HENRY B. TIPPIE COLLEGE OF BUSINESS

The University of Iowa has offered courses in economics and business administration for more than a century. A School of Commerce was formally established in 1914 and the College of Business Administration, which was founded in 1921, received national accreditation in 1923. The College was renamed the Henry B. Tippie College of Business in 1999. Today, there are more than 2,000 students in the College working toward Bachelor of Business Administration (B.B.A.), Master of Accountancy (M.Ac.), Master of Business Administration (M.B.A.) and doctoral (Ph.D.) degrees.

The Undergraduate Program provides a broad business education along with specializations in the areas of accounting, economics, finance, marketing, management and organizations, and management information systems. Student organizations, the Frank Business Communications Center, and specialized programming for targeted student groups provide a full-service educational experience. In addition, students can earn certificates in International Business, Entrepreneurship, and Risk Management and Insurance.

The Tippie M.B.A. program provides advanced management education that expands a student's ability to excel in the business world. The full range of M.B.A. programs is listed in the adjacent column. The Master of Accountancy program is intended for students seeking a career in public accounting. The College's Ph.D. program prepares individuals for faculty positions in academia, as well as for business or government careers.

The College hosts a number of centers that promote research and opportunities within specialized career areas. The Hawkinson Institute of Business Finance provides opportunities for students interested in working in the investment community, while the new Emmett J. Vaughan Institute for Risk Management and Insurance helps students explore careers in risk management and insurance. The Institute for Economic Research and the RSM McGladrey Institute of Accounting Education and Research provide research and services to their respective fields. The John Pappajohn Entrepreneurial Center offers a full spectrum of programming for both student and community-based entrepreneurs. Students in the Tippie College of Business can learn more about the global business environment through the Institute for International Business.

HENRY B. TIPPIE SCHOOL OF MANAGEMENT

Created by Dean Sidney Winter in 1960, the Master of Business Administration (M.B.A.) Program at The University of Iowa was "born into a secure future as the College's flagship." Now, boasting an enrollment of nearly 1,000 students, the M.B.A. Program is recognized as being among the top 50 programs in the world.

The M.B.A. Program at the Henry B. Tippie School of Management provides its students the opportunity to broaden their managerial skills and enhance their professional careers in the business or public sector. The curriculum is designed for college graduates in any field but emphasizes the importance of professional work experience prior to enrollment.

Students have the option of pursuing the M.B.A. degree on campus through the Full-Time M.B.A. Program, part-time through the M.B.A. for Professionals and Managers (M.B.A.-PM), or via the Executive M.B.A. Program. M.B.A.-PM classes are offered in the Quad Cities, Cedar Rapids and Des Moines. Students may pursue Executive M.B.A. classes in Iowa City or Hong Kong.

The School participates in several joint-degree programs for students enrolled full-time. These include the M.B.A./M.A. Program in Library and Information Science with the School of Library and Information Science, the M.B.A./J.D. Program with the College of Law, the M.B.A./M.S.N. Program with the College of Nursing, the M.B.A./M.D. Program with the Carver College of Medicine, and the M.B.A./M.H.A. Program with the College of Public Health.

More than 5,000 graduates now hold an M.B.A. degree from The Henry B. Tippie School of Management. Successful alumni can be found worldwide, in every facet of today's global economy.

COLLEGE OF DENTISTRY

Dental education began at The University of Iowa in 1882 with 14 students, four faculty members, and a first year's budget of just over \$1,000. Patients were treated in an improvised clinic equipped with borrowed barber chairs. Today the College of Dentistry is ranked among the leading dental schools in the United States. An integral part of The University of Iowa Health Sciences Center, the College has an enrollment of 300 dental students and 77 advanced education and graduate students in programs representing all the dental specialties as well as Master's and Ph.D. programs in oral science. In addition, there are three students enrolled in the Bachelor's in Oral Health Science Program.

The Dental Science Building affords faculty and students of the college excellent facilities for their many programs of research into the nature and treatment of oral diseases. These investigations have resulted in a number of significant advances in dental science.

