### Campus Visits for Prospective Students

The best introduction to The University of Iowa is a visit to the campus. Come first to the Admission Visitors Center, C110 Pomerantz Center, 213 N. Clinton St. Office hours: weekdays 8:30 a.m. to 4:30 p.m. and selected Saturday mornings. It is best to visit the campus on weekdays, when classes are in session and when other University offices are open. Please call the Office of Admissions to arrange for a campus visit: toll-free nationwide 1-800-553-IOWA (4692); direct dial 319-335-1569.

Visit The University of Iowa online at http://www.uiowa.edu.
The University of Iowa
General Catalog 2005-2006

The General Catalog is published for informational purposes and should not be construed as the basis of a contract between a student and The University of Iowa. Every effort is made to provide information that is accurate at the time of publication. However, information on courses, curricula, fees, policies, regulations, and other matters is subject to change at any time. Visit the Catalog at http://www.registrar-uiowa.edu/registrar/catalog.

The University’s annual viewbook and Transfer Guide provide condensed general information for prospective first-year and transfer students concerning University colleges, departments, schools, and programs. Also included is information on admission, fees, scholarships, student financial aid, housing, and student services. An online course schedule [http://isis.uiowa.edu/courses] provides information about courses offered in a particular semester.

Areas of study and application for admission: Office of Admissions, The University of Iowa, 107 Calvin Hall, Iowa City, IA 52242-1396; toll-free nationwide 1-800-553-IOWA (4692); direct dial 319-335-3847.
E-mail: admissions@uiowa.edu
Web site: http://www.uiowa.edu/admissions

Housing information and application:
Housing Office, The University of Iowa, 17 Burge Hall, Iowa City, IA 52242-1298; 319-335-3009.
E-mail: reshall-housing@uiowa.edu
Web site: http://www.housing.uiowa.edu

Scholarships, loans, and student employment: Office of Student Financial Aid, The University of Iowa, 208 Calvin Hall, Iowa City, IA 52242-1315; 319-335-1450.
E-mail: financial-aid@uiowa.edu
Web site: http://www.uiowa.edu/financial-aid

Honors study: University Honors Program, The University of Iowa, 420 Blank Honors Center, Iowa City, IA 52242-0454; 319-335-1681.
E-mail: honors-program@uiowa.edu
Web site: http://www.uiowa.edu/~honors

The University of Iowa prohibits discrimination in employment, educational programs, and activities on the basis of race, national origin, color, creed, religion, sex, age, disability, veteran status, sexual orientation, gender identity, or associational preference. The University also affirms its commitment to providing equal opportunities and equal access to University facilities. For additional information, contact the Office of Equal Opportunity and Diversity, 319-335-0705.

Undergraduate Study Programs

The University of Iowa offers the following undergraduate majors, pre-majors and interest areas, certificates, and minors. Some majors offer Teacher Education Programs, as indicated below. Each major links to the appropriate Catalog section. Additional information about all majors is available on the Office of Admissions web site Undergraduate Admissions: Majors and Programs.

Majors and Tracks/Emphases

Accounting (B.B.A.)
Actuarial Science (B.S.): see Statistics and Actuarial Science
African American World Studies (B.A.)
American Studies (B.A.)
Ancient Civilization (B.A.): see Classics
Anthropology (B.A., B.S.)
Applied Physics (B.S.): see Physics and Astronomy
Applied Studies (B.A.S.)
Art (B.A., B.F.A.): see Art and Art History Option: Teacher Education Program
Art History (B.A.): see Art and Art History Option: Teacher Education Program
Asian Languages and Literature (B.A.)
Chinese Track
Hindi Track
Japanese Track
Sanskrit Track
Astronomy (B.A., B.S.): see Physics and Astronomy
Athletic Training (B.S.): see Exercise Science
Biochemistry (B.A., B.S.)
Biology (B.A., B.S.): see Biological Sciences
Cell and Developmental Biology Track
Comprehensive Biology Track
Evolution Track
Genetics and Biotechnology Track
Neuroscience Track
Physiology and Molecular Biology of Plants Track
Biomedical Engineering (B.S.E.)  
Bioinformatics/Computational Biology Track  
Biomaterials Track  
Biosystems/Bioimaging Track  
Cardiovascular Biomechanics Track  
Musculoskeletal Biomechanics Track  
Pre-Medicine Track  
Tissue Engineering Track  
Business Administration (B.B.A.)

Pre-Majors and Interest Areas

Information about most pre-majors and interest areas is available on the Office of Admissions web site Undergraduate Admissions: Majors and Programs. If the pre-major or interest area is not listed, click on the link to the corresponding major (e.g., for information on Pre-Actuarial Science, click on Actuarial Science).

Pre-Majors
Pre-Accounting
Pre-Actuarial Science
Pre-Athletic Training
Pre-Business
Pre-Chiropractic
Pre-Clinical Laboratory Sciences (see Clinical Laboratory Sciences in the Catalog)
Pre-Dentistry
Pre-Exercise Science
Pre-Journalism
Pre-Law
Pre-Medicine
Pre-Mortuary Science
Pre-Nuclear Medicine Technology
Pre-Optometry
Pre-Physical Therapy
Pre-Physician Assistant
Pre-Podiatric Medicine  
Pre-Radiation Sciences  
Pre-RN/B.S.N. (listed under Nursing)  
Pre-Social Work  
Pre-Veterinary Medicine  

**Interest Areas**  
Communication Studies Interest  
Dance Interest  
Elementary Education Interest  
Health Promotion Interest (listed under Health and Sport Studies)  
Liberal Studies Interest  
Music Interest  
Nursing Interest  
Pharmacy Interest  
Therapeutic Recreation Interest (listed under Leisure Studies)  

**Certificates**  
Certificate in Aging Studies  
Certificate in American Indian and Native Studies  
Certificate in American Sign Language and Deaf Studies  
Certificate in Entrepreneurship Studies: see Tippie College of Business  
Certificate in Global Health Studies  
Certificate in International Business  
Certificate in Latin American Studies  
Certificate in Medieval Studies  
Certificate in Museum Studies  
Certificate in Philosophies and Ethics of Politics, Law, and Economics  
Certificate in Sexuality Studies  
Certificate in Technological Entrepreneurship: see Tippie College of Business and College of Engineering  
Postbaccalaureate Certificate in Classics  

**Minors**  
Actuarial Science: see Statistics and Actuarial Science  
African American Studies: see African American World Studies  
Aging Studies  
American Indian and Native Studies  
American Studies  
Ancient Civilization: see Classics

**Four-Year Graduation Plan**  
The Four-Year Graduation Plan is a partnership between students and the University. Students who sign the Four-Year Graduation Plan agree to a number of conditions that guide their studies and their progress toward a degree. The
University's colleges and departments also agree to certain conditions. They ensure the availability of courses that students need for graduation; they also guarantee that they will provide certain remedies to a student facing a delay in graduation due to lack of a course, as long as the student has met the conditions of the four-year plan. The Tippie College of Business and the Colleges of Engineering, Liberal Arts and Sciences, and Nursing participate in the four-year plan.

Only students who enter the University directly from high school are eligible to participate in the four-year plan. General information on the Four-Year Graduation Plan is available from the Office of Admissions. Information also is available from the participating colleges and the Academic Advising Center.

### Graduate and Professional Study Programs

See the Graduate College section of the Catalog for a list of University of Iowa graduate degrees and information about graduate programs and procedures.

For information about professional degrees and programs, see the appropriate college sections in the Catalog.

### Course Numbering

Each course in the regular University curriculum has an identifying number, preceded by the number of the college, department, or program that administers the course. For example, "002:001" is the code for the course numbered 001 in the Department of Biological Sciences (002), entitled "Introduction to Botany." Course numbers below 100 designate courses primarily for undergraduates, numbers 100 to 199 designate courses for undergraduates and graduates, and numbers 200 and above designate courses primarily for graduates.

#### Tippie College of Business

- 6A Accounting
- 6B Business Administration
- 6E Economics
- 6F Finance
- 6J Management and Organizations
- 6K Management Sciences
- 6M Marketing
- 6N M.B.A. Program
- 6T Business Administration Nondepartmental
- 620 Business Nondepartmental

#### College of Dentistry

- 82 Operative Dentistry
- 83 Endodontics
- 84 Prosthodontics
- 86 Oral Pathology, Radiology, and Medicine
- 87 Oral and Maxillofacial Surgery
- 89 Orthodontics
- 90 Pediatric Dentistry
- 92 Periodontics
- 111 Preventive and Community Dentistry
- 112 Dentistry Nondepartmental
- 114 Family Dentistry
- 151 Oral Science

#### College of Education

- 7B Educational Policy and Leadership Studies
- 7C Counseling, Rehabilitation, and Student Development
- 7E Elementary Education
- 7P Educational Psychology, Measurement, and Statistics
- 7S Secondary Education
- 7U Special Education
- 7W Instructional Design and Technology
- 7X Education Interdivisional

#### College of Engineering

- 51 Biomedical Engineering
- 52 Chemical and Biochemical Engineering
- 53 Civil and Environmental Engineering
- 55 Electrical and Computer Engineering
- 56 Industrial Engineering
- 57 Engineering Core
- 58 Mechanical Engineering
- 59 Core Engineering
## Learning at Iowa

### Graduate College
- 21 Library and Information Science
- 22A Applied Mathematical and Computational Sciences
- 102 Urban and Regional Planning

14 Learning at Iowa

Grading System

The University uses a letter grading system for individual courses but computes grade-point average according to a numerical scale. Grade-point averages are displayed at the bottom of students' grade reports and are truncated so as not to exceed 4.00. All of the following marks appear on the permanent record.

**Grade points for each semester hour**

- A+ = 4.33
- A = 4.00
- A− = 3.67
- B+ = 3.33
- B = 3.00
- B− = 2.67
- C+ = 2.33
- C = 2.00
- C− = 1.67
- D+ = 1.33
- D = 1.00
- D− = 0.67
- F = 0

Not used in computing grade-point average:

- S = Satisfactory
- P = Pass
- U = Unsatisfactory (Graduate College only)
- N = Nonpass

Other marks on the permanent record:

- I = Incomplete
- O = No grade reported
- R = Registered
- W = Withdrawn
- # = Second-grade-only option
- * = Honors

The College of Law uses a numeric grading system.
Admission

### Dean: Linda Maxson

### Executive Associate Dean: Raúl Curto

### Associate Dean for Academic Programs: Helena Detmer

### Associate Dean for Research and Development: Joseph K. Kearney

### Web Site: [http://www.clas.uiowa.edu](http://www.clas.uiowa.edu)
The College of Liberal Arts and Sciences (CLAS) is the oldest and largest of the 11 colleges that make up The University of Iowa. Students from all over the United States and more than 50 other nations study together in the college. Every University of Iowa undergraduate takes courses offered by the college, and more than 75 percent of undergraduates earn their degrees from the College of Liberal Arts and Sciences.

The college provides a comprehensive liberal arts education and advanced education in specialized areas. It offers more than 50 majors, as well as certificates, minors, and opportunities for interdisciplinary work. Students can even design their own majors, through the B.A. in Interdepartmental Studies.

Students participate in the college’s decisions by serving on the Dean’s Student Advisory Committee and as members of the Educational Policy Committee and the General Education Curriculum Committee. Students also are invited to serve on ad hoc college committees. Many departments have an undergraduate student group or association, and students from the College of Liberal Arts and Sciences serve in the University’s Student Government.

The College on the Internet

The college’s web site (http://www.clas.uiowa.edu) serves as a gateway to departmental web sites, where departments post extended and updated information about their programs, faculty, and students. The college’s site also includes information from the Office of the Dean and the CLAS Academic Programs & Services office, news of the college, and links to other helpful sites. Students can find information on academic policies and procedures, including the college’s General Education Program, in the Student Academic Handbook. A print version of the college’s handbook is published each fall as part of the booklet Information for University of Iowa Students.

CLAS Academic Programs & Services Office

The CLAS Academic Programs & Services office is an integral part of the College of Liberal Arts and Sciences Office of the Dean. Led by the associate dean for academic programs, the staff welcomes students wishing to declare or change majors, file second-grade-only options, or request permission to register late, add or drop a course late, or withdraw an entire registration after the established deadlines.

Staff members answer questions about the General Education Program, graduation requirements, and college policies affecting students; work with students on academic probation and those who are reinstated; conduct semiannual reviews of students on academic probation and take dismissal actions when students do not meet academic standards; and respond to requests for reinstatement to the college.

Students in the College of Liberal Arts and Sciences may request exceptions to the rules and requirements of the college by petitioning the Student Appeals Committee through CLAS Academic Programs & Services.

CLAS Academic Programs & Services also considers evidence and recommends appropriate disciplinary action for student plagiarism, cheating, forgery, and other academic misconduct.

Nondepartmental Courses

610:029 First-Year Seminar 1-2 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Prerequisite: first- or second-semester standing.

610:030 Leadership in a Diverse Society 1 s.h.
Elements of diversity and culture (e.g., race/ethnicity, gender, class, disability, sexual identity, religion, geography); multidisciplinary perspectives and materials; understanding of one’s self and others, with the goal of developing skills necessary in today’s world.

610:099 Peer Mentoring 1-2 s.h.
Opportunities to participate in classroom and course activities as mentor for other students.

610:150 U.S. Latino/a Cultural Studies 3 s.h.
Topics vary.
The African American World Studies Program focuses on the study of people of the African diaspora, particularly in the United States. The program is interdisciplinary, drawing cooperating faculty from American studies, anthropology, art, education, English, French, geography, history, political science, Spanish and Portuguese, sociology, and women’s studies.

Because a thorough understanding of African American and African cultures cannot be achieved through study restricted to the perspective of a single discipline, all students are required to pursue courses in both humanities and social sciences. African American world studies continually expands its perspectives by developing or cross-listing courses that fuse the knowledge drawn from many disciplines in the humanities and social sciences.

The program originated in 1969 through courses intended to foster awareness of African Americans’ role in the development of the United States; those courses also were designed to promote understanding of the conditions and concerns of African Americans. Since then, the courses have been organized into a curriculum that includes a Bachelor of Arts in African American world studies, an undergraduate minor in African American studies, a Master of Arts in African American studies, and concentrations of African American studies in programs leading to a B.A., M.A., or Ph.D. in American studies. Students seeking the Ph.D. in English or history also can organize courses in African American literature or African American history into a special field or cognate area.

Although most of the students in the Ph.D. program are preparing to work as teachers and administrators in colleges and universities, the B.A. and M.A. programs provide valuable backgrounds for students seeking careers in community work, public school teaching, religion, government, political science, and law.

### Undergraduate Program

#### Bachelor of Arts

The major in African American world studies requires 30-33 s.h. (10 or 11 courses). At least 15 s.h. must be earned in courses numbered 100 or above. Students must maintain a g.p.a. of at least 2.00 in the major. Transfer course work is evaluated individually.

**INTRODUCTORY COURSES**

Students are required to complete both 129:060 Introduction to African American Society and 129:061 Introduction to African American Culture.

- **Introduction to African American Society**: presents thematic concerns of peoples of African descent and matters related to diaspora. The course includes a socioeconomic approach and may include readings in political science, history, sociology, geography, anthropology, and other disciplines. Introduction to African American Culture presents themes in African American cultural studies. It includes readings in literature, music, film studies, religious studies, and the visual arts.

- Neither 129:060 nor 129:061 is a prerequisite for 100-level courses, but majors are strongly urged to take at least one of the introductory courses before enrolling in advanced courses.

**SOCIAL SCIENCE AND HUMANITIES CORE**

Students are required to take two core courses (3 s.h. each), one each in the humanities and social sciences. Students may choose from courses in African, Caribbean, or African American literature or African, Caribbean, or

---

**Professor**: Peter Nazareth (English/African American World Studies)

**Associate professors**: Michaeline Crichlow, Fredrick Woodard (African American World Studies/English), Richard B. Turner (African American World Studies/Religious Studies)

**Assistant professor**: Vershawn Young (Rhetoric/African American World Studies)

**Undergraduate degree**: B.A. in African American World Studies

**Undergraduate nondegree program**: Minor in African American Studies

**Graduate degree**: M.A. in African American World Studies

**Graduate nondegree programs**: cognate concentrations leading to M.A. and Ph.D. in American Studies and other programs

**Web site**: [http://www.english.uiowa.edu/AfricanAmerican/](http://www.english.uiowa.edu/AfricanAmerican/)
African American history. For a list of approved courses, contact the African American World Studies Program. Students who wish to substitute related courses offered by other departments should consult the director of undergraduate studies.

FOCUS AREA

Students select six courses (total of 18 s.h.) that constitute a focused area of interest. The focus area may include courses in the social sciences, humanities, or arts. Courses offered by other departments and cross-referenced with African American world studies may be counted toward this requirement.

With approval from the program, students may enroll in one or two courses offered by other departments, but not cross-referenced with African American world studies, as partial fulfillment of the focus area requirement.

Students who use an advanced seminar to meet the advanced seminar and research participation requirement (see below) may count the seminar toward the focus area requirement.

LANGUAGE REQUIREMENT

The language requirement for the African American world studies major is the same as that of the College of Liberal Arts and Sciences General Education Program; visit the College of Liberal Arts and Sciences web site (http://www.clas.uiowa.edu).

RESEARCH PREPARATION OR ADVANCED SEMINAR

Students must complete a course numbered 100 or above that includes some instruction in interdisciplinary research methods, or an advanced seminar.

The program maintains lists of courses that satisfy the research preparation requirement, all of which require students to write a formal research paper.

While an advanced seminar is not required of all majors, students who take an advanced seminar may use the seminar to satisfy the research preparation requirement. Students who enroll in an advanced seminar are required to take five courses in their focus interest area; the advanced seminar counts as the sixth course. Only courses offered by the African American World Studies Program may be used as advanced seminars.

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

Before the third semester begins: at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: at least two courses in the major, including 129:060 and 129:061, and at least one-half of the semester hours required for graduation

Before the seventh semester begins: four more courses in the major (for a total of six) and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: at least eight courses in the major

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Honors

The African American world studies honors program offers students the opportunity to pursue special interests in individual, in-depth research. Honors students in African American world studies must be members of the University Honors Program, which requires students to maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University Honors Program for more information). Honors students complete 36 s.h. of course work, including all of the required course work for the major and up to 6 s.h. of honors course work.

Under the guidance of the undergraduate honors adviser, the honors student defines a research project using primary sources. Students make project proposals by the end of their junior year. Each student completes a project under the guidance of a supervising faculty member and may register for up to 6 s.h. in 129:095 Honors Project. Results are presented in a senior essay to a committee of three faculty members, including the supervising faculty member, the honors adviser, and a third faculty member of the student’s choice. When the honors adviser is the supervising faculty member, the student may select second and third faculty members. The
student’s committee may choose to hear an oral defense of the final project, usually in the 12th week of the student’s last semester.

**Minor**

African American world studies offers an undergraduate minor in African American studies. The requirements conform to the general requirements for minors in the College of Liberal Arts and Sciences. In consultation with their advisers, students select five courses (15 s.h.) in African American world studies courses. Four of these courses (12 s.h.) must be numbered 100 or above and must be taken at The University of Iowa.

Students must earn a g.p.a. of at least 2.00 in all courses in the minor. Courses numbered 100 and above may be selected from 129-prefix courses.

Students who wish to pursue a minor should consult with an adviser in African American world studies as early as possible. Advisers recommend that students select an introductory course from 129:008, 129:050, 129:060, and 129:061; and that they choose 129:116 or 129:117, and 129:189 as two of their upper-level courses.

**Graduate Programs**

**Master of Arts**

The interdisciplinary curriculum leading to a Master of Arts in African American studies provides an intensive, organized, graduate-level examination of African American and African cultures and experience. Such a program especially benefits individuals preparing for community college teaching, work with community-service organizations, or other careers in which an understanding of African Americans and Africans may be necessary or helpful.

**Curriculum Requirements**

The M.A. requires 34 s.h. of postbaccalaureate study. Requirements include the following.

- 129:211 Introduction to Research in African American Culture 3 s.h.
- 129:312 Advanced Research in African American Culture (thesis/project) 4 s.h.
- Additional African American world studies courses (must earn at least 12 s.h.) 12 s.h.
- Electives 15 s.h.

Students should choose electives in consultation with their advisers, to determine which courses are approved for an M.A. Electives may be chosen from courses numbered above 100. Ideally, electives should share either a disciplinary or thematic connection.

Because the African American world studies advisory committee encourages doctoral study for those who have the ability, interest, and resources, it recommends that 6 of the 15 s.h. of electives in the Master of Arts program be used to explore doctoral education in disciplines outside African American world studies. Possible fields of study include American studies, anthropology, education, English, geography, history, and sociology. Students are encouraged to select at least one-half of the courses in the M.A. curriculum from those numbered above 200.

**Language/Tool Requirements**

No foreign language or tool is required for the Master of Arts in African American world studies, but students considering doctoral study in another field are encouraged to complete one language/tool requirement for that field while studying at the master’s level.

**Thesis/Project Requirements**

A thesis is optional for the Master of Arts. Students who elect to write a thesis must explore a topic of African American culture and/or experience using research from more than one discipline. The maximum credit for a thesis is 4 s.h.

Students who do not prepare a thesis are required to develop, in consultation with an adviser, a project related to African American culture and/or experience. When completed, the project must be presented and defended before an appropriate class in African American studies. Credit for the thesis or project usually is earned through registration in 129:312 Advanced Research in African American Culture (4 s.h.).

**Admission**

Unconditional graduate admission to African American world studies requires that students meet the admission requirements of the Graduate College, have an appropriate educational background in literature and the social sciences, at least 6 s.h. of college credit in African or African American literature and/or history courses, and a g.p.a. of at least 2.70 in previous college courses in African American studies. Students may be asked to take, without credit
toward the master's degree, courses to remedy
deficiencies in their undergraduate preparation.

Applicants for admission must provide three
letters of recommendation from former professors
and a sample of written scholarly work.

The African American World Studies Program
admissions subcommittee makes
recommendations for admission.

**Concentration Leading
to Ph.D. in American Studies**

Generally, students seeking a Ph.D. in American
studies with a concentration in African American
studies are preparing to be teachers or research
scholars at the college or university level.

Students seeking the African American studies
concentration ordinarily take a minimum of
36 s.h. of graduate study in African American
world studies and write a dissertation on a topic
in African American culture. Consult both the
chair of the African American World Studies
Program and the chair of the American Studies
Department for more information.

**Cognate Areas, Special Fields**

Students can take concentrations of African
American studies courses as cognate areas or
special fields in Ph.D. programs in history,
English, and other disciplines. Consult an adviser
in the African American World Studies Program
for more information.

**Related Courses**

Although they are not offered by African
American world studies, the following courses
are recommended for interested students. For
course descriptions, see the appropriate
departmental sections of the Catalog.

**HEALTH AND SPORT STUDIES**

| 028:074 Inequality in Sport           | 3 s.h.  |

**HISTORY**

| 16A:061 American History 1492-1877    | 3 s.h.  |
| 16A:062 American History 1877-Present | 3 s.h.  |
| 16A:164 Civil War and Reconstruction  | 3 s.h.  |
| 16A:165 The Gilded Age in America     | 3 s.h.  |
| 16A:166 The Progressive Era in America| 3 s.h.  |
| 16A:167 The New Era and The New Deal 1920-1940 | 3 s.h. |
| 16A:168 The Contemporary U.S. 1940-Present | 3 s.h. |

**POLITICAL SCIENCE**

| 030:146 African Development            | 3 s.h.  |
| 030:150 Politics of Emerging Market Economies | 3 s.h. |

**SOCIOLOGY**

| 034:066 Social Inequality              | 3 s.h.  |

**SOCIAL WORK**

| 042:147 Discrimination, Oppression, and Diversity | 3 s.h. |

**Cocurricular Activities**

**African American Theatre**

Sponsored academically through the Department of Theatre Arts, 049:190-049:191 African American Theatre I-II give participants instruction and experience in theatrical productions of works by Black authors.

**Afro-American Cultural Center**

African American world studies encourages students to use facilities of the Afro-American Cultural Center. The center serves as a museum and library of educational and cultural artifacts and exhibits of Black culture, providing cultural enrichment for Black people of the Iowa City community and a cultural meeting place for Black students. It also attempts to provide a knowledge of Black culture that will promote interracial understanding among all members of the University community.
Student Association

The African American Studies Student Association attempts to promote interest in Black culture by sponsoring programs on various topics. Any University of Iowa student interested in African American world studies is eligible to become a member.

Courses

For Undergraduates

129:008 Literatures of the African Peoples 3 s.h.
Works in English by authors of African descent from America, continental Africa, the Caribbean. GE: foreign civilization and culture or humanities. Prerequisite: 08G:001. Same as 08G:014.

129:050 Introduction to African American Religions 3 s.h.
Same as 032:034.

129:060 Introduction to African American Society 3 s.h.
Social and cultural history of African Americans through framework of general works in anthropology, sociology, history. GE: cultural diversity or social sciences.

129:061 Introduction to African American Culture 3 s.h.
Interdisciplinary look at Black culture in the United States through significant contributions of the humanities (music, art, literature, drama, philosophy) to development of Black culture. GE: cultural diversity or humanities. Same as 045:030.

129:065 Introduction to African American History 3 s.h.
Topics vary. Same as 16A:065.

129:080 Critical Skills Seminar 3 s.h.

129:095 Honors Project arr.
Independent research and writing on interdisciplinary topic. Prerequisite: consent of instructor.

129:099 Senior Seminar 3 s.h.
African American, African, and African Caribbean culture and experience; comparative approach to synthesize students’ earlier study. Prerequisites: African American world studies senior standing and consent of instructor.

For Advanced Undergraduate and Graduate Students

129:107 Introduction to the Art of West Africa 3 s.h.
Same as 016:021.

129:110 Introduction to the Art of Central Africa 3 s.h.
Same as 016:022.

129:113 Africans in the New World 3 s.h.
Social and cultural history of Black populations in the New World. Same as 113:113.

129:115 Social Anthropology of the Caribbean 3 s.h.
GE: foreign civilization and culture. Same as 113:118.

129:116 African American Literature I 3 s.h.
African American writers from 18th century to 1940 examined in relation to cultural, social, literary, historical influences. Same as 008:116.

129:117 African American Literature II 3 s.h.
Literary developments among African Americans 1935 to present; writers and works in relation to cultural, political, social, literary influences on African Americans. Same as 008:117.

129:119 African Literature 3 s.h.
Portrayal in fiction of contemporary African states. Same as 008:119.

129:122 African-Americans and Mass Communication 3 s.h.
GE: cultural diversity. Same as 019:165.

129:123 Twentieth Century African American Religion: Civil Rights to Hip Hop 3 s.h.
Same as 032:126.

129:124 Seminar: Black Culture and Experience 3 s.h.
Black culture and experience, nationally and internationally, as revealed through humanities and social sciences.

129:128 Racial Narrative and American Performance 3 s.h.
Same as 010:128, 048:128.

129:130 African American Literary/Rhetorical Criticism I 3 s.h.
Same as 008:160, 010:132.

129:131 African American Literary/Rhetorical Criticism II 3 s.h.
Prerequisite: 008:160 or 010:132 or 129:130. Same as 008:166, 010:133.

129:132 History and Environment in Africa 3 s.h.
Same as 16W:122.

129:135 Francophone Literature of the African Diaspora 3 s.h.
Same as 009:163.

129:137 History of Slavery in the U.S.A. 3 s.h.
Same as 16A:147.

129:138 African and African American Interactions 3 s.h.
The slave trade, its legacy in Africa and the Americas; cultural, political interaction between Africans and African Americans; images of Africa in African American thought; Afrocenrism, its African critics. Same as 16W:119.

129:139 African American Poetry 3 s.h.
Same as 008:139.

129:140 Topics in African American Studies arr.
Different topic each semester.

129:145 Elementary Swahili I 3-4 s.h.
GE: foreign language. Same as 103:125.

129:146 Elementary Swahili II 3-4 s.h.
GE: foreign language. Same as 103:126.

129:147 Intermediate Swahili I 3-4 s.h.
GE: foreign language. Same as 103:127.

129:148 Intermediate Swahili II 3-4 s.h.
GE: foreign language. Same as 103:128.

129:149 Advanced Swahili 3-4 s.h.
Same as 103:129.

129:151 Race, Ethnicity, and International Relations 3 s.h.
Same as 113:181.

129:153 The Civil Rights Movement 3 s.h.
Same as 045:153.
129:157 Peoples and Cultures of Africa 3 s.h.
Ethnography of Africa; what African life is like and how it has been described and understood by outsiders.

129:158 Topics in African Cinema 3 s.h.
Same as 008:157.

129:159 Anthropology of African Art 3 s.h.
Theoretical perspectives and useful methods for studying African art and material culture in cultural and historical context; focus on synthesizing perspectives, methods of anthropology and art history; movies, slides of African art.

129:163 Precolonial African History 3 s.h.
Africa to 1880; introduction of oral tradition, other sources; political development; ecological change; slavery and the slave trade. GE: foreign civilization and culture. Same as 16W:120.

129:164 African History since 1880 3 s.h.
Africa in colonial, post-colonial periods; economic and political structures of colonialism; social change, political life in the 20th century. GE: foreign civilization and culture. Same as 16W:121.

129:175 African American Theatre I 3 s.h.
Theory and performance; study of history and theory related to stage presentations or performances by Black Americans; responsibility for African American Theatre productions. Same as 049:190.

129:176 Roots/Routes: Introduction to the Study of Diaspora 3 s.h.
The role of world economic development in creating societies and cultures, thus shaping flows and counterflows of the world's diverse peoples and creating distinct spaces. Prerequisite: consent of instructor.

129:179 Independent Study in Black Culture arr.
Prerequisite: consent of instructor.

129:181 African American Autobiography 3 s.h.
Same as 008:137.

129:184 Black Metropolis: Twentieth Century 3 s.h.
Black popular culture and the African American urban experience. Same as 16A:184.

129:187 African American History 1865-Present 3 s.h.
Same as 16A:188.

129:189 Themes in African American History 3 s.h.
Same as 16A:185.

129:191 African American Theatre II 3 s.h.
Advanced version of 129:175, with focus on different plays; for theatre arts and African American world studies majors. Prerequisite: consent of instructor. Same as 049:191.

129:192 Elvis as Anthology 3 s.h.
Redefining the music of other performers through listening to Elvis, watching video and movie clips, discussing relevant texts of fiction, nonfiction.

For Graduate Students

129:205 Gender and Race in Nineteenth Century U.S. arr.
Same as 016:205, 131:206.

129:211 Introduction to Research in African American Culture arr.
Methodologies, bibliographies, issues, resources significant to study of African American culture. Prerequisite: consent of instructor. Same as 045:210.

129:212 Advanced Readings in Black Culture arr.
Textual, social, political analyses of works by Black authors.

129:221 Analytical Exposition in Afro-American Studies 3 s.h.
Synthesis of primary and secondary research materials for analytical and comprehensive studies in Black culture, other related graduate courses, and future publications.

129:225 Seminar: Problems in African Art 2-3 s.h.
Repeatable. Same as 01H:310.

129:227 Three African Writers 3 s.h.
Same as 008:227.

129:231 Crossing Borders Seminar 3-4 s.h.

Same as 016:245.

Same as 016:246.

Interpretations and methods applied by historians in varied world regions to forms of oral history, ranging from old oral traditions to contemporary autobiographical testimony. Same as 016:259.

Same as 016:287, 131:287.

129:312 Advanced Research in African American Culture arr.
Seminar or independent study; for graduate students concentrating in African American studies. Prerequisites: basic African American studies courses and 129:211.

129:350 Seminar: Critical Theory 3 s.h.
Theory in context of African American literature, culture.
The Department of American Studies provides an interdisciplinary introduction to American culture, past and present. It helps students acquire a broad familiarity with the dynamics of cultural experience and explore aspects of life in the United States, such as popular and fine arts, institutions, values, gender and ethnic relations, artifacts, and the everyday life of a diverse citizenry.

**Undergraduate Program**

**Bachelor of Arts**

The B.A. program in American studies stresses broad training in cultural analysis and communication. Although it offers no explicit vocational training, the program provides preparation for careers in business, education, government, journalism, or social service; for advanced study in the humanities, the social sciences, theology, or business; or for professional study in law or medicine. Internships can be arranged, through the University's Pomerantz Career Center.

**Required Courses**

A distinctive feature of the American studies major is the opportunity to develop broad training in cultural analysis as well as emphasis of particular interests within the study of American culture. With the help of their American studies adviser, students may elect to pursue one of three focus areas within American studies, or they may create an individual plan of study. Each focus area allows students to group courses in American studies and other departments around a specific interdisciplinary theme, topic, or set of social issues. Focus areas are described below.

Shortly after declaring a major, a student should meet with his or her faculty adviser to explore the range of course work available and to begin shaping an individual plan of study. By the student's second term in the major, the student and adviser should have agreed upon a plan of study and focus area for completing the major requirements.

The major usually consists of 12 courses totaling 36 s.h. Courses in American studies must include 045:020 Sources for American Studies and 045:090 Seminar in American Cultural Studies. Requirements are as follows.

- **American studies requirement:** six core courses, including 045:020 and 045:090 18 s.h.
- **American history:** two courses 6 s.h.
- **Special interest focus area:** four courses in American studies and/or other departments 12 s.h.

At least 24 s.h. of course work toward the major must be earned at The University of Iowa.

**American Studies Focus Areas**

Students should consult regularly with the Department of American Studies about courses offered by American studies and other departments that apply toward each focus area. No more than two courses from a single department outside American studies may be applied toward any one focus area.

**DIVERSITY AND DIFFERENCES**

Students choose this focus to develop understanding of how social differentiation along the lines of gender, race, sexuality, social class, region, national origins, and age shape institutions and cultural practices in the United States. Emphasis is on the historic emergence of categories of social difference, and their interactions, especially as revealed in cultural practices and artifacts, geography and cityscapes, leisure, and popular expression.
AMERICAN ARTS, LITERATURE, AND POPULAR CULTURE

Students who choose this focus examine artistic creations to discover how they are shaped by cultural preconceptions, norms, and standards, and how in turn these expressive forms affect ongoing developments in cultural life. Emphasis is on skills in the formal analysis of artistic artifacts, historical inquiry, and cultural contextualization.

AMERICAN SOCIETY, POLITICS, AND EVERYDAY LIFE

Students who choose this focus consider the dynamics of social change, the emergence and fate of political movements, and the forms and practice of everyday life in America. The area encompasses the tradition of revolution in America, the effects of technological and economic change, and the roles of the family, workplace, and community from the colonial era to the digital age.

INDIVIDUALLY DESIGNED FOCUS AREA

Individually designed focus areas may concentrate on an interdisciplinary topic, theme, group of people, or time period. Students who wish to design their own interdisciplinary focus area should consult with their American studies adviser for appropriate courses.

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

Before the third semester begins: at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: declaration of the major, discussion of a plan of study with an American Studies adviser, and at least one-half of the semester hours required for graduation

Before the seventh semester begins: at least six courses from the plan of study and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: at least nine courses from the plan of study

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Honors

The American studies honors program offers students the opportunity to pursue special interests in individual, in-depth research. Honors candidates must be members of the University Honors Program, which requires that students maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University Honors Program for more information).

Under the guidance of the undergraduate honors adviser, honors candidates define a research project. Project proposals ideally are made by the end of the junior year. Each candidate completes the project under the guidance of a supervising faculty member and may register for up to 6 s.h. in 045:095 Honors Project.

Results of the research project are presented in a senior essay to a committee of three faculty members, including the supervising faculty member, the honors adviser, and a third faculty member of the student’s choice. (When the honors adviser is the supervising faculty member, the candidate may select the other two faculty members.) The candidate’s committee may choose to hear an oral defense of the final project, usually in the 12th week of the last semester.

Minor

Students interested in a minor in American studies should consult American studies faculty members. The minor requires a minimum of 15 s.h. in American studies with a g.p.a. of at least 2.00. At least 12 of the 15 s.h. must be taken at The University of Iowa in advanced courses. All core courses numbered above 045:001 are considered advanced for the minor.

Graduate Programs

Master of Arts

The M.A. in American studies may be a terminal degree or preliminary to a Ph.D. in American studies or another discipline. It usually includes 12 courses totaling 36 s.h. Requirements include the following.

045:200-045:201 Theory and Practice in American Studies I-II 6 s.h.

Two other core courses in American studies 6 s.h.
M.A. students also select from five to eight additional courses relevant to a topic or period of cultural history. These courses may be grouped to address more than one topic and must be chosen from more than one discipline; they usually include at least two courses in American history and courses focusing on American diversity.

Master’s degree candidates must perform satisfactorily in 045:400 Masters Preparation (3 s.h.), which includes a comprehensive examination on course work and basic concepts. The M.A. also may be taken with thesis, for credit up to 6 s.h. Students should consult the program chair for details.

**Joint M.A./J.D.**

A joint program leading to an M.A. in American studies and a J.D. from the College of Law provides a broad cultural context for the study and practice of law. Similar joint programs can be arranged in other professional fields, such as journalism and social work.

**Doctor of Philosophy**

The Ph.D. program in American studies requires a minimum of 72 s.h. of course work, which includes a core of American studies courses in interdisciplinary methods and substantial course work in two major fields. Course requirements are as follows.

- 045:200-045:201 Theory and Practice in American Studies I-II (introductory seminars) 6 s.h.
- Two or more additional core graduate courses in American Studies 6 s.h.
- First major field (at least six courses) 18 s.h.
- Second major field (at least six courses) 18 s.h.
- Electives 6 s.h.
- Dissertation (up to 18 s.h.)

Although American studies Ph.D. students are permitted considerable flexibility in planning a program, they must meet certain basic requirements.

The introductory seminars 045:200-045:201 Theory and Practice in American Studies I-II should be taken as early as possible, one during each of the first two years in residence. The additional American Studies graduate courses provide further models for interdisciplinary inquiry.

The two major fields may be defined to correspond with the student’s strongest intellectual interests, but they must be interdisciplinary in concept and multidisciplinary in scope. Each must include course work from more than one of the University’s departments and programs. They also should be designed to emphasize a generous but well-defined period of American cultural history; therefore, historical knowledge is essential to all doctoral plans of study. The two major fields may, and usually should, have an intellectual relationship with each other.

The program expects doctoral students to address the cultural diversity of American life in their course work and reading.

**ADMISSION TO PH.D. CANDIDACY**

Advising is important. Each doctoral student and his or her faculty adviser map out a coherent plan of study that reflects the student’s particular interests in American cultural studies. The plan of study usually has been formulated tentatively by the end of the first year in residence. During the first semester of the second year, the student submits the plan to the entire faculty, which reviews it and meets with the student to discuss it. When the faculty accepts the plan of study, the student is admitted to Ph.D. candidacy. In the next three or four semesters, the candidate completes the established plan and begins to prepare for comprehensive examinations.

**COMPREHENSIVE EXAMINATIONS**

The comprehensive exam comprises three written portions and an oral examination.

The position paper is always written in advance of the rest of the exam and under the supervision of an American studies faculty member. In it, the candidate lays out his or her general approach to American cultural studies and provides an exemplification of that approach.

The remaining two written exams explore the candidate’s major fields; these are at least four hours long, but may be given on a take-home basis at the examiner’s discretion.

The oral examination covers material from the position paper and the two written exams.

**THESIS**

The final requirement for the Ph.D. in American studies is presentation of an acceptable thesis on an interdisciplinary topic whose investigation involves more than one field or discipline.
Internships

Qualified graduate students in American studies can arrange internships with a number of local agencies, including the State Historical Society of Iowa, the Division of Historic Preservation, the University of Iowa Museum of Art, the Iowa Humanities Board, Brucemore, the Herbert Hoover Presidential Library and Museum, and the Putnam Museum of History and National Science. With special permission, candidates conducting research during such on-the-job training may receive academic credit through 045:320 Independent Study or 045:350 Material Culture Internship. Other internships with social agencies, government, or business also may be arranged.

Courses

Primarily for Undergraduates

045:001 American Values 3 s.h.
Representative texts, artifacts, cultural values in historical and contemporary perspective. GE: humanities.

045:005 American Issues 3 s.h.
Representative issues: mass and American culture; cultural history of the Civil War era; American history, literature, culture.

045:020 Sources for American Studies 3 s.h.
Variety of historic and contemporary sources, such as literature, law, photography, painting, film, TV, music, fashions, environments, events of everyday life.

045:029 First-Year Seminar 2 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities, fieldtrips). Prerequisite: first- or second-semester standing.

045:030 Introduction to African American Culture 3 s.h.
GE: cultural diversity or humanities. Same as 129:061.

045:060 Sexuality and Popular Culture in the Postwar U.S. 3 s.h.
Same as 008:050, 154:060.

045:074 Popular Music in American Culture 3 s.h.
History, development, and social context of American popular music in the 20th century. Same as 016:074.

045:075 American Popular Music 3 s.h.

045:085 America as a Foreign Country 3 s.h.
American features and circumstances that draw attention from non-Americans.

045:090 Seminar in American Cultural Studies 3 s.h.
Interdisciplinary perspectives on a single theme or period.

045:095 Honors Project 3 s.h.
Independent interdisciplinary research, writing.

045:100 Independent Study 3 s.h.
Prerequisite: consent of instructor.

For Undergraduate and Graduate Students

045:115 American Culture of the 1930s 3 s.h.
The Great Depression through historical records, literature, photography, movies, other arts; emphasis on expression of American life and thought, social and cultural experience.

045:116 Cultural Geographies of North America 3 s.h.
Same as 044:115.

045:123 American Literature and History 3 s.h.
Examination of fictional fictions (novels about history), their relationship to historical interpretation. Same as 008:123.

045:130 Dance in American Culture 3 s.h.
Social, popular, theatrical forms since the 1960s; emphasis on relationships among aesthetics, the body, cultural politics.

045:139 Race, Gender, Class, and the American Frontier 3 s.h.
How race, gender, and class shape cross-cultural encounter and imperial expansion on regional frontiers; how frontiers are represented in literature, art, and film.

045:145 Immigration and American Culture 3 s.h.
Immigrants and immigrant communities.

045:150 Topics in American Cultural Studies 2-4 s.h.
Special topics in American history, literature, culture.

045:151 American Business Cultures 3 s.h.
Examines the cultural construction of business, corporate ethics, and related concepts of national identity in the United States, social and cultural experience.

045:152 Fairs and Amusement Parks 3 s.h.
Nineteenth- and 20th-century international expositions, amusement parks, and theme parks as cultural events of U.S. self-definition.

045:153 The Civil Rights Movement 3 s.h.
History of the American civil rights movement. Same as 129:153.

045:154 Foodways in American Culture 3 s.h.
Cultural signification of production, distribution, and consumption of food in the United States.

045:155 Performing America Oueerly 3 s.h.

045:156 Arts in America 3 s.h.
Relationship of the arts to their cultural context and to popular culture, focus on contemporary arts (e.g., music, dance, visual arts, theater, literature).

045:157 Gender on Stage 3 s.h.
How gendered bodies and roles are displayed on stage: popular, elite, experimental, traditional, mass media theatre, dance, music; performing gender in everyday life, theorizing spectatorship, politics of drag, feminist theatre. Same as 131:157.

045:159 Representations of Revolution 3 s.h.
Cultural politics of the revolutionary tradition in American culture from 1776 to 1976.

045:161 Museums and the Politics of Representation 3 s.h.
Types of museums (natural history, art, ethnic, social history, eccentrics) at national, regional, local levels.

*American Studies*
Anthropology

Chair: Michael Chibnik
Professors: Thomas H. Charlton, Michael Chibnik, Russell Ciochon (Anthropology/Pediatric Dentistry), Virginia Dominguez, Melanie Dreher (Nursing/Anthropology), Ellen Lewin (Women's Studies/Anthropology), Toni Tripp Reimer (Nursing/Anthropology)
Professors emeriti: Mac Marshall, Margery Wolf
Associate professors: Rudolf Colloredo-Mansfeld, James Enloe, Robert Franciscus, Laura Graham, Katina Lillios, Douglas Midgett, Scott Schnell, Glenn Storey (Classics/Anthropology)
Associate professor emeritus: Marshall B. McKusick
Adjunct associate professors: Kevin Kelly, Althieta Monagan, Rachelle Saltzman
Assistant professors: Nanette Barkey (Anthropology/Community and Behavioral Health), William Graves, Adi M. Hastings, Meena R. Khandelwal (Women's Studies/Anthropology), Erica Prussing (Anthropology/Community and Behavioral Health)
Adjunct assistant professors: John Doeshkuk, Brightine French, Karen Haslett, Velana Huntington, Stephen C. Laskin, Maureen McCue, Elizabeth Prine Pauls
Adjunct instructor: Shirley J. Schermer

Undergraduate Program

The Department of Anthropology offers the Bachelor of Arts and the Bachelor of Science. Either program is appropriate preparation for advanced training or careers in anthropology, allied fields, and professional programs. Students who complete an anthropology major gain special understanding of human relations and expertise for jobs involving international or cross-cultural work, cultural resource management, and social and ethnic diversity in the United States.

Upon graduation, anthropology majors embark on careers in government work, international affairs, gerontology, urban and regional planning, social work, marketing, museum work, and education. Others pursue graduate study in law, business, and health care as well as anthropology and related social science disciplines. Some are employed in cultural resource management.

The B.A. program has been designed to offer a comprehensive overview of anthropology’s four main subfields and the broadest possible cross-cultural background. Students with interests in physical anthropology, archaeological lab work, and quantitative approaches within sociocultural or linguistic anthropology are encouraged to pursue the Bachelor of Science.

B.A. students must complete 33 s.h. in the major; at least 15 s.h. must be earned at The University of Iowa.

B.S. students must complete 42 s.h. (not including the semester hours for the minor); at least 15 s.h. must be earned at The University of Iowa.

Common Requirements

All anthropology majors must complete the following courses.

One of these:
113:003 Introduction to the Study of Culture and Society 3 s.h.
113:010 Anthropology and Contemporary World Problems 3 s.h.
All of these:
113:012 Introduction to Prehistory 3 s.h.
113:013 Human Origins 3 s.h.
113:014 Language, Culture, and Communication 3 s.h.
113:050 Issues in Anthropology 3 s.h.
One 100-level course in archaeology (areal or topical) or biological anthropology 3 s.h.
One 100-level course in sociocultural or linguistic anthropology 3 s.h.
One 100-level course in area studies 3 s.h.
Three 100-level electives 9 s.h.

Anthropology electives offer many choices, including courses dealing with biological anthropology, environment and culture, expressive culture (art, verbal arts, literature, music, and dance), gender, human evolution, human prehistory, identity, language and culture, medical anthropology, psychological anthropology, religious activity, ritual, and urban anthropology. Department faculty members offer area studies courses on Latin America, Africa, Japan, the Caribbean, the Middle East, South Asia, and Native North America.

Additional Bachelor of Arts Requirements
Students pursuing the B.A. are strongly encouraged to participate in archaeological field and laboratory research, independent studies in sociocultural anthropology, or linguistic anthropology research.

Additional Bachelor of Science Requirements
Students pursuing the B.S. must fulfill requirements in the following areas.
A qualitative, mathematical, or formal reasoning tool: at least two courses, minimum 6 s.h.
Directed laboratory or field research: at least one course, 3 s.h. (credit may be applied to honors major when appropriate)
Allied topical course work (related minor)

QUANTITATIVE, MATHEMATICAL, OR FORMAL REASONING TOOL
Students must complete a minimum of 6 s.h. beyond the courses used to complete the General Education Program quantitative or formal reasoning component. Students select specific courses or course sequences in consultation with their advisers.

DIRECTED LABORATORY OR FIELD RESEARCH
Students complete an approved directed research requirement (minimum of 3 s.h.) consisting of one of the following:
Laboratory research: a laboratory practicum in anthropology research labs or independent, faculty-guided, laboratory research, including use of the collections of the Office of the State Archaeologist.
Field research project: faculty-advised projects involving the collection of primary data in a fieldwork setting.
A University of Iowa field school program or approved equivalent (current field schools include Plum Grove Historical Archaeology and the University of Iowa Southwest Archaeology Field School).
An approved internship: typical approved internships include work in cultural resource management firms, museums, and public health research or education projects. To receive research credit for an internship, students must make a final report to their faculty adviser, summarizing the work accomplished or presenting materials that document the nature of the work.

ALLIED TOPICAL COURSE WORK
Students complete a topical specialization, consisting of at least a minor in one of the following allied fields: biological sciences, chemistry, computer science, economics, exercise science, geography, geoscience, global health studies, health and sport studies, linguistics, mathematics, psychology, science education, or statistics and actuarial science. Minors (or at least five courses) in other fields, chosen in consultation with the student's adviser, may be applied toward this requirement.

Advising
Students who declare anthropology as their major when they are admitted to the College of Liberal Arts and Sciences are advised at the Academic Advising Center until they have earned 28 s.h. Students who have earned more than 28 s.h. are advised in the department. Students are assigned an adviser based on faculty adviser loads and student interests.

Transfer Students
Students pursuing the B.A. or B.S. must earn at least 15 s.h. in anthropology at The University of
Iowa. Students may apply semester hours earned at approved field schools offered by other institutions toward the B.S. in anthropology.

**Four-Year Graduation Plan**

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan.

**Bachelor of Arts**

**Before the third semester begins:** at least one-quarter of the semester hours required for graduation

**Before the fifth semester begins:** at least two courses in the major and one-half of the semester hours required for graduation

**Before the seventh semester begins:** at least seven courses in the major and at least three-quarters of the hours required for graduation

**Before the eighth semester begins:** at least eight courses in the major

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

**Bachelor of Science**

**Before the third semester begins:** at least one anthropology course or other course in the major, and one-quarter of the semester hours required for graduation

**Before the fifth semester begins:** at least four anthropology courses or other courses in the major, one course in the minor area, one course for the quantitative or formal reasoning tool requirement, and one-half of the semester hours required for graduation

**Before the seventh semester begins:** at least seven courses in the major, three courses in the minor area, the second quantitative or formal reasoning tool course, and at least three-quarters of the hours required for graduation

**Before the eighth semester begins:** at least nine courses in the major, including the directed research requirement and four courses in the minor area

**During the eighth semester:** enrollment in all remaining course work in the major and in the minor area, all remaining General Education courses, and a sufficient number of semester hours to graduate

**Honors**

In addition to the regular requirements for a major in anthropology, honors students pursuing either the B.A. or the B.S. conduct an independent research project that culminates in a 30-50 page thesis. The project includes completion of 113:186 Honors Research Seminar, offered only fall semesters, and registration for 113:176 Honors Research, typically the next semester. They also must take one of their anthropology courses at the graduate level. To graduate with honors, students must have a g.p.a. of at least 3.50 in anthropology and be a member of the University Honors Program, which requires students to maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University Honors Program for more information). For more information about honors in anthropology, contact the department’s honors adviser.

Students pursuing the B.S. can count their directed research project or laboratory practicum towards the semester hours needed to complete honors requirements, but meeting the research requirement by itself does not meet the honors requirement. Students must work with their honors thesis adviser to structure their research so that it meets the added requirements of honors work.

**Minor**

To minor in anthropology, students must complete 15 s.h. in anthropology with a g.p.a. of at least 2.00. At least 12 s.h. must be taken at The University of Iowa in courses numbered 113:100 and above.

**Graduate Programs**

The graduate program emphasizes continuity from the Master of Arts to the Doctor of Philosophy. The department admits student who seek the Ph.D. Students seeking only the M.A. must request special permission for admission. Students must complete all M.A. requirements before advancing to the Ph.D. program. Entering graduate students are not required to have an undergraduate degree in anthropology. Applicants who hold an M.A. in anthropology from another institution may apply directly for admission to the Ph.D. program.
Once a student completes all requirements for the M.A., his or her committee makes a recommendation to the faculty concerning the students' potential for completing the Ph.D. The committee recommends continuation or dismissal from the program.

**Master of Arts**

The M.A. in anthropology is normally awarded to students after two years in the graduate program. The degree requires 30-36 s.h., depending on the student's previous anthropological training. No more than 9 s.h. earned in courses outside anthropology may be applied to the M.A. in anthropology.

In the first semester of the M.A. program, the director of graduate studies advises the student. By the end of the second semester, students must select an adviser and begin forming an M.A. committee. In consultation with the committee, the student develops a research project and writes an M.A. paper. The committee must approve the M.A. paper by the end of the fourth semester of study. The student also publically presents the paper.

There are two options for the M.A.: general anthropology and feminist anthropology. Feminist anthropology has more specific requirements than general anthropology.

**General Anthropology**

Students in the general anthropology M.A. program must complete core seminars in at least three of the four subfields, for a total of 9 s.h. The four core seminars are as follows.

- 113:240 Seminar: Sociocultural Anthropology 3 s.h.
- 113:268 Seminar: Archaeological Theory and Method 3 s.h.
- 113:271 Seminar: Linguistic Anthropology 3 s.h.
- 113:285 Seminar: Biological Anthropology 3 s.h.

In addition, all students are required to take 113:210 Anthropological Data Analysis or another course in statistics within the first three years of their graduate program, preferably during their M.A. program (first two years of graduate study).

**ELECTIVES**

In consultation with their adviser and committee members, students select additional course work to complete the remaining semester hours required for the M.A. Elective hours may include courses in other disciplines, directed study, or up to 6 s.h. of thesis credit (if applicable).

**Feminist Anthropology**

Students in the feminist anthropology M.A. program must take two of the following three general anthropology core seminars.

- 113:240 Seminar: Sociocultural Anthropology 3 s.h.
- 113:268 Seminar: Archaeological Theory and Method 3 s.h.
- 113:271 Seminar: Linguistic Anthropology 3 s.h.

In addition, students must take the following feminist core seminars:

- 113:220 Seminar: Feminist Anthropology 3 s.h.
- 113:273 Seminar: Language and Gender 3 s.h.
- 113:290 Feminist Perspectives on Biology and Culture 3 s.h.

All students must take 113:210 Anthropological Data Analysis or another statistics course within the first three years of graduate study, preferably during the first two years.

**ELECTIVES**

Students must select two of these:

- 113:105 Motherhood and Reproduction 3 s.h.
- 113:107 Gendering India 3 s.h.
- 113:133 Anthropology of Women's Health 3 s.h.
- 113:141 History of Feminist Anthropology 3 s.h.
- 113:156 Sexuality and Culture 3 s.h.
- 113:180 Women Writing Culture 3 s.h.
- 113:182 Women, Health, and Healing 3 s.h.
- 113:221 Seminar: Feminist Ethnography 3 s.h.
- 113:223 Feminist Medical Anthropology 3 s.h.
- 113:224 Seminar: Feminist and Gender Archaeology 3 s.h.

In consultation with their adviser and committee members, students select additional course work to complete the remaining semester hours required for the M.A. Elective credit may include course work in other disciplines, directed study, or up to 6 s.h. of thesis credit (if applicable).

**Doctor of Philosophy**

The Ph.D. represents a balance between general anthropological competence obtained at the M.A. level and professional specialization and competence for independent research and teaching in one of four subfields: sociocultural
anthropology, linguistic anthropology, archaeology, and biological anthropology.

To ensure focus on the student’s research interests, the department has an integrated process of simultaneous preparation of reading lists, research proposals for submission to granting agencies, dissertation proposal, and position papers. In order to complete the degree, all doctoral candidates are required to complete appropriate course work and the Ph.D. comprehensive process, carry out original anthropological research, and write and defend a dissertation. Students work closely with their adviser and committee at all stages.

In the first semester after completing the M.A. (or the first semester in the program for students who enter with an M.A. in anthropology from another institution), the student selects an adviser. By the end of the second semester, the student selects a committee to oversee his or her completion of the comprehensive process.

The student immediately begins consulting with their adviser, and eventually their committee, to start compiling an annotated bibliography of works relevant to future research. The annotated bibliography is a working document for the student’s use in the Ph.D. program; it is not a formal requirement and does not require formal review.

In the third and fourth semesters of the program, the student completes the comprehensive process. Then he or she may select a dissertation committee.

REQUIRED COURSE WORK

The Ph.D. requires a minimum of 72 s.h. beyond the B.A.

Students should take all lecture courses and seminars that are relevant to the areas they intend to cover in their position papers. A maximum of 18 s.h. earned in non-anthropology courses may be counted toward the 72 s.h. required for the Ph.D., including the maximum 9 s.h. that can be counted toward the master’s degree.

Students must not rely heavily upon independent study courses.

Students must take at least one theory course beyond the course they took to fulfill the master’s requirements in their specialization subfield. This course should be chosen from one of the following lists.

### Sociocultural Anthropology

- 113:116 Self and Others 3 s.h.
- 113:124 Colonialism and Culture 3 s.h.
- 113:135 Psychological Anthropology 3 s.h.
- 113:141 History of Feminist Anthropology 3 s.h.
- 113:142 Anthropology of Religion 2-3 s.h.
- 113:143 Environment and Culture 3 s.h.
- 113:144 Culture and Consumption 3 s.h.
- 113:145 Economic Anthropology of the Third World 3 s.h.
- 113:153 Cultural Politics 3 s.h.
- 113:156 Sexuality and Culture 3 s.h.
- 113:185 Medical Anthropology 3 s.h.
- 113:201 Seminar: Anthropological Theory 3 s.h.
- 113:205 Reading French Theorists 3 s.h.
- 113:208 Foundations of Ethnomusicology 3 s.h.
- 113:220 Seminar: Feminist Anthropology 3 s.h.
- 113:223 Feminist Medical Anthropology 3 s.h.
- 113:240 Seminar: Sociocultural Anthropology 3 s.h.
- 113:244 Seminar: Semiotics 3 s.h.
- 113:250 Seminar: Ritual and Performance 3 s.h.

### Linguistic Anthropology

- 113:123 Language and Nationalism 3 s.h.
- 113:179 Language and Identity 3 s.h.
- 113:244 Seminar: Semiotics 3 s.h.
- 113:271 Seminar: Linguistic Anthropology 3 s.h.

### Archaeology

- 113:164 Comparative Prehistory 3 s.h.
- 113:178 Hunter-Gatherer Ethnoarchaeology 3 s.h.
- 113:191 Marxism and Archaeology 3 s.h.
- 113:224 Seminar: Feminist and Gender Archaeology 3 s.h.
- 113:258 Seminar: Zooarchaeology 3 s.h.
- 113:268 Seminar: Archaeological Theory and Method 3 s.h.

### Biological Anthropology

- 113:165 Human Variation 3 s.h.
- 113:169 Human Evolutionary Anatomy 3 s.h.
- 113:170 Primate Evolutionary Biology 3 s.h.
- 113:187 Human Evolution 3 s.h.
- 113:188 Primate Behavior and Ecology 3 s.h.
- 113:285 Seminar: Biological Anthropology 3 s.h.
- 113:288 Seminar: Paleoanthropology 3 s.h.
- 113:290 Feminist Perspectives on Biology and Culture 3 s.h.
FOREIGN LANGUAGE
All doctoral students must demonstrate reading and/or speaking knowledge of one foreign language. They must meet this requirement before beginning dissertation research.

THE PH.D. COMPREHENSIVE PROCESS
The comprehensive process consists of writing position papers and preparing a research proposal and prospectus defense. According to individual needs and in consultation with the committee, a student selects the order of completing these two tasks.

Successful completion of the comprehensive process advances the student to Ph.D. candidacy.

To remain in good academic standing, students must complete the comprehensive process by the end of the fourth semester in the Ph.D. program. Students who do not adhere to this timeline are placed on departmental probation.

Research Proposal and Prospectus Defense
Working closely with the committee, the student drafts a research proposal for the program of dissertation research and defends a research prospectus before the Ph.D. committee. The defense is open to students and faculty. A copy of the student's dissertation prospectus must be made available in the department office one week before the defense.

Position Papers
Position papers are two essays of publishable quality. One essay concerns the student's geographical area of specialization; the other deals with his or her primary topical area. In some fields (e.g., biological anthropology), a geographical area may not be relevant. The essays are responses to questions the committee prepares in consultation with the student.

Position papers should demonstrate analysis, evaluation, synthesis, and control of a body of information (knowledge and comprehension). They should critique a major problem or debate (application and analysis), and they should develop a position on an issue and provide an explanation or theoretical justification for the position (evaluation and synthesis).

DISSERTATION
All Ph.D. candidates are required to carry out original anthropological research. Students typically conduct dissertation research after defending their research prospectus and writing position papers. Dissertations usually are based on fieldwork. Some are based on data from archival collections, laboratory projects, collections, or other source materials.

Archaeological Field Research
Under the direction of University archaeologists, students acquire skills in data recovery and interpretive techniques. Opportunities are available for students to participate in archaeological field research in central Mexico, France, the Netherlands, Portugal, Sicily, the U.S. Southwest, or at various sites in the U.S. Midwest. Occasional fieldwork in East and Southeast Asia is available to graduate students in the paleoanthropology research program.

Admission
Applicants for admission to the graduate program in anthropology are considered regardless of their previous field of training. Students without previous training in anthropology may be expected to perform additional work necessary to achieve competence expected for their degree objective.

Students normally are admitted directly to the Ph.D. program. For students without an M.A. in anthropology, the first two years of the Ph.D. program are devoted to fulfilling the requirements of the M.A. After those requirements are completed, the student's committee recommends to the faculty whether the student should continue to work toward the Ph.D.

Students with an M.A. in anthropology from another institution may proceed directly into a Ph.D. program organized around their special research interests.

Applicants for admission to the graduate program must meet the admission requirements of the Graduate College (see the Manual of Rules and Regulations of the Graduate College) and are required to submit the following:

- a completed University application form;
- transcripts of all previous undergraduate and graduate work;
- three letters of recommendation from individuals competent to judge the applicant's potential for graduate training;
- Graduate Record Examination (GRE) scores;
- TOEFL (Test of English as a Foreign Language) scores for international applicants whose first language is not English and whose previous university work was not conducted in English; and
at least one written example of previous work (for example, a term paper).

Applicants with an M.A. from another university must submit a copy of their master's thesis; applicants who earned an M.A. without thesis or whose thesis is not yet complete should submit written copies of three papers completed in graduate school.

Applicants should have a g.p.a. of at least 3.00. Applicants with lower grade-point averages may be admitted on conditional status if they show potential for graduate work. Applicants admitted on conditional status receive a letter stating courses they must take and grades they must earn in order to remove their conditional status. The Graduate College requires students to meet the conditions set forth in the letter of admission by the end of the second semester in order to continue in the program.

Financial Support

Financial assistance, usually in the form of teaching and research assistantships, is offered to the majority of graduate students in good standing for up to five years. Students making satisfactory and timely progress through the graduate program are in good standing. Eligibility for financial aid is reduced after two years in the M.A. portion of the graduate program, after two years in the Ph.D. portion of the graduate program, or after one year of postdoctoral fieldwork or research enrollment. The department typically provides a one-year tuition scholarship to doctoral students conducting research for the dissertation. The amount and types of aid depend on departmental needs. The department awards financial aid to most entering graduate students every year.

Students are notified in writing of a provisional financial award before the semester or summer session for which the award has been granted. Financial aid awards are made before the end of the previous semester, so each award is contingent upon satisfactory completion of that semester’s work by the awardee. Financial aid normally is given only to full-time students.

Resources, Facilities

The editorial office of the American Ethnologist, the official journal of the American Ethnological Society, has been housed in the Department of Anthropology since July 2002. The department has access to the Iowa Archaeological Collections through the Office of the State Archaeologist and maintains its own archaeological collections (midwestern prehistoric and historical and comparative faunal material).

The department maintains a documented human osteology teaching collection amassed by the University of Iowa Carver College of Medicine, and it holds a substantial documented human osteology research collection originally from Stanford University’s medical school that is maintained jointly with the Office of the State Archaeologist.

Individual faculty members maintain field laboratories and conduct research outside the United States, maintaining ties with research institutions in foreign countries, including the Teotihuacan Archaeological Research Facility, in Mexico; the Laboratoire d’Ethnologie Préhistorique at Pincevent; the Centre de Recherches Archéologiques at Verberie, in France; the Institute of Technology Bandung (ITB), in Indonesia; and the Gemeente Nijmegen, Bureau Archeologie, Nijmegen, the Netherlands.

The department also has well-equipped laboratories for the study of archaeology, biological anthropology, and a state-of-the-art multimedia linguistic anthropology lab.

The University is a charter member of the Human Relations Area Files (HRAF), an extensively annotated set of source materials on the peoples of the world—their environments, behavioral patterns, social lives, and cultures. Through HRAF and other library resources, anthropology students have access to source materials on more than 400 different cultures.

The University’s exchange programs for Iowa students provide opportunities and some scholarships for study abroad.

Faculty

Members of the anthropology faculty have studied and lived in Africa, Asia, the Caribbean, Europe, Mesoamerica, the Middle East, Pacific Islands, South America, and the United States. Recent field research has been conducted in Belgium, Brazil, the eastern Caribbean, China, Czech Republic, Ecuador, France, Greece, Honduras, Portugal, Hungary, India, Indonesia, Israel, Italy, Japan, Mexico, Micronesia, Myanmar (formerly Burma), the Netherlands, Papua New Guinea, Peru, Russia, native North America, the United States, and Vietnam.
Current faculty interests include patterns of political and economic development of emerging nations; the trade in Mexican folk art, material culture, and the politics of consumption; Andean peoples and cultures; indigenous movements; gender and the cultural politics surrounding sobriety in native North America; the cultural production of scientific knowledge about racial/ethnic disparities in infant mortality in U.S. public health; West Indian migrants in London; political economy of the eastern Caribbean; environmental issues in the western United States; cultural politics, semiotics, and critical discourses in the United States and the Middle East; power, memory, and social inequality in ancient Iberia; language and gender; expressive culture and performance in the Brazilian Amazon; Sanskrit, colonial linguistics, cultural politics of language, religion, and ethnicity; spiritual tourism in India; ritual and social change in Japan; paleoanthropological investigations of Pleistocene karst caves in China and northern Vietnam; geological and paleoanthropological field surveys of the Plio-Pleistocene Sangiran Dome, in Java; Neanderthal craniofacial form, function, and evolutionary history; anatomical modernity and the origins of modern humans; historical archaeology of Iowa; precontact state systems and the historical archaeology of the Basin of Mexico; faunal and spatial analyses from Paleolithic sites in France and the Ukraine; and social and political organization of late prehistoric and early historic period Puebloan society in New Mexico.

Courses

For Undergraduates

113:003 Introduction to the Study of Culture and Society
Comparative study of culture, social organization. GE: social sciences.

3 s.h.

113:010 Anthropology and Contemporary World Problems
Selected world problems from an anthropological perspective; current dilemmas and those faced by diverse human groups in recent times and distant past. GE: social sciences.

3 s.h.

113:012 Introduction to Prehistory
Data, theories on evolution of human cultures from end of Pleistocene to emergence of complex societies; emphasis on prehistoric cultural information from world areas from which relatively complete sequences are available. GE: historical perspectives.

3 s.h.

113:013 Human Origins
Processes, products of human evolution from perspectives of heredity and genetics, evolutionary theory, human biological characteristics, fossil record, artifactual evidence, biocultural behaviors. GE: natural sciences.

3 s.h.

113:014 Language, Culture, and Communication
Human language in context of animal communication; development, acquisition of language; biological base; language as a linguistic system in cultural social context. GE: social sciences.

3 s.h.

113:020 Introduction to Midwestern Prehistory
Prehistoric cultural sequence of Iowa viewed against background of North American prehistory; current and future research. Same as 149:020.

3 s.h.

113:029 First-Year Seminar
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Prerequisite: first- or second-semester standing.

1-2 s.h.

113:050 Issues in Anthropology
In-depth exploration of methodological and theoretical issues in contemporary anthropology; emphasis on critical reading of primary texts.

3 s.h.

113:051 Diversity in Action in American Society
Consequences of American racial and cultural diversity as related to contemporary social issues and professional careers; assumptions that define diversity as a problem for educators.

1-3 s.h.

113:075 Individual Study
Readings in area or subdivision of anthropology in which student has had basic course work. Prerequisite: consent of instructor.

1-3 s.h.

Advanced Courses

General Anthropology

113:003 Introduction to Museology

3 s.h.

113:147 Special Topics in Anthropology
Problems, concepts involved in comparing and contrasting behavior and ideas of different cultures.

2-3 s.h.

113:148 Special Topics in Anthropology
Problems, concepts involved in comparing and contrasting behavior and ideas of different cultures.

3 s.h.

113:149 Special Topics in Anthropology
Problems, concepts involved in comparing and contrasting behavior and ideas of different cultures.

2-3 s.h.

113:151 Sociology of the Third World
Economic development as a sociological problem; social institutions, social organization of underdeveloped areas; social, economic development programs; social change, consequences of industrialization and urbanization in underdeveloped areas. Prerequisite: 034:001 or 113:003. Same as 034:151.

3 s.h.

113:209 Research Design and Proposal Writing
Anthropological research design; preparation of proposals for fieldwork or laboratory analysis. Prerequisite: graduate standing or consent of instructor.

3 s.h.

113:210 Anthropological Data Analysis
Quantitative procedures for analyzing field data, library materials; elementary statistics, introduction to computers.

3 s.h.

113:235 Graduate Teaching Proseminar
Graduate student teaching skills: developing course guidelines, leading discussion, grading, review sessions, dealing with problem students and complaints; development of syllabi and teaching portfolios, mentoring of less-experienced teaching assistants. Repeatable. Prerequisite: graduate standing.

1 s.h.
Area Studies

The following archaeology courses may be used to fulfill the area studies requirement: 113:150, 113:159, 113:163, 113:166, 113:167, 113:192, and 113:194. No single course may be used to fulfill both area studies and archaeology requirements.

113:104 Inside/Outside The Middle East 3 s.h.
Social, political relations in Middle Eastern societies; anthropological perspectives; understanding of Islam; nationalist movements; social revolutions; male-female relations; competing claims to cultural, historical authenticity.

113:106 Interviewing Americans 3 s.h.
Contemporary Americans through interviews; questioning, recording techniques, ethnographic writing. Same as 045:199.

113:107 Gendering India 3 s.h.
Aspects of Indian culture, including nation, family, sexuality, work, and religion, through the lens of gender; Hindu India, differences in region, caste, and class. Prerequisite: 113:003 or 131:010. Same as 131:107.

113:110 Indians of North America 3 s.h.
History, culture of American Indian peoples; emphasis on North America. GE: cultural diversity. Same as 149:110.

113:112 Understanding Africa 3 s.h.
Introduction to anthropological study of sub-Saharan Africa; continuing impact of colonialism and globalization, identity and nationalism, political and economic organization, belief systems, family life, environment, art, music, religion.

113:113 Africans in the New World 3 s.h.
Social, cultural history of African descendants in the New World; emphasis on contrary, change in U.S. populations; contemporary African American societies, emphasis on cultural unity, variation, liberation themes. Same as 129:113.

113:117 The Maya 3 s.h.
Maya of Guatemala, Mexico from the Classic Period (eighth century) to present; history, art, science, achievements, religion, cultural and social systems, language, politics, identity, contemporary problems.

113:118 Social Anthropology of the Caribbean 3 s.h.
Historical background, other factors underlying contemporary social, cultural situations in insular and circum Caribbean region; emphasis on African American populations, cultural components. GE: foreign civilization and culture. Same as 129:115.

113:120 Popular Culture in South Asia 3 s.h.
Popular cultural forms (films, calendar art, music, comics, advertising) and their role in formation and expression of collective identities based on gender, ethnicity, caste, religion, and so forth in South Asia. Same as 039:119.

113:125 Japanese Society and Culture 3 s.h.
Cultural anthropology of Japan, including historical tradition, religious ethos, social organization, human ecology, educational and political institutions; emphasis on how these aspects relate to and influence one another. GE: foreign civilization and culture. Same as 39:125.

113:126 Japanese Ethos: Narrative and Performance 3 s.h.
Japanese attitudes, relationships, and perceptions as expressed through various forms of narrative and performance, including myth, ritual, dance, theater, folklore, literature, and film. Prerequisite: 39:125 or 113:125 or consent of instructor. Same as 39:126.

113:127 Ethnology of Oceania 3 s.h.
Comparative ethnography of island Oceania (Polynesia, Micronesia, Melanesia); precontact and current history of Pacific area, special problems of living in island habitats, contributions of Oceanic ethnography to anthropological theory, contemporary problems, research trends. GE: foreign civilization and culture.

113:129 Language/Politics of Culture in South Asia 3 s.h.
Key moments in the sociolinguistic history of premodern, colonial, and postcolonial linguistic communities in South Asia; rules of language in mediation of cultural and political processes. Same as 039:122.

113:131 Latin American Economy and Society 3 s.h.
Development, present structure of Latin American economy and society; emphasis on rural regions in context of national development; focus on area as a whole. GE: foreign civilization and culture.

113:132 Latin American Studies Seminar 3 s.h.
Interdisciplinary (anthropology, history, political science, Spanish and Portuguese). Same as 039:176, 038:176, 048:151, 130:176.

113:134 Gender and Indian Diaspora 3 s.h.
General theories of diaspora, which have expanded from the Jewish experience to explain African and Asian diasporas; theories in context of Indian diaspora populations and their relationship to the homeland. Prerequisite: 113:003 or consent of instructor.

113:259 Field Research in Ethnography arc.
Applied research techniques in a field setting of instructor's choice.

Sociocultural Anthropology

113:105 Motherhood and Reproduction 3 s.h.
Motherhood and reproduction in feminist theory and scholarship viewed through various disciplines. Same as 131:142.

113:109 Literature and Anthropology 3 s.h.
Topics vary. Same as 008:151, 048:151.

113:111 Drugs: Medical Anthropological Perspectives 3 s.h.
Survey of worldwide variety in human drug use, patterns of consumption, associated cultural beliefs, physiological and psychological effects, beneficial and detrimental health consequences; both traditional and modern, legal and illegal drugs. Prerequisite: 113:003 or 113:010 or consent of instructor.

113:115 Race, Racism, and Antiracism in the U.S. 3 s.h.
U.S. concepts of race and racism in historical comparative perspective, visual, legal, media, political, cultural, and intellectual arenas in which ideas about race are manifested, produced, consumed, contested. Prerequisite: sophomore or higher standing.

113:116 Self and Others 3 s.h.
Comparative, theoretical discussions of social identity: principles of social differentiation, categorization, sociopolitical hierarchies, consequences; contextualization of U.S. notions of ethnicity, race, nation, class, gender, culture. Prerequisite: junior or higher standing or consent of instructor.

113:119 Urban Anthropology 3 s.h.
Cross-cultural approach; emphasis on urbanizing processes, migration and adaptation, aspects of class and ethnicity in urban settings, urban economic relations. GE: social sciences.

113:121 Health of Indigenous Peoples 3 s.h.
Health problems and services for indigenous populations worldwide, from perspectives of Fourth World postcolonial politics. Prerequisite: 113:003 or 113:010 or consent of instructor. Same as 149:121, 152:121.
113:124 Colonialism and Culture 3 s.h.
Effects of the colonial encounter on the European colonizers and colonized populations: cultural, economic, and political modernities through various thematic, sociopolitical, and geographic contexts. Prerequisite: 113:003 or 113:010 or consent of instructor.

113:133 The Anthropology of Women’s Health 3 s.h.
How men and women interact with culture, environment, and political economy to shape health and illness; reproductive health, violence, drug use, cancer; readings in anthropology; public health. Prerequisite: 113:003 or 113:010 or 131:010 or consent of instructor. Same as 131:133, 172:133.

113:135 Psychological Anthropology 3 s.h.
Cultural diversity in constructions of self, mind, and emotion; religious experience; altered states of consciousness, behavioral disorders. Prerequisite: 113:003 or 113:010.

113:136 Applied Anthropology 3 s.h.
Practical health, environmental, and social problems viewed through an anthropological framework; how anthropological approaches are used to recognize and address applied problems. Same as 175:136.

113:137 Anthropology of Tourism 3 s.h.
Anthropology of leisure tourism; history of tourism, seasonal rituals and pilgrimage, cultural or ethnic tourism, production and trade in ethnic arts, tourism as economic development.

113:138 Anthropology and Education 3 s.h.
Sociocultural nature of education and impact of linguistic and cultural diversity on education; political, social, linguistic issues of educational practices and policies today.

113:139 Religion and Environmental Ethics 3 s.h.
How humans conceptualize the biophysical environment through religious beliefs and practices; how images of the environment influence humans, how they are used by grassroots environmental movements. Prerequisite: junior or senior standing or consent of instructor. Same as 032:130, 033:139.

113:140 City and Society 3 s.h.
Current issues in cross-cultural perspective; emphasis on Third World cities in the era of globalization, with attention to gender, race, class, citizenship.

113:141 History of Feminist Anthropology 3 s.h.
Development and evolution of feminist critiques in cultural anthropology; readings from early studies by women anthropologists, classic writings that sought to give women cross-cultural visibility, recent experimental texts. Prerequisite: 113:003 or 113:010. Same as 131:141.

113:142 Anthropology of Religion 2-3 s.h.
Approaches; religious roots, shamanism, witchcraft, curing, mythology; place of religion in social and cultural change. Same as 032:165.

113:143 Environment and Culture 3 s.h.
Individual and group responses to scarcity of natural resources such as land, water, food. Prerequisite: 113:003 or 113:010 or graduate standing or consent of instructor.

113:144 Culture and Consumption 3 s.h.
How social world is made through goods and commodities; gift giving, prestige economies, commodification, objects and ideology; politics of consumption; role of materialism in culture change; cases from prehistory to post-WWII Los Angeles.

113:145 Economic Anthropology of the Third World 3 s.h.
Ecological, cultural, and political theories of poverty; economies and adaptive practices of rural peoples in context of world economic system; ethnographic case studies of material practices and political institutions related to economy.

113:146 Anthropology of Death 3 s.h.
How anthropologists and archaeologists study death, dying, mortuary rituals, and notions of the afterlife in contemporary North America and in different places and times. Prerequisite: 113:003 or 113:012 or graduate standing or consent of instructor.

113:153 Cultural Politics 3 s.h.
Implicit and explicit manifestations of power in the arts, popular culture, institutions of learning, sites of historical preservation; illustrations, analyses drawn from a variety of countries in addition to contemporary United States. Prerequisite: sophomore or higher standing.

113:155 Race and Ethnic Relations 3 s.h.
Multidisciplinary study of intergroup relations; emphasis on historical, sociological, political issues in study of American minority groups. Prerequisite: 034:001 or 113:003 or consent of instructor.

113:156 Sexuality and Culture 3 s.h.
How organization and meaning of sexuality are shaped by kinship, subsistence activities, and inequalities based on race, class, gender, and nation; focus on cultures outside the United States. Prerequisite: 113:003 or 113:010. Same as 131:156.

113:157 Alcohol and Culture 3 s.h.
Cross-cultural view of use, abuse, focus on common patterns of drinking, social variability in drunken comportment; implications of studies of drinking in other cultures; drinking behaviors in American society. Prerequisite: 113:003 or consent of instructor.

113:180 Women Writing Culture 3 s.h.
Feminist ethnography and other kinds of feminist narrative that write culture; pushing the boundaries of how anthropologists define ethnography. Prerequisite: 113:003 or 113:010. Same as 131:165.

113:181 Race, Ethnicity, and International Relations 3 s.h.
Racial and ethnic conflict, particularly as threat to regional, world balances; efforts to alleviate conflict. Same as 120:151.

113:182 Women, Health, and Healing 3 s.h.
Experiences of women as recipients and providers of health care; intersection of race, class, cultural variation on women’s health; reproductive and nonreproductive health concerns. Same as 131:143.

113:184 Anthropology and International Health 3 s.h.
Medical anthropology’s critical role in international health research and practice; political ecology of infectious disease, quest for culturally appropriate interventions. Same as 152:184, 172:131.

113:185 Medical Anthropology 3 s.h.
Major theoretical, methodological approaches; international health and development; biomedicine as a cultural system; ethnomedicine; anthropology and AIDS, human reproduction, epidemiology, ethnopsychiatry. Prerequisite: 113:003 or 113:010 or consent of instructor. Same as 152:185.

113:201 Seminar: Anthropological Theory 3 s.h.
Contemporary theoretical issues in sociocultural anthropology.

113:202 Ethnographic Field Methods 3 s.h.
Basic data-gathering techniques for field research in sociocultural anthropology. Prerequisite: anthropology graduate standing or consent of instructor.

113:205 Reading French Theorists 3 s.h.
Influential modern/postmodern French scholars and their anthropological, cultural studies adaptations; Durkheim, Levi-Strauss, Foucault, Bourdieu, DeCerteau. Prerequisite: anthropology graduate standing or consent of instructor.
College of Liberal Arts and Sciences

113:208 Foundations of Ethnomusicology 3 s.h.
Ethnomusicology in relation to domains of musical, humanitarian, social science scholarship, on expressive culture and artistic processes. Prerequisites: senior standing and consent of instructor. Same as 025:319.

113:220 Seminar: Feminist Anthropology 3 s.h.
Theory, methods, research, epistemology from a feminist perspective. Prerequisites: graduate standing and consent of instructor. Same as 131:220.

113:221 Seminar: Feminist Ethnography 3 s.h.
Feminist critiques of traditional ethnographers, informed by contemporary feminisms. Prerequisite: 113:220 or 131:220 or consent of instructor. Same as 131:245.

113:223 Feminist Medical Anthropology 3 s.h.
Directions feminists have taken in medical anthropological scholarship, focus on ethnographers that have become classics of the genre and on influential theoretical and applied work. Prerequisite: consent of instructor. Same as 131:223.

113:230 Crossing Borders Seminar: Introductory 3-4 s.h.

113:240 Seminar: Sociocultural Anthropology 3 s.h.
Social institutions in the world’s societies; problems in theory, method, interpretation. Prerequisite: anthropology graduate standing.

113:247 Crossing Borders Seminar 3-4 s.h.

113:248 Crossing Borders Pro-Seminar 1 s.h.

113:250 Seminar: Ritual and Performance 3 s.h.
Approaches to comparative study of ritual in religious and secular contexts. Prerequisite: graduate standing or consent of instructor.

113:261 Rhetorics of Ethnographies 3 s.h.
Rhetorical theory, analysis applied to a selection of ethnographic classics, more recent ethnographies, tropes, conventions of ethnographic writing in essays, oral presentations, fieldwork. Same as 008:266, 010:361.

113:275 Development Policy and Planning in the Third World 3 s.h.
Same as 078:275, 034:275, 042:275, 044:275, 102:275.

Archaeology

The following archaeology courses may be used to fulfill the area studies requirement: 113:150, 113:159, 113:163, 113:166, 113:167, 113:192, and 113:194. No single course may be used to fulfill both area studies and archaeology requirements.

113:150 Tribes and Chiefdoms of Ancient Europe 3 s.h.
Archaeology of European societies between the Mesolithic and Iron Age; how ideas about Europe’s prehistoric past have been used for political purposes. Prerequisite: 113:012 or graduate standing or consent of instructor.

113:158 Animal Bones in Archaeology 3 s.h.
Use of faunal material in interpretation of archaeological remains, including skeletal anatomy, identification, taphonomy, determination of age and sex, seasonality, quantification, sampling, breakage and curation, interpretations, laboratory sessions. Prerequisite: 113:012.

113:159 Southwestern Archaeology 3 s.h.
Archaeological overview of prehistoric cultures of the American Southwest; emphasis on understanding archaeological arguments concerning major processes in the past. Same as 149:159.

113:160 Environmental Archaeology 3 s.h.
Methods, theories from ecology, cultural ecology, paleoecology, cultural evolution, general systems theory, and economics applied to prehistoric archaeological data; emphasis on relationships between past cultures and their local and regional environments. Prerequisite: 113:012.

113:161 Prehistoric People of the Ice Age 3 s.h.
Hominid occupation of Old World during Pleistocene; hominid fossils, artifacts, settlement patterns, climatic reconstruction, evolutionary processes; survey and evaluation. Prerequisites: 113:012 and 113:168, or consent of instructor.

113:162 Laboratory Methods in Archaeology 3 s.h.
Materials recovered by excavation; survey training. Prerequisite: consent of instructor.

113:163 Archaeology of Mesoamerica 3 s.h.
Archaeological data related to the evolution of civilization in Mesoamerica; sequence from hunter-gatherers to A.D. 1519; emphasis on Central Mexico, Maya area, Oaxaca. Prerequisite: 113:012 or anthropology graduate standing or consent of instructor.

113:164 Comparative Prehistory 3 s.h.
Cultural evolution in Old World, New World; emphasis on developments from pre-agricultural societies to appearance of urban civilizations; focus on Mesoamerica, Central Andes, Near East, Egypt, Indus Valley, China. Prerequisite: 113:012 or anthropology graduate standing or consent of instructor.

113:166 The Aztecs, Their Predecessors, and Their Contemporaries 3 s.h.
Background for development of Aztec state, nature of civilization encountered by Spaniards in 1519; contemporary peoples affected by Aztecs. Prerequisite: 113:012 or anthropology graduate standing or consent of instructor.

113:167 North American Archaeology 3 s.h.
Prehistoric cultural development north of Mexico from initial occupation to European contact and conquest; emphasis on dynamics of culture change. Same as 149:167.

113:168 Method and Theory in Archaeology 3 s.h.
Current theoretical approaches, methods used to investigate the past; site formation processes, taphonomy, sampling and research design, typology and seriation, subsistence-settlement reconstruction, cultural evolution. Prerequisite: 113:012.

113:177 The Origins of Inequality 3 s.h.
Major anthropological works concerning origins and development of social and political inequality in human societies. Prerequisite: 113:003 or 113:012 or consent of instructor.

113:178 Hunter-Gatherer Ethnoarchaeology 3 s.h.
Variability in adaptations of hunter-gatherers on a global scale; emphasis on subsistence, mobility, social organization; archaeological record of prehistoric hunter-gatherers interpreted through study of modern societies. Prerequisite: graduate standing or consent of instructor.

113:189 Approaches to Geoarchaeology 3 s.h.
Geoarchaeology as a multidisciplinary framework for human paleoecology; natural processes that create the archaelogical record; approaches to reconstructing landscapes of the past as contexts for archaeological deposits; site, intrusive, and landscape scales in light of erosion, deposition, weathering, and biological and human activity; dynamic nature of archaeological landscapes through time. Prerequisite: 012:136 or 113:012 or consent of instructor. Same as 012:185.
113:191 Marxism and Archaeology 3 s.h.
Marxist approaches in archaeology and anthropology, works from influential Marxist scholars in the social sciences, including Marx and Engels; archaeological case studies employing Marxist perspectives. Prerequisite: 113:012 or graduate standing in anthropology or consent of instructor.

113:192 Greek Archaeology and Ethnology 3 s.h.
Archaeology and ethnology of the Greek world, from end of Bronze Age to late Roman Empire; sociocultural processes that influence development and persistence of Greek civilization. Prerequisite: 113:012 or 113:013 or consent of instructor. Same as 20E:118.

113:193 Special Topics in Archaeology 3 s.h.

113:194 Roman Archaeology 3 s.h.
Archaeology and ethnology of Roman civilization from Iron Age eighth-century occupation of the Palatine Hill to the end of the Roman empire in the West, A.D. 476. Prerequisite: 113:012 or 113:013 or consent of instructor. Same as 20E:119.

113:198 Special Topics in Archaeology 3 s.h.

113:199 Field Research in Archaeology arr.
Beginning skills in site surveying and excavation, lab work, record keeping at nearby prehistoric sites. Prerequisite: consent of instructor.

113:224 Seminar: Feminist and Gender Archaeology 3 s.h.
Feminist perspectives on archaeological method, theory, and practice; role of colonialism, capitalism, and positivism in development of the field; feminist case studies. Prerequisite: graduate standing. Same as 131:224.

113:258 Seminar: Zooarchaeology 3 s.h.
Interpretation of faunal material in archaeology; intensive survey of classic and recent literature on taphonomy, skeletal anatomy, population parameters, seasonality, quantification and sampling, butchering patterns, ethnoarchaeology, social and economic inferences. Prerequisite: 113:158 or consent of instructor.

113:268 Seminar: Archaeological Theory and Method 3 s.h.
Development, current status of theory, method in Americanist archaeology. Prerequisite: anthropology graduate standing or consent of instructor.

113:285 Seminar: Biological Anthropology 3 s.h.
Human adaptations. Prerequisite: graduate standing in anthropology or biological sciences or related department or consent of instructor.

113:100 Introduction to Linguistics 3 s.h.
Same as OSL:100, 103:100.

113:123 Language and Nationalism 3 s.h.
Varied cases of linguistic nationalism, how language has become a powerful symbol for expression of national identity across many contexts and circumstances.

113:171 Multi-Media Ethnography 3 s.h.
Use of video, photography, computer analyses, library research. Prerequisite: consent of instructor.

113:179 Language and Identity 3 s.h.
Relationship between using language and establishing or maintaining identity; cultural factors in language maintenance and loss. Prerequisite: 113:014 or 103:011 or consent of instructor.

</table>
The School of Art and Art History provides a creative, multidisciplinary environment for students of the studio arts, the history of art, and art education. Established in 1936, the school is firmly grounded in the College of Liberal Arts and Sciences. It encourages interaction among its diverse faculty as well as collaboration with related disciplines across campus.

Iowa’s art and art history graduates enjoy success as practicing professional artists, professors of art history, teachers, museum directors and curators, theater designers, commercial designers, and art administrators.

Studio Art

The studio art program is based on the idea that the philosophical issues of society that are questioned and interpreted by artists are the basis for an artist’s work. The diversity of concept and style among School of Art and Art History faculty members encourages students to seek and work toward a keen understanding of themselves as individuals capable of making their own personal statements as part of the philosophical continuum in art’s history.
Undergraduate Programs

Bachelor of Arts in Art

The undergraduate program in art requires a foundation in art history as well as an understanding of the formal traditions and contemporary practices in art. Undergraduate students concentrating in studio art begin in the program leading to the B.A. and pursue broad-based knowledge in at least four areas of studio art. Especially interested students with proven abilities may transfer into the B.F.A. program. Application for such transfer normally is made early in the junior year. B.F.A. students may select an emphasis in ceramics, design, drawing, intermedia, metalsmithing and jewelry, painting, photography, printmaking, or sculpture.

B.A. students in art must earn at least 70 s.h. of credit in non-art courses. Cross-referenced courses originating in the School of Art and Art History may not be counted as non-art electives.

The B.A. in art requires the following.

Two art history courses chosen from these (preferably taken during the first two years):
- 01H:002 Arts of Africa 3 s.h.
- 01H:003 Art of Pre-Columbian America, Native America, and Oceania 3 s.h.
- 01H:005 Western Art and Culture before 1400 3 s.h.
- 01H:006 Western Art and Culture after 1400 3 s.h.
- 01H:016 Asian Art and Culture 3 s.h.

Two additional art history courses chosen from 01H:001, 01H:004, 01H:010, and 01H:020-01H:199 6 s.h.

Two studio courses:
- 01A:003 Basic Drawing (prerequisite for all studio courses) 3 s.h.
- 01A:004 Design Fundamentals (prerequisite for all studio courses) 3 s.h.

Any two of these three-dimensional courses:
- 01C:060 Ceramics I 3 s.h.
- 01D:021 Problems in Design I: Form and Structure 3 s.h.
- 01G:084 Introduction to Jewelry and Metal Arts 3 s.h.
- 01J:090 Intermedia I 3 s.h.
- 01N:015 Undergraduate Sculpture I 3 s.h.

Any two of these two-dimensional courses, from two different studio areas (students may not use more than one 01M course to satisfy this requirement):
- 01D:028 Graphic Design I 3 s.h.
- 01F:007 Life Drawing I 3 s.h.
- 01K:009 Painting I 3 s.h.
- 01L:034 Beginning Photography 3 s.h.
- 01M:021 Undergraduate Intaglio I 3 s.h.
- 01M:024 Undergraduate Relief I 3 s.h.
- 01M:031 Undergraduate Lithography 3 s.h.
- 01M:041 Undergraduate Monotype 3 s.h.

Electives chosen from School of Art and Art History courses must bring the total credit in art history, studio art, and art education to a minimum of 38 s.h. No more than 50 s.h. of credit in art history, studio art, and art education courses, total, may be counted toward the 120 s.h. required for the B.A.

Transfer Students

Transfer students majoring in art must complete a minimum of 12 s.h. in studio art at The University of Iowa. The studio hours must include work in at least two different studio areas.

Undergraduate transfer students majoring in studio art must attend transfer portfolio review and show a portfolio of their art to faculty members, who determine the students’ placement in, or exemption from, the sequence of basic studio courses.

Study Abroad

Students who wish to study abroad must meet with the undergraduate adviser before they depart to review approval of the studio art and art history courses they plan to take. Upon their return, they meet with the undergraduate adviser to determine which courses require portfolio review. Students may need to bring the original art work they completed during their study abroad back to campus for a portfolio review with a designated faculty member.

Art Education

The Art Education Program requires a broad foundation in formal traditions of studio art, substantive knowledge in art history, and art teacher certification course work. Undergraduate students in art education concentrate in studio art and pursue broad-based knowledge in at least four areas of studio art. They earn a B.A. or B.F.A. and art teacher licensure K-12. Students with proven abilities may transfer into the B.F.A. program; application for transfer normally is made early in the junior year. B.F.A. students may select an emphasis in ceramics, design, drawing, intermedia and video art, metalsmithing and
jewelry, painting, photography, printmaking, or sculpture.

Art education with a B.A. in art requires a minimum of 47 s.h. of art and art history course work (9 s.h. more than the minimum requirement for a B.A. without art teacher certification). B.A. students earn at least 70 s.h. in non-art courses. Cross-referenced courses that originate in the School of Art and Art History may not be counted as non-art electives. No more than 50 s.h. earned in art history, studio art, and art education courses may be counted toward the degree.

Art education with a B.F.A. requires a minimum of 62 s.h. of art and art history coursework. Undergraduate students in art education who earn a B.F.A. with art teacher licensure K-12 typically complete an additional semester of course work. In addition to completing the General Education Program and the major requirements listed below for the B.A. in art with art education, B.F.A. candidates must complete three courses in a studio area of concentration beyond the introductory or beginning course, as well as one introductory course and one advanced-level course in each of two additional studio areas. All B.F.A. candidates in drawing and painting are required to take 01F:106 Undergraduate Seminar in Drawing and Painting in addition to the studio courses for the major area. Papermaking, calligraphy, and bookbinding courses may not be used as major or minor areas. Cross-referenced courses that originate in the School of Art and Art History may not be counted as non-art electives. Before they student teach, all B.F.A. candidates must have an exhibition of their studio work, preferably at the School of Art and Art History.

The B.F.A. requires that students earn 58 s.h. in courses taken outside the School of Art and Art History and 62 s.h. in courses offered by the school. Prospective B.F.A. students must apply to enter the program after completing at least one semester of work in the studio area of concentration but before completing 50 s.h. in art. B.F.A. candidate reviews are held once each semester.

Applications for admission must be submitted to the Teacher Education Program, Teacher Education and Student Services Office, College of Education. Deadlines are June 15 for fall admittance, October 15 for spring admittance, and March 15 for summer admittance.

The B.A. in art with art education (teacher certification) requires the following course work:

Two art history courses chosen from these (preferably taken during the first or second year):

<table>

Electives, chosen only from courses offered by the School of Art and Art History, must bring the total credit in art history, studio art, and art education to a minimum of 47 s.h. Students often select two additional studio courses in an area of emphasis. No more than 50 s.h. of credit in art history, studio art, and art education courses, total, may be counted toward the degree.

Transfer students majoring in art must complete a minimum of 3 s.h. in art history and 12 s.h. in studio art at The University of Iowa. The studio art credit must include work in at least two different studio areas.

Undergraduate transfer students majoring in studio art must, on the Friday before a fall or spring semester begins, show a portfolio of their art to faculty members, who determine each student’s placement in or exemption from the sequence of basic studio courses.
Minor in Art

A minor in art requires 15 s.h. in art courses with a g.p.a. of 2.00 or higher; 12 of the 15 s.h. must be taken at The University of Iowa. Students must complete 01H:001 Elements of Art, or the equivalent, and 12 s.h. of studio art courses. Studio courses must include one introductory-level course and one advanced-level course in two different studio areas. One art history course may be included in the 15 s.h. of course work in lieu of an advanced-level studio class. In selecting courses, students should pay close attention to the stated prerequisites for individual courses. Graphic design, papermaking, calligraphy, and bookbinding courses, any course with an 01E or 01P prefix, and 01A:004 Design Fundamentals may not be used to satisfy the requirements for a minor.

Course work applied toward a minor in art may not be used to satisfy the requirements for a major in art or in art history.

Bachelor of Arts in Art History

Because the history of art is engaged in problems of historical analysis and the interpretation of culture, it provides students with a broad background in the humanities consistent with a liberal arts and sciences education. The undergraduate degree program is designed to prepare students for competitive placement in graduate schools across the country.

As students progress through the program, they become familiar with historical relationships between art objects and society, learn techniques of formal analysis, study patterns of patronage, and absorb methods for interpreting the meaning of paintings, sculptures, and buildings. In the course of their studies, art history majors develop their research abilities and writing skills.

The B.A. in art history requires the following course work (total of 45-46 s.h.). Not all courses are offered every year. Students should take required survey courses (numbered 002, 003, 005, 006, and 016) and introductory courses (numbered 020-085) before taking advanced courses (numbered 103-196).

One of these:
01H:002 Arts of Africa 3 s.h.
01H:003 Art of Pre-Columbian America, Native America, and Oceania 3 s.h.
01H:016 Asian Art and Culture 3 s.h.

Four courses chosen from 01H:020 through 01H:085 12 s.h.
Four courses chosen from 01H:103 through 01H:196 12 s.h.
01H:199 Topics in Art History 3 s.h.
01H:010 Tutorial for Majors: Art History as a Discipline 3 s.h.
or
01H:099 Undergraduate Seminar in the History of Art (normally in junior or senior year) 3 s.h.

Studio courses 6 s.h.

No more than 50 s.h. of credit in art history and studio may be counted toward the minimum 120 s.h. required for the B.A. in art history.

CREDIT IN DISCIPLINES OUTSIDE ART HISTORY

Art history students must take courses in at least three of the following disciplines: anthropology, classics, history, literature, philosophy, political science, religion, sociology, or others approved by faculty advisers, for a total of 12 s.h.

Transfer Students

Transfer students planning to major in art history should meet with the undergraduate adviser to discuss the requirements they may fulfill with transfer courses. Art history transfer courses must be reviewed by the art history division head to determine the student’s placement in or exemption from required art history courses.

Study Abroad

Students who wish to study abroad must meet with the undergraduate adviser and the head of art history before they depart to review approval of the art history courses they plan to take. Upon their return, they meet with the art history division head to review their art history course work and confirm the credit they have earned.

Minor in Art History

A minor in art history requires 15 s.h. of courses in art history, with a g.p.a. of at least 2.00. Twelve of the 15 s.h. must be taken in advanced-level courses at The University of Iowa (courses numbered 01H:020 and above).

Students planning a minor in art history are
required to take at least one of these survey-level courses: 01H:002, 01H:003, 01H:005, 01H:006, or 01H:016. Course work applied toward a minor in art history may not be used to satisfy the requirements for a major in art or art history.

**Bachelor of Fine Arts in Studio**

Prospective B.F.A. students must apply to enter the program after completing at least one semester of work in the studio area of concentration, but before completing 50 s.h. in art. B.F.A. candidate reviews are held once each semester.

Students who wish to enter the B.F.A. program should consult the faculty in the studio area of concentration for information about the required portfolio review.

The B.F.A. requires that the 120 s.h. required for graduation include 58 s.h. from courses taken outside the School of Art and Art History and 62 s.h. in School of Art and Art History courses.

In addition to completing the General Education Program and major requirements listed above for the B.A. in art, B.F.A. students must complete three courses in a studio concentration area beyond the introductory or beginning course, as well as one introductory course and one advanced course in each of two additional studio areas.

B.F.A. students in drawing and painting are required to take 01F:106 Undergraduate Seminar in Drawing and Painting in addition to the studio courses for the major area.

B.F.A. students in painting are required to complete the following sequence.

- 01K:009 Painting I 3 s.h.
- 01K:010 Painting I 3 s.h.
- 01K:025 Life Painting 3-4 s.h.
- 01K:046 Intermediate Painting 3 s.h.
- 01K:049 Advanced Painting 3-4 s.h.

Students may enroll in other painting classes in addition to the above sequence. Life Painting (01K:025) may be repeated once, but applies only once in the above sequence.

B.F.A. students must present an exhibition of their studio work, preferably at the School of Art and Art History.

Teacher licensure requirements are the same for art education B.A. and B.F.A. students.

**Four-Year Graduation Plan**

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan.

**B.A. in Art**

- **Before the third semester begins:** at least one-quarter of the semester hours required for graduation
- **Before the fifth semester begins:** at least four courses in the major and at least one-half of the semester hours required for graduation
- **Before the seventh semester begins:** at least eight courses in the major and at least three-quarters of the semester hours required for graduation
- **Before the eighth semester begins:** at least 11 courses in the major

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

**B.A. in Art History**

- **Before the third semester begins:** at least one-quarter of the semester hours required for graduation
- **Before the fifth semester begins:** at least four courses in the major and at least one-half of the semester hours required for graduation
- **Before the seventh semester begins:** at least eight courses in the major and at least three-quarters of the semester hours required for graduation
- **Before the eighth semester begins:** at least 11 courses in the major

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

**Bachelor of Fine Arts**

Admission to the program leading to the B.F.A. in art is limited and depends on the department’s evaluation of the student’s work. In order to participate in the four-year graduation plan, students must be admitted to the degree program on schedule as determined by the art adviser.
Before the third semester begins: at least four courses in the major and at least one-quarter of the semester hours required for graduation.

Before the fifth semester begins: at least eight courses in the major, and at least one-half of the semester hours required for graduation.

Before the seventh semester begins: at least 14 courses in the major and at least three-quarters of the semester hours required for graduation.

Before the eighth semester begins: at least 18 courses in the major.

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate.

Honors

Art and art history majors who are members of the University Honors Program may enroll in the honors program of the School of Art and Art History. Membership in the University Honors Program requires students to maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University Honors Program for more information).

To earn a degree with honors in art history, students must complete the requirements for the B.A. in art history with a g.p.a. of at least 3.50 in art history courses. There are two options for earning the degree with honors.

Option 1: Students take two upper-division courses with honors designation and complete an extra project, such as an annotated bibliography, a supplemental paper or presentation, or a comparable project endorsed by the instructor. Then students enroll in a third upper-division course appropriate to their honors thesis topic and write the thesis (5,000 to 7,000 words) as part of the course, for an additional 1 s.h.

Option 2: Students research and write an honors thesis of 10,000 to 15,000 words under the supervision of an art history faculty member, preparing a statement of the sources of the thesis, and writing the thesis under the supervision of the instructor. The thesis should conform to the Graduate College format for theses.

Honors students in studio must maintain a g.p.a. of at least 3.50 in the major. Each student must complete an honors project, supervised by a faculty member, prepare a statement of the sources of the studio work, and hold an exhibition of the honors project. The statement may be based on the history of art, history of ideas, philosophy, and so forth, and should be written under the supervision of faculty in the student’s studio concentration area. Students must register for 01P:190 Honors in Studio Art for 0-3 s.h.

Graduate Programs

Master of Arts in Art

The school offers the M.A. in art with majors in ceramics, design, drawing, intermedia and video art, metalsmithing and jewelry, painting, photography, printmaking, and sculpture.

Requirements for the M.A. in art are:

- a B.A. or B.F.A. in art equivalent to that offered at The University of Iowa (undergraduate deficiencies, if any, may be made up concurrently with, but are in addition to, graduate requirements);
- a minimum of 38 s.h. of graduate work, including at least 12 s.h. in a major studio area, 6 s.h. in a minor studio area from one of the M.A. majors that offer at least 21 s.h. in studio courses; 3 s.h. in the history and theory of art, excluding readings and directed studies; a drawing course taken at The University of Iowa; and 6 s.h. of courses outside art and art history;
- division-wide review for M.A. candidacy by faculty review (during the third semester in residence); and
- written theses and possibly a studio thesis.

M.A. students may earn 1 s.h. for writing a technical or substantial thesis by registering for 01A:302, with approval of the thesis supervisor. Thesis credit earned in an M.A. program is not applicable toward M.F.A. requirements.

Master of Fine Arts in Art

The school offers the M.F.A. with a major in ceramics, design, drawing, intermedia and video art, metalsmithing and jewelry, painting, photography, printmaking, or sculpture. M.A. students advance to the M.F.A. program by invitation following completion of the M.A.

Requirements for the M.F.A. in art are:

- an M.A. in art equivalent to that offered at The University of Iowa;
a minimum of 60 s.h. of graduate work, including at least 18 s.h. in a major studio subject, at least 9 s.h. in a minor studio field selected from the fields listed above, 6 s.h. in art history and theory of art, 6 s.h. in courses originating outside the school, and a drawing course at The University of Iowa (if not already taken); M.F.A. committee review; and written theses and possibly a studio thesis.

Transfer credits are decided by faculty review.
M.F.A. students may earn 1 s.h. for writing a technical or substantial thesis by registering for 01A:304, with approval of the thesis supervisor. Thesis credit earned in an M.A. program is not applicable toward M.F.A. requirements.

Master of Arts in Art Education
Requirements for the M.A. in art education are:

- a B.A. or B.F.A. in art equivalent to that offered at The University of Iowa;
- teaching licensure/certification in art;
- completion of 38 s.h. of graduate credit, including 18 s.h. of studio and art history in a ratio of two to one (either 12 s.h. of graduate credit in studio and 6 in art history, or 6 in studio and 12 in art history), 8 s.h. in graduate seminars in art education, and 12 s.h. to be specified after the student begins the program; and
- a written thesis based on research in art education, creative scholarship, or art history.

Art education majors may elect to take art history courses on a satisfactory-unsatisfactory basis.

Master of Arts in Art History
Students pursuing an M.A. in art history are expected to acquire a broad knowledge of art history as an academic and humanistic discipline, to become familiar with major periods and monuments of world art, and to gain proficiency in scholarship. The M.A. program in art history provides students with training in research methods appropriate to subsequent specialization at the Ph.D. level. Because the M.A. culminates in a substantial thesis in the candidate's chosen area of focus, evidence of competence in scholarly research and writing is required for graduation. Graduates with an M.A. generally continue for the Ph.D. or enter college teaching or museum work.

To earn an M.A. in the history of art, students must complete a minimum of 30 s.h. of graduate-level course work with a g.p.a. of at least 3.50. Only one semester of academic probation is allowed. All M.A. candidates, including transfer students, must take at least 24 s.h. in residence at The University of Iowa.

M.A. in art history students must earn a grade of B or higher in semester-long courses (100-level) in five of the following 10 distribution fields: African (including Oceanic), Asian, ancient, medieval, Renaissance, Baroque, 18th- and 19th-century European, American (including Pre-Columbian, Native American, and African American), modern/contemporary, and architecture. These courses must be taken after the B.A. is granted. However, a student who earned a grade of B or higher in an intermediate-level course in the same field during his or her undergraduate career may apply credit for a graduate seminar toward a distribution field requirement.

**REQUIRED COURSES**
All graduate students must take 01H:210 Art History Colloquium each semester they register for 9 s.h. or more. Students who register for fewer than 9 s.h. are strongly encouraged to attend. In addition, M.A. in art history students must complete the following course work.

- 01H:200 History and Methods 3 s.h.
- Two art history seminars (with different instructors in different fields) 6 s.h.
- Additional art history or studio courses, or courses outside the School of Art and Art History 6 s.h.

History and Methods (01H:200) must be taken during the first fall semester of the student's residency. Incoming students who already have taken a comparable graduate-level course at another university may petition the art history faculty to waive this requirement.

Courses outside the curriculum of the School of Art and Art History's art history division do not carry art history credit. Cross-referenced courses not taught by art history faculty members do not carry art history credit.

**Directed Studies**
Directed Studies (01H:300) is designed for graduate students who already have taken an advanced course or courses in a specific art history area. It provides students with an opportunity to work one-to-one with a professor on specific research interests developed in lecture courses or seminars, or on topics that eventually
may be the subject of a thesis or dissertation. Directed Studies cannot be substituted for a lecture course already offered in the program. Normally, students have taken at least one course with a professor before taking Directed Studies with that professor. To take Directed Studies, students must discuss the course with the professor and have his or her approval. Directed Studies may be taken only once in any semester. Students may earn 1-3 s.h. for a single registration in the course but may not count more than 3 s.h. toward M.A. requirements.

Students taking Directed Studies for 1-2 s.h. normally meet with the directing professor every other week and complete readings and short written assignments. Those taking the course for 3 s.h. normally meet once a week and complete extensive readings, annotated bibliographies, and a substantial paper on a specific topic.

FOREIGN LANGUAGES
Within the first 20 s.h. of graduate study, students must demonstrate the ability to read art history writings in an appropriate second foreign language. This requirement, which is in addition to the foreign language requirement for admission to the M.A. program, generally is fulfilled either by the satisfactory completion of the second semester of a graduate-level reading-for-research language course or the completion, with a grade of B or higher, of the fourth semester of an undergraduate language sequence. Language requirements are fulfilled with German and French. Credit earned in language courses taken to fulfill the language requirement does not count toward the 30 s.h. required for the degree.

M.A. THESIS
Before graduation, M.A. candidates complete a written thesis (01H:302 M.A. Written Thesis) for 3 s.h. of credit. This credit can be applied toward the degree but cannot be substituted for other required courses.

The M.A. committee consists of the student’s faculty mentor and two additional tenured or tenure-track members of the art history faculty.

FINAL EXAMINATION
The final examination constitutes an oral defense of the written M.A. thesis. The final examination meeting with the M.A. committee normally takes place toward the end of the student’s last semester of course work.

Doctor of Philosophy in Art History
Graduates with a Ph.D. have gained breadth in the discipline of art history and expertise in a specialized area of research. They are expected to contribute to the field of art history through original research that responds to issues deemed critical to their field of concentration. Graduates with a Ph.D. generally anticipate careers in college or university teaching or in the museum profession.

To earn a Ph.D. in art history, students must complete a minimum of 72 s.h. of graduate-level course work with a g.p.a. of at least 3.50; a maximum of 38 s.h. of work taken for the M.A. may be counted toward this requirement. Students are allowed only one semester of academic probation.

To establish academic residency, candidates must be enrolled as full-time students at The University of Iowa for two semesters (at least 9 s.h. each) beyond the first 24 s.h. of graduate-level course work or three semesters (at least 6 s.h. each) with a one-quarter-time assistantship.

Ph.D. students major in one of the following 10 fields: African, Asian, ancient, medieval, Renaissance, Baroque, 18th- and 19th-century European, American, modern/contemporary, and architecture. Candidates also minor in two fields. The first minor must be in an art history field that is not contiguous with the major field. The second minor may be in any art history field or relevant discipline outside the art history division.

REQUIRED COURSES
Ph.D. in art history students must complete the following course work:
Three art history seminars (different instructors in different fields) 9 s.h.
Additional art history courses 15-27 s.h.
Courses outside the School of Art and Art History 0-12 s.h.
Up to 6 s.h. of credit for dissertation research may be applied toward the 72 s.h. required for the degree. Courses outside the curriculum of the School of Art and Art History’s art history division do not carry art history credit.

Directed Studies
Normally, a maximum of 6 s.h. earned in 01H:300 Directed Studies may be applied toward the semester-hour requirement for the Ph.D., although doctoral students may petition the art history faculty for permission to apply up to 9 s.h.
PH.D. COMMITTEE
The Ph.D. committee consists of the student's faculty mentor, who is responsible for the major field, two members responsible for the two minor fields, and at least two additional members. Of these five, four must be tenured or tenure-track faculty members from the art history division. One must be from outside the division and must be on the faculty of the Graduate College. When appropriate, committees may include additional members.

COMPREHENSIVE EXAMINATION
Upon completion of course requirements, the Ph.D. candidate takes three written comprehensive examinations. The major exam consists of six questions and lasts six hours; the two minor exams each consist of three questions and last three hours. The exams normally are taken on two consecutive days.

The scope of the comprehensive exams is determined in consultation with the candidate’s degree committee supervisor and the committee members responsible for the two minor fields.

ORAL COMPREHENSIVE EXAMINATION
Within approximately one month of completing the three written exams, the candidate meets with his or her degree committee for the oral comprehensive examination, which concentrates on questions that arise from the written comprehensive exams.

DISSERTATION PROPOSAL
As soon as possible after completing the comprehensive examinations, the candidate submits a dissertation proposal to his or her degree committee supervisor and subsequently to the degree committee. The proposal includes a 1-2 page abstract, a 10-15 page précis (including a review of the state of the field), and a bibliography.

After the proposal has been approved by the committee, the candidate circulates an abstract to the entire art history faculty. He or she must present a public lecture about the dissertation topic no later than the end of the semester following the degree committee’s approval. The lecture must be scheduled with the head of art history.

FINAL EXAMINATION
The completion of a written dissertation, which constitutes an original scholarly contribution to the field, and the successful completion of the final examination (the oral defense) of this dissertation are the final Ph.D. requirements.

Doctor of Philosophy in Art Education
The Ph.D. in art education gives college teachers and researchers in art education and art supervisors in state departments of education and school systems an opportunity to continue their inquiry and creative work in art history and in studio art.

The program is administered by the College of Education, in cooperation with the School of Art and Art History. Students must apply for admission to the College of Education.

Degree Requirements
Students must complete at least 60 s.h. of graduate work beyond the M.A. The curriculum must be planned with the adviser and must include at least 15 s.h. in the School of Art and Art History, 15 s.h. in art education graduate seminars, 15 s.h. in a related area (e.g., aesthetics, anthropology, higher education, psychology, sociology), and 15 s.h. in thesis and tool courses (07E:306 Introduction to Research in Art Education).

Students must take both oral and written comprehensive examinations. The written examination consists of an in-depth research problem to be completed within 14 days, after which an oral examination on the project is held. The research problem is assigned by the examining committee, and the written portion of the examination is not intended to relate directly to the student’s dissertation proposal.

Students also must complete a written dissertation for at least 12 s.h. of credit and are expected to prepare a dissertation proposal and defend it before the dissertation committee. An oral examination on the dissertation is the Ph.D. final examination.

Graduate Admission
Applicants to the graduate programs in art and art history must meet the admission requirements of the Graduate College as well as those of the School of Art and Art History.
Completed applications for the master’s or doctoral program in art history and requests for financial aid must be received by January 15 for fall admission.

Completed applications for the master’s program in all areas of studio art and requests for financial aid must be received by February 1 for fall admission. Complete application materials should be sent to the graduate secretary, School of Art and Art History.

The Office of Graduate Admissions notifies all applicants by mail of admission decisions. Acceptance notification cannot be given over the phone by either the admissions office or the School of Art and Art History. Decisions regarding admission and assistantships cannot be confirmed until at least two weeks after the application deadline.

Applicants whose first language is not English and who do not have a baccalaureate degree from an accredited college or university in the United States, the United Kingdom, Canada (except Quebec), Australia, or New Zealand must score as follows on the Test of English as a Foreign Language (TOEFL): at least 550 (paper-based) or at least 213 (computer-based) for admission to the studio program; and at least 600 (paper-based) or at least 250 (computer-based) for admission to the art history program.

All applicants must submit the following to the Office of Graduate Admissions:
- a completed application for admission (one area of interest must be specified on the application form);
- Graduate Record Exam (GRE) General Test scores, and TOEFL scores (if applicable);
- the required application fee; and
- an official copy of all undergraduate transcripts and/or graduate work completed by the date of application.

Art history applicants must include Graduate Record Examination (GRE) General Test scores with their application for admission, in accordance with the appropriate application deadlines. Studio or art education applicants who do not submit GRE General Test scores at the time of application must do so by their first semester in residence. In addition, applicants must meet the graduate application requirements for the particular programs for which they seek admission, as follows.

**STUDIO ART**

Admission procedures for graduate studio programs include a review of applications and all of the applicant’s supporting material by a committee composed of area faculty members. Complete application materials for graduate degrees in studio art must be submitted to the School of Art and Art History by February 1.

Applicants must submit the following to the graduate secretary at the School of Art and Art History: a one-page statement of purpose, official transcripts for all undergraduate and graduate work completed by the date of application, three letters of recommendation assessing potential as a graduate student, application for graduate awards (if desired), and application for graduate scholarships and fellowships (if desired). They also must submit one of the following portfolios. (Portfolios are returned by mail only if return postage is supplied by the applicant.)

**Ceramics, design, intermedia and video art, metalsmithing and jewelry, or painting:**
- 8 slides and/or photos of work in the major area and 2 slides or photos of work in a second studio area
- CDs may be submitted for ceramics, CDs or DVDs for intermedia

**Drawing:**
- 8 slides or photos of drawings, including figure drawings, and 2 slides or photos of work in a second studio area

**Photography:**
- a selection of 20-25 slides or prints in the major field of work and 2-3 slides or photos of work in a second studio area

**Printmaking:**
- a selection of 6-20 original prints and at least 6 original drawings in a returnable carton or mailing tube, and 8-10 slides or photos of prints

**Sculpture:**
- a selection of 20 slides or a CD with at least 10 sculptures or installations (multiview) and a slide of at least two drawings; for kinetic sculptures, a DVD

Each slide must be enclosed in a slide sheet and labeled with the name, title, portfolio medium, size, and approximate date of work; the top should be indicated. An inventory list with the same information should be included. Extreme care is taken in handling all portfolios, but the school cannot be responsible for reimbursement in the event of loss or damage.

**ART HISTORY—M.A.**

Applicants to the M.A. program in art history must have earned a bachelor’s degree.

Proficiency in at least one foreign language (French or German), shown by completion of
two years (or the equivalent) of undergraduate language course work with a grade of B or higher, is required for admission.

Although exceptions sometimes are made, applicants should have a combined verbal and quantitative score of at least 1200 and an analytical writing score of at least 5 on the Graduate Record Exam (GRE) General Test; and an undergraduate g.p.a. of at least 3.25.

In addition to the admissions materials required by the Graduate College, the School of Art and Art History requires that applicants submit a research paper (preferably from an art history course) or undergraduate thesis that demonstrates the applicant's ability to do future research in art history; a 500- to 1,000-word essay that outlines the applicant's purpose in pursuing graduate studies and states his or her intellectual interests and career goals; three letters of recommendation that assess the applicant's potential for graduate study; and transcripts from all colleges and universities attended. The materials should be submitted by January 15 to the School of Art and Art History's graduate secretary.

ART HISTORY—PH.D.

Applicants for admission to the Ph.D. program in art history must have earned an M.A. in art history or a related graduate degree. Proficiency in at least two foreign languages (French and German), shown by completion of the second semester of a graduate-level reading-for-research language course or completion of the fourth semester of an undergraduate language sequence with a grade of B or higher, is required for admission.

Although exceptions may be made, applicants should have a combined verbal and quantitative score of at least 1200 and an analytic writing score of at least 5 on the Graduate Record Exam (GRE) General Test; and a graduate g.p.a. of at least 3.50.

Students who have completed their M.A. at The University of Iowa and who wish to apply for entrance into the Ph.D. program must make a formal application to the program. Applications are evaluated in the context of the entire applicant pool.

In addition to the admissions materials required by the Graduate College, the School of Art and Art History requires that applicants submit a thesis or other major research paper, an essay of 500 to 1,000 words that outlines the applicant's purpose in pursuing graduate studies and states his or her intellectual interests and career goals; three letters of recommendation, including one from the applicant's M.A. thesis supervisor assessing the applicant's potential for doctoral study; and transcripts from all colleges and universities attended. The materials should be submitted to the School of Art and Art History's graduate secretary.

Completed applications for the master's or doctoral program and requests for financial aid must be submitted to the School of Art and Art History graduate secretary by January 15.

ART EDUCATION

Applicants must submit to the School of Art and Art History's graduate secretary a one-page paper that states their purpose and three letters of recommendation that assess their potential for graduate study.

Applicants to the M.A. program in art education must submit a term paper or other example of ability to write in the field and a selection of slides or photographs of their creative work in two studio areas.

For admission to the Ph.D. in art education, applicants must meet the doctoral student admission requirements of the Graduate College and must have an M.A. in art education from The University of Iowa or an equivalent degree from an accredited college or university. Students who have course work deficiencies must register for pertinent courses. Candidates must have completed one year of successful teaching experience in an elementary or secondary school to be eligible for the doctoral degree.

Application to the Ph.D. program must be accompanied by a representative portfolio of the candidate's work, consisting of 12 colored slide reproductions of art work and two examples of written work, which may consist of previously written papers or new work. The portfolio should be submitted to the Art Education Office. Complete application materials for graduate admission in art education must be on file in the College of Education by February 1 for fall admission.

Financial Support

Fellowships, teaching assistantships, research assistantships, and tuition scholarships are awarded to graduate students on the basis of artistic and/or scholarly record.

In the studio programs, financial aid to new students is possible, but most assistantships and scholarships are awarded to graduate students who have been in residence for at least a year.
This gives faculty members an opportunity to observe their performance and potential.

**Presidential Graduate Fellowships**

These fellowships are awarded by the Graduate College on the basis of a University-wide competition among incoming Ph.D. students. Each fellowship is a four-year package, including two years on fellowship and two years on teaching or research assistantships. They include stipends plus full tuition scholarships. The school nominates incoming students for Presidential Graduate Fellowships on the basis of Graduate Record Examination scores, grade-point average, and letters of recommendation.

**Teaching and Research Assistantships**

Assistantships are awarded to graduate students on the basis of academic record, Graduate Record Examination (GRE) General Test scores, promise as scholars or artists, and demonstrated ability to do the job. Quality of performance in one’s graduate program at Iowa is generally the major criterion for awarding teaching assistantships. The number of hours of work required depends on the amount of the award.

**Scholarships and Fellowships**

The School of Art and Art History offers a variety of scholarships and fellowships made possible by contributions from alumni who wish to support promising artists and scholars. These awards are made on the same basis as teaching and research assistantships.

Information and application materials for graduate scholarships and fellowships are included in the admissions package. They also are available from the School of Art and Art History director’s secretary.

Renewal or reappointment for fellowships and assistantships depends on adequate progress toward the degree (graduate students must accumulate at least 18 s.h. of graduate credit each calendar year and maintain a grade-point average above the required minimum) and satisfactory performance of assistantship duties.

Decisions on assistantships and financial aid generally are made during the latter part of the spring semester for the following academic year. In most cases, applications and all relevant materials should be on file by February 1.

