

Another Delay in Gulf Oil Spill Cleanup -- fire aboard ship

Fire on ship stopped cleanup briefly, but it was good enough for The Washington Post -- breaking news.

News Alert: BP temporarily halts containment of gulf oil leak
02:41 PM EDT Tuesday, June 15, 2010

BP has shut down siphoning efforts from its leaking well in the Gulf of Mexico after a ship collecting the oil caught fire, the company says. The fire is believed to have been caused by lightning. BP says the capture operation is expected to resume later Tuesday.