Faculty, postdoctoral and predoctoral students extend service to hundreds of thousands of Iowa citizens in the patient-care clinics of the Dental Science Building. Students also provide dental care to Iowa communities through the college's extramural programs in hospitals, community health centers and nursing homes. Dental health educational presentations are regularly provided by dental students in schools, nursing homes and other locations throughout the state.

The College has a long history of graduating students who become nationally prominent clinicians, dental educators, and researchers. More than 3,000 living alumni perpetuate the college's tradition of excellence as they distinguish themselves with contributions to their professions and our society.

COLLEGE OF EDUCATION

The University of Iowa College of Education had its beginning when the University established the nation's first professorial chair in education at the university level in 1872. Now comprising four departments, the College carries on its programs in conjunction with the other colleges of the University, particularly the College of Liberal Arts and Sciences and the Graduate College.

Undergraduate students preparing to be teachers are admitted to the College of Education for the sequence of courses in professional education culminating in student teaching. Both elementary and secondary education students receive their degrees from the College of Liberal Arts and Sciences. The College of Education is the recommending agency for teacher licensure.

The College of Education enrolls approximately 1,000 undergraduate students in programs preparing them for licensure in early childhood, elementary and secondary education.

Approximately 1,000 graduate students are engaged in College of Education programs for master's, specialist, and doctoral degrees in such diverse fields as rehabilitation counseling, testing and measurement, and teacher education.

From nationally recognized literacy projects to internationally renowned testing instruments, College of Education faculty produce meaningful and applicable research. They work collaboratively with K-12 teachers, assist school districts with curriculum development, provide consultation and counseling services, and offer a wide variety of professional development workshops and other continuing education programs.

COLLEGE OF ENGINEERING

Engineering is a profession devoted to applying knowledge of the mathematical and natural sciences to the discovery and development of efficient ways to use the materials and forces of nature for the benefit of society.

Career opportunities in engineering are numerous and diverse. In preparing men and women for these opportunities, The University of Iowa College of Engineering seeks to produce high-caliber professionals with interdisciplinary interests and strong backgrounds in engineering fundamentals. It offers students engineering education in the context of a diversified university with a strong College of Liberal Arts and Sciences and outstanding professional colleges.

With educational courses dating back more than 100 years, the College today has an enrollment of about 1,600 students—1,250 of whom are undergraduates. About 65 percent of undergraduate enrollment comes from the state of Iowa, with another 32 percent attending from contiguous states. Women make up more than 18 percent of undergraduates.

There are 83 faculty serving six undergraduate programs in biomedical, chemical, civil, electrical, industrial, and mechanical engineering.

Student achievement has become a hallmark of the college. Average ACT scores are consistently in the top 10th percentile.

Even though engineering students represent only 5 percent of University enrollment, they are awarded many top first-year merit scholarships. Since 1980, 17 engineering students have earned the prestigious University Hancher-Finkbine Medallion for achievement. The College is the first in the U.S. to offer a Technological Entrepreneurship Certificate with an engineering degree.

The college offers graduate programs in biomedical, chemical and biochemical, civil and environmental, electrical and computer, industrial, and mechanical engineering. Research units of the college include the Center for Bioinformatics and Computational Biology, Center for Computer-Aided Design, IHR—Hydroscience and Engineering, and the Iowa Spine Research Center.

GRADUATE COLLEGE

The University of Iowa's Graduate College was founded in 1900 and that year awarded its first doctorate to Fred D. Merritt in political science. Since then, it has conferred 70,443 master's, 523 specialist, and 17,420 doctoral degrees. With more than 5,300 students, the college now accounts for nearly one-fifth of the University's total enrollment, in more than 100 different programs of advanced study, research, and artistic creation. The Graduate College is a proud supporter of interdisciplinary programs, including a unique, individualized interdisciplinary studies doctorate program.

