

FAA computer glitch causes flight delays

Flight delays is a big breaking news.

News Alert

08:49 AM EDT Thursday, November 19, 2009

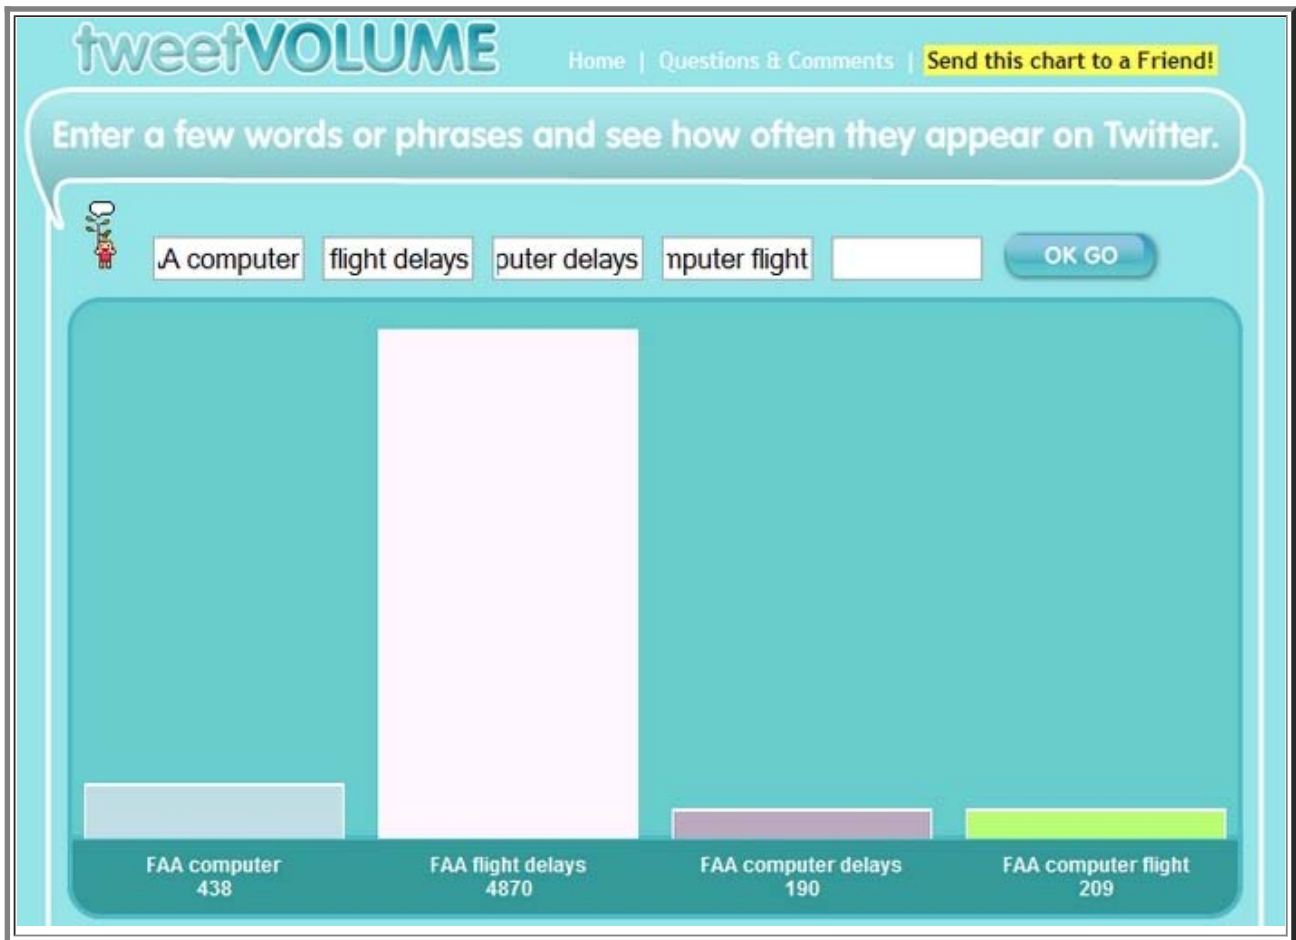

FAA computer problem causes widespread delays

Widespread flight cancellations and delays are reported nationwide because of a problem with the FAA system that collects airlines' flight plans.

I checked four phrases

"FAA flight delays" search found 719 messages and all but one was from November 19 -- the day of the computer glitch and flight delays. So that is the search phrase to use.

The search stopped 1:22 a.m. December 6, 2009. The total of messages found was 1719.

This was a one day wonder.

The .txt file that can be read by Excel is [faa flight delays.txt](#)
