; clinical work with faculty mentors; experience in clinical evaluation, technical physics, biological application.

186:998 Radiation Oncology on Campus arr.
Development of new markers for normal tissue toxicity following radiation treatment.

186:999 Radiation Oncology off Campus arr.
Arranged by the student with department approval.
The Radiation Sciences Program is one of five academic units in the Division of Associated Medical Sciences. For information on the division’s general academic policies, see Associated Medical Sciences in the Catalog.

Radiation sciences professionals work with physicians to gather accurate patient information for diagnosis, treatment, and/or research of disease and injury. The radiation sciences professional must possess knowledge, skill, and mature judgment in order to operate complex equipment safely and efficiently and to produce quality images using multiple sources of radiation energy while delivering quality patient care during procedures.

**Undergraduate Program**

The Bachelor of Science in radiation sciences provides graduates with the knowledge they need to adapt to the increasing sophistication of the profession of radiation sciences and meet the multicredential/multicompetency demands of the profession.

**Bachelor of Science**

The Bachelor of Science in radiation sciences requires a minimum of 124 s.h. Radiation sciences students complete specific components of the College of Liberal Arts and Sciences General Education Program, a professional radiography program, a specialty (modality program), and advanced course work. The modality program must be completed at the Carver College of Medicine. All radiation sciences students must meet residency and g.p.a. requirements; see “General Academic Policies” in the Division of Associated Medical Sciences section of the Catalog.

Students who complete the entire program at Iowa enroll first with a radiation science interest in the College of Liberal Arts and Sciences, where they complete the General Education Program. During the fall semester of the first year, students apply to University of Iowa Hospitals and Clinics Radiologic Technology Program. Admission is selective. Accepted students enroll for the second and third years as nondegree students in the Radiologic Technology Program. Finally, students must be accepted to a modality program, be admitted to the Carver College of Medicine B.S. program in radiation sciences, and complete the advanced course requirements.

Certified radiographers who hold national certification from the American Registry of Radiologic Technologists, or student radiographers intending to take the national certification exam, must be admitted to the Carver College of Medicine as Bachelor of Science students in the Radiation Sciences Program. They must complete the required University courses and a specialty (modality program). Admission to modality programs is selective. Applicants must meet semester-hour, grade-point average, and residency requirements. The program plan is as follows.

**GENERAL EDUCATION COURSES**

**Rhetoric**

Students take 010:001 and 010:002 Rhetoric I-II (8 s.h.) or 010:003 Accelerated Rhetoric (4 s.h.).

**Natural Sciences**

One of these sequences:
- 004:007-004:008 General Chemistry I-II 6 s.h.
- 004:011-004:012 Principles of Chemistry I-II 8 s.h.

**Social Sciences**

031:001 Elementary Psychology 3 s.h.

**Quantitative or Formal Reasoning**

22M:015 Mathematics for the Biological Sciences 4 s.h.

**Distributed Education**

One course in two of these areas: social sciences (except psychology), humanities, cultural diversity, and historical perspectives 6 s.h.
For information about the General Education Program, contact the College of Liberal Arts and Sciences or visit its web site (http://www.clas.uiowa.edu).

**RADIOLOGIC TECHNOLOGY PROGRAM**

Students must complete a radiologic technology program and pass the American Registry of Radiologic Technologists (AART) national certification exam. The Radiologic Technology Program sponsored by University of Iowa Hospitals and Clinics (670:901 and 670:902 Radiologic Technology I-II, 0 s.h.) provides education in pathology, radiation biology, radiation protection, patient care, and ethics. Students learn about anatomy and physiology, medical terminology, and radiographic procedures, imaging, and evaluation. They become acquainted with imaging equipment, study quality assurance, and participate in supervised clinical education. The 24-month program begins in June. Graduates of the program are eligible to take the national certification exam; upon successful completion of the exam, students are granted 60 s.h. of credit toward the B.S. in radiation sciences.

**SPECIALTY (MODALITY PROGRAM)**

Radiation sciences students must apply to, be accepted, and complete one of the following specialties (modality programs) at University of Iowa Hospitals and Clinics. Each program offers modality-specific didactic and supervised clinical education courses. Program duration varies. Graduates of the modality programs are eligible to take certification exams.

**Nuclear Medicine Technology (074:101, 074:102, 074:103, 074:104, and 074:105)** includes classes in radiopharmacy, radiobiology, radioimmunology, radiation protection, patient care, medical terminology, instrumentation, computer applications, administration, and ethics; 12-month program (30 s.h.); begins in August.

**Radiation Therapy (672:803, 672:804, and 672:805)** teaches theory and techniques of radiation therapy technology, with emphasis on competence in areas of oncology treatment planning, treatment delivery, dosimetry, and use of megavoltage radiation-producing equipment to administer treatment; 12-month program (30 s.h.); begins in August.

**Diagnostic Medical Sonography (673:803, 673:804, 673:805, 673:806, and 673:807)** focuses on principles and methods in using ultrasound and offers specialties in abdominal, pediatric, obstetric, and gynecologic imaging as well as interventional procedures and vascular technology; 18-month program (36 s.h.); begins in August.

**Magnetic Resonance Imaging (674:806, 674:807, and 674:808)** offers intensive study and practice in magnetic resonance imaging, including computer technology, pathophysics, physics, advanced sectional anatomy, and instrumentation; nine-month program (24 s.h.); begins in September and March.

**Cardiovascular Intervention (675:808 and 675:809)** teaches about imaging equipment, pharmacology, sterile techniques, cardiac monitoring, vascular anatomy and physiology, cardiovascular intervention technology imaging procedures, therapeutic intervention techniques, and digital angiography; six-month program (15 s.h.); begins in September and March.

**Computed Tomography (676:100, 676:110, 676:120, and 676:130)** concentrates on sectional anatomy, single and multislice computed tomography (CT), electron beam CT, physiologic and 3-D imaging, CT simulation, physics and imaging, and procedures and pathology; on-line courses (15 s.h.); 676:140 recommended elective internship (3 s.h.); begins in August and January.

**Quality Management/Picture Archival and Communication Systems (678:816 and 678:817)** includes courses in quality management, radiographic and mammographic quality control, research methods, federal regulations, PACS technology, networking and standards, PACS management, radiology department design and workflow, and QA for the digital department; advanced national recognition exam in Quality Management is recommended at completion; six-month program (15 s.h.); begins in August and February.

**ADVANCED COURSES**

06j:048 Introduction to Management 3 s.h.
22S:102 Introduction to Statistical Methods 3 s.h.
096:263 Informatics in Nursing and Health Care 3 s.h.

**ELECTIVES**

Elective course work, to complete the required 124 s.h., should be planned in consultation with the advisor.

**Advising**

Students who have declared a radiation science interest and are completing the General Radiation Sciences 933
Education Program before admission to the Radiologic Technology Program are advised at the University’s Academic Advising Center. After admission to the Radiologic Technology Program, they are advised by the program’s director. Students admitted to the radiation sciences major are advised by Radiation Sciences Program personnel.

Admission

Students who intend to complete the entire program at Iowa must be admitted to The University of Iowa as having a radiation sciences interest in the College of Liberal Arts and Sciences. For information on admission requirements, contact the University’s Office of Admissions.

Admission to the Radiologic Technology Program is competitive; enrollment is limited to 25. Student applications are accepted October through December. Students accepted to the program are admitted to the Carver College of Medicine on nondegree (special) student status and must meet specific program requirements; see Information/RT & Modality Programs on the Radiation Sciences Program web site. A g.p.a. of 2.50 in general education courses is recommended.

Admission to the Carver College of Medicine radiation sciences major requires national certification in radiologic technology from the American Registry of Radiologic Technologists and a cumulative g.p.a. of at least 2.00.

Admission to specialties (modality programs) is competitive; enrollment is limited. See Prospective Students/Admission on the Radiation Sciences Program web site or contact the individual modality program directors. The application deadline is February 1. Admission to the radiation sciences major does not guarantee admission to a modality program. Cumulative grade-point averages of 2.50 are recommended. Applicants must hold national certification from the American Registry of Radiologic Technologists.
Head: Laurie Fajardo
Associate professors: Joong Ahn, Thomas Barloon, D. Lee Bennett, Bruce P. Brown, Thomas Grabowski, Joan Maley, Louis Messerle, Brian Mullan, Kenjiroh Ohashi, Alan Stolpen, Shiliang Sun, Brad H. Thompson, G. Leonard Watkins, Jinhu Xiong
Assistant professors: Kelli Andresen, Geetika Khanna, David Kuehn, Vincent Magnotta, Yusuf Menda, Heather Ohrt, Stanley Parker, Daniel Thedens
Web site: http://www.radiology.uiowa.edu

Undergraduate Education

The Department of Radiology offers clinical education to Division of Associated Medical Sciences students; see Nuclear Medicine Technology and Radiation Sciences in the Catalog.

Courses

074:006 Clinical Radiology 2 s.h.
Two-week clerkship. Prerequisite: M.D. enrollment.

074:101 Principles of Nuclear Medicine I 0, 6 s.h.
Didactic and laboratory work in radiopharmacy, patient care, radiation protection, math and statistics, radiation physics, anatomy and physiology, radiochemistry and tracer techniques, medical terminology, computer applications. Prerequisite: Nuclear Medicine Technology Program enrollment.

074:102 Introductory Clinical Nuclear Medicine 0, 6 s.h.
Experience in preparing radiopharmaceuticals, performing routine nuclear imaging and in vitro procedures; work with clinical instructors. Prerequisite: Nuclear Medicine Technology Program enrollment.

074:103 Principles of Nuclear Medicine II 0, 3 s.h.
Didactic and laboratory work in nuclear medicine instrumentation, radiobiology, professional ethics, administration and management, computer applications. Prerequisite: Nuclear Medicine Technology Program enrollment.

074:104 Intermediate Clinical Nuclear Medicine 0, 9 s.h.
Progressive responsibility in radiopharmacy, nuclear and P.E.T. imaging, cardiac stress testing. Prerequisite: Nuclear Medicine Technology Program enrollment.

074:105 Advanced Clinical Nuclear Medicine 0, 6 s.h.
Proficiency in performance, quality assurance of all radiopharmacy and nuclear medicine procedures; opportunities for independent study, research. Prerequisite: Nuclear Medicine Technology Program enrollment.

074:191 Health Informatics I 3 s.h.

074:192 Health Informatics II 3 s.h.

074:201 Advanced Clinical Radiology arr.
Prerequisite: M.D. enrollment.

074:203 Vascular and Interventional Radiology arr.
Prerequisite: M.D. enrollment.

074:901 Community Radiology arr.
Prerequisite: M.D. enrollment.

074:998 Radiology on Campus arr.
Prerequisite: M.D. enrollment.

074:999 Radiology off Campus arr.
Prerequisite: M.D. enrollment.
Students develop awareness of surgical therapy’s place in the treatment of disease. Emphasis is placed on basic emergency techniques, trauma, oncology, burns, gastrointestinal and biliary tract disease, endocrine disease, transplantation, plastic surgery and reconstruction, and peripheral vascular surgery.

The majority of surgery courses involve patient-centered discussions and practical exercises interwoven with operating room experience. Lectures and conferences are scheduled regularly on specific topics.

Independent study courses in selected surgery topics and clinical experiences are available to fourth-year M.D. students by arrangement with the faculty.

Faculty

The faculty’s strengths center in pathophysiology and problems of severe burns, organ transplantation, surgical control of morbid obesity, inflammatory bowel disease, biliary tract disease, pediatric surgery, endocrine disease, plastic surgery, and vascular surgery.

Facilities

Abundant patient contact provides education in a wide variety of surgical diseases. The Department of Surgery provides training in the only burn unit in Iowa approved by the American College of Surgeons and in the Level I Trauma Center at University of Iowa Hospitals and Clinics.

Laboratories provide equipment, space, and technical expertise to support teaching and a wide spectrum of clinical and scientific research. Projects are available in gastrointestinal surgery, surgical microbiology, peripheral vascular surgery, transplantation, wound healing, organ preservation, vascular surgery, pediatric surgery, and surgical oncology.

Courses

075:005 Clinical Surgery 6 s.h.
Experience as active member of surgical team; work on inpatient units, in clinics and operating room; assist in elective and emergency patient care.

075:216 Subinternship in General Surgery 4 s.h.
Responsibility for management of selected surgical patients, in operating rooms on a surgical service. Prerequisite: 075:005.
075:223 Subinternship in Burn Therapy  
Experience as member of burn team on ward, in operating room; resuscitation with fluid and electrolytes, nutritional support, wound healing, rehabilitation. Prerequisite: 075:005.

075:224 Subinternship in Pediatric Surgery  
Clinical experience in ward, operating room, outpatient clinics; surgical, pediatric conferences. Prerequisite: 075:005.

075:226 Subinternship in Plastic Surgery  
Experience with problems in plastic and reconstructive surgery. Prerequisite: 075:005.

075:229 Research Surgery  
Project with faculty member. Prerequisites: 075:005 and consent of instructor.

075:230 Subinternship in Vascular Surgery  
Diagnosis, treatment of peripheral vascular disease; noninvasive diagnosis of arterial, venous problems; vascular problems in outpatient clinic, inpatient service; time in operating room, rounds with residents, conferences. Prerequisite: 075:005.

075:235 Subinternship in General Surgery, Iowa Methodist Medical Center  
Care of general surgery patients in private hospital setting. Prerequisites: 075:005 and consent of instructor.

075:236 Intensive Care Unit—Trauma, Iowa Methodist  
Subinternship on trauma service team; evaluation and management of critically ill patients in the emergency room, operating room, intensive care unit. Prerequisites: 075:005 and fourth-year M.D. enrollment.

075:237 Subinternship in General Surgery, Davenport  
Participation in diagnosis and management of general surgical patients under supervision of attending surgeons from Davenport Surgical Group, Genesis Medical Center. Prerequisites: 075:005 and fourth-year M.D. enrollment.

075:998 Surgery on Campus  
Surgery on campus; individually arranged. Prerequisite: 075:005.

075:999 Surgery off Campus  
Prerequisites: 075:005 and consent of instructor.
Urology encompases the subspecialty areas of urologic nephrology, oncology, and endocrinology; male reproductive physiology; erectile dysfunction; neurourology; pediatric urology; urinary tract stone and infection, including endourology; laparoscopic urology; diagnostic urology, and urinary tract obstruction.

The Department of Urology offers instruction in all of these areas at both the undergraduate and graduate levels and provides continuing education for the delivery of urologic care.

Medical Student Training

The department cooperates with several University of Iowa basic science departments to educate first-year M.D. students in the relationship between urology and the basic sciences. It collaborates with the Department of Microbiology in teaching and research concerning immunology of genitourinary cancers and renal transplantation.

In the second-year M.D. course, 050:165 Foundations of Clinical Practice IV ICD, the department presents illustrative lectures and demonstrations related to diagnosis and treatment of genitourinary tract diseases.

Third- and fourth-year M.D. students take Department of Urology courses that provide experience in all areas of urology. The required third-year clerkship covers the fundamentals of these areas through experience in outpatient clinics and inpatient units at University of Iowa Hospitals and Clinics and the Veterans Affairs Iowa City Health Care System, as well as in daily interactive teaching seminars. Fourth-year M.D. students can take advanced elective courses of intensive study in any of the urologic subspecialties.

Continuing Education

The department offers continuing education activities throughout the year for urologic and family practitioners. These activities are conducted by the senior staff, whose interests include pediatric urology, reproductive physiology, urologic oncology, urinary tract stone (including endourology/laparoscopy), and prostatic diseases.

Research

The department has earned international recognition for its studies of prostatic diseases. The urological laboratories conduct research and offer instruction in experimental oncology, cellular immunology, and infertility.

Courses

079:104 Clinical Urology 2 s.h.  
Work in urology unit, clinic; responsibility for patient care, working with residents.

079:108 Advanced Clerkship in Urology 4 s.h.  
Experience as integral member of urological staff, junior resident level.

079:109 Advanced Clerkship in Pediatric Urology 4 s.h.  
In-depth study of pediatric urology topics. Prerequisite: 079:104.

079:110 Individual Study and Research arr.  
Preclinical or clinical projects; may include research presentation, collaboration on a publication.

079:119 Advanced Clerkship Female and Reconstructive Surgery 4 s.h.  
Clinical and surgical experience in voiding dysfunction, incontinence, urodynamics. Prerequisite: 079:104.

079:120 Community General Urology, Des Moines 4 s.h.  
Exposure to the entire spectrum of private practice urology, in office and operating room settings; experience with preoperative and postoperative care; nonoperative aspects of office-based community urology. Prerequisite: 079:104.

079:999 Urology off Campus arr.  
Individually arranged by students with department approval.
The College of Nursing is an integral part of the University of Iowa health science campus, sharing in and contributing to teaching, research, and patient care resources that have earned international recognition. The University provides an unusually fine setting for nursing preparation because the educational and clinical resources vital to educating nurses are available on or near the campus. Faculty and students participate fully in University life and contribute their time, interests, and abilities to the many general and special activities of a major research university.

The college’s Bachelor of Science in Nursing (B.S.N.), Master’s in Nursing and Health Care Practice (M.N.H.P.), and Master of Science in Nursing (M.S.N.) programs are accredited by the Commission on Collegiate Nursing Education (CCNE), an autonomous accrediting arm of the American Association of Colleges of Nursing (AACN). They also are approved by the Iowa Board of Nursing. The anesthesia nursing program is accredited by the Council on Accreditation of Nurse Anesthesia Educational Programs.

Graduates of the B.S.N. and M.N.H.P. programs qualify to take the licensure examination required for practice as registered nurses (RN). Graduates of advanced practice majors in the graduate program are eligible to take certification examinations and apply for Advanced Registered Nurse Practitioner (ARNP) licensure.

Undergraduate Program

The college offers the Bachelor of Science in Nursing (B.S.N.). The program provides preparation for careers in the hospital care of patients and in community agencies such as public health services, schools, homes, and industries. It also provides a base for graduate study in nursing.

In addition to the advantages of combining general education with specialized career
preparation, a college or university program offers the advantages of full participation in the social, cultural, and recreational activities of a highly diverse campus community. In nursing, no less than in other pursuits, a college or university background enables people not only to prepare for a career but to achieve a life of thought and action informed by knowledge, introspection, and contemplation.

The nursing major provides a basis for nurses’ roles in wellness and health promotion, in acute care, and in long-term care for chronic illness. The professional nurse provides care to individuals, families, groups, and communities along a continuum of health, illness, and disability in any sector of the health care system.

In addition to providing care, the nurse serves as a coordinator of health care by organizing and facilitating the delivery of comprehensive, efficient, and appropriate service to individuals, families, groups, and communities. The nurse demonstrates the ability to conceptualize the total continuing health needs of the patient, including legal and ethical aspects of care. The University of Iowa program’s goal is to produce graduates who are competent, committed, creative, and compassionate.

Bachelor of Science in Nursing

The Bachelor of Science in Nursing requires 128 s.h., including 68 s.h. in the nursing major and 60 s.h. in the College of Liberal Arts and Sciences General Education Program and supportive pre-nursing courses. Students can expect to complete the program in four and one-half academic years.

B.S.N. students may complete their entire program at Iowa, enrolling for their first year or year-and-a-half in the College of Liberal Arts and Sciences. Or they may transfer from an institution that offers specific courses approved by the College of Nursing. See “Admission to the B.S.N.” later in this section.

Each B.S.N. student is assigned a College of Nursing faculty member as an advisor on career planning and professional development.

Nursing courses are based on concepts of health, deviations from health, and nursing intervention. Course work progresses in complexity from the sophomore through the senior year. The curriculum reflects the current trend in health care delivery toward emphasis on nursing as a service provided both inside and outside hospitals. Students have access to clinical experiences selected from more than 60 agencies in Iowa.

Advising

Advisors from the University’s Academic Advising Center advise pre-nursing students. After admission to the College of Nursing, each student is assigned a College of Nursing faculty advisor.

RN/B.S.N. for Registered Nurses

The RN/B.S.N. progression program is designed to offer registered nurses the opportunity to build on their nursing knowledge and experience by earning a Bachelor of Science in Nursing.

RN/B.S.N. students take courses that focus on professional aspects of nursing, nursing process and health assessment, community/public health, leadership and management, research, and nursing issues. Each student is assigned to a College of Nursing faculty member for academic advising and curriculum planning.

The College of Nursing participates as a receiving institution in the Iowa Statewide Articulation Plan for Nursing Education: RN to Baccalaureate.

Students may transfer course work completed at other colleges and universities to satisfy prerequisites and degree requirements other than those for the nursing major. Once they satisfy prerequisites, students may complete the RN/B.S.N. in one calendar year in a sequence that begins each summer and includes three clinical and five nonclinical nursing courses.

The RN/B.S.N. program uses online educational technologies. Face-to-face meetings are limited to physical assessment lab practice and testing each summer, available at support centers across Iowa. Students may be required to do a practicum presentation in fall and spring semesters. Presentations are flexibly scheduled and may be done on site, at a support center, or using online presentation software.

Registered nurses who plan to enter the baccalaureate program should contact the College of Nursing RN/B.S.N. Program Office for information and early advising.

Honors

The College of Nursing Honors Program provides seminars and independent study experience for qualified students. In order to pursue honors studies in nursing, students must have completed
the first clinical nursing course and must maintain an overall cumulative g.p.a. of at least 3.33 and a nursing major g.p.a. of at least 3.50.

The honors program enables students to explore subject matter based on individual interests, needs, and goals. It provides opportunities for self-initiative, research experience, and intellectual and personal development, and challenges students to grow and excel. Students who fulfill the requirements of the program graduate with honors in nursing.

Certificate, Minor in Aging Studies

Students in the College of Nursing may participate in the Aging Studies Program, which provides undergraduate students with a multidisciplinary approach to gerontology. Students plan their course of study with their academic advisor in close cooperation with the Aging Studies Program coordinator. Nursing students who successfully complete 21 s.h. of approved course work in aging studies are awarded the Certificate in Aging Studies. Nursing students also may complete a minor in aging studies by taking 15 s.h. outside of their major in courses approved by the Aging Studies Program. See Aging Studies (College of Liberal Arts and Sciences) in the Catalog.

Study Abroad

The College of Nursing advocates study abroad as a rich educational experience for students. Nursing students have the opportunity to encounter another culture directly through the college’s cultural nursing experiences abroad. The intent of these regular programs is to introduce students to health care systems in other countries. In addition, students learn about health conditions and circumstances not widely prevalent in the United States (e.g., diphtheria, nutritional deficiencies). For more information, contact the College of Nursing Office of Student Services.

Expenses and Insurance

Students pay University of Iowa student fees throughout the B.S.N. program. They also must purchase uniforms, white shoes, a stethoscope, a watch with a full-sweep second hand, and supplies and materials for required nursing courses. Students arrange for their own health screening requirements, health insurance, professional liability insurance, and transportation once they are enrolled in clinical nursing courses. Students also pay fees for computer testing, criminal background checks, and laboratory equipment.

Mandatory Health Insurance

All students in the College of Nursing must show annual verification that they have obtained and currently hold health insurance sufficient to satisfy the following minimal standards of coverage (or an equivalent alternative care plan):

- $250,000 lifetime benefit;
- coverage for hospitalization, including coverage for room and board, physician visits, surgeon services, X-ray, and lab services;
- inpatient deductible under an individual policy not exceeding $500 per admission and a 20 percent copayment/coinsurance requirement;
- coverage for medically necessary care, including both physician services for treatment of emergencies, illness, accident, injury, X-ray, and lab services.

Professional Liability Insurance

All students in the College of Nursing are required to carry professional liability insurance throughout the duration of their program. Agencies in which students are involved in clinical practicums require that students have insurance coverage. Entering students in the College of Nursing are provided information about this requirement and must show verification that they have purchased and currently hold professional liability insurance with a minimum coverage of $1 million per single occurrence.

Undergraduate Student Organizations

All College of Nursing undergraduate students are members of the National Student Nurses’ Association and its local chapter, the Iowa Association of Nursing Students. The University of Iowa Association of Nursing Students (UIANS) provides opportunities for professional growth and development in nursing. UIANS representatives are members of the University of Iowa Student Government (UISG), and there is a UIANS representative on the Academic Council of the College of Nursing.

The University of Iowa Minority Student Nursing Association (UIMNSA) provides opportunities for
professional growth and development for students from populations underrepresented in nursing. UIMNSA board members are members of the University of Iowa Student Government.

Admission to the B.S.N.

B.S.N. students may complete their entire program at Iowa, enrolling for their first year or year-and-a-half in the College of Liberal Arts and Sciences. Highly qualified students may be admitted early to the College of Nursing if they have an Admission Index Score of 148 or higher and have no high school unit deficiencies. The Admission Index Score equals ACT composite score multiplied by two, plus high school percentile rank. For more information, contact the College of Nursing or the University of Iowa Office of Admissions.

Students also may transfer from an institution that offers specific courses approved by the University of Iowa College of Nursing. Cooperating state institutions and independent colleges that participate in the transfer plan include Iowa State University; the University of Northern Iowa; Upper Iowa University; and Briar Cliff, Morningside, Loras, Luther, Clarke, Simpson, and Wartburg colleges. Participating community colleges are located in Ankeny, Bettendorf, Boone, Burlington, Calmar, Carroll, Cedar Rapids, Clarinda, Clinton, Council Bluffs, Davenport, Des Moines, Emmetsburg, Estherville, Fort Dodge, Iowa Falls, Keokuk, Marshalltown, Mason City, Muscatine, Ottumwa, Peosta, Sheldon, Sioux City, and Waterloo.

Completion of the transfer sequence at a cooperating institution does not guarantee admission to the College of Nursing; admission standards for transfers are the same as for all other College of Nursing applicants. Prospective transfer students who want more information about this plan should contact the cooperating institution of their choice.

To apply for admission to the B.S.N. program in nursing, each student must qualify for admission to The University of Iowa and meet these requirements:

- completion of all prerequisites for admission to the College of Nursing, or current enrollment in any remaining prerequisites;
- a grade of C or higher in all prerequisite courses;
- a g.p.a. of at least 2.70 (recommended).

Applicants whose first language is not English must score at least 550 (paper-based) or 213 (computer-based) on the Test of English as a Foreign Language (TOEFL). Registered nurses educated outside the United States are required to present verification of having passed the Commission on Graduates of Foreign Nursing Schools (CGFNS) examination and specified Excelsior baccalaureate nursing examinations. They also must meet the University’s English proficiency requirements.

A criminal background check is conducted for all prelicensure and undergraduate students upon admission.

High School Background

The College of Nursing requires four years of English, three years of social science, three years of mathematics (a minimum of algebra I-II and geometry), two years of one foreign language, one year each of biology and chemistry, one-half year of physics, and other college preparatory courses selected with the help of the high school counselor.

Preclinical Background

In addition to the biological and behavioral science courses required for College of Nursing admission, students must satisfy the following requirements before beginning clinical course work.

**Rhetoric:** 8 s.h. (may be satisfied by testing for advanced standing); a student who has earned 6 s.h. in English composition may complete the speech component after admission.

**Mathematics:** three years of high school mathematics, or a score of 26 or higher on the mathematics battery of the ACT, or completion of a college mathematics course comparable to or more advanced than 22M:002 Basic Algebra II.

**Physics:** one-half year of high school physics or equivalent.

**Other course work:** animal biology, inorganic chemistry I, microbiology, human anatomy, psychology, and human development and behavior.

American College Tests

All entering first-year and undergraduate transfer students who have earned fewer than 24 s.h. when they apply for admission to The University of Iowa must complete the American College Test (ACT) or the Scholastic Aptitude Test (SAT). For information on the ACT, write to ACT Inc., Box 451, Iowa City, Iowa 52243.
Core Performance Standards

Applicants to the College of Nursing are expected to be capable of completing the entire nursing curriculum and of earning a B.S.N. The nursing curriculum requires demonstrated proficiency in a variety of cognitive, problem-solving, manipulative, communicative, and interpersonal skills. Therefore, College of Nursing students must meet the following performance standards.

- Possess and use critical thinking skills sufficient for clinical judgment (e.g., identify cause-effect relationships in clinical situations, develop nursing care plans)
- Demonstrate interpersonal abilities sufficient for interaction with individuals, families, and groups from a variety of social, emotional, cultural, and intellectual backgrounds (e.g., establish rapport with patients, clients, colleagues)
- Possess and use communication skills sufficient for interacting with others (e.g., explain treatment procedures, initiate health teaching, observe patient/client responses, document and interpret nursing actions and patient/client responses)
- Administer cardiopulmonary procedures and other clinical procedures necessary for nursing care; calibrate and use equipment, position patients and clients
- Possess the tactile abilities (with or without an assistive device) sufficient for performing physical assessment (e.g., perform palpation functions of physical exam and those related to nursing interventions)

The examples above are not all-inclusive.

Applicants who may not meet these standards are encouraged to contact the College of Nursing associate dean for academic affairs for a personal interview.

Selection

The college’s admission committee recommends to the dean the applicants who appear to be best qualified. Fulfillment of minimum admission requirements does not guarantee admission to the College of Nursing. The committee may require personal interviews. A physical examination report and specific health screening requirements must be on file at the University of Iowa Student Health Service 10 days before the class opens for the first clinical nursing course.

Application Deadlines

Fall semester: April 1
Summer session (RN students only): January 15
Spring semester: October 1

Financial Aid

In addition to general assistance available to University students, there are assistance programs specifically for nursing students. Information about financial aid is available from the University’s Office of Student Financial Aid.

Postbaccalaureate Program

Master’s in Nursing and Health Care Practice

The Master’s in Nursing and Health Care Practice (M.N.H.P.) requires 61 s.h. The M.N.H.P. provides students with an education in the clinical skills and knowledge necessary for entry into the nursing profession; it is not an academic master’s degree with a research focus. Graduates of the program are prepared to join the nursing workforce in entry-level positions or to pursue the M.S.N. or a Ph.D. in nursing.

The M.N.H.P. program is a highly structured, full-time plan of study that is completed in four consecutive semesters, including summer. Students are strongly advised not to work while enrolled in the program.

The application deadline for the M.N.H.P. program is June 1.

Graduate Programs

The college offers the Master of Science in Nursing (M.S.N.) and a Doctor of Philosophy in nursing.

Master of Science in Nursing

The Master of Science in Nursing (M.S.N.) requires 33-52 s.h. of graduate credit, depending on the choice of concentration area. The program is designed to build on general and professional baccalaureate study. Graduation from an approved baccalaureate degree program is one of the admission requirements. Options are available for registered nurse applicants with a
non-accredited B.S.N., a non-nursing B.A. or B.S., or a B.S.N. from a foreign country.

The degree ordinarily requires four semesters of full-time study. Part-time study is available for some specializations. The M.B.A./M.S.N. and anesthesia nursing programs require a minimum of six semesters of full-time study.

The M.S.N. curriculum consists of a core component and areas of specialization enhanced by supporting course work in the College of Nursing or in related disciplines. Students may take two to three supporting courses related to their nursing specialization in the social, behavioral, or biological sciences or in business administration, law, or health management and policy.

Students must maintain a g.p.a. of at least 2.75 and must successfully complete a thesis, project, or portfolio.

The M.S.N. curriculum consists of the following components.

**ADVANCED NURSING CORE**

Core courses are taken by all students in the program. The core consists of 12 s.h. of course work, including leadership in nursing (3 s.h.), research application (3 s.h.), health policy and economics (3 s.h.), and nursing informatics in nursing and health care (3 s.h.).

**NURSING SPECIALIZATION**

Specialization allows students to build a specialized area of knowledge and practice that extends beyond the advanced nursing core. Students may pursue clinical specialization in adult and gerontological nursing, child health nursing, genetics nursing, community health nursing, occupational health nursing, psychiatric/mental health nursing, anesthesia nursing, pediatric nurse practitioner, adult/gerontology nurse practitioner, neonatal nurse practitioner, and family nurse practitioner. Nonclinical specializations include nursing administration, the M.B.A./M.S.N. joint degree program, the M.S.N./M.P.H. joint degree program, and informatics. Some areas of specialization require special acceptance procedures. Students with unique career goals have the option of modifying their plans of study under the direction of their academic advisors.

Students in the practitioner programs take an advanced clinical core that includes advanced physiology, pharmacology, health assessment, health promotion, and a professional role course. Students in other clinical options may be required to take one or more of these courses.

Some of the clinical core courses are open to other students. Students in a clinical or management specialization develop their knowledge and practice through course work and fieldwork.

**SUPPORTING COURSES**

Supporting course work varies with each specialization area. Supporting courses can be selected from varied academic departments at the University and should relate to the student’s interest and specialization area.

Some specialization areas require students to take some courses in other departments. For example, students in the community health nursing specialization must complete an upper-division or equivalent course in epidemiology and a management course; students in the management option select supporting courses from business, health management and policy, or allied study areas. Students select supporting course work in collaboration with their faculty advisors.

**THESIS/PROJECT/PORTFOLIO**

All M.S.N. students must take a final examination. Students satisfy this requirement by completing a thesis, project, or portfolio. Students, with their advisors, select the option that best serves their individual career objectives.

The master’s thesis is a systematic inquiry into a nursing problem. Methodologies may include historical research, case studies, analytical literature review, surveys, or experimental studies that meet the requirements of the University of Iowa Graduate College. Students earn a total of 5 s.h. for the thesis.

The master’s project is an in-depth synthesis and analysis of a chosen topic in nursing. The 15-to-20-page paper of publishable quality may not replicate previous course assignments. Students earn 2-3 s.h. for the project.

The master’s clinical portfolio is a written description of the clinical experiences that contributed to the development of the advanced practice role and a self-assessment of clinical competencies and areas for future growth. Students in the nurse practitioner, nurse anesthesia, and clinical specialty tracks are eligible to complete the clinical portfolio.

The master’s professional portfolio is a written description of practicum experiences and competencies. Students in the nonclinical tracks are eligible to complete the professional portfolio. Students earn no credit for the portfolio.
Admission

Applicants to the M.S.N. must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog. Applicants must have taken the Graduate Record Examination (GRE) General Test and must have a g.p.a. of at least 3.00.

In addition, the College of Nursing requires the following:

- a bachelor's degree with a major in nursing from an accredited program (options are available for registered nurse applicants with a non-accredited B.S.N., a non-nursing B.A. or B.S., or a B.S.N. from a foreign country);
- the legal requirements for the practice of nursing in Iowa;
- current written recommendations from three persons familiar with the applicant’s competence in the practice of nursing and potential for leadership and scholarship (forms required);
- current résumé, goal statement, and supplemental/information form;
- completion of an upper-division nursing research course in the undergraduate program; and
- successful completion of an upper-level statistics course (or equivalent) within five years of registering for 096:206 Nursing Science and Inquiry.

Students whose first language is not English must score at least 550 (paper-based), 213 (computer-based), or 81 (Internet-based) on the Test of English as a Foreign Language (TOEFL).

Applications for admission to the M.S.N. program are reviewed twice a year. For review, the applicant’s file must be complete, with all relevant materials submitted. Application deadlines are February 15 for fall admission and October 1 for spring admission. Students in the practitioner programs and the anesthesia program may begin those programs only in fall. Application deadline for the anesthesia program is October 1.

A criminal background check is conducted for all graduate students upon admission.

All Graduate College policies pertaining to academic standing, probation, and dismissal are applicable to graduate students in nursing. Transfer credit applicable to the master's degree program is limited and must be approved by the director of the graduate program in nursing and by the student’s advisor. Course work taken 10 years or more before the final examination must be updated, according to University policy.

Joint M.B.A./M.S.N.

The joint Master of Business Administration/ Master of Science in Nursing requires 61 s.h. The program is designed for students with previous clinical and administrative experience. Separate application to each program is required. For more information, contact the College of Nursing Graduate Programs Office.

Joint M.S.N./M.P.H.

The joint Master of Science in Nursing/Master of Public Health requires 60 s.h. The program is designed for students who want to pursue careers that include professional activities in nursing and public health. Separate application must be made to each program. Contact the College of Nursing Graduate Programs Office for more information.

Nursing Home Administrator Licensure

The nursing home administrator program offers students an efficient option for completing requirements for licensure examination while obtaining a M.S.N. Students may complete the requirements for licensure by supplementing study in adult and gerontology health nursing, adult/gerontology nurse practitioner, or nurse manager.

Doctor of Philosophy

The Doctor of Philosophy in nursing requires a minimum of 72 s.h. of graduate credit. The program prepares scientists to conduct research in nursing, extend their knowledge base relevant to nursing, and contribute to the body of knowledge in the discipline of nursing. Study requires expertise in clinical nursing and competence in research that relates to nursing practice and health care delivery.

B.S.N. students who intend to pursue a Ph.D. in nursing may be eligible to enter the doctoral program directly, once they have completed the B.S.N. Contact the College of Nursing Graduate Programs Office for more information.

Students choose from the curriculum’s five focal areas: nursing in aging, nursing administration,
nursing informatics, child and family nursing, and an individualized focus. Graduates of the program aspire to careers as researchers, college and university faculty members, consultants, and as leaders in the nursing profession, in health policy-making agencies, and in health care delivery systems.

**Degree Requirements**

All students must take the following courses.

096:340 Nursing Theory Construction I 3 s.h.
096:342 Qualitative Research 3 s.h.
096:344 Quantitative Research 3 s.h.
A graduate-level course in nursing/health informatics 3 s.h.
A graduate-level course in each of two of these areas: history of nursing, health economics, health policy 6 s.h.
Cognate minor courses 12 s.h.
Cognate research sequence: research methods and statistics 9 s.h.
096:490-096:491 Research Practicum 0 s.h.

B.S.N. graduates who enter the Ph.D. directly must take the following courses in addition to those listed above.

096:206 Nursing Science and Inquiry 3 s.h.
096:208 Leadership for Advanced Nursing Practice 3 s.h.

Two masters-level specialization courses, such as one of the following pairs:
096:219-096:220 Primary Care: Infants, Children, and Adolescents I-II 6 s.h.
096:260-096:261 Nursing Systems Administration I-II 6 s.h.
096:280 & 096:284 Primary Care: Adult and Older Individuals I-II 6 s.h.

In addition, all Ph.D. students must take the seminars and practicums appropriate for their focus area.

**Aging Focus**

096:410 Nursing Research of Biological Phenomena and Interventions for the Elderly 3 s.h.
096:420 Geriatric Mental Health Research 3 s.h.
096:430 Nursing Research in Sociocultural Phenomena and Interventions for the Elderly 3 s.h.
096:440 Research Utilization Residency in Care of the Elderly 3 s.h.

**Nursing Administration Focus**

096:450 Research Seminar in Nursing Administration I: Organizational Systems Concepts 3 s.h.
096:451 Research Seminar in Nursing Administration II: Health Care System Concepts 3 s.h.
096:460 Innovations in Nursing Management 3 s.h.
096:480 Residency in Nursing Service Administration 3 s.h.

**Nursing Informatics Focus**

096:462 Research in Nursing Informatics I 3 s.h.
096:465 Residency in Nursing Informatics 3 s.h.

Two of these:
06K:234 Information and Knowledge Management 3 s.h.
06K:272 Database Analysis and Design 3 s.h.
06K:275 Knowledge Discovery 3 s.h.
096:309 Data Mining and Machine Learning 3 s.h.
096:310 Advanced Nursing Informatics 3 s.h.
096:313 Computational Intelligence 3 s.h.
096:463 Research in Nursing Informatics II 3 s.h.
096:464 Nursing and Health Representation and Knowledge Building 3 s.h.
096:470 Methods and Issues in Nursing Interventions Effectiveness Research 3 s.h.
An approved CIC doctoral-level course

**Child and Family Nursing Focus**

096:405 Family Nursing Research 3 s.h.
096:445 Research Residency in Child and Family Nursing 3 s.h.

Two of these:
096:415 Genetic Nursing Research 3 s.h.
096:425 Research in Sociocultural Perspectives for Family and Women’s Health 3 s.h.
096:435 Research in Cognitive and Behavioral Interventions for Children 3 s.h.

**COMPREHENSIVE EXAM, DISSERTATION**

All Ph.D. students must complete a written comprehensive examination. They earn 12 s.h. for work on the dissertation by completing 096:497 Dissertation Research Seminar I: Scholarship Development (1 s.h.), 096:498 Dissertation Research Seminar II (0 s.h.), and 096:499 Dissertation Research (11 s.h.), which includes a dissertation prospectus, the dissertation, and an oral defense.
Admission

All applicants to the Ph.D. program must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog. Applicants must have taken the Graduate Record Examination (GRE) General Test, preferably within the preceding five years. They must have completed an accredited basic nursing program and must hold a current license to practice nursing (special license for international students). Applicants must submit:

- a two-to-three-page statement describing their educational objectives and identifying a focal area for their doctoral study;
- three recommendations from nursing professionals that speak to the applicant’s potential as a scholar;
- a current résumé or curriculum vitae; and
- a complete transcript of all college programs and courses.

Applicants who hold a master’s degree must have a g.p.a. of at least 3.00. They must have successfully completed at least one graduate-level course in research and inferential statistics (3 s.h.) and at least one graduate-level course in information systems/informatics (3 s.h.).

B.S.N. graduates who apply directly to the Ph.D. program must have a grade-point average of at least 3.00 and must have successfully completed an upper-division course in statistics. They also must submit a strong statement of their research focus and career goals.

Applicants whose first language is not English must score at least 550 (paper-based), 213 (computer-based), or 81 (Internet-based) on the Test of English as a Foreign Language (TOEFL).

Nursing Service Administration Certificate

The Certificate in Nursing Service Administration provides ongoing education for nurses who have a bachelor’s degree but do not wish to pursue the M.S.N. Students in the 15 s.h. certificate program must hold a B.S.N. and have an RN license.

Advanced Practice Nursing Certificate

The post-master’s degree Certificate in Advanced Practice Nursing allows for advanced clinical training in four specialty tracks: pediatric nurse practitioner, adult/gerontology nurse practitioner, family nurse practitioner, and psychiatric/mental health nursing. Certificate requirements include advanced clinical core courses and a sequence of specialty courses. Students formulate a plan of study with the advice and counsel of their advisor and/or the director of the master’s program. Successful completion of the specialty sequence qualifies a student to sit for professional certification examinations. Completion of the certificate program is noted on the student’s transcript.

Nursing Informatics Certificate

The Certificate in Nursing Informatics is a program for graduate students. Course work for the certificate focuses on methods and technologies of information handling and knowledge building in nursing. Certificate students must earn 20 s.h. in courses that cover the development, support, and evaluation of applications, tools, processes, and structures used to manage data for patient care and administrative support.

Health Informatics Certificate

The Certificate in Health Informatics is a program for graduate students. Certificate students must earn 20 s.h. in courses numbered 100 or above, including two required core courses.

Health Informatics I (096:283, 3 s.h.) is an interdisciplinary course intended primarily for graduate students, faculty, and health care clinicians. It explores decision-making processes and technological tools to support health care administration, management, and practice.

Health Informatics II (096:289, 3 s.h.) is an interdisciplinary course focused on field projects related to one or more health informatics topics under the direction of established researchers/educators. It includes a seminar. Students select electives (9-14 s.h.) from outside their major program of study. For example, a student working toward a nursing degree and the Certificate in Health Informatics can use only non-nursing electives for the certificate. Students choose electives with the guidance of their academic and certificate advisors.

Students who earn credit for a thesis, project, or independent study in their major program of study may apply the credit to the Certificate in Health Informatics if the certificate advisor determines that the subject matter is pertinent.
Professional Improvement

Registered nurses who wish to take University of Iowa course work to fulfill professional or personal improvement objectives may request admission in the professional improvement (PI) category. This admission status allows students to take some graduate courses at the University without committing to a degree objective.

Admission as a nursing professional improvement student requires a formal application, including submission of three current written recommendations and all academic transcripts. GRE General Test scores, required by the University, must be submitted before the end of first semester registration. Deadlines are July 15 for fall semester admission, December 1 for spring semester admission, and May 1 for summer session admission.

Since acceptance as a PI student does not influence acceptance to the M.S.N. or Ph.D. programs, PI students interested in master’s or doctoral study in nursing must follow the application procedures for those programs (see the appropriate sections, above). Only 6 s.h. or two required nursing core courses taken under professional improvement status may be used to fulfill M.S.N. requirements. Professional improvement students may not enroll in Ph.D. courses.

Student Organizations

All College of Nursing undergraduate students are members of the National Student Nurses’ Association and its local chapter, the Iowa Association of Nursing Students. The University of Iowa Association of Nursing Students (UIANS), which provides opportunities for professional growth and development in nursing. UIANS representatives are members of the University of Iowa Student Government (UISG), and there is a UIANS representative on the Academic Council of the College of Nursing.

The University of Iowa Minority Student Nursing Association (UIMNSA) provides opportunities for professional growth and development for students from populations underrepresented in nursing. UIMNSA board members are members of the University of Iowa Student Government.

The college’s Association of Graduate Nursing Students (AGNS) provides opportunities for professional growth sharing of research, and representation on varied college and University committees.

Continuing Education

The college offers nonacademic, short-term continuing education programs for registered nurses. Continuing Education Units (CEUs) are awarded for each program on the basis of one unit per 10 clock hours of instruction. The College of Nursing is approved by the Iowa Board of Nursing as an approved provider, number 1, and is accredited by the American Nurses Association Board of Accreditation and the National Association of Pediatric Nurse Associates and Practitioners.

Facilities

The Nursing Building is centrally located on the University’s main campus, in close proximity to the Carver College of Medicine, the College of Dentistry, the College of Pharmacy, the College of Public Health, University of Iowa Hospitals and Clinics, Bowen Science Building, and the Hardin Library for the Health Sciences.

Completed in 1971, the building consists of five floors with varied and specialized facilities. Administrative offices are located on the first floor. Faculty offices are located on every floor except the second, which is used entirely for classrooms and laboratories.

Learning Resource Services, located on the ground level, includes a technology laboratory. There are classrooms throughout the building; conference rooms, student lounges, and meeting rooms are located conveniently. Research and computer facilities provide direct access to the University’s computing facilities and to college-owned microcomputers.

Courses

Primarily for Undergraduates

096:030 Human Development and Behavior 3 s.h. Normal developmental transitions experienced by individuals and family systems throughout the lifespan, including physical, cognitive, and social-emotional development. Prerequisite: 031:001. Same as 153:030.

096:031 Adult Development and Aging 1 s.h.

096:050 Perspectives on Health Care Systems 3 s.h. Health care systems, delivery modes, resources, economics, contemporary problems and policies that influence health care; emphasis on the context of health care delivery. Prerequisite: facility with e-mail and World Wide Web.

096:051 Art and Science of Nursing 3 s.h. Integrated view of theories from nursing, the arts, the sciences; historic, holistic, and global perspectives on creative and scientific processes and concepts that underlie and guide nursing practice.

</table>
096:155 Psychiatric/Mental Health Nursing 3 s.h.
General principles and practices of psychiatric/mental health nursing; psychiatric disorders, populations at risk, continuity of care, problems in daily living. Prerequisite: 096:135. Pre- or corequisite: 096:124.

096:156 Psychiatric/Mental Health Nursing Practicum 3 s.h.
Nursing process used to deliver nursing care to individuals and families with mental illness in a variety of clinical settings; focus on promotion, maintenance, restoration of the mental health of individuals and families. Prerequisites: 096:135 and 096:136. Pre-or corequisites: 096:124 and 096:155.

096:157 Nursing Leadership and Care Management 3 s.h.
Analysis of nursing leadership, care management, and models of care in the context of society and the interdisciplinary health care system. Prerequisite: senior standing in nursing or consent of instructor.

096:158 Clinical Nursing Internship 5 s.h.
Independent internship in one of a variety of health care settings to promote role transition, lifelong learning; emphasis on integration and application of knowledge and skills to design, provide, manage, and coordinate care. Prerequisite: senior standing in nursing.

096:159 Contemporary Nursing Practice Issues 3 s.h.
Identification, exploration, analyses of selected issues in nursing and health care; impact of significant historical, social, political, genetic, legal, and ethical factors on development of the nursing discipline. Prerequisite: senior standing in nursing or consent of instructor.

096:160 Nonprofit Organizational Effectiveness I 3 s.h.
Same as 060:147, 024:147, 025:176, 032:127, 042:157, 049:175.

096:161 Nonprofit Organizational Effectiveness II 3 s.h.

096:171 Nursing and Society 1 s.h.
Introduction to professional nursing; history, knowledge development, roles, and health professional relationships of nursing; nursing’s unique contribution to meeting societal needs through theory, research, and practice. Prerequisite: admission to M.N.H.P. program.

096:172 Clinical Inquiry 4 s.h.
Clinical reasoning and outcomes, information systems and management, evidence-based practice, scholarship and scientific writing; development of skill using the research process to define clinical research problems. Prerequisites: 225:101 or 225:102 or equivalent, and admission to M.N.H.P. program.

096:174 Clinical Reasoning 4 s.h.
Skills to help nontraditional nursing students synthesize, expand, and refine nursing concepts and clinical reasoning competencies; development and application of cognitive and psychomotor skills necessary for performing systematic, holistic, and culturally competent health assessment. Prerequisites: 096:114 or 096:115 or equivalent, 096:177, and admission to M.N.H.P. program.

096:177 Therapeutic Nursing Interventions I 4 s.h.
Physiological and behavioral concepts, nursing diagnoses, interventions, and outcomes across settings and populations; nursing classifications; experience in the laboratory. Prerequisites: 096:114 or 096:115 or equivalent, 096:176, and admission to M.N.H.P. program.

096:178 Therapeutic Nursing Interventions II 4 s.h.

096:180 Intensive Practicum I 4 s.h.

096:183 Intensive Practicum II 4 s.h.
Experience in varied acute and community-based settings; opportunity to apply principles to the care of diverse populations, consistent with the four specialty theory courses; proficiency with advanced care management interventions and technologies. Prerequisites: 096:180 and admission to M.N.H.P. program. Corequisites: 096:139, 096:141, 096:153, and 096:155.

096:184 Hairitage: African American Women’s Hair Culture 2-3 s.h.
Hair and its centrality to the experience of women of African descent; emotional, political, economical, and historical significance; political, legal, and educational implications; connections to ideas of aesthetics, race relations, family dynamics, consumerism, and so forth.

096:185 Internship in Care Management 14 s.h.
Intensive clinical experience in nursing care management with nurse preceptors, with focus on complex, collaborative nursing care management of diverse populations; enhancement of care management skills as a foundation for optimal clinical outcomes. Prerequisites: 096:139, 096:141, 096:153, 096:183, and admission to M.N.H.P. program.

096:186 Cultural Expeditions in Nursing 3 s.h.
Multicultural awareness, recognition of specific health care beliefs and values; online course originating at University of Missouri-Columbia. Prerequisite: 096:135 or consent of instructor.

096:187 Legal Issues for Health Care Providers 3 s.h.
Legal issues faced by health care providers, counselors, and social services providers; administrative and regulatory requirements, civil lawsuits, issues that affect students as providers, advocates, and individuals.

096:188 Clinical Leadership I 2 s.h.
Nursing leadership, care management, and models of care in contexts of society and interdisciplinary health care; resource allocation and utilization, and delivery of care; clinical outcome improvement for populations and individuals. Prerequisites: 096:176 and 096:177.

096:189 Clinical Leadership II 2 s.h.
Builds on the content in 096:188; application of leadership and management concepts and skills in a changing, interdisciplinary health care system; concepts for human resource management and quality care outcomes for individuals and populations; personal professional roles, transition to leadership roles, support from professional organizations. Prerequisite: 096:188.

096:190 Dimensions of Professional Nursing 3 s.h.
The nursing discipline; identification, exploration, analysis of contemporary issues and trends in nursing; professional roles and responsibilities; the health care environment; importance of nursing science, theory, and research to nursing practice. Prerequisites: computer literacy and RN/B.S.N. standing, or consent of instructor.

096:191 Health Assessment 4 s.h.
Health assessment of adults; experience demonstrating assessment skills; compiling a health history, conducting a physical exam, and developing nursing diagnoses for clients. Prerequisite: RN/B.S.N. standing or consent of instructor.

096:192 Community Health Nursing 3 s.h.
Nursing’s role in the relationship between community conditions and public health; principles of public health, nursing knowledge, skills used to address primary, secondary, tertiary disease prevention needs. Prerequisites: 096:190, 096:191, and nursing major or consent of instructor.
096:193 Community Health Nursing Practicum 1, 3 s.h.
Experience applying principles of public health and nursing skills and knowledge to primary, secondary, and tertiary disease prevention problems of individuals, families, and groups. Prerequisites: 096:190 and 096:191, or consent of instructor; and RN licensure in state of practicum. Pre- or corequisite: 096:192.

096:194 Leadership and Care Management in Professional Nursing Practice 3 s.h.
Nursing leadership and management in a dynamic practice environment; focus on context in which nurses practice, leadership and management principles in changing health care system. Prerequisites: 096:192, 096:193, and 096:197; or consent of instructor.

096:195 Practicum for Leadership and Care Management in Professional Nursing 3 s.h.
Experience applying concepts of leadership, management, and evidence-based practice in a variety of settings; development of individualized plan of study for the experience. Prerequisites: 096:192, 096:193, and 096:197, or consent of instructor; and RN licensure in state of practicum. Pre- or corequisite: 096:194.

096:196 Special Studies in Nursing 3 s.h.
Identification, exploration, and analysis of contemporary issues that confront the professional nurse; the practice of nursing, regulation of health care systems, available resources. Prerequisite: 096:192 or consent of instructor.

096:197 Research for Practicing Nurses 3 s.h.
Research process, its application to nursing practice for RN students; conceptual basis, methodology, data collection, data analysis, presentation and utilization of research. Prerequisites: 096:190 or consent of instructor, and an approved statistics course.

096:198 Rural Clinical Leadership Practicum 3 s.h.
Nursing leadership preparation; observation of health professional role models, hands-on interdisciplinary experience in a rural Iowa hospital system; complex leadership roles, unique health care needs and opportunities in rural leadership and health care; contact with a faculty mentor by telephone and e-mail; clinical course. Prerequisites: 096:050, 096:051, and 096:130.

096:199 Intensive Practicum III 4 s.h.
Intensive clinical experience in nursing care management in collaboration with nurse preceptors; complex, collaborative nursing care management of diverse populations; enhancement of care management skills as a basic foundation for achieving optimal clinical outcomes; experience in application of evidence-based practice, clinical decision making, delegation and supervision, fiscal accounting, focus on interdisciplinary collaboration within complex organizational systems. Prerequisites: 096:139, 096:141, 096:153, 096:155, and 096:183.

096:200 Capstone Residency: Clinical Nurse Leader 4 s.h.
Capstone clinical practicum; immersion in role and practice expectations of the clinical nurse leader; mentoring by experienced clinical nurse leader(s) expert in providing and supervising care at the point of care; achieving optimal clinical outcomes by focusing on clinical leadership skills; application of evidence-based practice, collection and evaluation of client outcomes, assessment of cohort risk, interdisciplinary collaboration, client advocacy, client and staff education, direct provision of care in complex situations, application of cost-efficient care principles. Prerequisite: 096:190 or consent of instructor. Pre- or corequisite: 096:188.

Primarily for Graduate Students

096:205 Clinical Practicum: Health of Children in Schools 3 s.h.
Delivery of health care in school settings; educational, legal, cultural, ethical issues in school nursing practice; developmental issues and their relationship to risk factors and the school population's health; application of nursing interventions, evaluation of nursing and educational outcomes; clinical practicum with children in a school setting; seminar, 90 clock hours in clinical practicum. Prerequisite: M.S.N. enrollment with school health focus.

096:206 Nursing Science and Inquiry 3 s.h.
Research design and analysis for examining, applying, and using nursing science. Prerequisites: 096:143 or equivalent, and an advanced statistics course within past five years.

096:208 Leadership for Advanced Nursing Practice 3 s.h.
Roles and behaviors for leading others and influencing health care delivery.

096:209 Health Systems/Economics/Policy 3 s.h.
Global, economic, organizational, political, and technological contexts for advanced nursing practice.

096:210 Healthcare Financial Management 3 s.h.
Overview of health care finance and finance management; finance principles used by health services organizations.

096:211 Research for Evidence-Based Practice I 3 s.h.
Opportunity for clinicians to develop proficiency in use of research- and evidence-based practice; essentials of the research process, qualitative and quantitative research, components of evidence-based practice; acquisition of knowledge and skills necessary for research (knowledge) utilization initiatives and application of evidence-based practice principles in clinical settings; identification of appropriate research questions, synthesis of knowledge base for evidence-based practice, revision of clinical practice guidelines, and evaluation of research utilization and evidence-based practice initiatives. Prerequisite: successful completion of two posttests for 096:143.