**Special Resources**

**Reference Collections**

The art library contains 100,000 volumes, an outstanding periodical collection, and an extensive microfilm and microfiche archive.

The school’s Office of Visual Materials contains 300,000 slides, 30,000 photographs, a videotape library, and a digital image library.

**Museum of Art**

The University’s Museum of Art has a significant permanent collection that includes major holdings of 20th century and contemporary art, African and Pre-Columbian art, English and American silver, European and American prints, drawings and photographs, and Etruscan, Iranian, and contemporary American ceramics. As well as serving as a resource for research in a wide variety of art history areas, the museum offers a program of exhibitions, lectures, and recitals.

**Interdisciplinary Resources**

Colloquia, visiting artists and lecturer programs, and graduate workshops bring visitors to the school and provide open forums for discussion of issues in art and scholarship. Among the school’s major assets is the Project for the Advanced Study of Art and Life in Africa (PASALA), an interdisciplinary program that brings together faculty with international reputations in art history and anthropology to offer courses and independent study of art and expressive culture in West, Central, East, and South Africa. The result is a program of unusual breadth and depth of expertise. PASALA is among the most active of such programs in the country, organizing international symposia that discuss significant topical issues and publishing the proceedings in regular issues of *Iowa Studies in African Art*. Each year the project hosts distinguished international fellows from a range of disciplines who work with students and faculty on original research projects. In addition, PASALA offers scholarships and support for research in Africa and dissertation preparation to outstanding students. A major resource for PASALA is the Stanley Collection of African Art in The University of Iowa Museum of Art.

Art history participates in a collegewide program called Crossing Borders, which offers support to designated graduate student fellows whose
dissertation topics involve multiple foreign language areas. Fellows take team-taught seminars in a range of disciplines, with focus on interactions across cultural, regional, or national divides. They help plan an annual convocation, at which they and invited lecturers present their research.

The school also maintains an affiliation with the University's Department of American Studies, providing students with opportunities to study not only the history of American art but a variety of interdisciplinary programs in American history, literature, and politics.

**Facilities**

The school houses a printshop containing intaglio, lithographic, and monotype equipment and facilities for hot-stamping foil; facilities for welding and fabrication of steel sculpture; excellent drawing studios in the main building as well as individual studios for painting and drawing; and a B.F.A. painting studio space; a well-equipped darkroom and a digital photography laboratory; extensive kiln facilities, including provision for construction of various types of temporary and specialized kilns; a large shop for metalworking and industrial design; electroforming equipment; a silkscreen and offset print shop; a computer laboratory for graphic design; video equipment; and a schoolwide computer lab.

The sculpture area maintains a full range of welding facilities and specializes in heliarch, MIG, TIG, and oxyacetylene equipment. There are facilities for metal forming, such as a large wide-mouth gas forge, metal rollers, and shears. The area also maintains a bronze casting facility that includes furnaces and burn-out kilns for investment, ceramic shell, and bonded sand.

Art History—for Undergraduate and Graduate Students

An introductory course in the appropriate art history area or consent of instructor is prerequisite for courses numbered above 100. Courses designated “Themes in Art History” consider topics of current interest in the field, organized thematically rather than chronologically.

01H:103 Art of the South Pacific 3 s.h.
Traditional arts of Polynesia, Micronesia, Melanesia.

01H:104 American Indian Art 3 s.h.
Sculpture, painting, architecture, crafts, art of personal adornment of native peoples of North America. GE: cultural diversity.

01H:105 Art of Pre-Columbian America 3 s.h.
Art, architecture of Mexico, Peru before Cortez.

01H:106 African Kings 3 s.h.
African art created to reflect the political and military power of African rulers; in-depth study.

01H:107 Art of West Africa 3 s.h.

01H:110 Egyptian Art 3 s.h.
Sculpture, painting, architecture, and luxury arts from Pyramid Age to Death of Cleopatra. Prerequisite: 01H:005 or consent of instructor. Same as 032:104.

01H:111 Art and Independence in West Africa 3 s.h.
Art by West African artists just before, during, and just after the process of decolonization in several West African countries. Prerequisite: 01H:073 or 01H:113 or consent of instructor.

01H:112 Art and Independence in South Africa 3 s.h.
Artists in South Africa and diaspora since 1970. Prerequisite: 01H:073 or 01H:113 or consent of instructor.

01H:113 Contemporary African Art 3 s.h.
African art from the 1950s to the present. Prerequisite: 01H:073 or consent of instructor.

01H:114 Gender in African Art 3 s.h.
Examination of the role gender plays in shaping African art history; contemporary female African artists in African and diaspora. Prerequisite: 01H:113 or consent of instructor.

01H:119 Chinese Art and Culture 3 s.h.
Archaeological discoveries, sculpture, painting, architecture, calligraphy, other arts of Greater China area in historical and cultural contexts of past 5,000 years. Prerequisite: 01H:006 or 01H:031 or consent of instructor. Same as 039:159.

01H:120 Chinese Painting I 3 s.h.
Early Chinese painting from fourth century B.C.E. through 14th century C.E.; figural style, religious art, emergence of landscape, other nonreligious subjects, interconnectedness of painting and calligraphy as fine arts. Prerequisite: 01H:006 or 01H:031 or consent of instructor. Same as 039:120.

01H:121 Chinese Painting II 3 s.h.
Chinese painting 14th through 20th centuries; roots and backgrounds in earlier periods; late non-Chinese influences; Chinese painting on the international scene. Prerequisites: 01H:006 or 01H:031 or consent of instructor. Same as 039:121.

01H:122 Japanese Art and Culture 3 s.h.
Arts of Japan in their historical, religious, cultural contexts; what is specifically Japanese about Japanese arts and culture; non-Japanese influences, contributions. Prerequisite: 01H:006 or 01H:031 or consent of instructor. Same as 39J:156.

01H:123 Japanese Painting 3 s.h.
Japanese painting in its historical, cultural contexts; focus on developments of successive eras—religious art; narrative, other literary connections; Zen, decorative traditions; popular arts; Japan and the modern world. Prerequisite: 01H:006 or 01H:031 or consent of instructor. Same as 39J:123.

01H:124 Themes in Asian Art History 3 s.h.
Prerequisite: 01H:016 or 01H:016 or equivalent consent of instructor. Same as 039:111.

01H:126 Early Greek Art 3 s.h.
Art and archaeology of the Greek Bronze Age cultures from ca. 3000 B.C.E. to the end of Late Archaic Greece, ca. 500 B.C.E. Prerequisite: 01H:005 or 01H:026 or consent of instructor. Same as 20E:123.

01H:127 Classical Greek Art 3 s.h.
Art, sacred architecture from early Classical through late fourth century B.C.E.; Athens in the Golden Age. Prerequisite: 01H:005 or 01H:026 or consent of instructor. Same as 20E:124.

01H:128 Greek Vase Painting 3 s.h.
Greek ceramics as documents of religious beliefs, mythology, aspects of daily life ca. 1000-300 B.C.E. Prerequisite: 01H:005 or 01H:026 or consent of instructor. Same as 20E:125.

01H:129 Hellenistic Art 3 s.h.
Sculpture, painting, architecture, luxury arts in ancient lands conquered by Alexander the Great. Prerequisite: 01H:005 or 01H:026 or consent of instructor. Same as 20E:126.

01H:130 Etruscan Art 3 s.h.
Art and archaeology of Etruscan culture with focus on religion, ca. 900 B.C.E. to Roman conquest of Etruria. Prerequisite: 01H:005 or 01H:026 or consent of instructor. Same as 20E:127.

01H:132 Early Roman Art 3 s.h.
Art and architecture of Roman Italy and provinces from late Caesar Republic through reign of Hadrian, 80 B.C.E.-138 C.E. Prerequisite: 01H:005 or 01H:026 or consent of instructor. Same as 20E:128.

01H:133 Later Roman Art 3 s.h.
Art and architecture of late imperial Rome and the provinces, from the Antonines through Constantine, C.E. 138-337. Prerequisite: 01H:005 or 01H:026. Same as 20E:130.

01H:134 Art and Culture in Ancient Pompeii 3 s.h.
Art and architecture, as documents of ancient society and religion in towns destroyed by Mount Vesuvius in C.E. 79. Prerequisite: 01H:005 or 01H:026 or consent of instructor. Same as 20E:129.

01H:136 Early Medieval Art 3 s.h.
Survey of European art from 300-1000 A.D. Prerequisite: 01H:005 or 01H:040 or consent of instructor.

01H:137 Romanesque and Gothic Art 3 s.h.
Art and architecture in western Europe 1000-1500. Prerequisite: 01H:005 or 01H:040 or consent of instructor.

01H:138 Gothic Architecture 3 s.h.
Gothic architecture and its history, from varied perspectives (e.g., formal structural, symbolic, geometric, socio-economic). Prerequisite: 01H:005 or 01H:040 or consent of instructor.
01H:139 The Sculptural Origins of Michelangelo 3 s.h.
Sources 13th to 15th centuries for the work of Michelangelo. Prerequisite: 01H:005 or 01H:006 or consent of instructor.

01H:140 The World of Giotto and Dante 3 s.h.
Painting, sculpture, and architecture 1250-1400. Prerequisite: 01H:005 or 01H:006 or consent of instructor.

01H:141 Masaccio to Leonardo da Vinci 3 s.h.
Painting, sculpture, and architecture 1400-1525. Prerequisite: 01H:005 or 01H:006 or consent of instructor.

01H:142 Leonardo, Raphael, and their Contemporaries 3 s.h.
The arts in Italy 1485-1550. Prerequisite: 01H:005 or 01H:006 or consent of instructor.

01H:144 Classical Architecture: Theory/Practice 3 s.h.
Architectural design in the Italian Renaissance, Brunelleschi to Borromini. Prerequisite: 01H:005 or 01H:006 or consent of instructor.

01H:145 Buildings and Society in Europe 1500-1800 3 s.h.
Architecture from a sociological perspective.

01H:147 Violence and Image in Early Modern Europe 3 s.h.
Images of bloodshed and their sociological function 1500-1750.

01H:150 Seventeenth-Century Dutch and Flemish Painting 3 s.h.
Painting in the age of Rubens, Rembrandt, Vermeer; rise of landscape, still life, genre. Prerequisite: 01H:006 or consent of instructor.

01H:151 Inside Baroque: History and Methods of 17th-Century European Painting 3 s.h.
Study of Baroque painting techniques combined with studio practice; team-taught. Prerequisite: consent of instructor. Same as 01K:151.

01H:152 Rembrandt 3 s.h.
Works, life, and legend of the 17th-century Dutch master painter. Prerequisite: 01H:005 or consent of instructor.

01H:155 The Romantic Revolution 3 s.h.
Transformations in European art and culture 1750-1850; an age of artistic, political, cultural, intellectual crisis and revolutions; major artists, including David, Ingres, Gericault, Delacroix, Goya, Friedrich, Constable, Turner.

01H:156 Nineteenth-Century Art in Britain 3 s.h.
Painting, sculpture, prints, and book illustration in context of literary, aesthetic, cultural history; rapport between word and image—Blake, Constable, Turner, Ruskin, Morris, the Pre-Raphaelites, the aesthetic movement.

01H:157 Paris and the Art of Urban Life 3 s.h.
City of Paris examined in varied historical, artistic, cultural contexts, interdisciplinary. Same as 009:130, 033:130.

01H:158 Realism, Impressionism, Postimpressionism 3 s.h.
Naturalism, Realism, the Impressionist landscape, painting of modern life, new trends in subjectivity and exoticism mid to late-19th-century European art and culture; Courbet, Manet, Degas, Monet, Renoir, Seurat, Cezanne, Van Gogh, Gauguin, Ensor, Munch.

01H:159 Manet to Matisse 3 s.h.
Development of modernism and the avant-garde in late 19th- and early 20th-century Paris; intersection of innovation and tradition, literature and art, role of theory and criticism in works of Manet, Degas, Seurat, Cezanne, Gauguin, Rodin, Matisse, and Picasso.

01H:162 National Images: American Art to 1865 3 s.h.
Painting, sculpture, and architecture from colonial times to Civil War. Prerequisite: 01H:006 or 01H:006 or consent of instructor.

01H:163 The American Renaissance and the Gilded Age 3 s.h.
Architecture, painting, sculpture 1865-1913. Prerequisite: 01H:006 or 01H:066 or 01H:162 or consent of instructor.

01H:165 American Western Art 3 s.h.
Painting and sculpture of the western United States, primarily from Euro-American perspective. Prerequisite: 01H:006 or 01H:006 or consent of instructor.

01H:166 Chicago Architecture: Big Shoulders City 3 s.h.
Chicago architecture from bungalows to skyscrapers, in context of urban plan, neighborhoods, parks, and mythology. Prerequisite: 01H:006 or 01H:006 or 01H:084 or consent of instructor.

01H:167 African American Art and Architecture 3 s.h.
Visual and material culture of African Americans, including painting, sculpture, decorative arts, and film, examined from aesthetic and ideological perspectives.

01H:170 Modernism and Early Twentieth-Century American Art 3 s.h.
American responses to European Modernism in painting, sculpture, architecture, and photography. Prerequisite: 01H:006 or 01H:006 or consent of instructor.

01H:171 Modern Art 3 s.h.
European and American art 1900-1940. Prerequisite: 01H:006 or 01H:073 or consent of instructor.

01H:172 Late Modern Art 3 s.h.
American and European art 1940-1970. Prerequisite: 01H:006 or 01H:073 or consent of instructor.

01H:173 Contemporary Art 3 s.h.
European and American art 1970 to present. Prerequisite: 01H:006 or 01H:073 or consent of instructor.

01H:174 Cubism and Futurism 3 s.h.
Survey of Cubism and Futurism; focus on painting and sculpture; related aspects of architecture, design. Prerequisite: 01H:006 or 01H:073 or consent of instructor.

01H:176 Dada and Surrealism 3 s.h.
Survey of Dada and Surrealism; focus on painting and sculpture; related developments in photography, other media. Prerequisite: 01H:006 or 01H:073 or consent of instructor.

01H:177 Abstract Expressionism 3 s.h.
Survey of American Abstract Expressionism and European Art Informel and Tachisme; focus on painting and sculpture; related developments in photography, other media. Prerequisite: 01H:006 or 01H:073 or consent of instructor.

01H:178 Pop Art 3 s.h.
Survey of Pop Art in America, Britain, Europe; focus on developments in painting and sculpture 1950s to early 1960s; continuing influence of Pop Art. Prerequisite: 01H:006 or 01H:073 or consent of instructor.

01H:179 Minimalism 3 s.h.
Survey of Minimalism; focus on developments in painting and sculpture during 1960s; continuing influence. Prerequisite: 01H:006 or 01H:073 or consent of instructor.

01H:180 Conceptual Art 3 s.h.
Survey of Conceptual Art as it developed 1960s to early 1970s; continuing influence. Prerequisite: 01H:006 or 01H:073 or consent of instructor.

01H:182 Art, Law, and Ethics 3 s.h.
How law and ethics apply to individuals and institutions concerned with the visual arts. Same as 024:161, 033:175, 091:192.

01H:183 History of Prints 3 s.h.
Printmaking as an important art form, influential carrier of styles and iconography from area to area; focus on Europe; history of prints from prehistoric times to present.
01H:184 History of Photography 3 s.h.
Survey of photography 1839 to present. Prerequisite: 01H:006 or 01H:073 or consent of instructor.

01H:185 Modern Architecture 3 s.h.
Impact of new technology, artistic theory, and social practices on modern European and American architecture, 1850 to present. Prerequisite: 01H:006 or 01H:073 or 01H:084 or consent of instructor.

01H:190 Honors Research in Art History arr.
Research and preparation of thesis. Prerequisites: honors standing and consent of instructor.

01H:194 Readings in Art History arr.
Varied topics.

Art History—Primarily for Graduate Students

01H:200 History and Methods 3 s.h.
Critical thinking and research; readings in historical development of the discipline, from Renaissance to present; methodological paradigms and trends.

01H:210 Art History Colloquium 1 s.h.
Current topics and research in art history. Repeatable. Prerequisite: art history graduate standing.

01H:230 Crossing Borders Seminar: Introductory 3-4 s.h.

01H:247 Crossing Borders Seminar 3 s.h.

01H:300 Directed Studiesarr.

01H:302 M.A. Written Thesis arr.

01H:310 Seminar Problems in African Art 2-3 s.h.
Repeatable. Same as 129:225.

01H:316 Seminar Problems in Asian Art 2-3 s.h.
Repeatable. Same as 039:255.

01H:326 Seminar Problems in Ancient Art 3 s.h.
Repeatable. Same as 20E:210.

01H:330 Crossing Borders Pro-Seminar 1 s.h.

01H:340 Seminar: Problems in Medieval Art 3 s.h.
Major issues, methodologies. Repeatable.

01H:345 Seminar: Problems in Renaissance Art 3 s.h.
Special problems, issues. Repeatable.

01H:353 Seminar: Problems in Baroque Art 3 s.h.
Repeatable.

01H:359 Seminar: Problems in Nineteenth-Century Art 3 s.h.
Repeatable.

01H:362 Seminar: Modern/Contemporary Art 3 s.h.
Major issues, methodologies. Repeatable. Prerequisite: consent of instructor.

01H:366 Seminar: Problems in American Art 3 s.h.
Repeatable.

01H:385 Seminar: Problems in Architectural History 3 s.h.
Repeatable.

01H:400 Ph.D. Readings arr.
Repeatable.

Repeatable.

Studio—for Undergraduate and Graduate Students

Courses numbered through 099 are primarily for undergraduates and are not repeatable for credit except where indicated. Some courses numbered 100-199 are repeatable. Courses 01A:003 Basic Drawing and 01A:004 Design Fundamentals are prerequisites for all studio courses for art majors.

Fundamentals

01A:003 Basic Drawing 3 s.h.
Two-dimensional visual language, media; space, form, color. Prerequisite: art major.

01A:004 Design Fundamentals 3 s.h.
Two- and three-dimensional concepts and their relations; working with basic drawing instruments; problems in visual arts; artists’ philosophies and techniques. Prerequisite: art major or consent of instructor.

01A:302 M.A. Written Thesis 1 s.h.
Prerequisite: consent of thesis supervisor.

01A:304 M.F.A. Written Thesis 1 s.h.
Prerequisite: consent of thesis supervisor.

Elements

01B:001 Elements of Art 3 s.h.
Drawing, composition, selected reading. GE: fine arts. Prerequisite: closed to art majors.

01B:101 Individual Instruction in Elements of Art arr.
Individual instruction in elements of art for advanced students. Prerequisite: consent of instructor.

Ceramics

Courses 01A:003 Basic Drawing and 01A:004 Design Fundamentals are prerequisites for all ceramics courses for art majors; 01B:001 Elements of Art is prerequisite for nonmajors.

01C:000 Ceramics I 3 s.h.
Basic handbuilding methods of forming, firing, glazing clay. GE: fine arts. Prerequisites: 01A:003 and 01A:004 or majors, 01B:001 for nonmajors.

01C:001 Ceramics II 3 s.h.
Basic wheel-throwing techniques; clay, glaze formulation and preparation in kiln firing. Prerequisite: 01C:000 or equivalent.
Courses 01A:003 Basic Drawing and 01A:004 Design Fundamentals are prerequisites for all design courses for art majors; 01B:001 Elements of Art is the prerequisite for nonmajors.

01D:021 Problems in Design I: Form and Structure 3 s.h. Materials, their formal and structural possibilities. Offered fall semesters. Prerequisites: 01A:003 and 01A:004 for majors; 01B:001 for nonmajors.

01D:022 Problems in Design II: Form and Function 3 s.h. How objects are designed and structured; modeling, graphic skills necessary for basic project development. Offered spring semesters. Prerequisite: 01D:022.

01D:025 Introduction to Portfolio Design 3 s.h. Preparation of presentation boards and portfolio production for print and job application for 3-D design students. Prerequisite: 01D:021.

01D:028 Graphic Design I 3 s.h. Basic principles, techniques, and applications of graphic design, typography, composition, visual perception, creative, problem-solving aspects of graphic design. Prerequisites: 01A:003, 01A:004, and two art history courses.

01D:064 Introduction to Computer-Aided Design for 3-D Design 3 s.h. Basic principles of 2-D and 3-D computer-aided drafting; use of AutoCAD software to draw plans, elevations, and sections for objects and interior spaces. Prerequisites: 01A:003 and 01A:004.

01D:082 Introductory Computer Graphic Design 3 s.h. Macintosh computer as creative tool for graphic design; composition, manipulation, organization of type and image; projects, demonstrations, discussions. Prerequisites: 01A:004 and 01D:028.

01D:108 Introduction to Computer Modeling for 3-D Design 3 s.h. Basic knowledge and practical technical skills using 3DS Max Studio software; experience creating and manipulating basic forms and working with texture, background, light, and camera viewpoints; basic animation. Prerequisites: 01D:021 and 01D:064.

01D:125 Typography 3 s.h. Principles and history; designing with type; functional, aesthetic dimensions of typography. Prerequisites: 01D:133 and consent of instructor.

01D:128 Computer Graphic Design 3 s.h. Composition, manipulation, organization of image and type using Macintosh computer platform as a creative tool for graphic design; nature, uses, limitations of digital technology. Prerequisites: 01D:028 and 01D:082, or consent of instructor.

01D:133 Graphic Design II 3 s.h. In-depth study and exploration of graphic design as creative and problem-solving tool of visual communication; translation of ideas and concepts into comprehensible visual language. Prerequisites: 01D:028 and consent of instructor.

01D:135 Graphic Design Workshop I 3 s.h. Continuation of 01D:133; graphic design knowledge and skills applied to complex design problems such as visual identity, packaging, information design. Prerequisite: 01D:125.

01D:137 Environmental Design I 3 s.h. Human interaction with the interior and exterior environment. Offered fall semesters of odd years. Prerequisites: 01D:021 and 01D:022, or equivalents; and consent of instructor. Same as 049:158.

01D:141 Interior Design I 3 s.h. Relationship of interior space to its architecture, environment, human element, color, materials, furnishings, lighting, projects. Offered spring semesters. Prerequisites: 01D:021, 01D:022, and consent of instructor.

01D:142 Color for Interior Design 3 s.h. Use of color for interior spaces; principles of color theory reviewed and applied to 3-D environments; color as a compositional element and psychological tool. Prerequisites: 01D:021, 01D:022, and 01D:141.

01D:144 Interior Design II 3 s.h. Continuation of 01D:141. Offered fall semesters of even years. Prerequisites: 01D:064 and 01D:141.

01D:175 Advanced Typography 3 s.h. Continuation of 01D:125; advanced typographic problems. Prerequisite: 01D:125.

01D:190 Undergraduate Individual Instruction 1-3 s.h. Individual instruction in design for advanced students. Prerequisite: consent of instructor.

01D:235 Graphic Design Workshop II arr. Complex problems in graphic design; planning, development, organization of integrated design programs. Repeatable. Prerequisites: 01D:133, 01D:135, and consent of instructor.

01D:238 Environmental Design II 3 s.h. Continuation of 01D:137; design of graphic elements in natural and built environments. Repeatable. Prerequisites: 01D:137 and consent of instructor.

01D:240 Individual Instruction in Design arr. Repeatable.
Drawing

Courses 01A:003 Basic Drawing and 01A:004 Design Fundamentals are prerequisites for all drawing courses for art majors; 01B:001 Elements of Art is prerequisite for nonmajors.

*All B.F.A. students in drawing and painting must take 01F:106. Offered fall semesters.

01F:007 Life Drawing I 3 s.h.
Observational drawing of form in its spatial contexts; drawing in varied media; figural as well as nonfigural content. Prerequisites: 01A:003 and 01A:004; and 01B:001 for nonmajors.

01F:105 Concepts in Drawing 3 s.h.
Drawing from topics at the intermediate level; observation, theory, media, form, content; emphasizes personal direction. Prerequisite: 01F:007. Same as 049:157.

01F:106 Undergraduate Seminar in Drawing and Painting 3 s.h.
Contemporary issues, practical and professional skills, interdisciplinary concerns, education and career goals. Offered fall semesters. Prerequisite: 01F:105.

01F:109 Advanced Concepts in Drawing 4 s.h.
Drawing from topics at the advanced level. Repeatable. Prerequisite: 01F:105.

01F:190 Undergraduate Individual Instruction 1-3 s.h.
Individual instruction in drawing for advanced students. Prerequisite: consent of instructor.

01F:199 Special Topics in Drawing and Painting 3 s.h.
Advanced issues in drawing and painting. Prerequisite: 01F:105.

01F:201 Graduate Drawing 3 s.h.
Compositional and conceptual drawing as related to the student’s major interest; varied media. Repeatable. Prerequisites: 6 s.h. of 01F:105 or equivalent, and consent of instructor.

01F:205 Individual Instruction in Drawing arr.
Repeatable.

Metalsmithing and Jewelry

Courses 01A:003 Basic Drawing and 01A:004 Design Fundamentals are prerequisites for all metalsmithing and jewelry courses for art majors; 01B:001 Elements of Art is prerequisite for nonmajors.

01G:084 Introduction to Jewelry and Metal Arts 3 s.h.
Basic metalsmithing techniques, including sheet metal fabrication, hammer forming, hydraulic die forming, soldering, riveting, repousse, etching, roll printing, anodizing, stone setting, patination; creation of jewelry, functional, and nonfunctional objects using metals, other materials. Prerequisites: 01A:003 and 01A:004 for majors; 01B:001 for nonmajors.

01G:185 Intermediate Jewelry and Metal Arts 3 s.h.
Continuation of 01G:084; electroforming, electro-applique, casting, hinging, fold forming, inlay, stone setting, mold making; creation of conceptual and/or functional objects; jewelry; and prototype pieces for production art work using metals, other materials. Prerequisite: 01G:084.

01G:186 Advanced Jewelry and Metal Arts 3 s.h.
Examining, laser print transfer/resist, lathe usage, gold plating, kumboo; production of pieces using 3-D computer modeling, prototyping, other CNC industrial technologies, photo etching dropout processes; historical and current trends in crafts. Prerequisite: 01G:084.

01G:187 Mixed Media Workshop 3 s.h.
Free exploration of all media and materials, including found objects, creation of conceptual and/or functional mixed media objects, jewelry, sculptures, installation pieces; pioneering use of new materials, development of new techniques, creation of diverse innovative art works. Prerequisite: 01G:084. Recommended: 01G:185 and 01G:186.

01G:188 Metals Graduate Workshop 3 s.h.
Independent studio work; personal aesthetics, conceptual and technical skills developed and refined; creation of work without boundaries of media; portfolios, exhibitions, professional goals. Prerequisites: 01G:185, 01G:186, and 01G:187, or equivalents.

01G:190 Undergraduate Individual Instruction 1-3 s.h.
Individual instruction in metalsmithing and jewelry for advanced students. Prerequisite: consent of instructor.

01G:240 Individual Instruction in Metalsmithing and Jewelry arr.

Intermedia, Video Art

Courses 01A:003 Basic Drawing and 01A:004 Design Fundamentals are prerequisites for all intermedia and video art courses for art majors; 01B:001 Elements of Art is prerequisite for nonmajors.

01J:090 Intermedia I 3 s.h.
Interdisciplinary focus; emphasis on conceptual, installation, video, time-based media, performance art. Prerequisites: 01A:003 and 01A:004 for majors; 01B:001 for nonmajors.

01J:091 Intermedia II 3 s.h.
Interdisciplinary investigation of materials and concepts in relation to time-based media, performance, video, installation; individual and collaborative projects. Prerequisite: 01J:090.

01J:105 Time-Based Media/Video I 3 s.h.
Studio experimentation, individual projects. Prerequisites: 01J:000 or equivalent, and consent of instructor.

01J:106 Time-Based Media/Video II 3 s.h.
Continuation of 01J:105. Prerequisites: 01J:105 and consent of instructor.

01J:110 Intermedia Workshop 3 s.h.
Visual practice/visual theory; projects, critiques, visiting artists and scholars. Prerequisite: consent of instructor.

01J:115 What is Storytelling For? 3 s.h.
Same as 033:115.

01J:140 Artists in the Community—Intermedia 3-4 s.h.
Student participation in internships at Iowa City/Coralville nonprofit organizations; interdisciplinary seminar. Prerequisite: consent of instructor.

01J:190 Undergraduate Individual Instruction 1-3 s.h.
Individual instruction in intermedia for advanced students. Prerequisite: consent of instructor.

01J:190 Undergraduate Individual Instruction 1-3 s.h.
Individual instruction in intermedia for advanced students. Prerequisite: consent of instructor.
Painting
Courses 01A:003 Basic Drawing and 01A:004 Design Fundamentals are prerequisites for all painting courses for art majors; 01B:001 Elements of Art is prerequisite for nonmajors.

01K:009 Painting I 3 s.h.
Emphasis on observational painting, theory and development of pictorial ideas and skills. Prerequisite: 01F:007.

01K:010 Painting II 3 s.h.
Materials, techniques, beginning of a personal painting language through observation and imagination. Prerequisites: 01K:009 and consent of instructor.

01K:025 Life Painting 3-4 s.h.
Emphasis on the figure and/or still life, and discussion. Prerequisites: 01K:010 and consent of instructor.

01K:046 Intermediate Painting 3 s.h.
Continued discussion of personal direction in painting developed through contemporary issues. Prerequisites: 01K:009 and 01K:010, or equivalents, and consent of instructor.

01K:049 Advanced Painting 3-4 s.h.
Individual projects as they aid the realization of a personal vision. Prerequisite: 01K:046 or equivalent, and consent of instructor.

01K:151 Inside Baroque: History and Methods of 17th-Century European Painting 3 s.h.
Study of Baroque painting techniques combined with studio practice; team-taught. Same as 01H:151.

01K:190 Undergraduate Individual Instruction 1-3 s.h.
Individual instruction in painting for advanced students. Prerequisite: consent of instructor.

01K:199 Special Topics in Painting and Drawing 3 s.h.
Advanced issues in painting, drawing. Prerequisite: 01K:010.

01K:206 Graduate Painting: Topics 3 s.h.
Individual painting projects in desired medium; topics vary. Prerequisite: consent of instructor. Corequisite: 01K:208.

01K:207 Graduate Drawing and Painting Workshop 3 s.h.
Group and individual criticism, team-taught. Prerequisite: consent of instructor. Corequisite: 01K:208.

01K:208 Graduate Drawing and Painting Forum 1-3 s.h.
Problems and issues of contemporary artists. Prerequisite: consent of instructor.

01K:215 Individual Instruction in Painting arr.
Repeatable. Prerequisite: consent of instructor.

Photography
Courses 01A:003 Basic Drawing and 01A:004 Design Fundamentals are prerequisites for all photography courses for art majors; 01B:001 is prerequisite for nonmajors.

01L:034 Beginning Photography 3 s.h.
Camera, light meter, darkroom; history, theory of photography. Prerequisites: 01A:003 and 01A:004 for majors; 01B:001 for nonmajors.

01L:040 Introduction to Digital Imaging 3 s.h.
Working knowledge of digital image-making techniques, including image capture, image building/editing, printing/output options, work with Photoshop on Macintosh computers.

01L:101 Intermediate Photography 3 s.h.
Photographic materials, development of personal vision. Prerequisite: 01L:034 or equivalent.

01L:105 Advanced Photography 3 s.h.
Individual projects; development of personal vision. Prerequisite: 01L:101.

01L:125 Color Photography 3 s.h.
Basic color printing procedures. Prerequisite: 01L:101.

01L:129 Materials and Techniques 3 s.h.
Concepts and techniques, from reading contemporary topics to understanding and applying nontraditional photographic processes and digital imaging. Prerequisites: 01L:101 and consent of instructor.

01L:134 Silkscreen 3 s.h.
Photographic, nonphotographic stencil techniques for silkscreen printing. Prerequisites: 01A:003 and 01A:004. Recommended: 01L:034.

01L:135 Offset Productions Workshop 3 s.h.
Graphic arts techniques for producing postcards, broadsides, and visual books via high-speed offset press. Prerequisites: 01L:101 or equivalent, and consent of instructor. Same as 108:135.

01L:140 Digital Imaging 3 s.h.
Varied image editing programs, with focus on Photoshop, Adobe Illustrator, and the web.

01L:165 4 x 5 Camera and Lighting 3 s.h.
Use of a 4 x 5 camera to correct perspective, depth of field; large format printing, negative processes. Prerequisite: 01L:101.

01L:190 Undergraduate Individual Instruction 1-3 s.h.
Individual instruction in photography for advanced students. Prerequisite: consent of instructor.

01L:231 Individual Instruction in Photography arr.
Repeatable. Prerequisite: consent of instructor.

01L:236 Graduate Photography Workshop arr.
Projects, group critiques, readings. Prerequisite: consent of instructor.

Printmaking
Courses 01A:003 Basic Drawing and 01A:004 Design Fundamentals are prerequisites for all printmaking courses for art majors; 01B:001 Elements of Art is prerequisite for nonmajors.

01M:021 Undergraduate Intaglio I 3 s.h.
Concepts, techniques; Renaissance and contemporary ideas, methods; emphasis on metal plate printing, including etching, drypoint, engraving, softground, aquatint. Prerequisites: 01A:003 and 01A:004 for majors; 01B:001 for nonmajors.

01M:022 Undergraduate Intaglio II 3 s.h.
Individual instruction, with emphasis on development of personal visual language, woodcut, metal plate, color prints. Prerequisite: 01M:021.

01M:024 Undergraduate Relief I 3 s.h.
Relief printmaking techniques. Prerequisites: 01A:003 and 01A:004 for majors; 01B:001 for nonmajors.

01M:025 Undergraduate Relief II 3 s.h.
Continuation of 01M:024. Prerequisite: 01M:024.

01M:031 Undergraduate Lithography 3 s.h.
Fundamental techniques, characteristics of lithography; basic direct drawing, processing, printing of stone and plate images in black and white. Prerequisites: 01F:007 or equivalent, and consent of instructor.
### Undergraduate Monotype

- **01M:041 Undergraduate Monotype** 3 s.h.
  - Historical, technical, aesthetic aspects of unique non-matrix printed images as an approach to printmaking. Offered fall semesters. Prerequisites: 01A:003, 01A:004, and 01F:007.

### Undergraduate Monoprint

- **01M:042 Undergraduate Monoprint** 3 s.h.
  - Concepts and techniques in using traditional and alternative printmaking media to produce unique, matrix-generated prints. Offered spring semesters. Prerequisite: 01M:042 or equivalent.

### Advanced Intaglio and Relief

- **01M:122 Advanced Intaglio and Relief** 3 s.h.
  - Concepts and techniques of intaglio/relief; etching, engraving, drypoint, softground, aquatint, woodcut, linocut, color printing; emphasis on advanced methods, personal vision. Prerequisite: 01M:022 or equivalent.

### Lithography

- **01M:131 Lithography** 3 s.h.
  - Technical, aesthetic characteristics; basic direct drawing, processing, printing of stone and plate images in black and white. Prerequisites: 01F:007 or equivalent, and consent of instructor.

### Advanced Lithography

- **01M:132 Advanced Lithography** 3 s.h.
  - Technical, aesthetic aspects; emphasis on color printing, indirect image-forming and photo-mechanical processes. Prerequisites: 01M:131 or equivalent, and consent of instructor.

### Monotype

- **01M:141 Monotype** 3 s.h.
  - Historical, technical, aesthetic aspects of unique non-matrix, printed images. Offered fall semesters. Prerequisites: 01F:007 or equivalent, and consent of instructor.

### Monoprint

- **01M:142 Monoprint** 3 s.h.
  - Concepts, techniques in use of traditional and alternative printmaking media to produce unique, matrix-generated prints. Offered spring semesters. Prerequisites: 01M:022 or equivalent, and consent of instructor.

### Foil Imaging I

- **01M:151 Foil Imaging I** 3 s.h.
  - Participation in development of a new art form involving creation of original prints and other works of art using hot stamped foil and Iowa Foil Printer. Prerequisite: consent of instructor.

### Foil Imaging II

- **01M:152 Foil Imaging II** 3 s.h.
  - Advanced aesthetic and technical research for creation of original prints and other works of fine art using hot stamped foil and other printmaking techniques; individual instruction. Prerequisites: 01M:151 or equivalent, and consent of instructor.

### Special Workshop in Printmaking

- **01M:160 Special Workshop in Printmaking** 2-3 s.h.
  - Issues, themes, or studio practice. Prerequisite: consent of instructor.

### Graduate Individual Instruction in Printmaking

- **01M:222 Graduate Intaglio and Relief** 3 s.h.
  - Concepts, techniques; etching, engraving, drypoint, softground, aquatint, color printing, edging, lining, relief; emphasis on developing personal vision. Repeatable. Prerequisite: consent of instructor.

- **01M:232 Graduate Lithography Workshop** 3 s.h.
  - Contemporary issues in lithography and focused development of independent studio practice; special research projects. Repeatable. Prerequisites: 01M:132 and consent of instructor.

- **01M:250 Individual Instruction in Printmaking** arr.
  - Repeatable.

### Undergraduate Individual Instruction

- **01M:190 Undergraduate Individual Instruction** 1-3 s.h.
  - Individual instruction in printmaking for advanced students. Prerequisite: consent of instructor.

### Graduate Individual Instruction

- **01N:015 Graduate Sculpture Workshop** 3 s.h.
  - Foundry work, wax working, mold making, and processes. Prerequisites: 01N:015, 01N:016, and consent of instructor.

- **01N:160 Mold Making** 3 s.h.
  - All aspects of mold making—plaster, rubber, silicone; technical preparation for 01N:165. Prerequisites: 01N:015, 01N:016, and consent of instructor.

- **01N:165 Casting in Hot Metal and Metal Forming** 3 s.h.
  - Foundry work, wax working, mold making, and processes. Prerequisites: 01A:003, 01A:004, 01N:015, 01N:016, and 01N:160.

- **01N:190 Undergraduate Individual Instruction** 1-3 s.h.
  - Individual instruction in sculpture for advanced students. Prerequisite: consent of instructor.

### Graduate Individual Instruction in Sculpture

- **01N:260 Individual Instruction in Sculpture** arr.
  - Repeatable.

### Graduate Sculpture Workshop

- **01N:264 Graduate Sculpture Workshop** 3 s.h.
  - Critique seminar with readings for graduate sculptors and nonsculpture graduate students. Repeatable. Prerequisite: consent of instructor.

### Interdepartmental Courses

- **01P:029 First-Year Seminar** 1 s.h.
  - Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Prerequisite: first- or second-semester standing.

- **01P:100 Interaarea Topics** 3 s.h.
  - Conceptual or media issues that cross traditional area disciplines; team taught. Prerequisites: 01A:003 and 01A:004.

- **01P:134 Scene Design I** 3 s.h.
  - Introduction to design process; research, rendering, model building. Same as 049:134.

- **01P:190 Honors in Studio Art** 0-3 s.h.
  - Research, preparation, and exhibition of an honors project in studio art. Prerequisite: consent of instructor.

## Art and Art History

63
Asian Languages and Literature

Chair: Philip Lutgendorf
Professor: W. South Coblin
Associate professors: Yukiko Abe Hatasa, Chuanren Ke, Robert W. Leutner, Philip Lutgendorf, Maureen Robertson (Asian Languages and Literature/Cinema and Comparative Literature), Frederick Smith (Religious Studies/Asian Languages and Literature), Ikuko Yuasa
Assistant professors: Adrienne Hurley, Helen Shen
Lecturer: Satoru Ishikawa
Undergraduate degree: B.A. in Asian Languages and Literature
Undergraduate nondegree program: Minor in Asian Languages
Graduate degree: M.A. in Asian Civilizations
Web site: http://www.uiowa.edu/~asian

Undergraduate Programs

The Department of Asian Languages and Literature offers a major in Asian languages and literature, which is intended for students who want to concentrate on one of the language and literature programs offered by the department. Students interested in Asian studies may add a major in international studies with an emphasis in Asian studies.

The major in Asian languages and literature offers students the opportunity to develop advanced skills in an Asian language while they study the people, literatures, and cultures of Asia. Many students find that they can combine an Asian languages and literature major conveniently with a major in international studies, history, political science, art history, religion, sociology, journalism, business, anthropology, or other disciplines.

Graduates have found careers in education, government, communications, business, and other fields in the United States and abroad. The program also provides excellent background for advanced study in a variety of fields in the humanities and social sciences and for professional schools, such as law and business.

The department encourages its undergraduate majors to participate in study abroad programs in Asia and has entered into exchange agreements with several universities and institutes there. Every effort is made to facilitate transfer of credit for students studying abroad.

Bachelor of Arts

Requirements for the B.A. in Asian languages and literature range from 26 to 30 s.h., depending on the track. Transfer work is accepted to satisfy requirements of the major, but at least half of the semester hours of advanced work required for the major must be earned at The University of Iowa.

STUDENTS OF CHINESE

039:105-039:106 Second-Year Chinese: First-Second Semester 10 s.h.
039:115-039:116 Third-Year Chinese: First-Second Semester 10 s.h.
039:141 Chinese Literature: Poetry 3 s.h.
039:142 Chinese Literature: Prose or
039:180 Modern Chinese Writers 3 s.h.

STUDENTS OF HINDI

039:126-039:127 Second-Year Hindi: First-Second Semester 8 s.h.
*039:184-039:185 Third-Year Hindi: First-Second Semester 6 s.h.
039:136 Indian Literature 3 s.h.
Additional advanced courses (100-level) in South Asian studies, including
1-3 s.h. of independent study 13 s.h.

A list of advanced courses is available from the department.

*Students may substitute 6 s.h. of 100-level courses in South Asian studies, with the approval of their major adviser.

STUDENTS OF JAPANESE

Advanced courses in Japanese literature taught by faculty members in the department 6 s.h.
Advanced courses in Japanese language or linguistics taught by faculty members in the department 6 s.h.

Lists of advanced courses are available from the department.
STUDENTS OF SANSKRIT

039:112-039:113 Second-Year Sanskrit:
  First-Second Semester 6 s.h.
*039:186-039:187 Third-Year Sanskrit:
  First-Second Semester 6 s.h.
039:116 Indian Literature 3 s.h.
039:163 Indian Religious Texts 3 s.h.
Additional advanced courses (100-level) in South Asian studies, including
  1-3 s.h. of independent study 12 s.h.

A list of advanced courses is available from the department.

*Students may substitute 6 s.h. of advanced courses (100-level) in South Asian studies, with the approval of their major adviser.

Students of Sanskrit and Hindi are urged to fulfill the General Education Program requirement in historical perspectives (3 s.h.) by completing 016:007 Civilizations of Asia: South Asia.

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

Before the third semester begins: for students in Chinese and Japanese tracks, language work begun (students in the Hindi and Sanskrit tracks may begin language work in their sophomore year) and at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: at least first-year language competency and at least one-half of the semester hours required for graduation

Before the seventh semester begins: at least second-year language competency and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: at least third-year, first-semester language competency and one additional course in the major (two additional courses in the Japanese track)

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Honors

Students who maintain a cumulative University of Iowa g.p.a. of at least 3.33 are encouraged to enroll in the University Honors Program. With consent of the department chair and a faculty sponsor (an Asian specialist from any department), students register for 039:191 Honors Tutorial and 039:195 Senior Honors Thesis. To receive a B.A. with honors, students must complete an acceptable thesis based on original research.

Minor

A minor in Asian languages requires a minimum of 14-15 s.h. with a g.p.a. of at least 2.00. At least 12 s.h. must be taken at The University of Iowa in courses numbered 100 or above. Students may earn minors in Chinese, Hindi, Japanese, or Sanskrit.

Students of Hindi are permitted to complete the advanced course requirement with 11 s.h., and the minor with a total of 14 s.h.

Students of Japanese must choose one of the advanced courses from literature or linguistics courses. A list of approved courses for the minor is available in the department.

Certificate in International Business

Students of Chinese, Japanese, and Hindi may participate in a program leading to a Certificate in International Business, offered jointly by the Henry B. Tippie College of Business and the College of Liberal Arts and Sciences. The wide range of electives permits undergraduate students to tailor the program to their individual interests and to complement majors in the Tippie College of Business and the College of Liberal Arts and Sciences.

Teaching Licensure in Chinese and Japanese

Chinese and Japanese majors interested in licensure to teach in elementary and/or secondary schools must successfully complete the requirements for a major, or the equivalent, plus designated pedagogy and linguistics courses in the Department of Asian Languages and Literature. In addition, students must be
admitted to the College of Education's foreign language Teacher Education Program. Several courses in the College of Education are required, as is one semester of student teaching, taken in the senior year. Contact the College of Education's Department of Teaching and Learning for more information.

Students who plan to use a Chinese or Japanese minor to teach at the elementary and/or secondary level must contact the College of Education concerning requirements.

Language for Nonmajors

The department offers several opportunities for students who wish to study the languages of Asia and South Asia. Language study is available in Chinese, Hindi, Japanese, Korean, and Sanskrit.

Students who have had experience with Japanese should take the Japanese Foreign Language Placement Test, offered during summer orientation programs and at other times during the year by Evaluation and Examination Service. The test helps determine the level at which a student should begin Japanese language study at The University of Iowa. Students with backgrounds in Chinese, Hindi, Korean, or Sanskrit may receive individual evaluations from the department.

Foreign Language and General Education

Students may complete the foreign language component of the General Education Program with Chinese, Hindi, Japanese, Sanskrit, and Korean sequences offered by the department.

The Chinese sequence 039:008, 039:009, 039:105, and 039:106 completes the foreign language component of the General Education Program and is most appropriate for students who have had no Chinese. Students who know some Chinese as a family member, from high school, or from other study may wish to take 039:100 and 039:101 followed by 039:105 and 039:106. Additional course work is available, including classical Chinese and business Chinese.

The Hindi sequence 039:123, 039:124, 039:126, and 039:127 completes the foreign language component of the General Education Program. Additional courses are available for students who want to learn more.

The Sanskrit sequence 039:110, 039:111, 039:112, and 039:113 completes the foreign language component of the General Education Program. Additional courses are available.

The Korean sequence 039:040, 039:041, 039:042, and 039:043 leads to elementary/intermediate proficiency in Korean. Students who complete 039:043 Second-Year Korean: Second Semester may request recognition of their proficiency and complete the foreign language component of the General Education Program by contacting the CLAS Academic Programs & Services office.

Graduate Program

The graduate program in Asian civilizations prepares students for doctoral study in a variety of disciplines. It is also of interest to students with nonacademic career plans for whom graduate-level work in an Asian language and culture would be useful. Students in professional programs are encouraged to consider working concurrently toward a degree in Asian civilizations. Application materials are available from the department, as is specific information on program tracks (Hindi language and literature; Sanskrit language and literature; South Asian studies; Chinese literature and culture; Chinese linguistics; teaching Chinese as a foreign language; interdisciplinary Chinese studies; teaching Japanese as a foreign language; Japanese literature and culture; and interdisciplinary Japanese studies).

The Master of Arts in Asian Civilizations requires a minimum of 30 s.h. of approved course work, including 24 s.h. taken in residence at The University of Iowa. By the end of the first semester in residence, students propose a plan of study developed in consultation with their adviser and in accordance with guidelines for specializations within the program.

All students must maintain a g.p.a. of 3.00 or higher. Detailed information on degree requirements is sent to all applicants.

By the end of the final semester in residence, students are expected to demonstrate, either by departmental examination or the successful completion of courses at the appropriate level, advanced competence in Chinese, Japanese, Hindi, or Sanskrit, defined generally as corresponding to the fourth-year level of language...
course work in Chinese or Japanese and the third-year level in Hindi and Sanskrit.

Admission

Applicants for graduate admission must meet the admission requirements of the Graduate College, except that a g.p.a. of at least 2.75 is required for conditional admission, and at least 3.00 for regular admission. Applicants must submit a statement of purpose, a research paper written in English, three letters of recommendation, and GRE General Test scores. Applicants whose first language is not English must score at least 590 (paper-based) or 243 (computer-based) on the Test of English as a foreign language (TOEFL).

Both international and U.S. graduate applications requesting financial support for the following academic year are due February 1. All other applications are accepted until April 15 for fall admission and October 1 for spring admission.

Financial Aid

Undergraduate and graduate students have access to the following financial aid and scholarship resources. Contact the Department of Asian Languages and Literature for application information.

Cheng/Liu Scholarship: Undergraduate and graduate students currently majoring in Chinese in the Department of Asian Languages and Literature at The University of Iowa may apply for the Cheng/Liu Scholarship. The $1,000 award can be used for summer Chinese language study.

Fairall Scholarship: Undergraduate or graduate majors who have attended and/or graduated from Iowa elementary or secondary schools may be nominated by the department to receive a Fairall Scholarship. Preference is given to Japanese studies students. Applications are available late spring, with scholarships to be awarded the following fall semester.

Foreign Language and Area Studies Fellowships: Only U.S. citizens are eligible. Graduate students combining work in Asian languages at an advanced level with interdisciplinary or professional programs may apply. The award is offered by International Programs for academic year and summer language study.

Graduate Assistantships: The department offers teaching assistantships and research assistantships for graduate students in the program. All applicants to graduate study in the program receive information on applying for an assistantship. Assistantships are awarded each spring for the following academic year.

Graduate International Research: Opportunities for funding research abroad include Stanley Fellowships for Graduate Student Research Abroad, CIREH Research Scholarships in International Health, Fulbright Grants, and Foreign Language Area Scholarships.

Summer Language Scholarships: Currently enrolled undergraduate and graduate students may compete for a Stanley-University of Iowa Foundation Support Organization Summer Language Scholarship, to be used for intensive summer language study in Chinese, Hindi, Japanese, or Sanskrit. Eight to ten awards of $2,000-$2,500 are made each summer. Applications are due March 1.

Undergraduate Study Abroad: Opportunities for undergraduates to study abroad include the Presidential Scholarships for Study Abroad and the Stanley Scholarships for International Research and Study.

Special Programs and Activities

Summer and Study Abroad Programs

The department strongly urges its students to seek opportunities for summer language study and study abroad to accelerate the language acquisition process. The University's memberships in the American Institute of Indian Studies and the China Cooperative Language and Study Programs consortium help facilitate students’ access to quality international programs in India and China. The government of the Republic of China offers scholarships for two students to live and study in Taiwan each year.

The UI-Nanzan Exchange allows Iowa students to pay Iowa tuition, room, and board while attending the Center for Japanese Studies at Nanzan University in Nagoya, Japan. There also is a cooperative agreement with the Landour Language School in the Himalayan foothills of India. The South Asian Studies Program has launched a new study abroad program in Mysore and Bangalore, India, where students have the opportunity to study a variety of aspects of traditional and modern Indian civilization.

Many students participate in summer, semester-long, and year-long study abroad.
programs in India, China, and Japan offered through other U.S. universities. In many cases credit is transferable, and it is possible for a student to study abroad and still complete the Four-Year Graduation Plan. There are many resources available for funding research and study abroad. It also may be possible for students to apply University of Iowa financial aid to their study abroad programs.

Contact the Department of Asian Languages and Literature or the UI Office of Study Abroad for more information.

Internships

Students are encouraged to enrich their programs of study through internships designed to combine work experience in Asia or the United States with study or research projects. The University’s Career Center keeps a list of internships.

Student Associations

Students have many opportunities to enrich their studies in Asian languages and literature while living in Iowa City. The University sponsors student associations for students from many Asian countries, including mainland China, Japan, Korea, India, Pakistan, and Taiwan. All University of Iowa students are welcome to join. Various international community groups sponsor cultural events and holiday celebrations throughout the year.

The International Crossroads Community, located in Hillcrest Residence Hall, includes Japanese House, a focal point for activities among resident and nonresident students and the Japanese Student Association. The house’s activities include weekly dinners.

Library Facilities

Since 1960 the University of Iowa Libraries has routinely acquired most American titles in Asian studies and selected overseas scholarly publications in English and other Western languages. The Main Library’s Asian collection includes approximately 80,000 volumes in Asian languages and about 140,000 Western-language volumes on Asian subjects. Since 1975, the University has been a member of the Library of Congress Foreign Currency Exchange Program for Indian books and periodicals.

The library’s nonprint media collection includes a growing number of Asian feature films. A Chinese-Japanese-Korean computer terminal gives students and faculty access to the growing Research Libraries Information Network database in Asian languages.

Courses

Language for Undergraduates

Chinese

039:001 Conversational Chinese I 1 s.h.
Introduction to modern Chinese, with focus on communication “survival” skills for discussing oneself, family, daily activities, interests, personal preferences, food, shopping, travel, lodging, situational activities and performance.

039:002 Conversational Chinese II 1 s.h.
Continuation of 039:001, with focus on speaking and listening.

039:008 First-Year Chinese: First Semester 5 s.h.
Sound system of Mandarin Chinese, basic sentence patterns; aural understanding, speaking, reading, writing. Offered fall semesters. GE: foreign language. Prerequisite: undergraduate standing.

039:009 First-Year Chinese: Second Semester 5 s.h.
Continuation of 039:008. Offered spring semesters. GE: foreign language. Prerequisite: 039:008 and undergraduate standing.

039:100 Advanced First-Year Chinese: First Semester 5 s.h.
Previous knowledge of Chinese used as foundation for study of the language; for students with aural/oral fluency in Mandarin Chinese or non-Mandarin dialect. GE: foreign language. Offered fall semesters.

039:101 Advanced First-Year Chinese: Second Semester 5 s.h.
Continuation of 039:100. GE: foreign language. Offered spring semesters. Prerequisites: 039:100 and consent of instructor.

039:105 Second-Year Chinese: First Semester 5 s.h.
Continuation of 039:009. Offered fall semesters. GE: foreign language. Prerequisites: 039:009 and undergraduate standing.

039:106 Second-Year Chinese: Second Semester 5 s.h.
Continuation of 039:105. Offered spring semesters. GE: foreign language. Prerequisites: 039:105 and undergraduate standing.

039:108 Classical Chinese: First Semester 3 s.h.
Late Zhou period; readings from Zhanguoce, Mengzi, Zhuangzi; focus on grammatical analysis; exact translation. Offered fall semesters. Prerequisite: 039:106.

039:109 Classical Chinese: Second Semester 3 s.h.
Continuation of 039:108. Offered spring semesters. Prerequisite: 039:108.

039:115 Third-Year Chinese: First Semester 5 s.h.
Reading of advanced modern Chinese texts; speaking, writing. Offered fall semesters. Prerequisite: 039:106.

039:116 Third-Year Chinese: Second Semester 5 s.h.
Continuation of 039:115. Offered spring semesters. Prerequisite: 039:115.

039:128 Fourth-Year Chinese: First Semester 3 s.h.
Proficiency through oral and written discussions of modern texts. Offered fall semesters. Prerequisite: 039:116 or equivalent.

039:129 Fourth-Year Chinese: Second Semester 3 s.h.
Offered spring semesters. Prerequisite: 039:128.
Asian Languages and Literature 69

039:165 Fifth-Year Chinese: First Semester 3 s.h.
Improvement of language skills in modern Chinese; listening, speaking, reading, writing; skill development in reading authentic texts related to topics of student interest. Prerequisite: 039:129.

039:166 Fifth-Year Chinese: Second Semester 3 s.h.
Continuation of 039:165. Prerequisite: 039:165.

039:171 Readings in Chinese Literature 3 s.h.
Readings for advanced modern Chinese learners to elevate reading and writing abilities; essays, fiction, poetry by contemporary Chinese writers. Taught in Chinese.

Hindi

039:123 First-Year Hindi: First Semester 5 s.h.
Reading, writing, speaking. Offered fall semesters of odd years. GE: foreign language. Prerequisite: undergraduate standing.

039:124 First-Year Hindi: Second Semester 5 s.h.
Continuation of 039:123. Offered spring semesters of even years. GE: foreign language. Prerequisites: 039:123 and undergraduate standing.

039:126 Second-Year Hindi: First Semester 4 s.h.
Conversation, reading of folktales and modern short stories. Offered fall semesters of even years. GE: foreign language. Prerequisites: 039:124 and undergraduate standing.

039:127 Second-Year Hindi: Second Semester 4 s.h.
Continuation of 039:126. Offered spring semesters of odd years. Prerequisites: 039:126 and undergraduate standing.

039:184 Third-Year Hindi: First Semester 3 s.h.
Advanced level Hindi texts; speaking, writing. Offered fall semesters. Prerequisite: 039:127.

039:185 Third-Year Hindi: Second Semester 3 s.h.
Continuation of 039:184. Offered spring semesters. Prerequisite: 039:184.

Japanese

039:010 First-Year Japanese: First Semester 5 s.h.
Modern Japanese. Offered fall semesters. GE: foreign language. Prerequisite: undergraduate standing.

039:011 Elementary Japanese: Review 3 s.h.
Review of material presented in 039:010. GE: foreign language. Prerequisites: Japanese language study, and first-year or new transfer standing.

039:012 First-Year Japanese: Second Semester 5 s.h.
Continuation of 039:010 or 039:011. Offered spring semesters. GE: foreign language. Prerequisites: 039:010 and undergraduate standing.

039:101 Second-Year Japanese: First Semester 5 s.h.
Continuation of 039:012. Offered fall semesters. GE: foreign language. Prerequisites: 039:012 and undergraduate standing.

039:102 Second-Year Japanese: Second Semester 5 s.h.
Continuation of 039:101. Offered spring semesters. Prerequisites: 039:101 and undergraduate standing.

039:105 Third-Year Japanese: Conversation I 3 s.h.
Modern Japanese; focus on speaking, listening. Offered fall semesters. Prerequisite: 039:102. Recommended: concurrent registration in 039:167.

039:106 Third-Year Japanese: Conversation II 3 s.h.
Continuation of 039:105. Offered spring semesters. Prerequisite: 039:105. Recommended: concurrent registration in 039:108.

039:107 Third-Year Japanese: Reading and Writing I 3 s.h.
Modern Japanese; focus on reading, writing. Offered fall semesters. Prerequisite: 039:102. Recommended: concurrent registration in 039:105.

039:108 Third-Year Japanese: Reading and Writing II 3 s.h.

039:119 Classical Japanese: First Semester 3 s.h.
Grammar, readings in classical Japanese. Offered fall semesters. Prerequisites: 039:106 and consent of instructor.

039:121 Fourth-Year Japanese: First Semester 3 s.h.
Modern Japanese; emphasis on communication skills. Offered fall semesters. Prerequisites: 039:106 and 039:108.

039:122 Fourth-Year Japanese: Second Semester 3 s.h.
Continuation of 039:121. Offered spring semesters. Prerequisite: 039:121.

039:131 Fifth-Year Japanese: First Semester 3 s.h.
Improvement of Japanese for academic and professional purposes. Offered fall semesters. Prerequisite: 039:121 or consent of instructor.

039:132 Fifth-Year Japanese: Second Semester 3 s.h.
Continuation of 039:131. Offered spring semesters.

Kannada

Kannada is a South Indian language spoken by more than 35 million people.

039:103 First-Year Kannada 5 s.h.
Kannada script and basic grammar, writing, reading, and speaking in simple sentences using a core vocabulary; culture.

039:104 First-Year Kannada II 5 s.h.
Continuation of 039:103. Offered spring semesters. Prerequisites: 039:103 and undergraduate standing.

039:150 Second-Year Kannada: First Semester 4 s.h.
Continuation of 039:104; complex sentence structures, models, negatives, tense and case system; translation. Prerequisite: 039:104.

039:151 Second-Year Kannada: Second Semester 4 s.h.
Continuation of 039:150; written and oral translation; Kannada culture. Prerequisite: 039:150.

Sanskrit

039:110 First-Year Sanskrit: First Semester 4 s.h.
Grammar, basic vocabulary; elementary readings. Offered fall semesters of even years. GE: foreign language. Prerequisite: undergraduate standing.

039:111 First-Year Sanskrit: Second Semester 4 s.h.
Readings in epic and story literature. Offered spring semesters of odd years. GE: foreign language. Prerequisites: 039:110 and undergraduate standing.

039:112 Second-Year Sanskrit: First Semester 3 s.h.
Readings in epic and puranic texts. Offered fall semesters of odd years. GE: foreign language. Prerequisites: 039:111 or consent of instructor, and undergraduate standing.

039:113 Second-Year Sanskrit: Second Semester 3 s.h.
The Bhagavadgita and related religious/philosophical texts. Offered spring semesters of even years. GE: foreign language. Prerequisites: 039:112 or consent of instructor, and undergraduate standing.

039:186 Third-Year Sanskrit: First Semester 3 s.h.
Readings in philosophical and literary Sanskrit. Offered fall semesters. Prerequisite: 039:113.
Korean

039:040 First-Year Korean: First Semester 4 s.h.
Modern Korean; speaking, listening, reading, writing. Offered fall semesters.

039:041 First-Year Korean: Second Semester 4 s.h.
Continuation of 039:040. Offered spring semesters. Prerequisite: 039:040.

039:042 Second-Year Korean: First Semester 4 s.h.
Continuation of 039:041; conversation and readings in intermediate Korean language; Korean culture. Prerequisite: 039:041.

039:043 Second-Year Korean: Second Semester 4 s.h.
Continuation of 039:042, which is prerequisite.

Persian

Persian (Farsi) is the most widely spoken of the Iranian branch of the Indo-Iranian languages, a subfamily of the Indo-European languages. Persian is the language of Iran and the official language of the Republic of Tajikistan and Afghanistan.

039:045 Introduction to Persian 4 s.h.
Introduction to colloquial Persian (Farsi); some basic reading and writing. Offered through Saturday & Evening Classes.

039:046 Introduction to Persian II 4 s.h.
Colloquial Persian (Farsi), with emphasis on basic reading and writing. Prerequisite: 039:045.

039:047 Intermediate Persian I 4 s.h.
Listening, reading, speaking, and writing skills; reading of simplified literary texts about Persian reading, speaking, and writing skills. Prerequisite: 039:046.

Language for Graduate Students

Chinese

039:213 Advanced Classical Chinese 3 s.h.
Readings from Zuozhuan, Gongyang, other texts of early classical period. Prerequisite: 039:109.

039:220 Literary Chinese I 3 s.h.
Readings from literary and historical texts of Han and Wei Jin periods. Prerequisite: 039:109 or consent of instructor.

For Undergraduate and Graduate Students

Literature

039:029 First-Year Seminar 1-2 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Prerequisite: first- or second-semester standing.

039:075 Asian Religious Classics 3 s.h.
Same as 032:075.

039:102 The Cultural History of Karnataka 3 s.h.
Introduction to Karnataka, constituent state of India.

39J:130 Workshop in Japanese Literary Translation 3 s.h.
Workshop in translation from Japanese to English, with emphasis on literary translation; issues in theory and practice of translation; special features of Japanese as a source language for translation. Prerequisite: 39J:012 or equivalent.

039:136 Indian Literature 3 s.h.
Readings from medieval and modern periods in English translation. Same as 032:177.

039:140 The Literature of Daoism 3 s.h.
Texts of philosophical, religious Daoism; Daoism in traditional Chinese political theory, literature, the arts, alchemy and medicine, sexual custom, comber. Taught in English. Same as 032:186.

039:141 Chinese Literature: Poetry 3 s.h.
Readings in classical and modern Chinese poetry in English translation. Same as 048:141.

39J:141 Traditional Japanese Literature in Translation 3 s.h.
From seventh century to early modern times. Same as 048:143.

039:142 Chinese Literature: Prose 3 s.h.
Readings in Chinese prose, primarily fiction, from third century B.C. to 1500 A.D., in English translation.

39J:142 Modern Japanese Fiction in Translation 3 s.h.
Nineteenth century to present. Same as 048:142.

39J:143 Topics in Japanese Literature in Translation 3 s.h.
Topics vary.

39J:144 Major Authors in Modern Japanese Literature 3 s.h.
Soeki, Ogai, Tanizaki, Abe, Oe; major works in English translation.

39J:145 The Tale of Genji 3 s.h.
Close reading in English of Murasaki Shikibu's Tale of Genji, tale's literary and social contexts, and later reception. Same as 048:144.

39J:146 Warriors Dreams 3 s.h.
Images of the warrior in traditional Japanese literature, from poetry of the eighth century to romances of the 19th century; readings in English. Same as 048:147.

039:158 East-West Literary Relations 3 s.h.
Topics in cross-cultural study based in Asian/Euro-American literary and film texts. Same as 048:158.

039:180 Modern Chinese Writers 3 s.h.
Readings in modern and contemporary Chinese fiction; in English translation.
Asian Languages and Literature

039:181 Translation Workshop 3 s.h.
Introduction to literary translation; individual student projects in a
workshop setting. GE: foreign civilization and culture or historical perspectives. Same as 048:181.

039:182 Asian-American Literature 3 s.h.
Immigration history, ethnic identities, contemporary American culture as represented in literary texts and films by
Asian-Americans. GE: foreign civilization and culture or historical perspectives. Same as 048:182.

039:184 Religious Themes in Japanese Literature 3 s.h.
Same as 039:182.

039:192 East Meets West: A Cross-Cultural Course 3 s.h.
Overview of cross-cultural perceptions in modern period based on
films, literary and philosophical texts from East and West. GE: foreign civilization and culture or historical perspectives. Same as 048:192.

039:193 Asian Literature Today 3 s.h.
Repeatable. Same as 048:193.

039:240 Seminar in Chinese Fiction 3 s.h.
Novels, novelettes; 16th to 18th centuries (Ming and Qing periods). Prerequisite: ability to read original texts.

039:241 Seminar in Chinese Literature 3 s.h.
Prerequisites: two years of modern Chinese and one year of classical Chinese, or equivalents. GE: foreign civilization and culture or historical perspectives. Same as 048:241.

039:245 Seminar in Japanese Literature 3 s.h.
Repeatable. Prerequisite: three years of Japanese and consent of instructor.

039J:245 Seminar in Japanese Literature 3 s.h.
Repeatable. Prerequisites: three years of Japanese and consent of instructor.

Civilization

The following courses are taught in English.

039:006 Introduction to Buddhism 3 s.h.
Same as 032:006.

039:007 Chinese Religions 3 s.h.
Same as 032:010.

039:015 Introduction to Chinese Culture 3 s.h.
Key aspects of traditional and modern Chinese culture as insights into the Chinese experience and worldview; development of the Chinese language and writing system, calligraphy and brush painting, cultural geography, urban life, martial arts, mainstream popular culture, music, and cuisine.

039:016 Asian Art and Culture 3 s.h.
GE: fine arts or foreign civilization and culture or historical perspectives. Same as 01H:016.

039:018 Asian Humanities: India 3 s.h.
Introduction to four thousand years of South Asian civilization, through popular stories. GE: foreign civilization and culture or humanities. Same as 032:008.

039:019 Asian Humanities: China 3 s.h.
Literary and philosophical texts of China in English translation. GE: foreign civilization and culture or humanities. Same as 032:009.

039:020 Asian Humanities: Japan 3 s.h.
Literary texts, related arts of premodern Japan. GE: foreign civilization and culture or humanities. Same as 032:007.

039:028 Introduction to the Art of China 3 s.h.
Same as 01H:031.

039:033 Introduction to the Art of Japan 3 s.h.
GE: fine arts or foreign civilization and culture or historical perspectives. Same as 01H:033.

039:050 Japan: Culture and Communication 3 s.h.
Same as 016:005.

039:055 Civilizations of Asia: China 3 s.h.
GE: foreign civilization and culture or historical perspectives. Same as 016:005.

039:056 Civilizations of Asia: Japan 3-4 s.h.
GE: foreign civilization and culture or historical perspectives. Same as 016:006.

039:057 Civilizations of Asia: South Asia 3-4 s.h.
Pre-modern and modern topics in history, art, religion, philosophy, politics, and culture of India, nearby states. GE: foreign civilization and culture or historical perspectives. Same as 016:007.

039:064 Living Religions of the East 3 s.h.
GE: foreign civilization and culture or historical perspectives. Same as 032:004.

039:109 Religion in Japan 3 s.h.
Same as 032:116.

039:119 Popular Culture in South Asia 3 s.h.
Same as 113:120.

039:120 Chinese Painting I 3 s.h.
Same as 01H:120.

039:121 Chinese Painting II 3 s.h.
Same as 01H:121.

039:122 Language/Poltics of Culture in South Asia 3 s.h.
Same as 113:129.

039:123 Japanese Painting 3 s.h.
Same as 01H:123.

039:125 Japanese Society and Culture 3 s.h.
GE: foreign civilization and culture. Same as 113:125.

039:126 Japanese Ethos: Narrative and Performance 3 s.h.
Japanese social relationships, attitudes, and perceptions expressed through literature and film; dramatic changes resulting from rapid urban industrialization in recent decades. GE: foreign civilization and culture. Same as 113:126.

039:131 Themes in Asian Art History 3 s.h.
Prerequisite: 039:016 or 01H:016 or equivalent or consent of instructor. Same as 01H:124.

039:132 Vietnam War in Historical Perspective 3 s.h.
Same as 16W:182.

039:134 Imperialism and Modern India 3 s.h.
GE: foreign civilization and culture. Same as 16W:104.

039:145 Topics in Asian Cinema 3 s.h.
Films from mainland China, Taiwan, South Asia. Same as 008:127, 048:106.

039:151 Japanese Film History 3 s.h.
From silent period to present.

039:152 Topics in Japanese Cinema 3 s.h.
Issues, periods, or directors in Japanese film.

039:154 Modern China 1600s to 1920s 3 s.h.
GE: foreign civilization and culture. Same as 16W:106.

039:155 Contemporary Japanese Culture 3 s.h.
Cultural texts and practices in contemporary Japan: literature, film, television, manga.

039:156 Japanese Art and Culture 3 s.h.
Same as 01H:122.

039:157 Chinese Calligraphy 2 s.h.

039:202 Teaching Chinese as a Foreign Language I: Theories and Research 3 s.h.
Research, theory on acquisition of Chinese as a non-native language.

039:202 Japanese as a Foreign Language: Practical Applications 3 s.h.
Instructional methodology, curriculum, and material design; hands-on experience. Prerequisite: 039:122 or consent of instructor.

039:203 Teaching Chinese as a Foreign Language II: Curriculum, Methodology, and Assessment 3 s.h.
Multiple levels of major Chinese textbooks, curricular organizational schemes, language programs, communicative language instruction; development of supplementary materials for a University of Iowa Chinese course.

039:203 Advanced Japanese Pedagogy 3 s.h.
Instructional methods and management issues relevant to teaching Japanese language at advanced levels. Prerequisite: 039:202.

039:204 Teaching Chinese as a Foreign Language III: Technology, Materials, and Practicum 3 s.h.
Development, application of technological teaching/learning materials; emphasis on designing computer-based materials that increase learner interaction in contextualized cultural environments.

039:205 Analysis of L1 and L2 Data 3 s.h.
Same as 164:205.

039:207 Sociolinguistics 3 s.h.
Prerequisite: introductory linguistics course. Same as 164:207.

039:223 Topics in Second Language Acquisition: Listening 3 s.h.
Same as 164:223.

039:234 Principles of Teaching and Learning Foreign Languages 3 s.h.
Prerequisite: consent of instructor. Same as 009:234, 013:221, 041:234.

039:239 Seminar in Chinese Linguistics: Historical Phonology 3 s.h.
Topics in Chinese historical phonology. Repeatable. Prerequisite: 039:139.

039:239 Seminar in Japanese Applied Linguistics 3 s.h.
Topics in applied linguistics and language pedagogy related to Japanese language.

039:250 Seminar in Japanese Linguistics 3 s.h.
Opportunities for in-depth analysis of specific linguistics areas. Repeatable. Prerequisite: 039:200 or 103:100.

039:258 Second Language Acquisition of Japanese 3 s.h.
Theoretical foundation of Japanese as a second or foreign language; topics in second- or foreign-language acquisition of Japanese. Prerequisites: 07S:183, 039:200, and 103:100.

Repeatable.

039:216 Individual Sanskrit for Advanced Students arr.
Research, translation projects. Repeatable. Prerequisites: fourth-year proficiency and consent of instructor.

039:217 Individual Hindi for Advanced Students arr.
Readings in medieval and modern Hindi. Repeatable. Prerequisite: consent of instructor.

039:291 M.A. Thesis arr.
Offered fall semesters.

039:292 M.A. Thesis arr.
Offered spring semesters.
Biological Sciences

Chair: Jack Lilien
Professors: Bill Ballard, Jeffrey L. Denburg, Jan Fassler, Joseph Frankel, Gary N. Gussin, Stephen D. Hendrix, Jack Lilien, Jim Jung-Ching Lin, Robert E. Malone, Linda Maxson, John R. Menninger, Jeffrey C. Murray (Pediatrics/Biological Sciences), Jonathan E. Poulton, Jeffry T. Schabilion, Ming-Che Shih, David R. Soil (Carver/Emil Witschi Professor of the Biological Sciences), Barbara A. Stay, Wei-yeh Wang, Chun-Fang Wu

Associate professors: Debashish Bhattacharya, Chi-Lien Cheng, Michael E. Daley, Daniel Eberl (Biological Sciences/Otolaryngology), Steven Green (Biological Sciences/Otolaryngology), Diana G. Horton, Erin Irish, Alan Kay, Diane C. Slusarski

Associate professors emeriti: Robert W. Embree, Thomas E. Melchert

Assistant professors: Josep Comeron, Douglas Houston, John Logsdon, Bryant F. McAllister, Christopher Stipp, Joshua Weiner

Undergraduate degrees: B.A., B.S. in Biology

Undergraduate nondegree program: Minor in Biology

Graduate degrees: M.S., Ph.D. in Biology

Web site: http://www.biology.uiowa.edu

Undergraduate Programs

Study in the biological sciences prepares students for work in a wide variety of fields in educational institutions, government agencies, foundations, health care organizations, and businesses. Undergraduate programs prepare students for entry into research or service careers associated with private industry or government programs, and for primary and secondary teaching. They also prepare students for entry into advanced degree programs leading to careers in higher education and to independent research in a variety of biological fields, or for practice in health professions such as medicine, dentistry, pharmacy, nursing, veterinary medicine, medical technology, and physical therapy.

The B.S. and B.A. programs include a core curriculum consisting of the two-semester course 002:010-002:011 Principles of Biology I-II, 002:128 Fundamental Genetics, and 002:131 Evolution. Beyond the core, the B.S. and B.A. programs provide highly diverse content, including a total of 18 courses (63-70 s.h.) in biology, chemistry, physics, and mathematics. All course work prepares students for advanced graduate and professional training in biology and related subjects.

The department offers 002:196 Honors Investigations and 002:199 Introduction to Research to acquaint undergraduate students with the nature of practicing scientists’ work. Students associate with one of the department’s research groups in experiments, discussion of current research, study of specialized topics, and attendance at research seminars. Admission to the University Honors Program is required for 002:196. All students who are accepted by a Department of Biological Sciences faculty sponsor may take 002:199.

Students interested in field biology, zoology, or botany may take varied courses in these subjects offered during the summer at Iowa Lakeside Laboratory, Lake Okoboji, Iowa.

Students who wish to count course work done at another institution toward requirements for a biology degree at Iowa should consult with their biological sciences adviser.

Bachelor of Science in Biology

The Bachelor of Science in biology is divided into six tracks that emphasize the most dynamic and active areas in the biological sciences: cell and developmental biology, genetics and biotechnology, evolution, neuroscience, physiology and molecular biology of plants, and comprehensive biology. Students who pursue the B.S. must complete requirements in the chemistry-physics-mathematics foundation, the biology core, and one of the six tracks.

CHEMISTRY-PHYSICS-MATHEMATICS FOUNDATION

All of these:
004:011-004:012 Principles of Chemistry I-II 8 s.h.
004:121 Organic Chemistry I 3 s.h.

One of these sequences:
029:011-029:012 College Physics I-II 8 s.h.
029:081-029:082 Introductory Physics I-II 8 s.h.

One of these:
22M:016 Calculus for the Biological Sciences 4 s.h.
22M:025 Calculus I 4 s.h.
22M:031 Engineering Mathematics I:
   Single Variable Calculus 4 s.h.
One of these:
22S:030 Statistical Methods and
   Computing 3 s.h.
22S:101 Biostatistics 3 s.h.

**BIOLOGY CORE**
002:010-002:011 Principles of Biology I-II 8 s.h.
002:128 Fundamental Genetics 3-4 s.h.
002:131 Evolution 4 s.h.

**Tracks for the Bachelor of Science**
Students pursuing the B.S. must select a single track. Each track includes seven courses.

**CELL AND DEVELOPMENTAL BIOLOGY TRACK**
The cell and developmental biology track provides educational background suitable for graduate study in molecular, cellular, and developmental biology and for entry-level positions in laboratories and companies engaged in cancer research and related endeavors. It also provides strong preparation for professional study in medicine and other health-related subjects.

**Group 1 (Developmental Biology)**
Both of these:
002:104 Introduction to Developmental Biology 3 s.h.
002:117 Plant Developmental Biology 3 s.h.

**Group 2 (Biochemistry)**
One of these:
002:123 Plant Biochemistry 3 s.h.
099:110 Biochemistry 3 s.h.
099:120 & 099:130 Biochemistry and Molecular Biology I-II 6 s.h.

**Group 3 (Cellular Biology)**
One of these:
002:114 Cell Biology 3 s.h.
002:155 Cell Physiology 4 s.h.

**Group 4 (Investigative Laboratory)**
One of these:
002:133 Cell Biology Lab 3 s.h.
002:135 Developmental Biology Lab 3 s.h.
002:138 Genetics and Biotechnology Lab 3 s.h.
002:196 Honors Investigations (in cell/developmental biology) 6 s.h.

**Group 5 (Electives)**
At least two courses, which may include any combination of courses or a course sequence from Groups 3 and/or 4 that have not been used to satisfy those requirements, and/or courses from the following list:
002:150 Endocrinology 3 s.h.
002:168 Genes and Development 3 s.h.
002:171 Molecular Genetics 4 s.h.
002:180 Fundamental Neuroscience 4 s.h.
061:147 Survey of Immunology 4 s.h.
061:157 General Microbiology 5 s.h.

**EVOLUTION TRACK**
The evolution track provides educational background suitable for graduate study in evolutionary biology or related disciplines and for entry-level positions in laboratories utilizing population genetics or phylogenetic approaches (e.g., forensics, fisheries).

**Group 1 (Evolution Core)**
All of these:
002:134 Ecology 4 s.h.
002:160 Molecular Phylogenetics 3 s.h.
002:162 Population Genetics and Molecular Evolution 3 s.h.

**Group 2 (Biochemistry)**
One of these:
002:123 Plant Biochemistry 3 s.h.
099:110 Biochemistry 3 s.h.
099:120 and 099:130 Biochemistry and Molecular Biology I-II 6 s.h.

**Group 3 (Investigative Lab)**
One of these:
002:138 Genetics and Biotechnology Lab 3 s.h.
002:148 Field Ecology 4 s.h.
002:196 Honors Investigations (in evolution) 6 s.h.

**Group 4 (Electives)**
At least two courses, which may include any combination of courses or a course sequence from Group 3 that has not been used to satisfy the Group 3 requirement, and/or courses from the following list:
002:100 Plant Diversity and Evolution 4 s.h.
002:103 Biogeography 3 s.h.
002:104 Introduction to Developmental Biology 3 s.h.
or 002:117 Plant Developmental Biology 3 s.h.
002:107 Invertebrate Biology 4 s.h.
002:136 Conservation Biology 4 s.h.
002:140 Systematics 3 s.h.
002:143 Animal Behavior 4 s.h.
002:168 Genes and Development 3 s.h.
002:169 Introduction to Bioinformatics 4 s.h.
or 002:170 Bioinformatics 3 s.h.
22C:016 Computer Science I 4 s.h.
22S:120 Probability and Statistics 4 s.h.
113:170 Primate Evolutionary Biology 3 s.h.

**GENETICS AND BIOTECHNOLOGY TRACK**
The genetics and biotechnology track provides educational background suitable for graduate study in molecular biology, biotechnology, genetic counseling, and other areas of genetics and for entry-level positions in genetic engineering and biotechnology companies. It also provides strong preparation for professional study in medicine and other health-related fields.

**Group 1 (Genetics Core)**
One of these:
002:169 Introduction to Bioinformatics 4 s.h.
002:170 Bioinformatics 3 s.h.
Both of these:
002:171 Molecular Genetics 4 s.h.
061:170 Microbial Genetics 3 s.h.

**Group 2 (Biochemistry)**
One of these:
002:123 Plant Biochemistry 3 s.h.
099:110 Biochemistry 3 s.h.
099:120 & 099:130 Biochemistry and Molecular Biology I-II 6 s.h.

**Group 3 (Investigative Laboratory)**
One of these:
002:138 Genetics and Biotechnology Lab 3 s.h.
002:196 Honors Investigations (in genetics/biotechnology) 6 s.h.

**Group 4 (Electives)**
At least two courses; may include 099:130 if 099:120 and 099:130 are chosen from Group 2, and/or the course or course sequence from Group 3 that has not been used to satisfy the Group 3 requirement, and/or courses from the following list:

- One of these:
  - 002:104 Introduction to Developmental Biology 3 s.h.
  - 002:114 Cell Biology 3 s.h.
  - 002:117 Plant Developmental Biology 3 s.h.
  - 002:127 Introduction to Plant Molecular Biology 3 s.h.
  - 002:133 Cell Biology Lab 3 s.h.
  - 002:162 Population Genetics and Molecular Evolution 3 s.h.
  - 002:168 Genes and Development 3 s.h.
  - 061:147 Survey of Immunology 4 s.h.

**NEUROSCIENCE TRACK**
The neuroscience track provides educational background suitable for graduate study in neurobiology and neurophysiology and for entry-level positions in laboratories studying the therapeutic basis of neurological disorders and in pharmaceutical companies. It also provides strong preparation for professional study in medicine and other health-related disciplines.

**Group 1 (Neuroscience Core)**
All of these:
002:143 Animal Behavior 4 s.h.
002:145 Biology of the Brain 4 s.h.
002:180 Fundamental Neuroscience 4 s.h.

**Group 2 (Biochemistry)**
One of these:
099:110 Biochemistry 3 s.h.
099:120 & 099:130 Biochemistry and Molecular Biology I-II 6 s.h.

**Group 3 (Investigative Laboratory)**
One of these:
002:133 Cell Biology Lab 3 s.h.
002:138 Genetics and Biotechnology Lab 3 s.h.
002:196 Honors Investigations (in neuroscience) 6 s.h.
031:177 Field Methods: Animal Behavior Research 3 s.h.

**Group 4 (Electives)**
At least two courses, which may include any combination of a course or course sequence from Group 3 that have not been used to satisfy the Group 3 requirement, and/or courses from the following list:

- 002:114 Cell Biology 3 s.h.
or 002:155 Cell Physiology 4 s.h.
002:104 Introduction to Developmental Biology 3 s.h.
002:124 Animal Physiology 3 s.h.
002:150 Endocrinology 3 s.h.
002:181 Neurophysiology 3 s.h.

PHYSIOLOGY AND MOLECULAR BIOLOGY OF PLANTS TRACK

The physiology and molecular biology of plants track provides educational background suitable for graduate study in plant biotechnology, plant molecular and cellular biology, and agronomy, and for entry-level positions in companies engaged in plant breeding, biotechnology, and pharmaceuticals.

Group 1 (Plant Biology and Biochemistry Core)

All of these:
002:110 Plant Physiology 3 s.h.
002:117 Plant Developmental Biology 3 s.h.
002:123 Plant Biochemistry 3 s.h.
002:127 Introduction to Plant Molecular Biology 3 s.h.

Group 2 (Investigative Laboratory)

One of these:
002:133 Cell Biology Lab 3 s.h.
002:138 Genetics and Biotechnology Lab 3 s.h.
002:196 Honors Investigations (in plant physiology/molecular biology) 6 s.h.

Group 3 (Electives)

At least two courses, which may include any combination of a course or course sequence from Group 2 that have not been used to satisfy the Group 2 requirement, and/or courses from the following list, and/or approved plant biology courses taught at Iowa Lakeside Laboratory (students consult their advisers):
002:114 Cell Biology 3 s.h.
or
002:155 Cell Physiology 4 s.h.
002:100 Plant Diversity and Evolution 4 s.h.
002:113 Ecological Plant Anatomy 4 s.h.
002:171 Molecular Genetics 4 s.h.

COMPREHENSIVE BIOLOGY TRACK

The Comprehensive Biology track is designed for students who wish a balanced introduction to the major fields of biology. It provides educational background suitable for entry into graduate programs in the biological sciences, for science education, and for entry-level positions in research in laboratories in many fields of biology.

Group 1 (Biochemistry)

One of these:
002:123 Plant Biochemistry 3 s.h.
099:110 Biochemistry 3 s.h.
099:120 & 099:130 Biochemistry and Molecular Biology I-II 6 s.h.

Group 2 (Molecular Biology)

At least one course, either 099:130 if 099:120 and 099:130 is chosen in group 1 or a course from the following list:
002:127 Introduction to Plant Molecular Biology 3 s.h.
002:171 Molecular Genetics 4 s.h.

Group 3 (Cellular Biology)

At least one of these:
002:114 Cell Biology 3 s.h.
002:155 Cell Physiology 4 s.h.
002:180 Fundamental Neuroscience 4 s.h.

Group 4 (Developmental Biology)

At least one of these:
002:110 Plant Physiology 3 s.h.
002:124 Animal Physiology 3 s.h.
002:150 Endocrinology 3 s.h.

Group 5 (Organismal Physiology)

At least one of these:
002:100 Plant Diversity and Evolution 4 s.h.
002:134 Ecology 4 s.h.
002:140 Systematics 3 s.h.

Group 6 (Population Biology)

At least one of these:
002:133 Cell Biology Lab 3 s.h.
002:135 Developmental Biology Lab 3 s.h.
002:136 Conservation Biology 4 s.h.
002:138 Genetics and Biotechnology Lab 3 s.h.
002:148 Field Ecology 4 s.h.
002:196 Honors Investigations 6 s.h.
031:177 Field Methods: Animal Behavior Research 3 s.h.
Suggested First-Year Schedule

The following first-year schedule of science courses is recommended for students seeking either the B.S. or B.A. in biology.

First Semester Science Courses

004:011 Principles of Chemistry I 4 s.h.
Calculus or mathematics leading to calculus 3-4 s.h.

Second Semester Science Courses

004:012 Principles of Chemistry II 4 s.h.
002:010 Principles of Biology I 4 s.h.
Calculus (if not taken during the first semester) 4 s.h.

Bachelor of Arts in Biology

The Bachelor of Arts in biology features a combination of directed breadth and student choice. Students who pursue the B.A. must complete a chemistry-physics-math foundation; a biology core identical to that required for the B.S.; one course in each of three breadth menus; one course with a laboratory; and three elective courses, which may include one course in the history or philosophy of science. The B.A. provides educational background suitable for admission into graduate programs in the biological sciences and for science education and entry-level positions in laboratory and field research. It also provides preparation for professional study in medicine and other health-related subjects.

CHEMISTRY-PHYSICS-MATHEMATICS FOUNDATION

All of these:
004:011-004:012 Principles of Chemistry I-II 8 s.h.
004:122 Organic Chemistry I 3 s.h.
099:110 Biochemistry 3 s.h.

One of these:
002:123 Plant Biochemistry 3 s.h.
002:127 Introduction to Plant Molecular Biology 3 s.h.
002:155 Cell Physiology 4 s.h.
002:171 Molecular Genetics 4 s.h.

BIOLOGY CORE

002:010-002:011 Principles of Biology I-II 8 s.h.
002:128 Fundamental Genetics 3-4 s.h.
002:131 Evolution 4 s.h.

BREADTH MENUS

At least one course from each of the following three breadth menus:

Molecular and Cellular Biology

002:114 Cell Biology 3 s.h.
002:127 Introduction to Plant Molecular Biology 3 s.h.
002:155 Cell Physiology 4 s.h.
002:171 Molecular Genetics 4 s.h.

Developmental Biology and Physiology

002:104 Introduction to Developmental Biology 3 s.h.
002:110 Plant Physiology 3 s.h.
002:117 Plant Developmental Biology 3 s.h.
002:124 Animal Physiology 3 s.h.
002:150 Endocrinology 3 s.h.
002:180 Fundamental Neuroscience 4 s.h.

Ecology and Evolutionary Biology

002:100 Plant Diversity and Evolution 4 s.h.
002:103 Biogeography 3 s.h.
002:134 Ecology 4 s.h.
002:140 Systematics 3 s.h.

COURSE WITH A LABORATORY

One of these (must not have been used as a breadth menu course):
002:100 Plant Diversity and Evolution 4 s.h.
002:107 Invertebrate Biology 4 s.h.
002:108 Vertebrate Zoology 4 s.h.
002:113 Ecological Plant Anatomy 4 s.h.
002:133 Cell Biology Laboratory 3 s.h.
002:135 Developmental Biology Lab 3 s.h.
002:136 Conservation Biology 4 s.h.
002:138 Genetics and Biotechnology Laboratory 3 s.h.
002:148 Field Ecology 4 s.h.
002:196 Honors Investigations 6 s.h.
031:177 Field Methods: Animal Behavior Research 3 s.h.
061:157 General Microbiology 5 s.h.
099:140 Experimental Biochemistry 4 s.h.
Iowa Lakeside Laboratory courses (students consult their advisers) 4-5 s.h.
ELECTIVES

At least three courses, which may include any course chosen from a breadth menu or from the list of courses with a laboratory that has not been used to satisfy those requirements, any other 2-4 s.h. course numbered 100 or above offered by the Department of Biological Sciences (002:145 must be taken for 4 s.h.), any approved advanced biology course taught at the Iowa Lakeside Laboratory (students consult their advisers), and/or any course(s) chosen from the following list:

- 012:121 Principles of Paleontology 3 s.h.
- 012:122 Evolution of the Vertebrates 3 s.h.
- 027:155 Skeletal Muscle Biology 3 s.h.
- 061:147 Survey of Immunology 4 s.h.
- 113:170 Primate Evolutionary Biology 3 s.h.
- 113:188 Primate Behavior and Ecology 3 s.h.

One of the electives may be chosen from these:

- 016:136/152:136 History of Medicine in Western Society 3 s.h.
- 16E:139 Ancient and Medieval Science 3 s.h.
- 16W:137/152:137 History of Public Health 3 s.h.
- 16W:138/152:138 History of International Health 3 s.h.
- 026:104 Introduction to Philosophy of Science 3 s.h.

In addition, students who have passed 004:121, 004:122, and 099:110 may use 099:110 as a biology elective.

Introduction to Research (002:199, 3 s.h.) may be counted toward the elective requirement for the B.A.

Suggested First-Year Schedule

See “Bachelor of Science in Biology.”

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan. (Courses in the major are those required to complete the major, exclusive of courses in the chemistry-physics-mathematics foundation.)

B.S. in Biology

Before the third semester begins: math through calculus I, 004:011 and 004:012, 002:145, and at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: the courses listed above, plus 002:011, 004:121, 22S:030 or 22S:101, two other courses in the major, and at least one-half of the semester hours required for graduation

Before the seventh semester begins: the courses listed above, 029:011 and 029:012 or equivalents, plus five or six more courses in the major, and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: the courses listed above, plus two or three more courses in the major

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

B.A. in Biology

Before the third semester begins: math through calculus I, 004:011 and 004:012, 002:010, and at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: the courses listed above, 002:011, 004:121, 22S:030 or 22S:101, three other courses in the major, and at least one-half of the semester hours required for graduation

Before the seventh semester begins: the courses listed above, 029:011 and 029:012 or equivalents, plus five or six more courses in the major, and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: the courses listed above, plus two or three more courses in the major

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Honors

Biology majors who are members of the University Honors Program may enroll in the Honors Program in Biology, which gives talented students membership in a small, active group of undergraduates with common interests. Honors students gain an introduction to the pursuits of practicing scientists by associating with one of the department's research groups and participating in an independent research project guided by a faculty member (the research supervisor). Honors students write a thesis that
should be based on an interesting biological problem, which is usually identified by the research supervisor. The thesis should clearly document that the student has acquired the necessary experimental skills to address specific questions and test specific hypotheses related to the research problem. Honors Seminar in Biology (002:198), or equivalent seminar, provides students with an ideal opportunity to improve their skills in seminar presentation and in writing scientific English. Throughout undergraduate residence, biology honors students may also take advantage of enrollment in honors sections of courses within the department and the college.

Membership in the University Honors Program requires that students maintain a cumulative University of Iowa g.p.a. of at least 3.33. To graduate with honors in biology, students must complete the requirements for a B.S. or B.A. in biology with a g.p.a. of at least 3.33 in all course work in the biology major taken at The University of Iowa (including all biology courses and cognates in chemistry, physics, biochemistry, mathematics, and statistics). In addition, students must fulfill the following requirements: complete 2 s.h. in either 002:198 Honors Seminar in Biology or an advanced-level biology seminar course; complete a minimum of 6 s.h. (taken over two or more semesters) of 002:196 Honors Investigations; write a brief research proposal summarizing the background and goals of their proposed honors research; upon completion of their research, submit an acceptable honors thesis; and give a brief oral presentation of their research findings to other biology honors students.

Students pursuing the B.S. in biology may apply 6 s.h. of 002:196 Honors Investigations toward the investigative laboratory requirement in an appropriate track. Students pursuing the B.A. in biology may apply 5 s.h. of 002:196 Honors Investigations toward the elective laboratory course requirement and count the 2 s.h. earned in 002:198 Honors Seminar in Biology toward the elective requirement.

Biology majors interested in pursuing an honors degree should contact the biology honors adviser as early as possible, preferably in their sophomore or junior year, so that they may be matched with an appropriate lab.

Minors in Biology

Students majoring in other subjects may earn a minor in biology. The minor requires 15 s.h. of credit in biology, at least 12 of which must be in 100-level courses. All of the 100-level courses must be offered by the Department of Biological Sciences at The University of Iowa, or they must be approved 100-level courses offered at Iowa Lakeside Laboratory. Students must earn a g.p.a. of at least 2.00 in 100-level courses. Biological sciences courses taken on a pass/fail basis do not apply toward the biology minor. Biological sciences courses taken at other institutions, except Iowa Lakeside Laboratory, do not apply to the 100-level course requirement in the biology minor.

Graduate Programs

All members of the biological sciences faculty engage in research that addresses fundamental questions in the biological sciences. Areas of departmental research include cell and developmental biology, evolutionary biology and ecology, genetics and biotechnology, neurobiology, and plant physiology and molecular biology.

Graduate programs in biological sciences are designed to train scientists in the principles and practice of biological research in preparation for positions in education, industry, or government. The Doctor of Philosophy program primarily prepares students to become principal investigators of independent research projects and to hold faculty positions at colleges and universities. Students who complete their academic training with the Master of Science are prepared to participate in research or teach at the community college or secondary school level.

On admission, each new graduate student is assigned a temporary adviser, who guides the student through initial requirements and acts as his or her advocate.

Before registration, new graduate students meet with their temporary advisers to discuss their educational background and to formulate a study plan for the first year. Students may be advised to take specific course work to enhance their background in certain areas.

During the first year, students must make up undergraduate deficiencies in chemistry, genetics, mathematics, and physics. A student with a bachelor's degree outside the biological sciences may request modification of certain area requirements; the Graduate Affairs Committee decides whether portions of the requirements may be waived. Students also take 002:128 Fundamental Genetics during the first year, unless excused from this requirement by the Graduate Affairs Committee. After the first year, students are advised by their research sponsor and dissertation committee.
Minimum entry requirements are:
- two semesters of organic chemistry or one semester of organic chemistry and one semester of biochemistry;
- one semester of calculus;
- two semesters of college physics; and
- 20 s.h. of course work in biology.

Master of Science in Biology

Although the department emphasizes the Ph.D. degree, M.S. programs are available with and without thesis. All M.S. students must take a seminar with a substantial writing and oral presentation requirement.

M.S. With Thesis

The M.S. with thesis requires 30 s.h. of graduate credit and a thesis based on original research. No more than 9 s.h. earned in research can be applied toward the degree. The remaining semester hours are selected in consultation with the student’s advisory committee and are tailored to the student’s background and career goals. Students receive academic credit for courses they are required to take, except credit awarded for courses necessary to make up undergraduate deficiencies, which does not count toward the 30 s.h. requirement.

After the thesis is accepted by the supervisor and advisory committee, the candidate must pass an oral examination on the research described in the thesis and on related subjects.

M.S. Without Thesis

The M.S. in biology without thesis requires 34 s.h. of graduate credit and a library research report for which no more than 4 s.h. of credit may be granted. Credit may be earned in biology or cognate sciences; specific courses are determined in consultation with the student’s thesis committee and are tailored to fit the student’s background and career goals. No more than 8 s.h. earned in research can be applied toward the M.S. without thesis.

Credit earned in courses numbered 100 or above—except courses required to make up deficiencies—may be included in the 34 s.h. if approved by the advisory committee. On completion of the 34 s.h. and acceptance of the research report by the faculty sponsor, the student must pass a written examination covering the graduate program in biology, including the area of the research report.

Doctor of Philosophy in Biology

The department expects new Ph.D. candidates to do research in three laboratories on a rotating basis during their first year. Students consult with their temporary advisers and with prospective faculty research advisers before identifying their preferences for rotations. Students are assigned to laboratories through a matching process.

During the first year, students are required to enroll in the department’s colloquium, which is based on a weekly Friday seminar series. In the second semester, the colloquium includes a discussion component based on the research described in the seminars. During the first two years, students also are required to enroll in at least two seminar courses that have a significant writing component and in two advanced lecture courses. In each subsequent year, students also must enroll in a seminar/writing course.

Additional formal course work and proficiency requirements for each Ph.D. student are determined by the dissertation committee on the basis of the student’s background and current and prospective research interests. The dissertation committee also determines what portion of the formal course or proficiency requirements the student must complete before the comprehensive examination. In this examination, students must demonstrate knowledge of biology fundamentals and the analytic and synthetic skills necessary to become creative, independent scientists. Once they complete the course work and proficiency requirements and pass the comprehensive examination, students may be admitted to full candidacy for the Ph.D.

Students also must demonstrate teaching skills by assisting in instruction as teaching assistants for at least two semesters.

The program culminates in students’ preparation of a dissertation based on original, independent research. Students must pass a final examination that covers the thesis and its specialized field before the Ph.D. is awarded.

Financial Support

All graduate students making satisfactory progress toward the Ph.D. receive stipend and full tuition support from fellowships or teaching assistantships. Research assistantships also are available through individual research grants administered by faculty members or by the University. First-year Ph.D. students are
Admission

Application materials for the graduate program must be sent both to the University's Office of Admissions and to the Department of Biological Sciences graduate admissions committee. Complete instructions are listed on the application form; contact the Department of Biological Sciences or visit its web site. Applicants should have official transcripts from each undergraduate and graduate institution they have attended sent to both the Office of Admissions and the Department of Biological Sciences. They also should arrange to have official scores from the Graduate Record Examination (GRE) General Test (verbal, quantitative, and analytical writing) sent to both offices. A valid B.S. or B.A. from an accredited institution is required.

International applicants whose first language is not English must score 570 (paper-based) or 230 (computer-based) or higher on the Test of English as a Foreign Language (TOEFL), and have their score sent to the Office of Admissions. International applicants who received their degrees (either bachelor's or master's) from a U.S. institution are exempt from this requirement. All international students whose first language is not English are required to take an English proficiency exam when they first enroll for classes.

Successful applicants for graduate admission usually have a g.p.a. of at least 3.00 and score above 1200 on the Graduate Record Examination (combined verbal and quantitative). These criteria are general guidelines for the admissions committee, which also considers letters of recommendation, research experience, and other appropriate criteria.

The department recommends that applicants also take the Graduate Record Examination advanced biology test and submit their scores. Although most applicants have completed undergraduate programs in biology, the department also considers applicants with backgrounds in biophysics, botany, biochemistry, molecular biology, microbiology, and other related areas.

Applications should be submitted by February 1 and must include the GRE test scores. In order to meet the deadline, applicants must take the GRE in October or earlier. Late applications are considered as placement and funding permit.

Students applying for admission to the M.S. with thesis program in biology should have a bachelor's degree in one of the biological sciences. Students with bachelor's degrees in other areas may need to register as nondegree students (A9 or G9) and make up the equivalent of the department's bachelor's degree program prior to consideration for admission. Nondegree students must complete chemistry, physics, and calculus requirements in addition to the biology courses listed in the undergraduate program. Nondegree students should consult the department's graduate program administrator before applying for admission.

The M.S. degree without thesis is an exit degree. Students are not permitted to enter as graduate students with this degree objective.

For more information, visit the department's web site.

Facilities

The department is housed in three contiguous buildings, with modern facilities and equipment for state-of-the-art research. A new research and teaching building was completed in spring 2000, and extensive renovation of the preexisting facilities was completed in spring 2004. Facilities include the Keck Dynamic Image Analysis Facility, which couples sophisticated state-of-the-art microscopy and computerized motion analysis to permit three-dimensional real-time analysis of cell movement in vitro and in situ. The Roy J. Carver Center for Comparative Genomics houses the department's DNA sequencing, quantitative PCR, functional genomics/microarray facilities, and informatics facilities.

A well-staffed microscopy and imaging facility, including access to a newly established confocal microscope, is available for teaching and research.

Two large greenhouses are used in plant research and education.

The department houses animal-care facilities suitable for mice, rats, rabbits, Xenopus laevis, and zebra fish. These facilities are managed by the University's animal care unit, which is accredited by the Association for Assessment and Accreditation of Laboratory Animal Care. A central University facility provides assistance in the preparation of transgenic mice.

The department is also the home of the National Institute of Health-affiliated Developmental Studies Hybridoma Bank, which collects and
distributes monoclonal antibodies that originate in laboratories all over the world. The collection now contains nearly 600 monoclonal antibodies that are distributed to users internationally for a modest fee.

In addition to department facilities, campuswide facilities include a DNA oligonucleotide synthesis and sequencing equipment, and mass- and NMR spectroscopy facilities. A hybridoma facility is available for preparation of monoclonal antibodies. The Center for Biocatalysis and Bioprocessing is available for growing large amounts of microorganisms (e.g., 100 liters) for use in protein isolation.

**Iowa Lakeside Laboratory**

Advanced courses in biology at Iowa Lakeside Laboratory are accepted for elective credit in the biology major—for the B.A. and the physiology and molecular biology of plants track in the B.S.—and in the minor. The laboratory, located on West Lake Okoboji in northwestern Iowa, affords excellent conditions for summer study in field biology, limnology, phycology, aquatic ecology, pollination biology, and plant taxonomy. See Iowa Lakeside Laboratory (University College) in the Catalog.

**Courses**

Many courses include field and/or laboratory components.

**For Precollege Students**

002:004 Secondary Student Training Program

3-4 s.h.

Special projects. Prerequisite: secondary school enrollment.

**Primarily for Undergraduates**

002:001 Introduction to Botany

4 s.h.

Biology of plant life; emphasis on structure, function, reproduction, diversity, inheritance. GE: natural sciences.

002:002 Introductory Animal Biology

4 s.h.

002:010 Principles of Biology I

4 s.h.

Structure and function of cells; structure, function, reproduction of higher plants and vertebrate animals; first of two-semester course sequence. GE: natural sciences. Prerequisite: 004:011.

002:011 Principles of Biology II

4 s.h.

Continuation of 002:010; genetics, development, immunology, ecology, evolution. GE: natural sciences. Prerequisites: 002:010 and 004:011.

**Elementary Topics of General Interest**

These courses are not open to graduates and do not provide credit toward a biology major.

002:021 Human Biology

4 s.h.

Molecular and cellular basis of human life; integration of humans and the biosphere through photosynthesis, respiration, structure, function of human tissues, organs, organ systems; reproduction, genetics, impact of molecular biology and genetic engineering; lecture, laboratory. GE: natural sciences. Prerequisite: nonscience major.

002:022 Ecology and Evolution

3 s.h.

Evolution and diversity of living things, their patterns on Earth, their organization in ecological systems; dynamics of evolutionary processes. GE: natural sciences.

002:029 First-Year Seminar

1-2 s.h.

Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities, field trips). Prerequisite: first- or second-semester standing.

002:081 Human Genetics in the Twenty-First Century

3 s.h.

Heredity in human families, populations; genetic basis of normal, abnormal traits; chromosome behavior; molecular basis of genetics; sex determination. GE: natural sciences.

002:087 Spring Flora

3 s.h.

Recognition and identification of spring-flowering herbaceous plants, native woodland trees and shrubs, woody landscape plants; family characteristics, use of taxonomic key.

002:095 Plants and Human Affairs

2-3 s.h.

How plants are useful to people: food, clothing, shelter; plants' social, economic, ecological significance.

**For Undergraduate and Graduate Students**

002:100 Plant Diversity and Evolution

4 s.h.

Major groups, including algae, bryophytes, ferns and fern allies, gymnosperms, primitive angiosperms; emphasis on evolutionary implications of structure, reproductive biology, ecological adaptations; extant representatives of each plant group, reference to paleobotanical evidence. Prerequisites: 002:001, or 002:010 and 002:011, or equivalents.

002:101 Teaching Internship in Biology

2 s.h.

Training in teaching the laboratory component of a large General Education biology course; weekly session with instructor, shadowing and assisting a graduate teaching assistant in a lab section, leading laboratory exercises. Prerequisites: grade of B or higher in 002:010 and 002:011, junior or senior standing, and consent of instructor.

002:103 Biogeography

2-3 s.h.

Patterns of plant and animal distribution and their interpretation; historical geography; including glaciation, plate tectonics; ecological geography, including physical factors such as climate, geology. Prerequisite: 002:001, or 002:010 and 002:011, or 044:003 or consent of instructor. Same as 044:103.

002:104 Introduction to Developmental Biology

3 s.h.

Fundamental mechanisms in differentiation, organogenesis, morphogenesis; and pattern formation; mechanistic approach at molecular, cellular, tissue levels of organizations. Prerequisites: grade of C- or higher in 002:010, 002:011, 002:128, and 004:012.
84 College of Liberal Arts and Sciences

002:107 Invertebrate Biology 4 s.h.
Major evolutionary trends; structural, physiological, behavioral adaptations; laboratory emphasis on living material. Prerequisites: 002:010 and 002:011, or equivalents.

002:108 Vertebrate Zoology 4 s.h.
Vertebrate diversity, success in relation to evolutionary history, and adaptive radiation of fish, amphibians, reptiles, birds, mammals; physiological, morphological, behavioral, life history adaptations; vertebrate zoogeography, systematics, patterns of reproduction, social systems. Prerequisites: 002:010 and 002:011, or consent of instructor.

002:110 Plant Physiology 3-4 s.h.
Nutrients, metabolism, growth and development of higher plants; emphasis on photosynthesis, hormone actions, photomorphogenesis. Prerequisite: 002:001, or 002:010 and 002:011, or consent of instructor.

002:113 Ecological Plant Anatomy 4 s.h.
Fundamental tissue systems of vascular plants, emphasis on seed plants; development, differentiation of each cell type, arrangement in primary and secondary plant body; focus on relationships between structure, function. Prerequisite: 002:001, or 002:010 and 002:011, or equivalents.

002:114 Cell Biology 3 s.h.
Structures of cells and organelles in relation to their functions at molecular, cellular levels; emphasis on higher eukaryotic cells. Prerequisites: 002:010 and 002:011, and 004:012 or equivalent.

002:117 Plant Developmental Biology 3 s.h.
Developmental processes throughout life cycle of vascular plants; current knowledge of mechanisms, control; emphasis on molecular, genetic approaches to development, including transposon tagging, transformation. Prerequisite: 002:128.

002:123 Plant Biochemistry 3 s.h.
Proteins, carbohydrates, lipids, nucleic acids, their chemical structures and participation in plant metabolism; emphasis on processes unique to plants, including photosynthesis, photoreception, nitrogen fixation. Prerequisite: 002:010, 002:011, and 004:121, or consent of instructor.

002:124 Animal Physiology 3 s.h.
Principles of cellular and systems physiology. Prerequisites: 002:010 and 002:011, and college physics or consent of instructor.

002:125 Scientific Basis of Biological Warfare 3 s.h.

002:127 Introduction to Plant Molecular Biology 3 s.h.
Fundamentals of molecular biology and their application in understanding plant biology. Prerequisites: 002:010 and 002:011, or equivalents.

002:128 Fundamental Genetics 3-4 s.h.

002:131 Evolution 4 s.h.
Nature, evidence, analysis, implications, molecular/genetic basis; historical record, phylogeny, speciation, adaptation, investigative methods. Prerequisites: grade of C- or higher in 002:128, and calculus or statistics. Recommended: a course in biochemistry.

002:133 Cell Biology Laboratory 3 s.h.
Conceptual understanding and technical skills in fluorescence microscopy and digital imaging, mammalian cell culture, tissue fractionation, centrifugation, electrophoresis, and expression of recombinant proteins. Prerequisites: 002:010 and 002:011.
Corequisite: a 100-level course in biological sciences, biochemistry, or microbiology.

002:134 Ecology 4 s.h.
Adaptations of organisms to their physical and biological environments; organism-environment interactions; population biology; interactions between species; ecology of communities, ecosystems, human impact on ecosystems. Prerequisites: 002:010 and 002:011, and 22M:016 or 22M:025. Same as 159:134.

002:135 Developmental Biology Lab 3 s.h.
Experimental manipulation of embryos to examine mechanisms of early development, including gametogenesis and fertilization, cleavage, gastrulation, pattern formation and organogenesis; in vivo imaging of development, methods to visualize gene expression; model organisms including sea urchin, fish, frog, chick, mouse. Prerequisites: 002:104 and consent of instructor.

002:136 Conservation Biology 4 s.h.
Definition and measurement of biodiversity, causes of biodiversity loss; conservation biology of populations, habitats, and ecosystems; practical application of conservation principles, value of biodiversity; field projects to develop skill in assessing and measuring important characteristics of natural areas, and in creating and presenting management plans. Prerequisites: 002:010, 002:011, and 002:134.

002:138 Genetics and Biotechnology Lab 3 s.h.

002:140 Systematics: Classifying Biodiversity 2-3 s.h.
Nature of species, isolating mechanisms, hybridization; problems of convergence, homology; plant mating systems; types of information used in making taxonomic decisions. Prerequisites: 002:001, or 002:010 and 002:011, or equivalents.

002:143 Animal Behavior 4 s.h.
Genetics, sensory physiology, migration, development of behavior, circadian rhythms, foraging strategies, aggression, sexual and parental behavior, group selection, social behavior. Prerequisites: 002:010 and 002:011. Recommended: advanced standing.

002:145 Biology of the Brain 3-4 s.h.
Application of experimental results, including those from molecular biology, genetics, neuropharmacology and brain imaging, to understanding of mind-brain relationship, relative contributions of environmental and genetic behavior determinants, and the nature of mental disorders. GE: natural sciences.

002:148 Field Ecology 4 s.h.
Correlation of vegetation, environmental factors; delineation of plant communities, populations; population dynamics, analysis of field data; methods for describing ecological phenomena in quantitative terms; statistics. Prerequisite: 002:134 or consent of instructor.

002:150 Endocrinology 3 s.h.
Glands of internal secretion; emphasis on vertebrate systems; actions of hormones in regulating growth and metabolism, organ to molecular level. Prerequisites: 002:010 and 002:011, or equivalents. Recommended: organic chemistry.

002:155 Cell Physiology 4 s.h.
Functions common to all cells: metabolism and its control, cellular energetics, membranes and transport, excitation, signal transduction, synthesis of proteins in cells and organelles, expression of genetic information, cell cycle, movement, architecture, lecture, discussion. Prerequisites: 002:128, and 099:110 or 099:120, and 22M:016 or 22M:025 or 22M:031, and 029:011 or 029:081; or consent of instructor. Corequisite: 029:012 or 029:082.

002:157 Plant Cell Biology 3 s.h.

002:160 Molecular Phylogenetics 3 s.h.
Theory underlying phylogenetic analysis with application of these methods to molecular data sets; analysis of multiple genes, organellar, and nuclear genome sequences to reconstruct the history of cells. Prerequisite: grade of C- or higher in 002:128 or consent of instructor. Recommended: 002:131.
002:162 Population Genetics and Molecular Evolution 3 s.h.
Nucleotide sequences, genes, and mutation; rates and patterns of nucleotide substitution; selection at the molecular level and the neutral theory; population genetics theory; genome evolution.
Prerequisite: grade of C- or higher in 002:128 or consent of instructor. Recommended: 002:131.

002:168 Genes and Development 3 s.h.
Mechanisms by which genes control development; methodology of scientific research applied to developmental genetics.
Prerequisites: 002:104 and 002:128 or equivalent or consent of instructor.

002:169 Introduction to Bioinformatics 4 s.h.
Basics of genetics and molecular biology; overview of bioinformatics and genome science, including genome projects, functional genomics, phylogenetics, proteomics, microarrays, DNA polymorphisms, data mining algorithms; experimental methods, analytical approaches. Prerequisite: 002:128 or 099:120 or graduate standing or consent of instructor. Same as 051:121, 055:121.

002:170 Bioinformatics 3 s.h.
Overview of bioinformatics and genomics; requires working knowledge of basic concepts in genetics and molecular biology.
Prerequisite: grade of B+ or higher in 002:128 or consent of instructor. Same as 127:170.

002:171 Molecular Genetics 4 s.h.
Mechanism, regulation of RNA, DNA, protein biosynthesis, with emphasis on methods of genetic analysis; application of modern recombinant DNA techniques to basic problems. Prerequisites: 002:128 or 099:120, and undergraduate or first-year graduate standing.

002:174 Computational Genomics 3 s.h.
Same as 051:122, 055:122, 127:173.

002:176 Statistics in Bioinformatics 3 s.h.
Same as 185:103.

002:180 Fundamental Neuroscience 4 s.h.
Neuronal function, plasticity, and development at the molecular and cellular levels. Prerequisites: 002:010, 002:011, and 002:145 or grade of B or higher in 002:114; or consent of instructor. Recommended: 029:012 and 099:110, or equivalents. Same as 132:180.

002:181 Neurophysiology 3-4 s.h.
Physiological properties of nerve cells, nervous systems; axonal conduction, synaptic transmission, sensory transduction, integrative processes, higher functions. Prerequisites: 22M:025 or equivalent, and 029:012; or consent of instructor. Same as 132:181.

002:190 Topics in Evolution and Ecology 2 s.h.
Eukaryotic gene and genome composition, organization, and evolution. Prerequisite: 002:128 or consent of instructor.

002:196 Honors Investigations arr.
Experimental and theoretical research, readings in biological sciences. Prerequisites: honors standing and consent of instructor.

002:197 Topics in Plant Molecular Biology 1-2 s.h.
Prerequisite: consent of instructor.

002:198 Honors Seminar in Biology 2 s.h.
Prerequisite: honors standing.

002:199 Introduction to Research 3 s.h.
Prerequisite: consent of instructor.

002:200 Biology Colloquium 0, 2 s.h.
Repeatable.

002:207 Graduate Research Techniques 1 s.h.
Prerequisite: consent of instructor.

Prerequisite: consent of instructor.

002:218 Microscopy for Biomedical Research 3 s.h.
Preparation and analysis of biomedical projects by light and electron microscopy. Prerequisites: biological science course and consent of instructor. Same as 060:218, 061:218.

002:220 Advanced Microscopy Biomedical Research arr.
Individually designed student research projects. Prerequisites: introductory microscopy course and consent of instructor. Same as 060:220, 061:220.

002:228 Advanced Readings in Genetics 1 s.h.
Critical evaluation of classic genetics papers. Prerequisite: biological sciences graduate standing. Corequisite: 002:128.

002:234 Seminar: Writing in Natural Sciences 2 s.h.
Writing and critiquing skills in the natural sciences. Prerequisite: consent of instructor.

002:246 Developmental Neurobiology 3 s.h.
Same as 072:245, 132:246.

002:265 Neuroscience Seminar 0-1 s.h.

002:270 Biosciences Seminar 1 s.h.
Same as 072:342, 156:265.

002:301 Research: Biology arr.
Repeatable.

002:303 Independent Study in Biology arr.
Repeatable.

002:304 Independent Study in Neurobiology arr.
Repeatable.

Biological Sciences 85
Chemistry

Chair: David F. Wiemer
Professors: Mark A. Arnold, Donald J. Burton (Carver/Ralph L. Shriner Professor of Chemistry), James B. Gline, Harold M. Coff, Vicki H. Grassian (Chemistry/Chemical and Biochemical Engineering), Daniel M. Quinn, Gary W. Small, David F. Wiemer (Chemistry/Pharmacology)
Assistant professors: Ned Bowden, Donald M. Cannon, Chris Cheatum, Amnon Kohen, Leonard MacGillivray, Jason Telford

Undergraduate degrees: B.A., B.S. in Chemistry
Undergraduate nondegree program: Minor in Chemistry
Graduate degrees: M.S., Ph.D. in Chemistry
Web site: http://www.uiowa.edu/~chemdept

Undergraduate Programs

Bachelor of Science

The Bachelor of Science in Chemistry is certified by the American Chemical Society. Current and projected demand for B.S. graduates in chemistry is excellent in research and in control and process-development work. The B.S. program also provides all the prerequisites for graduate work in chemistry or biochemistry and in other biomedical areas with a molecular focus.

The B.S. requires 66 s.h., of which 46 must be earned in chemistry courses. Of these, at least 9 s.h. must be earned in chemistry courses at The University of Iowa. The following courses are required.

Chemistry

One of these sequences:
004:121-004:122 Organic Chemistry I-II 8 s.h.
004:123-004:124 Organic Chemistry I-II for Majors (preferred) 6 s.h.

One of these:
004:141 Organic Chemistry Laboratory 3 s.h.
004:142 Organic Chemistry Laboratory for Majors (preferred) 3 s.h.

All of these:
004:021 Basic Measurement 3 s.h.
004:111-004:112 Analytical Chemistry I-II 6 s.h.
004:125 Inorganic Chemistry 2 s.h.
004:131-004:132 Physical Chemistry I-II 6 s.h.
004:143 Analytical Measurements 3 s.h.
004:144 Physical Measurements 3 s.h.
004:153 Inorganic Chemistry Laboratory 3 s.h.
004:170 Advanced Inorganic Chemistry 3 s.h.

Integral Calculus

One of these sequences:
22M:025-22M:026 Calculus I-II 8 s.h.

Introductory Physics

One of these sequences:
029:011-029:012 College Physics I-II (accepted) 8 s.h.
029:081-029:082 Introductory Physics I-II (preferred) 8 s.h.

Students must earn a total of at least 6 s.h. in advanced science elective courses and in 004:162 Undergraduate Research. Advanced science electives may be chosen in chemistry, mathematics, computer science, astronomy, physics, engineering, environmental sciences, radiation biology, biochemistry, microbiology, pharmacology, pharmacy, biological sciences, geoscience, or physiology.

Bachelor of Arts

The B.A. program in chemistry provides a more general education, with a concentration in fundamental chemistry and a wider choice of electives than the B.S. program includes.
Advanced courses in chemistry, biological sciences, mathematics, physics, or other scientific areas are recommended.

The B.A. requires 51 s.h., of which 37 must be earned in chemistry courses. At least 6 s.h. must be earned in chemistry courses at The University of Iowa.

B.A. graduates in chemistry may qualify to be high school teachers, provided they meet teacher licensure requirements. By choosing appropriate electives, students can meet entrance requirements for chemistry, biochemistry, medicine, dentistry, or other graduate or professional programs while satisfying the B.A. requirements in chemistry. B.A. graduates also pursue careers and education in business, law, and other areas.

The major course requirements for the B.A. are as follows.

**Chemistry**

One of these sequences:
- 004:011-004:012 Principles of Chemistry I-II 8 s.h.
- 004:018-004:019-004:020 Chemical Science I-II and Chemical Science Laboratory 8 s.h.

One of these sequences:
- 004:121-004:122 Organic Chemistry I-II 6 s.h.
- 004:123-004:124 Organic Chemistry I-II for Majors (preferred) 6 s.h.

One of these:
- 004:141 Organic Chemistry Laboratory 3 s.h.
- 004:142 Organic Chemistry Laboratory for Majors (preferred) 3 s.h.

One of these:
- 004:143 Analytical Measurements 3 s.h.
- 004:144 Physical Measurements 3 s.h.
- 004:153 Inorganic Chemistry Laboratory 3 s.h.

All of these:
- 004:021 Basic Measurement 3 s.h.
- 004:111-004:112 Analytical Chemistry I-II 6 s.h.
- 004:125 Inorganic Chemistry 2 s.h.
- 004:131-004:132 Physical Chemistry I-II 6 s.h.

**Integral Calculus**

One of these sequences:
- 22M:025-22M:026 Calculus I-II 8 s.h.
- 22M:031-22M:032 Engineering Mathematics I-II; Single Variable and Multivariable Calculus 8 s.h.

**Introductory Physics**

One of these sequences:
- 029:011-029:012 College Physics I-II (accepted) 8 s.h.
- 029:081-029:082 Introductory Physics I-II (preferred) 8 s.h.

**Four-Year Graduation Plan**

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

**Bachelor of Arts**

Before the third semester begins: math through calculus I, 004:011 and 004:012 or 004:018, 004:019, and 004:020 or equivalent course work, and at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: the courses listed above, calculus II, organic chemistry I and II, physics I and II, and at least one-half of the semester hours required for graduation

Before the seventh semester begins: the courses listed above, four more courses in the major, and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: the courses listed above, and one or two more courses in the major

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

**Bachelor of Science**

Before the third semester begins: math through calculus I, 004:011 and 004:012 or 004:018, 004:019, and 004:020 or equivalent course work, and at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: the courses listed above, calculus II, physics I and II, organic chemistry I and II, three other courses in the major, and at least one-half of the semester hours required for graduation
Before the seventh semester begins: the courses listed above, six more courses in the major, and at least three-quarters of the semester hours required for graduation.

Before the eighth semester begins: the courses listed above, and three more courses in the major.

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate.

Honors

To graduate with honors in chemistry, a student must be a member of the University Honors Program, which requires students to maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University Honors Program for more information). Honors students in chemistry must take 004:162 Undergraduate Research, complete a research project acceptable to his or her research adviser, and write an honors thesis based on that research. Students are encouraged, but not required, to present their research at local and regional meetings and to publish their results in professional journals.

Minor

The minimum requirements for a minor in chemistry are 15 s.h., including 3 s.h. in introductory-level courses and 12 s.h. taken at The University of Iowa in advanced chemistry courses numbered 100 and above; 004:011 and 004:012 Principles of Chemistry I-II, 004:018, 004:019, and 004:020 Chemical Science I-II and Chemical Science Laboratory, or their equivalents are prerequisites for advanced chemistry courses.