All faculty members with professorial rank in the academic divisions of the University hold membership on the Graduate College faculty; thus, almost all of the University's 1,673 faculty members participate in graduate instruction. Because academic programs involve specialists from different disciplines and because many faculty members hold appointments in more than one department, school, or college, graduate instruction is assured a healthy interaction and collaboration among disciplines.

A number of the University's graduate programs are recognized as the finest, or among the finest, in the nation, including six programs ranked in the top quartile nationally. The Graduate College boasts three winners of the prestigious UMI/CGS Dissertation Prize, tied with Ohio State University, Princeton University, and Yale University for the most awarded to any doctoral institution since the inception of the award. In 2001 the college inaugurated its Graduate College Outstanding Mentor Awards. The awards for the 2006-07 academic year were made to Professors Virginia Dominguez, Anthropology, and Alberto Segre, Computer Science, in recognition of their outstanding contributions to graduate education.

COLLEGE OF LAW

The University of Iowa College of Law is the oldest law school in continuous operation west of the Mississippi. Established in Des Moines in 1865, it was moved to Iowa City in 1868 to become part of the University. Today it has an enrollment of more than 650 students and a faculty of more than 50 full-time teachers. While most of its students come from the Midwest, more than 96 colleges and universities were represented in the 2006 entering class.

The College's educational objectives are to help each student learn the fundamentals of critical reading and logical analysis, oral and written communication and argumentation, research, interviewing and counseling, technical drafting, transaction planning, and litigation.

First-year students spend part of their time in large classes, participating with their teachers in a Socratic dialogue—a method of questioning designed to develop and exercise analytical abilities and argumentation skills. Legal Analysis, Writing and Research provides each student with individual attention in a small class format each semester. This course is taught by instructors dedicated to this specialty area of legal instruction.

In the second and third years, seminars, tutorials, clinical assignments, independent research, writing for the College's legal journals, oral advocacy competitions, and litigation skills training all supplement more traditionally taught courses. Aside from the skills instruction, the curriculum focuses on the overriding importance of high personal standards of ethics and professional responsibility and their role in guiding the behavior of lawyers.

COLLEGE OF LIBERAL ARTS AND SCIENCES

The College of Liberal Arts and Sciences invites students to explore the entire range of human learning: the fine arts, the humanities, the social sciences, the natural and mathematical sciences. Our students work with faculty members who are committed to integrating their research into their teaching and to helping students develop their own capacity to ask significant questions, to think analytically, to draw conclusions from what they learn, and to discover workable solutions to problems. These skills, honed throughout the undergraduate experience, will form the basis for life-long success and learning. We seek to prepare our graduates to be knowledgeable citizens and to enable them to continually acquire the new information and skills they will need to meet the challenges of our continually changing world.

Although a liberal arts and sciences education has been available since the University first began offering instruction in 1855, the "College of Liberal Arts" was not created until the beginning of the 1900-01 academic year. In the years that followed, other colleges evolved out of that first college: Engineering in 1905, Education in 1913, and Commerce (now the Tippie College of Business) in 1921. In fall 2001, The College of Liberal Arts became "The College of Liberal Arts and Sciences," a name that recognizes the breadth of the College's teaching and research.

In 1900-01, the College had about 600 students in its four "courses of study," and a faculty consisting of only 28 professors and assistant professors. Today, more than 16,500 undergraduates are enrolled every year. Over 90 percent of all UI undergraduates begin their studies in the College of Liberal Arts and Sciences, and we award more than 70 percent of the University's undergraduate degrees. Our students choose to major in one—or more—of nearly 60 different programs leading to a B.A., B.S, B.M, or B.F.A. degree. Many of our students add minors and certificates to their degrees, further expanding their knowledge and skills.

More than 600 tenured and tenure-track faculty members form more than three dozen separate departments and work together in numerous interdisciplinary programs to provide research, teaching and service to our students, the state, and the world. Faculty members from every area of the College have developed national and international reputations for the quality of their research and creative work. Every year, members of our faculty are recognized by national and international foundations, earning Fulbright, Guggenheim, National Endowment for the Arts, National

Institutes of Health, and National Science Foundation fellowships and other awards. They receive recognition and awards from disciplinary organizations as well. Here on campus, CLAS faculty members routinely win University-wide teaching awards—including the prestigious Philip G. Hubbard Award for Outstanding Teaching for each of the five years it has been awarded—as well as other recognition of their teaching and scholarship.