096:212 Research for Evidence-Based Practice II 3 s.h.
Innovation models applied to nursing practice; implementation and evaluation research applied to planning, initiating, and monitoring best-care practices; factors that impede or facilitate evidence-based practice changes within and across health care systems; strategies for successful implementation of evidence-based practice change in organizations; students participate in evidence-based implementation process. Prerequisite: Doctor of Nursing Practice enrollment or 096:211 or consent of instructor.

096:213 Physiology for Advanced Clinical Practice 3 s.h.
Regulation of cellular, organ, and system function; regulation of internal milieu; functional interrelationships among body systems; cellular and body-wide mechanisms of self-defense; illustrative examples of pathological phenomena. Prerequisites: anatomy, physiology, microbiology, and pathophysiology courses, or equivalents, or consent of instructor.

096:214 Advanced Health Assessment for Clinical Practice 3 s.h.
Knowledge and skills necessary for advanced health assessment of individuals and families across the life span. Prerequisite: graduate standing in nursing or consent of instructor.
096:219 Primary Care: Infants, Children, and Adolescents I 2-3 s.h.

096:220 Primary Care: Infants, Children, and Adolescents II 3 s.h.
Enhancement of clinical knowledge and skills for infant, child, adolescent care; development and refinement of knowledge and skills in primary health care delivery. Prerequisite: 096:219 or 096:280. Same as 070:201.

096:221 Primary Care: Pediatric Nurse Practitioner III Intensive Practicum 3 s.h.
In-depth practicum synthesizing clinical management and role enactment; opportunity for discussion and analysis of practice and role issues. Prerequisites: 096:220 and 096:285.

096:222 Health Promotion and Intervention for Primary Care 3 s.h.
Theories of health promotion in primary care, levels of prevention, epidemiological principles and methods; specific interventions designed to maintain, promote, optimize health across the lifespan.

096:223 Clinical Applications for Health Assessment and Health Promotion 1-3 s.h.
Advanced health assessment and promotion skills applied to planning, implementing, and evaluating interventions designed to maintain, promote, and optimize health across the lifespan. Prerequisite: graduate standing in nursing or consent of instructor. Pre- or corequisites: 096:214 and 096:222.

096:224 Pharmacotherapeutics for Advanced Clinical Practice 4 s.h.
Pharmacologic, pharmacokinetic, and pharmacodynamic principles essential for advanced clinical practice; classes of drugs frequently used in management of common clinical conditions; legal considerations in prescriptive authority. Prerequisite: 096:213 or consent of instructor.

096:225 Biopsychosocial Dimensions of Healthy Aging 3 s.h.
Biopsychosocial dimensions of healthy aging in individuals; healthy aging, including behavior and normal age-related physiological changes, psychosocial and cultural implications of aging; expansion of gerontological nursing based on integration of theory, research, standardized nursing languages.

096:228 Advanced Practice Genetic Nursing I 3 s.h.

096:229 Advanced Practice Genetic Nursing Practicum I 2 s.h.
Integration and application of advanced practice in genetic nursing assessment and counseling skills with individuals and families. Corequisite: 096:228 or consent of instructor.

096:230 Advanced Practice Genetic Nursing II 3 s.h.
Genetic conditions that present in adult years; gene detection, ethical and social aspects of genetic health care delivery, professional issues in the delivery of genetic care. Prerequisites: 096:228 and 096:229. Corequisites: 07C:178 and 096:231.

096:231 Advanced Practice Genetic Nursing Practicum II 2 s.h.
Application of advanced practice in genetic nursing; emphasis on conditions that present in the adult years and the nurse’s role in an interdisciplinary genetic delivery system. Prerequisite: 096:229. Corequisite: 096:230.

096:232 Professional Aspects of Clinical Nursing Practice 3 s.h.
Advanced nursing role competencies and related settings in which advanced nursing practice occurs; history and development, core competencies, advanced practice roles, practice management issues. Prerequisite: 096:218.

096:234 Advanced Community Health Assessment 3 s.h.
Health of communities, process of assessment; emphasis on conceptual models from public health that focus on select populations, community assessment. Prerequisite: epidemiology course.

096:235 Advanced Community Health Nursing Practicum I 2 s.h.
Integration and application of advanced community health assessment knowledge, skills; nurse’s role in population-focused practice. Prerequisites: epidemiology course and M.S.N. enrollment. Corequisite: 096:234.

096:236 Advanced Community Health Intervention and Evaluation 3 s.h.
Development, implementation, evaluation of health promotion and disease prevention strategies for select populations, communities. Prerequisite: 096:234.

096:237 Advanced Community Health Nursing Practicum II 2 s.h.
Integration and application of knowledge and skills for advanced community health intervention, outcome evaluation. Offered spring semesters of odd years. Prerequisite: M.S.N. enrollment. Pre- or corequisite: 096:236.

096:238 Intensive Practicum in Advanced Community Health 3 s.h.
Synthesis of advanced public health theory, nursing knowledge; in-depth experience synthesizing clinical management, role enactment. Offered summer sessions of odd years. Prerequisites: 096:235 and 096:237.

096:241 The Care of the Frail Elderly 3 s.h.
Clinical management of the elderly; emphasis on economic considerations, principles of gerontological care, common syndromes, ethical issues; clinical application experience in a long-term care setting. Prerequisites: 096:214, 096:222, and 096:224. Same as 153:241.

096:242 Primary Care: Adult/GNP Clinical Practice I 3 s.h.
Clinical management of the pathological alterations presented in 096:280; development of comprehensive assessment and clinical management skills in the context of community services and resources.

096:243 Primary Care: Adult/GNP Clinical Practice II 3 s.h.
Continuation of 096:242, which is prerequisite; clinical management of the pathological alterations presented in 096:284; comprehensive assessment and clinical management skills. Corequisite: 096:284.

096:244 Primary Care: Adult/Gerontological Nurse Practitioner III Intensive Practicum 3 s.h.
Transition from student to advanced adult/gerontological nurse practitioner; in-depth primary care experience synthesizing aspects of clinical management and role enactment. Prerequisite: 096:243.

096:246 Nursing Education: Process, Roles, and Strategies 3 s.h.
Role of nurse educator through study, application of teaching/learning theories; learning tasks of students in nursing education programs. Pre- or corequisite: 096:208 or consent of instructor.
096:247 Curriculum Development in Nursing Education 3 s.h.
Societal, educational, professional factors in undergraduate curriculum design; evaluation of components in basic nursing education programs. Prerequisite: 096:246.

096:250 Psychiatric/Mental Health Nursing Theory I 3 s.h.
Basic psychological principles, theories related to mental health and intersections between physical and mental health; psychological theory viewed through framework of lifespan development, infancy through adulthood.

096:251 Psychiatric/Mental Health Nursing Theory II 3 s.h.
Advanced psychiatric nursing practice with selected populations; definition and expansion of practice based on the integration of theory, standardized languages, research, self-evaluation. Prerequisite: 096:250 or consent of instructor.

096:252 Psychiatric/Mental Health Nursing Practice with Individuals 3 s.h.
Therapeutic models that guide clinical practice with individuals; major psychological and biological theories applied to nursing process with individuals in a variety of settings. Prerequisites: 096:224, 096:251, and admission to psychiatric/mental health nursing program.

096:253 Psychiatric/Mental Health Nursing Practice with Families 3 s.h.
Experience using family therapy as a treatment modality; relevance of family intervention models for meeting mental health needs of families. Prerequisites: 096:251 and admission to psychiatric/mental health nursing program.

096:254 Psychiatric/Mental Health Nursing Practice with Groups 3 s.h.
Experience using group process as a treatment modality; relevance of group intervention models for meeting mental health needs of clients across the life span. Prerequisites: 096:251 and admission to psychiatric/mental health nursing program.

096:255 Psychiatric/Mental Health Care Management 3 s.h.
Direct and indirect care responsibilities, including clinical supervision, evaluation of treatment environments, program development, interdisciplinary collaboration; development of goals for future professional development and contributions to nursing. Prerequisites: 096:251 and 096:252.

096:256 Occupational Health Nursing I 3 s.h.
Framework for occupational health nursing practice and evolving role of the occupational health nurse; focus on health in the workplace. Prerequisite: 175:230 or consent of instructor. Corequisite: 096:257.

096:257 Occupational Health Practicum I 3 s.h.

096:258 Occupational Health Nursing II 3 s.h.

096:259 Occupational Health Practicum II 3 s.h.
Transition from student role to clinical specialist role in occupational health nursing; in-depth experience in student’s interest area. Corequisite: 096:258.

096:260 Nursing Systems Administration I 1-4 s.h.
Leadership concepts and theories, and their application to the nurse administrator’s unique roles in community and institutional health care organizations; environmental, technological, and professional influences on structure and functions of health care and nursing service organizations and on the nurse administrator’s role; course modules on leading patient care delivery, health care systems, and strategic management; practicum component for nurse administrator students. Prerequisite: 096:208 or consent of instructor.

096:261 Nursing Systems Administration II 1-5 s.h.
Concepts and theories regarding administration of financial, material, and human resources and quality of service, related to selected functions of the nurse administrator; course modules on financial management, human resources management, and outcomes and safety management; financial, human resources, and outcomes management in context of institutional settings (hospitals, nursing homes) or community and ambulatory care settings; influence of economic and social forces on administration of resources, personnel, and quality of service; research in nursing, business, and behavioral science related to administrative functions; practicum component for nurse administrator students. Prerequisite: 096:208 or 096:260 or consent of instructor.

096:263 Informatics in Nursing and Health Care 3 s.h.
Foundation of information management and processing principles that support data, information, and knowledge in provision and delivery of nursing and health care. Prerequisites: competence in computer use and nursing major, or consent of instructor.

096:264 Nursing and Health Informatics in the International Context 2, 4 s.h.
Informatics dimensions of health care systems within a specific historical, cultural, legal, ethical, and political national context; focus on unique services of nursing, necessary information infrastructure. Prerequisite: graduate informatics course.

096:266 Advanced Case Management: Interdisciplinary Approach 3 s.h.
Theory, evidence, and strategies for health care coordination and integration examined through analysis of case management and disease management interventions; interdisciplinary approach; leadership for interdisciplinary teamwork; analysis and critique of case and disease management theory and models; synthesis of case and disease management principles as a framework for managing health care outcomes for cost and quality, identification of evidence-based clinical care guidelines; analysis of financial, legal, ethical, and outcomes management components of case and disease management practice. Same as 174:266.

096:269 Human Physiology, Pathology, and Assessment for Advanced Practice Nursing 3 s.h.
Detailed study of normal and abnormal human physiology, including mechanisms that govern and support cell, organ, and system function; builds on basic sciences required for undergraduate nursing curriculum and on clinical skills from experience in intensive care setting. Prerequisite: admission to anesthesia nursing program or consent of instructor.

096:270 Human Anatomy, Physiology, Pathophysiology, and Assessment for Advanced Practice Nursing 3, 6 s.h.
Interrelationships between anatomic structure and physiological function in health and disease; clinical assessment of functional integrity of organ systems; implications of pathophysiology for anesthesia. Prerequisite: admission to anesthesia nursing program or consent of instructor. Same as 060:270.

096:271 Chemical and Physical Principles of Anesthesia Practice 3 s.h.
Chemistry and physics, as applied to anesthesia. Prerequisite: admission to anesthesia nursing program or consent of instructor. Same as 116:271.
096:222 Pharmacology of Anesthesia Practice I 3 s.h.
Mechanism and action of drugs; focus on pharmacotherapeutic principles, including pharmacokinetics, pharmacodynamics, receptor binding, cell signaling; principles of uptake, distribution, elimination of anesthetic and adjunctive agents. Prerequisites: grade of 2.67 or higher in 096:271 and admission to anesthesia nursing program, or consent of instructor. Same as 116:272.

096:273 Pharmacology of Anesthesia Practice II 2 s.h.
Continuation of 096:272; vascular, hepatic, renal, GI, endocrine aspects; cellular mechanics, electrolytes alterations. Prerequisites: grade of 2.67 or higher in 096:272 and admission to anesthesia nursing program, or consent of instructor. Same as 116:273.

096:274 Basic Principles of Anesthesia Practice 5 s.h.
Overview of anesthesia as a nursing specialty; patient assessment, anesthetic planning and management, pertinent regulations; principles of general and regional anesthesia for surgical specialties. Prerequisite: grade of 2.67 or higher in 096:272, or concurrent enrollment in 096:273, or consent of instructor. Same as 116:274.

096:275 Advanced Principles of Anesthesia Practice I 2 s.h.
Special needs and intraoperative management of obstetric, pediatric, and neurological patients; emphasis on pathophysiology, monitoring, ancillary requirements. Prerequisites: grade of 2.67 or higher in 096:273 and 096:274, or consent of instructor. Same as 116:275.

096:276 Advanced Principles of Anesthesia Practice II 2 s.h.
Special needs and intraoperative management of patients in cardiac, vascular, thoracic, and other surgical specialties; focus on altered pathophysiology, anesthetic requirements; strategies for special surgical situations. Prerequisites: grade of 2.67 or higher in 096:273 and 096:274, or consent of instructor. Same as 116:276.

096:277 Advanced Principles of Anesthesia Practice III 1 s.h.
Acute and chronic pain management; anesthetic problems with concurrent multisystem disease, advanced age, altered physical and/or mental status. Prerequisites: grade of 2.67 or higher in 096:273 and 096:274, or consent of instructor. Same as 116:277.

096:278 Professional Aspects of Anesthesia Nursing Practice 2 s.h.
Issues in contemporary anesthesia nursing practice: historical development; ethical, legal, and political aspects; evaluation; quality management; responsibilities; career expectations and development; role of professional organization. Prerequisite: anesthesia nursing program enrollment. Same as 116:278.

096:279 Equipment and Technological Principles of Anesthesia Practice 3 s.h.
Anesthesia delivery systems, ancillary equipment, monitoring devices; correlation of applicable chemical and physical principles for use, sale operation, care, and cleaning of anesthesia-related equipment. Prerequisites: 116:271 and anesthesia nursing program enrollment. Same as 116:279.

096:280 Primary Care: Adults and Older Individuals I 3 s.h.
Pathophysiologic alterations and clinical management of associated health care problems in adults, the elderly. Prerequisites: 096:213, 096:214, 096:222, and 096:224.

096:281 Primary Care: PNP Clinical Applications I 3 s.h.
Integration of advanced assessment skills, health promotion, and knowledge of pathophysiologic alterations in development and application of advanced practice competencies, including clinical decision making and critical thinking for care of infants, children, adolescents. Prerequisite: 096:223. Corequisite: 096:219.

096:282 Primary Care: Family Nurse Practitioner Clinical Applications I 3 s.h.
Integration of advanced assessment skills, health promotion, knowledge of pathophysiologic alterations to develop and apply advanced practice competencies, including clinical decision making, critical thinking. Prerequisite: 096:223. Corequisite: 096:280.

096:283 Health Informatics I 3 s.h.

096:284 Primary Care: Adults and Older Individuals II 3 s.h.
Continuation of 096:280. Prerequisite: 096:280.

096:285 Primary Care: PNP Clinical Applications II 3 s.h.
Continuation of 096:281. Prerequisite: 096:220.

096:286 Primary Care: Family Nurse Practitioner Clinical Applications II 3 s.h.

096:287 Pharmacology of Anesthesia Practice III 2 s.h.
Drugs specific to various specialty areas: tocolytics, vasoactive and cardiotoxic agents, drugs that alter clothing, chronic pain therapy agents. Prerequisites: grade of 2.67 or higher in 096:273 or consent of instructor, and anesthesia nursing program enrollment. Same as 116:287.

096:288 Primary Care: FNP Intensive Practicum 4 s.h.
In-depth practicum experience synthesizing clinical management and role enactment; seminar on practice and role issues. Prerequisite: 096:286.

096:289 Health Informatics II 3 s.h.
Selected health informatics initiatives, including computer-based patient records, physiologic monitoring, networking, imaging, virtual reality; participation in an interdisciplinary project team focused on an informatics innovation; application and research seminars. Same as 021:280, 051:189, 056:287, 074:192.

096:290 Introductory Clinical Anesthesia 1 s.h.
Initial anesthesia preceptorship; development of basic clinical skills for work as a nurse anesthetist. Prerequisites: basic science core courses and anesthesia nursing program enrollment. Same as 116:290.

096:291 Clinical Anesthesia I 1 s.h.
Supervised anesthesia clinical experience for general, orthopedic, gynecologic, pediatric, urologic, dental, EENT, ambulatory surgery, or invasive diagnostic procedures. Prerequisites: 096:290 and anesthesia nursing program enrollment. Same as 116:291.

096:292 Clinical Anesthesia II 1 s.h.
Clinical anesthesia experience under faculty supervision at University Hospitals and Clinics, in surgical subspecialty rotations not completed in 096:291. Prerequisites: 096:291 and anesthesia nursing program enrollment. Same as 116:292.

096:293 Advanced Clinical Anesthesia 1 s.h.
Clinical anesthesia experiences in neurologic surgery, cardiovascular/thoracic surgery; experience providing anesthesia for patients with complex pathophysiology in varied surgical settings. Prerequisites: anesthesia nursing concentration courses, anesthesia nursing program senior standing, and g.p.a. of 2.67 or higher. Same as 116:293.

096:294 Obstetrical Anesthesia 1 s.h.
Experience providing anesthesia for the parturient, initial neonatal care; two one-month rotations off campus. Prerequisite: anesthesia nursing program enrollment. Same as 116:294.
interprofessional collaborative skills and team building. Builds on 096:304; continued development of in-depth clinical knowledge and skills in student’s interest area; advanced levels of interprofessional collaborative skills and team building. Prerequisite: 096:303. Corequisite: 096:307.

096:304 DNP: Advanced Role Development Practicum I 3 s.h.
Opportunities to apply advanced leadership and clinical knowledge in health care systems; application of content from 096:303; identification of needs and/or interests to define student’s clinical practice; experience in selected clinical or agency sites to increase competencies in areas such as clinical acumen, case management, leadership, business practices. Prerequisite: admission to Doctor of Nursing Practice program. Corequisite: 096:304.

096:305 Emerging Science 3 s.h.
Acquisition of emerging scientific knowledge in health care and application to individuals, families, populations; integration of epidemiologic approaches, genomic factors, and socio-cultural influences in processes of conducting risk assessment, intervention implementation, and health care delivery evaluation; importance of research and statistical methods in establishing risk profiles; studies of clinical, community, vulnerable, and marginalized populations as essential for developing and implementing individualized health care plans for populations, family units, and individuals. Prerequisite: admission to Doctor of Nursing Practice program. Corequisite: 096:305.

096:306 DNP: Advanced Role Development Practicum II 3 s.h.
Builds on 096:304; continued development of in-depth clinical knowledge and skills in student’s interest area; advanced levels of interprofessional collaborative skills and team building. Prerequisite: 096:303. Corequisite: 096:306.

096:307 DNP: Advanced Role Development Practicum II 3 s.h.
Builds on 096:304; advanced leadership skills and clinical knowledge applied at practicum site; enhancement of competencies in areas such as clinical acumen, case management, leadership, business practices. Prerequisites: 096:303 and 096:304. Corequisite: 096:306.

096:308 Clinical Leadership I 3 s.h.
Opportunity for in-depth analysis and synthesis of a topic that contributes to an aspect of advanced nursing practice; students relate projects to evidence-based practice/translational science courses and/or 096:303 and 096:306.

096:309 Data Mining and Machine Learning 3 s.h.

096:310 Advanced Nursing Informatics 3 s.h.
Management and processing of data and information, evaluation of information systems; related informatics research methods that support knowledge development. Prerequisite: graduate-level informatics course or consent of instructor.

096:311 Advanced Practice in Clinical Information Systems 3 s.h.
Nursing informatics theory applied to design, modification, implementation, and evaluation of nursing and health information systems; supervised clinical preceptorship. Prerequisites: 096:263 and 096:310, or consent of instructor.

096:312 Advanced Practice in Clinical Information Systems 3 s.h.
Same as 056:235.

096:313 Computational Intelligence 3 s.h.

096:314 Integrated Seminar in Nursing Informatics 3 s.h.
Topics focused on problems related to nursing and health informatics theory, measurement, methodology, ethics, and policy issues. Prerequisites: Ph.D. enrollment and consent of instructor.

096:320 Economics of Health Care and Nursing 3 s.h.
Economic principles: demand, supply for health manpower; insurance; costs, financing of health care services; contemporary hospital structures, organization; role of government.

096:330 Nursing’s Role in Health Care Policy 3 s.h.
Impact of federal health policy on nurses, nurse manpower projections, trends in hospital nursing, challenges of long-term care, frontiers of nursing practice, strategies for increasing nurses’ autonomy, federal nursing priorities.

096:340 Nursing Theory Construction I 3 s.h.
Foundation of theory for professional practice; history, philosophy, sociology of science; development of a scientific community in nursing; relationship between theory construction, research, methods for generating specific theories.

096:342 Qualitative Research 3 s.h.
Overview of qualitative research; ethnography, grounded theory, historiography, phenomenology, and variations within each approach; philosophical underpinnings and research design across traditions; participant recruitment and selection, modes of data collection, management, and analysis, and evaluation criteria; issues in qualitative research, including integrated methods, metasynthesis, work with vulnerable populations. Prerequisite: 096:340 or consent of instructor.

096:344 Quantitative Research 3 s.h.
Refinement of students’ understanding of the application of scientific logic; criteria for causality, its application in health-related research; quantitative research designs and corresponding methods of analysis, sampling theory, approaches to sample selection and recruitment, methods to avoid bias; instrument selection, reliability and validity, management of large data sets and maintenance of data integrity. Prerequisite: 096:340 or consent of instructor.

096:405 Family Nursing Research 3 s.h.
Family theories and empirical research from nursing and related disciplines; mid-range family theories; issues in research methodology.

College of Pharmacy

Dean: Jordan L. Cohen
Associate dean, academic affairs: Michael W. Kelly
Associate dean, research and graduate affairs: Michael W. Duffel
Assistant dean, curriculum and assessment: Hazel H. Seaba
Assistant dean, University of Iowa Hospitals and Clinics: Paul W. Abramowitz
Assistant to the dean: Michael T. Sullivan
Director, Division of Pharmaceutical Service: Rolland I. Poust
Director, Division of Drug Information Service: Kevin G. Moores
Laboratory director, Center for Advanced Drug Development: Alta Botha
Head, medicinal and natural products chemistry: Kevin G. Rice
Interim head, pharmaceutics: Rolland I. Poust
Head, clinical and administrative pharmacy: Bernard A. Sorofman
Professors (clinical): Jay D. Currie, James A. Ponto, Hazel H. Seaba
Professor (clinical emeritus): Bruce Alexander
Adjunct professors: Douglas Geraets, R. Edward Howell, Randy P. McDonough, Craig K. Svensson
Associate professors emeriti: Ting-Fong Chin, Lloyd E. Matheson
Associate professors (clinical): Lucinda Buys, Michael Ernst, Ronald A. Herman, Michael W. Kelly, Cindy Marek, Kevin G. Moores, John M. Swegle
Adjunct associate professors: James D. Carlson, Helen E. Eddy, William S. Fisher, Grace E. Jerome, Mark E. Jones, Holli A. Kaufman, Craig D. Legemann, Mary E. Milavetz, Warren A. Narducci, Steven P. Nelson, Mary B. Ross, Dorothy L. Smith, Patti Sue R. Trenkamp
Assistant professors: Mahfoud Assen, Jonathan A. Doorn, Jennifer Fiegel, Thomas Prisinzano, Alisa Kas Salem, Julie M. Urmie, Yang Xie
Assistant professors (clinical emeriti): Harold J. Black, Ruth A. Kelliems

Instructors (clinical): Wilson, Robert Witt, Gregory J. Yeakel

Adjunct instructors: Rode, Donald L. Roehrkasse, Suzette L. Rolling, Roger Reinhart, Diane C. Rode, Robert J. Rode, John F.

http://www.pharmacy.uiowa.edu

The pharmacy profession is concerned with a wide variety of activities, from developing new drug products to caring for patients. A recent concept in the delivery of pharmaceutical services is pharmaceutical care—the responsible provision of drug therapy to achieve defined outcomes that improve patients' quality of life. These outcomes include preventing, arresting, or curing a disease, and/or eliminating or reducing its symptoms.

 Pharmaceutical care can enhance health care in rural settings and in primary care among the elderly, who are by far the heaviest users of drug therapy. In order to carry out these responsibilities, pharmacists specialize in the science of drugs and drug information.

Work as a pharmacist dispensing medications and information at the corner pharmacy is just one aspect of the profession. Pharmacists are active in research, clinical practice, teaching, and counseling. Along with their training in science and drug preparation, they learn the business and communication skills necessary for their multifaceted careers.

Demand for qualified pharmacists is high. Iowa's graduates enjoy a 100 percent placement rate. Iowa's pharmacy students study with professors who, in many cases, are pioneering the development of new drugs to solve chronic health problems. They also enjoy advanced research facilities, including those of Iowa's drug research and manufacturing area, where experimental drugs are produced for testing and licensing by manufacturers before being introduced worldwide.
The University of Iowa College of Pharmacy is accredited by the American Council on Pharmaceutical Education.

**College Organization**

The College of Pharmacy’s faculty and programs are organized in divisions defined by three major content areas: clinical and administrative pharmacy, medicinal and natural products chemistry, and pharmaceutics. These divisions provide course work for both the Doctor of Pharmacy curriculum and specialized graduate programs.

**Clinical and Administrative Pharmacy Division**

Faculty in the Clinical and Administrative Pharmacy Division provide expertise and education in the professional practice of pharmacy. Many are practitioners in a wide variety of settings; they provide instruction in the professional role of the pharmacist and the safe and effective use of medications. Course work in this division is related to pharmacotherapy, communication and practice, ethics and law, the organization and administration of the health care system, and patient care. Faculty serve as role models, providing closely supervised practice experiences.

The division’s Master of Science and Doctor of Philosophy programs are based in two areas: clinical pharmaceutical sciences, and pharmaceutical socioeconomics (behavioral, economic, social, and administrative sciences).

**Medicinal and Natural Products Chemistry Division**

The Medicinal and Natural Products Chemistry Division provides course work in areas related to understanding the chemistry of drugs and their action on human systems. Additional content areas include principles of drug discovery and drug design, natural product chemistry, and biotechnology/genomic strategies for producing new drug molecules.

The division’s Master of Science and Doctor of Philosophy programs provide abundant opportunities for interface with researchers in other areas, including medicine, pharmacology, biochemistry, chemistry, and pharmaceutics.

**Pharmaceutics Division**

The Pharmaceutics Division focuses on physical pharmacy, dosage form development and performance, industrial and manufacturing pharmacy, and the pharmacokinetics and pharmacodynamics of drugs and biological molecules. The division’s Master of Science and Doctor of Philosophy programs parallel the research in the division with specialization in formulation and preformulation sciences, biopharmaceutics, pharmacokinetics, pharmacodynamics, novel drug delivery systems, and tissue engineering. Multidisciplinary program opportunities also exist with faculty in chemistry, engineering, dentistry, and other departments.

**Courses for Non-Pharmacy Students**

Students must be enrolled in the College of Pharmacy to take the college’s courses. Graduate students in other majors must have the instructor’s consent to take College of Pharmacy courses.

**Professional Program (Pharm.D.)**

The College of Pharmacy offers the Doctor of Pharmacy and collaborates with the College of Public Health to offer the joint Doctor of Pharmacy/Master of Public Health.

**Doctor of Pharmacy**

The Doctor of Pharmacy program prepares students for work as pharmacists. It provides professional education in a number of areas, including pharmaceutical technology, biopharmaceutics, medicinal chemistry and natural products, pharmaceutical socioeconomics, clinical and hospital pharmacy, and aspects of biotechnology.

The program requires four years of full-time study preceded by at least two years of prepharmacy study in the College of Liberal Arts and Sciences at The University of Iowa or at any accredited community or liberal arts college. Graduates of the program are qualified to take the national licensure examination required by the Iowa Board of Pharmacy Examiners.

The Doctor of Pharmacy requires satisfactory completion of required courses, including at least 12 s.h. of professional electives, 20 s.h. of general education courses, a cumulative g.p.a. of at least
2.00, and a pharmacy g.p.a. of at least 2.00. The pharmacy grade-point average is computed from grades earned in all required courses that students have completed while enrolled in the College of Pharmacy, excluding general education electives and professional electives.

A grade of C-minus or higher is required for transfer courses applied to the Pharm.D. Rules and regulations concerning academic probation, pass/nonpass, credit by examination, maximum schedule, second-grade-only option, waiver or substitution of courses, cancellation of registration, drop date, and correspondence study are provided in the College of Pharmacy section of the ISIS Student Handbook, and in the College of Pharmacy Student Handbook.

The Tippie College of Business, the Carver College of Medicine, the College of Dentistry, and the College of Liberal Arts and Sciences contribute to the education of pharmacy students by providing instruction in the physical sciences, basic medical sciences, business, the humanities, and social sciences.

**Professional Curriculum**

In addition to the specific courses listed here, students must complete 20 s.h. of general education courses chosen from behavioral, social, humanistic, and business disciplines.

046:165 Infectious Disease Therapeutics (two courses) 4 s.h.
Professional electives 5 s.h.

FOURTH YEAR: ADVANCED PRACTICE EXPERIENCES

During the fourth year, students are required to complete nine advanced-practice rotations. Each rotation is four or five weeks long. Five of the rotations are required, the other four are elective. Students choose elective rotations from a list of professional experiences; see "Rotations" below. Students earn a total of 36 s.h., as follows.

046:178 Hospital Pharmacy Rotation 4 s.h.
046:179 Community Pharmaceutical Care Rotation 4 s.h.
046:180 Medicine Rotation 4 s.h.
046:181 Family Practice Rotation 4 s.h.
046:183 Community Pharmacy Rotation 4 s.h.
Four elective rotations (4 s.h. each) 16 s.h.

046:377 Health Disparities and Culturally Competent Care 2-4 s.h.
Joint Pharm.D./M.P.H.

The College of Pharmacy and the College of Public Health offer the joint Doctor of Pharmacy/Master of Public Health. The joint Pharm.D./M.P.H. requires 42 s.h. of postbaccalaureate credit. Students who complete the program are granted both degrees.

The Pharm.D./M.P.H. program helps students develop expertise in public health related to pharmacotherapy, health promotion, disease prevention, and medication safety. Its graduates may work in areas of interest common to pharmacy and public health, such as spread and treatment of disease, community health, and immunology; bioterrorism, terrorism, and preparedness; genetics; insurance; managed care; family and juvenile health; and protection of special populations. Employment opportunities are available in hospitals and clinics and with health care providers; private practice; insurance and managed care organizations; local, county, state, and federal government; public health governmental agencies; and colleges and universities.

Separate admission to both programs is required. Applicants must be admitted to both programs before they can be admitted to the joint degree program.

Admission requirements include a bachelor's degree or a minimum of 120 s.h. of undergraduate course work; an undergraduate cumulative g.p.a. of at least 3.00; one semester each of college algebra and biology; transcripts of all college course work; scores (preferably at or above the national median) on the Graduate Record Exam or the Pharmacy College Admission Test (PCAT); and three professional recommendations (University of Iowa recommendation forms are required).

Contact the College of Pharmacy and the College of Public Health for details.

Requirements

Students in the Pharm.D./M.P.H. program must complete M.P.H. core courses, practicum, and public health electives in addition to courses required for the Pharm.D.

M.P.H. CORE COURSES

Students must earn a B or higher on each core course. Students may repeat core courses to achieve this standard.

M.P.H. ELECTIVES

Students select electives totaling 9 s.h. from one of the following public health areas: biostatistics, community and behavioral health, epidemiology, health communication, health policy and administration, occupational and environmental health, public health genetics, or an approved M.P.H. focus area (aging studies; global health; maternal, child, and family health; or nutrition and exercise). Electives are chosen in consultation with the student’s advisors in the College of Pharmacy and Public Health.

COURSES THAT COUNT TOWARD BOTH DEGREES

The following required courses (12 s.h.) from the Pharm.D. curriculum also count as credit toward the M.P.H.: 046:130 Core Principles in Pharmaceutical Socioeconomics, 046:154 Endocrinology, Ophthalmology, Women’s and Men’s Health Therapeutics, 046:165 Cardiovascular Therapeutics, 046:165 Infectious Disease Therapeutics, and 069:133 Introduction to Human Pathology.

PHARM.D. REQUIREMENTS

The joint Pharm.D./M.P.H. program requires students to complete the professional curriculum of the Pharm.D. program (see “Doctor of Pharmacy” earlier in this section).
Students must be enrolled in the College of Pharmacy in order to take College of Pharmacy courses.

**Admission to the Pharm.D.**

Application deadline for the Pharm.D. program is January 1.

Students admitted to the College of Pharmacy are required to submit a $250 admission acceptance fee. The fee is applied to tuition for the student's first semester of enrollment in the college. The deposit is not refunded to applicants who do not enroll in the College of Pharmacy.

The college-level course work outlined below is the minimum academic requirement for admission to the College of Pharmacy. The Pharmacy College Admission Test (PCAT), a personal statement, personal interviews, and two letters of reference are required for admission. Students must have an overall cumulative g.p.a. of at least 2.50 to be considered for admission.

Fulfillment of these requirements does not ensure admission to the college; the admission committee selects the best-qualified applicants. Questions concerning satisfaction of degree requirements should be directed to the College of Pharmacy Office of Academic Affairs.

- **Rhetoric:** 8 s.h., or 6 s.h. of transfer credit in English composition and rhetoric, and 2-3 s.h. in speech (010:001 and 010:002, or 010:003)
- **Human anatomy:** 3 s.h. (060:110)
- **General biology:** 8 s.h. (002:010-002:011 Principles of Biology I-II)
- **General chemistry:** 8 s.h. (004:011-004:012)
- **Organic chemistry:** 6 s.h. (004:121-004:122)
- **Mathematics:** 3-4 s.h. of a satisfactory differential and integral calculus course (22M:016)
- **Microbiology:** 4 s.h. (061:164)
- **Microeconomics:** 3-4 s.h. (06E:001)
- **Physics:** one year of high school physics or one semester of college-level physics with a lab (029:008)
- **Human physiology:** 3 s.h. (027:130)
- **Statistics:** 3 s.h.
- **General education electives:** at least 12 s.h.

Each student must complete 20 s.h. of general education courses in order to graduate. Courses in moral reasoning or ethics, communications, computer science, and business are recommended. Courses in the behavioral and social sciences and the humanities are acceptable. Courses in physical education skills, applied music, and studio art are not acceptable.

A grade of C-minus or higher is required for transfer courses applied to the Pharm.D.

**Financial Support**

All P2-P4 students are encouraged to apply for College of Pharmacy scholarships. Applications are available each April from the Pharmacy Office of Academic Affairs. Students complete a single application form in order to be considered for all scholarships. Award amounts vary. The Awards and Recognition Committee selects the best-qualified applicant for each scholarship.

- **Courtney Adam Scholarship:** based on financial need.
- **Seymour M. Blaug Memorial Award:** for a pharmacy student with above-average academic achievement.
- **Ilse O. Buckner Scholarship:** for a pharmacy student who maintains satisfactory academic progress; nonrenewable, financial need is considered.
- **David and James Carlson Scholarship:** for pharmacy students interested in clinical or hospital practice; financial need is considered.
- **Vernon Conzemius Scholarship:** for selected pharmacy students.
- **Ben M. Cooper Memorial Award:** for an academically outstanding undergraduate student; preference is given to students from Scott County, Iowa; financial need is considered.
- **CVS Scholarship:** for a student in good academic standing who is interested in community pharmacy.
- **Max Eggleston Scholarship:** for a student who has completed one year; preference is given to students from Iowa; based on financial need.
- **Alice Coxon Gates Scholarship:** for an Iowa resident with a commitment to pharmacy.
- **Dick and Brenda Hartig Scholarship:** for a student from Dubuque, Waukon, Dyersville, Iowa City, Galena, or Stockton, Iowa; based on financial need.
- **Thomas D. Hill Scholarship:** for any pharmacy student in good academic standing.
Frances T. and Charles Holub Memorial Award: for selected third-year pharmacy students; financial need is considered.

Iowa Pharmacy Foundation Scholarship: for selected pharmacy students who are residents of Iowa and who demonstrate outstanding academic ability; financial need is considered.

Johnson County Pharmacists Association Scholarship: for any student member of JCPS with a grade-point average of at least 3.00.

Kuever Scholarship Fund: for a pharmacy student from Iowa who is in good academic standing.

Ernest Kyle Memorial Scholarship: for a pharmacy student from Iowa who is in good academic standing.

Ronald Madden Scholarship: for an Iowa high school graduate with a B or higher average in high school.

Charles J. Malecek Pharmacy Scholarship: for a selected pharmacy student.

Carleton Mikkelsen Scholarship: for the top P4 student based on final P3 grade-point average.

Miller-Ruegnitz Scholarships: based on financial need.

NACDS Scholarship: for a student who is interested in community pharmacy.

Osco Scholarship: for students currently employed in a community pharmacy setting who are residents of a state with Osco pharmacies.

Petersen Linder Scholarship: for a pharmacy student in excellent academic standing who has outstanding leadership skills; based on financial need.

Pharmacists Mutual Scholarship: for a student who intends to become a community practitioner and who is from a midwestern state where Pharmacists Mutual operates; based on academic achievement and need.

Gordon H. Sheffield Scholarships: for P3 or P4 students who are residents of Iowa; who have demonstrated outstanding academic ability, leadership, and financial need; and who have contributed service to the University community.

ShopKo Scholarship: preference is given to students from Iowa who are interested in a career with ShopKo and who are from Burlington, Dubuque, Fort Madison, Mason City, Sioux City, or Pamida; financial need is considered.

Shutt Pharmacy Scholarship: preference is given to Iowa residents; based on financial need.

H. Curtis Snyder Award: for a pharmacy student in good standing.

Wilbur J. Teeters Scholarship: for a pharmacy student who has completed at least one year in the college; financial need is considered.

Teeters/Wahl Scholarship: for pharmacy students based on outstanding academic ability, U.S. citizenship, and financial need.

John Stanley Thor Memorial Award: for a pharmacy student in good standing.

Wal-Mart Scholarship: for a P3 or P4 student with high scholastic standing who demonstrates strong leadership, desire to enter a community pharmacy practice, and financial need.

Walgreen’s Scholarship: for a P4 student with a grade-point average of at least 2.00, outstanding leadership, and excellent communication skills.

Louis C. Zopf Memorial Award: for a pharmacy student who is academically qualified; financial need is considered.

John D. Zuelke Scholarship: preference given to a P3 or P4 student from Wapello County, Iowa.

**Graduate Programs**

The college offers a Master of Science and a Doctor of Philosophy in four areas: clinical pharmaceutical science, medicinal and natural products chemistry, pharmaceutical socioeconomics, and pharmaceutics.

Advanced study in the pharmaceutical sciences prepares students for research, teaching, and administrative positions in the pharmaceutical industry, in colleges and universities, in government agencies, and in health-related institutions and organizations.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog. Academic requirements for maintaining graduate registration are determined by the Graduate College and by the individual divisions of the College of Pharmacy.

For more information about graduate study, visit the College of Pharmacy web site.
## Facilities

The Pharmacy Building is located on the University’s Health Science Campus, in close proximity to the Carver College of Medicine, College of Dentistry, College of Nursing, and College of Public Health. Also nearby are University of Iowa Hospitals and Clinics, the Bowen Science Building, and the Hardin Library for the Health Sciences.

The Pharmacy Building is a five-story structure designed to provide modern facilities for a comprehensive program of pharmacy education. In addition to classrooms and auditoriums, there are well-equipped separate laboratories for instruction at the professional and graduate levels.

The college operates small and large classrooms with state-of-the-art technology. The student practice lab is a technologically advanced licensed pharmacy that provides real and simulated practice experiences. The Banker Student Activity Center provides quiet individual and small-group study environments and houses College of Pharmacy Student Organizations offices.

The building also houses a fully supported Instructional Technology Center (Pharmacy ITC) in the Learning Resource Center. The ITC provides state-of-the-art desktop workstations and laptop computers are available for student checkout. Both desktop and laptop computers have secure connections to the University network for online drug information searching and printing.

The Center for Advanced Drug Development can engage in the full range of the drug development process through the resources of The University of Iowa’s Division of Pharmaceutical Service, the Iowa Drug Information Network, and the Center for Biocatalysis and Bioprocessing.

The Division of Pharmaceutical Service, a pharmaceutical manufacturing facility registered with the U.S. Food and Drug Administration, develops pharmaceutical dosage forms and manufactures clinical supplies in compliance with Good Manufacturing Practices for clinical trials in humans. Its staff works closely with clients and pharmaceutical faculty members to produce virtually every type of pharmaceutical dosage form.

The Division of Drug Information Service, a service division of the college located on the University's Oakdale Campus, publishes the IDIS (Iowa Drug Information Service), a bibliographical database that provides full-text access to specialized information related to drugs and drug therapy. IDIS reaches subscribers throughout the world. The division also is home to the Iowa Drug Information Network, which serves a network of community pharmacies and family practice sites with drug information resources, educational programs, and direct-response consultations that support the pharmaceutical care initiatives at the network’s sites. The division plays an important educational role for pharmacy students by providing both didactic and experiential teaching in drug information.

The College of Pharmacy provides students with the highest possible quality in the professional experiential program. College faculty members and adjunct faculty members serve as preceptors, and varied institutions and pharmacies in Iowa and nationwide provide advanced-practice experience.

## Courses

### For Doctor of Pharmacy Students

#### Clinical and Administrative Pharmacy

<table>
<thead>
<tr>
<th>Course Number</th>

</tr>
<tr>
<td></td>
<td>Introduction to Palm OS PDA and web-based drug information sources for pharmacy students.</td>
<td></td>
</tr>
<tr>
<td>046:012</td>
<td>Survey of Basic Pharmaceutical Sciences</td>
<td>1-2 s.h.</td>
</tr>
<tr>
<td></td>
<td>Aspects of drug discovery and development; seminar with guest speakers from industry. Prerequisite: admission to Pharm.D. program.</td>
<td></td>
</tr>
</tbody>
</table>
046:018 Journey through Illness 1 s.h.
Chronic illness from a patient’s perspective; discussion with patients.

046:050 Pharmacy Practice Lab I 2 s.h.
Prescription interpretation, aseptic technique in the preparation of parenteral products, patient counseling, applications of drug information and law. Prerequisite: P1 standing.

046:051 Pharmacy Practice Lab II 2 s.h.
Continuation of 046:050. Prerequisites: 046:050 and P1 standing.

046:066 Pharmacy Computer Systems 2 s.h.
Fundamentals of data storage and retrieval for pharmacy information systems.

046:103 Fundamentals of Evaluating Clinical Research 1 s.h.
Basic concepts for evaluation of clinical trials published in primary biomedical and pharmacy literature; design, methods, outcomes, statistical analysis, and generalizability of results. Prerequisite: P1 standing.

046:104 Pharmacy Law and Ethics 2 s.h.
Legal and moral aspects involved in the practice of pharmacy. Prerequisite: P1 standing.

046:105 Alternative and Complementary Medicine arr.
Prerequisite: P4 standing. Same as 078:210, 096:182.

046:106 Clinical Practice Skills I: Theory and Application 2 s.h.
Exploration and development of professional skills required for delivery of patient care; patient assessment, clinical decision making, communication (written and oral), teamwork. Corequisite: 046:155.

046:107 Clinical Practice Skills II: Critical Patient Analysis 2 s.h.
Continuation of 046:106; development of professional skills required for delivery of patient care; patient assessment, clinical decision making, communication (written and oral), teamwork. Prerequisite: P2 standing. Corequisite: 046:158.

046:108 Clinical Practice Skills III: Applied Patient Management 2 s.h.
Continuation of 046:107; development of professional skills required for delivery of patient care; patient assessment, clinical decision making, communication (written and oral), teamwork. Prerequisite: P2 standing. Corequisite: 046:164.

046:115 Drug Literature Evaluation 2 s.h.
Study design methods, drug information techniques and skills; skill development in critical analysis and evaluation of published reports of drug use and drug trials, assessment of validity of reports, trials and studies, assessment of generalizability of results to individual patients and patient groups; laboratory experience in biomedical literature analysis, evaluation.

046:116 Pharmacy Practice Lab III 2 s.h.
Pre- or corequisites: 046:149 and 046:154.

046:117 Pharmacy Practice Lab IV 2 s.h.
Continuation of 046:116. Pre- or corequisites: 046:155 and 046:156.

046:118 Pharmacy Practice Lab V 2 s.h.
Continuation of 046:117. Pre- or corequisites: 046:158 and 046:159.

046:119 Pharmacy Practice Lab VI 2 s.h.
Continuation of 046:118. Pre- or corequisites: 046:164 and 046:165.

046:121 Substance Abuse 3 s.h.
Themes and concepts in substance abuse and treatment; stimulants, depressants, alcohol, opiates, hallucinogenics, steroids; drug abuse prevention and treatment, including dual diagnosis, from cradle to the grave.

046:125 Forensic Toxicology 3 s.h.
Pharmacology, pharmacokinetics, and pharmacodynamics of drugs of abuse, toxic drugs, and chemicals applied to the needs of the law. Prerequisites: 046:138, 071:181, and P3 standing.

046:126 International Perspectives: Xicotepec 2 s.h.
Introduction to providing service to a community in a less developed country; student projects intended to improve community life in Xicotepec. Same as 053:126.

046:127 Pharmaceuticals Management for Underserved Populations 3 s.h.
Experience analyzing problems and developing strategies based on real-world drug management cycle issues; the role of WHO-TRIPS, government, and NGOs in the selection and use of pharmaceuticals.

046:130 Core Principles in Pharmaceutical Socioeconomics 3 s.h.
Organization and financing of the U.S. health care system, role of pharmaceuticals in health care, role of pharmacists in health care, patient influence on health care decisions. Prerequisite: a microeconomics course.

046:144 Elective: Insurance and Reimbursement 2-3 s.h.
Insurance and reimbursement for prescription drugs and pharmacist services; related policy issues.

046:146 End of Life Care for Adults and Families 2-4 s.h.
Same as 050:147, 096:147, 153:147.

046:149 Introduction to Therapeutics 2 s.h.
Treatment modalities that promote health and treat common diseases; common laboratory and diagnostic procedures used to diagnose and monitor diseases; basic types of adverse drug reactions. Prerequisite: P2 standing.

046:154 Endocrinology, Ophthalmology, Women’s and Men’s Health Therapeutics 2 s.h.
Pharmacotherapy for endocrine and ophthalmologic disorders; review of disorders, treatment goals, treatment plans, patient counseling, monitoring of patient outcomes. Prerequisite: P2 standing.

046:155 Respiratory and Dermatologic Therapeutics 2 s.h.
Pharmacotherapy for respiratory and dermatology disorders; review of disorders, treatment goals, treatment plans, patient counseling, monitoring of patient outcomes. Prerequisite: P2 standing.

046:156 Cardiovascular Therapeutics 2 s.h.
Pharmacotherapy for cardiovascular disorders; review of disorders, treatment goals, treatment plans, patient counseling, monitoring of patient outcomes. Prerequisite: P2 standing.

046:158 FEN, GI, and Renal Therapeutics 2 s.h.
Pharmacotherapy for fluid/electrolyte/nutrition disorders; gastrointestinal and renal diseases; review of disorders, treatment goals, treatment plans, patient counseling, monitoring of patient outcomes. Prerequisite: P2 standing.

046:159 Rheumatology, Immunology, Hematology, Oncology, and Transplantation Therapeutics 2 s.h.
Pharmacotherapy for rheumatology, immunology, hematology, oncology, and transplantation; review of disorders, treatment goals, treatment plans, patient counseling, monitoring of patient outcomes. Prerequisite: P3 standing.

046:164 Neurology/Psychiatry Therapeutics 2 s.h.
Pharmacotherapy for psychiatric and neurologic disorders; review of disorders, therapeutic goals, treatment plans, patient counseling, monitoring of patient outcomes. Prerequisite: P3 standing.
Focus on building practical knowledge and understanding of promotion. Prerequisite: P3 standing.

**046:357 Topics in Community Pharmacy**  
Introduction to pharmacogenomics in pharmacy; laboratory techniques, application of pharmacogenetics to clinical pharmacy.

**046:170 Clinical Pharmacokinetics**  
Application of pharmacokinetics to the clinical setting. Prerequisite: P3 standing.

**046:171 Nonprescription Pharmacotherapy**  
Introduction to nonprescription medications; development of patient assessment and consultation skills; understanding of pharmacist's role in patient self-care.

**046:174 Pharmacy Service Development**  
Issues and approaches used to develop pharmacy services; planning, service design, payment, promotion, quality improvement. Prerequisite: P3 standing or consent of instructor.

**046:176 Immunization Theory and Practice**  
Preparation for administering routine immunizations safely and responsibly under specific order of a prescriber; preparation for administering vaccinations under protocol according to rules of the Iowa Boards of Pharmacy and Medical Examiners. Prerequisites: 046:159 and P3 standing.

**046:177 Emerging Issues in Infectious Diseases**  
Contemporary issues related to infectious diseases; unusual pathogens such as Ebola, tropical medicine, bioterrorism, resistance, travel medicine, epidemiology.

**046:198 Elective: Hospital Pharmacy Practice Management**  
Practice management issues; organizational structure, service delivery models, drug policy, drug and pharmacy costs, use of technology and informatics, supervision, quality improvement.

**046:253 Elective: Economics and Treatment Choice**  
Introduction to patient and population pharmacoeconomic modeling; clinical decision, cost-minimization, cost-effectiveness, cost-utility, and cost-benefit analysis.

**046:344 PSE Selective: Insurance and Reimbursement**  
Insurance and reimbursement for prescription drugs and pharmacist services; related policy issues. Prerequisite: P3 standing.

**046:353 PSE Selective: Economics and Treatment Choice**  
Patient and population pharmacoeconomic modeling; clinical decision analysis, cost-minimization analysis, cost-effectiveness analysis, cost-utility analysis, cost-benefit analysis. Prerequisite: P3 standing.

**046:355 PSE Selective: Social Pharmacy**  
Behavioral and social aspects of drug use in society; therapeutic uses of medications, pharmaceutical care systems, pharmacy-related health behaviors. Prerequisite: P3 standing.

**046:356 PSE Selective: Marketing and Healthcare**  
Marketing concepts and principles applied to health care, especially pharmacy and pharmaceuticals; marketing management, patient behavior, marketing plan, marketing mix, promotion. Prerequisite: P3 standing.

**046:357 Topics in Community Pharmacy Management**  
Focus on building practical knowledge and understanding of business principles. Prerequisite: 046:130 or consent of instructor.

**046:377 Health Disparities and Culturally Competent Care**  
Characteristics, causes, and effects of health disparities in the U.S. health care system; foundation for development of knowledge, attitudes, and skills required of culturally competent health care providers; definitions and models of cultural competence, characteristics of culturally effective practitioners and workplaces; health disparities among specific populations, evidence for cultural competence as a remedy; taking a culturally appropriate history; working with interpreters; legal and professional imperatives for cultural competence. Same as 096:125, 172:135.

**046:398 PSE Selective: Hospital Pharmacy Practice Management**  
Organizational structure of pharmacy departments in hospitals and health care systems; models for delivery of pharmaceutical care; pharmacy's role in drug policy decision making; provision of drug information; clinical and distributive pharmacy services; control of pharmacy and pharmacy costs; use of information technology and automation for service delivery; supervisory management; quality improvement. Prerequisite: P3 standing.

---

**Clinical and Administrative Pharmacy Professional Experience**

**046:161 Drug Information Rotation**  
Drug information knowledge applied to service and research projects. Prerequisites: P4 standing and consent of instructor.

**046:175 Clinical Investigation**  
Development of research skills through completion of a research project.

**046:178 Hospital Pharmacy Rotation**  
Pacticum experience in components of hospital pharmacy; emphasis on hospital organization, inpatient and outpatient services, IV additives, unit dose, clinical services; many sites available. Prerequisites: P4 standing and consent of instructor.

**046:179 Community Pharmaceutical Care Rotation**  
Delivery of pharmaceutical care in the community pharmacy and ambulatory primary care environment. Prerequisite: P4 standing.

**046:180 Medicine Rotation**  
Advanced application of therapeutic skills necessary for the pharmacotherapeutic management of patients in general medicine or other subspecialties. Prerequisite: P4 standing.

**046:181 Family Practice Rotation**  
Advanced clinical experience in primary care environment involving drug therapy management of a wide variety of acute and chronic medical problems in patients of all ages. Prerequisite: P4 standing.

**046:182 Pediatrics Rotation**  
Advanced application of clinical pharmacology/toxicology principles to optimize disease management in the inpatient and outpatient pediatric population. Prerequisite: P4 standing.

**046:183 Community Pharmacy Rotation**  
Pacticum experience in community pharmacy; drug distribution, communication with patients, management functions. Prerequisites: P4 standing and consent of instructor.

**046:184 Psychiatry Rotation**  
Advanced application of clinical pharmacotherapeutics and pharmacokinetic psychopharmacology to the care of inpatient and outpatient psychiatric patients using a consultant role model. Prerequisite: P4 standing.

**046:185 Neurology Rotation**  
Lecture and advanced clinical practice of pharmacotherapeutics related to neurological diseases. Prerequisite: P4 standing.
Medicinal and Natural Products Chemistry

046:128 Medicinal and Natural Products Chemistry I: Biotechnology and Chemistry 4 s.h.
Organic and inorganic medicinal and therapeutic agents of natural and synthetic origin; physical, chemical, biological, and biochemical properties as they relate to medicinal and therapeutic effects; comparative biological activity and toxicity; detoxication mechanisms; functional group chemistry; nomenclature; chemistry of radiodiagnostic and therapeutic agents; introduction to biopharmaceutical analysis; first of a three-course sequence. Prerequisites: 004:122, 061:112, and 099:162 or equivalents, and P1 standing.

046:131 Medicinal and Natural Products Chemistry II: Pharmacodynamic Agents 4 s.h.
Medicinal chemistry of pharmacodynamic agents; introduction to peptides and proteins, thyroid hormone, diabetes, vaccines, gene therapeutics, NSAIDs, cardiovascular drugs, antibiotics, antihistamines, anticancer drugs; second of a three-course sequence. Prerequisites: 046:128 and P2 standing.

046:132 Medicinal and Natural Products Chemistry III: Medicinal Neurochemistry 4 s.h.
Receptor site theory; steroids, lipids, and prostaglandins; sedatives and hypnotics; drugs of abuse; cholinergics; excitatory amino acids and anticonvulsants; major analgesics; adrenergics; psychotherapeutics; third of a three-course sequence. Prerequisites: 046:128, 046:131, and P2 standing.

For Graduate Students

Pharmaceutics

046:101 Pharmacy Projects 1-3 s.h.
Basic and applied research problems of pharmaceutical interest.

046:120 Advanced Compounding 3 s.h.
Conceptual and practical framework for resolving therapeutic issues in compounding pharmacy practice; design and preparation of compounded medications using current quality assurance methods, legal aspects of compounding, development and marketing of a compounding practice. Prerequisites: 046:051 and 046:124.

046:123 Pharmaceutics I: Solutions 4 s.h.
Application of physical and chemical principles to formulation, preparation of liquid dosage forms, including solution, colloid, ointments, emulsions. Prerequisite: P1 standing.

046:124 Pharmaceutics II: Solids and Semi-solids 4 s.h.
Properties of solids; formulation, preparation, evaluation of solid dosage forms. Prerequisite: P1 standing.

046:138 Pharmacokinetics and Biopharmaceutics 3 s.h.
Qualitative and quantitative description of kinetics of drug absorption, distribution, and elimination, including physiological factors that influence each process; adjustment of dosing regimens for optimizing therapeutic drug levels in the body. Prerequisites: 046:123 and 046:124.

046:172 PharmaStatistics 2 s.h.
Introduction to the use of statistics.

046:173 Parenteral Products and Technology 2 s.h.
Knowledge and application of parenteral products and the technology used to compound and administer them. Prerequisites: 046:051 and 046:123.