Teaching Licensure

Chemistry courses required for the B.S. or B.A. satisfy the major requirements for teaching in secondary schools. A minor in chemistry satisfies the requirements for a teaching emphasis in chemistry (see Science Education in the Catalog).

Special Opportunities for Undergraduates

The department offers undergraduates—majors and other students interested in chemistry—a number of programs and opportunities to enrich their classroom studies.

Undergraduate Chemistry Center

The Chemistry Center serves all students who take chemistry courses as well as the department’s professors and teaching assistants. The center maintains waiting lists and offers other assistance with registration; returns examinations and homework assignments and maintains a file of lecture hand-outs; provides a library of chemistry textbooks; and maintains bulletin boards with information on all lower-level chemistry courses. Information about student organizations and departmental scholarships and awards also is available at the Chemistry Center.

Student Organizations

Students may join the Undergraduate Chemical Society (UCS), a student affiliate of the American Chemical Society (ACS). Chapter activities include dinner meetings with guest speakers; a chemistry tutoring service for other students; participation in local and national meetings of the ACS; and participation in chemistry outreach programs. Students in UCS develop leadership, organization, and speaking skills valuable throughout their college experience and in their subsequent careers.

The department has a chapter of Alpha Chi Sigma, a co-ed chemistry fraternity. The Alpha Theta Chapter is open to students in chemistry, biochemistry, chemical engineering, and related fields. Alpha Chi Sigma sponsors many social and professional events throughout the year.

The department also supports the activities of Women in Science and Engineering (WISE), whose aim is to increase women’s participation and advancement as students, faculty members, and professional staff; promote a supportive study and work environment for women; integrate women’s ideas, strengths, and approaches into research, teaching, and service; and inform the public of educational and career opportunities for women in scientific and technical fields. WISE sponsors a living-learning community in Stanley Hall (University residence hall) for first-year women majoring in science or engineering, the Student-to-Student Support in Science mentoring program, a service learning program, and the WISE Discourse and Dining series.

Scholarships and Awards

A number of awards and scholarships are available to chemistry majors, including the American Institute of Chemists Award, the Undergraduate Award in Analytical Chemistry,
the Chemistry Alumni Awards (one each for a sophomore, a junior, and a senior), and the Merck Index Award. Chemistry majors also may apply for Russell K. Simms and Shoemaker-Strickler Scholarships.

Graduate Programs
The department offers a Master of Science and a Doctor of Philosophy in chemistry.

Master of Science
The Master of Science is offered with or without thesis, in analytical, inorganic, organic, and physical chemistry and in chemical physics. M.S. students must demonstrate minimal proficiency in analytical, inorganic, organic, and physical chemistry by passing specific examinations or by enrolling in suitable core courses. This requirement must be completed by the end of the second year of enrollment. The M.S. requires at least 30 s.h. of graduate work. A g.p.a. of at least 3.00 is required for admission to the master's examination.

Doctor of Philosophy
Ph.D. study in the areas listed for the M.S. include minimal proficiency examinations, core courses as necessary, a minimum of 11 s.h. of advanced course work, and research.

Students who meet the course requirements with a cumulative g.p.a. of 3.00 or higher are admitted to the oral comprehensive examination upon presentation and preliminary approval of their written research proposal and research progress report; they must take the oral comprehensive examination no later than the end of their second year of enrollment.

Upon completing Ph.D. research, candidates prepare the dissertation. The final examination consists of an oral defense of the thesis, at which time the candidate presents at least one manuscript of the publishable portion of his or her thesis.

Interdisciplinary Programs
The Department of Chemistry cooperates in interdisciplinary programs in applied mathematical sciences and in chemical physics (see Graduate College in the Catalog). Students with undergraduate degrees in chemistry, physics, mathematics, or engineering are eligible.

Admission
Applicants for graduate admission should have a bachelor’s degree in chemistry, preferably with a g.p.a. above 3.00. Most admitted graduate students receive financial support. For application information, contact the Department of Chemistry or visit its web site.

Facilities
The department is housed in the Chemistry Building, a five-story structure containing 2 auditoriums, 5 lecture rooms, 15 undergraduate laboratories, 43 graduate research laboratories, a computer laboratory, and a number of special-purpose instruction rooms. Research laboratories and offices of chemistry faculty members also are housed in the Iowa Advanced Technology Laboratories, one-half block from the Chemistry Building. Modern scientific equipment is available for research.

The department’s excellent library facilities are available to all students. The library contains standard reference works and complete volumes of chemistry and chemical engineering journals and subscribes to a large number of current scientific journals. The library provides online access to electronic journals and chemistry databases.

Courses

Primarily for Undergraduates
Students planning to take more than one year of chemistry should take 004:011 and 004:012. Students who require only one year of chemistry with no laboratory component may take 004:007 and 004:008. The Chemistry Diagnostic Test determines whether students are better prepared to begin with 004:007-004:008 or 004:011-004:012.

004:004 Secondary Student Training Program 3-4 s.h.
Special projects. Prerequisite: secondary school enrollment.

004:005 Technology and Society 3 s.h.
Nonmathematical exploration of selected areas of technology; basic science background, current technological applications, implications for society; for non-science majors. GE: natural sciences. Prerequisite: closed to students who have taken college chemistry courses.

004:006 Technology and Society Laboratory 1 s.h.
Laboratory for 004:005; demonstrations, student experiments. GE: natural sciences. Prerequisite: closed to students who have earned more than 3 s.h. in chemistry courses. Pre- or corequisite: 004:005.
004:007 General Chemistry I 3 s.h.
Atomic structure, chemical bonds, mole relations, stoichiometry, states of matter, acids and bases, reaction rates, electrochemistry, nuclear chemistry. GE: natural sciences. Prerequisite: elementary algebra.

004:008 General Chemistry II 3 s.h.
Organic chemistry and biochemistry. GE: natural sciences. Prerequisite: 004:007 or high school chemistry.

004:009 Supplemental Chemistry Lab 1 s.h.
Lab techniques, elementary synthesis, measurement, analysis, case-study lectures and experiments, safety glasses, appropriate dress, compliance with laboratory safety protocols required. Prerequisite: grade of C or higher in 004:018 or 004:019 or consent of instructor.

004:011 Principles of Chemistry I 4 s.h.
Chemical bonding and chemical reactions; atomic and molecular structure, chemical equations, stoichiometry, gases, liquids, thermodynamics of phase changes, solutions, equilibrium, acids, bases, pH, elementary organic chemistry; the solid state, including modern materials; lecture, discussion, laboratory. GE: natural sciences. Prerequisite: 22M:002, or ACT math subscore of 24 and MPT II score of 20, or ACT math subscore of 24 and MPT III score of 10. Recommended: Chemistry Diagnostic Test score of 15.

004:012 Principles of Chemistry II 4 s.h.
Continuation of 004:011; colligative properties of solutions, chemical thermodynamics, electrochemistry, chemical kinetics, chemical bonding, aspects of industrial chemistry, nuclear chemistry; lecture, discussion, laboratory. GE: natural sciences. Prerequisite: 004:011.

004:016 Principles of Chemistry Lab 2 s.h.
Laboratory techniques for former sequence 004:013-004:014. GE: natural sciences. Prerequisites: grade of C or higher in 004:014, or 004:018 and 004:019.

004:018 Chemical Science I 3 s.h.
GE: natural sciences.

004:019 Chemical Science II 3 s.h.
GE: natural sciences.

004:020 Chemical Science Laboratory 2 s.h.
GE: natural sciences.

004:021 Basic Measurement 3 s.h.
Continuation of 004:012; techniques of data collection and processing, including numeric and instrumental techniques for data collection and computer techniques for data processing. Prerequisite: 004:012 or 004:020, and chemistry major.

004:029 First-Year Seminar 1-2 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Prerequisite: first- or second-semester standing.

004:111 Analytical Chemistry I 3 s.h.
Modern theory and practice; emphasis on chemical equilibria (acid-base chemistry, solubility, complexation) and electroanalytical chemistry (potentiometry, voltammetry, coulometry). Prereq or coreq: 004:131 or 004:132 or consent of instructor.

004:112 Analytical Chemistry II 3 s.h.
Continuation of 004:111; emphasis on instrumental methods, including atomic and molecular spectroscopy, mass spectrometry, chemical separations. Prerequisite: 004:111.

004:121 Organic Chemistry I 3 s.h.
Carbon-containing compounds, structure, stereochemistry, physical properties, reactivity, reaction mechanisms, synthesis, emphasis on alkanes, alkenes, alkynes, alcohols, aldehydes, aromatics. Prerequisite: 004:012 or 004:019.

004:122 Organic Chemistry II 3 s.h.
Continuation of 004:121; use of spectroscopic techniques to determine chemical structures, chemistry of carbonyl compounds, amines, ethers, amino acids, carbohydrates, nucleosides. Prerequisite: 004:121.

004:123 Organic Chemistry I for Majors 3 s.h.
Carbon-containing compounds, structure, stereochemistry, physical properties, reactivity, reaction mechanisms, synthesis; emphasis on alkanes, alkenes, alkynes, alcohols, aldehydes, aromatics. Prerequisites: 004:012 or 004:019; and chemistry, biochemistry, or chemical engineering major.

004:124 Organic Chemistry II for Majors 3 s.h.
Continuation of 004:123; use of spectroscopic techniques to determine chemical structures, chemistry of carbonyl compounds, amines, ethers, amino acids, carbohydrates, and nucleosides. Prerequisites: 004:121 or 004:123, and chemistry, biochemistry, or chemical engineering major.

004:125 Inorganic Chemistry 2 s.h.
Modern principles; emphasis on descriptive chemistry of the main group and transition elements, ionic and covalent chemical bonding theories, symmetry, inorganic stereochemistry. Prerequisite: 004:014 or 004:019. Corequisites: 004:122 or 004:124.

004:131 Physical Chemistry I 3 s.h.
Chemical thermodynamics and its application to chemical equilibria, phase changes and chemical equilibria; ideal and real gases; kinetic theory; surface absorption and electrochemistry, thermodynamics. Prerequisites: 004:012 or 004:019, and 029:012 or 029:082, and 22M:026 or equivalent.

004:132 Physical Chemistry II 3 s.h.
Quantum mechanics and its application to atomic and molecular structure; determination of structure and bonding by various spectroscopic methods; chemical kinetics. Prerequisites: 004:012 or 004:019, and 029:012 or 029:082, and 22M:026 or equivalent.

004:135 Physical Chemistry Laboratory 2 s.h.
Preparation, purification, identification, analysis of chemical compounds, principally organic compounds. Prerequisites: 004:011 and 004:012, or 004:014 or 004:020, and 004:121 or 004:123. Corequisites: 004:122 or 004:124.

004:141 Organic Chemistry Laboratory 3 s.h.
Preparation, purification, identification, analysis of chemical compounds, principally organic compounds. Open only to chemistry, biochemistry, and chemical engineering majors. Prerequisites: 004:011 and 004:012, or 004:016 or 004:020, and 004:121 or 004:123. Corequisite: 004:124.

004:143 Analytical Measurements 3 s.h.
Modern theory and practice of laboratory methods; emphasis on experimental techniques and data analysis in spectroscopy, chromatography, electrochemistry. Prerequisite: 004:111. Corequisite: 004:112.

004:144 Physical Measurements 3 s.h.
Experiments using instrumentation and computers to illustrate the principles and practice of modern chemistry. Prerequisites: 004:021, and 004:131 or 004:132, and chemistry major. Corequisite: 004:131 or 004:132.

004:153 Inorganic Chemistry Laboratory 3 s.h.
Preparation and characterization of a variety of inorganic, organometallic, and coordination compounds of the main group and transition elements; emphasis on synthetic techniques, methods for characterization of inorganic species. Prerequisites: 004:125, and 004:141 or 004:142, or consent of instructor.

004:162 Undergraduate Research 1-4 s.h.
Prerequisite: consent of adviser.

Cinema and Comparative Literature

Chair: Steven Ungar
Professors: Rick Altman, Daniel Balderston (Spanish and Portuguese/Cinema and Comparative Literature), Cheryl Herr (English/Cinema and Comparative Literature), Rudolf E. Kuenzli (English/Cinema and Comparative Literature), Christopher Merrill (American Studies/Cinema and Comparative Literature), Steven Ungar (French and Italian/Cinema and Comparative Literature)

Associate professors: Corey Creekmur (English/Cinema and Comparative Literature), Sabine Götz, Kathleen Newman (Spanish and Portuguese/Cinema and Comparative Literature), Astrid Oesmann (German/Cinema and Comparative Literature), Maureen Robertson (Asian Languages and Literature/Cinema and Comparative Literature), Rosemarie Scullion (French and Italian/Women's Studies/Cinema and Comparative Literature), Russell Valentino (Russian/Cinema and Comparative Literature), David Wittenberg (English/Cinema and Comparative Literature)

Assistant professors: Paula Amad, Rosalind Galt, Louis Schwartz, Sasha Waters

Adjunct assistant professors: Sandra H. Barkan, Kathleen Edwards

Undergraduate degrees: B.A. in Cinema, B.A. in Comparative Literature
Undergraduate nondegree programs: Minor in Cinema, Minor in Comparative Literature
Graduate degrees: M.A., Ph.D. in Comparative Literature; M.F.A. in Translation; M.E.A. in Film and Video Production; M.A., Ph.D. in Film Studies
Web site: http://www.uiowa.edu/~ccl

The Department of Cinema and Comparative Literature presents film, literature, translation, and relations with the other arts as subjects of international and interdisciplinary study. It provides a basis for intensive work in literature, literary theory, critical methods, translation, film studies, and the production of film, video, and digital arts.

The department encourages study in comparative arts, with particular emphasis on cinema, where the program’s resources are especially strong. Students and faculty members have easy access to the resources of the Translation Workshop and the Institute for Cinema and Culture.

The cinema and comparative literature faculty offers expertise in the languages and cultural study of the Americas, China, England, France, Germany, India, Ireland, Italy, Japan, Spain, and Sub-Saharan Africa. Specific expertise and direction are available in translation and in film and audiovisual history, production, and theory.

In addition to its own faculty, the department calls on faculty members in other departments and programs, including American studies, women’s studies, classics, Asian languages and literature, communication studies, English, French, and Italian, German, history, Spanish and Portuguese, Russian, and theatre arts.

Undergraduate Program

The undergraduate majors in cinema and in comparative literature provide individualized programs in the interdisciplinary study of literature and the study and production of film and audiovisual arts. The program is designed to promote cultural awareness, to increase speaking and writing skills, and to develop capacities for systematic reasoning.

The Department of Cinema and Comparative Literature offers two undergraduate majors, a B.A. in comparative literature and a B.A. in cinema. Both ordinarily require that students earn at least 21 s.h. in the major in University of Iowa course work. Students may apply only 6 s.h. of course work from another major, minor, or certificate to the major in cinema or in comparative literature.

The department also offers a minor in cinema and a minor in comparative literature.

Bachelor of Arts in Cinema

The B.A. in cinema is an individualized program in the interdisciplinary study of film and the production of creative work in film, video, and interactive multimedia. The program is designed to promote cultural and artistic awareness, to increase speaking and writing skills, and to develop capacities for systematic reasoning and effective production in cinema arts.

All students are expected to gain a perspective on both the study and the production of film, video, or digital media while becoming acquainted with the historical, critical, and theoretical issues of the area. In conjunction with an appropriate overall curriculum, the major in cinema can offer effective preparation for continuing study or
creative work in the humanities, arts, and cinema; provide a solid foundation for careers in film, video, television, and digital production; and lead to careers in arts administration, advertising, and business.

In addition to completing the College of Liberal Arts and Sciences General Education Program, cinema majors complete a minimum of 33 s.h. as follows.

- 048:001 Introduction to Film Analysis 3 s.h.
- 048:025 Introduction to Critical Reading and Viewing 3 s.h.
- 048:034 Modes of Film and Video Production 4 s.h.
- 048:095 Undergraduate Seminar 3 s.h.

One of these:

- 048:030 Introduction to Film Theory 3 s.h.
- 048:100 Introduction to Criticism and Theory 3 s.h.
- 048:120 Issues in Film Theory 3 s.h.

One film studies or film production course at the 100 level 3 s.h.

Additional cinema and comparative literature course work, including at least 9 s.h. of advanced film studies or film and video production courses numbered 048:050 or above 14 s.h.

Bachelor of Arts in Comparative Literature

B.A. students in comparative literature share a common set of basic courses in the literatures of widely divergent cultures and historical periods, in translation, and in interaction among the arts. All students are expected to gain an international perspective on literature and the arts, and to become acquainted with interdisciplinary approaches to cultural study. In conjunction with an appropriate overall curriculum, the major in comparative literature can offer effective preparation for professional studies in fields such as law and business, or for employment in fields that value critical thinking and international understanding. It also offers excellent preparation for graduate work in the humanities.

The successful pursuit of comparative literature requires that students study at least one foreign cultural tradition, appropriately emphasizing language, literature, and the arts in historical context. Familiarity with the literatures and cultures of other nations goes hand-in-hand with theoretical inquiry and reflection upon basic issues such as the nature and value of storytelling in literature and other arts—for instance, film, song, and painting. Translation between languages and among different arts represents another basic center of theory and practice. Individual courses of study may extend into other disciplines, including history, philosophy, linguistics, anthropology, law, and psychology.

Two tracks are available for completing the B.A.: language and literature, and literature and arts. Working with faculty advisers close to their particular track and interests, students develop coherent, individualized programs of study that reflect their own interests and developing skills.

In addition to completing the College of Liberal Arts and Sciences General Education Program, majors complete a minimum of 33 s.h. in courses as follows.

**COMMON COURSES**

All students take these, for a total of 18 s.h.

- 048:025 Introduction to Critical Reading and Viewing 3 s.h.
- 048:040-048:041 Major Texts in World Literature I-II 6 s.h.
- 048:095 Undergraduate Seminar 3 s.h.
- 048:100 Introduction to Criticism and Theory 3 s.h.
- Comparative literature elective(s) numbered above 048:050 3 s.h.

**Tracks**

Students take a total of 15 s.h. of work in one track.

**FOREIGN LANGUAGE AND LITERATURE TRACK**

To complete this track, students take 9 s.h. of courses in one foreign literature, read in the original language. One course in composition and conversation may count toward the major. (Language courses taken to complete the General Education Program may not be included.)

Students take an additional 6 s.h. of course work in cinema and comparative literature or a related area (e.g., English and American literature, film, linguistics, anthropology, philosophy, history) or in a second foreign literature.

**LITERATURE AND ARTS TRACK**

To complete this track, students take 12 s.h. of advanced work (100-level or above) in a single fine arts area. They may count one course in advanced performance, practice, or production toward the major, with consent of the director of undergraduate studies.

One additional 3 s.h. course must focus explicitly on arts and literature in comparative perspective.
Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

B.A. in Cinema

Note: The cinema major requires only one course in film, video, and digital production. Only this course is guaranteed to students who have signed the four-year graduation plan agreement. More advanced courses in production may be used to complete the major, but admission to these courses is limited and depends on student achievement in production courses.

Before the third semester begins: at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: at least two courses in the major (including 048:001, and 048:025 or 048:034) and at least half of the semester hours required for graduation

Before the seventh semester begins: at least six courses in the major (including 048:001, 048:025, and 048:034), and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: at least nine courses in the major

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

B.A. in Comparative Literature

Note: Because the major may require competency in a language in which the student will take advanced work, the student may need to acquire this language competency through course work early in the plan. Such course work is not reflected in these checkpoints.

Before the third semester begins: at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: at least two courses in the major and at least one-half of the semester hours required for graduation

Before the seventh semester begins: at least six courses in the major and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: at least nine courses in the major

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Honors

To graduate with honors in cinema or comparative literature, students must be members of the University Honors Program, which requires that students maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University Honors Program for more information). They must identify an area that extends beyond regularly offered course work and must complete a project in consultation with one or two faculty members, including the major adviser. Contact the Department of Cinema and Comparative Literature for details.

Minor in Cinema

Students majoring in other disciplines may earn a minor in cinema by completing 15 s.h. of work at The University of Iowa in cinema courses with a g.p.a. of at least 2.00. Of these 15 s.h., at least 12 must be in courses numbered 048:050 and above. Students must choose courses with a primary emphasis in cinema. Contact the Department of Cinema and Comparative Literature for a list of approved courses.

Minor in Comparative Literature

Students majoring in other disciplines may earn a minor in comparative literature by completing 15 s.h. of work at The University of Iowa in comparative literature with a g.p.a. of at least 2.00. Of these 15 s.h., at least 12 must be in courses numbered 048:040 and above. Students must choose courses with a primary emphasis in comparative literature. Contact the Department of Cinema and Comparative Literature for a list of approved courses.
Graduate Programs

The department offers an M.A. in film studies and in comparative literature; an M.F.A. in film and video production and in translation; and a Ph.D. in film studies and in comparative literature.

Master of Arts in Film Studies

The M.A. in film studies requires 36 s.h. of course work. The focus is on film in an international context, with required distributions of course work in U.S. cinema, European cinema, world cinemas, and film production, documentary film, animation, or experimental film.

Students meet formal degree requirements with course work, a research paper, and a written examination on two areas, which the student selects from one list focusing on film theory and another list focusing on film history. Exams are offered annually in January; students normally submit the research paper in April of their second year of graduate study.

Master of Arts in Comparative Literature

The M.A. in comparative literature requires 37 s.h. of course work. The focus is on literature in an international context, with concentration on two or more national literatures and on the theory and study of literature in general. In consultation with faculty advisers, students combine courses in comparative literature and allied departments to design a coherent program of study.

Students satisfy formal degree requirements with a written examination on reading lists that they and their advisers agree upon, or with a written thesis and an oral examination on the thesis and its relation to problems and issues in comparative literature. The M.A. also may be awarded upon successful completion of the comprehensive examination for the Ph.D.

Master of Fine Arts in Film and Video Production

The M.F.A. combines 54 s.h. of creative and scholarly course work aimed at producing a body of artistic work in film and/or video. A comprehensive exam on an aspect of film and/or video theory in January of the second year, an oral portfolio review, a thesis paper, and a creative thesis project complete the formal degree requirements.

Master of Fine Arts in Translation

The M.F.A. in translation promotes creative performance and study of languages, literatures, criticism, and cultural history. The aim of the program is to encourage the practice of literary translation and to bring about greater awareness of its tradition, contributions, and possibilities. The Iowa Translation Workshop is the central course in the program.

Admission to the program is granted on the basis of a submitted portfolio, including translations into English and original writing in English as well as supporting evidence of competence. Degree requirements include a thesis—usually a book-length collection of poems or stories, or a short novel—translated out of the original language into English and accompanied by a critical introduction.

A total of 48 s.h. of graduate study is required, of which 24 s.h. must be taken at The University of Iowa. Besides workshop hours, course work includes study of foreign literature(s), creative writing (stylistics, etc.), and criticism. M.F.A. students may expect to take courses in foreign language departments, the creative writing program, and the English department, as well as in comparative literature.

Doctor of Philosophy in Film Studies

The Ph.D. in film studies requires at least 72 s.h. of graduate course work, concentrated in film history and film theory. With the consultation and guidance of a faculty committee, students prepare for a qualifying examination in the first or second year, formulate and pursue a plan of study proposing areas to be mastered before the dissertation, present a predissertation exam on these areas, and write a dissertation in the area of advanced research.

Doctor of Philosophy in Comparative Literature

Ph.D. students in comparative literature study at least three literatures, one in historical depth and two others in limited areas of specialization. Students are encouraged to include an interdisciplinary area of concentration. All students devote a portion of their programs to
comparative study, bringing the several areas into focus. Specific areas and interrelations of areas are determined by the student in consultation with appropriate faculty members.

Some typical critical and comparative areas are European Renaissance, romanticism, structuralism and poststructuralism, narrative theory in literature and film, symbolist poetics and modern literature, oral literature in antiquity and today, and satire, rhetoric, and the theory of social interaction.

The Ph.D. dissertation should demonstrate the candidate’s ability to write a substantial piece of scholarship or criticism. Translation of a work of sufficient significance and linguistic complexity, preceded by a critical introduction, may serve as an acceptable dissertation. The final oral exam centers on the dissertation and its background.

Admission

The study of literature across linguistic and geographical borders calls for training in languages. A thorough knowledge of at least one foreign language is required for admission to the M.A. program; knowledge of at least two foreign languages is a prerequisite for Ph.D. study.

For more information, see the procedural guide for graduate students in comparative literature, available from the department.

Institute for Cinema and Culture

The Institute for Cinema and Culture promotes international film culture on the University of Iowa campus by supplementing the curriculum of the Department of Cinema and Comparative Literature with regular film screenings and public events, often in collaboration with other departments and programs. The institute helps departments, faculty, and student groups present films and relevant speakers to an interdisciplinary audience. It is especially dedicated to providing Iowa students and faculty with the opportunity to view and study important films from nations and cultures otherwise underrepresented in course offerings and at local theaters.

Each semester the institute offers 048:112 Proseminar in Cinema and Culture, a course with public screenings devoted to a single national cinema or a focused topic in world film. It also regularly sponsors a range of campus film festivals and hosts the Cinematheque series, which showcases rare and unusual films each semester.

Iowa Translation Workshop

The Iowa Translation Workshop (048:260) is offered each fall as a course for advanced students in creative writing and translation. The workshop is closely coordinated with the International Writing Program, which annually brings 20 or more writers from other countries to Iowa City for 10 weeks of activities on the University of Iowa campus. Students in the fall workshop work closely with one or more writers in translating their works into English.

Courses

- **048:001 Introduction to Film Analysis** (3 s.h.)
  Formal analysis of film; narrative cinema and approaches to narrative structure; authorship and genre issues, other major topics.

- **048:002 Survey of Film** (3 s.h.)
  Film history, theory, criticism; issues of form, technologies, and cultural functions of cinema; screenings of narrative, documentary, experimental films from varied periods and nations. GE: humanities.

- **048:010 Contemporary Cinema** (3 s.h.)
  Current cinema; key genres, movements, filmmakers, technological changes; recent cultural contexts, industrial and economic factors, changes in the film viewing experience.

- **048:011 Films and Screenplays** (3 s.h.)
  Films and their origins in original screenplays or adaptations; the screenplay as a distinct form of creative writing. Same as 008:011.

- **048:012 Film and Society** (3 s.h.)
  Relationships between cinema and society in historical and contemporary contexts; censorship, social issues, cinematic treatment of minorities and social groups.

- **048:020 U.S. Film** (3 s.h.)
  American film industry; social and artistic perspectives.

- **048:021 European Film History** (3 s.h.)
  Major works, movements, and recent developments in European cinema; German Expressionism, Soviet montage, Italian Neorealism, French New Wave; social, cultural, political contexts. GE: humanities.

- **048:022 World Film** (3 s.h.)
  Filmmaking and film culture outside the United States; key works from Asia, Africa, the Middle East, Latin America; social, cultural, political contexts.

- **048:023 Documentary Film** (3 s.h.)
  Key works and movements in international nonfiction film, from early cinema to present; formal, historical, philosophical issues in documentary practices.

- **048:025 Introduction to Critical Reading and Viewing** (3 s.h.)
  Critical approaches to literature and audiovisual media (film, video, interactive multimedia); selected texts, scholarly and critical responses to them. Prerequisite: completion of rhetoric requirement.

- **048:029 First-Year Seminar** (1-2 s.h.)
  Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures,
048:030 Introduction to Film Theory 3 s.h.
Classical film theory—formalist and realist theories; authorship, genre; contemporary film theory—semiotics, feminism, psychoanalysis, ideological criticism, postmodernism, queer theory.

048:034 Modes of Film and Video Production 4 s.h.
Introduction to nonfiction, fiction, and experimental modes of film and video production; video exercises and nonlinear editing.

048:040 Major Texts in World Literature I 3 s.h.
Reading and analysis of major literary texts from ancient Greece to 1800 in the Mediterranean, Asia, Africa; interrelationship of literature, history. Offered fall semesters. GE: humanities. Same as 008:040.

048:041 Major Texts of World Literature II 3 s.h.
Reading and analysis of major literary texts from Neoclassicism to 1900, in chronological sequence; emphasis on interrelationship of literature and history. Offered spring semesters. GE: humanities. Prerequisite: completion of requisite requirement. Same as 008:041.

048:051 Film Criticism 3 s.h.
Evaluation and analysis of film, from journalistic reviews to academic scholarship; principles and theoretical positions.

048:052 Gender and Film 3 s.h.
Representations of femininity, masculinity, sexual identity, how they relate to society, culture; examples from feminist, psychoanalytic, queer theory.

048:053 Introduction to Film Sound 3 s.h.
Sound as an acoustic, technological, aesthetic, and historical issue; functions of voice, music, sound effects.

048:064 Film/Video Production: Alternative Forms 3 s.h.
Hands-on workshops in Super 8 film, camerakiss filmmaking, activist video, or similar content. Prerequisites: 048:034 and consent of instructor.

048:065 Film Production: Material of 16mm Film 3 s.h.
Basic 16mm motion picture camera, editing, and sound techniques; individual and group exercises. Prerequisite: 048:034.

048:066 Video Production: Nonfiction 3 s.h.
Single-camera shooting on location, with emphasis on editing; group exercises oriented to nonfiction forms. Prerequisite: 048:034.

048:067 Screenwriting: Long Form 3 s.h.
Visualization, sequencing, dialogue; preparation of treatment, screenplay for fiction film, script problems. Prerequisite: 048:034.

048:068 Video Production: Fiction 3 s.h.
Development of fiction video making technique through group projects in the studio and on location, and nonlinear editing. Prerequisite: 048:034.

048:070 Styles and Genres 3 s.h.
Major film types (musicals, science fiction, westerns, film noir) and their cultural significance.

048:071 Film Authors 3 s.h.
A major director or comparison of directors; director's role in industrial and collaborative contexts; relations between biography and criticism, function of individual styles.

048:079 Undergraduate Translation Workshop 3 s.h.
Translation exercises, discussion of translation works in progress; alternative strategies for translation projects. Prerequisite: working knowledge of a language other than English. Same as 08W:079.

048:081 Film and Literature 3 s.h.
Relationships among films, novels, plays, adaptations; shared and distinct formal elements of cinematic and literary texts, their cultural functions. Same as 008:081.

048:0890 Issues in Film/Video Theory and Practice 6 s.h.
Film/video production with historical, analytical, and theoretical study; close study of a particular area of film practice, individual production project in that area (e.g., documentary or experimental film, animation, screenplay, or sound design). Prerequisites: 048:031 and 048:034.

048:091 Internship arr.
Opportunity to apply skills; faculty supervision, on or off campus. Prerequisite: cinematic and comparative literature major and consent of instructor.

048:095 Undergraduate Seminar 3 s.h.
Focus on a significant text or critical problem. Prerequisites: junior or senior standing and cinema and comparative literature major, or consent of instructor.

048:098 Honors Tutorial arr.

048:099 Individual Study arr.

048:100 Introduction to Criticism and Theory 3 s.h.
Critical approaches to the phenomenon of literature. Prerequisite: junior standing.

048:103 Topics in Contemporary Film 3 s.h.
Specific issues or periods in contemporary film.

048:104 Topics in European Film 3 s.h.
Specific issues or periods in European film.

048:105 French Cinema 3 s.h.
Issues or periods in French cinema. GE: foreign civilization and culture. Same as 009:147.

048:106 Topics in Asian Cinema 3 s.h.
Issues or topics in East or South Asian cinemas. Same as 008:127, 036:145.

048:107 Russian Literature in Translation 1860-1917 3 s.h.
GE: humanities. Same as 041:102.

048:108 History of Documentary Film 3 s.h.
A period, type, or concern of nonfiction filmmaking. Prerequisite: 048:034.

048:109 European Literature of the Nineteenth Century 3 s.h.
International and national perspectives on literary movements, works, authors before 1900. Same as 008:131.

048:110 Comparative Arts 3 s.h.
Cultural and aesthetic issues arising from side-by-side investigation of several art forms, including literature, cinema, painting, music, opera, architecture; periods, schools, styles, and their theorems. Same as 033:110.

048:111 Cinema and Culture 3 s.h.
One or more national cinemas in relation to social, historical, cultural contexts.

048:112 Proseminar in Cinema and Culture 1-2 s.h.
A national cinema or topic in international film.

048:113 Film and Video Production: Drama 3 s.h.
Individual and group dramatic video projects; location and studio shooting, nonlinear editing. Prerequisite: 048:065 or 048:066.

048:115 Literary Genres in European Literature II 3 s.h.
Same as 008:126, 041:115.

048:184 Early Modern Culture 3 s.h.
Same as 009:191.

048:186 East Meets West: A Cross-Cultural Course 3 s.h.
Perceptions in the modern period based on analyses of films, literary and philosophical texts from East and West. Same as 039:192.

048:187 Asian Literature Today 3 s.h.
Same as 039:193.

048:188 Introduction to Feminist Criticism 3 s.h.
Same as 009:194, 131:194.

048:189 Selected Authors 3 s.h.
Written by one or more authors; close readings, literary theory.

048:190 Cuban American Literature and Culture 3 s.h.
Explores the Cuban exile in the United States, emergence of a literature based on dispossession, marginality, memory of island past. GE: cultural diversity. Prerequisite: 08G:001 or equivalent. Same as 035:143.

048:191 Techniques of Translation 3 s.h.
Same as 009:197.

048:192 Individual Study arr.
Prerequisite: advanced B.A. candidates with international and comparative literary projects, or M.A. candidates in comparative literature.

048:193 Advanced Film/Video Production Workshop 1-4 s.h.
Individual film, video, interactive, or screenwriting project; common problems, screenings of work in progress, criticism. Prerequisites: graduate standing, and 048:116 or 048:124 or 048:132.

048:194 Comparative Methods 3 s.h.
Culture studied in interdisciplinary and multinational context, including historiography, ethnography, anthropology, philosophy, psychoanalysis, rhetoric, feminism, cultural studies, postcolonialism; discourse practices in context of multiple theories, comparative perspective.

048:195 Reading Across the Arts 3 s.h.
Contemporary arts and critical theory, with focus on how written texts interpret works in other media; varied approaches to art works and theory of reading.

048:196 Comparative Stylistics 3 s.h.
Same as 009:210.

048:197 Introduction to Contemporary Literary Theory 3 s.h.
How major authors construct literary text; structuralist, semiotic, psychoanalytic, Marxist, reader response, Derridian criticism. Same as 035:281.

048:198 Romantic Literature 3 s.h.
Same as 008:213.

048:199 Crossing Borders Seminar: Introductory 3-4 s.h.

048:200 Queer Theory 3 s.h.
Same as 008:239, 035:239.

048:201 Topics in Culture and Politics 3 s.h.
Comparative and interdisciplinary approaches to current theoretical debates regarding culture and politics. Repeatable. Same as 035:240.

048:202 Writing about Cinema 1-3 s.h.
Directed research, writing, revision of graduate work in film studies.

048:203 Issues in Translation 3 s.h.
Contemporary and historical theories.

048:204 Translation Workshop 1-3 s.h.
Prerequisites: at least one foreign language and consent of instructor. Same as 08W:260, 181:260.

048:205 History of Criticism: 1700-Present 3 s.h.
Theory of literature from neoclassicism to contemporary critical movements. Same as 008:262, 049:262.

048:206 Seminar Issues in the History of Translation 3 s.h.
Selected readings, current debate on translation's history and theory. Same as 08W:265.

048:207 Advanced Film Theory 3 s.h.
A major figure, issue, or approach in film theory.

048:208 Advanced Film History 3 s.h.
A major period or topic in film history; issues in film historiography, research.

048:209 Narrative Modes 3 s.h.
History or theory of narration modes in varied media.

048:210 Studies in Sound and Image 3 s.h.
Theoretical and historical approaches to film sound, technology, style.

Chair: John F. Finamore
Professors: Helena Dettmer, John F. Finamore
Professors emeriti: Erling B. Holtsmark, Roger A. Hornby, Donald F. Jackson
Associate professors: Mary J. Depew, Craig Gibson, Carin M. Green, Robert C. Ketterer, Glenn R. Storey
Assistant professors: Rosemary Moore, Jessica Wisman

Undergraduate degrees: B.A. in Ancient Civilization, Classical Languages
Undergraduate nondegree programs: Minors in Ancient Civilization, Classical Languages, Greek, Latin; Postbaccalaureate Certificate in Classics
Graduate degrees: M.A. in Classics, Greek, Latin; Ph.D. in Classics
Web site: http://www.uiowa.edu/~classics

Classics is the study of ancient languages, literatures, and cultures of the Mediterranean basin from approximately 2000 B.C.E. to 600 C.E. It embraces three civilizations—the Minoan-Mycenaean, Greek, and Roman; two languages—Greek and Latin; and a geographical area including Europe, North Africa, Egypt, and the Near East. The Department of Classics provides a basis for understanding and interpreting the contribution of the ancient world to life in the present and the future.

Undergraduate Programs

The department offers the Bachelor of Arts in ancient civilization and in classical languages (Greek and/or Latin). Both majors provide a solid foundation for graduate study in classics, European literature, law, history, art, philosophy, and religion. Graduates have become secondary school and university teachers, lawyers, doctors, librarians, museum curators, and bankers.

Bachelor of Arts in Classical Languages

The majors in classics, Greek, and Latin were discontinued effective fall 2005. Students who entered one of the discontinued majors before the first day of fall semester 2005 may choose to complete that major, but they must complete all requirements and graduate by August 2009. Beginning the first day of fall semester 2005, students may declare a major in classical languages or in ancient civilization; they must complete the requirements described below.

The Bachelor of Arts in classical languages trains students to read the ancient Greek and/or Latin languages and acquaints them with the major works of Greek and/or Roman literature. Students learn about the history of ancient Greece of the eighth through the fourth centuries B.C.E., where most of the modern Western notions of political, artistic, and social life are rooted. They also develop an understanding of the Roman Republic and Empire, when Rome established its hegemony over the Mediterranean basin, laid the foundation of law for the Western World, and spread Greece’s culture to the West.

The B.A. in classical languages requires a minimum of 36 s.h. in the major. Transfer credit is evaluated on an individual basis. The following course work is required.

Intermediate or advanced Greek and/or Latin courses (20G:011-20G:199, 20L:011-20L:199) 18 s.h.
Greek or Latin prose composition (20G:176 or 20L:171) 3 s.h.
Additional Department of Classics courses at any level, with no more than 9 s.h. in 20E Courses 15 s.h.

The advanced undergraduate Greek courses 20G:120-20G:121 Archaic and Classical Periods I-II and 20G:122-20G:123 Classical and Hellenistic Periods I-II are offered every other year and may be repeated or taken in any sequence. They cover a broad range of prose and poetry in historical context.

The advanced undergraduate Latin courses 20L:120-20L:121 Latin Literature of the Republic I-II and 20L:122-20L:123 Latin Literature of the Empire I-II are offered every other year and may be repeated or taken in any sequence. They cover a range of Latin prose and poetry in historical context from the mid-Republic to the third century C.E. Students also may count 20L:198 Medieval Latin toward the major.

To comply with the Board of Regents, State of Iowa policy on student outcomes assessment, the Department of Classics has established a method to assess the achievement level of B.A. students completing one of the department’s majors. Every student maintains a portfolio that details his or her progress in attaining the objectives of the
Teacher Licensure in Latin

For information about Teacher Education Programs and licensure, contact the Office of Teacher Education and Student Services in the College of Education or see Education in the Catalog.

Bachelor of Arts in Ancient Civilization

The Bachelor of Arts in ancient civilization is sponsored by the Departments of Classics, History, and Religious Studies and the School of Art and Art History. It concentrates on the ancient civilization of the Mediterranean world, draws on courses offered by various University departments, and allows students to create individual programs. Although the major is not preparation for graduate study in classics, it provides a sound basis for preparing teachers at the secondary school and junior college levels. It also provides a sound liberal arts and sciences basis for preprofessional training in law, medicine, and other professions.

The B.A. in ancient civilization requires a minimum of 30 s.h. in the major. The following course work is required.

- Ancient art 6 s.h.
- Ancient history 6 s.h.
- Ancient philosophy or religion 6 s.h.
- Classics, may be 20E courses or Latin or Greek language courses 9 s.h.
- Appropriate courses in art, history, philosophy, religion, or linguistics 3 s.h.

At least 15 of the 30 s.h. must be advanced (20E courses at the 100 level, and Latin and Greek language courses numbered 20G:011 and 20G:012, or 20L:011 and 20L:012, or above). Transfer credit is evaluated on an individual basis.

To comply with the Board of Regents, State of Iowa policy on student outcomes assessment, the Department of Classics has established a method to assess the achievement level of B.A. students completing one of the department's majors. Every student maintains a portfolio that details his or her progress in attaining the objectives of the major. The student submits the portfolio to the undergraduate adviser by midterm of the semester in which the student intends to graduate. Formal approval of the portfolio is required for graduation. Consult the undergraduate adviser for details.

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

B.A. in Ancient Civilization

Before the third semester begins: at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: at least two courses in the major and at least one-half of the semester hours required for graduation

Before the seventh semester begins: at least six courses in the major and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: at least eight courses in the major

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

B.A. in Classical Languages: Greek and Latin

Before the third semester begins: Elementary Latin I-II or Elementary Greek I-II, and at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: Second-Year Latin I-II and Elementary Greek I-II, or Second-Year Greek I-II and Elementary Latin I-II, and at least one-half of the semester hours required for graduation

Before the seventh semester begins: sixth semester of Latin and fourth semester of Greek, or sixth semester of Greek and fourth semester of Latin, two more courses in the major, and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: one semester of composition in either Greek or Latin
(may be completed during the eighth semester) and two more courses in the major.

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate.

**B.A. in Classical Languages: Greek Only**

Before the third semester begins: Elementary Greek I-II and at least one-quarter of the semester hours required for graduation.

Before the fifth semester begins: Second-Year Greek I-II and at least one-half of the semester hours required for graduation.

Before the seventh semester begins: three or four more courses in the major and at least three-quarters of the semester hours required for graduation.

Before the eighth semester begins: two or three more courses in the major.

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate.

**B.A. in Classical Languages: Latin Only**

Before the third semester begins: Elementary Latin I-II and at least one-quarter of the semester hours required for graduation.

Before the fifth semester begins: Second-Year Latin I-II and at least one-half of the semester hours required for graduation.

Before the seventh semester begins: three or four more courses in the major and at least three-quarters of the semester hours required for graduation.

Before the eighth semester begins: two or three more courses in the major.

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate.

**Honors**

Membership in the University Honors Program requires that students maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University Honors Program for more information). Classics seniors who are members of the University Honors Program and who have attained a g.p.a. of at least 3.50 in their first three years of classics courses may graduate with honors in classical languages or ancient civilization by completing two courses in honors reading, one each semester of the senior year, for 3 s.h. of credit each. The readings and discussions are on an ancient author or a field in ancient history or literature chosen by students and the instructor. During the first semester, students present an essay every other week; at the end of the second semester, they present a long paper, which is read and judged for honors by two members of the department. Students who write an honors thesis in classical languages must be enrolled at the same time in the appropriate advanced language courses.

**Minors**

The department offers minors in Greek, Latin, classical languages, and ancient civilization. A minor in classical languages requires a minimum of 18 s.h. in classics courses; minors in Latin, Greek, and ancient civilization require a minimum of 15 s.h. in classics courses; at least 12 s.h. must be earned in advanced courses. All minors require a g.p.a. of at least 2.00.

Students may count one relevant advanced 20E course in English toward any classics minor. Only 3 s.h. of lower-level transfer course work may be counted toward a minor. Students earning a major in classical languages or ancient civilization, or a minor in classical languages, Greek, Latin, or ancient civilization may count toward the minor no more than 6 s.h. of course work used to satisfy requirements for another major, minor, or certificate, including majors and minors in the Department of Classics.

All upper-level course work must be in University of Iowa courses. For a list of relevant courses, contact the undergraduate adviser. Students who enter with high school Latin or Greek should consult the adviser for an appropriate course schedule.

**CLASSICAL LANGUAGES**

The minor in classical languages requires a minimum of 18 s.h. Students must complete the sequences 20G:011-20G:012 Second-Year Greek I-II and 20L:011-20L:012 Second-Year Latin I-II, and an additional 6 s.h. of upper-level Department of Classics courses. At least one course must be in Latin or Greek language.

Students earning a major in classical languages or ancient civilization or a minor in classical languages, Greek, Latin, or ancient civilization...
may count toward the minor no more than 6 s.h. of course work used to satisfy requirements for another major, minor, or certificate, including majors and minors in the Department of Classics.

GREEK
The minor in Greek requires a minimum of 15 s.h.; at least 12 s.h. must be earned in advanced courses. The sequence 20G:011-20G:012 Second-Year Greek I-II is considered advanced for the minor, as are all courses numbered 100 and above. A minor may be fulfilled by completion of the intermediate level plus two 100-level courses, one of which may be a relevant course in Greek history, culture, or literature offered by the Department of Classics and taught in English.

Students earning a major in classical languages or ancient civilization, or a minor in classical languages, Greek, Latin, or ancient civilization, or a minor in classical languages, Greek, Latin, or ancient civilization may count toward the minor no more than 6 s.h. of course work used to satisfy requirements for another major, minor, or certificate, including majors and minors in the Department of Classics.

LATIN
The minor in Latin requires a minimum of 15 s.h.; at least 12 s.h. must be earned in advanced courses. The sequence 20L:011-20L:012 Second-Year Latin I-II is considered advanced for the minor, as are all courses numbered 100 and above. A minor may be fulfilled by completion of the intermediate level plus two 100-level courses, one of which may be a relevant course in Roman history, culture, or literature offered by the Department of Classics and taught in English.

Students earning a major in classical languages or ancient civilization, or a minor in classical languages, Greek, Latin, or ancient civilization may count toward the minor no more than 6 s.h. of course work used to satisfy requirements for another major, minor, or certificate, including majors and minors in the Department of Classics.

ANCIENT CIVILIZATION
The minor in ancient civilization requires a minimum of 15 s.h.; at least 12 s.h. must be earned in advanced courses. All courses in Greek numbered 20G:011 or above and all courses in Latin numbered 20L:011 or above are considered advanced for the minor. Appropriate courses in art, religion, history, and philosophy, as approved by the undergraduate adviser, also may be counted toward a minor in ancient civilization.

Students earning a major in classical languages or ancient civilization, or a minor in classical languages, Greek, Latin, or ancient civilization may count toward the minor no more than 6 s.h. of course work used to satisfy requirements for another major, minor, or certificate, including majors and minors in the Department of Classics.

Postbaccalaureate Certificate in Classics
The Postbaccalaureate Certificate in Classics is designed for students who have a baccalaureate and wish further study in Greek and Latin in order to be competitive for admission to a graduate program in classics. Entry to most such programs requires study of both Latin and Greek, preferably three years in one language and two years in the other.

The certificate is designed to be completed in two semesters by students who enter with two years of Latin and one to two years of Greek, or vice versa. It requires 18 s.h. in Department of Classics courses numbered 100 or above (upper-level and graduate courses), including at least 12 s.h. in Greek and Latin language courses. The remaining 6 s.h. may be taken in approved advanced 20E courses. Transfer credit is not accepted toward the certificate. Students must maintain a g.p.a. of at least 3.00 to remain in good standing and complete the program.

A typical plan of study for a student who enters the program with two years of Latin and one year of Greek is as follows.

Fall semester:
- 20G:011 Second-Year Greek I 3 s.h.
- 20L:120 Latin Literature of the Republic I 3 s.h.
- 20L:171 Elementary Latin Composition 3 s.h.

Spring semester:
- 20G:012 Second-Year Greek II 3 s.h.
- 20L:121 Latin Literature of the Republic II 3 s.h.
- Postbaccalaureate reading course 3 s.h.

A typical plan of study for a student who enters the program with two years of Latin and two years of Greek is as follows.

Fall semester:
- 20G:120 Archaic and Classical Periods I 3 s.h.
- 20L:120 Latin Literature of the Republic I 3 s.h.
- 20L:171 Elementary Latin Composition 3 s.h.

Spring semester:
- 20G:121 Archaic and Classical Periods II 3 s.h.
- 20L:121 Latin Literature of the Republic II 3 s.h.
- Postbaccalaureate reading course 3 s.h.
Students who complete the program successfully receive a certificate from the College of Liberal Arts and Sciences and a letter from the Department of Classics.

Admission
Applicants must have a baccalaureate degree from an accredited college or university and a minimum of two years of language study (two years of Latin or two years of Greek, or one year of each). In unusual circumstances, students with less language preparation may be admitted.

Applicants who are not enrolled in a graduate or professional program may apply to The University of Iowa as nondegree students; they also must apply separately to the College of Liberal Arts and Sciences for admission to the classics postbaccalaureate certificate program. They must submit transcripts confirming preparation for certificate language study, a statement of purpose, and two or more letters of recommendation from faculty members at their baccalaureate institution.

Language for Nonmajors
Nonmajors who wish to study Greek or Latin and who have background in either language should take either the Greek Foreign Language Placement Test or the Latin Foreign Language Placement Test, offered during summer orientation programs and monthly by Evaluation and Examination Service. The tests help determine the level at which a student should begin Greek or Latin language study at The University of Iowa.

Students who want to complete the College of Liberal Arts and Sciences General Education Program foreign language component by studying Greek should take 20G:001-20G:002 Elementary Greek I-II. Students who want to complete the component by studying Latin may choose 20L:001-20L:002 Elementary Latin I-II (20L:001 is prerequisite for 20L:002) and 20L:011-20L:012 Second-Year Latin I-II (20L:011 is prerequisite for 20L:012). Both courses must be taken to complete the General Education Program foreign language component.

Graduate Programs
The department offers the Master of Arts in classics, Greek, and Latin; and the Doctor of Philosophy in classics.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

Master of Arts
The M.A. in classics, Greek, or Latin requires a minimum of 30 s.h. in courses numbered 101 and above. Students may count no more than 12 s.h. earned in courses numbered 101-199 toward the degree. Courses taken to complete the Postbaccalaureate Certificate in Classics may not be counted toward the degree.

Students must pass a sight examination in the language(s) studied and an examination on literature and history.

Doctor of Philosophy
The Ph.D. in classics requires a minimum of 72 s.h. of course work, including the courses listed below (27 s.h.). Students may count no more than 12 s.h. earned in courses numbered 101-199 toward the degree. Courses taken to compete the Postbaccalaureate Certificate in Classics may not be counted toward the degree.

Students also must take precomprehensive and comprehensive examinations and write a dissertation.

The remaining course work is made up of Department of Classics and other courses.
PH.D. EXAMINATIONS

Ph.D. students must take precomprehensive exams in Latin sight reading and Greek sight reading and must attempt one sight reading exam by the end of their first year of graduate study. Competence in reading both German and French must be demonstrated by the close of the second year of study.

Students must file a request for the comprehensive exam at least three weeks before the date of the exam. They must take the second-year exam at the end of their second year. The remaining exams may be taken in any sequence.

Sight exam in Latin: four hours, written
Sight exam in Greek: four hours, written
Second-year exam on literature and history: four hours, written
Latin literature based on reading list: three hours, written and one hour oral
Greek literature based on reading list: three hours, written and one hour oral
Greek and Roman history based on reading list: three hours, written
Special field or author (Greek): four hours, written
Special field or author (Latin): four hours, written

Facilities

The University's Main Library and the Art Library house extensive collections of classical texts and uninterrupted runs of classical periodicals from 1850 that facilitate research in the major areas of Greek and Roman civilization. The Department of Classics has a varied collection of slides on classical subjects and a small library. The department's classical museum contains a small collection of coins, vases, and facsimiles in bronze from Mycenae, Pompei, and Herculaneum.

The University is a supporting institution of the American School of Classical Studies at Athens and the American Academy in Rome, thereby making those facilities available to its faculty and students. Students in residence are encouraged to participate in summer programs at both institutions.

The department offers students the opportunity to participate in an archaeological dig during the summer. Contact the Department of Classics in mid-February for details.

Courses

Classics in English for Undergraduates

All readings for these courses are in English except Sanskrit courses 20E:110, 20E:111, 20E:121, and 20E:122; no previous knowledge of Greek or Latin is necessary.

20E:014 Hero, God, Mortal: Literature of Greece 3 s.h.
Ancient Greek literature and culture as it responded to Homer; may include genre (e.g., epic to tragedy), religion, changing concept of hero, interaction with Mediterranean cultures, myth versus history. GE: foreign civilization and culture or humanities.

20E:015 Love and Glory: Literature of Rome 3 s.h.
Main themes and works of ancient Roman literature; works reflecting conflict of personal desire and public self in Rome. GE: foreign civilization and culture or humanities.

20E:026 Introduction to Ancient Art 3 s.h.
Art and architecture of Mediterranean civilization from Minoan times to the age of Constantine. Prerequisite: consent of instructor. Same as 01H:026.

20E:029 First-Year Seminar 2 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Prerequisite: first- or second-semester standing.

20E:030 Greek Civilization 3 s.h.
History, literature, art, architecture, religion, social life ca. 3000 B.C.E. to second century B.C.E. GE: historical perspectives.

20E:031 Roman Civilization 3 s.h.
History, literature, politics, religion, social structure from eighth century B.C.E. to second century C.E. GE: historical perspectives.

20E:050 Word Power: Building English Vocabulary 3 s.h.
Analysis of unfamiliar English words through knowledge of the history and meaning of word parts. Prerequisite: one semester of rhetoric. Same as 08N:050.

20E:070 Civilizations of the Ancient Near East 3 s.h.
Cultural development of Egypt, the Middle East, and the Iranian Plateau from first urban societies of the Sumerians and the Nile Valley (c. 3000 B.C.E.) to the conquest of Persia by Alexander the Great (fourth century B.C.E.).

20E:071 The Middle East and Mediterranean Alexander to Suleiman 3 s.h.
GE: foreign civilization and culture. Same as 016:045, 032:061.

20E:075 Ancient Sports and Leisure 3 s.h.
Sports, games, and hobbies in the ancient world, primarily Greece and Rome, 1500 B.C.E. to 500 C.E.; ancient Olympic games, Roman festival games; anthropology of sport.

20E:090 Education in Classical Antiquity 3 s.h.
Education in the Greek and Roman worlds from Homer into late antiquity.
Classics in English for Undergraduate and Graduate Students

All of these, except the Sanskrit course are taught in English.

- **20E:101 Ancient Egypt and the Ancient Near East** 3 s.h. Same as 16E:101.
- **20E:103 Medical and Technical Terminology** 2 s.h. Memorization of word stems and basic medical terms, practice on computer terminal; no formal classes.
- **20E:105 Women in the Ancient World** 3 s.h. Same as 16E:105.
- **20E:106 Warfare in Ancient Mediterranean Society** 3 s.h. Same as 16E:106.
- **20E:108 Greek Drama in Translation** 3 s.h. Tragedies of Aeschylus, Sophocles, and Euripides and comedies of Aristophanes in their dramatic, historical, and social contexts; ancient and modern production techniques, film adaptations and stage productions. GE: Humanities. Same as 049:180.
- **20E:109 Women in Antiquity** 3 s.h. Attitudes toward women and the role of women in ancient Greek and Roman society; ancient authors, male and female, and modern critics. Same as 131:109.
- **20E:110 First-Year Sanskrit: First Semester** 4 s.h. GE: Foreign Language. Same as 039:110.
- **20E:111 First-Year Sanskrit: Second Semester** 4 s.h. GE: Foreign Language. Same as 039:111.
- **20E:112 Classical Mythology** 3 s.h. Ancient Greek and Roman myths, their interpretation by Western civilization; emphasis on flexibility of myth and its importance for art, literature, anthropological, psychological studies. GE: Humanities. Same as 008:125.
- **20E:115 Greek Religion and Society** 3 s.h. From Bronze Age to the Hellenistic period, in context of Mediterranean culture; evidence such as choral hymns, inscribed prayers, magical curses inscribed on lead, architecture, sculpted offerings to the gods. GE: Humanities. Same as 032:154.
- **20E:116 Roman Religion and Society** 3 s.h. Religious beliefs, practices and writings of Romans from eighth century B.C.E. to second century C.E. GE: Humanities. Same as 032:118.
- **20E:117 Concepts of the City: Rome** 3 s.h. Physical and cultural development of the city of Rome from early republic to emperor Constantine and rise of Christianity in the fourth century C.E.
- **20E:118 Greek Archaeology and Ethnohistory** 3 s.h. Archaeology and ethnology of the Greek World, from the end of the Bronze Age to the late Roman Empire; sociocultural processes that influence development and persistence of Greek civilization. Prerequisite: introductory archaeology course or consent of instructor. Same as 113:192.
- **20E:119 Roman Archaeology** 3 s.h. Archaeology, ethnology of Roman Civilization from Iron Age to fifth century C.E. GE: Humanities. Same as 113:194.
- **20E:120 Concepts of the City: Athens** 3 s.h. Athenia from Bronze Age to present; city's role in development of political democracy and religion.

- **20E:121 Second-Year Sanskrit: First Semester** 3 s.h. GE: Foreign Language. Same as 039:112.
- **20E:122 Second-Year Sanskrit: Second Semester** 3 s.h. GE: Foreign Language. Same as 039:113.
- **20E:123 Early Greek Art** 3 s.h. Architecture, sculpture, painting, minor arts from Mycenaean to Hellenistic times. Same as 01H:126.
- **20E:124 Classical Greek Art** 3 s.h. Continuation of 20E:123. Same as 01H:127.
- **20E:125 Greek Vase Painting** 3 s.h. Geometric and figure vases from ancient Greece, Asia Minor, and Italy. Same as 01H:128.
- **20E:126 Hellenistic Art** 3 s.h. Art, religion, culture of the Greeks, Romans, Egyptians 330-30 B.C.E. Same as 01H:129.
- **20E:127 Etruscan Art** 3 s.h. Art and culture from Bronze Age to Roman conquest of Etruria. Same as 01H:130.
- **20E:128 Early Roman Art** 3 s.h. Roman architecture, sculpture, painting, mosaics of republican, imperial, late antique periods. Same as 01H:132.
- **20E:129 Art and Culture in Ancient Pompeii** 3 s.h. Art and architecture as documents of ancient society and religion in cities destroyed by Vesuvius in C.E. 79. Same as 01H:134.
- **20E:130 Later Roman Art** 3 s.h. Art and architecture of imperial Rome and provinces, from the Antonines through Constantine, C.E. 138-337. Prerequisite: 01H:005 or 01H:026. Same as 01H:133.
- **20E:134 Soul and the Afterlife in the Ancient World** 3 s.h. The concept of soul and its fate in the ancient classical world, Homer’s Odyssey through writings of the Presocratic philosophers, Plato, Aristotle, and the Stoics.
- **20E:135 Topics from the Ancient World** 3 s.h. Culture, literature, and history of the ancient Mediterranean.
- **20E:136 Gender and Sexuality in the Ancient World** 3 s.h. Thematic survey of gender and sexuality issues in the social, political, and religious life of ancient Greece and Rome; evidence from literature, the visual arts, archaeology. GE: Foreign civilization and culture. Prerequisite: 20E:030 or consent of instructor, completion of rhetoric requirement, and sophomore standing. Same as 131:152, 154:121.
- **20E:190 Honors Readings** arr. Discussion, readings, research for a paper on ancient civilization.
- **20E:194 Seminar in Ancient Civilization** 3 s.h.
- **20E:199 Private Assignments** arr. Readings in classical literature in translation.

Classics in English for Graduate Students

- **20E:201 Topics in Comparative Romance Linguistics** 3 s.h. Same as 035:207, 103:262.
- **20E:210 Seminar Problems in Ancient Art** 3 s.h. Repeatable. Same as 01H:326.
- **20E:230 Classical Rhetoric** 2-4 s.h. Same as 008:267, 010:301, 036:310.

*108 College of Liberal Arts and Sciences*
Greek for Undergraduates

20G:001 Elementary Greek I 4 s.h.
Ancient Greek, the language of Homer, the New Testament, modern medicine and science; focus on reading Greek, Greek culture. GE: foreign language.

20G:002 Elementary Greek II 4 s.h.
Continuation of 20G:001; selections from Greek authors. GE: foreign language. Prerequisite: 20G:001.

20G:011 Second-Year Greek I 3 s.h.
Focus on reading Greek prose authors, such as Xenophon and Plato. GE: foreign language. Prerequisite: 20G:002 or equivalent.

20G:012 Second-Year Greek II 3 s.h.
Continuation of 20G:011; focus on reading and interpretation of Greek poetry. GE: foreign language. Prerequisite: 20G:011.

Greek for Undergraduate and Graduate Students

20G:120 Archaic and Classical Periods I 3 s.h.
Readings in major Greek authors of the Archaic and Classical periods. Prerequisites: 20G:012 or equivalent, and consent of instructor.

20G:121 Archaic and Classical Periods II 3 s.h.
Continuation of 20G:120. Prerequisite: 20G:012 or equivalent.

20G:122 Classical and Hellenistic Periods I 3 s.h.
Readings in Greek literature of the Classical and Hellenistic periods. Prerequisite: 20G:012 or equivalent.

20G:123 Classical and Hellenistic Periods II 3 s.h.
Continuation of 20G:122. Prerequisite: 20G:012 or equivalent.

20G:176 Greek Composition 3 s.h.
Review of Greek morphology, syntax, sentence structure; composition of sentences, short passages in Greek.

20G:190 Honors Readings arr.
Discussion, readings, research for a paper on Greek literature, history, or civilization. Prerequisite: classics major.

20G:199 Private Assignments 1-3 s.h.
Directed reading and study with faculty member.

Greek for Graduate Students

Courses numbered 20G:221 through 20G:227 cover topics from the major genres and periods of Greek literature. They are offered on a four-year cycle.

Courses numbered 20G:222, 20G:223, and 20G:228 cover authors, genres, and topics of the major periods of Greek history. Specific topics are determined by the instructor's expertise and research interests. Ph.D. students are exposed to topics in all major periods at least once in four years of course work.

20G:205 Classical and Hellenistic Literature 3 s.h.
Introductory survey of Greek literature and language in and after the fourth century B.C.E.

20G:220 Greek and Roman Literary Criticism 3 s.h.
Early literary criticism in the fifth century B.C.E.; Aristophanes' critiques of his fellow poets, prose theory through Plato and Aristotle, Hellenistic and Roman treatises by "Longinus" (On the Sublime) and Horace (Ars Poetica); readings of Greek and Latin texts.

20G:222 Archaic Poetry 3 s.h.
Topics chosen from Homer, Hesiod, Homeric hymns or lyric poetry. Repeatable.

20G:223 Hellenistic Literature 3 s.h.
Authors, genres, and topics from the death of Alexander to the accession of Augustus. Repeatable.

20G:224 Greek History 3 s.h.
Readings in the ancient Greek historians (e.g., Herodotus, Thucydides) and examination of their times. Repeatable.

20G:225 Greek Philosophy 3 s.h.
Close examination of Greek texts of ancient philosophers (e.g., Plato or Aristotle); wider readings in English.

20G:227 Greek Oratory 3 s.h.
Readings from classical Greek orators with attention to their historical, social, and cultural contexts and place in history of rhetoric. Repeatable.

20G:228 Classical Greece 3 s.h.
Authors, genres, and topics from the fourth and fifth centuries B.C.E. Repeatable.

For Ph.D. students writing a dissertation. Repeatable. Prerequisite: Ph.D. candidacy.

Latin for Undergraduates

20L:001 Elementary Latin I 4 s.h.
Focus on reading Latin and on Roman culture. GE: foreign language.

20L:002 Elementary Latin II 4 s.h.
Continuation of 20L:001. GE: foreign language. Prerequisite: 20L:001.

20L:011 Second-Year Latin I 3 s.h.
Focus on reading Latin prose authors, such as Caesar and Cicero. GE: foreign language. Prerequisite: 20L:002 or two years of high school Latin.

20L:012 Second-Year Latin II 3 s.h.
Focus on reading and interpretation of Roman poets, such as Vergil and Catullus. GE: foreign language. Prerequisite: 20L:011 or equivalent.

Latin for Undergraduate and Graduate Students

20L:120 Latin Literature of the Republic I 3 s.h.
Prose or poetry by major authors of the republic. Prerequisite: 20L:012 or equivalent.

20L:121 Latin Literature of the Republic II 3 s.h.
Continuation of 20L:120. Prerequisite: 20L:012 or equivalent.

20L:122 Latin Literature of the Empire I arr.
Prose or poetry by major authors of the empire. Prerequisite: 20L:012 or equivalent.

</table>
The Department of Communication Studies encourages exploration of the practical, social, and aesthetic dimensions of symbolic exchange and awareness of the relationships among these dimensions. The department has produced many influential scholars and artists and has been a hub for the intersection of programs and projects of the University and other institutions.

**Undergraduate Programs**

The department offers a Bachelor of Arts in communication studies. First-year students interested in pursuing a degree in communication studies are advised at the Academic Advising Center. Students who have earned 30 s.h. or more and who have a cumulative (University of Iowa and transfer) g.p.a. of at least 2.50 can declare the major and are advised in the department.

**Bachelor of Arts**

The undergraduate curriculum is designed to encourage learning that progresses from a basic understanding of communication as symbolic action to intermediate and advanced courses that emphasize four approaches to communication: the practice of communication, the context of communication, communication research and criticism, and communication theory. Students who major in communication studies can choose among courses in interpersonal communication and relationships, media and society, production, public communication, and rhetoric and public advocacy. They may choose to focus on specific areas of the field to build creative combinations of course work that suit their individual learning and career goals.

The B.A. in communication studies requires a minimum of 30 s.h. in the major. Students may count up to 50 s.h. of communication studies course work toward the degree. Guided Independent Study and transfer courses may be accepted as long as the student meets University of Iowa and College of Liberal Arts and Sciences residency requirements and the department approves the courses; a maximum of 15 s.h. of transfer credit may be counted toward the degree. Students must have a cumulative g.p.a. of at least 2.50 to take most communication studies courses.
All majors begin their studies with 036:001 Core Concepts in Communication Studies (3 s.h.). This course is prerequisite to other major courses. It introduces core concepts and problems in the field and orients students to the organization and goals of the major.

Students complete course work in each of the following areas. Lists of courses approved in each area are available from the department.

036:001 Core Concepts in Communication Studies 3 s.h.
Practice courses 6 s.h.
Context courses 6 s.h.
A research and criticism course 3 s.h.
A theory course 3 s.h.
Advanced courses numbered 036:080 and above, including 3 s.h. in courses numbered 036:110 or above 9 s.h.

Practice courses focus on communication production and practice. Students acquire practical skills and learn to recognize and understand the interpersonal, public, technical, or media production communication practices of others.

Context courses explore how communication practices and meanings are shaped by context—for example, historical, cultural, social, interpersonal, or institutional settings. Context courses provide students with a better understanding of communication practices useful in professional careers such as business, education, health care, law, and media production.

Research and criticism courses emphasize communication study methods and approaches as well as how those methods and approaches are interpreted and evaluated. They focus on the application of interpretive schemas and analytical models to communicative practices or bodies of discourse. Students work directly with primary materials such as institutional data, transcripts of conversations, speeches, historical documents, media programs, and performances.

Theory courses examine the process of abstracting, modeling, and conceptualizing communicative relationships and interactions. Students learn how scholars have described and explained communication practices as behavior, cultural and social forms and formations, expressions of commonality and difference, mediated discourses, and symbolic interaction. They explore particular bodies of theory and investigate the process of theorizing in communication studies.

Students work with the department academic counselor to develop study plans that meet the requirements of the major. They may check their progress toward the degree by logging on to ISIS (Iowa Student Information Services).

Students may discuss their career goals and interests with faculty members.

**Four-Year Graduation Plan**

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan. Students who have signed the four-year graduation agreement should consult the department for details.

**Before the third semester begins:** at least one-quarter of the semester hours required for graduation

**Before the fifth semester begins:** at least two courses in the major and at least one-half of the semester hours required for graduation

**Before the seventh semester begins:** at least six courses in the major and at least three-quarters of the semester hours required for graduation

**Before the eighth semester begins:** at least eight courses in the major

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

**Honors**

The department encourages outstanding undergraduates to take part in the honors program. To graduate with honors in communication studies, students must maintain a cumulative University of Iowa g.p.a. of at least 3.33, join the University Honors Program, and fulfill the following course requirements.

036:101 Honors Workshop (seminar offered fall semesters only) 3 s.h.
036:102 Honors Thesis (usually taken final semester before graduation) 3 s.h.

In special cases, independent study course work may be substituted for the Honors Workshop, with the honors officer’s permission. Additional course work may be required by the student’s honors adviser.

To begin work toward a degree with honors in communication studies, students choose a faculty
member to supervise their honors project and act as their honors adviser.

Students who enroll in the honors program are eligible to take courses offered through the University Honors Program and to add an honors designation to any other departmental course by completing an agreement with the course instructor for special work in that course.

Detailed information on the honors program is available from the communication studies departmental honors officer.

**Minor**

A minor in communication studies requires 15 s.h. of credit in communication studies, with a g.p.a. of at least 2.00 in those courses. The minor must include 036:001 Core Concepts in Communication Studies and at least 12 s.h. of courses taken at The University of Iowa and numbered 036:040 and above.

**Forensics/Debate**

Students in the forensics/debate program have the opportunity to participate in on-campus debates, in developmental programs designed to improve speech activities in the state, and as members of competitive intercollegiate debate teams. Forensics scholarships are available. Students interested in debate should enroll in 036:013 Practicum in Debate or 036:014 Elements of Debate.

**Internships**

Internships enable students to supplement their course work with professional experiences relevant to careers in communication-related fields. The internship program is open only to communication studies majors.

To earn academic credit for internships, students must complete an internship application and obtain approval for their internship experience and site before they register for 036:028 Communication Studies Internship (arr.). Internship academic credit is awarded for an analytical paper submitted at the end of the internship and for the number of hours worked. Internships can be completed during the fall or spring semester or summer session.

For applications, contact the Department of Communication Studies or visit http://www.uiowa.edu/~commstud/undergrad/index.html. Contact the internship coordinator or the academic counselor for more information.

**Graduate Programs**

The department offers the Doctor of Philosophy in communication studies with specializations in interpersonal communication and relationships, media and society, and rhetoric and public advocacy. The department offers a Master of Arts to students who have their committee’s approval.

**Master of Arts**

The M.A. in communication studies requires a minimum of 30 s.h. and usually is granted to students in the process of pursuing the Ph.D. All students take 036:200 Introduction to Research (2 s.h.), 036:201 Issues in Teaching (1 s.h.), and at least two courses numbered 200 or above. They also prepare a graduate seminar paper that involves significant original research. For a detailed description of M.A. requirements, see the Communication Studies Graduate Student Handbook.

**Doctor of Philosophy**

The Doctor of Philosophy requires a minimum of 82 s.h. of graduate credit, including dissertation credit. All students take 036:200 Introduction to Research and 036:201 Issues in Teaching, and earn at least 10 s.h. of dissertation credit in 036:399 Ph.D. Dissertation.

Ph.D. students must successfully complete a qualifying examination during their second or third semester and a comprehensive (predissertation) examination in their major research area during their fifth or sixth semester, and write a substantial scholarly dissertation. Students must maintain a cumulative g.p.a. of at least 3.00 throughout the program. Individual Ph.D. specializations may have additional requirements; contact the director of graduate studies for details.

Admission usually is for fall semester entry. Applicants whose materials are received at the department by January 1 receive preference for admission and financial aid. Admission decisions are based on undergraduate achievement, letters of reference, Graduate Record Examination (GRE) General Test scores, the statement of purpose, and samples of scholarly work.
Interpersonal Communication and Relationships

The communication and relationships program is centered on theory complemented by strength in quantitative and qualitative research methods. It focuses on scholarly issues that arise from face-to-face, everyday communication practices in interpersonal, small-group, and organizational contexts. It emphasizes personal relationship processes, decision making and problem solving, persuasion, culture, and issues in health communication.

The goal of the program is to produce scholars who possess sophisticated knowledge of theory and methodology, who are careful consumers of theories and methods, and who can develop their own approaches to communication phenomena. The program emphasizes systematic analysis of the forms, functions, and meanings of messages within various contexts. Its broad social-scientific orientation springs from the belief that many methodological approaches are appropriate to studying and building theoretical explanations of communication.

Graduate students typically enter the program to earn a Ph.D. Advisers and committee members work closely with individual students to select courses from communication studies and other University departments and plan teaching and research experiences that will prepare students well for the employment they seek after graduation.

Media and Society

The graduate program in media and society focuses on the interplay of institutions, texts, and audiences of mediated communication systems. Its central aim is to examine modern media—radio, television, advertising, music, and a wide range of other popular cultural expressions—within their historical, social, political, economic, and cultural contexts. It also uses the mass media as sites for asking basic questions about culture, society, politics, and modernity.

Like the department’s other graduate programs, media studies has a strong interdisciplinary flavor. Students draw not only on allied areas in the Department of Communication Studies but on fields across the University.

Rhetoric and Public Advocacy

The program in rhetoric and public advocacy is built on foundation courses in classical and 20th-century rhetorical theory and in an overview of 20th-century rhetorical criticism. Courses from a rhetorical perspective include rhetorical theory, rhetorical criticism, visual rhetoric and politics, public address and public culture, studies in argumentation and freedom of speech, work in science and technology as well as academic inquiry, and historical methods. Cognate work of interest to rhetoricians also can be found in interpersonal communication and relationship studies as well as media studies.

The Ph.D. in rhetorical studies is designed to give students a mature grasp of the specialties and perspectives embraced by the field and to develop research competence essential to a life of productive scholarship.

Work in related departments—political science, history, sociology, English, cinema and comparative literature, anthropology, American studies, and journalism—complements rhetorical studies course offerings. Faculty from the Departments of Rhetoric, Political Science, and American Studies cross-reference their courses on rhetorical topics in this program.

The Project on Rhetorics of Inquiry (POROI) offers a certificate program, allowing doctoral students to specialize in the study of how academic fields use argumentative and linguistic strategies to generate and control knowledge. Many doctoral students also do extensive work in media studies or interpersonal communication to improve their range of teaching opportunities and their research skills.

Facilities

The Samuel L. Becker Communication Studies Building is designed to meet the department’s research and technological needs. Included are two television studios, a film sound stage, a scene shop, areas for animation and graphics production, a radio studio, and digital nonlinear editing stations. Introductory and intermediate video and radio production classes are offered each semester.
Courses

Courses numbered below 200 are intended primarily for undergraduates; those numbered 200 and above are for graduate students. Graduate students may take 100-level courses for credit, with their committee's approval.

Not all courses are offered each semester.

For Undergraduates

To register for most undergraduate communication studies courses, students must have earned 30 s.h. and have a cumulative g.p.a. of at least 2.50. However, registration for the following courses is open to all undergraduates, regardless of their grade-point average: 036:017, 036:070, 036:074, 036:143, 036:146, and 036:158. Registration in 036:029 is open to first- and second-semester students regardless of grade-point average.

036:001 Core Concepts in Communication Studies 3 s.h.
Introduction to fundamental ideas in communication studies; concepts important for understanding communication in history and today. Prerequisites: g.p.a. of at least 2.50 and 30 s.h. of credit.

036:002 Workshop in Debate and Forensics 3 s.h.
Public argument on questions of value and policy, opportunities for demonstration and practice in discussion and debate. Corequisites: enrollment in the National Summer Institute in Forensics.

036:011 Group Communication 3 s.h.
Application of group problem-solving techniques; leadership, group participation; projects in social decision, action. Area: practice. Prerequisite: g.p.a. of at least 2.50.

036:012 Interpersonal Communication 3 s.h.
Informal social interaction between individuals; evaluation of students' own interpersonal skills. Area: practice. Prerequisite: g.p.a. of at least 2.50.

036:013 Practicum in Debate 1 s.h.
Specialized research, case construction, argument preparation, and practice for intercollegiate policy debate competition. Area: practice. Prerequisites: g.p.a. of at least 2.50 and participation in A. Craig Baird Debate Forum.

036:014 Elements of Debate 3 s.h.
Debate and debate procedures; teaching debate in school settings; directing interscholastic debate programs. Area: practice. Prerequisite: g.p.a. of at least 2.50.

036:015 Persuasive Communication 3 s.h.
Applications of persuasive communication, persuasive speaking, persuasive messages. Area: practice. Prerequisite: g.p.a. of at least 2.50.

036:016 Business and Professional Communication 3 s.h.
Basic concepts and skills of communication in workplace settings; interviewing, formal presentations, speeches, team-building, managing difference. Area: practice. Prerequisite: g.p.a. of at least 2.50.

036:017 Theory and Practice of Argument 4 s.h.
Public argument as practiced in law, social science, politics, other arenas; oral argument. Area: practice. GE: quantitative or formal reasoning. Prerequisite: completion of General Education Program rhetoric component.

036:018 Parliamentary Procedure 1 s.h.
Rules of order for meetings of committees, clubs, organizations; making and debating motions from the floor; precedence over parliamentary sessions. Offered only through Guided Correspondence Study. Prerequisite: g.p.a. of at least 2.50.

036:019 Organizational Leadership 2-3 s.h.
Focus on communication methods, motivation, parliamentary procedure. Offered only through Guided Correspondence Study. Prerequisite: g.p.a. of at least 2.50.

036:020 Clothing as Nonverbal Communication 3 s.h.
How clothing communicates culture, gender, self-concept, age, occupation, values, status, sexuality; clothing for international business, children, the elderly; fashion theory. Area: practice. Prerequisite: g.p.a. of at least 2.50. Same as 049:042.

036:021 Oral Interpretation 3 s.h.
Principles, practice of reading literary prose and poetry to audiences; analysis, interpretation, performance, evaluation. Area: practice. Prerequisite: g.p.a. of at least 2.50. Same as 07E:021.

036:022 Introduction to Media Production 4 s.h.
Short projects in audio and single-camera video production; emphasis on building a working knowledge of how projects are created in a real-world environment, and developing critical thinking skills about media industries. Area: practice. Prerequisites: 036:001, g.p.a. of at least 2.50, and sophomore standing.

036:024 Media Industry Practices 3 s.h.
Budgeting, staff, audience research, programming, promotion, sales, labor relations, government regulation, community responsibility. Area: practice. Prerequisite: g.p.a. of at least 2.50.

036:025 Writing for Television and Radio 3 s.h.
Basic writing skills for broadcast media. Area: practice. Prerequisites: 036:001 and g.p.a. of at least 2.50.

036:026 Theory and Practice of Debate 3 s.h.
Case construction and refutation, organization of speeches; discussion and practice of specialized formats. Area: practice. Prerequisites: g.p.a. of at least 2.50 and participation in A. Craig Baird Debate Forum.

036:028 Communication Studies Internship arr.
Communication skills, knowledge in work assignments related to students' academic and career interests; full- or part-time, on or off campus. Area: practice. Prerequisite: g.p.a. of at least 2.50 or higher, communication studies major, and consent of instructor.

036:029 First-Year Seminar 1-2 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Prerequisite: first- or second-semester standing.

036:040 Communication and Conflict 3 s.h.
Implications of communication theories, conflict theories; applications to everyday life. Area: context. Prerequisites: 036:001 and g.p.a. of at least 2.50.

036:041 Gender Roles and Communication 3 s.h.
Gender roles and communication processes; function of communication in gender role development. Area: context. Prerequisites: 036:001 and g.p.a. of at least 2.50. Same as 131:041.

036:042 Intercultural Communication 3 s.h.
Relationships among culture-based assumptions, values, thought patterns, communication behavior; theory and practice. Area: context. Prerequisites: 036:001 and g.p.a. of at least 2.50. Same as 042:042.
036:043 Rhetoric, Science, and Technology 3 s.h.
Role of technology in contemporary culture; representation of technology in film and advertising; technology's role in the physical and biological sciences, cultural implications of the information revolution. Area: context. Prerequisites: 036:001 and g.p.a. of at least 2.50.

036:044 Rhetoric and Public Advocacy 3 s.h.
Rhetoric of campaigns at national, state, local levels; in election years, discussions with candidates, media representatives; individual investigations. Area: context. Prerequisites: 036:001 and g.p.a. of at least 2.50.

036:048 The Rise of Electronic Media 3 s.h.
Technical, economic, legal development of electronic media in the United States; embedment in social institutions such as family, nation, consumer culture. Area: context. Prerequisites: 036:001 and g.p.a. of at least 2.50.

036:051 Politics of Popular Culture 3 s.h.
Critical cultural approach to study of popular culture (e.g., television shows, movies, music); mainstream media, alternative forms of mass communication. Area: context. Prerequisites: 036:001 and g.p.a. of at least 2.50.

036:052 Introduction to Health Communication 3 s.h.
Research, concepts, and theories on communication about health; interpersonal communication in contexts of provider/patient, family, and social support; mass communication and health, including health communication campaigns, public relations, advertising, how news media and Internet present health information. Area: context. Prerequisites: 036:001 and g.p.a. of at least 2.50.

036:060 Communication Inquiry 3 s.h.
Social scientific methods used to generate knowledge about interpersonal, group, and mediated communication. Area: research and criticism. Prerequisites: 036:001 and g.p.a. of at least 2.50.

036:061 Persuasion in Society 3 s.h.
Theories of public persuasion, types of persuasive campaigns and movements in society; rhetorical analysis of advertising, political processes, social unrest. Area: research and criticism. Prerequisites: 036:001 and g.p.a. of at least 2.50.

036:062 Feminist Critical Practice 3 s.h.
Feminist approaches to communicative practices. Area: research and criticism. Prerequisites: 036:001 and g.p.a. of at least 2.50.

036:064 Media, Advertising, and Society 3 s.h.
Media advertising in contemporary culture; marketing to ethnic, class, gender groups. Area: research and criticism. Prerequisites: 036:001 and g.p.a. of at least 2.50.

036:065 Television Criticism 3 s.h.
Television form and content; roles of industry, audience, and textual conventions in defining the medium. Area: research and criticism. Prerequisites: 036:001 and g.p.a. of at least 2.50.

036:066 Media Audiences 3 s.h.
Historical survey of major methods in mass communication and cultural studies that are used to understand effects of mass media on audiences; student projects involving audience research and analysis. Area: research and criticism. Prerequisites: 036:001 and g.p.a. of at least 2.50.

036:068 Popular Music and Culture 3 s.h.
What makes popular music important for people; music's power to change culture; production, distribution, reception of popular music in cultural and historical contexts. Area: research and criticism. Prerequisites: 036:001 and g.p.a. of at least 2.50.

036:070 Communication and Everyday Life 3 s.h.
Theory, research on basic skills, processes in everyday communication. Area: theory. GE: social sciences.

036:071 Communication and Contemporary Culture 3 s.h.
Social-cultural rules that govern contemporary communication practices; methods for analyzing settings of discourse. Area: theory. Prerequisites: 036:001 and g.p.a. of at least 2.50.

036:074 Media and Society 3 s.h.
Processes and effects of mass communication; how mass media operate in the United States; how mass communication scholars develop knowledge. Area: theory: GE: social sciences.

036:075 Gender, Sexuality, and Media 3 s.h.
Media as a site for theorizing gender, sexuality, identity. Area: theory. Prerequisites: 036:001 and g.p.a. of at least 2.50.

036:076 Race, Ethnicity, and Media 3 s.h.
Principal debates in media criticism about representation, circulation, and commodification of popular images of race and ethnicity. Area: theory. Prerequisites: 036:001 and g.p.a. of at least 2.50.

036:080 Radio Production 3 s.h.
The studio as a production resource; radio production forms and practices; multitrack recording and mixing, tape editing. Area: practice. Prerequisites: 036:001, 036:022, and g.p.a. of at least 2.50.

036:081 Television Production 3 s.h.
The studio as a production facility; interview, news show, demonstration, other forms typical of local station or cable operation. Area: practice. Prerequisites: 036:001, 036:022, and g.p.a. of at least 2.50.

036:082 Sound and Video Documentary 3 s.h.
Nonfiction forms and practices in historical context. Area: context. Prerequisites: 036:001, 036:022, and g.p.a. of at least 2.50.

036:083 Cultural History of Radio 3 s.h.
Development of radio as a sociocultural system. Area: context. Prerequisites: 036:048 and g.p.a. of at least 2.50.

036:084 Cultural Approaches to Mass Communication 3 s.h.
Methods of conceiving, observing, and analyzing media artifacts, processes, politics. Area: context. Prerequisites: one course from 036:040 to 036:051, and g.p.a. of at least 2.50.

036:085 Media Industries and Organizations 3 s.h.
Industry economics and organizational practices as contexts for media production. Area: context. Prerequisites: 036:001 or 036:024 or 036:048 or 036:066 or 036:074; and g.p.a. of at least 2.50.

036:086 Global Media Studies 3 s.h.
Development of media systems, content strategies, and audience formations internationally, comparatively. Area: context. Prerequisites: one course from 036:040 to 036:051 and g.p.a. of at least 2.50.

036:087 Culture and Intellectual Property Law 3 s.h.
How culture and media are shaped by intellectual property laws. Area: context. Prerequisites: 036:001 and g.p.a. of at least 2.50.

036:088 Mass Communication and American Democracy 3 s.h.
Philosophical foundations of American democracy; focus on contemporary issues of news, media and politics, culture, technology, freedom of speech. Area: theory. Prerequisites: 036:001, one course from 036:070 to 036:075, and g.p.a. of at least 2.50.

036:089 Nonverbal Communication 3 s.h.
Theoretical approaches to nonverbal communication as it occurs in everyday context and situations. Area: theory. Prerequisites: 036:001, one course from 036:070 to 036:075, and g.p.a. of at least 2.50.
Communication Studies

036:090 Topics in Communication Studies 3 s.h.
Topics vary. Area: context. Prerequisites: 036:001 and g.p.a. of at least 2.50.

036:091 Organizational Communication 3 s.h.
Contemporary concepts of communication's meaning and function in organizations. Prerequisites: 036:001, 036:011, 036:016, and g.p.a. of at least 2.50.

036:092 Advanced Video Production 3 s.h.
Use of software programs, digital video cameras, and scanners to create commercials, visual identity, movie trailers, and so forth. Recommended: working knowledge of nonlinear editing, software, use of digital video cameras, production. Area: practice. Prerequisites: 036:001, 036:022, and g.p.a. of at least 2.50.

036:093 Rhetoric of War 3 s.h.
Argumentation and rhetorical strategies for going to war, for opposing war, for managing public opinion during the reverses of war, and for making peace; examples from ancient and modern wars in the light of classical rhetorical theory and as affected by modern media. Area: context. Prerequisites: 036:001 and g.p.a. of at least 2.50.

036:094 Topics in Production 3 s.h.
Topics vary. Area: practice. Prerequisites: 036:001, 036:022, and g.p.a. of at least 2.50.

036:100 Independent Study arr.
Creative or research project under faculty supervision. Area: context. Prerequisites: g.p.a. of at least 2.50 and consent of instructor, adviser, and department chair.

036:101 Honors Workshop 3 s.h.
Preparation for honors thesis prospectus; coordination of student's individual thesis work, introduction to issues in research design, methods. Area: context. Prerequisites: 036:001 and honors standing.

036:102 Honors Thesis 3 s.h.
Individual research, writing, or creative production under faculty supervision. Area: context. Prerequisites: 036:001, 036:101, and honors standing.

036:105 Workshop in Teaching Communication and Forensics arr.
Methods, materials, progression, evaluation in teaching and supervising students in courses and class activities; opportunities for observation, demonstration, practice in teaching theater, discussion and debate, individual speech, dramatic and forensic events. Prerequisite: g.p.a. of at least 2.50. Same as 075:178.

036:106 Radio Production Workshop 3 s.h.
Independent creative work. Area: practice. Prerequisites: 036:080, g.p.a. of at least 2.50, and consent of instructor.

036:144 Contemporary Political Rhetoric 3 s.h.
Televised presidential speechmaking and political action, John F. Kennedy to present. Area: context. Prerequisites: 036:001, 036:017 or one course from 036:043 to 036:047, and g.p.a. of at least 2.50.

036:145 Studies in Argument 3 s.h.
Advanced topics in argumentation within specialized personal, public, and technical forums; argument strategies, modes of decision making in social disputes. Area: context. Prerequisites: one course from 036:043 to 036:047 and g.p.a. of at least 2.50.

036:146 Issues in Rhetoric and Culture 3 s.h.
Case studies of relationships between public discourse, particular cultural contexts. Same as 008:181, 010:160, 160:160.

036:147 Family Communication 3 s.h.
Concepts, theories, and research in communication in family relationships; how information can be used to describe and understand communication behaviors in families. Area: context. Prerequisites: one course from 036:040 to 036:051 and g.p.a. of at least 2.50.

036:150 Cultural History of Advertising 3 s.h.
Evolution of consumer culture in the United States since the mid-19th century. Area: context. Prerequisites: one course from 036:040 to 036:051 and g.p.a. of at least 2.50.

036:151 Cultural History of Television 3 s.h.
Changing structure, content of U.S. television since World War II. Area: context. Prerequisites: one course from 036:040 to 036:051 and g.p.a. of at least 2.50.

036:152 Latin American Media 3 s.h.
History of Latin American media development; debates over U.S. media and cultural imperialism in the region. Area: context. Prerequisites: one course from 036:040 to 036:051 and g.p.a. of at least 2.50.

036:155 Visual Rhetoric 3 s.h.
Role of visual and material culture in American life; strategic use of images and objects, rather than language, to move audiences to attitude, action. Area: context. Prerequisites: one course from 036:040 to 036:051 and g.p.a. of at least 2.50.

036:157 Advanced Topics in Communication Studies 3 s.h.
Issues or problems in particular communication contexts. Area: context. Prerequisites: 036:001, one course from 036:040 to 036:051 or 036:060 to 036:075, and g.p.a. of at least 2.50.

036:158 Rhetoric and Past Public Controversy 3 s.h.
Rhetoric's role in public controversy, in particular time periods. GE: historical perspectives. Same as 010:141.

036:161 Physician-Patient Communication 3 s.h.
Methods for studying physician-patient communication, patient outcomes, research on characteristics and qualities of physician-patient talk; in-depth study. Prerequisite: 036:060. Same as 172:144.

036:162 Rhetorical Strategies of Documentaries 3 s.h.
Rhetorical strategies used in documentary film and video; documentaries as rhetorical acts, use of appeals and rhetorical strategies; nonfiction film in theory and practice. Area: context. Prerequisites: 036:091 and g.p.a. of at least 2.50.

036:165 Introduction to Rhetorical Criticism 3 s.h.
Rhetorical theories, methods, and criticism. Prerequisites: one course from 036:043, 036:044, 036:062, or 036:071, and g.p.a. of at least 2.50.

036:170 Theories of Persuasion 3 s.h.
Persuasion beyond advertisements, political speeches, and sales pitches; persuasion in interpersonal contexts, theories of persuasion examined from three points of view—psychological, social, cultural. Area: theory. Prerequisites: 036:091, one course from 036:060 to 036:075, and g.p.a. of at least 2.50.
For Graduate Students

Graduate students also may take 100-level courses for credit, with approval of their committee.

036:200 Introduction to Research 2 s.h.
Communication studies as a field of scholarship; selection of research problems, major lines of research represented in the department, bibliographical tools for scholarship in the field.

036:201 Issues in Teaching 1 s.h.
Continuation of 036:200; issues, practical tasks, and concerns relevant to effective college or university classroom teaching.

036:210 Introduction to Rhetorics of Inquiry 2-4 s.h.
Practice in invention and arrangement of academic prose through peer criticism; exemplary works, especially at and across disciplinary boundaries. Same as 160:200.

036:220 Rhetorical Criticism 3 s.h.
Approaches to rhetorical analysis of communicative artifacts, acts, events, rhetorical-critical essay writing. Same as 010:230.

036:222 Feminist Cultural Studies 3 s.h.

036:240 Media Criticism 3 s.h.
Focus on television, video.

036:241 Theories of Mass Communication 3 s.h.
Major concepts, theories, schools of thought in media studies, mass communication.

036:242 Studies and Practices of Audio and Video Production 3 s.h.
Introduction to audio and video production; acquisition of a production tool; critical vocabulary; teaching introductory production courses. Prerequisite: advanced graduate standing.

036:270 Health Communication 3 s.h.
Same as 172:240.

036:299 Graduate Independent Study arr.

036:310 Classical Rhetoric 2-4 s.h.

036:311 Modern Rhetoric 2-4 s.h.
History of modernist rhetorical theory in the 20th century; relationships with philosophy, social and physical sciences, cultural change. Same as 008:268.

036:312 Rhetoric and Philosophy 2-4 s.h.
Contemporary philosophical approaches to the study of rhetoric.

036:313 Rhetoric and Argument Theory 2-4 s.h.
Approaches to study of argumentation, key issues at dispute in contemporary conceptualizations of argument.

036:315 Rhetorics of Technology and Technoscience 2-4 s.h.
Survey of technological sites and situations involving technology; rhetorical criticism of technological and technoscience discourses; evaluation and construction of theories about technological discourses and practices. Same as 160:307.

036:316 Foundations for Feminist Inquiry II 3 s.h.
Prerequisite: consent of instructor. Same as 010:201, 131:201.

036:317 Current Issues in Rhetoric 3 s.h.

036:319 Practical Criticism 3 s.h.
Basics of rhetorical criticism; rhetoric as practice or technique; how to read rhetorically; fundamentals (e.g., figuration and tropes, form and genre, voice, style, topoi) and art of rhetorical critique.

036:330 Reading Group 1-2 s.h.
Analysis and discussion of important texts in rhetorical theory and criticism. Repeatable.

036:331 Studies in Language Theory 2-4 s.h.
Semiotics, speech acts, philosophy of language emphasis on their relationship to rhetoric. Same as 008:316.

036:332 Visual Political Rhetoric 1-4 s.h.
Theoretical and critical studies of visual political discourse.

036:334 Seminar: Comparative Disciplinary Rhetorics 2-4 s.h.
Same as 160:505.

036:335 Proseminar: Contemporary Rhetorical Studies 2-4 s.h.
Problems in contemporary rhetorical studies; may include works of Kenneth Burke, Wayne Booth, deconstructionists, feminist theorists and critics, critics of communication technologies.

036:336 Seminar in Rhetorical Theory 1-4 s.h.
Topics in history and development of rhetorical theory, theory construction and application to critical practice. Same as 010:600.

036:339 Seminar: Rhetoric and Culture 1-4 s.h.
Cultural thestes, their utility in accounting for communication practices.

036:340 Media and Modernity 3 s.h.
Survey of classic and contemporary theoretical texts on cultural, social, political, and human consequences of 19th- and 20th-century media.

036:341 Topics in Mass Communication Scholarship 1-3 s.h.
Theory and research on problems in mass communication.

036:343 Rise and Fall of the American TV Networks 3 s.h.
Conditions supporting American television’s 39-year dominance by a commercial broadcast network oligopoly; the oligopoly’s decline; the relationship between such institutional changes and television’s cultural roles.

036:346 The Public Sphere 3 s.h.
Theories, intellectual history, critics, contemporary issues of the public sphere.

036:347 Nationalism as a Communication Process 3 s.h.
Nation building and construction of national identity as a problem in communication history and theory; the nation as a community constructed through discourse, role of the state and other social forces in creating and deploying nationalist discourse.

036:348 Audience Studies 3 s.h.
Tradition of critical, qualitative, and interpretive tradition of media audience research that has developed since the mid-1980s; recent ethnographic studies of audience experiences; institutional and global economic and cultural forces on audiences’ engagement with media.

Undergraduate Programs

Undergraduates majoring in computer science develop competence in programming principles and methodologies, problem-solving techniques, mathematics, and computer systems. Computer science training is critical for many careers in science, engineering, and business.

The department offers both Bachelor of Arts and Bachelor of Science degrees. Of the two, the B.S. program provides more intensive concentration in computer science and greater emphasis in science and mathematics. Students interested in pursuing graduate work in computer science should strongly consider seeking the B.S. The B.A. requires fewer courses in computer science and mathematics, allowing for a wider choice of electives.

Both the B.A. and B.S. provide students with the necessary training for employment in careers such as software development and information management. Students who do not want to pursue a computer science career should consider a computer science minor to gain fundamental knowledge of the use and applications of computers. The department encourages students in both B.A. and B.S. programs to consider adding another major, certificate, or minor to their graduation plans.

Students may declare a major in computer science and be admitted to the department's B.A. or B.S. program at any time on or after admission to the University. After admission to the major, students must maintain a g.p.a. of 2.00 or higher in all course work to receive a degree in computer science. All computer science students are advised at the Academic Advising Center until they have completed 22C:019. Students who are being advised at the advising center also may consult with computer science faculty members.

Transfer students who have taken a course approved as equivalent to one of the computer science courses are exempt from that course. Transfer grades are included in the computer science grade-point average.

Majors should consult the department's Computer Science Undergraduate Student Handbook, available on the department's web site. The handbook details department policies, suggests possible elective areas, and discusses internships, scholarships, and student groups, such as the University's chapter of the Association for Computing Machinery and Women in Computer Science.

Advanced Placement

The Computer Science Advanced Placement Program test can be used to gain credit for elective semester hours. See the Computer Science Undergraduate Student Handbook for more details.

Bachelor of Arts

The B.A. program is designed for students who wish to gain considerable knowledge in computer science and have flexibility in selecting electives. Students preparing for computer careers in business may pursue the B.A., but they are encouraged to supplement the base requirements with additional computer science courses. The flexibility of the program makes it suitable for combination with other majors.

The B.A. requires a minimum of 41 s.h.
All students must complete the College of Liberal Arts and Sciences General Education Program.

Students who are enrolled in the B.A. program but who might switch to the B.S. program should choose their natural science courses carefully; see “Natural Science Sequences” under “Bachelor of Science,” below.

The B.A. program requires the following core courses. They may not be taken pass/nonpass. Students also must take one advanced computer science elective.

**COMPUTER SCIENCE CORE**

All of these:
- 22C:016 Computer Science I: Fundamentals 4 s.h.
- 22C:019 Discrete Structures 3 s.h.
- 22C:021 Computer Science II: Data Structures 4 s.h.
- 22C:022 Object-Oriented Software Development 4 s.h.
- 22C:031 Algorithms 3 s.h.
- 22C:111 Programming Language Concepts 3 s.h.

One of these:
- 22C:060 Computer Organization 3 s.h.
- 055:035 Computer Architecture and Organization 3 s.h.

One of these:
- 22C:112 Operating Systems 3 s.h.
- 22C:113 Introduction to Systems Software 3 s.h.
- 22C:118 Introduction to Networks and Their Applications 3 s.h.

**MATHEMATICS CORE**

Calculus I—one of these:
- 22M:025 Calculus I 4 s.h.

Calculus II—one of these:
- 22M:022 Calculus and Modeling II 4 s.h.
- 22M:026 Calculus II 4 s.h.
- 22M:032 Engineering Mathematics II: Multivariable Calculus 4 s.h.

Linear algebra/probability and statistics—one of these:
- 22M:027 Introduction to Linear Algebra 4 s.h.
- 22M:047 Linear Algebra and Differential Equations for Scientists 3 s.h.
- 22S:039 Probability and Statistics for the Engineering and Physical Sciences 3 s.h.
- 22S:043 Engineering Probability and Statistics 3 s.h.
- 22S:120 Probability and Statistics 4 s.h.

**ADVANCED ELECTIVES**

Bachelor of Arts students must earn at least 3 s.h. in advanced electives.
- 22C:072/22M:072 Elementary Numerical Analysis 3 s.h.
- 22C:096 Topics in Computer Science (with adviser's approval) arr.
- 22C:099 Honors in Computer Science (may be counted once as an advanced course) arr.

Any 100-level computer science course numbered above 22C:110

With instructor's approval, most 22C courses numbered above 200 may be counted as advanced courses.

**Bachelor of Science**

The B.S. program is more rigorous than the B.A. and is designed to give in-depth training for students who may pursue graduate work in computer science. However, the choice between the B.A. or the B.S. should be dictated by students' personal career goals. The B.S. is not required for graduate study, and many students not interested in graduate study may choose the B.S. to enhance their skills and job prospects.

The B.S. requires a minimum of 64 s.h.

All students must complete the College of Liberal Arts and Sciences General Education Program. When chosen carefully, courses that complete the General Education Program natural sciences component also satisfy the Department of Computer Science natural science requirement (see “Natural Science Sequences,” below).

Students complete all department requirements for the B.A. They also must complete an additional mathematics course, a course on computation theory, another computer science elective, two technical electives, and the natural science requirement. These courses cannot be taken pass/nonpass. Students with certain special elective programs may petition for additional courses to be accepted for this requirement.

**COMPUTER SCIENCE CORE**

All of these:
- 22C:016 Computer Science I: Fundamentals 4 s.h.
- 22C:019 Discrete Structures 3 s.h.
- 22C:021 Computer Science II: Data Structures 3 s.h.
- 22C:022 Object-Oriented Software Development 4 s.h.
- 22C:031 Algorithms 3 s.h.
22C:111 Programming Language Concepts 3 s.h.
One of these:
22C:060 Computer Organization 3 s.h.
055:035 Computer Architecture and Organization 3 s.h.
One of these:
22C:112 Operating Systems 3 s.h.
22C:113 Introduction to Systems Software 3 s.h.
22C:118 Introduction to Networks and Their Applications 3 s.h.

MATHEMATICS CORE
Calculus I—one of these:
22M:025 Calculus I 4 s.h.
22M:031 Engineering Mathematics I: Single Variable Calculus 4 s.h.
Calculus II—one of these:
22M:022 Calculus and Modeling II 4 s.h.
22M:026 Calculus II 4 s.h.
22M:032 Engineering Mathematics II: Multivariable Calculus 4 s.h.
Linear algebra—one of these:
22M:027 Introduction to Linear Algebra 4 s.h.
22M:047 Linear Algebra and Differential Equations for Scientists 3 s.h.
Probability and statistics—one of these:
22S:039 Probability and Statistics for the Engineering and Physical Sciences 3 s.h.
22S:043 Engineering Probability and Statistics 3 s.h.
22S:120 Probability and Statistics 4 s.h.
Another probability and statistics course with a calculus prerequisite, approved by a computer science adviser

ADVANCED ELECTIVES
Bachelor of Science students must earn at least 6 s.h. in advanced electives.
22C:072/22M:072 Elementary Numerical Analysis 3 s.h.
22C:096 Topics in Computer Science (with adviser's approval) arr.
22C:099 Honors in Computer Science (may be counted once as an advanced course) arr.
Any 100-level computer science course numbered above 22C:110
With instructor's approval, most 22C courses numbered above 200 may be counted as advanced courses.

COMPUTATION THEORY
One of these:
22C:131 Limits of Computation 3 s.h.
22C:135 Theory of Computation 3 s.h.

TECHNICAL ELECTIVES
Bachelor of Science students must earn 6 s.h. in technical electives. Advanced elective courses in computer science or 100-level courses in any other department, approved by an adviser, can be counted as technical electives. For a list of approved technical electives, visit the Department of Computer Science web site.

NATURAL SCIENCE SEQUENCES
For the B.S., students take two or more courses in a sequence required of majors in a chosen area of natural science. The first course must be a prerequisite or corequisite to the second. This study is intended to enhance the student's perspective by providing a deeper understanding of the scientific method. It is typical, but not required, that these courses be taken in the same science department. This cognate sequence must total at least 7 s.h. Students often choose courses that also complete the General Education Program natural sciences component. Some possible choices are listed below; the computer science adviser may approve others.
CLEP/APP credit may be used to satisfy part or all of the natural science requirement only if the appropriate science department at The University of Iowa accepts the credit as equivalent to one or more of the specific courses listed below.

Astronomy
029:061 General Astronomy 4 s.h.
029:062 General Astronomy 4 s.h.

Biology/Chemistry
002:010 Principles of Biology I 4 s.h.
002:011 Principles of Biology II 4 s.h.
004:011 Principles of Chemistry I 4 s.h.
004:012 Principles of Chemistry II 4 s.h.

Chemistry
004:011 Principles of Chemistry I 4 s.h.
004:012 Principles of Chemistry II 4 s.h.

Geography
044:003 Introduction to Earth Systems Science 4 s.h.
044:005 Foundations of GIS 3 s.h.

Geoscience
012:005 Introduction to Geology 4 s.h.
Introduction to Environmental Science 3 s.h.

Physics
One of these sequences:
029:011-029:012 College Physics 8 s.h.
029:027-029:028 Physics I-II 8 s.h.
029:081-029:082 Introductory Physics I-II (recommended) 8 s.h.

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

Bachelor of Arts

Before the third semester begins: math through calculus I, three courses in the major (e.g., 22C:016, 22C:019, and 22C:021), and at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: math through calculus II, at least two more courses in the major (e.g., 22C:022 and 22C:060), and at least one-half of the semester hours required for graduation

Before the seventh semester begins: at least three more courses in the major and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: at least two more courses in the major

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Bachelor of Science

These checkpoints do not include the required natural science sequence, which students usually complete as part of their General Education Program natural science component.

Before the third semester begins: math through calculus I, three courses in the major (e.g., 22C:016, 22C:019, and 22C:021), and at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: math through calculus II, at least two more courses in the major (e.g., 22C:022 and 22C:060), and at least one-half of the semester hours required for graduation

Before the seventh semester begins: at least three more courses in the major and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: at least two more courses in the major

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Honors

In order to pursue honors study in the Department of Computer Science, students must be members of the University Honors Program, which requires them to maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University Honors Program for more information).

To graduate with honors in computer science, students must complete 4-6 s.h. of 22C:099 Honors in Computer Science and submit an acceptable honors thesis. Students are responsible for finding a faculty member willing to supervise their honors project. The faculty member must approve the proposed project and a timetable for the work. Students register for 22C:099 under the thesis supervisor’s instructor number. See the Computer Science Undergraduate Student Handbook for details. Students may count 3 s.h. of 22C:099 toward an advanced or technical elective for the B.S.

Minor

The minor in computer science requires the following courses, for a minimum of 18 s.h.

22C:016 Computer Science I: Fundamentals 4 s.h.
22C:019 Discrete Structures 3 s.h.
22C:021 Computer Science II: Data Structures 4 s.h.
22C:022 Object-Oriented Software Development 4 s.h.
One computer science elective 3 s.h.

Any computer science course except 22C:001, 22C:002, 22C:104, and 22C:109 may be used as an elective. To avoid regression, 22C:005 may be used as an elective only if taken before 22C:016.
No course accepted toward the minor may be taken pass/nonpass. Students must have a g.p.a. of at least 2.00 on all work attempted in the minor.

Students in electrical and computer engineering who have completed 055:033, 057:017, and 059:006 are considered to have satisfied the requirements for 22C:016 and 22C:022; they receive 8 s.h. of credit toward a computer science minor.

Students may apply a maximum of 6 s.h. of transfer course work toward the minor. Students excused from the minor courses may substitute other computer science electives.

Students apply for a minor in computer science when they apply for a degree.

**Graduate Programs**

The department offers three graduate degree programs: Master of Computer Science (M.C.S.), Master of Science (M.S.), and Doctor of Philosophy (Ph.D.).

The M.C.S. is a non-research, course-based program for students who wish to enhance their careers with advanced knowledge of computer science. The M.S. usually is granted to students working toward the Ph.D., which emphasizes preparation for research, teaching, and scholarly work in academic settings or private, industrial, or government laboratories.

Admission decisions are based on prior academic performance, letters of reference, scores on the Graduate Record Examination, and the applicant's statement about background and purpose. Students need not have a master's degree either to begin the Ph.D. program or to be eligible to receive the Ph.D. A student admitted without a master's degree may choose to receive an M.S. while working toward the doctorate. Most graduate students are admitted to the M.C.S. or Ph.D. programs; direct admission to the M.S. program is rare.

Current and prospective graduate students should consult the Computer Science Graduate Student Handbook, available from the department's office or on its web site. The handbook provides detailed information about specific degree requirements, such as required courses, examinations, and dissertation requirements. For general information about the department, faculty, and research activities, contact the Department of Computer Science or visit its web site.

**Master of Computer Science**

The M.C.S. requires a minimum of 32 s.h. Students must complete at least 26 s.h. at The University of Iowa, including 8 s.h. on campus.

Basic M.C.S. requirements are as follows. Consult the Computer Science Graduate Student Handbook for detailed information about M.C.S. requirements and graduate study policies.

**ALGORITHMS AND THEORY**

One of these:
- 22C:131 Limits of Computation 3 s.h.
- 22C:135 Theory of Computation 3 s.h.
- 22C:231 Design and Analysis of Algorithms 3 s.h.

**SYSTEMS**

One of these:
- 22C:160 High Performance Computer Architecture 3 s.h.
- 22C:162 Advanced Operating Systems 3 s.h.
- 22C:166 Distributed Systems and Algorithms 3 s.h.
- 22C:168 Computer Communications 3 s.h.
- 22C:181 Formal Methods in Software Engineering 3 s.h.
- 22C:185 Programming Language Foundations 3 s.h.
- 22C:186 Introduction to Compiler Construction 3 s.h.

**COLLOQUIUM**

All M.C.S. students earn at least 2 s.h. in 22C:399 Research Seminar: Colloquium Series.

**ELECTIVES**

M.C.S. students fill their remaining 24 s.h. with a combination of computer science graduate courses, reading and project courses, and non-computer science graduate courses approved by their adviser.

Students must take at least six computer science graduate courses (18 s.h.), excluding 22C:190 through 22C:199, 22C:290 through 22C:299, and 22C:390 through 22C:399. They may take only one computer science graduate course (3 s.h.) numbered 22C:190 through 22C:199, 22C:290 through 22C:299, or 22C:390 through 22C:399.

Students may not count computer science graduate courses numbered 22C:101 through 22C:119 toward the elective requirement.
Students may count no more than two non-computer science graduate courses (6 s.h.) of a technical or quantitative nature, approved by their adviser, toward the elective requirement.

**Master of Science**

The M.S. is usually offered only to students working toward a Ph.D. in computer science. Students who are interested primarily in a master's degree and do not intend to pursue a more advanced degree should apply to the M.C.S. program.

**Doctor of Philosophy**

The Ph.D. requires a minimum of 72 s.h., three examinations (qualifying, comprehensive, and final), and a dissertation.

Basic Ph.D. requirements are as follows. Consult the Computer Science Graduate Student Handbook for detailed information about Ph.D. requirements and graduate study policies.

**ALGORITHMS AND THEORY**

Both of these:
- 22C:231 Design and Analysis of Algorithms 3 s.h.
- 22C:135 Theory of Computation 3 s.h.

**BREADTH**

Ph.D. students must complete at least three of the following courses, with at least one course selected from each area (9 s.h.).

- Systems and software:
  - 22C:160 High Performance Computer Architecture 3 s.h.
  - 22C:162 Advanced Operating Systems 3 s.h.
- Networks and distributed systems:
  - 22C:166 Distributed Systems 3 s.h.
  - 22C:168 Computer Communications 3 s.h.
- Programming languages and compilers:
  - 22C:181 Formal Methods in Software Engineering 3 s.h.
  - 22C:185 Programming Language Foundations 3 s.h.
  - 22C:186 Introduction to Compiler Construction 3 s.h.

**PRACTICE**

Ph.D. students must complete at least one course (3 s.h.) with significant practical or implementation-oriented content. Each semester the department designates courses that satisfy this requirement. The following are typical selections.

- 22C:144 Database Systems 3 s.h.
- 22C:145 Artificial Intelligence 3 s.h.
- 22C:151 Computer Graphics 3 s.h.
- 22C:165 Parallel Programming 3 s.h.
- 22C:174 Optimization Techniques 3 s.h.
- 22C:177 High Performance and Parallel Computing 3 s.h.
- 22C:180 Fundamentals of Software Engineering 3 s.h.
- 22C:198 Individual Programming Projects 3 s.h.

**COGNATE AREA**

Ph.D. students are required to select, in consultation with their adviser, a total of 9 s.h. in courses that constitute coherent coverage of an external cognate area. Choices include, but are not limited to, mathematics, statistics, genetics, biology, and engineering disciplines.

**COLLOQUIUM**

Ph.D. students earn at least 4 s.h. in 22C:399 Research Seminar: Colloquium Series.

**ELECTIVES**

Ph.D. students fill their remaining semester hours with a selection of computer science graduate courses (excluding those numbered 22C:101 through 22C:119) and non-computer science graduate courses approved by their adviser.

**QUALIFYING EXAM**

Ph.D. students are required to pass a qualifying examination by the end of their second year of graduate study. Once students select a topic in consultation with their adviser, they are assigned a three-member faculty examination panel by the department. Then they prepare a written prospectus for review by the committee, followed by an oral presentation.

**COMPREHENSIVE EXAM**

The comprehensive examination is an evaluation of the student's mastery of a research area at or near completion of formal course work, and before preparation of the dissertation. The exam may be written, oral, or both, at the department's discretion, and is administered by a faculty committee. The comprehensive exam typically should be completed by the end of the student's third year and no later than the end of the fourth year in the Ph.D. program.

**DISSERTATION**

Each Ph.D. student must write a dissertation, a significant, original contribution to the field of computer science. Once students obtain some
preliminary results and can identify and describe the boundaries of their dissertation, they prepare a written proposal for their committee's review. The dissertation must be prepared in accordance with the format specified in the Graduate College Thesis Manual.

**FINAL ORAL EXAMINATION**

Once the dissertation is complete and has been reviewed by the student's committee, a final oral examination is administered on campus. This examination must take place no sooner than the semester following successful completion of the comprehensive examination and no later than five years after completion of the comprehensive exam.

**Graduate Service Courses**

Competence and exposure to computer science are not only useful, they often are prerequisite to advanced study and research in many disciplines. For most graduate students from other disciplines, an appropriate first course is 22C:104 Introduction to Informatics.

**Courses**

**Primarily for Nonmajors**

Computer science students may not earn degree credit for 22C:104 and 22C:109.

**22C:001 Computer Literacy**

3 s.h.
Computer literacy, nature, uses, limitations of computers and computing, impact of computer technology on society; privacy, ethics, security; overview of computer organization; introduction to applications, including communications, word processing, desktop publishing, spreadsheets, graphics, databases, World Wide Web. Prerequisite: closed to computer science majors and students who have completed 096:070 or a computer science course numbered above 22C:001.

**22C:002 First-Year Seminar**

1-2 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Prerequisite: first- or second-semester standing.

**22C:005 Introduction to Computer Science**

3 s.h.
Broad overview: programming, algorithmic problem solving and analysis, hardware, operating systems, networks, graphics, databases. GE: quantitative or formal reasoning. Prerequisite: closed to students who have completed a computer science course numbered 22C:016 or above.

**22C:104 Introduction to Informatics**

3 s.h.
Fundamentals of computer science: algorithms, complexity, relational databases, systems concepts, programming in Perl. Prerequisite: closed to computer science majors. Same as 185:104.

**22C:109 Programming Languages and Tools**

3 s.h.
Varied programming languages and tools. Prerequisite: a programming course (e.g., 22C:005, 22C:016, or 22C:104) or consent of instructor.

**For Undergraduate Majors and Minors**

**22C:010 Computer Science I: Fundamentals**

4 s.h.
Programming using Java with emphasis on software engineering practice; programming constructs, data types, problem-solving strategies, data structures, object-oriented programming. GE: quantitative or formal reasoning. Prerequisites: 22M:005, and MPT II score of 20 or higher or MPT III score of 10 or higher.

**22C:019 Discrete Structures**

3 s.h.
Mathematical methods used in computer science, including logic, proof techniques (with induction), functions, relations, algorithm analysis, recurrence relations, counting methods, combinatorics, graphs, trees. Prerequisite: grade of C- or higher in 22C:016. Recommended: calculus I.

**22C:021 Computer Science II: Data Structures**

4 s.h.
Design, implementation, and analysis of data structures and algorithms, including linked lists, stacks, queues, hash tables, trees, graphs; complexity analysis; recursion, dynamic data structures. Prerequisite: grade of C- or higher in 22C:016. Pre- or corequisite: 22C:019.

**22C:022 Object-Oriented Software Development**

4 s.h.
Object-oriented design and software development methodology; team programming projects; GUIs, event handling, network programming, concurrency, data representation, UI programming. Prerequisite: grade of C- or higher in 22C:016. Pre- or corequisite: 22C:019.

**22C:031 Algorithms**

3 s.h.
Algorithm design techniques (divide and conquer, dynamic programming, greedy) and analysis techniques (big O notation, recurrence); sorting (merge sort, heap sort, and quick sort); searching (B-trees, AVL trees or red-black trees, hashing); basic graph algorithms (depth-first and breadth-first search, minimum spanning trees, shortest paths); NP-completeness. Prerequisites: grade of C- or higher in 22C:021, and 22M:025 or 22M:031.

**22C:060 Computer Organization**

3 s.h.
Computer building blocks: representing data, computer arithmetic, instruction sets, assembly language, digital logic, control units, ALU design, register organization, IO. Prerequisite: grade of C- or higher in 22C:021.

**22C:072 Elementary Numerical Analysis**

3 s.h.
Computer arithmetic, rootfinding, polynomial approximation, numerical integration, systems of linear equations, ordinary differential equations, use of higher-level computer languages such as Mathematica. Prerequisite: grade of C- or higher in 22M:022 or 22M:026. Same as 22M:072.

**22C:090 Topics in Computer Science**

arr.
Complement to material in other courses. Prerequisite: consent of instructor.

**22C:099 Honors in Computer Science**

arr.
Individual projects. Prerequisites: computer science major, honors standing, and consent of instructor.

**For Advanced Undergraduate Majors**

Computer science graduate students may not earn degree credit for these courses.

**22C:111 Programming Language Concepts**

3 s.h.
Imperative, functional, and logical programming languages, and differences between them; syntax specification, types, control structures, recursion, data abstraction. Prerequisite: grade of C- or higher in 22C:019, 22C:021, and 22C:022.
For Advanced Undergraduate and Graduate Students

22C:112 Operating Systems 3 s.h.
Introduction to modern operating systems, including device control, memory management and addressing, process scheduling, interprocess communication, interrupts, synchronization, security. Prerequisite: grade of C- or higher in 22C:060.

22C:113 Introduction to Systems Software 3 s.h.
Design and implementation of system software, including operating systems and programming support software (assemblers, compilers, linkers, loaders); process, memory, message management. Prerequisite: grade of C- or higher in 22C:060.

22C:118 Introduction to Networks and Their Applications 3 s.h.
Introduction to networks and the development of network applications; basic concepts of network communication; common to applications such as parallel simulation and multiplayer games. Prerequisite: grade of C- or higher in 22C:060.

22C:131 Limits of Computation 3 s.h.
Turing machines, undecidability and complexity: reductions, Cook's theorem and NP-completeness, approximation algorithms and randomized algorithms. Prerequisite: grade of C- or higher in 22C:031 or equivalent.

22C:135 Theory of Computation 3 s.h.
Finite automata; regular sets and expressions; context-free and context-sensitive grammars, their properties; push-down automata; standard, universal, and linear-bounded Turing machines; relationships between formal languages and automata; undecidability and its consequences. Prerequisite: grade of C- or higher in 22C:031 or equivalent.

22C:137 Theory of Graphs 3 s.h.
Connectivity properties, including Euler, Hamilton cycle problems; graph colorings, matchings; characterization of families of graphs such as trees, planar graphs, networks; graph algorithms, their applications. Prerequisite: grade of C- or higher in 22M:027 or equivalent. Same as 22M:152.

22C:144 Database Systems 3 s.h.
Introduction to database systems including querying using SQL, design using ER diagrams, programming using IDB and XML; practice using and developing databases and applications. Prerequisites: grades of C- or higher in 22C:021 and 22C:022 or equivalents.

22C:145 Artificial Intelligence 3 s.h.
Introduction to artificial intelligence covering problem-solving methods, heuristic search, knowledge representation, automated reasoning, planning, game playing, machine learning, and neural networks. Prerequisite: grade of C- or higher in 22C:031 or equivalent.

22C:146 Introduction to Computational Linguistics 3 s.h.
Introduction to computational linguistics with focus on theory and practice of natural language processing and syntactic and semantic analysis. Same as 103:140.

22C:151 Computer Graphics 3 s.h.
Introduction to computer graphics algorithms and techniques, with emphasis on interactive 3-D graphics; coordinate systems and frames, modeling and viewing transformations, rendering, shading, lighting, textures, bump, environment mapping, animation, ray tracing, radiosity. Prerequisites: grades of C- or higher in 22C:031 and 22C:027 or equivalents.

22C:160 High Performance Computer Architecture 3 s.h.
Processor architectures; Von Neumann machine, evolution of instruction set design, RISC and CISC; implementation of instruction set, microprogramming; storage systems—cache, main and secondary memory, virtual memory; I/O organizations; CPU design—instruction, arithmetic pipelines; high performance computers; array and vector processors, shared-memory and distributed-memory multiprocessors; case studies from historic, current architectures. Prerequisite: grade of C- or higher in 22C:112 or 22C:113 or equivalent. Same as 055:132.

22C:162 Advanced Operating Systems 3 s.h.
Operating system support for sequential, concurrent, distributed programming, interprocess communication, synchronization constructs: semaphores, sockets, monitors, remote procedure calls; management, protection of memory, communication resources. Prerequisites: grades of C- or higher in 22C:031, 22C:111, and 22C:112 or 22C:113, or equivalents.

22C:165 Parallel Programming 3 s.h.
Parallel computations: concepts, design, implementation; performance evaluation; concept of process, parallel algorithms, language and architectural support; development, running of parallel programs on available parallel machines. Prerequisite: grade of C- or higher in 22C:112 or 22C:113 or equivalent.

22C:166 Distributed Systems and Algorithms 3 s.h.
Models of distributed systems, program correctness—safety and liveness properties, causality, logical and vector clocks, mutual exclusion, distributed snapshot, leader election, distributed algorithms for graph-theoretic problems, fault-tolerance—masking versus nonmasking types, checkpointing, stabilization, consensus—byzantine generals problem, fault-tolerant broadcast and multicast, management of replicated data. Prerequisite: grade of C- or higher in 22C:162 or 22C:168 or equivalent.

22C:168 Computer Communications 3 s.h.
Networks, ISO model, network topology, data link control; error control; point-to-point networks, local area networks; transport services; wireless networking, internetworking, user services. Prerequisites: 22S:039 or 22S:120, familiarity with C and Unix, and senior or graduate standing in computer science or electrical and computer engineering, or consent of instructor. Same as 055:134.

22C:169 Computer Security 3 s.h.
Mechanism versus policy; authentication, access control, security domains; perimeter security, defense in depth; cryptographic protocols; key management and distribution; security assessment. Prerequisite: grade of C- or higher in 22C:060 or equivalent.