Our students are also recognized for their achievements. Every year, more than 200 College of Liberal Arts and Sciences students graduate "with honors" in their major. Even more graduate "with distinction," "with high distinction," or "with highest distinction." Our students participate in departmental honors societies, and in national honor societies including Phi Beta Kappa, Mortar Board, and Omicron Delta Kappa. We are pleased to recognize student achievement in other ways, too. Each year, the College provides many scholarships recognizing student achievement. We also provide research funding for undergraduates, including the Dewey Stuit Fund in Liberal Arts & Sciences, which provides support for undergraduate travel, research, and mentoring projects.

The College collaborates with other University units to foster scholarship, teaching, and service. We work with every one of the other colleges, offering joint programs and course work, and providing students opportunities for collaborative research and other learning activities. We support and are supported by the Pomerantz Career Center in providing internships before graduation and career guidance after graduation. We are grateful to the many alumni who continue to support the College with their time and energy and who have helped to provide funding to create opportunities and scholarships for our students.

The College of Liberal Arts and Sciences is proud of our history and our current endeavors. Despite the challenges we continue to face in an uncertain economic climate and a world that grows more complicated every day, we remain dedicated to our College's mission: to advance scholarly and creative endeavor through leading-edge research and artistic production; to use this research and creativity to enhance undergraduate, graduate, and professional education, health care, and other services provided to the people of Iowa, the nation, and the world; and to conduct these activities in a culturally diverse, humane, technologically advanced and increasingly global environment.

ROY J. AND LUCILLE A. CARVER COLLEGE OF MEDICINE

The University of Iowa Carver College of Medicine admits students to the four-year curriculum leading to the Doctor of Medicine degree as well as to the programs in the associated medical sciences each year. Its faculty members also provide instruction to several thousand students each year from the Graduate College, the colleges of Dentistry, Nursing, Pharmacy, and Public Health, and the life science areas of the College of Liberal Arts and Sciences. The clinical faculty additionally provides instruction for nearly 600 physicians in residency and fellowship training in all the medical and surgical specialties.

Each year, several thousand physicians and other health professionals update their knowledge and skills in the College's continuing medical education programs.

The Statewide Family Practice Residency Program, training 138 physicians at 11 hospitals (10 community-based plus UI Hospitals and Clinics), has attracted nationwide attention and plays a major role in increasing the number of primary care physicians practicing in Iowa.

The spectrum of new knowledge in medicine is such that health care problems need to be approached by an integration of relevant disciplines and a melding of faculty expertise into groups of scholars with a common purpose.

The UI Carver College of Medicine is a national leader in biomedical research, ranking 11th among public medical schools in funding from the National Institutes of Health and second among Big Ten universities. The research funding and reputation emanate from the efforts of faculty, students and postdoctoral trainees working in the laboratories of some of the nation's premier biomedical scientists in leading interdisciplinary research and training programs.

COLLEGE OF NURSING

The University of Iowa College of Nursing has offered basic nursing education since the turn of the 20th century and baccalaureate and master's degree programs for more than 50 years. A Ph.D. program in nursing began in 1988. The College is an integral part of the health sciences campus, sharing in and contributing to teaching, research, and patient-care resources, which have earned international recognition.

Undergraduate students enter the nursing program after completing the pre-professional course. Six semesters of study in nursing are required to complete the undergraduate degree.

All senior undergraduates have a clinical internship that facilitates the transition from student to staff nurse. Internships are supervised by 300 staff nurse preceptors across the state.

Special program options are available for registered nurses pursuing the BSN. Registered nurses may study on campus or in satellite centers in several locations in the state.

The professional Master's in Nursing and Healthcare Practice is a post-baccalaureate program for people who are interested in pursuing a nursing career. This pre-licensure program prepares students as entry-level nurses who are eligible to sit for the NCLEX licensure exam.