Clinical and Administrative Pharmacy

046:147 Introduction to Research Methods 3 s.h.
Scientific inquiry, experimental design, data collection, statistical methods used in the study of health services and clinical investigations; focus on understanding the research process and evaluating published studies. Prerequisite: consent of instructor. Recommended: introductory statistics.

046:213 Pharmaceutical Socioeconomics: Seminar 1-2 s.h.
Recent research in pharmacy administration. Repeatable.

046:243 Clinical Pharmacy Sciences Research 3 s.h.

046:245 Analytical Techniques in Therapeutics 3 s.h.
Basic concepts and techniques of HPLC, Elisa/RIA, PCR, in vitro pharmacodynamic models, cell culture, animal models; identification of problems, solutions.

046:251 Pharmaceutical Socioeconomics: Research 3 s.h.

046:255 Elective: Social Pharmacy 2-3 s.h.
Behavioral and social aspects of drug use in society; emphasis on therapeutic uses of medications, pharmaceutical care systems, pharmacy-related health behaviors.

046:256 Elective: Marketing and Healthcare 2 s.h.
Research on marketing’s impact on delivery and consumption of health care, and on changes in marketing that result from evolution of health care systems.

046:257 Foundation Literature in Pharmaceutical Socioeconomics arr.
Issues related to pharmacy administration, social and behavioral pharmacy, pharmacy education.
046:261 Analytic Issues in Health Services Research I 3 s.h.
Same as 174:261.

046:262 Analytic Issues in Health Services Research II 3 s.h.
Same as 174:262.

046:263 Models of Patient Behavior and Choice 3 s.h.
Theoretical models used to describe behavior and choice in
pharmaceutical socioeconomic research; models from economics,
health services research, health behavior, clinical decision making.

046:264 Models of Provider Behavior and Choice 3 s.h.
Theoretical background for study of provider decision making and
behavior; models based on a classic economic approach, models
used to study provider behavior.

046:269 Introduction to Clinical Pharmacogenomics 3 s.h.
Basic pharmacogenetic techniques; use of pharmacogenomics in
clinical pharmacy. Prerequisite: 002:128.

046:280 Clinical Pharmacy Sciences Seminar 1-2 s.h.
Research by faculty, graduate students.

046:284 Introduction to Pharmaceutical Sciences Research 2 s.h.
Key principles and methods in pharmaceutical sciences research.
Prerequisite: consent of instructor.

046:378 Translation Research and Clinical Drug Development 3 s.h.
Clinical drug development; preclinical studies and clinical trials;
phase I, II, and III clinical trials, including regulatory
considerations.

046:379 Principles of Experimental Therapeutics 3 s.h.
Introduction to key principles and concepts for research in
experimental therapeutics; basic principles related to drug
disposition, toxicity, and efficacy.

046:380 Applied Clinical and Translational Science 3 s.h.
Application of clinical and translational science in a
multidisciplinary collaborative environment to develop, conduct,
and report research.

Medicinal and Natural Products Chemistry

046:135 Perspectives in MNPC Research 1 s.h.
Contemporary research in medicinal chemistry and natural
products.

046:136 Medicinal Chemistry of CNS Active Agents 3 s.h.
Concepts for understanding the chemistry and pharmacology of
agents on the central nervous system. Prerequisite:
second-semester organic chemistry.

046:137 Enzymatic Basis of Drug Metabolism 3 s.h.
Current literature on catalytic and physical properties,
distribution, and substrate specificity of enzymes involved in
mammalian drug metabolism. Prerequisites: 004:122 and
099:162, or consent of instructor.

046:150 Synthetic Strategies in Medicinal Chemistry 3 s.h.
Modern chemical methods for construction of carbon-carbon
bonds commonly used in synthesis of natural products; strategic
disconnections for the syntheses of these molecules. Prerequisites:
004:122 and 046:132.

046:211 Total Synthesis of Natural Products 3 s.h.
Total synthesis of natural products; use of strategies, tactics,
efficiency, selectivity, synthetic maneuvering. Prerequisite:
consent of instructor.

046:214 Pharmaceutical and Chemical Toxicology 3 s.h.
Principles and mechanisms of chemical toxicology related to
drugs and environmental agents; modern toxicological research
methods. Prerequisite: consent of instructor.

046:215 Current Medicinal Chemistry 3 s.h.
Modern techniques used in drug discovery; important drug
classes, their chemical mechanism of action. Prerequisite:
046:132 or consent of instructor.

046:217 Medicinal and Natural Products Chemistry Research arr.

046:219 Analytical Biochemistry 3 s.h.
Application of modern chromatographic and detection methods
used to isolate, characterize, and quantify drugs and
macromolecules.

046:227 Medicinal and Natural Products Chemistry Seminar 1-2 s.h.

046:275 Perspectives in Biocatalysis 1-3 s.h.
Applied enzymology, protein design, structure-activity
relationships, biosensor technology, microbial transformations,
biodegradation of environmental pollutants. Repeatable. Same as
004:275, 052:275, 053:275, 061:275, 099:275.

Pharmaceutics

046:148 Pharmacokinetics and Pharmacodynamics 3 s.h.
Kinetics of drug absorption, distribution, and elimination,
including development of mathematical models. Prerequisites:
two semesters of calculus and one semester of statistics, or
consent of instructor.

046:157 Quantitative Research Methods in Pharmacy 4 s.h.
Lecture and laboratory; collection and interpretation of analytical
data; instrumental analysis as applied to pharmaceutical quality
control; separation techniques.

046:202 Pharmacy: Selected Topics 1-4 s.h.
Recent advances and contemporary research in pharmaceutics.
Repeatable.

046:203 Advanced Psychopharmacotherapeutics I 2 s.h.
Drug treatment of psychiatric disorders involving psychosis and
depression. Prerequisite: 071:105 or 096:124, or 071:180 and
071:181.

046:204 Advanced Psychopharmacotherapeutics II 2 s.h.
Drug treatment of psychiatric disorders involving mania, anxiety
disorders, drug-induced psychosis, substance abuse treatment,
childhood depression, attention-deficit hyperactivity disorder.
Prerequisite: 071:105 or 096:124, or 071:180 and 071:181.

046:206 Stability of Pharmaceuticals 3 s.h.
Mechanisms of degradation of pharmaceuticals; prediction of shelf
life of pharmaceuticals, stabilization. Prerequisite: 004:132.

046:207 Polymers in Pharmaceutics 3 s.h.
Polymer science, its implications in pharmaceutics; polymers
useful as excipients in design of controlled and/or sustained
release products.

046:225 Product Development 3 s.h.
Application of physico-chemical principles to formulation and
design of pharmaceutical dosage forms.

046:229 Advanced Pharmacokinetics and Pharmacodynamics 3 s.h.
Selected topics, including nonlinear curve fittings. Prerequisite:
046:148.

046:231 Pharmacy Seminar 1-2 s.h.
Repeatable.

The College of Public Health, established in 1999, is a partner with the Carver College of Medicine and the Colleges of Dentistry, Nursing, and Pharmacy in striving to improve human health and well-being. Consistent with the interdisciplinary traditions of public health, the college also collaborates with non-health science colleges across the University and with other Board of Regents, State of Iowa institutions, state and local agencies, and the private sector.

A population-based approach to health is a distinguishing feature of public health and of the college. For public health practitioners—a wide range of professionals including physicians, nurses, dentists, pharmacists, social workers, nutritionists, environmental scientists, health educators, and health service administrators—the primary focus is on the health of entire communities rather than individual patients. Tools that public health professionals use to improve and enhance quality of life include analytical methods to identify, describe, and monitor the health of communities and populations at risk; education and prevention programs, methods of assuring access to appropriate and cost-effective care; and formulation of sound public policies.

The public health approach has led to many important health improvements over the past century. Vaccination campaigns, improved sanitation, fluoridation of drinking water, and efforts to reduce tobacco use are among the most recognizable public health initiatives. Public health programs also have led to safer workplaces, reduction of deaths from coronary heart disease and stroke, improved motor vehicle safety, and creation of effective health systems to provide care to those who need it. In the future, public health professionals will play an important role worldwide in seeking better approaches to complex issues such as quality of life for the elderly, drug and alcohol abuse, teen pregnancy, new and emerging infectious diseases, food safety, effects of bioterrorism, and nutrition.

The College of Public Health provides educational opportunities to students...
The college includes the Departments of Biostatistics, Community and Behavioral Health, Epidemiology, Health Management and Policy, and Occupational and Environmental Health, and the Program in Public Health Genetics. It offers four graduate degrees: Master of Health Administration (M.H.A.), Master of Public Health (M.P.H.), Master of Science (M.S.), and Doctor of Philosophy (Ph.D.).

The college is accredited by the Council on Education for Public Health (CEPH), the accrediting body for the nation’s schools and colleges of public health. Two programs in the college currently are accredited: The industrial hygiene program is accredited by the Accreditation Board for Engineering and Technology (ABET) and the American Board of Industrial Hygiene (ABIH), and the Master of Health Administration is accredited by the Commission on Accreditation of Healthcare Management Education (CAHME).

Graduate Program

Certificate in Public Health

The college offers a certificate program via distance education to improve public health practice and public health workforce capacity in Iowa and the upper Midwest. The Certificate in Public Health is designed primarily for individuals in public health practice, those in the workforce, and those interested in acquiring a basic knowledge of public health practice.

All certificate courses are offered on the Internet. Some also are offered on the University of Iowa campus and in the College of Public Health Summer Institute. Certificate students must successfully complete the program’s 12 s.h. of required course work within five years and must maintain a cumulative g.p.a. of at least 2.75 throughout the program. Students must have access to a computer and the Internet.

The following courses are required.

Both of these:
- 170:101 Introduction to Public Health 3 s.h.
- 173:099 Evidence-Based Public Health Methods 3 s.h.

Two of these:
- 172:101 Introduction to Health Promotion and Disease Prevention 3 s.h.
- 174:102 Introduction to the U.S. Health Care System 3 s.h.
- 175:197 Environmental Health 3 s.h.

Applicants to the certificate program must have completed at least 60 s.h. of postsecondary education course work and have a cumulative g.p.a. of at least 2.50. They should submit a statement of their career goals and their reasons for applying to the program and two letters of reference.

Application deadlines are March 15 for summer session, July 1 for fall semester, and December 1 for spring semester.

Students who have graduate standing when they complete the certificate course work, and are admitted to the M.P.H. program after earning the certificate, may apply 9 s.h. of credit from the certificate program toward the M.P.H.

Admission

Each department in the College of Public Health has an admissions committee. Admission criteria usually include a satisfactory cumulative grade-point average; Graduate Record Examination scores; references; résumés; and for international applicants, scores on the Test of English as a Foreign Language (TOEFL). Other evaluation criteria may include oral and on-campus interviews, written statements, special emphasis on science and math courses, and a match of available faculty mentors with student interests. Application deadlines vary by department.

Applicants to College of Public Health programs must meet the admission requirements of the Graduate College. For detailed information about Graduate College policies, including application requirements and procedures, see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.
Faculty

The college’s faculty includes members with single appointments in the College of Public Health as well as those with joint appointments in other University of Iowa colleges, including the Carver College of Medicine and the Colleges of Dentistry, Engineering, Law, Liberal Arts and Sciences, Nursing, and Pharmacy. In addition, the college’s faculty includes adjunct members from Drake University, Iowa State University, the University of Northern Iowa, the Iowa State Department of Public Health, the Iowa State Hygienic Laboratory, the Iowa Heart Center (in Des Moines), University of Iowa Hospitals and Clinics, and the National Institutes of Health.

Research Centers and Institutes

The College of Public Health is home to 26 centers and institutes that conduct research and provide public service. These multidisciplinary centers and institutes—most of which are supported by federal grants—focus their investigative efforts on important public health topics. They conduct an array of outreach, service, and policy activities through which the College of Public Health engages with agencies, communities, and organizations throughout Iowa, the Midwest, the nation, and the world. Students are encouraged to explore opportunities for involvement with any of the college’s centers and institutes.

For more information, see College of Public Health Based Centers (http://www.public-health.uiowa.edu/research/centers.html) on the college’s web site.

Facilities

The college’s administrative offices are housed in the General Hospital, on the University’s health sciences campus. Faculty offices are located on the health sciences campus in the College of Medicine Administration Building, General Hospital, John Colloton Pavilion, the Medical Education Building, Medical Laboratories, and Westlawn; on the main campus in the Jefferson Building, MacLean Hall, Schaeffer Hall, and University Capitol Centre; and on the Oakdale Campus in Oakdale Hall and at the Institute for Rural and Environmental Health. Specialized laboratories also are located on the Oakdale Campus.

Eight student computer laboratories are housed at the college. More than 55 software packages are available for student use, most without charge. Software includes Microsoft Office products, SAS, and S+. Some specialty labs are equipped with RedHat Linux and are loaded with R, Macanova, Xlispstat, Mathematica, and other software.

Students, faculty, and staff draw on extensive library resources available across campus. Hardin Library for the Health Sciences serves as a central resource for all of the health sciences colleges. Hardin Library’s Information Commons, a state-of-the-art health sciences educational technology facility, provides central support and delivery for courseware development, classroom instruction, health-related research, and independent learning. It offers high-end multimedia development workstations, networked electronic classrooms, a case-based learning and conference room, and information research workstations for searching health-related databases and the Internet.
The Master of Public Health is recognized as the primary professional degree in public health. The objective of Iowa’s M.P.H. program is to provide education and practical training in public health to students who will be leaders in their respective communities. The program is appropriate for individuals who already have professional experience and/or training in public health as well as for those whose expertise lies outside of public health.

The M.P.H. is awarded by the University of Iowa Graduate College. Combined degree programs for medical, nursing, and pharmacy students are available; see “Joint M.D./M.P.H.,” “Joint M.S.N./M.P.H.,” and “Joint Pharm.D./M.P.H.” in this section. A combined program for veterinary students is offered in conjunction with the College of Veterinary Medicine at Iowa State University; see “Joint D.V.M./M.P.H.” in this section.

Master of Public Health

The M.P.H. is offered with seven subtracks: biostatistics, community and behavioral health, epidemiology, ergonomics, health communication, occupational and environmental health, and policy and administration. Students also may pursue a general M.P.H., for which they must define a focused area of study: aging studies; global health; maternal, child, and family health; or nutrition and exercise.

The degree requires 42-48 s.h. of graduate credit, depending on the student’s choice of specialization.

Degree requirements include a core course in public health practice and in each of the five core disciplines of public health (epidemiology, biostatistics, environmental health, health administration, and social and behavioral sciences); a bioscience course (or an additional elective course); a practicum; a set of content-specific required courses; and a set of content-specific electives. A final written report with oral presentation or a poster presentation related to the practicum constitutes the final examination.

All M.P.H. students complete the course work listed under “Common Requirements.” In addition, each student completes the course work listed for his or her chosen subtrack.

Common Requirements

The following course work is required for all M.P.H. students. Students must earn a B or higher on each core course. Students may repeat courses to achieve this standard.

CORE COURSES

All of these:
170:101 Introduction to Public Health 3 s.h.
171:161 Introduction to Biostatistics 3 s.h.
172:101 Introduction to Health Promotion and Disease Prevention 3 s.h.
173:140 Epidemiology I: Principles 3 s.h.
175:197 Environmental Health 3 s.h.

One of these:
174:102 Introduction to the U.S. Health Care System 3 s.h.
174:200 Introduction to Health Care Organization and Policy 3 s.h.

BIOSCIENCE REQUIREMENT

All students, except those in the biostatistics, policy and administration, ergonomics, or community and behavioral health subtracks, take one of the following. Students who already have completed equivalent course work may substitute an additional elective course for the bioscience requirement. Contact the Master of Public Health Program for current information about this requirement.

069:133 Introduction to Human Pathology 4 s.h.
069:270 Pathogenesis of Major Human Diseases 3 s.h.
096:114 Human Pathophysiology: Organ Systems 3 s.h.
096:115 Human Pathophysiology: Cellular/Neurology/Immunology 3 s.h.

PRACTICUM

The practicum is a fieldwork experience in which students show proficiency in applying academic principles in community settings. There are many
practicum opportunities for M.P.H. students in Iowa and surrounding states; the college’s Institute for Public Health Practice coordinates placements. The practicum is the culmination of the M.P.H. program.

Students must choose an approved topic and complete at least five of the six core courses before registering for the practicum. A final written report with an oral presentation or a poster presentation is required. The practicum constitutes the final examination for the M.P.H. program.

170:299 M.P.H. Practicum Experience  3 s.h.

**Biostatistics Subtrack**

The M.P.H. with subtrack in biostatistics requires 44 s.h. of graduate credit. It focuses on application of biostatistical methods to public health and biomedical sciences, and applications of methodology for design and analysis of research investigations in the health sciences. It provides fundamental training in the public health sciences, core biostatistical theory, and core biostatistical methods vital for health science investigations. Graduates of the program are prepared for work as statistical consultants and data analysts for public health projects.

Applicants to the biostatistics subtrack should have a bachelor’s degree or equivalent in the biological, mathematical, or physical sciences. Applicants should have mathematics training in methods and techniques of single variable and multivariable differential and integral calculus, and in linear algebra. They also should be competent in at least one computer language, preferably FORTRAN, Pascal, or C.

Applicants with deficiencies in any of these areas may apply for admission and make up the deficiencies during the first year of graduate study. The following University of Iowa courses provide training at the required level.

22M:025 Calculus I  4 s.h.
22M:026 Calculus II  4 s.h.
22M:027 Introduction to Linear Algebra  4 s.h.
22M:028 Calculus III  4 s.h.

In addition to the M.P.H. course work listed under “Common Requirements,” the biostatistics subtrack requires the following courses.

**REQUIRED COURSES**

All of these (13 s.h.):
171:202 Biostatistical Methods II  4 s.h.
171:241 Applied Categorical Data Analysis  3 s.h.

One of these (3 s.h.):
171:173 Intermediate Design of Sample Surveys  3 s.h.
171:242 Applied Survival and Cohort Data Analysis  3 s.h.

**ELECTIVES**

Students choose 6 s.h. from the following (or 9 s.h. if they substitute an elective for the bioscience requirement).

22S:138 Bayesian Statistics  3 s.h.
22S:161 Applied Multivariate Analysis  3 s.h.
22S:255 Linear Models  4 s.h.
171:164 Research Data Management  3 s.h.
171:242 Applied Survival and Cohort Data Analysis  3 s.h.
171:261 Survival Data Analysis  3 s.h.
171:262 Analysis of Categorical Data  3 s.h.
171:264 Longitudinal Data Analysis  3 s.h.
171:266 Statistical Methods in Clinical Trials  3 s.h.
171:271 Advanced Survival Analysis  3 s.h.

**Community and Behavioral Health Subtrack**

The M.P.H. with subtrack in community and behavioral health requires 42 s.h. of graduate credit. It prepares public health practitioners for a variety of positions related to community development, health program implementation, and health education. Students learn how to design, implement, and evaluate evidence-based interventions directed toward identified public health problems in populations. A bachelor’s degree in the social and behavioral sciences is good preparation for this program, but students come from a variety of educational backgrounds. Preference is given to applicants who have professional experience or clinical background.

In addition to the M.P.H. course work listed under “Common Requirements,” the community and behavioral health subtrack requires the following courses.

**REQUIRED COURSES**

At least 12 s.h. from these:
172:106 Designing and Implementing Interventions  3 s.h.
172:130 Social Determinants of Health  3 s.h.
172:150 Health Behavior and Health Education  3 s.h.
172:181 Evaluation I: Theory and Application  3 s.h.
172:183 Qualitative Research for Public Health  3 s.h.
The M.P.H. with subtrack in epidemiology requires 42 s.h. of graduate credit. It takes advantage of interdisciplinary faculty strengths in the Colleges of Public Health and Engineering and the Carver College of Medicine. Epidemiology students gain a thorough understanding of workplace physical environments that contribute to musculoskeletal injuries and illness. They also acquire knowledge of engineering and administrative methods to control workplace risk factors. The program prepares students for work in industry and government agencies, as well as for further academic training.

In addition to the M.P.H. course work listed under “Common Requirements,” the epidemiology subtrack requires the following courses.

**REQUIRED COURSES**

All of these (11 s.h.):
171:162 Design and Analysis of Biomedical Studies 3 s.h.
173:145 Public Health Data 2 s.h.
173:160 Introduction to Epidemiologic Data Analysis with Computers 2 s.h.
173:240 Epidemiology II: Advanced Methods 4 s.h.

Epidemiology subtrack students are required to attend departmental seminars and journal club. They also must present one scientific poster at an international, national, regional, state, university, or departmental poster session.

**ELECTIVES**

Students must earn at least 7 s.h. in elective course work (or 10 s.h. if an elective is substituted for the bioscience requirement). At least 3 s.h. of this must be earned in courses offered by the Department of Epidemiology (prefix 173) or the following biostatistics course.

171:242 Applied Survival and Cohort Data Analysis 3 s.h.

**Ergonomics Subtrack**

The M.P.H. with subtrack in ergonomics requires 42 s.h. of graduate credit. It takes advantage of interdisciplinary faculty strengths in the Colleges of Public Health and Engineering and the Carver College of Medicine. Ergonomics students gain a thorough understanding of workplace physical environments that contribute to musculoskeletal injuries and illness. They also acquire knowledge of engineering and administrative methods to control workplace risk factors. The program prepares students for work in industry and government agencies, as well as for further academic training.

In addition to the M.P.H. course work listed under “Common Requirements,” the ergonomics subtrack requires the following courses.

**REQUIRED COURSES**

All of these (16 s.h.):
050:270 Responsible Conduct in Research 0 s.h.
056:144 Human Factors 3 s.h.
056:147 Ergonomics 3 s.h.
175:180 Occupational and Environmental Health Seminar 1 s.h.
175:190 Occupational Ergonomics I 3 s.h.
175:230 Occupational Health 3 s.h.
175:295 Clinical Ergonomics 3 s.h.

**ELECTIVES**

Ergonomics subtrack students must earn 5 s.h. in elective course work. Electives may be chosen
Health Communication Subtrack

The M.P.H. with subtrack in health communication requires 42 s.h. of graduate credit. It provides opportunities for students to develop knowledge and skill in designing, evaluating, and implementing effective communication strategies and messages that speak to the health needs of diverse audiences. The program addresses clinician-patient interaction, family communication, group and organizational communication, and mass media and web-based campaigns. The M.P.H. may be of interest to clinicians, such as physicians, nurses, pharmacists, and dentists, as well as other professionals who do not wish to earn a Ph.D.

The health communications subtrack requires the following courses.

HEALTH COMMUNICATION CORE

Four of these (12 s.h.):
- 036:371 Communication Theory 3 s.h.
- 172:140/019:160 Media and Health 3 s.h.
- 172:240/036:270 Health Communication 3 s.h.
- 172:242 Persuasion and Health 3 s.h.
- 172:246/036:379 Health Communication Campaigns 3 s.h.

COMMUNITY AND BEHAVIORAL HEALTH CORE

Three of these (9 s.h.):
- 044:106 Foundations of GIS 3 s.h.
- 172:106 Designing and Implementing Interventions 3 s.h.
- 172:130 Social Determinants of Health 3 s.h.
- 172:150 Health Behavior and Health Education 3 s.h.
- 172:181 Evaluation I: Theory and Applications 3 s.h.
- 172:183 Qualitative Research for Public Health 3 s.h.
- 172:202/113:202 Ethnographic Field Methods 3 s.h.

Occupational and Environmental Health Subtrack

The M.P.H. with subtrack in occupational and environmental health requires 42 s.h. of graduate credit. It provides students with a broad perspective on public health and career preparation for a variety of professional positions in occupational and environmental health. Public health experience provides desirable background for this subtrack.

In addition to the M.P.H. course work listed under “Common Requirements,” the occupational and environmental health subtrack requires the following courses.

REQUIRED COURSES

- 050:270 Responsible Conduct in Research 0 s.h.
- 175:180 Occupational and Environmental Health Seminar 1 s.h.
- Occupational and environmental health courses not already listed, or other approved courses 17-21 s.h.

Policy and Administration Subtrack

The M.P.H. with subtrack in policy and administration requires 46 s.h. of graduate credit. It focuses on planning administration and program evaluation skills with emphasis on public sector organizations. Graduates of the program find positions in federal and state government, professional associations, and health agencies. A variety of academic backgrounds are appropriate preparation for this program, including business, liberal arts and sciences, and the health professions.

In addition to the M.P.H. course work listed under “Common Requirements,” the policy and administration subtrack requires the following courses.

REQUIRED COURSES

- One of these:
  - 174:201 Health Care Management 3 s.h.
  - 174:203 Strategic Planning and Marketing (if 174:201 is waived) 3 s.h.
- One of these:
  - 07P:165 Introduction to Program and Project Evaluation 3 s.h.
  - 172:181 Evaluation I: Theory and Applications 3 s.h.
- One of these:
  - 174:212 Health Economics I 3 s.h.
  - 174:228 Cost Effectiveness and Decision Analysis 3 s.h.
- All of these:
  - 174:214 Financial Accounting for Health Care Organizations 3 s.h.
ELECTIVES

Students earn a minimum of 8 s.h., selecting at least one course from each of the following categories.

**Administration**

- 06N:215 Corporate Financial Reporting 3 s.h.
- 06N:225 Managerial Finance 3 s.h.
- 174:203 Strategic Planning and Marketing 3 s.h.
- 174:206 Leadership in Healthcare Organizations 3 s.h.
- 174:208 Health Services Information Systems 3 s.h.
- 174:212 Health Economics I 3 s.h.
- 174:213 Health Economics II 3 s.h.
- 174:220 Advanced Topics in Managed Care 3 s.h.
- 174:224 Human Resources for Health Organizations 3 s.h.
- 174:228 Cost Effectiveness and Decision Analysis 3 s.h.

**Policy**

- 030:210 American Politics 4 s.h.
- 091:261 Health Law 3 s.h.
- 102:221 Poverty, Planning, and Public Policy 3 s.h.
- 174:140 Mental Health Services and Policy I 3 s.h.
- 174:144 Medicare and Medicaid Policy 3 s.h.
- 174:217 Health Insurance and Managed Care 3 s.h.
- 174:242 Federalism and Health Policy 3 s.h.
- 175:252 Environmental Health Policy 3 s.h.

**M.P.H. for Practicing Veterinarians**

The College of Public Health at The University of Iowa, in collaboration with the College of Veterinary Medicine at Iowa State University, offers a distance-based M.P.H. for practicing veterinarians. The program enables students to prepare for new career opportunities and equips them to respond to public health challenges such as zoonotic diseases, food security and foodborne illnesses, bioterrorism, and environmental health.

The M.P.H. for practicing veterinarians requires a minimum of 42 s.h. of graduate credit. Students participate in two summer institutes, one on each campus during consecutive summers (two weeks in May and June); the rest of the program is Internet-based, so students may complete requirements at times that fit their schedules. Specific courses are required each semester of the program.

The M.P.H. for practicing veterinarians requires the following course work.

**M.P.H. COMMON REQUIREMENTS**

Students must complete courses listed under “Common Requirements”; see “Master of Public Health” above.

**ADDITIONAL REQUIRED COURSES**

All of these (21 s.h.):

- 173:157 Zoonotic Diseases 2 s.h.
- 175:170 Injury and Violence Prevention 3 s.h.
- 175:175 Research Methods in Disaster Studies 3 s.h.
- 175:205 Public Health Law 2 s.h.
- 175:209 Rural Health and Agricultural Medicine 3 s.h.
- Advanced epidemiology/biostatistics seminar 3 s.h.
- Food safety 3 s.h.
- Foreign animal diseases 1 s.h.
- Professional seminar: Veterinarians in Public Health 1 s.h.

**FIRST SUMMER INSTITUTE (UNIVERSITY OF IOWA)**

- 173:157 Zoonotic Diseases 2 s.h.
- 175:209 Rural Health and Agricultural Medicine 3 s.h.
- Professional seminar 1 s.h.

**SECOND SUMMER INSTITUTE (IOWA STATE UNIVERSITY)**

- Advanced epidemiology/biostatistics seminar 3 s.h.
- Food safety 3 s.h.

**Joint M.D./M.P.H.**

The Carver College of Medicine and the College of Public Health offer the joint Doctor of Medicine/Master of Public Health. The joint M.D./M.P.H. requires a minimum of 42 s.h. of postbaccalaureate credit. Students who complete the program are granted both degrees. They enjoy expanded career opportunities and are well prepared to apply the principles of medicine and public health in their work.

Separate admission to each program is required. Applicants must be admitted to both programs before they can be admitted to the joint program.

Contact the Carver College of Medicine and the College of Public Health for details.
The joint M.D./M.P.H. requires the following course work.

**M.P.H. COMMON REQUIREMENTS**

Students must complete courses listed under “Common Requirements”; see “Master of Public Health” above.

**M.P.H. ELECTIVES**

Students earn 9 s.h. of electives in one of the following public health areas: biostatistics, community and behavioral health, epidemiology, health communication, health policy and administration, occupational and environmental health, or an approved M.P.H. focus area (e.g., aging studies; global health; maternal, child, and family health; nutrition and exercise). Students choose electives in consultation with their advisors in the Carver College of Medicine and the College of Public Health.

**COURSES THAT COUNT TOWARD BOTH DEGREES**

The following required courses (12 s.h.) from the M.D. curriculum also count toward the M.P.H.: 050:183 Health Care Ethics, Law, and Policy (2 s.h.); and 10 s.h. from 050:180 Community-Based Primary Care (arr.), 078:101 Inpatient Internal Medicine (arr.), and 078:102 Outpatient Internal Medicine (3-4 s.h.).

**Joint M.S.N./M.P.H.**

The College of Nursing and the College of Public Health offer the joint Master of Science in Nursing/Master of Public Health. The joint M.S.N./M.P.H. requires a minimum of 60 s.h. of graduate credit. Students who complete the program are granted both degrees. The program prepares students for positions such as director of a public or community health agency, director of occupational health for a company or corporation, case manager for specific populations, information systems specialist for a public health agency or organization, or advanced nurse practitioner in a school, occupational, or public health organization.

Separate admission to the M.S.N. and the M.P.H. programs is required. Applicants must be admitted to each program before they can be admitted to the joint degree program. Each college’s admission committee reviews each candidate independently.

Applicants must hold a baccalaureate degree in nursing from an accredited program and have an undergraduate g.p.a. of at least 3.00 and satisfactory Graduate Record Exam (GRE) General Test scores. They must submit a formal application, complete transcripts from each undergraduate and graduate school they have attended, and three professional recommendations (University of Iowa recommendations forms are required).

Contact the College of Nursing and the College of Public Health for details.

To meet the M.S.N./M.P.H. degree requirement of 60 s.h., students earn 30 s.h. in core courses from both disciplines, 9-12 s.h. in a nursing focus, and 3 s.h. in an M.P.H. capstone project. A master’s project or nursing portfolio is required. The remaining semester hours are earned in elective courses. Areas of emphasis are informatics, nursing administration, community health, and occupational health/ergonomics.

For availability of nursing courses, contact the College of Nursing.

The joint M.S.N./M.P.H. requires the following course work.

**M.P.H. COMMON REQUIREMENTS**

Students must complete courses listed under “Common Requirements”; see “Master of Public Health” above.

**M.S.N. CORE COURSES**

- 096:206 Nursing Science and Inquiry 3 s.h.
- 096:208 Leadership for Advanced Nursing Practice 3 s.h.
- 096:209 Health Systems, Economics, and Policy 3 s.h.
- 096:263 Informatics in Nursing and Health Care 3 s.h.

**Joint Pharm.D./M.P.H.**

The College of Pharmacy and the College of Public Health offer the joint Doctor of Pharmacy/Master of Public Health. The joint Pharm.D./M.P.H. requires 42 s.h. of postbaccalaureate credit. Students who complete the program are granted both degrees.

The Pharm.D./M.P.H. program helps students develop expertise in public health related to pharmacotherapy, health promotion, disease prevention, and medication safety. Its graduates may work in areas of interest common to pharmacy and public health, such as spread and treatment of disease, community health, and immunology; bioterrorism, terrorism, and preparedness; genetics; insurance; managed care; family and juvenile health; and protection of special populations. Employment opportunities
are available in hospitals and clinics and with health care providers; private practice; insurance and managed care organizations; local, county, state, and federal government; public health governmental agencies; and colleges and universities.

Separate admission to both programs is required. Applicants must be admitted to both programs before they can be admitted to the joint degree program.

Admission requirements include a bachelor’s degree or a minimum of 120 s.h. of undergraduate course work; an undergraduate cumulative g.p.a. of at least 3.00; one semester each of college algebra and biology; transcripts of all college course work; scores (preferably at or above the national median) on the Graduate Record Exam or the Pharmacy College Admission Test (PCAT); and three professional recommendations (University of Iowa recommendation forms are required).

Contact the College of Pharmacy and the College of Public Health for details.

The joint Pharm.D./M.P.H. requires the following course work.

**M.P.H. COMMON REQUIREMENTS**

Students must complete courses listed under “Common Requirements”; see “Master of Public Health” above.

**M.P.H. ELECTIVES**

Students select electives totaling 9 s.h. from one of the following public health areas: biostatistics, community and behavioral health, epidemiology, health communication, health policy and administration, occupational and environmental health, public health genetics, or an approved M.P.H. focus area (aging studies; global health; maternal, child, and family health; or nutrition and exercise). Electives are chosen in consultation with the student’s advisors in the Colleges of Pharmacy and Public Health.

**COURSES THAT COUNT TOWARD BOTH DEGREES**

The following required courses (12 s.h.) from the Pharm.D. curriculum also count as credit toward the M.P.H.: 046:130 Core Principles in Pharmaceutical Socioeconomics, 046:154 Endocrinology, Ophthalmology, Women’s and Men’s Health Therapeutics, 046:156 Cardiovascular Therapeutics, 046:165 Infectious Disease Therapeutics, and 069:133 Introduction to Human Pathology.

**PHARM.D. REQUIREMENTS**

The joint Pharm.D./M.P.H. program requires students to complete the professional curriculum of the Pharm.D. program (see “Doctor of Pharmacy” in the College of Pharmacy section of the Catalog).

Students must be enrolled in the College of Pharmacy in order to take College of Pharmacy courses.

**Joint D.V.M./M.P.H.**

The College of Veterinary Medicine at Iowa State University (ISU) and the College of Public Health at The University of Iowa offer the joint Doctor of Veterinary Medicine/Master of Public Health. The joint D.V.M./M.P.H. requires a minimum of 42 s.h. of postbaccalaureate credit. Students who complete the program are granted both degrees. The program prepares students for work as state veterinarians, as college and university faculty members, in local and state departments of public health, in the Public Health Commissions Corp., in state agricultural departments, and for public health positions in the military.

Separate admission to each program is required; applicants must be admitted to both programs before they can be admitted to the joint program. For M.P.H. admission requirements, see “Admission” later in this section.

The joint D.V.M./M.P.H. requires the following course work.

**M.P.H. COMMON REQUIREMENTS**

Students must complete courses listed under “Common Requirements”; see “Master of Public Health” above.

**M.P.H. ELECTIVES**

Students must earn at least 9 s.h. from the following courses. Courses marked with asterisks are offered through distance education.

- 173:111/175:111 International Health 3 s.h.
- 173:150 Introduction to Clinical Epidemiology 2 s.h.
- *173:155 Diagnostic Microbiology for Epidemiology 3 s.h.
- 173:157 Zoonotic Diseases (one-week course) 2 s.h.
- 173:225 Genetics and Epidemiology 4 s.h.
- 173:240 Epidemiology II: Advanced Methods 4 s.h.
- *173:251/175:251 Injury Epidemiology 3 s.h.
- 173:253/175:253 Epidemiology of Occupational Injuries 3 s.h.
REQUIRED D.V.M. COURSES
All of these (ISU courses):
- Principles of Public Health (VMPM 388) 3 s.h.
- Infectious Diseases and Preventive Medicine (VMPM 436) 2 s.h.
- Infectious Diseases and Preventive Medicine (VMPM 437) 3 s.h.
- Pharmacology and Therapeutics (VPP 443) 3 s.h.
- Laboratories in Public Health (VMPM 486) 1 s.h.

Admission

For detailed information about Graduate College policies, including application requirements and procedures, see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

Applicants to the M.P.H. program must have successfully completed one semester each of college algebra and biology.

All M.P.H. applicants must submit a Graduate College application form, three letters of reference, a statement of purpose that describes their interest in public health and identifies a specialty area, and a résumé highlighting professional experience in public health or in nursing. They also must submit scores on the Graduate Record Exam (GRE) General Test, LSAT, DAT, VCAT, GMAT, or another professional placement exam; scores must be at or above the median scores for test takers applying to similar programs.

International applicants who do not hold a baccalaureate degree from an accredited college or university in the United States, the United Kingdom, Canada (except Quebec), Australia, or New Zealand must score at least 600 (paper-based) or 250 (computer-based) on the Test of English as a Foreign Language (TOEFL). Foreign language proficiency is required for international applicants who do not hold a baccalaureate degree from an accredited college or university in the United States, the United Kingdom, Canada (except Quebec), Australia, or New Zealand. The required score is 700 (paper-based) or 213 (computer-based) on the Test of English as a Foreign Language (TOEFL). Applicants who score below those ranges are not considered for admission.

Application deadlines for fall entrance to the M.P.H. program are May 1 (or until the class is filled) for U.S. citizens and permanent residents, April 1 for international applicants. Application deadlines for spring entrance are November 1 for U.S. citizens and permanent residents, October 1 for international applicants. Application deadlines for summer entrance are April 1 for U.S. citizens and permanent residents, March 15 for international applicants.

Financial Support

A limited number of modest tuition awards are available each year for M.P.H. students. For information on financing education through jobs, grants, and loans, contact the University’s Office of Student Financial Aid.

Courses

170:101 Introduction to Public Health 3 s.h.
Concepts, structures, and activities in public health practice. Offered fall semesters and summer sessions.

170:171 Problems in Public Health arr.
Didactic material in public health, including tutorial, seminar, faculty-directed independent work (e.g., literature search, project, short research project).

170:172 Independent Study in Public Health arr.
In-depth pursuit of an area of special interest in public health.

Community service learning experience directly related to goals and objectives of a specific public health course; faculty-guided planning and reflection.

170:209 M.P.H. Practicum Experience 3-6 s.h.
The Department of Biostatistics prepares students for professional and academic careers in biostatistics. Graduates find positions in pharmaceutical, health care, and research companies and institutions; in universities and government agencies; and as consultants. The department also provides training for non-biostatistics students.

Current research interests in the Department of Biostatistics include computer intensive statistics, Bayesian methods, design and analysis of clinical trials, longitudinal data analysis, survival analysis, spatial modeling, analysis of data subject to missingness, time series, model selection, quality control, survey sampling, and public health statistics. Biostatistics faculty members work closely with both clinical and basic science investigators on the University of Iowa health sciences campus in the design and analysis of research projects.

Graduate Programs

The department offers two graduate degrees: Master of Science and Doctor of Philosophy. In addition, a biostatistics subtrack is available in the M.P.H.; see Master of Public Health Program in the Catalog.

Master of Science

The M.S. program provides training in the design of experiments and in analysis of data related to biomedical or public health problems. It emphasizes mathematical, statistical, and computer methods for dealing with quantitative information, and provides opportunities for students to gain statistical consulting experience with a variety of problems.

Graduates find career opportunities in many areas, including pharmaceuticals, health care, research companies and institutions, consulting firms, universities, and government agencies.

The M.S. requires a minimum of 38 s.h. of graduate credit. Students must maintain a g.p.a. of at least 3.00. Those who receive a grade of C on 7 s.h. or more of course work may be dismissed from the program.

All M.S. students are required to complete an in-depth preceptorship under the direction of a departmental faculty member and a final comprehensive-style examination.

REQUIRED COURSES

All of these:
171:173 Intermediate Design of Sample Surveys 3 s.h.
171:178 Biostatistical Computing 3 s.h.
171:201-171:202 Biostatistical Methods I-II 8 s.h.
171:203 Biostatistical Methods in Categorical Data 3 s.h.
171:266 Statistical Methods in Clinical Trials 3 s.h.
171:280 Preceptorship in Biostatistics 3 s.h.
173:140 Epidemiology I: Principles 3 s.h.

One of these sequences:
22S:193-22S:194 Statistical Inference I-II (preferred for Ph.D. students) 6 s.h.

One of these:
002:169 Introduction to Bioinformatics 4 s.h.
055:122 Computational Genomics 3 s.h.
061:157 General Microbiology 5 s.h.
069:133 Introduction to Human Pathology 4 s.h.
096:114 Human Pathophysiology: Organ Systems 3 s.h.
Biostatistics

096:115 Human Pathophysiology: Cellular/Neurology/Immunology 3 s.h.
127:191 Human Molecular Genetics 3 s.h.
170:101 Introduction to Public Health Promotion and Disease Prevention 3 s.h.
174:102 Introduction to the U.S. Health Care System 3 s.h.
175:197 Environmental Health 3 s.h.

ELECTIVES
At least 3 s.h. from these:
22S:138 Bayesian Statistics 3 s.h.
22S:161 Applied Multivariate Analysis 3 s.h.
22S:248 Computer Intensive Statistics 3 s.h.
22S:255 Linear Models 4 s.h.
171:230 Statistical Data Mining in Public Health 3 s.h.
171:242 Applied Survival and Cohort Data Analysis 3 s.h.
171:251 Theory of Biostatistics I 4 s.h.
171:252 Theory of Biostatistics II 4 s.h.
171:261 Survival Data Analysis 3 s.h.
171:262 Analysis of Categorical Data 3 s.h.
171:264 Longitudinal Data Analysis 3 s.h.
171:282 Problems/Special Topics in Biostatistics 1 s.h.
185:103 Microarray Analysis and Statistics in Bioinformatics 3 s.h.
185:272 Population and Quantitative Genetics 3 s.h.
185:274 Theory of Statistical Genetics 3 s.h.

Doctor of Philosophy

The Ph.D. program prepares students for professional and academic careers in biostatistics, especially for positions that emphasize developing and applying statistical methodology to solve important biological and public health problems.

The Ph.D. requires a minimum of 79 s.h. of graduate credit. Doctoral students must maintain a g.p.a. of at least 3.00. Those who receive a grade of C on 7 s.h. or more of course work may be dismissed from the program.

All Ph.D. students must successfully complete a qualifying examination, a comprehensive examination, and a dissertation—a substantial scholarly treatise. The research topic and content, which vary depending on the program of study, must be approved by the student’s dissertation committee. Other degree requirements include approved electives chosen from Department of Biostatistics and other University of Iowa courses.

Requirements for the Ph.D. are as follows.

MASTER OF SCIENCE BACKGROUND

Ph.D. students must take the following courses (26 s.h.) required for the Master of Science in biostatistics. Students who have completed equivalent course work at other institutions may request waivers and/or transfers of credit. Students who earned a Master of Science in biostatistics at The University of Iowa automatically receive credit for these courses.

One of these sequences:
22S:193-22S:194 Statistical Inference I-II 6 s.h.

All of these:
171:201-171:202 Biostatistical Methods I-II 8 s.h.
*171:203 Biostatistical Methods in Categorical Data 3 s.h.
173:140 Epidemiology I: Principles 3 s.h.
One approved biology/public health course

*171:241 may be substituted for 171:203 if it was taken fall 2006 or earlier.

CORE COURSES

22S:255 Linear Models 4 s.h.
171:251 Theory of Biostatistics I 4 s.h.
171:252 Theory of Biostatistics II 4 s.h.
171:261 Survival Data Analysis 3 s.h.
171:262 Analysis of Categorical Data 3 s.h.
171:264 Longitudinal Data Analysis 3 s.h.

ELECTIVES

With approval of their advisors, students choose 15-22 s.h. of graduate-level courses in biostatistics, statistics, genetics, microbiology, and so forth. They may count a maximum of 5 s.h. earned in nonquantitative courses (e.g., community and behavioral health, epidemiology, microbiology) toward the requirement. They also may count courses required for the Master of Science that are not listed under “Master of Science Background,” above, toward the requirement.

Ph.D. students may take the following courses.

22S:138 Bayesian Statistics 3 s.h.
22S:156 Applied Time Series Analysis 3 s.h.
22S:161 Applied Multivariate Analysis 3 s.h.
22S:195 Probability and Stochastic Processes I 3 s.h.
22S:248 Computer Intensive Statistics 3 s.h.
22S:256 Multivariate Analysis 3 s.h.
171:243 Cohort Data Analysis 1 s.h.
171:280 Preceptorship in Biostatistics (in addition to preceptorship required for M.S.) 3 s.h.
171:290 Advanced Biostatistics Seminar 1-3 s.h.
185:274 Theory of Statistical Genetics 3 s.h.

DISSERTATION
171:300 Thesis/Dissertation (at least two semesters in residence) 10-17 s.h.

Application
For detailed information about Graduate College policies, including application requirements and procedures, see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

The biostatistics faculty considers several factors when evaluating applications for admission, including GRE scores, grade-point averages, letters of recommendation, intent and motivation for graduate study, and research interests. A student with deficiencies in one area may be admitted if all other components of his or her application are very strong.

All M.S. and Ph.D. program applicants must hold a baccalaureate degree, have a cumulative g.p.a. of at least 3.00, and have taken the Graduate Record Examination (GRE) General Test. International applicants who do not hold a baccalaureate degree from an accredited college or university in the United States, the United Kingdom, Canada (except Quebec), Australia, or New Zealand must score at least 600 (paper-based), 250 (computer-based), or 100 (Internet-based) on the Test of English as a Foreign Language (TOEFL). International applicants who score 550-599 (paper-based), 213-249 (computer-based), or 81-99 (Internet-based) are required to take English fluency courses. Applicants who score below those ranges are not considered for admission.

All biostatistics applicants and students are required to have strong written and oral communication skills.

All M.S. applicants must be competent in at least one computer programming language, preferably Fortran, C, or C++. They also must have mathematical sciences training in methods and techniques of single variable and multivariable differential and integral calculus, and in linear algebra.

Completion of an M.S. program in statistics or biostatistics generally is required for admission to the Ph.D. program.

Application Deadlines
M.S. (fall entrance): January 15 (early), March 15 (late)
Ph.D. (fall entrance): January 15 (early), March 15 (late)

Financial Support
A limited number of teaching and research assistantships are available. Assistantships offer financial support and resident tuition with a partial tuition scholarship, and provide valuable on-the-job training experiences.

For information on financing education through jobs, grants, and loans, contact the Office of Student Financial Aid.

Resources
Department of Biostatistics resources and activities include the Biostatistical Consulting Center, the Clinical Trials Statistical and Data Management Center, and the Center for Public Health Statistics. The Biostatistics Consulting Center provides opportunities for students to gain valuable experience working with faculty and staff in the health sciences at The University of Iowa. The Clinical Trials Statistical and Data Management Center serves the statistical design, data management, and analysis needs of a variety of multicenter clinical trials, including studies of new treatments for acute ischemic stroke and studies of islet transportation. The Center for Public Health Statistics facilitates the collection, statistical analyses, and dissemination of health data in support of the University’s research, teaching, and service missions and in partnership with the Iowa Department of Public Health.

Courses
171:161 Introduction to Biostatistics 3 s.h.
Application of statistical techniques to biological data, including descriptive statistics; probability; normal, binomial, and Poisson distributions; sampling distributions; tests of significance; confidence intervals; analysis of frequency data; simple linear regression. Prerequisite: college algebra.

171:162 Design and Analysis of Biomedical Studies 3 s.h.
Simple and multiple linear regression and correlation; one- and two-way layout considerations in planning experiments; factorial experiments; multiple comparison techniques; orthogonal contrasts. Offered spring semesters. Prerequisite: 171:161 or equivalent. Same as 22S:140.

171:163 Introduction to the Design of Sample Surveys 3 s.h.

171:164 Research Data Management 3 s.h.
Overview of problems encountered in gathering and processing data from biomedical investigations; introduction to data...
management techniques useful in biomedical studies; introduction to Microsoft Access. Offered fall semesters of odd years. Prerequisite: Fortran or C programming capability.

171:168 Introduction to Biostatistical Computing 1 s.h.

171:171 Statistical Methods in Oncology 1 s.h.
Statistical methods used in oncology, hematology, and cancer.

171:173 Intermediate Design of Sample Surveys 3 s.h.
Challenges in designing sample surveys; emphasis on construction and number of strata, unbiased ratio estimators, multistaged sampling, estimation of variance in complex surveys, double sampling, sampling frame construction problems, panel studies, and problems due to nonresponse. Offered fall semesters. Prerequisite: 22S:154 or 22S:194 or 171:202 or equivalent.

171:174 Introductory Longitudinal Data Analysis 3 s.h.
Statistical models and estimation methods used to analyze correlated data (e.g., the same subject measured repeatedly); focus on use of statistical software. Offered fall semesters of even years. Pre- or corequisite: 171:161 or 171:162 or 22S:152. Same as 22S:160.

171:178 Biostatistical Computing 3 s.h.
Groundwork in SAS and R programming; emphasis on data management, Monte Carlo simulations, and expectation maximization techniques; C and C++ skills recommended. Offered fall semesters. Corequisite: 171:201 or consent of instructor.

171:201 Biostatistical Methods I 4 s.h.
Problem-oriented probability distributions, moments, estimation, parametric and nonparametric inference for one-sample and two-sample problems, analysis of frequency data, linear regression, and correlation analysis, with emphasis on use of computers. Offered fall semesters. Prerequisites: two semesters of calculus and consent of instructor.

171:202 Biostatistical Methods II 4 s.h.
Continuation of 171:201, which is prerequisite; linear regression and correlation, multiple linear regression, multiple factor experiments, multiple comparisons, orthogonal contrasts, block and split plot designs, confounding interactions, and mixed models. Offered spring semesters. Prerequisite: 171:201.

171:203 Biostatistical Methods in Categorical Data 3 s.h.

171:230 Statistical Data Mining in Public Health 3 s.h.
Introduction to supervised statistical methods (e.g., regression, decision tree, neural network) and unsupervised methods (e.g., association rules and clustering) for data analysis in health-related applications. Offered spring semesters of even years. Prerequisites: 171:202, and 22S:153 or 22S:193; or consent of instructor.

171:241 Applied Categorical Data Analysis 3 s.h.
Overview of methods to analyze categorical data from health science investigations; estimation of rates and risks, measures of relative risk, stratified analysis, logistic regression analysis. Offered fall semesters. Prerequisites: 171:162 and 173:140.

171:242 Applied Survival and Cohort Data Analysis 3 s.h.
Nonparametric and semiparametric methods for survival data; methods of directly comparing standardized rates and standardization mortality ratios; Poisson regression for cohort data. Offered spring semesters of odd years. Prerequisites: 171:203 and 171:241.

171:243 Cohort Data Analysis 1 s.h.
Methods of comparing direct standardized rates and standardized mortality ratios; Poisson regression for cohort data. Offered spring semesters of odd years. Prerequisites: 171:241 and consent of instructor.

171:251 Theory of Biostatistics I 4 s.h.
Intermediate study of sufficiency, exponential families, methods of estimation, uniform minimum variance unbiasedness, information, likelihood theory, confidence intervals, the Neyman-Pearson lemma, asymptotic theory and its applications. Offered fall semesters of even years. Prerequisites: 22S:154 or 22S:194, and 171:202 or equivalent.

171:252 Theory of Biostatistics II 4 s.h.
Nonparametric hypothesis tests, semiparametric estimation, generalized linear models, generalized estimation equations, generalized linear mixed models, EM algorithm, computer-intensive methods; application of theory learned in 171:251 to classical and new methods in biostatistics. Offered spring semesters of odd years. Prerequisite: 171:251.

171:261 Survival Data Analysis 3 s.h.
Types of censoring and truncation; survival function estimation; life tables; parametric inference using exponential, Weibull, and accelerated failure time models; nonparametric tests; sample size calculation; Cox regression with stratification and time-dependent covariates; regression diagnostics; competing risks; analysis of correlated survival data. Offered fall semesters of odd years. Prerequisites: 22S:154 or 22S:194, and 171:202 or equivalent. Same as 22S:225.

171:262 Analysis of Categorical Data 3 s.h.
Models for discrete data, distribution theory, maximum likelihood and weighted least squares estimation for categorical data, tests of fit, models selection. Offered spring semesters. Prerequisites: 22S:154 or 22S:194, 22S:164 or 171:202, or consent of instructor. Same as 22S:220.

171:264 Longitudinal Data Analysis 3 s.h.
Introduction to statistical methodology for analyzing data from observational and experimental studies in which the response variable from each subject is measured repeatedly; emphasis on use of statistical software packages and specialized programs. Offered spring semesters of odd years. Prerequisites: 22S:154 or 22S:194, and 171:202 or equivalent.

171:266 Statistical Methods in Clinical Trials 3 s.h.
Survey of statistical methods commonly used in clinical trials; methodological perspective on the design, conduct, and analysis of trials; emphasis on Phase III randomized controlled clinical trials. Offered spring semesters. Prerequisites: 22S:154 or 22S:194, and 171:202.

171:271 Advanced Survival Analysis 3 s.h.
Counting process/martingale theory leading to asymptotic results of survival methods; semiparametric regression of accelerated failure time and additive hazard models; multivariate survival models for clustered, multiple event, and recurrent event data; special topics. Prerequisite: 171:261.

171:280 Preceptorship in Biostatistics arr.
Work experience using knowledge and skills acquired in classroom; arranged in conjunction with ongoing departmental or collegiate activities or with governmental agencies or private industry; preparation of prospectus and presentation of research results in a department seminar. Repeatable.

171:281 Independent Study in Biostatistics arr.
In-depth pursuit of an area of special interest in biostatistics requiring substantial creativity and independence. Repeatable.

171:282 Problems/Special Topics in Biostatistics arr.
Didactic material in biostatistics; may include tutorials, seminars, faculty-directed independent work (e.g., literature search, project, short research project). Repeatable.

171:290 Advanced Biostatistics Seminar 1-3 s.h.
Current topics; supervised experience in reading and interpreting biostatistical literature. Offered spring semesters. Prerequisite: consent of instructor.

171:295 Research in Biostatistics arr.
Research that may lead to a dissertation. Repeatable.

Repeatable.
The Department of Community and Behavioral Health examines the relationship between human behavior and community health and focuses on creating effective strategies for change. Its faculty members come from a variety of disciplines within the social and health sciences, drawn together by an interest in health behavior and promoting healthy communities. Community and behavioral health students learn how to design, implement, and evaluate interventions directed toward identified public health problems in communities. They learn how public and institutional policy, the media, and community organizations can promote healthy behavior and effect positive change.

**Graduate Programs**

The department offers two graduate degrees: Master of Science, with a subtrack in health communication; and Doctor of Philosophy, with subtracks in addiction studies and health communication. It also offers Master of Public Health subtracks in community and behavioral health, and health communication; and Master of Public Health focus areas in nutrition and exercise, and maternal, child, and family health; see Master of Public Health Program in the Catalog.

**Master of Science**

The M.S. program prepares students for research and professional positions in community and behavioral health or for Ph.D. study in community and behavioral health. The M.S. is offered with an optional subtrack in health communication.

The M.S. requires 35 s.h. of graduate credit, including a thesis. During the first semester, students work with their academic advisor to develop a plan of study that satisfies their interests and professional goals as well as the program’s requirements. Students are required to attend departmental seminars and to complete the following courses.

**COLLEGE OF PUBLIC HEALTH CORE**

All of these (9 s.h.):
- 171:161 Introduction to Biostatistics 3 s.h.
- 172:101 Introduction to Health Promotion and Disease Prevention 3 s.h.
- 173:140 Epidemiology I: Principles 3 s.h.

**BEHAVIORAL AND SOCIAL SCIENCES CORE**

Three of these (9 s.h.):
- 172:106 Designing and Implementing Interventions 3 s.h.
- 172:110 Community Development in Public Health 3 s.h.
- 172:130 Social Determinants of Health 3 s.h.
- 172:135 Health Disparities and Cultural Competence 2-4 s.h.
- 172:150 Health Behavior and Health Education 3 s.h.
- 172:173/113:185 Medical Anthropology 3 s.h.
- 172:185 Communicating with the Community 3 s.h.
- 172:240 Health Communication 3 s.h.
- 172:242 Persuasion and Health 3 s.h.
- 172:246 Health Communication Campaigns 3 s.h.