22C:170 Numerical Analysis: Nonlinear Equations and Approximation Theory 3 s.h.
Root-finding for nonlinear equations; polynomial interpolation; polynomial approximation of functions; numerical integration. Prerequisites: 22M:027 and 22M:028, or 22M:037, or 22M:056, computer programming knowledge, or consent of instructor. Same as 22M:170.

22C:171 Numerical Analysis: Differential Equations and Linear Algebra 3 s.h.
Numerical methods for initial value problems for ordinary differential equations; direct and iterative methods for linear systems of equations; eigenvalue problems for matrices. Prerequisites: 22M:027 and 22M:028, or 22M:037, or 22M:056, 22M:100; and computer programming knowledge, or consent of instructor. Same as 22M:171.

22C:174 Optimization Techniques 3 s.h.
Basic theory of optimization, use of numerical algorithms in solution of optimization problems; linear and nonlinear programming, sensitivity analysis, convexity, optimal control theory, dynamic programming, calculus of variations. Prerequisite: 22M:100 or equivalent. Same as 22M:174.

22C:177 High Performance and Parallel Computing 3 s.h.
Parallel scientific computing methods such as parallel algorithms for dense and sparse matrices; implementation using libraries such as MPI, current topics such as grid computing. Prerequisites: a linear algebra course or a numerical analysis course, and a programming language. Same as 22M:178.
For Graduate Students

22C:231 Design and Analysis of Algorithms 3 s.h.
Review of design and analysis techniques; advanced data structures (binomial and Fibonacci heaps, disjoint sets); graph algorithms (network flows, matching, min-cut); NP-completeness, randomization and approximation algorithms; special topics (string matching, computational geometry, number theoretic algorithms). Prerequisite: 22C:031 or 22C:131 or equivalent.

22C:244 Database System Implementation 3 s.h.
Advanced database topics including file organizations, storage management, architectures, query optimization, transaction management, recovery, and concurrency control. Optional topics include distributed databases and integration. Prerequisite: 22C:144 or equivalent.

22C:245 Advanced Artificial Intelligence 3 s.h.
In-depth treatment of one of these: automated deduction (e.g., first-order logic, natural deduction, resolution, model elimination, equational reasoning, search plans for theorem proving, theorem proven design), constraint satisfaction, model construction, planning, AI programming languages and techniques, machine learning, philosophies of machine intelligence. Prerequisite: 22C:145 or equivalent.

22C:251 Advanced Computer Graphics 3 s.h.
Topics such as global illumination and rendering, volume rendering, animation, curves and surfaces, advanced modeling and mapping techniques; graphics hardware, real-time graphics for virtual environments. Prerequisite: 22C:151 or consent of instructor.

22C:253 Algorithms in Discrete Optimization 3 s.h.
Recent progress in discrete algorithms and combinatorial optimization; approximation algorithms, randomized algorithms/sampling, network flow algorithms, LP-based algorithms. Prerequisite: 22C:231 or equivalent.

22C:290 Readings for Research arr.
Prerequisite: Ph.D. candidacy in computer science and consent of instructor.

22C:294 Seminar on Systems and Networks arr.
Prerequisite: consent of instructor.

22C:295 Seminar on Artificial Intelligence arr.
Prerequisite: consent of instructor.

22C:296 Seminar on Computer Science arr.
Prerequisite: consent of instructor.

22C:299 Research for Dissertation arr.
Prerequisite: Ph.D. candidacy in computer science and consent of advisor.

22C:391 Research Seminar: Algorithms 1 s.h.
Research papers in algorithm design and analysis. Repeatable. Prerequisite: 22C:131 or consent of instructor.

22C:394 Research Seminar: Distributed Systems 1-2 s.h.
Distributed systems theory. Repeatable. Prerequisites: 22C:166 and 22C:204, or consent of instructor.

22C:398 Research Seminar: Programming Languages 0 s.h.
Repeatable. Prerequisite: consent of instructor.

22C:399 Research Seminar: Colloquium Series 1 s.h.
Graduate colloquium. Repeatable.
The Department of English offers courses in literature, cultural studies, language, and writing. In these courses, students read poetry, fiction, essays, criticism, and theory to acquire methods for understanding literature and culture. In addition to providing these essential elements of a liberal education, department courses can augment students’ specialized interests in other fields. The department also participates in the interdisciplinary departments and programs in American studies; American Indian and native studies; African American world studies; the Center for the Book; cinema and comparative literature; literature, science, and the arts; and women’s studies.

The department has a strong, long-standing commitment to teaching creative and nonfiction writing.

Although most students in the Ph.D. program are preparing for careers as teachers and scholars, and most in the M.F.A. program are preparing for lives as poets, storytellers, and essayists, the B.A. and M.A. programs provide valuable training for careers in many other fields. Students who have received English degrees from The University of Iowa write for advertising firms, newspapers, and book publishers; teach in primary and secondary schools; practice law and medicine; work in business and industry; and participate in state or federal government. As far as possible, a student’s course of study is arranged to meet his or her individual needs and objectives.

The English program offers courses in literature, film, critical theory, cultural studies, language, and writing. In these courses, students study poetry, fiction, essays, criticism, and theory to acquire methods for understanding the history and significance of texts in the cultures from which they emerge. The program also challenges students to strive for excellence as writers.

Bachelor of Arts

The major in English requires a minimum of 33 s.h. of course work (11 courses). Course work is divided into six areas and three historical periods. The area and historical period fulfilled by
each regularly offered course is identified in the course description (see "Courses" in this section of the Catalog or visit the University's ISIS web site). Information and course lists are also available on the department's web site and from advisers.

At least one course (3 s.h.) from each of the following six areas is required.

- Literary theory and interdisciplinary studies
- Medieval and early modern literature and culture
- Modern British literature and culture
- American literature and culture
- Transnational literature and postcolonial studies
- Nonfiction and creative writing

Each student chooses one of the six areas as a concentration area and takes an additional two courses in that area, for a total of three courses (9 s.h.) in one area, and eight area courses in all.

Students also must take at least two courses from each of the following three historical periods.

- Early literatures through the 17th century
- Eighteenth- and/or 19th-century literature
- Twentieth- and/or 21st-century literature

Since most courses satisfy both an area and a historical period, most students complete the historical period requirements as they complete the area requirements, and are able to choose additional elective course work to complete the major.

Of the 33 s.h. required for the major, 15 s.h. may be transferred from another institution. At least 18 s.h. in the major must be taken in residence at The University of Iowa.

Students who plan to apply to the College of Education for a degree in secondary education (English) should consult with an adviser in that program as early as possible. The education degree demands that students choose particular courses within each of the English major's required categories in order for them to meet state requirements. See "English and Education" in this section of the Catalog.

Students interested in an English major should consult the director of undergraduate studies in the English department office. Visit the Department of English web site for details about the program, faculty, courses, and upcoming events.

**Courses Approved for General Education**

English majors should not use 08G courses to complete the College of Liberal Arts and Sciences General Education Program. Although 08G:001 The Interpretation of Literature is a part of the General Education Program, English majors should substitute a course approved for General Education in the humanities area for 08G:001.

No 08G course can be counted toward the 33 s.h. required for the English major. Creative Writing Studio Workshop (08C:001) cannot be counted toward the English major.

**Four-Year Graduation Plan**

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan.

**Before the third semester begins:** at least one-quarter of the semester hours required for graduation

**Before the fifth semester begins:** at least two courses in the major and at least one-half of the semester hours required for graduation

**Before the seventh semester begins:** at least six courses in the major and at least three-quarters of the semester hours required for graduation

**Before the eighth semester begins:** at least eight courses in the major

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

**Honors**

The English major with honors gives talented students the opportunity to enhance their course of study through special courses and independent study. Each year the department offers five honors proseminars covering a wide range of historical areas and topics.

Students usually complete a four-semester sequence to graduate with honors in English. They must complete 008:098 Honors Proseminar twice, preferably during the junior year, and a senior thesis. Students who wish to count other course work, including study abroad, toward the proseminar requirement must have the honors director's permission. The proseminar requirement must be completed the semester before graduation.

To graduate with honors in English, students must maintain a cumulative University of Iowa g.p.a. of at least 3.33 and an English g.p.a. of at least 3.50.
Ideally, the honors student’s senior year is devoted to the thesis project, written under the supervision of a faculty member. Students may earn up to 6 s.h. of credit for work they carry out for the honors thesis, through a combination of semester hours earned in 008:120 Honors Thesis Workshop and/or 008:198 Undergraduate Honors Project Independent Study. Thesis projects may cover the range of fields offered by the Department of English: literary, theoretical, and cultural studies; nonfiction writing; and creative writing (poetry and fiction).

Students who wish to submit a nonfiction thesis must work under the supervision of a regular faculty member in the Nonfiction Writing Program and must have completed at least one nonfiction writing course above the 100 level. Students who wish to submit a creative thesis in poetry or fiction must work under the supervision of a permanent member of the Writers’ Workshop.

Students interested in more information should contact the director of the English honors program or the director of undergraduate studies. A handout, Guidelines and Deadlines, which details requirements for the final project and specifies deadlines for turning in the prospectus and the final honors project, is available in the Department of English office and the Honors Lounge.

Contact the University Honors Program for more information about honors study at Iowa.

Minor

Before taking courses for the minor, students must complete 08C:001 The Interpretation of Literature.

The minor requires a minimum of 15 s.h. of course work in English, including at least 6 s.h. in the area of literature (courses numbered 008). The other 9 s.h. may be selected from additional courses in literature, courses in writing (08C, 08N) or courses in linguistics (08L). At least 12 s.h. must be from advanced courses; those numbered 008:033 and above, 08C:002 and above, 08N:050 and above, and all 08L courses are considered advanced. Courses designated 08G and 08A do not count toward the minor. Transfer credit and credit by examination are not accepted toward the 12 s.h. of advanced work.

Students must have a g.p.a. of 2.00 or higher in course work taken toward the minor.

No course for the minor may be taken pass/nonpass.

The minor is officially acknowledged and recorded only after the student has completed the application for graduation.

Students who would like assistance in planning to meet requirements for the minor may schedule an appointment with an adviser in the English department; contact the undergraduate English secretary.

Writing for Undergraduates

Many undergraduate students come to The University of Iowa because of the Writers’ Workshop (see “Writing Programs” later in this section of the Catalog). Although the workshop is essentially a graduate program, any student may take the undergraduate courses taught there. These are 08C:023 Creative Writing, 08C:097 Fiction Writing, 08C:098 Poetry Writing, and 08C:001 Creative Writing Studio Workshop, which is approved for General Education in fine arts or humanities but does not count toward the English major.

Admission to the undergraduate workshops in fiction and poetry (08C:163 Undergraduate Writers’ Workshop: Fiction and 08C:166 Undergraduate Writers’ Workshop: Poetry) requires the instructor’s consent. Students who wish to participate in these workshops must submit samples of their poetry or fiction to the Writers’ Workshop office no earlier than a week before registration and no later than the last day of registration for that semester.

Nonfiction writing is also a major area of interest for faculty and students in the department of English. Students may enroll for courses that stress practice in forms of nonfiction writing and for courses that focus on nonfiction literature. Students who wish to participate in 08N:150 Undergraduate Essay Workshop and other courses with special permission requirements should check with the instructor of the course before registering.

Undergraduate majors may concentrate in nonfiction and creative writing with any combination of 08N or 08C courses.

English and Education

Students planning to teach English in secondary schools must complete the requirements for the major in English and gain admission to the Teacher Education Program. Contact the College of Education Office of Teacher Education and Student Services for application forms and information.
COURSE REQUIREMENTS

By the end of the program, students must have taken the following courses.

English (Part of the Undergraduate Major)

One Shakespeare course

Three courses on American literature, one with a focus on cultural studies

Two courses on literature written before 1800

One British literature course

08N:141/07S:155 Approaches to Teaching Writing (area: nonfiction and creative writing) 3 s.h.

08P:182/07S:182 Language and Learning (area: literary theory and interdisciplinary studies) 2-3 s.h.

08P:198/07S:193 Reading and Teaching Adolescent Literature (area: literary theory and interdisciplinary studies) 3 s.h.

One nonfiction or creative writing course (in addition to 08N:141)

Education

07B:180 Human Relations for the Classroom Teacher 3 s.h.

07E:102/07S:102 Technology in the Classroom 2 s.h.

07P:075 Educational Psychology and Measurement 3 s.h.

07S:100 Foundations of Education 3 s.h.

07S:114 Introduction and Practicum: English/Speech 3 s.h.

07S:115 Methods: English 3 s.h.

07S:187 Seminar: Curriculum and Student Teaching 1-3 s.h.

07S:190 Orientation to Secondary Education 0-1 s.h.

07S:191 Observation and Laboratory Practice in the Secondary School 6 s.h.

07S:192 Observation and Laboratory Practice in the Secondary School 6 s.h.

07S:194 Methods: High School Reading 2-3 s.h.

07U:100 Foundations of Special Education 3 s.h.

One college-level mathematics or statistics course

Admission

Applicants to the Teacher Education Program in English must have completed a minimum of 12 s.h. in English before they can be admitted (6G courses do not count toward the 12 s.h.). Applicants must have a University of Iowa g.p.a. and a cumulative g.p.a. of at least 2.70 as well as an English major g.p.a. of at least 3.00. Applicants must submit an application to the College of Education, including PRAXIS I scores, an Iowa criminal history check, letters of recommendation, and proof of a 10-hour preadmission volunteer field experience.

Minor Licensure in English

Students who seek licensure for secondary teaching in fields other than English may seek minor licensure in English. First-year courses in rhetoric, speech, or writing do not count toward this requirement.

The English minor licensure program includes the following course work.

An American literature course

A British literature course

A course in creative or nonfiction writing

An additional English course

07S:115 Methods: English 3 s.h.

07S:194 Methods: High School Reading 2-3 s.h.

08N:141/07S:155 Approaches to Teaching Writing 3 s.h.

08P:182/07S:182 Language and Learning 2-3 s.h.

08P:198/07S:193 Reading and Teaching Adolescent Literature 3 s.h.

While this program meets minimum requirements for licensure, the department recommends that students who want to teach English have considerably more training in the field.

Graduate Programs

The Department of English offers four graduate degrees. The M.F.A. in creative writing and the M.F.A. in nonfiction writing offer advanced courses in writing poetry, fiction, and essays. The M.A. in literary studies introduces students to the professional study of literature, and the Ph.D. prepares them to serve as faculty members at colleges and universities.

Although direct application to the Ph.D. program is generally encouraged, some students consider the M.A. an appropriate step in their professional training. These students may have had an undergraduate major in a different field or may want more preparation for other reasons. Some may intend to complete their studies elsewhere. Students interested in careers in any area of book studies (professional writing, editing, web design, or publishing) may wish to pursue the M.A. as a...
terminal degree, as may teachers seeking to enhance their credentials or students pursuing intellectual growth unrelated to a specific career.

M.A. and Ph.D. students mix freely in graduate courses, share the same access to faculty, and meet the same standards of quality in their work.

Master of Arts in Literary Studies

The M.A. in literary studies requires a minimum of 30 s.h., including 24 s.h. earned in residence at The University of Iowa with a g.p.a. of at least 3.25. Students who wish to transfer to Iowa’s Ph.D. program must complete two semesters or 15 s.h. of course work in literature (whichever comes first) before applying for admission to the doctoral program.

COURSE WORK

Each student must take the following courses at the 200 level or above. Applicable transfer courses must be approved by a faculty adviser.

One course in criticism and theory

Four courses from the following five areas:

- British or American literature and culture before 1500
- British or American literature and culture 1500-1660
- British or American literature and culture 1660-1800
- British or American literature and culture 1800-1900
- British or American literature and culture of the 20th Century

Elective courses constitute half of the total credit for the degree and may be chosen from graduate courses both in and outside the English department. Students may wish to explore opportunities for interdisciplinary study, language study, experience in theory and practice of writing, or specialization in a field of literary scholarship.

Completion of the M.A. requires either a thesis or a portfolio. Students submit a written description of their choice to the director of the program before the semester in which they plan to graduate.

M.A. THESIS

Students who choose to write an M.A. thesis must submit a brief prospectus approved by a thesis director before they register for thesis credit and at least one semester before they submit the thesis. The thesis committee consists of the thesis director, the director of the M.A. program, and one other faculty member. At a final oral examination, the thesis is evaluated by the committee as either satisfactory or unsatisfactory.

A copy of the thesis must be presented to the Graduate College for approval no later than four weeks before the date on which the degree is to be conferred. The final copy of the thesis must be deposited with the Graduate College no later than 10 days before graduation. For detailed information about Graduate College policies, see the Manual of Rules and Regulations of the Graduate College.

THE PORTFOLIO

Students working toward the M.A. in literary studies submit, near the end of their course work, a portfolio of work to the M.A. examination committee, which consists of the director of the M.A. program and two other members. All three read the full portfolio. To pass, the candidate must win a majority vote of the committee members.

Students take the first step toward preparing to submit a portfolio by meeting with the director of the M.A. program to discuss the portfolio and scheduling. Soon after this meeting, and no less than three weeks before the exam date, the student presents to the director a draft of the portfolio’s introductory statement. The director may suggest changes either before or after approving the statement. Once the director approves the statement, the student must provide the director with three copies of the full portfolio at least two weeks before the date of the examination.

The work in the portfolio should demonstrate the student’s knowledge of literature as a broad historical and theoretical inquiry. Students submit approximately 50 pages (12,500 words) of their best work, along with an introductory statement of five to seven pages. The body of the portfolio should contain revised versions of papers originally produced for classes. The introductory statement should explain the contents of the portfolio, contextualize each paper, and give a brief overview of the writing. Students are expected to describe the research methods used in assembling their portfolios and the critical practices that ground their work.
M.A.T. Candidates
The English component of the exam for the M.A.T. program is administered in coordination with the College of Education. M.A.T. students should contact the Department of Teaching and Learning or visit the College of Education website.

Master of Fine Arts (Nonfiction Writing)
The M.F.A. program in nonfiction writing is broadly devoted to literary nonfiction. It is designed primarily for persons who wish to become nonfiction writers, but it also may be appropriate for those who wish to teach, edit, or pursue other activities in the field of nonfiction. Normally, the program takes three years to complete.

The degree requires a total of 48 s.h., including at least 30 s.h. earned in residence at The University of Iowa and 24 s.h. of work in program-designated courses. In addition to the course work, students are required to enroll for at least 4 s.h. and no more than 8 s.h. of credit for the thesis.

Electives may be chosen widely, from courses in the English department as well as any other University departments.

All students in the program are required to write a thesis, which may be a single extended piece of nonfiction, a collection of shorter nonfiction pieces, or a collection of essays. Whatever the project, the thesis is expected to be of publishable quality.

For more information, consult the director of the Nonfiction Writing Program.

Master of Fine Arts (Creative Writing)
The purpose of the M.F.A. program in creative writing is to provide professional guidance and a stimulating environment for students with previous achievement or notable promise in writing poetry or fiction. The flexible requirements include 48 s.h. of graduate credit, earned chiefly in the Writers’ Workshop; a collection of poems or short stories, or a novel; and satisfactory performance on an examination covering modern poetry or fiction.

Doctor of Philosophy
The Ph.D. program is designed as preparation for the teaching, publishing, and administrative service required of college and university faculty members. The degree requires 72 s.h. of graduate credit, including at least 30 s.h. earned in residence at The University of Iowa with a g.p.a. of at least 3.50.

Concentrations are offered in areas such as literary history, literary theory, and cultural studies.

Ph.D. requirements include the following.

Formal admission to candidacy by a vote of the Graduate Steering Committee, usually during the third semester of doctoral study

Course work in any four of the following historical periods:
- British or American literature and culture before 1500
- British or American literature and culture 1500-1660
- British or American literature and culture 1660-1800
- British or American literature and culture 1800-1900
- British or American literature and culture of the 20th century

Three English department seminars taken at The University of Iowa

A comprehensive examination that consists of the following: a portfolio of five scholarly questions based on a period of British and/or American literary history; a review essay and annotated bibliography in a special area of interest; two course syllabi; an article to be submitted for publication; and an introduction to the portfolio that synthesizes its parts in preparation for a two-hour exam

A dissertation

A final examination in defense of the dissertation

All doctoral candidates are encouraged to gain teaching experience, preferably in the College of Liberal Arts and Sciences Department of Rhetoric and in General Education Program literature courses.

For application forms and a complete description of the Ph.D. program, contact the department’s graduate secretary.
Admission

For admission requirements, visit the Department of English web site. Applications for admission are due January 15.

Financial Support

Graduate scholarships, fellowships, and teaching and research assistantships are awarded on a competitive basis. The department strives to support all doctoral students who are in good standing, which requires a University of Iowa g.p.a. of at least 3.50 and full-time student standing.

Financial aid applications are considered only from students who have applied or been admitted to a degree program in the Graduate College. Applications and all necessary supporting material must be submitted by the end of January for the following academic year. Forms are available from the Department of English and the University’s Office of Admissions.

Writing Programs

For the past 69 years, The University of Iowa has been a national leader in virtually all areas of the teaching of writing.

Founded in 1936, the Writers’ Workshop was a pioneer in the field of creative writing. It counts scores of distinguished poets and novelists among its alumni. The workshop provides opportunities for students at all levels to work with outstanding teacher-authors. It also brings numerous prominent authors to campus each year for lectures and readings.

The University of Iowa also leads in nonfiction writing. It is one of the few academic institutions in the nation that offers a full range of graduate course work in this area. It also gives undergraduates the opportunity to pursue a concentration in nonfiction writing. See “Master of Fine Arts (Nonfiction Writing)” and “Writing for Undergraduates” earlier in this section of the Catalog.

Facilities

The University of Iowa Libraries collection is strong in all areas of English and American literature. Partly because of the influence of the Writers’ Workshop, University Libraries has particular strengths in 20th-century fiction and poetry, including manuscript collections of 20th-century authors.

Several periodicals are published under the department’s aegis. The Iowa Review, Walt Whitman Quarterly Review, and Philological Quarterly offer opportunities for especially qualified graduate students to work as research assistants or editorial associates. The Iowa Journal of Cultural Studies, edited by English department graduate students, features creative and scholarly work by students in English and related areas.

The Windover Press, which publishes fine editions of works by contemporary authors, offers qualified students the opportunity to learn the art of fine printing.

The Department of English and the Writers’ Workshop sponsor a rich and extensive series of readings and lectures by poets, fiction writers, and scholars, all open to students in the department.

The Association of Graduate Students in English sponsors social and intellectual events during the year and provides a forum for student opinion. All graduate students in the department are members.

Courses

Individual descriptions for most English courses are not included because content and emphasis may vary considerably from one semester to the next. For detailed descriptions of each semester’s courses, visit the University’s ISIS web site.

Courses for Non-English Majors

08A:015 Writing for Practical Purposes for Non-English Majors 2-3 s.h.
08A:072 Shakespeare for Non-English Majors 3 s.h.
08A:080 Nonfiction Writing for Non-English Majors 3 s.h.
08A:104 Personal Writing for Non-English Majors 3 s.h.
08A:106 Literature and Culture of 20th-Century America for Non-English Majors 3 s.h.
08A:113 Writing for Business and Industry for Non-English Majors 3 s.h.
08A:133 British Novel: Scott to Butler for Non-English Majors 3 s.h.
08A:135 Forms of the Essay for Non-English Majors 3 s.h.
08A:142 Popular Literature for Non-English Majors 3 s.h.
08A:182 Science Fiction for Non-English Majors 3 s.h.
08A:188 Prose by Women Writers for Non-English Majors 3 s.h.
Literature—General Education

All students who seek a degree from the College of Liberal Arts and Sciences, except English majors, must take 08G:001 The Interpretation of Literature as part of the General Education Program. English majors should substitute any course that is approved for General Education in the humanities, except those numbered 08G.

Course 08G:001 (or its equivalent by examination or transfer) is a prerequisite for courses 08G:002 through 08G:015. The pass/nonpass option is available only for students in the Colleges of Nursing and Engineering with consent of the student’s adviser and the instructor. Students must successfully complete the rhetoric requirement before they take 08G courses.

08G:001 The Interpretation of Literature 3 s.h.
Ways of reading; focus on reader, text, contexts; poetry, short fiction, drama, novels; GE: interpretation of literature.

08G:002 Biblical and Classical Literature 3 s.h.
Literatures of ancient cultures—Jewish and Christian, Greek and Roman—that have deeply affected later civilizations; GE: humanities. Prerequisite: 08G:001.

08G:003 Medieval and Renaissance Literature 3 s.h.
English and European poetry, prose, drama circa 400–1700 in dialogue with contemporary concerns; GE: humanities. Prerequisite: 08G:001.

08G:004 Epic and Tragic Literature 3 s.h.
Heroes and heroines as the products of imagination; literary representations of heroes and heroines in differing social and historical situations; how their representation shapes our understanding of heroism; GE: humanities. Prerequisite: 08G:001; closed to students who have taken 08G:012.

08G:005 Literatures of Native American Peoples 3 s.h.
Genres of Native American literature, including oral literature; focus on written literature (fiction, essays, poetry, drama); GE: cultural diversity. Prerequisite: 08G:001. Same as 149:005.

08G:006 Fictions 3 s.h.
Selected masterpieces and recent developments in the art of storytelling in poetry and prose; GE: humanities. Prerequisite: 08G:001.

08G:007 Poetry 3 s.h.
Poetry from major periods of development as well as contemporary verse; emphasis on distinctive language, major formal patterns of poetry; GE: humanities. Prerequisite: 08G:001.

08G:008 Drama 3 s.h.
Pays from a wide range of periods; relationship of text to performance; GE: humanities. Prerequisite: 08G:001.

08G:009 American Lives 3 s.h.
Major works of American literature; GE: humanities. Prerequisite: 08G:001.

08G:011 Literature and Sexuality 3 s.h.
Works from various genres, time periods, cultures that reflect and construct a wide range of sexual identities; GE: cultural diversity or humanities. Prerequisite: 08G:001.

08G:012 Comic and Tragic Literature 3 s.h.
Interrelations of comic and tragic literature, including film and other popular media, and their connection with human experience; comic and tragic forms and their uses in different social and historical situations; GE: humanities. Prerequisite: 08G:001; closed to students who have taken 08G:004.

08G:013 Literatures of Latinos/as in the USA 3 s.h.
Works in English by U.S. authors of Latin American descent; GE: cultural diversity or humanities. Prerequisite: 08G:001.

08G:014 Literatures of the African Peoples 3 s.h.
Works in English by authors of African descent from America, continental Africa, the Caribbean; GE: foreign civilization and culture or humanities. Prerequisite: 08G:001. Same as 120:008.

08G:015 Women and Literature 3 s.h.
Works from various genres and time periods focusing on a wide range of women’s experiences; GE: humanities. Prerequisite: 08G:001.

Literature—Primarily for Undergraduates

English department courses are open to all undergraduates who have satisfied the rhetoric requirement. Undergraduates should complete one or more departmental courses below the 100 level before attempting 100-level courses.

008:001 Modern Fiction 3 s.h.
Area: literary theory and interdisciplinary studies. Period: 20th- and/or 21st-century literature.

008:002 Postmodern Fiction 3 s.h.
Area: literary theory and interdisciplinary studies. Period: 20th- and/or 21st-century literature.

008:008 Classical and Biblical Literature 3 s.h.
Area: medieval and early modern literature and culture. Period: early eras through 17th century.

008:011 Films and Screenplays 3 s.h.

008:031 Introduction to Cultural Studies 3 s.h.
Area: literary theory and interdisciplinary studies. Period: 20th- and/or 21st-century literature.

008:033 Introduction to Criticism and Theory 3 s.h.

008:034 Introduction to the Novel 3 s.h.
Area: literary theory and interdisciplinary studies. Period: 20th- and/or 21st-century literature.

008:035 Introduction to Poetry 3 s.h.
Area: literary theory and interdisciplinary studies. Period: 20th- and/or 21st-century literature.

008:036 Introduction to the Short Story 3 s.h.
Area: literary theory and interdisciplinary studies. Period: 20th- and/or 21st-century literature.

008:037 Introduction to Drama 3 s.h.
Area: literary theory and interdisciplinary studies. Period: 20th- and/or 21st-century literature.

Nonfiction and Creative Writing

Copurses 08N:080, 08N:119, 08N:130, 08N:135, 08N:150, and 08N:155 may be repeated. Others may be repeated with consent of the instructor and the director of undergraduate studies.

08C:023 Creative Writing 3 s.h.
Guidance in the process of writing fiction and poetry; writing as exploration; development of students' critical skills as readers; application of new knowledge and skills to students' own writing. Period: 20th- and/or 21st-century literature.

08C:097 Fiction Writing 3 s.h.
Analysis of works of accomplished fiction writers; critique of class members' short stories, in writing and in class; discussion of how class members use language, characterization, point of view, other elements of fiction in their work. Period: 20th- and/or 21st-century literature.

08C:098 Poetry Writing 3 s.h.
Careful writing of poems, reading of poetry by class members as well as established poets; supportive workshop context. Period: 20th- and/or 21st-century literature.

08C:163 Undergraduate Writers' Workshop: Fiction arr.
Period: 20th- and/or 21st-century literature. Prerequisite: consent of instructor.

08C:166 Undergraduate Writers' Workshop: Poetry arr.
Period: 20th- and/or 21st-century literature. Prerequisite: consent of instructor.

08N:020 Introduction to Nonfiction Writing 3 s.h.
Period: 20th- and/or 21st-century literature.

08N:050 Word Power: Building English Vocabulary 3 s.h.
Period: 20th- and/or 21st-century literature. Same as 20E:050.

08N:080 Nonfiction Writing 3 s.h.
Period: 20th- and/or 21st-century literature.

08N:090 Intermediate Nonfiction Writing 3 s.h.
Period: 20th- and/or 21st-century literature.

08N:094 Nature Writing for Interdisciplinary Audiences 3 s.h.
Period: 20th- and/or 21st-century literature. Same as 012:094.

08N:102 Prose Style 3 s.h.
Period: 20th- and/or 21st-century literature.

08N:104 Personal Writing 3 s.h.
Period: 20th- and/or 21st-century literature.

08N:113 Writing for Business and Industry 3 s.h.
Period: 20th- and/or 21st-century literature.

08N:119 Writing for Interdisciplinary Audiences 3 s.h.

08N:120 Advanced Nonfiction Writing 3 s.h.
Period: 20th- and/or 21st-century literature.

08N:125 Freelance Reporting and Writing 4 s.h.
Period: 20th- and/or 21st-century literature. Same as 019:125.

08N:130 Forms of Nonfiction 3 s.h.
Period: 20th- and/or 21st-century literature.

08N:133 Advanced Writing for Business 3 s.h.
Period: 20th- and/or 21st-century literature.

08N:135 Forms of the Essay 3 s.h.
Period: 20th- and/or 21st-century literature.

08N:141 Approaches to Teaching Writing 3 s.h.
Period: 20th- and/or 21st-century literature. Same as 07S:155.

08N:145 Multimedia Writing 3 s.h.
Period: 20th- and/or 21st-century literature.

08N:150 Undergraduate Essay Workshop arr.
Period: 20th- and/or 21st-century literature. Prerequisite: consent of instructor.

08N:155 Undergraduate Nonfiction Workshop 3 s.h.
Period: 20th- and/or 21st-century literature. Prerequisite: consent of instructor.

08N:183 Invention 3 s.h.
Period: 20th- and/or 21st-century literature. Same as 160:183.

08N:192 Dublin Writing Workshop 3 s.h.
Period: 20th- and/or 21st-century literature.

08N:199 Undergraduate Project in Nonfiction Writing arr.
Period: 20th- and/or 21st-century literature.

Special Topics

These courses do not fulfill area or period requirements for the English major. They may be used to earn elective credit in the major.

Nonfiction Writing

Courses 08N:250, 08N:255, 08N:262, 08N:350, and 08N:355 may be repeated. Others may be repeated with consent of the instructor and the director of graduate studies.

Practice in Writing

These courses give intensive attention to composition and exposition and to formal and thematic problems, both in the meditative essay and in extended works of nonfiction.

Theory and Practice of Writing

These courses combine theory and analysis of nonfiction writing with practical experimentation in writing. They are intended for people who want to practice, criticize, and/or teach nonfiction writing.

Independent Study

The following courses offer theoretical and practical training for those who plan to teach.

Professional Training

The following courses offer theoretical and practical training for those who plan to teach.

Independent Study

The following courses offer theoretical and practical training for those who plan to teach.
Creative Writing

All may be repeated except 08C:001.

General Education

08C:001 Creative Writing Studio Workshop 3 s.h.
Experience reading and writing fiction, poetry, and literary nonfiction in a workshop setting; study of published work and critical discussion from a writer's standpoint; critique of class members' work. GE: fine arts or humanities.

Workshops and Seminars

Open only to Writers' Workshop students or to others with consent of instructor.

08C:251 Fiction Workshop arr.
08C:252 Poetry Workshop arr.
08C:270 Form of Fiction 3 s.h.
08C:275 Form of Poetry 3 s.h.
08C:297 Fiction Writing 3 s.h.
Reading and discussion of published stories and those written by class members, with the aim of improving writing through careful reading and reflection, spirited discussion, and written comments. Repeatable.

08C:298 Poetry Writing 3 s.h.
Careful writing and reading of poems by students as well as by established poets; thorough discussion in a supportive context. Repeatable.

08C:490 Seminar: Problems in Modern Fiction arr.
08C:495 Seminar: Problems in Modern Poetry arr.
08C:496 The Poetics of the Book 3 s.h.
Role of the book in literature and culture. Prerequisite: B.A. or consent of instructor. Same as 108:496.

Independent Study

08C:195 Undergraduate Project in Creative Writing arr.
08C:555 Graduate Project in Creative Writing arr.
08C:590 M.F.A. Thesis arr.

Translation Studies

08W:079 Undergraduate Translation Workshop 3 s.h.
Same as 048:079.

08W:260 Translation Workshop 1-3 s.h.
Same as 048:260, 181:260.

08W:265 Seminar: Issues in the History of Translation 3 s.h.
Same as 048:270.
**Environmental Sciences**

**Academic coordinator:** Stephen D. Hendrix  
**Executive committee chair:** C. Thomas Foster Jr.  
**Undergraduate degree:** B.S. in Environmental Sciences  
**Web site:** [http://www.uiowa.edu/~envsci](http://www.uiowa.edu/~envsci)

The Environmental Sciences Program provides strong and rigorous interdisciplinary training in the scientific aspects of environmental study. Because it promotes the understanding of Earth as a complex network of interacting organic and inorganic systems, the environmental sciences major demands that students acquire a solid foundation of knowledge in the sciences. It also requires that they attain a thorough grounding in mathematics so that they will have the basic tools to use scientific data necessary for understanding earth systems.

The major draws on the diversity in the broad field of environmental sciences and the disciplinary strengths of the College of Liberal Arts and Sciences to offer four tracks: geosciences, biosciences, chemical sciences, and hydrosciences. Each track focuses on an aspect of environmental sciences, with the aim of preparing scientists to tackle problems whose solutions require particular areas of expertise:

- **Geosciences track**—earth materials and surficial geologic processes;
- **Hydrosciences track**—hydrogeology and hydrogeologic systems, and water chemistry;
- **Chemical sciences track**—environmental systems and chemistry; and
- **Biosciences track**—biological systems and ecological approaches.

Students are assigned an adviser who specializes in their track. The Department of Geoscience is the administrative home for the Environmental Sciences Program.

**Bachelor of Science**

Students majoring in environmental sciences must complete requirements in three areas: a science and mathematics foundation that provides the basic comprehension students need to complete the rigorous degree requirements; an earth systems foundation that develops students' comprehensive knowledge of earth surface physical and biotic systems as well as the skills they will need for employment or future graduate study; and one of the four tracks providing a focus in one area of environmental science.

Students must complete the College of Liberal Arts and Sciences General Education Program. Courses required for the major in environmental sciences also can be used to complete the General Education Program.

**SCIENCE AND MATHEMATICS FOUNDATION**

Students must complete at least 34 s.h. of course work in this area, including the following.

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>

Tracks

All environmental sciences majors must choose one of the four tracks in the major. Each track requires additional general sciences courses, track foundation courses, field courses, and electives.

ENVIRONMENTAL GEOSCIENCES (BROWN) TRACK

The environmental geosciences track provides training for entry-level positions that require a basic understanding of geological principles and a working knowledge of basic geologic concepts applied in the environmental industry. It also lays a strong foundation for graduate study in environmental geology, engineering geology, and natural hazards assessment. The environmental geosciences track requires 34 s.h.

General Science
029:008 Basic Physics 4 s.h.

Students are strongly encouraged to take additional work in physics.

Environmental Geosciences Foundation
012:041 Mineralogy 4 s.h.
012:052 Petrology 4 s.h.
012:092 Structural Geology 4 s.h.
012:136 Soil Genesis and Geomorphology 3 s.h.
012:179 Engineering Geology 3 s.h.

Environmental Geosciences Field Study
012:093 Geologic Field Methods 2 s.h.
012:194 Environmental Field Methods 3 s.h.

Environmental Geosciences Electives
At least 9 s.h. from these:
*06E:133 Environmental and Natural Resource Economics 3 s.h.
012:114 Energy and the Environment 3 s.h.
012:149 Elements of Geochemistry 3 s.h.
012:152 Isotope Geochemistry 3 s.h.
012:161 Stratigraphy 3 s.h.
012:166 Hydrogeology 3 s.h.
012:172 Glacial and Pleistocene Geology 3 s.h.
012:178 Applied Geostatistics 3 s.h.
012:180 Principles of Geophysics 3 s.h.
012:184 Groundwater Modeling 3 s.h.
012:191 Geotectonics 3 s.h.
044:101 Climatology 3 s.h.
*044:122 Environmental Conservation in the United States 3 s.h.
*044:125 Environmental Impact Analysis 4 s.h.
044:126 Wetlands: Function, Geography, and Management 3 s.h.
044:129 Water Resources Management 3 s.h.
053:050 Natural Environmental Systems 3 s.h.
053:071 Principles of Hydraulics 3 s.h.
053:152 Environmental Chemistry I 3 s.h.
053:153 Environmental Chemistry Laboratory 3 s.h.
053:154 Environmental Microbiology 3 s.h.
053:179 Hydroclimatology 3 s.h.

*No more than one of these policy courses may be included in the 9 s.h.

ENVIRONMENTAL HYDROSCIENCES (BLUE) TRACK

The environmental hydrosciences track provides training for entry-level positions that require a simple understanding of geological principles and a working knowledge of hydrogeology and hydrogeochemistry. It also prepares students for graduate education in hydrogeology, hydrology, geochemistry, and aqueous chemistry. The environmental hydrosciences track requires 34 s.h.

General Science
029:011-029:012 College Physics 8 s.h.

Environmental Hydrosciences Foundation
Both of these:
012:138 Fluvial Geomorphology 3 s.h.
012:166 Hydrogeology 3 s.h.

One of these:
012:149 Elements of Geochemistry 3 s.h.
053:152 Environmental Chemistry I 3 s.h.

Environmental Hydrosciences Field Study
012:194 Environmental Field Methods 3 s.h.

Students also must complete the OSHA training program for hazardous waste site workers.

Environmental Hydrosciences Electives
At least 11 s.h. from these:
*06E:133 Environmental and Natural Resource Economics 3 s.h.
012:161 Stratigraphy 3 s.h.
012:178 Applied Geostatistics 3 s.h.
012:179 Engineering Geology 3 s.h.
012:180 Principles of Geophysics 3 s.h.
012:184 Groundwater Modeling 3 s.h.
044:101 Climatology 3 s.h.
*044:122 Environmental Conservation in the United States 3 s.h.
*044:125 Environmental Impact Analysis 4 s.h.
044:126 Wetlands: Function, Geography, and Management 3 s.h.
044:129 Water Resources Management 3 s.h.
053:050 Natural Environmental Systems 3 s.h.
053:071 Principles of Hydraulics 3 s.h.
053:152 Environmental Chemistry I 3 s.h.
053:153 Environmental Chemistry Laboratory 3 s.h.
053:154 Environmental Microbiology 3 s.h.
053:179 Hydroclimatology 3 s.h.

*No more than one of these may be included in the 11 s.h.
The environmental chemical sciences track provides training for entry-level positions that require a basic understanding of chemical principles and a working knowledge of basic chemical concepts as applied in the environment. It also provides a strong foundation for graduate or professional training in environmental chemistry. The environmental chemical sciences track requires 37 s.h.

**General Sciences**

One of these sequences:

029:011-029:012 College Physics 8 s.h.
029:081-029:082 Introductory Physics I-II 8 s.h.

**Environmental Chemical Sciences Foundation**

004:111-004:112 Analytical Chemistry I-II 6 s.h.
One of these sequences:

004:121-004:122 Organic Chemistry I-II for Majors 6 s.h.
004:123-004:124 Organic Chemistry I-II 6 s.h.
One of these:

004:131 Physical Chemistry I 3 s.h.
004:132 Physical Chemistry II 3 s.h.

**Field and Laboratory Courses**

004:140 Organic Chemistry Lab 3 s.h.
004:143 Analytical Measurements 3 s.h.

**Environmental Chemical Sciences Electives**

At least 8 s.h. from these:

004:125 Inorganic Chemistry 2 s.h.
004:131 Physical Chemistry I (if not taken as a foundation course) 3 s.h.
or
004:132 Physical Chemistry II (if not taken as a foundation course) 3 s.h.
004:162 Undergraduate Research 1-3 s.h.
004:173 Atmospheric and Environmental Chemistry 3 s.h.
*06E:133 Environmental and Natural Resources Economics 3 s.h.
012:149 Elements of Geochemistry 3 s.h.
012:152 Isotope Geochemistry 3 s.h.
012:195 Field Methods: Environmental Processes 3 s.h.
044:101 Climatology 3 s.h.
*044:122 Environmental Conservation in the United States 3 s.h.
*044:125 Environmental Impact Analysis 4 s.h.
053:152 Environmental Chemistry I 3 s.h.
053:153 Environmental Chemistry Lab 3 s.h.
053:252 Environmental Chemistry II 3 s.h.
099:110 Biochemistry 3 s.h.

*Only one of these policy courses may be counted as part of the 8 s.h. of electives.

Students may petition the chemistry department’s environmental science adviser to use appropriate 100- and 200-level courses taught in the chemistry department as electives.

**ENVIRONMENTAL BIOSCIENCES (GREEN) TRACK**

The environmental biosciences track provides the essential skills for entry-level positions that require a good knowledge of biotic systems and the ability to inventory biologic resources. It also provides a strong foundation for graduate or professional training in disciplines such as ecology, wildlife management, and natural resource management. The environmental biosciences track requires 33-35 s.h.

**General Science**

002:121 Organic Chemistry I 3 s.h.

Students are encouraged to take at least one semester of physics.

**Environmental Biosciences Foundation**

002:128 Fundamental Genetics 4 s.h.
002:131 Evolution 4 s.h.

At least 7 s.h. from these:

00L:102 Plant-Animal Interactions 4 s.h.
00L:105 Plant Taxonomy 4 s.h.
00L:115 Field Mycology 4 s.h.
00L:117 Ecology and Systematics of Diatoms 4 s.h.
00L:128 Fish Ecology 4 s.h.
00L:129 Vertebrate Ecology 4 s.h.
002:100 Plant Diversity and Evolution 4 s.h.
002:107 Invertebrate Biology 4 s.h.
002:108 Vertebrate Zoology 4 s.h.
002:113 Ecological Plant Anatomy 4 s.h.
002:136 Conservation Biology 4 s.h.
002:140 Systematics 2-3 s.h.
012:122 Evolution of the Vertebrates 3 s.h.

**Environmental Biosciences Field Study**

The minimum requirement is 7 s.h., with at least 3 s.h. from the field methods courses.

**Field methods:**

00L:103 Aquatic Ecology 4 s.h.
00L:121 Plant Ecology 4 s.h.
00L:122 Prairie Ecology 4 s.h.
00L:144 Ecosystems of North America 4 s.h.
00L:160 Restoration Ecology 4 s.h.
00L:163 Conservation Biology 4 s.h.
002:136 Conservation Biology 4 s.h.
002:148 Field Ecology 4 s.h.

Field organismal courses:
00L:102 Plant-Animal Interactions 4 s.h.
00L:105 Plant Taxonomy 4 s.h.
00L:115 Field Mycology 4 s.h.
00L:117 Ecology and Systematics of Diatoms 4 s.h.
00L:128 Fish Ecology 4 s.h.
00L:129 Vertebrate Ecology 4 s.h.

Environmental Biosciences Electives
The minimum requirement is 8 s.h., with at least 5 s.h. from the following (3 s.h. may be chosen from the field methods or field organismal courses).
002:087 Spring Flora 3 s.h.
002:103/044:103 Biogeography 2-3 s.h.
002:110 Plant Physiology 3-4 s.h.
002:113 Ecological Plant Anatomy 4 s.h.
002:124 Animal Physiology 3 s.h.
002:140 Systematics 2-3 s.h.
002:143 Animal Behavior 4 s.h.
002:199 Introduction to Research 3 s.h.
004:111 Analytical Chemistry I 3 s.h.
004:112 Analytical Chemistry II 3 s.h.
*06E:133 Environmental and Natural Resource Economics 3 s.h.
012:108 Introduction to Oceanography 2 s.h.
012:121 Principles of Paleontology 3 s.h.
012:173 Quaternary Environments 3 s.h.
22S:148 Intermediate Statistical Methods 4 s.h.
044:101 Climatology 3 s.h.
*044:122 Environmental Conservation in the United States 3 s.h.
044:123 Landscape Ecology 3 s.h.
*044:125 Environmental Impact Analysis 4 s.h.
044:126 Wetlands: Function, Geography, and Management 3 s.h.

*Only one of these policy courses may be included in the 8 s.h.

Four-Year Graduation Plan
The Four-Year Graduation Plan is not available for environmental sciences. Students work with their advisers on individual graduation plans.

Honors
Environmental sciences students who wish to graduate with honors must be members of the University Honors Program, which requires students to maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University Honors Program for more information).

Requirements for the B.S. with honors in environmental sciences include a research project that culminates in an honors thesis. Students should join the honors program early to ensure that they have adequate time to complete the research project.

Before beginning the research, students must find a faculty research sponsor from one of the Environmental Sciences Program’s four participating departments (biological sciences, chemistry, geology, and geoscience). Honors students usually spend two or more semesters working on the research under the guidance of their faculty research sponsor, with enrollment in 002:196, 004:162, 012:119, or 044:195. Then they write an honors thesis based on their research. The thesis must be submitted before classes end in the student’s last semester before graduation.

Students work with their faculty research sponsor to determine the format, length, and content of the honors thesis as well as the number of semester hours the student will earn for the honors research.

Students must notify the environmental sciences honors adviser of their intent to graduate with honors by the eighth week of the semester before they graduate.

Courses
159:008 Introduction to Environmental Science 3-4 s.h.
Biological and physical character of the Earth; interaction of humans with the environment, including impacts on ecosystems, climate, natural processes, resources; alternative options, including sustainability, waste management, energy, land reform. GE: natural sciences. Same as 012:008.
159:009 Introduction to Environmental Sciences Laboratory 1 s.h.
GE: natural sciences. Same as 012:009.
159:100 Environmental Sciences Seminar 0-1 s.h.
Role of sciences in environmental issues and problems; progression from observation to evaluation to design of better questions and experiments. Prerequisite: environmental sciences major.
159:102 Earth Surface Processes 3 s.h.
Basic geophysical, environmental processes that shape the earth’s surface; emphasis on weathering—mass movement (creep, landslides, earth flow), erosion, transport, deposition by fluid agents (wind, water, ice); methods used to study these processes. Prerequisite: 012:005 or 012:008 or 044:003 or 159:008 or consent of instructor. Same as 024:102.
159:110 Introduction to Applied Remote Sensing 4 s.h.
Remote sensing of the earth’s surface from aircraft, satellites, aerial photograph interpretation, remote sensing systems, methods, data analysis using electromagnetic spectrum and digital processing techniques, including ultraviolet, visible, infrared, microwave radiation; remote sensing applied to geologic and environmental problems. Same as 012:110.
159:134 Ecology  4 s.h.
Adaptations of organisms to their physical, biological environments; organism/environment interactions; population biology; interactions between species; ecology of communities, ecosystems; human impact on ecosystems. Prerequisites: 002:010, 002:011, 22M:025, and environmental sciences major. Same as 002:134.

159:153 Geocomputing  1-3 s.h.
Computer applications in geology; visualization, data management, interactive modeling, computer graphics. Same as 012:153.

159:194 Environmental Field Methods  3 s.h.
Same as 012:194.
The Department of Exercise Science offers undergraduate and graduate programs in exercise science. Graduate students may choose from five different areas of specialization for the M.S. with thesis, and from four different areas for the Ph.D. The department also offers an undergraduate major in athletic training, in conjunction with the Department of Orthopaedics and Rehabilitation in the Carver College of Medicine.

**Undergraduate Programs**

**Bachelor of Science in Exercise Science**

The Bachelor of Science program is designed primarily for individuals who intend to continue their education beyond the B.S. in the health professions, including medicine, dentistry, optometry, physician assistant, physical therapy, and podiatry, or for those who intend to pursue graduate degrees in basic sciences related to the health care professions.

The exercise science major includes study in anatomy, biomechanics, integrative physiology, neural control of movement, and the cognate areas of biology, chemistry, mathematics, physics, and statistics.

Qualifications for admission to exercise science include completion of the following courses, with a g.p.a. of 3.00 or higher:

- 002:010 Principles of Biology I 4 s.h.
- 004:011 Principles of Chemistry I 4 s.h.

One of these:
- 22M:016 Calculus for the Biological Sciences 4 s.h.
- 22M:025 Calculus I 4 s.h.

A more advanced calculus course

One of these:
- 010:001-010:002 Rhetoric I-II 8 s.h.
- 010:003 Accelerated Rhetoric 4 s.h.

Students also must have maintained a g.p.a. of 2.75 or higher in all course work taken at The University of Iowa.

Students denied admission to the major may reapply in a subsequent semester.

**GENERAL EDUCATION COURSES**

The department recommends that candidates for the B.S. in exercise science complete the College of Liberal Arts and Sciences General Education Program natural sciences component by taking 004:011-004:012 Principles of Chemistry I-II and 002:010 Principles of Biology I. It also recommends completing the General Education Program social sciences component with 031:001 Elementary Psychology. Transfer credit for course work in the major requires the approval of the undergraduate academic adviser.

**EXERCISE SCIENCE REQUIREMENTS**

All of these:

- 027:130 Human Physiology 3 s.h.
- 027:141 Exercise Physiology 3 s.h.
- 027:142 Exercise Physiology Laboratory 2 s.h.
- 027:150 Gross Anatomy for Exercise Science 2 s.h.
- 027:151 Gross Anatomy Lab for Exercise Science 2 s.h.
027:160 Motor Control I: Neurophysiological Basis 3 s.h.  
027:197 Biomechanics of Human Motion 4 s.h.  
At least three of these:  
027:096 Special Projects arr.  
027:117 Human Growth and Motor Development 3 s.h.  
027:145 Cardiovascular Physiology 3 s.h.  
027:146 Molecules to Malady 3 s.h.  
027:153 Embryology and Connective Tissue Anatomy 2 s.h.  
027:155 Skeletal Muscle Biology 3 s.h.  
027:196 Exercise Science Senior Seminar 3 s.h.  
027:200 Problems arr.  
103:028 English Grammar 3 s.h.  

REQUIREMENTS IN OTHER SUBJECTS (COGNATES)  
The biology, chemistry, and mathematics listings below include courses that are prerequisites for admission to the major.  

Biology  
Total of at least 12 s.h.  
002:010-002:011 Principles of Biology I-II 8 s.h.  
At least 4 s.h. from these:  
002:108 Vertebrate Zoology 4 s.h.  
002:114 Cell Biology 3 s.h.  
002:124 Animal Physiology 3 s.h.  
002:128 Fundamental Genetics 4 s.h.  
002:143 Animal Behavior 4 s.h.  
002:150 Endocrinology 3 s.h.  
002:155 Cell Physiology 4 s.h.  
002:180 Fundamental Neuroscience 4 s.h.  
002:181 Neurophysiology 3 s.h.  
061:157 General Microbiology 5 s.h.  
099:110 Biochemistry 3 s.h.  
099:120 Biochemistry and Molecular Biology I 3 s.h.  
099:130 Biochemistry and Molecular Biology II 3 s.h.  
099:140 Experimental Biochemistry 4 s.h.  

Chemistry  
Total of at least 8 s.h.  
004:011-004:012 Principles of Chemistry I-II 8 s.h.  
These additional courses are highly recommended.  
004:121 Organic Chemistry I 3 s.h.  
004:122 Organic Chemistry II 3 s.h.  
004:141 Organic Chemistry Laboratory 3 s.h.  

Mathematics  
At least 4 s.h. from these:  
22M:016 Calculus for the Biological Sciences 4 s.h.  
22M:025 Calculus I 4 s.h.  

22M:031 Engineering Mathematics I: Single Variable Calculus 4 s.h.  
A more advanced calculus course  

Physics  
One of these sequences:  
029:011-029:012 College Physics I-II 8 s.h.  
029:081-029:082 Introductory Physics I-II 8 s.h.  

Statistics  
At least 3 s.h. from these:  
07P:143 Introduction to Statistical Methods 3 s.h.  
22S:101 Biostatistics 3 s.h.  
22S:102 Introduction to Statistical Methods 3 s.h.  
171:161 Introduction to Biostatistics 3 s.h.  

RECOMMENDED ELECTIVES  
It is recommended that students choose from the following electives in order to complete the 120 s.h. required for a B.S. in the College of Liberal Arts and Sciences. Courses in biology and chemistry also are listed under “Requirements in Other Subjects (Cognates).”  

Anthropology  
113:190 Human Osteology 3 s.h.  

Biochemistry  
099:110 Biochemistry 3 s.h.  
099:120 Biochemistry and Molecular Biology I 3 s.h.  
099:130 Biochemistry and Molecular Biology II 3 s.h.  
099:140 Experimental Biochemistry 4 s.h.  

Biology  
002:108 Vertebrate Zoology 4 s.h.  
002:114 Cell Biology 3 s.h.  
002:124 Animal Physiology 3 s.h.  
002:128 Fundamental Genetics 4 s.h.  
002:143 Animal Behavior 4 s.h.  
002:150 Endocrinology 3 s.h.  
002:155 Cell Physiology 4 s.h.  
002:180 Fundamental Neuroscience 4 s.h.  
002:181 Neurophysiology 3 s.h.  

Chemistry  
004:111 Analytical Chemistry I 3 s.h.  
004:112 Analytical Chemistry II 3 s.h.  
004:121 Organic Chemistry I 3 s.h.  
004:122 Organic Chemistry II 3 s.h.  
004:131 Physical Chemistry 3 s.h.  
004:141 Organic Chemistry Laboratory 3 s.h.  

150 College of Liberal Arts and Sciences
# Bachelor of Science in Athletic Training

Athletic trainers work with physically active individuals, including athletes, to help prevent injuries, offer advice about appropriate equipment, recognize and evaluate injuries, administer emergency treatment, and determine need for specialized medical care. Athletic trainers also work as part of health care teams involved in rehabilitation after injuries sustained in sports or physical activity.

The B.S. in athletic training provides concentrated studies and clinical experiences leading to national certification in athletic training. Employment opportunities for graduates include work as health care professionals for sports medicine clinics and hospitals. Additional education usually is required for employment with professional teams as well as for university, college, and secondary school athletic teams. Teacher certification is recommended but not required.

Students who have not formally contacted the athletic training program director before enrolling at The University of Iowa should talk to an athletic training adviser or their academic adviser upon entering the University. Early advising for course selection is vital since prerequisite courses and sequenced skill development must be completed along with general education course work. Students should begin taking prerequisites for required major courses during their first year and should complete their final prerequisites after admission to the athletic training major. For current information on rules, procedures, and curriculum, contact the athletic training program director.

## PREREQUISITE FOR APPLICATION

**027:096 Special Projects**

## PREREQUISITES FOR COURSE WORK IN THE MAJOR

Total of 37-39 s.h.

One of these:

- **002:002 Introductory Animal Biology** | 4 s.h. |
002:010 Principles of Biology I 4 s.h.
One of these sequences:
004:007-004:008 General Chemistry I-II 6 s.h.
004:011-004:012 Principles of Chemistry I-II 8 s.h.
One of these:
029:008 Basic Physics 4 s.h.
029:011 College Physics I 4 s.h.
All of these:
07P:025 Elementary Statistics and Inference 3 s.h.
07P:075 Educational Psychology and Measurement 3 s.h.
027:053 Human Anatomy 3 s.h.
027:056 First Aid and CPR (or community certifications) 2 s.h.
027:057 Basic Athletic Training 3 s.h.
027:117 Human Growth and Motor Development 3 s.h.
028:075 Health in Everyday Life (pathology is recommended substitute) 3 s.h.
031:001 Elementary Psychology 3 s.h.

**REQUIRED MAJOR COURSE WORK**

Total of 68-69 s.h.

One of these:
027:140 Exercise Physiology for Practitioners 3 s.h.
027:141 Exercise Physiology 3 s.h.

One of these:
071:120 Drugs: Their Nature, Action, and Use 2 s.h.
071:130 Drug Mechanisms and Actions 3 s.h.

All of these:
07C:199 Counseling for Related Professions 3 s.h.
027:036-027:037 Practicum in Athletic Training I-II 4 s.h.
027:090 Scientific Basis of Human Movement 3 s.h.
027:130 Human Physiology 3 s.h.
027:143 Physiology of Nutrition (or equivalent) 3 s.h.
027:171 Administration of Athletic Training Programs 3 s.h.
027:172-027:173 Clinical Sciences I-II 3 s.h.
027:180 Advanced Emergency Care for Athletic Trainers 2 s.h.
027:182-027:183 Clinical Sciences III-IV 6 s.h.
027:185 Clinical Sciences V 2 s.h.
027:186 Practicum in Athletic Training III 6 s.h.
027:253 Advanced Human Anatomy 6 s.h.
076:187 Practicum in Athletic Training 8 s.h.

College of Liberal Arts and Sciences students may be admitted to the athletic training major and begin clinical experience as sophomores. Applicants to the program must meet the following requirements:

- at least 11 s.h. of graded college credit, including 027:096 with a grade of C or higher; course work taken pass/fail cannot be counted; and
- a g.p.a. of at least 2.50 on all undergraduate course work.

Preference is given to applicants with high scholastic standing, strong writing skills, and varied athletic training and health care experience. A personal interview may be required; the athletic training program contacts applicants invited for interviews.

Fulfillment of admission requirements does not ensure admission to the athletic training major. The program selects candidates who appear to be best qualified for the study and practice of athletic training. Students denied admission to the major may reapply in a subsequent fall semester.

All students admitted to the major in athletic training are required to comply with entrance and periodic health screening history and immunization, which is coordinated through the program’s medical director.

### Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

Note: Students must be admitted to the exercise science or athletic training majors on schedule in order to complete a four-year graduation plan.

#### B.S. in Exercise Science

**Before the third semester begins:** calculus, one other course in the major, and at least one-quarter of the semester hours required for graduation.
Before the fifth semester begins: at least five more courses in the major and at least one-half of the semester hours required for graduation.

Before the seventh semester begins: at least six more courses in the major and at least three-quarters of the semester hours required for graduation.

Before the eighth semester begins: at least two more courses in the major.

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate.

**B.S. in Athletic Training**

Before the third semester begins: three courses in the major and at least one-quarter of the semester hours required for graduation.

Before the fifth semester begins: six courses in the major and at least one-half of the semester hours required for graduation.

Before the seventh semester begins: nine courses in the major and at least three-quarters of the semester hours required for graduation.

Before the eighth semester: 12 courses in the major.

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate.

**Minor**

The minor in exercise science requires at least 15 s.h. of exercise science courses with a g.p.a. of 2.00 or higher. All 15 s.h. must be earned at The University of Iowa; transfer courses are not accepted. At least 12 of the 15 s.h. must be in exercise science courses numbered 100 and above.

The service course 027:056 First Aid and CPR does not count toward the minor, nor do the specific clinical training courses involved with the Athletic Training Program (027:036, 027:037, 027:057, 027:171, 027:172, 027:173, 027:180, 027:182, 027:183, 027:184, 027:185, and 027:186). No courses accepted toward the minor may be taken pass/nonpass.

College-level courses in mathematics, chemistry, and biological sciences usually are required as prerequisite work for exercise science courses. Students seeking a minor in exercise science should be sufficiently prepared in the supporting sciences before they take advanced courses in the department.

There is no minor in athletic training.

**Graduate Programs**

The department offers the Master of Science, with or without thesis, and the Doctor of Philosophy. Admission to any of the graduate programs requires an undergraduate g.p.a. of 3.00 or higher.

**Master of Science Without Thesis**

The M.S. without thesis in athletic training is a terminal degree. It is designed primarily as an advanced area of study in clinical education and research for the certified athletic trainer. Emphasis is on developing and applying a base of research and education to the knowledge and skills of the entry-level athletic trainer. The program focuses on a health care team approach to sports medicine, medical care management, wellness, pediatric/adolescent health, and special health populations.

The following undergraduate course work (total of 30 s.h.) is required background for the M.S. nonthesis program in athletic training. Students must maintain a g.p.a. of 3.00 for the 30 s.h.

- **Anatomy:**
  - Human anatomy (minimum requirement) 3 s.h.
  - Human physiology 3 s.h.

- **Athletic training core:**
  - Prevention 3 s.h.
  - Evaluation and recognition 3 s.h.
  - Modalities and rehabilitation 3 s.h.
  - Administration 2 s.h.

- **Exercise science core:**
  - Neural control 3 s.h.
  - Exercise physiology 3 s.h.
  - Biomechanics or kinesiology 3 s.h.

- **Electives in related areas** 3-4 s.h.

Current emergency certifications
NATA certification or eligibility

**Course Requirements**

For the M.S. without thesis, students must complete 30 s.h., including at least 20 s.h. in exercise science. Students must maintain a g.p.a. of 3.00 for the 30 s.h. The following courses are required.
EXERCISE SCIENCE
Three of these:
027:141 Exercise Physiology  3 s.h.
027:145 Cardiovascular Physiology  3 s.h.
027:146 Molecules to Malady  3 s.h.
027:150 Gross Anatomy for Exercise Science  2 s.h.
027:153 Embryology and Connective Tissue Anatomy  2 s.h.
027:155 Skeletal Muscle Biology  3 s.h.
027:160 Motor Control I: Neurophysiological Basis  3 s.h.
027:197 Biomechanics of Human Motion  4 s.h.
027:253 Advanced Human Anatomy  6 s.h.

CLINICAL RESEARCH TOOLS
07P:243/22S:148 Intermediate Statistical Methods  4 s.h.
An approved tools or special interest area course  2-4 s.h.

ATHLETIC TRAINING
027:200 Problems (taken twice)  4 s.h.
027:202 Practicum in College Teaching  3 s.h.
027:301 Non-Thesis Seminar  2 s.h.
One of these:
07P:205 Design of Instruction  3 s.h.
069:133 Introduction to Human Pathology  3 s.h.
173:140 Epidemiology I: Principles  3 s.h.

ELECTIVES
Maximum of 4 s.h.

Master of Science With Thesis
The M.S. with thesis in exercise science is designed primarily as a first step in graduate study leading to the Doctor of Philosophy. It is a research-oriented program that introduces students to the nature and quality of research in exercise science and gives them an opportunity to specialize in an area of interest. The five areas of specialization leading to the M.S. with thesis are anatomy, athletic training, biomechanics, exercise and integrative physiology, and motor control.

Because the M.S. with thesis is regarded as the first step toward the Ph.D. in one of five areas of specialization, the required undergraduate prerequisite courses depend on the area in which the candidate intends to specialize for doctoral study. Specific courses in mathematics, chemistry, physics, biology, physiology, or psychology are required in some areas of specialization. These courses must be approved by the M.S. adviser and the professor in charge of the emphasis area selected by the student.

Course Requirements
The following courses (total of 30 s.h.) are required for the M.S. with thesis.

CORE COURSE REQUIREMENT
One of these:
22S:102 Introduction to Statistical Methods  3 s.h.
171:161 Introduction to Biostatistics  3 s.h.

SPECIALIZATION AREA COURSES
027:404 Thesis: M.S.  4 s.h.
Specialization courses approved by adviser  5-7 s.h.
Electives  5-6 s.h.

Doctor of Philosophy
Ph.D. students should have a strong background in the natural sciences, a working knowledge of statistics and research methodology, and a specific interest in at least one area of specialization in the department. Students can acquire additional knowledge of statistics and research methodology after entering the program.

The specialization areas are anatomy, biomechanics, integrative physiology, and neural control related to human motion.

Students must complete a minimum of 72 s.h. beyond the B.A. or B.S., including a dissertation in the area of specialization. They are expected to submit an appropriate manuscript of the
dissertation to a refereed professional journal for publication.

Many of the courses in the specialization areas are offered by departments other than exercise science. Professors from these departments frequently serve on comprehensive examination committees and on dissertation committees for the initial presentation of the candidate’s prospectus. They also participate in the final oral examination.

**GENERAL REQUIREMENTS**

Ph.D. students must fulfill the following requirements.

- At least 10 s.h. of independent research, exclusive of the thesis requirement
- At least 72 s.h. of graduate credit beyond the B.A. or B.S.

**CORE COURSE REQUIREMENTS**

Two approved courses in statistics
027:201 Research (10 s.h. minimum) 10 s.h.
027:202 Practicum in College Teaching (2 s.h. minimum) 2 s.h.
027:405 Thesis: Ph.D. 12 s.h.
650:270 Responsible Conduct in Research 1 s.h.

**SCIENTIFIC AREA COURSES**

In order to ensure that exercise science Ph.D. students obtain a breadth of knowledge over the key scientific areas that constitute the basis of the major, each student must complete at least one course in each of the areas of specialization. This requirement may be met by transfer credit if approved by the student’s adviser. The areas of specialization are anatomy, biomechanics, exercise physiology, and motor control.

**Specializations**

Candidates are expected to obtain a broad knowledge base within their area of specialization. This normally entails approximately 30 s.h. of course work. The following courses are recommended choices for each area of specialization.

**ANATOMY**

- 002:128 Fundamental Genetics 4 s.h.
- 002:150 Endocrinology 3 s.h.
- 027:153 Embryology and Connective Tissue Anatomy 2 s.h.
- 027:155 Skeletal Muscle Biology 3 s.h.
- 027:253 Advanced Human Anatomy 6 s.h.
- 060:205 General Histology for Graduate Students or equivalent 4 s.h.
- 060:234 Medical Neuroscience 4 s.h.
- 077:103 Radiation Biology 4 s.h.
- 099:110 Biochemistry 3 s.h.
- 099:120 Biochemistry and Molecular Biology I 3 s.h.
- 099:130 Biochemistry and Molecular Biology II 3 s.h.
- 101:295 Applied Electromyography 3 s.h.
- 142:220 Mechanisms of Cellular Organization 3 s.h.
- 142:225 Mechanisms of Cell Growth and Development 3 s.h.
- One of these:
  - 003:219 Fundamentals of Laboratory Instrumentation 3 s.h.
  - 101:212 Biomedical Instrumentation 4 s.h.

**BIOMECHANICS**

- 027:253 Advanced Human Anatomy 6 s.h.
- 057:019 Mechanics of Deformable Bodies 3 s.h.
- 057:020 Fluid Mechanics 4 s.h.
- 101:212 Biomedical Instrumentation 4 s.h.
- 101:295 Applied Electromyography 3 s.h.
- 171:162 Design and Analysis of Biomedical Studies 3 s.h.

**EXERCISE AND INTEGRATIVE PHYSIOLOGY**

- 002:128 Fundamental Genetics 4 s.h.
- 002:150 Endocrinology 3 s.h.
- 027:141 Exercise Physiology 3 s.h.
- 027:142 Exercise Physiology Laboratory 2 s.h.
- 027:145 Cardiovascular Physiology 3 s.h.
- 027:146 Molecules to Malady 3 s.h.
- 027:241 Integrative Physiology Seminar 1 s.h.
- 027:253 Advanced Human Anatomy 6 s.h.
- 050:240 Human Organ Systems 8 s.h.
- 060:204 Survival Skills for a Research Career 1 s.h.
- 060:205 General Histology for Graduate Students 4 s.h.
- 071:130 Drug Mechanisms and Actions 3 s.h.
- 072:153 Graduate Physiology 4 s.h.
- 077:103 Radiation Biology 4 s.h.
- 077:222 Free Radicals in Biology and Medicine 4 s.h.
- 099:110 Biochemistry 3 s.h.
- 099:120 Biochemistry and Molecular Biology I 3 s.h.
- 099:130 Biochemistry and Molecular Biology II 3 s.h.
- 099:140 Experimental Biochemistry 4 s.h.
Courses

Primarily for Undergraduates

027:036 Practicum in Athletic Training I 2 s.h.
Basic clinical skill instruction, evaluation, and integration for athletic trainers. Prerequisite: athletic training major.

027:037 Practicum in Athletic Training II 2 s.h.
Integration of basic physical skills and orientation to traditional settings; clinical experience for first-year students arranged through the athletic training program. Prerequisite: grade of C or higher in 027:036.

027:053 Human Anatomy 3 s.h.
General human anatomy covering most systems of the body. GE: natural sciences.

027:056 First Aid and CPR 2 s.h.
American Red Cross certification: basic first aid, CPR procedures.

027:057 Basic Athletic Training 3 s.h.
Basic pathology, epidemiology, materials biology for prevention and immediate care of athletic injuries.

027:090 Scientific Basis of Human Movement 3 s.h.
Survey of scientific principles that underlie human movement; emphasis on biomechanical and physiological contributions.

027:096 Special Projects arr.

027:107 Introduction to Biomechanics 3 s.h.

027:117 Human Growth and Motor Development 3 s.h.
Human growth and biological maturation; focus on motor development from birth through puberty. Offered fall semesters. Recommended: anatomy, human physiology, or animal biology course.

027:130 Human Physiology 3 s.h.
Organ system approach to physiology, with focus on normal function of the human body; information on all levels of integration, from submolecular to whole organism, with emphasis on how the intact organism functions. GE: natural sciences.

027:140 Exercise Physiology for Practitioners 3 s.h.
Effects of acute and chronic exercise on different physiological systems (energy, respiratory, circulatory, endocrine); fitness evaluation, weight-control strategies, training programs; preparation for ACSM Fitness Instructor Certification. Offered fall semesters and summer sessions. Recommended: human physiology course.

027:141 Exercise Physiology 3 s.h.
Mechanisms responsible for the acute and chronic effects of exercise on the different organ systems of the body. Offered fall semesters. Prerequisite: 027:130 or 027:150 or equivalent.

027:142 Exercise Physiology Laboratory 2 s.h.
Supplements 027:141, principles of scientific investigation used to demonstrate acute and chronic effects of exercise. Prerequisite: consent of instructor.

027:143 Physiology of Nutrition 3 s.h.
Metabolic and biological aspects of human energy production, relationship to energy consumption, systems or integrative approach.

Facilities

Classroom and research laboratories for anatomy, biomechanics, exercise physiology, and motor control are located in the Field House and in other buildings on campus. They provide excellent facilities for instruction and research at both the undergraduate and graduate levels.

Cooperative efforts with other departments facilitate specialization by allowing exercise science students to use additional special facilities and research equipment in other departments on campus (e.g., biology, biochemistry, orthopaedic surgery, internal medicine, pharmacology, physiology and biophysics, and the College of Engineering).
027:145 Cardiovascular Physiology 3 s.h.
Structure and function of cardiovascular system; heart, microcirculation, hemodynamics, regional circulation, reflex integration, regulation during physical stress. Prerequisite: 027:130 or equivalent. Recommended: calculus and physics.

027:146 Molecules to Malady 3 s.h.
Changes in single molecules that lead to systemic physiological alterations in mammals; relationship of these changes to development, aging, exercise, and specific diseases; current methodologies for studying mammalian genetics and physiology. Prerequisite: 027:130 or equivalent.

027:150 Gross Anatomy for Exercise Science 2 s.h.
Major systems of the body with emphasis on the nervous, muscular, and connective tissue systems related to movement. Offered fall semesters. Prerequisite: exercise science major.

027:151 Gross Anatomy Lab for Exercise Science 2 s.h.
Major systems of the body with emphasis on nervous, cardiovascular, muscular systems related to movement. Offered fall semesters. Prerequisite: exercise science major.

027:153 Embryology and Connective Tissue Anatomy 2 s.h.
Structure, growth, and development of connective, muscular, nerve tissue from embryologic to adult stages; specific joints, their structure and movements. Offered spring semesters.

027:155 Skeletal Muscle Biology 3 s.h.
Skeletal muscle structure, contractile mechanisms, production of movement, biomechanical properties; adaptation to increased use, disuse, injury. Offered spring semesters.

027:160 Motor Control I: Neurophysiological Basis 3 s.h.
Neuromuscular and neurophysiological bases of human motor control; mechanisms for locomotion and posture, control of arm and hand movements, role of sensory information. Offered spring semesters. Prerequisite: anatomy or human physiology course.

027:161 Administration of Athletic Training Programs 2-3 s.h.
Health care supervision, professional athletic training responsibilities, philosophies in athletic health care. Offered fall semesters. Prerequisite: 027:057.

027:172 Clinical Sciences I 2 s.h.
Theoretical knowledge base in therapeutic modalities. Offered spring semesters. Prerequisite: grade of C or higher in 027:036.

027:173 Clinical Sciences II 1 s.h.
Palpation, ROM, strength and stretching orientation for musculoskeletal evaluation. Offered summer sessions. Prerequisites: 027:172 and athletic training major.

027:180 Advanced Emergency Care for Athletic Trainers 1-2 s.h.
Coordinated initial professional emergency response certification for athletic trainers; recertification for those holding valid certifications. Prerequisites: Red Cross First Aid and CPR certifications, or consent of instructor.

027:182 Clinical Sciences III 3 s.h.
Theoretical and practical skill development in the areas of musculoskeletal evaluation. Offered fall semesters. Prerequisites: 027:173 and athletic training major.

027:183 Clinical Sciences IV 3 s.h.
Continuation of musculoskeletal evaluation, completion of EENT, chest, abdomen, and dermatologic evaluation; integration of rehabilitation programs. Offered spring semesters. Prerequisite: grade of C or higher in 027:182.

027:184 Seminar in Athletic Training 1-4 s.h.
Sports medicine conference topics. Offered fall and spring semesters. Prerequisite: graduate standing.

027:185 Clinical Sciences V: Rehabilitation 2 s.h.
Rehabilitation for athletic trainers based on the theory and principles of therapeutic exercise; application of current research concepts. Prerequisites: 027:172 and athletic training major. Corequisite: 027:182.

027:186 Practicum in Athletic Training III 3 s.h.
Advanced clinical skill instruction, evaluation, and integration for athletic trainers. Prerequisite: grade of C or higher in 027:037.

027:190 Exercise Science Senior Seminar 2-3 s.h.
Independent library or laboratory research in one of four areas of specialization (anatomy, biomechanics, exercise physiology, or motor control); oral and written presentation of results. Offered fall and spring semesters. Prerequisite: exercise science major.

027:197 Biomechanics of Human Motion 4 s.h.
Application of the principles of mechanics to investigation of human motion in two dimensions; system modeling, force system and equilibrium analysis, particle and rigid body kinematics, Newton’s and Euler’s equations of motion, work-energy and impulse-momentum integral principles. Offered spring semesters.

Primarily for Graduate Students

027:200 Problems 1-3 s.h.
Repeatable. Prerequisite: consent of instructor.

027:201 Research 1-3 s.h.
Repeatable. Prerequisite: consent of instructor.

027:202 Practicum in College Teaching 2-4 s.h.
Prerequisite: consent of instructor.

027:241 Integrative Physiology Seminar 1 s.h.
Current topics in cardiovascular physiology, vascular biology, free radical biology. Repeatable.

027:253 Advanced Human Anatomy 6 s.h.
Offered summer sessions.

027:275 Advanced Exercise Physiology 1 s.h.

027:301 Non-Thesis Seminar 2 s.h.
For candidates for the M.S. without thesis. Offered spring semesters.

027:314 Seminar in Motor Control 1-2 s.h.
Repeatable.

027:404 Thesis: M.S. 0-4 s.h.
Repeatable.

027:405 Thesis: Ph.D. 0-4 s.h.
Repeatable.
French and Italian

Chair: Downing A. Thomas
General education language coordinators: Kathy Heilenman, Anny Dominique Curtius (French), Deborah Contra (Italian)
Professors: Wendelin Guentner, Geoffrey R. Hope, Downing A. Thomas, Steven Ungar (French and Italian/Cinema and Comparative Literature)
Professors emeriti: Janet G. Altman, Jacques A. Bourgeacq, Florindo Cerreta, Simone Delaty, John T. Nothnagle
Associate professors: Cinzia Blum, Deborah L. Contra, L. Kathy Heilenman (French and Italian/Teaching and Learning), Michel Laronde, Roland Racvezki, Rosemarie Scullion (French and Italian/Women’s Studies)
Assistant professor: Anny Dominique Curtius
Instructor: Katja Liimatta

Undergraduate Programs

The department introduces students to the cultures of France and Italy, provides an understanding of those countries’ historical and contemporary importance, and facilitates development of proficiency in the French and Italian languages. It also fosters critical appreciation of French, Francophone, and Italian literature and civilization.

Students choose from varied programs for French and Italian majors and electives for nonmajors. They are afforded flexible means to complete the College of Liberal Arts and Sciences General Education Program foreign language component and to satisfy individual needs and interests.

Students majoring in French or Italian may combine their studies with courses in education to prepare for jobs in high school teaching. They may go on to graduate study in areas such as French, Italian, comparative literature, and other interdisciplinary areas as preparation for college-level teaching. Or they may combine other skills and studies with their major in French or Italian to prepare for challenging career opportunities in international government, business, finance, travel, communications, and other fields where the knowledge of a foreign language is essential.

Bachelor of Arts in French

The B.A. in French may be completed with an emphasis on literature, culture and civilization, teaching, language, or interdisciplinary studies.

All majors must complete the following courses (total of 10 s.h.) plus an additional 21 s.h. of course work from one of the five emphasis areas.

- 009:111 Introduction to Reading and Writing in Literature 3 s.h.
- 009:112 French Grammar 3 s.h.
- 009:106 Oral Expression in French II 2 s.h.
- 009:136 Oral Expression in French III 2 s.h.

Students must maintain a p.p.a. of at least 2.00 in all major course work, including all University of Iowa course work in the major. Majors must maintain portfolios documenting their progress toward attaining the objectives of the French major. On the basis of materials in his or her portfolio, a student may petition the department to count a literature course toward the culture and civilization distribution requirement, or vice-versa.

Transfer course work is acceptable, and students are encouraged to participate in study abroad, but the last two courses in the major ordinarily must be completed at The University of Iowa. Transfer work for application to the major is evaluated on an individual basis.

Upon declaring the major (or later, but before the senior year), students choose an emphasis in one of the following five tracks.

Culture and Civilization Track

The culture and civilization track is designed for students interested in French history, politics, and culture. It is recommended for students who wish to combine studies in French with a major in another area, such as history, political science, pre-law, communication studies, or journalism.

Requirements for the culture and civilization track include the following courses in addition to the 10 s.h. of foundation course work in French. Only one of the courses may be taught in English under the French department prefix. This restriction does not apply to courses taught in French. Two courses must be numbered above 009:150.
Four courses in culture/civilization
Three courses in literature or language

**Language Track**

The language track is designed for students with an interest in language and translation. Students work in specific areas such as international business, comparative stylistics, and translation.

Requirements for the language track include the following courses in addition to the 10 s.h. of foundation course work in French. Only one of the courses may be taught in English under the French department prefix. This restriction does not apply to courses taught in English with an additional semester hour in French. At least two courses must be numbered above 009:150.

009:115 Business French 3 s.h.
009:197 Techniques of Translation 3 s.h.

Five courses in French
culture/civilization, literature, or language

Courses in French stylistics and textual analysis, another language, economics, political science, and/or business administration are recommended as adjunct electives.

**Literature Track**

The literature track is designed for students who are interested in French literature or in combining the study of French literature with a major in another area, such as English, comparative literature, cinema, or fine arts.

Requirements for the literature track include the following seven courses in addition to the 10 s.h. of foundation course work in French. Only one of the courses may be taught in English under the French department prefix. This restriction does not apply to courses taught in English with an additional semester hour in French. At least two courses must be numbered above 009:150.

Four courses in literature
Three courses in culture/civilization or language

**Teaching Track**

French majors interested in obtaining licensure to teach in elementary and/or secondary schools must successfully complete the requirements for a major in French in the teaching track and must be admitted to the College of Education’s foreign language Teacher Education Program (TEP).

Several courses in the College of Education are required, as is one semester of student teaching.

Contact the Department of Teaching and Learning for details.

Requirements for the teaching track include the following courses in addition to the 10 s.h. of foundation course work in French. Only one of the courses may be taught in English under the French department prefix. This restriction does not apply to courses taught in English with an additional semester hour in French. At least two courses must be numbered above 009:150.

Two courses in culture/civilization
Two courses in literature
Three courses from these areas: culture/civilization, literature, pedagogy, or language

Students who plan to use a French minor to teach at the elementary and/or secondary level must contact the College of Education concerning requirements. See College of Education in the Catalog.

**French Interdisciplinary Studies Track**

The French interdisciplinary studies (FIS) track is designed for students with interests in French culture and in French historical, social, and cultural studies. It includes areas of French studies from a variety of fields, such as art history, comparative literature and film, francophone studies, history, linguistics, philosophy, music, and women’s studies.

Requirements for the FIS track include the following courses in addition to the 10 s.h. of foundation course work in French.

Two courses in French
culture/civilization, literature, or language taught in French 6 s.h.
Five courses taught in French or English representing a coherent interdisciplinary focus in French studies (adviser’s approval required) 15 s.h.

Students are expected to write a paper on their particular interdisciplinary focus in one of their upper-level classes, for inclusion in their portfolio.

The following courses, offered by other departments, may be taken for the FIS track. Students may petition the department to count other courses toward the major in this track.

**Art and Art History**

01H:162 National Images: American Art to 1865 3 s.h.
History
16E:126 The French Revolutions and Human Rights 3 s.h.
16E:127 European History in Text and Film 4 s.h.
16E:144 Modern France 1870-Present 3 s.h.
16E:146 France from 1815 to the Present 3 s.h.
16E:148 Society and Gender in Europe 1750-Present 3 s.h.
16E:161 Politics and Culture in Twentieth-Century Europe 3 s.h.
16W:121 African History Since 1880 3 s.h.

Linguistics
103:110 Articulatory and Acoustic Phonetics 3 s.h.
103:111 Syntactic Analysis 3 s.h.
103:112 Phonological Analysis 3 s.h.

Philosophy
026:158 Descartes 3 s.h.
026:174 Sartre 3 s.h.

Political Science
030:176 French Politics and Society 3 s.h.

Bachelor of Arts in Italian
Requirements for the major in Italian total 31 s.h., as follows.
018:011-018:012 Intermediate Italian 8 s.h.
018:111-018:112 Advanced Composition and Conversation 8 s.h.
018:105 Modern Italian Fiction 3 s.h.
018:106 Modern Italian Poetry and Drama 3 s.h.
018:119 Medieval Italian Literature 3 s.h.
018:120 Medieval and Renaissance Italian Literature 3 s.h.
An additional course taught in Italian, numbered above 018:103 3 s.h.

Elementary and Secondary Teaching Licensure in Italian
Italian majors interested in licensure to teach in elementary and/or secondary schools must successfully complete the requirements for a major in Italian, including an additional 2 s.h. in either 018:013 or 018:014, and must be admitted to the College of Education’s foreign language Teacher Education Program. Several courses in the College of Education are required, as is one semester of student teaching. Contact the Department of Teaching and Learning for details.

Students who plan to use an Italian minor to teach at the elementary and/or secondary level must contact the College of Education concerning requirements. See College of Education in the Catalog.

Four-Year Graduation Plan
The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan.

B.A. in French
Before the third semester begins: competence in first-year French and at least one-quarter of the semester hours required for graduation
Before the fifth semester begins: second-year French (009:012) and at least one-half of the semester hours required for graduation
Before the seventh semester begins: two semesters of third-year French (009:111-009:112), one or two other courses in the major, and at least three-quarters of the semester hours required for graduation
Before the eighth semester begins: 009:106 and three more courses in the major; for students in the French language track, 009:115 and 009:197
During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

B.A. in Italian
Before the third semester begins: competence in first-year Italian and at least one-quarter of the semester hours required for graduation
Before the fifth semester begins: competence in second-year Italian (018:012) and at least one-half of the semester hours required for graduation.
Before the seventh semester begins: four courses in the major numbered above 018:103 and at least three-quarters of the semester hours required for graduation
Before the eighth semester begins: a total of at least five courses in the major numbered above 018:103
During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate Honors

The department participates in the University Honors Program. To gain admission to honors in French or Italian, a student must have a University of Iowa g.p.a. of at least 3.33 and a department g.p.a. of at least 3.50, and must be a member of the University Honors Program. Students register for 009:198 (in French)/018:198 (in Italian) Honors Research and Thesis, and one honors-designated course numbered above 009:160 (in French) or 018:103 (in Italian). Students must complete an honors thesis or equivalent (for example, translation, comparative stylistics, cultural studies, or research paper) in French or Italian and must present their work to a faculty committee.

Minor in French

The requirements for a minor in French are 15 s.h. with a g.p.a. of at least 2.00, with 12 s.h. taken at The University of Iowa in courses numbered 009:105 or above. Credit from the Iowa Regents' Summer Program in Lyon is counted as University of Iowa credit. Courses taught in English do not count toward the minor in French.

Minor in Italian

The requirements for a minor in Italian are 15 s.h. with a g.p.a. of at least 2.00, with 12 s.h. taken at The University of Iowa in courses numbered 018:105 and above. All courses taken to complete the minor must be taught in Italian. Students may count 6 s.h. earned abroad in courses taught in Italian.

Summer Program in France

The department cosponsors the Iowa Regents Summer Program in France for students enrolled in any of the three Board of Regents, State of Iowa universities. Eligibility for the program requires a good basic knowledge of French (two years of college-level preparation is recommended), but students need not be French majors.

Centered in Lyon, the eight-week program combines formal class work in language skills, courses in the culture and civilization of France, and visits to points of cultural and historical interest. Students may earn 8 or 9 s.h. in the program.

Summer Program in Quebec

The department participates in the Committee on Institutional Cooperation (CIC) Summer French Program in Quebec at the Université de Laval. The CIC is a nonprofit organization whose purpose is to foster cooperative educational opportunities among the Big Ten universities and the University of Chicago. Affiliated with the Cours d’été pour non-francophones of the Université de Laval, the program is designed to offer qualified students the opportunity to increase their command of French in a French-speaking environment and to introduce them to the heritage and cultural traditions of a unique and vital segment of North American culture. To participate in the program, students must have taken at least two semesters of French.

Foreign Language House

The French and Italian department maintains close connections with the Maison Française in the International Crossroads Community at Hillcrest Residence Hall. Residents initiate cultural and educational programs with the participation of the faculty and other students, providing a unique opportunity to combine living with language learning.

Language for Nonmajors

Nonmajors who wish to study French and who have a background in the language should take the French Foreign Language Placement Test, offered through Evaluation and Examination Service. The test helps determine the level at which a student should begin French language study at The University of Iowa.

Students without a background in French should begin with 009:001.

Students who wish to complete the General Education Program’s foreign language component with French can choose from the following sequences.

- 009:001, 009:002, 009:011, 009:012
- 009:010, 009:011, 009:012

Nonmajors who wish to study Italian and who have a background in the language should consult with the department before the
Beginning of classes to determine the level at which they should begin Italian language study at The University of Iowa.

Students without a background in Italian should begin with 018:001.

Students who wish to complete the General Education Program’s foreign language component with Italian should complete the following course sequence: 018:001, 018:002, 018:011, and 018:012. Students with strong language-learning abilities or background in another romance language can choose the sequence 018:103, 018:011, and 018:012.

**Graduate Programs**

The department offers the Master of Arts and the Doctor of Philosophy in French.

The faculty’s expertise allows for courses in the traditionally recognized historical periods of French literature, various literary genres, and critical theories as well as the francophone literatures of Canada, North and Sub-Saharan Africa, and the Caribbean. The department has particular strengths in interdisciplinary studies, notably in the areas of comparative arts, film studies, history, and second language acquisition.

Emphasis on language proficiency, composition, and stylistics remains integral to the M.A. program. Along with the literature-centered M.A., the department offers an M.A. in French education.

For more detailed information on graduate degrees in French, contact the Department of French and Italian or visit its web site. The department also publishes the Guide for Graduate Students and Assistants.

**Master of Arts in French Without Thesis**

M.A. without thesis students must earn a minimum of 30 s.h. of graduate credit and pass a written and oral examination. The program must include the following:

- 009:208 Introduction to Graduate Study in French 1 s.h.
- 009:209 Advanced Grammar and Lexicology 3 s.h.
- 009:210 Comparative Stylistics 3 s.h.
- At least four graduate-level literature or culture courses numbered 200 and above

With permission of the director of graduate studies and the department chair, students may take up to 6 s.h. of the required 30 s.h. outside the department or transfer up to 6 s.h. of course work taken at another institution.

**Master of Arts in French With Thesis**

M.A. with thesis students must earn a minimum of 30 s.h. of graduate credit and take a written and oral examination on their areas of study. They also must defend the thesis at the time of the comprehensive examination. The program must include the following:

- 009:208 Introduction to Graduate Study in French 1 s.h.
- 009:209 Advanced Grammar and Lexicology 3 s.h.
- 009:210 Comparative Stylistics 3 s.h.

At least four graduate-level literature or culture courses numbered 200 and above

Students may earn up to 6 s.h. of the required 30 s.h. for thesis work.

A thesis prospectus must be accepted one year before the thesis is defended.

**Master of Arts in French Education**

The M.A. in French education is intended primarily for prospective secondary school and junior college teachers. Requirements include a total of 38 s.h. of graduate credit in French. The program must include the following:

- 009:208 Introduction to Graduate Study in French 1 s.h.
- 009:209 Advanced Grammar and Lexicology 3 s.h.
- 009:234 Principles of Teaching and Learning Foreign Languages 3 s.h.

Courses in French literature numbered 200 and above (minimum requirement) 9 s.h.

Candidates must pass a final written and oral examination.
Doctor of Philosophy in French

The Ph.D. in French is designed to prepare students for research, teaching, and professional service normally required of college and university faculty members.

Requirements for the Ph.D. in French include at least three years of graduate study, of which at least one must be spent in residence at The University of Iowa. Students must earn a minimum of 72 s.h. of graduate credit, including credit earned for the M.A. They also must pass a comprehensive examination and make a successful oral defense of their dissertation.

Specific requirements include the following.

- Fifth semester (or equivalent proficiency) in a foreign language other than French
- Three graduate courses in a related field, such as another literature, history, or philosophy (8 s.h. minimum)
- 009:208 Introduction to Graduate Study in French 1 s.h.
- 009:260 Critical Theory and Practice 3 s.h.
- 009:277 Thesis (6 s.h. minimum) 6 s.h.

Students working toward the Ph.D. are required to spend at least one year teaching as graduate assistants in the department.

Admission

Applicants to the M.A. program in French must have completed the equivalent of The University of Iowa undergraduate major in French. The M.A. in French is prerequisite to admission to the Ph.D. program in French. Successful completion of the M.A. program, however, does not necessarily qualify a student for doctoral study.

Applicants for fall semester whose application materials are received in the department by January 15 have the best chance to be admitted and receive financial aid. They must submit academic transcripts, letters of recommendation from three persons familiar with their past academic work, Graduate Record Examination (GRE) General Test results, a statement of purpose in taking graduate work, and one or more samples of original writing, one of which should be in French, that show their ability to pursue graduate work in French (an honors thesis, term paper, seminar paper, or other course papers).

Financial Aid

Teaching and research assistantships are offered through the department, and University fellowships and scholarships are available through the Graduate College. Contact the Department of French and Italian for details.

Teaching assistants in the department must take 009:234 Principles of Teaching and Learning Foreign Languages.

Exchange assistantship agreements with the University of Pau, the University of Picardie (Amiens), and the University of Poitiers provide one year of residence in France for a limited number of graduate students.

Courses

For a detailed description of courses offered each semester, contact the Department of French and Italian. French courses are conducted in French and Italian courses are conducted in Italian, unless otherwise indicated. Students may not receive credit for a course that is prerequisite to, or whose equivalent is prerequisite to, a higher-level course they have already completed. French courses numbered 150-199 are intended primarily for advanced undergraduates; graduate students should consult with their adviser before registering for these courses.

With the exception of the interdisciplinary track, only one course in English may be used to fulfill requirements for the undergraduate major. This restriction does not apply to courses taught in English with an additional semester hour in French. Students should consult with their adviser before registering.

Students who have had significant experience with French through study or foreign residence should consult with the department before enrolling in any French course.

French—Primarily for Undergraduates

009:001 Elementary French I 4 s.h.
For students who have no knowledge of French. Offered fall semesters. GE: foreign language.

009:002 Elementary French II 4 s.h.
Offered spring semesters. GE: foreign language. Prerequisite: 009:001 or equivalent.

009:010 First-Year French Review 5 s.h.
A year in one semester. GE: foreign language.

009:011 Intermediate French I 4 s.h.
GE: foreign language. Prerequisite: 009:002 or 009:010 or equivalent.
French—For Undergraduate and Graduate Students

009:012 Intermediate French II 4 s.h.
Continuation of 009:011. GE: foreign language. Prerequisite: 009:011 or equivalent.

009:026 Oral Expression in French II 2 s.h.
Prerequisite: 009:026 or 009:010 or equivalent.

009:029 First-Year Seminar 1-2 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Taught in English. Prerequisite: fall or second-semester standing.

009:030 Cultural Misunderstandings: France and U.S.A. 3 s.h.
Key moments in the history of relations between the United States and France, from similarities underlying democratic principles to recent divergent worldviews. Taught in English.

009:055 Revolutions in 19th-Century France 3 s.h.
GE: humanities. Same as 033:055.

009:079 French-Speaking Cultures 3 s.h.
Features of cultures in which French is spoken; North Africa, Sub-Saharan Africa, the Indian Ocean, Indochina, the West Indies, Canada, Europe; cinema, music, literature, the arts, the media. Prerequisite: 009:111 or equivalent.

009:124 Study Abroad: Language 3 s.h.
Written and spoken French; listening, speaking, reading, writing in cultural contexts. Prerequisite: 009:012 or equivalent.

009:127 Study Abroad: Culture 3 s.h.
Geography, history, architecture, painting, music of France; readings, slides, video and audio cassettes, visits to sites of cultural significance. Prerequisite: 009:012 or equivalent.

009:130 Paris and the Art of Urban Life 3 s.h.
Same as 01H:157, 033:130.

009:136 Oral Expression in French III 2 s.h.
Last in a three-course sequence. Prerequisite: 009:106 or equivalent.

009:144 Tales of Love in French Literature 3 s.h.
The problematic of love, politics and points of desire; selected works, Middle Ages to 20th century. Prerequisite: ability to read French.

009:146 Francophone Cinema 3 s.h.
Introduction to the cinema of French-speaking countries outside of France; history, production, distribution; issues of colonialism, postcolonial identities, gender, social realism, diasporas, popular culture.

009:147 French Cinema 3 s.h.
GE: foreign civilization and culture. Prerequisite: 009:012 or equivalent. Same as 048:105.

009:148 Gender and Sexuality in French Cinema 3 s.h.
Cultural, historical, semiotic approach to studying construction of gender identity and sexual codes in French cinema from 1920s to present. Prerequisite: 009:111 or 048:001 or 048:002 or 131:010 or consent of instructor. Same as 048:167, 131:167.

009:156 Pastiche and Parody 3 s.h.
History and theory of the genre, its presence in original literature; analysis of texts; creative compositions in the genre. Prerequisites: 009:111 and 009:112, or equivalents.

009:161 Topics in French Civilization 3 s.h.
Prerequisites: 009:111 and 009:112, or equivalents.

009:163 Francophone Literature of the African Diaspora 3 s.h.
Literatures and cultures of Africa, the Caribbean, and the Indian Ocean analyzed through fiction, essays, films, documentaries. Prerequisites: 009:111 and 009:112, or equivalents. Same as 120:135.

009:164 Québécois Literature 3 s.h.
Prerequisites: 009:111 and 009:112, or equivalents.

009:168 Post-Colonial Literature in France 3 s.h.
Literatures and cultures of Arabo-French (Berber) and Ams-French immigrations. Prerequisites: 009:111 and 009:112, or equivalents. Same as 048:168.

009:170 Early Modern French Literature and Culture 3-4 s.h.
Literary representations of social trends in early modern France. Prerequisites: 009:111 and 009:112.

009:178 Topics in French Studies II 3 s.h.
French and/or Francophone literature or culture. Prerequisites: 009:111 and 009:112, or equivalents.

Geography

Chair: Marc P. Armstrong

Professors: Marc P. Armstrong, Rex D. Honey, George P. Malanson, R. Rajagopal, David R. Reynolds, Gerard Rushton

Professors emeriti: James B. Lindberg, Michael L. McNulty

Adjunct professor: Jerry Croft

Associate professor: David A. Bennett

Associate professor emerita: Rebecca S. Roberts

Adjunct associate professor: David E. Osterberg

Assistant professors: Naresh Kumar, Marc A. Linderman

Adjunct assistant professors: Edwin Brands, Mary P. Skopec, William J. Smith Jr., Shaowen Wang, Peter J. Weyer

Adjunct instructor: Clifford Missen

Lecturer: Claire E. Pavlik

Undergraduate degrees: B.A., B.S. in Geography

Undergraduate nondegree program: Minor in Geography

Graduate degrees: M.A., Ph.D. in Geography

Web site: http://www.uiowa.edu/~geog

Geography is concerned with place and environment and the ongoing processes of change within and between social and physical systems. Geography's importance to scholarly inquiry is rooted in the complexity of the social and environmental problems with which the science deals. Its analytical power comes from its ability to understand and work with complex systems and with problems that require synthesis and integration. Three concepts at the core of the discipline—space, place, and scale—provide theoretical constructs and methodological tools for a science that investigates the complex character of social and environmental phenomena.

Geographers examine issues such as distribution and consumption of natural resources, air and water quality, climate changes and ecosystem dynamics, growth and development of urban areas, population dynamics, politics and practice of international development, social justice, and gender relations. They view society and the environment as a physical/social/cultural system. They apply uniquely geographical perspectives and tools, as well as knowledge from other social and scientific disciplines, to analyze the emergent properties of these systems.

Department of Geography graduates find employment opportunities in government, nongovernmental organizations, and business. For example, many geographers are employed in resource management, urban and regional development, site selection, and market area analysis. They analyze problems in the distribution and interactions among physical, ecological, social, and political systems.

Geography students acquire skills in computer-based cartography and data handling (geographic information science, or GIS) that are used in the investigation and solution of many environmental and social problems. Opportunities for graduates with GIS training are growing rapidly in both private and governmental organizations.

Courses in geography are commonly required of students preparing to teach at the elementary and secondary school levels and those who want to pursue careers in urban and regional planning. They also provide a background for many related professions, including law, health care, environmental or transportation engineering, and international business.

GIS Laboratory

The University's Geographic Information System Instructional Laboratory (GISIL) is located in the Department of Geography. GISIL is a center for teaching GIS as well as a place where students conduct geographic and GIS-related research. The laboratory houses a networked system of student workstations.

Undergraduate Programs

The Department of Geography offers a Bachelor of Science and a Bachelor of Arts in Geography, as well as a minor.

The geography faculty has developed an undergraduate instructional program that serves students majoring or minoring in geography as well as students in other disciplines who are interested in taking geography courses as part of a liberal education. The department also participates in a number of University interdisciplinary programs that have international, area studies, urban, or environmental components. Undergraduate students have access to the Geographic
Information System Instructional Laboratory for GIC instruction and research.

Bachelor of Science, Bachelor of Arts

Requirements for the major in geography have changed. Students who entered the College of Liberal Arts and Sciences in or after summer 2005, or who declared the major on or after the first day of fall semester 2005, must complete the requirements described below. Students who declared the major before the first day of fall semester 2005 may choose to complete the old requirements, but they must complete all requirements and graduate by August 2009.

The Bachelor of Science in geography requires 46 s.h. in the major; the Bachelor of Arts in geography requires 38 s.h. Transfer students must earn at least 15 s.h. in geography course work taken in residence at The University of Iowa.

Either the B.S. or B.A. is appropriate preparation for advanced training or careers in geography. Students with interests in quantitative analysis and model building should choose the B.S. degree and are encouraged to master an appropriate computer programming language.

Each student majoring in geography selects one of three tracks: geography and social change, environmental studies, or geographic information science.

Common Requirements

All geography majors must complete the following courses.

All of these:
044:001 Introduction to Human Geography 4 s.h.
044:003 Introduction to Earth System Science 4 s.h.
044:005 Foundations of GIS 3 s.h.

One of these:
044:011 Population 3 s.h.
044:015 Introduction to Political Geography 3 s.h.
044:030 The Global Economy 3 s.h.
044:035 World Cities 3 s.h.
044:094 International Development 3 s.h.

One of these:
044:100 GIS for Environmental Studies 3 s.h.
044:112 Mapping American Cities and Regions 3 s.h.
044:180 Field Methods in Physical Geography 3 s.h.
044:181 Field Methods in Social/Environmental Geography 3 s.h.

One of these:
044:150 Senior Project Seminar 3 s.h.
044:151 Senior Thesis 3 s.h.
044:113 Principles of Geographic Information Systems 3 s.h.

All majors must complete one 3 s.h. course offered by the Department of Statistics and Actuarial Science numbered 22S:025 or above. The following are recommended.

22S:025 Elementary Statistics and Inference 3 s.h.
22S:102 Introduction to Statistical Methods 3 s.h.

Bachelor of Science students must satisfy a mathematics requirement consisting of one of the following sequences.

22M:015-22M:016 Mathematics for the Biological Sciences/Calculus for the Biological Sciences 8 s.h.
22M:025-22M:026 Calculus I-II 8 s.h.

Tracks

All geography majors must complete one of the three tracks described below: geography and social change, environmental studies, or geographic information science. Students should pay close attention to prerequisites for the upper-level courses in each track so that they can develop a study plan that allows them to complete their major in a timely way. Students in the environmental studies or geography and social change tracks who wish to gain additional experience in theory and application of geographic information systems (GIS) should take 044:113 Principles of Geographic Information Systems and at least an additional 6 s.h. in GIS-based courses offered by the Department of Geography.

Geography and Social Change Track

The geography and social change track is designed for students preparing for positions in government, nongovernment organizations, international development agencies, and business. It also provides preparation for graduate study in geography or planning, or for professional programs such as law, business, or policy analysis. The track provides an understanding of increasing globalization, including processes of urban and regional
development or underdevelopment; the roles of elites, classes, institutions, and social movements; the role of the natural environment in effecting social change in different parts of the world; and the processes through which policy decisions are reached. Course work in the track covers social and economic theories of location and regional formation, methods of spatial analysis and geographic modeling, global and regional political economy, and theories of community conflict and social change.

Students develop requisite skills in quantitative analysis and the development, management, and application of geographic information systems and computer methods. They have opportunities to work on applied problems, such as assessing sites for their growth potential, identifying the best locations for service facilities, evaluating the impact of major projects, and forecasting the populations of small areas. The geography and social change track also provides opportunities for students interested in international development to examine competing theories intended to explain international and regional inequalities, and to investigate and evaluate the patterns and practice of development worldwide.

In addition to satisfying the common requirements for all geography majors, students in the geography and social change track must complete the following.

- 044:010 The Contemporary Global System 4 s.h.
- Upper-level geography courses 11 s.h.

Students choose the upper-level courses (11 s.h.) in consultation with their advisers. They may not count 044:150 Senior Project Seminar or the independent study courses 044:195, 044:198, and 044:199 toward this requirement. Students in the geography and social change track who wish to gain additional experience in theory and application of geographic information systems (GIS) should take 044:113 Principles of Geographic Information Systems and at least an additional 6 s.h. in GIS-based geography courses.

The following upper-level courses are recommended.

- 044:100 Readings for Undergraduates 3 s.h.
- 044:104 Environment and Development 3 s.h.
- 044:115 Cultural Geographies of North America 3 s.h.
- 044:124 Gender and the Environment 3 s.h.
- 044:131 Geography of Health 2-3 s.h.
- 044:132 Geography of Contemporary Europe 3 s.h.
- 044:133 Introduction to Economics of Transportation 3 s.h.
- 044:135 Urban Geography 3 s.h.
- 044:139 Location Models and Spatial Decision Support Systems 3 s.h.
- 044:162 Work, Gender, and Development 3 s.h.
- 044:163 Geography of the Newly Industrializing Countries 3 s.h.
- 044:164 The Middle East 3 s.h.
- 044:170 Geography of Justice 3 s.h.
- 044:172 Development Planning and Policy 3 s.h.
- 044:176 Social Consequences of Global Change 3 s.h.
- 044:178 Consequences of Global Environmental Change 3 s.h.
- 044:181 Field Methods in Social/Environmental Geography 3 s.h.
- 044:194 Geographic Perspectives on Development 3 s.h.

* A course chosen to fulfill one requirement cannot be used to fulfill a second.

ENVIRONMENTAL STUDIES TRACK

The environmental studies track is designed for students interested in the interrelationships among social and natural processes that affect the environment. The track prepares students for careers or pursuit of personal interests in resource management, physical geography, climatology, environmental policy or law, global environmental change, sustainable development, or other complex environmental issues.

Graduates may find employment in an environmental profession such as landscape ecology or climatology; environmental planning and regulation; or environmental law, policy, and politics.

The environmental studies track offers training in field observation, remote sensing, geographical information systems, quantitative analysis/computing, and cartographic representation. It also provides a sound foundation or graduate or professional-level studies in the natural or social aspects of the environment.

In addition to satisfying the common requirements for all geography majors, students in environmental studies track must complete the following.

- 044:019 Contemporary Environmental Issues 3 s.h.
- Upper-level geography courses 12 s.h.

Students choose the upper-level courses (12 s.h.) in consultation with their advisers. They may not count 044:150 Senior Project Seminar or the independent study courses 044:195, 044:198, and 044:199 toward this requirement.
044:198, and 044:199 toward this requirement. Students in the environmental studies track who wish to gain additional experience in theory and application of geographic information systems (GIS) should take 044:113 Principles of Geographic Information Systems and at least an additional 6 s.h. in GIS-based geography courses.

The following upper-level courses are recommended.

- 044:100 Readings for Undergraduates arr.
- 044:101 Climatology 3 s.h.
- 044:103 Biogeography 3 s.h.
- 044:104 Environment and Development 3 s.h.
- 044:105 Introduction to Environmental Remote Sensing 3 s.h.
- 044:122 Environmental Conservation in the U.S. 3 s.h.
- 044:123 Landscape Ecology 3 s.h.
- 044:124 Gender and the Environment 3 s.h.
- 044:125 Environmental Impact Analysis 4 s.h.
- 044:126 Wetlands: Function, Geography, and Management 3 s.h.
- 044:127 Environmental Quality: Science, Technology, and Policy 3 s.h.
- 044:128 GIS for Environmental Studies: Applications 3 s.h.
- 044:129 Water Resources Management 3 s.h.
- 044:131 Geography of Health 2-3 s.h.
- 044:170 Geography of Justice 3 s.h.
- 044:178 Consequences of Global Environmental Change 3 s.h.
- *044:180 Field Methods in Physical Geography 2-4 s.h.

*A course chosen to fulfill one requirement cannot be used to fulfill a second.

GEOGRAPHIC INFORMATION SCIENCE TRACK

The geographic information science track is designed for students preparing for positions in government agencies, nongovernment organizations, international development agencies, and business. It also provides preparation for graduate study in geography, planning, and other disciplines. The track focuses on the design, implementation, and use of geographic information systems. Courses address how geographic data are acquired, stored, accessed, displayed, managed, and analyzed.

Students in the geographic information science track learn to address problems involved in modeling environmental systems, identifying the best locations for service facilities, assessing environmental impacts, and forecasting the populations of small areas. They use the department's Geographic Information Systems Instructional Laboratory (GISIL) extensively to develop expertise in using GIS software.

Course work in the track covers methods of spatial analysis and geographical modeling and involves database management and computer programming.

In addition to the common requirements for all geography majors, students in the geographic information science track must complete the following.

- 22C:016 Computer Science I 4 s.h.
- Upper-level geography courses 11 s.h.

Students choose the upper-level courses (11 s.h.) in consultation with their advisers. They may not count 044:150 Senior Project Seminar or the independent study courses 044:195, 044:198, and 044:199 toward this requirement. Students who focus on GIS for environmental analysis select upper-level courses from the department’s environmental studies area; those who focus on socioeconomic analysis select upper-level courses from the geography and social change area.

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

Bachelor of Arts

The B.A. degree requires 35 s.h. in the major.

Before the third semester begins: one of the introductory courses in the major and at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: five courses in the major and at least one-half of the semester hours required for graduation

Before the seventh semester begins: 11 courses in the major and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: 14 courses in the major

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate...
**Bachelor of Science**

The B.S. degree requires 38 s.h. in the major.

**Before the third semester begins:** two of the introductory courses in the major and at least one-quarter of the semester hours required for graduation.

**Before the fifth semester begins:** six courses in the major and at least one-half of the semester hours required for graduation.

**Before the seventh semester begins:** 12 courses in the major and at least three-quarters of the semester hours required for graduation.

**Before the eighth semester begins:** 15 courses in the major.

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate.

**Honors**

Honors in geography is for students of superior ability who want to pursue studies beyond the typical undergraduate level. To graduate with honors, students must become a member of the University Honors Program, which requires that students maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University Honors Program for more information). They must be admitted to the honors program in geography by the first semester of the senior year and must maintain a g.p.a. of at least 3.33 in geography. They also must prepare and present an honors thesis, which consists of original research under the direction of a faculty member. The thesis is reviewed by a three-member faculty committee.

Students complete the thesis through the year-long 044:198 Honors Tutorial and 044:199 Honors Thesis. The senior course 044:150 Senior Project Seminar may be substituted for 044:199 Honors Thesis, as long as the student continues work on the thesis under the direction of a faculty member.

**Minor**

To minor in geography, a student must complete at least 15 s.h. in geography courses with a g.p.a. of at least 2.00; 12 of the 15 s.h. must be taken at The University of Iowa in 100-level courses. Minors are encouraged to concentrate their course work in tracks—geography and social change, environmental studies, or geographic information science. Students who wish assistance in selecting courses may contact the department secretary to request assignment of a minor adviser.

**Internships**

The Department of Geography is a participant in the University's internship program, which provides opportunities for both undergraduate and graduate students to participate in paid and unpaid activities related to their academic programs. The Pomerantz Career Center works with students to develop appropriate internships.

**Courses for Nonmajors**

Students in the College of Liberal Arts and Sciences as well as other academic units at the University may find geography courses useful to their own study programs. The beginning-level courses 044:001 Introduction to Human Geography, 044:011 Population Geography, 044:019 Contemporary Environmental Issues, and 044:030 The Global Economy are approved by the College of Liberal Arts and Sciences for General Education in social sciences; 044:010 The Contemporary Global System and 044:161 African Development are approved for General Education in social sciences and foreign civilization and culture; and 044:003 Introduction to Earth Systems Science is approved for General Education in natural sciences. These courses serve as part of a liberal education.

Other courses may be taken as electives, including 044:015 Introduction to Political Geography, 044:035 World Cities, 044:124 Gender and the Environment, and 044:132 Geography of Contemporary Europe.

**Graduate Programs**

Graduate programs in the Department of Geography focuses on investigating the environmental consequences of human decisions on local, regional, and global scales. Geographical information science and the theories and models of environmental and social sciences are central to the department's studies. Within this broad domain, the department is developing strengths in environmental justice, environmental modeling, land use and its environmental consequences, health geography, and information technology and development.
The department offers a Master of Arts and a Doctor of Philosophy. Both programs prepare students to carry on creative and productive research in selected areas of geography. University of Iowa graduates hold positions on college and university faculties, in private research organizations, and in business and government.

The department provides opportunities for graduate students to gain practical teaching experience through service as departmental teaching assistants or graduate instructors.

Graduate students present research papers at conferences and have regularly won awards. Students are involved in faculty research that leads to coauthored publications; they also publish their own. Graduate students compete successfully for intramural and extramural funding for graduate education and research.

**Master of Arts**

The M.A. in geography is designed to be completed in four semesters. It requires a minimum of 30 s.h. of graduate credit, but students accumulate 40-48 s.h. in completing the degree. Students use the additional work to increase their breadth of knowledge in geography and to tailor their study programs to their individual interests. A maximum of 6 s.h. may be earned for thesis work.

Graduate students demonstrate competence by completing appropriate course work; and completing an M.A. exam, or completing and defending an M.A. thesis, or completing the Ph.D. comprehensive exams.

For detailed information about requirements, see the *Manual for Graduate Degree Requirements, Department of Geography*; contact the Department of Geography.

**Doctor of Philosophy**

The Doctor of Philosophy in geography prepares students for college and university teaching and for advanced research. It provides programs of study that lead to broad knowledge of a field of geography and its literature and to special expertise in a subfield.

The Ph.D. requires 72 s.h. of graduate credit and is designed to be completed in four or five years. Students can enter the program upon completing an undergraduate degree or with advanced standing corresponding to previous graduate education.

All Ph.D. students take the following courses.

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Title</th>

<td>Two research seminars chosen from 044:315-044:319 (3 s.h. each)</td>
<td>6 s.h.</td>
</tr>
</tbody>
</table>

Before students can be admitted to candidacy for the Ph.D., they must submit an original research paper to a faculty committee for approval. Students who complete an M.A. or M.S. thesis can submit it to fulfill this requirement. Before taking the comprehensive examination, which consists of both written and oral components, each student must submit an area review paper to his or her Ph.D. committee. This paper, which must be approved by the student's Ph.D. adviser, consists of a critical review of research in the student's concentration area.

The comprehensive examination covers the student's concentration area and his or her general field in the discipline. After obtaining the dissertation supervisor's approval, the student submits a dissertation proposal to the dissertation committee for critical comments and approval. The student then must complete and defend the dissertation.

For detailed information about requirements, see the *Manual for Graduate Degree Requirements, Department of Geography*; contact the Department of Geography.

**Admission**

Applicants to graduate programs in geography must meet the admission requirements of the Graduate College. For detailed information about Graduate College policies, see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

A bachelor's degree in geography is not required for admission to graduate study in geography, but applicants must have an undergraduate background relevant to the field. Strength in social or environmental science and interest in exploring the regional and spatial perspectives that characterize modern geography are important in admission decisions. Depending on their prior training, graduate students may be required to take courses that are prerequisites for course work in their chosen area of graduate study; credit earned in prerequisites does not count toward the graduate degree.
Application materials include the undergraduate transcript with grade-point average, scores on the Graduate Record Examination (GRE) General Test, three letters of recommendation, and an essay in which the applicant states his or her reasons for wanting to study geography at The University of Iowa.

International applicants whose first language is not English must take the Test of English as a Foreign Language (TOEFL) and have their official scores sent to the University's Office of Admissions.

Financial Support
A number of graduate appointments as teaching or research assistants are available. In addition, there are several fellowships for outstanding applicants and underrepresented minorities. Awards are based on merit. In making awards, the department pays particular attention to grade-point average, especially for the junior and senior years; score on the Graduate Record Examination (GRE) General Test; letters of recommendation; and fit of the student's objectives with department specializations. Applications for graduate appointments must be received by February 1. Applications for fellowships are due by January 15.

Facilities and Centers
The department houses three geographic information computational laboratories, which support a variety of GIS software packages, including the latest software from ESRI (ArcGIS), Erdas (Imagine), and Caliper (Transcad).

The Geographic Information Systems Instructional Laboratory (GISIL) is equipped with 20 networked workstations, instructional support technology (e.g., CRT projection), and a suite of peripherals.

Environmental modeling and GIS research laboratories contain state-of-the-art machines. The department provides Windows and Linus platforms, digitizers, scanners, plotters, and printers. Projects requiring massive storage have access to the advanced GIS and modeling facility in the Center for Global and Regional Environmental Research. The University of Iowa is a charter member of Internet2, with a high-performance network link to the Department of Geography. The University also is a member of the University Consortium on Geographic Information Science.

To aid studies of water resources and physical geography, the department has a laboratory for analysis of vegetation, sediment, soil, water quality, and tree rings, and a variety of field equipment, including portable meteorological stations and data loggers.

Faculty and graduate students participate in multidisciplinary working groups through the University's Program in Applied Mathematical and Computational Sciences, Center for Global and Regional Environmental Research, Center for Health Effects of Environmental Contamination, International Programs, Institute for Rural and Environmental Health, Iowa Quaternary Studies Group, and Public Policy Center.

The University's Main Library has a collection of more than 115,500 maps, 3,600 atlases and reference works, and around 100,000 aerial photographs, primarily of Iowa.

Courses
Primarily for Undergraduates
044:001 Introduction to Human Geography 4 s.h.
Application of geographic principles to contemporary social, economic, and political problems; urban growth, problems of the ghetto, diffusion of innovations; territority and perception. GE: social sciences.

044:003 Introduction to Earth Systems Science 4 s.h.
Elementary principles of physical geography: physics of weather and climate, hydrological systems, geomorphological and geological forces, pedological processes, and ecological processes and patterns; geographic explanation of physical environment, with principles applied to the human use system; environmental pollution and natural hazards. GE: natural sciences.

044:005 Foundations of GIS 3 s.h.
Cartography, map analysis, and geographic information systems; map projections and scale, data collection, remote sensing, and GPS; data structures and organization; cartometry; symbolization and visualization.

044:010 The Contemporary Global System 4 s.h.
Problems of the global system and ways to address them; global economy and environment, state and security, social justice and human rights. GE: foreign civilization and culture or social sciences.

044:011 Population Geography 3 s.h.
Spatial considerations of population growth and distribution; minorities within a population; poverty, housing, social organization and disorganization; social systems, including education, religion, recreation, medical and social services; diffusion of ideas and traits over space. GE: social sciences.

044:015 Introduction to Political Geography 3 s.h.
Emphasis on application of geographical and economic theory in understanding historical development and restructuring of political economies at global, national, and local levels; development of nation states, nationalism, imperialism, geopolitics, economic restructuring, electoral geography.
044:019 Contemporary Environmental Issues 3 s.h.
Political, economic, cultural, technological, ecological, and ethical issues associated with natural resource and environmental problems, including population, global climate change, food production, tropical deforestation, soil erosion, waste management. GE: social sciences.

044:029 First-Year Seminar 1 s.h.
Small discussion class taught by a faculty member, topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Prerequisite: first- or second-semester standing.

044:030 The Global Economy 3 s.h.
Location and spatial organization of the world's major types of economies; agriculture, energy and minerals, manufacturing, transportation; trade and service centers. GE: social sciences.

044:035 World Cities 3 s.h.
Urbanization as a process; specific concepts and theories of urbanization through global patterns, regional urban systems, individual metropolitan areas.

044:094 International Development 3 s.h.
Theories of international development, political economy, development policy and planning, empirical analysis of conditions, policies, experiences of selected Third World countries. Prerequisite: social science GE.

044:100 Readings for Undergraduates arr.
Supervised readings in geography. Prerequisite: consent of instructor.

For Undergraduate and Graduate Students

044:101 Climatology 3 s.h.
Boundary layer processes that drive atmospheric dynamics; exchanges of energy and water at simple and complex surfaces; global climate change records, theories, models, impacts of climate on society. Prerequisite: 044:003 or consent of instructor. Same as 012:104.

044:103 Biogeography 2-3 s.h.
Distribution and abundance of plants and animals, spatial patterns and processes, and temporal dynamics of succession, response to climate change, and evolution; methods applied to the study of vegetation and plant community patterns. Prerequisite: 044:003 or 002:001 or consent of instructor. Same as 002:103.

044:104 Environment and Development 3 s.h.
Environmental impacts of industrial and rural development explored through Third World case studies (Latin America, Africa, South and East Asia); environmental degradation from perspectives of political economy and ecology; class, gender, and indigenous peoples' issues; industry-agriculture linkages.

044:105 Introduction to Environmental Remote Sensing 3 s.h.
Basic concepts and principles of remote sensing; sources of data, georegistration, digital processing and classification of remotely sensed images for extraction of environmental information; linkage of remote sensing techniques with GIS analysis.

044:106 Foundations of GIS 3 s.h.
Cartography, map analysis, and geographic information systems; map projections and scale; data collection, remote sensing, GPS; data structures and organization, cartography, symbolization and visualization.

044:110 GIS for Environmental Studies: Introduction 3 s.h.
Methods of managing and processing geographic information for environmental analysis; basic concepts, structures, theories of Geographic Information System (GIS), basic analytical techniques, and hands-on experience in GIS operations. Prerequisite: 044:005 or consent of instructor.

044:112 Mapping American Cities and Regions 3 s.h.
Foundation concepts for GIS-based analysis of urban, social, and economic data for the United States, georeferenced sources of U.S. national and state data; application to contemporary social issues. Prerequisite: 044:005 or consent of instructor.

044:113 Principles of Geographic Information Systems 3 s.h.
Issues in establishment of geographic information systems: spatial data encoding, raster-vector options, spatial and attribute resolution, cartographic data models, linkages to spatial analysis procedures, display techniques for decision support, institutional setting. Prerequisite: 044:005 or consent of instructor.

044:115 Cultural Geographies of North America 3 s.h.
Historical and contemporary perspectives on the contested cultural geographies of North America; processes underlying the social construction and reproduction of place, region, and place-based identities. Same as 045:116.

044:122 Environmental Conservation in the U.S. 3 s.h.
Varied natural environments of the United States; problems arising from conflicting land uses; consideration of land use policy, environmental impacts of different land uses, problems of habitat preservation and endangered species. Prerequisite: 044:003 or 044:019 or consent of instructor.

044:123 Landscape Ecology 3 s.h.
Effects of spatial pattern on spatial processes in ecology; characteristics of matrix, patch, corridor; fragmentation, deforestation, habitat loss; spatial flows of energy, matter, genetic information; relationship to human impact, global climate change. Prerequisite: 044:103 or a 100-level course in ecology.