The master's degree program provides a flexible curriculum tailored to meet individual career goals for advanced clinical practice. The Master of Science in Nursing (M.S.N.) degree is available with preparation for certification and licensure as a nurse practitioner, psychiatric/mental health nurse specialist or nurse anesthetist. Master's level programs of study are available with preparation in nursing service administration, gerontological nursing, genetics, community health, occupational health, and informatics. Two joint degrees are offered in collaboration with other colleges: the M.S.N./M.B.A. offered with the Tippie College of Business, and the M.S.N./M.P.H. offered with the College of Public Health.

The Doctor of Philosophy degree program provides learning and research opportunities in gerontological nursing, child and family nursing, informatics, or nursing service administration. An individualized option is also available. Faculty research in these areas and others is well-supported by external funding and offers students a broad array of support. Students may also pursue an individualized program of study.

COLLEGE OF PHARMACY

The College was originated by a forward-thinking group of pharmacists from the Iowa Pharmaceutical Association in 1885 and was one of the first Colleges of Pharmacy in the nation associated with a major public university. This nationally ranked program is located in the Health Sciences Center on the west side of the University's main campus in close proximity to the Colleges of Medicine, Nursing, Dentistry, Public Health and the University of Iowa Hospitals and Clinics.

The pharmacy profession is concerned with a wide variety of activities, from developing new drug products to dispensing medicines to patients. A recent concept in the delivery of pharmaceutical services is pharmaceutical care—the responsible provision of drug therapy to achieve defined outcomes that improve patients' quality of life. These outcomes include preventing, arresting, or curing a disease, and/or eliminating or reducing its symptoms.

Implementation of the pharmaceutical care model is expected to enhance health care in rural settings and in primary care among the elderly, who are by far the heaviest users of drug therapy. In order to carry out these responsibilities, pharmacists specialize in the science of drugs and drug information.

Demand for qualified pharmacists is high. Iowa's graduates enjoy a 100-percent placement rate. Iowa's pharmacy students study with professors who, in many cases, are pioneering the development of new drugs to solve chronic health problems. They also enjoy advanced research facilities, including those of Iowa's drug research and manufacturing area, where experimental drugs are produced for testing and licensing by manufacturers before being introduced worldwide.

The Doctor of Pharmacy (Pharm.D.) degree combines didactic course work with extensive clinical clerkship involvement to prepare a pharmacist for an extended role in monitoring, evaluating, and optimizing drug therapy in hospitalized and ambulatory patients. Students graduating from the college enjoy a wide variety of professional opportunities in community pharmacy, hospital pharmacy, government, and the pharmaceutical industry.

The College also has an extensive research and graduate education program leading to both master's and doctoral degrees in the medicinal and natural products chemistry, pharmaceuticals, and clinical and administrative pharmacy. Graduates of these programs are employed by the pharmaceutical industry, government and also assume academic positions.

COLLEGE OF PUBLIC HEALTH

Formed in July 1999, the College of Public Health is the newest collegiate unit at The University of Iowa. Building on the University's long tradition of public health training, research, and service—including programs targeting agricultural safety and health, cancer and birth defects monitoring, health services planning, and women's health—the establishment of this college marked a renewed and expanded commitment to improving the health of all Iowans.

The College of Public Health consists of five academic units: biostatistics, community and behavioral health, epidemiology, health management and policy, and occupational and environmental health. Numerous centers and programs within these units focus attention on the unique health concerns of Iowans, especially the needs of its large rural and agricultural population and its growing number of elderly residents. Iowa's Center for Agricultural Safety and Health, the Institute for Public Health Practice, the Center for Public Health Statistics, the Preventive Intervention Center, and the Institute for Quality Healthcare are just a few of the 29 centers based in the College of Public Health. These multidisciplinary centers focus research efforts on important public health topics and also provide a platform for an array of outreach, service, and policy activities. These centers also provide a framework for extensive interdisciplinary collaboration involving College of Public Health investigators and colleagues throughout the University and at other Regent institutions and governmental agencies.

