

Airport Security

Terrorism is closely associated with terrorism in the US. So I decided I would just search for airport security to see how it might intersect with terrorism. But there was no airport security in the US during the search.

Search term: airport security

There are two files. I started a search using desktop Archivist January 20, 2010. That continued until I decided to move the search to SocialPing on July 2, 2010. So the files are an .xml file the native file for desktop Archivist. The export file from desktop Archivist which is a .txt file. And SocialPing produces a .csv file for export.

I closed down the search on August 27, 2010. It had been going on long enough.

The desktop Archivist file started with 1020 tweets and had 68545 when it closed. The SocialPing file started with 913 tweets and ended with 22543.