044:124 Gender and the Environment 3 s.h.
Relationships between gendered human activities and environmental problems in developed and less-developed regional contexts; women's work, environment, development, role of women's activism in environmental movements; science, gender, knowledge of the environment; ecofeminist perspectives. Prerequisite: an introductory environmental studies or women's studies course. Same as 131:124.

044:125 Environmental Impact Analysis 4 s.h.
Environmental impact assessment methodologies; emphasis on cost-benefit risk, cost-effectiveness and incremental analysis, and overlay and graphic techniques; optimal resource use, system simulation; field trips to local environmental control facilities. Prerequisites: 044:019, and 029:005 or equivalent. Same as 102:125.

044:126 Wetlands: Function, Geography, and Management 3 s.h.
Basic aspects of water resources production, geographical basis of biophysical processes in drainage basins; spatial aspects of stream ecology; regional characterization of wetland structure and process. Prerequisite: 044:101 or 044:103. Same as 012:126.

044:127 Environmental Quality: Science, Technology, and Policy 3 s.h.
Geographical perspectives in the study and interpretation of chemicals in the environment; environmental standards under existing laws; local, regional, national, international case studies in environment and health; socioeconomic and institutional considerations in designing environmental protection strategies. Prerequisites: 225:025 or equivalent or consent of instructor.

044:128 GIS for Environmental Studies: Applications 3 s.h.
Applications of Geographic Information System (GIS) techniques in environmental change analysis (especially land use/cover change), environmental assessment, hazard/risk analysis, environmental decision making. Prerequisite: 044:110 or consent of instructor.
044:129 Water Resources Management 3 s.h.
Application of hydrological information in water resources management; aspects of water quantity and quality, groundwater availability, water use and treatment, resource development, political and administrative issues, basin management problems—forestry, agriculture, urbanization, floods, droughts. Prerequisite: 044:122 or equivalent.

044:131 Geography of Health 1-3 s.h.
Provision of health care in selected countries, with particular reference to the Third World; focus on problems of geographical, economic, cultural accessibility to health services; disease ecology, prospective payment systems, privatization, medical pluralism. Same as 152:131.

044:132 Geography of Contemporary Europe 3 s.h.
Physical demographic, and ethnic-cultural landscapes of contemporary Europe; national economies and European economic and social integration; transformation of Eastern Europe; comparison of European and U.S. economic development and social policies.

044:133 Introduction to Economics of Transportation 3 s.h.
Overview of transportation markets (intercity, rural, urban) and transportation modes (railroads, highways, air carriage, waterways); regulation, finance, physical distribution issues. Same as 044:143, 102:133.

044:135 Urban Geography 3 s.h.
Central ideas of modern urban geography, their links to social theory; focus on interrelation between social change, urban environment; evolution of urban systems, emergence of the capitalist city, urban social and residential differentiation, local politics of uneven development.

044:136 Planning Livable Cities 3 s.h.
Same as 102:101.

044:139 Location Models and Spatial Decision Support Systems 3 s.h.
Application of location models within GIS environments to support decision making; small area demographic forecasting, location-allocating models, regionalization problems, shortest path models, other spatial analysis methods used to support spatial decisions. Prerequisite: 044:005.

044:150 Senior Project Seminar 3 s.h.
Development of a research project and preparation of a research report. Offered spring semesters. Prerequisite: senior standing.

044:151 Senior Thesis 3 s.h.
Original research. Prerequisites: senior standing and consent of instructor.

044:161 African Development 3 s.h.
Problems of economic, political, spatial integration in Africa; patterns and processes of economic development and nation building. GE: foreign civilization and culture or social sciences. Prerequisite: 044:094. Same as 030:131.

044:162 Work, Gender, and Development 3 s.h.
Gender and class considered through political economy, gender-development theory, and institutional economics; global processes of First/Third World development analyzed; focus on class, gender, and collective action in cooperative enterprises, factory workplaces, and social movements. Prerequisite: 044:094 or graduate standing.

044:163 Geography of the Newly Industrializing Countries 3 s.h.
Newly industrializing countries (NICs) in geographic and historical perspectives; U.S. manufacturing base as a backdrop in NICs industrialization, off-shore industrial production, women in development, import-substitution industrialization (ISI), export-led industrialization, theories of industrial location, high-technology industries, the international division of labor; regional profiles taken from the Pacific Rim, Chile, Brazil, Mexico. Prerequisite: 044:030 or 044:094 or consent of instructor.

044:164 The Middle East 3 s.h.
Middle East cultures, political economy, conflict; significance of the Middle East in world affairs, vice versa.

044:170 Geography of Justice 3 s.h.
Geographical analysis of social and environmental justice; justice from various cultural perspectives; cultural struggles over human rights.

044:172 Development Planning and Policy 3 s.h.
Explicit and implicit strategies for economic and social development: origins, goals, formulation, execution, results; policy analysis methods. Prerequisites: 225:025 and 044:094.

044:174 Health, Work, and Environment 3 s.h.
Same as 175:101.

044:176 Social Consequences of Global Change 3 s.h.
Social consequences of economic, political transformation; urbanization, technological change, and penetration of global capital; their impacts on gender relations, ethnic identity and significance, other social structures.

044:178 Consequences of Global Environmental Change 3 s.h.
Physical components of global change, their relationship to environmental policy concerns; consequences manifested on local, regional, international scales. Prerequisites: 044:003 or 159:008, and 044:019; or consent of instructor.

044:180 Field Methods in Physical Geography 2-4 s.h.
Methods of measuring climate, vegetation, soil, landforms, water; projects in areas including field meteorology, tree-ring sampling, topographic surveying, vegetation sampling, water quality sampling, use of global positioning systems; introduction to research design.

044:181 Field Methods in Social/Environmental Geography 3 s.h.

044:183 Quaternary Environments 3 s.h.
Same as 012:173.

044:186 Soil Genesis and Geomorphology 3 s.h.
Same as 012:136.

044:188 Applied Geostatistics 3 s.h.
Same as 012:178.

044:194 Geographic Perspectives on Development 3 s.h.
Theoretical and empirical studies of the regional development process, with emphasis on developing countries; alternative regional development theories and changes in development theories in the literature of geography, related disciplines. Prerequisites: satisfaction of introductory geography and social change requirements, or consent of instructor.

044:195 Undergraduate Research arr.
Supervised research in geography. Prerequisite: consent of instructor.

044:197 Special Topics arr.
Contemporary fields of inquiry, such as political economy, regional/African development, biophysical systems, GIS, locational analysis, water resources, economic geography, demographic analysis, environment, urbanization, transportation.

044:198 Honors Tutorial arr.
Individual study.

Original research. Prerequisite: honors standing.
For Graduate Students

044:200 Readings arr. Supervised readings by graduate students in topics of their choice. Prerequisite: consent of instructor.

044:210 Fundamentals of Geography 3 s.h. Geography as an academic discipline; history, advances, epistemology; common themes.

044:211 Research and Writing in Geography 3 s.h. Identification of research areas; research questions and hypotheses; methodological decisions; research proposal and paper writing.

044:215 Module in Spatial Analysis and Modeling 1 s.h. Research themes in spatial analysis, GIScience, simulation, remote sensing.

044:216 Module in Rural Land Use 1 s.h. Research themes in land use, water resources, conservation.

044:217 Module in Environmental Justice 1 s.h. Research themes in environmental justice.

044:218 Module in Health and Environment 1 s.h. Research themes in health and environment.

044:219 Module in Information Technology and Development 1 s.h. Research themes in GIScience and development.

044:225 Environmental/Social Systems Analysis 3 s.h. Linear optimization and related models; recent applications in water resources management, pollution control, economics, public policy; potential future applications in designing water quality monitoring networks. Prerequisite: consent of instructor.

044:226 Advanced Biogeography 3 s.h. Current questions on spatial distribution of organisms, spatial patterns of biodiversity, environmental gradients.

044:227 Environmental Quality: Science, Technology, and Policy 3 s.h. Geographical perspectives in the study and interpretation of chemicals in the environment; environmental standards under existing laws; local, regional, national, international case studies in environment and health; socio-economic and institutional considerations in designing environmental protection strategies.

044:246 Advanced Landscape Ecology 3 s.h. Current questions of effects of spatial structure on ecological processes, economics and boundaries, metapopulations, pattern metrics.

044:263 Agrarian Change, Food, and Globalization 3 s.h. Indigenous people, peasant and rural development; gender development theory; agriculture/industrial links, state policy and rural politics, cooperative rural development; rural social movements, (bio)technological change and environmental degradation.

044:265 Transportation Regulation and Finance 1-3 s.h. Public policy options for improving passenger and commodity movements within and between cities; air, water, land-based transportation modes. Same as 102:265.

044:275 Development Policy and Planning in the Third World 3 s.h. Development policies and planning in Third World countries; important development problems and alternative perspectives on problems and proposed solutions; interdisciplinary seminar. Same as 07B:275, 044:275, 042:275, 102:275, 113:275.

044:281 Medical Geography 3 s.h. Geographical information systems for health surveillance; spatial patterns of mortality, morbidity, ways of evaluating geographical accessibility problems of special populations. Same as 152:281.

044:296 Topics in Geographic Information Science 3 s.h. Current theoretical research issues in geographic information science; intensive readings. Repeatable. Prerequisite: 044:113 or consent of instructor.

044:297 Special Topics arr. Contemporary fields of inquiry, such as political economy, regional/African development, biophysical systems, GIS, locational analysis, water resources, economic geography, demographic analysis, environment, urbanization, transportation.

044:315 Seminar in Spatial Analysis and Modeling 3 s.h. Research themes in spatial analysis, GIScience, simulation, remote sensing.

044:316 Seminar in Rural Land Use 3 s.h. Research on land use, water resources, conservation.

044:317 Seminar in Environmental Justice 3 s.h. Research on environmental justice.

044:318 Seminar in Health and Environment 3 s.h. Research on health and environment.

044:319 Seminar in Information Technology and Development 3 s.h. Research on GIScience and development.

044:350 Geography Colloquium arr. Prerequisite: consent of instructor.

044:396 Topics in Geographic Information Science 3 s.h. Current theoretical research issues in geographic information science; intensive readings. Repeatable. Prerequisite: 044:113 or consent of instructor.

044:415 Research in Spatial Analysis and Modeling 3 s.h. Directed research in spatial analysis, GIScience, simulation.

044:416 Research in Rural Land Use 3 s.h. Directed research in land use, water resources, conservation.

044:417 Research in Environmental Justice 3 s.h. Directed research in environmental justice.

044:418 Research in Health and Environment 3 s.h. Directed research in health and environment.

044:419 Research in Information Technology and Development 3 s.h. Directed research in GIScience and development.

044:441 Research: Locational Analysis arr.

044:450 Thesis arr.
Geoscience

Chair: C. Thomas Foster Jr.
Professors: Ann F. Budd, C. Thomas Foster Jr., Philip H. Heckel
Adjunct professor: David L. Campbell
Associate professors: Jonathan M. Adrain, E. Arthur Bettis III, Robert L. Brenner, Mark K. Reagan, Frank H. Wiersch, You-Xuan Zhang
Adjunct associate professors: Scott J. Carpenter, Gregory A. Ludvigson, Brian J. Witzke
Assistant professors: Christopher A. Brochu, Jeffrey A. Dore, Jane A. Gollott, Walter A. Illman, David W. Peate, Hallie J. Sims
Adjunct assistant professors: Ray Anderson, Rhawn F. Denton, James Huber, Ingrid U. Peate, Doug Schnoebelen
Visiting assistant professor: Christian V. Shorey
Adjunct instructor: Tiffany Adrain
Undergraduate degrees: B.A., B.S. in Geoscience
Graduate degrees: M.S., Ph.D. in Geoscience
Web site: http://www.uiowa.edu/~geology

Geoscience faculty and students study the many physical, chemical, and biological systems that compose the earth. Using modern observational, analytical, and computational methods, they examine how the planet’s interior, surface, hydrosphere, and atmosphere have evolved since the earth was born in the solar system 4.6 billion years ago. Topics commonly studied in the department include how plate movements cause earthquakes, volcanoes, and mountain building; how global climate change and catastrophic events cause changes in biodiversity; how and where economic resources are generated in the earth; and how these resources are located and used in modern society.

The geoscience curriculum provides students with hands-on experience analyzing rocks, minerals, fossils, soils, and waters, generally in a small classroom setting. Much of this experience is obtained in laboratory and field courses. Field courses include travel to other states or countries to view earth materials and fossils in the context of their natural surroundings.

The master’s degree is regarded by most hiring agencies as the working degree. The doctoral degree is required for college and university teaching positions. However, an undergraduate degree is fully satisfactory in certain teaching, government, and industrial situations.

Many of The University of Iowa’s geoscience graduates find employment with resource companies, environmental corporations, and educational institutions. Others continue in graduate school or take jobs with government or conservation agencies. Some intend to enter law, business, or fields such as urban planning, environmental studies, engineering, archaeology, science education, or oceanography as advanced areas. Geoscience provides skills useful for all of these.

Each year more than 1,500 students enroll in 012:003 Earth History and Resources, 012:004 Evolution and the History of Life, 012:005 Introduction to Geology, 012:007 Age of Dinosaurs, 012:008 Introduction to Environmental Science, and 012:114 Energy and the Environment, all courses approved by the College of Liberal Arts and Sciences for General Education in natural sciences.

For nonmajors, the department offers a lecture sequence featuring a general survey of geoscience (012:001, 012:006, 012:008) and several intermediate courses with few prerequisites—paleontology (012:121), oceanography (012:108), remote sensing (012:110), earth surface processes (012:102), and energy and the environment (012:114).

Many of the department’s faculty members are involved in the Interdisciplinary Environmental Sciences Program (see Environmental Sciences in the Catalog).

Undergraduate Programs

The department offers programs leading to the Bachelor of Science and the Bachelor of Arts. Geoscience majors receive at least an academic year’s work in three allied scientific areas—physics, chemistry, and mathematics—and a semester of biological sciences in addition to a course in each major area of geology.

Students majoring in geoscience must complete the College of Liberal Arts and Sciences General Education Program. It is recommended that they
complete the foreign language component with French, German, Spanish, or Russian, and the social sciences component with an approved course in economics, geography, or anthropology.

Transfer students must complete a minimum of 15 s.h. of course work in the Department of Geoscience for either the B.S. or the B.A.

**Bachelor of Science**

The Bachelor of Science in geoscience is designed to prepare students for immediate employment after graduation or for entering a graduate program in geology. The B.S. requires a minimum of 38 s.h. of departmental work, including the following course work.

One of these:
- 012:003 Earth History and Resources 4 s.h.
- 012:005 Introduction to Geology (preferred) 4 s.h.

All of these:
- 012:004 Evolution and the History of Life 4 s.h.
- 012:041 Mineralogy 4 s.h.
- 012:052 Petrology 4 s.h.
- 012:092 Structural Geology 4 s.h.
- 012:113 Summer Field Course 6 s.h.
- 012:121 Principles of Paleontology 3 s.h.
- At least two geoscience electives 6-7 s.h.

At least 8 s.h. of calculus, including one of these:
- 22M:022 Calculus and Modeling II 4 s.h.
- 22M:026 Calculus II 4 s.h.
- 22M:032 Engineering Mathematics II: Multivariable Calculus 4 s.h.

An additional course in mathematics (numbered 22M:027 and above), computer science (numbered 22C:005 and above), or statistics (numbered 22S:030 and above) also is required.

B.S. students must complete the following course work in chemistry, physics, and biological sciences (these are minimum requirements).

At least 8 s.h. of college-level chemistry is required, including the following, equivalent courses, or more advanced courses; chemistry courses numbered below 004:011 cannot be used to satisfy the chemistry requirement for the B.S. in geoscience.

004:011-004:012 Principles of Chemistry I-II 8 s.h.

At least 8 s.h. of college-level physics is required, as follows: physics courses numbered below 029:011 cannot be used to satisfy the physics requirement for the B.S. in geoscience.

One of these sequences:
- 029:011-029:012 College Physics 8 s.h.
- 029:081-029:082 Introductory Physics I-II 8 s.h.

At least one biological science course that includes a laboratory (4 s.h.) is required. Students with an interest in palaeontology are encouraged to take 002:019-002:021 Principles of Biology I-II.

**RECOMMENDED OPTIONS**

All B.S. candidates should take elective courses from the following groups in order to broaden their undergraduate experience and prepare themselves for graduate study or professional employment. Students who have clear career goals are advised to take three or more elective courses from the group that fits their needs most closely. Students also may seek a broad education in geoscience by choosing elective courses from a number of groups.

**Quaternary Geology**

012:102 Earth Surface Processes 3 s.h.
012:110 Introduction to Applied Remote Sensing 4 s.h.
012:130 Sedimentary Geology 3 s.h.
012:136 Soil Genesis and Geomorphology 3 s.h.
012:138 Fluvial Geomorphology 3 s.h.
012:149 Elements of Geochemistry 3 s.h.
012:153 Geocomputing 1-3 s.h.
012:166 Hydrogeology 3 s.h.
012:172 Glacial and Pleistocene Geology 3 s.h.
012:173 Quaternary Environments 3 s.h.
012:178 Applied Geostatistics 3 s.h.
012:179 Engineering Geology 3 s.h.
012:180 Principles of Geophysics 3 s.h.
012:184 Groundwater Modeling 3 s.h.
012:186 Contaminant Hydrogeology 3 s.h.
012:187 Vadose Zone Hydrology 3 s.h.

**Environmental Geology**

012:108 Introduction to Oceanography 2 s.h.
012:110 Introduction to Applied Remote Sensing 4 s.h.
012:138 Fluvial Geomorphology 3 s.h.
012:139 Integrated Watershed Analysis 3 s.h.
012:140 Natural Hazards 3 s.h.
012:149 Elements of Geochemistry 3 s.h.
012:153 Geocomputing 1-3 s.h.
012:166 Hydrogeology 3 s.h.
012:172 Glacial and Pleistocene Geology 3 s.h.
012:173 Quaternary Environments 3 s.h.
012:178 Applied Geostatistics 3 s.h.
012:179 Engineering Geology 3 s.h.
012:180 Principles of Geophysics 3 s.h.
012:184 Groundwater Modeling 3 s.h.
012:186 Contaminant Hydrogeology 3 s.h.
012:187 Vadose Zone Hydrology 3 s.h.

**Bachelor of Arts**

The B.A. in geoscience is designed to provide students with a varied background in geology and a broader choice of electives than is practical in the B.S. program. The B.A. is intended for students who are interested in the fundamentals of geology or earth science teaching (see College of Education in the Catalog). Completing the minimum requirements for this degree may not adequately prepare a student for an entry-level professional job in geology. The B.A. requires a minimum of 35 s.h. of departmental work, including the following required course work.

One of these:
- 012:003 Earth History and Resources 4 s.h.
- 012:005 Introduction to Geology 4 s.h.

Both of these:
- 012:041 Mineralogy 4 s.h.
- 012:052 Petrology 4 s.h.

One or both of these:
- 012:004 Evolution and the History of Life 4 s.h.
- 012:121 Principles of Paleontology 3 s.h.

One to four of these:
- 012:092 Structural Geology 4 s.h.
- 012:130 Sedimentary Geology 3 s.h.
- 012:136 Soil Genesis and Geomorphology 3 s.h.
- 012:138 Fluvial Geomorphology 3 s.h.
- 012:161 Stratigraphy 3 s.h.
- 012:166 Hydrogeology 3 s.h.

B.A. students must complete the following course work in mathematics and chemistry (these are minimum requirements).

- College-level mathematics (may include computer science and statistics) 10 s.h.
- At least two college-level chemistry courses (either Option 1 or Option 2) are required; chemistry courses numbered below 004:007 cannot be used to satisfy the chemistry requirement for the B.A. in geoscience.

**Option 1:**
- 004:007-004:008 General Chemistry I-II 6 s.h.

**Option 2:**
- 004:011-004:012 Principles of Chemistry I-II 8 s.h.

**FIELD REQUIREMENT**

To complete the major, students must have field experience. They may take two semesters of 012:018 or 012:116, or one semester of each of these courses (total of 4 s.h.). Or they may take one semester of 012:093, 012:113, 012:195, or the Lakeside session.

- 012:018 Geology Field Trip: Selected National Parks 2, 4 s.h.
- 012:116 Field Trip 2, 4 s.h.
- 012:093 Geologic Field Methods 2 s.h.
- 012:113 Summer Field Course 6 s.h.
- 012:195 Field Methods: Environmental Processes 2-4 s.h.

One natural science session at Iowa Lakeside Laboratory
Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

Note: These checkpoints show the range of required course work; the B.A. program requires 17-18 courses, and the B.S. requires 18.

The geoscience major requires field trip experiences, many of which take place during vacation periods during or between semesters, or during the summer session. These checkpoints do not include the field trip requirements.

Before the third semester begins:
- competence in math through trigonometry
- first required chemistry course
- at least one-quarter of the semester hours required for graduation

Before the fifth semester begins:
- three to five courses in the major (including the remainder of the chemistry requirement and continuation of the mathematics requirement)
- and at least one-half of the semester hours required for graduation

Before the seventh semester begins:
- 7-11 courses in the major
- and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins:
- 10-14 courses in the major

During the eighth semester:
- enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Honors

Qualified students may earn a degree with honors in geoscience. Honors program students must complete a senior thesis (012:010 Honors Thesis in Geoscience) and maintain a cumulative University of Iowa g.p.a. of at least 3.33 in order to graduate with honors (contact the University Honors Program for more information).

Undergraduate Geoscience Colloquium (012:190) is highly recommended.

National Honor Society

The department sponsors a chapter of Sigma Gamma Epsilon National Earth Science Honor Society. Students with an overall g.p.a. of at least 2.80 and at least 3.20 in geoscience courses are considered for membership after they have completed a minimum of 16 s.h. of course work in geoscience. Consult the departmental honors adviser for more information.

Minor

A minor requires at least 15 s.h. of geoscience courses with a g.p.a. of 2.00 or higher. At least 12 of the 15 s.h. must be earned in advanced geoscience courses taken at The University of Iowa. All geoscience courses numbered 100 and above may be taken as advanced courses. In addition, 012:041 Mineralogy, 012:052 Petrology, and 012:092 Structural Geology are considered advanced courses for the minor.

College-level courses in mathematics, physics, chemistry, and biological sciences usually are required as collateral work for geology students. Those seeking a minor in geoscience should be sufficiently prepared in the areas of supporting sciences before they take advanced courses in geoscience.

Recommended advanced courses in geoscience that deal with important areas of earth materials and earth processes are as follows.

- 012:041 Mineralogy 4 s.h.
- 012:052 Petrology 4 s.h.
- 012:092 Structural Geology 4 s.h.
- 012:102 Earth Surface Processes 3 s.h.
- 012:108 Introduction to Oceanography 2 s.h.
- 012:114 Energy and the Environment 3 s.h.
- 012:121 Principles of Paleontology 3 s.h.
- 012:130 Sedimentary Geology 3 s.h.
- 012:136 Soil Genesis and Geomorphology 3 s.h.
- 012:138 Fluvial Geomorphology 3 s.h.
- 012:139 Integrated Watershed Analysis 3 s.h.
- 012:149 Elements of Geochemistry 3 s.h.
- 012:161 Stratigraphy 3 s.h.
- 012:180 Principles of Geophysics 3 s.h.
- 012:191 Geotectonics 3 s.h.

Joint Programs

Joint programs can be arranged, usually with chemistry, physics, biological sciences, environmental engineering, environmental science, and anthropology.
Independent Research

A junior or senior who is ready to pursue independent research for credit in geoscience may assist a faculty member or graduate student with a current research project (012:019 Directed Study) or may initiate a small-scale project involving a combination of field, laboratory, and library investigation (012:119 Directed Study). Independent study is encouraged and may result in honors or senior theses that subsequently are published.

Graduate Programs

The Department of Geoscience offers the M.S. in geoscience, with or without thesis, and the Ph.D. in geoscience.

All geoscience graduate students are responsible for meeting requirements and deadlines. They should acquaint themselves with the Manual of Rules and Regulations of the Graduate College—particularly sections IX, X, and XII (see Graduate College in the Catalog)—and with the University calendar (for deadline dates and so forth).

New graduate students receive a handout that provides detailed information about graduate degree requirements. See Graduate Programs in Geoscience on the department's web site.

Entering graduate students are required to enroll in 012:207 Geologic Orientation. By the first month of their second semester in residence, they must select an adviser. Also during their second semester in residence, they must consult with faculty members and arrange for an advisory committee.

Throughout their graduate study, all M.S. and Ph.D. students must maintain a g.p.a. of at least 3.00 on all course work required for their degree and on all graduate-level geoscience course work. Students whose g.p.a. drops below 3.00 are placed on academic probation.

Geoscience graduate students are encouraged to present their research at local, regional, national, or international meetings. The department provides partial funding for travel to such meetings.

Master of Science

The M.S. program is designed primarily to prepare students for professional careers in geoscience, or for more advanced studies. It requires a minimum of 30 s.h. of graduate credit. No more than 8 of the 30 s.h. can be earned in research. At least 24 s.h. must be completed in residence at The University of Iowa.

M.S. students are responsible for obtaining their advisory committee’s approval of a suitable program of course work and for satisfactory development of research plans as outlined in a thesis proposal, which should be completed before the end of the second semester of full-time study.

Master’s students are required to deliver a half-hour public presentation of the thesis, followed by an oral defense, supporting research, and related topics. They also must take a final examination, for which members of their advisory committee act as examiners.

Nonthesis Option

The M.S. without thesis is designed for students with extensive geological background and experience. Individuals interested in pursuing the nonthesis option must obtain the department chair’s permission.

Requirements for the nonthesis option are similar to those for the M.S. with thesis, except that in lieu of the thesis the student must submit a manuscript that his or her thesis committee deems acceptable for submission for publication. The student may choose to submit a previously published manuscript. Nonthesis students also must take a final examination that covers course work and the work done in lieu of the thesis.

Doctor of Philosophy

The Ph.D. program is designed primarily to train students to be independent researchers and/or teachers, and to bring students to the forefront of a specialized area of geoscience. It requires a minimum of 72 s.h. of graduate credit. At least two semesters beyond the first 24 s.h. earned in graduate work must be spent in full-time study (9 s.h. per semester) in residence at The University of Iowa.

Ph.D. students usually enter the program with established fields of interest and a research adviser already selected. Under exceptional circumstances, a student may be admitted to the Ph.D. program without an established field of interest.

During the first semester of study, students consult with faculty members and their adviser to select course work and to choose a faculty committee for the comprehensive examination. Students should complete most of their course work before taking the comprehensive
examination, which consists of both written and oral portions and which must be passed before the end of the second year of doctoral study. Once candidates have passed the comprehensive examination, they are required to register each semester until they receive the Ph.D. Candidates who have completed their plan of study may register for 000:002 Doctoral Continuous Registration or 000:003 Doctoral Final Registration.

Doctoral candidates, in consultation with their adviser and other faculty members, prepare a formal dissertation proposal, which must be submitted to the chair of the geoscience department by the beginning of the fifth semester of the candidate's full-time doctoral study and before the bulk of his or her research is completed. The proposal must receive the dissertation committee’s unanimous approval. The written dissertation must be available to the committee at least two weeks before the final examination. All Ph.D. candidates must deliver a one-hour public presentation associated with the dissertation defense.

Admission

Applicants to graduate programs in geoscience must:

- hold a bachelor's degree from a college or university accredited by a regional accrediting association, and
- have a g.p.a. of at least 3.00 (for M.S. applicants) or at least 3.20 (for Ph.D. applicants), or a total score of 1100 or higher on the combined verbal and quantitative portions and 4.5 or higher on the analytical writing portion of the Graduate Record Exam (taken since October 1, 2002).

Students may be admitted on conditional status with a g.p.a. of at least 2.30 (for M.S. applicants) or at least 2.70 (for Ph.D. applicants). Graduate students admitted on conditional status must enroll in at least 8 s.h. of graduate course work during each session and must attain regular status at the end of the second session of registration.

The department also admits students who are not candidates for a degree. Such students, called professional improvement students, must meet the same standards as applicants to the master’s program.

International applicants whose first language is not English must score 550 (paper-based) or 213 (computer-based) or higher on the Test of English as a Foreign Language (TOEFL).

Financial Support

The Department of Geoscience offers merit-based graduate assistantships. All admitted graduate students are eligible for assistantships.

M.S. students may hold an assistantship for two academic years and Ph.D. students for up to five, depending on whether and where they earned an M.S. In order to retain their appointments from semester to semester, students must perform satisfactorily in the assistantship and must continue to make satisfactory progress toward completion of their degree. Students who begin graduate study without an assistantship may become eligible for one as appointments become available.

Students must demonstrate proficiency in English before they can be considered for a teaching assistantship. Teaching assistants are evaluated each semester for teaching proficiency and communication skills, through student evaluations and observation by a supervising instructor. Research assistantships are typically funded by individual faculty grants and vary depending on the nature of the funded project. Duties often involve activities such as sample collection and preparation; collection, analysis, and interpretation of analytical or measurement data; preparation of maps and diagrams; and assistance with fieldwork.

Outstanding students who are entering their first year of graduate school and are enrolled in doctoral programs may apply for Presidential Graduate Fellowships, which provide two academic years and all summers without formal work assignments, freeing students to pursue their own research.

The department also awards a significant number of tuition scholarships based on merit.

Facilities

Resources and equipment available for research in the Department of Geoscience include the following.

Computer facilities: five networked PC teaching classrooms; a high-end SGI-UNIX teaching classroom with GIS, GMS, remote sensing, image analysis, and computational software packages; a number of multiprocessor SUN and SGI workstations, IBM RISC-6000 workstations; and high-end SGI servers.

Environmental and Hydrogeology Laboratory: permeameters and tensionometers; pumping and slug/bail test units with
transducers and data-loggers; water-quality analysis facility; advanced groundwater modeling and geostatistics software; advanced data logging systems for field research; 3-D sensor arrays (wind and water systems); and facilities for field instrumentation design and construction.

**Environmental Instrumentation Laboratories:** storage, testing, and teaching facility focusing on field instrumentation; assembly, housing, and testing of climatic, meteorological, fluvial, water quality and associated environmental instrumentation data recording systems and sampling systems.

**Geomorphic Computing Laboratory:** high-end SGI visualization systems (SGI onyx reality engine); high-end digitizing remote sensing and GIS systems; and high-end SGI and SUN multiprocessors workstations.

**Geoscience Library:** a branch of University of Iowa Libraries that serves the University community, the Iowa Geological Survey Bureau, and the public; more than 55,000 volumes to support research, study, and teaching, including publications of state, federal, and international geological surveys and field trip guidebooks; more than 73,000 geological maps, including the newest versions of U.S. topographic quadrangle maps.

**Morphometric laboratories:** reflex microscope for capturing 3-D data; high-resolution digital cameras and microscopes for 2-D image analysis; and laboratories for micro- and macro-fossil preparation.

**Paleontological Repository:** more than a million specimens, including some 25,000 type and referred specimens, with 6,000-7,000 primary types; invertebrate, vertebrate, and plant fossils of all geologic ages, and more than 90 percent Paleozoic invertebrates; the fifth-largest university collection in North America (CONARIP 1977); editorial office of the *Journal of Paleontology*.

**Petrology laboratories:** clean laboratory for preparation of samples for elemental and isotopic analysis; alpha-spectrometry laboratory; image analysis; heating freezing stage; petrographic microscopes; photo microscopy; wet-chemistry facilities; rock preparation and mineral separation; and UNIX, Windows, and Mac workstations for data analysis and modeling.

**Quaternary Materials Laboratory:** pipette grain-size analysis apparatus; chittick apparatus; Sedigraph 5100 X-ray particle-size analyzer; wet-chemistry facilities; a Flotech flotation system; and a Giddings drill rig.

**Sedimentary geology laboratories:** water ion chromatograph; image analysis; sedigraph X-ray particle-size analyzer; and a soil/sediment characterization laboratory.

**Stable Isotope Laboratory:** Finnigan MAT 252 IRMS; Kiel III carbonate reaction device; H/device; Gasbench II; IsoCarp automated microsampling device; and a Costech CHNS Analyzer.

**Thin-section and rock preparation laboratory:** diamond saws and specialized grinding equipment used to prepare ultrathin slices (30 microns thick) of rocks and fossils for microscopic and electron microprobe analysis.

**Cooperative Activities**

The department does collaborative work with the Iowa Geological Survey Bureau and the Office of the State Archaeologist of Iowa. Geoscience students sometimes work on projects for the survey.

The Departments of Geoscience, Geography, Anthropology, Chemistry, Civil and Environmental Engineering, and Biological Sciences share services, expertise, joint instruction, and equipment. The geoscience department is an important participant in the Iowa Quaternary Studies group, an interdisciplinary program that promotes projects combining work in geology, geography, biological sciences, anthropology, and statistics. Course work, degree programs, and facilities are shared among departments. The geoscience department and its faculty also support and actively participate in the interdisciplinary Environmental Sciences Program, which offers a Bachelor of Science degree.

**Field Trips**

Field trips are integral parts of several courses in geoscience, with frequent weekend general-interest events. The geology of the Iowa City region is characterized by Quaternary glacial sediments on a largely Paleozoic sedimentary section a few hundred meters thick, overlying a Precambrian crystalline basement. Marine and terrestrial fossil assemblages, extensive reefs, and unique geode sites are located within a few hours’ drive. Numerous Pleistocene glaciations are represented in Iowa, and field studies of landforms, exposures, and cores continue to yield information on sedimentology, stratigraphy, soil formation, paleopedology, and fossil biotas from both glacial and interglacial deposits.
Spring break provides time for longer trips, which are open to all geoscience students. In recent years, students have traveled to Hawaii, Puerto Rico, Death Valley, the Florida Keys, the southern Appalachians, Arizona, New Mexico, Texas, and the Ozarks. Advanced classes have visited Colorado, Kansas, Oklahoma, Wisconsin, California, and Ontario, Canada.

**Courses**

Not all courses are offered every year.

**Primarily for Undergraduates**

</table>
012:158 Biogeochemical Cycles and Modeling 3 s.h.
Fundamental processes and reactions that control elemental distribution on the earth’s surface; major biogeochemical cycles from global to microscopic scales, and their modeling at different time scales. Prerequisite: consent of instructor.

012:161 Stratigraphy 3 s.h.
Genesis of sedimentary rocks, geologic time, stratigraphic nomenclature, biostratigraphic and physical correlation methods, mass extinctions, sequence stratigraphy, basin analysis and modeling, stratigraphic field methods. Offered fall semesters. Prerequisite: 012:052 or consent of instructor.

012:166 Hydrogeology 3 s.h.
Groundwater hydrology, well hydraulics, regional aquifer systems, groundwater contamination and remediation, principles of groundwater flow and contaminant transport, slug/bail and pumping tests and analysis. Prerequisite: senior or graduate standing.

012:170 Paleocology 3 s.h.
Archaeological, botanical, zoological, physical, chemical means of reconstructing ice-age environments; techniques, results; interdisciplinary approach; field trips. Prerequisite: consent of instructor. Same as 044:183.

012:172 Glacial and Pleistocene Geology 3 s.h.
Interactions among glaciers, oceans, and climate; glacier dynamics; evolution of Earth’s Pleistocene and landscapes; Pleistocene stratigraphy. Prerequisite: physical geology or physical geography or anthropology.

012:173 Quaternary Environments 3 s.h.
Evolutionary history of terrestrial and marine ecosystems; ecological processes from population to ecosystem levels; community assembly, trophic levels, networks, biodiversity dynamics; practical aspects of paleoecological data collection, statistical analysis, modeling. Prerequisite: 002:010 or 002:011 or 012:004 or 012:006 or 012:121 or consent of instructor.

012:177 Geostatistics 3 s.h.
Applications of geostatistical methods to geology, geography, hydrology, environmental sciences, and engineering, variogram, Kriging, analysis of spatial-varied data with ranked computer software in participants’ specialties. Same as 044:188.

012:178 Engineering Geology 3 s.h.
Basic concepts in geology focusing on rock and soil, including material properties, spatial variability in properties, geological processes, external factors such as stress, evaluation of engineering design adequacy, site investigation and characterization techniques used to define and characterize geotechnical and hydrogeological properties of geological materials; case studies to illustrate the importance of geology on engineering design. Recommended. 012:005. Same as 053:105.

012:180 Principles of Geophysics 3 s.h.
What we know about the physics of the Earth and how we know it: geophysical measurement and data processing techniques, earthquakes and seismology, gravity and isostasy, magnetic fields and paleomagnetism, heat flow, internal structure, radioactivity and age dating, geophysical evidence for plate tectonics. Prerequisite: introductory geology or physics.

012:181 Exploration Geophysics 3 s.h.
Techniques used in exploration for oil and gas, minerals, groundwater, and subsurface structure: gravity, magnetic, seismic, electrical, and electromagnetic methods. Offered spring semesters. Prerequisite: 012:180, or college geology, physics, or mathematics, or consent of instructor.

012:184 Groundwater Modeling 3 s.h.
Groundwater flow and contaminant transport in modeling; numerical methods, applications of groundwater modeling to water supply, groundwater resources evaluation, remediation design using software, GMS (MODFLOW, MODPATH, and MT3D). Prerequisite: 012:166 or 053:103, and 22M:026. Same as 053:104.

012:185 Approaches to Geoarchaeology 3 s.h.
Geoarchaeology as multidisciplinary contextual framework for human paleoecology; natural processes that create the archaeological record, approaches to reconstructing landscapes of the past as a context for archaeological deposits. Prerequisite: 012:136 or 012:172 or 113:160 or 113:161 or 113:164 or consent of instructor. Same as 113:189.

012:186 Contaminant Hydrogeology 3 s.h.
Physical and chemical processes that govern mass transport, transformations, retardation, and attenuation of contaminants in groundwater; survey of sampling, monitoring, and groundwater remediation techniques; analytical and numerical solutions of equations using spreadsheets, computers. Same as 053:186.

012:187 Vadose Zone Hydrology 3 s.h.
Introduction to vadose zone hydrology; development and application of equations describing flow and transport in vadose zone, including multiphase flow; field and laboratory methods for vadose zone characterization, vadose zone processes that cause groundwater contamination; case studies to illustrate vadose zone hydrologist’s importance in engineering design, groundwater contamination. Prerequisite: 012:166 or equivalent. Same as 053:181.

012:188 Environmental Seminar 1 s.h.
Lectures on the environment by faculty members from the University, other colleges and universities, researchers and professionals from state and federal agencies.

012:190 Undergraduate Geoscience Colloquium 1-2 s.h.
Presentation, discussion of undergraduate research projects. Prerequisite: consent of department chair.

012:191 Geotectonics 3 s.h.
Dynamic processes responsible for crustal genesis, plate movements, mountain building; plate boundary zones; sedimentologic, structural, petrologic, geophysical characteristics of major tectonic settings; multidisciplinary approach; week-long field trip. Prerequisite: 012:092.

012:194 Environmental Field Methods 3 s.h.
Integrated, comprehensive, field-based overview of environmental sampling concepts and methods for geoscience and hydroscience. Three weeks. Same as 159:104.

012:195 Field Methods: Environmental Processes 2-4 s.h.
Problem definition and research design in a field setting; sampling theory and procedures; collection of primary data using different sensor and recording methods; data analysis and interpretation of processes in geomorphic, climatic, environmental research. Prerequisite: 12 s.h. of geoscience or environmental science or equivalent or consent of instructor. Same as 053:180.

Primarily for Graduate Students

012:201 Geoscience Seminar Series 0 s.h.
Scholarly work and research in geoscience. Repeatable.

012:207 Geologic Orientation 1 s.h.
Department degree requirements; programs; field survey of local geology; tips for TAs; introduction to specialized facilities; for new graduate students.

012:225 Paleontology Seminar 1-3 s.h.

012:233 Sedimentary Petrology 4 s.h.
Identification of constituents and interpretation of provenance genesis, structures, environments of formation, patterns and processes of diagenesis in sandstones and limestones, laboratory-based. Prerequisite: familiarity with optical microscope and sedimentation principles.

Assistant professor: Bruce Spencer

**Undergraduate Program**

The department offers the Bachelor of Arts in German.

**Bachelor of Arts**

Requirements for the major in German have changed. Students who entered the College of Liberal Arts and Sciences in summer 2005 or later, or who declared the major on or after the first day of fall semester 2005, must complete the requirements described below. Students who declared the major before the first day of fall semester 2005 may choose to complete the old requirements, but they must complete all requirements and graduate by August 2009.

The B.A. in German requires a minimum of 30 s.h. in the major. Students choose one of three tracks: the humanities track, the applied German track, or the comprehensive track. Students who plan to complete the undergraduate teaching major in German in conjunction with the College of Education are encouraged to choose the comprehensive track; see “Teaching Licensure in German” below.

Students who begin a German major with no previous German language experience must complete the following course sequences or their equivalents (the basic program).

- 013:011 Elementary German I 4 s.h.
- 013:012 Elementary German II 4 s.h.
- 013:021 Intermediate German I 4 s.h.
- 013:022 Intermediate German II 4 s.h.

The basic program also may be satisfied by various combinations of 013:113, 013:014, and 013:025. See the German department’s director of undergraduate studies for details.

Students must complete at least five upper-level German courses at The University of Iowa. Those who have taken upper-level course work at other institutions should consult the department’s director of undergraduate studies to determine how much work remains for completion of the major.

University graduates with degrees in German frequently enter the teaching profession. They also find positions in government, foreign service, and commercial enterprise.
such as German history, philosophy, and business.

HUMANITIES TRACK

The humanities track enables students to concentrate on German language, literature, and culture, both past and present. It is recommended for students who want to explore the world of German ideas and their influence through the ages. The following courses are required.

- 013:101 Introduction to German Literature 3 s.h.
- 013:103-013:104 Composition and Conversation I-II 6 s.h.
- 013:105 German Cultural History 3 s.h.
- 013:116 Advanced Composition and Conversation 3 s.h.

Three literature courses chosen from 013:140 through 013:159 9 s.h.

Two 100-level electives offered by the Department of German, including courses taught in English 6 s.h.

Introduction to German Literature (013:101) is prerequisite for all other literature courses.

APPLIED GERMAN TRACK

The applied German track gives students practical skills and proficiency in German for business and government. It is especially useful when combined with a business-oriented curriculum. The College of Liberal Arts and Sciences and the Tippie College of Business offer a joint program leading to the Certificate in International Business; see International Business in the Catalog.

The applied German track requires the following.

All of these:
- 013:103-013:104 Composition and Conversation I-II 6 s.h.
- 013:115 Contemporary German Civilization 3 s.h.
- 013:116 Advanced Composition and Conversation 3 s.h.

One of these:
- 013:107 Introduction to German Linguistics 3 s.h.
- A linguistics course numbered between 013:160 and 013:169 3 s.h.

Two of these:
- 013:108 The German Media 3 s.h.
- 013:114 Business German 3 s.h.
- 013:117 Current Issues 3 s.h.

COMPREHENSIVE TRACK

The comprehensive track provides a foundation in both literature and linguistics as well as a sound basis in speaking, reading, oral comprehension, and writing skills in German. It is recommended for students seeking teaching licensure and for those intending to pursue graduate studies in German. The following courses are required.

All of these:
- 013:101 Introduction to German Literature 3 s.h.
- 013:103 Composition and Conversation I 3 s.h.
- 013:104 Composition and Conversation II 3 s.h.
- 013:107 Introduction to German Linguistics 3 s.h.
- 013:116 Advanced Composition and Conversation 3 s.h.

One of these:
- 013:105 German Cultural History 3 s.h.
- 013:115 Contemporary German Civilization 3 s.h.

One literature course numbered between 013:140 and 013:159 3 s.h.

Three 100-level electives offered by the Department of German, selected with the undergraduate adviser, excluding courses taught in English 9 s.h.

Combined B.A./M.A.

The department offers the combined Bachelor of Arts/Master of Arts in German. The combined degree, which is designed to be completed in five years, is appropriate for students who enter The University of Iowa from high school with advanced German language preparation. Students in the program receive a B.A. in German when they have met all bachelor's degree requirements, and they receive an M.A. in German when they have completed all master's degree requirements.

The program is attractive to highly motivated students who plan to study abroad and who plan to pursue a Ph.D. in German or second language acquisition. It may serve as preparation for other programs such as those related to international
studies, library science, business with an international focus, or international relations. Students seeking careers in teaching or other fields may pursue the combined degree as a credential.

Applicants to the joint program must:

be University of Iowa undergraduate students;

have completed 80 s.h. or be in the process of completing at least 90 s.h. of undergraduate work;

have completed or be in the process of completing at least 21 s.h. of 100-level courses in the German major;

have a g.p.a of at least 3.50 at the time of application, or have a letter from a Department of German faculty member recommending an exception; and

have completed or be in the process of completing at the time of application a study abroad program in a German-speaking country, or have satisfied this requirement another way.

Applicants must be admitted to the combined program before the beginning of their seventh semester (senior year).

Students in the program must meet the usual requirements for the combined track of the B.A. in German as well as those for the M.A. They ordinarily spend two semesters in their junior year enrolled in the study abroad program at the University of Freiburg, in Germany (see “Study Abroad” below) unless they have met this expectation another way (e.g., a year abroad during high school or a study abroad program with similar content).

During the last two semesters of their senior year, they may take up to 12 s.h. of graduate-level courses, which may be counted toward both degrees, as follows: 6 s.h. may be counted toward the course requirements for the undergraduate German major, and 6 s.h. may be counted as undergraduate electives.

Students must maintain an undergraduate German g.p.a. of at least 3.50; if they fail to meet this standard for more than one semester, they may be required to leave the program.

After completing the B.A. requirements, students complete the remaining M.A. requirements. They must have an undergraduate g.p.a. of at least 3.00 when they achieve graduate standing.

Students pay undergraduate tuition and fees during their first semester in the combined program enrollment (normally their seventh semester); beginning with their second semester in the program (normally their eighth semester), they begin paying graduate tuition and fees. Students may hold a graduate appointment beginning with their second semester in the program.

Teaching Licensure in German

German majors interested in licensure to teach in elementary and/or secondary schools must successfully complete the requirements for a major in German and must be admitted to the College of Education’s foreign language teacher education program. Several courses in the College of Education also are required, as is one semester of student teaching in the senior year. Contact the Department of Teaching and Learning for more details.

Students who plan to use a German minor to teach at the elementary and/or secondary level must contact the College of Education concerning requirements.

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan.

Before the third semester begins: language competency equal to first-year German and at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: language competency equal to second-year German and at least one-half of the semester hours required for graduation

Before the seventh semester begins: four courses in the major and at least three-quarters of the semester hours required for graduation

Before the eighth semester: two to three additional courses in the major

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Honors

Honors in German is open to exceptional students who are members of the University Honors Program, which requires students to maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University Honors Program for more information). To participate in
honors in German, students must have completed three years of college-level German, or the equivalent, with a g.p.a. of at least 3.50 in upper-division German courses.

Participating students register for the following courses.

013:190 Honors Program in German 3 s.h.
013:191 Honors Research and Thesis 3 s.h.

Honors students are expected to engage in readings and discussions in German literature and culture and to write essays in German and English. Students meet with their faculty director of studies on a regular basis.

The program concludes with presentation of an honors thesis to a faculty committee of at least three members.

Minor

A minor in German requires 15 s.h. of course work in college-level German with a g.p.a. of at least 2.00; 12 of the 15 s.h. must be in advanced courses (numbered 100 and above) at The University of Iowa, although students may count 6 s.h. earned in study abroad at a university in a German-speaking country toward the minor. All courses numbered 100 and above count toward the minor except courses in which works in German are taught in English translation.

Language for Nonmajors

The department offers a number of opportunities for students who wish to study German. Students who have had experience with the language should take the Foreign Language Placement Test in German, offered during summer orientation programs and monthly by Evaluation and Examination Service. The test helps determine the level at which a student should begin German language study at The University of Iowa.

Students with no background in German should begin their study with 013:011 Elementary German I.

Students who wish to use German to complete the foreign language component of the General Education Program can choose from a number of course sequences. All of the following satisfy the requirement. Students are encouraged to talk with departmental advisers about the varied sequences.

013:113, 013:021, 013:022
013:014, 013:021, 013:022
013:011, 013:012, 013:125
013:113, 013:125
013:014, 013:125

Graduate Programs

The department offers the Master of Arts in German with a literature or linguistics concentration, and a Doctor of Philosophy in German, with a literature, linguistics, or combined literature and linguistics concentration. It also offers a combined Bachelor of Arts/Master of Arts for advanced undergraduates; see “Combined B.A./M.A.” above.

Courses in the department are offered in two broad categories: German literature (e.g., 013:227 German Novelle, 013:295 German Literature from Naturalism to Expressionism), and Germanic linguistics (e.g., 013:241 History of the German Language, 013:255 Semantics).

Applicants must meet the admission requirements of the Graduate College; for detailed information about Graduate College policies, see the Manual of Rules and Regulations of the Graduate College section of the Catalog.

Master of Arts

The M.A. in German is offered with and without thesis. Both options require a minimum of 33 s.h. of qualifying course work; thesis students prepare and defend a thesis.

M.A. students choose one of two concentrations: German literature and Germanic linguistics. The German literature concentration requires seven literature courses (21 s.h.) and four linguistics courses (12 s.h.). The Germanic linguistics concentration requires seven linguistics courses (21 s.h.) and four literature courses (12 s.h.).

M.A. students are expected to complete at least 24 s.h. in the Department of German. All M.A. course work taken outside the department requires the graduate adviser’s approval.

Doctor of Philosophy

The Ph.D. in German requires a minimum of 75 s.h., including at least 27 s.h. in post-M.A. courses and a dissertation. No more than 12 s.h. of post-course-work dissertation credit may be counted toward the degree.

Ph.D. students choose one of three concentrations: German literature, Germanic linguistics, or combined literature and linguistics.
In addition to satisfying the course requirements of their concentration, students must develop an independent research program that combines core and specialty areas within their concentration. These areas form the basis for the student's qualifying exam, comprehensive exam, and dissertation.

German literature students must complete five literature courses (15 s.h.) and must earn 12 s.h. of the required 27 s.h. in post-M.A. courses in the Department of German.

Germanic linguistics students must complete at least five linguistics courses (15 s.h.) and must earn 12 s.h. of the required 27 s.h. in post-M.A. courses in the Department of German.

Combined literature and linguistics students must complete at least 5 concentration area courses (15 s.h.) and must earn 21 s.h. of the required 27 s.h. in post-M.A. courses in the Department of German. They plan the balance of their courses with their advisory committee, generally taking four courses in their dissertation area.

All Ph.D. course work taken outside the department requires the graduate adviser's consent.

**CORE AND SPECIALTY READING LISTS**

By the end of their second semester in the Ph.D. program, students must have compiled a core area reading list and a specialty area reading list. The expectations for each list vary by concentration.

**German Literature Concentration**

The core area reading list for the literature concentration comprises 70-100 works that cover at least three genres from a distinct historical period of German literature. For sample reading lists, contact the Department of German.

The specialty area reading list for the literature concentration comprises 40 works from a specific field of literary research: a genre, body of theory, major author(s), or second historical period.

**Germanic Linguistics Concentration**

The core area reading list for the linguistics concentration comprises lists one and two in all six areas of the Department of German linguistics reading list. Students also select one of the six areas as a specialty concentration for the qualifying exam and assemble a reading list of 10-20 titles from the relevant list three of the linguistics reading list. The linguistics reading list is available from linguistics faculty members.

The specialty area reading list for the linguistics concentration comprises 10-20 titles from list three in one of the six areas of the Department of German linguistics reading list. The specialty list for the comprehensive exam must be in an area different from that for the core area of the qualifying exam.

**Literature and Linguistics Concentration**

The core area reading list for the combined literature and linguistics concentration comprises 35-50 works of literature in at least two genres from a specific literary period, and all titles from lists one and two in these areas of the Department of German linguistics reading list.

The specialty area reading list for the combined literature and linguistics concentration follows the guidelines for the linguistics or literature specialty area list, depending on the student's preference. The specialty area concentration must be distinct from that of the research paper: students who choose literature as the specialty area write a research paper that concerns linguistics, and those who choose linguistics as the specialty area write a research paper that concerns literature.

**QUALIFYING AND COMPREHENSIVE EXAMS**

Students prepare five essay questions on the basis of their core area reading list, in consultation with their qualifying exam committee, which approves the final list. The committee selects three of the questions for the student to answer in writing on the exam. Approximately one week after the written exam, the committee and student convene for a one-hour oral exam based on the core area reading list and the student's written exam responses.

No later than two weeks before the oral exam, the student must submit two essays to the comprehensive exam committee. One is a review essay (10-15 pages) that analyzes key issues in a selection of works from the student's specialty area reading list, together with an annotated bibliography that covers titles from the reading list not addressed in the essay. The other is a research essay (25-35 pages) of publishable quality written in consultation with the comprehensive exam committee chair; the essay may be based on a seminar paper of exceptional quality or a potential chapter of the student's dissertation. The student takes a final two-hour oral examination focusing on the review essay and research paper, ordinarily during finals week. After the oral exam, the student produces a written dissertation prospectus for approval by the dissertation committee.
Graduate Degree
Language Tools

Master of Arts
Before taking the M.A. exam, students must demonstrate reading knowledge of a foreign language other than German, at a level equivalent to two years of college study or four years of high school study.

Students may demonstrate competence by submitting proof that they have taken the required course work with a g.p.a. of at least 3.00, or by passing an exam at the fourth-semester college level as determined by the appropriate language department.

Doctor of Philosophy
Students must demonstrate a reading knowledge of two languages determined by the adviser to be pertinent to the student’s research interests.

Students may demonstrate competence by submitting proof that they have taken the required course work with a g.p.a. of at least 3.00, or by passing an exam at the fourth-semester college level as determined by the appropriate language department.

Financial Support
Teaching assistantships, research assistantships, and partial tuition scholarships are available for qualified graduate students. The department awards the Wilson and the Funke prizes to students of distinction.

Study Abroad
The Department of German participates in an academic year abroad program for undergraduates at the Albert-Ludwigs Universität in Freiburg, Germany. The Freiburg program is offered by a consortium made up of Michigan State University, The University of Iowa, The University of Michigan, and The University of Wisconsin-Madison.

Students arrive during the first week of September and participate in a four-week intensive language program. Then they take a blend of special program classes and regular German university courses. Organized field trips are designed to give students a broader perspective of German culture. Vacation periods permit extensive travel throughout Europe, and students are encouraged to use weekends for shorter trips in the region.

To apply, students must have reached at least junior standing by the beginning of the program, must have completed at least the first four semesters of college German or the equivalent, and must be in good academic standing at a U.S. college or university.

Students earn resident credit in all courses successfully completed in the program. They may count up to 21 s.h. earned at Freiburg toward the major in German. Credit also counts toward the minor in German. Students in other majors should consult with their adviser or their department’s undergraduate director.

Contact the Department of German or the Office for Study Abroad for more information.

Special Facilities
Students have the opportunity to improve their comprehension and command of German by working with recorded materials in the Language Media Center. They also may benefit from the computer-assisted instruction program.

An extensive collection of works and periodicals in the University of Iowa Libraries facilitates research in all major areas of German literature and Germanic linguistics and at all levels of study.

The International Crossroads Community is an on-campus housing option for undergraduate and graduate students.

Courses
Primarily for Undergraduates

013:011 Elementary German I 4 s.h.
Understanding and speaking “everyday German”; reading and writing skills; acquaintance with the German-speaking world through discussion, readings, videos. GE: foreign language

013:012 Elementary German II 4 s.h.
Continuation of 013:011. GE: foreign language. Prerequisite: 013:011 or equivalent.

013:014 First-Year German Review 5 s.h.
Accelerated course in preparation for third-semester German. GE: foreign language. Prerequisite: at least two years of high school German.

013:021 Intermediate German I 4 s.h.
Proficiency in spoken and written German; German-speaking cultures of central Europe, their historical background; emphasis on refinement of reading skill. GE: foreign language. Prerequisite: 013:012 or 013:014 or equivalent.

013:022 Intermediate German II 4 s.h.
Continuation of 013:021. GE: foreign language. Prerequisite: 013:021 or equivalent.

Health and Sport Studies

Chair: Susan Birrell
Professors: Susan Birrell (Health and Sport Studies/Women's Studies/American Studies), Kathleen F. Janz (Health and Sport Studies/Epidemiology)
Professors emeriti: Donald R. Casady, Margaret G. Fox
Associate professors: Christine H.B. Grant, Michael Lomax, Catriona Parratt, Elizabeth Pelton, Bonnie Slatton, Dawn E. Stephens
Associate professors emeriti: N. Peggy Burke, Carolyn Lara-Braud, David K. Leslie, Jeannette L. Scahill
Assistant professor: Kerry McGannon

Undergraduate degree: B.A. in Health and Sport Studies
Undergraduate nondegree program: Minor in Health and Sport Studies
Graduate degrees: M.A., Ph.D. in Health and Sport Studies
Web site: http://www.uiowa.edu/~hss

The Department of Health and Sport Studies offers programs of study at the undergraduate and graduate level that focus on health, sport, and physical activity as they are influenced by cultural, psychological, and behavioral factors. Graduates work in teaching, research, coaching, health promotion, and administration of athletic programs.

The department also houses the Physical Education Skills Program, which offers courses providing instruction and practice in various sports and fitness activities aimed at enhancing physical health and well-being. Physical Education Skills courses are approved in the health and physical activity area of the General Education Program.

**Undergraduate Program**

**Bachelor of Arts**

Requirements for the major in health and sport studies have changed. Students who entered the college in or after summer 2005, or who declared or entered the major on or after the first day of fall semester 2005, must complete the program described below. Students who declared or entered the major before the first day of fall semester 2005 may choose to complete the old requirements, but they must complete all requirements and graduate by August 2009.

Students majoring in health and sport studies choose one of two tracks: health promotion or sport studies. Students may enter the sport studies track at any time; there is a selective admission process for the health promotion track.

**HSS FOUNDATION COURSES**

All health and sport studies majors should complete the following three foundation courses as early as possible.

- 028:036 Physical Activity Through the Life Span 3 s.h.
- 028:074 Inequality in Sport 3 s.h.
- 028:076 Psychological Aspects of Sport and Physical Activity 3 s.h.

Guided Independent Study or transfer courses may not be used to fulfill HSS foundation course requirements after a student has declared a health and sport studies major. Students who transfer to The University of Iowa and wish to substitute courses they completed at other institutions, before they declared an HSS major, for any of the foundation course requirements must complete a Request For Substitution of Courses form, available at the department office. Substitutions are granted only on the basis of course content duplication. At least half of all credit in the major must be earned in residence at The University of Iowa.

**Health Promotion**

The health promotion program integrates theoretical and applied study of health education with biological, behavioral, and social processes that affect individual and community health. It encourages students to envision health promotion as a multidisciplinary tool for building healthy communities and empowering individuals at greater risk for disease and premature death. Lifestyle interventions, community health education, and environmental health supports are central tenets of this program.

Health promotion prepares students for employment opportunities in hospital-based and corporate-based wellness programs, nonprofit health agencies, commercial fitness enterprises, and federal and state health promotion agencies. Employment opportunities in these sectors have been good to excellent and are expected to increase, according to U.S. Department of Labor projections.
The undergraduate curriculum provides opportunities to develop introductory and advanced skills in physical activity promotion and exercise prescription, dietary assessment and planning, stress management, health communication, health education, and facility-based management.

Health promotion courses address certification competencies for the American College of Sports Medicine (ACSM) Health Fitness Instructor, the National Commission for Health Education Credentialing Certified Health Education Specialist (CHES), and the National Strength and Conditioning Association (NSCA)—National Strength and Conditioning Specialist.

Community and clinical practicum experiences give students the opportunity to apply health promotion concepts and skills. As a capstone experience, supervised internships are available in a variety of organizational settings, both nationally and internationally.

To be admitted to the health promotion program, students must complete a minimum of 24 s.h. at The University of Iowa, including 002:002 Introductory Animal Biology (or 002:021 Human Biology), 004:007 General Chemistry I (or one year of high school chemistry), 004:008 General Chemistry II, 22S:025 Elementary Statistics and Inference, and 027:053 Human Anatomy (or 060:110 Principles of Human Anatomy). Equivalent or more advanced courses that address the same content areas may be substituted with the department's approval.

Applicants must have a g.p.a. of at least 2.70 in all University of Iowa course work and a cumulative g.p.a. of at least 2.70. Transfer students must meet the same requirements (including the same chemistry, biology, anatomy, and statistics courses), except that they must have completed a minimum of 12 s.h. at The University of Iowa.

Students who have a University of Iowa or cumulative g.p.a. lower than 2.70 may apply under an exceptional admission policy.

Once admitted to the health promotion program, students should plan on a course of study of at least two years. Applications must be submitted to the department's undergraduate director by October 15 for spring admission and by March 15 for fall admission. For health promotion program admission forms, see “Programs” on the Department of Health and Sport Studies web site.

Students in health promotion must complete the 9 s.h. of HSS foundation courses and the following course work.

### Health Promotion Core
These are required (22 s.h.).

- 027:140 Exercise Physiology for Practitioners 3 s.h.
- 028:038 Understanding Food and Nutrition 3 s.h.
- 028:075 Health in Everyday Life 3 s.h.
- 028:138 Exercise Testing and Prescription 4 s.h.
- 028:141 Health Promotion Theory and Practice 3 s.h.
- 028:142 Worksite Health Promotion 3 s.h.
- 028:145 Health Promotion Processes 3 s.h.

### Health Promotion Electives
Students must complete 12 s.h. of electives or the internship option, which consists of 6 s.h. chosen from the list of electives plus 028:190 Preinternship Seminar and 028:191 Internship. In order to be eligible for an internship, students must earn a grade of C-minus or higher in each of their health promotion core and elective courses.

Electives:

- No more than one of these:
  - 06A:001 Introduction to Financial Accounting 3 s.h.
  - 06A:020 Accounting for Nonbusiness Students 3 s.h.
  - 06T:113 Basics of Small Business Accounting 1 s.h.
  - 06T:120 Entrepreneurship and New Business Formation 3 s.h.
  - 07C:112 Human Sexuality 3 s.h.
  - 07C:185 Introduction to Substance Abuse 3 s.h.
  - 028:020 Alcohol and Your College Experience 1 s.h.
  - 028:021 Tobacco and Your College Experience 1 s.h.
  - 028:030 Principles of an Exercise Class 2 s.h.
  - 028:031 Health-Related Muscular Fitness 2 s.h.
  - 028:032 First Aid and CPR 2 s.h.
  - 028:033 Nutrition through the Life Span 3 s.h.
  - 028:034 First Aid and CPR for Instructors 2 s.h.
  - 028:035 Stress Management 2 s.h.
  - 028:077 Understanding Peak Performance in Sport 2 s.h.
  - 028:132 Fitness/Sport Nutrition 3 s.h.
  - 028:133 Nutrition through the Life Span 3 s.h.
  - 028:134 Nutrition Intervention 3 s.h.
  - 028:143 Health Communications Programming 3 s.h.
  - 028:144 Peer Health Education 2 s.h.
  - 028:146 Seminar: Health Education Specialist 2 s.h.
  - 028:147 Promoting Health Globally 2 s.h.
  - 028:148 Practicum in Health Promotion 1 s.h.
028:166 Exercise for Special Populations 1 s.h.
028:190 Preinternship Seminar (may be taken as an elective if not completing the internship option) 1 s.h.
028:194 Honors Readings 1-2 s.h.
028:195 Honors Problems 3-4 s.h.
071:120 Drugs: Their Nature, Action, and Use 2 s.h.
071:130 Drug Mechanisms and Action 3 s.h.
152:150 Global Health Seminar 2 s.h.
152:152 Global Health Conference 1 s.h.

Internship option:
Courses chosen from the preceding list of electives 6 s.h.
028:190 Preinternship Seminar 1 s.h.
028:191 Internship 6, 12 s.h.

Sport Studies
This program is for students who want to examine sport in its historical and contemporary cultural contexts. Course work in history, sociology, and psychology of sport and physical activity provides students with the critical skills necessary to understand sport as a significant aspect of cultural life. Sport’s interactions with educational institutions, the media, the economy, and the political system are examined critically. Race, class, and gender differences in the sport experience are explored.

Many students use their experience in the program to prepare for graduate school. For others, the required second area of concentration or minor serves as an introduction to careers in a number of fields, such as sport journalism and athletic administration.

Students enrolled in the sport studies program must complete the 9 s.h of HSS foundation courses, the sport studies core, and selected electives.

Sport Studies Core
These are required (12 s.h.).
One of these:
028:078 Women, Sport, and Culture 3 s.h.
028:079 Race and Ethnicity in Sport 3 s.h.
One of these:
028:175 Sport and the Media 3 s.h.
028:188 Twentieth-Century U.S. Sport 3 s.h.
One of these:
028:176 Sport and Nationalism 3 s.h.
028:177 Western World Sport: Greeks to Present 3 s.h.

One of these:
028:178 Sport in the U.S. to 1900 3 s.h.
028:179 The American Vacation 3 s.h.

Sport Studies Electives
Students must complete at least 11 s.h. of course work from courses offered by the Department of Health and Sport Studies. Courses that have not been used to fulfill the “Sports Studies Core” above and the following are recommended.
028:032 First Aid/CPR 2 s.h.
028:035 Stress Management 2 s.h.
028:077 Understanding Peak Performance in Sport 2 s.h.
028:143 Health Communications Programming 3 s.h.
028:147 Promoting Health Globally 2 s.h.
028:180 Theory and Ethics of Coaching 3 s.h.
028:193 Independent Study 1-3 s.h.
028:194 Honors Readings 1-2 s.h.
028:195 Honors Problems 3-4 s.h.
028:198 Topics 1-3 s.h.

Concentration or Minor
Sport studies students also must complete a concentration or minor of 15 s.h. in an area, program, or department outside health and sport studies—for example, American studies, business administration, journalism, or women’s studies. They must choose the area in consultation with their adviser. Of the 15 s.h., 6 must be earned in 100-level courses or in courses designated as advanced by the offering unit. No course counted for the concentration or minor may be taken pass/nonpass.

Four-Year Graduation Plan
The Four-Year Graduation Plan is not available for the B.A. in health and sport studies. Students are encouraged to work with their advisers to develop an individual graduation plan.

Honors
The honors program in health and sports studies is designed for superior students. It gives participants some research experience and a perspective on graduate study. To be eligible for honors study in the Department of Health and Sport Studies, a student must have declared a major in the department and be a member of the University Honors Program, which requires that students maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University Honors Program for more information). Visit the Department of Health and Sport Studies web site for details.
Minor

A minor in health and sports studies requires at least 15 s.h. of course work in the department with a g.p.a. of at least 2.00. Of the 15 s.h., 6 must be taken in advanced (100-level) courses at The University of Iowa. Students choose courses according to their interests and the recommendations of the undergraduate director.

No courses accepted toward the minor may be taken pass/nonpass.

Coaching Endorsement

Any student in a teaching licensure program may receive a coaching endorsement on his or her license by completing the following courses and applying through the College of Education Office of Teacher Education and Student Services.

- 027:053 Human Anatomy 3 s.h.
- 027:057 Basic Athletic Training 3 s.h.
- 027:117 Human Growth and Motor Development 3 s.h.
- 028:180 Theory and Ethics of Coaching 3 s.h.

The following courses are highly recommended, but not required.

- 027:107 Introduction to Biomechanics 3 s.h.
- 027:140 Exercise Physiology for Practitioner 3 s.h.
- 028:032 First Aid and CPR 2 s.h.

Coaching Authorization

Any student in a nonteaching program may receive coaching authorization by completing the following courses and applying directly to the Iowa Department of Public Instruction. For coaching authorization application forms, contact the Department of Health and Sport Studies.

- 027:053 Human Anatomy 3 s.h.
* 027:057 Basic Athletic Training 3 s.h.
- 027:117 Human Growth and Motor Development 3 s.h.
- 028:180 Theory and Ethics of Coaching 3 s.h.

*Students should take 027:053 and obtain first aid certification before taking 027:057.

In addition, it is highly recommended that students obtain practical coaching experience. Such experience may be available through local public and private schools, recreation departments, and community groups. Students eligible for coaching endorsement (those who plan to be licensed as teachers) may earn credit by registering for 075:198 Coaching Practicum.

Graduate Programs

The department offers the Master of Arts and the Doctor of Philosophy, both with two specialization areas.

Master of Arts

The M.A. offers specialization areas in psychology of sport and physical activity, and sport studies. Students in psychology of sport and physical activity may choose an emphasis on sport psychology or health promotion. Students in sport studies may choose an emphasis on cultural studies of sport or athletic administration.

The degree is awarded upon completion of at least 33 s.h. of graduate course work including thesis, or 36 s.h. without thesis. All M.A. students must complete a group of foundation courses, supplemented with work in their specialization area.

FOUNDATION COURSES

- 028:202 Critical Perspectives 3 s.h.
- 028:204 Research Methodologies 3 s.h.
- 028:300 Research Colloquium 1 s.h.

A graduate-level course in statistics or cultural analysis 3 s.h.

Specialization Areas

PSYCHOLOGY OF SPORT AND PHYSICAL ACTIVITY

The psychology of sport and physical activity specialization focuses on the dynamic interaction of psychological, cultural, and behavioral processes that inform and explain behavior in sport, health, and physical activity. The curriculum integrates the psychosocial aspects of participation in sport and physical activity with an analysis of the health consequences of a sedentary lifestyle. In addition to providing a theoretical framework for understanding sport and health-related behavior, the specialization provides students with an opportunity to develop skills in exercise prescription and assessment, dietary assessment, and stress management. Practicums are available at the University of Iowa Student Health Service, University of Iowa Hospitals and Clinics, Johnson County Public Health, and local community agencies. Graduates go on to doctoral programs in sport, health, or associated fields, or they enter health promotion, athletic, or sport professions in government, nonprofit organizations, and business.
SPORT STUDIES

Sport studies is an interdisciplinary program that draws on the insights of sociology, history, philosophy, and psychology to produce analyses of health, sport, and physical activity. Graduates go on to doctoral study in cultural studies of sport or to entry-level positions in athletic administration. Students supplement departmental course work with courses in other departments, such as American studies, communication studies, women’s studies, history, psychology, sociology, and business. Internships are available in The University of Iowa Athletic Department.

Assistantships

A number of teaching and research assistantships are available. Teaching assistants teach physical education skills courses or support general education courses offered by the department. Research assistants work directly with faculty members to support research programs. Apply to the Department of Health and Sport Studies chair.

Doctor of Philosophy

The Ph.D. program offers two areas of specialization: psychology of sport and physical activity, and sport studies. Students in the sport studies concentration may choose an emphasis in either athletic administration or cultural studies. Most students enter the doctoral program after completing a master’s degree.

The Ph.D. entails 60 s.h. of course work beyond the master’s degree. All doctoral students must complete a total of at least 72 s.h. of graduate work, including general requirements for the M.A. and credit for the dissertation. They also must satisfy the residency requirement by completing at least two semesters (minimum of 9 s.h. each) in residence at The University of Iowa.

FOUNDATION COURSES

Ph.D. students must take these.

028:202 Critical Perspectives 3 s.h.
028:204 Research Methodologies 3 s.h.
028:300 Research Colloquium 1 s.h.

In addition, all doctoral students must complete a dissertation and take at least 3 s.h. of advanced research methodologies.

Specialization Areas

PSYCHOLOGY OF SPORT AND PHYSICAL ACTIVITY

The psychology of sport and physical activity program focuses on psychological processes as they interact with social and cultural forces. Scholarship in this program advances understanding of behavior in sport and physical activity through evaluation of theories that predict behavior and through testing interventions that promote sport and physical activity. Interdepartmental study is central to the program; students may draw from course work in psychology, epidemiology, counselor education, and women’s studies. The program provides students with the analytical and research skills necessary for teaching and scholarship at the university level.

SPORT STUDIES

The sport studies specialization is an interdisciplinary program that explores sport with insights from sociology, history, and the humanities as well as interdisciplinary fields such as communication studies and women’s studies. Students develop analytical skills in order to produce research and cultural criticism of sport, leisure, dance, and physical activity. Careers in scholarship and teaching are the usual outcomes of such a curriculum.

The sport studies curriculum also provides a foundation for an athletic administration emphasis. Students usually pursue this emphasis to prepare for administrative work at all levels within collegiate sport, including Division I. Opportunities to work in The University of Iowa Athletic Department are available.

Assistantships

Teaching assistantships and research assistantships are available. Teaching assistants teach throughout the undergraduate program, including physical education skills courses. Research assistants work directly with faculty members to support research programs. Apply to the Department of Health and Sport Studies chair.

Courses

028:020 Alcohol and Your College Experience 1 s.h.
Patterns of alcohol, drug use focused on college years; strategies for monitoring use, behavioral change plans for implementing lower-risk drinking practices; for drinkers and non-drinkers.

028:021 Tobacco and Your College Experience 1 s.h.
Current behavior change theories related to tobacco use, cessation, nicotine replacement therapies (NRT), non-NRT
methods; triggers, relapse prevention, cognitive behavioral skills, support systems, for smokers and non-smokers.

028:029 First-Year Seminar  1-2 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Prerequisite: first- or second-semester standing.

028:030 Principles of an Exercise Class  2 s.h.

028:031 Health-Related Muscular Fitness  2 s.h.
Educational and practical experience for designing resistance training and flexibility programs; competencies for certification with National Strength and Conditioning Association.

028:032 First Aid and CPR  2 s.h.
Leads to American Red Cross first aid and adult CPR certifications.

028:034 First Aid and CPR for Instructors  2 s.h.
Preparation for American Red Cross first aid and adult CPR instructor certification. Prerequisite: first aid/CPR certification.

028:035 Stress Management  2 s.h.
Stress, the stress response; causes and consequences, management. GE: health and physical activity.

028:036 Physical Activity Through the Life Span  3 s.h.
Physical activity determinants in society; school, workplace, community-based health promotion interventions to improve activity levels; practicum experiences. GE: health and physical activity.

028:038 Understanding Food and Nutrition  3 s.h.
Physiology, biochemistry of human nutrition; appropriate food sources, qualitative and quantitative evaluation of diets using standard references. Prerequisite: simple arithmetic and computer skills.

028:074 Inequality in Sport  3 s.h.
Role of sport in the phenomenon of nationalism; selected theories; biographies, adolescent fiction.

028:133 Nutrition Through the Life Span  3 s.h.
How body processes and nutritional needs change with age and the physiological state; effects of food-drug medication interactions, anorexia, bulimia, and adolescent pregnancy; emphasis on food and health habits that minimize nutrition-related problems. Prerequisite: 028:038. Same as 153:133.

028:134 Nutrition Intervention  3 s.h.
Strategies for meeting unique nutritional needs of individuals with limitations imposed by genetics, trauma, aging, medications, and so forth. Prerequisite: 028:038.

028:138 Exercise Testing and Prescription  4 s.h.
Basic techniques in physical fitness assessment, prescription of exercise for healthy and unhealthy adults, promotion of physical activity within communities; provides knowledge and skill competencies required for certification as American College of Sports Medicine health fitness instructor. Prerequisites: 027:140 and admission to health promotion program.

028:141 Health Promotion Theory and Practice  3 s.h.
Principles of epidemiology and health behavior theories applied to multilevel frameworks for health promotion. Prerequisite: 028:075.

028:142 Worksite Health Promotion  3 s.h.
Management and organizational theories; assessment, planning, implementation, and evaluation of clinical and work-setting (targeted) health promotion programs.

028:143 Health Communications Programming  3 s.h.
Development, implementation, evaluation of effective health communication interventions; identification of health education resources for targeted groups. Prerequisite: 028:075.

028:144 Peer Health Education  2 s.h.
Experience acting as a peer educator, assisting students in their residential areas, presenting educational outreach programs on health topics, making referrals to campus and area agencies. Prerequisite: consent of instructor.

028:145 Health Promotion Processes  3 s.h.
Assessment, planning, implementation, and evaluation of health promotion programs. Prerequisite: 028:141.

028:146 Seminar: Health Education Specialist  2 s.h.
Development or refinement of competencies related to the seven professional responsibility areas of health educators; preparation for attainment of Certified Health Education Specialist (C.H.E.S.) credentials.

028:147 Promoting Health Globally  2 s.h.
Major global health threats in the United States and abroad; impact of culture, history, economics on health disparities; approaches, programs, policies to remedy them. Same as 152:158.

028:148 Practicum in Health Promotion  1-2 s.h.
Experience in planning, implementing clinical and community health promotion strategies including nutrition, physical fitness, cardiac rehabilitation, respiratory rehabilitation. Prerequisite: consent of instructor.

028:166 Exercise for Special Populations  1 s.h.
Laboratory experiences in development and implementation of exercise testing and prescription for special populations, including children, elders, and individuals with chronic diseases. Prerequisite: 028:138. Same as 153:166.

028:175 Sport and the Media  3 s.h.
Representations of sport in television, the press, fiction, films, biographies, adolescent fiction.

028:176 Sport and Nationalism  3 s.h.
Role of sport in the phenomenon of nationalism; selected theories; case studies on Ireland, Australia, British West Indies, Cold War U.S., fascist Europe.

History

Chair: Linda K. Kerber
Professors: R. David Arkush, Constance A. Berman, T. Dwight Bozeman (Religious Studies/History), Kenneth J. Cram, Jeffrey L. Cox, James L. Glick, Paul Greenough, Colin Gordon, Sarah Hanley, Linda K. Kerber (May Brodbeck Professor in the Liberal Arts and Sciences), Malcolm J. Rohrbough, David Schoenbaum, H. Shelton Smolga, Katherine Tachau, Stephen Vlastos
Professors emeriti: Lawrence E. Gelfand, Ralph E. Giese, Charles A. Hale, Ellis W. Hawley, Henry G. Horwitz, Jaroslaw Pelenski, Stow Persons, Alan B. Spitzer
Associate professors: Douglas Baynton (History/Speech Pathology and Audiology), Elizabeth Heineman, Susan C. Lawrence (History/Anatomy and Cell Biology), Paula Michaels, Mark Peterson, Leslie A. Schwalm, Allen Steinberg
Assistant professors: Michel Gobat, Laura Gorkowitz, Rosemary Moore (Classics/History), Kevin Mumsford, H. Glenn Penny, Jacki T. Rand (History/American Indian and Native Studies), Shira Robinson, Johanna Schoen (History/Women's Studies), Jennifer E. Sessions
Lecturer: Kathleen Kamerick
Undergraduate degree: B.A. in History
Undergraduate nondegree program: Minor in History
Graduate degrees: M.A., Ph.D. in History
Web site: http://www.uiowa.edu/~history

The Department of History’s purpose is to increase knowledge of human experience and provide students with opportunities to gain information about and learn methods for understanding their world in light of its past. In addition to offering these essential elements of a liberal education, the department trains professional historians and teachers of history and serves those who require knowledge of a period or aspect of history as background for their own specialized interests in other fields. Faculty and students in the department participate in many of the University’s interdisciplinary departments and programs, including American studies, African American world studies, ancient civilizations, Asian studies, international studies, Latin American studies, and women’s studies.

Undergraduate Program

Baccalaureate graduates in history work in a variety of positions in business, education, public service, advertising, and journalism. Many plan further training in history, law, religion, library and information science, or social work.

History majors are encouraged to take courses in other fields that illuminate and expand the meaning of history courses and that introduce information and a variety of approaches to understanding how societies and cultures work.

For example, students majoring in history are encouraged to complete the College of Liberal Arts and Sciences General Education Program foreign language component by choosing a language that fits their interests in history. The history faculty particularly encourages study abroad programs that complement students’ foreign area interests. Majors also are encouraged to improve their writing and speaking skills.

The major is for students with a general interest in history. Course requirements include a colloquium, which usually is taken during the sophomore year or the semester after the student elects a major in history. The required portfolio, which should consist of at least three papers the student has written while enrolled in history classes, is submitted to the student’s adviser during the semester before graduation.

College Level Equivalency Program (CLEP) and Advanced Placement Program credit cannot be used as part of the history major. Transfer work that is equivalent to University of Iowa course work can be accepted toward the major, but at least 18 s.h., including the colloquium, must be earned at The University of Iowa.

Undergraduate courses are divided into four areas: American history (prefix 16A), European history (16E), non-western world history (16W), and courses that have no area designation (016).
REQUIRED COURSES

Colloquium

One of these:

16A:051 Colloquium for History Majors (American) 3 s.h.
16E:051 Colloquium for History Majors (European) 3 s.h.
16W:051 Colloquium for History Majors (World) 3 s.h.

History majors take the colloquium as soon as possible after declaring their major. Every colloquium includes assigned papers; students must include in their history portfolio at least one paper from their colloquium.

Other Required Courses

Students must complete 36 s.h. in history courses, including the following.

At least 6 s.h. of American history, including at least one course numbered 16A:100 or above
At least 6 s.h. of European history, including at least one course numbered 16E:100 or above
At least 6 s.h. of non-western world history, including at least one course numbered 16W:100 or above

*At least 3 s.h. of pre-1700 history (see "Pre-1700 Courses")
* A course taken to fill the pre-1700 history requirement also may be counted toward the requirement in American, European, or non-western world history.

History Electives

In addition to the requirements listed above, the major requires 15 s.h. of elective courses in history (the total may include the colloquium). History electives may include no more than two of the following: 016:001 Western Civilization I, 016:002 Western Civilization II, 016:003 Western Civilization III, 016:005 Civilizations of Asia: China, 016:006 Civilizations of Asia: Japan, and 016:007 Civilizations of Asia: South Asia. Electives also may include all other courses offered by the department numbered 016:040, 16A:040, 16E:040, and 16W:040 or above. No more than 18 s.h. of American history (prefix 16A) may be counted toward the major.

Pre-1700 Courses

The following courses fulfill the 3 s.h. requirement for pre-1700 history:

016:001 Western Civilization I 3-4 s.h.
016:002 Western Civilization II 3-4 s.h.
016:005 Civilizations of Asia: China 3 s.h.
016:006 Civilizations of Asia: Japan 3-4 s.h.
016:007 Civilizations of Asia: South Asia 3-4 s.h.
016:045 Middle East and Mediterranean, Alexander to Suleiman 3 s.h.
016:160 The Atlantic World 1500-1800 3 s.h.
16A:115 Native North America I: Precontact-1789 3 s.h.
16A:121 The Puritan Experience 2-3 s.h.
16A:131 The Frontier in American History to 1840 3 s.h.
16A:161 The Colonial Period in America 3 s.h.
16E:101 Ancient Egypt and the Ancient Near East 3 s.h.
16E:103 Ancient Slavery and Modern Ideology 3 s.h.
16E:104 The World of Ancient Greece 3 s.h.
16E:105 Women in the Ancient World 3 s.h.
16E:106 Warfare in Ancient Mediterranean Society 3 s.h.
16E:107 The Hellenistic World and Rome BCE 14 CE 3 s.h.
16E:109 The Rise of the Roman Empire 264-395 CE 3 s.h.
16E:110 Medieval Civilization 3 s.h.
16E:111 Medieval Intellectual History 300-1150 3 s.h.
16E:112 Medieval Intellectual History 1150-1500 3 s.h.
16E:113 Economic and Social History of Medieval Europe 3 s.h.
16E:115 Twelfth-Century Renaissance 3 s.h.
16E:117 History of the Medieval Church 3 s.h.
16E:118 The Transition from Manuscript to Print 3 s.h.
16E:119 Women, Power, and Society in Medieval Europe 3 s.h.
16E:120 The Book in the Middle Ages 3 s.h.
16E:122 European Religious Reformations 1250-1750 3 s.h.
16E:125 Society and Gender in Europe 1200-1789 3 s.h.
16E:126 The French Revolutions and Human Rights 3 s.h.
16E:127 European History in Text and Film 4 s.h.
16E:128 The Age of Religious Wars 3 s.h.
16E:131 England: Reformation to the Civil War 1509-1649 3 s.h.
16E:133 Early Modern Europe 3 s.h.
16E:139 Ancient and Medieval Science 3 s.h.
16E:176 Imperial Russia 1598-1801 3 s.h.
16W:111 Colonial Latin America 3 s.h.
16W:120 Pre-Colonial African History 3 s.h.
Teacher Licensure

Students who wish to qualify for teaching licensure in secondary social studies education must complete their history major, at least 15 s.h. in U.S. history (16A), at least 15 s.h. in non-U.S. history (16E and 16W), and 15 s.h. in a related area chosen from economics, geography, anthropology, psychology, sociology, or American government. Courses taken as part of the history major, including Colloquium for History Majors (numbered 16A:051, 16E:051, or 16W:051) may be counted as part of the 15 s.h. in U.S. history and the 15 s.h. in non-U.S. history required for certification.

Students also must complete College of Education professional education courses required for teaching licensure. Not all political science courses count toward certification to teach American government. Course content must center around the American political system or American political issues.

For information about the Teacher Education Program (TEP) or the secondary social studies education program, consult the social studies program coordinator at the College of Education.

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan.

**Before the third semester begins:** at least one-quarter of the semester hours required for graduation

**Before the fifth semester begins:** three courses in the major (including Colloquium for History Majors) and at least one-half of the semester hours required for graduation

**Before the seventh semester begins:** four more courses in the major and at least three-quarters of the semester hours required for graduation

**Before the eighth semester begins:** three more courses in the major and submission of the portfolio of written work to the student's adviser during the eighth semester: enrollment in all remaining course work in the major (two courses), all remaining General Education courses, and a sufficient number of semester hours to graduate

Honors

The requirement for entry into the history department's honors program is the same as that for entry into the University Honors Program: a cumulative University of Iowa g.p.a. of at least 3.33. Through its honors program, the department provides outstanding students with opportunities to enhance their history major in several ways.

The most significant part of the honors program in history is the honors thesis. The thesis is an extended research paper (30-50 pages), usually completed during the senior year. Research for the thesis is done under the supervision of a faculty member who specializes in the field in which the student undertakes his or her research. Students register for 3 s.h. of 016:091 Honors Seminar and 3 s.h. of 016:092 Honors Thesis in each of two semesters. The 6 s.h. count toward the total number of hours needed for the history major.

Minor

Any student who completes at least 15 s.h. in history with a g.p.a. of 2.00 may earn a minor. Of the 15 s.h., 12 must be in advanced courses taken at The University of Iowa. For the minor, all courses numbered above 016:080, 16A:080, 16E:080, and 16W:080 are considered advanced.

Graduate Programs

The graduate programs in history prepare students for occupations such as high school or college teaching, publishing, commercial research, foundations and nongovernmental organizations, and government or other public service. With additional specialized training, students of history become qualified for careers in archival work, library work, museum work, or historical site preparation and display. Some students enter the joint program leading to degrees in both law and history (see "Joint Law and Graduate Degree Programs" in the College of Law section of the Catalog).

Students interested in graduate work should obtain a copy of the current Guide to Graduate Study at The University of Iowa from the Department of History office. The guide is revised
every spring to include the latest faculty listing, research interests of faculty members, detailed regulations on study toward advanced degrees, and other information for prospective students.

Master of Arts

The department offers two M.A. programs. The first is for students who plan to work toward the Ph.D. It requires a minimum of 30 s.h. of credit, including the completion of a research essay. The student must earn at least 24 s.h. of credit in the history department, including at least two seminars or one seminar and one readings course. One seminar or readings course must be taken in each of the first two semesters of residence. Students must earn 12 s.h. in the area of their essay topic and at least 6 s.h. in a second division, including either a seminar or a readings course.

The essay in the major division must be based on original research and should be approximately 10,000 to 15,000 words long. It usually begins as a term paper for the seminar in the major division and is completed the following semester under the supervisor’s guidance. The finished product should emulate the character of articles in learned journals, just as the Ph.D. dissertation takes the form of a full-length scholarly monograph.

The second M.A. program is designed for students who do not intend to pursue a doctorate in history. The basic course requirements are much the same as those for the Ph.D.-track program. Students must earn 30 s.h. overall, including 24 s.h. in history. Of the 24 s.h., 12 are earned in one major division and must include at least one readings or seminar course. The two plans differ mainly in their concentration in fields: the Ph.D. track emphasizes development of research capabilities culminating in the essay; the non-Ph.D. track stresses breadth of learning. Students in the non-Ph.D. track must take at least 6 s.h. in each of two other divisions in history, or 6 s.h. in one other division in history and 6 s.h. in a related department. Included in these 12 s.h. must be at least one readings or seminar course in history.

After completing these requirements, or during the semester in which they are to be completed, M.A. students must take an oral and written comprehensive examination in their major division.

Doctor of Philosophy

Students who earn the M.A. with research essay are admitted to the Ph.D. program on the favorable recommendation of the examining committee. Students who earn an M.A. at another university must meet the admission requirements of the Graduate College (see Graduate College in the Catalog) and of the Department of History. They must submit a writing sample, such as a seminar paper or an M.A. thesis. They must take a research seminar during their first two semesters in residence at Iowa.

The Ph.D. requires at least 72 s.h. of credit, including credit for work done toward the master's degree. The 72 s.h. must include at least eight 200-level courses of 4 s.h. each, taken in research seminars (not fewer than three) or graduate readings courses. At least five of the eight courses must be completed before the student takes the comprehensive examination. Courses taken at the M.A. level may be counted toward this requirement. The candidate also must take a graduate course in the philosophy of history, historiography, or methods of historical research.

The department has no general language requirement for the Ph.D., but the supervising faculty member may require the student to demonstrate a reading knowledge of one or more foreign languages and proficiency in the use of other study tools. Students may not complete the comprehensive examination until these requirements have been met.

The comprehensive written and oral examination covers three distinct fields, two of which must be in a major division that is chosen from the following divisions.

- The ancient world
- Medieval Europe
- Europe, early modern
- Europe, modern
- Russia and the former Soviet Union
- United States
- Latin America
- China
- Japan
- India
- Africa

Students may construct another field, subject to approval by the comprehensive exam committee.

The third field must be a division outside the student’s major division or in a related department outside history. The committee may
define and delimit the individual fields for examination. It may also set, separately for each field, the character of the written portion of the comprehensive examination, which may take the form of a syllabus, a critical bibliography, a topical paper, or any other form or combination of forms that the committee deems suitable. The oral portion of the comprehensive examination focuses on issues and problems arising from the examination papers.

The candidate must submit to the dissertation committee a written prospectus for the dissertation no later than the semester following completion of the comprehensive exams. The committee consists of at least five members, including at least one member from outside the department. It considers the prospectus and may approve it, reject it, or require its revision. When the dissertation is completed in final form, the committee administers the final examination for the doctorate, a formal oral defense of the dissertation that usually lasts two hours.

Admission

Applicants for admission to the graduate program in history must meet the admission requirements of the Graduate College and must submit academic transcripts and Graduate Record Examination (GRE) General Test scores.

In addition, students must submit examples of original writing to the history department, such as a term paper, a seminar paper, or an honors thesis, letters of recommendation from three persons familiar with the student's past academic work, and a one- or two-page personal statement of the applicant's purpose in taking graduate work. All application materials are due by January 10 for entry the following August.

Special Facilities

The University of Iowa Libraries has unusual strength in all aspects of U.S. history. The Main Library houses the Henry A. Wallace papers and related collections, the Iowa Women's Archives, and other unique materials. In European history, special strengths include the fine collections of French and English materials. The State Historical Society of Iowa in Iowa City and the Herbert Hoover Presidential Library and Museum in West Branch also hold valuable research materials.

Courses

Courses numbered 016:001 through 016:040 are approved for General Education. Some other courses are approved in the foreign civilization and culture General Education area. They cannot be taken pass/nonpass, even when they are taken as electives. Majors should take 16A:051, 16E:051, or 16W:051 in the sophomore year or in the first semester after declaring the major. Other courses numbered below 200 are open to first-year students who already have completed the General Education Program historical perspectives component. Courses numbered 200 and above are offered as occasion demands.

Division of Interdisciplinary Programs

Director: Lauren Rabinovitz (American Studies/Communication Studies)

The College of Liberal Arts and Sciences has long recognized that research and learning cannot always be contained within one discipline and that interactions between experts in different disciplines benefit researchers and students alike. One locus of interdisciplinary activity in the college is the Division of Interdisciplinary Programs. The division provides a structure that facilitates teaching, research, and service that cut across established boundaries.

The division provides an administrative umbrella for several of the college’s programs. The Program in Literature, Science, and the Arts, the Interdepartmental Studies Program, and the Leisure Studies Program offer undergraduate majors. The Aging Studies, American Indian and Native Studies, Medieval Studies, Museum Studies, and Sexuality Studies Programs offer certificates and, in some cases, minors. The Center for the Book offers a graduate certificate and courses that undergraduates may choose as electives.

Located in the Jefferson Building, the Division of Interdisciplinary Programs provides a home for its constituent programs and centralizes administrative activities. The division home facilitates access to academic advising for students and administrative support for faculty members.
Interdepartmental Studies

Director of Interdisciplinary Programs:
Lauren Rabinovitz
Advisers: David Gould, Alyson Powers
Undergraduate degree: B.A. in Interdepartmental Studies
Web site: http://www.uiowa.edu/~interdep/

The Interdepartmental Studies Program (ISP) offers a Bachelor of Arts designed to provide alternatives in planning academic programs outside traditional undergraduate majors. Since the major includes advanced-level course work from a variety of departments, students are responsible for planning their own area of intellectual focus with the help of the interdepartmental studies adviser.

Interdepartmental studies students develop creative emphases that draw from several departments and integrate varied approaches to a particular topic. A few examples of interdepartmental programs are aging studies, technical writing, family studies, and urban studies.

Course work toward a Certificate in Aging Studies, American Indian and Native Studies, Medieval Studies, Museum Studies, or Sexuality Studies might evolve into a major in interdepartmental studies. Course work in an area that has no undergraduate major, certificate, or minor, such as book studies, also could provide a concentration leading to a major in interdepartmental studies.

Programs offered through existing departmental majors are not appropriate for the ISP major. In all cases, careful and timely planning is essential.

Plan of Study

Students are required to submit a plan of study for approval before declaring an interdepartmental studies major. Students should consult promptly with the interdepartmental studies adviser to discuss an appropriate individualized program for their academic goals. The adviser can explain the plan of study review process. The earlier in a student’s academic career a plan of study is submitted and approved, the more effective the student’s program will be.

Students working on a plan of study enroll in 145:001 Orientation to Interdepartmental Studies to prepare their plans.

Because the ISP major by definition allows for individualized academic planning, students are encouraged to apply for the program before or during their junior year.

GUIDELINES

Each plan of study submitted for approval must include:

- an essay (no more than five pages) that includes a clear statement of the area of intellectual focus; the reasons for preferring the ISP to any departmental program; a concrete discussion of how the advanced courses relate to each other, to personal interests, and to the central focus of the plan of study; and a description of academic goals for the bachelor's degree; and
- a list of advanced-level course work already completed and advanced-level course work planned for all remaining semesters.

Each plan of study is approved by a committee that may include the ISP coordinator and the faculty advisory committee. Reviews are held as needed.

If the committee does not grant approval, the plan of study may be returned to the student for revisions and resubmission at the next committee meeting. In some cases, the student may be referred to an appropriate departmental major.

Students are required to take the courses approved in the plan of study. A limited number of substitutions may be allowed, but only if they are clearly consistent with the area of intellectual focus in the approved plan of study and only if they are approved in advance by the ISP adviser. Unauthorized substitutions may be designated as elective course work.

Significant changes in the focus of a student’s plan of study require the submission and approval of a revised plan of study. The student's academic adviser determines whether changes warrant a revised plan.

Forms and guidelines for preparing the plan of study are available from the interdepartmental studies adviser.
Bachelor of Arts

The Bachelor of Arts in interdepartmental studies requires a total of at least 120 s.h., including the 36 s.h. of advanced course work specified in the plan of study. Students must complete a minimum of 30 s.h. after entering the program, including 15 s.h. in advanced-level course work included in the plan of study.

Having approval for the plan of study before embarking on the final two semesters ensures that students are truly planning ahead for a senior year. Hours taken during the semester in which the plan of study is approved are not counted as part of the final 30 s.h.

Grade-Point Average

Students must achieve a g.p.a. of at least 2.00 in all college work attempted, all college work undertaken at The University of Iowa, and all advanced course work attempted.

General Education Program

Students must complete the College of Liberal Arts and Sciences General Education Program, including four semesters of college-level foreign language or the equivalent. Contact the College of Liberal Arts and Sciences or visit its web site for details.

Course Work for the Plan of Study

Students must complete at The University of Iowa at least 36 s.h. of advanced course work approved as the formal plan of study. Advanced courses are those numbered 100 and above. No more than 18 s.h. of advanced course work from any one department can be counted toward this requirement. However, students who earn more than 18 s.h. in advanced course work from one department may count this as elective credit and apply it toward the 120 s.h. needed for graduation.

All courses with prefix 007 (College of Education) are considered to be in one department. All courses with prefix 006 (Tippie College of Business) are considered to be in one department, except 06E (economics), which may be considered a separate unit for purposes of the plan of study:

Courses taken to complete the General Education Program cannot be counted toward completion of the advanced course work requirement.

The pass/nonpass grading option is not available for the 36 s.h. of advanced course work required for the degree, but it may be used for advanced course work taken as elective credit beyond the 36 s.h.

Some study abroad advanced courses are considered residential work for the purposes of ISP requirements and college residence requirements. Students should check in advance with the ISP academic adviser.

All College of Liberal Arts and Sciences policies regarding residence, pass/nonpass, satisfactory/fail, and academic standards apply to ISP students; see the CLAS Student Academic Handbook.

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan. (Courses in the major are those required to complete the major.)

Before the third semester begins: at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: at least one-half of the semester hours required for graduation

Before the seventh semester begins: an approved plan of study, at least six courses in the plan of study, and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: a total of at least nine courses in the plan of study

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Honors

ISP students qualify for membership in the University Honors Program by maintaining a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University Honors Program for more information). Graduating with honors usually includes the successful completion of the honors requirements in a particular department or program.

ISP students should initiate inquiries about graduating with honors by contacting the ISP coordinator. Students are encouraged to inquire early in their junior year to allow time for
foundations coursework. The director of the University Honors Program can offer suggestions for contacting a supervising faculty member or committee from one or several appropriate departments. Because the ISP exists outside traditional departmental structures, students must submit an honors project approval form to the ISP coordinator and the honors program director.

**Double Major**

Interdepartmental studies students may earn a second major. No more than 6 s.h. of course work may be applied toward both majors. The focus represented by each major should be distinct and separate.

**Simultaneous Degrees**

Interdepartmental studies students may earn a second degree (see “Simultaneous Degrees” in the CLAS Student Academic Handbook).

**Certificates**

Interdepartmental studies students may earn certificates in other programs, departments, or colleges. The same course may be used to meet the requirements of both the major in interdepartmental studies and the certificate program.

**Minor**

The Interdepartmental Studies Program does not offer a minor. Interdepartmental studies students may earn minors in other programs, departments, or colleges. Courses used to meet the requirements of a minor may not be used to complete the interdepartmental studies major.

**Career Considerations**

Since the B.A. in interdepartmental studies affords opportunities outside the traditional degree pattern, students must create programs of study that meet their individual educational and career objectives. Those who plan to seek employment immediately after graduation should familiarize themselves with the educational background and qualifications required by employers and should include appropriate courses in their programs of study.

Students preparing for advanced study should become familiar with the admissions requirements of graduate or professional schools that interest them. The earlier students decide to pursue graduate or professional study, the easier it is to complete necessary prerequisites.

Leisure plays an important role in all of our lives. The Leisure Studies Program contributes to the education of students in the College of Liberal Arts and Sciences by providing opportunities to study the phenomenon of leisure. In courses offered by leisure studies, students learn how to use their unobligated—or free—time to enhance the quality of their lives. The program also provides professional preparation for careers in the expanding fields of therapeutic recreation and recreational sport management.

The Leisure Studies Program offers courses that students may use to complete the General Education Program, including courses approved in the humanities area and in the social sciences area.

The undergraduate and graduate programs offered in leisure studies prepare professionals to work in community, commercial, campus, and therapeutic recreation settings. The populations served by recreation professionals include the general public; students, colleges, and universities; and persons with disabilities or chronic conditions.

Undergraduate Program

Bachelor of Science

The undergraduate major leads to a Bachelor of Science in Leisure Studies with an emphasis in therapeutic recreation.

Therapeutic recreation is a rapidly growing, health-oriented field in recreation and leisure services professions. It involves the use of recreation services to improve or maintain the physical, mental, emotional, and/or social functioning of persons with disabilities and/or special needs. Therapeutic recreation also helps individuals pursue meaningful lifestyles. Graduates are eligible to sit for the national certification examination in therapeutic recreation. Typically, graduates find employment in clinical or community settings.

Comprehensive therapeutic recreation services involve a continuum of care, including treatment that uses activities to remediate or rehabilitate functional disabilities; leisure education that uses instruction to help individuals acquire skills, knowledge, and attitudes that facilitate an independent lifestyle and avocational competence; and recreation that uses activities to enhance health, growth, development, and independence through intrinsically rewarding leisure behavior.

Populations most commonly served by certified therapeutic recreation specialists include the physically, mentally, or emotionally disabled; mentally delayed; incarcerated; chemically dependent; or socially disadvantaged older adults. Therapeutic recreation professionals are commonly employed in settings such as long-term health care facilities, community recreation centers, state and community mental health institutions, general medical hospitals, physical rehabilitation centers, special recreation districts, correctional facilities, senior citizens’ community-based programs, facilities for the mentally delayed, facilities for the emotionally disturbed, and substance-abuse programs.

The U.S. Department of Labor’s Bureau of Labor Statistics recently projected that employment in the field of therapeutic recreation is expected to
grow faster than average. This growth is caused by the expansion of physical and psychiatric rehabilitation and services in long-term care settings, including nursing homes, retirement communities, community-based therapeutic recreation, and adult day care programs.

Students interested in leisure studies often begin by taking one of the program’s courses approved for General Education. Students can indicate their interest in leisure studies when they are admitted to The University of Iowa or any time after that, but application and admission to the major is required. To be admitted to the therapeutic recreation emphasis, students must complete a minimum of 24 s.h. at The University of Iowa, including the following.

All of these:

- 027:053 Human Anatomy 3 s.h.
- 031:001 Elementary Psychology (or an equivalent or more advanced course addressing the same content areas) 3 s.h.

One of these:

- 034:001 Introduction to Sociology: Principles 3-4 s.h.
- 034:020 Principles of Social Psychology 3-4 s.h.

Students must have a g.p.a. of at least 2.50 for all University of Iowa course work and a cumulative g.p.a. of at least 2.50.

Transfer students must meet the same requirements (including the same sociology, statistics, anatomy, and psychology courses), except that they must have completed a minimum of 12 s.h. at The University of Iowa.

Students who have a University of Iowa or cumulative g.p.a. lower than 2.50 may apply for exceptional admission.

For application forms, visit the Leisure Studies Program web site or contact the Division of Interdisciplinary Programs. Applications must be completed and submitted for consideration to the department’s therapeutic recreation admissions committee by October 15 for admission the following spring semester or by March 15 for consideration for admission the following fall semester. Once admitted, students should plan on a course of study of about two years.

In addition to courses required for admission to the program, students must complete the following course work.

### Therapeutic Recreation Foundation

These courses are required (22 s.h.).

- 169:060 Leisure in Contemporary Society 3 s.h.
- 169:061 Recreation Leadership and Programming 4 s.h.
- 169:150 Recreation Administration 3 s.h.
- 169:160 Introduction to Therapeutic Recreation 3 s.h.
- 169:162 Therapeutic Recreation: Clientele 3 s.h.
- 169:163 Concepts and Issues in Therapeutic Recreation 3 s.h.
- 169:164 Therapeutic Recreation: Rehabilitation 3 s.h.

### Therapeutic Recreation Electives

Students must complete 18 s.h. of electives chosen from these.

- 031:063 Abnormal Psychology: Health Professions 3 s.h.
- 031:163 Abnormal Psychology 3 s.h.
- 027:053 Human Anatomy 3 s.h.
- 096:030 Human Development and Behavior 3 s.h.
- Courses in human services (i.e., aging studies, psychology, sociology, social work, special education) 9 s.h.

### Internship

Students must complete both of these (13 s.h.).

- 169:190 Preinternship Seminar 1 s.h.
- 169:191 Internship I 12 s.h.

### Four-Year Graduation Plan

The Four-Year Graduation Plan is not available for the B.S. in leisure studies. Students are encouraged to work with their advisers to develop an individual graduation plan.

### Honors

The honors program is designed for superior students. It gives participants some research experience and a perspective on some aspects of graduate study. To be eligible for honors, students must maintain a cumulative University of Iowa g.p.a. of at least 3.33. For honors program application forms, contact the Leisure Studies Program.

To qualify for a degree with honors in leisure studies, students must successfully complete 169:194 Honors Readings and 169:195 Honors Problems, for which they must complete a
reading or research project under the supervision of a leisure studies faculty member and write a paper summarizing the project’s results. Honor students also must maintain a cumulative University of Iowa g.p.a. of at least 3.33 throughout the rest of their degree work.

Contact the University Honors Program for more information about honors study at Iowa.

**Minor**

Students who wish to minor in leisure studies must complete at least 15 s.h. in leisure studies with a g.p.a. of at least 2.00. Of the 15 s.h., 12 must be taken in advanced [100-level] courses at The University of Iowa. Students choose courses according to their interests and the recommendations of the leisure studies coordinator. No courses accepted toward the minor may be taken pass/nonpass.

**Graduate Program**

Undergraduate preparation in leisure studies is not required for successful completion of the graduate program; indeed, students from diverse backgrounds are encouraged to apply. However, students may need to fulfill prerequisites specific to their specialization areas.

**Master of Arts**

The Leisure Studies Program offers a Master of Arts with or without thesis in two specialization areas: therapeutic recreation, and recreational sport management. The degree is awarded upon completion of at least 33 s.h. of graduate course work including thesis, or 36 s.h. without thesis. All M.A. students must complete a group of core courses supplemented with work in their specialization areas.

**CORE REQUIREMENTS**

All M.A. students must take these courses.

- 07P:143 Introduction to Statistical Methods 3 s.h.
- 169:200 Historical and Philosophical Perspectives on Leisure 3 s.h.
- 169:205 Research Methods and Leisure Behavior 3 s.h.
- 169:301 Research Colloquium in Leisure Studies 3 s.h.
- A research methods course (quantitative or qualitative) 3 s.h.

**Specialization Areas**

**THERAPEUTIC RECREATION**

Therapeutic recreation relates to development and administration of programs that serve persons with mental or physical disabilities, the emotionally disturbed, and aged persons in both institutional and community settings. The M.A. program, directed toward understanding recreation’s role in a comprehensive rehabilitation process, prepares students to work with a broad range of disability areas in either clinical or community settings. Students may enhance specialization areas by taking related area courses. The program emphasizes application of research techniques and skills to solve problems in practical settings.

In addition to the core requirements (above), students should complete the following.

- 169:163 Concepts and Issues in Therapeutic Recreation 3 s.h.
- 169:262 Procedures in Therapeutic Recreation 3 s.h.
- 169:264 Therapeutic Recreation: Services 3 s.h.

Each student also chooses a cognate area of 6-9 s.h. Cognate areas include counseling and group processes, disabilities, management, and aging. Nonthesis students take an additional 6 s.h. of electives; thesis students complete 6 s.h. of 169:398 M.A.: Thesis.

Therapeutic recreation students must complete a practicum [169:289 Graduate Practicum in Therapeutic Recreation] in order to sit for the National Certification Examination.

**RECREATIONAL SPORT MANAGEMENT**

The M.A. with emphasis in recreational sport management prepares students for positions in public and private recreation and sport management. Students typically find employment in community or municipal recreation programs, campus recreation programs, or commercial recreation and sport operations.

In addition to the core requirements (above), students should complete the following.

- 169:151 Risk Management 3 s.h.
- 169:250 Seminar in Recreation Management 3 s.h.
- 169:252 Economics and Financing 3 s.h.

Each student also chooses a cognate area of 6-9 s.h. Cognate areas include business, communications, or cultural studies. Nonthesis students take an additional 6 s.h. of electives; thesis students complete 6 s.h. of 169:398 M.A.: Thesis.
Internships
Internships, available in several areas, are strongly recommended for graduate students.

Certification Examination
M.A. students specializing in therapeutic recreation or in recreational sport management are eligible to take professional certification examinations. Consult a graduate adviser for guidance toward professional certification.

Assistantships
The program offers a limited number of teaching assistantships; applications should be made directly to the leisure studies academic coordinator. Teaching assistants supervise student interns or support General Education courses offered by the Leisure Studies Program.

Courses

169:029 First-Year Seminar 1-2 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Prerequisite: first- or second-semester standing.

169:040 The Good Society 3 s.h.
Same as 033:040.

169:050 Making Choices: Interdisciplinary Perspectives 3 s.h.
Same as 033:050.

169:060 Leisure in Contemporary Society 3 s.h.
Basic philosophical, historical, scientific foundations and developments; function, settings of organized recreation.

169:061 Recreation Leadership and Programming 4 s.h.
Leadership principles, techniques; programming techniques.

169:070 Perspectives on Leisure and Play 3 s.h.
Relationships between leisure and economics, sociology, other social sciences; effect of leisure on individual and group behavior; antecedents, motives, consequences of leisure behavior. GE: social sciences.

169:072 Leisure and the Liberal Arts 3 s.h.
Integration of the ideal of a liberal education with worthy, meaningful use of free time in contemporary society; classic writings in the humanities. GE: humanities.

169:075 The Politics of Women's Leisure 3 s.h.
Politics of women's leisure viewed through sociological concepts of agency and constraint and theoretical perspectives of hegemony and feminist theories; gender differences in leisure choices, politics of housework, mothering and childcare, fitness and sport, beauty and appearance, emotional labor and relationships, media and popular culture as vehicles for discussion and analysis; how race, sexual preference, age, and socioeconomic status affect women's attitudes and choice of work and leisure pursuits.

169:076 Culture and Community in Human Services 3 s.h.
Roles played by culture and community in human services; aspects of culture and community-based perspectives, including race, ethnicity, gender, class, sexuality, religion; disproportionate influence that particular cultures and communities exert on the structures of society.

169:080 Introduction to Place Studies 3 s.h.
Same as 033:080.

169:102 Introduction to Museology 3 s.h.

169:105 Physical Education: Disabilities 3 s.h.
Prerequisite: 027:053.

169:108 Basic Aspects of Aging 3 s.h.
Social, psychological, and biological aspects of aging; focus on demographics of aging, health, economic issues, primary relationships, social services. Same as 042:108, 096:108, 153:108.

169:112 Workshop: Leisure Studies 1-4 s.h.

169:128 Environmental Issues in Recreation 1-4 s.h.
Issues related to outdoor recreation behavior, management, issues vs. vs. ecosystem concept.

169:140 Health for Living 3 s.h.
Personal health strategies; focus on disease prevention, wellness. GE: social sciences.

169:142 Health Promotion in the Workplace Setting 3 s.h.
Management and organizational theories, assessment, planning, implementation, and evaluation of clinical and workplace (targeted) health promotion programs.

169:146 Health Promotion for Older Adults 3 s.h.
Problems, strategic efforts toward long-term goals of health promotion, disease prevention, slowing the decline caused by chronic conditions to extend independent, rewarding lives. Same as 096:146, 153:146.

169:148 Personal Training Management 3 s.h.
Basics of personal training, including establishing a personal training business, screening, and assessing clients; current issues and certifications. Prerequisite: 153:108. Same as 153:148.

169:150 Recreation Administration 3 s.h.
Personnel, finance, budgets, liability, marketing.

169:151 Risk Management 3 s.h.
Legal knowledge necessary for effective management of sport, recreation, and physical activity programs, avoidance of legal problems; strategies for addressing issues such as right to participate, liability for injuries, risk management; legal statutes that govern sport, health, recreation organizations.

169:154 Recreation Sport Facility Management 3 s.h.
Personnel, program, financing, design, standards.

169:155 Camp Administration 3 s.h.
Basics of camp administration; risk management, programming, general standards set by the American Camping Association.

169:156 Design of Recreation Facilities 3 s.h.
Horticulture, floriculture, landscape design, agronomy, turf management; their relation to planning and design of recreation and park areas and facilities.

169:157 Health Fitness Management 3 s.h.
Management, operation of private, hospital-based, and corporate fitness clubs.

Leisure Studies 223
The Interdisciplinary Program in Literature, Science, and the Arts (LSA) enables students to pursue individual interests while exploring the full range of liberal arts and sciences disciplines. LSA majors design individualized plans of study that relate personal goals and academic interests to broad issues in the humanities, sciences, arts, and professions. One student might study ethics related to business, law, and medicine; another, relations among science, society, and values; yet another, the arts within a particular cultural context.

The LSA major offers a Bachelor of Arts degree broader than that permitted by study in a single subject. Topics cross, reflect upon, and challenge disciplinary boundaries. Through writing, analytical thinking, and discussion, students develop critical appreciation of diverse perspectives.

Central to the program are team-taught interdisciplinary seminars that challenge students to consider ideas from diverse points of view. The seminars are small-group round-table discussions led by two or more faculty members representing different departments and disciplinary perspectives. Together, faculty members and students examine values and judgments rooted in liberal arts and sciences disciplines.

LSA courses are open to undergraduates from any department or college. Courses numbered 100 and below are designed as introductions to interdisciplinary studies and are open to all students who have completed the rhetoric requirement. Courses numbered above 100 are designed for juniors, seniors, and graduate students; all other students should consult the instructor or the LSA office before enrolling.

Frequent consultations with an adviser and care in preparing the required statement of purpose ensure that students shape the major to suit individual goals, including preparation for professional careers or further study in graduate school.

**Bachelor of Arts**

Specific requirements for the B.A. with a major in literature, science, and the arts are as follows. A plan of study must include the following 24 s.h. of course work.

**LSA courses** 12 s.h.

**Natural science and social science courses** 12 s.h.

Students also must complete at least 30 s.h. of course work chosen from the following four areas. All areas must be represented; students choose 12 s.h. from each of two areas and 3 s.h. from each of the other two areas. Up to 15 s.h. of advanced course work used to complete the General Education Program may be applied to requirements of the major.

**Philosophy, religion, history**

**Literature** (may include literature courses taught in a language other than English; may not include courses with 08G prefix)

**Fine arts**

**Foreign language** (may not include courses used to complete the General Education Program foreign language component)

Students who fulfill the LSA foreign language requirement with 3 s.h. can use a course in culture, civilization, or literature taught in English by the department of the student's language of expertise. Students who fulfill the requirement with 12 s.h. cannot use courses taught in English.
By their second semester as majors, LSA students must submit a statement of purpose describing their goals. For information on writing the statement of purpose and descriptions of LSA courses for the current and coming semesters, visit the Program in Literature, Science, and the Arts web site.

Students must complete a minimum of 12 s.h. of LSA courses and at least 12 s.h. of other major courses at The University of Iowa.

Students considering an LSA major should consult with the program’s office before the end of their sophomore year.

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

Note: No course may satisfy more than one major requirement. Students prepare an individualized plan of study consisting of at least 14 courses, including one in foreign language beyond fourth-semester competency, so some students may need to do foreign language work early.

Before the third semester begins: at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: a plan of study, language competency in the language of choice, and at least one-half of the semester hours required for graduation

Before the seventh semester begins: at least six courses from the plan of study and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: four more courses from the plan of study

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Honors

Superior students who undertake a further program of independent study may earn the Bachelor of Arts with honors. To be admitted as candidates for a degree with honors, students must have the endorsement of the director of the Program in Literature, Science, and the Arts and must meet the requirements for the University Honors Program. Membership in the University Honors Program requires that students maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University Honors Program for more information). Honors students submit an honors project to a faculty committee.

Courses

033:005 Rhetoric of Scientific Inquiry 4 s.h.
Same as 010:005.

033:010 The Good Society 3 s.h.
Critiques of the existing social order, articulation of models of a good society with associated conceptions of the good life. GE: humanities. Same as 169:010.

033:050 Making Choices: Interdisciplinary Perspectives 3 s.h.
Philosophical and historical foundations of choice, personal, social, private decision making. GE: humanities. Same as 169:050.

033:055 Revolutions in 19th-Century France 3 s.h.
Introduction to social and political history of 19th-century France, an unstable but rich period in French history and culture. GE: humanities. Same as 009:055.

033:056 The Splendor of Cities 3 s.h.
Same as 102:055.

033:060 Scientific Reasoning 3 s.h.
Patterns of reasoning useful for understanding and evaluating scientific evidence, theory, controversy, historical and contemporary examples from the physical, biological, behavioral, biomedical sciences. GE: quantitative or formal reasoning.

033:065 Essays and Assays 3 s.h.
Topics in biology and medicine; aesthetic concepts of mimesis, identity, representation.

033:075 Cultural Diversity and Identity 3 s.h.
The nature of personal and cultural identity within a pluralistic society; race, ethnicity, national identity, class, sexuality, and gender as categories of cultural difference. GE: cultural diversity. Prerequisite: 010:002 or 010:003.

033:080 Introduction to Place Studies 3 s.h.
Environmental, social, and cultural perspectives on the interdisciplinary concept of place, historical concepts of place, the state of place in contemporary society and culture, elements of place in midwestern experience. Same as 169:080.

033:095 Science and the Arts: Chaos Theory 3 s.h.
Chaos theory and new perspectives on cause and effect, pattern and randomness, simplicity and complexity, organization and dissipation, fate and free will, challenges to the certainties of Newtonian physics and the confidence of western science; how chaos and related theories (e.g., complexity theory, catastrophe theory, fractal geometry) can illuminate aspects of the arts and the creative process.

033:110 Comparative Arts 3 s.h.
Same as 048:110.

033:112 The City: Narrative and Design 3 s.h.
Same as 102:112.

033:115 What Is Storytelling For? 3 s.h.
Philosophical look at storytelling, experiences telling and listening to stories, role of storytelling in performative acts of interpretation. Same as 01J:115.
033:120 Tobacco, Health, and Society 2 s.h.
The tobacco industry, tobacco-related disease, and public policy responses in various political systems, economic environments, cultural contexts; history of tobacco and its cultural associations, production, promotion, health issues, and control efforts worldwide, focusing on countries with unique problems or approaches.

033:130 Paris and the Art of Urban Life 3 s.h.
Pictorial treatment of well-known architectural sites, such as the Eiffel Tower, the Cathedral of Notre Dame; intersection of urban history, art, architecture, daily life. Same as 009:130, 01H:157.

033:139 Religion and Environmental Ethics 3 s.h.
How humans conceptualize the biophysical environment through religious beliefs and practices; how images of the environment influence people's activities and are used in grass-roots environmental movements. Same as 032:130, 113:139.

033:142 Natural Sciences and Human Cultures 3 s.h.
Impact of gender on scientific practice in medicine and on career path issues for women in science, math, engineering, technology; women's roles, gender bias, gender issues in health care. GE: humanities.

033:143 Gender Issues in Science and Medicine 3 s.h.
Impact of gender on diagnosis, treatment, allocation and utilization of resources in medicine; study design, data collection, interpretation, and implementation of results in research.

033:144 Mind and Behavior 3 s.h.
Theories of what it is to act and know, of what intelligence might be in animals, humans, machines; perspectives from philosophy, psychology. Prerequisite: junior or senior standing or consent of instructor. Same as 031:174.

033:145 Literature, Music, and Aesthetics 3 s.h.
Interdisciplinary connections between literature and music; specific cultural, ideological contexts. Same as 025:137.

033:146 Literature and the Visual Arts 3 s.h.
The roles of meaning, values, and cultural expression in selected works of literature and the visual arts from the Enlightenment to Modernism; interrelationship of poetry, essays, novellas, and short stories with paintings, prints, sculpture, and architecture.

033:147 Nature vs. Nurture: Theory to Practice 3 s.h.
Sex differences in cognitive abilities explored through psychosocial versus biological perspective; impact on populations, especially women in science, math, engineering, technology.

033:151 Individuals and Institutions 3 s.h.
Relationships between individuals and institutions viewed through outstanding works of literature, social science, and law.

033:152 Values in the Contemporary World 3 s.h.
Modern problems in definition and choice of values; writings of contemporary ethical theorists, novelists. Same as 032:149.

033:153 Hard Cases: Science Policy and Values 3 s.h.
Major issues in practical ethics through difficult case studies in fields such as law, medicine, business, politics; readings in classic authors; recent contributions from several disciplines. Same as 060:153.

033:154 Human Nature and the Impact of Science 3 s.h.
Relationships among scientific, humanistic, social, religious thought. GE: humanities.

033:161 The Arts in Performance 3 s.h.
Performing arts in human experience; creativity in different performance media, cultures, historical contexts. GE: fine arts or humanities.

033:170 Trains of Thought 3 s.h.

033:175 Art, Law and Ethics 3 s.h.
How law and ethics apply to individuals and institutions concerned with the visual arts. Same as 018:182, 024:161, 091:192.

033:180 Special Projects art.
033:191 Independent Study for Honors art.
International Programs offers a major in international studies leading to a Bachelor of Arts from the College of Liberal Arts and Sciences. The major is an interdisciplinary program of study offered with either a geographic or a thematic emphasis. It prepares students for careers in business, government, international development agencies, nongovernmental organizations, philanthropic agencies, and the arts. It also is excellent preparation for graduate training in the social sciences, the arts, law, business, journalism, international affairs, and area studies.

International studies is not simply the study of diplomacy and relations among states. The program of study requires all students to integrate theoretical knowledge about broad global processes and the methods used to study them, with in-depth examination of a particular region of the world or a major theme in international studies. It affords students the opportunity to integrate the study of history, politics, economics, expressive arts, culture, beliefs, and social systems.

The curriculum is designed to help students learn to appreciate foreign cultures, focus on themes of global significance, and master varied disciplinary approaches used to study international issues. For students interested in pursuing a double major, the international studies major complements a wide range of academic degree programs.

**Bachelor of Arts**

The international studies major is flexible, drawing on courses across the humanities and social sciences. All students majoring in international studies are mentored by a faculty member who specializes in their geographic or thematic emphasis area. The Academic Advising Center provides official advising for all international studies majors. Students must work closely with their faculty mentors to coordinate their program of study and fulfill the requirements for the major.

The B.A. in international studies requires 36 s.h.; at least 12 of the 36 s.h. must be earned in upper-level course work. A foundation course (3 s.h.) and two gateway courses (6 s.h.) introduce students to the major issues in international studies and the varied methods used to examine them. Foreign language proficiency is vital for participating in diverse societies and cultures, so foreign language study beyond the General Education requirements is required. Students select a geographic or thematic emphasis area or develop one in consultation with their faculty adviser. Each student must complete a senior project related to his or her focus of study. International studies electives (6 s.h.) outside the student's emphasis area provide comparative perspectives.