The academic degree offerings of the College of Public Health include the Master of Public Health degree, with subtracks in biostatistics, community and behavioral health, public health epidemiology, ergonomics, health communication, policy and administration, and occupational and environmental health and focus areas in aging studies, nutrition and exercise, maternal, child and family health, and global health. The Master of Public Health program offers combined degrees with the UI Carver College of Medicine, the College of Nursing, the College of Pharmacy, and Iowa State University. The college also offers the Master of Health Administration degree. This program offers combined

degrees with the College of Law, the Tippie College of Business, and the Urban and Regional Planning Program. In addition, master of science and doctoral degrees are offered in biostatistics, epidemiology, community and behavioral health, and occupational and environmental health. The community and behavioral health master of science program offers a subtrack in health communication. The occupational and environmental health master of science program offers an emphasis in industrial hygiene. A master of science degree in clinical investigation is available, and additional doctoral degrees are offered in statistical genetics; health services and policy; industrial hygiene, which is a subtrack of occupational and environmental health; and addiction studies and health communication, which are subtracks of community and behavioral health. The college also offers a Certificate in Public Health. More than 300 students are currently enrolled in degree programs within the College of Public Health.

GRADUATION HONORS

High scholastic achievement is recognized at graduation time in two ways: graduation with distinction, based on grades only, and graduation with honors in a particular field, based upon both grades and the completion of special work as outlined by the college and the major department.

Graduation with Distinction. The Office of the Registrar certifies to the deans of the colleges the names of students eligible to graduate with distinction. To be eligible for consideration, the graduate must complete the final 60 semester hours in residence in the graduating college, at least 45 semester hours of which must have been completed prior to the final semester of registration. The grade-point average upon which distinction is determined includes all work undertaken prior to the opening of the final session.

Graduates with distinction in the colleges of Liberal Arts and Sciences, Engineering, and Business rank as follows:

With Highest Distinction	Highest 2%
With High Distinction	Next Highest 3%
With Distinction	Next Highest 5%

In the College of Nursing, distinction recognition is determined as follows:

With Highest Distinction	3.90 GPA or above
With High Distinction	3.80-3.89 GPA
With Distinction	3.75-3.79 GPA

In the College of Pharmacy, distinction recognition is determined as follows:

With Highest Distinction	3.75 GPA or above
With High Distinction	3.50-3.74 GPA
With Distinction	3.25-3.49 GPA

Distinction is designated by gold stars worn on the left sleeve. Three stars indicate graduation *with highest distinction*; two, *with high distinction*; and one, *with distinction*.

Graduation with Honors Degrees. An honors student may complete work for an honors degree in one of many fields of concentration. Honors students are admitted to work in candidacy for an honors degree, normally not later than the junior year, upon application to and formal acceptance by the department of their choice. At the option of the department, the special honors work may be planned as an addition to the regular requirements for the major or in substitution for some part of these requirements.

Liberal Arts and Sciences candidates who are graduating with honors in a particular field wear white cordons draped over the shoulders.

PRESIDENTIAL EMBLEM

The jeweled gold medallion worn by The University of Iowa president during commencement ceremonies and other formal academic events on the campus was designed as an emblem of the University's presidency by a UI graduate student in the School of Art and Art History, Karen Cantine.

Featuring an abstract UI motif in the University's colors—old gold and black—the emblem was first used in the investiture of Howard R. Bowen as the University's fourteenth president during inauguration ceremonies on December 5, 1964.

Four and one-half inches in diameter, the medallion is worn on a gold chain also designed and made by Mrs. Cantine. Fashioning the emblem from a sheet of 14-carat yellow gold, Mrs. Cantine outlined in black enamel eight UI motifs in raised gold letters in areas radiating from a large topaz in the center.

The central jewel is almost an inch in diameter. A slightly smaller topaz is set in the link which attaches the emblem to the chain on which it is worn, and eight small topazes are set around the edge of the emblem, one being placed at the end of each "spoke" which bears a UI motif.

