MINERAL PRODUCTION OF IOWA

IN 1903

BY

S. W. BEYER.

---

---

## VALUE OF MINERAL PRODUCTION.

1902.

Coal.....	\$ 8,058,779
Clay.....	2,843,591
Stone.....	673,591
Gypsum.....	337,735
Lead.....	11,178
Total.....	<u>\$11,924,644</u>

1903.

Coal.....	\$10,439,139
Clay.....	3,033,583
Stone.....	597,965
Gypsum.....	523,008
Lead.....	3,013
Total.....	<u>\$14,596,708</u>

## MINERAL PRODUCTION IN IOWA FOR 1903.

---

BY S. W. BEYER.

---

In the production for 1903, Iowa shows a gain of more than 21 per cent in the selling value of her mineral products marketed. Coal, clay goods and gypsum show substantial increases, while a falling off is recorded in lead and quarry products. No zinc or iron was sold during the year.

The number of producers for the various mineral industries of the state is shown below in parallel columns for the years 1900 to 1903 inclusive.

	1900	1901	1902	1903
Coal.....	231	242	274	271
Clay.....	381	349	329	296
Stone.....	170	229	273	197
Gypsum.....	7	7	7	8
Lead and zinc.....	6	10	8	8
Iron.....	1	1	...	...
	796	838	891	780

The number of producers reporting shows a marked decrease owing to the continued wet weather which made the "summer brickyard" unprofitable and many of the smaller quarries impossible.

The statistics were gathered as usual through the co-operation of the Federal and State Geological Surveys.

The value of the total mineral production in Iowa for 1903 is shown in Table I.

TABLE No. 1.

VALUE OF TOTAL MINERAL PRODUCTION BY COUNTIES FOR 1903.

## COAL.

The coal production shows an increase of more than fifteen per cent in ~~output and twenty-eight~~ per cent in the value of the product marketed. Most of the coal producing counties contributed to the increased output and profited by the increase in price. Keokuk is the only county showing a decided slump.

Table II gives the total tonnage, average price per ton, total value, number of mines producing, average number of days worked and number of men employed, arranged by counties.

TABLE No 2.

## COAL OUTPUT BY COUNTIES FOR 1903.

**CLAY.**

The continued wet weather caused the abandonment of many of the hand yards but greatly stimulated the manufacture of drain tile. The increase in the production of tile more than compensated for the falling off in common brick. The product was distributed as follows:

	THOUSAND.	VALUE.
Common brick.....	194,872	\$1,396,088
Front brick.....	7,381	83,306
Paving brick.....	20,688	221,481
Ornamental brick .....		1,200
Fire brick.....		975
Drain tile.....		1,009,933
Sewer pipe.....		88,000
Hollow block.....		131,191
Sidewalk brick .....		11,743
Floor tile.....		500
Railway ballast.....		12,000
Pottery.....		55,762
Miscellaneous .....		21,404
Total.....		<u>\$3,033 583</u>

Every class of clay ware shows an advance in price and away from the Mississippi river district, most of the factories could not keep up with their orders.

The distribution of clay products by counties, showing the common brick and total brick in thousands, the values of common brick and of total brick, value of drain tile and total value of clay products are shown in Table III.

TABLE III.

STONE.

The stone production shows a decline as compared with the two years preceding, probably due to the continued wet weather. The production for 1903 was distributed as follows:

Limestone used for:

Building purposes.....	\$204,769
Flagging.....	2,388
Curbing.....	2,318
Paving.....	9,087
Lime.....	113,195
Rubble.....	65,307
Riprap.....	37,096

## Crushed stone:

Roadmaking.....	63,637
Railway ballast.....	12,243
Concrete.....	68,763
Miscellaneous.....	2,158
Sandstone.....	17,004
	\$597,965

Table IV gives the production by counties and specifies the various grades of stone put upon the market.

TABLE No. 4.

Total.....	12	\$ 6,052	\$ 10,952	\$ 17,004

### GYPSUM.

The price of gypsum products shows a considerable advance over that for the preceding year. The amount marketed was also somewhat greater than for 1902. The output of gypsum was reported to be 166,713 tons of crude gypsum valued at \$317,326 and sold as:

	TONS	VALUE.
Wall cement or plaster.....	87,397	\$411,503
Plaster of Paris.....	30,306	100.74
Land plaster.....	2,098	9,227
Crude Gypsum.....	703	1,534
Total.....	120,504	\$523,008

### LEAD AND ZINC.

The lead industry about Dubuque still continued to decline. The outlook for 1904 is much more promising as the amount of ore marketed before July 1st exceeded that for the entire preceding year. A small quantity of zinc ore was produced but none was sold. Prospecting and development work continues. The output of lead was as follows:

Galena 120,450 pounds sold for \$3,013.

No zinc was put upon the market during 1903.