The program encourages study abroad. See “Study Abroad Opportunity” below, for details.

**DISTRIBUTION REQUIREMENTS**

Students majoring in international studies may not count toward the international studies major more than 12 s.h. applied to another major, minor, or certificate.

Students majoring in international studies must undertake course work in at least four different departments.

Students must complete at least 12 s.h. of upper-level course work: 6 s.h. in the emphasis area, 3 s.h. in the elective area, and the senior project.

**FOUNDATION COURSE**

Each student chooses at least one of the following courses, ordinarily as the first course in the major. Each provides an overview of global issues and introduces a disciplinary approach to global topics, laying a foundation for continuing study.

Issues in international studies courses (187:001, 187:002, 187:003, and 187:004, each 1 s.h.) are offered every semester by faculty members affiliated with the international studies major. Each course provides a focused introduction to a specific international studies topic or approach. Students who choose Issues in International Studies as their foundation must complete three courses (total of 3 s.h.).

**GATEWAY COURSES**

In choosing gateway courses, students begin to craft their individualized majors. For example, a student might choose two courses in the arts or two social science courses.

Students should choose two gateway courses (total of 6 s.h.) from the following list. In order to preserve the interdisciplinarity of the program, students must choose at least one course from a department different from the one that offered their foundation course.

**GEOGRAPHIC OR THEMATIC EMPHASIS AREA**

Each student chooses a concentration in one of the geographic emphasis or thematic emphasis areas listed below. The emphasis area is noted on the student’s transcript. Lists of approved courses in each area are available at the Academic Advising Center and on the International Studies Program web site. Students may petition the associate dean of international studies to include a course not on the approved list. Students must complete at least four courses in the emphasis area, for a total of 12 s.h.; at least 6 of the 12 s.h. must be earned in upper-level course work (usually numbered 100 or above).

Geographic areas include Caribbean studies, African studies; East Asian studies; European studies; Latin American studies; Russian, East European, and Eurasian studies; and South Asian studies.

Thematic areas include development; global artistic tradition and change; global resources and the environment; global health; human rights; international business; International communication and information; international politics and international relations; postcolonial and diasporic studies; and war, peace, and security.

Other thematic areas, for which sufficient courses exist, may be developed by a student with the approval of an international studies faculty adviser.

**INTERNATIONAL STUDIES ELECTIVES**

Students also must complete 6 s.h. of international studies course work. Electives may be chosen from any of the courses approved for the international studies major, but they must not be chosen from courses in the student’s emphasis area. At least 3 s.h. must be earned in upper-level course work.
LANGUAGE REQUIREMENT
All students must complete a minimum of two semesters of advanced foreign language study (defined as beyond the minimum required to complete the foreign language component of the General Education Program), or two semesters of a second foreign language at any level. This requirement may be fulfilled either by completing the third year of the same language used to complete the General Education Program or by completing two semesters, or the equivalent, of a second foreign language. Languages not offered by The University of Iowa may be studied at other universities or through an approved study abroad program. Consult an international studies faculty adviser or an international studies adviser in the Academic Advising Center for more information.

In fulfilling the language requirement, most students are eligible to receive an additional 4 s.h. of ungraded credit under the Foreign Language Incentive Program (FLIP). This credit may be applied to the minimum 120 s.h. required for graduation, but it does not count toward requirements for the international studies major.

INTERNATIONAL STUDIES SENIOR PROJECT
All students enroll in 187:199 International Studies Senior Project during their last year of study. In this independent study course, students complete a research essay of 15-20 pages or produce a creative work focusing on a topic within their geographic or thematic emphasis area. The course is completed under the supervision of a faculty mentor in the emphasis area.

Study Abroad Opportunity
Students are strongly encouraged to incorporate an approved study abroad experience into their international studies major. Credit earned while studying abroad is counted toward the requirements for the major, as appropriate. All international studies majors who study abroad in an approved program receive a $1,000 scholarship from International Programs in addition to other financial aid and scholarships for which they are eligible. In order to receive this scholarship, students must declare the international studies major and complete at least 12 s.h. of course work toward it.

It is important to plan ahead for study abroad. Students should meet with an adviser in the Office for Study Abroad shortly after choosing their geographic or thematic emphasis for help in selecting an appropriate study abroad program. Students planning to earn a bachelor's degree in four years must schedule study abroad advising appointments (see "Four-Year Graduation Plan," below).

Transfer Credit
Transfer course work equivalent to University of Iowa course work can be accepted toward the major, but at least 15 s.h. of course work for the major must be earned at The University of Iowa.

Four-Year Graduation Plan
The following checkpoints list the minimum requirements students must complete in order to stay on the University's Four-Year Graduation Plan.

Before the third semester begins: at least one-quarter of the semester hours required for graduation
Before the fifth semester begins: at least two courses in the major (a foundation course and one gateway course) and at least one-half of the semester hours required for graduation
Before the seventh semester begins: at least six courses in the major and at least three-quarters of the semester hours required for graduation
Before the eighth semester begins: at least nine courses in the major
During the eighth semester: enrollment in all remaining course work in the major (three courses), all remaining General Education courses, and a sufficient number of semester hours to graduate

Honors
Students may earn a B.A. with honors in international studies. The option is available to students with a cumulative University of Iowa g.p.a. of at least 3.33 and a g.p.a. of at least 3.33 in international studies. To graduate with honors, students are required to complete a minimum of 39 s.h., including three courses (9 s.h.) in a
second emphasis area (this takes the place of the 6 s.h. international studies elective requirement). Honors students must complete at least 15 s.h. in upper-level course work. At least 6 s.h. of the 39 s.h. required for the honors major must be earned in courses designated as honors courses. Students may enroll in honors courses offered by individual departments, or they may work with instructors to designate any approved international studies course as an honors course by adding additional writing requirements. Contact an international studies faculty mentor or an international studies adviser at the Academic Advising Center.

Contact the University Honors Program for more information about honors study at Iowa.

Minor

To earn a minor in international studies, students must complete 15 s.h. in courses approved by international studies. To preserve the minor's interdisciplinary nature, students may not count toward the international studies minor more than 6 s.h. applied to another major, minor, or certificate. At least 12 s.h. applied to the minor must be earned in course work designated as upper-level by the department offering the course. Students are required to include one of the international studies foundation or gateway courses in the minor.

Courses

187:001 International Studies Colloquium 1 s.h. Modules focusing on varied topics, taught by international studies faculty members.

187:002 Issues in International Studies 1 s.h. Modules focusing on varied topics, taught by international studies faculty members.

187:003 Issues in International Studies 1 s.h. Modules focusing on varied topics, taught by international studies faculty members.

187:004 Issues in International Studies 1 s.h. Modules focusing on varied topics, taught by international studies faculty members.

187:005 Making of the Modern Global System 3 s.h. Formation of the modern global system; capitalism, science and technology, representative government and nationalism, colonialism and decolonization; rise of these institutions in the West, response and adaptation by a nonwestern society.

187:006 International Analysis of Topics and Places 3 s.h. Analysis of international topics (e.g., population characteristics, religion, language and racial groups, world income, environment) using case-study approach.

187:012 European Ethnic Places in Iowa 3 s.h. Iowa's European Heritage; European immigration; field trips to European ethnic communities in Iowa.

187:030 International Crossroads Seminar 1 s.h. Introduction to international campus resources; cross-cultural communication skills; service learning project. Prerequisite: UI International Crossroads Community residence.

187:090 International Studies News Colloquium 2 s.h.

187:099 Introduction to Russia, the Soviet Union, and its Successor States 3 s.h. Histories and cultures of the region's societies, including current problems in economics, politics, ethnicity, religion, ecology, health, law. GE: foreign civilization and culture.

187:142 Introduction to Caribbean Studies 3 s.h. Diversity and unity of Caribbean culture; geography, history, culture; Hispanic, Francophone, and Anglophone Caribbean texts. Same as 035:142.

187:150 Internetworks in International Development 3 s.h. The Internet and online development resources; technical background, accessibility, impact; advanced skill development in Internet communication and authoring techniques; previous knowledge not required.

187:159 African Literature Today 3 s.h. Same as 008:159, 048:159.

187:170 IFUSS Proseminar 1-3 s.h. Introduction to Islam, growth and development of Islam; sociopolitical and historical forces relevant to contemporary crisis in the Middle East; Islam and the United States.

187:175 Child Labor and International Human Rights 3 s.h. Complexity of child labor in global, regional, national, and local contexts; international human rights system, current programs and strategies for reducing or eliminating abusive child labor.

187:199 International Studies Senior Project 3 s.h.

187:210 International Programs Summer Institute for Teachers 3 s.h. Professional development workshop for teachers on what Iowans need to know about the rest of the world. Weeklong. Same as 07S:210.

187:211 International Studies Professional Development for Teachers 1 s.h. Contemporary issues in international studies and classroom integration of global perspectives; for current and pre-service K-12 teachers. Repeatable.
Journalism and Mass Communication

Director: Pamela J. Creedon
Professors: Kay Amert, Stephen G. Bloom, Pamela J. Creedon, Carolyn Stewart Dyer, Judy Polumbaum
Professors emeriti: Joseph Ascroft, Gilbert Cranberg, Hanno Hardt, Donald Smith, Kenneth Starck, Al Talbott
Associate professors: Julie Andsager, Daniel A. Berkowitz, Stephen Berry, Verise Berry, Gigi Durham, John Erickson, John Kimmich, Donald McLeese
Associate professors emeriti: Sue Lafky, William Zima
Assistant professors: John Bennett, Stacey Cone, Frank Durham, Lyonbe Eko, Jane Singer, Sujatha Sosale
Undergraduate degrees: B.A., B.S. in Journalism and Mass Communication
Undergraduate nondegree program: Minor in Mass Communication
Graduate degrees: M.A. in Journalism; Ph.D. in Mass Communications
Web site: http://www.uiowa.edu/jmc

Undergraduate Program

The School of Journalism and Mass Communication offers a Bachelor of Arts and a Bachelor of Science. Both degrees prepare students for careers in journalism and mass communication.

Journalistic writing is the core of the undergraduate program, and visual communication is an important focus. Students are required to take both professional and conceptual courses offered by the school; they develop professional skills while studying the historical, legal, cultural, and institutional roles of media in society. The program also builds upon the University’s commitment to the liberal arts and sciences, requiring majors to complete extensive academic work outside the school.

Graduates find employment in a variety of areas such as newspapers, magazines, radio, television, online communications, public relations, publication design, photojournalism, and media research.

The school also offers a minor in mass communication; see “Minor” later in this section.

The school is accredited by the Accrediting Council on Education in Journalism and Mass Communications.

Selective Admission

To preserve the quality of its programs, the School of Journalism and Mass Communication has a selective admission program. Students with a declared interest in journalism are admitted to the major in one of two ways. First-year students who enter the University with honors standing in the College of Liberal Arts and Sciences, or as Presidential Scholars, Dean’s Scholars, or Daily Iowan Scholars, are eligible to enter the major in journalism and mass communication upon enrollment in the University. Most students are classified as pre-journalism students until they are admitted to the major.

Students may apply for admission to the major during the semester in which they will complete the following: 019:090 Social Scientific Foundations of Communication and 019:091 Cultural and Historical Foundations of Communication; all required rhetoric courses; and a total of at least 45 s.h. of course work.

Students who qualify for the University Honors Program after their first semester at the University may apply for admission to the major during the semester in which they will complete the premajor requirements and 30 s.h. of course work.

The primary criterion for admission to major status is overall academic performance. Also considered are the applicant’s statement of interest, demonstrated writing ability, prior journalistic experience, and performance in journalism courses. The number of students accepted each semester depends on the number of students already in the program and available resources. The school reviews applications with the goal of admitting the most qualified students to the program.

For applications and deadline information, contact the School of Journalism and Mass Communication.

Bachelor of Arts, Bachelor of Science

The B.A. and B.S. in journalism and mass communication require a minimum of 35 s.h. in the major. Students may earn a maximum of 40 s.h. in journalism and mass communication courses, in accordance with College of Liberal
Arts and Sciences guidelines. Students must maintain a g.p.a. of at least 2.00 in courses in the major in order to graduate. They also must complete a second major or 24 s.h. in a second concentration area.

The undergraduate program’s flexibility allows each major to develop an individual study plan in consultation with a faculty adviser.

**Common Requirements**

All majors must complete the following course work (minimum of 35 s.h., maximum of 40 s.h.).

**PREMAJOR FOUNDATION**

019:090 Social Scientific Foundations of Communication 3 s.h.

019:091 Cultural and Historical Foundations of Communication 3 s.h.

**JOURNALISM WRITING AND WORKSHOP COURSES**

019:098 Journalistic Reporting and Writing 4 s.h.

Two advanced reporting and writing courses (019:120-019:125, 019:171) 8 s.h.

One workshop course (019:130-019:139, 019:172-019:174) 4 s.h.

An additional advanced reporting and writing or workshop course (019:120-019:125, 019:130-019:139, 019:171-019:174) 4 s.h.

**CONCEPTUAL COURSES**

019:140 Legal and Ethical Issues in Communication 3 s.h.

An advanced conceptual course (019:141-019:169) 3 s.h.

**ELECTIVES**

Course work chosen from undergraduate journalism and mass communication courses 3 s.h.

**ADDITIONAL ELECTIVES**

Additional courses up to the maximum 40 s.h. (optional)

**LEARNING PORTFOLIO**

Seniors must complete a learning portfolio, approved by their adviser, before they graduate.

---

**Second Major or Concentration Area**

In addition to completing the College of Liberal Arts and Sciences General Education Program, every journalism major must complete a second major or a concentration area outside the School of Journalism and Mass Communication. Study in the second major or concentration area enables students to acquire a substantial body of knowledge, learn how another discipline views the world, and/or develop a companion set of skills to those in journalism and mass communication.

Students who satisfy the requirement by completing a concentration area must choose 24 s.h. of related course work in one or more departments; at least 15 of the 24 s.h. must be earned in advanced courses (in most departments, advanced courses are numbered 100 or above). B.A. students who complete a minor in business administration are credited with meeting the second major or concentration area requirement. Course work in the concentration area must be arranged in consultation with the student’s adviser; each student must have the adviser’s written endorsement of the second major or concentration area before graduation.

**BACHELOR OF ARTS**

B.A. students must complete the requirements for the journalism and mass communication major (35 s.h.) and must satisfy the school’s second major or concentration area requirement in one of two ways.

**Option 1:** complete a B.A. major in another department

**Option 2:** complete a 24 s.h. concentration of related courses in one or more departments that offer B.A. degrees, or complete a minor in business administration

**BACHELOR OF SCIENCE**

B.S. students must complete the requirements for the journalism and mass communication major (35 s.h.) and must satisfy the school’s second major or concentration area requirement in one of two ways.

**Option 1:** complete a B.S. major in a natural, mathematical, or social science

**Option 2:** complete a 24 s.h. concentration of related courses in the social sciences (economics, geography, political science, psychology, or sociology) and/or the natural and mathematical sciences; and complete all the special math,
research methods, statistics, computer science, and/or cognate science requirements required for the B.S. in the department in which the majority of concentration area courses are taken.

**Four-Year Graduation Plan**

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan. (Courses in the major are those required to complete the major, they may be offered by departments other than the major department.)

Note: With the exception of students admitted to the major directly upon their first enrollment in the University, students are admitted to the School of Journalism and Mass Communication on a competitive, selective basis. The Four-Year Graduation Plan agreement applies only to students who are admitted to major status by the second semester of their sophomore year. Also, each student must complete a second major or a concentration area consisting of at least 24 s.h., of which 15 s.h. must be earned in advanced courses. These checkpoints show only the minimum requirements for a second area, not the requirements for a second major.

**Before the third semester begins:** either 019:090 or 019:091 and at least one-quarter of the semester hours required for graduation

**Before the fifth semester begins:** admission to the major, 019:098, an additional course in the major, at least one second-area course, and at least one-half of the semester hours required for graduation

**Before the seventh semester begins:** two additional courses in the major, three additional second-area courses, and at least three-quarters of the semester hours required for graduation

**Before the eighth semester begins:** two additional courses in the major and two more second-area courses

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General Education courses, all remaining courses in the second area, and a sufficient number of semester hours to graduate

**Honors**

The University Honors Program gives students with outstanding academic records the opportunity to do honors course work in their fields or individual interest areas under the guidance of a faculty member.

To graduate with honors in journalism and mass communication, a student must have a g.p.a. of at least 3.50 in the major and must be a member of the University Honors Program, which requires that students maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University Honors Program for more information). Honors students also must complete 019:191 Honors Project (3 s.h.) under the supervision of a faculty member. The project may be a thesis or a professional project, typically completed during the last semester of the senior year. Students are encouraged but not required to take 019:190 Honors Readings (1-3 s.h.) to prepare for the project.

All majors with an overall g.p.a. of at least 3.33 are encouraged to take any journalism and mass communication course for honors credit and to make use of other honors opportunities in the school. Visit the School of Journalism and Mass Communication's web site or contact the school's honors adviser for details.

**National Honor Society**

The School's chapter of Kappa Tau Alpha, the national society honoring scholarship in journalism and mass communication, was founded in 1936 and is named for former director Leslie G. Moeller. Students are considered for membership if their grade-point average places them in the top 10 percent of their class and they have completed at least five semesters of University work, including a minimum of 9 s.h. in journalism and mass communications skills courses. Contact the School's Kappa Tau Alpha adviser for details.

**Minor**

Students may earn a minor by completing at least 15 s.h. in journalism and mass communication with a g.p.a. of at least 2.00; 12 of the 15 s.h. must be taken in advanced courses at The University of Iowa (courses numbered 019:100 or above). Students are encouraged to take one of the following courses.

019:090 Social Scientific Foundations of Communication 3 s.h.
019:091 Cultural and Historical Foundations of Communication 3 s.h.
019:095 Media and Consumers 3 s.h.

The minor does not prepare students for careers in journalism or mass communication. It should be regarded as an introduction to the field.

Courses for the minor may not be taken pass/nonpass.
Transfer Students

Transfer students who declare an interest in journalism and mass communication are classified as premajors. They may apply to the major during the semester in which they complete at least 45 s.h. of course work at The University of Iowa and other institutions, including the rhetoric requirement and the foundation courses 019:090 Social Scientific Foundations of Communication and 019:091 Cultural and Historical Foundations of Communication. Courses taken at other institutions cannot be substituted for 019:090 or 019:091.

The school may accept up to 7 s.h. of transfer credit in journalism toward the major in journalism and mass communication, or up to 3 s.h. toward the minor in mass communication. Some journalism course work taken at another school may be used to satisfy elective and/or second major or concentration area requirements. Transfer credit intended to meet School of Journalism and Mass Communication requirements must be discussed with a journalism faculty adviser and approved by the head of undergraduate studies.

Graduate Programs

Master of Arts

The School of Journalism and Mass Communication offers the Master of Arts with two emphases: professional journalism and media communication.

The professional journalism emphasis requires 30-35 s.h. of course work and successful completion of a master's project. The media communication emphasis requires 32 s.h. and completion of a thesis. Each emphasis is described below. For more detailed descriptions, see the Graduate Student Handbook; contact the School of Journalism and Mass Communication.

Admission to the M.A. is for fall entry.

Professional Journalism Emphasis

The Master of Arts with professional journalism emphasis is designed for students who have an academic or professional background in media communication and who wish to enhance their careers through specialized study in a specific area. It is a terminal degree, not preparation for doctoral study. Exceptional applicants without the required background may be accepted if they complete one noncredit preparatory course.

In consultation with an academic adviser, each student creates an individual program of courses chosen from inside and outside the school. Examples of areas inside the school are narrative writing, investigative reporting, publication design, and broadcast news. Some areas outside the school are the arts, law, political science, business, medicine, science, the environment, book arts, and race, gender and sexuality studies.

Students who have a journalism background might develop a focus in an outside area for some of their electives. Those new to journalism and media communication may wish to focus their study on areas inside the school.

Building on conceptual and advanced skills courses, students complete the program with a master's project in a professional area, such as an in-depth reporting series; a design, multimedia, video, or documentary photography project; or applied research in mass communication.

All courses are chosen in consultation with the student's academic adviser.

The following courses are required.

019:225 Contemporary Problems in Journalism 3 s.h.
019:226 Master's Advanced Reporting and Writing 3 s.h.
019:229 Master's Media Project 3 s.h.
One conceptual course from
019:140-019:169, or 019:250 and above 3 s.h.
Two advanced writing or workshop courses from the 019:120, 019:130, 019:170, and 019:220 series 6-8 s.h.
*Three electives in journalism and mass communication or an outside focus area 9-12 s.h.
019:299 Master's Research (professional project) 3 s.h.

*Students who have not taken a recent U.S. media law class must enroll in 019:140 Legal and Ethical Issues in Communication or an alternative media law course, with the instructor's consent and the adviser's approval.

Media Communication Emphasis

The Master of Arts with media communication emphasis offers specialization in mass communication phenomena and emphasizes communication research, theory, and methodology. It prepares students for doctoral studies.
Students in the media communication emphasis take foundation courses in common with beginning Ph.D. students. Because of the program’s interdisciplinary nature, students are expected to take courses outside the school, as determined in consultation with their advisers. The course work should provide students theoretical and methodological preparation to complete the thesis.

The following courses are required.
- 019:231 Media Communication Theory I 3 s.h.
- 019:232 Media Communication Theory II 3 s.h.
- 019:235 Media Communication Research Methods I 3 s.h.
- 019:236 Media Communication Research Methods II 3 s.h.
- 019:220 Master's Seminar (1 s.h. for 2 semesters) 2 s.h.
- Advanced methods courses 3 s.h.
- Electives (at least 6 s.h. in journalism and mass communication) 12 s.h.
- 019:299 Master's Research (thesis) 3 s.h.

Doctor of Philosophy

The Doctor of Philosophy in mass communications emphasizes interdisciplinary inquiry into media communication phenomena from cultural, historical, and social perspectives. The program is defined by the scholarly interests of its faculty, which include historical, legal, critical, cultural, social, feminist, and international aspects of media communication, both verbal and visual; comparative communication; convergence; new media; health communication; popular culture; and globalization. Faculty members use qualitative or quantitative methods in their research and teaching.

The program is highly individualized. In consultation with his or her adviser, each student draws on courses offered by the School of Journalism and Mass Communication as well as other academic units to develop a course of study that reflects his or her academic background, experience, professional goals, and intellectual interests.

The Ph.D. in mass communications requires 80 s.h. and is designed for students who have completed an M.A. thesis. Students may count up to 30 s.h. of master's degree credit toward the Ph.D., with the graduate committee’s approval, as long as the credit was earned in courses relevant to the Ph.D. study plan. The Graduate College does not accept transfer credit for professional skills courses. Students who have earned professional master's degrees must take additional Ph.D. course work.

The following courses are required.
- 019:231 Media Communication Theory I 3 s.h.
- 019:232 Media Communication Theory II 3 s.h.
- 019:235 Media Communication Research Methods I 3 s.h.
- 019:236 Media Communication Research Methods II 3 s.h.
- 019:265 Approaches to Teaching 3 s.h.
- 019:320 Ph.D. Seminar (taken four semesters for 1 s.h.) 4 s.h.
- Advanced research methods courses 3 s.h.
- Advanced theory courses 3 s.h.
- Journalism and mass communication electives 6 s.h.
- Outside concentration courses 9 s.h.
- Credit from master's degree and/or additional Ph.D. courses 30 s.h.
- 019:399 Dissertation 10 s.h.

For more detailed descriptions, see the Graduate Student Handbook; contact the School of Journalism and Mass Communication.

Admission to the Ph.D. is for fall entry.

Joint M.A./J.D. and Ph.D./J.D.

The School of Journalism and Mass Communication and the College of Law offer a joint degree program that leads to a Master of Arts or a Doctor of Philosophy, and a Juris Doctor. Separate application must be made to the School of Journalism and Mass Communication and the College of Law. Applicants must be admitted to each program before they may enroll in the joint program.

Students in the joint program may count some J.D. credit toward the M.A. or Ph.D., and some M.A. or Ph.D. credit toward the J.D. This enables them to earn both degrees in less time than they would need to earn each degree separately.

Admission

Applicants for admission to University of Iowa graduate degree programs must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

Admission for School of Journalism and Mass Communication graduate programs is for fall entry.
Facilities
The School of Journalism and Mass Communication moved into the new Philip D. Adler Journalism and Mass Communication Building in January 2005. The 65,000-square-foot building has computer laboratories for audio, video, design, writing, web publishing, and a resource center. Photography and typography laboratories are located nearby. The building also is home to offices of the Iowa High School Press Association; the Quill and Scroll Society, an international honor society for high school journalists; and the University’s award-winning student newspaper, The Daily Iowan.

Iowa Center for Communication Study
The Iowa Center for Communication Study encourages and facilitates student and faculty research in communication. It also sponsors publications and provides editorial oversight for two periodicals, the Journal of Communication Inquiry and The Iowa Guide: Scholarly Journals in Mass Communication and Related Fields.

Financial Support
More than $130,000 in scholarships is disbursed to undergraduate journalism majors and M.A. professional journalism emphasis students each year. Scholarship information and applications are available each fall; contact the School of Journalism and Mass Communication. The school offers research and teaching assistantships for graduate students; preference is given to Ph.D. students. Journalism and mass communication students have been successful in winning competitive fellowships open to all graduate students; applicants must be nominated by the graduate committee.

The school has a program of modest financial support for undergraduate and graduate student research projects.

Professional Enrichment
The school encourages professional students to complete at least one internship during their study program. The school’s internship and assessment coordinator helps students find appropriate internships.

Undergraduate students may take one internship for credit, registering with appropriate faculty sponsorship for 019:099 Journalism Internship (1-3 s.h.). Internships do not fulfill requirements for the major, but internship credit counts toward the maximum 40 s.h. of journalism and mass communication credit that may be applied toward the bachelor’s degree. Students may take additional internships for no credit through 409:019 Internship in Journalism. M.A. students in the professional journalism emphasis may work with the internship and assessment coordinator to find internship opportunities.

In addition to internships, students may find opportunities for journalism experience on campus through student-operated media, including The Daily Iowan and KRUI-FM radio.

Job Placement
The school’s internship and assessment coordinator helps students seeking career guidance and employment opportunities. The school posts notices of professional jobs open to journalism students and graduates and publicizes them on its electronic mailing list. It cooperates with the University’s Career Center in providing career guidance and placement services as well as workshops and programs on job-seeking skills.

Special Activities
The school engages in a variety of activities for the enrichment of students, faculty, and the entire campus. Speakers visit campus each year under lectureships funded by the John F. Murray and Leslie G. Moeller Fund. In addition, guest speakers are funded through the Hearst Visiting Professionals Program and the Hageboeck Daily Iowan Visiting Professionals Program. Campus organizations for students include Kappa Tau Alpha (KTA, a national society honoring scholarship in journalism), the National Association of Black Journalists (NABJ), the Public Relations Student Society of America (PRSSA), the Society of Professional Journalists (SPJ), and the Radio and Television News Directors’ Association (RTDNA).
Courses

Primarily for Undergraduates

019:099 Journalistic Reporting and Writing 4 s.h.
Fundamentals of journalistic reporting and writing: sophisticated news writing, basic to complex; emphasis on reporting techniques, enterprise, beat coverage.

019:101 Methods: Secondary School Journalism 3 s.h.
Same as 07S:113.

019:102 Workshop for Secondary School Journalism/Communication Teachers 1-2 s.h.
Workshops on journalism/mass media curriculum, audio/video production, photojournalism, publication design, journalistic writing techniques, advising student publications. Same as 07S:130.

019:120 Specialized Reporting and Writing 4 s.h.
Representative topics: public affairs, law, science, business, medicine, intercultural affairs, education, lifestyle, computer-assisted reporting. Repeatable. Prerequisite: 019:098 or consent of instructor.

019:121 Depth Reporting and Writing 4 s.h.
Enterprise reporting, emphasis on reporter as researcher, organizer, writer of complex stories in a variety of contexts. Prerequisite: 019:098 or consent of instructor.

019:122 Magazine Reporting and Writing 4 s.h.
Finding ideas, researching, interviewing; problems of organization and style; identification of audiences and markets; development of writing skills. Prerequisite: 019:098 or consent of instructor.

019:123 Broadcast Journalism Reporting and Writing 4 s.h.
Principles, gathering, writing, editing, reporting the news; techniques and concepts as a foundation for understanding, successfully writing, and delivering broadcast news. Prerequisite: 019:098 or consent of instructor.

019:124 Persuasive Writing 4 s.h.
Principles and practices of persuasive writing in editorials, op-ed pieces, magazine essays, reviews, public relations. Prerequisite: 019:098 or consent of instructor.

019:125 Freelance Reporting and Writing 4 s.h.
Approaches to writing and marketing articles to magazines, newspapers, other publications; developing ideas, researching, periodical markets, writing queries, writing and rewriting articles for publication. Prerequisite: 019:098 or consent of instructor. Same as 08N:125.

019:130 Media Workshop 4 s.h.
Analysis and solution of problems with communication strategies and/or media products; public relations, newsletter production, online journalism, media research. Repeatable. Prerequisite: 019:098 or consent of instructor.

019:131 Publication Design Workshop 4 s.h.
Problems of design, layout and production; practical and aesthetic considerations; digital techniques; creative projects. Prerequisite: 019:098 or consent of instructor.

019:132 Photojournalism Workshop 4 s.h.
Techniques; basic craft, location shooting, editing photographs; group critiques of assignments. Prerequisite: consent of instructor.

019:133 Typography Workshop 4 s.h.
Fonts and their use in design; letterform terminology; special typographical practices; digital techniques; creative projects. Prerequisite: 019:098 or consent of instructor.

019:134 Broadcast Journalism Workshop 4 s.h.
Electronic news gathering (ENG); conceptualization, shooting, editing basic news packages. Prerequisite: 019:098 or consent of instructor.

019:135 Public Relations Practice Workshop 4 s.h.
Development and presentation of public relations campaigns for client organizations; communication theory and research techniques applied in analyzing and solving public relations problems through objective-based strategic planning. Prerequisite: 019:098 or consent of instructor.

019:136 Editing Workshop 4 s.h.
Theory, principles, and process of editing and packaging material for various forms of publication; basics of editing—copy editing, headlines, illustration, layout, pagination. Prerequisite: 019:098 or consent of instructor.

019:137 Book Design Workshop 4 s.h.
Specialized problems and practices of book design, digital typesetting and pagination technology, creative projects. Prerequisite: 019:098 or consent of instructor.

019:138 Online Journalism 4 s.h.
Creation of original journalistic web sites incorporating writing, design, and structure; contemporary online media issues. Prerequisite: 019:098.

019:140 Legal and Ethical Issues in Communication 3 s.h.
Issues affecting the media: freedom of expression, libel, privacy, access to information, protection of news sources, free press/law trial, copyright, government regulation of broadcasting.

019:141 Classic and Contemporary Sports Writing 3 s.h.
Critical reading of sports reportage, including historical and current examples; social and cultural preoccupations and problems viewed through the prism of sports journalism.

019:142 Public Relations Case Studies 3 s.h.
Public relations concepts applied to analysis of public relations situations; development of solutions for public relations problems and opportunities.

019:150 Visual Communication 3 s.h.
History of modern visual communication from a cultural perspective; visual form, composition, spatial representation, color and other topics; in-depth study of selected artists, designers, photographers.
019:151 Communication Research Methods 3 s.h. Fundamentals of scientific inquiry in the study of communication and mass communication behavior; language, concepts, procedures, application of behavioral research methods; field and experimental approaches.

019:152 History of Mass Communication in the U.S. 3 s.h. Historical analysis of professional practices. Prerequisite: 019:091 or consent of instructor.

019:153 Popular Culture and Mass Communication 3 s.h. Relationships between popular media practices and American cultural realities as they influence contemporary social existence.

019:155 Mass Media and Society 3 s.h. Critical analysis of mass media in all forms (news, film, video, popular television, online communication); gender, race, class, sexual orientation, politics, current events.

019:156 Comparative Communication Systems 3 s.h. Culture and communication as central to examining media in different social and political settings; emphasis on contemporary problems.

019:157 News-Editorial Problems 3 s.h. Current issues in journalism; emphasis on press performance and practical problems journalists confront in their work.

019:159 Electoral Politics and the Mass Media 3 s.h. Relationship between political campaigns and mass media; critical evaluation of nature, role, function of media political coverage.

019:161 Law and the American Media 3 s.h. Current topics in communication law. Prerequisite: 019:140 or consent of instructor.

019:162 Communication and Public Relations 3 s.h. Theory and practice of public relations, cultural, social, and organizational roles of public relations, opportunities, problems and solutions.

019:163 History of Books and Printing 3 s.h. Invention and development of printing and its social and cultural consequences in the West; case studies of selected printers, designers, publishers; books and other printed media.

019:164 Images and Society 3 s.h. Treatment and uses of photography, film, and television as technologies of reproduction in contemporary American or Western culture.

019:165 African Americans and Mass Communication 3 s.h. Racism in varied genres of mass communication (music, television, film, print); analysis of images and messages related to African American culture. GE: cultural diversity. Same as 129:122.

019:166 Communication Technology and Society 3 s.h. Implications and effects of computer-based forms of communication, especially the Internet, for journalists, the media audience, and society at large.

019:167 Gender and Mass Media 3 s.h. Media images and representations of the body in terms of gender; impact on people, society; media and body image, sexuality, gender roles, gender and power, race, ethnicity, class, age, critical analysis of mediated images.

019:168 Journalism Ethics 3 s.h. Application of ethical principles in journalistic decision making; consideration of potentially conflicting values, loyalties, and goals that force professional journalists to make difficult choices.

019:169 Topics in Mass Communication 3 s.h. Focus on particular area, issue, approach or body of knowledge; may include international media, media criticism, new technologies, history of documentary photography, literary journalism, media ethics. Repeatable.

019:171 Advanced Reporting and Writing 4 s.h. Project journalism; extended magazine pieces, series for newspapers, or task-force projects by entire class on a major issue, with goal of publication. Repeatable. Prerequisite: one course from 019:120 through 019:125.

019:172 Advanced Photojournalism 4 s.h. Photojournalism skills; may include documentary photography, advanced photojournalism methods and techniques. Repeatable. Prerequisite: 019:132 or consent of instructor.

019:173 Advanced Media Workshop 4 s.h. Journalism and mass communication skills; may include editing, broadcasting, design, multimedia. Repeatable. Prerequisite: one course from 019:120 through 019:138.

019:174 Advanced Television News 4 s.h. Advanced training and experience in producing, writing, and reporting television news packages and newscasts; emphasis on meeting professional standards. Repeatable. Prerequisite: 019:134 or consent of instructor.

019:180 Special Projects in Mass Communication 1-3 s.h. Research and readings to fit needs, interests of students. Prerequisite: consent of instructor.

019:181 Readings in Communication and Mass Communication 1-3 s.h. Focus on a problem or issue. Prerequisite: consent of instructor.

019:190 Honors Readings 1-3 s.h. Topic in journalism or mass communication, chosen by student. Repeatable. Prerequisites: honors standing and consent of instructor.

019:191 Honors Project 3 s.h. Independent research or project for honors students. Prerequisites: honors standing and consent of instructor.

019:220 Master's Seminar 1 s.h. Theoretical or methodological problems in mass communication. Repeatable.

019:225 Contemporary Problems in Journalism 3 s.h. Current issues in journalism and mass communication in the United States and the world.

019:226 Master's Advanced Reporting and Writing 3 s.h. Writing workshop for new M.A. professional journalism emphasis students.

019:227 Master's Journalism Workshop 3 s.h. Advanced work in the student's visual or broadcast area of interest. Repeatable. Prerequisite: consent of instructor.

019:228 Master's Journalism Laboratory 3 s.h. Advanced writing, topics from student's focus area, approaches, or techniques of inquiry. Repeatable. Prerequisite: consent of instructor.

019:229 Master's Media Project 3 s.h. Group project on topic chosen by students and instructor; research, investigation, and dissemination of findings in several media formats; advanced writing, visual, broadcast, or multimedia interest area.

Liberal Studies

Coordinator: Anne Zalenski
Undergraduate degree: B.L.S.
Web site: http://www.continuetolearn.uiowa.edu/ccp/bls

Bachelor of Liberal Studies

The Bachelor of Liberal Studies (B.L.S.) program is offered by each of the three Board of Regents, State of Iowa, universities (The University of Iowa, Iowa State University, and The University of Northern Iowa) to serve adults whose job, family, geographic location, or other personal circumstances prevent them from attending college as full-time, on-campus students. The B.L.S. program has no on-campus residence requirement, but students must complete 30 s.h. of University of Iowa course work.

Students may complete the degree without attending a course on campus. Credit applicable toward the degree may be earned through several types of courses, including Saturday & Evening Classes, print- and web-based independent study courses, semester-based web courses, extension courses at sites throughout Iowa, interactive and broadcast televised courses, and regular session courses. Courses from any of the three Regents universities may be applied toward the degree, as may appropriate courses from other accredited institutions.

At The University of Iowa, the B.L.S. is awarded by the College of Liberal Arts and Sciences and administered by the Division of Continuing Education. Since the B.L.S. is a general undergraduate degree without a traditional major, B.L.S. students may not earn minors. However, the requirements are sufficiently flexible to allow students, with the assistance of a B.L.S. adviser, to structure a program that meets their individual needs and objectives. Many B.L.S. students plan programs designed to help them advance in their chosen career, begin a new career, or prepare for graduate or professional study. Students who have specific career goals or advanced degree programs in mind should learn what educational background they will need in order to achieve their goals, and they should include appropriate courses in their B.L.S. programs.

Requirements

Of the 120 s.h. required for the degree, 30 must be earned at The University of Iowa after admission to the B.L.S. program. At least 60 s.h. must be earned at four-year colleges, including 45 s.h. defined as upper-level. For the B.L.S., University of Iowa courses are considered upper-level if they are numbered 100 and above. A few courses numbered below 100 may be considered upper-level for the B.L.S.; for a list of these courses, contact the Center for Credit Programs.

B.L.S. students are required to complete the General Education Program (contact the College of Liberal Arts and Sciences for more information).

Since there are no traditional majors available through the B.L.S. program, students organize their study by earning at least 12 s.h. of credit, including 6 s.h. of upper-level credit, in each of three of the following distribution areas.

- Humanities (e.g., literature, history, philosophy, religion)
- Communication and arts (e.g., journalism, speech, drama, art, music)
- Natural sciences and mathematics (e.g., geology, biological sciences, statistics, computer science)
- Social sciences (e.g., geography, psychology, economics, political science, anthropology)
- Professional fields (e.g., business, education, nursing, social work, library science)

Semester hours applied toward completion of the General Education Program may not be used to meet the B.L.S. distribution area requirements, but they may be counted toward the required 45 s.h. of upper-level course work, if applicable.

Students must maintain a g.p.a. of 2.00 or higher in all course work applied toward the degree, all course work completed after admission to the program, and all upper-level course work.

All other College of Liberal Arts and Sciences policies regarding pass/nonpass and satisfactory/fail grading, academic standards, and so forth apply to B.L.S. students.

Contact the Center for Credit Programs for more information about the B.L.S. program.
Admission

Students who want to graduate with a B.L.S. must make a formal application for admission to the program. Prospective students should contact the Center for Credit Programs office before applying.

All applications to the program are screened. Students who have access to the full range of the University's daytime classes should seek admission to the College of Liberal Arts and Sciences in order to pursue a major leading to a degree other than the B.L.S. Non-B.L.S. students interested in tailoring a degree program to their individual interests should consider pursuing the interdepartmental studies major (see Interdepartmental Studies in the Catalog).

To be eligible for admission to the B.L.S. program, students must have earned either:

- an Associate in Arts (A.A.) degree from an Iowa area community college that participates in the Iowa Community College/Regents Articulation Agreement, with a g.p.a. of 2.00 or higher; or
- at least 60 s.h. of collegiate work acceptable for credit toward graduation, with a g.p.a. of 2.25 or higher.

Students admitted to The University of Iowa must have a g.p.a. of at least 2.00 to qualify for admission to the B.L.S. program.
Linguistics

Chair: Catherine O. Ringen
Professors: William D. Davies, Catherine O. Ringen, Jerzy Rubach
Professor emeritus: Robert S. Wachal
Associate professors: Jill Beckman, Alice L. Davison, Roumyana Slabakova
Assistant professors: Elena Gavruseva, Marc Light

Undergraduate degree: B.A. in Linguistics
Undergraduate nondegree program: Minor in Linguistics
Graduate degrees: M.A., Ph.D. in Linguistics
Web site: http://www.uiowa.edu/~linguist

Linguistics is the scientific study of human languages, which are highly complex systems. Areas of study include word structure (morphology), speech sounds (phonetics) and their patterns of combination and contrast (phonology), sentence structure (syntax), and meaning relations (semantics).

Linguists study well-known and familiar languages, such as English, Spanish, Russian, and Chinese. They also study less well-known languages and even those languages about which little has been discovered. While human languages are different from one another in many ways, there are broad similarities among them, supporting the idea that the capacity for language is part of human cognitive functions.

The description of formal patterns of human language has a number of applications. Linguistics is linked with anthropology and other social sciences in studying how language use relates to culture, region, class, and gender. It is connected to psychology, and to speech and hearing, in studying how children learn language, how speakers process and interpret language, and how injuries and disorders affect both production and perception of speech. Linguists and computer scientists collaborate to construct computational representations of syntax and semantics for processing natural languages.

Linguistics has important ties with instruction in foreign languages and in English as a second language. Studies of how languages are learned are based in part on analysis of the languages in question. They also are grounded strongly in theories of second language acquisition, which in turn are related to theories of how linguistic knowledge is represented in the mind.

People with linguistic training teach English as a second language and help clinicians retrain people with linguistic disabilities. Some help design school programs for minority groups or intelligence and achievement tests. Linguists also work in occupations related to law, the computer industry, and foreign languages.

Undergraduate Program

High scores on verbal, analytic, and quantitative aptitude tests are indicators of success in linguistics. Although few aspects of the field deal with numbers, students must be able to reason logically and explicitly and deal with formulas and abstract symbols. Depending on their vocational goals, prospective linguistics students should consider pursuing their studies either through the M.A. in linguistics with a professional focus or through the Ph.D.; or they should take a second major. Appropriate companion fields include foreign languages, English, anthropology, sociology, speech pathology, psychology, mathematics, computer science, philosophy, and elementary and secondary education.

Bachelor of Arts

The B.A. in linguistics prepares students to do basic language analysis in syntax-semantics (sentence patterns and their relation to meanings) and phonology (sound patterns). Elective courses in a variety of subspecialties enable students to tailor the program to their own interests.

The major in linguistics requires 24 s.h. of course work, as follows.

- 103:100 Introduction to Linguistics 3 s.h.
- 103:110 Articulatory and Acoustic Phonetics 3 s.h.
- 103:111 Syntactic Analysis 3 s.h.
- 103:112 Phonological Analysis 3 s.h.
- A course in language history (e.g., 103:131 or 103:139)
- or
- A course in an old language (classical Greek, Latin, Old English, Sanskrit)

Electives (chosen in consultation with undergraduate adviser)
Students must complete no fewer than 15 s.h. of the major, including 103:110, 103:111, and 103:112, at The University of Iowa.

TESL Emphasis
As part of the B.A. in linguistics, students can earn an emphasis in Teaching English as a Second Language (TESL). This emphasis can prepare students to teach English to non-native speakers abroad. This emphasis is also excellent preparation for graduate work in second language acquisition. To earn the TESL emphasis, students take the five required courses plus the following.

Both of these:
- 103:141 The Structure of English 3 s.h.
- 103:145 Methods of Teaching English as a Second Language 3 s.h.

One of these:
- 103:107 Practicum in Teaching English as a Second Language 3 s.h.
- 103:147 Research Methods 3 s.h.
- 103:156 Child Language—Linguistic Perspectives 3 s.h.
- 103:161 Practical Phonetics 3 s.h.
- 103:173 Generative Second Language Acquisition 3 s.h.

Four-Year Graduation Plan
The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

Before the third semester begins: at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: Introduction to Linguistics (103:100) and at least one-half of the semester hours required for graduation

Before the seventh semester begins: two more courses in the major and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: two more courses in the major

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Honors
Members of the University Honors Program may graduate with honors in linguistics by completing the major course work plus an honors thesis, which must be prepared in consultation with the student's academic adviser. Membership in the University Honors Program requires that students maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University Honors Program for more information).

Minor
The undergraduate minor in linguistics requires 15 s.h. of linguistics courses, including at least 12 s.h. taken at The University of Iowa in advanced courses (numbered 103:100 and above). The minor must include 103:100, 103:110, 103:111, and 103:112. Course work toward the minor may not be taken pass/nonpass.

Joint B.A./M.A. with TESL Focus
Qualified undergraduate linguistics majors may apply to the joint B.A./M.A. program, in which they receive an M.A. in linguistics with TESL (Teaching English as a Second Language) focus one year after receiving the B.A. To enter the program, a student must:

- be a University of Iowa undergraduate student majoring in linguistics;
- complete at least 80 s.h. of undergraduate work, typically by the end of the fifth semester; and
- have a g.p.a. of at least 3.50.

As part of the undergraduate major, students take 103:141 The Structure of English, a course in language history, 103:100 Introduction to Linguistics, and 103:110 Articulatory and Acoustic Phonetics.

Joint B.A./M.A. students may count 12 s.h. toward both the B.A. and the M.A. Instead of taking 103:111 Syntactic Analysis to fulfill the B.A. syntax requirement, they take 103:201 Introduction to Syntax, the first course in the mandatory two-course syntax sequence for M.A. students. Instead of taking 103:112 Phonological Analysis to fulfill the B.A. phonology requirement, they take 103:203 Introduction to Phonology, the first in the graduate two-course phonology sequence.
In addition, 103:145 Methods of Teaching English as a Second Language and 103:202 Syntactic Theory count toward both degrees and typically are taken during the senior year.

**Graduate Programs**

The graduate programs emphasize theory and research. Students interested in nonuniversity careers also may take courses in applied linguistics and other fields, either in connection with doctoral work or as an option in the M.A. program.

**Master of Arts**

All students take a required set of core courses in phonology and syntax. Comprehensive examinations cover phonology, syntax, [and applied linguistics for students who choose this option]. The required core courses are as follows.

- 103:110 Articulatory and Acoustic Phonetics 3 s.h.
- 103:173 Generative Second Language Acquisition 3 s.h.
- 103:201 Introduction to Syntax 4 s.h.
- 103:202 Syntactic Theory 3 s.h.
- 103:203 Introduction to Phonology 3 s.h.
- 103:204 Phonological Theory 3 s.h.

One of these:

- 103:113 Linguistic Field Methods 3 s.h.
- 103:210 Linguistic Structures 3 s.h.
- 103:217 Language Universals and Linguistic Typology 3 s.h.

The M.A. with thesis requires at least 9 s.h. of elective courses and up to 6 s.h. of thesis credit. The nonthesis option requires at least 36 s.h., including the 21 s.h. departmental core and 15 s.h. of course work in the department. The 15 s.h. may include a 12 s.h. focus [e.g., teaching English as a second language]. All courses that count toward the degree must be approved by the student's adviser.

For students with a linguistics background, up to 6 s.h. of course work can be waived if the department determines that the student completed comparable work before enrolling in the program.

All students must earn a minimum of 30 s.h. of graduate credit to receive the degree, regardless of prior preparation.

**Doctor of Philosophy**

The highly selective Ph.D. program provides students with a strong foundation in theoretical linguistics and helps them develop the skills they will need to explore the close relationship between linguistics and related disciplines. The core is as follows (total of 18 s.h.).

- Two upper-level syntax courses numbered 103:212 or above
- Two upper-level phonology courses numbered 103:214 or above
- At least two seminars

An approved specialty area of 18 s.h. also is required, and students must achieve proficiency in a foreign language, as specified by department regulations.

To pass the comprehensive examination for the Ph.D., a student must gain approval for two papers of publishable quality. One must be in phonology or syntax. The other should be in an area of the student's choosing and must be distinct from the area of the first paper.

An oral defense of the dissertation and three years of residence also are required. In addition, all candidates are required to gain supervised experience in teaching and research.

**Admission**

Applicants to the graduate program in linguistics must complete an application form, submit GRE General Test scores, and have three letters of recommendation sent to the Department of Linguistics. Students whose first language is not English must submit Test of English as a Foreign Language (TOEFL) scores. Applications for admission should be submitted as early as possible for the following academic year.

**Financial Support**

Fellowships, teaching assistantships, and research assistantships are available to qualified graduate students. Applications are due no later than March 1 for the following academic year; earlier submission is strongly encouraged.

University of Iowa Fellowships are available for exceptionally well-qualified applicants. Those interested in being nominated for a University of Iowa Fellowship should submit all application materials by January 15 for the following academic year.

Applications for all awards are considered only for students whose application for admission is complete.
Language Instruction

Instruction in Swahili and Arabic is provided by native-speaking teachers through the department. Elementary and intermediate Swahili and Arabic are taught every year. The classroom emphasis on oral communication skills is augmented by discussion of various aspects of the cultures. Students may use the four-semester sequence in Swahili to complete the College of Liberal Arts and Sciences General Education Program foreign language component. The sequences also satisfy requirements for certain undergraduate programs, for example, those in the African American World Studies Program.

English as a Second Language

ESL instruction is offered in three distinct, but related, programs: the ESL credit classes, the Iowa Intensive English Program (IIEP), and the Teaching Assistant Preparation in English Program (TAPE). These programs meet the needs of students whose first language is not English. The ESL credit support courses help students raise their English proficiency so they can complete a degree successfully. The IIEP provides intensive instruction for students who must raise their English proficiency to gain admission to a university or college. The TAPE program prepares students to teach in U.S. classrooms.

ESL Credit Classes

English as a Second Language Credit Classes bridge the gap between full-time language instruction and full-time academic work, serving students who score 530-599 (paper-based) or 197-250 (computer-based) on the Test of English as a Foreign Language (TOEFL). ESL courses are offered to increase proficiency in five skill areas: reading, writing, speaking, pronunciation, and grammar. Each course grants 3 s.h. of credit, which count toward graduation. Courses are taught by teaching assistants pursuing advanced degrees in linguistics.

Courses taken to meet the College of Liberal Arts and Sciences English proficiency requirement may not be taken P/N. ESL courses may not be taken S/U. All required ESL courses must be completed before registration in rhetoric courses. Once enrolled, students may not drop ESL courses.

Iowa Intensive English Program (IIEP)

The IIEP primarily serves students on conditional admission and persons who have not yet been admitted to the University and who score below 530 (paper-based) or 197 (computer-based) on the Test of English as a Foreign Language (TOEFL). The program offers intensive English instruction and a cultural, social, and academic orientation to the United States. Instruction emphasizes proficiency in spoken and written English, which is crucial to college and university work. Grammar and the basic language skills of writing, reading, listening comprehension, and speaking are taught each day at all levels—beginning, intermediate, and advanced.

Each student receives 20 hours of classroom instruction each week plus individual work in the language laboratory. Field trips and cultural and social experiences are an integral part of the program. Students enrolled in the IIEP have full access to all University facilities. The program welcomes international students preparing to enter universities and colleges as well as other adults who want to improve their English skills. Instruction is by full-time professional ESL instructors.

International students admitted to the IIEP receive a certificate of eligibility (Form I-20), which enables them to apply for a student visa at the nearest U.S. consulate or embassy. Application materials are available from the ESL Programs Office and on the Iowa Intensive English Program web site.

Teaching Assistant Preparation in English (TAPE)

The Teaching Assistant Preparation in English (TAPE) program is designed for graduate students whose first language is not English, who need additional work on English communication, and who will hold teaching assistantships while at The University of Iowa. Only students who need the program and who have sufficient competence in English to profit from it are eligible. TAPE courses are open to graduate students who have been evaluated for TA certification and to others if space is available. Students are taught by full-time professional ESL instructors.
Facilities

The Department of Linguistics has two laboratories. One is equipped with 12 computer workstations for small group instruction, individual work, and student research in speech analysis, second language acquisition, computational linguistics, and other areas. The other has a soundproof booth connected to a computer with software for speech analysis. Remote terminals and personal computers are also available to students.

The departmental reading room, which contains a modest library, provides a common meeting place for faculty and students. Students have considerable influence on departmental affairs and enjoy a high degree of individual instruction.

Courses

Primarily for Undergraduates

103:011 Language and Society 3 s.h.
Correlates between language and social behavior; methods for discovering and describing socially significant language behavior; educational and political implications of findings. GE: social sciences.

103:013 Language and Formal Reasoning 3 s.h.
Semantics and sentence structure of English; word meanings, meaning connected to truth conditions, reasoning based on logical connectives and quantifiers, evaluation of valid and invalid arguments. GE: quantitative or formal reasoning.

103:020 Introduction to the Study of Language 3 s.h.
Nontechnical introduction: classification of languages, writing systems, language and the brain, acquisition of first and second languages, bilingualism, animal communication, language and computing.

103:028 English Grammar 3 s.h.
Recognizing nouns, verbs, adverbs, adjectives, and other parts of speech; sentence analysis; subjects, objects; types of sentences; passives; relative clauses; for students with little or no background in English grammar study.

103:035 English Words 3 s.h.
English word formation, basic units of English vocabulary; vocabulary skill expansion; word structure, history of English, language change, phonetics, phonology, sociolinguistics.

103:045 Language Rights 3 s.h.
Language minorities and linguistic human rights in the United States and the world; language and identity, culture, power, case studies of language rights deprivation.

103:055 Languages of the World 3 s.h.
Overview of structural similarities and differences in human language; survey of the world’s major language families; emphasis on sentence and word structure, sound systems, and modes of classification. GE: social sciences.

103:095 Research Practicum arr.
Individual participation in faculty research projects. Prerequisite: consent of instructor.

103:099 Special Project arr.

For Undergraduate and Graduate Students

103:100 Introduction to Linguistics 3 s.h.
Introduction to the study of human language: sounds and their contrasts and variation, words and meaningful subunits, sentence structure, historical change. Same as 08L:100, 113:100.

103:107 Practicum in Teaching English as a Second Language 3 s.h.
Practical experience in TESL; observation and participation in intensive English classes; design and teaching of ESL classes under supervision. Prerequisites: 103:145 and consent of instructor.

103:110 Articulatory and Acoustic Phonetics 3 s.h.
Production and transcription of sounds in human languages; physics of sound, computer analysis of speech sounds. Offered fall semesters.

103:111 Syntactic Analysis 3 s.h.
Introduction to sentence structures and basic abstract relations that characterize them, including word category, word order, hierarchical organization; problem sets from English and other languages as basis for discussion, analysis. Offered spring semesters.

103:112 Phonological Analysis 3 s.h.
Introduction to analysis of sound systems; generative phonological theory; practice in phonological analysis using data from a variety of languages. Offered spring semesters. Prerequisite: 103:110.

103:113 Linguistic Field Methods 3 s.h.
Collection and analysis of primary linguistic data from unfamiliar language; methods of elicitation, theory, practical problems; extensive practice in eliciting data from a consultant. Prerequisites: 103:110, 103:111, and 103:112.

103:120 Accelerated Elementary Arabic 4, 6 s.h.
First-year Arabic in one semester.

103:121 Elementary Arabic I 3-4 s.h.
Speaking, listening, reading, and writing skills.

103:122 Elementary Arabic II Continuation of 103:121. 3-4 s.h.

103:123 Intermediate Arabic I Communication in speaking and writing; cultural topics. Prerequisite: 103:122. 3-4 s.h.

103:124 Intermediate Arabic II Continuation of 103:123. Prerequisite: 103:123. 3-4 s.h.

103:125 Elementary Swahili I GE: foreign language. Same as 129:145. 3-4 s.h.

103:126 Elementary Swahili II GE: foreign language. Same as 129:146. 3-4 s.h.

103:127 Intermediate Swahili I GE: foreign language. Same as 129:147. 3-4 s.h.

103:128 Intermediate Swahili II GE: foreign language. Same as 129:148. 3-4 s.h.

103:129 Advanced Swahili Advanced speaking, listening, reading, and writing skills. Prerequisite: 103:128 or equivalent. Same as 129:149. 3-4 s.h.

103:131 History of the English Language Development of phonological and grammatical structure of English, from Old to Modern English; dialectal differentiation in English. Prerequisite: 103:100 or equivalent. Same as 08L:131. 3 s.h.

103:132 Elementary Old English Structure; historical position in the Germanic group of languages; selected texts. Same as 008:140. 4 s.h.
103:139 Chinese Historical Phonology 3 s.h.
Same as 039:139.

103:140 Introduction to Computational Linguistics 3 s.h.
Introduction to computational linguistics; focus on theory and practice of natural language processing and syntactic and semantic analysis. Same as 22C:146.

103:141 The Structure of English 3 s.h.
Descriptive analysis of English, including word and sentence structure; focus on relevance to teaching English as a second language. Offered fall semesters. Pre- or corequisite: 103:111 or consent of instructor.

103:144 Introduction to Chinese Linguistics 3 s.h.
Same as 039:144.

103:145 Methods of Teaching English as a Second Language 3 s.h.
Observations of ESL and intensive English classes at the University; design and presentation of short lessons; test evaluation, demonstrations of innovative approaches of the last decade; materials. Offered spring semesters. Prerequisites: 103:110 and 103:141.

103:147 Research Methods 3 s.h.
Research tools of linguistics, language acquisition, and English as a second language; emphasis on design of research experiments based on specific linguistic hypotheses; evaluation of research methodologies; basic statistical analysis, work with linguistic databases through problem sets. Prerequisite: 103:100.

103:150 Language and Gender 3 s.h.
Gender-related language variation; current research on gender-specific linguistic forms and usage in the United States and other language communities; introduction to relevant principles of linguistic theory and analysis. GE: cultural diversity. Same as 113:173.

103:155 Morphology 3 s.h.
Lexicon and principles of word formation; principal processes of inflection, derivation, and compounding found in the world’s languages; relation to phonology, syntax; practice in morphological analysis from a variety of languages. Prerequisite: 103:100.

103:156 Child Language—Linguistic Perspectives 3 s.h.
Linguistic theory as applied to first-language learning, including acquisition of sounds, syntax and word meaning, acquisition strategies, properties of input, theories of first-language acquisition. Prerequisite: 103:100.

103:157 Electronic Corpora and Linguistic Analysis 3 s.h.
Aspects of electronic corpora and their use for linguistics, language acquisition, and language technology; creation and nature of corpora; tools for using a corpus.

103:161 Practical Phonetics 3 s.h.
Contemporary articulatory and acoustic research, including second-language acquisition, elocution and computer analysis of primary linguistic data. Prerequisite: 103:150.

103:163 Philosophy of Language 3 s.h.
Prerequisite: consent of instructor. Same as 026:189.

103:172 Psychology of Language 3 s.h.
GE: social sciences. Same as 003:117.

103:173 Generative Second Language Acquisition 3 s.h.
Overview of current second-language acquisition research in the generative linguistic framework; focus on characterizing second language learners’ linguistic competence and how it is constrained by principles of universal grammar. Offered fall semesters. Prerequisite: 103:100 or equivalent.

103:175 Introduction to Semantics 3 s.h.
Overview of meaning in natural language mapped onto lexical and syntactic structures; formal logical and set theory description; discussion of truth conditions, compositionality, presupposition, definiteness, quantification in natural language. Prerequisite: 103:111 or equivalent.

103:176 Language Development 1-3 s.h.
GE: social sciences. Prerequisite: 103:172 or 103:100 or consent of instructor. Same as 003:118.

103:177 Basic Neuroscience for Speech and Hearing 3 s.h.
Same as 003:116.

103:199 Special Projects arr.
Theoretical and applied topics.

Primarily for Graduate Students

103:201 Introduction to Syntax 4 s.h.
Methods and argumentation for formal analysis of sentence structure through induction from language data of central concepts and relations; hypothesis testing, empirical bases of theoretical concepts.

103:202 Syntactic Theory 3 s.h.
Current syntactic theory examined through analysis of data sets, readings in recent research; emphasis on argument construction, statement of formal principles. Offered spring semesters. Prerequisite: 103:201.

103:203 Introduction to Phonology 3 s.h.
Analysis of sound systems, focus on early generative phonological theory; extensive practice in analysis using data from a variety of languages; linguistic argumentation. Prerequisite: 103:110.

103:204 Phonological Theory 3 s.h.
Post-SPE phonological theory, including autosegmental phonology, lexical phonology, feature geometry, underspecification theory, the syllable, optimality theory. Prerequisite: 103:203.

103:206 First Language Acquisition 3 s.h.
Child language from a crosslinguistic perspective. Prerequisites: 103:110, and 103:141 or 103:201.

103:210 Linguistic Structures 3 s.h.
Grammatical and/or phonological structure of a selected language or language family. Repeatable with different language. Prerequisite: consent of instructor.

103:212 Advanced Syntactic Theory 2-3 s.h.
Recent developments in syntax; comparison of theories, argumentation, and uses of data.

103:214 Advanced Phonological Theory 2-3 s.h.
Current issues. Repeatable. Prerequisite: 103:204.

103:215 Historical and Comparative Linguistics 3 s.h.

103:216 Topics in Second Language Acquisition 3 s.h.
Recent developments of selected issues in second language acquisition. Repeatable. Prerequisite: 103:173 or consent of instructor.

103:217 Language Universals and Linguistic Typology 3 s.h.
Proposed universal principles of linguistic structure; approaches to classification of languages on the basis of grammatical and phonological structure. Prerequisites: 103:100 or equivalent, and consent of instructor.

### Special English Courses

#### ESL Credit Support Courses

The following courses are for students whose first language is not English. Courses taken to meet the College of Liberal Arts and Sciences English proficiency requirement may not be taken P/N. English as a Second Language (ESL) courses may not be taken S/U. In order to enroll in ESL courses, undergraduates must score 530 (paper-based) or 197 (computer-based) or higher on the Test of English as a Foreign Language (TOEFL), or the equivalent; graduate students must score 550 (paper-based) or 215 (computer-based) or higher on TOEFL, or the equivalent. Consent of ESL coordinator is required for all courses.

**Special English Courses**

**ESL Credit Support Courses**
Iowa Intensive English Program (IIEP)

These courses are for students whose first language is not English. The Iowa Intensive English Program primarily serves students on conditional admission, those who have not yet been admitted to the University, and those who score below 530 (paper-based) or 197 (computer-based) on the Test of English as a Foreign Language (TOEFL).

103:001 Iowa Intensive English: Communication Skills 0 s.h.
Aural comprehension, spoken English; U.S. culture; information exchange, talking with Americans; cultural differences; beginning, intermediate, advanced. Prerequisite: consent of ESL coordinator.

103:002 Iowa Intensive English: Communication Skills for Professionals 0 s.h.
Listening and speaking skills for international professionals; conversational fluency, language for professional interactions (e.g., discussions and presentations). Prerequisite: consent of ESL coordinator.

103:003 Iowa Intensive English: Reading 0 s.h.
Effective reading: skills and practice of reading strategies using newspapers, popular magazines, schedules, documents, academic textbooks, correspondence, literature; beginning, intermediate, advanced. Prerequisite: consent of ESL coordinator.

103:004 Iowa Intensive English: Grammar 0 s.h.
Correct use of English grammatical structures; extensive practice to achieve competence in English communication; beginning, intermediate, advanced. Prerequisite: consent of ESL coordinator.

103:005 Iowa Intensive English: Writing 0 s.h.
Personal and formal writing: journal entries, letters, critiques, essay exams, short papers involving library use; revising and editing; beginning, intermediate, advanced. Prerequisite: consent of ESL coordinator.

Teaching Assistant Preparation in English (TAPE)

The TAPE program is designed for prospective teaching assistants whose first language is not English and who need additional work on English communication skills. Entry to the program is determined by a test.

103:006 TA Preparation in English: Fluency Building 0 s.h.
Pronunciation, conversational fluency, knowledge of U.S. culture. Prerequisite: consent of ESL coordinator.

103:007 TA Preparation in English: Pronunciation 0 s.h.
Intensive work toward maximum intelligibility; emphasis on stress, timing, intonation. Prerequisite: consent of ESL coordinator.

103:008 TA Preparation in English: Presentation Skills 0 s.h.
Intelligibility of speech and clarity of expression in presenting and responding; practice in videotaped lectures. Prerequisite: consent of ESL coordinator.

103:009 TA Preparation in English: Orientation 0 s.h.
Student expectations, typical teacher/student relationships, basic classroom management in a U.S. university. Prerequisite: consent of ESL coordinator.
Mathematics

Chair: David Manderscheid
Professors emeriti: Kendall E. Atkinson, Eugene W. Johnson, Erwin Kleinfeld, Margaret Kleinfeld, Frank J. Kosier, Harold L. Schoen, Marilyn Zweng
Associate professors: Richard Baker, Frauke Bleher, Oguz Durumeric, Laurent Jay, John P. Lediaev, Tong Li, Walter Seaman, David Stewart
Associate professor emeritus: Michael A. Geraghty
Assistant professor: Isabel Darcy
Assistant professor emerita: Matilde Macagno
Undergraduate degrees: B.A., B.S. in Mathematics
Undergraduate nondegree program: Minor in Mathematics
Graduate degrees: M.S., Ph.D. in Mathematics
Web site: http://www.math.uiowa.edu

Mathematics is a basic tool for understanding modern society as well as a crucial requirement for many careers in science, engineering, business, and the professions. Research in this living, dynamic subject is at the highest level in history.

An undergraduate degree in mathematics prepares students for a variety of careers in government and business, for secondary teaching, for graduate study, and with proper planning, for a variety of professional programs. Graduate study is advisable for some industrial and governmental positions and for college and university teaching and research.

Undergraduate Programs

The department offers two undergraduate degrees in mathematics, the Bachelor of Science and the Bachelor of Arts. Students seeking a bachelor's degree enroll in one of three programs: Program A is for students who plan to work in industry or government or pursue graduate study in mathematics; program B is for students who seek secondary school teaching licensure; and program C is for those seeking specialization in a math-related area, such as actuarial science, biomathematics, business, computer science, economics, physics, statistics, and so forth. Program C may be especially appropriate for students who plan to seek a math-related job after earning a B.A. or B.S. in mathematics, rather than going on to graduate study.

Students may choose to combine a degree in mathematics with one in computer science, statistics, or actuarial science. The department also offers a minor in mathematics.

Candidates for all Department of Mathematics undergraduate degrees must complete the College of Liberal Arts and Sciences General Education Program. The department encourages students to choose courses that complement their mathematics interests.

At least 15 s.h. of post-calculus course work applied toward the major requirements must be taken at The University of Iowa. Post-calculus courses are those numbered 22M:027 and higher that have a calculus prerequisite.

Students must maintain a g.p.a. of at least 2.00 in all course work for the major to earn a degree in mathematics.

For policies concerning transfer credit, correspondence credit, credit by examination, cumulative grade-point average, rules relating to regression and duplication, and so forth, see the College of Liberal Arts and Sciences Student Academic Handbook. For information about duplication, regression, and use of the second-grade-only option for mathematics courses, contact the Department of Mathematics.

The Handbook for Undergraduate Majors is available from the Department of Mathematics and on its web site. The handbook provides details about schedule planning and career options. For more information on admission, financial support, employment opportunities, the faculty, facilities, and other topics, visit The University of Iowa and Department of Mathematics web sites.

Program A

Program A is primarily for students who plan to work in industry or government or to pursue graduate study in mathematics.
Students must complete seven core courses. In addition, B.A. students must complete at least four electives, and B.S. students must complete at least six.

**CORE COURSES**

A two-semester sequence of calculus I-II (8 s.h.) is required. Advanced placement credit, CLEP credit, and credit earned through the Mathematics Incentive Program is accepted for part or all of the calculus requirement.

All of these:

- 22M:025-22M:026 Calculus I-II 8 s.h.
- 22M:027 Introduction to Linear Algebra 4 s.h.
- 22M:050 Introduction to Abstract Algebra I 3 s.h.
- 22M:055-22M:056 Fundamental Properties of Spaces and Functions I-II 7 s.h.
- 22M:100 Introduction to Ordinary Differential Equations 3 s.h.

More advanced courses may be substituted for the core courses, with Department of Mathematics approval.

**ELECTIVES**

**For the B.A. degree:** four electives (each 3-4 s.h.) chosen from the following list, including at least one upper-level mathematics course

**For the B.S. degree:** six electives from the following list, including at least three upper-level mathematics courses

**Mathematics**

**Computer Science**

22C:016 Computer Science I: Fundamentals 4 s.h.

Any course numbered above 22C:020 that counts toward an undergraduate major in computer science, except 22C:197 and 22C:198.

**Statistics and Actuarial Science**

Students can count only one of these: 22S:120 or 22S:130. Neither of them can be counted if taken after 22S:153.

- 22S:120 Probability and Statistics 4 s.h.
- 22S:130 Introduction to Mathematical Statistics I 3 s.h.
- 22S:131 Introduction to Mathematical Statistics II 3 s.h.

- 22S:138 Bayesian Statistics 3 s.h.
- 22S:150 Regression, Time Series, and Forecasting 3 s.h.
- 22S:153 Mathematical Statistics I 3 s.h.
- 22S:154 Mathematical Statistics II 3 s.h.
- 22S:156 Applied Time Series Analysis 3 s.h.
- 22S:158 Experimental Design and Analysis 3 s.h.
- 22S:174 Quantitative Methods for Actuaries 3 s.h.
- 22S:175 Actuarial Models 3 s.h.
- 22S:176 Credibility and Loss Distributions 4 s.h.
- 22S:180 Mathematics of Finance 4 s.h.
- 22S:181 Life Contingencies I 3 s.h.
- 22S:182 Life Contingencies II 4 s.h.
- 22S:193 Statistical Inference I 3 s.h.
- 22S:194 Statistical Inference II 3 s.h.
- 22S:195 Probability and Stochastic Processes I 3 s.h.
- 22S:196 Probability and Stochastic Processes II 3 s.h.

**Program B**

Program B is intended for students seeking secondary school teaching licensure. See the department’s Handbook for Undergraduate Majors, and see Teaching and Learning (College of Education) in the Catalog.

**CORE COURSES**

A two-semester sequence of calculus I-II (8 s.h.) is required. Advanced placement credit, CLEP credit, and credit earned through the Mathematics Incentive Program is accepted for part or all of the calculus requirement.

All of these:

- 22C:016 Computer Science I: Fundamentals 4 s.h.
- 22M:025-22M:026 Calculus I-II 8 s.h.
- 22M:027 Introduction to Linear Algebra 4 s.h.
- 22M:028 Calculus III 4 s.h.
- 22M:050 Introduction to Abstract Algebra I 3 s.h.
- 22M:055-22M:056 Fundamental Properties of Spaces and Functions I-II 3 s.h.
- 22S:120 Probability and Statistics 4 s.h.

Students who wish to take 22M:055 and 22M:056 instead of 22M:028 and 22M:055 should consult their adviser.

One of these:

- 22M:070 Foundations of Geometry 3 s.h.
- 22M:106 Transformation Geometry 3 s.h.

One of these:

- 22M:150 Introduction to Discrete Mathematics 3 s.h.
More advanced courses may be substituted for the core courses, with Department of Mathematics approval.

ELECTIVES

B.A. students in Program B must take at least one additional course beyond calculus. B.S. students in Program B must take at least three additional courses beyond calculus, of which two must be numbered 22M:106 or above. With their adviser's approval, capable students are encouraged to substitute more advanced courses in the same subject area for any of the electives. The Handbook for Undergraduate Majors offers advice on course selection.

Program C

Program C provides a degree with specialization in a math-related area, for instance, mathematics of optimal business decision making, economics, physics, biostatistics, biomathematics, computer science, and statistics and actuarial science. In consultation with the faculty adviser, each student prepares a program of studies tailor-made to his or her interests and academic or career goals. Building on a core of mathematics courses, students have considerable freedom to design their curriculum. The proposed program of studies must be approved by the mathematics department undergraduate committee. The Handbook for Undergraduate Majors has plans for choosing electives in several areas; students may use these or propose other plans.

CORE COURSES

A two-semester sequence of calculus I-II (8 s.h.) is required. Advanced placement credit, CLEP credit, and credit earned through the Mathematics Incentive Program is accepted for part or all of the calculus requirement.

<td>4 s.h.</td>
</tr>
</tbody>
</table>

One additional proof course (e.g., 22M:050 or 22M:055)

More advanced courses may be substituted for the core courses, with Department of Mathematics approval.

ELECTIVES

Students choose six electives for the B.A. and eight for the B.S. Students choose electives according to their specialization area. At least three of the courses must be in mathematical sciences (prefixes 22C, 22M, and 22S).

For a list of suggested subtracks, consult the Handbook for Undergraduate Majors.

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

Note: Much of the work in mathematics must be taken in sequence, so students must begin major requirements as early as possible, and individual plans of study must be worked out carefully. The B.A. in mathematics typically requires 11 courses, and the B.S. requires 13. Students must choose program A, B, or C by the end of the third semester and must remain in their chosen program until they graduate in order to stay on track for the four-year graduation plan.

Before the third semester begins: course work through second-semester calculus and at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: two or three more courses in the major and at least one-half of the semester hours required for graduation

Before the seventh semester begins: three or four more major courses and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: two or three more major courses

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Honors

In order to graduate with honors in mathematics, a student must be a member of the University Honors Program, which requires students to maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University Honors Program for more information). Honors students...
in mathematics also must complete the regular requirements for an undergraduate major in mathematics with a g.p.a. of at least 3.40, and must complete either an honors project or the courses 22M:115-22M:116, and 22M:120-22M:121 with a g.p.a. of 3.00 or higher. Other sequences, such as 22M:170-22M:171, may be substituted with the approval of the honors adviser.

Students planning an honors project are responsible for finding a faculty member willing to supervise the project. For help finding a project supervisor, contact the department. Students typically register for 22M:197 Individual Study and Honors in Mathematics for at least 3 s.h. For more information, contact the mathematics department honors adviser.

Double Majors

Students who wish to combine a major in mathematics with a major in computer science, statistics, or actuarial science must satisfy the requirements of program A, program B, or program C in mathematics. Students are advised to seek the same degree (B.A. in both areas or B.S. in both); otherwise the University requires additional semester hours for graduation.

Transfer from Engineering to Mathematics

Certain students who have completed 22M:031, 22M:032, 22M:033, 22M:034, 22M:037, 22M:047, or 22M:048 may count these courses toward a bachelor's degree in mathematics. See the department's Handbook for Undergraduate Majors.

Minor

The minor in mathematics requires a minimum of 15 s.h. earned in Department of Mathematics courses, including at least 12 s.h. in advanced courses at The University of Iowa. Neither transfer credit nor credit by examination is accepted toward the 12 s.h. of advanced work; advanced courses are 22M:027 and 22M:028, and all courses numbered 22M:033 or above, except 22M:081, 22M:104, 22M:105, 22M:109, and 22M:195. See the department's Handbook for Undergraduate Majors.

Students seeking a mathematics minor must maintain a g.p.a. of at least 2.00 in all work attempted in the department. No course counted toward the minor may be taken pass/nonpass.

Graduate Programs

The department offers a Master of Science and a Doctor of Philosophy in mathematics.

Master of Science

Students earn the M.S. through courses and comprehensive examinations. There is no M.S. thesis.

There are four programs leading to an M.S. in mathematics. The requirements [courses and comprehensive examination areas] may be modified with the department's consent.

Program I

Program I prepares students for further study of pure and applied mathematics and for employment in government and industry. The program requires a minimum of 30 s.h. of graduate credit. M.S. students in program I take several courses and pass two comprehensive examinations. Students must earn a grade of B-minus or higher in six of the courses and maintain a g.p.a. of at least 2.75 in all mathematics courses taken for the M.S.

The following courses are required.

- 22M:115-22M:116 Introduction to Analysis I-II 6 s.h.
- 22M:120-22M:121 Abstract Algebra I-II 6 s.h.
- 22M:132 General Topology 3 s.h.
- 22M:133 Introduction to Smooth Manifolds 3 s.h.
- 22M:142 Nonlinear Dynamics with Numerical Methods 3 s.h.
- 22M:144 Partial Differential Equations with Numerical Methods 3 s.h.

Each student must pass two comprehensive exams at the M.S. level, chosen from algebra, analysis, differential equations with numerical methods, and topology.

Program II

Program II is designed for secondary school teachers. The requirements are the same as those in programs I and III, except that two mathematics education courses are required. All mathematics courses numbered 22M:100 or above may be used to satisfy the 24 s.h. requirement. Students are encouraged to consult with the mathematics education faculty when planning their course of study.
Program III

Program III focuses on applied mathematics. It requires a minimum of 30 s.h. of graduate credit. Students in program III take several courses and pass two comprehensive examinations. Students must earn a grade of B-minus or higher in six of the courses and maintain a g.p.a. of at least 2.75 in all mathematics courses taken for the M.S.

The following courses are required.

22M:115-22M:116 Introduction to Analysis I-II 6 s.h.
22M:142 Nonlinear Dynamics with Numerical Methods 3 s.h.
22M:144 Partial Differential Equations with Numerical Methods 3 s.h.
22M:170 Numerical Analysis: Nonlinear Equations and Approximation Theory 3 s.h.
22M:171 Numerical Analysis: Differential Equations and Linear Algebra 3 s.h.
22M:174 Optimization Techniques 3 s.h.
22M:140 Continuous Mathematical Models 3 s.h.
22M:151 Discrete Mathematical Models 3 s.h.

Each student must pass two comprehensive exams at the M.S. level, chosen from differential equations with numerical methods, numerical analysis, and analysis.

Program IV

Program IV is designed for nondepartmental students working toward the Ph.D. in areas that require mathematical knowledge. The program has no specific required courses. Course distribution requirements are the same as those for program I.

Students in program IV are considered to have passed the comprehensive examination for the master's degree in mathematics if they have maintained a g.p.a. of at least 3.00 in all mathematics courses taken for the M.S. in mathematics and have successfully completed the Ph.D. comprehensive examination in their chosen area.

Students in program IV are assigned a mathematics adviser, who works with them and their major adviser to plan an appropriate curriculum for the M.S. in mathematics. A suitable program of study should be approved by a mathematics adviser before the student takes the Ph.D. comprehensive examination, and a member of the mathematics faculty should serve on the Ph.D. comprehensive examination committee.

Admission

Admission to an M.S. program (I, II, or III) is based on a combination of undergraduate course work and grades, letters of recommendation, and GRE General Test scores (and Test of English as a Foreign Language scores for international applicants). Numerical standards change every year or so. Exceptions may be made to the following guidelines.

Applicants must have completed work in an undergraduate program equivalent to the bachelor's degree offered by the mathematics department. Those whose preparation does not meet this requirement may be admitted conditionally and are asked to take specific courses that cover the deficiency.

Applicants are expected to have an undergraduate g.p.a. of at least 3.20. Relevance and difficulty of courses are considered when evaluating grades; grades of C or lower in mathematics courses need to be balanced by grades of A.

Applicants must submit three letters of recommendation.

They also are expected to score at least 650 on the quantitative section of the GRE General Test. Applicants are encouraged to submit scores for the mathematics area examination as well—particularly those who need financial support and whose credentials may show weak areas.

International applicants are required to demonstrate their competence in English, normally by scoring 550 (paper-based) or 215 (computer-based) on the Test of English as a Foreign Language (TOEFL).

Doctor of Philosophy

The Ph.D. program places strong emphasis on preparation for research and teaching. The department maintains no division between "pure" and "applicable" mathematics. It cooperates in interdisciplinary doctoral programs with the College of Education and the Program in Applied Mathematical and Computational Sciences.

Ph.D. students in mathematics must satisfy the following requirements for course work (credits and breadth), examinations, foreign language, and the Ph.D. thesis.

Students must earn at least 72 s.h. of graduate credit and spend at least three years in residence at a graduate college, including at least one year
at The University of Iowa. They also should enroll in specific courses designated as preparatory for the Ph.D. examinations (consult the Department of Mathematics graduate studies director).

To further encourage mathematical breadth, students must earn at least 18 s.h. of graduate credit in regular courses equivalent to or more advanced than Ph.D. comprehensive examination preparatory courses. For a list of accepted 200-level and 300-level courses, and rules to ensure proper distribution, contact the department.

The Ph.D. examinations consist of a qualifying exam and a comprehensive exam. Students choose three areas from the department’s list of qualifying examination areas: algebra, analysis, differential equations with numerical methods, and topology. For each qualifying area, there is a two-semester, 100-level course sequence designated as preparatory, although exams may differ from course content. The three parts of the qualifying exam are taken over a two-week period. One grade (pass, fail, conditional pass) is given on the entire three-part qualifying examination by a committee consisting of six faculty members, two from each area. If the grade is fail, the committee has the option to consider each part of the exam separately, offering the student the option of pass in one or two of the areas and fail in the other(s).

The Ph.D. comprehensive exam tests students on research-related topics.

Candidates also take an oral final examination on their dissertation material.

Ph.D. students are required to demonstrate reading proficiency in French, German, or Russian by passing a reading test administered by the appropriate language department, earning a grade of B or higher in the second semester of a sequence offered by the appropriate language department, or passing a special examination approved by the mathematics department graduate committee. Courses that do not carry graduate credit can be used to satisfy this requirement, but they cannot be counted toward the required 72 s.h. of graduate credit. Students must demonstrate language competence after enrolling in graduate school.

The most distinctive aspect of a Ph.D. is the thesis. The department expects the thesis to be an original mathematical work comparable in content and writing quality to that found in standard published research journals. The thesis is written under the supervision of a math department faculty member and is approved by a committee.

Admission

Admission to the Ph.D. program is based on a combination of undergraduate or graduate course work and grades, letters of recommendation, and Graduate Record Examination scores (and Test of English as a Foreign Language scores for international applicants). See the admission information under Master of Science programs. The department generally seeks stronger grades and scores for doctoral admission: undergraduate or graduate g.p.a. of at least 3.40, GRE General Test quantitative score of at least 700, and scores of 575 (paper-based) or 230 (computer-based) or higher on the Test of English as a Foreign Language (TOEFL). New graduate students often are admitted as master’s candidates even if they intend to go on for a Ph.D.

Courses

For Lower-Division Undergraduates

These courses are not open to graduate students except by special arrangement with the department chair. Credit earned in 22M:001, 22M:002, and 22M:003 does not count toward degree requirements.

*Although the sequences 22M:025-22M:026 and 22M:031-22M:032 are similar, they cover the material in a different order and with different emphases. Students must consult with their adviser before taking the second semester of one sequence after taking the first semester of another. Students who consider taking 22M:026 after 22M:011, 22M:016, or 22M:017 must consult with their adviser.

22M:001 Basic Algebra I 3 s.h.
Percent, ratio, proportion, algebraic expressions and operations, simple products, linear and quadratic equations, simultaneous equations, exponents and radicals; emphasis on verbal problems.

22M:002 Basic Algebra II 3 s.h.
Algebraic techniques, equations and inequalities, functions and graphs, exponential and logarithmic functions, systems of equations and inequalities. Prerequisite: 22M:001 or satisfactory score on math placement exam or one year of high school algebra.

22M:003 Basic Geometry 3 s.h.
Angles, triangles, polygons, areas, Pythagorean theorem, similar triangles, circles, loci, related topics. Offered spring semesters. Prerequisite: 22M:001 or satisfactory score on math placement exam or one year of high school algebra.

22M:005 Trigonometry 3 s.h.
Trigonometric functions, solutions of right and oblique triangles, complex numbers. Prerequisite: 22M:002, or satisfactory score on math placement exam, or two years of high school algebra and one year of high school geometry.
22M:006 Logic of Arithmetic 3 s.h.
Mathematical and conceptual foundations of the natural numbers used in elementary school arithmetic teaching; multiple algorithmic approaches to arithmetic and its mathematical and contextual relationships, extensions to integers, rational and irrational numbers, multiple representations. GE: quantitative or formal reasoning. Prerequisite: 22M:001 or satisfactory score on math placement exam or equivalent or consent of instructor.

22M:009 Elementary Functions 4 s.h.
Functions, relations, coordinate systems, properties and graphs of algebraic, trigonometric, logarithmic, exponential functions; inverse trigonometric functions; properties of lines, conic sections. GE: quantitative or formal reasoning. Prerequisite: 22M:005, or satisfactory score on math placement exam, or two years of high school algebra and one year of high school geometry.

22M:010 Finite Mathematics 4 s.h.
Introduction to logic, set theory, linear equations and inequalities, linear programming, matrix algebra, combinatorial probability. GE: quantitative or formal reasoning. Prerequisite: 22M:002 or satisfactory score on math-placement exam or two-and-a-half years of high school mathematics.

22M:011 Introduction to Calculus with Applications 4 s.h.
Short course in derivatives and integrals with applications. GE: quantitative or formal reasoning. Offered spring semesters. Prerequisite: 22M:002 or satisfactory score on math placement exam or 22M:010 or two and one-half years of high school mathematics.

22M:012 Theory of Arithmetic 3 s.h.
Sets, cardinalities, reasoning in proofs, counterexamples, arithmetic with integers, rationals, irrationals, number theory, functions, algebraic expressions. GE: quantitative or formal reasoning. Prerequisite: 22M:009 or a more advanced course or satisfactory score on math placement exam or equivalent or consent of instructor.

22M:013 Mathematics for Business 4 s.h.
Fundamentals of algebraic expressions; examples and applications from management, economic sciences, related areas. Prerequisite: 22M:015; or satisfactory score on math calculus; applications to life sciences. GE: quantitative or formal reasoning. Prerequisite: 22M:009 or 22M:002 and a score of 3 or higher on AP Calc (AB) exam, or score of 3 or higher on AP Calc (BC) exam, or consent of instructor.

22M:014 First-Year Seminar 1-2 s.h.
Small discussion class taught by a faculty member, topics chosen by instructor, may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Prerequisite: first- or second semester standing.

22M:015 Mathematics for the Biological Sciences 4 s.h.
Relations, functions, coordinate systems, graphing, polynomials, trigonometric functions, logarithmic and exponential functions, discrete mathematics, probability; examples and applications from biological sciences. GE: quantitative or formal reasoning. Prerequisite: 22M:002 or satisfactory score on math placement exam or two years of high school mathematics.

22M:016 Calculus for the Biological Sciences 4 s.h.
Differential, integral calculus; differential equations, multivariable calculus; applications to life sciences. GE: quantitative or formal reasoning. Prerequisite: 22M:015; or satisfactory score on math placement exam, or three and one-half years of high school mathematics, including trigonometry.

22M:017 Calculus and Matrix Algebra for Business 4 s.h.
Quantitative methods for treating problems arising in management, economic sciences, related areas; introduction to differential and integral calculus, systems of linear equations and matrix operations. GE: quantitative or formal reasoning. Prerequisite: 22M:002 or 22M:013 or satisfactory score on math placement exam.

22M:022 Calculus and Modeling II 4 s.h.
Fundamental concepts, methods, techniques of single-variable differential and integral calculus; differentiation, techniques of integration, series, applications. GE: quantitative or formal reasoning. Prerequisite: 22M:009; or 22M:002 and 22M:005; or three and one-half years of high school mathematics, including analytic geometry and trigonometry.

22M:024 Calculus I 4 s.h.
Continuation of 22M:022. Prerequisite: 22M:025 or consent of advisor.

22M:025 Calculus I 4 s.h.
Continuation of 22M:022. Prerequisite: 22M:025 or consent of advisor.

22M:027 Introduction to Linear Algebra 4 s.h.
Vector algebra and geometry of three-dimensional Euclidean space and extensions to n-space and vector spaces; lines and planes, matrices, linear transformations, systems of linear equations, reduction to row echelon form, dimension, rank, determinants, eigenvalues and eigenvectors. Prerequisite: 22M:025 or 22M:031 or consent of instructor.

22M:028 Calculus III 4 s.h.
Multivariable calculus; vector functions, line integrals, total differentials, gradient, implicit functions, coordinate systems, Taylor's expansion, extrema, multiple integrals, vector fields, surface integrals, Stokes' theorem. Prerequisite: 22M:022 or 22M:032 or consent of instructor.

22M:031 Engineering Mathematics I: Single Variable Calculus 4 s.h.
Limits, derivatives, max/min, other applications, mean-value theorem, approximating functions, concavity, curve sketching, exponential models; Riemann sums, fundamental theorem; integration techniques, improper integrals, approximations. GE: quantitative or formal reasoning. Prerequisite: 22M:009 or 22M:002 and one and one-half years of high school mathematics, including introduction to analytic geometry and trigonometry.

22M:032 Engineering Mathematics II: Multivariable Calculus 4 s.h.
Vector geometry; functions of several variables; polar coordinates, partial derivatives, gradients, directional derivatives; tangent lines and planes; max/min/parametric curves, curvilinear motion; multiple integrals; vector fields, flow; integration on curves, work; divergence, flux, Green's theorem. Prerequisite: 22M:031, or score of 4 or higher on AP Calc (AB) exam, or score of 3 or higher on AP Calc (BC) exam, or consent of instructor.

22M:033 Engineering Mathematics III: Matrix Algebra 2 s.h.
Applications, computers for matrix calculations, matrix, vector arithmetic; linear independence, basis, subspace (in R2, R3); systems of equations, matrix reduction; rank, dimension; determinants, applications; eigenvalues, eigenvectors, diagonalization, principal axis theorem. Prerequisites: 22M:031, and engineering major or consent of department head.

22M:034 Engineering Mathematics IV: Differential Equations 3 s.h.
Ordinary differential equations and applications, with integrated use of computing, student projects, first-order equations; higher order linear equations; systems of linear equations, Laplace transforms; introduction to nonlinear equations and systems, phase plane, stability. Prerequisites: 22M:032, 22M:033, and engineering major or consent of department head.

22M:037 Engineering Mathematics V: Vector Calculus 3 s.h.
Partial derivatives, max min problems, integrals along curves, surfaces and solids, vector fields and conservation of energy; curl, divergence, Stokes' theorem and the divergence theorem; the classical partial differential equations and qualitative behavior of their solutions. Prerequisites: 22M:034 or consent of instructor, and engineering major or consent of department head.
22M:047 Linear Algebra and Differential Equations for Scientists 3 s.h.

22M:048 Vector Calculus for Scientists 3 s.h.

Elementary Topics of General Interest

These courses are not open to graduate students except by special arrangement with the department chair.

22M:050 Introduction to Abstract Algebra 3 s.h.
Basic logic, proof methods, sets, functions, relations, mathematical induction, gradual transition from familiar number systems to abstract structures—division algorithm, unique factorization theorems, groups, subgroups, quotient groups, homomorphisms. Prerequisite: 22M:027. Corequisite: second-semester calculus or consent of instructor.

22M:055 Fundamental Properties of Spaces and Functions I 3 s.h.
Elementary topological and analytic properties of real numbers; emphasis on ability to handle definitions, theorems, proofs. Prerequisite: second-semester calculus. Corequisite: 22M:027 or consent of instructor.

22M:056 Fundamental Properties of Spaces and Functions II 4 s.h.
Multivariable analysis, Bolzano-Weierstrass theorem in three-dimensional Euclidean space, differential calculus, inverse and implicit function theorems, multiple integrals, surface and line integrals, differential forms and Stokes' theorem in n-dimensional Euclidean space. Prerequisites: 22M:055; closed to students who have taken 22M:028.

22M:070 Foundations of Geometry 3 s.h.
Axiomatic development of common foundation for Euclidean, non-Euclidean geometry; constructions of non-Euclidean models, Euclidean geometry through automorphisms of the plane; parallel postulate. Prerequisite: 22M:027 or 22M:055 or equivalent. Consent of instructor.

22M:072 Elementary Numerical Analysis 3 s.h.
Computer arithmetic, root finding, polynomial approximation, numerical integration, systems of linear equations, ordinary differential equations, use of higher-level computer language such as Matlab, Maple, Mathematica. Prerequisite: grade of C- or higher in 22M:022 or 22M:026 or 22M:032. Same as 22C:072.

22M:081 Geometry for Elementary Teachers 3 s.h.
Points, lines, planes, measurement, two and three-dimensional coordinate geometry, transformational geometry and vectors, applications of geometry to solve real-world problems. Offered spring semesters. Prerequisites: 22M:081 or equivalent, and elementary teacher certificate candidacy or certification.

22M:090 Elementary Topics in Mathematics 3 s.h.
Recommended: enrollment as a sequel to 22M:047.

For Upper-Division Undergraduates

Graduate students in mathematics may not receive credit for 22M:100, 22M:104, 22M:105, or 22M:109.

22M:100 Introduction to Ordinary Differential Equations 2-3 s.h.
First-order ordinary differential equations; second-order linear differential equations; series solutions; higher-order linear and matrix differential equations; existence and uniqueness theorems. Prerequisites: 22M:027 and 22M:028, or 22M:056 or equivalent; or consent of instructor.

22M:104 Introduction to Matrix Theory 3 s.h.
Vector algebra and geometry of three-dimensional Euclidean space and extensions to n-space and vector spaces; lines and planes, matrices, linear transformations, systems of linear equations, reduction to row-echelon form, dimension, rank, determinants, eigenvalues, eigenvectors. Prerequisite: graduate standing.

22M:105 Basic Analysis 3 s.h.
Elementary topological and analytical properties of real numbers; emphasis on ability to handle definitions, theorems, proofs, same material as 22M:055 for non-mathematics graduate students. Prerequisites: graduate standing, one year of calculus, and one semester of linear algebra.

22M:106 Transformation Geometry 3 s.h.
Euclidean geometry through automorphisms of the plane; geometry and algebra connected through group structure of important sets of transformations; emphasis on plane isometries, similarities, and problem-solving techniques they provide. Prerequisite: 22M:050 or equivalent or consent of instructor.

22M:107 History of Mathematics 3 s.h.
May include numerical systems, Babylonian, Egyptian, and Greek mathematics; mathematics of other cultures; calculus; 19th- and 20th-century mathematics. Prerequisites: two semesters of calculus and one semester of linear algebra, or consent of instructor.

22M:108 Philosophy of Mathematics 3 s.h.
Role of formalism, intuitionism, logicalism, Platonism in shaping foundations of mathematics; nature of mathematical existence and truth; Gödel's incompleteness theorems, axiom of choice; philosophical differences between various set theories (e.g., Zermelo-Fraenkel, Gödel-von Neumann); category theory, other viable foundations of mathematics; relationship between mathematics, science. Prerequisites: two semesters of calculus, and 22M:027 or equivalent; or consent of instructor.

22M:109 Classical Analysis 3 s.h.
Multivariable calculus, vector functions, line integral, total differentials, gradient, implicit functions, coordinate systems, Taylor's expansion, extrema, multiple integrals, vector fields, surface integrals, Stoke's theorem. Prerequisites: graduate standing, and one year of calculus or consent of instructor.

22M:115 Introduction to Analysis I 3 s.h.
Real numbers, fundamentals of limits and continuity in the context of metric spaces; Lebesgue theory of functions of one real variable. Prerequisite: 22M:055 or graduate standing or consent of instructor.

22M:116 Introduction to Analysis II 3 s.h.
Local theory of analytic functions of one complex variable, power series, classical transcendental functions, spaces of functions. Prerequisite: 22M:115 or consent of instructor.
22M:118 Complex Variables 3 s.h.
Geometry of complex plane, analytic functions; Cauchy-Goursat theorem, applications; Laurent series, residues, elementary conformal mapping. Prerequisite: 22M:028 or 22M:056 or 22M:109 or equivalent or consent of instructor.

22M:120 Abstract Algebra I 3 s.h.
Groups and homomorphisms, Sylow Theorems, rings, finitely generated modules over a PID, Galois theory, vector spaces, linear transformations and matrices, canonical forms. Prerequisite: 22M:050 or equivalent or consent of instructor.

22M:121 Abstract Algebra II 3 s.h.
Continuation of 22M:120. Prerequisite: 22M:120.

22M:123 Foundations of Set Theory 3 s.h.
Sets theory as used in abstract mathematics; equivalent forms of axiom of choice, cardinal numbers and their arithmetic, ordinal numbers and transfinite induction. Prerequisite: 22M:050 or 22M:055 or graduate standing or consent of instructor.

22M:124 Foundations of Logic 3 s.h.
Propositional calculus, Boolean algebras, introduction to axiomatic theories. Prerequisite: 22M:050 or 22M:055 or graduate standing or consent of instructor.

22M:125 Master's Comprehensive Examination 0 s.h.
Preparation Seminars

22M:126 Elementary Theory of Numbers 2-3 s.h.
Factorization, congruence, Diophantine equations, law of quadratic reciprocity. Prerequisite: 22M:050 or equivalent or consent of instructor.

22M:127 Matrix Theory 3 s.h.
Vector spaces, linear transformations, matrices, equivalence of matrices, eigenvalues and eigenvectors, canonical forms, similarity, orthogonal transformations, bilinear and quadratic forms. Prerequisite: 22M:027 or 22M:104 or equivalent or consent of instructor.

22M:130 Elementary Topology 3 s.h.
Introduction to topology of Euclidean spaces and manifolds, emphasis on basic sets (disks, spheres, annuli, Cantor sets) in dimensions 1, 2, 3, continuous maps, homeomorphisms, and embeddings; connectedness and path; convergence and compactness; manifolds; homotopy, contractible sets, Brouwer fixed-point theorem, covering spaces. Prerequisite: 22M:055 or equivalent or consent of instructor.

22M:132 General Topology 3 s.h.
Basic concepts of general topological spaces and continuous functions; countability of sets, topological space, compact topologies; subspace, order, and product topologies; closed sets and limit points, continuous functions, metric topology, quotient topology (including projective spaces and gluing cells), connectedness in the real line and in general spaces, components and local connectedness, compactness in Euclidean and general spaces, limit point compactness, local compactness, countability axioms, separation axioms, normal spaces and Urysohn's Lemma complete metric spaces, convergence in function spaces. Prerequisite: 22M:055 or consent of instructor.

22M:133 Introduction to Smooth Manifolds 3 s.h.
Calculus on smooth manifolds; smooth functions, mean value theorem, chain rule, smooth manifolds, tangent vectors, tangent spaces, inverse and implicit functions theorems, submersions and immersions, vectorfields, flows, multilinear algebra, differential forms, Stokes theorem. Prerequisites: 22M:027, 22M:055, and 22M:028 or 22M:056 or consent of instructor.

22M:140 Continuous Mathematical Models 3 s.h.
Building and analyzing mathematical models involving differential equations for specific problems from engineering and the sciences; modeling project. Prerequisite: 22M:100 or equivalent or consent of instructor.

22M:142 Nonlinear Dynamics with Numerical Methods 3 s.h.
Nonlinear differential equations, one- and two-dimensional flows, stability, phase plane analysis, limit cycles, bifurcations, chaos, fractals, Euler's, Runge-Kutta numerical methods. Prerequisite: 22M:055 and 22M:100, or consent of instructor.

22M:144 Partial Differential Equations with Numerical Methods 3 s.h.
Conservation laws, weak solutions, diffusion equation, Laplace's equation, finite difference methods, variational methods, finite element method. Prerequisite: 22M:028, 22M:055, and 22M:100 or consent of instructor.

22M:150 Introduction to Discrete Mathematics 3 s.h.
Basic methods of enumerative combinatorics, inclusion-exclusion and generating functions, applications of group theory (Pólya-Burnside theorem). Offered fall semesters. Prerequisite: 22M:050 or equivalent or consent of instructor.

22M:151 Discrete Mathematical Models 3 s.h.
Case history approach to discrete models from various fields (e.g., genetics, psychology, health care, scheduling); construction, interpretation, analysis, simulation, testing of models; development of discrete mathematics. Prerequisite: 22M:027 or equivalent or consent of instructor.

22M:152 Theory of Graphs 3 s.h.
Connectivity properties, including Euler, Hamilton cycle problems; graph colorings, matchings; characterization of families of graphs such as trees, planar graphs, networks; graph algorithms, their applications. Prerequisite: 22M:050 or equivalent or consent of instructor. Same as 22C:137.

22M:160 Introduction to Differential Geometry I 3 s.h.
Space curves, differentiable manifolds, vector and tensor fields, integration of forms, covariant differentiation, intrinsic geometry of surfaces. Prerequisites: 22M:028 and 22M:055, or 22M:056 or 22M:100 or equivalent or consent of instructor.

22M:161 Introduction to Differential Geometry II 3 s.h.
May include Riemannian geometry, rigidity theorems, minimal surfaces, connections, elementary Lie groups, relativity. Prerequisite: 22M:160 or equivalent or consent of instructor.

22M:170 Numerical Analysis: Nonlinear Equations and Approximation Theory 3 s.h.
Root finding for nonlinear equations; polynomial interpolation; polynomial approximation of functions; numerical integration. Prerequisites: 22M:027 and 22M:028, or 22M:037 or 22M:056 or equivalent or consent of instructor; and knowledge of computer programming. Same as 22C:170.

22M:171 Numerical Analysis: Differential Equations and Linear Algebra 3 s.h.
Numerical methods for initial value problems for ordinary differential equations; direct and iterative methods for linear systems of equations; eigenvalue problems for matrices. Prerequisites: 22M:027 and 22M:028, or 22M:037 or 22M:056 or equivalent or consent of instructor; and knowledge of computer programming and 22M:100. Same as 22C:171.

22M:174 Optimization Techniques 3 s.h.
Basic theory of optimization, use of numerical algorithms in solution of optimization problems; linear and nonlinear programming, sensitivity analysis, convexity, optimal control theory, dynamic programming, calculus of variations. Prerequisite: 22M:100 or equivalent or consent of instructor. Same as 22C:174.
22M:176 Finite Element Method 3 s.h.
Variational principles, finite element subspaces, h-p, h-p versions, convergence analysis, shape functions, computation of stiffness matrices and load vectors; the effect of numerical integrations, post-processing, error control, adaptivity, applications. Prerequisites: 22M:170 and 22M:171, or equivalents or consent of instructor.

22M:178 High Performance and Parallel Computing 3 s.h.
Design and implementation of computational linear algebra algorithms for high performance computers. Basic knowledge of a computer language and basic linear algebra required. Prerequisites: a linear algebra course and a numerical analysis course. Same as 22C:177.

22M:191 Topics in Technology Uses in Mathematics 2 s.h.

22M:193 Current Issues in Mathematics Education 2-3 s.h.
Philosophy and objectives, curricular problems, review and evaluation of current literature, special methods. Prerequisite: consent of instructor. Same as 07E:235, 07S:235.

22M:196 Topics in Mathematics 2 s.h.
Prerequisite: consent of instructor.

22M:197 Individual Study and Honors in Mathematics 2 s.h.
Prerequisite: consent of advisor.

22M:199 Readings in Mathematics 2 s.h.
Prerequisite: consent of instructor.

Core Graduate Courses

22M:200 Introduction to Differential Topology 3 s.h.
Manifolds, functions, tangent bundle, Morse-Sard theorem, transversality, submanifolds, tubular neighborhoods, normal bundles, vector fields, degree and intersection theory, fixed-point theory, Morse theory. Prerequisite: 22M:132 or equivalent or consent of instructor.

22M:201 Introduction to Algebraic Topology 3 s.h.
Homology, fundamental group and covering spaces, CW and simplicial complexes, simplicial homology, Euler characteristic. Prerequisite: 22M:132 or equivalent or consent of instructor.

22M:203 Topology of Manifolds 3 s.h.
Embedding, knotting, immersions; isotopy, homotopy, regular neighborhoods, engulfing, surgery, cobordism; three-, four-, and higher dimensional manifolds. Prerequisites: 22M:200 and 22M:201, or equivalents or consent of instructor.

22M:205 Introduction to Algebra I 3 s.h.
Abstract algebra: semigroups, groups, rings, integral domains, polynomial rings, division rings, fields, vector spaces, matrices, modules over rings, lattices, categories. Prerequisite: 22M:120 or equivalent or consent of instructor.

22M:206 Introduction to Algebra II 3 s.h.
Continuation of 22M:205. Prerequisite: 22M:205 or equivalent or consent of instructor.

22M:210 Analysis I 3 s.h.
Lebesque measure and integral, fundamental theorem of calculus, abstract measures and integration, Fubini’s theorem, Radon-Nikodym theorem, Riesz representation theorem, L-p spaces. Prerequisite: 22M:116 or equivalent or consent of instructor.

22M:211 Analysis II 3 s.h.
Hilbert space, Banach space techniques, Hahn-Banach theorem, open mapping theorem, principle of uniform boundedness, reflexivity, H-p spaces, Paley-Wiener theorem, space of functions analytic on the open unit disk. Prerequisites: 22M:116 and 22M:210, or equivalents or consent of instructor.

22M:213 Ordinary Differential Equations I 3 s.h.
Existence, uniqueness, continuous dependence of solutions to initial value problems, autonomous systems; Poincare-Bendixon theory; linear systems and linearizations, perturbation, stability, periodic solutions, bifurcation, comparison and oscillation theorems, boundary value problems. Prerequisite: 22M:116 or equivalent or consent of instructor.

22M:214 Ordinary Differential Equations II 3 s.h.
Continuation of 22M:213. Prerequisite: 22M:213 or equivalent or consent of instructor.

22M:216 Partial Differential Equations I 3 s.h.
Elliptic equations; potential theory; maximum principle, a priori estimate, De Giorgi problem, initial value problem for parabolic equations; hyperbolic equations; Duhamel’s principle, Cauchy problem; nonlinear equations, characteristics, canonical form, first-order systems. Prerequisite: 22M:116 or equivalent or consent of instructor.

22M:217 Partial Differential Equations II 3 s.h.
Continuation of 22M:216. Prerequisite: 22M:216 or equivalent or consent of instructor.

22M:220 Introduction to Mathematical Logic I 3 s.h.
Propositional calculus, first-order predicate calculus, Godel completeness theorem, formal elementary number theory, Godel incompleteness theorem. Prerequisite: graduate standing or consent of instructor.

22M:221 Introduction to Mathematical Logic II 3 s.h.
Formal number theory, arithmetic hierarchy, Pure theorem, formal recursive functions, Turing machines, Thue systems, world problems. Prerequisite: 22M:220 or equivalent or consent of instructor.

22M:224 First-Year Graduate Seminar 1 s.h.
Introduction to mathematics graduate program.

22M:225 Comprehensive Exam Preparation Seminars 0 s.h.
Ph.D. comprehensive exam preparation in algebra, analysis, logic, partial differential equations, topology. Repeatable. Prerequisite: consent of instructor.

Primarily for Graduate Students

22M:260 Differential Geometry I 3 s.h.
Differential manifolds and functions, form, connections, curvature, related topics. Prerequisite: consent of instructor.

22M:261 Differential Geometry II 3 s.h.
Continuation of 22M:260. Prerequisite: 22M:260 or equivalent or consent of instructor.

22M:270 Theoretical Numerical Analysis I 3 s.h.

22M:271 Theoretical Numerical Analysis II 3 s.h.
Continuation of 22M:270. Prerequisite: 22M:270 or equivalent or consent of instructor.

22M:303 Topics in Analysis 2-3 s.h.
Measure theory, integration, general topology. Repeatable. Prerequisite: consent of instructor.

22M:305 Topics in Topology 2-3 s.h.
May include homotopy theory, topology of 3-manifolds, 4-manifolds, or higher-dimensional manifolds, knotting and
embedding problems, fiber bundles and characteristic classes, K-theory, PL manifolds, infinite-dimensional manifolds. Repeatable. Prerequisite: consent of instructor.

22M:313 Functional Analysis I 3 s.h.
Locally convex topological vector spaces, duality, tensor products and nuclear spaces; Krein-Milman theorem, Choquet’s theory, geometry of Banach spaces, nonlinear functional analysis, operators on Hilbert spaces, spectral theorem, algebras of operators. Prerequisite: 22M:211 or equivalent or consent of instructor.

22M:314 Functional Analysis II 3 s.h.
Continuation of 22M:313. Prerequisite: 22M:313 or equivalent or consent of instructor.

22M:321 Topics in Applied Mathematics arr.
Application of mathematics to other disciplines. Repeatable. Prerequisite: consent of instructor.

22M:324 Topics in Partial Differential Equations 2-3 s.h.
Regularity theory, nonlinear analysis in partial differential equations, fluid dynamics, harmonic analysis, conservation laws, other topics. Repeatable. Prerequisite: consent of instructor.

22M:328 Topics in Logic 3 s.h.
Theory of models, recursive functions, sets, deductions. Repeatable. Prerequisite: 22M:221 or equivalent or consent of instructor.

22M:330 Topics in Algebra 2-3 s.h.
May include algebraic number theory, groups, representation theory, algebraic geometry, lattice theory. Repeatable. Prerequisite: 22M:206 or equivalent or consent of instructor.

22M:335 Topics in Ring Theory 3 s.h.
Theory of commutative and/or noncommutative rings and their categories of modules. Repeatable. Prerequisite: 22M:206 or equivalent or consent of instructor.

22M:340 Homological Algebra 3 s.h.
Modules, tensor products, groups of homomorphisms, categories, functors, homology function, projective and injective modules, derived functors, torsion and extension functions, homological dimension. Prerequisite: 22M:206 or equivalent or consent of instructor.

22M:371 Topics in Numerical Analysis 3 s.h.
Repeatable. Prerequisites: 22M:170 and 22M:171, or equivalents or consent of instructor.

22M:383 Seminar: Commutative Ring Theory arr.
Repeatable. Prerequisite: consent of instructor.

Repeatable. Prerequisite: consent of instructor.

22M:385 Seminar: Representation Theory arr.
Repeatable. Prerequisite: consent of instructor.

22M:386 Seminar in Undergraduate Mathematics Education arr.
Varied topics in teaching, learning, curriculum; philosophy, objectives, strategies, methods; use of technology, group learning, projects, discovery method, multiple approaches, other current issues. Repeatable. Prerequisite: consent of instructor.

Repeatable. Prerequisite: consent of instructor.

Repeatable. Prerequisite: consent of instructor.

Repeatable. Prerequisite: consent of instructor.
Division of Performing Arts

Director: Kristin Thelander
Undergraduate degree: B.A. in Performing Arts
Entrepreneurship

The Division of Performing Arts includes the Department of Dance, the School of Music, and the Department of Theatre Arts. The division fosters interdisciplinary collaboration among these units, coordinates artistic and academic activities, and sponsors a full array of performances and symposia. Performances are supported by professional staff in the division’s Performing Art Production Unit.

The division’s individual academic units offer undergraduate and graduate courses and degree programs in creative, performance, scholarly, and theoretical areas. They present an extensive schedule of dance productions, faculty and student recitals, ensemble concerts, and mainstage and gallery theater productions.

The division also is home to the Bachelor of Arts program in performing arts entrepreneurship.
Performing Arts Entrepreneurship

**Director:** Kristin Thelander (Music)

**Undergraduate degree:** B.A. in Performing Arts Entrepreneurship

**Web site:** http://www.uiowa.edu/~dpa

The Division of Performing Arts, in partnership with the Pappajohn Entrepreneurial Center in the Tippie College of Business, offers a Bachelor of Arts in performing arts entrepreneurship.

The program leading to the B.A. offers students the opportunity to pursue professional studies in two areas of the performing arts, in the framework of a liberal arts education. It also helps them develop the skills required for creating market-based opportunities in the arts.

The program’s focus is not arts management. Rather, the major is intended for students who plan to start or operate their own businesses in the performing arts. The program’s goals are to enhance students’ understanding of the entrepreneurial process in the performing arts and to nurture developing artists who will be leaders in arts innovation.

**Bachelor of Arts**

The program requires completion of 53-59 s.h. of course work. All students pursuing the major choose a primary area of study in dance, theatre arts, or music. They also choose a secondary area different from their primary area. All students complete three required courses in entrepreneurship, a capstone course, and an internship.

Students may apply a maximum of 24 s.h. earned at other institutions toward the major in performing arts entrepreneurship. In order to be counted toward the major, all transfer course work must be reviewed and approved by the program.

Performing arts entrepreneurship students are advised by the Academic Advising Center until they have earned 24 s.h. Then they are assigned a faculty adviser from their primary area in the Division of Performing Arts as well as an adviser from the Tippie College of Business.

The curriculum is as follows.
Music
This primary area requires a total of 26 s.h. An audition is required. Contact the School of Music for details.

All of these:
025:001 Fundamentals of Music for Majors (unless exempted by proficiency exam) 3 s.h.
025:002 Musicianship and Theory I 4 s.h.
025:003 Musicianship and Theory II 4 s.h.
025:071 Group Instruction in Piano I (unless exempted by proficiency exam) 1 s.h.
025:072 Group Instruction in Piano II (unless exempted by proficiency exam) 1 s.h.
Music history—one of these:
025:103 World Music 3 s.h.
025:104 Music of Latin America and the Caribbean 3 s.h.
025:141 History of Jazz 3 s.h.
025:146 History of Music II 3 s.h.
025:178 Music, Culture and Identity 3 s.h.

All of these:
Applied music for lower-level undergraduates (students must audition to be accepted by a professor—register for 2 s.h. each for two semesters) 4 s.h.
Ensemble participation (placement by audition in choral, orchestra, band, or jazz ensembles) 4 s.h.
025:074 Recital Attendance 2 s.h.

Students who are exempted by proficiency exam from 025:001 (3 s.h.), 025:071 (1 s.h.), or 025:072 (1 s.h.) must earn an equal number of semester hours in music electives.

SECONDARY AREA

Students complete the requirements for the secondary area of their choosing.

Dance
This secondary area requires at least 15 s.h. of course work in dance. The following courses are suggested.
137:034 Beginning Contact Improvisation 2 s.h.
137:080 Dance and Society 3 s.h.
Dance technique 7 s.h.
Dance electives 3 s.h.
Four-Year Graduation Plan

The Four-Year Graduation Plan is not available to students pursuing the performing arts entrepreneurship major. Many students need an extra semester to complete the internship requirement. But some students may be able to graduate in four years by taking summer course work or a summer internship. Advisers work with students to develop individual graduation plans.

Honors

Students who are members of the University Honors Program, have a g.p.a. of at least 3.33 in the major, and have approval from their primary adviser may undertake an honors project. Projects may be analytical, creative, or a combination of the two. They ordinarily require an oral presentation or performance for designated faculty members as well as a research and writing component, which is due upon the project’s completion.

Performing arts entrepreneurship majors who are members of the University Honors Program may take honors courses in their primary and secondary areas. Courses can be designated honors courses with permission of the faculty member who teaches the course, the department offering the course, and the University Honors Program.

Membership in the University Honors Program requires that students maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University Honors Program for more information).

Performing Arts Learning Community

First-year students majoring in performing arts entrepreneurship may apply to live in the Performing Arts Learning Community, a coed floor in Currier Hall, across the Iowa River from the fine arts campus. The community includes students from art and art history, dance, film, music, and theatre arts.

Courses

188:001 Cultural Connections 1 s.h.
Forum for an interdisciplinary perspective on culture; exposure to all art forms; classtime presentations of live music, dance, and theater performances or rehearsals in conjunction with film and art.

188:182 Historical Perspectives in Dance 3 s.h.
Same as 137:182.
Dance

Chair: Alan Sener
Professor: Alan Sener
Professor emerita: Françoise Martinet
Associate professors: Charlotte Adams, George de la Pena, Armando Duarte
Associate professors emeritae: Alicia Brown, Helen Chadima
Assistant professors: Eloy Barragan, Deanna Carter, Jennifer Kayle, Rebekah Kowal
Adjunct assistant professors: Paul Cunliffe, Gary N. Holmquist, Lyle Juracek
Visiting assistant professor: Daniel Stark
Lecturer: Jim Albert
Undergraduate degrees: B.A., B.F.A. in Dance
Undergraduate nondegree program: Minor in Dance
Graduate degree: M.F.A. in Dance
Web site: http://www.uiowa.edu/~dance

Undergraduate Programs

The undergraduate major in dance provides a liberal arts and sciences education and thorough preparation for careers in professional dance, choreography, and education, as well as preparation for graduate studies. The department offers as many as 12 concerts every year, providing dance students with numerous opportunities for performance and choreography. Periodic master classes with noted guest teachers, choreographers, and touring companies add diversity to the dance experience. The University of Iowa Dance Company performs its annual Dance Gala in Hancher Auditorium on The University of Iowa campus, and since 1986, the department’s touring company, Dancers In Company, has given students an opportunity to perform in Iowa and surrounding states. Dance faculty members regularly present their choreography in national venues, giving University student performers the opportunity to develop their performance skills.

The Department of Dance also participates in offering a major in performing arts entrepreneurship, offered through the Division of Performing Arts in cooperation with the John Pappajohn Entrepreneurial Center of the Tippie College of Business. For more information, see Performing Arts Entrepreneurship in the Catalog.

Bachelor of Arts

The B.A. program in dance is designed for students who want to acquire a strong liberal arts and sciences background while pursuing a comprehensive undergraduate dance education. The degree stresses performance and choreography as well as dance theory courses, including labanotation, dance history, dance kinesiology, and dance production.

Students must audition for placement in dance classes before registration. No student is admitted to the dance major without a placement audition. Students are encouraged to audition on campus for class placement and scholarship in the semester before entry to the University. Those who cannot come to campus for a placement audition may send an audition videotape or DVD. Contact the Department of Dance, the undergraduate program coordinator, or the Office of Admissions for additional information.

To graduate, students must complete 50 s.h. in dance courses, including two semesters of 137:113 Major Ballet II or 137:114 Major Modern Dance II with a grade of B-minus or higher. Two semesters of 137:123 Major Ballet III or 137:124 Major Modern Dance III also satisfy this requirement. A maximum of 50 s.h. in dance department courses is accepted toward the 120 s.h. required for graduation. At least half of all semester hours in the major must be earned at The University of Iowa.

Required Courses

Students who select cross-referenced, non-dance department courses to satisfy the core course requirements must take additional dance department electives to complete the required 50 s.h. in dance department courses.

137:147/049:108 Dance Kinesiology  3 s.h.  
137:180 Dance History I: Ancient to Enlightenment  3 s.h.  
or  
137:181 Dance History II: Romantic to Contemporary  3 s.h.  

**STUDIO COURSES**

137:034 Beginning Contact Improvisation 2 s.h.  
or  
137:134 Improvisation 2 s.h.  
137:070 Choreography I 2 s.h.  
137:071 Choreography II 2 s.h.  

**DANCE TECHNIQUE**

Dance majors must take 6 s.h. each of ballet and of modern dance technique; students choose 20 s.h. from the following. All courses may be repeated.

137:022 Intermediate Jazz 2 s.h.  
137:023 Intermediate Ballet 2 s.h.  
137:024 Intermediate Modern 2 s.h.  
137:103 Major Ballet I 1-3 s.h.  
137:104 Major Modern Dance I 1-2 s.h.  
137:113 Major Ballet II 1-3 s.h.  
137:114 Major Modern Dance II 1-3 s.h.  
137:122 Advanced Jazz Dance 2 s.h.  
137:123 Major Ballet III 1-3 s.h.  
137:124 Major Modern Dance III 1-3 s.h.  
137:130 Major Modern Dance IV 1-2 s.h.  
137:133 Ballet Pointe 1 s.h.  

**DANCE ELECTIVES**

Credit earned in dance courses [prefix 137] that is not used to satisfy core, studio, or dance technique degree requirements is counted toward the dance elective requirement. Dance electives complete the 50 s.h. of dance courses required for the Bachelor of Arts.

The required number of semester hours in dance electives varies depending on whether the student completes the core with dance courses or with cross-referenced courses from another department, or has a core requirement waived.

**Bachelor of Fine Arts**

In contrast to the B.A., the B.F.A. emphasizes choreography and performance through an additional 14 s.h. of choreography, performance, and technique. Students may be admitted to the B.F.A. program after they have completed a minimum of 30 s.h. at The University of Iowa. Students who have achieved the equivalent of “Major II” technique and who show academic and professional promise are selected by department faculty for admission to the program.

B.F.A. students must complete three semesters of 137:123 Major Ballet III or 137:124 Major Modern Dance III with a grade of B-minus or higher. B.F.A. students are required to maintain a cumulative g.p.a. of at least 3.50 in dance department courses.

The B.F.A. requires that the 120 s.h. required for graduation include 58 s.h. in courses taken outside the department and 62 s.h. in dance department courses. At least half of all semester hours in the major must be earned at The University of Iowa.

**Required Courses**

Students who select cross-referenced, non-dance department courses to satisfy the core course requirements must take additional dance department electives to complete the required 62 s.h. in dance department courses.

**CORE COURSES**

027:053 Human Anatomy 3 s.h.

or  
137:181 Dance History II: Romantic to Contemporary 3 s.h.
STUDIO COURSES

137:034 Beginning Contact Improvisation 2 s.h.
or
137:134 Improvisation 2 s.h.
137:070 Choreography I 2 s.h.
137:071 Choreography II 2 s.h.
137:106 Dance Performance (6 s.h. required) 1 s.h.
137:135 Improvisation II 2 s.h.
or
137:170 Choreography III 2 s.h.

DANCE TECHNIQUE

Students are required to complete 12 s.h. each of ballet and modern dance courses and a total of 28 s.h. of technique, chosen from the following (all courses are repeatable).

137:103 Major Ballet I 1-3 s.h.
137:104 Major Modern Dance I 1-2 s.h.
137:113 Major Ballet II 1-3 s.h.
137:114 Major Modern Dance II 1-3 s.h.
137:122 Advanced Jazz Dance 2 s.h.
137:123 Major Ballet III 1-3 s.h.
137:124 Major Modern Dance III 1-3 s.h.
137:130 Major Modern Dance IV 1-2 s.h.
137:133 Ballet Pointe 1 s.h.

DANCE ELECTIVES

Credit earned in dance courses (prefix 137) that is not used to satisfy core, studio, or dance technique degree requirements is counted toward the dance elective requirement. Dance electives complete the 62 s.h. of dance courses required for the Bachelor of Fine Arts.

The required number of semester hours in dance electives varies depending on whether the student completes the core with dance courses or with cross-referenced courses from another department, or has a core requirement waived.

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

The B.A. requires a total of 50 s.h. of dance major credit; the B.F.A. requires a total of 62 s.h. of dance major credit. Course work in dance beyond these limits does not apply toward semester hours required for graduation. These checkpoints indicate the range of semester hours required.