**RESEARCH METHODS CORE**

Two of these (6 s.h.):
- 07P:249 Factor Analysis and Structural Equation Models 3 s.h.
07P:252 Introduction to Multivariate Statistical Methods 3 s.h.
044:106 Foundations of GIS 3 s.h.
171:162 Design and Analysis of Biomedical Studies 3 s.h.
172:181 Evaluation I: Theory and Applications 3 s.h.
172:183 Qualitative Research for Public Health 3 s.h.
172:202/113:202 Ethnographic Field Methods 3 s.h.
172:282 Evaluation II: Design and Methods 3 s.h.
172:285 Research Methods in Community and Behavioral Health 3 s.h.

CONTENT AREA ELECTIVES

Students work with their advisors to select at least 5 s.h. of course work appropriate to their educational goals and emphasis areas. They may choose from any community and behavioral health courses not already taken, other College of Public Health courses, or other University of Iowa graduate-level courses.

THESIS

The thesis requirement is 6 s.h.

M.S. Subtrack in Health Communication

The M.S. subtrack in health communication is designed for students who wish to gain skill in designing, evaluating, and implementing effective communication strategies and messages that speak to the health needs of diverse audiences. The program addresses clinician-patient interaction, family communication, group and organizational communication, and mass media and web-based campaigns.

The health communication subtrack combines the M.S. core course work with additional concentrated learning opportunities. Students fulfill the regular M.S. requirements, using the health communication core to satisfy the content area electives requirement.

HEALTH COMMUNICATION CORE

Four of these (12 s.h.):
036:371 Communication Theory 3 s.h.
172:140/019:160 Media and Health Communication 3 s.h.
172:240/036:270 Health Communication 3 s.h.
172:242 Persuasion and Health 3 s.h.
172:246/036:379 Health Communication Campaigns 3 s.h.

M.P.H. Subtracks and Focus Areas

M.P.H. Subtrack in Health Communication

The M.P.H. subtrack in health communication prepares public health practitioners for a variety of employment opportunities in health communication strategies, health communication in groups and organizations, and mass media/web-based campaigns in health promotion. See Master of Public Health Program in the Catalog.

M.P.H. Subtrack in Community and Behavioral Health

The M.P.H. subtrack in community and behavioral health prepares public health practitioners for a variety of positions in community development, health program implementation, and health education. See Master of Public Health Program in the Catalog.

M.P.H. Focus Area in Maternal, Child, and Family Health

The M.P.H. focus area in maternal, child, and family health prepares public health practitioners for employment in maternal, child, and family health positions that involve identifying problems, analyzing data, and developing solutions to maternal, child, and family health issues. See Master of Public Health Program in the Catalog.

M.P.H. Focus Area in Nutrition and Exercise

The M.P.H. focus area in nutrition and exercise prepares public health practitioners for employment in community health promotion programs where nutrition and exercise research is applied. Students learn skills for working with clients to make behavioral changes such as altering diet and exercise patterns. See Master of Public Health Program in the Catalog.

Doctor of Philosophy

The Ph.D. program prepares individuals for academic, research, and policy-making work in the social and behavioral health sciences. This fast-growing academic specialty offers many career opportunities in academic and research institutions. The Ph.D. is offered with subtracks in addiction studies and health communication.
The Ph.D. requires at least 75 s.h. of graduate credit, including credit from a master’s degree. Students must successfully complete a qualifying exam, a comprehensive exam, and a dissertation—a substantial scholarly treatise. The research topic must be approved by the student’s dissertation committee.

During the first semester, students work with their academic advisors to develop a plan of study that satisfies their interests and professional goals as well as the program’s requirements. Students are required to attend departmental seminars and to complete the following courses.

**COLLEGE OF PUBLIC HEALTH CORE**

All of these (9 s.h.):
- 171:161 Introduction to Biostatistics 3 s.h.
- 172:101 Introduction to Health Promotion and Disease Prevention 3 s.h.
- 173:140 Epidemiology I: Principles 3 s.h.

**BEHAVIORAL AND SOCIAL SCIENCES CORE**

Seven of these (21 s.h.):
- 172:106 Designing and Implementing Interventions 3 s.h.
- 172:110 Community Development in Public Health 3 s.h.
- 172:130 Social Determinants of Health 3 s.h.
- 172:131/113:184 Anthropology and International Health 3 s.h.
- 172:135 Health Disparities and Cultural Competence 2-4 s.h.
- 172:150 Health Behavior and Health Education 3 s.h.
- 172:173/113:185 Medical Anthropology 3 s.h.
- 172:185 Communicating with the Community 3 s.h.
- 172:240 Health Communication 3 s.h.
- 172:242 Persuasion and Health 3 s.h.
- 172:246 Health Communication Campaigns 3 s.h.

**RESEARCH METHODS CORE**

Five of these (15 s.h.):
- 07P:249 Factor Analysis and Structural Equation Models 3 s.h.
- 07P:252 Introduction to Multivariate Statistical Methods 3 s.h.
- 034:214 Introduction to Sociological Data Analysis 3 s.h.
- 034:215 Sampling, Measurement, and Observation Techniques 3 s.h.
- 034:216 Linear Models in Sociological Research 3 s.h.
- 034:218 Advanced Statistical Modeling of Data 3 s.h.
- 034:219 Structural Equation Modeling 3 s.h.
- 044:106 Foundations of GIS 3 s.h.

- 171:162 Design and Analysis of Biomedical Studies 3 s.h.
- 172:181 Evaluation I: Theory and Applications 3 s.h.
- 172:183 Qualitative Research for Public Health 3 s.h.
- 172:202/113:202 Ethnographic Field Methods 3 s.h.
- 172:282 Evaluation II: Design and Methods 3 s.h.
- 172:285 Research Methods in Community and Behavioral Health 3 s.h.

**CONTENT AREA ELECTIVES**

Students work with their advisors to select at least 18 s.h. of course work appropriate to their educational goals and emphasis areas. They may choose from any Department of Community and Behavioral Health courses they have not already taken, other College of Public Health courses, or other University of Iowa graduate-level courses.

**DISSERTATION**

The dissertation requirement is 12 s.h.

**Ph.D. Subtrack in Addiction Studies**

The Ph.D. subtrack in addiction studies is designed for students who wish to gain skill in developing and evaluating addiction prevention and intervention programs. This area of study and practice examines addiction prevention and treatment from both a public health and a biopsychosocial perspective.

The addiction studies subtrack combines core course work from the Ph.D. curriculum with additional specialized training. Students fulfill the regular Ph.D. requirements, using the addiction studies core to satisfy the content area electives requirement.

**ADDICTION STUDIES CORE**

Students work with their advisor to select 18 s.h. of addictions studies course work offered by the department. Courses focusing on treatment of substance abuse and comorbid psychopathology, prevention of substance abuse and comorbid psychopathology, and assessment and diagnosis of addiction and comorbid psychopathology are under development.

**Ph.D. Subtrack in Health Communication**

The Ph.D. subtrack in health communication is designed for students who wish to prepare for academic, research, and policy-making careers in the area of health communication.
The health communication subtrack combines the core course work from the Ph.D. curriculum with additional specialized training. Students fulfill the regular Ph.D. requirements, using the health communication core to satisfy the content area electives requirement.

HEALTH COMMUNICATION CORE
Four of these (12 s.h.):
- 036:371 Communication Theory 3 s.h.
- 172:140/019:160 Media and Health 3 s.h.
- 172:240/036:270 Health Communication 3 s.h.
- 172:242 Persuasion and Health 3 s.h.
- 172:246/036:379 Health Communication Campaigns 3 s.h.

Admission
For detailed information about Graduate College policies, including application requirements and procedures, see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

The community and behavioral health faculty considers several factors when evaluating applications for admission, including scores on the Graduate Record Exam, grade-point averages, letters of recommendation, intent and motivation for graduate study, and research interests. A student with deficiencies in one area may be admitted if all other components of his or her application are very strong.

All applicants must submit academic transcripts, three letters of recommendation, and a statement of purpose. Forms are available from the Department of Community and Behavioral Health or on its web site (see “Prospective Students”).

Applicants to the M.S. program must have a cumulative grade-point average of at least 3.00 and should hold a bachelor’s degree from an accredited college or university. No specific undergraduate major is required. Preference is given to applicants with Graduate Record Exam verbal scores of at least 520, quantitative scores of at least 620, and analytical writing scores of at least 4.0. Ph.D. program applicants also must submit their masters thesis, or if no thesis is available, a sample of their scholarly writing.

International applicants who do not hold a baccalaureate degree from an accredited college or university in the United States, the United Kingdom, Canada (except Quebec), Australia, or New Zealand must score at least 600 (paper-based), 250 (computer-based), or 100 (Internet-based) on the Test of English as a Foreign Language (TOEFL). International applicants who score 550-599 (paper-based), 213-249 (computer-based), or 79-99 (Internet-based) are required to take English fluency courses. Applicants who score below those ranges are not considered for admission.

APPLICATION DEADLINES
Fall entry: April 1
Spring entry: October 1
Applications received by January 20 receive maximum consideration for financial aid.

Financial Support
Several forms of financial support are available, including scholarships and awards, student loans, and graduate assistantships.

Graduate assistantships provide a stipend and entitle students to resident tuition and reduced health insurance costs. Research assistantships are competitive and are awarded according to department need and student merit. Most graduate students do not receive assistantships until their second year in the program. Scholarships and fellowships are available through federal agencies, such as the Centers for Disease Control and the National Institutes of Health, and from private foundations.

Resources
The department houses the Iowa Tobacco Research Center, Prairielands Addiction Technology Transfer Center, and the Prevention Research Center. M.S. and Ph.D. students may be asked to assist with ongoing research projects.

The Iowa Tobacco Research Center supports innovative research and education on tobacco use and prevention, as well as provision and support of culturally competent and accessible
smoking cessation services. The Prairielands Addiction Technology Transfer Center provides state-of-the-art training, curricula, and resources on substance use issues for counselors, health care professionals, and members of the community. The Prevention Research Center focuses on improving the health of rural Iowans.

Courses

172:101 Introduction to Health Promotion and Disease Prevention 3 s.h.
Basic concepts, strategies, and methods of health promotion and disease prevention; health promotion in the context of public health, theories and principles that underpin health promotion; overview of policy formation and health promotion planning, implementation, evaluation. Offered spring semesters. Prerequisite: graduate standing or consent of instructor.

172:106 Designing and Implementing Interventions 3 s.h.
Background and skills necessary to plan a public health intervention program; program planning models. Offered fall semesters. Prerequisites: 172:150, and admission to College of Public Health or consent of instructor.

172:110 Community Development in Public Health 3 s.h.
Concepts, strategies, and methods of community development as major approaches to creating healthy communities and promoting social change; role of public health practitioners as agents of change in organizations, communities. Offered fall semesters. Prerequisite: graduate standing or consent of instructor.

172:115 Community Preventive Programs and Services 2 s.h.
Current public health problems and associated community preventive interventions. Offered fall semesters.

172:122 Maternal, Child, and Family Health 3 s.h.
Major issues, policies, and programs for health of women, children, and families in the United States; social, political, and economic determinants. Offered spring semesters. Prerequisites: 096:030 and 173:140, or consent of instructor.

172:130 Social Determinants of Health 3 s.h.
Relationship between social factors and health, with focus on family, neighborhood, community, and social group levels. Offered spring semesters. Prerequisite: graduate standing or consent of instructor.

172:131 Anthropology and International Health 3 s.h.
Anthropological contributions to and critiques of the international health enterprise; case studies illustrating anthropology and international health’s intersection, and their differences. Offered spring semesters. Same as 113:184, 152:184.

172:133 The Anthropology of Women’s Health 3 s.h.
How female gender intersects with culture, environment, and political economy to shape health and illness; reproductive health, violence, drug use, cancer; readings in anthropology and public health. Offered fall semesters. Prerequisite: 113:003 or 113:010 or 131:010 or graduate standing or consent of instructor. Same as 113:133, 131:133.

172:135 Health Disparities and Cultural Competence 2-4 s.h.
Same as 046:377, 096:125.

172:140 Media and Health 3 s.h.
Same as 019:160.

172:144 Physician-Patient Communication 3 s.h.
Research on characteristics and qualities of physician-patient talk and patient outcomes. Prerequisite: 036:060 or graduate standing or consent of instructor. Same as 036:161.

172:150 Health Behavior and Health Education 3 s.h.
Common theories of health behavior and health education and their application to varied public health problems and settings. Offered spring semesters. Prerequisite: graduate standing or consent of instructor.

172:160 Substance Use and Misuse in America 3 s.h.
Same as 031:173.

172:161 Substance Abuse and Mental Health 3 s.h.
Prevalence and defining characteristics of substance-related and mental health disorders; gender, cultural, ethnic, life-span, and socioeconomic differences, at individual and community levels; implication for primary and secondary prevention. Offered spring semesters. Prerequisites: graduate standing and substance abuse course, or consent of instructor.

172:163 Tobacco Use: Prevention and Control 3 s.h.
Tobacco use, particularly cigarette smoking, as a major public health concern; key factors contributing to tobacco use; strategies to reduce smoking in communities.

172:170 Special Topics arr.
Didactic material in community and behavioral health that may include tutorial, seminar, or faculty-directed independent work (e.g., literature search, project, short research project). Prerequisite: consent of instructor.

172:173 Medical Anthropology 3 s.h.
Same as 113:185, 152:185.

172:181 Evaluation I: Theory and Applications 3 s.h.
Program evaluation methods in public health; overview of evaluation theory and models of program evaluation, examples of public health program evaluation, criteria for judging evaluation methods and products. Offered fall semesters. Prerequisite: public health student standing or consent of instructor.

172:183 Qualitative Research for Public Health 3 s.h.
Introduction to methods and theories of qualitative research that facilitate description and explanation of social phenomena related to health behavior, illness, prevention, and treatment in the public health domain. Offered fall semesters. Prerequisite: graduate standing or consent of instructor.

172:185 Communicating with the Community 3 s.h.
Communication skills for research and practice settings, taught from a cultural perspective with reference to gender, age, ethnicity; individual and constructive interviewing, public speaking, conducting focus groups. Offered fall semesters. Prerequisite: graduate standing or consent of instructor.

172:202 Ethnographic Field Methods 3 s.h.
Same as 113:202.

172:240 Health Communication 3 s.h.
Theories, concepts, research associated with health communication; interpersonal and mass communication approaches. Same as 036:270.

172:242 Persuasion and Health 3 s.h.
Theories of persuasion and social influence; attitude formation, relationship between attitudes and behavior, persuasion theories and their applications across health topics.

172:246 Health Communication Campaigns 3 s.h.
Design and analysis of health campaigns; theory, practice, methods; mass media, community, organization, and interpersonal approaches. Same as 036:379.

172:270 Independent Study in Community and Behavioral Health arr.
Pursuit of an interest in community and behavioral health requiring substantial creativity and independence. Repeatable.
172:271 Research in Community and Behavioral Health

Advanced research in community and behavioral health. Repeatable.

172:282 Evaluation II: Design and Methods 3 s.h.
Research design and methodology for evaluation of public health and related programs; causality, evaluation theory, threats to validity, selection and comparison of research designs, sample selection and size, survey and scale construction, quantitative and qualitative data collection and analysis, data management, reporting; based on case study of an infant mortality prevention program. Offered spring semesters. Prerequisites: 172:181 and a course in biostatistics or statistics.

172:285 Research Methods in Community and Behavioral Health 3 s.h.
Overview of quantitative research methods for community and behavioral health; major elements of behavioral and social science research, critical evaluation of research related to community and behavioral health, application of research methods in public health practice; opportunities for students to build skills for evaluation of research and application of quantitative research methods. Prerequisite: 171:161 or 173:140.

172:300 CBH Thesis/Dissertation
Epidemiology

Head: James C. Torner
Professors: Trudy Burns (Pediatrics), Elizabeth Chrischilles (Pharmacy), Michael Cohen (Pathology/Urology), Gary Doern (Pathology), Claibourne Dungy (Pediatrics), Laurence Fuortes (Occupational and Environmental Health), Greg Gray (International Programs), Loreen Herwaldt (Internal Medicine), Steve Levy (Preventive and Community Dentistry), Charles Lynch (Pathology), Larry Mahoney (Pediatrics), Jeffrey Murray (Pediatrics/Biological Sciences/Pediatric Dentistry), Corinne Peek-Asa (Occupational and Environmental Health), Gary Rosenthal (Internal Medicine), Audrey Saftlas, Elaine Smith (Preventive and Community Dentistry), Linda Snetselaar (Internal Medicine), James Torner (Surgery/Neurosurgery), Don VanDyke (Pediatrics), Robert Wallace (Internal Medicine), Mary Wilson (Internal Medicine), Craig Zwerling (Occupational and Environmental Health)
Professors emeriti: Herman Hein (Pediatrics), Ronald Lauer (Pediatrics), Michael Pfaller (Pathology), Helmut Schrott (Internal Medicine), Robert Woolson (Biostatistics)
Adjunct professors: James Cerhan, Bradley Doebbeling, Susan Joslyn, Paul Pomrehn, M. Patricia Quinlisk, James Roth
Associate professors: John Brooks (Pharmacy), Leslie Dennis, R. William Field (Occupational and Environmental Health), David Katz (Internal Medicine), Jennifer Robinson, Wayne Sanderson (Occupational and Environmental Health)
Adjunct associate professors: Caroline Carney Doebbeling, Neal Kohatsu, Jose Sanchez
Assistant professors: Catherine Bradley (Obstetrics and Gynecology), Elizabeth Clark (Family Medicine), Valerie Forman Hoffman (Internal Medicine), Philip Poigreen (Internal Medicine), Paul Romitti, Tara Smith
Adjunct assistant professors: Patrick Blair, Radford Davis, Lucy DesJardin, James Gill, Jesse Hostetter, Badrinath Koney (Urology), Maureen McCue, Michael Pentella, Christine Petersen, Shannon Putnam, Sheila Riggs, Mario Schootman, Anne Tabor
Graduate degrees: M.S., Ph.D. in Epidemiology; M.S. in Clinical Investigation
Web site: http://www.public-health.uiowa.edu/epi

The Department of Epidemiology focuses on surveillance for disease, risk factors for disease in the general population, behavioral factors in disease, use and outcome of health interventions and care, and the establishment and evaluation of disease control measures in the community. Students are guided by faculty members whose research interests include epidemiology of communication disorders, pharmacoepidemiology, cancer epidemiology, infectious disease epidemiology, adverse reproductive outcome epidemiology, anatomic pathology, genetics, cardiovascular disease, nutrition, smoking cessation, epidemiology of reproduction, dental epidemiology, clinical epidemiology, neuroepidemiology, meta-analysis, intervention trials, international health, and effects of aging.

Graduate Programs

The department offers three graduate degrees: Master of Science and Doctor of Philosophy in epidemiology, and Master of Science in clinical investigation. In addition, an epidemiology subtrack is available in the M.P.H.; see Master of Public Health Program in the Catalog.

Master of Science in Epidemiology

The Master of Science in epidemiology prepares graduate students for professional careers in which specialized knowledge of epidemiological methods and analytic techniques are essential. Graduates find employment in local, state, and federal health agencies, academic institutions, and private enterprise.

The M.S. in epidemiology requires 38 s.h. of graduate credit and is offered with or without thesis. Students must maintain a g.p.a. of at least 3.00. Those who receive a grade of C on 7 s.h. or more of course work may be dismissed from the program. Students who choose to complete the degree without thesis are required to pass a comprehensive examination.

Students are required to attend departmental seminars and journal club. They also must present one scientific poster at an international, national, regional, state, university, or department poster session.

The following courses are required.

REQUIRED COURSES

All of these:
171:161 Introduction to Biostatistics 3 s.h.
171:162 Design and Analysis of Biomedical Studies 3 s.h.
171:241 Applied Categorical Data Analysis 3 s.h.
173:140 Epidemiology I: Principles 3 s.h. (web-based course cannot be used)
173:160 Introduction to Epidemiologic Data Analysis With Computers 2 s.h.
173:240 Epidemiology II: Advanced Methods 4 s.h.

One of these:
069:133 Introduction to Human Pathology 4 s.h.
069:270 Pathogenesis of Major Human Diseases 3 s.h.

One of these:
173:255 Epidemiology of Infectious Diseases 3 s.h.
173:260 Epidemiology of Chronic Diseases 3 s.h.

One of these:
172:150 Health Behavior and Health Education 3 s.h.
173:280 Introduction to Health Care Organization and Policy 3 s.h.
175:197 Environmental Health 3 s.h.

One of these:
173:195 Preceptorship in Epidemiology (for nonthesis students) 3-6 s.h.
173:300 Thesis/Dissertation (for thesis students, may be taken twice) 3 s.h.

**ELECTIVES**

Students must earn a minimum of 5 s.h. in electives, which must be selected from courses offered by the Department of Epidemiology (prefix 173).

Students also must earn at least 2 s.h. in course work pertinent to their educational goals and background. Students may choose an epidemiology course or another graduate course, with their advisor’s approval. The following courses are recommended.

171:164 Research Data Management 3 s.h.
171:174 Introductory Longitudinal Data Analysis 3 s.h.
171:242 Applied Survival and Cohort Data Analysis 3 s.h.

**Master of Science in Clinical Investigation**

The Master of Science in clinical investigation is offered by the Department of Epidemiology in cooperation with the interdisciplinary Iowa Scholars in Clinical Investigation program, which is coordinated by the Department of Internal Medicine, Carver College of Medicine. The program is designed for clinicians interested in pursuing careers in clinical research.

The M.S. in clinical investigation requires 30 s.h. of graduate credit. It includes in-depth training in biostatistics, epidemiology, research ethics, and academic survival skills as well as didactic training applicable to clinical research careers.

Graduates of the program are able to critically evaluate clinical literature, write competitive grant proposals, design and conduct clinical research projects, work effectively with other researchers and support staff, and disseminate research results through manuscripts and presentations.

Applicants to the program must have completed at least 6 s.h. of pathology, physiology, and/or pharmacology. Those lacking this preparation are required to take courses that fill this requirement during their enrollment in the program.

The M.S. in clinical investigation requires the following course work.

**REQUIRED COURSES**

Students earn a minimum of 15 s.h. as follows.

All of these:
173:150 Introduction to Clinical Epidemiology 2 s.h.
173:152 Clinical Research Career Development 1 s.h.
173:163 Seminar in Clinical Research (four semesters, 1 s.h. each) 4 s.h.
173:211 Grant Writing for Clinical Investigators 1 s.h.
173:295 Clinical Research Ethics 2 s.h.

One of these:
173:160 Introduction to Epidemiologic Data Analysis With Computers 2 s.h.
173:161 Patient-Oriented Research-Data Analysis 3 s.h.

One of these:
173:195 Preceptorship in Epidemiology 3-6 s.h.
173:300 Thesis 3-6 s.h.

**EPIDEMIOLOGY CORE**

Students earn a minimum of 12 s.h. as follows.

Both of these:
171:241 Applied Categorical Data Analysis or approved substitute 3 s.h.
173:140 Epidemiology I: Principles 3 s.h.

One of these:
171:161 Introduction to Biostatistics 3 s.h.
171:201 Biostatistical Methods I 4 s.h.
One of these:
171:162 Design and Analysis of Biomedical Studies 3 s.h.
171:202 Biostatistical Methods II 4 s.h.

FOCUS AREA ELECTIVES

Students earn a minimum of 3 s.h. from one focus area.

General (Applicable to More Than One Focus Area)
06J:269 Meta-Analysis in the Behavioral and Social Sciences 3 s.h.
171:242 Applied Survival & Cohort Data Analysis 3 s.h.
171:266 Statistical Methods in Clinical Trials 3 s.h.
172:183 Qualitative Research for Public Health 3 s.h.
173:210 Writing a Research Protocol 3 s.h.
173:290 Intervention and Clinical Trials 3 s.h.
174:221 Evaluation and Outcomes in Health Care 2 s.h.

Patient-Oriented Research
031:270 Clinical Research Methods 3 s.h.
142:215 Molecular Biology of Gene Expression 3 s.h.
173:236 Nutrition Intervention in Clinical Trials Research 2 s.h.

Epidemiology and Behavioral Research
031:263 Psychological Appraisal I 3 s.h.
044:131 Geography of Health 1-3 s.h.
111:204 Principles of Oral Epidemiology arr.
172:101 Introduction to Health Promotion and Disease Prevention 3 s.h.
172:150 Health Behavior and Health Education 3 s.h.
173:150 Introduction to Clinical Epidemiology 2 s.h.
173:225 Genetics and Epidemiology 4 s.h.
173:235 Nutritional Epidemiology 2 s.h.
173:240 Epidemiology II: Advanced Methods 4 s.h.
173:251 Injury Epidemiology 3 s.h.
173:253 Epidemiology of Occupational Injuries 3 s.h.
173:255 Epidemiology of Infectious Diseases 3 s.h.
173:256 Hospital Epidemiology 2 s.h.
173:260 Epidemiology of Chronic Diseases 3 s.h.
173:261 Epidemiology of Aging 1-2 s.h.
173:262 Neuroepidemiology 2 s.h.
173:263 Epidemiology of Reproductive Diseases 2 s.h.
173:265 Cardiovascular Disease Epidemiology 3 s.h.
173:267 Psychiatric Epidemiology 3 s.h.
173:270 Cancer Epidemiology and Control 3 s.h.
173:291 Pharmacoepidemiology 3 s.h.

Outcomes and Health Services Research
06J:270 Research Methods in Management and Organization 3 s.h.
07B:222 Introduction to Policy Analysis and Evaluation 3 s.h.
07P:165 Introduction to Program and Project Evaluation 3 s.h.
07P:265 Program Evaluation 3 s.h.
050:225 Translational Biomedical Research arr.
050:283 Health Informatics I (or II) 3 s.h.
172:181 Evaluation I: Theory and Applications 3 s.h.
172:282 Evaluation II: Design and Methods 3 s.h.
173:276 Health Care Utilization Outcomes 3 s.h.
173:280 Introduction to Health Care Organization and Policy 3 s.h.
174:204 Quantitative Management in Health Care 2-3 s.h.
174:212 Health Economics I 3 s.h.
174:228 Cost Effectiveness and Decision Analysis 3 s.h.
174:261 Analytic Issues in Health Services Research I 3 s.h.
174:268 Health Care Utilization 3 s.h.

Doctor of Philosophy in Epidemiology

The Doctor of Philosophy in epidemiology prepares graduate students for careers as scientists, teachers, and practitioners of epidemiologic methods. Employment opportunities exist in academic institutions; local, state, and federal health agencies; and in commercial enterprises.

The Ph.D. requires a minimum of 75 s.h. of graduate credit. Doctoral students must maintain a g.p.a. of at least 3.00. Those who receive a grade of C on 7 s.h. or more of course work may be dismissed from the program.

All doctoral students must successfully complete a qualifying examination, a comprehensive examination, and a dissertation—a substantial scholarly treatise. The research topic and content, which vary depending on the program of study, must be approved by the student’s dissertation committee. Other degree
requirements include approved electives chosen from Department of Epidemiology courses and other University of Iowa courses.

Students are required to attend departmental seminars and journal club. They also must present one scientific poster at an international, national, regional, state, university, or department poster session.

The following courses are required.

**REQUIRED COURSES**

171:161 Introduction to Biostatistics 3 s.h.
171:162 Design and Analysis of Biomedical Studies 3 s.h.
171:164 Research Data Management 3 s.h.
171:241 Applied Categorical Data Analysis 3 s.h.
171:242 Applied Survival and Cohort Data Analysis 3 s.h.
173:140 Epidemiology I: Principles (web-based course cannot be used) 3 s.h.
173:160 Introduction to Epidemiologic Data Analysis With Computers 2 s.h.
173:205 Research in Epidemiology 3 s.h.
173:210 Writing a Research Protocol 3 s.h.
173:240 Epidemiology II: Advanced Methods 4 s.h.
173:340 Epidemiology III: Theories 3 s.h.

One of these:
069:133 Introduction to Human Pathology 4 s.h.
069:270 Pathogenesis of Major Human Diseases 3 s.h.

One of these:
027:130 Human Physiology 3 s.h.
072:153 Graduate Physiology 6 s.h.

Ph.D. students also must earn 3 s.h. in epidemiology courses outside their emphasis area.

**ELECTIVES**

Each student must declare an emphasis area and, working with the emphasis area coordinator, develop a plan of study that ensures the student will develop knowledge in a specific area sufficient to support important original research. At the discretion of the emphasis area coordinator and study plan committee, the student may organize emphasis area course work into required emphasis area courses and electives.

**DISSERTATION**

All doctoral students must successfully complete a Ph.D. thesis.

173:300 Thesis 10-18 s.h.

---

**Admission**

For detailed information about Graduate College policies, including application requirements and procedures, see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

**M.S. and Ph.D. in Epidemiology**

The epidemiology faculty considers several factors when evaluating applications for admission, including GRE scores, grade-point average, letters of recommendation, intent and motivation for graduate study, and research interests. A student with deficiencies in one area may be admitted if all other components of his or her application are very strong.

All M.S. program applicants must hold a baccalaureate degree and have a cumulative g.p.a. of at least 3.00. Undergraduate preparation must include two semesters of biological sciences, and mathematics through algebra.

Ph.D. program applicants must hold a baccalaureate degree (an M.S. or M.P.H. usually is required), and must have a cumulative g.p.a. of at least 3.00. Courses in the biological, physical and mathematical sciences provide important background; one semester of calculus and two semesters of biological sciences are highly recommended. Computing skills also are desirable.

All applicants to the M.S. or Ph.D. program must have taken the Graduate Record Examination (GRE) General Test.

International applicants who do not hold a baccalaureate degree from an accredited college or university in the United States, the United Kingdom, Canada (except Quebec), Australia, or New Zealand must score at least 600 (paper-based), 250 (computer-based), or 100 (Internet-based) on the Test of English as a Foreign Language (TOEFL). International applicants who score 550-599 (paper-based), 213-249 (computer-based), or 81-99 (Internet-based) are required to take English fluency courses. Applicants who score below those ranges are not considered for admission. The department accepts International English Testing System (IELTS) scores of 7.0 or higher, with no subscore below 6.0, in place of TOEFL scores.

All M.S. and Ph.D. applicants and students are required to have strong written and oral communication skills.

Application deadlines for fall entrance to the M.S. in epidemiology are July 1 for U.S. citizens,
April 15 for international applicants. Application deadlines for spring entrance are April 15 for U.S. citizens, March 1 for international applicants.

Application deadline for fall entrance to the Ph.D. in epidemiology is April 1. Application deadline for spring entrance (not encouraged) is October 1.

M.S. in Clinical Investigation

Applicants to the M.S. program in clinical investigation must hold a doctoral-level degree in a clinical discipline [e.g., M.D., D.O., D.D.S., Ph.D., Pharm.D., D.V.M] or be enrolled in the Medical Scientist Training Program, Carver College of Medicine. They must hold a baccalaureate degree with a cumulative g.p.a. of at least 3.00; foreign-trained applicants must have an outstanding doctoral training record.

All applicants must have taken the Graduate Record Examination (GRE), Medical College Admission Test (MCAT), or Dental Admissions Test (DAT). International applicants who do not hold a degree from an accredited English-speaking college or university must have taken the Test of English as a Foreign Language (TOEFL).

Applicants are considered based on their credentials, prior training, and research training plans. An applicant with deficiencies in one area may be admitted if all other components of his or her application are strong.

The M.S. in clinical investigation accepts students only for summer entrance. Application deadlines are April 15 for U.S. citizens, March 1 for international applicants.

Financial Support

A limited number of graduate research assistantships are available for advanced M.S. and Ph.D. students; for information, consult the department. For information on financing education through jobs, grants, and loans, contact the Office of Student Financial Aid.

Opportunities for funded predoctoral fellowships are available. Funded positions sponsored by federal agencies are available only to U.S. citizens.

Resources

Department of Epidemiology resources and activities include the State Health Registries of Iowa, the Preventive Intervention Center, the Lipid Research Clinic, the Health Effectiveness Research Center, the Center for Emerging Infectious Diseases, and the Nutrition Center.

The State Health Registries of Iowa, which encompasses the Iowa Cancer Registry and the Iowa Registry for Congenital and Inherited Disorders, works in cooperation with the Iowa Department of Public Health to collect medical data on Iowans. It is one of 10 registries nationwide that report data to the National Cancer Institute.

The Preventive Intervention Center conducts population-based intervention trials to prevent occurrence and recurrence of disease and to promote wellness, with a focus on the elderly. The Lipid Research Clinic specializes in research promoting prevention of cardiovascular disease and provides an interdisciplinary approach to risk factor interventions. The Health Effectiveness Research Center is a collaborative research enterprise with the College of Pharmacy that studies whether particular health care treatments or services are over- or underutilized. The Center for Emerging Infectious Diseases employs epidemiological methods, laboratory technologies, and clinical evaluations to achieve a better understanding of emerging infectious diseases. The Nutrition Center provides expertise in nutrition and dietary assessment, dietary interventions, and nutrition lifestyle change strategies.

Study

173:099 Evidence-Based Public Health Methods 3 s.h.
How to choose, conduct, and evaluate evidence-based programs and policies in public health; finding and using scientific evidence, implementing and evaluating interventions that produce new evidence. Offered summer sessions. Prerequisite: Certificate in Public Health enrollment.

173:111 International Health arr.
Urgent health problems in the developing world and among disadvantaged populations in developed countries; biological, social, cultural, political aspects of international health problems; applications of research methods from epidemiology, environmental health, social sciences. Offered fall semesters. Same as 152:111, 175:111.

173:140 Epidemiology I: Principles 3 s.h.
Epidemiological concepts and methods; design of descriptive and analytic studies, such as aggregate, case series, cross-sectional, case-control, cohort studies, clinical trials; application of epidemiology to public health practice; communication and dissemination of epidemiological findings.

173:145 Public Health Data 2 s.h.
Concepts and methods of obtaining and using public health data in community settings; how public health data are used for epidemiologic investigations and prevention programs. Offered spring semesters. Pre- or corequisites: 171:161 and 173:140.

173:150 Introduction to Clinical Epidemiology 2-3 s.h.
Epidemiologic applications and methods used in clinical settings to evaluate clinical medicine and other health profession disciplines, including health measurement, health outcome
173:152 Clinical Research Career Development 1 s.h.
173:155 Diagnostic Microbiology for Epidemiology 3 s.h.
173:160 Introduction to Epidemiologic Data Analysis With Computers 2 s.h.
173:163 Seminar in Clinical Research 1 s.h.
173:165 Introduction to Molecular Epidemiology 3 s.h.
173:167 Introduction to Epidemiology and control of zoonotic diseases; zoonoses endemic to the midwestern United States. Offered summer sessions. Prerequisite: 061:103 or 061:112 or 061:157 or 061:164.
173:168 Statistical Computing With R 1 s.h.
173:170 Injury and Violence Prevention 3 s.h.
173:175 Research Methods in Disaster Studies 3 s.h.
173:190 Problems and Special Topics in Epidemiology arr.
173:195 Preceptorship in Epidemiology arr.
173:200 Independent Study in Epidemiology arr.
173:203 Independent Study in Epidemiology arr.
173:205 Research in Epidemiology arr.
173:210 Writing a Research Protocol 3 s.h.
173:211 Grant Writing for Clinical Investigators 1 s.h.
173:215 Writing for Medical Journals 1 s.h.
173:225 Genetics and Epidemiology 4 s.h.
173:230 Principles of Dietary Assessment 1 s.h.
173:235 Nutritional Epidemiology 2 s.h.
173:236 Nutrition Intervention in Clinical Trials Research 2 s.h.
173:237 Nutrition Intervention in Research Lab 3 s.h.
173:240 Epidemiology II: Advanced Methods 4 s.h.
173:245 Epidemiology of Physical Activity 3 s.h.
173:251 Injury Epidemiology 3 s.h.
173:253 Epidemiology of Occupational Injuries 3 s.h.
173:255 Epidemiology of Infectious Diseases 3 s.h.
173:256 Hospital Epidemiology 2 s.h.

173:155 Prerequisites: 061:103 or 061:112 or 061:157 or 061:164.

173:170 Prerequisite: 173:140 or consent of instructor.

173:175 Prerequisite: 173:140 or consent of instructor. Same as 175:251.

173:190 Recommended: a basic nutrition course.

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
<th>Description</th>
<th>Prerequisites/Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td>173:257</td>
<td>Infectious Causes of Chronic Disease</td>
<td>3 s.h.</td>
<td>Evidence linking various infectious agents with the development of different types of chronic disease. Pre- or corequisite: 173:140.</td>
<td></td>
</tr>
<tr>
<td>173:260</td>
<td>Epidemiology of Chronic Diseases</td>
<td>3 s.h.</td>
<td>Chronic disease epidemiology; survey of leading chronic diseases, including measurement of disease, lifestyle, nutrition, occupation, family history. Offered spring semesters. Prerequisite: 173:140 or consent of instructor.</td>
<td></td>
</tr>
<tr>
<td>173:261</td>
<td>Epidemiology of Aging</td>
<td>1-2 s.h.</td>
<td>Epidemiologic methods for studying health and social problems of older persons; applications including research and public health practice and policy. Offered spring semesters. Prerequisite: 173:140. Same as 153:261.</td>
<td></td>
</tr>
<tr>
<td>173:262</td>
<td>Neuroepidemiology</td>
<td>2 s.h.</td>
<td>Basic epidemiologic concepts applied to neurologic disease; concepts, methods, examples of neuroepidemiology; various diseases, methods. Offered spring semesters. Prerequisites: 173:140 and 173:160.</td>
<td></td>
</tr>
<tr>
<td>173:263</td>
<td>Epidemiology of Reproductive Diseases</td>
<td>2 s.h.</td>
<td>Evaluation of methodological issues and current findings for reproductive diseases and conditions; etiological mechanisms, including behavioral and genetic. Offered fall semesters. Prerequisite: 173:140.</td>
<td></td>
</tr>
<tr>
<td>173:265</td>
<td>Cardiovascular Disease Epidemiology</td>
<td>3 s.h.</td>
<td>Natural history of atherosclerotic disease in humans and risk factors affecting its development; atherosclerotic disease by age, sex, and in varied populations worldwide; recent guidelines and clinical trials to delay onset, reduce incidence, improve outcome of cardiovascular disease. Offered fall semesters of odd years. Prerequisites: 171:161 and 173:140.</td>
<td></td>
</tr>
<tr>
<td>173:267</td>
<td>Psychiatric Epidemiology</td>
<td>3 s.h.</td>
<td>Population-based studies of psychiatric disorders and associated etiologic tools; diagnostic criteria used in psychiatric research, common structured interviews and rating scales; recent research relevant to common psychiatric disorders; experience writing a research idea using NIH PHS grant form. Offered spring semesters. Prerequisite: 173:140 or consent of instructor. Recommended: 173:240 or two years of resident training in psychiatry. Same as 073:255.</td>
<td></td>
</tr>
<tr>
<td>173:270</td>
<td>Cancer Epidemiology and Control</td>
<td>3 s.h.</td>
<td>Incidence, mortality, survival; risk factors, cancer control options for major cancer sites; principles and methods of cancer registration; research examples by type of study design. Offered spring semesters of even years. Prerequisites: 171:161 and 173:140.</td>
<td></td>
</tr>
<tr>
<td>173:276</td>
<td>Health Care Utilization Outcomes</td>
<td>3 s.h.</td>
<td>Research tools to assess changes in health care use and cost as outcomes of treatment; evidence-based medicine, meta-analysis, decision trees, cost-of-illness analysis, cost effectiveness models. Offered fall semesters. Same as 174:268.</td>
<td></td>
</tr>
<tr>
<td>173:280</td>
<td>Introduction to Health Care Organization and Policy</td>
<td>3 s.h.</td>
<td>Basic arrangements of services in the United States; social, political, psychological, economic forces that shape health services; determinants of use, amounts, types of health resources available, financing methods, government regulation; current issues. Offered fall semesters. Same as 174:200.</td>
<td></td>
</tr>
<tr>
<td>173:290</td>
<td>Intervention and Clinical Trials</td>
<td>3 s.h.</td>
<td>Methodologic introduction to rationale, design, conduct, analysis, and presentation of clinical trials; basics of clinical trial design, variety of designs, examples from clinical trials; biostatistical methods, including sample size determination. Offered fall semesters. Prerequisites: 171:161 and 173:140, or equivalents.</td>
<td></td>

Health Management and Policy

Head: Barry R. Greene

Professors: Franklin Dexter (Anesthesiology), Joanne Dochterman (Nursing), Josephine Gitter (Law), Barry R. Greene, Dennis Harper (Pediatrics/Counseling, Rehabilitation, and Student Development), Arthur J. Hartz (Family Medicine), Charles Helms (Internal Medicine), Diane Huber (Nursing), Michael Kienzie (Medicine), Samuel Levey, James L. Price (Sociology), Gary E. Rosenthal (Internal Medicine), Gerard Rushton (Geography), Marcia M. Ward, Fredric D. Wolinsky

Professors (clinical): Christopher Atchison, Mary Gilchrist, Donna Katen-Bahensky, Lawrence D. Prybil

Adjunct professors: William W. Hesson, R. Edward Howell, Henri R. Manasse Jr., John H. Staley

Associate professors: Rachel L. Anderson, John Brooks (Pharmacy), Thomas E. Vaughn

Associate professors (clinical): James Bahensky, Linda Everett (Nursing), Tanya Uden-Holman

Adjunct associate professors: Ellen Gaucher, Richard B. Murphy, William D. Petasnick, Peter Roberts, Peter Wallace

Adjunct associate professor (clinical): Michelle Robnett (Nursing)

Assistant professors: Brian Kaskie, John E. Schneider, Julie Urmie (Pharmacy)

Adjunct assistant professors: Lee Carmen, Shane Cerone, Mark Moser, Ralph Wilmoth

Graduate degrees: M.H.A., Ph.D. in Health Services and Policy

Web site: http://www.public-health.uiowa.edu/hmp

The Department of Health Management and Policy educates health care executives to assume leadership roles in an increasingly complex and dynamic health care system. Graduates hold key positions in all areas of health management and policy, both in the United States and abroad.

The department’s degree programs rank among the foremost in the field. They include the Master of Health Administration (M.H.A.), which is accredited by the Commission on Accreditation of Healthcare Management Education, and a Doctor of Philosophy in health services and policy. The Ph.D. program offers core training in health services research and a range of specializations, including health economics, health outcomes, health policy, and management and organizations.

The department’s faculty also presents the policy and administration subtrack of the Master of Public Health (M.P.H.), which prepares students to lead public health organizations; see Master of Public Health Program in the Catalog.

The department also offers joint degree programs with the Tippie College of Business (M.H.A./M.B.A.), the College of Law (M.H.A./J.D.), and the department of Urban and Regional Planning (M.H.A./M.A.). Students who wish to pursue an integrated program combining an M.H.A. with a master’s degree in another field should discuss their plans with both academic units and indicate their interest when they apply to the M.H.A. program.

Master of Health Administration

The Master of Health Administration program prepares students for a wide variety of positions in health care management. The curriculum is designed to provide students with a comprehensive understanding of issues encountered by health care delivery organizations, and strong business skills.

The M.H.A. requires 60 s.h. of graduate credit (usually two academic years of full-time study). Transfer credit and course waivers may be accepted, but all students are expected to complete a minimum of 54 s.h. during their course of study.

Core courses in management, economics, law, managerial finance, and financial accounting provide students with necessary business skills. Students also may take course work in other areas, such as business, urban and regional planning, and aging studies.

Students work with their advisors to create a plan of study that incorporates required courses and elective course work that supports their career goals in areas such as operations management, managed care, or financial management.

During the first year, students are introduced to the social, political, economic, and financial environments of health care organizations. The
concepts, tools, and techniques of effective managerial decision making, planning, and control also are presented.

During the second year, students pursue in-depth applications of management concepts and develop skills in areas relating to their special interests and career objectives.

**REQUIRED COURSES**

- **06N:215** Corporate Financial Reporting 3 s.h.
- **06N:225** Managerial Finance 3 s.h.
- **171:161** Introduction to Biostatistics 3 s.h.
- **173:140** Epidemiology I: Principles 3 s.h.
- **174:100** Executive Seminar Series 0 s.h.
- **174:200** Introduction to Health Care Organization and Policy 3 s.h.
- **174:201** Health Care Management 3 s.h.
- **174:203** Strategic Planning and Marketing 3 s.h.
- **174:204** Quantitative Management in Health Care 2 s.h.
- **174:205** Issues in Health Management and Policy 3 s.h.
- **174:208** Health Services Information Systems 2 s.h.
- **174:212** Health Economics I 3 s.h.
- **174:216** Financial Management of Health Institutions 3 s.h.
- **174:221** Evaluation and Outcomes in Health Care 2 s.h.
- **174:223** Seminar in Health Care Ethics 2 s.h.
- **174:224** Human Resources for Health Organizations 2 s.h.
- **174:225** Project Management and Decision Modeling 2 s.h.
- **174:237** Legal Aspects of Health and Medical Care 3 s.h.
- **174:243** Health Policy 1 s.h.

**ELECTIVES**

Students choose 14 s.h. of course work, which must include 8 s.h. in Department of Health Management and Policy courses.

**Summer Internships, Fellowships, Residencies**

The department facilitates placement of M.H.A. students in summer internships between the first and second years of study. Internships offer opportunities for practical experience outside the classroom, observing and interacting with executives in a health care setting. Internships are full-time positions that usually last 10-12 weeks. Students normally receive a salary or stipend, and in some cases, assistance with living arrangements. Internships may carry up to 3 s.h. of credit.

Many M.H.A. students complement their academic training with a postgraduate fellowship or residency. Such experiences provide opportunities to observe, develop, and demonstrate practical management techniques and skills and to develop connections with colleagues. The department takes an active role in helping students identify and secure fellowship and residency positions.

**Joint M.H.A./M.B.A.**

Students interested in combining the traditional strengths of health management and policy with greater exposure to advanced management techniques may pursue the joint master’s degree program with the Tippie College of Business.

This combination leads to an M.H.A. in health management and policy and an M.B.A. (Master of Business Administration). It requires 75 s.h. of graduate credit and normally is completed in two-and-a-half to three years. Separate admission to each degree program is required.

**Joint M.H.A./J.D.**

The joint program with the College of Law is highly individualized, allowing students to gain in-depth exposure to and training in both health care management and law.

The program leads to an M.H.A. in health management and policy and a J.D. in law. It requires a minimum of 126 s.h. of postbaccalaureate credit and usually takes four years to complete, although students who enroll in the accelerated law program may complete it in less time. Separate admission to each degree program is required. Students register only for law courses during their first year.

**Joint M.H.A./M.A. in Planning**

Students interested in developing special expertise in community and health planning may pursue a joint master’s degree with the program in Urban and Regional Planning. The M.A. in urban and regional planning prepares students to develop public policy alternatives that help improve the quality of life in cities and throughout regions.

The program leads to an M.H.A. in health management and policy and an M.A. in urban and regional planning. It requires 76 s.h. of graduate credit and can be completed in three years. Separate admission to each degree program is required.
Doctor of Philosophy

The Doctor of Philosophy program, established in 1950, was the nation’s first doctoral program in health care management. Students earn a Ph.D. in health services and policy, which prepares them for careers in health services research, education, and policy leadership in universities, government agencies, and health organizations. The program’s faculty members are committed to interdisciplinary scholarly inquiry and research. Individual plans of study allow students to prepare for specific careers, and small class size encourages frequent student-faculty interaction, including participation in research projects as well as scholarly publications.

The program is oriented toward applied, interdisciplinary research. Students develop mastery of theories and research methodologies necessary to study the complex American health system.

The Ph.D. requires at least 90 s.h. of graduate credit. Students may apply up to 30 s.h. of credit earned for master's degree work toward the Ph.D.

REQUIRED COURSE WORK

Ph.D. students take course work in core content areas covering health care systems, health care management, health economics, and health policy. Courses in research design and statistical analysis are required. Students may waive specific courses, depending on their background.

EXAMINATIONS

All Ph.D. students must pass a preliminary examination that tests the student's mastery of core material covered during the first year in the department, including American health systems and health services research methods.

Students take the comprehensive examination at or near the end of their formal course work. The comprehensive exam focuses on the student’s specific area of research and theoretical interest.

DISSERTATION

Doctoral candidates prepare dissertations based on original research that tests, extends, or applies concepts or principles to a problem in health care. Students may choose to complete a traditional dissertation or may complete a dissertation based on three publishable papers.

Admission

For detailed information about Graduate College policies, including application requirements and procedures, see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

Students from a variety of academic backgrounds are admitted to the department’s graduate programs.

Applicants to the M.H.A. program should hold a bachelor’s degree from an accredited college or university. No specific undergraduate major is required, but prospective applicants are strongly advised to complete introductory courses in accounting, economics, and statistics and to gain facility in using spreadsheet and presentation software. A cumulative g.p.a. of at least 3.00 is required. M.H.A. program applicants must submit scores on the Graduate Record Exam (GRE) General Test (a combined verbal and quantitative score of 1100 or above is preferred) or the Graduate Management Admission Test (a score of 600 or above is preferred); official MCAT, VAT, LSAT, or DAT scores are accepted in place of GRE or GMAT scores. Previous work experience in health care is preferred.

All applicants must submit academic transcripts, three letters of recommendation, and a statement of objectives form (contact the Department of Health Management and Policy). Applicants to the Ph.D. program also are required to submit a sample of scholarly writing.

International applicants to the M.H.A. or Ph.D. program who do not hold a baccalaureate or more advanced degree from an accredited college or university in the United States, the United Kingdom, Canada (except Quebec), Australia, or New Zealand must score at least 600 (paper-based), 250 (computer-based), or 100 (Internet-based) on the Test of English as a Foreign Language (TOEFL). International applicants who score 550-599 (paper-based), 213-249 (computer-based), or 81-99 (Internet-based) are required to take English fluency courses. Applicants who score below those ranges are not considered for admission.

Students begin the program in fall semester. Campus visits are encouraged, and personal
interviews are required before admission. The admissions committee conducts telephone interviews with applicants unable to interview on campus.

Financial Support

A variety of financial assistance is available, including scholarships and awards, student loans, and research assistantships. Every effort is made to provide financial support to students who demonstrate need and maintain satisfactory academic standards. Some awards are offered in recognition of outstanding scholarship and experience, regardless of need.

Research assistantships generally are awarded on the basis of student merit and the department’s need. Assistantships afford valuable experience in health services research and management projects. Research assistants work 10-20 hours per week and must apply for reappointment each year. Research assistantships provide a stipend and some tuition assistance and entitle students to resident tuition.

Opportunities also exist for part-time employment both on and off campus. For information and financial aid application forms, contact the Office of Student Financial Aid.

Alumni Association

An active alumni association supports the program in a number of ways, including scholarships, consultation on curriculum, continuing education, research, and fund development. The association also functions as a network for graduates entering the profession. Alumni serve as visiting faculty, consultants, mentors, and preceptors for summer internships, residencies, and fellowships.

Graduates maintain their Iowa connection and learn about news of their classmates, the department, and faculty members and students through the Alumni Newsletter.

The Department of Health Management and Policy and its alumni association jointly sponsor the Annual Iowa Health Care Executive Symposium each fall. Renowned speakers from across the country present a variety of symposium topics. Health care leaders, alumni, educators, students, and friends of the department attend the symposium, which offers students a high quality educational experience in addition to the opportunity to network with faculty and alumni.

Resources

The Center for Health Policy and Research is the research arm of the Department of Health Management and Policy and a University-wide interdisciplinary research facility. The center collaborates with health provider associations, policy and planning groups, insurance organizations, health delivery institutions, and other members of the health services research community. It also sponsors educational activities, including an annual policy symposium and weekly seminars.

Department of Health Management and Policy faculty members are involved in a wide range of research topics and methodologies and have research grants and contracts of $7 million in the center. This large research portfolio provides excellent training opportunities for students.

Courses

174:100 Executive Seminar Series 0 s.h.
Issues in the health care industry; talks by executives from academic health centers, health-related associations, multihospital systems, government agencies, health maintenance organizations, community hospitals, health insurance industry. Prerequisite: consent of instructor.

174:102 Introduction to the U.S. Health Care System 3 s.h.
The U.S. health care system; socioeconomic, political, and environmental forces that influence the organization, financing, and delivery of personal and public health services; health services, policy, concepts, terminology. Same as 06J:159.

174:140 Mental Health Services and Policy I 3 s.h.
Contemporary mental health services and policy; characteristics of mental health services, historical background, evolution, future prospects. Same as 096:100.

174:144 Medicare and Medicaid Policy 3 s.h.
Health policies most pertinent to Americans over age of 65. Same as 153:144.

174:200 Introduction to Health Care Organization and Policy 3 s.h.
Organization of U.S. health care system, health policies that shape its development; historical, socioeconomic, political, environmental forces that influence the organization, financing, and delivery of personal and public health services; health services, policy concepts, and terminology, including health determinants, access to care, system integration, policy development, federalism. Same as 173:280.

174:201 Health Care Management 3 s.h.
Application of basic management principles such as leadership, goal setting, decision making, human resource management, to health care organizations. Prerequisite: consent of instructor.

174:202 Hospital Organization and Management 2-3 s.h.
Role of hospitals, governance, organizational structure, medical staff organization, departmental operations. Prerequisites: 174:200 and 174:201, or consent of instructor.

174:203 Strategic Planning and Marketing 3 s.h.
Management, marketing. Prerequisite: 174:201.
174:204 Quantitative Management in Health Care 2-3 s.h.
Quantitative analysis techniques used by managers in health care settings to assist with planning, decision making, resource allocation. Prerequisite: consent of instructor.

174:205 Issues in Health Management and Policy 3 s.h.
Integration and application of theories, concepts, principles; case studies. Prerequisites: 174:201 and consent of instructor.

174:206 Leadership in Health Care Organizations 2-3 s.h.
Management and leadership concepts and their application in health care organizations. Prerequisite: 174:201.

174:207 Group Practice and Ambulatory Care Administration 3 s.h.
Delivery of ambulatory health care services, for-profit, and not-for-profit organizations; emphasis on structures, payment mechanism, compensation, effects of managed care, other internal issues. Prerequisites: 174:200, 174:201, and 174:202; or consent of instructor.

174:208 Health Services Information Systems 2-3 s.h.
Conceptual, practical aspects of analysis, development, and use of computer-based information systems; emphasis on application to the health sciences environment.

174:212 Health Economics I 3 s.h.
Microeconomic principles applied to health care, health insurance, information and uncertainty, models of physician and hospital behavior, theory of the firm, market structure, regulation, competitive reform, managed care. Prerequisite: consent of instructor.

174:213 Health Economics II 3 s.h.
Economic theory and its application to health behavior, markets for health care and health insurance, public policy related to health. Prerequisite: 174:212 or consent of instructor.

174:214 Financial Accounting for Health Care Organizations 3 s.h.
Introduction to financial accounting practices in health care delivery organizations.

174:216 Financial Management of Health Institutions 3 s.h.
Issues in working capital management, capital financing, cost analysis and rate setting, budgeting, reimbursement, managed care contracting and health reform initiatives; emphasis on use of information from accounting, financial management systems. Prerequisite: consent of instructor.

174:217 Health Insurance and Managed Care 3 s.h.
History and theory of insurance, comparative health systems, health systems and networks, HMOs, public health insurance, care for uninsured; emphasis on public policy. Prerequisites: 046:263 or 174:212 or equivalent health economics course, and 174:200 or equivalent U.S. health care system course; or consent of instructor. Same as 152:217.

174:218 Topics in Health Administration 1-3 s.h.
Topics related to contemporary problems that concern health care students, administrators. Repeatable.

174:220 Advanced Topics in Managed Care 3 s.h.
Skill development for managed care; risk management, rate setting, contracting, equity evaluation, mergers and acquisitions, regulatory issues; for advanced students. Prerequisite: 174:216 or consent of instructor.

174:221 Evaluation and Outcomes in Health Care 2 s.h.
Qualitative and quantitative methods for evaluating health care quality, effectiveness; program evaluation, health outcomes, clinical and cost effectiveness, evaluation across health care delivery systems. Prerequisite: 174:102 or 174:200 or consent of instructor.

174:223 Seminar in Health Care Ethics 2-3 s.h.
Biomedical and organization ethics in the contemporary health care environment; ethical concepts and principles, ethical issues that confront executive, clinical, and governance leaders in context of complex health organizations. Prerequisite: consent of instructor.

174:224 Human Resources for Health Organizations 2-3 s.h.
Overview of human resource management theories and practices for health care organizations; strategic human resource management, equal employment, staffing, training and development, appraisal, compensation. Prerequisite: 174:201 or consent of instructor.