Designing and making the presidential emblem was part of Mrs. Cantine's work for a Master of Arts degree in metalwork and jewelry.

ACADEMIC COSTUME

The history of academic dress reaches far back into the early days of the oldest universities. A statute of 1321 required that all "Doctors, Licentiates, and Bachelors" of the University of Coimbra wear gowns. It is still a vexing question whether academic dress finds its sources chiefly in ecclesiastical or in secular dress. Gowns may have been necessary for warmth in the unheated buildings frequented by medieval scholars. Hoods seem to have served to cover the tonsured head until they were superseded for that purpose by the skull cap. This was itself displaced by a headdress more or less like one or another of those now recognized as "academic."

Over the many years of development, a great diversity of academic apparel made its appearance. When American colleges and universities desired to adopt some suitable system of academic apparel more than a century ago, it seemed to them best to agree on some definite system which all might follow. Accordingly, there was held on May 16, 1895 at Columbia University a conference of representatives of the governing boards of various interested institutions. The outgrowth of that meeting was the establishment of "The Academic Costume Code." The code has been revised several times since its initial approval. The most recent change was in 1959. In nearly every instance of the many hundreds of colleges and universities of the United States which have adopted academic dress, the standards thus prescribed have been adopted and followed, either wholly or at least in the main.

The academic costume code recognizes three styles of gowns: a bachelor's gown, a master's gown, and a doctor's gown. In conjunction with its centennial celebration in May 2000, the Graduate College inaugurated a new doctor's gown. The differences in these gowns are mainly in the cut and shape of the sleeves and in the trimming. Hoods are also recognized for each of the above degrees. They vary in shape, size, and length, the larger and more elaborate designating the doctoral level. The shell of the hood matches the black material of the gown, and is lined with the color or colors of the institution conferring the degree—in the instance of The University of Iowa, old gold. The velvet border of the hood is of a color indicative of the field of learning to which the degree pertains. An abbreviated list of these colors as they apply to The University of Iowa follows:

Arts and Letters, white
Business and Accounting, sapphire blue
Dentistry, lilac
Engineering, orange
Law, purple
Medicine, green
Music, pink
Nursing, apricot
Pharmacy, olive green
Philosophy, dark blue
Science, golden yellow

The Oxford cap, proper for all degrees, is worn both indoors and outdoors with academic costume. The tassel, worn over the left eye, is also symbolic of the degree to be conferred on the wearer and conforms to the code colors for hood trimming.

Practice at The University of Iowa varies slightly from that established by the code. Candidates for degrees may be identified with the *colleges* from which they are to secure their degrees by the color of the tassels they wear. Colleges are designated by tassel colors as follows:

Business, sapphire blue
Dentistry, lilac
Engineering, orange
Graduate, black
Law, purple
Liberal Arts and Sciences, white
Medicine, green
Nursing, apricot
Pharmacy, olive green

Only candidates for the doctoral-level degrees (Doctor of Philosophy, Doctor of Audiology, Doctor of Musical Arts, Doctor of Physical Therapy, Doctor of Dental Surgery, Doctor of Medicine, Juris Doctor, and Doctor of Pharmacy) wear hoods. The velvet trim on the hoods for these degrees conforms to the colors set forth in the intercollegiate code, and, with the exception of the Doctor of Philosophy, the Doctor of Musical Arts, the Doctor of Audiology and the Doctor of Physical Therapy hoods, are the same color as the tassel. The Doctor of Philosophy hood is trimmed in blue, the color appropriate to philosophy, and the Doctor of Musical Arts hood is trimmed in pink, the color for music. The Doctor of Audiology and the Doctor of Physical Therapy are trimmed in teal. In all four instances, the tassel worn is black.

The University of Iowa prohibits discrimination in employment, educational programs, and activities on the basis of race, national origin, color, creed, religion, sex, age, disability, veteran status, sexual orientation, gender identity, or associational preference. The University also affirms its commitment to providing equal opportunities and equal access to University facilities.