Before the third semester begins: 12-16 s.h. of courses in the major and at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: 24-32 s.h. of courses in the major and at least one-half of the semester hours required for graduation

Before the seventh semester begins: 36-48 s.h. of courses in the major and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: 42-50 s.h. of courses in the major

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Honors Program

In order to pursue honors studies in the Department of Dance, a student must be a member of the University Honors Program, which requires students to maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University Honors Program for more information). Honors students in dance must maintain a g.p.a. of at least 3.50 in UI dance department courses.

The honors program in dance is designed to serve and recognize outstanding students in the areas of choreography, performance, and special projects. It requires 8-10 s.h. To complete the honors program in dance, students must take two courses for honors credit and complete an honors project. All honors projects must be approved by the dance department faculty.

Minor

A minor in dance requires 15 s.h. of credit in dance department courses with a g.p.a. of 2.00 or higher. At least 12 s.h. must be in University of Iowa courses numbered 137:100 and above. Students contemplating a minor in dance should attend a placement audition. Auditions are offered in November and March.
Graduate Program

Master of Fine Arts

Students who demonstrate accomplishment in dance performance and/or choreography may apply for admission to the M.F.A. program. Admission is based on an interview, a teaching and technique audition, review of videotaped choreographic and performance work, and letters of recommendation. The M.F.A. is designed to be completed in four to six semesters in residence.

Students select the choreography or the performance track before they are admitted. A total of 60 s.h. is required.

Prerequisites

Advanced technique (ballet or modern)
Demonstrated accomplishment in performance or choreography

Required Courses

DANCE CORE
A total of 19 s.h. of core course work is required for both the performance and the choreography track.

137:143 Elementary Ballet Pedagogy  3 s.h.
of
137:144 Teaching of Modern Dance  3 s.h.
137:200 Graduate Seminar in Dance  2 s.h.
137:201 Graduate Production Practicum  1 s.h.
137:202 Theories of Dance and the Body  3 s.h.
137:234 Graduate Improvisation  2 s.h.
or
137:235 Graduate Improvisation II  2 s.h.
137:277 Thesis  8 s.h.

DANCE TECHNIQUE
The performance track requires 18 s.h. from the following, the choreography track requires 12 s.h.; courses may be repeated. Performance track students must take a minimum of 4 s.h. of modern dance and 4 s.h. of ballet.

137:103 Major Ballet I  1-3 s.h.
137:104 Major Modern Dance I  1-2 s.h.
137:213 Graduate Majors Ballet II  1-3 s.h.
137:214 Graduate Majors Modern II  1-3 s.h.
137:223 Graduate Majors Ballet III  1-3 s.h.
137:224 Graduate Majors Modern III  1-3 s.h.
137:230 Graduate Majors Modern IV  1-2 s.h.

Emphasis Courses

A total of 14 s.h. is required for both the choreography and the performance track.

Choreography Track
137:206 Graduate Dance Performance  (1 s.h. each performance, 2 s.h. total) 1 s.h.
137:274 Graduate Independent Choreography  (1 s.h. each project, 4 s.h. total) 1 s.h.
A total of 8 s.h. from these:
137:270 Graduate Choreography I  2 s.h.
137:271 Graduate Choreography II  2 s.h.
137:272 Graduate Choreography III  2 s.h.
137:273 Graduate Choreography IV  2 s.h.
137:275 Advanced Choreographic Design  1-4 s.h.

Performance Track
M.F.A. performance track candidates must earn 12 s.h. in performance courses and 2 s.h. in choreography courses.

137:107 Repertory Dance Company (4 s.h. per year, 0-8 s.h. total) 0-4 s.h.
137:206 Graduate Dance Performance (1 s.h. each performance, 4-12 s.h. total) 1 s.h.
137:274 Graduate Independent Choreography  (1 s.h. each project, 2 s.h. total) 1 s.h.
or
A course from the choreography sequence (137:270-137:273) 2 s.h.

Electives

M.F.A. candidates in performance must earn a total of 9 s.h. in elective courses numbered 100 or above. A minimum of 6 s.h. must be earned in nondance courses; the remaining 3 s.h. may be earned in dance or nondance courses.

M.F.A. candidates in choreography must earn a total of 15 s.h. in elective courses numbered 100 or above. A minimum of 6 s.h. must be earned in nondance courses; 6 s.h. must be earned in a course or courses that provide research material for the thesis; the remaining 3 s.h. may be earned in dance or nondance courses.

Facilities

The Department of Dance houses six technique studios, a movement training lab, a media classroom and library, a media laboratory, and its own theater for dance concerts. The annual Dance Gala is staged in Hancher Auditorium, the University's premier performance hall.
Courses

Primarily for Undergraduates

137:001 Beginning Tap 1-2 s.h.
Elementary techniques, steps, and performance skills for rhythm and show tap styles; enhancement of rhythmic ability through exercises, improvisation, creative activities; may include history of tap. Tap shoes required. GE: fine arts.

137:002 Beginning Jazz 1-2 s.h.
Basic movement fundamentals, terminology, performance skills of jazz dance; enhancement of flexibility, strength, body alignment, coordination, balance, kinesthetic awareness, personal range of motion, and musicality; warm-up, locomotion, center combinations; may include history of jazz dance. GE: fine arts.

137:003 Beginning Ballet 1-2 s.h.
Basic movement fundamentals, terminology, performance skills of ballet; enhancement of flexibility, strength, body alignment, coordination, balance, kinesthetic awareness, personal range of motion, and musicality; barre and center combinations; terminology; may include history of ballet. GE: fine arts.

137:004 Beginning Modern Dance 1-2 s.h.
Basic movement fundamentals, terminology, performance skills of modern dance; enhancement of flexibility, strength, body alignment, coordination, balance, kinesthetic awareness, personal range of motion, and musicality; barre and center combinations; may include history of modern dance. GE: fine arts.

137:011 Continuing Tap 1-2 s.h.
Continuation of 137:001. GE: fine arts.

137:012 Continuing Jazz 1-2 s.h.
Continuation of 137:002; skills for technique and performance of jazz dance; enhancement of flexibility, strength, body alignment, coordination, balance, kinesthetic awareness, personal range of motion, and musicality; barre and center combinations; may include history of jazz dance. GE: fine arts.

137:013 Continuing Ballet 1-2 s.h.
Continuation of 137:003; skills necessary for technique and performance of ballet; enhancement of flexibility, strength, body alignment, coordination, balance, kinesthetic awareness, personal range of motion, and musicality; barre and center combinations; terminology; may include history of ballet. GE: fine arts.

137:014 Continuing Modern Dance 1-2 s.h.
Continuation of 137:004; skills necessary for the technique and performance of modern dance; enhancement of flexibility, strength, body alignment, coordination, balance, kinesthetic awareness, personal range of motion, and musicality; warm-up, locomotion, center combinations; may include history of modern dance. GE: fine arts.

137:022 Intermediate Jazz 1-2 s.h.
Low intermediate technique and performance training in jazz dance; flexibility, strength, body alignment, and coordination as foundation for more advanced dance artistry, including mobility, musicality, style, warm-up, locomotion, center combinations; may include history of jazz dance. GE: fine arts.

137:023 Intermediate Ballet 1-2 s.h.
Low intermediate technique and performance training in ballet; flexibility, strength, body alignment, and coordination as foundation for more advanced dance artistry, including more difficult steps, musicality, mobility, balance; basic ballet terminology, including steps, head, body, arm positions; variations in timing, changes of facing. GE: fine arts.

137:024 Intermediate Modern 1-2 s.h.
Low intermediate technique and performance training in modern dance; flexibility, strength, body alignment, and breath as foundation for more advanced dance artistry, including musicality, mobility, balance, improvisation, variations in timing, changes of facing. GE: fine arts.

137:029 First-Year Seminar 1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Prerequisite: first- or second-semester standing.

137:030 Ballet Pointe I 1 s.h.
Basic techniques and training for ballet pointe; repetition and analysis of steps and combinations, assimilation of new material; barre and center exercises, pirouettes and turns commonly performed on pointe; learning and performing variations drawn from repertoire. Prerequisite: previous ballet training and experience.

137:034 Beginning Contact Improvisation 1-2 s.h.
Concepts for contact improvisation, such as shared weight, support, counter-balancing, elementary partnering; for dancers exploring movement potential and improvisational techniques.

137:040 Introduction to Dance 1 s.h.
Dance careers; current dance issues; viewing and response to dance works; introduction to the Department of Dance and the arts at the University of Iowa.

137:050 Dance Production 3 s.h.
Scenic design, costumes, lighting, audio/video, publicity; visits by professional guest lecturers, field trips to creative shops, projects.

137:051 Production: Run Crew 1-2 s.h.
Hands-on experience in production work for live performances; work as run-crew staff for departmental productions. Same as 049:045.

137:060 Music Fundamentals in Dance 2 s.h.
Relationship between dance and music; basic musical concepts, including rhythm, melody, major and minor scales, key signatures and intervals, triads, seventh chords, tonality; concepts experienced through free and guided movement exploration and improvisation; visits by performers and presenters.

137:070 Choreography I 2 s.h.
Elementary skills used to explore choreographic process and form short dance works.

137:071 Choreography II 2 s.h.
Continuation of 137:070; development of choreographic skills through elements of movement at intermediate level, emphasis on personal discovery and invention through improvisation and creation of compositional studies.

137:080 Dance and Society 3 s.h.
Role of dance and other forms of physical culture in nations worldwide, including the United States, Brazil, West Africa, Japan, France, Germany; relationships between dance and culture (e.g., function of dance in spiritual, celebratory, social, political contexts) examined through ethnographic techniques; exchange of dance forms and ideas about the body from old to new worlds and back; aesthetic issues related to concert dance (e.g., performance, choreography, spectatorship, criticism, production). GE: fine arts or humanities.

137:103 Major Ballet I 1-3 s.h.
Builds on 137:023; intermediate technical and performance training in ballet; flexibility, strength, body alignment, and coordination as foundation for introduction of more advanced aspects of dance artistry, including steps, musicality, mobility, balance; terminology related to barre and center vocabulary, including steps, head, body, and arm positions; practice of steps and combinations, variations in timing, changes of facing. GE: fine arts. Prerequisite: consent of instructor.

<td>Ballet Pointe II</td>
<td>1-2 s.h.</td>
<td>Intermediate/advanced techniques and training for ballet pointe work; repetition and analysis of steps and combinations, assimilation of new material; barre and center exercises, pirouettes and turns commonly performed en pointe, learning and performing variations drawn from repertory. Prerequisite: consent of instructor.</td>
</tr>
<tr>
<td>137:134</td>
<td>Improvisation</td>
<td>1-2 s.h.</td>
<td>Cultivation of creative freedom through the use and invention of movement; broadening of dancer’s range of expression through awareness of personal movement capacity, sense of spontaneity and imagination, ability to make and commit to movement choices; new approaches to moving and thinking about elements of movement such as space, shape, motion, qualities, and dynamics. Prerequisite: consent of instructor.</td>
</tr>
<tr>
<td>137:135</td>
<td>Improvisation II</td>
<td>2 s.h.</td>
<td>Advanced improvisation. Prerequisite: consent of instructor.</td>
</tr>
<tr>
<td>137:136</td>
<td>Character Dance</td>
<td>1 s.h.</td>
<td>Steps, style, and temperament of theatrical character dancing; distinctions among dances of various Eastern European countries when applied to the stage; barre and center exercises, steps and patterns associated with the Mazurka, Czardas, Polka, Gopak.</td>
</tr>
<tr>
<td>137:137</td>
<td>Pas de Deux</td>
<td>1 s.h.</td>
<td>Basics of partnering; techniques for coordination between partners, including breath and timing, supported pointe work, lifts, variations of turns. Prerequisites: 137:133 for women and consent of instructor.</td>
</tr>
<tr>
<td>137:140</td>
<td>Honors Project in Dance</td>
<td>arr.</td>
<td>Research, choreographic reconstructions, or performance project under guidance of a faculty advisor. Prerequisite: senior standing.</td>
</tr>
<tr>
<td>137:143</td>
<td>Elementary Ballet Pedagogy</td>
<td>3 s.h.</td>
<td>Methods, materials, concepts for teaching ballet techniques.</td>
</tr>
<tr>
<td>137:144</td>
<td>Teaching of Modern Dance</td>
<td>3 s.h.</td>
<td>Practices of teaching modern dance; information and experience for developing an individualized approach to teaching; educational methodology for defining essential elements of a modern class, approaches for planning and structuring classes.</td>
</tr>
<tr>
<td>137:147</td>
<td>Dance Kinesiology</td>
<td>3 s.h.</td>
<td>Body movement related to demands of dance; structural and muscular analysis for efficient, effective dance training and prevention of injuries; investigation of skeletal and ligamentous structure for working knowledge of how the body produces movement; joint actions and restrictions, common injuries to those sites; attachments of the voluntary muscles, pathways and potential actions; neuromuscular analysis of an action; ideal skeletal alignment; how individual differences may affect movement performance. Prerequisite: 027:053. Same as 049:108.</td>
</tr>
<tr>
<td>137:149</td>
<td>Honors Studies in Dance</td>
<td>arr.</td>
<td>Choreography, performance, production, laboratory, dance history, or pedagogy. Prerequisite: g.p.a. of 3.33 or higher.</td>
</tr>
<tr>
<td>137:150</td>
<td>Beginning Labanotation</td>
<td>3 s.h.</td>
<td></td>
</tr>
<tr>
<td>137:160</td>
<td>Movement for Performers</td>
<td>2-3 s.h.</td>
<td>Same as 025:167, 049:105.</td>
</tr>
<tr>
<td>137:170</td>
<td>Choreography III</td>
<td>2 s.h.</td>
<td>Third semester; choreographic concepts, process, composition.</td>
</tr>
<tr>
<td>137:171</td>
<td>Choreography IV</td>
<td>2 s.h.</td>
<td>Advanced choreographic concepts, methods, applications; the choreographic process and how it relates to other artistic practices in the performing arts; creative ideas, movement concepts, choreographic statements; creation of an extended dance work.</td>
</tr>
</tbody>
</table>
137:172 Independent Choreography  
Credit for creation of independent choreographic project, developed under guidance of faculty adviser; that results in production of a dance work. Prerequisite: consent of faculty project adviser.

137:174 Afro/Cuban Drum and Dance Ensemble  
1 s.h.
Dancing, drumming, and/or the musical dialect of several folkloric and ceremonial Afro/Cuban forms. Prerequisite: consent of instructor. Same as 025:173.

137:180 Dance History I: Ancient to Enlightenment  
3 s.h.
Developments in dance from the beginning of recorded history to 1800; ritual in tribal and premodern societies; dance, theatre and spectacle in ancient Greece and Rome; dance and celebration in European and Asian feudal societies and courts; dance in the new world (colonial United States and Latin American).

137:181 Dance History II: Romantic to Contemporary  
3 s.h.
Dance history in the 19th and 20th centuries; changes in dance training and technique; theory, composition, performance practices in context of broader social, political, and cultural trends; how dance and choreographic practices have changed over time, relationships between social ideas about embodiment and production of dance forms, precedents for contemporary dance practices in past forms.

137:182 Historical Perspectives in Dance  
3 s.h.
Contemporary dance scene; careers and work of Mark Morris, Trisha Brown, Twyla Tharp, Bill T. Jones, Paul Taylor, Merce Cunningham, Fina Bausch, William Forsythe, Jowle Willa Jo Zollar, Anna Halprin, Miguel Gutierrez (autobiography; bodies, site/sight of performance [venue and vantage points]), reading [interpretation, including historical, political, and social implications]; new ways of looking at and thinking about contemporary dance, artistic trends, directions for choreographic production. Same as 025:182.

137:190 Independent Study  
arr.
Credit for an individual student-designed project coordinated with a faculty adviser. Prerequisites: sophomore or higher standing and consent of instructor.

137:200 Graduate Seminar in Dance  
2 s.h.
Research, careers, administrative and educational topics.

137:201 Graduate Production Practicum  
1 s.h.
Scenery and costume design, lighting, audio/video, publicity.

137:202 Theories of Dance and the Body  
3 s.h.
Theoretical trends in studies of dance and physical bodies; performative and choreographic aspects of being.

137:206 Graduate Dance Performance  
0-1 s.h.
Credit for rehearsal hours and performance of dance works in produced dance concert. Repeatable. Prerequisite: audition and/or concert adjudication.

137:213 Graduate Majors Ballet II  
1-3 s.h.
Advanced technical and performance training for proficient dancers; physical and mental skills necessary for professional work—physical stamina, strength, flexibility, articulation, coordination, musicality, phrasing, basic physical concepts underlying clear and efficient movement, capacity to assimilate new movement material, awareness of the center of gravity and its role in mobilization and control of the body. Repeatable.

137:214 Graduate Majors Modern II  
1-3 s.h.
High intermediate technical and performance training in modern dance; physical and mental skills necessary for more advanced work—physical stamina, strength, flexibility, articulation, coordination, musicality, phrasing, basic physical concepts underlying clear and efficient movement, capacity to assimilate new movement material, awareness of the center of gravity and its role in mobilization and control of the body, consciousness of personal movement choices and expressive range. Repeatable.

137:223 Graduate Majors Ballet III  
1-3 s.h.
Advanced ballet technique and performance training for proficient dancers; physical and mental skills necessary for professional work—physical stamina, strength, flexibility, articulation, coordination, musicality, phrasing, understanding of basic physical concepts underlying clear and efficient movement, capacity to assimilate new movement material, awareness of the center of gravity and its role in mobilization and control of the body. Repeatable.

137:224 Graduate Majors Modern III  
1-3 s.h.
Advanced technical and performance training in modern dance; physical and mental skills necessary for professional work—physical stamina, strength, flexibility, articulation, coordination, musicality, phrasing, understanding of basic physical concepts underlying clear and efficient movement, capacity to assimilate new movement material, awareness of the center of gravity and its role in mobilization and control of the body, consciousness of personal movement choices and expressive range. Repeatable.

137:230 Graduate Major Modern IV  
1-2 s.h.
Professional technique and performance training in modern dance. Prerequisite: consent of instructor.

137:234 Graduate Improvisation  
1-2 s.h.
Dance improvisation. Prerequisite: consent of instructor.

137:235 Graduate Improvisation II  
2 s.h.
Advanced improvisation. Prerequisite: consent of instructor.

137:270 Graduate Choreography I  
2 s.h.
The craft of choreography and the creative process; elements of gesture, motion, shape, space, form; vocabulary for discussing and analyzing choreographic works; enhancement of ability to invent and develop movement ideas.

137:271 Graduate Choreography II  
2 s.h.
Continuation of 137:270.

137:272 Graduate Choreography III  
2 s.h.
Continuation of 137:271; advanced choreographic concepts, methods, and applications with focus on the creative mind and choreographic process; concepts and experiences that support development of advanced choreographic skills and innovative dances.

137:273 Graduate Choreography IV  
2 s.h.
Advanced choreography concepts, methods, applications.

137:274 Graduate Independent Choreography  
arr.
Credit for creation of an independent choreographic project, developed under guidance of faculty adviser, that results in production of a dance work. Prerequisite: consent of faculty project adviser.

137:275 Advanced Choreographic Design  
1-4 s.h.
Collaborative experience with advanced artists from varied disciplines that culminates in a final performance, emphasis on sharing and investigating ideas, artistic intent, personal vision, and creating collaborative projects.

137:277 Thesis  
arr.

137:290 Graduate Independent Study  
arr.
Credit for individually designed project coordinated with a faculty adviser. Prerequisite: consent of faculty project adviser.

Primarily for Graduate Students

137:200 Graduate Seminar in Dance  
2 s.h.
Research, careers, administrative and educational topics.

137:201 Graduate Production Practicum  
1 s.h.
Scenery and costume design, lighting, audio/video, publicity.

137:202 Theories of Dance and the Body  
3 s.h.
Theoretical trends in studies of dance and physical bodies; performative and choreographic aspects of being.

137:206 Graduate Dance Performance  
0-1 s.h.
Credit for rehearsal hours and performance of dance works in produced dance concert. Repeatable. Prerequisite: audition and/or concert adjudication.

137:213 Graduate Majors Ballet II  
1-3 s.h.
Advanced technical and performance training for proficient dancers; physical and mental skills necessary for professional work—physical stamina, strength, flexibility, articulation, coordination, musicality, phrasing, basic physical concepts underlying clear and efficient movement, capacity to assimilate new movement material, awareness of the center of gravity and its role in mobilization and control of the body. Repeatable.

137:214 Graduate Majors Modern II  
1-3 s.h.
High intermediate technical and performance training in modern dance; physical and mental skills necessary for more advanced work—physical stamina, strength, flexibility, articulation, coordination, musicality, phrasing, basic physical concepts underlying clear and efficient movement, capacity to assimilate new movement material, awareness of the center of gravity and its role in mobilization and control of the body, consciousness of personal movement choices and expressive range. Repeatable.

137:223 Graduate Majors Ballet III  
1-3 s.h.
Advanced ballet technique and performance training for proficient dancers; physical and mental skills necessary for professional work—physical stamina, strength, flexibility, articulation, coordination, musicality, phrasing, understanding of basic physical concepts underlying clear and efficient movement, capacity to assimilate new movement material, awareness of the center of gravity and its role in mobilization and control of the body. Repeatable.

137:224 Graduate Majors Modern III  
1-3 s.h.
Advanced technical and performance training in modern dance; physical and mental skills necessary for professional work—physical stamina, strength, flexibility, articulation, coordination, musicality, phrasing, understanding of basic physical concepts underlying clear and efficient movement, capacity to assimilate new movement material, awareness of the center of gravity and its role in mobilization and control of the body, consciousness of personal movement choices and expressive range. Repeatable.

137:230 Graduate Major Modern IV  
1-2 s.h.
Professional technique and performance training in modern dance. Prerequisite: consent of instructor.

137:234 Graduate Improvisation  
1-2 s.h.
Dance improvisation. Prerequisite: consent of instructor.

137:235 Graduate Improvisation II  
2 s.h.
Advanced improvisation. Prerequisite: consent of instructor.

137:270 Graduate Choreography I  
2 s.h.
The craft of choreography and the creative process; elements of gesture, motion, shape, space, form; vocabulary for discussing and analyzing choreographic works; enhancement of ability to invent and develop movement ideas.

137:271 Graduate Choreography II  
2 s.h.
Continuation of 137:270.

137:272 Graduate Choreography III  
2 s.h.
Continuation of 137:271; advanced choreographic concepts, methods, and applications with focus on the creative mind and choreographic process; concepts and experiences that support development of advanced choreographic skills and innovative dances.

137:273 Graduate Choreography IV  
2 s.h.
Advanced choreography concepts, methods, applications.

137:274 Graduate Independent Choreography  
arr.
Credit for creation of an independent choreographic project, developed under guidance of faculty adviser, that results in production of a dance work. Prerequisite: consent of faculty project adviser.

137:275 Advanced Choreographic Design  
1-4 s.h.
Collaborative experience with advanced artists from varied disciplines that culminates in a final performance, emphasis on sharing and investigating ideas, artistic intent, personal vision, and creating collaborative projects.

137:277 Thesis  
arr.

137:290 Graduate Independent Study  
arr.
Credit for individually designed project coordinated with a faculty adviser. Prerequisite: consent of faculty project adviser.
Music

Director: Kristin Thelander
Associate directors: David Gier, Carlos Xavier Rodriguez, Mark Weiger

Professors: Elizabeth Aubrey, Don Coffman, Delbert Desselhorst, Katherine Ebertle, Kate Gileler (Music/Speech Pathology and Audiology), David K. Compper, David Greenhoe, William LaRue Jones, Maurita Murphy Mead, David Nelson, John Rapson, Stephen Swanson, Kristin Thelander, Ingo Titze (Speech Pathology and Audiology/Music), Urie Tschirch, Mark Weiger, Myron D. Welch

Associate professors: Mary Adamek, Benjamin Coelho, Michael Eckert, Lawrence Fritts, Christine Getz, David Gier, Rachel Joselson, Kevin Kastens, Rene Lechner, Dan Moore, Ksenia Nosikova, Gary Race, Carlos Xavier Rodriguez, Christine Rutledge, T.M. Scruggs, Timothy Salter, Marian Wilson-Kimber, Katherine Wolfe

Associate professors emeriti: Richard J. Bloesch, Don Haines, Carole Thomas, Robert Yeats

Assistant professors: Jeffrey Agrell, Anthony Armone, Jerry Cain, Scott Conklin, Timothy Dickey, Alan Huckleberry, John Manning, Gregory Martin, Jose Martens, John Muriello, Volkan Orhon, Tamara Thweatt, Kenneth Tse

Adjunct assistant professors: Joel Boyer, Anthony Cox, James Dreier, Steven Grismore, Robert Paeser, Brent Sandy, Rachelle Tschirch, Joey Walker, Brett Wolgast

Lecturers: Hannah Holman, Elizabeth Oakes, Susan Jones, Tricia Park, Shari Rhoads

Undergraduate degrees: B.A. in Music; B.M.

Undergraduate nondegree program: Minor in Music

Graduate degrees: M.A., M.F.A., Ph.D. in Music; D.M.A.

Graduate nondegree program: Certificate in Sacred Music

Web site: http://www.uiowa.edu/~music

The University of Iowa School of Music is prominent in a fine arts community of international repute. It has long been recognized as one of the excellent university-based schools of music in the United States.

The school's on-campus enrollment of approximately 450 music majors is large enough to sustain strong programs in all areas of specialization, yet small enough to ensure the individual attention essential to each student's development.

The faculty consists of highly trained artist-teachers in each area of specialization and scholars of international distinction. Faculty ensembles in residence include the Iowa Woodwind Quintet, the Iowa Brass Quintet, and the Maia String Quartet. Private lessons with faculty members are offered in all band and orchestra instruments, voice, piano, and organ.

The school's undergraduate curricula offer all qualified students, whether music majors or nonmajors, the opportunity for further study of music. In addition to its comprehensive course offerings for majors, the school provides a substantial selection of courses especially recommended for nonmajors (see “Music for Nonmajors”).

The graduate curricula are designed primarily as preparation for teaching in secondary schools, colleges, and universities and for careers in performance and music therapy.

The School of Music is a charter member of the National Association of Schools of Music. The requirements for entrance and for graduation are in accordance with the published standards of the National Association of Schools of Music.

Undergraduate Programs

The school offers Bachelor of Arts and Bachelor of Music degrees. B.M. students may count more than 50 s.h. of course work in music toward the minimum 120 s.h. required for graduation; B.A. students may not. Areas of concentration for the B.M. are composition, music therapy, and performance; a second emphasis in jazz studies may be added to a performance track. B.A. program emphases include composition, music history, performance, and jazz studies. Professional certification in music education and music therapy are available only through the B.M. program.

The School of Music also participates in offering the major in performing arts entrepreneurship, offered through the Division of Performing Arts in cooperation with the John Pappajohn Entrepreneurial Center of the Tippie College of
Business. For more information, see Performing Arts Entrepreneurship in the Catalog.

All undergraduate enrollments require School of Music approval. Entering first-year and transfer students who plan to major in music must be accepted into a performance area through audition either in person or by recording before they register. Students who plan to major in composition or music history must submit examples of creative and/or written work; for details, see “Composition Concentration” below, or “Music History Emphasis” under “Bachelor of Arts” below. All entering students must complete a theory diagnostic exam and a piano proficiency exam to determine appropriate placement in related courses.

Bachelor of Music

GENERAL COURSE REQUIREMENTS

All Bachelor of Music candidates must complete the College of Liberal Arts and Sciences General Education Program as well as the following School of Music course requirements.

025:001 Fundamentals of Music for Majors (or successful completion of the undergraduate theory examination) 3 s.h.
025:002-025:005 Musicianship and Theory I-IV 16 s.h.
025:071-025:072 Group Instruction in Piano I-II (or successful completion of proficiency exams I and II) 2 s.h.

Registration in 025:071-025:072 Group Instruction in Piano I-II is corequisite with 025:002-025:005 Musicianship and Theory I and II, unless exempted by proficiency exam. Transfer students should complete this requirement in their first year of residence, unless exempted by proficiency exam.

025:074 Recital Attendance 7 s.h.

Seven semesters of 025:074 are required for all B.M. students, except music therapy students, who are required to take four semesters. Transfer students should plan to enroll in this course each of their remaining semesters.

025:107 Techniques of Conducting 2 s.h.
025:144 History of Music I (western music of the Middle Ages, Renaissance, and Baroque) 3 s.h.
025:146 History of Music II (western music 1750-present) 3 s.h.
025:154 Senior Recital 1 s.h.

To complete the senior recital, students must have achieved upper-level applied status or be enrolled in upper-level applied music courses (see “Applied Music”). Music therapy students may complete a senior recital or a senior research project. Composition and music history students substitute 025:009 Bachelor’s Thesis for the senior recital. The senior recital, research project, or thesis must be completed at The University of Iowa.

One of these:
025:103 World Music 3 s.h.
025:104 Music of Latin America and the Caribbean 3 s.h.
025:141 History of Jazz 3 s.h.
025:178 Music, Culture, and Identity 3 s.h.

At least 4 s.h. from these:
025:101 Introduction to Improvisation 3 s.h.
025:102 Jazz Improvisation 2 s.h.
025:117 Arranging for Band 2 s.h.
025:118 Jazz Theory 2 s.h.
025:145 Counterpoint Before 1600 3 s.h.
025:147 Counterpoint After 1600 3 s.h.
025:148 Instrumentation 2 s.h.
025:153 Keyboard Harmony 2 s.h.
025:155 Composition 2 s.h.
025:157 Orchestration 2 s.h.
025:243 Advanced Jazz Improvisation 2 s.h.
025:244 Transcription 2 s.h.
025:247 Analysis of Music Literature 1800-present 3 s.h.
025:249 Analysis of Tonal Music 3 s.h.
025:256 Analysis of Music Literature: Special Topics 3 s.h.

APPLIED MUSIC

Four years of applied music are required. Instruction is provided on two levels, lower and upper. Students must achieve upper-level status before they may present the senior recital. Readiness for upper-level applied music is determined in the student’s areas of instruction, usually by a jury examination in the area. The eighth semester of applied music may be waived for students who are enrolled in the Teacher Education Program and are student teaching. Students are allowed a maximum of six semesters (not including summer) in lower-level applied instruction. Those who want to continue lessons beyond the maximum allowable lower-level registration must do so under the nonmajor category.

Music therapy students who complete a senior research project rather than a senior recital are required to take three years of lower-level applied music.
ENSEMBLE PARTICIPATION

Eight semesters of major ensemble participation are required. Students normally enroll in major ensemble participation during consecutive semesters, beginning early in their degree work, to ensure completion of the requirement in a timely manner. Ensemble assignments are made at the discretion of the major teacher and ensemble director. String students participate in University Orchestra and Chamber Orchestra. Wind and percussion students participate in the Symphony Band/Concert Band/University Band. Voice students participate in Camerata Singers, University Choir, Kantorei, and/or University Chorale. Keyboard students may substitute accompanying for major ensemble participation for two semesters during their junior and/or senior years, with their major applied teacher’s consent. Composition and music history students may, with their adviser’s consent, substitute other ensembles.

Music therapy students who complete a senior research project rather than a senior recital are required to complete 6 s.h. of major ensemble participation.

Any student who wants to request adjustment of the major ensemble requirement must submit his or her request in writing to a review committee consisting of the ensemble director(s) involved, the studio instructor, and the associate director for undergraduate studies.

Major ensembles are as follows.

- 025:142 Camerata Singers 1 s.h.
- 025:181 University Choir 1 s.h.
- 025:185 Kantorei 1 s.h.
- 025:191 University Chorale (Women’s Chorale) 1 s.h.
- 025:192 Orchestra 0-1 s.h.
- 025:194 Symphony Band/Concert Band/University Band 0-1 s.h.

ELECTIVES

Students may take advanced electives in performance (including chamber music and piano accompanying), theory, composition, cultural diversity, music education, music therapy, music history, music literature, conducting, and orchestration.

Performance Concentrations

A performance concentration is available in each of the orchestral areas—strings, brass, woodwinds, and percussion—and in voice and keyboard. Students must take at least an additional 17 s.h. beyond the School of Music general course requirements. This course work is chosen from a list of electives unique to each performance area. Course listings for each of the respective areas are available from the School of Music Academic Office.

Jazz Studies Emphasis

Students are admitted to the jazz studies emphasis only by audition, which occurs after they complete their first year. When admitted, they are assigned to the jazz studies adviser in addition to their regular faculty adviser.

Senior recital and recital attendance requirements are the same as those for the B.M. Course requirements are the same as those for the B.M., plus an additional 18 s.h. of jazz courses.

Music Therapy

Admission to the music therapy program is based on successful completion (grade of C-plus or higher) of 025:114 Orientation to Music Therapy. In addition to the core courses in music therapy listed below, specific courses are required in biological sciences, psychology, and music.

A six-month internship in an approved off-campus clinical facility is required. Following successful completion of the internship, students are eligible to take the board certification examination in music therapy.

Specific course requirements for music therapy are as follows.

- All of these:
  - 07S:144 Psychology of Music 2 s.h.
  - 07S:149 Introduction to Music Research 2 s.h.
  - 025:017 Secondary Performance—Voice (2 s.h. required) 1 s.h.
  - 025:071 Group Instruction in Piano I 1 s.h.
  - 025:072 Group Instruction in Piano II 1 s.h.
  - 025:073 Group Instruction in Piano III 1 s.h.
  - 025:074 Recital Attendance (four semesters required) 4 s.h.
  - 025:091 Music Foundations in Therapy I 2 s.h.
  - 025:092 Music Foundations in Therapy II 2 s.h.
  - 025:094 Music Therapy Practicum (three semesters, for 1, 2, and 2 s.h., respectively) 5 s.h.
  - 025:096 Music Techniques in Special Education and Recreation 3 s.h.
  - 025:114 Orientation to Music Therapy 2 s.h.
  - 025:138 Music Therapy Techniques: Atypical Children 3 s.h.
  - 025:139 Music Therapy Techniques: Adult Clients 3 s.h.
  - 025:140 Internship in Music Therapy 2 s.h.
One of these:
025:117 Arranging for Band  2 s.h.
025:148 Instrumentation  2 s.h.

One of these:
025:098 Senior Project in Music Therapy  1 s.h.
025:154 Senior Recital  1 s.h.

Music therapy students who elect the senior recital option must take four years of applied music and attain upper-level status; they also must take 8 s.h. of major ensemble participation. Those who elect the senior research project option must take three years of applied music, 6 s.h. of major ensemble, and the following courses.

025:101 Introduction to Improvisation  3 s.h.
025:103 World Music  3 s.h.

**Composition Concentration**

Applicants to the composition concentration must submit a portfolio of creative work for evaluation by the composition faculty. Upon admission to the program, students are assigned a faculty adviser. Accomplished students may gain admission as entering first-year students; in such cases the approval of submitted work replaces a performance audition. If the composition faculty advises postponement of admission until further study has been undertaken, the entering first-year or transfer student must audition in a performance studio for admission to the School of Music.

Composition students may pursue the B.M. or the B.A. They must satisfy the degree requirements stated under “Bachelor of Music” or “Bachelor of Arts.” The B.M. and B.A. programs in composition require additional course work in composition and music theory; contact the School of Music or visit [http://www.uiowa.edu/~music/current/undergraduate.htm](http://www.uiowa.edu/~music/current/undergraduate.htm).

The Bachelor's Thesis (025:099) replaces the recital required of applied music students. It consists of one or more compositions, approved by a committee of three faculty members and performed on regularly scheduled School of Music recitals.

**Teacher Certification**

*(B.M. With Teacher Licensure)*

Undergraduate students seeking teacher certification must be enrolled in a B.M. program in performance. Teacher licensure in music education is earned by completing the appropriate licensure program (e.g., band, choral, string) in addition to the School of Music requirements for the Bachelor of Music. Students must be admitted to the College of Education’s Teacher Education Program (TEP) before they may take required professional education courses.

Music TEP students must maintain a University of Iowa g.p.a. and a cumulative g.p.a. of at least 2.70 in all course work, and a cumulative g.p.a. of at least 3.00 in course work for the music major. They must have a cumulative g.p.a. of at least 2.70 at the time of recommendation for licensure.

Music TEP students must complete at least 20 s.h. at The University of Iowa in order to be recommended for licensure.

In addition to the B.M. requirements in music, TEP students must take College of Liberal Arts and Sciences General Education Program courses that fulfill licensure requirements. The certification program requires music methods and techniques courses, professional education courses, and student teaching.

The following courses are required for all music TEP students. Courses 07S:096, 07E:102/07S:102, 07S:190, and 07S:195 are prerequisites for all other certification courses; students must take them during their first semester in the Teacher Education Program.

One college-level math course (excluding 22M:001, 22M:002, 22M:003)
07B:180 Human Relations for the Classroom Teacher  3 s.h.
07E:100/07S:100 Foundations of Education  3 s.h.
07E:102/07S:102 Technology in the Classroom  2 s.h.
07E:145 Methods and Materials: General Music  3 s.h.
07E:192 Special Area Student Teaching  6 s.h.
07P:075 Educational Psychology and Measurement  3 s.h.
07S:096 Introduction and Practicum: Music  2 s.h.
07S:187 Seminar: Curriculum and Student Teaching  1 s.h.
07S:190 Orientation to Secondary Education  1 s.h.
07S:191 Observation and Laboratory Practice in the Secondary School  6 s.h.
07S:195 Teaching Reading in Secondary Content Areas  1 s.h.
07U:100 Foundations of Special Education  3 s.h.
BRASS, WOODWIND, AND PERCUSSION STUDENTS

Brass, woodwind, and percussion students in the TEP participate in 025:193 Marching Band for one semester. Exceptions must be approved by the head of the music education area.

The following courses are required.

- 07S:140 Band Methods and Materials 3 s.h.
- 07S:143/025:105 Instrumental Techniques 7 s.h.
- 07S:145/025:108 Instrumental Conducting 2 s.h.
- 025:100 Class Strings 1 s.h.
- 025:182 Marching Band Techniques 1 s.h.
- 025:193 Marching Band 1 s.h.
- 025:196 Jazz Band Techniques 2 s.h.
- 025:197 Jazz Band (section 2) 1-3 s.h.

STRING STUDENTS

String majors take two semesters of secondary performance on each of three string instruments other than their primary instrument (total of 6 s.h.). For example, violin majors take two semesters of each of these: 025:022 Secondary Performance—Viola, 025:023 Secondary Performance—Cello, and 025:024 Secondary Performance—String Bass.

The following courses are required.

- 07S:143/025:105 Instrumental Techniques (1 s.h. each of brass, woodwind, percussion) 3 s.h.
- 07S:145/025:108 Instrumental Conducting 2 s.h.
- 07S:150/025:112 String Methods and Materials 2 s.h.
- Secondary performance (six semesters chosen from 025:021, 025:022, 025:023, or 025:024) 6 s.h.

VOCAL AND KEYBOARD STUDENTS

Vocal majors register for 025:018 Secondary Performance—Piano for two semesters.

Keyboard students register for 025:017 Secondary Performance—Voice for two semesters.

The following courses are required.

- 07S:143/025:105 Instrumental Techniques (1 s.h. each of brass, woodwind, percussion) 3 s.h.
- 07S:147/025:110 Choral Methods and Literature 3 s.h.
- 025:100 Class Strings 1 s.h.
- Secondary performance (two semesters chosen from 025:017, 025:018) 2 s.h.

KEYBOARD STUDENTS (NONVOCAL)

Keyboard students who plan to teach in nonvocal areas complete the requirements in either the brass-woodwind-percussion area or the string area, as stated above.

Admission to TEP

Application forms for admission to the Teacher Education Program are available from the Office of Teacher Education and Student Services at the College of Education. Application deadlines for the secondary Teacher Education Program are October 15 for entry the following spring and March 15 for entry the following fall. The Teacher Education Program in music accepts a limited number of applicants; meeting the minimum requirements stated below does not guarantee admission. Application also requires a proficiency exam and a personal statement.

Minimum requirements for admission to the music TEP are:

- a University of Iowa g.p.a. and a cumulative g.p.a. of at least 2.70 at the time of admission to the program; and
- completion of at least 30 s.h. of college credit, a 10-hour volunteer practicum in a secondary school setting, and the PRAXIS I exam.

Bachelor of Arts

The Bachelor of Arts degree in music is a nonprofessional degree for students who have strong abilities and interest in music but are not planning on a career as a musician, or who want to combine a major in music with another major in a liberal arts and sciences discipline. Students must audition and be accepted into a performance area. They develop musicianship and performance skills and choose from a wide variety of music electives.

Students in many areas, from engineering and physics to history, art, and English, find that a B.A. in music is a good addition to their studies. Other students choose the B.A. in music to complement course work in business (especially the minor in business administration), foreign language and literature, or interdisciplinary fields like American studies and literature, science, and the arts. Some students combine a B.A. in music with undergraduate preparation to study law or medicine.

Students who seek the B.A. may choose an emphasis in performance, music history, composition, or jazz studies. The performance emphasis requires 37-42 s.h. in music course
work and is offered in all performance areas listed for the B.M. program. The music history and composition emphases require 50 s.h. in music course work. The jazz studies emphasis requires 40-50 s.h. of music course work. Music education and music therapy programs are offered only with the B.M.

All B.A. students must complete the College of Liberal Arts and Sciences General Education Program and satisfy all other collegiate requirements. Specific requirements for each emphasis area are available from the School of Music and the Academic Advising Center.

Performance Emphasis

Students may enroll in lower-level applied instruction for a maximum of six semesters (not including summer). Those who wish to continue lessons for more than six semesters must be approved for upper-level applied instruction or must register under the nonmajor category (music majors may not count nonmajor instruction toward the elective requirement). String students participate in orchestra; wind and percussion students participate in bands; and voice students participate in choral organizations. Any student who wants to request adjustment of the ensemble requirement must submit his or her request in writing to a review committee consisting of the ensemble director(s) involved, the major teacher, and the associate director for undergraduate studies.

All music majors with scholarships must participate in a major ensemble and studio lessons each semester.

For a list of major ensembles, see “Ensemble Participation” under “Bachelor of Music” above.

Music History Emphasis

All applicants should submit examples of written work (term paper, senior thesis) for evaluation to the music history faculty. Upon acceptance to the music history program, students who already are enrolled as music majors are assigned a faculty adviser in music history. Incoming first-year students, in addition to being accepted by the music history area, must pass a studio audition before they can be admitted to the School of Music. All students, in consultation with their adviser, design an appropriate plan of study, which includes assignment to an applied studio. Bachelor’s Thesis (025:099) replaces the recital. It consists of a major research paper, approved by a committee of three faculty members.

All music majors with scholarships must participate in a major ensemble and studio lessons each semester.

Jazz Studies Emphasis

The jazz studies emphasis in the B.A. is designed for students seeking a liberal arts structure for their undergraduate degree. It is not designed for those who intend to pursue graduate work in music or a professional credential program in music.

All music majors with scholarships must participate in a major ensemble and studio lessons each semester. Admission to the program is determined by audition with the director of jazz studies and a studio teacher. Guitar students must petition an ad hoc committee that includes the director of jazz studies, the undergraduate music adviser, and a studio professor for admission to the major.

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan.

In addition to the requirements listed under the checkpoints, all students must complete 2 s.h. in applied music and 1 s.h. in a major ensemble each semester.

The Four-Year Graduation Plan is not available for music therapy and music education.

Bachelor of Arts

The Bachelor of Arts with performance emphasis requires 37-42 s.h. in School of Music courses. The B.A. with music history or composition emphasis requires 50 s.h. in School of Music courses.

Before the third semester begins: 15-18 s.h. of course work in the major, including 025:002, 025:003, 025:071, and 025:072; and at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: at least 23-32 s.h. of course work in the major, including 025:004 and 025:005, and at least one-half of the semester hours required for graduation

Before the seventh semester begins: at least 33-41 s.h. of course work in the major and at least three-quarters of the semester hours required for graduation
Before the eighth semester begins: at least 36-46 s.h. of course work in the major
During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate Bachelor of Music
Students may apply more than 50 s.h. earned in School of Music courses toward the minimum 120 s.h. required for the B.M.
Before the third semester begins: 18 s.h. of course work in the major, including 025:002, 025:003, 025:071, and 025:072; and at least one-quarter of the semester hours required for graduation
Before the fifth semester begins: at least 34 s.h. of course work in the major, including 025:004 and 025:005, and at least one-half of the semester hours required for graduation
Before the seventh semester begins: at least 50 s.h. of course work in the major and at least three-quarters of the semester hours required for graduation
Before the eighth semester begins: at least 56 s.h. of course work in the major
During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Honors
Exceptional music majors who are members of the University Honors Program and maintain a music g.p.a. of at least 3.80 may enroll in the School of Music’s honors program. Membership in the University Honors Program requires students to maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University Honors Program for more information).
Throughout undergraduate residence, honors music students may enroll in honors sections of courses in the school and in the College of Liberal Arts and Sciences. They also may seek honors designation for any course, with the instructor’s consent. All honors course work must be approved by the School of Music honors adviser.
Honors students with junior or senior standing and a music g.p.a. of at least 3.80 may undertake work leading to the B.M. or B.A. with honors. Graduation with honors is awarded after completion of 6-8 s.h. of honors work; students must earn a minimum of 3 s.h. in 025:097 Honors in Music. Honors projects for which credit is given in 025:097 include honors performances (solo and/or ensemble); honors compositions (or transcriptions, orchestrations, arrangements); and honors essays, research papers, editions, or translations. A combination of at least two of these types of projects is required. None of the projects may duplicate projects assigned in other courses, nor may they be required for graduation (e.g., 025:154 Senior Recital).
Honors students in music are encouraged to take graduate-level courses. Advanced courses in music history, music theory, and languages are particularly recommended. An honors committee appointed by the adviser and the student’s faculty sponsor evaluates the student’s work.
Consult the School of Music honors adviser for more information.
National Honor Society
The School of Music sponsors a chapter of Pi Kappa Lambda, the national music honor society. Students of exceptional ability are recommended for membership by faculty members. For more information, consult the School of Music honors adviser.
Minor
Students may earn a minor in music by completing 15 s.h. of course work in the School of Music, including 12 s.h. in advanced course work at The University of Iowa. Advanced courses include all courses numbered 025:100 and above, the core music major courses in the music theory sequence (025:002, 025:003, 025:004, and 025:005), and all lower-level applied instruction courses for majors.
Students must include one music theory course, one music history course; and 3 s.h. of performance courses (lower-level applied instruction for majors or ensembles). Auditions with the major instructor are required for the admission to the lower-level instruction courses; admission to the theory courses is determined by results on the theory placement exam or completion of 025:001 Fundamentals of Music. Students seeking a music minor must maintain a g.p.a. of at least 2.00. No course counted toward the minor may be taken pass/nonpass.
Financial Aid
A number of music activity scholarships are available to qualified undergraduate music majors. For information, write to the School of Music.

Graduate Programs
The School of Music offers four graduate degrees: Master of Arts, Master of Fine Arts, Doctor of Philosophy, and Doctor of Musical Arts. It also offers a graduate theory pedagogy minor and the graduate Certificate in Sacred Music.

Before applicants can be considered for admission to any of the graduate programs, they must audition and/or submit supporting materials in their area of concentration. Information about Graduate College admission and curriculum requirements for each area in the School of Music is available from the school's academic office.

GENERAL REQUIREMENTS
Before they register, entering graduate students must take two School of Music advisory examinations: one in music theory, and one in music history and literature. M.A. students in music therapy are not required to take the advisory examination in music theory or music history. These examinations are given at the beginning of the fall semester on the two days (except Sunday) immediately preceding the opening of classes, and at the beginning of the spring and summer sessions by appointment. A leaflet describing the general content of these tests is available from the School of Music academic office.

For detailed information about Graduate College policies, see the Manual of Rules and Regulations of the Graduate College or Graduate College in the Catalog.

ENSEMBLE PARTICIPATION
Students in the M.A. or M.F.A. program (performance tracks) or the D.M.A. program in performance and pedagogy are required to complete four semesters of major ensemble participation. Students normally enroll in major ensemble participation during consecutive semesters beginning early in their degree work, to ensure completion of the major ensemble requirements in a timely manner. Ensemble assignments are made at the discretion of the major teacher and ensemble director. For a list of major ensembles, see “Ensemble Participation” under “Bachelor of Music” above.

Keyboard majors may substitute piano accompanying for major ensemble participation, at their major applied teacher's discretion. Jazz studies majors substitute 025:197 Jazz Band for major ensemble participation. Theory, composition, musicology, music education, and music therapy majors have no major ensemble requirement.

Any student who wants to request adjustment of this requirement must submit his or her request in writing to a review committee consisting of the major ensemble director(s) involved, the major teacher, and the School of Music associate director for graduate studies.

Master of Arts
The Master of Arts is offered in performance, conducting, jazz studies, composition, music theory, musicology, music therapy, music education, and opera theater direction. Performance majors present a public recital in place of a written thesis. Jazz studies majors present a public recital and a separate performance project. The Master of Arts without thesis is offered in performance, jazz studies, music education, and music therapy. Both thesis/recital and nonthesis degrees require a minimum of 30-33 s.h. of postbaccalaureate study. All M.A. programs—except music therapy—must include the following requirements. (Consult the music therapy program for information about requirements for the music therapy M.A.)

025:321 Introduction to Graduate Study in Music 2 s.h.

Music Theory
Students must earn 6 s.h.

025:240 Analytical Techniques (unless exempt by advisory exam) 3 s.h.

Students exempted from 025:240 through the advisory examination in music theory must substitute an additional theory elective from the following.

025:145 Counterpoint before 1600 3 s.h.
025:147 Counterpoint after 1600 3 s.h.
025:247 Analysis of Music Literature 1890-Present 3 s.h.
025:249 Analysis of Tonal Music 3 s.h.
025:256 Analysis of Music Literature: Special Topics 3 s.h.

One elective from these:
025:145 Counterpoint Before 1600 3 s.h.
025:147 Counterpoint After 1600 3 s.h.
Music History

Students must earn 6 s.h.

025:301 Advanced History and Literature of Music I 3 s.h.
025:302 Advanced History and Literature of Music II 3 s.h.

Students exempted from 025:301 and/or 025:302 through the advisory examination in music history must substitute a music history course from the following list for each of the exemptions.

025:303 Medieval Music 3 s.h.
025:304 Renaissance Music 3 s.h.
025:305 Seventeenth-Century Music 3 s.h.
025:306 Eighteenth-Century Music 3 s.h.
025:307 Nineteenth-Century Music 3 s.h.
025:308 Music 1900-1945 3 s.h.
025:309 Music 1945-Present 3 s.h.
025:310 American Music 3 s.h.
025:313 Major Composers 3 s.h.
025:314 Genres of Music 3 s.h.
025:315 Topics in the History of Opera 3 s.h.
025:318 Topics in Ethnomusicology 3 s.h.
025:319 Foundations of Ethnomusicology 3 s.h.
025:323 Medieval Music Notations 3 s.h.
025:324 Renaissance Music Notations 3 s.h.
025:330 Seminar in Musicology 3 s.h.
025:331 Performance Practices of Medieval and Renaissance Music 3 s.h.

Master of Fine Arts

The M.F.A. is for students of superior ability in instrumental or vocal performance. It requires a minimum of 60 s.h. of postbaccalaureate study, including at least two full-length recitals or programs (025:401 M.F.A. Thesis) for a maximum of 8 s.h. of credit.

Students may earn a Master of Arts degree while working toward the Master of Fine Arts degree, but all requirements for each degree—including two final examinations—must be met separately (see Graduate College in the Catalog).

Doctoral Degrees

All doctoral study in music includes the following.

Minimum course requirements listed under the M.A.

One or more additional music theory course(s) listed in the master’s degree requirements

One or more additional course(s) in music history, chosen from those listed in the master’s degree requirements

One of these:
025:500 Ph.D. Thesis
025:501 Composition Ph.D. Thesis
025:502 D.M.A. Essay

Proficiency in one or more foreign languages is required in most areas.

Doctor of Philosophy

Areas of concentration for the Ph.D. include composition, musicology, music education, music theory, and music literature. The music literature program is designed for students who already have achieved a professional level of musical performance. These students are required to audition in their major performance area.

Information about specific admission and curricular requirements for each area is available from the School of Music academic office.

Doctor of Musical Arts

Requirements for the D.M.A. in performance and pedagogy are the same as the school’s general doctoral requirements, except that the D.M.A. requires three full-length recitals. At the performance area’s discretion, a concerto performance with orchestra or other appropriate ensemble from the School of Music may be substituted for one of the recitals. Some performance areas allow one or more lecture recitals, with faculty approval. Singers may substitute one major opera role or one major solo contribution to an orchestra performance for one of their recitals. Conductors present two programs. See the associate director of graduate programs for specific area requirements.

D.M.A. candidates also must complete a scholarly investigation of limited scope in a written essay or thesis.
Certificate in Sacred Music

The certificate program is interdisciplinary. It requires course work in sacred music, choral conducting/literature, keyboard, voice, religion, and art and art history. Acceptance to the Graduate College is required. Simultaneous work toward a graduate degree is an option but is not required.

Theory Pedagogy Minor

Any student admitted to a graduate degree program in the School of Music may earn the theory pedagogy minor by completing the following required courses.

One of these:
025:145 Counterpoint Before 1600 3 s.h.
025:147 Counterpoint After 1600 3 s.h.

Both of these:
025:236 Methods and Techniques of Teaching Basic Theory 3 s.h.
025:237 Music Theory Colloquium (concurrent with 025:236) 0-1 s.h.

One of these:
025:249 Analysis of Tonal Music 3 s.h.
025:312 Schenkerian Theory and Analysis 3 s.h.

Total of 6 s.h. from these:
025:241 History of Music Theory I 3 s.h.
025:242 History of Music Theory II 3 s.h.
025:247 Analysis of Music Literature 1890-Present 3 s.h.
025:256 Analysis of Music Literature: Special Topics 3 s.h.
025:311 Theory and Analysis of Atonal Music 3 s.h.

Graduate Awards

Qualified graduate students are invited to apply for teaching and research assistantships. Inquiries should be directed to the academic office of the School of Music.

Music for Nonmajors

Courses recommended for nonmajors who are interested in music include the following.

025:010 Fundamentals of Music 3 s.h.
025:013 Concepts and Contexts of Western Music 3 s.h.
025:014 Great Musicians 3 s.h.
025:059 Performance Instruction for Non-Majors 1 s.h.
025:064 Recital Attendance for Non-Majors 1 s.h.
025:082 Group Piano I: Non-Music Majors 1 s.h.
025:084 Group Piano II: Non-Music Majors 1 s.h.
025:103 World Music 3 s.h.
025:104 Music of Latin America and the Caribbean 3 s.h.
025:141 History of Jazz 3 s.h.
025:144 History of Music I 3 s.h.
025:146 History of Music II 3 s.h.
025:178 Music, Culture, and Identity 3 s.h.

Group Piano I: Non-Music Majors (025:082) is available for nonmajors who wish to develop elementary performance skills for personal musical growth and enjoyment.

Participation in School of Music ensembles is open to all University students with the ensemble director's approval (for a list of major ensembles, see "Ensemble Participation" under "Bachelor of Music" above).

Applied music instruction is offered to nonmajors as instructors are available. Nonmajors interested in registering for 025:059 Performance Instruction for Non-Majors should consult music advisers.

Center for New Music

The Center for New Music is a vital component of the School of Music's composition program. Since its founding in 1966, the center has been both laboratory and showcase for late-20th-century music. It presents several concerts of contemporary works each academic season. It also provides a forum for visiting composers and other creative artists, bringing new music to a variety of outreach venues. Audition, rehearsal, and programming information is available on request.

Facilities

The Iowa Arts Campus has one of the nation's finest facilities for teaching and performing music. In addition to classrooms, the Voxman Music Building houses 55 teaching studios, 73 practice rooms, a library, three electronic music studios, ear training and listening facilities, four large rehearsal halls, ensemble rooms, professional recording facilities, eight practice and recital organs, the 80-seat Krapf Organ Studio, and the 700-seat Clapp Recital Hall. Its Instructional Technology Center has 30 desktop
computers with MIDI equipment and music-related software. Hancher Auditorium seats 2,680 people for concerts, operas, and other stage productions.

The Rita Benton Music Library holds more than 70,000 music scores and chamber music parts; 50,000 books, including bound journals; 3,500 microforms, chiefly manuscripts and early printed books; and 26,000 sound recordings and videos. It receives about 300 journals. Its Rare Book Room has particular strengths in 18th- and 19th-century music theory treatises and instrumental methods, and an outstanding collection of keyboard and chamber music by Ignaz Pleyel. Music manuscripts of the composer Phillip Greeley Clapp, a former director of the school, are housed in Special Collections at the University's Main Library. The Goldman Band Collection also is kept in the Main Library.

The Music Library accommodates 100 patrons at carrels and tables, with additional space at 15 listening room stations outfitted with computers that have CD and DVD players, turntables, or cassette decks. Separate small rooms house microformat readers and video equipment. The photocopier accommodates ledger-size sheets, enlargement, and reduction. All print materials are on open shelves; patrons must request audio records, videos, and microformats. The large reference collection is supplemented by standard electronic versions of music references and InfoHawk Gateway, the University's library catalog online.

Courses

General

Other courses appropriate for nonmajors are 025:144 and 025:146 (see “Music History”); 025:141 (see “Jazz Studies”); and most ensembles (see “Ensembles”).

*Instruction in 025:059 Performance Instruction for Non-Majors consists of a half-hour lesson per week. The course is offered on a fee-per-course basis, in addition to tuition. Students register under separate section numbers for different instruments.

025:010 Fundamentals of Music 3 s.h.
Music fundamentals through writing, listening, sight-singing, dictation, notation of pitch and rhythm, intervals, scales, key signatures, triads, and seventh chords. Offered by Saturday & Evening Classes. Prerequisite: closed to music majors.

025:013 Concepts and Contexts of Western Music 3 s.h.
Idea, social and historical contexts, emergence of genres and styles, diverse performing traditions in music making of Europe and North America. GE: fine arts, humanities.

025:014 Great Musicians 3 s.h.
Lives and works of important composers, performers. GE: fine arts, humanities.

025:059 Performance Instruction for Non-Majors 1 s.h.
Bassoon, cellos, clarinet, euphonium, flute, horn, oboe, organ, percussion, piano, saxophone, string bass, trombone, trumpet, tuba, viola, violin, or voice. GE: fine arts or humanities. Prerequisite: closed to music majors.

025:063 Survey of World Percussion 1 s.h.
Percussion music explored through a selection of nonwestern musical and cultural traditions; hands-on experience learning to play instruments from a variety of musical genres; music of Cuba, Brazil, Africa, Trinidad, Asia, other areas.

025:064 Recital Attendance for Non-Majors 1 s.h.
Musical experience through student, faculty recitals.

025:074 Recital Attendance 1 s.h.
Prerequisite: music major.

025:082 Group Piano I: Non-Music Majors 1 s.h.
Reading, technical study, choreography, playing by ear, improvisation; for beginners. GE: fine arts or humanities. Prerequisite: closed to music majors.

025:083 Introduction to Hand Drumming 1 s.h.
Hand drumming techniques indigenous to several Afro-Caribbean cultures; hands-on instruction and coaching on varied ethnic instruments, lectures, listening sessions.

025:084 Group Piano II: Non-Music Majors 1 s.h.
Continuation of 025:082. Prerequisite: closed to music majors.

025:103 World Music 3 s.h.
Varied perspectives on the relationship of music and culture, drawing from musical cultures around the world.

025:104 Music of Latin America and the Caribbean 3 s.h.
Folk and popular musical traditions and their social contexts in Latin America the Caribbean; listening skills; video/film screenings. GE: fine arts or humanities.

025:105 Social History of the Violin 1-3 s.h.
Same as 016:151.

025:167 Movement for Performers 2-3 s.h.
Movement as support for sound production, artistic expression, and wellness; Bartenieff Fundamentals and Laban Movement Analysis as methods of organizing and integrating body movement, expanding expressive range; studio course with practice, journal, observations, project applying movement skills to student’s area of performance/study. Same as 049:155, 137:160.

025:176 Nonprofit Organizational Effectiveness I 3 s.h.
Same as 06J:147, 024:147, 032:127, 042:157, 049:175, 096:168.

025:177 Nonprofit Organizational Effectiveness II 3 s.h.

025:178 Music, Culture and Identity 3 s.h.
Use of music as marker of social identity; focus on popular music in the United States and interplay among Latino, African, and European-American musical cultures; listening skills.
### Applied Music

Instruction consists of individual and/or class lessons, at the instructor’s option, for a minimum of one hour per week (students register for 2 s.h.), or one half-hour per week (students register for 1 s.h.). Majors are required to attend weekly performance and pedagogy seminars in applied music. Offered on a fee-per-course basis, in addition to tuition. Repeatable.

### Conducting

See also 025:108, 025:109, and 025:110, under the heading Music Education.

- **025:107 Techniques of Conducting** 2 s.h.
  Basic elements, score analysis.
- **025:158 Advanced Conducting** 2 s.h.
  Prerequisite: graduate standing.
- **025:203 Advanced Choral Conducting I** 1-3 s.h.
- **025:204 Advanced Choral Conducting II** 1-3 s.h.
- **025:205 Advanced Choral Conducting III** 1-3 s.h.
- **025:206 Advanced Choral Conducting IV** 1-3 s.h.

### Ensembles

Courses may be repeated; consent of instructor required.

- **025:142 Camerata Singers** 1 s.h.
- **025:162 All-University String Orchestra** 1 s.h.
  Repertoire, rehearsal pacing, and performance expectation geared to general students. Open to all UI students with no audition.
- **025:163 Steel Band** 1 s.h.
  Musical and cultural introduction to steel band music of Trinidad and other Caribbean musical styles, including calypso, soca, ska, and reggae. Prerequisite: consent of instructor.
- **025:173 Afro-Cuban Drum and Dance Ensemble** 1 s.h.
  Drumming, dance, and songs from folkloric musical traditions of Cuba. Prerequisite: audition. Same as 137:174.
- **025:180 Large Pep Band** 1 s.h.
  Performing ensemble for men’s basketball games during spring semester. Prerequisite: membership in marching band (025:193) and audition.
- **025:181 University Choir** 1 s.h.
- **025:183 Chamber Orchestra** 0-1 s.h.
- **025:184 Collegium Musicum** 1 s.h.
  Ensembles dedicated to performance of medieval, renaissance, and baroque music.
- **025:185 Kantoerei** 1 s.h.
- **025:186 Piano Accompaniment** arr.
  Collaborative arts techniques, methods, and history. Prerequisite: keyboard major or consent of instructor.
- **025:187 Piano Chamber Music** arr.
  Prerequisite: music major or consent of instructor.
- **025:188 String Chamber Music** arr.
- **025:190 Wind Chamber Music** arr.
  Preparation, performance of representative literature; sections for woodwinds, brass, flute, clarinet, horn, saxophone, double reed, trumpet, trombone, brass choir, tuba/euphonium ensemble.
University Chorale 1 s.h.
Women’s chorus.

Orchestra 0-1 s.h.

Marching Band 0-1 s.h.
Offered fall semesters.

Symphony Band/Concert Band/University Band 0-1 s.h.

Percussion Ensemble arr.
Range of styles and idioms, primarily written during the 20th century; historical or cultural aspects such as ancient rudimental drumming styles, ragtime, jazz, popular music, and music from Africa, the Caribbean, Brazil, Cuba. Prerequisite: consent of instructor.

Jazz Studies

Introduction to Improvisation 3 s.h.
Prerequisite: 025:002 or audition.

Jazz Improvisation 2 s.h.
Prerequisites: 025:002, 025:101, and audition.

Jazz Theory 2 s.h.
Rhythm, melody, harmony in jazz practice; ear training, keyboard skills, dictation, transcription. Prerequisite: 025:002 or consent of instructor.

History of Jazz 3 s.h.
Survey of jazz 1917 to 1970. GE: cultural diversity.

Jazz Band Techniques 2 s.h.
Prerequisite: music education major or consent of instructor.

Jazz Band 2 s.h.
Prerequisite: audition.

Small Jazz Ensembles 1 s.h.
Repeatable. Prerequisite: audition.

Jazz Composition and Arranging 2 s.h.

Advanced Jazz Improvisation 2 s.h.
Repeatable. Prerequisites: 025:102 and audition.

Transcription 2 s.h.
Transcriptions of improvisations, small ensemble arrangements, large ensemble compositions; computer/midi realization. Repeatable. Prerequisite: 025:118 or consent of instructor.

Music Education

Class Strings 1 s.h.
Fundamental skills in stringed instruments. Prerequisite: teacher education student in music.

Instrumental Techniques 1-3 s.h.
Fundamental skills in wind, percussion instruments. Same as 07S:143.

Instrumental Conducting 2 s.h.
Advanced skills; score analysis, rehearsal techniques, literature selection. Prerequisite: 025:107. Same as 07S:145.

Choral Methods 3 s.h.
Effective choral music programs for all ages. Same as 07S:147.

Choral Conducting and Literature 3 s.h.
Prerequisite: 025:107. Same as 07S:148.

String Methods and Materials 2-4 s.h.
Same as 07S:150.

Arranging for Band 2 s.h.
Scoring and arranging techniques for concert, marching bands. Offered spring semesters.

Marching Band Techniques 1 s.h.
Administration, charting. Offered fall semesters.

Seminar in Advanced Band Literature and Band History arr.
Band literature; history.

Music Education Workshop 1 s.h.
For inservice music teachers; topics vary. Same as 07S:241.

Music History

Note: Courses 025:303 and 025:309, 025:313 and 025:314, 025:323 and 025:324, and 025:331 deal with periods and special topics in music history. They are offered about every two years. All of them have as prerequisites 025:301 and 025:302, or the equivalents, or consent of instructor.

This listing includes several courses appropriate for nonmajors. Other music history courses appropriate for nonmajors are listed under “General.”

Literature, Music, and Aesthetics 3 s.h.
Interdisciplinary connections between literature and music with attention to specific cultural, ideological contexts. Same as 033:145.

History of Music I 3 s.h.
History and style of Medieval, Renaissance, and Baroque music (750-1750). Offered fall semesters.

History of Music II 3 s.h.
History and style of Classical, 19th-, 20th-, and 21st-century music (1750-present). Offered spring semesters.

Advanced History and Literature of Music I 3 s.h.
History and style of Medieval, Renaissance, and Baroque music (750-1750). Offered fall semesters.

Advanced History and Literature of Music II 3 s.h.
History and style of Classical, 19th-, 20th-, and 21st-century music (1750-present). Offered spring semesters.

Medieval Music 3 s.h.
Prerequisite: 025:301 or consent of instructor.

Renaissance Music 3 s.h.
Prerequisite: 025:301 or consent of instructor.
025:305 Seventeenth-Century Music 3 s.h.
Prerequisite: 025:301 or consent of instructor.

025:306 Eighteenth-Century Music 3 s.h.
Prerequisite: 025:302 or consent of instructor.

025:307 Nineteenth-Century Music 3 s.h.
Prerequisite: 025:302 or consent of instructor.

025:308 Music 1900-1945 3 s.h.
Repeatable. Prerequisite: 025:302 or consent of instructor.

025:309 Music 1945-Present 3 s.h.
Prerequisite: 025:302 or consent of instructor.

025:310 American Music 3 s.h.
Prerequisite: 025:302 or consent of instructor.

025:313 Major Composers 3 s.h.
The life and works of one or more important composers (announced before registration). Repeatable.

025:314 Genres of Music 3 s.h.
One or more major genres in the history of music (announced before registration). Repeatable.

025:315 Topics in the History of Opera 3 s.h.
History, style, ideology, and cultural context of operatic works from one or more eras, countries, or composers. Repeatable. Prerequisites: 025:301 and 025:302, or consent of instructor.

025:318 Topics in Ethnomusicology 3 s.h.
Perspectives on analysis and representation of selected musical cultures from around the world. Repeatable. Prerequisite: consent of instructor.

025:319 Foundations of Ethnomusicology 3 s.h.
Ethnomusicology in relation to domains of musical, humanitarian, social science scholarship on expressive culture and artistic processes. Prerequisites: senior standing and consent of instructor. Same as 113:208.

025:320 Introduction to Musicology 1-3 s.h.
Methods, materials of research in historical musicology: field of musicology. Offered fall semesters. Prerequisite: for 1 s.h. credit, 025:321 or equivalent. Corequisite: for 3 s.h. credit, 025:321.

025:321 Introduction to Graduate Study in Music 2 s.h.
Music library; reference materials; bibliography; research problems, methods; writing research papers. Offered fall and spring semesters.

025:323 Medieval Music Notations 3 s.h.
Chant neumes, medieval black notation, musical and textual paleography; transcription of early vocal and instrumental notations; editorial problems. Prerequisite: 025:301 or consent of instructor.

025:324 Renaissance Music Notations 3 s.h.
Renaissance white notation, keyboard tablatures, musical paleography; transcription of early vocal, instrumental notations; editorial problems. Prerequisite: 025:301 or consent of instructor.

025:325 Music Editing 3 s.h.
Principles and methods of music editing; use of primary source materials, establishment of music text; preparation of critical apparatus; project to prepare a critical edition of music for publication. Prerequisite: 025:321.

025:330 Seminar in Musicology 3 s.h.
One or more selected areas of music history. Repeatable.

025:331 Performance Practices of Medieval and Renaissance Music 3 s.h.
Practical approaches to performing vocal and instrumental music before 1600; theoretical, social issues bearing on performance. Prerequisite: 025:301 or consent of instructor.

025:381 Readings in Music History arr.

Music and Technology

Also see 025:250 and 025:251 Composition: Electronic Media I-II listed under “Composition.”

025:161 Fundamentals of Piano Technology 1 s.h.
Offered spring semesters.

025:214 Recording Techniques 3 s.h.
Audio fundamentals, including sound generation, acoustical environments, forms of sound energy, basic audio systems; use of microphones (primary stereo techniques), mixers, recorders, related equipment; introduction to Pro Tools digital recording, editing, and mixing on Macintosh; production of high-quality audio compact discs. Offered fall semesters. Prerequisite: consent of instructor.

025:230 Seminar in Audio Recording 3 s.h.
Functionality with Pro Tools digital audio recording, editing, mixing, and mastering on Macintosh; basic digital theory; configuration of Macintosh G4 computer with Pro Tools hardware and software; music editing projects and production of multitrack recordings. Offered spring semesters. Prerequisites: 025:214 and consent of instructor.

Music Therapy

025:091 Music Foundations in Therapy I 2 s.h.
Skill development on social instruments such as guitar, autoharp, piano, song-leading skills and repertoire development for use in clinical music therapy sessions. Prerequisites: 025:114, music therapy major, and consent of instructor.

025:092 Music Foundations in Therapy II 2 s.h.
Advanced skill development on guitar for use in clinical music therapy sessions; movement, percussion techniques, and related skills used in therapeutic settings. Prerequisites: 025:091, music therapy major, and consent of instructor.

025:094 Music Therapy Practicum 1-2 s.h.
Supervised clinical training with adult clients and children in a variety of health care settings. Prerequisites: 025:114, music therapy major, and consent of instructor.

025:096 Music Techniques in Special Education and Recreation 2-3 s.h.
Music methods and materials appropriate for students with disabilities in special educational settings; overview of individualized educational planning for students with disabilities. Prerequisite: music therapy or music education major or consent of instructor.

025:098 Senior Project in Music Therapy 1 s.h.
Prerequisite: consent of instructor.

025:114 Orientation to Music Therapy 2 s.h.
Theory, practice, typical clients and places of employment in music therapy.

025:138 Music Therapy Techniques: Atypical Children 3 s.h.
Techniques, procedures for use in clinical, educational settings. Prerequisites: 025:114, music therapy major, and consent of instructor.

025:139 Music Therapy Techniques: Adult Clients 3 s.h.
Techniques, procedures for work with adult clients with disabilities. Prerequisites: 025:114, music therapy major, and consent of instructor.

025:140 Internship in Music Therapy 2 s.h.
Clinical training under direction of board certified music therapist. Prerequisites: core music therapy requirements and consent of instructor.

025:297 Piano Literature II 2 s.h.
Beethoven through Schumann or 20th century. Repeatable.

025:361 Special Studies Piano Literature arr.
Individual research in special aspects of piano literature, primarily for D.M.A. students. Repeatable.

Advanced collaborative arts practicum. Prerequisite: 025:186 or consent of instructor.

Recital and Thesis

025:097 Honors in Music 1-4 s.h.
Prerequisite: honors standing.

025:099 Bachelor's Thesis 0-1 s.h.
Prerequisite: consent of instructor.

025:154 Senior Recital 1 s.h.

025:199 Special Studies arr.

025:400 M.A. Thesis arr.

025:402 M.A. Recital arr.

025:503 D.M.A. Recital arr.

Theory

025:001 Fundamentals of Music for Majors 3 s.h.
Music fundamentals through writing, hearing, performance; notation of pitch and rhythm; intervals, scales, triadic harmony; elements of tonality; key signatures, major and minor modes; sight-singing, dictation. Offered fall semesters. Corequisite: 025:071 or successful completion of piano proficiency exam.

025:002 Musicianship and Theory I 4 s.h.
Principles of harmony; emphasis on aural skills, theoretical concepts, notation. Offered fall semesters. Prerequisite: 025:001 or equivalent or successful completion of music theory diagnostic exam. Corequisite: 025:071 or successful completion of piano proficiency exam.

025:003 Musicianship and Theory II 4 s.h.
Continuation of 025:002. Offered spring semesters. Corequisite: 025:072 or successful completion of piano proficiency exam.

025:004 Musicianship and Theory III 4 s.h.
Continuation of 025:002 and 025:003, focus on common-practice repertory. Offered fall semesters.

025:005 Musicianship and Theory IV 4 s.h.
Continuation of 025:002, 025:003, and 025:004; focus on late 19th- and early 20th-century repertories. Offered spring semesters.

025:145 Counterpoint before 1600 3 s.h.
Two- and three-part counterpoint: Renaissance polyphony. Prerequisite: 025:003 for undergraduates, 025:240 for graduate students.

025:147 Counterpoint after 1600 3 s.h.
Two- and three-part writing in the style of J.S. Bach; fugue. Prerequisite: 025:005 for undergraduates, 025:240 for graduate students.

025:153 Keyboard Harmony 1-2 s.h.
Melody harmonization and figured-bass realization at the keyboard. Prerequisites: 025:005 for undergraduates, 025:240 for graduate students; and keyboard proficiency.

025:236 Methods and Techniques of Teaching Basic Theory 3 s.h.

025:237 Music Theory Colloquium arr.
Repeatable.

025:240 Analytical Techniques 3 s.h.
Theories, strategies of analysis applied to classic/romantic and post-tonal music.

025:241 History of Music Theory I 3 s.h.
Prerequisite: 025:240.

025:242 History of Music Theory II 3 s.h.
Prerequisites: 025:240 and 025:241.

025:247 Analysis of Music Literature 1890-Present 3 s.h.
Repeatable. Prerequisite: consent of instructor for undergraduates, 025:240 for graduate students.

025:249 Analysis of Tonal Music 3 s.h.
Analysis of tonal repertories from the 17th through 20th centuries. Repeatable. Prerequisite: consent of instructor for undergraduates, 025:240 for graduate students.

025:250 Analysis of Music Literature: Special Topics 3 s.h.
Repeatable. Prerequisite: consent of instructor for undergraduates, 025:240 for graduate students.

025:311 Theory and Analysis of Atonal Music 3 s.h.
Reading, application of current analytical approaches (e.g., Lewin, Morris, Mead, Cohn). Prerequisite: 025:247 or consent of instructor.

025:312 Schenkerian Theory and Analysis 3 s.h.
Application of Heinrich Schenker's theories to music 1700-1900. Prerequisite: 025:249 or consent of instructor.

025:380 Readings in Music Theory arr.

Voice and Opera

025:115 Diction for Singers I 2 s.h.
Ecclesiastical Latin, Spanish, Italian; basics of international phonetic alphabet and correct pronunciation for singing; no previous background required.

025:116 Diction for Singers II 2 s.h.
German pronunciation for singing. Prerequisite: 025:115.

025:159 Diction for Singers III 2 s.h.
French pronunciation for singing; no previous background required. Prerequisites: 025:115 and 025:116.

025:160 History of Art Song 2 s.h.
Historical survey of development of major Western art song styles. Offered fall semesters of odd years.

025:165 Opera Workshop 2 s.h.
Opera performing techniques, including acting, aria interpretation, scene work. Prerequisite: vocal major or audition.

025:169 Singing for Actors 2 s.h.
Fundamentals of singing technique; development of audition repertoire. Prerequisite: consent of instructor. Recommended: concurrent registration in 025:059. Same as 049:106.

025:170 Opera Theater: Chorus 1 s.h.
Prerequisite: audition.

Theatre Arts

Chair: Alan MacVey  
Professors: Eric Forsythe, Alan MacVey  
Professors emeriti: Cosmo A. Catalano, David Schaal, David Thayer  
Assistant professor: William Moser  
Lecturers: James Albert, Meredith Alexander (Theatre Arts/Literature, Science, and the Arts), James P. Birder, Ralph Hall, Judy Leigh-Johnson, Carol MacVey  
Undergraduate degree: B.A. in Theatre Arts  
Undergraduate nondegree program: Minor in Theatre Arts  
Graduate degree: M.F.A. in Theatre Arts  
Web site: http://www.uiowa.edu/~theatre

Undergraduate Program

The undergraduate major in theatre arts is based on the belief that the best way to develop future artists is to expose them to rigorous professional practice within the framework of a liberal arts and sciences education. Iowa theatre arts students take workshop courses in acting, directing, design, technical theatre, stage management, and playwriting and complement them with classes in dramatic literature, history, and criticism. Students also are actively encouraged to explore a range of courses throughout the University. Two dozen productions each year provide additional opportunities to learn the theatre craft and to develop a personal artistic vision.

The Department of Theatre Arts also participates in offering the major in performing arts entrepreneurship, offered through the Division of Performing Arts in cooperation with the John Pappajohn Entrepreneurial Center of the Tippie College of Business. For more information, see Performing Arts Entrepreneurship in the Catalog.

The department also is interested in educating students who plan to enter other fields in which understanding of the arts and experience with theatre skills are useful. See “Opportunities for Nonmajors” in this section of the Catalog.

Bachelor of Arts

The following courses compose the basic experience for all undergraduate theatre arts majors. Registration in some courses required for the major requires special permission. Contact the Department of Theatre Arts for details.

MINIMUM REQUIREMENTS

Students must maintain a p.p.a. of at least 2.00 for all courses taken in the major. The following course work is required (total of 32 s.h.).

Many of these courses have prerequisites, which students must complete before they register in these.

One of these:
049:130 Directing I 3 s.h.
049:172 Senior Seminar 3 s.h.
049:194 Dramaturgy 3 s.h.
An upper-level playwriting course (numbered 049:063 or above) 3 s.h.

Students should complete 049:060 Playscript Analysis as soon as possible; it is prerequisite to several 100-level courses. Courses 049:025, 049:043, 049:060, and 049:112 or 049:113 normally are completed within the first three semesters of study in the major. Theatre Crafts (049:044) is prerequisite to all production courses; 049:045 Production: Run Crew is prerequisite to 049:046 Production: Crew Chief and 049:047 Production: Construction.

ELECTIVES

The College of Liberal Arts and Sciences maximum hours rule permits students earning a B.A. or B.S. to apply no more than 50 s.h. from one department to the minimum 120 s.h. required for graduation. Students who earn more than 50 s.h. from one department may use the additional semester hours to satisfy major requirements (if the department accepts them), and the grades they earn become part of their grade-point average. The additional semester hours are included on student’s transcript, but they do not count toward the minimum 120 s.h. required for graduation.

Majors may count up to 18 s.h. earned in theatre arts elective courses (prefix 049) toward the degree. Majors are encouraged to choose electives in the arts, humanities, and social sciences.

AUDITIONS

All productions are open to anyone who wishes to audition. Each play is cast on the basis of who is best suited to the available roles.

Theatre arts majors are encouraged to audition in general auditions at the beginning of the fall semester. They normally present a three-minute audition consisting of two contrasting pieces. From this audition, call-back lists are posted for major productions offered during the first semester. Additional general auditions normally are scheduled in early November and in February.

Materials and information about the general auditions are available from the theatre arts office in August. Notices of auditions for all subsequent productions are posted on the department's call board.

Transfer Students

Students who transfer to The University of Iowa from other accredited two- or four-year institutions must demonstrate that they have successfully completed course work equivalent to the basic requirements of the theatre arts department and the University before they may undertake advanced-level electives. Consult the director of undergraduate studies for more information.

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan.

Before the third semester begins: at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: three courses in the major (chosen from 049:025, 049:043, 049:060, 049:112, and 049:113) and at least one-half of the semester hours required for graduation

Before the seventh semester begins: three more courses in the major, two semesters of production credit, and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: two more courses in the major and another semester of production credit

During the eighth semester: enrollment in remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Honors

Students who wish to pursue honors studies in the Department of Theatre Arts must be members of the University Honors Program, which requires students to maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University Honors Program for more information). Senior theatre arts majors who are members of the University Honors Program, have earned a 3.33 g.p.a. in the major, and have approval from the theatre arts faculty may undertake an honors project. Projects may be analytical or creative, or an appropriate combination of the two. Projects ordinarily require an oral presentation or performance for designated faculty members as well as a research
and writing component, which is due upon the project's completion.

Students who wish to complete an honors project meet with the departmental honors adviser, who helps them find an appropriate adviser, prepare and gain acceptance for a written proposal, present the work, and evaluate the outcome.

Theatre arts majors who are members of the University Honors Program may take honors courses in theatre arts. Courses in the major can be designated as honors courses with permission of the faculty member who teaches the course, the department, and the University Honors Program.

Minor

A minor in theatre arts requires 15 s.h. of course work in theatre arts with a g.p.a. of at least 2.00. At least 12 of the 15 s.h. must be taken at The University of Iowa in advanced courses. Advanced courses accepted by the department include 049:021, 049:025, 049:043, 049:044, 049:060, 049:062, 049:063, and any course numbered 049:100 and above.

Opportunities for Nonmajors

Students in other majors who have an interest in the theatre arts may take courses in the department. The following courses are open to nonmajors.

- 049:001 Art of the Theatre 3 s.h.
- 049:002 Theatre and Society: Ancients and Moderns 4 s.h.
- 049:003 Theatre and Society: Romantics and Rebels 4 s.h.
- 049:020 Basic Acting 3 s.h.
- 049:021 Basic Acting II 3 s.h.
- 049:042 Clothing as Nonverbal Communication 3 s.h.
- 049:062 Playwriting I 3 s.h.
- 049:072 Shakespeare 3 s.h.
- 049:101 Drama in the Classroom 3 s.h.
- 049:102 Acting for Singers 2 s.h.
- 049:103 Voice/Speech/Text—Speaking in Public 3 s.h.
- 049:105 Movement for Performers 2-3 s.h.
- 049:106 Singing for Actors 2 s.h.
- 049:107 Drama Therapy 3 s.h.
- 049:109 Introduction to Arts Management 3 s.h.
- 049:110 Theatre for Social Outreach 3 s.h.
- 049:190 African American Theatre I 3 s.h.
- 049:191 African American Theatre II 3 s.h.
- 049:192 Topics: Culturally Diverse Theatre 3 s.h.

Nonmajors with backgrounds in the fine arts may take the following with consent of instructor.

- 049:134 Scene Design I 3 s.h.
- 049:135 Costume Design I 3 s.h.
- 049:136 Lighting Design I 3 s.h.

Other courses may be open to nonmajors with consent of the instructor.

Graduate Program

Master of Fine Arts

The M.F.A. programs are dedicated to creative development of theatre artists. Graduates have a solid background in major performance theories, dramatic literature, and practices of the past and present as well as in the craft of their chosen specialties.

Special attention is given to understanding the role and importance of live theatre in society. Interactions among the various theatre disciplines are emphasized, both in classes and through the department's extensive production program. Particular emphasis is placed on the development of new works for the theatre.

Students who demonstrate exceptional ability in acting, directing, dramaturgy, playwriting, design, or stage management may apply for admission to the program of study and production leading to the M.F.A. Admission is based on interview, audition, and/or a portfolio of relevant work, the undergraduate record or other proof of artistic accomplishment, and letters of recommendation.

Submission of playscripts is the most important element in gaining admission to the Playwrights Workshop.

Degree Requirements

Students normally must complete six semesters in residence (internships may be substituted), and the requisite number of graduate semester hours in the individual program. They also must make normal progress toward completion of the degree requirements to remain in the program—that is, they must maintain a g.p.a. of at least 3.00 overall and in all course work within the primary area of concentration, and they must build a record of substantial creative work of high quality.

Students who fail to make normal progress are placed on academic probation and given one additional semester to demonstrate their qualifications for earning the degree.
Facilities

The University of Iowa has one of the finest educational theatre complexes in the country. The Theatre Building offers four theatres and up-to-date facilities for classroom, laboratory, shop, and performance work.

The E.C. Mable Theatre, a continental-style, 467-seat proscenium playhouse, is one of the finest theatres of its type in the United States. The David Thayer Theatre is a “black box” production space; its flexible seating units accommodate from 140 to 225 people and allow modification of space and audience relationships. Theatre B, which seats 144, is an open-stage theatre dedicated primarily to the production of new and experimental works. The flexible studio theatre seats 50.

In addition to classrooms for acting and directing, several spaces are designed for teaching particular aspects of dramatic studies. The Cosmo Catalano Acting Studio is for study of movement and motion by acting students. The Arnie Gillette Design Studio serves as classroom and studio workshop for design students.

To support its production schedule and to provide students with an appropriate range of experience, the department maintains shops for building, painting, maintaining, and storing scenery, costumes, and properties. Using these shops, students learn to work in metal, plastics, canvas, and wood.

Productions

The Department of Theatre Arts presents around 25 public productions each year. These include a subscription series of five plays, a festival of five new works by students, three productions by Iowa Summer Repertory Theatre (a professional company that also employs students), and other productions, many of them new plays.

Special attention is given to the process of developing new works and to the collaborative process that involves writers, directors, designers, dramaturge, stage managers, and actors. Graduates, undergraduates, faculty, and visiting guest artists work together on large and small projects throughout the year and in a special summer repertory season.

Courses

Primarily for Undergraduates

049:001 Art of the Theatre 3 s.h.
Fundamentals of acting, playwriting, directing. GE: fine arts or humanities.

049:002 Theatre and Society: Ancients and Moderns 4 s.h.
Representative plays as performed in social contexts of ancient Egypt; classical Greece, Rome, India, and Japan; and medieval and early modern Europe. GE: fine arts or historical perspectives.

049:003 Theatre and Society: Romantics and Rebels 4 s.h.
Representative plays as performed in social contexts of revolutionary and modern Europe and postwar United States. GE: fine arts or humanities.

049:020 Basic Acting 3 s.h.
Concentration, relaxation, imagination, observation, communication, sensory awareness; development of theatrical creativity through objectives, obstacles, action, conflict, spontaneity; development of a scene from script. GE: fine arts or humanities. Prerequisite: closed to theatre arts majors.

049:021 Basic Acting II 3 s.h.
Continuation of 049:020; emphasis on development of scenes. GE: fine arts or humanities.

049:029 First-Year Seminar 1-2 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Prerequisite: first- or second-semester standing.

049:042 Clothing as Nonverbal Communication 3 s.h.
How clothing communicates culture, gender, self-concept, age, occupation, values, status, sexuality; clothing for international business, children, the elderly; fashion theory. Prerequisite: g.p.a. of at least 2.50. Same as 036:020.

049:043 Elements of Design 3 s.h.
Development of visual literacy; manipulation of line, shape, color, value, texture, form; development of designs for theatre through techniques explored in class.

049:044 Theatre Crafts 3 s.h.
Backstage operations; wardrobe, scenery, properties, lighting, sound. Prerequisite: theatre arts major or consent of instructor.

049:045 Production: Run Crew 1-2 s.h.
Experience as run crew member in scenery, props, or costumery; or light board, sound board, or follow-spot operator; for mainstage production. Prerequisite: 049:044 or 137:050. Same as 137:051.

049:046 Production: Crew Chief 2 s.h.
Experience as master electrician, stage manager, assistant stage manager, wardrobe master, production carpenter, or properties assistant for single production. Prerequisites: 049:044 and 049:045.

049:047 Production: Construction 1-2 s.h.
Production work in scenery, costume, or electric shop. Prerequisites: 049:044, 049:045, and consent of instructor.

049:060 Playscript Analysis 3 s.h.
Basic skills in critical reading and close analysis of dramatic texts, with focus on dramatic structure, challenges of putting texts into production.

049:062 Playwriting I 3 s.h.
Elements of playwriting; emphasis on analysis and discussion of original student writing. GE: fine arts or humanities.
049:063 Playwriting II 3 s.h.
Composition of 049:062; original student writing, one-act play form. Prerequisite: 049:062.

049:072 Shakespeare 3 s.h.
Same as 008:147.

For Undergraduate and Graduate Students

Acting and Directing

049:025 Acting I 3 s.h.
Development of creativity, imagination, and openness through exercises: 049:025, body, and voice in theatrical play and scene work. Prerequisite: consent of instructor.

049:101 Drama in the Classroom 3 s.h.
Techniques and strategies for integrating drama into curriculum or educational setting; theatre games, drama dramas, improvisation scenarios; accessible classrooms for students with disabilities. Same as 07E:180.

049:102 Acting for Singers 2 s.h.
Same as 025:175.

049:103 Voice/Speech/Text—Speaking in Public 3 s.h.
How to be an effective and confident communicator; exercises designed to develop and improve vocal sound, vocal strength, clarity of speech, appropriate interpretation of text.

049:105 Movement for Performers 2-3 s.h.
Same as 025:167, 137:160.

049:106 Singing for Actors 2 s.h.
Skill development for healthy, effective singing in the musical theatre style; techniques of vocal production through breath management, resonance, articulation, flexibility; song interpretation and repertoire. Same as 025:169.

049:107 Drama Therapy 3 s.h.
Basic principles and practices of drama therapy; exercises, theory, and technique; how to use dramatic processes to encourage psychological growth and change.

049:108 Dance Kinesiology 3 s.h.
Movement analysis. Same as 137:147.

049:109 Introduction to Arts Management 3 s.h.
Historic and contemporary theatre management; theatre structures and operations; emphasis on not-for-profit organizations, unions, regional theatre.

049:110 Theatre for Social Outreach arr.
Use of improvisation, storytelling, readers’ theatre to explore complex social issues, participation in Darwin Turner Action Theatre; experience creating works that examine social issues, especially those related to cultural diversity; performances in Iowa schools and communities. Prerequisite: consent of instructor.

049:120 Acting II 3 s.h.
Extension of work begun in 049:025; scene study, with focus on contemporary realism and development of collaborative dynamic. Prerequisites: 049:025, 049:026.

049:121 Advanced Scene Study 3 s.h.
Development of characterization and creative process through performance of complex, challenging scenes. Prerequisites: 049:120, 049:125 or 049:127, audition, and interview.

049:122 Acting with Verse 3 s.h.
Approaches to poetic material; emphasis on Shakespeare; contemporary scenes written in poetic or abstract styles. Prerequisites: 049:120, 049:125, and consent of instructor.

049:123 Alternative Approaches to Acting 3 s.h.
Methods of acting expression that differ from standard realistic/cognitive approach; acting on impulse, internal/external “mask,” story theatre, working within and against type, use of psycho-physical techniques. Prerequisites: 049:120, 049:127, and consent of instructor.

049:124 Acting: Special Topics 3 s.h.
Specialized study in a specific aspect or theory of acting. Prerequisite: consent of instructor.

049:125 Voice for the Actor 1-3 s.h.
Progressive development of voice and speech for theatre; physical awareness, relaxation, breathing, freeing the sound channel, resonance, articulation, application of voice work through prose, poetry, text. Prerequisite: 049:025.

049:126 Voice, Text, and the Actor 3 s.h.
Vocal study of prose/poetry/dramatic text to achieve connection to language—emotion, images, and sensuality connected to a fully released voice; emphasis on Shakespearean verse. Prerequisite: 049:125.

049:127 Theatre Movement 3 s.h.
The body as a tool for dramatic expression; basic principles and practices of stage movement; approaches to physical technique, mime/movement studies, ensemble performance projects. Prerequisite: theatre arts major.

049:128 Movement Styles 3 s.h.
Intensive study of a selected movement style, such as mask, clowning, mizudrama, mime, commedia dell’arte, stage combat; presentation of student projects. Prerequisite: 049:127 or consent of instructor.

049:129 Stage Combat 3 s.h.
Principles, safety, techniques of nonviolent stage combat for actor, director, choreographer.

049:130 Directing I 3 s.h.
Basic elements of stage direction; exercises in composition, emphasis, movement, rhythm, directorial analysis; director’s role in production process; short scenes, projects, papers. Prerequisites: 049:025, 049:043, 049:060, and consent of instructor.

049:132 Stage Management 3 s.h.
Duties and procedures of stage management; focus on development of production from preparatory work through performance; examine role of stage manager in collaboration. Prerequisite: 049:044 or consent of instructor.

049:200 Stage Management: Special Topics 3 s.h.
Topics in stage management, arts production, and their professional practice. Repeatable. Prerequisites: 049:133 and consent of instructor.

049:201 Voice for Performers 2 s.h.
Same as 003:204, 025:216.

049:220 Advanced Acting 3 s.h.
Preprofessional training; may include psycho-physical training in impulse, openness and the “mask,” individual and group dynamics, improvisation, repetition, characterization and scenework, Shakespeare and style, on-camera, development of professional work habits and skills, audition and interview. Repeatable. Prerequisite: consent of instructor.

049:225 Vocal Technique 3 s.h.
Skills training, voice and speech for the actor, phonetics, dialects, sound exploration, contemporary and classical text analysis. Repeatable. Prerequisite: consent of instructor.

049:227 Movement Technique 3 s.h.
Fundamental principles and practices required for physical acting technique; basic stage movement, stage combat, mime technique, LeCocq-based improvisation; new works project. Repeatable. Prerequisite: graduate acting major.
Design

**049:133 Theatre Design I** 3 s.h.
The process of theatre design; how to research, conceptualize, and visualize ideas; use of a script and working in scenery, costumes. Prerequisites: 049:043 and consent of instructor.

**049:134 Scene Design I** 3 s.h.
The development of theatre scenery; how to research, conceptualize, and express ideas in sketches, models, simple drafting. Prerequisite: 049:043. Same as 01P:134.

**049:135 Costume Design I** 3 s.h.
The development of theatre costumes; how to research, conceptualize, and express ideas through rendering and swatching; historical orientation. Prerequisite: 049:043.

**049:136 Lighting Design I** 3 s.h.
How to research, conceptualize, and express ideas through light plots, other design paperwork, and theatre lighting design projects. Prerequisite: 049:043.

**049:137 Scene Design II** 3 s.h.
Design and execution of increasingly complex projects in a variety of formats, including refined perspective sketching, color models, property drawing, more detailed drafting. Prerequisites: 049:060, 049:134, and consent of instructor.

**049:138 Costume Design II** 3 s.h.
Research, conceptual and character analysis skills, color, material, and volume as expressions of different styles. Prerequisites: 049:060, 049:134, and consent of instructor.

**049:139 Lighting Design II** 3 s.h.
Production styles and venues; skills developed through increasingly complex light plots, more precise paperwork. Prerequisites: 049:060, 049:134, and consent of instructor.

**049:140 Sound Design for the Theatre** 3 s.h.
Methods of sound recording, editing, reinforcement; how to conceptualize and express ideas for theatre production. Prerequisites: 049:060 and consent of instructor.

**049:141 Period Styles for Theatre Designers** 3 s.h.
Aesthetics of selected periods as they apply to theatrical presentation; principles of architecture, furniture, fashion.

**049:142 Textile Science** 3 s.h.
Textile properties, fiber science, yarn and fabric construction, textile testing and standards, dying, finishing. Same as 097:107.

**049:143 Sound Design II** 3 s.h.
Sound designs for theatre using digital and analog equipment, concept development, design execution; focus on computer-aided design skills, design presentation, advanced editing techniques. Prerequisite: 049:140.

**049:144 Drafting for Designers I** 3 s.h.
Tools and techniques of drafting for theatre; development of plans, sections, elevations, detail drawings for scenery, manual and analytical skills. Prerequisite: consent of instructor.

**049:145 Drafting for Designers II** 3 s.h.
Computer drafting with AutoCAD, principles of theatre drafting—basic functions and commands, one-word editing skills. Prerequisite: 049:144.

**049:164 Drawing and Rendering for the Theatre** 3 s.h.
Development of artistic skills and documentation techniques through studio work in drawing, painting, model-craft projects for theatre. Prerequisite: consent of instructor. Pre- or corequisite: 049:043 or admission to M.F.A. program.

**049:147 Technical Production I** 3 s.h.
Scene construction techniques, including stage carpentry, softgoods, theatrical rigging, drafting, management procedures. Prerequisite: 049:044 or consent of instructor.

**049:148 Technical Production: Special Topics** 3 s.h.
Skill development and construction techniques, including work in plastics, metals, mechanics, electricity. Prerequisite: 049:044 or consent of instructor.

**049:151 Scenic Art for Designers** 3 s.h.
Techniques in scenic art for the theatre; classical trompe l’oeil scene painting, sculpting with nontraditional materials, finishing. Prerequisite: consent of instructor.

**049:152 Costume Crafts I** 3 s.h.
Stage makeup design and application, papier mâché and plaster gauze mask-making techniques.

**049:153 Costume Crafts II** 3 s.h.
Pattern drafting, draping, basic costume construction techniques.

**049:157 Concepts in Drawing** 3 s.h.
Same as 03F:105.

**049:158 Environmental Design I** 3 s.h.
Same as 04F:104.

**049:237 Complex Design II** 3 s.h.
Complex assignments in theatre, dance, opera; documentation skills, scenery design preparation. Prerequisite: 049:137.

**049:238 Costume Design II** 3 s.h.
Advanced projects in costume design; psychological effect of design elements; preparation of costume designs for production. Prerequisite: 049:138.

**049:239 Lighting Design III** 3 s.h.
Advanced projects in venues such as dance, opera, industrials; preparation of lighting designs for production. Prerequisite: 049:139.

**049:240 Scene Design IV** 3 s.h.
Advanced projects; production problems and techniques; development of clarity and speed in conceptualizing and documenting designs. Prerequisite: consent of instructor.

**049:241 Costume Design IV** 3 s.h.
Analytical and studio skills for advanced projects in widening venues, including music, dance, opera. Prerequisite: consent of instructor.

**049:242 Lighting Design IV** 3 s.h.
Advanced projects in a variety of venues; development of clarity in concepts and design documentation. Prerequisite: consent of instructor.

**049:243 Scene Design V** 3 s.h.
Portfolio development; collaborative. Prerequisite: consent of instructor.

**049:244 Costume Design V** 3 s.h.
Portfolio development; collaborative. Prerequisite: consent of instructor.

**049:245 Lighting Design V** 3 s.h.
Portfolio development; collaborative. Prerequisite: consent of instructor.

Workshops, Performances, Special Studies

049:172 Senior Seminar 3 s.h.
Contemporary theatre as professional artistic expression and process. Prerequisites: senior standing and theatre arts major.

049:175 Nonprofit Organizational Effectiveness I 3 s.h.

049:176 Nonprofit Organizational Effectiveness II 3 s.h.

049:177 London Performance Study 3 s.h.
Same as 008:128.

049:196 Projects in Theatre arr.
Prerequisite: consent of instructor.

049:197 Honors Theatre Arts arr.
Development and production of a new work for film or television by writers, directors, actors.

049:199 Independent Study arr.

049:234 Internship in Stage Management 1-6 s.h.
Experience as stage manager or assistant stage manager with a professional theatre, dance, or opera company. Repeatable. Prerequisites: stage management M.F.A. enrollment and consent of instructor.

049:298 M.F.A. Thesis 0-3 s.h.
Work related to M.F.A. thesis projects in theatre arts. Repeatable. Prerequisite: consent of instructor.
**Philosophy**

Chair: David Stern  
Professors: James Duerlinger, Richard Fumerton, Gregory Landini, David Stern  
Professors emeriti: Laird Addis, Panayot Butchvarov, Phillip Cummins  
Associate professors: Evan Fales, Diane Jeske, Thomas Williams  
Assistant professors: Sarah Buss, David Cunning, James John  
Undergraduate degree: B.A. in Philosophy  
Undergraduate nondegree program: Minor in Philosophy  
Graduate degrees: M.A., Ph.D. in Philosophy  
Web site: [http://www.uiowa.edu/~phil](http://www.uiowa.edu/~phil)

**Undergraduate Programs**

Undergraduate courses in philosophy are designed to impart knowledge of fundamental issues and main developments in philosophy while strengthening logical and analytic skills. A major in philosophy develops abilities useful for graduate or professional work in many fields—law, for example—and for any situation requiring clear, systematic thinking. A graduate degree is necessary for college teaching in philosophy.

**Bachelor of Arts**

The B.A. requires at least 27 s.h. of credit in courses numbered from 026:061 through 026:198 and must include the following.

- 026:103 Introduction to Symbolic Logic 3 s.h.
- 026:111 Ancient Philosophy 3 s.h.

One of these:

- 026:114 Seventeenth-Century Philosophy 3 s.h.
- 026:115 Modern Philosophy 3 s.h.
- 026:116 Eighteenth-Century Philosophy 3 s.h.

The final 12 s.h. of philosophy courses used to complete the department requirement must be taken at The University of Iowa.

In addition to prerequisites listed for individual courses, considerations such as the order in which historical courses are taken are relevant to the effective structuring of a major’s undergraduate education. A student’s department adviser or the director of undergraduate studies can provide more information.

**Four-Year Graduation Plan**

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan.

**Before the third semester begins:** at least one-quarter of the semester hours required for graduation

**Before the fifth semester begins:** at least one course in the major and at least one-half of the semester hours required for graduation

**Before the seventh semester begins:** at least five courses in the major and at least three-quarters of the semester hours required for graduation

**Before the eighth semester begins:** at least six courses in the major

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

**Honors**

The department administers an honors program for undergraduate students of superior ability. In order to be admitted to the honors program in philosophy, a student must be a member of the University Honors Program, which requires that students maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University Honors Program for more information), and must have taken and passed at least three philosophy courses for the major. In order to graduate with honors in philosophy, a student must complete the regular requirements for an undergraduate major in philosophy with a g.p.a. of at least 3.40 in philosophy courses and must write an acceptable honors thesis on a significant topic in philosophy that interests him or her. Contact the honors adviser for more information.

**Minor**

The minor in philosophy requires students to complete a minimum of 15 s.h. in philosophy courses with a g.p.a. of at least 2.00. Of the 15 s.h., a minimum of 12 s.h. must be taken at
Graduate Programs
The graduate program is designed to train teachers and scholars in philosophy. The main areas in the graduate curriculum are metaphysics, epistemology, history of philosophy, ethics, logic, and philosophy of science.

Master of Arts
The M.A. requires a minimum of 30 s.h. and may be taken without thesis. Requirements include courses in metaphysics and epistemology, history of philosophy, logic and philosophy of science, and ethics. An oral final examination also is required. There is no foreign language requirement. Contact the graduate studies director for more information.

Joint M.A./J.D. Degree
The department offers a joint degree program with the College of Law, in which students pursue an M.A. in philosophy in the College of Liberal Arts and Sciences simultaneously with a J.D. in the College of Law. The College of Law permits dual degree students to count up to 12 s.h. of course work taken in the joint program toward the 90 s.h. required for the J.D., providing that the 12 s.h. are earned after admission to the joint degree program and after matriculation at the College of Law. The Department of Philosophy requires students in the joint program to earn 18 of the 30 s.h. required for the M.A. in graduate courses in philosophy (the usual requirement is 24 s.h.). The department also requires students to earn a minimum of 36 s.h. in philosophy in undergraduate and graduate work combined (the usual requirement is 42 s.h.).

Doctor of Philosophy
The Ph.D. requires a minimum of 72 s.h. of graduate credit. Candidacy for the doctoral program is determined by a formal vote of the entire faculty of the Department of Philosophy, usually after the student has completed three semesters of graduate study in residence. Requirements include courses in metaphysics and epistemology, history of philosophy, logic and philosophy of science, and ethics. A written comprehensive examination covering the student’s area of specialization and a prospectus of the dissertation also are required. A student may take the comprehensive examination only after showing competence in an approved foreign language. Contact the graduate studies director for more information.

Courses
For more detailed descriptions of undergraduate and graduate courses offered during a given semester or summer session, visit the University’s ISIS web site before early registration.

For Undergraduates
The following courses are open only to undergraduates.

026:001 Problems of Moral Reasoning 3 s.h.
Ethical thought, with emphasis on its implications for contemporary moral controversies.

026:033 Philosophy and Human Nature 3 s.h.
Human nature and its relation to society, knowledge, religion, science, and freedom; philosophical and historical examination. GE: historical perspectives.

026:034 Philosophy and the Just Society 3 s.h.
The nature of individuals and governments and the obligations they have to each other; philosophical and historical examination of theories from Plato through the 19th century. GE: historical perspectives.

026:036 Principles of Reasoning 3 s.h.
Elementary logic and its applications. GE: quantitative or formal reasoning.

026:061 Introduction to Philosophy 3 s.h.
Issues and arguments; topics may include rational belief, evidence, the self, causation, and the presuppositions of religion. GE: humanities.

For Undergraduate and Graduate Students
The following courses are closed to first-year students.

026:102 Introduction to Ethics 3 s.h.
Analytical and historical introduction to ethical theories about issues such as the nature of goodness, the nature of right conduct. GE: humanities.

026:103 Introduction to Symbolic Logic 3 s.h.
Main ideas and techniques of formal deduction.

026:104 Introduction to Philosophy of Science 3 s.h.
Fundamental issues in scientific method, inductive reasoning, explanation, the distinctive nature of science.

026:111 Ancient Philosophy 3 s.h.
Main trends and major figures, such as Plato and Aristotle.

026:112 Medieval Philosophy 3 s.h.
Main trends and major figures, such as Augustine and Aquinas.
026:114 Seventeenth-Century Philosophy 3 s.h.
Main trends, central arguments, major positions; Bacon and Descartes to Leibniz and Locke.

026:115 Modern Philosophy 3 s.h.
Main trends and major figures from Descartes to Kant.

026:116 Eighteenth-Century Philosophy 3 s.h.
Main trends, central arguments, major positions; Berkeley to Kant.

026:118 Twentieth-Century Philosophy 3 s.h.
Main trends and major figures.

026:131 Aesthetics 3 s.h.
Major problems in philosophy of the arts.

026:132 Introduction to Political Philosophy 3 s.h.
Major problems.

026:133 Philosophy of History 3 s.h.
Major problems: objectivity, historiographic methods and theory of interpretation, nature of historical explanations, reduction.

026:134 Philosophy of Religion 3 s.h.
Medieval to contemporary treatments of central issues: the nature of faith, the existence and nature of God; religion and ethics; the interpretation of religious texts. Same as 032:146.

026:135 Philosophy of Law 3 s.h.
Introduction; the nature of law, legal authority, legal reasoning; issues in criminal law, such as punishment, responsibility; issues in property law, constitutional law. Prerequisite: 026:034 or 026:102 or 026:132 or consent of instructor.

026:138 Philosophical Problems of Artificial Intelligence 3 s.h.
Major issues and controversies.

026:141 Existentialist Philosophy 3 s.h.
Main ideas of existentialism; emphasis on Kierkegaard, Nietzsche, Heidegger, Sartre.

026:143 Philosophy East and West 3 s.h.
Comparative analysis of ideas in Eastern and Western philosophy.

026:144 Indian Philosophy 3 s.h.
Main ideas; major texts. Same as 032:174.

026:145 Buddhist Philosophy 3 s.h.
Introduction to main ideas. Same as 032:175.

026:147 Philosophical Issues 3 s.h.
A philosophical topic or controversy.

026:148 Readings in Philosophy 3 s.h.
Prerequisite: honors standing.

026:149 Undergraduate Seminar in Philosophy 3 s.h.
Selected problems. Prerequisite: consent of instructor.

026:150 Topics in Indian Philosophy 3 s.h.
A single Indian philosopher or philosophical problem. Prerequisite: consent of instructor.

026:151 Topics in Ancient Philosophy 3 s.h.
A single ancient philosopher or philosophical problem. Prerequisite: consent of instructor.

026:152 Plato 3 s.h.
Main ideas; major texts. Prerequisite: consent of instructor.

026:153 Aristotle 3 s.h.
Main ideas; major texts. Prerequisite: consent of instructor.

026:154 Augustine, Aquinas, and Abelard 3 s.h.
Views of one or more of these three philosophers; other important philosophers and general philosophical trends of the early Middle Ages. Prerequisite: consent of instructor.

026:155 Aquinas, Scotus, and Ockham 3 s.h.
Views of one or more of these three philosophers; other important philosophers and general philosophical trends of the Middle Ages. Prerequisite: consent of instructor.

026:158 Descartes 3 s.h.
Major works, such as the Discourse on Method, as well as lesser known works, such as The World. Prerequisite: consent of instructor.

026:160 Spinoza and Leibniz 3 s.h.
Main ideas, major texts. Prerequisite: consent of instructor.

026:163 Berkeley 3 s.h.
Immaterialism and its development. Prerequisite: consent of instructor.

026:164 Hume 3 s.h.
Hume's metaphysical and epistemological views in their historical context. Prerequisite: consent of instructor.

026:166 Kant 3 s.h.
Main ideas, major texts of Kant's metaphysics and epistemology. Prerequisite: consent of instructor.

026:173 Heidegger 3 s.h.
Heidegger's major writings critically analyzed in relation to metaphysical and epistemological traditions. Prerequisite: consent of instructor.

026:174 Sartre 3 s.h.
Phenomenological and existentialist works. Prerequisite: consent of instructor.

026:176 Frege and Russell 3 s.h.
Main ideas, major texts. Prerequisite: consent of instructor.

026:177 Wittgenstein 3 s.h.
Main ideas, major texts. Prerequisite: consent of instructor.

026:179 Quine 3 s.h.
Main ideas, major texts. Prerequisite: consent of instructor.

026:180 Analytic Ethics 3 s.h.
Topics in contemporary ethics. Prerequisite: consent of instructor.

026:182 History of Ethics I 3 s.h.
Ancient and medieval ethics, with emphasis on Plato, Aristotle, Thomas Aquinas.

026:183 History of Ethics II 3 s.h.
Early modern and 19th-century ethics, emphasizing the British moralists, Kant, the classical utilitarians. Prerequisite: consent of instructor.

026:185 Political Philosophy 3 s.h.
Selected topics. Prerequisite: consent of instructor.

026:186 Metaphysics 3 s.h.
Fundamental topics; major works, both classical and contemporary. Prerequisite: consent of instructor.

026:187 Epistemology 3 s.h.
Contemporary topics. Prerequisite: consent of instructor.

026:188 Philosophy of Mind 3 s.h.
Contemporary topics. Prerequisite: consent of instructor.

026:189 Philosophy of Language 3 s.h.
Contemporary topics. Prerequisite: consent of instructor. Same as 103:163.

026:191 Mathematical Logic 3 s.h.
Presentation of central theorems relating to decidability, completeness, model theory; second order logic. Prerequisite: consent of instructor.
026:192 Modal Logic 3 s.h.
Formal techniques developed and applied to problems in analysis and modal semantics; related philosophical issues. Prerequisite: consent of instructor.

026:194 Philosophy of Science 3 s.h.
Central topics—for example, scientific explanation, confirmation, the meaning of scientific theories; survey of major 20th-century developments in these areas. Prerequisite: consent of instructor.

026:196 Philosophy of the Human Sciences 3 s.h.
Explanation and understanding, theories and reduction, values and ideology, freedom and causality. Prerequisite: consent of instructor.

026:198 Topics in Philosophy 3 s.h.
A single philosopher or philosophical problem. Prerequisite: consent of instructor.

Primarily for Graduate Students

All of the following courses are repeatable.

026:220 Seminar: Philosophy of Language 3 s.h.
026:221 Seminar: Metaphysics 3 s.h.
026:222 Seminar: Epistemology 3 s.h.
026:223 Seminar: Philosophical Analysis 3 s.h.
026:224 Seminar: Philosophy of Science 3 s.h.
026:225 Seminar: Philosophy of Religion 3 s.h.
026:226 Seminar: Ethics 3 s.h.
026:227 Seminar: Ancient Philosophy 3 s.h.
026:228 Seminar: Medieval Philosophy 3 s.h.
026:229 Seminar: Modern Philosophy 3 s.h.
026:245 Research: Value Theory arr.
026:247 Research: Metaphysics and Epistemology arr.
026:249 Research: Logic and Philosophy of Science arr.
026:253 Thesis arr.
Chair: Thomas F. Boggess

Professors: David R. Andersen (Electrical and Computer Engineering/Physics and Astronomy), Thomas F. Boggess (Physics and Astronomy/Electrical and Computer Engineering), Nicola D'Angelo, Louis A. Frank (Carver/James A. Van Allen Professor of Physics), John A. Goree, Donald A. Gurnett (Carver/James A. Van Allen Professor of Physics), Richard Hichwa (Radiology/Physics and Astronomy), Paul D. Kleiber (Harnett B. and Harold S. Brady Professor of Laser Physics), William H. Klink (Physics and Astronomy/Mathematics), Karl E. Lonsgren (Electrical and Computer Engineering/Physics and Astronomy), Mark T. Madsen (Radiology/Physics and Astronomy), Usha Mallik, Robert L. Merlino, Yennick Meurice, Robert L. Mutel, Yasar Onel, Wayne N. Polyzou, Mary H. Reno, John W. Schweitzer, Jack D. Scudder, Frederick N. Skiff, Arthur L. Smirl (Physics and Astronomy/Electrical and Computer Engineering, Lowell Battershell Chair in Laser Engineering), Steven R. Spangler

Associate professors: Michael E. Flatté, Kenneth G. Gayley, Philip Kaaret, Craig A. Kletzing, Charles R. Newsom, Vincent G.J. Rodgers

Assistant professors: Benjamin D.G. Chandran, William Daughton, Cornelia C. Lang, John P. Prineas, Craig Pryor, Markus Wohlgenannt

Undergraduate programs: Minor in Physics and Astronomy

Graduate degrees: M.S. in Physics, Astronomy; Ph.D. in Physics (including specialization in Astronomy)

Web site: http://www.physics.uiowa.edu

The Department of Physics and Astronomy provides comprehensive and rigorous instruction in all basic aspects of its subjects. It also provides research facilities and guidance in selected specialties for advanced individual scholarly work.

Total departmental enrollment is approximately 1,700 each semester of the academic year and 150 during the summer session. All courses and advanced laboratories are taught by faculty members. Faculty members also supervise associated laboratories taught by graduate students.

Beyond the elementary level, typical course enrollment is 15-20; there is ample opportunity for individual work. Special introductory courses are offered for majors in physics and astronomy and for others with special interest in these subjects. There are about 80 undergraduate majors, half of whom are honors students, and 60 graduate students in physics or astronomy.

About 70 percent of graduates with bachelor's degrees pursue advanced study. Others find positions in secondary school teaching and in government and industrial laboratories. Some use their training as the basis for careers in other fields.

Graduates with an M.S. or Ph.D. in physics or astronomy have opportunities for employment in universities, colleges, and research laboratories in government and industry.

Undergraduate Programs

The department offers a Bachelor of Science, Bachelor of Arts, and an undergraduate minor in both physics and in astronomy. It also offers a double major in physics and astronomy and a Bachelor of Science in applied physics.

Bachelor of Science in Physics

The B.S. program provides preparation for careers in industry, employment in research laboratories, and graduate study in physics and related sciences.

The following courses or their equivalents are required for the B.S. with a major in physics. Students satisfy the following mathematics and laboratory requirements as well as the “Other Required Courses.” The department encourages students to do additional work.

Additional science course work in a thematic area as approved by the student's adviser or the course work required for teacher licensure 12 s.h.

Undergraduate majors who plan to pursue graduate study are advised to go as far as they can beyond the minimum requirements, including further work in mathematics. In planning this work, they should keep in mind the College of Liberal Arts and Sciences maximum hours rule: students earning a B.A. or B.S. may apply no more than 50 s.h. from one department to the minimum 120 s.h. required for graduation, whether or not the course work is accepted toward major requirements; students who earn more than 50 s.h. from one department may use the additional semester hours to satisfy major requirements (if the department accepts them), and the grades they earn become part of their grade-point average; they cannot apply the additional semester hours to the minimum 120 s.h. required for graduation.

Students earning both a B.S. in Physics and a B.S. in Astronomy from the Department of Physics and Astronomy may apply more than 50 s.h. from that department to the 120 s.h. needed for graduation, but they must earn a minimum of 56 s.h. in course work taken outside the department.

**Bachelor of Arts in Physics**

The B.A. program is designed for students who wish to gain knowledge of physics but do not plan a research-oriented career in physics. The program is appropriate for those planning careers in medicine, law, science-related administration, business, technical writing, or secondary-school science teaching; see Science Education (College of Liberal Arts and Sciences) in the Catalog.

The B.A. requires fewer courses in physics than the B.S., and provides for a wider choice of electives.

The following courses or their equivalents are required for the B.A. with a major in physics. The department encourages students to do additional work.

- 22M:025-22M:026 Calculus I-II 8 s.h.
- 029:027-029:028 Physics I-II 8 s.h.
- 029:029-029:030 Physics III-IV 8 s.h.
- 029:115 Intermediate Mechanics 3 s.h.
- 029:118 Statistical Physics 3 s.h.
- 029:132 Intermediate Laboratory 3 s.h.

One of these:

- 029:128 Electronics 4 s.h.
- 029:129 Electricity and Magnetism 3 s.h.

**Bachelor of Science in Applied Physics**

The B.S. in applied physics is intended primarily for students interested in a broad program of study in physics combined with a significant concentration of courses in an applied field that has immediate application to industry. The degree provides a foundation for a wide range of employment opportunities in high-technology industries, including research and development, product design and testing, sales, and quality control. It also is designed to include exposure to physics sufficient to allow the student to continue with graduate studies in either physics or astronomy.

The program offers four areas of concentration: optics, solid-state electronics, computer science, and medical physics. A student also may design a customized concentration area in close consultation with his or her adviser, and with departmental approval.
An essential component of each concentration is successful completion of a one-semester industrial internship or practicum experience in a research laboratory (an applied physics thesis is required for the latter option). This requirement may result in the need for a ninth semester to fulfill all requirements.

Because of this, the Four-Year Graduation Plan is not available for the B.S. in applied physics. Well-prepared students will be able to complete the degree in four years. Students should work closely with their advisers on a graduation plan.

Students are encouraged to take additional course work. Advisers can suggest electives that will enrich programs and help students prepare for graduate work.

The following courses are required.

### COMMON REQUIREMENTS

In addition to satisfying mathematics requirements (see listings under Bachelor of Science in Physics), students must successfully complete the following courses or their equivalents.

Two additional advanced biological sciences courses

### Bachelor of Science in Astronomy

A balanced and integrated program of astronomy, mathematics, and physics courses is required for the B.S. in astronomy. This program prepares students for advanced study in astronomy or astrophysics or serves as an interesting choice of major for a liberal arts and sciences education.
The following courses or their equivalents are required for the B.S. with a major in astronomy.

**MATHEMATICS**
- 22M:025-22M:026 Calculus I-II 8 s.h.
- 22M:047 Linear Algebra and Differential Equations for Scientists 3 s.h.
- 22M:048 Vector Calculus for Scientists 3 s.h.

**OTHER REQUIRED COURSES**
- 029:027-029:028 Physics I-II 8 s.h.
- 029:029-029:030 Physics III-IV 8 s.h.
- 029:115 Intermediate Mechanics 3 s.h.
- 029:119-029:120 Introduction to Astrophysics I-II 6 s.h.
- 029:129-029:130 Electricity and Magnetism 6 s.h.
- 029:137 Astronomical Laboratory 2 s.h.
- 029:132 Intermediate Laboratory 3 s.h.

One of these:
- 029:118 Statistical Physics 3 s.h.
- 029:180 Electromagnetic Foundations of Optics 3 s.h.

One of these:
- 029:128 Electronics 4 s.h.
- 029:129 Electricity and Magnetism (requires vector calculus as prerequisite) 3 s.h.

*Classes are offered alternate years. Students are responsible for registering for these classes when they are available.

Undergraduate majors who plan to pursue graduate study are advised to go as far as they can beyond the minimum requirements listed above, by taking one or more of the courses listed below. In planning this work, they should keep in mind the College of Liberal Arts and Sciences maximum hours rule: students earning a B.A. or B.S. may apply no more than 50 s.h. from one department to the minimum 120 s.h. required for graduation, whether or not the course work is accepted toward major requirements; students who earn more than 50 s.h. from one department may use the additional semester hours to satisfy major requirements (if the department accepts them), and the grades they earn become part of their grade-point average; but they cannot apply the additional semester hours to the minimum 120 s.h. required for graduation.

Students earning both a B.S. in Physics and a B.S. in Astronomy from the Department of Physics and Astronomy may apply more than 50 s.h. from that department to the 120 s.h. needed for graduation, but they must earn a minimum of 56 s.h. in course work taken outside the department.

- 029:118 Statistical Physics 3 s.h.
- 029:137 Astronomical Laboratory (additional semester) 2 s.h.
- 029:141 Introduction to Quantum Mechanics II 3 s.h.
- 029:171-029:172 Mathematical Methods of Physics 6 s.h.
- 029:180 Electromagnetic Foundations of Optics 3 s.h.
- 029:186 Radio Astronomy 3 s.h.
- 029:192 Elementary Particles and Nuclear Physics 3 s.h.

**Bachelor of Arts in Astronomy**

The B.A. program is designed for students who wish to gain considerable knowledge of astronomy but who do not plan a research-oriented career in the field. This degree program is appropriate for those planning careers in secondary school science teaching or science-related administration; see Science Education (College of Liberal Arts and Sciences) in the Catalog. It also is appropriate for those preparing for professional school. The B.A. requires fewer courses in physics and mathematics than the B.S., and thus provides for a wider choice of electives.

The following courses or their equivalents are required for the B.A. with a major in astronomy.

- 22M:025-22M:026 Calculus I-II 8 s.h.
- 029:027-029:028 Physics I-II 8 s.h.
- 029:029-029:030 Physics III-IV 8 s.h.
- 029:061-029:062 General Astronomy 8 s.h.
- 029:115 Intermediate Mechanics 3 s.h.
- 029:119-029:120 Introduction to Astrophysics I-II 6 s.h.
- 029:132 Intermediate Laboratory 3 s.h.
- 029:137 Astronomical Laboratory 2 s.h.