174:225 Project Management and Decision Modeling 1-3 s.h.
Basic project management skills to ensure benefits from health care projects; quantitative decision modeling for a scientific approach to decision making. Prerequisite: consent of instructor.

174:226 Health Informatics I 3 s.h.
Technological tools that support health care administration, management, and decision making. Same as 021:275, 050:283, 051:187, 056:186, 074:191, 096:283.

174:228 Cost Effectiveness and Decision Analysis 3 s.h.
Methods of cost-effectiveness analysis and decision analysis; applications to resource allocation decisions in public health and medicine.

174:229 Lean Sigma Principles: Applications in Health Care 1, 3 s.h.
General lean and six sigma principles (1 s.h.); application to health care situations (3 s.h.); examples from University of Iowa Hospitals and Clinics, other institutions.

174:234 Administrative Internship arr.

174:235 Administrative Residency/Fellowship arr.

174:236 Administrative Practicum 3 s.h.
Experience with operational and planning matters in a health care setting. Prerequisites: second-year standing and g.p.a. of at least 3.00 for two consecutive semesters.

174:237 Legal Aspects of Health and Medical Care 3 s.h.
Statutory, common law frameworks applicable to health care system; court decisions that illustrate applications of general legal doctrines in hospital, health settings. Prerequisite: consent of instructor.

174:242 Federalism and Health Policy 3 s.h.
How American government's organization shapes development and implementation of health policy, programs, services.

174:243 Health Policy 1-3 s.h.
Policy process, policies and programs that shape provision of health care in the United States; health policies such as Medicare, Medicaid, Older Americans Act.

174:245 Seminar in Health Policy 3 s.h.
Contemporary health policy issues; theoretical and applied perspectives; social justice and health care for vulnerable populations (e.g., mental health, nursing homes); readings, discussion. Prerequisite: 174:242 or consent of instructor.

174:247 Nonprofit Organizational Effectiveness I 3 s.h.
174:248 Nonprofit Organizational Effectiveness II 3 s.h.
Qualities for leadership of nonprofit organizations, including relationships with staff and volunteers; relationship of nonprofits to outside world; marketing, public relations, advocacy strategies for nonprofits. Prerequisite: 06J:247 or 024:247 or 174:247. Same as 06J:248, 021:265, 024:248, 028:258, 032:228, 042:248, 091:322.

174:252 Advanced Organizational Behavior in Health Care 3 s.h.
Key concepts of organizational behavior and their application to health organizations; theoretical writings, empirical studies. Prerequisites: Ph.D. standing, knowledge of human services organizations, and consent of instructor.

Case studies highlighting management as the primary integrative force in health organizations; major areas of executive action in the development of policy, organization, planning, information systems, control.

174:254 Advanced Organizational Theory in Health Care 3 s.h.
Key concepts and their application to health care organizations and health services; perspectives from theoretical writings, empirical studies. Prerequisites: Ph.D. standing and consent of instructor.

174:255 Seminar in Contemporary Health Issues 0 s.h.
Review of relevant literature on methodological substantive issues in health care, presentations by researchers on health services and policy research. Prerequisite: consent of instructor.

174:257 Ph.D. Guided Research 1-3 s.h.
Experience with empirical research, guided by a faculty mentor; structured and supervised research activities. Prerequisite: consent of instructor.

174:259 Design Issues in Health Service Research 3 s.h.
Design and causal inference reliability and validity in measurement; rules of evidence; research design for randomized-control trials, observational studies, meta-analysis. Prerequisite: graduate standing.

174:260 Ph.D. Independent Research 1-3 s.h.
Experience in empirical research through one or more substantive research experiences, with faculty mentor; authorship or coauthorship of at least one manuscript suitable for publication in peer review journal. Prerequisite: satisfactory completion of Ph.D. preliminary exams.

174:261 Analytic Issues in Health Services Research I 3 s.h.
Analytic tools used in health services research; focus on applications in nonexperimental research settings, such as analyses using administrative claims data or preexisting public use data sets. Prerequisites: 171:162 and consent of instructor. Same as 046:261.

174:262 Analytic Issues in Health Services Research II 3 s.h.
Continuation of 174:261; advanced applications, including panel data and qualitative response models. Prerequisite: 174:261. Same as 046:262.

174:266 Advanced Case Management: An Interdisciplinary Approach 3 s.h.
Management of health care outcomes for cost, quality: advanced topics in health care coordination, interdisciplinary case management; managed care; financial, legal, ethical considerations; outcomes of case management practice. Prerequisite: consent of instructor. Same as 006:266.

174:268 Health Care Utilization Outcomes 3 s.h.
Research tools to assess changes in health care use and cost as outcomes of treatment; evidence-based medicine, meta analysis, decision trees, cost-of-illness analysis, cost effectiveness models. Prerequisite: consent of instructor. Same as 173:276.

174:270 Seminar in Health Research and Instruction 1-3 s.h.
Opportunity for Ph.D. students to develop research and teaching skills through presentations, readings, workshops. Prerequisites: Ph.D. student standing and satisfactory completion of Ph.D. preliminary exams.

174:280 Independent Study and Research arr.
Supervised tutorial. Prerequisite: consent of instructor.

Research for preparation of dissertation; seminar presentation. Prerequisite: consent of instructor.
Head: Craig Zwerling  
Professors: Thomas Cook (Physical Therapy and Rehabilitation Science/International Programs), Kelley Donham (Nursing), Laurence Fuortes (Internal Medicine/Epidemiology/International Programs), Vicki Grassian (Chemistry), Fredric Gerr (Internal Medicine), Paul James (Family Medicine), Joel Kline (Internal Medicine), James Merchant (Internal Medicine/Nursing), Gene Parkin (Civil and Environmental Engineering), Corinne Peek-Asa (Epidemiology/Nursing), Larry Robertson (Radiation Oncology), Jerald Schnoor (Civil and Environmental Engineering), Nancy Sprince (Internal Medicine/Nursing), Peter Thorne (Civil and Environmental Engineering), Craig Zwerling (Internal Medicine/Epidemiology)  
Professors emeriti: Clyde Berry, William Hausler, L.W. Knapp Jr., Keith Long, Donald Morgan  
Adjunct professors: Vijay Goel, John Frederic Green, Nelson Moyer  
Clinical professor: Patrick Hartley (Internal Medicine)  
Associate professors: Kenneth Culp (Nursing), William Field (Epidemiology), William Heitbrink, Keri Hornebucke (Civil and Environmental Engineering), John Lee (Mechanical and Industrial Engineering), Patrick O'Shaughnessy (Civil and Environmental Engineering), Wayne Sanderson [Epidemiology], Thomas Schnell (Mechanical and Industrial Engineering), David Wilder (Biomedical Engineering)  
Associate professor emeritus: Franklin Kilpatrick  
Adjunct associate professors: Kevin Kelly, Burton Kross, Daniel McGehee (Public Policy Center), James McClothin, Kenneth McMains, Michael Rossmann  
Clinical associate professors: Craig Bainbridge, Henri Cuddihy (Internal Medicine), Monty Menhusen (Anesthesiology), David Osterberg (Geography)  
Assistant professors: Daniel Anton (Physical Therapy and Rehabilitation Science), Gabriele Ludewig, Thomas Peters  
Assistant professor emerita: Pamela Willard (Nursing)  
Adjunct assistant professors: Chandran Achutan, Danelle Bickett-Weddle, Seong Woo Choi, Gregory Couser, Christine Deignan, Gregory Flamme, Dian Gottlob, Daniel Holub, Carrie LaSeur, Hans-Joachim Lehmler, Murray Madsen, Shannon Marquez, John Rosecrance, Donald Simmons, Laurie Taylor, Roberta Till-Retz, John Vargo, Peter Weyer, Michael Wichman, Catherine Zeman  
Clinical assistant professors: Edward Bottei, George Phillips, Risto Rautiainen  
Graduate degrees: M.P.H.; M.S., Ph.D. in Occupational and Environmental Health  
Web site: http://www.public-health.uiowa.edu/oeh

The Department of Occupational and Environmental Health focuses on assessment of risk factors in the physical environment and their relationship to disease—particularly health problems of agricultural and industrial workers. Students are guided by faculty members whose research interests include rural health care delivery, agricultural health, environmental health, occupational medicine, occupational lung disease, mammalian toxicology, inhalation toxicology, ergonomics, indoor air quality, occupational injury, injury epidemiology, injury prevention programs, aerosol physics, air and water quality, environmental chemistry, analytical toxicology, and environmental health in developing countries.

Graduate Programs

The department offers three graduate degrees: Master of Public Health, which includes an optional subtrack in ergonomics or focus in global health; and Master of Science and Doctor of Philosophy in occupational and environmental health, both of which include optional subtracks in agricultural safety and health and in industrial hygiene. The department also offers a joint M.S./M.A. with the Graduate College’s Urban and Regional Planning Program.

Individuals who are not enrolled in one of the department’s degree programs but wish to take departmental courses may apply for professional improvement status. The department also offers an occupational medicine residency training program.

Master of Public Health

See Master of Public Health Program in the Catalog.

Master of Science

The Master of Science in Occupational and Environmental Health requires a minimum of 38 s.h. of graduate credit. It is offered with two optional subtracks: agricultural safety and health (requires a minimum of 38 s.h. of graduate credit) and industrial hygiene (requires a minimum of 43 s.h. of graduate credit). All M.S. students are required to complete a thesis, except
industrial hygiene professional option students, who must complete a preceptorship.

The following courses are required for all M.S. students.

**REQUIRED COURSES**

All of these:

050:270 Responsible Conduct in Research 0 s.h.
171:161 Introduction to Biostatistics 3 s.h.
173:140 Epidemiology I: Principles 3 s.h.
175:180 Occupational and Environmental Health Seminar (taken three times, twice for 0 s.h. and once for 1 s.h.) 1 s.h.
175:196 Agricultural Safety: Theories and Practice 2 s.h.
175:197 Environmental Health 3 s.h.
175:203 Preceptorship in Occupational and Environmental Health 1 s.h.
175:209 Rural Health and Agricultural Medicine 3 s.h.
175:210 Current Topics in Agricultural Health (seminar, taken two times, once for 0 s.h. and once for 1 s.h.) 1 s.h.
175:230 Occupational Health 3 s.h.
175:260 Environmental Toxicology 3 s.h.

One of these:

069:133 Introduction to Human Pathology 4 s.h.
096:114 Human Pathophysiology: Organ Systems 3 s.h.
096:115 Human Pathophysiology: Cellular/Neurology/Immunology 3 s.h.

**ELECTIVES**

Elective courses are chosen to fill the 38 s.h. requirement for the degree. Students work with their advisors to select electives appropriate for their professional goals.

**THESIS**

All M.S. students, except those who choose the industrial hygiene professional option, must complete a master’s thesis that is accepted for degree credit. Students may earn a maximum of 6 s.h. for the thesis. Additional thesis credit may be allowed for students who take more than 38 s.h.

**Agricultural Safety and Health Subtrack**

The M.S. with agricultural safety and health subtrack prepares students for professional careers in education, health care, insurance, and agribusiness as specialists in agricultural safety and health.

The M.S. with agricultural safety and health subtrack requires a minimum of 38 s.h. of graduate credit.

Requirements are as follows.

**REQUIRED COURSES**

050:270 Responsible Conduct in Research 0 s.h.
171:161 Introduction to Biostatistics 3 s.h.
173:140 Epidemiology I: Principles 3 s.h.
175:180 Occupational and Environmental Health Seminar (taken three times, twice for 0 s.h. and once for 1 s.h.) 1 s.h.
175:196 Agricultural Safety: Theories and Practice 2 s.h.
175:197 Environmental Health 3 s.h.
175:203 Preceptorship in Occupational and Environmental Health 1 s.h.
175:209 Rural Health and Agricultural Medicine 3 s.h.
175:210 Current Topics in Agricultural Health (seminar, taken two times, once for 0 s.h. and once for 1 s.h.) 1 s.h.
175:230 Occupational Health 3 s.h.
175:260 Environmental Toxicology 3 s.h.

One of these:

096:114 Human Pathophysiology: Organ Systems 3 s.h.
096:115 Human Pathophysiology: Cellular/Neurology/Immunology 3 s.h.

**ELECTIVES**

Agricultural safety and health subtrack students must complete required electives from one of five focus areas; the semester-hour requirement varies by area.

Industrial hygiene: 9 s.h.
Ergonomics: 9 s.h.
Occupational and environmental health: 9 s.h.
Occupational epidemiology: 11 s.h.
Occupational injury prevention: 8 s.h.

**THESIS**

All M.S. students must complete a master’s thesis that is accepted for degree credit. Students must earn a minimum of 3 s.h. for the thesis.

**Industrial Hygiene Subtrack**

The M.S. with industrial hygiene subtrack prepares students for professional careers in industrial hygiene as well as the broad field of occupational and environmental health. Career opportunities are available in health and safety departments of industries; in consulting firms; in academic institutions; and in local, state, and federal public health agencies.
The M.S. with industrial hygiene subtrack requires a minimum of 43 s.h. of graduate credit. Two options are available: a research option, which requires a master’s thesis, and a professional option, which requires a semester-long practical experience (preceptorship).

**RESEARCH (THESIS) OPTION**

Industrial hygiene subtrack students who choose the research (thesis) option must complete a master’s thesis that is accepted for degree credit. Students may earn a maximum of 6 s.h. for the thesis.

**PROFESSIONAL (NONTHESIS) OPTION**

Industrial hygiene subtrack students who choose the professional (nonthesis) option must complete a preceptorship in industrial hygiene. Students may earn a maximum of 3 s.h. for the preceptorship.

175:203 Preceptorship in Occupational and Environmental Health arr.

Students also must complete at least one 3 s.h. elective course to fill the 43 s.h. requirement for the degree.

**Joint M.S./M.A. in Planning**

The Department of Occupational and Environmental Health and the Urban and Regional Planning Program offer a joint master’s degree program. Students who choose this option earn an M.S. in occupational and environmental health and an M.A. in planning. Separate admission to each program is required. The combined degree requires a minimum of 65 s.h. of graduate credit.

**Doctor of Philosophy**

The Doctor of Philosophy in occupational and environmental health prepares students for professional and academic careers in environmental and occupational health. It is offered with two optional subtracks: agricultural safety and health, and industrial hygiene.

The Ph.D. requires 72 s.h. of graduate credit. All doctoral students must complete a dissertation—a substantial scholarly treatise. Ph.D. requirements are as follows.

**REQUIRED COURSES**

All of these:

**ELECTIVES**

Students must earn a minimum of 24 s.h. in non-research-related courses, including classroom courses or equivalent web-based courses. Students work with their advisors to select courses appropriate for their professional goals.

**RESEARCH CREDIT**

Students earn the remaining credit for the Ph.D. by completing any combination of the following courses or other classroom courses. All Ph.D. students must complete a dissertation.
Agricultural Safety and Health Subtrack

The Ph.D. with agricultural safety and health subtrack prepares doctoral students for academic, research, and policy-making careers in occupational and environmental health, with specialty in agricultural safety and health.

Requirements are as follows.

**REQUIRED COURSES**

- 050:270 Responsible Conduct in Research 0 s.h.
- 171:161 Introduction to Biostatistics 3 s.h.
- 171:162 Design and Analysis of Biomedical Studies 3 s.h.
- 173:140 Epidemiology I: Principles 3 s.h.
- 173:157 Zoonotic Diseases 2 s.h.
- 175:180 Occupational and Environmental Health Seminar (taken three times, twice for 0 s.h. and once for 1 s.h.) 1 s.h.
- 175:196 Agricultural Safety: Theories and Practice 2 s.h.
- 175:197 Environmental Health 3 s.h.
- 175:203 Preceptorship in Occupational and Environmental Health 1 s.h.
- 175:209 Rural Health and Agricultural Medicine 3 s.h.
- 175:210 Current Topics in Agricultural Health (seminar, taken two times, once for 0 s.h. and once for 1 s.h.) 1 s.h.
- 175:230 Occupational Health 3 s.h.

One of the following:

- 096:114 Human Pathophysiology: Organ Systems 3 s.h.
- 096:115 Human Pathophysiology: Cellular/Neurology/Immunology 3 s.h.

**ELECTIVES**

Agricultural safety and health subtrack students must complete required electives from one of five focus areas; the semester-hour requirement varies by area.

- Industrial hygiene: 24 s.h.
- Ergonomics: 15 s.h.
- Occupational and environmental health: 24 s.h.

**Industrial Hygiene Subtrack**

The Ph.D. with industrial hygiene subtrack provides doctoral students with specialized knowledge in industrial hygiene in addition to their expertise in the broad field of occupational and environmental health.

The following courses are required.

**REQUIRED COURSES**

- 050:270 Responsible Conduct in Research 0 s.h.
- 171:161 Introduction to Biostatistics 3 s.h.
- 171:162 Design and Analysis of Biomedical Studies 3 s.h.
- 173:140 Epidemiology I: Principles 3 s.h.
- 175:180 Occupational and Environmental Health Seminar (taken three times, twice for 0 s.h. and once for 1 s.h.) 1 s.h.
- 175:190 Occupational Ergonomics I 3 s.h.
- 175:192 Occupational Safety 3 s.h.
- 175:197 Environmental Health 3 s.h.
- 175:220 Environmental and Occupational Epidemiology 3 s.h.
- 175:221 Aerosol Technology 3 s.h.
- 175:230 Occupational Health 3 s.h.
- 175:231 Industrial Hygiene Fundamentals 3 s.h.
- 175:232 Assessing Physical Agent Hazards 3 s.h.
- 175:233 Control of Occupational Hazards 3 s.h.
- 175:260 Environmental Toxicology 3 s.h.

**ELECTIVES**

Students must earn a minimum of 12 s.h. in non-research-related courses, including classroom courses or equivalent web-based courses. Students work with their advisors to select courses appropriate for their professional goals.
RESEARCH CREDIT

Students earn the remaining credit for the Ph.D. by completing any combination of the following courses or other classroom courses. All Ph.D. students must complete a dissertation.

175:172 Independent Study in Occupational and Environmental Health arr.
175:201 Research in Occupational and Environmental Health arr.

Admission

For detailed information about Graduate College policies, including application requirements and procedures, see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

The occupational and environmental health faculty takes several factors into consideration when evaluating applications for admission, including Graduate Record Exam (GRE) General Test scores, grade-point averages, letters of recommendation, intent and motivation for graduate study, and research interests. A student with deficiencies in one area may be admitted if all other components of his or her application are very strong.

All M.P.H., M.S., and Ph.D. program applicants must hold a baccalaureate degree and have a cumulative g.p.a. of at least 3.00 (M.P.H. and M.S. applicants) or at least 3.25 (Ph.D. applicants). All applicants must have taken the GRE General Test. A minimum GRE score of 1050 (verbal plus quantitative) is recommended for master’s applicants, 1100 for doctoral applicants.

International applicants who do not hold a baccalaureate degree from an accredited college or university in the United States, the United Kingdom, Canada (except Quebec), Australia, or New Zealand must score at least 600 (paper-based), 250 (computer-based), or 100 (Internet-based) on the Test of English as a Foreign Language (TOEFL). International applicants who score 550-599 (paper-based), 213-249 (computer-based), or 81-99 (Internet-based) are required to take English fluency courses. Applicants who score below those ranges are not considered for admission.

Undergraduate preparation for M.P.H. and M.S. applicants must include course work in mathematics, biological sciences, chemistry, and either physical sciences or engineering, depending on the applicant’s chosen specialty area.

M.S. applicants who intend to pursue the industrial hygiene subtrack also must have taken physics and mathematics through calculus; course work in biological sciences, microbiology, and computer programming is highly recommended.

Completion of the M.S. program before beginning Ph.D. study is recommended. Undergraduate preparation for doctoral applicants must include at least two semesters of chemistry, one semester of physics, and one semester of calculus. Course work in biological sciences, microbiology, and computer programming are highly recommended, particularly for students interested in some specialized areas.

Application deadlines for fall entrance for graduate study are July 1 for U.S. citizens and permanent residents, April 1 for international applicants. Application deadlines for spring entrance are December 1 for U.S. citizens and permanent residents, October 1 for international applicants.

Financial Support

Several graduate student awards, including tuition and stipend support, are available for individuals interested in industrial hygiene, agricultural safety and health, ergonomics, occupational epidemiology, or occupational injury prevention. Both stipend and tuition support are available for all occupational medicine residents. Full-time graduate students in good academic standing (those not admitted on conditional status) are eligible for a stipend and tuition support. All other students are eligible for tuition support only; requests are considered case-by-case. All recipients must be U.S. citizens or permanent residents.

Postdoctoral Positions

The College of Public Health’s Environmental Health Sciences Training Program offers postdoctoral positions in environmental health/toxicology. Appointments are made for two years with the possibility of an additional year. Applicants must be U.S. citizens or permanent residents.

Residency Program

In cooperation with University of Iowa Hospitals and Clinics, the department offers residency training in occupational medicine for physicians seeking specialty training in occupational medicine. For information contact the director of the Occupational Medicine Residency Program.
Resources

The Heartland Center for Occupational Health and Safety, one of 16 education and research centers funded by the National Institute of Occupational Safety and Health (NIOSH), provides training, education, and outreach. Its program areas are occupational health nursing, industrial hygiene, occupational medicine, ergonomics, agricultural safety and health, occupational injury prevention research, occupational epidemiology, and continuing education/outreach.

Facilities

The Department of Occupational and Environmental Health is housed on the University’s Oakdale Research Campus in the Institute for Rural and Environmental Health. College of Public Health-based laboratory facilities give researchers and students access to cutting-edge technologies for the study of occupational and environmental health.

The Inhalation Toxicology Facility (ITF), provides a full array of inhalation toxicology, aerosol science, and bioaerosol assay services. A primary focus of the ITF is the study of toxicants found in the agricultural environment and related exposure situations. The facility is particularly well-equipped for studying organic dusts and bioaerosols.

The Occupational Hygiene Laboratory (OHL) provides expertise and equipment for exposure assessment in occupational settings. The OHL provides a range of sample collection capabilities and an extensive inventory of sampling equipment. The field and laboratory services available through the laboratory support exposure-response studies and control technology development studies in a variety of occupational arenas, including agriculture, construction, and indoor environments (home and office).

A computer laboratory is available for student use, and a library collection is located in the Institute for Rural and Environmental Health.

Courses

175:101 Health, Work, and the Environment 3 s.h.
Current topics in occupational and environmental health; how the United States protects workers, protects people from environmental agents, and reduces environmental harm. Same as 044:174.

175:111 International Health arr.
Urgent health problems in the developing world and among disadvantaged populations in developed countries; biological, social, cultural, political aspects of international health problems; applications of research methods from epidemiology, environmental health, social sciences. Same as 152:111, 173:111.

175:170 Injury and Violence Prevention 3 s.h.
Theory, research, and practice of injury control; unintentional and intentional injuries; local, national, international injury issues. Same as 173:170.

175:171 Problems in Occupational and Environmental Health arr.
Didactic material in occupational and environmental health; may include tutorial, seminar, faculty-directed independent work (e.g., literature search, project, short research project).

175:172 Independent Study in Occupational and Environmental Health arr.
In-depth pursuit of an area in occupational and environmental health requiring substantial creativity and independence.

175:175 Research Methods in Disaster Studies 3 s.h.
Epidemiologic study of disasters and their health consequences; research to identify and reduce health effects, research in context of response and preparedness. Same as 173:175.

175:180 Occupational and Environmental Health Seminar 0-1 s.h.
Contemporary topics in occupational health, agricultural and comparative medicine, environmental health.

175:185 Occupational Health Research Seminar 2 s.h.
Tools necessary for making critical assessment of published scientific research reports from a methodological perspective; examples from recently published research studies in occupational and environmental health. Corequisites: 171:161 and 173:140.

175:190 Occupational Ergonomics I 2-3 s.h.
Principles of ergonomics, with focus on physical capabilities of workers and their interactions with their work environment; physiological basis of work, patterns of work, occupational risk factors for musculoskeletal and neurovascular disorders, workplace and equipment design, integration of ergonomics in manufacturing processes.

175:192 Occupational Safety 3 s.h.
Principles and practices of occupational safety; applications in industrial and other occupational settings; interactions with other disciplines.

175:193 Environmental Health Law 3 s.h.
Legal foundation of environmental health protection; federal, state, local regulation; police powers; tort liability; investigations and inspections, air and water pollution, biotechnology. Prerequisite: 175:197 or consent of instructor.

175:195 Global Environmental Health 2 s.h.
Current problems, including transboundary movement of pollutants, vectors of infectious agents, global warming and climatic change. Prerequisite: 175:111 or 175:197 or consent of instructor.

175:196 Agricultural Safety: Theories and Practice 2 s.h.
General theories and practice of injury prevention from varied fields, including industrial safety, engineering, regulation, education, epidemiology, social psychology; strategic application in agriculture.

175:197 Environmental Health 3 s.h.
Survey of the field; assessment of contemporary human health issues associated with biological, chemical, physical factors of environment; critical review of environmental factors that affect health; public policies governing recognition, intervention, control.

175:198 Solid and Hazardous Wastes 3 s.h.
Sources, characteristics, collection and disposal of solid and hazardous wastes; environmental impacts of hazardous waste
175:201 Research in Occupational and Environmental Health  
Research that may lead to a dissertation. Repeatable.

175:203 Preceptorship in Occupational and Environmental Health  
Work experience using knowledge and skills acquired in the classroom; arranged in conjunction with departmental or collegiate activities or with governmental agencies or private industry. Repeatable.

175:205 Public Health Law  
Introduction to legal principles and case law relevant to public health policy making; constitutional, administrative, and tort law as applied to public health; fluency with legal analysis and terminology. Pre- or corequisite: 175:197.

175:209 Rural Health and Agricultural Medicine  
Clinical orientation of specific health problems of rural residents, agricultural workers; rural health care delivery, socioeconomic issues in agriculture and their effects on health and safety of the agricultural population; occupational health problems, environmental health hazards in rural areas. Prerequisite: 173:140 or medicine enrollment or consent of instructor.

175:210 Current Topics in Agricultural Health  
Issues that affect the health of agricultural populations, such as agro-terrorism, antibiotic resistance, genetically modified organisms; current scientific literature.

175:211 Veterinary Public Health: The Profession  
History and overview of veterinary public health and the American College of Veterinary Preventive Medicine (ACVPM); preparation for ACVPM board of certification.

175:220 Environmental and Occupational Epidemiology  
Environmental and occupational epidemiologic study designs; basic and novel methods of exposure assessment; methodologies to improve study validity. Prerequisite: 173:140. Corequisites: 171:161 and 175:197.

175:221 Aerosol Technology  
Particle statistics and physics of aerosols, including inertia, diffusion, nucleation, evaporation, condensation, optics, electrical properties; relationship to fields such as agriculture, nanotechnology, environmental and occupational health, atmospheric chemistry, drug delivery.

175:230 Occupational Health  
Principles, practice of occupational medicine, fundamentals of industrial hygiene and safety, occupational health management, ergonomics, occupational health nursing. Offered fall semesters.

175:231 Industrial Hygiene Fundamentals  
Principles, with emphasis on recognition of chemical health hazards, physical health hazards at work. Pre- or corequisite: 175:230.

175:232 Assessing Physical Agent Hazards  
Basic principles of recognizing and evaluating hazards presented by physical agents in occupational environments. Prerequisite: 175:230.

175:233 Control of Occupational Hazards  
Physical science concepts applied to control of occupational hazards ranging from dusts to mists to vapors; strategies, management issues, personal protective equipment, implementation skills; in-depth instruction on local exhaust ventilation system design. Prerequisite: 175:230 or 175:231 or consent of instructor.

175:251 Injury Epidemiology  
How epidemiology can be applied to injury prevention and control; specific methodological problems involved in the epidemiology of injuries; epidemiology literature, critical evaluation of research articles. Offered spring semesters of odd years. Prerequisite: 173:140 or consent of instructor. Same as 173:251.

175:252 Environmental Health Policy  
Major concerns in environment and human health, legislation enacted to deal with these concerns; emphasis on contemporary issues. Offered fall semesters of odd years. Prerequisite: 175:197 or consent of instructor. Same as 053:204, 152:252.

175:253 Epidemiology of Occupational Injuries  
Epidemiological literature on occupational injuries. Offered spring semesters of even years. Prerequisite: 173:140 or consent of instructor. Same as 173:253.

175:260 Environmental Toxicology  
Sources, routes of absorption, effects of environmental toxicants affecting man; pathophysiology of toxicant actions, including those of air and water pollutants, metals, pesticides, solvents, food toxicants, chemicals. Prerequisite: college organic and inorganic chemistry, or physiology, or biochemistry.

175:265 Advanced Toxicology  
Hepatic metabolism and toxification mechanisms, pulmonary and immunotoxicology, nervous system poisons and their mechanisms of action, general and molecular concepts of chemical carcinogenesis. Prerequisite: 175:260 or equivalent or consent of instructor.

175:270 Special Topics in Toxicology  
Genesis of toxicology as the science of poisoning, its application to murder, magic, medicine; use of natural products for gaining power, hunting, warfare, religion, witchcraft. Offered spring semesters of even years. Pre- or corequisite: 175:260.

175:285 Advanced Topics in Occupational Medicine  
Skills and knowledge for evaluating and treating patients with work-related illness.

175:294 Occupational Ergonomics II  
Application of ergonomic principles in varied work settings, through case study approach; participatory ergonomics, economics of ergonomics, workforce issues, psychosocial factors, shift work, integration of ergonomics into business models, current legislative issues, legal aspects of ergonomics, international perspectives; biomedical instrumentation used for risk factor exposure measurements.

175:295 Clinical Ergonomics  
Clinical orientation to specific ergonomic problems and issues; preparation for conducting independent on-site ergonomic evaluations in occupational settings; experience developing and evaluating ergonomic inventions in an occupational setting; rotation through an occupational medicine clinic. Prerequisite: 175:190 or consent of instructor.

175:300 Thesis/Dissertation  
Repeatable.

175:996 Occupational Medicine  
In-depth study of an area in occupational and environmental medicine, with clinical experience in an outpatient community setting. Four-week course. Prerequisite: M.D. enrollment.
The Program in Public Health Genetics focuses on statistical genetics with applications to medical research, especially mapping and understanding genes related to common, complex human diseases. It also focuses on public health implications of genetics and genetics research.

**Graduate Programs**

The program offers the Doctor of Philosophy and a graduate certificate, both in statistical genetics.

Admission to the Ph.D. in statistical genetics has been suspended.

**Doctor of Philosophy**

The Ph.D. in statistical genetics prepares students for professional and academic careers in statistical genetics. It provides training in the development and evaluation of new statistical methods for analyzing human genetic data, and the application of those methods to discovering and understanding the genes underlying human disease. The program also prepares students to contribute to collaborative clinical research by providing them with training in genetics and with opportunities to participate in research involving collaboration with molecular and clinical geneticists and genetic epidemiologists.

The Ph.D. requires a minimum of 82 s.h. of graduate credit. Students complete a 42 s.h. core; 9-12 s.h. in a concentration area outside statistical genetics (biostatistics/statistics, computer science/bioinformatics, biology/bioinformatics, or epidemiology/biostatistics); up to 25 s.h. of elective course work chosen in consultation with the student’s advisor; and at least 6 s.h. of dissertation credit. They also must successfully complete a comprehensive examination and a dissertation—a substantial scholarly treatise for which they must earn at least 6 s.h. The dissertation research topic and content must be approved by the student’s dissertation committee.

Ph.D. requirements are as follows.

**REQUIRED CORE**

All Ph.D. students must complete the following courses (42 s.h.).

<table>
<thead>
<tr>
<th>Course Code</th>

</tbody>
</table>
Computer Science/Bioinformatics

All of these:
002:170 Bioinformatics 3 s.h.
06K:272 Database Analysis and Design 3 s.h.
06K:275 Knowledge Discovery 3 s.h.

Epidemiology/Biostatistics

Both of these:
171:241 Applied Categorical Data Analysis 3 s.h.
173:140 Epidemiology I: Principles 3 s.h.

One of these:
173:255 Epidemiology of Infectious Diseases 3 s.h.
173:265 Cardiovascular Disease Epidemiology 3 s.h.
173:267 Psychiatric Epidemiology 3 s.h.
173:270 Cancer Epidemiology and Control 3 s.h.

ELECTIVES

Students select up to 25 s.h. of elective courses from this list. They also may substitute other courses with written approval of the program’s director and their advisors.

22S:138 Bayesian Statistics 3 s.h.
22S:161 Applied Multivariate Analysis 3 s.h.
22S:255 Linear Models 4 s.h.
22S:256 Multivariate Analysis 3 s.h.
171:185/185:103 Microarray Analysis and Statistics in Bioinformatics 3 s.h.
171:261 Survival Data Analysis 3 s.h.
171:262 Analysis of Categorical Data 3 s.h.
171:264 Longitudinal Data Analysis 3 s.h.
185:101 Introduction to Genetics and Public Health 3 s.h.
185:281 Independent Study in Statistical Genetics 3 s.h.
185:282 Special Topics in Statistical Genetics 3 s.h.
185:295 Research in Statistical Genetics 3 s.h.

DISSERTATION

Students must earn at least 6 s.h. for the dissertation and must be in residence a minimum of two years.
185:300 Dissertation in Statistical Genetics 6 s.h.

Certificate

The Certificate in Statistical Genetics prepares students for careers as data analysts on research projects involving human genetic data. The certificate is designed to complement an M.S. in biostatistics or a related field, such as statistics. It can be completed either in conjunction with or after completing an M.S. The certificate cannot be awarded before completion of an M.S.

The certificate requires the following course work (16 s.h.) with a g.p.a. of at least 3.00.

070:110 Medical Genetics 2 s.h.
173:225 Genetics and Epidemiology 4 s.h.
185:102 Introduction to Genetic Data Analysis 3 s.h.
185:276 Statistical Genetics Laboratory 3 s.h.
*185:280 Preceptorship in Statistical Genetics 3 s.h.
185:285 Clinical Genetics Practicum 1 s.h.

*The preceptorship in statistical genetics must be approved by the head of the Program in Public Health Genetics.

Admission

Admission to the Ph.D. in statistical genetics has been suspended.

For detailed information about Graduate College policies, including application requirements and procedures, see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

Resources

The Center for Statistical Genetics Research supports research on complex human inherited disease through basic methodological work in statistical genetics and promotion of interdisciplinary, collaborative, clinical-genetic research. The center provides opportunities for graduate students and postdoctoral fellows to be involved in research throughout their training.

Courses

185:101 Introduction to Genetics and Public Health 3 s.h.
185:102 Introduction to Genetic Data Analysis 3 s.h.
185:103 Microarray Analysis and Statistics in Bioinformatics 3 s.h.
185:104 Introduction to Informatics 3 s.h.
Computing principles and fundamental aspects of computer science; history of computing, basic computer architecture and operating system concepts, fundamentals of relational databases, algorithmic idioms, computational complexity, introductory programming concepts in Perl. Offered fall semesters. Prerequisite: closed to computer science students. Same as 22C:104.
185:272 Population and Quantitative Genetics 3 s.h.
185:274 Theory of Statistical Genetics 3 s.h.

University College is home to a wide range of programs for University of Iowa students and precollege students. It includes major college-level programs such as the University of Iowa Honors Program, Study Abroad, and study at Iowa Lakeside Laboratory. Some of its college-level programs are designed to smooth entering students’ transition to college life, such as the College Success Initiatives program, or to provide opportunities for populations underrepresented in the sciences and engineering, such as Iowa Biosciences Advantage and Alliances for Graduate Education and the Professoriate. Special courses for student orientation advisors, residence hall assistants, fraternity and sorority leaders, and students who design web sites for University departments and offices are offered through University College, as are Lifetime Leisure Skills courses in a broad range of sport and fitness activities.

The University’s Reserve Officer Training Corps programs, Aerospace Studies and Military Science, reside in University College.

Several precollege programs also are under University College’s wing: the Belin-Blank Center for Gifted Education, the Iowa Young Writers’ Studio, Opportunity at Iowa Summer Programs, the Secondary Student Training Program, and University of Iowa Upward Bound.

Courses offered through University College programs are taught by University of Iowa faculty and staff members.
The Aerospace Studies Program administers the Air Force Reserve Officer Training Corps (AFROTC) at The University of Iowa. AFROTC educates highly qualified students who are working toward a degree and a commission as an officer in the United States Air Force.

AFROTC is voluntary, with courses open to all undergraduate and graduate students. The amount of AFROTC academic credit that may be applied toward a degree varies from college to college at the University. The College of Liberal Arts and Sciences, for example, accepts a maximum of 20 s.h.

In order to receive a commission, AFROTC cadets must complete all University requirements for a degree as well as courses specified by the U.S. Air Force.

AFROTC offers programs lasting two and one-half years, three years, and four years. Joining the program early gives students the opportunity to try AFROTC without obligation. It also can give them an advantage in the scholarship selection process.

The AFROTC program’s three main components are the general military course, the professional officer course, and field training.

**General Military Course**

The general military course (GMC) consists of a 1 s.h. course and a leadership laboratory taken each semester for two years. Any student who meets AFROTC qualifications and is in good academic standing with the University is eligible to participate in the GMC. Students normally apply for the GMC up to the time they earn 60 s.h. Students who have earned more than 60 s.h. may enroll in the GMC if they are willing to extend their academic plan by a semester or more.

**Professional Officer Course**

The professional officer course (POC) consists of four 3 s.h. AFROTC courses. Students accepted into the POC make a commitment to serve a minimum of four years as U.S. Air Force officers. To enter the POC, students must be selected to attend and must successfully complete field training. Students generally take the POC during their last 60 s.h.

**Field Training**

All POC applicants must successfully complete field training at a U.S. Air Force base. Field training is an intensive, four-week program completed the summer after the sophomore year. It provides a first-hand look at the active duty Air Force and develops military leadership and discipline. Students participate in aircraft and aircrew orientation, junior officer education, marksmanship, survival training, and physical fitness training. When they complete the program, they are ready to return to school and assume a leadership position in the AFROTC program.

Students receive authorized pay and allowances when they attend field training.

**Special Activities**

Students have the option to compete for acceptance to a variety of optional AFROTC summer training programs. They can shadow a junior officer in a career field of interest, or they can compete to attend the Air Force Academy’s free-fall parachute, glider, or combat survival schools. Students can return to field training as cadet training assistants, go to the Pentagon to see how the Air Force operates, or travel to a foreign country for a cultural immersion program. The Air Force provides transportation, meals, lodging, and a daily expense allowance for all summer programs.

Throughout the year, students may learn more about the Air Force by choosing to participate in base visits, aircraft orientation rides, a Dining Out (a formal ball in Air Force tradition), and other activities.

The AFROTC Cadet Corps also sponsors many social events, including informal parties, formal dinners, intramural athletics, and a military ball.
Financial Aid

Merit scholarships are available for one, two, and three years of study. They provide tuition, a $750 stipend for books, laboratory fees, and $250-400 per month, tax-free. Applicants are selected based on objective and subjective factors. Students should apply directly to the head of aerospace studies. Students majoring in certain high-demand disciplines may be eligible for an express scholarship upon acceptance to AFROTC.

All cadets in the last two years of AFROTC are eligible for some financial assistance. They receive $350-400 per month, tax-free. Uniforms are furnished as well as all books for AFROTC classes.

Education Delay

Cadets may request an education delay to postpone entry to active duty until after completion of an advanced degree or professional training program.

Courses

23A:010 Foundations of the U.S. Air Force I 1 s.h.
Introduction to U.S. Air Force: military customs and courtesies, basic oral and written communication techniques, careers available to Air Force officers. Prerequisite: first-year or sophomore standing or consent of instructor.

23A:011 AFROTC Leadership Laboratory (LLAB)
AS 100-FA 1 s.h.
A progression of experiences designed to develop leadership ability; military customs and courtesies, drill and ceremonies, military professional development, the life and work of a junior officer; leadership skills in a practical, supervised military lab setting. Offered fall semesters. Prerequisite: first-year or sophomore standing or consent of instructor. Corequisite: 23A:010.

23A:012 Foundations of the U.S. Air Force II 1 s.h.
Continuation of 23A:010; leadership theory and practice, team building, diversity in the work force. Prerequisite: first-year or sophomore standing or consent of instructor.

23A:013 AFROTC Leadership Laboratory (LLAB)
AS 100-SP 1 s.h.
A progression of experiences designed to develop leadership ability; military customs and courtesies, drill and ceremonies, military professional development, the life and work of a junior officer; leadership skills in a practical, supervised military lab setting. Offered spring semesters. Prerequisite: first-year or sophomore standing or consent of instructor. Corequisite: 23A:012.

23A:020 Evolution of USAF Air and Space Power I 1 s.h.
Air power from Civil War hot air balloons through World War II; emphasis on developments in U.S. Air Force.

23A:021 AFROTC Leadership Laboratory (LLAB)
AS 200-FA 1 s.h.

23A:022 Evolution of USAF Air and Space Power II 1 s.h.
Continuation of 23A:020; air power from post-World War II to present; emphasis on developments in U.S. Air Force.

23A:023 AFROTC Leadership Laboratory (LLAB)
AS 200-SP 1 s.h.

23A:130 Air Force Leadership Studies I 3 s.h.
Emphasis on management, leadership, communication skills required of an Air Force officer. Prerequisite: junior or higher standing or consent of instructor.

23A:131 AFROTC Leadership Laboratory (LLAB)
AS 300-FA 1 s.h.

23A:132 Air Force Leadership Studies II 3 s.h.
Continuation of 23A:130; leadership topics in counseling, accountability, ethics. Prerequisite: junior or higher standing or consent of instructor.

23A:133 AFROTC Leadership Laboratory (LLAB)
AS 300-SP 1 s.h.

23A:140 National Security Affairs and Active Duty
Preparation I 3 s.h.
America’s evolving national security policy; structure of national security agencies, development of national security strategies; global regions and their historical and current importance to U.S. security policies. Prerequisite: junior or higher standing or consent of instructor.

23A:141 AFROTC Leadership Laboratory (LLAB)
AS 400-FA 1 s.h.

23A:142 National Security Affairs and Active Duty
Preparation II 3 s.h.
Continuation of 23A:140; Department of Defense structure, missions, and responsibilities, with emphasis on role of the U.S. Air Force; Air Force standards; preparation for active duty as Air Force junior officers. Prerequisite: junior or higher standing or consent of instructor.

23A:143 AFROTC Leadership Laboratory (LLAB)
AS 400-SP 1 s.h.

23A:150 Readings in Contemporary Military Issues 1-4 s.h.
Independent research on the U.S. Air Force; historical topics, current missions, future technologies, comparisons to other nations. Prerequisite: consent of instructor.

23A:171 AFROTC Leadership Lab AS 700 0 s.h.
Opportunity to use leadership skills acquired in previous AFROTC classes; experience providing leadership to the Cadet Corps, under direction of commandant of cadets. Prerequisites: 23A:141 and 23A:143.

23A:173 AFROTC Leadership Lab AS 700 0 s.h.
The Alliances for Graduate Education and the Professoriate Summer Program (AGEP) prepares students to pursue graduate education in engineering and in the mathematical, physical, and life sciences. The eight-week program offers early research experience by matching students with University of Iowa faculty mentors in the students’ interest areas. It also gives participants the opportunity to experience life as a graduate student at a large university.

Students are required to participate in weekly seminars and in social, cultural, and educational activities. They also tour facilities both on and off campus. A final report/project is required. The program ends with a research symposium at which students make oral and poster presentations of their research.

Students accepted to AGEP receive a $2,500 stipend, on-campus room and board, and round-trip airfare to Iowa.

Applicants must be U.S. citizens or permanent residents, and members of an underrepresented minority (African American, Hispanic, or American Indian). They must be undergraduate students pursuing a degree in science, technology, engineering, or mathematics. To enter the program, applicants must have completed their sophomore year in college and have a cumulative g.p.a. of at least 3.00. Graduating seniors are not eligible.
The Bachelor of Applied Studies (B.A.S.) program is designed for nontraditional students who are graduates of community college technical programs and who wish to complete a bachelor's degree without interrupting their careers. Applicants should have a minimum of three years of work experience.

The B.A.S. provides alternatives to traditional majors. Because the program does not have departmental major requirements, students work with an advisor to plan their own emphasis areas.

Students may earn credit toward the degree through several types of courses, including Saturday & Evening Classes, print- and web-based independent study courses, semester-based web courses, extension courses at sites throughout Iowa, interactive and broadcast televised courses, and regular session courses.

At The University of Iowa, the B.A.S. is awarded by University College and administered by the Division of Continuing Education. Since the B.A.S. is a general undergraduate degree without a traditional major, B.A.S. students may not earn minors. However, the degree requirements are sufficiently flexible to allow students, with the assistance of their B.A.S. advisor, to structure a program that meets their individual objectives. B.A.S. students may plan programs designed to help them advance in their chosen careers, begin new careers, or prepare for professional study. Students who have specific career goals or advanced degree programs in mind should learn what educational background they will need in order to achieve their goals, and they should include appropriate course work in their B.A.S. programs.

The Bachelor of Applied Studies requires 120 s.h., including at least 30 s.h. earned at The University of Iowa after admission to the B.A.S. program. Students must earn at least 60 s.h. of the required 120 s.h. at four-year colleges, including 45 s.h. in course work defined as upper-level. For the B.A.S., University of Iowa courses are considered upper-level if they are numbered 100 and above. A few courses numbered below 100 may be considered upper-level for the B.A.S.; for a list of these courses, contact the Center for Credit Programs.

The program of study requires that a student complete 12 s.h. in three of the following five distribution areas.

- Humanities (e.g., literature, history, philosophy, religion)
- Communication and arts (e.g., journalism, speech, drama, art, music)
- Natural sciences and mathematics (e.g., geology, biological sciences, statistics, computer science)
- Social sciences (e.g., geography, psychology, economics, political science, anthropology)
- Professional fields (e.g., business, education, nursing, social work, library science)

Semester hours applied toward completion of the B.A.S core requirements (see “Admission” later in this section) may not be used to meet the B.A.S. distribution area requirements, but they may be counted toward the required 45 s.h. of upper-level course work, if applicable.

Students must maintain a g.p.a. of 2.00 or higher in all course work attempted, work undertaken at The University of Iowa, and all upper-level course work.

All Division of Continuing Education policies regarding pass/nonpass and satisfactory/fail grading, academic standards, and so forth apply to B.A.S. students (for details, see http://www.continuetolearn.uiowa.edu/ccp/studservs.htm).

Students may incorporate one of three online certificate programs into their B.A.S. studies: the Certificate in Entrepreneurship, the Certificate in Nonprofit Management, and the Certificate in Public Health. Or they may use an interdisciplinary approach to plan an individualized focus area.

Entrepreneurship Certificate

The Certificate in Entrepreneurship is offered by the Tippie College of Business. It requires 18-20 s.h. Courses are offered via the World Wide Web. See Entrepreneurship (Tippie College
of Business) in the Catalog or contact the Tippie College of Business for details.

**Nonprofit Management Certificate**

The Certificate in Nonprofit Management is offered by University College in collaboration with the Center for Credit Programs and the Larned A. Waterman Iowa Nonprofit Resource Center. The certificate requires 18 s.h. Courses are offered primarily on the World Wide Web. See Nonprofit Management (University College) in the Catalog or contact the Center for Credit Programs for details.

**Public Health Certificate**

The Certificate in Public Health is offered by the College of Public Health and is designed primarily for individuals working in public health practice and for those considering public health careers. The certificate requires 12 s.h. Courses are offered via the World Wide Web. Applicants must have substantial relevant work experience. Contact the College of Public Health for details.

**Interdisciplinary Approaches**

In collaboration with their B.A.S. advisor, students may design a focus in one of a variety of interdisciplinary areas (e.g., aging studies, environmental studies, technical writing, family studies).

**Admission**

Students who want to graduate with a B.A.S. must make a formal application for admission to the program. Prospective students should contact the Center for Credit Programs office before applying.

All applications to the program are screened. Students who have access to the full range of the University’s daytime classes should seek admission to the College of Liberal Arts and Sciences in order to pursue a major leading to a degree other than the B.A.S. Non-B.A.S. students interested in tailoring a degree program to their individual interests should consider pursuing the interdepartmental studies major (see Interdepartmental Studies in the Catalog) or the Bachelor of Liberal Studies degree (see Bachelor of Liberal Studies in the Catalog).

To be eligible for admission to the B.A.S. program, students must have earned an Associate of Science (A.S.) from an Iowa area community college that participates in the Iowa Community College/Regents Articulation Agreement. They must have a g.p.a. of at least 2.00 and must have completed the following B.A.S. minimum core requirements.

- **Rhetoric:** total of 4-8 s.h. (the requirement includes two composition courses and one speech course)
- **Quantitative or formal reasoning:** (3 s.h.)
- **Social sciences:** (3 s.h.)
- **Cultural diversity:** (3 s.h.)

**Business/management:** total of 6 s.h. from these:

- 06A:001 Introduction to Financial Accounting 3 s.h.
- 06A:002 Managerial Accounting 3 s.h.
- 06A:020 Accounting for Nonbusiness Students 3 s.h.
- 06J:047 Introduction to Law 3 s.h.
- 06J:048 Introduction to Management 3 s.h.
- 06K:070 Computer Analysis 3 s.h.

See a B.A.S. advisor for a list of other acceptable courses.

Contact the Center for Credit Programs for more information about the B.A.S. program.
Career Center Programs

**Director:** David Baumgartner  
**Web site:** http://www.careers.uiowa.edu

The University of Iowa Marvin A. and Rose Lee Pomerantz Career Center administers the University’s Career Center Programs. The center helps students explore and plan careers, search for employment and internship opportunities, and prepare for job interviews. Students may use the Pomerantz Career Center’s services at any time during their academic careers, but the center encourages entering first-year and transfer students to visit after they arrive on campus and to make use of all of the center’s services throughout their study at Iowa.

The center offers online workshops throughout the year on a variety of topics, including résumé writing, job and internship search techniques, employer research, and interviewing skills. It hosts several career fairs each fall and spring, offering students the opportunity to talk with and learn about prospective employers.

The Pearson Library contains career-related books, periodicals, and online resources—some broad in scope, others targeted to specific careers or jobs. Corporate annual reports and employer recruiting brochures join information on salaries, geographical cost of living, resources for jobs and internships, graduate schools, and other topics.

The Pomerantz Career Center facilitates job interviewing with a wide range of employers—regional, national, and international; profit and nonprofit; state and federal government. Employers conduct on-campus job interviews at specific times during the year, and many post immediate openings year-round. On-campus recruiting and job postings are available on the center’s web site.

The center also helps students find internships in Iowa, the Midwest, nationwide, and sometimes in other countries. For a list of discipline-related internships [all require course registration], see “Courses”/“Internships” below.

For more information about the center’s services and facilities, contact the Pomerantz Career Center.

The College Success Initiatives program is designed to enrich students’ experiences at The University of Iowa. College Success Initiatives offers the following courses focused on helping first-year and entering students make a successful transition to the University: a traditional first-year experience course (407:001), a transition course for transfer students (407:011), a web-based course offering an introduction to electronic tools and resources at The University of Iowa (407:007), and a course for first-year students who have been placed on academic probation (407:002).

College Success Initiatives is administered by the associate provost for undergraduate education. For more information about College Success Initiatives courses, contact the Academic Advising Center. Other programs designed especially for first-year students at Iowa include Courses in Common (contact the Academic Advising Center), First-Year Seminars (contact the College of Liberal Arts and Sciences), and Learning Communities (contact the Office of the Provost).

Courses

407:001 The College Transition 2 s.h.
College culture, University of Iowa resources, refinement of study skills, test taking, identification of personal values, self-motivation, goal setting; taught in small sections with emphasis on classroom discussion. Prerequisite: entering first-year student standing.

407:002 College Success Seminar 1 s.h.
Skills, habits, and attitudes essential for college success; self-assessment, goal setting, problem solving, motivation, time management, study skills, preparing for and taking tests; campus resources, including the Pomerantz Career Center, University Counseling Service; emphasis on class participation and completion of assignments related to course topics. Prerequisite: selected students with first-year standing in the College of Liberal Arts and Sciences.

407:005 HSLC Seminar 1 s.h.

407:007 Online at Iowa 1 s.h.
Web-based introduction to electronic tools and resources at The University of Iowa; web sites, e-mail, databases; how to research courses, register for classes, and review grades; computer security; virtual campus tour.

407:011 The Transfer Transition 2 s.h.
University of Iowa resources, career and major selection, identification of personal values, self-motivation, goal setting, study and test-taking skills; small sections with classroom discussion. Prerequisite: first-year transfer student standing.

407:015 Diversity Awareness: Discussion About Differences 1 s.h.
Multicultural and diversity awareness developed through group interaction, dialogues, and reflection on topics such as race, ethnicity, gender, sexual orientation, and socioeconomic status.

407:020 Teamwork Practicum 1-3 s.h.
Participation on a University committee, completion of associated activities; effective team membership skills; how complex organizations function.
Intercollegiate Athletic Participation

Students who are members of University of Iowa intercollegiate athletics teams and are certified to participate in their sport may register for 408:021. Each section of the course represents a specific sports team; students register for the appropriate section. Registration requires approval from the director of athletic student services. Qualified students may repeat the course. Members of University of Iowa sport clubs are not eligible to enroll in 408:021.

Courses

408:021 Intercollegiate Athletic Participation 1 s.h.
Iowa Biosciences Advantage

**Director:** Sarah K. England (Molecular Physiology and Biophysics)
**Web site:** [http://www.uiowa.edu/iba/](http://www.uiowa.edu/iba/)

Iowa Biosciences Advantage (IBA) is a highly competitive undergraduate research and academic enrichment program funded by the National Institutes of Health. The program identifies academically talented undergraduates who are members of underrepresented minorities and who aspire to careers in research, and gives them first-rate training that facilitates their entry into doctoral programs in biomedical, behavioral, and biophysical sciences.

IBA students have opportunities to work in research laboratories with faculty mentors during the course of their undergraduate careers. The program’s faculty represents a broad range of disciplines in the basic and biomedical sciences. IBA students also benefit from specialized course work, career workshops, and academic advising for biomedical and bioscience careers.

Students selected for IBA must maintain good standing in academics and research. Good academic standing requires a g.p.a. of at least 3.00 and is evaluated at the end of each semester. Good research standing is determined by each student’s research mentor.

Students work with their mentors throughout the academic year and summer. They present their research in August at the Annual IBA Scholar Research Symposium.

**STUDENTS ACCEPTED FROM HIGH SCHOOL**

Students admitted to IBA from high school spend their first year at The University of Iowa establishing good academic standing and conducting laboratory rotations.

During fall semester, IBA students enroll in a special section of 407:001 The College Transition (2 s.h., graded satisfactory/unsatisfactory), which covers topics such as defining college culture, discovering University resources, refining study skills, taking tests, and setting goals.

During spring semester, IBA students enroll in two courses. They take 168:041 IBA Student Development Seminar (1 s.h.), an extension of subject matter introduced in The College Transition. They also take a special section of 168:047 IBA Research in Biomedical Science (0 s.h.) and complete two research rotations. The rotations, which are set up by IBA staff, introduce students to laboratory research at the University.

At the end of the first year, each student is evaluated for admission to the IBA Scholar Program. Students selected as IBA scholars remain on campus for the eight-week summer session. They earn wages for laboratory work with their research mentors, live in the IBA Summer Learning Community, and participate in IBA events.

**STUDENTS ACCEPTED FROM COLLEGE**

Applications also are accepted from current University of Iowa undergraduates majoring in the sciences as well as students transferring to Iowa as sophomores or juniors. Students accepted to IBA during their first, second, or third year of college join the appropriate class of IBA scholars. During their first semester of participation, new undergraduates complete lab rotations and establish good academic standing. They also enroll in 168:041 IBA Student Development Seminar. Once students are matched with a research mentor, they earn wages for their laboratory work during summer and the academic year.

**Admission**

Students apply to Iowa Biosciences Advantage during their senior year of high school or once they are undergraduate students.

Applicants must:
- have a strong interest in pursuing a research career;
- have a qualifying academic major;
- be in good academic standing (grade-point average of at least 3.00);
- submit an IBA application, including short essays and a release for IBA to obtain the applicant’s transcripts; and
- submit one letter of recommendation from a science or math instructor.

Admission requires an interview. Admission decisions are made throughout the year.
Faculty

Faculty members from the University’s broad range of basic and biomedical science disciplines serve as teachers and mentors to IBA students. They represent many departments, including anatomy and cell biology, biochemistry, biological sciences, biomedical engineering, chemistry, integrative physiology, microbiology, molecular physiology and biophysics, neuroscience, and psychology.

Courses

168:039 Introduction to Laboratory Techniques 2 s.h.
Exercises that teach basic laboratory techniques through experimentation with biological materials; preparation for conducting research in the mentor’s laboratory.

168:041 IBA Student Development Seminar 0-1 s.h.
Academic and professional development; presentations by faculty researchers, admissions representatives, or students in graduate bioscience programs; discussions about succeeding at the University; talks by professional educators on topics such as effective study skills.

168:047 IBA Research in Biomedical Science arr.
Registration in a section taught by the student’s research mentor. Prerequisite: enrollment in IBA.
Iowa Lakeside Laboratory

Director: Chet Rzonca (University of Iowa)
University of Iowa coordinator: Diana Horton (Biological Sciences)
Iowa State University participating faculty: Bonnie S. Bowen (Ecology, Evolution, and Organismal Biology), Lee Burras (Agronomy), C. Arthur Croyle (Art and Design), Clay A. Pierce (Natural Resource Ecology and Management)
University of Iowa participating faculty: John F. Doershuk (Anthropology)
University of Northern Iowa participating faculty: Thomas Hockey (Earth Science), Michael J. Shott (Sociology, Anthropology, and Criminology), Daryl D. Smith (Native Roadside Vegetation Center)
Web site: http://www.lakesidelab.org

Iowa Lakeside Laboratory is a field station run cooperatively by the Iowa Lakeside Laboratory Consortium, whose members include The University of Iowa, Iowa State University, the University of Northern Iowa, and Drake University. Iowa Lakeside Laboratory courses can be taken for credit through all consortium member schools. Students should check with their advisors to determine whether Iowa Lakeside Laboratory courses can be used to satisfy requirements of their academic majors or minors, or college or university general education requirements.

The laboratory was established in 1909 for the conservation and study of the rich flora and fauna of northwest Iowa, especially the numerous lakes, wetlands, and prairies of the Iowa Great Lakes region. The campus is located on approximately 140 acres of restored prairie, wetland, and gallery forest along the west shore of West Okoboji Lake. Lakeside’s mission is to provide undergraduate and graduate students an opportunity for hands-on experience in a variety of natural and human environments through its field-oriented summer courses, and to provide research facilities and support for graduate students and faculty members working on research projects in northwestern Iowa.

Each summer Iowa Lakeside Laboratory offers students a unique educational experience—small, full-immersion, field-oriented courses in the natural sciences (archaeology, ecology, environmental science, evolution, geology, hydrology, soils, taxonomy). All courses meet all day Monday through Friday. The majority of courses last four weeks. Enrollment in most courses is limited to eight to ten students. Courses are taught at the undergraduate level (sophomore and junior) and the senior/graduate level. Students earn 1 s.h. for each week (40 hours) in class. One- and two-week courses also are available, including courses designed especially for teachers.

Weather permitting, students normally spend at least part of each day doing fieldwork, either as part of their class work or for individual or group projects. Because some courses are offered alternate summers, the current Iowa Lakeside Laboratory Bulletin or the University of Iowa’s summer course offerings on ISIS (Iowa Student Information Services) should be consulted for the courses being offered in a particular summer session. The Iowa Lakeside Laboratory Bulletin also contains additional information about the Iowa Lakeside Laboratory and about each course being offered.

Research projects by undergraduates, graduate students, and faculty members can be completed either on the campus or at many nearby natural areas. Undergraduate and graduate students are strongly encouraged to do independent projects at Iowa Lakeside Laboratory, and graduate students are welcome to use Lakeside as a base for their thesis and dissertation research. Laboratory space and other facilities are available for long-term or short-term research projects.

Teaching and research facilities include eight laboratory buildings, a library, and a lecture hall. Living accommodations include cottages, motel-style units, and a large mess hall. All students are encouraged to stay at Lakeside while they are taking courses to derive full advantage of its educational, professional, and social life.

Registration

Students can enroll in Iowa Lakeside Laboratory courses only by submitting an Iowa Lakeside Laboratory Registration and Scholarship Form and the Lakeside housing form to the Iowa Lakeside Laboratory Administrative Office. These forms are included in the Iowa Lakeside Laboratory Bulletin and in The University of Iowa’s online course schedule on ISIS. Information on registration and current courses is available in the bulletin and on the Iowa Lakeside Laboratory web site. The Iowa Lakeside
**Laboratory Bulletin** is available on the University of Iowa campus from the Department of Biological Sciences, the Department of Chemistry, and the Department of Geoscience.

Early registration is advisable. Because enrollment in Lakeside courses is limited, students should register before May 1 for the following summer session. Housing is limited at Lakeside. When students register for courses, they must either apply for housing or state that they plan to live off campus.

**Financial Support**

Iowa Lakeside Laboratory scholarships are available to undergraduates and graduate students. Scholarships cover room and board. Information about how to apply for Iowa Lakeside Laboratory scholarships is included in the Iowa Lakeside Laboratory Bulletin and on Lakeside’s web site. Students also should consult the Office of Student Financial Aid for information about other scholarships, work-study, and loan programs.

The University of Iowa provides Thomas H. Macbride Scholarships in Natural Science for qualified graduate students attending Lakeside. The scholarships cover Iowa Lakeside Laboratory tuition costs. Application deadline is April 1.

**Courses**

**00L:005 Flora of the Iowa Lakes Region** 2 s.h.

**00L:015 Introduction to the Life Sciences** 1 s.h.
Overview of life sciences disciplines: ecology and evolutionary biology, molecular, cellular, and developmental biology; hands-on experience with one or more of these disciplines. Prerequisites: a biology course and high school enrollment.

**00L:031 Ecology** 4 s.h.
Introduction to the principles of ecology at the population, community, ecosystem levels; field studies of local lakes, wetlands, and prairies used to examine factors that control distributions, interactions, and roles of plants and animals in native ecosystems.

**00L:035 Physical Geology** 4 s.h.
Landscape development as a product of geologic materials and processes; field studies of the earth’s composition, glaciation, weathering, erosion, sedimentation. Offered summer sessions of even years.

**00L:040 Archaeology** 4 s.h.
Nature of cultural and environmental evidence in archaeology, how such evidence is used to model past human behavior and land use; emphasis on Iowa prehistory; basic reconnaissance surveying, excavation techniques.

**00L:043 Illustrating Nature—Sketching** 2 s.h.
Sketching plants, animals, terrain; visual communication, development of a personal style, integration of typographic and visual elements on a page.

**00L:044 Illustrating Nature—Photography** 2 s.h.
Beginning/intermediate technique and composition in color photography of natural areas, their plants and animals.

**00L:050 Undergraduate Internship** 1-5 s.h.
Placement with county conservation boards, camps, parks, and other agencies for experience as interpreters, rangers, technicians. Prerequisites: sophomore standing and consent of instructor.

**00L:064 Biology of Aquatic Plants** 4 s.h.
Field-oriented introduction to the taxonomy and ecology of aquatic plants in lakes, wetlands, rivers; individual or group projects. Offered summer sessions of odd years.

**00L:100 Techniques for Biology Teaching** 1-2 s.h.
Development and implementation of laboratory exercises suitable for inclusion in elementary, middle, high school, and community college biology and environmental courses; exercises built around common organisms and ecosystems in Iowa; animal biology, plant biology, fungi and lichens, aquatic ecology, prairie ecology, wetland ecology, limnology, animal behavior, insect ecology, biology of invertebrates, noninvasive use of living organisms, Project WET; field trips.

**00L:101 Iowa Natural History** 4 s.h.
Biological diversity and its causes examined through lectures and field trips to native lake, marsh, forest, and prairie habitats; measuring the environment, sampling and identifying organisms, experimenting with the ecosystem, understanding species interactions, appreciating influences of past and present climates and geological events on natural ecosystems of the region. Prerequisite: one biological sciences course.

**00L:102 Plant-Animal Interactions** 4 s.h.
Introduction to ecology and co-evolution of plants and animals; emphasis on dispersal, pollination, plant-herbivore interactions; field and laboratory work, reading, discussion. Prerequisite: one biological science course.

**00L:103 Aquatic Ecology** 4 s.h.
Analysis of aquatic ecosystems; emphasis on basic ecological principles; ecological theories tested in the field; identification of common plants and animals. Prerequisites: ecology, chemistry, and physics courses.

**00L:105 Plant Taxonomy** 4 s.h.
Principles of classification and evolution of vascular plants; taxonomic tools and collection techniques; use of keys; field and laboratory studies emphasizing identification of local flowering plants, recognition of major plant families.

**00L:109 Freshwater Algae** 4 s.h.
Structure and taxonomy of freshwater algae based on field material collected; emphasis on genus-level identifications; habitat visits to lakes, fens, streams, rivers; algal ecology.

**00L:1113 Undergraduate Independent Study** 1-4 s.h.
Prerequisites: junior or senior standing and consent of instructor.

**00L:115 Field Mycology** 4 s.h.
Identification and classification of the common fungi; techniques for identification, preservation, and culture practiced with members of the various fungi groups.

**00L:117 Ecology and Systematics of Diatoms** 4 s.h.
Field and laboratory study of freshwater diatoms; techniques in collection, preparation, and identification of diatom samples; study of environmental factors affecting growth, distribution, taxonomic characters; project design and execution, including construction of reference and voucher collections; data organization and analysis.

**00L:119 Evolution** 4 s.h.
Mechanisms and patterns in microevolution, macroevolution; field exercises emphasizing studies of natural selection, adaptation, genetic variation, and population genetics of local plant, animal populations.
00L:120 Freshwater Invertebrates  4 s.h.
Field-oriented introduction to identification, life history, and ecology of common, free-living freshwater invertebrates of north-temperate lakes, rivers, wetlands; emphasis on invertebrates’ role in aquatic food chains and litter processing. Prerequisite: an ecology course.

00L:121 Plant Ecology  4 s.h.
Principles of plant population, community, and ecosystem ecology illustrated through studies of native vegetation in local prairies, wetlands, forests; group or individual projects.

00L:122 Prairie Ecology  4 s.h.
Basic patterns, underlying physical and biotic causes of regional and local distributions of North American prairie plants and animals; field and laboratory analysis and projects. Prerequisite: familiarity with basic principles of biological sciences and ecology.

00L:124 Wetland Ecology  4 s.h.
Ecology, classification, creation, restoration, and management of wetlands; field studies on composition, structure, and function of local natural wetlands, restored prairie pothole wetlands; individual or group projects. Prerequisite: 00L:031.

00L:126 Ornithology  4 s.h.
Biology, ecology, and behavior of birds; emphasis on field studies of local avifauna; group projects with focus on techniques of population analysis and methodology for population studies.

00L:127 Introduction to Insect Ecology  4 s.h.
Insects; their diversity and life history; emphasis on ecology and behavior; field, laboratory study. Offered summer sessions of odd years.

00L:128 Fish Ecology  4 s.h.
Basic principles of fish interaction with biotic and abiotic environments; field methods, taxonomy, and biology of fish with emphasis on the fish fauna of northwestern Iowa.

00L:129 Vertebrate Ecology and Evolution  4 s.h.
Field and laboratory study of representative vertebrates of northwestern Iowa; observations and experimentation emphasize ecological histories by integrating concepts of functional morphology, behavioral ecology, evolutionary biology.

00L:130 Natural History Workshop 1-2 s.h.
A specific aspect of the upper Midwest’s natural history, or techniques for studying natural history; amphibians and reptiles, birds and birding, nature photography, mushrooms and other fungi, Iowa’s trees and forests, fish biology, prairies, common algae, common insects, aquatic plants, life in rivers, life in lakes, mosses and liverworts, natural history of Iowa Great Lakes region, field archaeology, scuba diving, astronomy, nature sketching; five-day, nontechnical introductions.

00L:141 Statistical Methods for Field Biologists  4 s.h.
Design and implementation of ecological and environmental field studies and statistical analyses; interpretation, presentation of field data; fundamentals of experimental design, hypothesis testing with continuous and discrete data, simple and multilinear regression and correlation, introduction of analysis of variance, data presentation; individual and/or group projects to collect field data.

00L:142 Watershed Hydrology and Surficial Processes  4 s.h.
Effects of geomorphology, soils, and land use on transport of water and materials (nutrients, contaminants) in watersheds; fieldwork emphasizing investigations of the Iowa Great Lakes watershed. Prerequisites: four courses in physical or biological sciences or engineering.

00L:144 Ecosystems of North America 2-4 s.h.
Extended field trip for study of an ecosystem type (e.g., prairie, coastal wetland, forest, alpine, coral reef) or the ecosystems of a specific region (e.g., Rocky Mountains, Gulf Coast, Appalachian Mountains, deserts of the Southwest, Central America); pre-trip orientation, post-trip review and synthesis. Field trip fee. Prerequisites: an ecology course and consent of instructor.

00L:145 Introduction to Environmental Planning  4 s.h.
Environmental planning theories and methods, emphasis on environmental planning using geographic information system (GIS) modeling approaches and public participation in the planning process; individual or group environmental planning projects. Offered summer sessions of even years. Recommended: basic familiarity with ArcView and database programs.

00L:150 Watershed Modeling and GIS  4 s.h.
Geographic information system (GIS) techniques for watershed hydrology and water quality modeling, water resource management; approaches to watershed analysis, modeling, management; analytical tools for modeling watershed hydrology, water quality; case studies in modeling and managing rural and urban watersheds.

00L:151 Analysis of Environmental Data  2 s.h.
Theory and application of statistical techniques for analysis of ecological and paleoecological data.

00L:156 Advanced Field Ornithology  2 s.h.
Field study of birds of the upper Midwest; extended field trip to Minnesota, Wisconsin; individual or group project. Field trip fee. Corequisite: 00L:126.

00L:160 Restoration Ecology  4 s.h.
Ecological principles for restoration of native ecosystems; establishment (site preparation, selection of seed mixes, planting techniques) and management (fire, mowing, weed control) of native vegetation; evaluation of restorations; emphasis on prairie restoration, wetland vegetation. Prerequisite: an ecology course.

00L:161 Introduction to GIS  4 s.h.
Descriptive and predictive geographic information system (GIS) modeling techniques, spatial statistics, map algebra; application of GIS modeling techniques to environmental planning and resource management.

00L:163 Conservation Biology  4 s.h.
Population- and community-level examination of factors influencing viability of plant and animal populations from demographic and genetic perspectives; assessment of biodiversity; design, management of preserves. Offered summer sessions of odd years. Prerequisite: 00L:031.

00L:165 Behavioral Ecology  4 s.h.
Ecological and evolutionary theories of animal behavior examined through field studies of animal coloniality, courtship, territoriality, predator defense, habitat selection, foraging, mating systems, parental care. Offered summer sessions of even years. Prerequisites: two biological sciences courses.

00L:166 Amphibians and Reptiles  4 s.h.
Ecology, behavior, and conservation biology of amphibians and reptiles, with focus on their anatomy, morphology; temperature and water regulation, locomotion, life history, reproduction, population and community ecology, conservation. Offered summer sessions of even years. Prerequisites: two biological sciences courses.

00L:170 Vegetation Restoration and Management  4 s.h.
Theoretical and practical considerations for development and implementation of vegetation management plans; hands-on experience with varied techniques for restoring and managing natural vegetation, including mowing, burning, grazing, thinning, mechanical and chemical weedling, planting techniques. Prerequisite: an ecology course.

00L:175 Soil Genesis and Landscape Relationships  4 s.h.
Relationships between soil formation, geomorphology, environment; soil description, classification, geography, mapping, interpretation for land use. Offered summer sessions of even years. Prerequisite: 00L:142.

00L:199 Undergraduate Research  1-4 s.h.
Prerequisites: junior or senior standing and consent of instructor.

Lifetime Leisure Skills courses are open to University of Iowa undergraduate and graduate students. Undergraduates in the College of Liberal Arts and Sciences may count credit earned in Lifetime Leisure Skills toward the 120 s.h. required for a bachelor's degree. Students should consult with their academic advisors.

Military Science

Head: LTC Randall Millers
Professor: LTC Randall Millers
Assistant professors: MAJ Dave Pinter, LTC Tony Wolf, CPT Christopher Barker

The Military Science Program administers Iowa Army ROTC. It gives students who wish to serve on active or reserve status in the U.S. Army the opportunity to earn commissions as army officers. It also administers merit scholarships from the United States government to qualified students.

Although the Military Science Program does not offer degrees, its courses provide education in the military’s role and instruction in leadership and management. The program’s courses are an essential part of the Iowa ROTC program, which competes annually in national leadership assessments.

Military Science courses are open to all students. Course credit that counts toward graduation varies by college. Students in the College of Liberal Arts and Sciences may count up to 20 s.h. toward graduation.

Basic Course

The ROTC basic course is designed primarily for first- and second-year students. It provides the fundamentals of leadership and management and introduces the roles of the military as influenced by national and foreign policy. Students incur no obligation to the military for participation in the basic course.

The following courses satisfy the basic course requirement. Some of these courses are prerequisites to others, so students must be careful to take courses in the correct order. Courses 023:101 and 023:102 are prerequisite to 023:103; courses 023:101, 023:102, and 023:103 are prerequisite to 023:104.

- 023:101 Leadership and Personal Development MSL101 1 s.h.
- 023:102 Introduction to Tactical Leadership MSL102 1 s.h.
- 023:103 Innovative Team Leadership MSL201 2 s.h.
- 023:104 Foundations of Tactical Leadership MSL202 2 s.h.

The basic course requirements may be taken over a one- or two-year period or during a four-week paid summer camp, the Leader’s Training Course (LTC), at Fort Knox, Kentucky. Students with prior military training normally are exempt from the basic course requirements.

Advanced Course

The ROTC advanced course is open to any student who meets the prerequisites, but is designed primarily for cadets who wish to pursue a commission as a lieutenant in the U.S. Army upon graduation. It is open to both undergraduate and graduate students. Most cadets in the advanced course incur an obligation to the military that can be satisfied in the Active Army, Army Reserve, or Army National Guard.

To enter the advanced course, students must satisfy the basic course requirements, earn at least 54 s.h., and have a cumulative g.p.a. of at least 2.00. In order to become U.S. Army officers, cadets must complete the Leadership Development and Assessment course (LDAC), a five-week session held at Fort Lewis, Washington. Cadets normally attend LDAC during the summer between their third and fourth years. With the military science professor’s permission, cadets may delay LDAC until the summer after their final ROTC class.

A tax-free monthly stipend is provided to cadets who enter a contractual agreement with ROTC to serve in the armed forces. Additional financial assistance may be provided through scholarships.

The following courses are the academic requirements for completion of the advanced course. Some of these courses have prerequisites and corequisites, so students must be careful to take courses in the correct order. Prerequisites and corequisites for each course are listed with course descriptions; see “Courses” at the end of this section.

- 023:090 Leadership Lab 0 s.h.
- 023:095 Advanced Military Fitness Training 1 s.h.
- 023:105 Adaptive Tactical Leadership MSL301 3 s.h.
- 023:106 Leadership in Changing Environments MSL302 3 s.h.
- 023:107 Developing Adaptive Leaders MSL401 3 s.h.
023:108 Leadership in a Complex World  
MSL402 3 s.h.

Additional Course Work

Cadets whose aim is a commission must satisfy a Professional Military Education (PME) requirement. They must complete at least one course in military history from the following list. This course may be the same as one used to complete the College of Liberal Arts and Sciences General Education Program. Cadets may use other courses to meet the requirement, with the military science professor’s approval.

016:011 Issues in Human History: The Vietnam War in Historical Perspective 3 s.h.
016:014 Issues in Human History: Europe’s Expansion Overseas 3 s.h.
16A:153 U.S.A. in a World at War 1931-1945 3 s.h.
16A:162 American Revolutionary Period 1740-1789 3 s.h.
16A:164 Civil War and Reconstruction 3 s.h.
16A:166 The Progressive Era in America 3 s.h.
16A:168 The Contemporary U.S. 1940-Present 3 s.h.

Financial Aid

Military Science offers two-, three-, and four-year ROTC scholarships for students who enter the ROTC program. These scholarships pay tuition at The University of Iowa, an allotment for books and supplies each semester, most mandatory educational fees, and a tax-free monthly stipend during the academic year. Scholarships also are available for nursing students who wish to become Army nurses.

Courses

023:090 Leadership Laboratory 0 s.h.  
Hands-on training in basic soldier skills, such as customs and courtesies, drill and ceremony, first aid, weapons employment, troop movement techniques; leadership training for U.S. army officer/ship. Offered fall and spring semesters.

023:095 Advanced Military Fitness Training 1 s.h.  
Aerobics and running, muscular strength and endurance, flexibility, and nutrition through exercise and classroom instruction; how to evaluate and measure fitness improvement; developed around Army physical fitness training program. Offered fall and spring semesters.

023:101 Leadership and Personal Development  
MSL101 1 s.h.  
Introduction to the personal challenges and competencies critical for effective leadership; how skills such as critical thinking, goal setting, time management, physical fitness, and stress management relate to leadership, officer/ship, and the army as a profession; dimensions of army leadership; understanding of the ROTC program, its purpose in the army, its advantages for students. Offered fall semesters.

023:102 Introduction to Tactical Leadership  
MSL102 1 s.h.  
Leadership fundamentals such as setting direction, problem solving, listening, presenting briefs, providing feedback, using effective writing skills; leadership values, attributes, skills, and actions explored through hands-on, interactive exercises; cadre role models, development of strong relationships among students through common experience, practical interaction. Offered spring semesters.

023:103 Innovative Team Leadership  
MSL201 2 s.h.  
Dimensions of creative, innovative tactical leadership strategies and styles explored through team dynamics and historical leadership theories (trait and behavior) central to the Army leadership framework; personal motivation and team building through planning, executing, and assessing team exercises and participating in leadership labs; continued development of leadership values and attributes through understanding army rank, structure, duties, basic aspects of land navigation and squad tactics; case studies on soldier’s creed and warrior ethos in the contemporary operating environment. Offered fall semesters. Prerequisites: 023:101 and 023:102, or consent of instructor.

023:104 Foundations of Tactical Leadership  
MSL202 2 s.h.  
Challenges of leading tactical teams in the complex contemporary operating environment; dimensions of terrain analysis, patrolling, operation orders; theoretical basis of the army leadership framework, dynamics of adaptive leadership in the context of military operations; self-assessment of cadet leadership styles, practice in communication and team building skills; case studies on importance and practice of teamwork and tactics in real-world scenarios. Offered spring semesters. Prerequisites: 023:101, 023:102, and 023:103; or consent of instructor.

023:105 Adaptive Tactical Leadership  
MSL301 3 s.h.  
Study, practice, and evaluation of adaptive leadership skills in challenging scenarios related to squad tactical operations; feedback on cadets’ leadership attributes and actions, continued development of leadership and critical thinking abilities; development of tactical leadership abilities in preparation for Leadership Development and Assessment Course (LDAC). Offered fall semesters. Prerequisites: 023:101, 023:102, 023:103, and 023:104, or completion of army basic training or Leader’s Training Course. Corequisites: 023:090 and 023:095.

023:106 Leadership in Changing Environments  
MSL302 3 s.h.  
Development of cadet awareness and tactical leadership to platoon level, through increasingly intense situational leadership challenges; experience reviewing combat, stability, and support operations, conducting military briefings, developing proficiency in garrison operation orders; focus on exploring, evaluating, and developing skills in decision making, persuasion, and motivation of team members in a contemporary operating environment; preparation for summer Leader Development Assessment Course. Offered spring semesters. Prerequisites: 023:101, 023:102, 023:103, and 023:104, or completion of army basic training or Leader’s Training Course; and 023:105. Corequisites: 023:090 and 023:095.

023:107 Developing Adaptive Leaders  
MSL401 3 s.h.  
Development of proficiency in planning, executing, and assessing complex operations, functioning as member of a staff, providing performance feedback to subordinates; experience assessing risk, making ethical decisions, leading fellow cadets; military justice and personnel processes in preparation for officer/ship; identification of key staff responsibilities, coordination of staff roles, use of situational opportunities to teach, train, and develop subordinates. Offered fall semesters. Prerequisites: 023:105 and 023:106. Corequisites: 023:090 and 023:095.
023:108 Leadership in a Complex World MSL402  3 s.h.
Leadership dynamics in complex military operations of the
temporary operating environment; differences in customs and
courtesies, military law, principles of war, rules of engagement in
the face of international terrorism; interaction with
nongovernmental organizations, civilians on the battlefield, host
nation support; ethical and practical demands on army
commissioned officers; preparation for first unit assignment
through case studies, scenarios, exercises. Offered spring
Corequisites: 023:090 and 023:095.

023:121 Readings in Contemporary Military Issues  1-3 s.h.
Preparation of book reviews from a reading list provided by the
instructor, with topics ranging from historical battles and
campaigns to global impact of U.S. political policies; or writing of
an operations order relating to an ROTC event or similar project
of historical significance (work in conjunction with instructor).
Prerequisites: 023:101, 023:102, 023:103, and 023:104, or
completion of army basic training or Leader's Training Course.
Museum Studies

Director: Pamela Trimpe
Undergraduate nondegree program: Certificate in Museum Studies
Web site: http://www.continuetolearn.uiowa.edu/museumstudies/

The University of Iowa has offered courses in museum studies continuously since 1910. Museum Studies Program students have become directors, curators, educators, and exhibit specialists in museums throughout the country. University College provides administrative and program support for museum studies. Both graduate and undergraduate students may take courses offered by the Museum Studies Program; the Certificate in Museum Studies is offered for undergraduate students.

A major in one of the natural sciences (e.g., biological sciences or geoscience), anthropology, science education, art history, American studies, or history is recommended for students preparing for museum careers; see the appropriate department sections (College of Liberal Arts and Sciences) in the Catalog. Undergraduate students may add the museum studies certificate to any of these majors or use the interdepartmental studies major (College of Liberal Arts and Sciences) to design their own plan of study by coordinating course work relevant to their academic concentration areas and professional interests.

Courses offered by the Museum Studies Program provide an introduction to fundamental museological subjects, including background in the history, organization, function, and management of museums as well as experience in exhibition planning and design, collection management, and education outreach development.

Museum studies courses are of value not only to students intending to pursue careers in museums but also to those with related interests in the arts, sciences, or humanities. Museum studies is useful in many career areas, including archaeology, anthropology, history, American studies, communication studies, elementary and secondary education, historic preservation, library science, recreation and leisure, art history and studio art, and science education.

Certificate

The Certificate in Museum Studies requires a minimum of 18 s.h., including 15 s.h. of foundation course work and an internship (3 s.h.).

All students take 024:102 Introduction to Museology (3 s.h.), which provides a historical overview of museum development and function and introduces students to issues such as museum governance and financing, ethics and law, collection management, exhibition and educational programming, interpretation, and audience research. Ideally, this is the first course students take in the certificate program.

Students select three courses (minimum of 9 s.h.), typically one from each of three of the following categories, and one additional course (minimum of 3 s.h.) from any of the categories.

Museum administration and management
History, theory, and culture
Exhibition development and public education
Collection management and care

After completing the 15 s.h. of foundation course work described above, students complete an internship (minimum of 3 s.h.). The Museum Studies Program director works closely with students and affiliated faculty members to ensure that internships provide students with the instruction and experience they need.

The Museum Studies Program web site lists courses that count toward the certificate. Students also may request permission to use courses not on the program’s list, providing the content of the course and the student’s work in the course fits into one of the program’s defined areas.

Courses applied toward the museum studies certificate also may be used to complete the College of Liberal Arts and Sciences General Education Program or requirements for a major or minor. Students may count a maximum of 6 s.h. of course work completed for another major, certificate, or minor toward the requirements of the Certificate in Museum Studies.

Students interested in the museum studies certificate are encouraged to meet with the Museum Studies Program director.
Museum Facilities

The University of Iowa has several excellent museum facilities. The Museum of Natural History, founded in 1858, is the oldest university museum west of the Mississippi River. It houses exhibits on North American and Iowa geology, biological sciences, and Native American cultures.

The University of Iowa Museum of Art houses significant collections of more than 12,000 objects and several outstanding collections, including African and pre-Columbian art, prints, and paintings from the 19th and 20th centuries.

Old Capitol housed Iowa’s territorial and state government offices from 1842 until 1857. A National Historic Landmark, the building now is Old Capitol Museum, dedicated to early Iowa and American history.

All three campus museums present public programs and events.

Students can gain first-hand experience through supervised internships. They also can learn from a number of smaller collections that are available on campus and in the Iowa City area.

Courses

024:102 Introduction to Museology 3 s.h.
Overview of museum history, function, philosophy, collection and curatorial practices, governance and funding issues, exhibition evaluation, audience studies; American cultural institutions. GE: humanities. Same as 07S:112, 097:115, 113:103.

024:104 Exhibition Planning 3 s.h.
Preliminary work for and process of developing museum exhibitions; history of exhibit design, evaluation, budgets, teams and team member roles, working with community and special interest groups, methods of production and display; students research a topic, choose artifacts and images, and create a narrative and exhibit script. Prerequisite: 024:102 or consent of instructor.

024:105 Designing History Exhibits 3 s.h.
Process of developing exhibitions by museum staff and professional design services; designer’s role; aspects of materials used in exhibit fabrication; lighting issues, design elements, organization and development of exhibit script, label and graphic production; creation of advertising and promotional material, and fit of such material with final exhibit product; using narrative and script created in 024:104, students produce documents that will be used to develop an exhibit at a nearby museum. Prerequisites: 024:102 and 024:104, or consent of instructor.

024:108 The Image in America 3 s.h.
Same as 16A:108.

024:119 Writing for Interdisciplinary Audiences 3 s.h.

024:120 Collection Care and Management 3 s.h.
How a museum’s management policy relates to its administrative, legal, and ethical obligations to its collections; acquisitions, deaccessions, collection use, data standards, storage environment, health, safety, documentation. Same as 012:120.

024:147 Nonprofit Organizational Effectiveness I 3 s.h.
Operational and financial aspects of nonprofit management, including organization mission and governance; strategic planning necessary for effective management, including finance, budget, income generation, fund-raising; guest presenters. Offered via Iowa Communications Network. Same as 06J:147, 025:176, 032:127, 042:157, 049:175, 096:168.

024:148 Nonprofit Organizational Effectiveness II 3 s.h.
Foundations of nonprofit institutions, including role, nature, history; tax treatment, political and legislative activities; role of director; officers; fiduciary duties and executive compensation, problems of external regulation, accreditation, ethics; funding, operating, legal issues. Offered via Iowa Communications Network. Same as 06J:148, 025:177, 032:128, 042:158, 049:176, 096:169.

024:150 Directed Studies and Projects 3 s.h.
Advanced readings in historical development, educational philosophy, programs, operations of museums; individual projects coordinated with programs, exhibits, or collections of campus and area museums. Prerequisite: 024:102, 024:104, or 024:120.

024:161 Art, Law, and Ethics 3 s.h.
How law and ethics apply to individuals and institutions concerned with the visual arts; personal and professional ethics; communal, national, and international issues, 18th century to present; how creative production is embedded in a social, legal, and moral context; legal and moral questions that spring from visual arts activities; how law and ethics support and constrain the visual arts; group project. Same as 01H:182, 033:175, 091:192.

024:170 Grant Writing in the Arts 3 s.h.
Same as 01P:185.

024:180 Museum Internship 3 s.h.
Working experience in functions, departments, programs of the sponsoring museum; relation to museum’s overall mission and museum field in general.

024:247 Nonprofit Organizational Effectiveness I 3 s.h.

024:248 Nonprofit Organizational Effectiveness II 3 s.h.
Nonprofit organizations play vital roles in our communities and contribute to our quality of life. Nonprofit organizations have unique management, funding, and finance issues that require specialized training. The Certificate in Nonprofit Management is designed to help staff members, board members, and volunteers develop the business and leadership skills necessary for building a successful nonprofit organization. The program provides a balance of academic principles and real-world experience as well as a fundamental understanding of how nonprofit organizations participate in building communities.

Certificate courses cover a wide range of topics and issues, such as community and government partnerships, organizational leadership, planning, human resources, financial accountability, grant writing, and web site creation and maintenance.

Courses are offered primarily on the World Wide Web.

The certificate is available to undergraduate students. Bachelor of Applied Studies and Bachelor of Liberal Studies students may incorporate certificate courses into their degree programs.

The program is presented by the Center for Credit Programs and the Larned A. Waterman Iowa Nonprofit Resource Center, in collaboration with University College.
Orientation Training

**Director:** Andrew Cinoman  
**Web site:** http://www.uiowa.edu/admissions/undergrad/orientation/index.html

The University of Iowa holds orientation sessions, presented by orientation staff members, for all incoming undergraduates. Parents and guardians are invited to attend separate but concurrent programs.

Orientation Training offers the following courses for all student employees who assist the professional staff in presenting orientation programs. Student orientation advisors are required to take 412:077. Parent program assistants are required to take 412:078.

### Courses

**412:077 Workshop in Orientation Services**  
2 s.h.  
Preparation for the role of student advisor in the Office of Orientation Services; knowledge of academic requirements, policies, and procedures at The University of Iowa; development of leadership, group facilitation, presentation, and academic advising skills. Prerequisite: consent of instructor.

**412:078 Orientation Services Parent Training**  
2 s.h.  
Preparation for the role of parent program assistant in the Office of Orientation Services; understanding the needs of parents who attend orientation programs; enhancement of communication, problem solving, and conflict management skills; knowledge of resource units on campus. Prerequisite: consent of instructor.
The Patient Care Practicum prepares students for work and/or internships at University of Iowa Hospitals and Clinics (UIHC). Students complete required online training modules through the University's course management system. Once the training modules are completed, students are certified to work at UIHC.
Research Experiences for Undergraduates in Microbiology

Web site: http://www.medicine.uiowa.edu/microbiology/educational/summer07.htm

The Department of Microbiology offers 403:030 Undergraduate Research Fellowship Program, a nine-week summer program for qualified undergraduate students who are studying microbiology or other biological sciences and are interested in pursuing careers in science. Participants conduct research on a project they select, under the direct supervision of a faculty member.

Each participant receives a stipend to pay for housing and food.

Applicants must be U.S. citizens or permanent residents who have completed their sophomore or junior year in a bachelor’s degree program in the biological sciences. Applications should include a completed application form and two letters of recommendation. Deadline to apply is mid-February for the following summer.

Visit the program’s web site or contact the Department of Microbiology, Carver College of Medicine, for more information.

Courses

403:030 Undergraduate Research Fellowship Program 0 s.h.
Student Information Technology Skills

**Director:** Mary Grabe (Information Technology Services)

**Web site:** http://cio.uiowa.edu/events/sits

Student Information Technology Skills is an intensive program for students interested in creating and maintaining web sites for University of Iowa departments or administrative units. Students are graded on their final project and participation in online and face-to-face discussions. Enrollment requires the instructor's consent. Stipends may be available.

### Courses

**416:100 Creating Web Sites** 2 s.h.
HTML, CSS fundamentals, use of Dreamweaver software for page and site development, web graphics; examination and critique of UI and non-UI web pages; design standards and practices for meeting federal accessibility guidelines; guidance in understanding how to work effectively with campus web customers.

**416:101 Topics in Institutional Computing** 2 s.h.
Key topics in providing computing support in institutional settings; networking and network services, security, authentication and authorization, e-mail and other enterprise services; policies, law, professional practices; roles and responsibilities of IT workers.

**416:102 Core IT Support Skills** 2 s.h.
Knowledge and hands-on skills necessary for supporting computers in an institutional setting; basic hardware, operating systems, application, and networking support topics.
Student Services

**Director:** William R. Nelson  
**Web site:** [http://www.imu.uiowa.edu/osl](http://www.imu.uiowa.edu/osl)

Student Services focuses on leadership development opportunities for University of Iowa Students. It offers one course on leadership and another that examines fraternity and sorority life and how cocurricular activities and programs enhance students’ college experiences.

Study Abroad

The University of Iowa sponsors or cosponsors a wide variety of study abroad programs in more than 40 countries. Students may choose from summer, semester, academic year, and winter session programs that complement and extend the University’s academic programs across the curriculum.

Students also may participate in study abroad programs sponsored by other accredited U.S. and foreign institutions. They should obtain advance approval of all transfer credit by completing a Study Abroad Credit Approval Form.

Information on University of Iowa and other study abroad programs is available at the Office for Study Abroad.

Courses

165:105 International Student Exchange Program arr. Study on reciprocal exchange at foreign universities worldwide; some instruction in English. Year-long, one semester, and summer options. Prerequisites: 40 s.h. of credit, g.p.a. of at least 3.00, and in some cases, command of a foreign language.

165:106 UK Exchange Program arr. Regular degree course work at the Universities of Birmingham, Hull, and Lancaster (England) and the University of Strathclyde (Scotland); humanities, social sciences, physical sciences, business, engineering. Prerequisites: 40 s.h. of credit and g.p.a. of at least 3.00.

165:108 Japan Exchange Program arr. Seven levels of Japanese language and area studies at Nanzan University’s Center for Japanese Studies, Nagoya; language and culture classes at Kanda University of International Studies, Tokyo; language study or degree course work at Meiji University, Tokyo; language and area studies at Nagoya University of Foreign Studies, year or spring; area studies and international relations, taught in English, at Tokyo Denki University, School of Information Environment, fall. Prerequisites vary by university.

165:112 The Iowa Exchanges arr. Choice of several institutions. Corvinus University Exchange, Budapest, Hungary: business, economics, and political science courses; taught in English; Hungarian language courses. Denmark Aalborg Exchange—Aalborg University; regular university course work in communication studies, psychology, and European studies emphasizing economics and politics; taught in English; semester or year-long. L’Ecole HEC [Hautes Études Commerciales] School of Management, Jouy-en-Josas, France: regular degree course work in business administration; taught in English and French; French proficiency and honors standing recommended. École Supérieure de Commerce d’Amiens: graduate and advanced undergraduate course work in business; semester or academic year; proficiency in French and appropriate academic background required. Fachhochschule Giessen-Friedberg: engineering and related course work; taught in German; semester or academic year. Joetsu exchange, graduate study and research in education at Joetsu University of Education, Japan. Korean exchanges: choice of six universities in Republic of Korea offering Korean language and Korean and/or Asian studies courses, regular university course work in full range of disciplines; taught in English; semester or academic year; course offerings vary by university. Journalism exchange with Mount Royal College, Calgary, Canada. Tilburg University, The Netherlands: accounting, applied microeconomics, finance, management, international marketing, electronic commerce, and other subjects; taught in English; semester or academic year. University of las Americas: liberal arts, business, international relations; taught in Spanish; semester or year-long. University of Dortmund, Germany: German language and culture for foreigners, regular course work in liberal arts, sciences, engineering, and business; all taught in German; semester or academic year. University of Iceland: anthropology, folklore studies, Icelandic literature, linguistics, earth sciences; semester or year-long program. University of Nijmegen: American studies, English literature, linguistics, international economics, geography, globalization, psychology, and artificial intelligence; all taught in English; semester or year-long. University of Paris III, France: graduate-level film studies. University of Szeged Exchange, Szeged, Hungary: Hungarian language, Hungarian and East-Central European studies; taught in English; regular university course work in liberal arts and sciences taught in Hungarian; semester or academic year.

165:117 Frankfurt Exchange Program arr. Regular degree course work in business and economics at Johann Wolfgang Goethe Universitaet; courses taught in German. Semester or academic year. Arranged through Tippie College of Business. Prerequisites: two years of college German or equivalent, and relevant academic background.

165:119 Vienna Exchange Program arr. Regular degree course work in business administration and economics at Wirtschaftsuniversitaet in Vienna, Austria; taught in English and German. Semester or academic year. Arranged through Tippie College of Business. Recommended: one year of college German or equivalent.

165:197 Microfinance for Women-Run Enterprises arr. Opportunity to compare bottom-up and top-down (or trickle-down) approaches to economic development; experience interacting with and learning from practicing women entrepreneurs in Tamil Nadu, India.

165:500 Study Abroad 0 s.h. Students participating in study abroad programs at other U.S. or foreign universities maintain their status at The University of Iowa by registering for this course.

165:501 Study Abroad arr.

165:510 Field Research Abroad arr. Research projects abroad.

165:520 Ghana Internship Program arr. Internships in areas related to the student’s academic and career objectives; professional experience working in the cultural environment of a developing country.

165:805 Iowa Regents Semester in Wales arr. University of Swansea, Wales: three-week interdisciplinary course on British life and culture, followed by regular degree course work in the humanities, social sciences, physical sciences, business, engineering. Fall and spring semesters. Prerequisite: g.p.a. of at least 2.80.

165:915 Internship in European Union Institutions arr. Internships in Brussels with organizations of the European Union; professional experience and relevant academic background required.

165:935 International Internship Program arr. Internships in areas related to the student’s academic and career objectives; professional experience working in the cultural environment of a developing country.

165:810 CIEE Spain Program 
Several programs in Alcala, Alicante, Barcelona, Madrid, Palma de Mallorca, and Seville addressing specific language proficiency levels and academic interests. Prerequisites vary.

165:811 USAC Studies in Spain 
Intensive Spanish language at beginning level; advanced language, civilization, literature at third-year level; intensive Basque language; some courses taught in English; program sites include Alcalá de Henares, Bilbao, Madrid, San Sebastian. Prerequisite: g.p.a. of at least 2.50.

165:812 CIEE France Program 
Two programs. Contemporary French studies program: language skills for students taking courses on French culture and contemporary civilization; one semester of French required. Critical studies program: critical approach to contemporary French thought in literature, film, philosophy, art, aesthetics; proficiency in French required. Prerequisite: g.p.a. of at least 3.00.

165:813 CIEE China Program 
Four programs in the People's Republic of China, one program in Taiwan. Mandarin Chinese, Chinese civilization, area studies, and international relations. Summer, semester, or academic year. Prerequisites and sessions vary.

165:814 Iowa in Tianjin 
Chinese language, area studies, and folk art; based at Tianjin University of Technology. Eight weeks in summer. Prerequisite: one to three years of college-level Chinese.

165:816 CIC Latin American Health and Nutrition Program 
Interdisciplinary and field-based study with course work in Spanish language, medicine, social sciences, humanities; independent study. Summer and/or fall. Prerequisites: one year of Spanish (summer), or two years of Spanish (summer and fall), or three years of Spanish (fall); and g.p.a. of at least 2.50.

165:817 CIC Program in Mexico 
University of Guanajuato; Spanish language, Latin American literature, art, history, anthropology, film, political science; homestays with Mexican families. Summer. Prerequisites: five semesters of Spanish and g.p.a. of at least 3.00.

165:818 CIC Program in Quebec 
Laval University; French language, Quebec literature and culture; home-stays with Francophone families or dormitory accommodations. Summer or fall semester. Prerequisites: one year of college-level French and g.p.a. of at least 3.00.

165:820 Semester at The Queen's University of Belfast 
Courses at The Queen’s University of Belfast, Northern Ireland; nearly 100 subjects, including social sciences and humanities from Irish and Northern Irish perspectives. Prerequisite: g.p.a. of at least 3.00.

165:826 Summer Art Program in Italy 
Printmaking and drawing courses in collaboration with the Scuola Internazionale de Grafica; cultural and artistic introduction to Venice and surrounding area; for students at all levels of artistic accomplishment.

165:827 Asia Study Tour 
Introduction to history, culture, society, economics, and politics of one or more Asian countries.

165:828 ACTR Program Russia 
Russian language programs at institutions in Leningrad, Moscow, or Vladimir; or business language and internship program; or Eurasian language program. Semester, academic year, or summer. Prerequisite: three years of college-level Russian or equivalent.

165:829 London Performance Study 
Selected theater productions, lectures, performances, discussions, written exercises, workshops, cultural activities. Credit may be applied toward a University of Iowa major in English or theatre arts. Summer.

165:831 Elementary Student Teaching Abroad 
Supervised student teaching in an overseas school.

165:832 Secondary Student Teaching Abroad 
Supervised student teaching in an overseas school.

165:833 Academic Year in Freiburg 
Combination of special program classes, German for foreigners, and regular degree course work in most liberal arts subjects at Albert-Ludwigs University, Freiburg, Germany. Academic year. Prerequisite: at least four semesters college German or equivalent with g.p.a. of at least 3.00.

165:834 Environmental Studies in Slovenia 
Short-term course at the School of Environmental Sciences, Nova Gorica, Slovenia; topics vary; taught in English. Offered summer session.

165:836 Semester in South India 
Indian civilization and culture; science, technology, and sustainable development; women's studies; Hindi, Kannada, or Sanskrit; internship or independent research project. Based in Mysore. Fall semester.

165:837 Iowa Regents Semester in Australia 
Regular course work in humanities, social sciences, business, engineering, and physical sciences at the University of Newcastle and the University of Tasmania. Fall and spring semesters. Prerequisites: sophomore standing and g.p.a. of at least 2.50.

165:838 Irish Writing Program 
Dublin, Ireland; writing workshops directed by Irish writers, literature courses taught by faculty. Summer.

165:839 International Student Exchange Program Direct 
Study at some ISEP member institutions in Brazil, Chile, Costa Rica, Estonia, Ghana, Italy, Malta, The Netherlands, New Zealand, South Africa, Thailand, the United Kingdom; fields and terms vary.

165:840 Archaeological Field Work Abroad 
Major salvage archaeology projects in the Netherlands excavating sites from 1000 B.C. to 1950 C.E. Summer.

165:841 International Perspectives: Engineering 
Exploration of historical, cultural, social, economic, ethical, environmental, and/or political conditions that may affect engineering projects in a specific country or world region; location and topics vary.

165:842 Cross-Cultural Nursing Experience 
Practical experience to build understanding of nursing roles and responsibilities in different cultures and health care systems; for advanced nursing students.

165:847 Japan Summer Language Institute 
Development of strong communication skills and cultural awareness through integrated language study and homestay, cultural immersion; Hokkaido, eight weeks. Prerequisite: one semester college-level Japanese or equivalent.

165:848 University of KwaZulu-Natal Exchange 
Introduction to South African culture from varied academic perspectives, summer session. Enrollment in regular University courses; fall and spring semesters.

165:849 Social Work International Travel/Study Seminar 
Impact of socio/political economy on family and community systems in the country visited; seminars, guest speakers, field visits. Prerequisite: 042:143 or consent of instructor.

165:850 USAC Studies in Costa Rica 
Intensive beginning-level Spanish language; advanced language, literature, civilization at third-year level; tropical ecology. Two program sites—Heredia and Puntarenas. Some courses taught in English. Prerequisite: g.p.a. of at least 2.50.

</table>
165:885 USAC Studies in the Czech Republic  
Introductory Czech and courses taught in English at Charles University. Summer, semester, or academic year.

165:886 Public Health Challenges in Ecuador  
Ecuadoran public health challenges, practices; intersection of culture and cloud forest ecology; students conduct related research among the indigenous communities in the Maquipucuna Bioreserve northwest of Quito.
The Summer Medical Scientist Training Program (MSTP) is an intensive eight-week experience for undergraduates interested in pursuing combined M.D./Ph.D. training. Participants gain experience in research laboratories and exposure to clinical medicine and medically relevant research in preparation for careers as physician-scientists.

Students conduct research in the laboratory of a biomedical sciences faculty member, shadow physician-scientists in clinical settings, participate in career development seminars, and attend a weekly seminar series focusing on the intersection of science and medicine.

Participants receive a stipend for the program and live on campus in University housing.

Applicants must be U.S. citizens or permanent residents who have completed their sophomore or junior year in a bachelor’s degree program in the biological or physical sciences. Applicants should submit an application form (available on the program’s web site); an official college transcript; and two letters of recommendation. Application deadline is early February for the following summer.

Contact the Medical Scientist Training Program, Carver College of Medicine, for more information.
University Housing

Assistant director: Kathleen A. Fitzgerald
Web site: http://housing.uiowa.edu/

University Housing courses are designed to help students involved in the resident assistant (RA) program become effective RAs. Students learn how to establish healthy student communities in the residence halls, how to confront crises and emergencies, and how to develop leadership skills. Enrollment is open only to students who have been selected to serve as resident assistants.

Courses

415:001 Issues in College Residence Halls I 1 s.h.
Development of knowledge and skills required for work as a resident assistant; creating community, handling crises and emergencies; leadership.

415:002 Issues in College Residence Halls II 1 s.h.
Continuation of 415:001.

415:003 Issues in College Residence Halls 2 s.h.
Content of 415:001 and 415:002 in one semester; development of knowledge and skills required for work as a resident assistant; creating community, handling crises and emergencies; leadership.
University Libraries offers an activity-based course that develops understanding of how library resources can be used to support individual courses of study. Designed primarily for sophomores and juniors, the course introduces students to the basic research process, research conventions in a specific field, and how to integrate information skills and concepts to accomplish course goals.

Subject-specialist librarians use lectures, in-class activities and assignments, and class discussion to present the course material.

Courses

417:001 Library Research in Context 1 s.h.
Academic research, effective use of the library and its resources, basic research methods, process of scholarly communication; content keyed to a discipline-specific course; research conventions of the discipline; students apply concepts and processes to their research projects.

Coordinator: Kathy Magarrell
Web site: http://www.lib.uiowa.edu
The University of Iowa Honors Program enriches the intellectual and personal lives of outstanding University of Iowa undergraduates in all colleges and majors. It provides special academic opportunities, extracurricular programs, and social events, many held in the award-winning Blank Honors Center and the University Honors House.

Honors Program staff members help honors students create their own honors curricula to explore interests inside and outside the classroom. Honors students enjoy course options for team and independent learning-by-doing in research, writing, teaching, leadership, and service. They meet with some of the University’s best teachers in small seminars designed especially for first- and second-year students and continue to work closely with excellent professors and other honors students in a variety of courses. Extracurricular activities in foreign relations, the arts, volunteering, and other areas give honors students practical experience and connections beyond the classroom. Above all, the Honors Program engages students in intellectual communities where they explore frontiers of knowledge with many of the most interesting people on campus.

The University of Iowa Honors Program admits students directly and automatically from high school, based on high school rank and ACT or SAT score. National Merit Scholars, Presidential Scholars, Old Gold Scholars, National Achievement Scholars, and National Academy of Arts, Sciences, and Engineering students are admitted automatically, as are other students who show great academic promise for college learning and further achievement.

Entering students who are not admitted automatically may become members through a process that requires a high school transcript, a letter of recommendation from a teacher, and a personal letter describing how the student would gain from Honors Program membership.

Entering transfer students must have a cumulative g.p.a. of at least 3.50 and must have earned at least 24 s.h. of college credit in order to be admitted to the University of Iowa Honors Program. Transfer students with less than 24 s.h. of college credit are admitted to the program on the same basis as are students who enter the University directly from high school.

Membership in the Honors Program also is open to undergraduate students enrolled in the Tippie College of Business and the Colleges of Education, Engineering, Liberal Arts and Sciences, and Nursing. Honors Program students must maintain a University of Iowa cumulative g.p.a. of at least 3.33 (B-plus) in order to remain in the program. The Honors Program automatically admits current students if they earn a g.p.a. of at least 3.33 before completing 72 s.h. of course work.

For more information on honors membership requirements, see the Honors Program web site.
honors credit, from laboratory and discussion sections of introductory courses to specialized studies in students’ varied disciplines. Finally, students can request honors designation for any regular University of Iowa course. Honors designation allows students to delve more deeply into a topic, under the instructor’s guidance, by developing a study plan that goes beyond the course’s normal requirements.

**Honors Commendation**

The Honors Program and the University president join in celebrating students who complete at least 12 s.h. of honors course work with a grade of B or higher in each graded course before completing their second year or their first 59 s.h. (whichever comes last). Students receive a certificate of congratulation signed by the Honors Program director and the University president.

**Honors in the Major**

Most majors offer upper-level honors courses, honors seminars, independent research, or opportunities to pursue an original honors thesis or senior project under the guidance of a faculty member. Each college and department determines its own requirements for graduation with honors, and faculty members in each department serve as honors advisors.

After students declare a major in the College of Liberal Arts and Sciences or enter the Tippie College of Business or the Colleges of Education, Engineering, or Nursing, they should speak with their collegiate or departmental honors advisors about their academic programs. Students who graduate with honors in their majors receive special recognition during commencement, and their permanent academic records note their achievements.

**Extracurricular Programs**

The University of Iowa Honors Program provides honors students with a rich variety of activities outside the classroom. Participation is not required, but many honors students find extracurricular programming a good way to meet people, get involved, and learn more about the world around them.

The Arts Program sends groups of honors students to attend music, dance, and theater events at the University and in the community. Students have opportunities to interact with artists, faculty members, and other honors students through related discussions, lectures, and visits.

The Iowa City Foreign Relations Council hosts luncheon dialogues on relevant international issues. Past speakers include award-winning journalists, Nobel Peace Prize laureates, seasoned diplomats, prominent politicians, and policy analysts. Honors students gain more textured understandings of world affairs by listening to and talking with these expert speakers.

The Volunteer Program provides students with service opportunities at varied organizations in eastern Iowa. Honors students learn more about their communities and related needs, often continuing to volunteer on their own.

The Old Gold and Presidential Scholars Programs emphasize community, cultural, and academic involvement while offering unique team-building components. As part of the programs, scholars may participate in cook-outs, Frisbee games, arts events, canoeing adventures, pizza parties, dinners with faculty members, mentoring programs, and volunteer projects.

The newsletter Honorable Mention is written, edited, and published four times a year by honors students. It informs, educates, and entertains honors students, their families, and University staff and faculty.

The honors web site and electronic mailing list offer resources for honors students. These also tell about past, present, and future honors activities, scholarships, courses, and other opportunities.

The Honors Program advises five major national and international honor societies: Phi Eta Sigma, National Society of Collegiate Scholars, Golden Key, Mortar Board, and Omicron Delta Kappa. The societies provide select students with opportunities to lead, serve their communities, and cultivate academic excellence.

For more information about honors extracurricular programs, see Extracurriculars on the Honors Program web site.

**Scholarship Advising**

The Honors Program helps students apply for many scholarships, awards, and prizes. The program offers its own scholarships of $1,000 to $2,500 to selected continuing honors students in all colleges. It also provides research stipends for students completing honors projects and travel grants for those who present work at conferences. These awards are made possible in
part by a bequest from Professor Rhodes Dunlap, the program’s founder and director for more than 20 years. Announcements about honors scholarships and other awards appear in the Honors Program newsletter and electronic mailing list. Honors Program scholarships are not available to incoming first-year or transfer students.

Honors students are awarded national and international scholarships each year. The program provides advising and nominations for Rhodes, Marshall, Gates Cambridge, Truman, Udall, Goldwater, and Jack Kent Cooke Scholarships.

**Blank Honors Center**

The Honors Program makes its home in the Blank Honors Center, a new facility for fostering community among honors students. The Blank Honors Center offers extended hours, social areas, a kitchenette, quiet study areas, classrooms, a computer lab with 24 workstations, office space for honor societies, honors advising for students, and offices for Honors Program staff. The center also has rooms for meetings, events, presentations, and conversation. Honors staff members are always on hand to help students.

**University Honors House**

The University Honors House fills Daum Residence Hall and is linked to the Blank Honors Center by a skywalk. This honors learning community sponsors cultural, academic, and social events for honors students living in Daum Hall. It also organizes group outings to arts events, workshops on scholarship and research opportunities, volunteer activities, and dinners with faculty members, and provides a convenient place for residents to socialize and study with each other.

The University Honors House particularly welcomes first-year and transfer students. To learn more about the University Honors House, see the Honors Program web site.

**Courses**

Honors courses are specifically for honors students.

**143:030 Honors First-Year Seminar** 1 s.h.
Small discussion classes taught by faculty members on special topics; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities, field trips). Prerequisite: first- or second-semester standing.

**143:040 Honors Studies** arr.
Independent studies arranged with faculty members who certify satisfactory completion of study plans and performance for topics not covered by other UI courses.

**143:042 Honors Service Learning** arr.
Service learning projects arranged with faculty members who certify satisfactory completion of study plans and service.

**143:050 Honors Seminar in Humanities** 3 s.h.
Small-class learning with a faculty member on humanities topics. GE: humanities.

**143:060 Honors Seminar in Social Sciences** 3 s.h.
Small-class learning with a faculty member on social science topics. GE: social sciences.

**143:070 Honors Seminar in Natural Sciences** 3 s.h.
Small-class learning with a faculty member on natural science topics. GE: natural sciences.

**143:090 Honors Research Colloquium** 1 s.h.
Small-class research with faculty members; advanced readings.

**143:100 Honors Research Practicum** 1-3 s.h.
Individual research performed in conjunction with a faculty member’s research.

**143:101 Honors Teaching Practicum** 3 s.h.
Teaching internship in first- and second-year courses; may include providing tutorial assistance, conducting review sessions, aiding course organization.

**143:102 Writing Fellows: Writing Theory and Practice** 3 s.h.
Preparation of honors students selected as writing fellows to serve as peer tutors in writing-intensive courses; theories of writing, evaluation of drafts, peer tutoring with students. Prerequisites: sophomore or junior honors standing, admission to Writing Fellows Program, and availability to work as a writing fellow in subsequent semesters.

**143:150 Honors Special Topics** 1-3 s.h.
Small-class learning with faculty members on advanced topics. Prerequisite: junior or senior honors standing.
The University of Iowa Department of Mathematics offers a summer program of research experience for undergraduates. VIGRE Heartland REU is designed for well-prepared students who have completed two years of college, but younger or more advanced students also may be admitted. Preference is given to students from Heartland Mathematics Partnership schools.

The eight-week program begins with a choice of introductory workshops followed by work in a small research group with a faculty member. Students choose one workshop from linear algebra, graph theory, and orthogonal polynomials. The subsequent research projects are connected to background developed in the workshops.

Students participate in hands-on introduction to mathematical writing in LaTeX; experience using computer systems such as Maple, Mathematica, or MatLab; and talks and panels about subsequent research opportunities, graduate school, the Graduate Record Examination, and career opportunities. The program also offers cultural and social activities.

Instruction is provided by Department of Mathematics faculty members, Heartland Mathematics Partnership instructors, VIGRE trainees, and staff members from the University’s Alliances for Graduate Education and the Professoriate Summer Program.

VIGRE Heartland REU is supported by the National Science Foundation program Vertical Integration of Research and Education in the Mathematical Sciences. For more information visit the VIGRE Heartland REU web site.
The following programs are presented by the
Connie Belin and Jacqueline N. Blank
International Center for Gifted Education and
Talent Development. For more information about
the center’s programs, contact the Belin-Blank
Center or visit the center’s web site.

Blank Summer Institute
The Blank Summer Institute for the Arts &
Sciences is a two-week residential summer
program for gifted Iowa students in grades 7 and
8. The institute provides exceptionally talented
students with an intensive and advanced
educational experience designed to enhance their
intellectual and social growth. The plan of study
complements the regular school curriculum and
consists of eight courses that cover advanced
science, math problem solving, social sciences,
creative writing, invention and innovation, visual
arts, performing arts, and global and cultural
studies.

Cultural and recreational activities are part of the
program, and participants have access to the
University of Iowa Libraries, computer facilities,
and study areas. Housing and meals are provided
at University residence halls.

To be eligible for the institute, students must
have finished grade 7 or 8 and must be
nominated by their schools. Financial support is
available.

International Language & Culture
Institute
The International Language & Culture Institute is
a one-week residential summer program for
gifted students in grades 9 through 11. The
institute is a collaborative program of the
University of Iowa’s International Programs and
the Belin-Blank Center. It provides talented
students with an intensive, advanced educational
experience designed to enhance their intellectual
and social growth.

Iowa Governor’s Institute
The Iowa Governor’s Institute for the Gifted and
Talented is a two-week residential summer
program that provides exceptionally talented
students with an intensive and advanced
educational experience designed to enhance their
intellectual and social growth. Participants enroll
in one course, Leadership for Students Who
Want to Make a Difference.

In addition to academic study, participants enjoy
a variety of cultural and recreational activities.
They also have access to the University of Iowa
Libraries, computer facilities, and study areas.
Housing and meals are provided at University
residence halls.

To be eligible for the institute, students must be
from Iowa and must have finished grade 7 or 8.
A nomination packet is required, and financial
support is available.

Iowa Talent Project
The Belin-Blank Center and the Des Moines
School District collaborate in the Iowa Talent
Project (ITP) to identify underrepresented
talented and gifted students who are taking
upper-level or advanced courses as they progress
through secondary school. The project’s goal is to
help students recognize their potential and take
advantage of rigorous courses of study that
challenge them.

Student participants attend a residential summer
program at The University of Iowa, which
focuses on college preparation. They also enjoy
recreational and cultural experiences while they
are on campus. The cost of attending the session
is covered by the University. Iowa Talent Project
students also complete courses at the Des Moines
Central Academy and take at least three AP
exams.

Upon finishing high school, successful ITP
students are admitted to The University of Iowa
and are given financial aid based on need and
merit. Once enrolled at the University, students
must maintain a designated grade-point average
while taking approved courses as full-time
students and must meet other specified
requirements.
**Junior Scholars Academy**

Students in grade 6, 7, or 8 may attend the Junior Scholars Academy (JSA), a one-week summer residential academic program at The University of Iowa for Belin-Blank Center students. JSA consists of 10 classes over two one-week sessions. Students take a single advanced course for the entire week and may apply for one or two sessions.

**National Scholars Academy**

Students in grade 9, 10, or 11 may attend the National Scholars Academy (NSA), a one-week summer residential academic program at The University of Iowa for Belin-Blank Center students. NSA consists of eight classes over two one-week sessions. Students take a single advanced course for the entire week and may apply for one or two sessions.

**Visual Arts Institute**

The Visual Arts Institute is a one-week residential summer program for artistically talented students in grades 9 through 11. The institute consists of two separate sessions: one in two-dimensional art (e.g., painting, drawing) and one in three-dimensional art (e.g., sculpture, ceramics).

The Visual Arts Institute provides talented artists with an intensive and advanced studio experience designed to enhance their creative and artistic growth. Each student receives a partial scholarship to cover the majority of the institute’s cost.

The Iowa Young Writers’ Studio is a two-week summer residential program for high school students who love to write. Students work with experienced writing teachers at the University and build a community of peers.

The studio offers three courses of study: poetry, fiction, and creative writing (a mix of poetry, fiction, and creative nonfiction). Each course consists of a seminar and a workshop. In seminars, students read literature by established writers. In workshops they share their own writing, get feedback from their classmates and teacher, and discuss issues of narrative and form.

The studio offers two 2-week sessions: one in June and one in July.

Young writers who have completed grade 10, 11, or 12 are eligible to attend the studio. Application materials include an application form, a creative writing sample, a statement of purpose, a high school transcript, and a letter of recommendation from an English teacher or another instructor familiar with the applicant’s writing. For complete application information, contact the Iowa Young Writers’ Studio or visit its web site.
Opportunity at Iowa offers the following programs for precollege students.

Iowa First Nations
Web site: http://www.uiowa.edu/~provost/oi/ifn

The Iowa First Nations Comprehensive Enrichment Program was established to encourage Native Americans of secondary school age to aim for professional careers in the sciences, engineering, and related fields. The Iowa First Nations Program brings Native American students entering grade 10 or 11 to The University of Iowa for a two-week residential summer program that focuses on the biological sciences and the relationship between science and Native American cultures. In addition to course work, students participate in varied social and recreational activities. For more information about Iowa First Nations, contact the Opportunity at Iowa Program.

Life Science Summer Program
Web site: http://www.uiowa.edu/~provost/oi/lssp

The Life Science Summer Program (LSSP) provides students who are entering grade 9 or 10 the opportunity for hands-on laboratory training and classroom instruction covering a wide range of topics in developmental biology. The curriculum also incorporates health issues and current events. For more information, contact the Opportunity at Iowa Program.

- 402:023 Iowa First Nations 0 s.h.
Secondary Student Training Program

**Director:** William Swain  
**Web site:** http://www.continuetolearn.uiowa.edu/sstp/

The Secondary Student Training Program provides opportunities for high school students to conduct research in a University of Iowa laboratory under the guidance of a faculty mentor. Students also attend faculty seminars and science communication workshops and participate in social and recreational activities during the six-week program.

**Courses**

418:001 Secondary Student Training Program  
0 s.h.  
Experience conducting research under the guidance of a faculty member; presentation of research findings at concluding seminar. Six weeks.
University of Iowa Upward Bound, a division of Support Service Programs, hosts a summer academic program for eligible high school students from five southeast Iowa communities. Upward Bound students who participate in the summer program reside on the University campus for six weeks. They take mathematics, science, language arts, and foreign language courses and participate in extracurricular activities and field trips. Bridge students (those who have graduated from high school) enroll in University course work for the eight-week summer session.

To be admitted to University of Iowa Upward Bound, students must:

- reside in the target area;
- be in grade 9 or 10;
- have a family income that meets U.S. Department of Education low-income guidelines;
- be potential first-generation college students;
- and
- show need for Upward Bound services.

Upward Bound provides services to students until they graduate from high school and enter a postsecondary education program of their choice. Participants receive all services at no cost.

University of Iowa Upward Bound serves students who attend target schools in Burlington, Columbus Junction, Davenport, Fort Madison, Muscatine, and West Liberty, Iowa. Other postsecondary institutions in Iowa also sponsor Upward Bound programs. High school students who do not attend target schools located in the communities served by The University of Iowa’s program should ask their counselors whether an Upward Bound program serves their area.

For more information, contact University of Iowa Upward Bound, The University of Iowa.
Continuing Education

Dean: Chet S. Rzonca
Web site: http://www.continuetolearn.uiowa.edu

The Division of Continuing Education increases access to the services and resources of The University of Iowa. In partnership with the University’s colleges and departments, the division provides high-quality credit and noncredit courses, workshops, and programs to traditional and nontraditional learners. Using a variety of locations, schedules, and technologies, including audiovisual and video services, the division helps provide a University of Iowa learning environment beyond the physical borders of campus.

The division’s organization and services include the following.

**Center for Conferences and Institutes**

Director: Jo Dickens
Web site: http://www.continuetolearn.uiowa.edu/conferences

The Center for Conferences and Institutes (CCI) is the University’s principal agency for initiating, coordinating, conducting, and supporting noncredit continuing education programs. The center also serves as the University of Iowa’s Continuing Education Unit (CEU) database.

CCI coordinates conferences for University faculty, departments, colleges, administrative units, student groups and related academic societies, professional associations, and other groups sponsored by the University.

CCI provides logistical management and administration of conferences; program content is designed by the unit presenting the conference. The center uses conference facilities on the University of Iowa campus as well as facilities located in Iowa City and Coralville, statewide, and nationwide. CCI also manages national and international programs for University faculty members and departments. For more information, visit the Center for Conferences and Institutes web site.

**Center for Credit Programs**

Director: Doug Lee
Web site: http://www.continuetolearn.uiowa.edu/ccp

The Center for Credit Programs works with University of Iowa colleges and academic departments to offer for-credit courses in a variety of formats and schedules. Courses are offered on and off campus; formats include distance education and independent study. Courses may be open to University of Iowa students and to persons not formally admitted to a degree program. For more information, contact the Center for Credit Programs or visit its web site.

**Saturday & Evening Classes**

Web site: http://www.continuetolearn.uiowa.edu/ccp/sande

The Center for Credit Programs sponsors University courses on campus at times convenient for part-time or nontraditional students. Undergraduate and graduate course work is available in a wide range of academic disciplines. For more information, contact the Center for Credit Programs.

**Summer and Winter Sessions**

Director: Doug Lee
Web sites: http://www.continuetolearn.uiowa.edu/ccp/summer
http://www.continuetolearn.uiowa.edu/ccp/winter

The University of Iowa conducts a summer session through the Center for Credit Programs with terms of three, six, and eight weeks. Classes also are offered outside these normal summer session terms. A three-week winter session is offered during the break between the fall and spring semesters.
During the summer and winter sessions, students can take undergraduate and graduate course work. Classes during these sessions are taught mainly by University of Iowa faculty members, so students receive the same first-rate instruction provided during the spring and fall semesters. Courses are offered in a variety of formats both on and off campus. They are open to University of Iowa students and to persons not formally admitted to a degree program.

**Distance Education Programs and Courses**

**Web site:** [http://www.continuetolearn.uiowa.edu/ccp/de](http://www.continuetolearn.uiowa.edu/ccp/de)

The Center for Credit Programs sponsors courses via several distance education formats.

Guided Independent Study courses are available through some 40 University departments. For a catalog providing course listings (including courses offered via the World Wide Web), procedures, and enrollment information, contact the Center for Credit Programs or visit the Guided Independent Study web site.

University extension classes are scheduled where they best serve off-campus students, at the request of public school officials, and/or where professional, business, industrial, or other qualified groups express a need for instruction. The center also sponsors courses via the Iowa Communications Network, the Internet, and other technologies. For more information, contact the Center for Credit Programs or visit its web site.

**Bachelor of Liberal Studies**

**Web site:** [http://www.continuetolearn.uiowa.edu/ccp/bls](http://www.continuetolearn.uiowa.edu/ccp/bls)

The Bachelor of Liberal Studies (B.L.S.) is a baccalaureate degree offered by each of the three Board of Regents, State of Iowa universities (The University of Iowa, Iowa State University, and the University of Northern Iowa). It serves adults whose jobs, families, geographic locations, or other personal circumstances prevent them from attending college as full-time, on-campus students. The program does not have a campus residence requirement.

Students may earn credit toward the degree in courses offered through the Center for Credit Programs, via campus-based or distance education formats, or through daytime on-campus courses.

At The University of Iowa, the B.L.S. is awarded by the College of Liberal Arts and Sciences and administered by the Division of Continuing Education. For a more detailed program description, see Bachelor of Liberal Studies (College of Liberal Arts and Sciences) in the Catalog or visit the Center for Credit Programs web site.

**Bachelor of Applied Studies**

**Web site:** [http://www.continuetolearn.uiowa.edu/ccp/bas](http://www.continuetolearn.uiowa.edu/ccp/bas)

The Bachelor of Applied Studies (B.A.S.) is a baccalaureate degree designed for nontraditional students who are graduates of community college technical programs and wish to complete a bachelor’s degree without interrupting their careers. Applicants should have a minimum of three years of work experience.

Students may earn credit toward the degree in courses offered through the Center for Credit Programs, via campus-based or distance education formats, or in daytime on-campus courses.

At The University of Iowa, the B.A.S. is offered through University College and administered by the Division of Continuing Education. For a more detailed program description, see Bachelor of Applied Studies (University College) in the Catalog or visit the Center for Credit Programs web site.

**Center for Media Production**

**Director:** Daniel G. Lind

**Web site:** [http://ui.media.uiowa.edu](http://ui.media.uiowa.edu)

The Center for Media Production provides professional services for development of media programs and materials that support the University’s educational and promotional needs. It collaborates with University of Iowa faculty and staff members, offering consultation, planning, design, development, and marketing services. The center has received more than 40 major awards, including a regional Emmy, CINE Golden Eagles, and New York Festival World Medals.

The Center for Media Production provides the following services.

**Video:** The center designs and develops video programs and promotional messages and authors interactive media (DVD and CD-ROM). It offers film-style video production; digitizing of video for
web use; video editing, special effects creation, electronic graphics, art, and animation; transfer of 16mm film to video; and videotape and DVD duplication, including conversion to or from world television standards.

**Photography:** The center’s staff provides location photography and printing services for promotions, portraits, conferences, summer camps, University administrators, visiting dignitaries, University events, University construction projects, and more. In-house processing and printing is available for black-and-white images and for color digital images of all sizes. Copy photography services include copying and enhancement of rare negatives and photos. The center also maintains an extensive archive of University of Iowa historical photos.

**Audio:** The center offers a wide range of professional services, including audio recording on location or in a studio sound stage, editing and sound mixing, audio noise reduction, and duplication of audiotapes and CDs. Projects include instructional and exam materials, radio programs, video soundtracks, audio for web courses and applications, and recording and editing of student audition tapes and faculty solo performances.

**Graphics:** Artistic services are available for development of posters and portable displays; large permanent displays; web site enhancements; lamination, certificates, and maps; and creation of designs, calligraphy, illustrations, conference materials, and University signs. Each year, the graphics staff designs and builds the University’s 1,200-square-foot Iowa State Fair exhibit. The center also offers portable display units for rent by traveling faculty and staff.

**Media publishing and marketing:** The center markets and distributes media products originated at the University. Royalties are paid to sponsoring University departments and authors.

**Labor Center**

**Director:** Daniel J. Holub  
**Web site:** [http://www.continuetolearn.uiowa.edu/laborctr](http://www.continuetolearn.uiowa.edu/laborctr)

The University of Iowa Labor Center provides educational and research services to Iowa trade unionists. The center offers a wide range of continuing and distance education programs on citizenship, collective bargaining, economics, globalization and human rights, grievance and arbitration, labor and employment law, labor history, organization building and strategic planning, union leadership and administration, public policy, workplace health and safety, worker participation, and other areas relevant to union members. Courses are offered both on and off campus at times and locations convenient to working adults. The Labor Center also provides research assistance and technical information.
Administrative Officers

Board of Regents, State of Iowa

The Board of Regents, State of Iowa, governs The University of Iowa, Iowa State University of Science and Technology, the University of Northern Iowa, the Iowa Braille and Sight-Saving School, and the Iowa School for the Deaf. The Board consists of nine members.

President: Michael G. Gartner, Des Moines
Bonnie J. Campbell, Des Moines
Jenny L. Connolly, Cedar Falls
Robert N. Downer, Iowa City
Jack B. Evans, Cedar Rapids
Ruth R. Harkin, Cumming
Craig A. Lang, West Des Moines
David W. Miles, Des Moines
Rose A. Vasquez, Des Moines

Executive director: Gary Steinke

Central Administration

President: Sally Mason
Executive vice president and provost: Michael J. Hogan
Senior vice president and university treasurer: Douglas K. True
Vice president for medical affairs and dean, Carver College of Medicine: Jean E. Robillard
Vice president for research: Meredith Hay
Vice president for student services and dean of students: Phillip E. Jones
Vice president for legal affairs and general counsel: Marcus Mills
Special assistant to the president for equal opportunity and diversity and associate provost: Marcella David
Special assistant to the president for governmental relations and associate vice president for research: Derek H. Willard

University ombudspersons: Cynthia Joyce, Craig Porter
Director, university relations: Steven R. Parrott

*Associate director, public affairs and media relations:* Linda S. Kettner
The following persons held University of Iowa faculty appointments with the rank of instructor, assistant professor, associate professor, or professor on July 11, 2007. In this listing, the year of first appointment follows the departmental identification, and the year of present appointment is given in parentheses.

**ABADA, HICHAM**, Clinical Associate Professor, Radiology, 2006 (2006); MD 1992 Medical Univ of Algiers

**ABBAS, HARUHI**, Adjunct Lecturer, University College, 2006 (2006); MA 1985 Indiana PA; MA 1988 Iowa; MA 2002 Iowa

**ABBOTT, LINDA I.**, Clinical Adjunct Instructor, Nursing, 2000 (2000); BSN 1980 University of Iowa; MSN 1996 Iowa

**ABBOD, FRANCOIS**, Professor, Internal Medicine/Physiology, 1961 (1968); BS 1948 Christian Brothers’ Sch-Egypt; PNS 1949 Cairo; MBBCH 1955 Ain Chams-Egypt; MBBCH 1955 Ain Chams-Egypt

**ABDEL-MALEK, KARIM**, Professor, Biomedical Engineering, 1994 (2005); BS 1988 Jordan; MS 1990 Pennsylvania; PHD 1993 Pennsylvania

**ABIOSE, ADEMOLA K.**, Clinical Assistant Professor, Internal Medicine, 2005 (2005); MBBS 1985 Lagos

**ABRAHAMSON, TIMOTHY GARTH**, Clinical Adjunct Assistant Professor, Dermatology, 2002 (2002); BA 1993 Warburg; MD 1997 Iowa

**ABRAMOFF, MICHAEL DAVID**, Assistant Professor, Ophthalmology & Visual Science/ Electrical-Computer Engineering, 2004 (2004); MS 1989 Amsterdam; MD 1994 Amsterdam; PHD 2001 University of Utecht

**ABRAMOWITZ, PAUL W.**, Professor, Pharmacy, 1998 (1998); BA 1972 Indiana; BSPh 1977 Toledo; PHARM 1979 Michigan

**ABREU, ALISON CORNELIA**, Clinical Assistant Professor, Psychiatry/Family Medicine, 2003 (2006); BS 1990 Massachusetts; MD 1998 Iowa

**ABU HASAN, MUTASIM**, Clinical Associate Professor, Pediatrics, 2000 (2006); MBBS 1991 Jordan

**ABU-YOUSEF, MONZER M.**, Professor, Radiology, 1976 (1991); MBBCH 1970 Cairo-Egypt

**ACARREGUI, MICHAEL J.**, Associate Professor, Pediatrics, 1991 (1999); BA 1981 Oregon; MD 1985 Oregon

**ACCARDI, ALESSIO**, Assistant Professor, Physiology, 2007 (2007); PHD 2001 Instituto di Cibernetica

**ACERBO, MARTIN**, Adjunct Assistant Professor, Economics, 2007 (2007); PHD 2001 Konstanz, Germany

**ACHEPOHL, KEITH A.**, Emeritus Professor, Art & Art History, 1973 (1981); BA 1956 Knox; MFA 1960 Iowa

**ACHRAZOGLOU, GEORGE JOHN**, Adjunct Assistant Professor, Teaching and Learning, 1987 (2004); BA 1981 University of Iowa; MA 1993 Univ of Iowa; PHD 2003 Univ of Iowa

**ACHUTAN, PAUL J.**, Adjunct Assistant Professor, Occupational & Environmental Health, 2002 (2002); BSc 1991 Sains Malaysia; MS 1996 Iowa; PHD 2001 Iowa

**ACKELSON, SUSAN JANE**, Adjunct Instructor, Social Work, 2004 (2004); BA 1972 Northern IA; MSW 1993 Iowa

**ACON, PATRICIA JO NASSIF**, Clinical Professor, Law-Faculty, 1981 (1985); BA 1971 Iowa; JD 1974 Iowa

**ADAM, MATTHEW**, Adjunct Lecturer, Management & Organizations, 2006 (2006); MBA 2002 Iowa

**ADAMEK, MARY**, Clinical Professor, Music, 1996 (2007); BM 1977 Virginia Commonwealth; MM 1981 Miami; PHD 1993 Minnesota

**ADAMS, BRIAN D.**, Professor, Orthopaedics and Rehabilitation/Biomedical Engineering, 1992 (1996); BS 1978 Nebraska; MD 1982 Nebraska

**ADAMS, CHARLOTTE**, Associate Professor, Dance, 1998 (2003); BA 1976 Appalachian State; MA 1984 Arizona; MFA 1995 Arizona

**ADAMS, CHRISTOPHER MAXIN**, Assistant Professor, Internal Medicine, 2006 (2006); BS 1992 Kansas, Lawrence; MD 1999 Iowa; PHD 1999 Iowa

**ADAMS, HAROLD P.**, Professor, Neurology, 1976 (1985); BA 1966 Drake; BS 1968 South Dakota-Vermillion; MD 1970 Northwestern

**ADAMS, JAMES D.**, Associate Professor, English/ American Studies, 1994 (2001); BA 1985 Duke; MA 1987 Virginia; PHD 1993 Virginia

**ADAMS, MOLLY M.**, Clinical Adjunct Assistant Professor, Pharmacy, 2004 (2004); PHARM 1999 Drake

**ADAMS, RUSSELL**, Clinical Adjunct Associate Professor, Internal Medicine, 2006 (2006); BS 1992 Iowa

**ADAMS, SARAH MARGARET**, Adjunct Professor, Religion, 2005 (2004); BA 1988 Chicago; MA 1994 Wesley Theological Seminary; PHD 2002 Oregon
ALLEN, LARRY L., Adjunct Assistant Professor, Social Work, 1987 (1996); MSW 1977 Iowa

ALLEN, LEE-ANN, Associate Professor, Internal Medicine/Microbiology, 1996 (2003); BS 1982 California-Riverside; MS 1983 California-Riverside; PhD 1990 Wisconsin-Madison

ALLYN, JEFFERY LYNN, Clinical Adjunct Assistant Professor, Family Medicine, 2001 (2001); MD 1985 Tulane

ALLEN, LEE-ANN, Adjunct Instructor, Linguistics, 2000 (2000); BA 1993 Gustavus Adolphus; MA 1998 Wisconsin

ALMOMANI, THAKIR DAMIN JUDI, Adjunct Instructor, Biomedical Engineering, 2007 (2007); BSC 1998 Jordan Univ; MS 2001 Jordan Univ; PhD 2007 Iowa

ALONZO, ALICIA CRISTINA, Assistant Professor, Teaching and Learning, 2006 (2006); BS 1993 Cornell; MS 1995 California Inst of Technology; PhD 1999 California Inst of Technology

ALTMAYER, ELIZABETH M., Professor, Psych & Quant Foundations/Community & Behavioral Health, 1980 (1989); BA 1973 Wheaton; MA 1975 Ohio State; PhD 1977 Ohio State

ALTMAN, CHARLES, Professor, Cinema & Comparative Literature, 1974 (1986); AB 1966 Duke; MA 1966 Duke; PhD 1971 Yale

ALTMAN, JANET G., Emeritus Professor, French & Italian, 1974 (1991); BA 1967 Duke; MPH 1970 Yale; PhD 1973 Yale

ALTON, DONALD A., Emeritus Professor, Computer Science, 1970 (1981); BA 1965 Rice; PhD 1970 Cornell

ALTON, EVERETT D., Emeritus Associate Professor, Electrical-Computer Engineering, 1955 (1967); BA 1939 Iowa State Teachers; MSEE 1955 Iowa

AMAD, PAULA T., Assistant Professor, Cinema & Comparative Literature, 2004 (2004); BA 1990 Melbourne; MA 1990 Melbourne; PhD 2002 Chicago

AMADA, KENNETH, Emeritus Professor, Music, 1967 (1976)

AMENDOLA, ANNUNZIATO, Professor, Orthopaedics and Rehabilitation/Integrative Physiology/Physical Therapy, 2001 (2004); BS 1980 Western Ontario; MD 1984 Western Ontario

AMERT, KAY L., Emeritus Professor, Journalism & Mass Communication, 1972 (1994); BGS 1972 Iowa

AMOS, JAMES JOHN, Clinical Associate Professor, Psychiatry, 1996 (2001); BS 1985 Iowa State; MD 1992 Iowa

AMPUEIRO, ROBERTO, Lecturer, Spanish & Portuguese, 2006 (2006); MA 2002 Iowa; PhD 2005 Iowa

AN, AMY, Lecturer, Accounting, 1983 (1983); BA 1973 British Columbia; MA 1982 Iowa

AN, HYONGGIN, Assistant Professor, Biostatistics, 2004 (2004); BS 1996 Korea; MS 1998 Chicago; PhD 2004 Michigan

ANDEREGG, JOE E., Adjunct Assistant Professor, Pharmacy, 2006 (2006); PHARM 2005 Iowa

ANDERSEN, DAVID R., Professor, Electrical-Computer Engineering/Physics & Astronomy, 1986 (1999); BSEE 1981 Iowa State; MSEE 1982 Purdue; PhD 1986 Purdue

ANDERSEN, ERIC G., Professor, Law-Faculty, 1984 (1988); BA 1974 Brigham Young; JD 1977 Brigham Young

ANDERSEN, KATHLEEN HELEN, Lecturer, Anatomy & Cell Biology/Nursing, 1992 (1992); MS 1991 Iowa

ANDERSON, BARBARA S., Adjunct Instructor, Speech Pathology & Audiology, 1996 (1996); MA 1976 Northern Iowa

ANDERSON, BARRIE, Emeritus Professor, Obstetrics & Gynecology, 1982 (1993); BS 1963 Wisconsin; MD 1967 State U of NY-Upstate Med Coll

ANDERSON, BRETT ALLEN, Adjunct Instructor, Pharmacy, 1997 (1997); BS 1991 Iowa

ANDERSON, BRUCE A., Adjunct Assistant Professor, Preventive & Community Dentistry, 1990 (1992); DDS 1988 Iowa

ANDERSON, BRUCE THOR, Clinical Adjunct Instructor, Nursing, 1991 (1991); MSN 1990 Eau Claire Wis

ANDERSON, CHARLES V., Emeritus Associate Professor, Speech Pathology & Audiology, 1966 (1968);

ANDERSON, DANIEL D., Professor, Mathematics, 1974 (1983); BA 1971 Iowa; MS 1971 Iowa; PhD 1974 Chicago

ANDERSON, DORIS M., Adjunct Assistant Professor, Pharmacy, 2002 (2002); BS 1978 Drake; PHARM 2002 Iowa

ANDERSON, ERLING A., Associate Professor, Anesthesiology, 1987 (1997); BS 1977 Iowa; MD 1977 Iowa

ANDERSON, ERLING A., Associate Professor, Anesthesia/Psychology, 1987 (1989); BA 1972 Wisconsin; MA 1981 Iowa; PhD 1984 Iowa

ANDERSON, JOSHUA ODIN, Adjunct Assistant Professor, Art & Art History, 2006 (2006); BFA 2002 Nebraska-Omaha; MFA 2006 Iowa

ANDERSON, KENNETH W., Clinical Adjunct Assistant Professor, Pediatrics, 1975 (1975); MD 1972 Northwestern

ANDERSON, LINDA LOUISE WICKER, Adjunct Instructor, Pharmacy, 2006 (2006); BSE 1974 Iowa

ANDERSON, MARK EDWARD, Professor, Internal Medicine/Physiology, 2005 (2005); BA 1981 Macalester; MD 1989 Minnesota; PhD 1989 Minnesota

ANDERSON, MICHAEL GARY, Assistant Professor, Physiology/Ophthalmology & Visual Science, 2004 (2004); PHD 1997 Iowa

ANDERSON, PAUL G., Emeritus Professor, Music, 1949 (1968); BM 1948 Iowa; MA 1949 Iowa

ANDERSON, RACHEL L., Associate Professor, Health Management & Policy/Nursing, 1999 (2005); BA 1987 Beloit; PhD 1997 Northwestern

ANDERSON, RAYMOND RONALD, Adjunct Assistant Professor, Geoscience, 1993 (1993); PhD 1992 Iowa

ANDERSON, RHONDA KAYE YOCKEY, Adjunct Instructor, Pharmacy, 2006 (2006); BSE 1989 Iowa

ANDERSON, STEVEN PAUL, Adjunct Assistant Professor, Family Dentistry, 2005 (2005); DDS 1980 Iowa
ANTON, DANIEL CHRISTOPHE, Associate Professor, Neurology, 1994 (2003); BA 1982 South Florida; MA 1985 Iowa; PHD 1987 Iowa

ANDERSON-SUDDARTH, JULIE LINN, Clinical Adjunct Assistant Professor, Pediatrics, 2006 (2006); BS 1995 Northeast Missouri State; MD 1999 Iowa

ANDREASEN, NANCY CooVER, Associate Professor, Psychiatry, 1973 (1981); BA 1958 Nebraska; MA 1959 Radcliffe; PHD 1963 Nebraska; MD 1970 Iowa

ANSTEY, B ELEANOR, Clinical Assistant Professor, Radiology, 2006 (2006); MD 2000 Iowa

ANDREWS, EMILY MARIE, Adjunct Instructor, Speech Pathology & Audiology, 2005 (2005); MA 1999 Iowa

ANDREWS, JAMES G., Emeritus Professor, Mechanical Engineering, 1964 (1983); BSME 1957 Iowa; MS 1959 Iowa

ANDSAGER, JULIE, Associate Professor, Journalism & Mass Communication/Community & Behavioral Health, 2003 (2003); BS 1986 Kansas State University; MS 1990 Kansas State University; PHD 1993 University of Tennessee

ANKENMANN, ROBERT D., Associate Professor, Psych & Quan Sciences, 1994 (2000); BED 1984 Western Ontario; SCB 1984 University of Waterloo; MED 1990 New Brunswick; PHD 1994 Pittsburgh

ANKENY, JOHN W., Clinical Adjunct Assistant Professor, Family Medicine, 1982 (2002); BA 1974 Simpson; DO 1977 Coll of Osteopathic Med

ANSLEY, TIMOTHY N., Associate Professor, Internal Medicine, 1983 (1989); BA 1974 Eastern Illinois; MS 1977 Northern Illinois; PHD 1984 Iowa

ANSTIE, B. Eleanor, Emeritus Assistant Professor, Social Work, 1974 (1978); BA 1953 Marycrest; MA 1959 Creighton; MA 1968 Manhattanville; PHD 1983 Iowa

ANTES, LISA MARIA, Clinical Associate Professor, Internal Medicine, 2000 (2005); BA 1986 Montclair State; BS 1986 Montclair State; MD 1990 Robert Wood Johnson Medical

ANTEZANO, EDUARDO S., Clinical Adjunct Assistant Professor, Internal Medicine, 2005 (2005); MD 1996 Peruvin, Cayetano

ANTHONY, JERRY, Associate Professor, Urban & Regional Planning, 2000 (2006); BA 1989 Kerala-India; MS 1991 Delhi-India; PHD 2000 Florida State

ANTHONY, REBECCA J., Adjunct Instructor, Teaching and Learning, 2005 (2005); BA 1972 Luther College; MA 1975 Iowa

ANTON, DANIEL CHRISTOPHE, Assistant Professor, Occupational & Environmental Health/Physical Therapy, 2003 (2003); BS 1982 Northwestern; MS 1998 Samuel Merritt; PHD 2002 Iowa

ANZELC, BENJAMIN PAUL, Adjunct Assistant Professor, Art & Art History, 2006 (2006); BS 1997 Northern Illinois; MA 2000 Northern Illinois

APICELLA, MICHAEL A., Professor, Microbiology/Internal Medicine, 1993 (1993); AB 1959 College of the Holy Cross; MD 1963 SUNY-Buffalo

APRILE, THOMAS R., Associate Professor, Art & Art History, 1980 (1995); MFA 1978 Syracuse

AQUILINO, MARY LOBER, Clinical Associate Professor, Community & Behavioral Health, 1982 (2004); BSN 1977 NY State- Binghamton; MSN 1982 North Carolina; PHD 1993 Iowa

AQUILINO, STEVEN A., Professor, Prosthodontics, 1982 (1993); BS 1975 State Univ of NY Binghamton; DDS 1979 North Carolina; MS 1982 North Carolina

ARAB, SIDDIQ M., Clinical Adjunct Assistant Professor, Pediatrics, 1977 (1977); MBBS 1965 King Edward Medical

ARAVAMUDHAN, RAMAN, Adjunct Instructor, Computer Science, 2003 (2004); ME 1986 Bharathir Univ, India

ARCHER, BRAD JAMES, Clinical Adjunct Assistant Professor, Internal Medicine, 2005 (2005); BA 1989 Northern Iowa; MD 1999 South Dakota

ARMENS, SVEN M., Emeritus Professor, English, 1950 (1966); BA 1943 Tufts; MA 1947 Harvard; PHD 1951 Harvard

ARMSTRONG, STEVEN RAY, Associate Professor, Operative Dentistry, 1999 (2005); BS 1983 Iowa; DDS 1987 Iowa; PHD 1998 Iowa

ARNDT, STEPHAN, Professor, Psychiatry/ Biostatistics/IA Consortium Substance Abuse, 1991 (1998); BS 1974 Loyola; MA 1976 Claremont; PHD 1980 Claremont

ARNESON, SCOTT KABRICK, Adjunct Lecturer, Family Dentistry/Marketing, 2000 (2000); BBA 1984 Iowa; MBA 1990 Iowa

ARNOLD, GERALD M., Clinical Adjunct Assistant Professor, Emergency Medicine, 2005 (2005); MD 1995 New York Medical College

ARNOLD, MARK A., Professor, Chemistry, 1982 (1994); BS 1978 Indiana-Purdue; PHD 1982 Delaware

ARNOLD, PATRICK ALOYSIUS, Adjunct Instructor, Pharmacy, 2006 (2006); BSPH 1978 Iowa

ARNONE, ANTHONY, Assistant Professor, Music, 2001 (2001); BM 1989 New England Conservatory; MM 1994 Wichita State; MM 1995 Wichita State

ARORA, JASBIR S., Professor, Civil-Environmental Engineering/Geological Engineering, 1972 (1972); BS 1964 Punjab-India; MS 1967 Kansas State; PHD 1971 Iowa

ARPEY, CHRISTOPHER J., Professor, Dermatology, 1985 (2006); BA 1982 Colgate; MD 1986 Rochester

ARTEMYEV, NIKOLAI O., Professor, Physiology, 1995 (2004); BS 1984 St. Petersburg Inst of Technol; PHD 1988 St. Petersburg Inst of Technol
ARThERhOLT, WILLIAM G., Clinical Adjunct Assistant Professor, Family Medicine, 1976 (2002); DO 1972 Coll of Osteopathic Med
ARTMAN, MICHAEL, Professor, Pediatrics/Physiology, 2005 (2004); MD 1978 Tulane University Med School
ASCOLI, MARIO, Professor, Pharmacology, 1990 (1990); BS 1971 San Carlos; PHD 1975 Vanderbilt
ASHARE, ALIX, Assistant Professor, Internal Medicine, 2005 (2006); MD 1999 Vanderbilt
ASHTON, NED C., Adjunct Instructor, Health, & Sport Studies, 1994 (1994); BS 1985 Iowa
ASPENGREN, KATHRYN DIANE, Adjunct Assistant Professor, Theatre Arts, 1995 (1995); BA 1974 Iowa; MFA 1994 Iowa
ASPREY, DAVID PERRY, Associate Professor, Physician Assistant/Physical Therapy, 1994 (2000); PHD 1999 Iowa
ASSEM, MAHFOUD, Assistant Professor, Family Medicine, 1976 (2002); DO 1972 Coll of Osteopathic Med
ARTHERhOLT, WILLIAM G., Clinical Adjunct Assistant Professor, Family Medicine, 1976 (2002); DO 1972 Coll of Osteopathic Med
ARTMAN, MICHAEL, Professor, Pediatrics/Physiology, 2005 (2004); MD 1978 Tulane University Med School
ASCOLI, MARIO, Professor, Pharmacology, 1990 (1990); BS 1971 San Carlos; PHD 1975 Vanderbilt
ASHARE, ALIX, Assistant Professor, Internal Medicine, 2005 (2006); MD 1999 Vanderbilt
ASHTON, NED C., Adjunct Instructor, Health, & Sport Studies, 1994 (1994); BS 1985 Iowa
ASPENGREN, KATHRYN DIANE, Adjunct Assistant Professor, Theatre Arts, 1995 (1995); BA 1974 Iowa; MFA 1994 Iowa
ASPREY, DAVID PERRY, Associate Professor, Physician Assistant/Physical Therapy, 1994 (2000); PHD 1999 Iowa
ASSEM, MAHFOUD, Assistant Professor, Pharmacy, 2007 (2007); PHARM 1995 Dijon, France; PHD 2000 Dijon, France
ATCHISON, CHRISTOPHER, Clinical Professor, Health Management & Policy/Nursing, 1998 (2004); AB 1971 Loyola; MPA 1990 Illinois-Springfield
ATIENZA, SALVADOR DIMAPASOK, Adjunct Assistant Professor, Family Dentistry, 1999 (2000); BS 1990 Iowa; DDS 1994 Iowa
ATKINS, DIANNE LEE, Professor, Pediatrics, 1983 (2002); BA 1974 Johns Hopkins; MD 1977 Johns Hopkins
ATKINSON, ALICE M., Emeritus Associate Professor, Teaching and Learning, 1973 (1995); BS 1961 Iowa State; MS 1963 Wisconsin; PHD 1982 Iowa
ATKINSON, KENNEDY E., Emeritus Professor, Mathematics/Computer Science, 1972 (1975); BS 1961 Iowa State; MS 1963 Wisconsin; PHD 1966 Wisconsin
AUBREY, ELIZABETH, Professor, Music, 1982 (1998); BA 1973 Grinnell; MM 1975 Maryland; PHD 1982 Maryland
AUL, EDWARD, Clinical Assistant Professor, Neurology, 1998 (2000); BS 1988 Pittsburgh; MD 1992 Pittsburgh
AUNAN, CAROL DIANE, Adjunct Assistant Professor, Nursing, 1997 (2004); BSN 1993 Iowa; MSN 2001 Iowa
AURAND, GARY, Adjunct Associate Professor, Chemical & Biochemical Engineering, 1997 (2004); BS 1986 University of Nebraska-Lincoln; PHD 1996 North Carolina State
AUSTIN, J C., Assistant Professor, Urology/Pediatrics, 2002 (2002); BA 1990 Northwestern; MD 1994 Washington-St. Louis
AYDELOTTE, MYRTLE, Emeritus Professor, Nursing, 1949 (1949); BS 1939 Minnesota; MA 1948 Minnesota; PHD 1955 Minnesota
AYRES, LIONESS, Assistant Professor, Nursing, 2005 (2005); MSN 1992 Illinois @ Chicago; PHD 1998 Illinois @ Chicago
AZAR, ANTOINE E., Clinical Assistant Professor, Internal Medicine, 2007 (2007); BS 1995 American Univ/Beirut, Lebanon; MD 1999 American Univ/Beirut, Lebanon
BABCOCK, BRUCE A., Adjunct Instructor, Pharmacy, 1997 (1997); BS 1987 Drake
BACON, JOHN ROBERT, Clinical Adjunct Assistant Professor, Educ Policy & Leadership Studies, 2006 (2006); BA 1997 Iowa; MA 2003 Iowa
BACON, ROBERT A., Adjunct Lecturer, Teaching and Learning, 1997 (1997); MA 1978 Iowa
BAENZIGER, NORMAN C., Emeritus Professor, Chemistry, 1949 (1957); BS 1943 Hamline; PHD 1948 Iowa State
BAER, WILLIAM THOMAS, Adjunct Assistant Professor, Pharmacy, 2005 (2005); BS 1976 Iowa
BAGFORD, JACK, Emeritus Professor, Teaching and Learning, 1962 (1970); MED 1956 Miami-Ohio; EDD 1960 Indiana
BAHENSKY, JAMES, Clinical Associate Professor, Health Management & Policy/Nursing, 2003 (2003); BS 1971 Nebraska; MS 1976 Nebraska
BAHRICK, AUDREY S., Adjunct Assistant Professor, Psych & Quant Foundations, 1995 (1995); BA 1980 Ohio Wesleyan; MA 1981 Ohio State; MA 1986 Ohio State; PHD 1989 Ohio State
BAI, ER-WEI, Professor, Electrical-Computer Engineering/Radiology, 1987 (2000); BS 1977 Fudan-China; ME 1982 Shanghai Jiaotong; PHD 1987 Calif-Berkeley
BAILEY, DWIGHT LAMAR, Adjunct Assistant Professor, Management & Organizations, 2005 (2005); BA 1992 Wilberforce, Ohio; PSYD 1996 Wright State, Ohio
BAILEY, JENNIE, MA 1994 Eastern Illinois
BAILEY, JONATHON, Lecturer, Civil-Environmental Engineering, 2006 (2007); BA 1985 Iowa State; BS 1985 Iowa State University
BAILEY, OLIVIA ERIN, Clinical Assistant Professor, Emergency Medicine, 2007 (2007); BA 2000 Iowa; BS 2000 Iowa; MD 2004 Chicago
BAILEY, SHAWN, Adjunct Assistant Professor, Oral & Maxillofacial Surgery, 2003 (2003); BS 1987 Eastern Illinois; DDS 1991 Iowa; MD 1995 New York
BAILEY, WILLIAM J., Clinical Adjunct Assistant Professor, Family Medicine, 2000 (2000); MD 1975 Creighton
BAILLIE, KYRRE BRANDON, Adjunct Assistant Professor, Periodontics, 2009 (2009); DDS 2001 CO U School of Dentistry
BAINBRIDGE, CRAIG WAYNE, Clinical Adjunct Associate Professor, Occupational & Environmental Health/Internal Medicine, 1997 (2002); MD 1974 Iowa
BAIR, THOMAS BRIAN, Adjunct Instructor, Biomedical Engineering, 2007 (2007); BS 1991 Western Illinois; MS 1993 Western Illinois; PHD 2001 Iowa
BAIRD, ROBERT D., Emeritus Professor, Religion, 1966 (1974); BA 1954 Houghton; BD 1957 Fuller Theological Seminary; MA 1958 SMU; PHD 1964 Iowa
BAKER, JAMES E., Adjunct Lecturer, Law-Faculty, 2005 (2005); BA 1982 Yale; JD 1990 Yale Law School

BAKER, KAREN ANN KENALEY, Associate Professor, Oral Pathology/Radiology/Medicine/Pharmacy, 1981 (1991); BS 1979 Pharmacy - Iowa; MS 1981 Iowa

BAKER, KENNETH R., Adjunct Assistant Professor, Pharmacy, 2004 (2004); BS 1967 Purdue School of Pharm; JD 1975 Indiana

BAKER, LARRY, Adjunct Assistant Professor, English, 1992 (1992); PHD 1986 Iowa

BAKER, LAURENCE J., Clinical Adjunct Assistant Professor, Family Medicine, 1982 (2002); BS 1974 Iowa; DO 1977 Coll of Osteopathic Med

BAKER, LYNDA A., Clinical Adjunct Assistant Professor, Internal Medicine, 1990 (1990); MD 1980 Iowa

BAKER, MAX T., Associate Professor, Anesthesia, 1989 (1994); BS 1975 Georgia; MS 1978 Georgia; PHD 1980 Georgia

BAKER, NANCY L., Adjunct Professor, Library & Information Science, 2002 (2002); BA 1972 Connecticut; AMLS 1973 Michigan; MA 1978 SUNY-Binghamton

BAKER, RICHARD G., Emeritus Professor, Geoscience/Biological Sciences, 1970 (1982); BA 1960 Wisconsin; MA 1964 Minnesota; PHD 1969 Colorado

BAKER, RICHARD LANCE, Associate Professor, Mathematics, 1989 (1995); BA 1972 Drake; MS 1979 Iowa; PHD 1987 California-Berkeley

BAKER, WILLIAM DEAN, Adjunct Instructor, Pharmacy, 1993 (1993); BS 1979 Iowa

BALAKRISHNAN, R, Professor, Accounting, 1986 (2000); BS 1977 Madras-India; MBA 1979 Indian Institute of Management; PHD 1986 Columbia

BALASUBRAMANIAN, RAVIKUMAR, Professor, Economics, 1995 (2002); PHD 1989 Iowa

BALCH, MICHAEL S., Emeritus Associate Professor, Economics, 1971 (1971); BS 1960 Pratt; MS 1962 New York; PHD 1965 New York

BALDUS, CLARA MARIE, Adjunct Assistant Professor, Psych & Quant Foundations, 2001 (2001); BA 1976 Mt. Mercy; MA 1988 Marycrest; PHD 2001 Iowa

BALDUS, DAVID C., Professor, Law-Faculty, 1969 (1972); BA 1957 Dartmouth; MA 1962 Pittsburgh; LLB 1964 Yale; LLM 1969 Yale

Baldwin, Austin, Adjunct Assistant Professor, Psychology, 2006 (2006); BS 2000 Brigham Young; PHD 2006 Minnesota

Ballard, Pamela S., Clinical Assistant Professor, Nursing, 1993 (2002); BA 1958 Iowa; BSN 1978 Iowa; MSN 1985 Iowa

Ballas, Zuhair K., Professor, Internal Medicine, 1980 (1993); BS 1970 Amer Univ of Beirut-Lebanon; MD 1974 Amer Univ of Beirut-Lebanon

Ballier, Robert D., Associate Professor, Sociology, 2000 (2006); BA 1993 Indiana-Purdue-Fort Wayne; MA 1995 Oregon

Balster, Erik Thomas, Adjunct Assistant Professor, Pediatric Dentistry, 2006 (2006); DDS 2004 Iowa; CER 2006 Univ of Iowa Ped Dentistry

Banas, Jeffrey A., Professor, Dows Institute-Research/Pediatric Dentistry, 2006 (2006); BS 1981 Notre Dame; PHD 1987 Michigan

Bandstra, Mike J., Adjunct Assistant Professor, Social Work/Law-Faculty, 1990 (2002); BS 1987 Iowa State; JD 1993 Iowa State

Banfi, Botond B., Associate Professor, Anatomy & Cell Biology, 2004 (2004); MD 2000 Semmelweis; PHD 2002 Semmelweis

Banker, Gilbert S., Emeritus Professor, Pharmacy, 1992 (1992); BS 1953 Union New York; MS 1955 Purdue; PHD 1957 Purdue

Banks, Kathleen, Assistant Professor, Psych & Quant Foundations, 2006 (2006); BS 1994 Wisconsin @ Whitewater; MS 1997 Wisconsin @ Milwaukee; PHD 2004 Wisconsin @ Milwaukee

Bar, Robert S., Emeritus Professor, Internal Medicine, 1977 (1986); BS 1964 Tufts; MD 1970 Ohio State; MS 1970 Ohio State

Barbosa, Maria Jose, Associate Professor, Spanish & Portuguese/International Programs-Grants, 1997 (2001); BA 1983 Federal de Minas Gerais-Brazil; MA 1984 North Carolina-Chapel Hill; PHD 1990 North Carolina-Chapel Hill

Barbuza, Isabel, Associate Professor, Art & Art History/International Programs-Grants, 1997 (2003); BA 1988 California-Santa Barbara; MFA 1990 California-Santa Barbara

Barfknecht, Charles F., Emeritus Professor, Pharmacy, 1967 (1974); BS 1960 Wisconsin; PHD 1964 Kansas

Barker, Anna, Adjunct Assistant Professor, English, 2003 (2005); BA 1991 Iowa; MA 1994 Iowa; PHD 2002 Iowa

Barker, Christopher Boyd, Assistant Professor, Military Science, 2005 (2005); BA 1996 Ohio

Barker, Jason H., Assistant Professor, Internal Medicine, 2005 (2007); MD 1999 Baylor

Barker Anderson, Dawn, Adjunct Lecturer, Law-Faculty, 2001 (2001); BA 1992 N - Iowa; JD 1995 Iowa

Barkey, Nanette, Assistant Professor, Anthropology/Community & Behavioral Health, 2004 (2004); BA 1987 Case Western Reserve Univ.; MS 1994 S Florida; PHD 2002 FL-Gainesville

Barloon, Thomas J., Associate Professor, Radiology, 1981 (1992); BS 1971 Loras; MD 1975 Wisconsin

Barnes, Ed C., Adjunct Instructor, Social Work, 2000 (2000); MSW 1999 Iowa

Barnes, Geoffrey J., Adjunct Lecturer, Management Sciences, 2000 (2000); MBA 2000 Iowa

Barnes, Patrick L., Adjunct Instructor, Pharmacy, 1997 (1997); BS 1982 Drake

Barnes, Thomas Minor, Adjunct Assistant Professor, Family Dentistry, 2002 (2004); BA 1992 Iowa; DDS 1999 Iowa; CER 2003 Iowa

Baron, Jeffrey, Emeritus Professor, Pharmacology, 1972 (1980); BS 1965 Connecticut; PHD 1969 Michigan
BARQUIST, STEPHANIE KAY RUDISH, Adjunct Assistant Professor, Operative Dentistry, 2000 (2000); BA 1995 Iowa; DDS 1998 Iowa

BARRAGAN, ELOY, Assistant Professor, Dance, 2005 (2005);

BARRASH, JOSEPH, Clinical Associate Professor, Neurology, 1998 (2006); PHD 1988 Iowa

BARTON, LORI A., Clinical Adjunct Assistant Professor, Pediatrics, 2004 (2004); BS 1987 South Florida; MD 1991 South Florida

BARRON, SHEILA, Adjunct Assistant Professor, Psych & Quant Foundations, 2001 (2001); BA 1989 Iowa; MA 1991 Iowa; PHD 1993 Iowa

BARTACHEK, AMY LYNN, Adjunct Lecturer, Management & Organizations, 2005 (2005); MA 2001 Iowa

BARTLETT, CATHERINE B., Adjunct Lecturer, Management & Organizations, 2003 (2004); BA 1990 Decorah, IA; MA 1995 Iowa

BARTLETT, TIMOTHY D., Adjunct Professor, Interdisciplinary Programs, 1993 (2005); BA 1973 Antioch

BARRON, SCOTT, Clinical Adjunct Assistant Professor, Pediatrics, 2004 (2004); BS 1987 South Florida; MD 1991 Arizona College of Med; MD 1995 Arizona College of Med

BARTLETT, HEATHER L., Assistant Professor, Pediatrics, 2004 (2004); BS 1991 Arizona College of Med; MD 1995 Arizona College of Med

BARTLETT, LARRY D., Professor, Educ Policy & Leadership Studies, 1985 (1994); BA 1964 Northern Iowa; JD 1974 Nebraska; PHD 1983 Iowa State

BARTLETT, WILLIAM G., Clinical Adjunct Assistant Professor, Pediatrics, 1977 (1977); DO 1971 Coll of Osteopathic Med

BARTON, LORI A., Adjunct Instructor, Pharmacy, 2005 (2005); BS 1995 Iowa

BASEL, DAVID, Clinical Adjunct Assistant Professor, Pediatrics/Internal Medicine, 2004 (2004); MD 1999 Kansas; MS 1999 Kansas State

BASS-RINGDAHL, SANDIE MICHELLE, Assistant Professor, Speech Pathology & Audiology, 2003 (2003); BA 1993 Florida; MA 1995 Louisiana State; PHD 2002 Iowa

BASU, HRIDEN NARAYAN, Clinical Adjunct Assistant Professor, Internal Medicine, 2000 (2000); MD 1964 Calcutta Medical

BATE, WALTER W., Clinical Adjunct Assistant Professor, Internal Medicine, 1984 (1984); MD 1977 Illinois

BATES, JAMES N., Associate Professor, Anesthesia, 1984 (1990); BA 1972 Calif-Santa Barbara; MA 1975 Calif-Santa Barbara; PHD 1977 Calif-Santa Barbara; MD 1981 Miami

BATHKE, JOSEPHINE ELLEN, Adjunct Assistant Professor, Management & Organizations, 2005 (2005); BA 1997 William Penn; JD 2003 Iowa; MBA 2003 University of Iowa

BAUER, PATRICK B., Professor, Law-Faculty, 1979 (1985); BA 1972 Wesleyan; JD 1975 Chicago

BAUM, KRISTIN ALANA, Adjunct Instructor, Library & Information Science, 2007 (2007); BA 1991 Lawrence; MA 1995 Iowa

BAUMBACK, GARY LYNN, Professor, Pathology, 1980 (1996); BA 1971 Warburg; MD 1976 Iowa

BAUMGARTNER, DAVID, Adjunct Lecturer, Management & Organizations, 2004 (2004); BA 1984 University of Northern Iowa; MA 1987 University of Northern Iowa; PHD 1990 Iowa State University

BAUMLER, SHARON KAY, Clinical Adjunct Instructor, Nursing, 2000 (2000); MSN 1997 Iowa

BAUSTIAN, GORDON HUGH, Clinical Adjunct Associate Professor, Family Medicine, 1999 (1999); MD 1979 Iowa

BAXTER, LESLIE, Professor, Communication Studies/Community & Behavioral Health, 1994 (1994); BS 1971 Lewis and Clark; MS 1972 Oregon; PHD 1975 Oregon

BAYLESS, JOHN D., Clinical Associate Professor, Psychiatry, 1999 (2002); BS 1974 Wisconsin-Oshkosh; MS 1977 Wisconsin-Oshkosh; PHD 1986 Iowa

BAYNE, DAVID C., Emeritus Professor, Law-Faculty, 1967 (1967); AB 1939 Detroit; LLB 1947 Georgetown; MA 1947 Loyola; SJD 1949 Yale; PHD 1953 Loyola; PHD 1980 Creighton

BAYNTHON, DOUGLAS CAMERON, Associate Professor, History/Speech Pathology & Audiology, 1993 (2002); BS 1986 Western Oregon State; MA 1988 University of Iowa; PHD 1993 University of Iowa

BAYOUTH, JOHN E., Associate Professor, Radiation Oncology, 2004 (2004); BS 1988 Kansas State; MS 1991 Kansas State; PHD 1993 Texas

BEAR, PHILLIP A., Clinical Adjunct Instructor, Internal Medicine, 1990 (1990); DO 1981 Osteopathic Med & Hth

BEASLEY, BYRON T., Clinical Adjunct Assistant Professor, Internal Medicine, 1977 (1984); MD 1974 Iowa

BEASLEY, OSCAR C., Emeritus Associate Professor, Internal Medicine, 1974 (1974); BS 1948 Kentucky; MD 1952 Vanderbuilt

BEATTIE, ELIZABETH RUBY, Adjunct Associate Professor, Nursing, 2006 (2006); BA 1985 Macquarie, Australia; MA 1989 New South Wales, Austr; PHD 1997 James Cook, Australia

BEATTIE, MATTHEW C., Adjunct Assistant Professor, Family Dentistry, 2002 (2002); BA 1996 Augusta; DDS 2000 Iowa

BEAVER, HILARY A., Clinical Associate Professor, Ophthalmology & Visual Science, 2000 (2003); BS 1987 William and Mary; MD 1991 Virginia

BEABOUT, KEVIN L., Adjunct Instructor, Pharmacy, 2003 (2003); BS 1984 Iowa

BECHARA, ANTOINE, Adjunct Associate Professor, Neurology, 1995 (2004); BSC 1983 Toronto; PHD 1991 Toronto

BECK, MARGARET E., Assistant Professor, Anthropology/Division of Interdisciplinary Program, 2007 (2007); BA 1992 Kansas; MA 1995 Kansas; PHD 2003 Arizona

BECK, MARY GWEN, Clinical Associate Professor, Internal Medicine, 1997 (2004); MD 1994 Iowa

CAMPANELLI, PATRICIA JO, Adjunct Instructor, Preventive & Community Dentistry, 2000 (2000); BS 1977 Iowa

CAMPBELL, ANN MELISSA, Associate Professor, Management Sciences, 2000 (2006); BA 1993 Rice; PhD 2000 Georgia Tech

CAMPBELL, CAM F., Clinical Adjunct Instructor, Internal Medicine, 1992 (1992); MD 1982 Southern California

CAMPBELL, DAVID L., Adjunct Professor, Geoscience, 2002 (2004); BA 1963 Iowa; MA 1966 California-Berkeley; PhD 1969 California-Berkeley

CAMPBELL, KEVIN P., Professor, Physiology/Neurology/Internal Medicine, 1981 (1988); BS 1973 Manhattan; MS 1976 Rochester; PhD 1979 Rochester

CAMPBELL, MARY E., Assistant Professor, Sociology, 2004 (2004); BA 1997 George Washington; MA 1999 Wisconsin; PhD 2004 Wisconsin

CAMPBELL, SARA L., Adjunct Associate Professor, Nursing, 2006 (2006); BSN 1986 Mennonite College of Nursing; MS 1993 Illinois State

CAMPO, MICHELLE, Assistant Professor, Community & Behavioral Health/Communication Studies, 2002 (2002); BS 1990 Corneli; MA 1994 Ohio State; PhD 1999 Michigan State

CAMPOS, JAVIER H., Clinical Professor, Anesthesia, 1987 (2001); BS 1971 Federal Prep School; MD 1975 Autonomous

CANADY, JOHN WESLEY, Professor, Surgery/Orthopaedics and Rehabilitation/Otolaryngology-Head & Neck Surgery/International Programs-Grants, 1990 (2002); BA 1980 Grinnell; MD 1983 Iowa; MS 1988 Iowa

CANNON, DONALD M., Assistant Professor, Chemistry, 2004 (2004); BS 1993 Pittsburgh; MA 1995 South Dakota; PhD 2000 Penn State

CANNON, JOSEPH G., Emeritus Professor, Pharmacy, 1962 (1965); BS 1951 Illinois; MS 1953 Illinois; PhD 1956 Illinois

CANTER, ARTHUR, Emeritus Professor, Psychiatry, 1960 (1965); BA 1946 Iowa; MA 1948 Iowa; PhD 1950 Iowa

CANTOR, GORDON N., Emeritus Professor, Psych & Quant Foundations, 1960 (1963); MA 1951 Syracuse; PhD 1954 Iowa

CANTOR, JOAN H., Emeritus Professor, Psychology, 1960 (1979); BA 1951 Syracuse; MA 1953 Iowa; PhD 1954 Iowa

CANTRELL, MATTHEW A., Adjunct Instructor, Pharmacy, 2005 (2005); BS 2000 Mount Mercy; PHARMD 2005 Iowa

CAPLAN, RICHARD M., Emeritus Professor, Dermatology, 1961 (1969); BS 1949 Iowa State; MA 1951 Iowa; MD 1955 Iowa

CAPLAN, ROBERT H., Clinical Adjunct Associate Professor, Internal Medicine, 1982 (1990); MD 1961 Chicago

CARANO, MARY ELLEN, Clinical Adjunct Instructor, Nursing, 2006 (2006); BA 1986 Skidmore; MSW 1988 Univ of Illinois, Champaign-Urbana

CAREW, DAVID P., Emeritus Professor, Pharmacy, 1957 (1965); BS 1952 Massachusetts, MS 1954 Massachusetts; PhD 1958 Connecticut

CARITHERS, JEFFREY SCOTT, Clinical Adjunct Assistant Professor, Otolaryngology-Head & Neck Surgery, 1987 (1987); MD 1981 Iowa

CARLILE, MARK ELTON, Adjunct Assistant Professor, History, 1993 (1996); BA 1982 Marquette; MA 1984 Marquette; PhD 1995 Iowa

CARLISLE, THOMAS L., Clinical Associate Professor, Internal Medicine, 1992 (2002); BS 1972 Maryland-Baltimore; PhD 1978 Wisconsin-Madison; MD 1986 Missouri-Columbia

CARLSON, JAMES DEAN, Adjunct Associate Professor, Pharmacy, 2006 (2006); BSpH 1971 Iowa; PHARM 1976 Michigan

CARLSON, JONATHAN C., Professor, Law-Faculty/International Programs-Grants, 1983 (1987); BA 1976 McGill; JD 1979 Chicago

CARLSON, KENT DAVID, Adjunct Associate Professor, Mechanical Engineering, 1998 (2006); BSE 1991 University of Iowa; MS 1993 University of Iowa; PhD 1997 Florida State

CARLSON, WAYNE R., Emeritus Professor, Biological Sciences, 1968 (1993); BA 1962 Rockford; MA 1966 Indiana; PhD 1968 Indiana

CARMEN, LEE T., Adjunct Assistant Professor, Health Management & Policy; 2002 (2002); BA 1978 Oklahoma; BS 1979 Iowa

CARMICHAEL, GREGORY R., Professor, Chemical & Biochemical Engineering/Civil-Environmental Engineering, 1978 (1985); BS 1974 Iowa State; MS 1975 Kentucky; PhD 1979 Kentucky

CARMICHAEL, ROBERT S., Emeritus Professor, Geoscience, 1977 (1983); BA 1963 Toronto; MS 1964 Pittsburgh; PhD 1967 Pittsburgh

CAROPRESE, PHILIP R., Clinical Adjunct Professor, Surgery, 1987 (2004); MD 1972 Upstate Medical School

CARPENTER, MARTIN, Adjunct Assistant Professor, Psychiatry, 2007 (2007); MD 2002 Missouri

CARPENTER, RAYMON T., Emeritus Professor, Physics & Astronomy, 1962 (1983); BS 1954 Kansas; MS 1956 Kansas; PhD 1962 Northwestern

CARPENTER, SCOTT J., Adjunct Associate Professor, Geoscience, 2002 (2002); BS 1985 St. Lawrence; MS 1988 Iowa; PhD 1997 Florida State

CARUSO, ENRIQUE R., Professor, Law-Faculty, 1990 (1994); BA 1980 Indiana; JD 1986 Georgetown

CARRICA, PABLO, Adjunct Associate Professor, Mechanical Engineering, 2002 (2002); PHD 1993 Nacional De Cuyo
CHRISCHILLES, ELIZABETH A., Professor, Epidemiology/Pharmacy, 1982 (2000); BS 1979 Iowa; MS 1981 Iowa; PHD 1986 Iowa

CHRIST, HEATHER ANN, Adjunct Assistant Professor, Pharmacy, 2006 (2006); AA 1994 Kirkwood Community; PHARM 2002 Iowa

CHRISTENSEN, ALAN J., Professor, Psychology/Internal Medicine, 1993 (2002); BS 1987 Utah; MS 1991 Utah; PHD 1993 Utah

CHRISTENSEN, CYNTHIA K., Clinical Associate Professor, Pediatric Dentistry, 2002 (2002); BS 1976 Iowa; DDS 1980 Iowa; MS 1983 Iowa

CHRISTENSEN, GARY E., Associate Professor, Electrical-Computer Engineering/Radiation Oncology, 1997 (2003); BS 1988 Washington-St. Louis; MS 1989 Washington-St. Louis; PHD 1994 Washington-St. Louis

CHRISTENSEN, JAMES, Emeritus Professor, Internal Medicine, 1963 (1972); BA 1953 Nebraska-Lincoln; MD 1957 Nebraska-Omaha; MS 1957 Nebraska-Omaha

CHRISTENSEN, LORI, Clinical Assistant Professor, Pediatrics, 2001 (2001); BA 1993 Iowa; MD 1998 Iowa

CHRISTENSEN, STEVE, Adjunct Instructor, Preventive & Community Dentistry, 2002 (2002); DDS 1986 Iowa

CHRISTENSEN-SZALANSKI, CARLYN M., Clinical Assistant Professor, Emergency Medicine, 2003 (2005); MD 1983 Washington

CHRISTIAN, KEVIN, Adjunct Instructor, Pharmacy, 2004 (2004); BPH 1995 Iowa

CHRISTISON, THOMAS A., Lecturer, Art & Art History, 2006 (2006); BFA 1981 Wisconsin @ Eau Claire; MFA 1984 Arizona State

CILEK, TONI LEE DATERS, Clinical Associate Professor, Speech Pathology & Audiology, 1992 (1992); BA 1975 Iowa; MA 1976 Iowa

CINOMAN, ANDREW H., Adjunct Lecturer, College Transition, 2002 (2002); BA 1985 Maryland; MA 1989 Ohio State; PHD 1993 Ohio State

CLAMON, GERALD H., Professor, Internal Medicine, 1976 (1991); BS 1967 Dartmouth; MD 1971 Washington-Missouri

CLANCY, JAMES M., Associate Professor, Prosthodontics, 1986 (1991); BS 1975 Iowa; DDS 1978 Iowa; MS 1980 Iowa

CLANCY, JOANNA LYNN, Adjunct Assistant Professor, Endodontics, 2005 (2005); DMD 1987 Alabama Birmingham; MDS 1992 Iowa

CLANCY, RENE C., Clinical Adjunct Instructor, Nursing, 2006 (2006); BS 1978 Iowa; MA 1997 Iowa

CLANCY, THOMAS R., Adjunct Assistant Professor, Nursing, 1999 (2007); BS 1978 Iowa; MBA 1993 Iowa; PHD 2006 Iowa

CLARK, CHARLES R., Professor, Orthopaedics and Rehabilitation/Biomedical Engineering, 1980 (1988); BS 1972 Notre Dame; MD 1976 Michigan

CLARK, CRAIG B., Clinical Adjunct Assistant Professor, Internal Medicine, 2001 (2004); BS 1991 Iowa State University; DO 1995 Des Moines Univ Col of Osteopa

CLARK, CRAIG LEO, Adjunct Instructor, Pharmacy, 1997 (1997); BPH 1998 Iowa

CLARK, DEWEY KEALAKAI, Clinical Assistant Professor, Pediatrics, 2007 (2007); MD 2000 Iowa

CLARK, ELIZABETH C., Assistant Professor, Family Medicine/Epidemiology, 2003 (2003); BA 1990 Grinnell; MD 1997 North Carolina; MPH 2002 Oregon Hlth&Science Univ

CLARK, ELIZABETH LEE, Adjunct Assistant Professor, English, 2001 (2001); BA 1986 Carroll; MA 1993 Iowa; PHD 2001 Iowa

CLARK, JAMES P., Adjunct Instructor, Social Work, 1998 (1998); MSW 1978 Nebraska

CLARK, LEE ANNA, Professor, Psychology, 1993; BA 1972 Cornell; MA 1977 Cornell; PHD 1982 Minnesota

CLARK, MARY KATHLEEN, Professor, Nursing/IA Consortium Substance Abuse, 1982 (2007); BSN 1973 Michigan; MN 1979 Washington; PHD 1990 Iowa

CLARK, RUTH ANN, Adjunct Instructor, Pharmacy, 1997 (1997); BPH 1992 Iowa

CLARK, SHAUNDA LOUISE, Adjunct Instructor, Preventive & Community Dentistry, 1998 (1998); BS 1997 Iowa

CLARK, STEVEN, Adjunct Instructor, Pharmacy, 2002 (2002); BS 1986 Drake

CLARK, WILLIAM RADUE, Professor, Nursing/IA Consortium Substance Abuse, 1982 (2007); BSN 1973 Michigan; MN 1979 Washington; PHD 1990 Iowa

CLARK, WILLIAM DAVID, Clinical Adjunct Assistant Professor, Family Medicine, 1999 (1999); MD 1977 Iowa

CLARKE, CHERYL, Adjunct Instructor, Pharmacy, 2002 (2002); BS 1986 Drake

CLARKE, MARY FRANCES, Adjunct Instructor, Social Work, 1997 (1997); MS 1996 Iowa

CLARKE, WILLIAM RADUE, Professor, Biostatistics, 1964 (1986); BA 1964 Oregon; MS 1967 Iowa; PHD 1975 Iowa

CLAUSS, JULIE ANN, Adjunct Lecturer, College Transition, 2002 (2002); BA 1984 Iowa; MA 1986 Iowa

CLAYTON, CHRISTOPHER EDMUND, Adjunct Assistant Professor, Pharmacy, 2005 (2005); AS 1995 North Iowa Area Community; PHARM 2000 Iowa

CLEGG, STEVEN, Professor, Microbiology, 1980 (1992); BS 1975 Dundee - Scotland; PHD 1978 Dundee-Scotland

CLEMENTS, SCOTT BRYAN, Adjunct Assistant Professor, Family Dentistry, 1994 (2000); BS 1989 Luther ; DDS 1993 Iowa; CER 1994 Iowa

CLEMSEN, LANCE V., Adjunct Instructor, Social Work, 1997 (1997); MS 1986 Columbia

CLEMSEN, LANCE V., Adjunct Instructor, Social Work, 1997 (1997); MS 1986 Columbia

CLEMSEN, LANCE V., Adjunct Instructor, Social Work, 1997 (1997); MS 1986 Columbia

CLEMSEN, LANCE V., Adjunct Instructor, Social Work, 1997 (1997); MS 1986 Columbia
CLIFTON, JAMES A., Emeritus Professor, Internal Medicine, 1953 (1963); BA 1944 Vanderbilt; MD 1947 Vanderbilt

CLINE, ROBERT N., Adjunct Lecturer, Marketing, 1996 (1996); BA 1968 Iowa

CLINTON, PATRICIA KAY, Clinical Professor, Nursing, 1984 (2002); BSN 1976 Iowa; MA 1984 Iowa; PHD 1995 Iowa

CLOW, TONI J., Associate Professor, Nursing, 1976 (1981); BS 1966 Iowa; MA 1975 Iowa

CLUBB, MERREL D., Associate Professor, Theatre Arts, 1999 (1999); BA 1976 Amherst College; MFA 1982 Yale; DFA 1991 Yale

DAGLE, JOHN MICHAEL, Associate Professor, Pediatrics, 1998 (2004); BS 1984 Creighton; MD 1991 Iowa; PhD 1991 Iowa

DAHAL, SANJIV KUMAR, Clinical Adjunct Assistant Professor, Internal Medicine, 2003 (2003); MD 1988 Minsk State, Belarus

DAHL, EVA C., Adjunct Professor, Oral Path,Radiology&Medicine, 1980 (1999); DDS 1976 Iowa

DAHMOUS, LAILA, Clinical Associate Professor, Pathology, 2001 (2007); MD 1999 Maryland-Baltimore

DAILEY, JON, Adjunct Instructor, Preventive & Community Dentistry, 2005 (2005); DDS 1978 Ohio State

DAILEY, MICHAEL E., Associate Professor, Biological Sciences, 1996 (2002); BS 1985 Geneva; PhD 1990 Washington

DAILEY, MORRIS O., Associate Professor, Pathology/Microbiology, 1984 (1989); BS 1971 Calif-Davis; PhD 1976 Chicago; MD 1977 Chicago

DALEY, NEAL R., Adjunct Instructor, Pharmacy, 2004 (2004); BSN 1980 Iowa

DALY, JEANETTE MARIE, Clinical Adjunct Assistant Professor, Nursing/Family Medicine, 1993 (1993); BS 1973 Northern Illinois; MS 1978 Northern Illinois; PhD 1992 Iowa

DAMASIO, ANTONIO R., Adjunct Professor, Neurology, 1975 (1980); MD 1968 Lisbon; PhD 1974 Lisbon

DAMASIO, HANNA M., Adjunct Professor, Neurology, 1975 (1985); MD 1968 Lisbon-Portugal

DAMIANO, PETER COSIMO, Professor, Preventive & Community Dentistry, 1988 (2001); BS 1982 Iowa; DDS 1986 Iowa; MPH 1990 California-Los Angeles

DAMICO, ALFONSO J., Professor, Political Science, 1999 (1999); BA 1964 George Washington; MA 1967 Ohio State; PhD 1971 Ohio State

DAMICO, SANDRA BOWMAN, Professor, Educ Policy & Leadership Studies, 1999 (1999); BA 1962 Ohio State; MA 1969 Ohio State; PhD 1973 Florida

DANIEL, BRIAN PHILLIP, Clinical Assistant Professor, Internal Medicine, 2004 (2005); BA 1987 Carson-Newman-TN; MD 1991 Vanderbilt

DANIEL, JOHN F., Adjunct Assistant Professor, Pharmacy, 2000 (2000); PHARM 1999 Iowa

DANIEL, JOHN JR, Adjunct Instructor, Pharmacy, 2005 (2005); BS Iowa

DANIELS, TIMOTHY K., Clinical Adjunct Assistant Professor, Family Medicine, 1979 (2002); MD 1973 Iowa

DANIELSON, STANTON L., Clinical Adjunct Assistant Professor, Family Medicine, 1982 (1984); MD 1976 Iowa

DANLEY, DANA L., Clinical Adjunct Assistant Professor, Family Medicine, 2004 (2004); BA 1993 Grinnell College, Grinnell, IA; MD 1998 Univ. of IA College of Med

DARCY, ISABEL K., Assistant Professor, Mathematics, 2003 (2003); BS 1987 California; MS 1989 California; PhD 1997 Florida State

DARLEY, CHARLES FREDERIC, Adjunct Assistant Professor, Health, & Sport Studies, 1984 (1998); BA 1968 California-Berkeley; PhD 1974 Stanford
DONNER-TIERNAN, CHRISTINE S., Adjunct Assistant Professor, Pharmacy, 2003 (2003); PHARMD 2000 Creighton; MBA 2001 Creighton

DONOHOU, PATRICIA A., Professor, Pediatrics, 1990 (2001); BS 1976 Marian; MD 1980 Ohio State

DONOVAN, MAUREEN D., Associate Professor, Pharmacy, 1989 (1996); BPH 1983 Minnesota; PHD 1989 Michigan

DONTA, THEODORE, Clinical Assistant Professor, Radiology, 2006 (2006); PHD 1995 University of CT; MD 2000 Boston

DOOLEY, FRANK JOSEPH, Adjunct Professor, Management Sciences, 2005 (2005); BA 1976 St. John’s; JD 1981 North Dakota; PhD 1986 Washington State University

DOORENBOS, DARYL E., Clinical Adjunct Assistant Professor, Family Medicine, 1979 (2002); MD 1970 Iowa

DOORENBOS, ROY ALLEN, Clinical Adjunct Assistant Professor, Family Medicine, 1995 (2002); MD 1983 Iowa

DOORN, JONATHAN A., Assistant Professor, Pharmacy, 2004 (2004); BS 1996 Calvin; MS 1998 Michigan; PHD 2001 Michigan

DOORNBOOS, J FRED, Emeritus Associate Professor, Radiology, 1986 (1993); BED 1950 Kansas; MD 1957 Kansas

DORALE, JEFFREY, Assistant Professor, Geoscience, 2003 (2003); BS 1988 Iowa; MS 1992 Iowa; PHD 2001 Minnesota

DORFMAN, LORRAINE T., Professor, Social Work/Division of Interdisciplinary Program, 1969 (1988); BS 1957 Temple; MA 1959 Michigan; PHD 1978 University of Iowa

DORMAN, JANE M., Adjunct Lecturer, College Transition, 2002 (2002); BS 1982 Wisconsin-LaCrosse; MSED 1987 Northern Illinois

DORNER, DOUGLAS B., Clinical Adjunct Professor, Surgery, 1973 (2001); MD 1967 Harvard

DORNFIELD, KENNETH J., Assistant Professor, Radiation Oncology/Otolaryngology-Head & Neck Surgery, 2002 (2002); BA 1984 Chicago; PhD 1991 Minnesota; MD 1993 Minnesota

DORR, GLORIA GRAHAM, Clinical Adjunct Instructor; Nursing, 2000 (2000); BS 1974 University of Iowa; MA 1979 Iowa

DOUCETTE, WILLIAM R., Professor, Pharmacy, 1996 (2007); BS 1983 Wisconsin; MS 1988 Wisconsin; PhD 1993 Wisconsin

DOUGLAS, ANDREW CALVIN, Adjunct Assistant Professor, English, 2007 (2007); MFA 2005 Iowa

DOUGLASS, R THOMAS, Emeritus Associate Professor, Spanish & Portuguese, 1970 (1970);

DOVE, EDWIN L., Associate Professor, Biomedical Engineering, 1985 (1992); BS 1973 Virginia Polytechnic Institute; MS 1974 Virginia Polytechnic Institute; PHD 1984 Case Western Reserve

DOWNEY, DEBORA ANN, Adjunct Instructor, Speech Pathology & Audiology, 1993 (1996); BA 1984 Northern Colorado; MA 1986 Northern Colorado

DOWNEY, WALTER DAVID, Adjunct Professor, Marketing, 2005 (2005); BS 1961 Purdue; MS 1963 Purdue; PHD 1967 Purdue

DOWNING, DONALD T., Emeritus Professor, Dermatology, 1978 (1978); BSC 1951 Western Australia; PHD 1955 Western Australia

DOYLE, BONNIE A., Clinical Adjunct Assistant Professor, Nursing, 2007 (2007); BSN 1991 Mount Mercy

DOYLE, JENNIFER R., Adjunct Assistant Professor, Nursing, 2006 (2006); BSN 1993 Iowa; MSN 1999 Mount Marty, SD

DOYLE, JOHN R., Emeritus Professor, Chemistry, 1955 (1965); BS 1949 MIT; PHD 1955 Tulane; MS MIT

DOYLE, MATTHEW RICHARD, Adjunct Instructor, Integrative Physiology, 2001 (2001); BS 1991 Iowa; MS 1996 Western Illinois

DRAKE, DAVID R., Professor, Endodontics, 1988 (2003); BS 1977 Purdue; MS 1982 Purdue; PHD 1986 Tennessee

DRAKE, LON D., Emeritus Professor, Geosciences, 1968 (1979); BA 1961 Buffalo; MA 1965 California-Los Angeles; PHD 1968 Ohio State

DREEMAN, BENJAMIN J., Adjunct Assistant Professor, Pharmacy, 2004 (2004); PHARMD 2003 Iowa

DREHER, MELANIE, Emeritus Professor, Nursing/Anthropology/Community & Behavioral Health, 1997 (1997); BSN 1967 Long Island; MA 1974 Teachers College; MPHIL 1976 Columbia; PHD 1977 Columbia

DREIER, JAMES, Lecturer, Music, 2000 (2000); BA 1985 Berklee; MA 2000 Iowa

DREVYANKO, TIMOTHY, Clinical Adjunct Assistant Professor, Pathology, 2004 (2004); BS 1975 Marycrest College; MD 1980 Iowa; MS 2002 Wisconsin

DREXLER, FREDERICK R., Adjunct Instructor, Prosthodontics, 1980 (1982); BA 1972 Earlham; DDS 1975 Iowa

DRILLING, WILLIAM MICHAEL, Adjunct Instructor, Pharmacy, 2005 (2005); BSNP Iowa

DROCKTON, DAVID A., Adjunct Instructor, Preventive & Community Dentistry, 2000 (2000); DDS 1984 Case Western

DRZYCIMSKI, JOHN L., Adjunct Instructor, Pharmacy, 2003 (2003); BS 1974 Teachers College; MPHIL 1976 Columbia; PHD 1977 Columbia

DUBA, VERNON K., Clinical Assistant Professor, Spanish & Portuguese, International Programs-Grants, 1982 (1989); BA 1971 Vanderbilt; MA 1974 Texas; PHD 1980 Minnesota

DUBA, VERNON K., Clinical Assistant Professor, Pharmacy, 1993 (1999); BA 1983 Doane College; MA 1987 University of MO, Columbia

DUBS, TRACY LYNN, Adjunct Lecturer, College Transition, 2005 (2005); BA 2002 Ball State; MS 2004 Minnesota State

DUCERLINGER, JAMES P., Professor, Philosophy, 1971 (1989); BA 1961 Wisconsin; MA 1963 Washington; PhD 1966 Wisconsin
1094

Faculty

DUFF, KEVIN M., Assistant Professor, Psychiatry, 2003
(2003); BA 1990 Massachusetts; MA 1993 N.
Colorado; PHD 2001 New York
DUFFEL, MICHAEL W., Professor, Pharmacy, 1981
(1993); BS 1975 Texas-Austin; PHD 1979
Texas-Austin

Admission Rules
Common to the Three
State Universities

681—1.1(262) Admission of undergraduate students directly from high school

Students desiring admission to the University of Iowa, Iowa State University, or the University of Northern Iowa must meet the requirements in this rule and also any special requirements for the curriculum, school, or college of their choice.

Applicants must submit a formal application for admission, together with the appropriate application fee as approved by the state board of regents pursuant to Iowa Code subsection 262.9(18) and detailed in rule 681-1.7(262), and have their secondary school provide a transcript of their academic record, including credits and grades, rank in class, and certification of graduation. Applicants must also submit scores from the American College Test (ACT) or the Scholastic Aptitude Test (SAT), or the equivalent, as determined by each university. The Test of English as a Foreign Language (TOEFL) is required of foreign students whose first language is not English. Applicants may be required to submit additional information or data to support their applications.

1.1(1) Graduates of approved Iowa high schools who have the subject matter background as recommended by each university and who rank in the upper one-half of their graduating class will be admitted. Applicants who are not in the upper one-half of their graduating class may, after a review of their academic and test records, and at the discretion of the admissions officers:

   a. Be admitted unconditionally,
   b. Be admitted conditionally,
   c. Be required to enroll for a tryout period during a preceding summer session, or
   d. Be denied admission.

1.1(2) Graduates of accredited high schools in other states may be held to higher academic standards, but must meet at least the same requirements as graduates of Iowa high schools. The options for conditional admission or summer tryout enrollment may not necessarily be offered to these students.

1.1(3) Applicants who are graduates of nonapproved high schools will be considered for admission in a manner similar to applicants from approved high schools, but additional emphasis will be given to scores obtained on standardized examinations.

1.1(4) Applicants who are not high school graduates, but whose classes have graduated, may be considered for admission. They will be required to submit all academic data to the extent that it exists and achieve scores on standardized examinations which will demonstrate that they are adequately prepared for academic study.

Students with superior academic records may be admitted, on an individual basis, for part-time university study while enrolled in high school or during the summers prior to high school graduation.

In rare situations, exceptional students may be admitted as full-time students to a regent university before completing high school. Early admission to a regent university is provided to serve persons whose academic achievement and personal and intellectual maturity clearly suggest readiness for collegiate level study. Each university will specify requirements and conditions for early admission.

This rule is intended to implement Iowa Code section 262.9(3).
681—1.2(262) Admission of undergraduate students by transfer from other colleges

Students desiring admission to the University of Iowa, Iowa State University, or the University of Northern Iowa must meet the requirements in this rule and also any special requirements for the curriculum, school, or college of their choice.

Applicants must submit a formal application for admission, together with the appropriate application fee as approved by the state board of regents pursuant to Iowa Code subsection 262.9(18) and detailed in rule 681-1.7(262), and request that each college they have attended send an official transcript of record to the admissions office. High school academic records and standardized test results may also be required. The Test of English as a Foreign Language (TOEFL) is required of foreign students whose first language is not English.

1.2(1) Transfer applicants with a minimum of 24 semester hours of graded credit from regionally accredited colleges or universities, who have achieved for all college work previously attempted the grade point required by each university for specific programs, will be admitted. Higher academic standards may be required of students who are not residents of Iowa.

Applicants who have not maintained the grade point required by each university for specific programs or who are under academic suspension from the last college attended may, after a review of their academic and test records, and at the discretion of the admissions officers:

a. Be admitted unconditionally,

b. Be admitted conditionally,

c. Be required to enroll for a tryout period during a preceding summer session, or

d. Be denied admission.

1.2(2) Admission of students with fewer than 24 semester hours of college credit will be based on high school academic and standardized test records in addition to review of the college record.

1.2(3) Transfer applicants under disciplinary suspension will not be considered for admission until information concerning the reason for the suspension has been received from the college assigning the suspension. Applicants granted admission under these circumstances will be admitted on probation.

1.2(4) Transfer applicants from colleges and universities not regionally accredited will be considered for admission on an individual basis taking into account all available academic information.

This rule is intended to implement Iowa Code section 262.9(3).

681—1.3(262) Transfer credit practices

The regent universities endorse the Joint Statement on Transfer and Award of Academic Credit approved in 1978 by the American Council on Education (ACE), the American Association of Collegiate Registrars and Admissions Officers (AACRAO), and the Council on Postsecondary Accreditation (COPA). The current issue of Transfer Credit Practices of Selected Educational Institutions, published by the American Association of Collegiate Registrars and Admissions Officers (AACRAO), and publications of the Council on Postsecondary Accreditation (COPA) are examples of references used by the universities in determining transfer credit. The acceptance and use of transfer credit is subject to limitations in accordance with the educational policies operative at each university.

1.3(1) Students from regionally accredited colleges and universities

Credit earned at regionally accredited colleges and universities is acceptable for transfer except that credit in courses determined by the receiving university to be of a remedial, vocational, or technical nature, or credit in courses or programs in which the institution granting the credit is not directly involved, may not be accepted, or may be accepted to a limited extent.

Of the course work earned at a two-year college, students may apply up to one-half but no more than 65 hours of the credits required for a bachelor’s degree toward that degree at a regent university. This policy became effective September 29, 1993.

1.3(2) Students from colleges and universities which have candidate status

Credit earned at colleges and universities which have become candidates for accreditation by a regional association is acceptable for transfer in a manner similar to that from regionally accredited colleges and universities if the credit is applicable to the bachelor’s degree at the receiving university.

Credit earned at the junior and senior classification from an accredited two-year college
which has received approval by a regional accrediting association for change to a four-year college may be accepted by a regent university.

1.3(3) Students from colleges and universities not regionally accredited

When students are admitted from colleges and universities not regionally accredited, they may validate portions or all of their transfer credit by satisfactory academic study in residence, or by examination. Each university will specify the amount of the transfer credit and the terms of the validation process at the time of admission.

In determining the acceptability of transfer credit from private colleges in Iowa which do not have regional accreditation, the regent committee on educational relations, upon request from the institutions, evaluates the nature and standards of the academic program, faculty, student records, library, and laboratories.

In determining the acceptability of transfer credit from colleges in states other than Iowa which are not regionally accredited, acceptance practices indicated in the current issue of Transfer Credit Practices of Selected Educational Institutions will be used as a guide. For institutions not listed in the publication, guidance is requested from the designated reporting institution of the appropriate state.

1.3(4) Students from foreign colleges and universities

Transfer credit from foreign educational institutions may be granted after a determination of the type of institution involved and after an evaluation of the content, level, and comparability of the study to courses and programs at the receiving university. Credit may be granted in specific courses, but is frequently assigned to general areas of study. Extensive use is made of professional journals and references which describe the education systems and programs of individual countries.

This rule is intended to implement Iowa Code section 262.9(3).

Residence

681—1.4(262) Classification of residents and nonresidents for admission, tuition, and fee purposes

1.4(1) General

a. A person enrolling at one of the three state universities shall be classified as a resident or nonresident for admission, tuition, and fee purposes by the registrar or someone designated by the registrar. The decision shall be based upon information furnished by the student and other relevant information.

b. In determining resident or nonresident classification, the issue is essentially one of why the person is in the state of Iowa. If the person is in the state primarily for educational purposes, that person will be considered a nonresident. For example, it may be possible that an individual could qualify as a resident of Iowa for such purposes as voting, or holding an Iowa driver’s license, and not meet the residency requirements as established by the Board of Regents for admission, tuition, and fee purposes.

c. The registrar, or designated person, is authorized to require written documents, affidavits, verifications, or other evidence deemed necessary to determine why a student is in Iowa. The burden of establishing that a student is in Iowa for other than educational purposes is upon the student.

A student may be required to file any or all of the following:

(1) A statement from the student describing employment and expected sources of support;
(2) A statement from the student’s employer;
(3) A statement from the student’s parents verifying nonsupport and the fact that the student was not listed as a dependent on tax returns for the past year and will not be so listed in future years;
(4) Supporting statements from persons who might be familiar with the family situation;
(5) Iowa state income tax return.

d. Change of classification from nonresident to resident will not be made retroactive beyond the term in which application for resident classification is made.

e. A student who gives incorrect or misleading information to evade payment of nonresident fees shall be subject to serious disciplinary action and must also pay the nonresident fees for each term previously attended.

f. Review Committee. These regulations shall be administered by the registrar or someone designated by the registrar. The decision of the registrar or designated person may be appealed to a university review committee. The finding of the review committee may be appealed to the state board of regents.
1.4(2) Guidelines

The following guidelines are used in determining the resident classification of a student for admission, tuition, and fee purposes:

a. A financially dependent student whose parents move from Iowa after the student is enrolled remains a resident provided the student maintains continuous enrollment. A financially dependent student whose parents move from Iowa during the senior year of high school will be considered a resident provided the student has not established domicile in another state.

b. In deciding why a person is in the state of Iowa, the person’s domicile will be considered. A person who comes to Iowa from another state and enrolls in any institution of postsecondary education for a full program or substantially a full program shall be presumed to have come to Iowa primarily for educational reasons rather than to establish a domicile in Iowa.

c. A student who was a former resident of Iowa may continue to be considered a resident provided absence from the state was for a period of less than 12 months and provided domicile is reestablished. If the absence from the state is for a period exceeding 12 months, a student may be considered a resident if evidence can be presented showing that the student has long-term ties to Iowa and reestablishes an Iowa domicile.

A person or the dependent of a person whose domicile is permanently established in Iowa, who has been classified as a resident for admission, tuition, and fee purposes, may continue to be classified as a resident so long as domicile is maintained, even though circumstances may require extended absence of the person from the state. It is required that a person who claims Iowa domicile while living in another state or country will provide proof of the continual Iowa domicile as evidence that the person:

(1) Has not acquired a domicile in another state,
(2) Has maintained a continuous voting record in Iowa, and
(3) Has filed regular Iowa resident income tax returns during absence from the state.

d. A student who moves to Iowa may be eligible for resident classification at the next registration following 12 consecutive months in the state provided the student is not enrolled as more than a half-time student (6 credits for an undergraduate or professional student, 5 credits for a graduate student) in any academic year term, is not enrolled for more than 4 credits in a summer term for any classification, and provides sufficient evidence of the establishment of an Iowa domicile.

e. A student who has been a continuous student and whose parents move to Iowa may become a resident at the beginning of the next term provided the student is dependent upon the parents for a majority of financial assistance.

f. A person who is moved into the state as the result of military or civil orders from the government for other than educational purposes, or the dependent of such a person, is entitled to resident status. However, if the arrival of the person under orders is subsequent to the beginning of the term in which the student is first enrolled, nonresident fees will be charged in all cases until the beginning of the next term in which the student is enrolled. Legislation, effective July 1, 1977, requires that military personnel who claim residency in Iowa (home of record) will be required to file Iowa resident income tax returns.

g. A person who has been certified as a refugee or granted asylum by the appropriate agency of the United States who enrolls as a student at a university governed by the Iowa state board of regents may be accorded immediate resident status for admission, tuition, and fee purposes where the person:

(1) Comes directly to the state of Iowa from a refugee facility or port of debarkation; or
(2) Comes to the state of Iowa within a reasonable time and has not established domicile in another state.

Any refugee or individual granted asylum not meeting these standards will be presumed to be a nonresident for admission, tuition, and fee purposes and thus subject to the usual method of proof of establishment of Iowa residency.

h. An alien who has immigrant status establishes Iowa residency in the same manner as a United States citizen.

i. At the regent institutions, American Indians who have origins in any of the original people of North America and who maintain a cultural identification through tribal affiliation or community recognition with one or more of the tribes or nations connected historically with the present state of Iowa, including the Iowa, Kickapoo, Menominee, Miami, Missouri, Ojibwa (Chippewa), Omaha, Otoe, Ottawa (Odawa), Potawatomi, Sac and Fox (Sauk, Meskwaki), Sioux, and Winnebago (Ho Chunk), will be assessed Iowa resident tuition and fees.
**1.4(3) Facts**

a. The following circumstances, although not necessarily conclusive, have probative value in support of a claim for resident classification:

(1) Reside in Iowa for 12 consecutive months, and be primarily engaged in activities other than those of a full-time student, immediately prior to the beginning of the term for which resident classification is sought.
(2) Reliance upon Iowa resources for financial support.
(3) Domicile in Iowa of persons legally responsible for the student.
(4) Former domicile in the state and maintenance of significant connections therein while absent.
(5) Acceptance of an offer of permanent employment in Iowa.
(6) Other facts indicating the student’s domicile will be considered by the universities in classifying the student.

b. The following circumstances, standing alone, do not constitute sufficient evidence of domicile to effect classification of a student as a resident under these regulations:

(1) Voting or registration for voting.
(2) Employment in any position normally filled by a student.
(3) The lease of living quarters.
(4) Admission to a licensed practicing profession in Iowa.
(5) Automobile registration.
(6) Public records, for example, birth and marriage records, Iowa driver’s license.
(7) Continuous presence in Iowa during periods when not enrolled in school.
(8) Ownership of property in Iowa, or the payment of Iowa taxes.

This rule is intended to implement Iowa Code section 262.9(3).

---

**Supplemental Specific Rules to The University of Iowa**

**681—1.6(262) College-bound program**

**1.6(1) Definitions.**

“Accredited private institution” means an institution of higher education as defined in Iowa Code section 261.9, subsection 5.

“Commission” means the college aid commission.

“Financial need” means the difference between the student’s financial resources, including resources available from the student’s parents and the student, as determined by a completed parents’ financial statement and including any non-campus-administered federal or state grants and scholarships, and the student’s estimated expenses while attending the institution. A student shall accept all available federal and state grants and scholarships before being considered eligible for grants under the Iowa minority academic grants for economic success program. Financial need shall be reconsidered on at least an annual basis.

“Full-time student” means an individual who is enrolled at an accredited private institution or board of regents university for at least 12 semester hours or the trimester or quarter equivalent.

“Minority person” means an individual who is black, Hispanic, Asian, or a Pacific Islander, American Indian, or an Alaskan Native American.

“Part-time student” means an individual who is enrolled at an accredited private institution or board of regents university in a course of study including at least three semester hours or the trimester or quarter equivalent of three semester hours.

“Program” means the Iowa minority academic grants for economic success program established in this division.

**1.6(2) Policy on college-bound program.**

a. The regent institutions will cooperate with other state and local agencies, including the department of education, the college aid commission, and educational institutions in implementing the college-bound program.
b. The universities will develop programs for elementary, middle and secondary school students and their families in the following areas:

(1) Encouragement to consider attending a postsecondary institution;
(2) Enrichment and academic preparation;
(3) Information about how to apply for admission.

c. College-bound program vouchers will be awarded to students on the basis of the participation of the student and the student’s family in the college-bound program. One voucher will be awarded for participation in each college-bound program sponsored by a university.

(1) Each university will maintain records concerning those students who participate in the college-bound program, according to its established policies and procedures. The records will include information on those students who have received college-bound program vouchers which are described in Iowa Code section 262.92(2). The University of Iowa will maintain a central record on all students who have received college-bound program vouchers on behalf of all regent institutions and will make appropriate information available to the college aid commission.

(2) College-bound program vouchers may be used by students enrolled at a regent institution or at a private college or university in Iowa.

(3) A student holding vouchers and enrolling at a regent institution will receive priority in the award of funds under the Iowa minority academic grants for economic success (IMAGES) program. Awards under the IMAGES program are made on the basis of financial need. A student may be eligible for an additional award from the institution in which the student is enrolled.

(4) A student holding vouchers and enrolling at a private college or university in Iowa will receive priority in the award of funds under the Iowa minority academic grants for economic success program as provided by the rules of the college aid commission.

(5) The presidents, or their designees, will administer and coordinate the college-bound program at the universities. As part of the coordination, they will establish liaison with the appropriate state and local agencies, serve as the university contact and promote collaborative efforts among the regent universities and other appropriate agencies and institutions. Annual reports to the board of regents shall be prepared by each regent university. The reports shall contain relevant information as to the accomplishments of the program in the past year and a plan of action with goals and objectives for the forthcoming year. Reports shall be submitted to the board of regents on October 1 of each year.

This rule is intended to implement Iowa Code section 262.92.

681—1.7(262) Application fees

Application fees required for admission to the University of Iowa, Iowa State University and the University of Northern Iowa are as follows:

University of Iowa
Undergraduate domestic student: $40
Undergraduate international student: $60
Graduate/professional domestic student: $60
Graduate/professional international student: $85
Pharm.D. student: $100
Re-entry fee: $20

This rule is intended to implement Iowa Code section 262.9(3).

681—2.1(262) Formal application for admission

All applicants for admission to any college of the University of Iowa must submit a formal application for admission with the required official transcripts and other supporting material as required to the director of admissions. Students may not be registered until they have been issued an admission statement by the director of admissions.

681—2.3(262) College of Business Administration

2.3(1) Application for admission

Applications for admission to the college of business administration should be submitted to the director of admissions.

Applicants are urged to apply as early as possible, since this will give the admissions committee more time to devote to each application. Closing dates for receiving applications will be announced well in advance of the opening date of any session.

2.3(2) Requirements for admission

For admission to the college of business administration an applicant must have—

a. Completed specific course work as prescribed by the faculty of the college.

b. Attained satisfactory scores on the university’s required admission examinations.
c. Maintained a satisfactory grade-point average on all courses undertaken, and on all courses undertaken at the University of Iowa, and on all courses undertaken in business and economics.

Applications from students who have minor deficiencies in meeting grade-point requirements specified above will be reviewed by the admissions committee of the college, and upon favorable recommendation of the committee, such students may be granted conditional or probationary admissions.

Fulfillment of the minimal requirements listed above, however, does not assure admission to the college of business administration. From those applicants who meet the minimum requirements, the admissions committee will select the applicants who, in their judgment, appear to be best qualified.

681—2.4(262) College of Dentistry

2.4(1) Application for admission

Address all inquiries regarding admission to the Director of Admissions, University of Iowa.

Applicants are urged to apply as early as possible, since this will give the admissions committee more time to devote to each application. Closing dates for receiving applications will be announced well in advance of the opening date of any session.

Applicants for admission to dentistry are encouraged to complete a program leading to a baccalaureate degree before entering dentistry. Applicants should consider a combined program of liberal arts and dentistry which would qualify them for a baccalaureate degree upon the completion of the freshman year in dentistry. Preference will be given to students who have the baccalaureate degree or who have completed the requirements for the degree in a combined program.

Fulfillment of the specific requirements for admission listed does not ensure admission to the college of dentistry. From the applicants meeting the minimum requirements, the admissions committee will select the applicants who in their judgment appear to be best qualified for the study and practice of dentistry.

Each applicant must place on file in the office of the director of admissions the completed application form and an official transcript from each college attended.

The college work outlined below will suffice to meet the minimal academic requirements for admission to the college of dentistry.

The college curriculum must include at least three academic years of accredited work comprising not less than 96 semester hours and including specific required science courses as prescribed by the faculty of the college. Electives should be chosen so as to give the applicant a well-rounded educational background.

In order to meet minimum scholarship requirements, the applicant should attain a cumulative grade-point average of 2.5. Since the quality of course work in predental science is basic to success in dentistry, special consideration to such college work is given by the admissions committee. The grade-point average is based upon the University of Iowa's marking system in which a grade of “A” is equivalent to four points. Other marking systems will be evaluated by the office of admissions and the committee on admissions of the college of dentistry.

Applicants who have completed the requirements for admission to dentistry five or more years prior to seeking admission to this college of dentistry will be considered by the admissions committee only under exceptional conditions.

Preference will be given to applicants who are residents of Iowa, but consideration will also be given to outstanding nonresidents.

Personal interviews will be required of applicants for admission to the college of dentistry. Applicants will be notified when they should appear for the required interviews with members of the admissions committee.

All applicants must complete the dental aptitude tests sponsored by the council on dental education of the American Dental Association. Tests are given three times annually. The University of Iowa is a testing center.

To facilitate early selection, applicants for admission to the college of dentistry are urged to complete the aptitude test no later than October to enable the admissions committee to begin its selection in December.

Accepted applicants are required to make the required deposit within two weeks after notification of favorable action on their applications. This deposit is not refundable but is credited toward the first fee payment. The applicant who fails to make the deposit within the time specified forfeits a place in the entering class.
Applicants accepted for admission are required to submit a satisfactory physical examination report to the university student health service within two weeks following notification of acceptance.

All applicants must also complete, through student health service, an X-ray film of the chest and a successful vaccination against smallpox prior to registration.

2.4(2) Advanced standing

Applications for admission with advanced standing are handled as individual cases.

681—2.5(262) College of Engineering

Address all inquiries regarding admission to the Director of Admissions, University of Iowa, Iowa City, Iowa.

Closing dates for receiving applications will be announced well in advance of the opening date of any session.

2.5(1) Admission of freshman students

The applicant must submit a formal application for admission and must have the secondary school provide a certificate of high school credits, including a complete statement of the applicant’s high school record, rank in class, scores on standardized tests, and certification of high school graduation. The applicant must also submit any other evidence such as a certificate of health that may be required by this university.

Each applicant must have attained satisfactory scores on the university’s required admission examinations, maintained a satisfactory cumulative grade-point average, achieved satisfactory rank in graduating class, and successfully completed all prerequisite courses. The university with the approval of the state board of regents shall establish and periodically review specific minimum requirements for admission to the college of engineering. Among the items to be so determined are test score, grade-point average, class rank and prerequisite courses. These specific determinations will be published in the university catalog.

From applicants who do not meet minimum admission requirements, the director of admissions may after a review of the applicant’s record: (a) Admit unconditionally, (b) admit on probation, (c) require enrollment for a tryout period during a preceding summer session, or (d) deny admission.

2.5(2) Admission of undergraduate students by transfer

The applicant must submit a formal application and official transcript of college work. Each applicant should have:

a. Maintained satisfactory progress in mathematics.

b. Attained satisfactory scores on the university's required admission examinations.

c. Maintained a satisfactory cumulative grade-point average on all college work undertaken.

From applicants who do not meet recommended requirements, the director of admissions will review individual records and may offer probationary admission.

681—2.6(262) Graduate College

Graduates of any college or university accredited by regional accrediting associations may if the academic record is satisfactory be admitted to the graduate college. Admission to the graduate college is not the equivalent of acceptance as a candidate for an advanced degree. Such acceptance is given usually after the completion in residence of work at the university and upon recommendation of the major department and approval by the dean of the graduate college. The acceptance of a student as a degree candidate is determined upon the merits of each individual case.

A student who is within four semester hours of having satisfied all the requirements for the bachelor’s degree at the University of Iowa may be given a tentative admission to the graduate college.

681—2.7(262) College of Law

2.7(1) Application for admission

Address all inquiries concerning admission to the Director of Admissions, University of Iowa, Iowa City, Iowa. Beginning students may enter the college of law only in the summer session or the fall semester. Closing dates for receiving applications will be announced well in advance of the opening date of any session.

To be considered for admission, an applicant should have attained a cumulative grade-point average of at least 2.3 on all college work undertaken. The grade-point average is based upon the University of Iowa’s marking system in which a grade of “A” is equivalent to four points. Other marking systems will be evaluated by the office of admissions.
Applicants for admission must present a baccalaureate degree from an approved college or university prior to commencing work in the college of law.

Each applicant for admission must take the Law School Admission Test administered by the Educational Testing Service, Princeton, New Jersey, and have the score forwarded to the college of law. The test is given several times per year and may be taken at numerous locations in the United States and throughout the world. Applicants are urged to take the test in the fall or winter preceding the fall semester for which they are making application. Except upon a showing acceptable to it, the admissions committee will not consider applications from students who fail to take the test prior to the June 1 preceding the fall semester in which they wish to enter.

Fulfillment of the specific requirements for admission listed above does not ensure admission to the college of law. From the applicants meeting the minimum requirements, the admissions committee of the college of law will select those applicants who, in their judgment, appear to be best qualified for the study and practice of law. The law admissions committee may require personal interviews of applicants.

2.7(2) Admission with advanced standing

A transfer student may be eligible for admission if the student (a) has attended a school approved by the Association of American Law Schools; (b) is in good standing at the time of withdrawal (evidenced by a letter from the dean of the school from which transferring); (c) meets the admission requirements for beginning students; and (d) has done substantially above average work in the law school the student attended. Where an applicant has completed more than one year of law study, advanced standing will be permitted only in exceptional cases. Applicants for admission with advanced standing should comply with the procedures required for admission to the first-year class.

681—2.8(262) College of Medicine

2.8(1) Application for admission

Address all inquiries regarding admission to the Director of Admissions, University of Iowa.

Applicants are urged to apply as early as possible, since this will give the admissions committee more time to devote to each application. Closing dates for receiving applications will be announced well in advance of the opening date of any session.

Fulfillment of the specific requirements for admission listed below does not ensure admission to the college of medicine. From the applicants meeting the specific requirements, the admissions committee of the college of medicine will select those applicants who in their judgment appear to be best qualified for the study and practice of medicine.

Prior to entrance an applicant must:

a. Have received the baccalaureate degree; or
b. Have completed three years of a combined baccalaureate-medicine curriculum which qualifies the applicant to receive the baccalaureate degree on completion of the first year in medicine; or

c. Have completed three years of a baccalaureate program which includes the general graduation requirements of the college of liberal arts of the University of Iowa for the combined baccalaureate degree.

Each applicant must place on file in the office of the director of admissions the completed application form and an official transcript from each college attended.

The college work as outlined below will suffice to meet the minimal academic requirements for admission to the college of medicine.

Applicants who have completed the baccalaureate degree and required courses five or more years prior to seeking admission to this college of medicine will be considered by the admissions committee only under exceptional conditions.

The college curriculum must include at least three years (equivalent to 96 semester hours) including specific required science courses as prescribed by the faculty of the college.

Students planning to study medicine should bear in mind that other college work is required in addition to prerequisite sciences because it offers an opportunity to secure a well-rounded education, which is of special importance to those entering the medical profession. In the selection of applicants, preference will be given to those who give evidence of having obtained such a broad education.

To be considered for admission, an applicant must have attained a grade-point average of at least 2.5 for all college work undertaken. As the quality of work in premedical science is very basic to success in medicine, special attention will be given by the admissions committee to grades in science. The grade-point average is based upon the University of Iowa’s marking...
system in which a grade of “A” is equivalent to four points. Other marking systems will be evaluated by the office of admissions and the committee on admissions of the college of medicine.

Preference will be given to applicants with high scholastic standing who are residents of Iowa, and consideration will also be given to outstanding nonresidents. Applicants for admission are required to take the medical college admissions test which is administered for the Association of American Medical Colleges. Applicants are requested to complete this test in May or October of the year preceding that for which they are applying for admission. Students may make arrangements to apply for this examination through the university examination service, the University of Iowa.

Personal interviews will be required. Applicants will be contacted for the appointment for required interviews.

Applicants accepted for admission are required to submit a satisfactory physical examination report to the university student health service within two weeks following notification of acceptance.

All applicants must also complete, through student health service, an X-ray film of the chest and successful vaccination against smallpox prior to registration.

2.8(2) Admission to advanced standing

If their work preparatory to entering a college of medicine would have met entrance requirements of this college, students from other approved medical colleges may be admitted to advanced standing according to the following conditions:

Only applicants of high scholastic standing will be considered.

They must present certificates showing that they have satisfactorily completed courses equivalent to those already pursued by the class they wish to enter.

The committee on admission to advanced standing will decide in each case whether examinations in the various subjects will be required.

Applications will be considered only upon receipt of a statement from the dean or registrar of the college from which the applicant comes, showing the actual amount of time the student has spent in the study of medicine, the courses taken, and the grades received, together with a statement of the work preparatory to entering upon the course in medicine.

No advanced standing will be granted to students from other than approved medical schools. Students may be granted subject credit upon recommendation of the head of the department concerned, for work taken in other than medical schools.

2.8(3) Unclassified students

Applications for admission to the college of medicine who are not candidates for a degree but who desire to register for special subjects, will be admitted to any lecture or laboratory course only upon complying with all the regular requirements for admission to such course or by action of the faculty upon recommendation of the professor in charge of the course.

681—2.9(262) College of Nursing

Applications for admission to the college of nursing should be submitted to the Director of Admissions, The University of Iowa, Iowa City, Iowa. Applicants for admission to the undergraduate program in nursing must present a minimum of 30 semester hours completed in an accredited college. For admission to the college of nursing an applicant must have:

1. Completed specific course work as prescribed by the faculty of the college. The director of admissions will provide a list of the course work required.

2. Completed the American College Tests.

3. Performed satisfactorily on all courses undertaken.

Applications from students who have minor deficiencies in meeting grade-point requirements specified above will be reviewed by the admissions committee of the college, and, upon favorable recommendation of the committee, such students may be granted conditional or probationary admissions.

Fulfillment of the minimum requirements listed above, however, does not assure admission to the college of nursing. From those applicants who meet the minimum requirements, the admissions committee will select the applicants who, in their judgment, appear to be best qualified.

681—2.10(262) College of Pharmacy

2.10(1) General basis for admission

Fulfillment of the specific requirements for admission does not ensure admission to the college of pharmacy. From the applicants meeting
the specific requirements, the admissions committee will select those applicants who in their judgment appear to be best qualified. Applicants for admission to pharmacy should have graduated from an approved high school or have an equivalent amount of training.

2.10(2) College work

The college work as outlined below will meet the minimum academic requirements for admission to the college of pharmacy. The minimum should include 32 semester hours of college level work exclusive of credit in military and air science and physical education. The 32 semester hours must include:

Communication skills. Applicants must have demonstrated satisfactory achievement in communication skills according to the requirements of the college of liberal arts at the state University of Iowa. Applicants from other institutions may meet this requirement by presenting six semester hours of credit in English composition and rhetoric and two semester hours of credit in speech or an eight-semester-hour year course in communication skills.

Inorganic chemistry and qualitative analysis, eight semester hours.

College mathematics, eight semester hours.

Physics or zoology, eight semester hours.

Students from other institutions may substitute a comparable eight-semester-hour course in biology in lieu of zoology.

Military or air science (if available), zero to two semester hours.

Students who present minor deficiencies in meeting the above requirements may be admitted to the college of pharmacy upon the recommendation of the dean of admissions and the college of pharmacy.

2.10(3) Scholarship and application deadline

To be considered for admission to the college of pharmacy, students must have earned a 2.0 or “C” average on all collegiate work undertaken. The minimum grade-point average of 2.0 is based on the state University of Iowa’s marking system in which the grade of “A” is equivalent to four points. Applications for admission and the required official transcripts should be filed before March 1 for the class to enter pharmacy in September.

2.10(4) Required tests

Applicants for admission are required to take the American College Testing Program test.

2.10(5) Current requirements

Applicants who have completed work in a college of pharmacy accredited by the American Council on Pharmaceutical Education may if their college academic average is acceptable be admitted and granted advanced standing toward the degree of bachelor of science in pharmacy.

681—2.11(262) College of Liberal Arts and Sciences

Applicants for admission to liberal arts and sciences must meet the rules that are common to the three state institutions in Iowa as listed in 681—1.1(262), 1.2(262) and 1.3(262).

681—2.12(262) College of Education

Students at the university desiring professional work in education are registered in the college of liberal arts and sciences or the graduate college. Requirements for permission to take teacher-training courses are listed in the university catalog.