One of these:
- 029:118 Statistical Physics 3 s.h.
- 029:180 Electromagnetic Foundations of Optics 3 s.h.

One of these:
- 029:128 Electronics 4 s.h.
Double Major in Physics and Astronomy

Students working toward a double major in physics and astronomy must earn a minimum of 56 s.h. in course work outside physics and astronomy. Students interested in a double major should consult with their adviser.

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

B.A. in Astronomy

Before the third semester begins: math through calculus I and II, physics I and II, and at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: physics III and IV, at least one more course in the major, and at least one-half of the semester hours required for graduation

Before the seventh semester begins: three more courses in the major and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: nine courses in the major

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

B.S. in Astronomy

Before the third semester begins: calculus I and II, physics II, and at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: physics III and IV, linear algebra and differential equations, vector calculus, up to two more courses in the major, and at least one-half of the semester hours required for graduation

Before the seventh semester begins: four more courses in the major and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: three more courses in the major

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Honors

Junior and senior majors who are members of the University Honors Program may take 6-8 s.h. of 029:099 Honors Seminar and conduct an investigation with the guidance of a faculty member as part of their programs for the B.A. or B.S. with honors in physics, applied physics, or astronomy. They must present a written research report (honors thesis) and describe the results of the research at a departmental seminar.

Membership in the University Honors Program requires that students maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University Honors Program for more information).

Minor in Physics

A minor in physics requires 15 s.h. in physics with a g.p.a. of at least 2.00. Those 15 s.h. must include 12 s.h. taken at The University of Iowa. The 12 s.h. must be chosen from 029-029 (prerequisites: 029-027 and 029-028, or 029-081 and 029-082), 029-030, and 100-level physics courses.

There is no minor offered in applied physics.
Minor in Astronomy

A minor in astronomy requires 15 s.h. in astronomy and physics courses with a g.p.a. of at least 2.00; 12 s.h. must be taken at The University of Iowa. The 15 s.h. must include 12 s.h. of upper-level course work with 6 s.h. chosen from the following.

029:119-029:120 Introduction to Astrophysics I-II 6 s.h.
029:137 Astronomical Laboratory 2 s.h.

The remaining course work may be chosen from any 100-level astronomy or physics courses.

Graduate Programs

The department offers a Master of Science and Doctor of Philosophy in physics, and a Master of Science in astronomy. Students who wish to pursue a program in astronomy beyond the M.S. may qualify for a Ph.D. in physics with specialization and a dissertation in astronomy or astrophysics. An M.S. is not prerequisite to a Ph.D.

All graduate students who intend to pursue a Ph.D. in physics must pass the qualifying exam (see “Doctor of Philosophy in Physics”).

Each entering graduate student is assigned a faculty adviser, who assists in preparing a plan of study and in guiding the student’s progress.

The Department of Physics and Astronomy participates in an interdisciplinary doctoral program with the Program in Applied Mathematical Sciences (see Graduate College in the Catalog).

Master of Science in Physics

The M.S. in physics is offered with thesis, or critical essay, or by examination. The M.S. with thesis requires a thesis based on an original experimental or theoretical investigation by the student. The M.S. with critical essay requires a critical essay on the literature of a particular area of physics.

The M.S. may be a terminal degree or a step toward a Ph.D. In either case, the final examination is oral, conducted by a committee of three faculty members.

The M.S. with thesis requires 30 s.h. of graduate work in courses numbered 170 or above, with at least 15 s.h. at the 200 level, a g.p.a. of at least 3.00, and a thesis based on an original experimental or theoretical investigation by the student. No more than 6 of the required 30 s.h. may be earned in 029:220 Individual Critical Study or 029:281 Research: Physics. No more than one-third of the graduate program may be taken in related scientific fields other than physics and mathematics (e.g., chemistry, astronomy, geology, engineering).

The M.S. with critical essay requires 30 s.h. of graduate work in courses numbered 170 or above, with at least 15 s.h. at the 200 level, a g.p.a. of at least 3.00, an independent study of the literature on a chosen topic, and preparation of a critical essay on that topic. No more than 4 of the required 30 s.h. may be earned in 029:220 Individual Critical Study or 029:281 Research: Physics. No more than one-third of the graduate program may be taken in related scientific fields other than physics and mathematics (e.g., chemistry, astronomy, geology, engineering).

The M.S. by examination requires 30 s.h. of graduate work, with 18 s.h. earned in the core graduate courses 029:205, 029:212, 029:213, 029:214, 029:245, and 029:246, and the remaining 12 s.h. in courses numbered 170 or above. Students must maintain a g.p.a. of at least 3.00 in the core graduate courses. No more than 4 s.h. of the required 30 s.h. may be earned in 029:220 Individual Critical Study or 029:281 Research: Physics. Up to one-third of the graduate program may be taken in related scientific fields other than physics and mathematics (e.g., chemistry, astronomy, geology, engineering).

The student’s plan of study should provide for as much advanced work as aptitude and previous preparation permit.

Master of Science in Astronomy

The M.S. in astronomy is offered either with or without thesis. The M.S. may be a terminal degree or a step toward a Ph.D. in physics with specialization and a dissertation in astronomy or astrophysics. In either case the final examination is oral, conducted by a committee of three faculty members.

The M.S. with thesis requires a minimum of 30 s.h. of graduate work in courses numbered 170 or above, with at least 15 s.h. at the 200 level, and a g.p.a. of at least 3.00. The 30 s.h. must include at least 6 s.h. chosen from 029:232, 029:233, 029:234, and 029:235. No more than 6 s.h. of the required 30 s.h. may be earned in 029:220 and 029:282. Seminars do
not count for credit toward the 30 s.h. requirement. Up to one-third of the course work may be in graduate courses in related fields, such as meteorology, geology, and electrical engineering; selection of such courses is encouraged.

The M.S. without thesis requires 30 s.h. of graduate work, with 18 s.h. earned in the core graduate courses 029:205, 029:213, 029:214, 029:232, 029:233, and 029:234. Students must maintain a g.p.a. of at least 3.00 in the core graduate courses. No more than 4 s.h. may be earned in 029:220 and 029:282. Seminars do not count toward the required 30 s.h. Up to one-third of the course work may be in graduate courses in related fields, such as meteorology, geology, and electrical engineering; selection of such courses is encouraged.

Doctor of Philosophy in Physics

Graduate students who wish to pursue a Ph.D. in physics must pass a qualifying examination in all principal areas of physics at the level of first-year graduate work. The examination, which may be repeated only once, is given each year before the beginning of the fall semester. Students must take the exam for the first time no later than the start of their third year of graduate study.

All Ph.D. students must take comprehensive examinations; participate in advanced seminars; do original research in experimental physics, theoretical physics, or astrophysics; and prepare and defend a written dissertation based on this work.

The program of study for the Ph.D. with a major in physics includes thorough course work in both classical and quantum physics for all students, whether their specialized research is to be in an experimental or a theoretical area.

Students must take at least 24 s.h. of 200-level courses in the department, excluding 029:220, 029:281, 029:282, and seminars. The following courses are required.

*029:171-029:172 Mathematical Methods of Physics 6 s.h.
029:205 Classical Mechanics 3 s.h.
029:212 Statistical Mechanics I 3 s.h.
029:213-029:214 Classical Electrodynamics I-II 6 s.h.
029:245-029:246 Quantum Mechanics I-II 6 s.h.

*Students who pass a written examination are exempt from the requirement to take 029:171-029:172 Mathematical Methods of Physics.

Advanced mathematics, such as complex variables and tensor analysis, is used freely in these courses. An introduction is given in 029:171-029:172 Mathematical Methods of Physics. The selection of less advanced course work depends on the adequacy of a student’s preparation for graduate work; students’ choice of more advanced and specialized courses depends on the direction in which their interests develop.

After a student has chosen a research specialty, he or she must submit a formal thesis proposal and defend the proposal in an oral comprehensive exam. The appropriate thesis adviser then becomes the candidate’s general adviser and the chair of the comprehensive and final examination committee. The comprehensive exam must be taken before the beginning of the fourth year of graduate study.

Ph.D. candidates are not recommended for the degree until they have written the dissertation in proper form for formal publication and have submitted it for publication, with the approval of the research adviser, to a widely distributed, refereed scientific journal.

Financial Support

Students qualified for graduate study are encouraged to apply for fellowships and assistantships. Contact the Department of Physics and Astronomy chair.

Research, Facilities

The department has an excellent library and a number of well-equipped laboratories and observatories, as well as a student computer cluster for which students can obtain accounts. Faculty, students, and staff access national supercomputers via the Internet. The central machine shop is fully equipped and staffed by skilled instrument makers and machinists, and there are several electronics and machine shops for use by advanced students and research staff.

Experimental research is conducted in astronomy (optical, radio, and X-ray), atomic and molecular physics, condensed matter physics, elementary particle physics, laser physics, medical physics, plasma physics, and space physics. Extensive facilities are available for construction of specialized research equipment and for data processing and analysis.
Experiments on electrical and magnetic properties of metals, alloys, compounds, semiconductors, and high-temperature superconductors are included in the experimental condensed matter program. State-of-the-art semiconductor materials and devices are grown in two molecular beam epitaxy machines. Ultrafast laser techniques are developed and used to probe electron transport, energy relaxation, recombination, and spin dynamics in the novel nanostructures grown in these machines. Experiments also are conducted on laser-induced coherent phenomena and coherent control of charge carriers in semiconductor nanostructures. The experimental condensed matter program is closely coordinated with the condensed matter theory group.

Plasma physics is an active area of experimental and theoretical research. Laboratory experiments studying plasma processes of importance in various space and astrophysical plasmas are performed in a Ω machine, including experiments on waves and instabilities in dusty plasmas. Additional laboratory and microgravity experiments with dusty plasmas include studies of Coulomb crystals, shocks, and complex fluids. Glow discharges for plasma processing applications are studied using laser diagnostics and numerical simulations. Wave propagation and plasma particle dynamics also are studied in collisionless plasmas through laboratory experiments. Laser techniques are developed for measuring plasma flow and following particle orbits. Plasma theory efforts include analytical and numerical investigations of magnetic reconnection and turbulence in space and astrophysical plasmas; collaboration with laboratory and space plasma experimental groups in strongly coupled dusty plasmas, waves, and instabilities; and free electron lasers and hydrodynamic turbulence.

State-of-the-art laser systems are available for high resolution spectroscopic measurement and ultrafast studies of molecular structure, for collisional relaxation and nonlinear optical effects in atomic and molecular systems, and for plasma diagnostics.

Experimental research in elementary particle physics is carried out at Fermi National Accelerator Laboratory, Stanford Linear Accelerator Center, CERN in Switzerland, DESY in Germany, and other international laboratories. The present generation of high-energy experiments has been designed to probe both the strong nuclear force and the weak interactions.

The department is well-equipped for research and instruction in observational astronomy. The primary optical instrument is a fully automated 15-inch telescope at a dark-sky site in Arizona. There also is a fully automated 7-inch refractor on the roof of Van Allen Hall. All instruments are equipped with CCD cameras and a variety of filters, and are used for research projects as well as instructional laboratories at all levels. There are 3-meter and 4.5-meter radio telescopes on the roof of Van Allen Hall, which are used for instruction and student research projects.

Research programs in galactic and extragalactic radioastronomy are carried out using the facilities of the National Radio Astronomy Observatory, including the Very Large Array and the Very Long Baseline Array, one element of which is 10 miles north of campus. Current long-term research activities include studies of the center of the Milky Way galaxy; investigations of extragalactic radio sources; the formation of powerful winds in young, luminous stars; radiowave scattering in the interstellar and interplanetary media; and interacting binary stars. A research program in X-ray astronomy has been established, and there is a laboratory for instrument development. Research topics in X-ray astronomy concentrate on observations of X-ray emission from black holes, using existing spacecraft.

Active theoretical research is carried on in astrophysics; atomic, molecular, and optical physics; condensed matter physics; elementary particle physics; laser physics; mathematical physics; nuclear physics; plasma physics; and space physics. An active mathematical physics seminar fosters the exchange of ideas between mathematics and physics.

The primary emphasis of Iowa’s program in experimental and theoretical space physics is on studies of cosmic and heliospheric physics, magnetospheric physics, and magnetosphere-ionosphere interactions. Facilities are available for designing and constructing spaceflight instruments. Investigators in the department have flown instruments for studying plasmas, energetic charged particles, auroral images, plasma waves, and radio emissions on a wide variety of terrestrial and planetary spacecraft, including Pioneer 10 and 11, Dynamics Explorer, Voyager 1 and 2, Galileo, Polar, Cassini, and Mars Express.
Courses

Prerequisites and corequisites are specified as guides and may be waived by the instructor.

Physics—Primarily for Undergraduates

029:001 Selected Topics in Physics arr.
029:003 From Quarks to Quasars 3-4 s.h.
Conceptual explanation of the latest discoveries in physics—from the smallest objects, such as quarks and atoms, to the largest, such as galaxies, black holes, and quasars, for non-science majors. GE: natural sciences.
029:005 Chemistry and Physics of the Environment 3 s.h.
Chemistry and physics of the ecology of our planet; air, water, and noise pollution; return of pollutants to man; chemistry and physics of the balance of nature; for non-science students. GE: natural sciences.
029:006 Physics of Everyday Experience: How Things Work 3 s.h.
Principles of physics for non-science majors; examples from everyday experience. GE: natural sciences.
029:008 Basic Physics 3-4 s.h.
Quantitative treatment of mechanics, electricity, heat, liquids, gases, and atomic, nuclear, and elementary particle physics. GE: natural sciences. Prerequisite: 22M:005 or equivalent; closed to students who have taken 029:011 or 029:012.
029:009 Directions in Modern Physics 3-4 s.h.
Introduction to recent progress in experimental and theoretical physics; chaotic dynamical systems, onset of turbulence, space plasma, superconducting, symmetries in particle physics, cosmology; emphasis on conceptual issues rather than problem-solving. GE: natural sciences. Prerequisites: 22M:005 or equivalent, and high school algebra and trigonometry.
029:011 College Physics I 4 s.h.
Mechanics, waves, thermodynamics, special relativity. GE: natural sciences. Prerequisite: 22M:005 or equivalent.
029:012 College Physics II 4 s.h.
Continuation of 029:011, which is prerequisite; electricity, magnetism, light, modern physics. GE: natural sciences.
029:027 Physics I 4 s.h.
Newtonian mechanics for point particles and rigid bodies; conservation laws. Offered fall semesters. GE: natural sciences. Prerequisite: physics or astronomy major. Corequisite: 22M:025.
029:028 Physics II 4 s.h.
Continuation of 029:027, which is prerequisite; introduction to fluid mechanics, electricity, magnetism (Maxwell's equations). Offered spring semesters. GE: natural sciences. Prerequisite: physics or astronomy major. Corequisite: 22M:026.
029:029 Physics III 4 s.h.
Continuation of 029:028, which is prerequisite; electromagnetic waves, optics; mechanical and sound waves; thermal physics. Offered fall semesters.
029:030 Physics IV 4 s.h.
Introduction to quantum mechanics and other topics in modern physics, including special relativity, atomic and solid state physics. Offered spring semesters. Prerequisites: 22M:026 and 029:020.
029:039 First-Year Seminar 1-2 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Prerequisite: first- or second-semester standing.
029:044 Physics of Sound 3-4 s.h.
Acoustical foundations of music; production of sound by vibrating objects; properties of sound waves, vocal acoustics, hearing, room acoustics, principles of electroacoustics. GE: natural sciences.
029:081 Introductory Physics I 4 s.h.
029:082 Introductory Physics II 3-4 s.h.
Continuation of 029:081, which is prerequisite; electricity, magnetism, light. GE: natural sciences. Corequisite: 22M:026 or 22M:032.
029:083 Modern Physics 3 s.h.
Wave mechanics, hydrogen atom, atomic and molecular structure, solid state physics, special relativity; primarily for engineering students. Prerequisite: 029:028 or 029:082.
029:084 Introductory Physics II Lab 1 s.h.
Laboratory for 029:082. GE: natural sciences. Prerequisite: 3 s.h. in 029:082 or equivalent.
029:093 Reading in Physics arr.
029:098 Undergraduate Seminar arr.
Selected topics in physics or astronomy.
029:099 Honors Seminar arr.
Supervised original research leading to written report, oral defense. Prerequisite: junior or senior honors standing in physics or astronomy.

Physics—for Undergraduate and Graduate Students

029:103 Reading in Physics arr.
029:105 Special Topics in Physics arr.
029:115 Intermediate Mechanics 3 s.h.
Newtonian mechanics, nonrelativistic reference systems; central forces, celestial mechanics; rigid body motion; Lagrangean, Hamiltonian equations of motion; small oscillations. Prerequisites: 22M:026, and 029:011 or 029:027 or 029:081.
029:118 Statistical Physics 3 s.h.
Integrated introduction to subjects of thermodynamics, statistical mechanics, kinetic theory; emphasis on applications. Prerequisites: 029:030 or 029:083, and 029:115.
029:128 Electronics 4 s.h.
Design and construction of small circuits; use of measurement instruments—oscilloscope, multimeter, function generator, circuits, including transistors, operational amplifiers, digital, analog-to-digital conversion; laboratory course for majors in UI science departments. Prerequisite: 029:012 or 029:028 or 029:082.
029:129 Electricity and Magnetism 3 s.h.
Electrostatics, magnetic fields, introduction to Maxwell's equations. Prerequisites: 22M:028 or 22M:048, and 029:012 or 029:028 or 029:082.
029:130 Electricity and Magnetism 3 s.h.
Continuation of 029:129; magnetism, electromagnetic waves, A.C. circuits, applications of Maxwell's equations to wave guides, antennas, optics, plasma physics, other topics. Prerequisite: 029:129.

029:131 General Laboratory 3 s.h.
Laboratory instruction and development, instrument repair, development of labs, teaching demonstrations, new hardware and software technologies; emphasis on physics, but other applications covered. Offered through Saturday & Evening Classes.

029:132 Intermediate Laboratory 3 s.h.
Electricity; electronics; magnetism; optics; atomic, nuclear, solid state physics; techniques in data analysis, including error analysis. Prerequisites: 029:028 or 029:082, and 029:029 or 029:083. Corequisite: 029:129.

029:133 Advanced Laboratory 3 s.h.
Topics in electricity, electronics, magnetism; atomic, nuclear, plasma, solid state physics; techniques in data analysis, including error analysis.

029:140 Introduction to Quantum Mechanics I 3 s.h.
Superposition principle, Stern-Gerlach experiment, linear operators, measurement theory, time evolution, angular momentum, wave mechanics in one dimension, one-dimensional harmonic oscillator, two-body problems with central forces, the hydrogen atom. Prerequisites: 029:030 or 029:083; 029:115; 22M:027 and 22M:028, or 22M:047 and 22M:048.

029:141 Introduction to Quantum Mechanics II 3 s.h.
Perturbation theory, variational methods, WKB approximations, scattering, Helium atom, periodic table, atomic spectroscopy, transition rates, other selected applications. Prerequisite: 029:140.

029:171 Mathematical Methods of Physics 3 s.h.
Functions of complex variables, integration methods, linear vector spaces, tensors, matrix algebra. Prerequisite: 22M:028, or 22M:047 and 22M:048.

029:172 Mathematical Methods of Physics 3 s.h.
Continuation of 029:171; Hilbert space, special functions, Fourier transform and expansions in orthogonal polynomials, differential equations, Green's functions. Prerequisite: 029:171.

029:180 Electromagnetic Foundations of Optics 3 s.h.
Geometrical and physical optics; interference; diffraction; polarization; microscopic origins of macroscopic optical properties of matter; optical activity, electro-optical, magneto-optical, acousto-optical phenomena; spontaneous Brillouin, Raman, Rayleigh scattering. Prerequisite: 029:130 or equivalent. Same as 055:177.

029:182 Electro-Optics 3 s.h.
Propagation, nonlinear effects in bounded structures; optical birefringence; dielectric waveguides, fibers; electro-optic, acousto-optic modulation, optical detection, noise. Prerequisite: 029:130 or equivalent. Same as 055:179.

029:184 Optical Signal Processing 3 s.h.
Linear optics from perspective of Fourier analysis; impulse response, convolution, transfer functions, coherence, interference, diffraction, image formation, Gaussian beam propagation, holography, sampling theory, optical information and signal processing. Prerequisite: 029:130 or equivalent. Same as 055:178.

029:192 Elementary Particles and Nuclear Physics 3 s.h.
Accelerators, particle detectors, passage of radiation through matter; nuclear structure, nuclear reactions; quark model of hadrons; strong, electromagnetic, weak interactions of elementary particles; gauge theories, intermediate vector bosons; unification of electromagnetic and weak interactions. Prerequisite: 029:140.

029:193 Introductory Solid State Physics 3 s.h.
Phenomena associated with solid state; classification of solids and crystal structures, electronic and vibrational properties in solids, thermal, optical, magnetic, dielectric properties of solids. Prerequisite: 029:140, and 22M:028, or 22M:047 and 22M:048. Same as 055:173.

029:194 Plasma Physics 3 s.h.
Physics of ionized gases, including orbit theory, guiding center motion, adiabatic invariants, ionization balance description of plasmas by fluid variables and distribution functions; linearized wave motions, instabilities; magnetohydrodynamics. Prerequisite: 029:130.

029:195 Plasma Physics 3 s.h.
Continuation of 029:194, which is prerequisite; linear, nonlinear solutions of the Vlasov equation, kinetic theory of plasmas, including Landau damping and velocity space instabilities.

029:196 Computational Physics 3 s.h.
Introduction to contemporary use of computers by physicists; topics such as numerical solutions of ordinary differential equations in classical mechanics, boundary value problems in electricity and magnetism, eigenvalue problems in quantum mechanics, Monte Carlo simulations in statistical mechanics, methods of data analysis. Prerequisites: 029:115, 029:129, and 029:140.

Physics — Primarily for Graduate Students

029:202 Workshops and Special Training in Physics arr.
Workshops and special training opportunities for postbacalaureate students; may include collaborations with other departments, institutions, or externally funded research organizations. Repeatable.

029:205 Classical Mechanics 3 s.h.
Dynamics of mass points; Lagrange multipliers, small oscillations, Hamilton's equations; canonical transformations, Hamilton-Jacobi theory; chaos. Prerequisite: 029:115.

029:211 Mechanics of Continua 3 s.h.
Introduction to contemporary use of computers by physicists; topics such as numerical solutions of ordinary differential equations in classical mechanics, boundary value problems in electricity and magnetism, eigenvalue problems in quantum mechanics, Monte Carlo simulations in statistical mechanics, methods of data analysis. Prerequisites: 029:115, 029:129, and 029:140.

029:220 Individual Critical Study arr.
Essay on topic chosen in consultation with faculty member. Repeatable.

029:222 Nonlinear Optics 3 s.h.
Classical treatment of second- and third-order optical nonlinearities; phase matching, harmonic generation, three- and four-wave mixing, self-focusing, self-phase modulation, stimulated scattering of light, applications. Prerequisite: 029:130 or equivalent. Same as 055:276.
029:224 Laser Principles 3 s.h.
Laser theory, stimulated emission, dispersion theory, broadening mechanisms, rate equations, gain saturation, optical resonators, mode-locking, Q-switching techniques, survey of laser types, modes of operation. Prerequisite: 029:130 or equivalent. Same as 055:274.

029:225 Special Topics in Physics arr.
Repeatable.

029:226 Quantum Electronics 3 s.h.

029:228 Topics in Quantum Electronics 3 s.h.
Quantum optics, optical properties of matter, laser science, photonics. Repeatable. Prerequisite: consent of instructor.

029:229 Semiconductor Physics 3 s.h.
Electronic, optical, and materials properties of semiconductors. Prerequisites: 029:193 and 029:246.

029:240 Medical Physics 4 s.h.
Interactions of radiation with matter; sources of radiation, dosimetry, applications of radiation and radiotoxicity in medicine. Prerequisite: 8 s.h. of physics or consent of instructor. Same as 077:211.

029:245 Quantum Mechanics I 3 s.h.
Nonrelativistic quantum mechanics, Hilbert space methods, perturbation theory, scattering, spin and angular momentum, identical particles, selected applications, introduction to relativistic theory. Prerequisites: 029:140 and 029:141.

029:246 Quantum Mechanics II 3 s.h.
Continuation of 029:245. Prerequisite: 029:245.

029:247 Introduction to Quantum Field Theory 3 s.h.
Quantization of relativistic and nonrelativistic field theories, covariant perturbation theory, theory of renormalization, dimensional regularization, renormalization group theory, introduction to gauge theories and anomalies. Prerequisite: 029:246.

029:248 Quantum Gauge Theories 3 s.h.

Current research. Same as 055:291.

Current research.

029:266 Seminar: Space Physics arr.
Current research.

029:267 Seminar: Nuclear Physics arr.
Current research.

029:268 Seminar: Elementary Particle Physics arr.
Current research.

029:271 Theoretical Solid State Physics I 3 s.h.
Central principles of the quantum theory of solids; lattice dynamics, electronic structure, optical properties, superconductivity, magnetism; emphasis on viewpoint of elementary excitations. Prerequisites: 029:193 and 029:246.

029:273 General Relativity and Cosmology 2-3 s.h.
Einstein's theory of gravitation; applications to astrophysics and cosmology. Repeatable.

029:275 Particle Physics 3 s.h.

029:276 Special Topics in Quantum Mechanics 3 s.h.
Current topics in quantum mechanics, such as string theory, relativistic quantum mechanics, quantum gravity, axiomatic quantum field theory. Repeatable.

029:277 Special Topics in Condensed Matter 3 s.h.
Current topics, such as superconductivity and magnetism. Repeatable. Prerequisite: 029:271.

029:278 Solar-Terrestrial Physics 2-3 s.h.
Atmosphere of sun, radio and particle emissions therefrom; solar wind; origin and nature of geomagnetic field; upper atmosphere of Earth; magnetospheres of Earth and other planets; propagation of energetic particles in interplanetary medium and their access to Earth. Repeatable.

029:281 Research: Physics arr.

029:291 Advanced Atomic and Molecular Physics 3 s.h.
Structure and processes, including scattering theory, radiative transfer, laser physics, nonlinear optics. Repeatable. Prerequisite: 029:246 or consent of instructor.

029:294 Advanced Plasma Physics I 3 s.h.
Microscopic plasma behavior: statistical mechanics of plasmas; Livshitz equation, BBGKY hierarchy; Fokker-Planck equation and relaxation processes; Balbuena-Lenard equation, Vlasov equation and linearized wave motion; shocks, nonlinear plasma motions, and instabilities; fluctuations and radiation processes; topics from recent literature. Repeatable. Prerequisite: consent of instructor.

Astronomy—Primarily for Undergraduates

029:050 Stars, Galaxies, and the Universe 3-4 s.h.
Survey of stars, galaxies, and the universe; life cycles of stars, including black holes and pulsars; diversity of galaxies, including the Milky Way and distant quasars; cosmology—the history, structure, and fate of the universe; current results from recent astronomical observations; night sky observation. GE: natural sciences. Prerequisite: closed to physics and astronomy majors.

029:051 Introductory Astronomy Laboratory 1 s.h.
Laboratory for 029:050. GE: natural sciences. Prerequisite: 3 s.h. in 029:050 or equivalent.

029:052 Exploration of the Solar System 3 s.h.
Survey of the solar system; physical properties of the planets, comets, and asteroids; origin of the solar system; search for extrasolar planetary systems; search for life in the universe; current results of recent planetary space missions; night sky observation. GE: natural sciences. Prerequisite: closed to physics and astronomy majors.

029:061 General Astronomy 4 s.h.
Qualitative and quantitative introduction to the development of astronomy, celestial mechanics, time, electromagnetic radiation, telescopes and astronomical instrumentation, planets, smaller solar system objects; laboratory emphasis on observation with telescopes. GE: natural sciences. Prerequisite: four years of high school math or consent of instructor.

Political Science

Chair: Michael S. Lewis-Beck
Professors emeriti: Joel D. Barkan, Gerhard Loewenberg, Russell M. Ross
Associate professors: Cary R. Covington, Douglas Dion, Timothy M. Hagle, Kelly M. Kadera, Sara Mitchell, David P. Redlawsk
Assistant professors: Frederick J. Boehmke, Christian Jensen, Brian H. Lai, Erika Moreno, Benjamin L. Read, Jae-Hee Spoon

Undergraduate degrees: B.A., B.S. in Political Science
Undergraduate nondegree program: Minor in Political Science
Graduate degrees: M.A., Ph.D. in Political Science
Web site: http://www.polisci.uiowa.edu

Undergraduate Programs

For more detailed descriptions of the undergraduate programs in political science, see Guide to Undergraduate Study in Political Science, available in the departmental office and on the web site.

Bachelor of Arts

Students seeking the B.A. with a major in political science must complete 33 s.h. of course work in political science.

Students must maintain a g.p.a. of at least 2.00 in all political science courses taken at The University of Iowa, and in all political science courses taken at other institutions and at the University combined.

Students must take at least 12 s.h. of the required 33 s.h. in political science at The University of Iowa. Credit from 030:029 First-Year Seminar and 030:191 Government Internship cannot be applied to the major.

The College of Liberal Arts and Sciences maximum hours rule permits students earning a B.A. or B.S. to apply no more than 50 s.h. from one department to the minimum 120 s.h. required for graduation, whether or not the course work is accepted toward major requirements. Students who earn more than 50 s.h. from one department may use the additional semester hours to satisfy major requirements if the department accepts them, and the grades they earn become part of their grade-point average. But they cannot apply the additional semester hours to the minimum 120 s.h. required for graduation.

The following course work is required.

030:001 Introduction to American Politics 3 s.h.
Four of these:
030:020 Introduction to Politics 3 s.h.
030:030 Introduction to Political Thought and Political Action 3 s.h.
030:040 Introduction to the Politics of the Industrial Democracies 3 s.h.
030:041 Introduction to the Politics of Russia and Eurasia 3 s.h.
030:042 Introduction to the Politics of Developing Areas 3 s.h.
030:050 Introduction to Political Behavior 3 s.h.
030:060 Introduction to International Relations 3 s.h.
030:061 Introduction to American Foreign Policy 3 s.h.
030:070 Introduction to Political Communication 3 s.h.

Political science courses numbered 100 or above (at least 12 s.h. must be taken in regularly scheduled classroom work) 18 s.h.

Bachelor of Science

Students seeking the B.S. with a major in political science must complete 33 s.h. of course work. Residence rules and grade-point average requirements for the B.S. are the same as those for the B.A. Credit for 030:029 First-Year Seminar and 030:191 Government Internship cannot be applied to the major.

The College of Liberal Arts and Sciences maximum hours rule permits students earning a B.A. or B.S. to apply no more than 50 s.h. from one department to the minimum 120 s.h. required for graduation, whether or not the course work is accepted toward major requirements. Students who earn more than 50 s.h. from one department may use the additional semester hours to satisfy major requirements if the department accepts them, and the grades they earn become part of their grade-point average. But they cannot apply the additional semester hours to the minimum 120 s.h. required for graduation.
additional semester hours to satisfy major requirements (if the department accepts them), and the grades they earn become part of their grade-point average. But they cannot apply the additional semester hours to the minimum 120 s.h. required for graduation.

The following course work is required.

030:001 Introduction to American Politics 3 s.h.

Four of these:
030:020 Introduction to Politics 3 s.h.
030:030 Introduction to Political Thought and Political Action 3 s.h.
030:040 Introduction to the Politics of the Industrial Democracies 3 s.h.
030:041 Introduction to the Politics of Russia and Eurasia 3 s.h.
030:042 Introduction to the Politics of Developing Areas 3 s.h.
030:050 Introduction to Political Behavior 3 s.h.
030:060 Introduction to International Relations 3 s.h.
030:061 Introduction to American Foreign Policy 3 s.h.
030:070 Introduction to Political Communication 3 s.h.

One of these:
030:185 Honors Research Project (for honors students) 3 s.h.
030:193 Undergraduate Research Tutorial 3 s.h.

All of these:
030:100 Understanding Political Research 3 s.h.

Additional political science courses at the 100 level 12 s.h.

At least 12 s.h. of 100-level courses, including 030:100, must be taken in regularly scheduled classroom work. The 12 s.h. may not include 030:185, 030:186, 030:190, 030:191, 030:193, and 030:194.

One of the sets of three mathematics courses listed under “Approved Math/Statistics Courses” 10-11 s.h.

Recommended but not required:
030:194 Senior Research Project/Paper 3 s.h.

EMPHASES IN POLITICAL SCIENCE

Students may elect to complete one or more emphases while fulfilling the requirements for the B.A. or B.S. If they complete an emphasis and request recognition from the department, the emphasis is indicated on their transcripts at graduation.

Each emphasis consists of four courses. Emphases are available in American institutions, American political practice, international relations, law and politics, political communication, political economy, political processes, political theory, politics of democratization, politics of developing areas, and politics of industrial democracies. For lists of courses approved in each area, contact the Department of Political Science. For more information consult the Guide to Undergraduate Study in Political Science.

TEACHER LICENSURE

Undergraduates planning to emphasize political science in their teacher training should consult the College of Education for requirements.

The courses 030:001 Introduction to American Politics and 030:110 The American Political System fulfill the requirement for Iowa teacher licensure.

FOUR-YEAR GRADUATION PLAN

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan. (Courses in the major
are those required to complete the major; they may be offered by departments other than the major department.)

**Bachelor of Arts**

**Before the third semester begins:** at least one-quarter of the semester hours required for graduation

**Before the fifth semester begins:** two courses in the major and at least one-half of the semester hours required for graduation

**Before the seventh semester begins:** six courses in the major and at least three-quarters of the semester hours required for graduation

**Before the eighth semester begins:** eight courses in the major

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

**Bachelor of Science**

**Before the third semester begins:** at least one-quarter of the semester hours required for graduation

**Before the fifth semester begins:** two courses in the major and at least one-half of the semester hours required for graduation

**Before the seventh semester:** eight courses in the major, including two of the three required mathematics/statistics courses and 030:100, and at least three-quarters of the semester hours required for graduation

**Before the eighth semester begins:** 11 courses in the major, including 030:193

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

**Bachelor’s Degrees with Honors**

In addition to the checkpoints for the B.A. and B.S. degrees, honors candidates must complete 030:180 before the seventh semester begins.

**Honors**

The program leading to a B.A. or B.S. with honors is open to students with a cumulative University of Iowa g.p.a. of at least 3.33 and a g.p.a. of at least 3.33 in political science. To graduate with honors, students must maintain a g.p.a. of at least 3.50 in political science and a cumulative U.I. g.p.a. of at least 3.33 (contact the University Honors Program for more information). Students are encouraged to take 100-level honors seminars as often as possible, although the program requires only 9 s.h. of 100-level honors course work with a grade of B or higher in each course. Students also are encouraged to take honors sections of introductory courses whenever available.

Honors students must complete 030:180 Honors Seminar on the Study of Politics, preferably as sophomores. They also must take at least one additional honors seminar (030:181 Honors Seminar on American Politics, 030:182 Honors Seminar on Political Theory, 030:183 Honors Seminar on Comparative Politics, or 030:184 Honors Seminar on International Politics). This requirement also may be met by taking a 300-level course, with the instructor's consent.

The last 3 s.h. required for graduation with honors in political science may be earned by completing 030:185 Honors Research Project or 030:186 Honors Senior Thesis. For more information, see the Guide to Undergraduate Study in Political Science or contact the Department of Political Science honors adviser.

**National Honor Society**

The department sponsors a chapter of Pi Sigma Alpha. Students who have a cumulative g.p.a. of at least 3.30, have attained junior standing, and have completed 15 s.h. of course work in political science are considered for membership. Contact the Department of Political Science honors adviser for more information.

**Minor**

To earn a minor in political science, students must take 15 s.h. in political science courses; 12 of the 15 s.h. must be at the 100 level, and 12 must be taken at The University of Iowa. Credit by exam is not accepted. Semester hours earned through a University of Iowa Regents program are considered credit in residence.

Credit from 030:029 First-Year Seminar and 030:191 Government Internship cannot be applied to the minor. Students may complete an area emphasis (see “Emphases in Political Science”).

Students must have a g.p.a. of at least 2.00 in all course work in the minor. No course taken pass/nonpass can be counted toward the minor.
Graduate Programs

For students planning academic careers, the department has a program leading to a Doctor of Philosophy in political science. The department usually offers the master's degree only as a preliminary step toward the Ph.D.

Master of Arts Without Thesis

The requirements for the M.A. without thesis include completion of at least 30 s.h. of graduate work with a g.p.a. of at least 3.25 and a review of the student's record by a final examination committee, which may waive the final oral examination. If the evaluation committee convened at the end of the student's first year of courses finds that a student's work provides sufficient evidence of the research and writing skills ordinarily demonstrated in a master's thesis, it may recommend that the student be allowed to proceed with a doctoral program.

When a first-year evaluation committee finds the quality of a student's work inadequate for recommending continuation toward the Ph.D., the committee may recommend that the student be permitted to seek the nonthesis M.A. as a terminal degree.

Doctor of Philosophy

The Ph.D. program in political science is designed to prepare students for research, teaching, and scholarly endeavor in academic settings and private or governmental institutions. It produces graduates who are deeply committed to the study of politics, familiar with fundamental knowledge about political processes, well-trained in methods and techniques for careful investigation of basic and applied research questions, and determined to make contributions to the discipline of political science and to society.

The department usually admits seven to ten Ph.D. students each year, so students work closely with faculty members, often collaborating on research and publication. Graduate students know one another and enjoy supportive, congenial working conditions.

Curriculum

Doctoral study usually lasts four to five years. The first-year curriculum for all students consists of core courses equally divided between substance and methodology. Emphasis is on basic research methods, including quantitative methods, that political scientists must understand thoroughly. Special attention is given to research design, collection of observations, and data analysis and interpretation.

The second and third years of study are spent in small seminars with focused, substantive topics. Papers written for these seminars might be submitted to journals or read at professional meetings. Students must take their qualifying examinations by the end of the third year. They take their comprehensive examination (oral defense of the dissertation proposal) by the middle of the first semester of their fourth year.

The fourth and fifth years are spent on dissertation research and writing. Students who do basic research and gather data abroad often require an additional year to complete the dissertation.

Six fields of study are available: American politics, comparative politics, international relations, political theory, formal theory, and for those who wish to go beyond the basic methodology training, research methods. Each student chooses three fields of study for qualifying examinations.

The Guide to Doctoral Study in Political Science, available from the Department of Political Science and on its web site, provides a comprehensive statement of departmental requirements. For University of Iowa graduate admission and degree requirements, see Graduate College in the Catalog.

Courses

For Undergraduates

Courses numbered below 100 are introductory; those numbered 100 to 199 are advanced.

*Courses 030:029 and 030:191 cannot be applied toward the requirements for the major or minor in political science; 030:191 is offered only satisfactory/fail.

030:001 Introduction to American Politics 3 s.h.
Structure and processes; political institutions including Congress, presidency, Supreme Court, parties, interest groups, bureaucracy, discussion of framing and significance of the U.S. Constitution. GE: social sciences.

030:007 Introduction to Politics 3 s.h.
Introduction to selected processes, institutions, or behaviors central to the study of politics.

030:020 First-Year Seminar 1-2 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor, may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Prerequisite: first- or second-semester standing.

</tbody>
</table>
030:127 Political Campaigning 3 s.h.
Current state of political campaigning at all levels of government; history of campaigning, role of money and campaign finance reform, television and negative advertising, Internet campaigning.

030:128 Direct Legislation 3 s.h.
Direct democracy—lawmaking by the citizenry without legislative action; origins, historical perspectives, usage across politics, regulations; consequences of direct democracy; concerns about equality of access, tyranny of majority; United States, other countries.

030:130 Capitalism and Modernity 3 s.h.
Philosophical foundations of political economy; optimistic foundations, 19th-century challenges; current awareness of the problems of unlimited growth, unrestricted capital mobility versus economic philosophy of progress.

030:132 Modern Political Theory 3 s.h.
Major writers and intellectual trends in political thought from Renaissance and Reformation to 19th century.

030:133 Postmodern Political Theory 3 s.h.
Major writers and intellectual trends, from 19th century to World War II.

030:134 Problems of Democracy 3 s.h.
Theory and practice of democracy; democratic ideals and the institutions and practices necessary for those ideals to work in everyday politics—power, equality, majority rule, participation, trust, representation.

030:135 Strategy in Politics 3 s.h.
How to isolate the most important elements in strategic political behavior, build models to understand them, recognize common scenarios, devise institutional resolutions to the Prisoners’ Dilemma and coordination problems.

030:137 Introduction to Political Economy 3 s.h.
Economic reasoning applied to political issues, including evolution of institutions, voting, leadership, interest groups, bargaining tactics, federalism, bureaucracy, fairness and compensation for wrongs, legitimacy of democracy, electoral cycles in economic policy.

030:138 Current Political Theory 3 s.h.
Thinkers or schools of thought, from World War II to present.

030:139 Political Issues 3 s.h.
Representative topics include democracy, revolution, justice, obligation, technology, authority.

030:140 Government and Politics of Europe 3 s.h.
Political institutions, processes of selected European countries. GE: social sciences. Prerequisite: 030:040.

030:141 Russian/Post-Soviet Politics 3 s.h.
How Soviet political system developed and functioned 1917-1985; transformations leading to 1991 break-up; emerging forms of government, politics in former Soviet republics. GE: foreign civilization and culture. Prerequisite: 030:041 or consent of instructor.

030:142 European Union 3 s.h.
Politics of the European Union; institutional characteristics and major political issues of the European Union, including popular and national responses to European integration.

030:143 Government and Politics of the Far East 3 s.h.
Functions, institutions of government in countries of Far East; focus on social, economic, historical environments. GE: foreign civilization and culture. Same as 039:178.

030:144 Latin American Government 3 s.h.
Governmental institutions, major interest groups; focus on area as a whole. GE: foreign civilization and culture.

030:145 Latin American Political Parties 3-4 s.h.
Challenges posed by recent democratization in Latin America; issues of representation and governance across Latin America’s party systems; broad theoretical concepts linked to processes under way in the region.

030:146 African Development 3 s.h.
Problems of economic, political, spatial integration in Africa; patterns, processes of economic development and nation building. GE: foreign civilization and culture or social sciences. Same as 044:161.

030:147 Comparative Parties and Elections 3 s.h.
Political parties and elections from a comparative perspective; parties in developed democracies; parties as organizations, in the electorate, in government; party formation and development, party identification and voter behavior; party competition, electoral systems. Prerequisite: 030:040.

030:148 Government and Politics of China 3 s.h.
Political development of China; Mao’s communist party’s rise to power and attempts to transform Chinese society; the Cultural Revolution; tensions and achievements of the reform era; whether partnership or conflict will define China’s relationship with the United States in the coming decades.

030:149 Problems in Comparative Politics 3 s.h.
Structures, functions, behaviors of different political systems.

030:150 Politics of Emerging Market Economies 3 s.h.
Politics and international economic relations of a select group of countries in Africa, Asia, and Latin America that have achieved rapid economic growth and/or successful democratization (e.g., Taiwan, Thailand, South Africa, Brazil, Mexico).

030:151 Political Leadership 3 s.h.
Role of courts, lawyers, judges, interest groups in the American political system.

030:152 The Legislative Process 3 s.h.
Comparative legislative processes, behavior; focus on legislative systems analysis, legislative institutionalization, legislature and its environment, organizational constraints on legislative behavior, recruitment of legislators, web of legislative interactions, legislative voting behavior.

030:153 The Judicial Process 3 s.h.
Role of courts, lawyers, judges, interest groups in the American political system.

030:154 Political Psychology 3 s.h.
Political phenomena from psychological perspective; political behaviors of individuals, including decision making by elites and masses, evaluations of political candidates, mass mobilization, response to mass media; psychological concepts including stereotyping, social cognition, attitude, group identification.

030:156 Ethnic Conflict in the International Arena 3 s.h.
Origins, nature, political consequences of communal clearance and conflict in selected contemporary societies and international settings.

030:157 Vetoing Behavior and Elections 3 s.h.
Determinants of vetoing behavior; correlates of political participation, political apathy; political socialization processes; nature and functions of elections.

030:158 The Criminal Justice System 3 s.h.
Role of actors, institutions that constitute and participate in the American criminal justice system.
030:159 Government and Politics of Eastern Europe  3 s.h.
Political institutions, processes in countries of central and eastern Europe, challenges of social, political, and economic transition, and impact of different historical legacies.

030:160 International Politics  3 s.h.
Concepts and problems; war, conflict resolution, political economy. Prerequisite: 030:060 or consent of instructor.

030:161 International Organization and World Order  3 s.h.
How and why states have developed regulated patterns of interaction in the spheres of economics and security through international organizations and international regimes; regional integration processes, multilateralism.

030:162 American Foreign Policies  3 s.h.
Ends pursued, problems encountered, means employed by the United States in relations with other states and international organizations. Prerequisite: 030:061 or consent of instructor.

030:163 Chinese Foreign Policy  3 s.h.
Foreign policy of the People's Republic of China from its founding in 1949 to present; important events (China's entry into the Korean War, Sino-Soviet split in the 1960s, rapprochement between China and the United States in the 1970s, tensions with Taiwan in the 1980s, China's entry into the World Trade Organization), competing explanations for these turning points, theoretical approaches to the study of international relations.

030:164 International Systems: Continuity and Change  3 s.h.
Continuity and change in patterns of international politics; usefulness of literature on international relations in explaining historically continuous and historically distinct international behaviors.

030:165 International Conflict  3 s.h.
International conflict as the primary ingredient of international politics; sources, causes, and effects of conflict, alliance structures, power distribution, geography, arms races, deterrence.

030:166 Global Political Communication  3 s.h.
How television and the Internet are creating a global culture within which political leaders and nations interact.

030:167 Politics and the Multinational Enterprise  3 s.h.
Political factors affecting a firm's decision to go multinational; effects on home and host countries; political risk management; bargaining between states and corporations; regulation of multinationals by nation-states and international organizations; political implications of global mergers.

030:168 Politics of Terrorism  3 s.h.
Political motivations of terrorism; responses to terrorism, politics of prevention and preparation for terrorism; contemporary terrorist organizations, international responses to them.

030:169 Problems of International Politics  3 s.h.
Problems in studying international system, structures, functions, behavior.

030:170 The Politics of International Economics  3 s.h.
Political, historical dimensions; political aspects of trade, monetary systems, foreign investment, aid, dependency, global interdependence.

030:171 Public Opinion  3 s.h.
Role in making public policy; formation, change of political attitudes and opinions; political ideology; measurement of public opinion; how opinion polls are conducted; experience with interviewing and conducting public opinion research. Same as 034:153.

030:172 Political Communication and Cognition  3 s.h.
Representative topics: structures, processes of political thinking and talking, especially in electronic societies; ads, experts, hearings, ideologies, media, news, publics, schemas, speeches, symbols.

030:173 Voluntary Organizations and Politics in Comparative Perspective  3 s.h.
Politics of the voluntary sector in various manifestations and diverse countries; nongovernmental organizations (NGOs), nonprofit organizations, civil society, and their impact on democracy, government accountability, development, and international organizations such as the United Nations and World Bank.

030:174 Multimedia Politics  3 s.h.
American politics and communication via multimedia domains; television, World Wide Web.

030:175 Politics of Film  3 s.h.
Issues in the popular politics of aesthetics, communication, culture, and myth, explored through analysis of films.

030:176 French Politics and Society  3 s.h.
Modern French history, politics, society, geography, culture.

030:177 Globalization  3 s.h.
Introduction to multidisciplinary literature on political economy and culture of globalization; major topics of debate on globalization.

030:179 Transitions to Democracy  3 s.h.
Comparative examination of transitions from authoritarian rule to democracy in eastern and southern Europe, Latin America, Asia, Africa. Prerequisite: 030:001 or 030:030 or 030:040 or 030:041 or 030:042 or 030:050 or 030:060 or 030:061 or 030:070.

030:180 Honors Seminar on the Study of Politics  3 s.h.
History, scope, methods; diverse issues, theories, techniques in systematic study. Prerequisite: honors standing in political science or consent of instructor.

030:181 Honors Seminar on American Politics  3 s.h.
Ideas, issues, methods in selected area. Prerequisite: junior or senior honors standing in political science or consent of instructor.

030:182 Honors Seminar on Political Theory  3 s.h.
Intensive study of ideas, issues, methods in an area of political theory. Prerequisite: junior or senior honors standing in political science or consent of instructor.

030:183 Honors Seminar on Comparative Politics  3 s.h.
Ideas, issues, methods in selected area. Prerequisite: junior or senior honors standing in political science or consent of instructor.

030:184 Honors Seminar on International Politics  3 s.h.
Ideas, issues, methods in selected area. Prerequisite: junior or senior honors standing in political science or consent of instructor.

030:185 Honors Research Project  3 s.h.
Special research assistance to political science faculty. Prerequisite: junior or senior honors standing in political science and consent of instructor.

030:186 Honors Senior Thesis  3 s.h.
Supervised research and writing. Prerequisites: honors standing in political science, more than one semester before graduation, and consent of instructor.

030:190 Independent Study  arr.
Supervised special projects. Prerequisite: consent of instructor.

*030:191 Government Internship  1-3 s.h.
Undergraduate internships in state or national legislative office, executive agency, or with election campaign official. Prerequisite: consent of instructor.

030:193 Undergraduate Research Tutorial  3 s.h.
Individual training in applied research. Prerequisite: consent of supervising faculty member.

030:194 Senior Research Project/Paper  3 s.h.
Supervised research and writing. Prerequisites: major in political science, more than one semester before graduation, and consent of instructor.
For Graduate Students

Courses numbered 200 to 299 are core courses; those numbered 300 and above are advanced.

030:200 Introduction to Political Analysis 4 s.h.
Conceptual problems of political analysis; empirical research strategies, philosophy of science. Prerequisite: doctoral standing in political science or consent of instructor.

030:201 Introductory Methodology 3-4 s.h.
Observational methods, data analysis; critical analysis of applied social research; laboratory on computing in political science. Prerequisite: doctoral standing in political science or consent of instructor.

030:204 Computational Methods 3 s.h.
Methods for political analysis; calculus, matrix algebra, set theory. Prerequisite: doctoral standing in political science or consent of instructor.

030:205 Introduction to Formal Models in Political Science 4 s.h.
Use of formal mathematical models; current modeling techniques, applications in American politics, comparative politics, international politics. Prerequisite: doctoral standing in political science or consent of instructor.

030:210 American Politics 4 s.h.
Major literature of American politics, emphasis on comparative, systemic, behavioral studies. Prerequisite: doctoral standing in political science or consent of instructor.

030:230 Political Theory 4 s.h.
Current approaches, analysis of systems; emphasis on conceptual, methodological issues. Prerequisite: doctoral standing in political science or consent of instructor.

030:240 Comparative Politics 4 s.h.
Current approaches, analysis of systems; emphasis on conceptual, methodological issues. Prerequisite: doctoral standing in political science or consent of instructor.

030:241 Crossing Borders Seminar: Introductory 3-4 s.h.

030:242 Crossing Borders Seminar 3-4 s.h.

030:243 Crossing Borders Proseminar 1 s.h.

030:260 International Politics 4 s.h.
Approaches to study of international politics. Prerequisite: doctoral standing in political science or consent of instructor.

030:301 Intermediate Methodology 3-4 s.h.
Techniques of data analysis; statistical models and their relationship to hypotheses tested. Prerequisite: doctoral standing in political science and one semester of intermediate statistics.

030:302 Writing Political Science 4 s.h.
Practice in planning and completing political inquiries, with emphasis on writing for scholarly publication; experience refining one’s prior research projects for submission to disciplinary journals, and drafting dissertation proposals. Prerequisite: doctoral standing in political science or consent of instructor.

030:304 Experimental Methods 4 s.h.
Methods, techniques used in political science experiments.

030:305 Quantitative Methods 4 s.h.
Application of advanced statistical techniques in political science; limited dependent variable regression techniques, simulation methods, missing data techniques, history/rare event analysis and maximum likelihood, and topics tailored to students' research; focus on learning how and when to apply these techniques. Repeatable.

030:307 Qualitative Research Methods 4 s.h.
Formal literature on qualitative research methodology; varied methods including synchronic and diachronic variate comparative methodology, classic Weberian sociological methodology; process tracing, historiography, ethnomet hodology and ethnography, genealogy, discursive textual and content analysis.

030:310 Modeling American Politics 4 s.h.
Exploration of how well formal models explain the real world and how the fit between models and world can be improved.

030:311 Representation and Elections 4 s.h.
Current research on political representation in a democratic polity; what constitutes democracy and representation, does America’s political system qualify; how party and electoral systems interact with policy-making institutions regarding society’s varied interests; principal problems and obstacles to full representation in America, including circumstances of American minorities, divided government, organized interest groups.

030:315 The Presidency 4 s.h.
American chief executive: history, recruitment, behavior, rules, responsibilities, powers, relationships with other institutions.

030:317 Minority Politics in America 4 s.h.
Minority status in American politics; historic and contemporary struggles of American minority groups for political power, social acceptance; bias and stereotype—their nature and effect on political behavior; current political dilemmas and strategic situations of African Americans, Latinos, homosexuals; political behavior; policy issues important to each group, disputes within minority groups.

030:319 Problems in American Politics 4 s.h.
Problems in study of American political system; structures, functions, behavior. Repeatable.

030:338 Colloquium in Political Theory 1-4 s.h.
Issues and works; no subject repetition in six consecutive semesters. Repeatable.

030:339 Problems in Political Theory 1-4 s.h.
Prescriptive and explanatory political theory. Repeatable.

030:340 Politics of Europe 4 s.h.
Selected systems or common political phenomena.

030:341 Democracy and Democratization 4 s.h.
Comparing conceptions of democratic governance and competing theoretical frameworks for the study of successful or attempted regime change from authoritarian rule towards democracy; emphasis on reading and critically analyzing diverse approaches.

030:342 Nationalism: Theory and Practice 4 s.h.
Theories of nationalism and nature of ethnicity; national identities in modern society; nationalism, rise and fall of nation states; constitutional mechanisms for reducing ethnic-based political and violent conflict.

030:343 Asian Political Systems 4 s.h.
Democratic, transitional, and totalitarian types of government; emphasis on leadership recruitment, social control, political participation.

030:344 European Union 4 s.h.
Politics of the European Union; institutional characteristics and major political issues of the European Union, including popular and national responses to European integration.

</table>
The department offers the Bachelor of Arts and the Bachelor of Science in psychology. Both programs are designed to contribute to students' general liberal education and to provide a foundation for postbaccalaureate training in psychology and closely related disciplines, and in areas such as business, medicine, law, and communications. Students who intend to enter the job market immediately after completing an undergraduate degree are well-advised to complement their psychology major with substantial preparation in another program more closely tied to the world of work (e.g., education, social work, business, journalism, nursing). Almost all vocational opportunities in psychology require advanced degrees.

The B.S. program is intended for students who plan to pursue advanced work in psychology or in a related discipline. It includes an admission grade-point average requirement and specific courses in statistics, experimental psychology, mathematics, and natural science. The B.A. program has fewer specific requirements and puts less emphasis on methodology. Both programs leave ample time for students to combine psychology with another discipline or program.

Students who shift to a psychology major after two years of undergraduate work may find they do not have the background for the B.S. program. They may wish to enrich the B.A. program with courses in experimental psychology and other advanced electives if they intend to pursue graduate work in psychology or a related field.

Students in either program begin with a general introductory course, followed by statistics and methodology courses and introductory courses in several broad areas: behavioral and cognitive neuroscience, developmental psychology, clinical psychology, cognition and perception, and personality and social psychology. These courses are followed by upper-level psychology course work selected by the student.

The department maintains excellent facilities to support teaching and research on human and animal behavior. All faculty members are directly engaged in research, and they bring to their undergraduate teaching the excitement that such
activity generates. Many opportunities exist for interested and capable students to participate in current research projects in the department.

The department has an active undergraduate organization, the Iowa Students Psychology Association, which is open to all interested students. The group sponsors speakers, films, career days, and student symposia.

Undergraduate psychology students may use Saturday & Evening Classes and/or Guided Independent Study to meet B.A. and B.S. program requirements.

Selective Admission

Admission to the B.A. program in psychology is open; admission to the B.S. program is restricted. To be eligible for admission to the B.S. program, students must have completed 30 s.h. of college course work (excluding any credit by exam) and must have a cumulative g.p.a. of 2.67 or higher. There is no limit on the number of qualified students admitted to the B.S. program. Students who do not meet the minimum admission requirements may petition the department in writing, presenting any additional evidence of their qualifications.

Any University student may enter the B.A. program. Entering first-year and transfer students with fewer than 30 s.h. of course work who are interested in the B.S. program are admitted to the B.A. program until they satisfy the admission requirements for the B.S. program. New transfer students who meet the admission requirements for the B.S. program may choose to enter the B.S. or the B.A. program. Any student in the B.A. program may switch to the B.S. program if he or she meets admission requirements at the time of the request. Students may switch from the B.S. to the B.A. program at any time.

Bachelor of Arts

The B.A. program is designed for students who wish to gain considerable knowledge in psychology but do not necessarily plan a professional career in the discipline. The program is appropriate for students preparing for careers in law, business, counseling, social work, or secondary school teaching; see Teaching and Learning (College of Education) in the Catalog for social science teaching certification requirements. The B.A. program requires fewer psychology courses than the B.S. program and can more easily be combined with a second major.

Students interested in pursuing graduate study in psychology or other social sciences may wish to enrich their B.A. program by taking courses in mathematics, statistics, research methods, and the natural sciences.

Students must satisfy College of Liberal Arts and Sciences requirements for the B.A. and must complete at least 28 s.h. in psychology plus an approved 3 s.h. statistics course. Students also must complete at least 9 s.h. of course work at The University of Iowa in a second area of concentration. Courses used to complete the College of Liberal Arts and Sciences General Education Program may not be used to satisfy the second area of concentration, but a second major or a minor in any discipline will satisfy the requirement.

Transfer students must complete at least 15 s.h. of the major at The University of Iowa.

The B.A. program must include the following courses or their equivalents. (Before registering each semester or summer session, see Undergraduate Psychology at Iowa for changes in department requirements.)

PSYCHOLOGY CORE REQUIREMENTS

07P:025/22S:025 Elementary Statistics and Inference (or a more advanced course) 3 s.h.
031:001 Elementary Psychology 3 s.h.
One of these:
031:043 Evaluating Psychological Research 4 s.h.
031:120-031:121 Experimental Psychology I-II 7 s.h.

LOWER-LEVEL ELECTIVES

Students take four of these after completing 031:001 (total of 12 s.h.).
031:012 Introduction to Brain and Behavior 3 s.h.
031:013 Introduction to Clinical Psychology 3 s.h.
031:014 Introduction to Child Development 3 s.h.
031:015 Introduction to Social Psychology 3 s.h.
031:016 Introduction to Cognitive Psychology 3 s.h.

UPPER-LEVEL ELECTIVES

Students take three upper-level courses after satisfactorily completing the psychology core courses and other specified prerequisites (total of 9 s.h.). Prerequisites are stated in course descriptions; see “Courses” later in this section.
For a list of approved upper-level courses and their prerequisites, see Undergraduate Psychology at Iowa, available from the department and on its web site. Check Iowa Student Information Services (ISIS) to learn which courses are offered in a particular semester.

**Bachelor of Science**

The B.S. program is designed to be more rigorous than the B.A., so it may be the degree of choice for students who plan to do graduate work in psychology and related research fields. However, a B.S. is not required for graduate study in psychology. Choice of a degree program should be dictated by the student’s personal career goals.

Students must satisfy the College of Liberal Arts and Sciences requirements for the B.S. and must complete at least 34 s.h. in psychology. Transfer students must complete at least 15 s.h. of the major at The University of Iowa.

The B.S. program must include the following courses or their equivalents. (Before registering each semester or summer session, see Undergraduate Psychology at Iowa for changes in department requirements.)

**PSYCHOLOGY CORE REQUIREMENTS**

- 07P:143/22S:102 Introduction to Statistical Methods (or an approved substitute, such as 22S:101 Biostatistics) 3 s.h.
- 031:001 Elementary Psychology 3 s.h.
- 031:120 Experimental Psychology I 3 s.h.

**LOWER-LEVEL ELECTIVES**

Students take four of these after completing 031:001 (total of 12 s.h.).

- 031:012 Introduction to Brain and Behavior 3 s.h.
- 031:013 Introduction to Clinical Psychology 3 s.h.
- 031:014 Introduction to Child Development 3 s.h.
- 031:015 Introduction to Social Psychology 3 s.h.
- 031:016 Introduction to Cognitive Psychology 3 s.h.

**UPPER-LEVEL ELECTIVES**

Students take three upper-level courses after satisfactorily completing the psychology core courses and other specified prerequisites (total of 9 s.h.). Prerequisites are stated in course descriptions; see “Courses” later in this section of the Catalog.

For a list of approved upper-level courses and their prerequisites, see Undergraduate Psychology at Iowa, available from the department and on its web site. Check Iowa Student Information Services (ISIS) to learn which courses are offered in a particular semester.

**SELECTED TOPICS COURSES**

Students take both of these.

- 031:121 Experimental Psychology II 4 s.h.
- 031:190 Psychology Seminar 3 s.h.

**ADDITIONAL REQUIRED COURSES**

Students in the B.S. program also are required to complete one of the following pairs of specified natural science courses: one semester each of chemistry and biological sciences; two semesters of chemistry; two semesters of physics; or one semester each of chemistry and physics. All of these combinations can be used to complete the General Education Program natural sciences component. B.S. majors also must complete at least one semester of calculus; in most cases this entails at least one precalculus mathematics course. Students should consult with their advisers concerning specific courses that satisfy these requirements.

Students also must complete at least one additional course in advanced mathematics, statistics, or computer science chosen from the following lists.

**Mathematics**

- 22M:022 Calculus and Modeling II 4 s.h.
- 22M:026 Calculus II 4 s.h.
- 22M:027 Introduction to Linear Algebra 4 s.h.
- 22M:032 Engineering Mathematics II: Multivariable Calculus 4 s.h.

**Statistics**

- 06E:071 Statistics for Strategy Problems 3 s.h.
- 22S:120 Probability and Statistics 4 s.h.
- 22S:148 Intermediate Statistical Methods 4 s.h.

**Computer Science**

- 06K:070 Computer Analysis 3 s.h.
- 22C:005 Introduction to Computer Science 3 s.h.
- 22C:016 Computer Science I 4 s.h.
Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

**Bachelor of Arts**

In addition to courses in the major, the B.A. requires three courses in a second area.

**Before the third semester begins:** at least one-quarter of the semester hours required for graduation

**Before the fifth semester begins:** 031:001, statistics, and at least one-half of the semester hours required for graduation

**Before the seventh semester begins:** four courses in the major (including 031:043 or 031:120), one second-area course, and at least three-quarters of the semester hours required for graduation

**Before the eighth semester begins:** two additional courses in the major and an additional second-area course

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

**Bachelor of Science**

Note: The B.S. is open only to students who have earned 30 s.h. in course work and have a g.p.a. of at least 2.67. Students must complete a natural science sequence, either as part of the General Education Program or in addition to it. Students also must complete a semester of calculus and an advanced math, statistics, or computer course, which may require some preliminary work.

**Before the third semester begins:** 031:001 and at least one-quarter of the semester hours required for graduation

**Before the fifth semester begins:** calculus, statistics, three additional courses in the major (including 031:120), and at least one-half of the semester hours required for graduation

**Before the seventh semester begins:** two more courses in the major, one course for the psychology natural science requirement, and at least three-quarters of the semester hours required for graduation

**Before the eighth semester begins:** the advanced math/statistics/computer course and two more courses in the major

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

**Honors**

In order to pursue honors studies in the Department of Psychology, a student must be a member of the University Honors Program, which requires students to maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University Honors Program for more information).

The department has an active honors program that includes research seminars and individual research collaboration with faculty members. Interested majors should contact the department honors adviser.

**National Honor Society**

The department sponsors a chapter of Psi Chi, the national undergraduate honor society of the American Psychological Association. Students who have a g.p.a. of at least 3.00 overall and 3.10 in psychology course work and who have completed 9 s.h. of psychology may request a membership application form. Consult the department’s academic coordinator for more information.

**Minor**

A minor in psychology is an attractive option to students from a variety of disciplines. A minor requires 15 s.h. of graded course work with a g.p.a. of at least 2.00. At least 12 of the 15 s.h. must be earned in the psychology department at The University of Iowa. Departmental advisers can help students identify courses for a minor that complement the student’s major. Prerequisites must be met when students enroll in psychology courses.
Graduate Program

The graduate program in psychology is designed for students seeking the Ph.D. Students enrolled in the Ph.D. program may elect to receive a Master of Arts when they have completed the M.A. requirements. Students entering without previous graduate work usually require at least four years to complete the program; those entering with previous graduate training usually require three to five additional years in the department, depending on the nature of the earlier preparation.

The Ph.D. program places strong emphasis on preparation for research, teaching, and scholarly endeavor, whether in academic settings or in industrial, governmental, or medical institutions. The intent is to produce graduates who are deeply committed to the study of psychology, familiar with fundamental knowledge about psychological processes, well-trained in the methods and techniques for careful investigation of basic and applied problems, and determined to make contributions to the discipline of psychology and to society.

Graduate training is organized in six broad areas: behavioral and cognitive neuroscience, clinical psychology, cognition and perception, developmental psychology, health psychology, and personality and social psychology. Each entering student is expected to identify one of these as his or her primary area and to follow a program that develops thorough understanding of the substantive material and methods of investigation central to that subdiscipline. While pursuing specialty training, all students must meet course requirements in statistics and research methods and in content areas other than their primary one.

The training area programs are sufficiently flexible to permit students to develop substantial competence in a second training area. Individually tailored programs are possible.

Doctor of Philosophy

The Ph.D. requires satisfactory completion of at least 72 s.h. of graduate work in psychology, including at least 33 s.h. in the psychology department. All students must satisfy, through one of several options, requirements in statistics and research methods. They also must take course work outside the primary training area to develop a background in the discipline of psychology as a whole.

During each of the first two semesters, graduate students ordinarily take three courses—for example, a statistics course, a course or two in the primary training area, and/or an outside area elective. Students also begin their research under the supervision of their adviser and with the guidance of their research advisory committee.

Near the end of the fall semester of the second year, students submit a report describing their research to date. At the beginning of the following semester, they present their research at the annual graduate research symposium.

During subsequent years, students continue selected course work in their training and interest areas and continue to develop their research programs. In addition, they develop a prospectus for the dissertation research and take the comprehensive examination, which covers material in the specialty area. The final year is devoted primarily to conducting the Ph.D. study and preparing the dissertation. In the Ph.D. final examination, students present an oral defense of their dissertation and are expected to relate the dissertation work to broader issues in the discipline of psychology.

Master of Arts With Thesis

The department ordinarily offers the Master of Arts only to students enrolled in the Ph.D. program. The M.A. with thesis requires satisfactory completion of at least 30 s.h. of graduate credit, including 24 s.h. taken at The University of Iowa. The course work must include a statistics course, courses outside the primary specialty area, and at least an additional 8 s.h. earned in psychology department courses and seminars. Students also must complete an acceptable scholarly thesis and conduct a successful oral defense of the thesis.

Master of Arts Without Thesis

The department ordinarily offers the Master of Arts only to students enrolled in the Ph.D. program. The M.A. without thesis requires satisfactory completion of at least 37 s.h. of graduate credit, including 30 s.h. taken at The University of Iowa. The course work must include a statistics course, courses outside the primary area, and at least an additional 15 s.h. earned in psychology department courses and seminars. Students also must perform successfully on an examination covering their area of specialization.
Graduate Training Areas

Behavioral and Cognitive Neuroscience

The program in behavioral and cognitive neuroscience focuses on the analysis of attention, motivation, and learning, primarily in nonhuman subjects, through the application of behavioral and biological principles. Special faculty strengths are in classical and operant conditioning, motivation and emotion, developmental psychology, neurobiology of learning, comparative psychology, cognitive neuroscience, neuropsychology, neuroendocrinology, and neuroanatomy. Students in this program have the opportunity to learn state-of-the-art techniques in computer-controlled experimentation and electronic instrumentation as well as advanced analytic and laboratory methods in neurosurgery, histology, and biochemical assay.

Faculty members in the behavioral and cognitive neuroscience area interact extensively with colleagues from a number of basic science and clinical departments in the Carver College of Medicine, including anatomy, anesthesia, pharmacology, internal medicine, pediatrics, and neurology. These collaborative activities provide excellent research and training opportunities for students interested in emerging interdisciplinary fields such as behavioral medicine.

Clinical Psychology

The clinical training program, fully approved by the American Psychological Association, strongly emphasizes a scientific or clinical science approach to the study of mental and physical health. It is designed for students who intend to pursue careers in clinical research and are interested primarily in developing scholarly understanding of clinical phenomena and acquiring research skills necessary to the systematic investigation of such phenomena. Because students must become familiar with clinical material and competent in the application of clinical skills in order to pursue clinical research, the department closely integrates practicum experience in the Seashore Clinic with course work and supervised research experience. Students with a primary interest in clinical practice should apply to another program.

Students in the clinical program may develop special competence in areas such as aggression, marital and family dysfunction, eating disorders, personality and personality disorders, psychophysiology, anxiety disorders, affective disorders, behavioral and cognitive therapies, child psychopathology, and clinical health psychology. Faculty members collaborate actively with colleagues from departments such as otolaryngology, psychiatry, pediatrics, obstetrics and gynecology, internal medicine, microbiology, neurology, and surgery, and from other units, such as the Center for Health Services Research and the Veterans Affairs Iowa City Health Care System.

Advanced students have opportunities to gain additional practicum experience through placement in clinical facilities maintained by local, state, federal, and University agencies. Students in the clinical program who wish to have the designation “clinical psychology” on their official transcript must satisfactorily complete a one-year internship at an approved agency before receiving a Ph.D. The internship ordinarily comes after completion of all course work and most, if not all, of the dissertation project.

For information about the clinical psychology program’s accreditation, contact the Office of Program Consultation and Accreditation, American Psychological Association.

Cognition and Perception

The cognition and perception training area is guided by the philosophy that understanding a specific cognitive process requires an understanding of how it interacts with other cognitive processes (e.g., interactions between attention and memory). The area pursues empirical rigor and theoretical development, so its research is theory driven and data tested.

Research programs of the area’s laboratories overlap with each other, and most content areas are studied by multiple laboratories and with multiple methodologies. Areas of strength include categorization, computational modeling, judgment and decision making, language and language learning, learning and memory, visual cognition, attention, and working memory.

Students in perception and cognition take basic courses and seminars in specialty areas, but they devote most of their time to research activities. Students work closely with a faculty mentor at first and then become progressively independent as they gain knowledge and skills. The program encourages students to work with more than one faculty member, both in the program and across the department and the University. Students often combine basic work on cognition with work in areas such as neuroscience, psychiatry, marketing, law, social psychology, and human factors engineering.
Developmental Psychology

Students in the developmental program are taught a broad range of developmental theory, and they acquire expertise in multiple research paradigms used in developmental psychology, such as observational research, experimentation, and field methods. Students also have the opportunity to study and collaborate with faculty members who are not primarily developmental psychologists but whose work has implications for developmental theory. This opportunity provides a unique breadth of training.

Students take courses in many areas of developmental psychology as well as in other areas of psychology. Currently available to students are research opportunities in cognitive development in infancy and childhood, social and emotional development, and developmental psychobiology. The developmental research group, composed of faculty members and students interested in issues related to developmental research, meets regularly to discuss ongoing research. These meetings provide both students and faculty members the opportunity to present and discuss their own research as well as to gain exposure to other developmental work being conducted in the department.

Health Psychology

The health psychology program is concerned with application of psychological theory, methods, and treatment to understanding and promotion of physical health and illness. The program’s perspective is based on the biopsychosocial model, which posits that biological, psychological, and social processes are integrally and interactively involved in physical health and illness.

Graduate training in health psychology emphasizes the integration of knowledge about biological, psychological, and social factors. Students are involved in research whose content and methods reflect the biopsychosocial perspective. Training in health psychology is facilitated by the faculty’s longstanding collaborations with medical practitioners and researchers at the UI Carver College of Medicine and University of Iowa Hospital and Clinics. Availability of medical populations and state-of-the-art medical technologies afford a unique opportunity for doctoral students in health psychology.

Research areas of the health psychology program include stress and illness, psychoneuroimmunology, patient adherence, animal models of hypertension and heart failure, postpartum depression, women’s health issues, and psycho-oncology.

Personality and Social Psychology

The personality and social psychology program offers a variety of perspectives on interpersonal and intrapersonal processes. Students develop a broad familiarity with all of the major subareas but may focus their graduate training in any one, such as social judgment, social influences on behavior, close relationships, adult attachment styles, health and stress, the social psychology of groups, social cognition, temperament and emotionality, and traits and individual differences.

Students in the personality and social psychology program also may acquire additional preparation for research and teaching in interest areas such as organizational and consumer behavior, communications, human factors, and behavioral medicine. Such preparation, which may involve participation in special research projects and selected course work outside the department (e.g., in the Department of Communication Studies or the College of Law), will broaden students’ employment prospects.

Admission

Since the graduate program in psychology is designed primarily for students seeking the Ph.D., all applicants are considered on this basis. Occasionally, a qualified applicant who is in good standing in another UI graduate program and is interested in advanced work in psychology only through the M.A. level may be admitted to pursue a joint graduate program. Students interested in such a program should contact the department chair before filing an application.

The application deadline is January 1. For all materials to be on file by that date, applicants should take the Graduate Record Examination (GRE) General Test in October, and no later than December. The subject test in psychology is not required. Applications may be submitted any time but are considered only once each year—between January 1 and February 1—for admission the following fall. Admission decisions are based on a composite consideration of prior academic and research performance; letters of reference; scores on the verbal, quantitative, and analytic writing sections of the GRE General Test; and the applicant's statement about background and purpose. Admission materials are reviewed initially by faculty members in the applicant’s primary training area.
Financial Support

All students admitted to the Ph.D. program in psychology are guaranteed five years of financial support, as long as they make satisfactory progress and remain in good academic standing. Financial support is provided through fellowships, teaching assistantships, research assistantships, and traineeships, depending on merit and availability. No separate application for financial aid is required.

Faculty

Faculty members of the Department of Psychology are nationally and internationally renowned leaders in a variety of subdisciplines. Their research is funded by numerous federal and private research grants, their findings are documented in many publications, and their accomplishments have won many awards.

Facilities

The department’s facilities for graduate training and research are among the finest in the country. The Kenneth W. Spence Laboratories of Psychology and adjoining space in Seashore Hall include a variety of laboratories for human and animal studies. Facilities include animal housing areas; a histology laboratory; observation suites with remote audiovisual control and recording equipment; soundproof chambers; electrophysiological recording rooms; conditioning laboratories; the Seashore Clinic; and well-equipped electronic, mechanical, and woodworking shops.

Computers are widely available. Office space for graduate students and faculty members is provided in Seashore Hall. The psychology branch of the University’s Main Library, with major collections in all areas, is conveniently located in the west wing of Seashore Hall.

The research and teaching activities of the department greatly benefit from the facilities and staff of other University and local agencies, including University of Iowa Hospitals and Clinics, the Veterans Affairs Iowa City Health Care System, the University Counseling Service, the Center for Disabilities and Development, the Wendell Johnson Speech and Hearing Clinic, the Center for Health Services Research, and the School of Social Work.

Courses

Courses 031:012, 031:013, 031:014, 031:015, 031:016, and 031:019 are open to first-year students who have satisfactorily completed an introductory psychology course (031:001 or equivalent).

031:001 Elementary Psychology 3 s.h. Psychology as a behavioral science. GE: social sciences.

031:012 Introduction to Brain and Behavior 3 s.h. Biological mechanisms of behavior; comparative study of behavior in animals (excluding humans), behavioral organization, animal intelligence, social behavior, communication, behavioral neuroscience, how brain systems control sensation, movement, homeostasis, emotion, learning. Prerequisite: 031:001.

031:013 Introduction to Clinical Psychology 3 s.h. Introduction to abnormal psychology; scientist-practitioner model, training, ethics, research methods in clinical psychology; current approaches to intellectual, personality, behavioral assessment; theories, research on treatment of psychological disorders. GE: social sciences. Prerequisite: 031:001.

031:014 Introduction to Child Development 3 s.h. Current research, theory in child psychology, including heredity and environment, infancy, perceptual development, attachment, language acquisition, thinking (Vygotsky), information processing, memory and concept development, intelligence, child rearing, peers, sex differences, moral development, aggression, child psychopathology. GE: social sciences. Prerequisite: 031:001.

031:015 Introduction to Social Psychology 3 s.h. Research and theories on people’s thoughts, feelings, and behavior in social situations; attitudes, attributions, person perception, aggression, stereotypes and prejudice, attraction, relationships, social influence, group processes, altruism. Prerequisite: 031:001.

031:016 Introduction to Cognitive Psychology 3 s.h. Individual human cognition; perception, attention, memory, language, learning, problem solving, decision making, thought considered from viewpoint of information processing. GE: social sciences. Prerequisite: 031:001.

031:019 Industrial/Organizational Psychology 3 s.h. Applications of psychology to problems in world of work; emphasis on personnel selection, training, attitudes, motivation, measurement of job performance. Prerequisite: 031:001.

031:029 First-Year Seminar 1-2 s.h. Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Prerequisite: first- or second-semester standing.

031:043 Evaluating Psychological Research 4 s.h. Skills for critical evaluation of professional and public literature dealing with scientific study of behavior: philosophy of scientific psychology, experimental and noneperimental methods of
Psychology 331

For Undergraduate and Graduate Students

Before enrolling in any upper-level undergraduate courses, students must complete all specified lower-level prerequisites or obtain consent of instructor.

031:102 Interpersonal Influence 3 s.h.
Classic and contemporary theory and research on social influences of behavior; topics include social influences on self-concept, intertemporal comparisons, obedience, conformity. Prerequisites: grade of C- or higher in 031:015 or equivalent, and 031:043 or 031:120 or equivalent.

031:103 Social and Personality Development 3 s.h.
Emotional, social, and personality development from infancy to adolescence; child’s temperament characteristics, parent-child relationship, and social context as contributors to growth. Prerequisites: grade of C- or higher in 031:014 or 031:015 or equivalent, and 031:043 or 031:120 or equivalent.

031:105 Personality 3 s.h.
Classic theoretical models and contemporary empirical research in personality, including influence of heredity and environment, consistency and stability of behavior. Prerequisites: grade of C- or higher in 031:013 or 031:015 or equivalent, and 031:043 or 031:120 or equivalent.

031:106 Attitude Change 3 s.h.
Current theoretical approaches, laboratory and field methods of research, basic processes of change considered within broader framework of psychology. Prerequisites: grade of C- or higher in 031:015 or equivalent, and 031:043 or 031:120 or equivalent.

031:107 Environmental Stress 3 s.h.
Social psychological aspects of urban living, crowding, control, institutionalization, energy utilization, theory and research on stress, arousal, emotion. Prerequisites: grade of C- or higher in 031:015 or equivalent, and 031:043 or 031:120 or equivalent.

031:108 Small Group Processes 3 s.h.
Classic work on conformity, reference groups, cohesion, contagion, group performance, responsibility diffusion, decision making, group conflict; focus on laboratory experiments, field studies and observations, relevant theory. Prerequisites: grade of C- or higher in 031:015, and 031:043 or 031:120 or equivalent.

031:110 Mood and Temperament 3 s.h.
Current theoretical approaches and contemporary empirical research in emotions, emotional expression, environmental and biological influences on mood, including circadian, weekly, seasonal cycles; individual differences in temperament, happiness, life satisfaction. Prerequisites: grade of C- or higher in 031:013 or equivalent, and 031:043 or 031:120 or equivalent.

031:111 Social Cognition 3 s.h.
Research and theory on cognitive structures and processes that underlie judgment, decision, belief, and behavior in social situations; attribution, heuristics, schemas, person perception, stereotypes, attitudes. Prerequisites: grade of C- or higher in 031:015 or equivalent, and 031:043 or 031:120 or equivalent.

031:114 Cognitive Development of Children 3 s.h.
Developmental research, theory concerning children’s concepts, thinking, problem solving, memory, communication. Prerequisites: grade of C- or higher in 031:014 or equivalent, and 031:043 or 031:120 or equivalent.

031:115 Theories of Developmental Psychology 3 s.h.
Major theoretical approaches to the study of developmental change (e.g., social learning, information-processing, ethological, contextual); related topics such as perceptual development and attachment. Prerequisites: grade of C- or higher in 031:014 or equivalent, and 031:043 or 031:120 or equivalent.

031:116 Psychology of Gender 3 s.h.
Origins of gender bias, gender socialization in childhood, gender differences across lifespan; research on gender differences in cognition, emotions, behavior, physical and mental disorders, communication. Prerequisite: grade of C- or higher in 031:043 or 031:120 or equivalent.

031:117 Psychology of Prenatal Development 3 s.h.
Behavior before and immediately after birth; embryology and development of fetus, preterm infant, and neonate; motor development, sensation, learning, adaptation to intrauterine conditions. Prerequisites: grade of C- or higher in 031:012 or 031:014 or equivalent, and 031:043 or 031:120 or equivalent.

031:118 Infant Development 3 s.h.
Cognitive and social development during first two years of life; development of perceptual abilities, early language acquisition, imitation, mother-infant attachment, temperament. Prerequisites: grade of C- or higher in 031:014 or equivalent, and 031:043 or 031:120 or equivalent.

031:120 Experimental Psychology I 3 s.h.
Logic and application of experimental methods to analysis of behavioral phenomena; major problem areas of experimental psychology. Prerequisites: 031:001; and 07P:143 or 22S:102 or equivalent.

031:121 Experimental Psychology II 4 s.h.
Laboratory study of an aspect of behavior; topics in a particular area (e.g., learning and memory, perception, social behavior, operant behavior, physiological processes). Prerequisite: grade of C- or higher in 031:120 or equivalent; additional prerequisites for some sections.

031:122 Language Development 3 s.h.
Introduction to first language acquisition, with focus on infancy through five years; sound discrimination abilities, word learning, babbling and speech production, acquisition of grammar, perspectives from psychology, audiology, linguistics, speech pathology. Prerequisites: grade of C- or higher in 031:014 or 031:016 or equivalent, and 031:043 or 031:120 or equivalent.

031:123 Psychology of Learning 3 s.h.
Psychological science of acquired behavior; interests in experimental study of Pavlovian conditioning, operant conditioning, cognition in humans and nonhuman animals, relevance to behavioral adaptation. Prerequisites: grade of C- or higher in 031:012 or 031:016 or equivalent, and 031:043 or 031:120 or equivalent.

031:125 Comparative Psychology 3 s.h.
Behavioral processes in humans, animals; intelligence, memory, attention, language, consciousness; behaviorism, mentalism, evolution, neuropsychology. Prerequisites: grade of C- or higher in 031:012 or equivalent, and 031:043 or 031:120 or equivalent.
addresses reciprocal effects of behavior and physical health.

Psychological contributions to understanding etiology, prevention, treatment of physical illness; basic and clinical research that addresses reciprocal effects of behavior and physical health.

- **031:126 Behavioral Neuroscience** 3 s.h.
  - Basic concepts and techniques in neuroscience, their application to analysis of sensory processes, arousal mechanisms, motivation, learning. Prerequisites: grade of C- or higher in 031:012 or equivalent, and 031:043 or 031:120 or equivalent.

- **031:128 Psychopharmacology** 3 s.h.
  - How drugs act to influence behavior; general principles of drug action on the nervous system; licit and illicit drugs, use/abuse, historical perspective on drug use. Prerequisites: grade of C- or higher in 031:012 or equivalent, and 031:043 or 031:120 or equivalent.

- **031:129 Neurobiology of Learning and Memory** 3 s.h.
  - Major topics in the neurobiology of learning and memory; focus on anatomical, cellular, molecular bases of various learning and memory processes. Prerequisites: grade of C- or higher in 031:012 or equivalent, and 031:043 or 031:120 or equivalent.

- **031:130 Psychology of Thinking** 3 s.h.
  - Problem solving, reasoning, judgment and decision making, language and thought, intelligence, creativity. Prerequisites: grade of C- or higher in 031:016 or equivalent, and 031:043 or 031:120 or equivalent.

- **031:131 Cognitive Science** 3 s.h.
  - Introduction to cognitive science, an interdisciplinary enterprise that investigates psychological processes using perspectives from psychology, computer science, linguistics, philosophy, neuroscience. Prerequisites: grade of C- or higher in 031:016 or equivalent, and 031:043 or 031:120 or equivalent.

- **031:133 Sensation and Perception** 3 s.h.
  - Psychological and neuropsychological examination of humans’ major sensory systems, especially vision. Prerequisites: grade of C- or higher in 031:012 or equivalent, and 031:043 or 031:120 or equivalent.

- **031:134 Cognition and the Brain** 3 s.h.
  - Analysis of the brain as a biological computational system that performs cognitive tasks such as vision, language, and memory. Prerequisites: grade of C- or higher in 031:012 or 031:016 or equivalent, and 031:043 or 031:120 or equivalent.

- **031:135 Principles of Behavioral Analysis** 3 s.h.
  - Experimental analysis of behavior; application of behavior analysis to broad range of topics in psychology, including reflexive behavior, perception, learning, motivation and emotion, memory and cognition, language, abnormal behavior, drug addiction, social behavior; consideration of behaviorist philosophy. Prerequisites: grade of C- or higher in 031:012 or 031:016 or equivalent, and 031:043 or 031:120 or equivalent.

- **031:136 Behavioral Endocrinology** 3 s.h.
  - Basic concepts; sexual differentiation of brain, male and female physiology, sexual behavior and cognitive function; aggression; homeostasis; biological rhythms; mood. Prerequisites: grade of C- or higher in 031:012 or equivalent, and 031:043 or 031:120 or equivalent.

- **031:140 Psychology of Interpersonal Relations** 3 s.h.
  - Theories, empirical findings, speculation from social psychology and related disciplines regarding how people form, maintain, and alter close, interpersonal relationships. Prerequisites: grade of C- or higher in 031:015 or equivalent, and 031:043 or 031:120 or equivalent.

- **031:141 Loss and Trauma** 3 s.h.
  - How people deal with loss—personal (e.g., aging) and interpersonal (e.g., death and divorce). Prerequisites: grade of C- or higher in 031:015 or equivalent, and 031:043 or 031:120 or equivalent.

- **031:152 Health Psychology** 3 s.h.
  - Psychological contributions to understanding etiology, prevention, treatment of physical illness; basic and clinical research that addresses reciprocal effects of behavior and physical health.
Primarily for Graduate Students

031:201 Advanced Social-Personality Psychology 3 s.h.
Classic and contemporary theory, research, methodological issues in social-personality psychology. Prerequisite: consent of instructor.

031:202 Attitudes and Persuasion 3 s.h.
Classic and current theories and findings on persuasion, the formation and measurement of attitudes.

031:205 Advanced Social Cognition 3 s.h.
Research and theory on cognitive processes that underlie judgment, decision, belief, and behavior in social situations; attribution, heuristics, counterfactual thinking, schemas, person perception, stereotypes, attitudes.

031:208 Psychology of Close Relationships 3 s.h.
Theory, general writing, empirical analysis of variables involved in initiation, maintenance, termination of close relationships; emphasis on social psychological processes, concepts.

031:212 Perceptual-Cognitive Development in Infancy 3 s.h.
Knowledge acquisition during first two years of life; development of visual, speech, bimodal perception; imitation; object concept and permanence; early perceptual concepts.

031:214 Processes of Language Acquisition 3 s.h.
Theoretical and computational approaches to the study of first language acquisition from infancy to five years, including prelinguistic sound discrimination, babbling, semantic development, categorization abilities, syntactic and grammatical development.

031:216 Dynamic Systems and Development 3 s.h.
Dynamical systems theory, its application to basic problems in developmental psychology; development of motor control, cognition, language; comparisons with other theoretical approaches in developmental psychology.

031:217 Psychobiology of Prenatal Development 3 s.h.
Current research on behavior before and immediately after birth; embryology and development of fetus, preterm infant, neonate; motor development, sensation, learning, adaptation to intrauterine conditions.

031:218 Cognitive Development 3 s.h.
Theoretical and empirical analyses of children's cognitive development; spatial and numerical concepts, causal reasoning, categorization, metacognition, memory.

031:220 Proseminar in Cognition and Perception 3 s.h.
Broad overview of study of cognition, including cognitive psychology, computer science and artificial intelligence, linguistics, neuroscience, philosophy of mind. Repeatable. Prerequisite: consent of instructor.

031:223 Neural Networks in Psychology 3 s.h.
Major techniques in neural network or connectionist modeling, specific application to issues in psychology. Prerequisite: consent of instructor.

031:226 Visual Perception 3 s.h.
Theoretical and empirical analyses of low- and high-level visual functions, including edge detection, surface representation, object identification.

031:227 Attention 3 s.h.
Theory and research on attention, from viewpoints of cognitive psychology and cognitive neuroscience, including historical perspectives, recent approaches.

031:230 Behavioral Pharmacology 3 s.h.
Behavioral analysis of drug action; emphasis on physiological, biomechanical mechanisms underlying behavioral processes in experimental animals, humans. Same as 071:230.

031:234 Developmental Psychology 3 s.h.
Biological bases of behavior in developing organisms; may include thermoregulation, ingestion, sleep, parent/offspring interactions, sensation motor control, learning, memory.

031:236 Psychobiology of Health and Sickness 3 s.h.
Physiological basis of behavior and cognition in normal and pathological states; body and brain functions that affect psychological processes, their role in mental and physical health, disease. Prerequisite: consent of instructor.

031:240 Judgment and Decision Making 3 s.h.
Models, methods used in study of human judgments and decisions; applications in areas such as clinical diagnosis, social and educational evaluations, economic judgments, consumer decisions.

031:241 Behavioral and Cognitive Neuroscience I 4 s.h.
Concepts, methods, and findings in behavioral and cognitive neurosciences; emphasis on principles of neuroscience, sensation, motivation, emotion. Prerequisite: consent of instructor. Same as 132:241.

031:242 Behavioral and Cognitive Neuroscience II 3 s.h.
Concepts, methods, and findings in behavioral and cognitive neurosciences; emphasis on principles of comparative psychology, motor control, learning. Prerequisite: consent of instructor. Same as 132:242.

031:244 Behavioral Neuroscience 3 s.h.
Basic principles of neurochemistry, neuropsychology, developmental neuroscience, behavioral neuroscience. Prerequisite: consent of instructor.

031:250 Introduction to Health and Behavioral Science 3 s.h.
Evolution of health psychology; survey of major physiological systems in which pathology is affected by behavioral processes; review of theoretical approaches, experimental paradigms from behavioral science as they may apply to assessment of health problems; prevention, intervention, psychological adaptation to physical disease. Prerequisite: consent of instructor.

031:252 Clinical Behavioral Medicine 3 s.h.
Biopsychosocial framework applied to study, treatment of chronic and acute physical conditions; clinical concepts, procedures. Prerequisite: consent of instructor.

031:258 Personality and Individual Differences 3 s.h.
Major theoretical, empirical issues in contemporary personality research, including stability and consistency of behavior, influence of heredity and environment in personality development, nature and organization of traits, validity of trait inferences.

031:260 Descriptive Psychopathology 3 s.h.
Psychiatric syndromes, including descriptions, etiology, experimental and clinical research; development, function of classification systems. Prerequisite: consent of instructor.

031:261 Experimental Psychopathology 3 s.h.
Theories of psychopathological processes underlying etiology of psychopathology; emphasis on schizophrenia, affective disorders, anxiety, psychosis, alcoholism/drug abuse. Prerequisite: consent of instructor.

031:263 Psychological Appraisal I 3 s.h.
Assessment theory and basic psychometric principles in test construction, evaluation, application, ethical, social, psychological, psychometric issues and controversies in assessment. Prerequisite: consent of instructor.
031:264 Psychological Appraisal II 3 s.h.
Introduction to assessment with children and adults, including assessment of cognitive abilities and achievement testing, neuropsychological assessment, and psychodiagnostic/personality assessment. Prerequisites: 031:263 or equivalent, and consent of instructor.

031:265 Neuroscience Seminar 0-1 s.h.

031:266 Psychological Therapies 3 s.h.
Historical development and current status of empirically based therapies for psychological disorders, including anxiety, depression, schizophrenia, childhood disorders; emphasis on critical evaluation of therapy techniques.

031:270 Clinical Research Methods 3 s.h.
Scientific basis of rigorous psychological research; conceptual and methodological processes that underlie sound research; development of capacity for critical evaluation of the research process. Prerequisite: consent of instructor.

031:276 Advanced Developmental Psychopathology 3 s.h.
Psychiatric syndromes manifested in childhood and adolescence; theoretical approaches, methodology from developmental and clinical psychology as they apply to study of childhood psychopathology. Prerequisite: consent of instructor.

031:278 Principles of Neuropsychology 3 s.h.
Basic principles of brain-behavior relationships, clinical and experimental applications of neuropsychology, research methods, disorders of higher cognitive and behavioral functions and its neural correlates. Prerequisite: consent of instructor.

031:280 Current Topics in Psychology 3 s.h.
Repeatable.

031:291 Problems in Psychology arr.
Individual study. Prerequisite: consent of instructor.

Prerequisite: consent of instructor.

Prerequisite: consent of instructor.

031:297 Research Projects arr.
Prerequisite: consent of instructor.

031:302 Seminar: Personality and Social Psychology 1 s.h.
Professional issues, current topics relevant to personality, social psychologists. Repeatable. Prerequisite: consent of instructor.

031:318 Seminar: Cognitive Development 0-3 s.h.
Theoretical, methodological issues focused on cognitive and perceptual development. Repeatable.

031:330 Seminar: Cognitive Psychology 2 s.h.
Repeatable. Prerequisite: consent of instructor.

031:335 Seminar: Cognitive Neuroscience 0-2 s.h.
Neurological and behavioral investigations of attention, perception, learning, memory, decision making, planning, contemporary models, theories. Prerequisite: consent of instructor.

031:338 Seminar: Advanced Topics in Behavioral and Cognitive Neuroscience 3 s.h.
Prerequisite: 031:241 or consent of instructor.

031:350 Seminar: Psychology in Medical Settings 1 s.h.
Introduction to evaluation, research, and intervention with medical patients. Prerequisite: consent of instructor.

031:360 Seminar: Orientation to Clinical Research 0-1 s.h.
Issues in clinical research, including use of databases, advisor/advisee relationships, preparation of IRB proposals, paper presentation and publication, common early career problems, funding resources.

031:370 Seminar: Health Psychology 0-2 s.h.
Theoretical and methodological issues; focus on specific topics, such as chronic disease, psychoneuroimmunology. Repeatable. Prerequisite: consent of instructor.

031:380 Ethics and Professional Concerns arr.
Major ethical and legal issues relevant to clinical psychologists’ varied roles; understanding of legal and ethical issues encountered by psychologists in varied settings, development of personal working model for resolving ethical and professional concerns.

031:461 Introductory Practicum arr.
Orientation to Department of Psychology clinic, including instruction in interviewing, observation of clinic procedures, attendance at clinic rounds under supervision of clinical psychology faculty members. Prerequisite: consent of clinical training committee.

031:462 Assessment Practicum arr.
Supervised practice in psychological assessment techniques. Prerequisite: consent of clinical training committee.

031:463 Therapy Practicum arr.
Supervised practice and clinical experience in application and evaluation of psychological therapies. Prerequisite: consent of clinical training committee.

031:464 External Practicum arr.
Supervised practice and clinical experience in field setting; psychological assessment techniques and/or application, evaluation of psychological therapies. Prerequisite: consent of clinical training committee.
Religious Studies

Chair: Raymond A. Mentzer
Professors: T. Dwight Bozeman (Religious Studies/History), Jay A. Holstein, David E. Kiernan, J. Kenneth Kunz, Raymond A. Mentzer, Robert F. Weir
Associate professors: Diana Fritz Cates, Ralph Keen, Janine T.A. Sawada, Frederick M. Smith (Religious Studies/Asian Languages and Literature), Richard B. Turner (Religious Studies/African American World Studies)
Assistant professors: Micheline Pesantubbee (Religious Studies/African American World Studies), Howard B. Rhodes, Morten Schlueter, Ahmed Souaiaia

Religion is a major factor in human culture, with the power to unify society as well as to disrupt and divide it. Given the diversity of cultures in a shrinking global context, an understanding of religion and its personal and social roles is a significant element in a liberal arts and sciences education. The Department of Religious Studies helps students acquire an appreciative and critical understanding of the history and literature of major religions in the East and West, and insight into the nature and meaning of the religious dimensions of human culture.

The department recognizes that religious activity is expressed in countless ways. Therefore, it offers a wide range of courses that explore facets of religion in cultures around the world. Topics and issues include religious texts and thinkers as well as how culture, tradition, and experience intersect. Diverse academic methods—including historical, textual, artistic, and literary approaches—are used to study the variety of ways in which religions have formulated values and addressed matters of ultimate concern.

Undergraduate Program

Each year thousands of University students enroll in courses in religious studies. Many are taking courses to complete the College of Liberal Arts and Sciences General Education Program. Some students choose religious studies as their major, a second major, or a minor to complement studies in another field.

Religious studies majors acquire core skills they will need to flourish in today's world: logical thinking, writing, communicating, and working with others, as well as open-mindedness to new ideas.

Students who choose to major in religious studies may count a maximum of three religious studies courses approved for the General Education Program as part of the 30 s.h. in religious studies required for the major. Transfer students may include up to 15 s.h. of transfer credit toward the major. Transfer credit is evaluated individually.

Required Courses

To graduate with a B.A. in religious studies, students must take 15 s.h. in foundation studies, 12 s.h. in continuing studies, and the senior seminar.

FOUNDATION STUDIES

Western Religious Traditions
Two of these:
032:001 Judaism, Christianity, and Islam 3 s.h.
032:013 Personalities of the Old Testament 3 s.h.
032:025 Medieval Religion and Culture 3 s.h.
032:026 Modern Religion and Culture 3 s.h.
032:030 Introduction to Islam 3 s.h.
032:032 Introduction to Qur’an 3 s.h.
032:034 Introduction to African American Religions 3 s.h.

Asian Religious Traditions
Two of these:
032:004/039:004 Living Religions of the East 3 s.h.
032:006/039:006 Introduction to Buddhism 3 s.h.
032:010/039:007 Chinese Religions 3 s.h.

Theoretical and Comparative Studies in Religion
One of these:
032:002 Religion and Society 3 s.h.
032:003 Quest for Human Destiny 3 s.h.
032:016 Religion and Liberation 3 s.h.
032:020 Religion and Conflict in the Contemporary World 3 s.h.
CONTINUING STUDIES

Students must take 12 s.h. of course work in continuing studies to complete the major. This course work must be chosen from courses in one of three concentration areas: western religious traditions; Asian religious traditions; or religion, culture, and society. For lists of approved courses for each of the three concentration areas, contact the Department of Religious Studies office.

SENIOR SEMINAR

All students must take 032:196 Senior Majors Seminar for 3 s.h.

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan.

Before the third semester begins: at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: one or two courses in the major and at least one-half of the semester hours required for graduation

Before the seventh semester begins: three to six courses in the major and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: five to seven courses in the major

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Honors

Students who maintain a cumulative University of Iowa g.p.a. of at least 3.33 are eligible for membership in the University Honors Program (contact the University Honors Program for more information). Honors majors must complete a total of 33 s.h. to fulfill the requirements for the religious studies major. Students must take 032:198 Honors Essay under the individual supervision of a faculty adviser. Copies of the completed and approved essay are submitted to the Department of Religious Studies and to the University Honors Program. Honors students may apply 3 s.h. of 032:195 Individual Study or 032:197 Honors Tutorial toward their 12 s.h. requirement in the concentration area.

Minor

A minor in religious studies requires 15 s.h. of credit in religious studies courses with a g.p.a. of at least 2.00. Of the 15 s.h., at least 12 s.h. must be taken at The University of Iowa in upper-level religious studies courses, including 032:007, 032:008, 032:009, and all courses numbered above 032:050.

Graduate Programs

A graduate degree in religious studies ordinarily leads to an academic career teaching at the college or university level, or to a career in a religious, nonprofit, or governmental organization. The department’s graduate programs place religion in a broad intellectual and cultural context, provide a substantial methodological dimension, and help students develop valuable research skills.

The Department of Religious Studies offers the Master of Arts and the Doctor of Philosophy. It offers the following three basic areas of study.

Modern religious thought—theology, ethics, and culture

Religious thought and culture in early modern Europe and America

Religion and culture in South and East Asia

All graduate students benefit from the department’s selection of three thematic foci of interest: religion and the arts, religion and conflict, and religion and health (including bioethics). These thematic foci give organization and structure to departmental colloquia; guide special programs with guest speakers and graduate student participation; and stimulate new courses, faculty research projects, and doctoral dissertations.

All master’s students take three of the following four courses (032:202, 032:203, and 032:205), which place the world’s religions within broad intellectual and cultural contexts, provide basic training in methodology, and develop valuable research skills. Doctoral students take all four courses.

032:201 Teaching Religious Studies (optional for M.A. students) 3 s.h.
032:202 Asian Religious Traditions 3 s.h.
032:203 Western Religious Traditions 3 s.h.
032:205 Methods and Theories in the Study of Religion 3 s.h.
Master of Arts

The M.A. program is designed for students who wish to advance and deepen their understanding of religion. The degree is available with or without thesis. It requires 30 s.h. of graduate work in religion, of which 24 must be taken at The University of Iowa, and a cumulative g.p.a. of at least 3.00. Requirements for languages and other research tools vary according to the focus of study. The M.A. program is highly flexible, based on student interest. M.A. students are supervised by a three-person faculty committee.

In the M.A. thesis, students demonstrate and refine their research and writing skills. The thesis may count for 6 of the 30 s.h.

Students must pass an M.A. examination that tests their competence in completed course work.

Doctor of Philosophy

The Ph.D. program prepares a select number of students to become specialists in the study and teaching of religion. The department’s program trains students in the research skills they will need to become productive scholars in their chosen field of study. It also trains them to teach religious studies across a broad range of traditions and methods, and it provides rich experiences in the classroom for future teachers.

The Ph.D. program requires 72 s.h. of course work, of which 24 may be transferred from another accredited graduate school. Formal admission to Ph.D. candidacy occurs during the student’s fourth semester of residency, providing the following conditions are met:
- completion of three of the four required courses, with the fourth in progress (see “Graduate Programs,” above);
- evidence of the ability to write scholarly papers;
- a cumulative University of Iowa g.p.a. of at least 3.40;
- satisfactory progress toward the language requirements of the individual student’s program; and
- submission of a plan of study.

Course requirements vary in the different areas of concentration (see “Graduate Programs” above). However, all students must take at least four graduate seminars in their area and complete the four general courses designed specifically for graduate students.

Students must pass a comprehensive examination based on a bibliography that covers the foci within each area. They also must write a dissertation based on original research and defend it in oral examination. The dissertation may count for up to 12 s.h.

Students working toward a Ph.D. may receive an M.A. upon completing at least 30 s.h. of course work and successfully passing the comprehensive examination.

For more detailed information on graduate programs in religious studies, contact the Department of Religious Studies or visit its web site, or contact the University’s Office of Admissions.

Financial Support

The Department of Religious Studies offers financial support for graduate students in the form of research and teaching assistantships as well as Graduate College fellowships. The department also may nominate eligible applicants for the Presidential Graduate Fellowship.

The Gilmore Scholarship, for doctoral students interested in the relationships among religion, the visual arts, and humanistic values, pays up to full tuition for one year.

Financial aid awards are made annually on a competitive basis.
Language Study at the University

The University offers a variety of modern European languages (see French and Italian, German, and Spanish and Portuguese in the Catalog) as well as Greek and Latin (see Classics in the Catalog); Arabic (see Linguistics in the Catalog); and Japanese, Chinese, Sanskrit, and Hindi (see Asian Languages and Literature in the Catalog).

Courses

032:001 Judaism, Christianity, and Islam 3 s.h.
Introduction to Judaism, Christianity, and Islam; scriptural foundation and historical development of the three traditions examined through text, art, music, literature, law, and philosophy; readings from Hebrew Bible, New Testament, Qur'an, and from Jewish, Christian, and Muslim thinkers. GE: historical perspectives.

032:002 Religion and Society 3 s.h.
Meaning of religious questions and answers in traditional and modern social contexts in the West. Offered spring semesters. GE: humanities.

032:003 Quest for Human Destiny 3 s.h.
Quests for destiny in terms of perceived options/goals and ability to recognize, pursue, achieve them. GE: humanities.

032:004 Living Religions of the East 3 s.h.
Religious beliefs, practices in India, China, Japan. GE: foreign civilization and culture or historical perspectives. Same as 039:064.

032:006 Introduction to Buddhism 3 s.h.
Basic tenets, religious paradigms, historical phases important in the development of Buddhism; from the Buddha's life to evolution of Mahayana Buddhism; readings from India, Tibet, China, Japan, Korea, Southeast Asia. Same as 039:006.

032:007 Asian Humanities: Japan 3 s.h.
GE: foreign civilization and culture or humanities. Same as 039:020.

032:008 Asian Humanities: India 3 s.h.
Four thousand years of South Asian civilization. GE: foreign civilization and culture or humanities. Same as 039:018.

032:009 Asian Humanities: China 3 s.h.
GE: foreign civilization and culture or humanities. Same as 039:019.

032:010 Chinese Religions 3 s.h.
Survey of Chinese religions; Chinese traditional religious beliefs and practices among the elite and the general population; recent developments in mainland China, Taiwan, and the West; religious ideas of Confucianism, Daoism, aspects of Buddhism, ancestor worship, cults of deities, practices such as spirit possession, faith healing, ghost marriages. Same as 039:007.

032:013 Personalities of the Old Testament 3 s.h.
Significant male, female figures of biblical Israel—thier ancient literary and social contexts; continuing impact.

032:015 New Testament Survey 3 s.h.
Literature of New Testament in its historical setting. GE: humanities.

032:016 Religion and Liberation 3 s.h.
Reflections on the life stories of Black Elk, Maya Angelou, and the Dalai Lama. GE: cultural diversity or humanities.

032:020 War and Peace in Western Religious Thought 3 s.h.
History, major themes, and contemporary applications of western religious traditions regarding proper use of armed force; Christian just war and pacifist traditions, Islamic traditions of jihad, debates of issues such as humanitarian intervention, terrorism, nuclear weapons.

032:025 Medieval Religion and Culture 3 s.h.
Religious in Europe from classical antiquity to dawn of the Reformation; the religious element in traditions such as art, architecture, literature. GE: historical perspectives. Same as 016:035.

032:026 Modern Religion and Culture 3 s.h.
European and American religious life from Renaissance to 21st century; focus on specific themes, such as secularism, regionalism, pluralism. GE: historical perspectives. Same as 016:036.

032:030 Introduction to Islam 3 s.h.
Major areas of Islamic religious tradition: Qur'an, traditions of the Prophet, development and character of Islamic law, theology. GE: foreign civilization and culture and historical perspectives.

032:032 Introduction to Qur'an 3 s.h.
Prophet, development and character of Islamic law, theology. GE: historical perspectives. Same as 016:035.

032:034 Introduction to African American Religions 3 s.h.
Same as 129:050.

032:036 African American Islam/International Perspective 3 s.h.
GE: historical perspectives. Same as 149:060.

032:038 Middle East and Mediterranean 3 s.h.
GE: foreign civilization and culture or humanities. Same as 039:060.

032:040 Landscapes of the Sacred: Native American Thought 3 s.h.
How American Indians maintain and renew the relationship between humans and the land through creative use of thought, language, and the material world. Same as 149:064.

032:042 War and Peace in Western Religious Thought 3 s.h.
History, major themes, and contemporary applications of western religious traditions regarding proper use of armed force; Christian just war and pacifist traditions, Islamic traditions of jihad, debates of issues such as humanitarian intervention, terrorism, nuclear weapons.

032:046 Introduction to Catholicism 3 s.h.
Catholic doctrine, liturgy, moral teaching.

032:055 Religion and Violence in America 3 s.h.
Movements in North American history marked by violence (i.e., Peoples Temple, Lakota Ghost Dance, Branch Davidians, Shawnee Movement); the role of violence in expressing and shaping some religious movements.

032:056 Christianity in the United States 3 s.h.
Religious in Europe from classical antiquity to dawn of the Reformation; the religious element in traditions such as art, architecture, literature. GE: historical perspectives. Same as 016:035.

032:058 Liturgy and Devotion in Christian Tradition 3 s.h.
Liturgy and devotion in western Christianity; Medieval Christian tradition, changes in liturgy and devotion that occurred with reformations of the 16th and 17th centuries; overview of modern developments. Same as 016:058.

032:060 Introduction to Native American Religions 3 s.h.
GE: cultural diversity. Same as 149:060.

032:062 Middle East and Mediterranean 3 s.h.
Alexandre Suleiman
GE: foreign civilization and culture. Same as 016:045, 20E:071.

032:063 African American Islam/International Perspective 3 s.h.

032:064 Landscapes of the Sacred: Native American Literature and Art 3 s.h.
How American Indians maintain and renew the relationship between humans and the land through creative use of thought, language, and the material world. Same as 149:064.

032:067 Theological Questions 3 s.h.
Treatment of basic religious questions, such as the meaning of "God," nature of religious symbols, phenomena of skepticism and atheism.
032:071 Sexual Ethics 3 s.h.
Christian, Jewish, secular perspectives on meaning and value of human sexuality, contemporary sexual ethical issues. Same as 154:071.

032:075 Asian Religious Classics 3 s.h.
Works of South and East Asia; may include Bhagavad Gita, Life of Milarepa, Mencius, Great Learning, Chung-ju, Lorus Sutra, Platform Sutra, selected Korean and Japanese works. Same as 039:075.

032:076 American Indian Environmentalism 3 s.h.
Same as 149:076.

032:078 American Indian Women: Myth, Ritual, and Sacred Power 3 s.h.
Same at 149:082.

032:080 Spirituality and Mysticism 3 s.h.
Classic texts, from Western religious traditions, that address possibilities and paths of experiencing the divine.

032:082 American Indian Activism 3 s.h.
Same at 149:080.

032:084 Introduction to Mysticism 3 s.h.
Mysticism and mystical experiences in religious traditions.

032:085 Early Modern Catholicism 3 s.h.
Same at 16E:085.

032:088 Religion and Health 3 s.h.
Contributions of Syro-Palestinian archaeological research to understanding historical, cultural backgrounds of biblical period.

032:100 Biblical Hebrew I 3 s.h.
Literary, historical, analysis of main developments, 1915-present.

032:101 Biblical Hebrew II 3 s.h.

032:102 Biblical Hebrew III 3 s.h.
Continuation of 032:101. Prerequisites: 032:100 and 032:101, or equivalents.

032:103 Biblical Archaeology 1, 3 s.h.
Contribution of Syro-Palestinian archaeological research to understanding historical, cultural backgrounds of biblical period.

032:104 Egyptian Art 3 s.h.
Same at 01H:110.

032:105 The World of the Old Testament 3 s.h.
Historical, intellectual background; focus on patterns of thought, religion in Near East, relation to Israelite religion.

032:106 Theology of the Old Testament 3 s.h.
Ancient Israel's perspective on God, world, and individual through focus on dominant biblical themes.

032:107 The Psalms and Wisdom of Biblical Israel 3 s.h.
Psalms, Proverbs, and Job as classics of Biblical hymnody and wisdom poetry, diverse psalm types and wisdom discourse (traditional and critical) in literary, religious, cultural contexts.

032:108 Prophecy in Biblical Israel 3 s.h.
Literary, historical, theological analysis of prophetic movement in ancient Israel and its continuing impact.

032:111 Religion and Women 3 s.h.
Sexism and its disavowal in biblical narrative, law, wisdom texts, Gospels, epistles, contemporary impact. GE: humanities. Same as 131:111.

032:112 The Bible in Film: Hollywood and Moses 3 s.h.
How Hollywood has interpreted the Biblical stories of Adam and Eve, Moses, and David the King.

032:116 Religion in Japan 3 s.h.

032:117 Death, Dying, and Tradition 2-3 s.h.

032:118 Roman Religion and Society 3 s.h.
Religious beliefs, practices, and writings of Romans from eighth century B.C.E. to second century C.E. GE: humanities. Same as 20E:116.

032:119 Jewish Mysticism 3 s.h.
History of Jewish mystical thought over the past 2,000 years.

032:121 The Hebrew Bible and Diet 3 s.h.
Why the biblical God permits humans to eat other animals' flesh; fundamental dietary differences between humans and the beasts.

032:122 The World of the New Testament 3 s.h.
Formative political, cultural, and religious factors influencing emergence of the New Testament and earliest Christianity.

032:125 Libraries in Western Culture 3 s.h.

032:126 Twentieth-Century African American Religion: Civil Rights to Hip-Hop 3 s.h.
Twentieth-century African American religious history; major political and cultural movements, such as civil rights, black power, black feminism/womanism, hip-hop. Same at 129:123.

032:127 Nonprofit Organizational Effectiveness I 3 s.h.
Same at 024:147, 025:176, 042:157, 049:175, 06E:147, 096:168.

032:128 Nonprofit Organizational Effectiveness II 3 s.h.

032:130 Religion and Environmental Ethics 3 s.h.
Same as 033:139, 113:139.

032:131 Urban Religious Experience: New Orleans 3 s.h.
Religious worldviews in America, colonial times to present, that breaks with received tradition, and reconceptualize the human condition and religious redemption. Same as 16A:125.

032:132 Medieval and Reformation Religious Thought 3 s.h.
Classics of patristic, scholastic, reformation theology; special attention to relationships among authors, periods, genres.

032:133 Religion, Music, and Culture in Black New Orleans 3 s.h.

032:134 Islamic Sects 3 s.h.

032:135 American Revolutionary Theologies 2-3 s.h.
Religious worldviews in America, colonial times to present, that emerge during cultural change or perceived danger, make startling breaks with received tradition, and reconceptualize the human condition and religious redemption. Same as 16A:125.

032:136 Religious Thought in Enlightenment 3 s.h.
Religious thought (1680-1790) that challenged the legitimacy of tradition and attempted to base all of life, including religion, on nature and reason; readings from Spinoza to Lessing, Kant.

032:137 Religious Thought in the Nineteenth Century 3 s.h.

032:138 Religious Thought in the Twentieth Century 3 s.h.
History, analysis of main developments, 1915-present.

032:140 Religion and Literature 3 s.h.
Religious themes in great works of literature.

032:141 Varieties of American Religion 3 s.h.
World views of religious groups (e.g., Mormon, Scientology), Jehovah’s Witnesses, Black Muslim, Unification Church of Sun Myung Moon). Same as 16A:122.

Religion in Ancient India

Upansads, including the Bṛhadāranyaka and Chāndogya, early literature on yoga, with focus on ideas of self, god, structure of cosmos, nature of transcendence. Same as 039:236.

Seminar: East Asian Religion

Emphasis on China and/or Japan. Same as 039:237.
The Department of Rhetoric offers courses that complete the College of Liberal Arts and Sciences General Education Program rhetoric component and provides individual instruction in its Writing Center and Speaking Center. It also offers other undergraduate courses and graduate seminars.

Students interested in continued study of rhetoric once they have completed the rhetoric component of the General Education Program may enroll in upper division rhetoric courses. Many of these are cross-referenced with and may be used toward majors in other academic departments at the University.

Graduate students in many disciplines, including American studies, anthropology, communication studies, comparative literature, classics, English, history, journalism, political science, and others, may find rhetoric courses valuable to their program of study.

General Education Courses

General Education courses in rhetoric help students

- read with understanding and enjoyment, and write and speak about reading with personal authority and analytical skill;
- use writing and speaking to discover and explain, question and defend positions in a controversy;
- take into account fundamental rhetorical concepts such as audience, purpose, and appropriateness in discussing controversies and in devising effective communication.

All undergraduates—including transfer students—must complete the rhetoric component of the General Education Program in one of the following ways:

- pass 010:001 Rhetoric I and 010:002 Rhetoric II (total of 8 s.h.);
- pass 010:003 Accelerated Rhetoric (4 s.h.) or 010:005 Rhetoric of Scientific Inquiry (4 s.h.);
- earn credit through the AP program and pass 010:006 Speaking and Reading (3 s.h.);
- transfer 3 s.h. of credit in an expository writing course and pass 010:003 Accelerated Rhetoric (4 s.h.);
- transfer 3 s.h. of credit in a public speaking course and pass 010:003 Accelerated Rhetoric (4 s.h.);
- transfer 3 s.h. of credit in an expository writing course and 3 s.h. of credit in a public speaking course and pass 010:004 Writing and Reading (3 s.h.); or
- transfer 6 s.h. of credit in two expository writing courses and pass 010:006 Speaking and Reading (3 s.h.).

During their first semester at the University, students should enroll in the rhetoric course indicated on their degree evaluations (unless a delay is required). Students must enroll in a rhetoric course each semester until the requirement has been satisfied. Students must complete all English as a Second Language (ESL) prerequisites before registering for any rhetoric course.

Placement is ordinarily determined by scores on the ACT, SAT, or Advanced Placement English Language Exam or English Literature Exam, and any available transfer credit. Students who question their placement should bring their degree evaluations and their ACT or SAT scores to the Rhetoric Department office during registration.

Students who have undergone formal evaluation by Student Disability Services and are found to be learning disabled in reading, writing, or speaking
should request reasonable accommodations in order to complete rhetoric. Accommodations may be arranged by Student Disability Services in consultation with the Rhetoric Department and individual instructors.

Satisfactory completion of rhetoric is a prerequisite for the General Education Program course 08G:001 The Interpretation of Literature.

</tbody>
</table>
The Russian program trains students in both written and spoken Russian and in Russian literature. It also provides them with an understanding and appreciation of Russian culture. A knowledge of Russian is seldom an end in itself; rather it complements another endeavor. Accordingly, the program encourages all of its students to pursue a joint major and to develop their interests in related or complementary fields.

Historically at Iowa, many students have combined study of Russian with a double major in fields such as history, linguistics, political science, and economics.

Through the University’s Bachelor of Arts degree program in international studies, interested students can focus their undergraduate training on a broader interdisciplinary understanding of this region of the world. For more information on this complementary B.A. program, see International Studies in the Catalog.

With the continued importance of Russian as a language of science and commerce, many students find that training in the language is an important asset to careers in the natural and physical sciences, engineering, medicine, and business. Students of journalism, library science, and the social and military sciences also have strengthened their career preparation through the study of Russian. Some students major in Russian before going into law, international relations, or another profession; others study Russian as preparation for graduate work in Slavic languages and literatures, comparative literature, English, or other humanistic disciplines.

Russian majors with a B.A. and the required education courses occasionally seek teaching careers in secondary schools; for description of relevant teacher preparation programs, see Teaching and Learning (College of Education) in the Catalog.

A number of governmental agencies are interested in job candidates who have advanced training in Russian; these agencies give preference to applicants who couple strong language proficiency with a well-rounded background in area studies. Students who develop an exceptional facility with the language may pursue careers in literary and technical translation and interpretation.

**Undergraduate Program**

Students working toward a B.A. in Russian must meet the College of Liberal Arts and Sciences general degree requirements and earn at least 26 s.h. of credit in advanced Russian courses. The following courses are required.

**One of these:**
- 041:109 Beginning Composition and Conversation I 4 s.h.
- 041:110 Beginning Composition and Conversation II 4 s.h.

**Both of these sequences:**
- 041:111-041:112 Third-Year Russian I-II 8 s.h.
- 041:113-041:114 Fourth-Year Russian I-II 8 s.h.

**Three of these:**
- 041:098 Introduction to Russian Culture 3 s.h.
- 041:099 Russia Today 3 s.h.
- 041:100 Russian Literature in Film 3 s.h.
- 041:101 Russian Literature in Translation 1800-1860 3 s.h.
- 041:102 Russian Literature in Translation 1860-1917 3 s.h.
- 041:103 Russian Literature since 1917 3 s.h.
- 041:126 Cult Films of the Last Soviet Generation 3 s.h.
- 041:155 Tolstoy and Dostoevsky 3 s.h.
- 041:156 Invitation to Nabokov 3 s.h.
- 041:160 Women in Russian Society 3 s.h.
- 041:170 Rise of the Russian Novel 3 s.h.
- 041:187 Russian Language and Civilization 3 s.h.
- 041:188 Topics in Russian Language and Civilization II 3 s.h.
Students majoring in Russian are urged to choose elective courses in economics, geography, history, political science, global health, and international studies. Nearly every avenue of professional training and employment requires a solid background in Russian area studies. For example, criteria for U.S. government employment include substantive knowledge in history, economics, political science, sociological disciplines, scientific specialties, demography, military-related skills, and in some cases cultural and religious background. In-depth knowledge of literature or linguistics without other substantive background may be of limited practical use in gaining employment.

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan.

Before the third semester begins: competence in first-year Russian and at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: competence in second-year Russian and at least one-half of the semester hours required for graduation

Before the seventh semester begins: competence in third-year Russian, an additional course in the major, and at least three-quarters of the semester hours required for graduation

Before the eighth semester: competence in fourth-year Russian and two more courses in the major

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Honors

Russian majors with junior or senior standing, a g.p.a. of at least 3.33 in Russian, and a cumulative University of Iowa g.p.a. of at least 3.33 may enroll in the honors program in Russian. An extensive reading program with discussions, regular reports, and a semester paper constitute each honors work unit of 3 s.h. Students may take up to 9 s.h. of honors in Russian.

Contact the University Honors Program for more information about honors study at Iowa.

Minor

A minor in Russian requires 15 s.h. with a g.p.a. of at least 2.00. Of the 15 s.h., 12 must be taken at The University of Iowa in advanced courses. The program recommends that students seeking a minor in Russian focus their preparation on 100-level courses, such as the sequences 041:109 and 041:110, 041:111 and 041:112, and 041:113 and 041:114. Up to 3 s.h. in courses taught exclusively in English may be counted toward the minor.

Elementary and Secondary Teaching Licensure

Russian majors interested in licensure to teach in elementary and/or secondary schools must successfully complete the requirements for a major in Russian and must be admitted to the College of Education’s foreign language Teacher Education Program. Several courses in the College of Education are required, as is one semester of student teaching in the senior year. All students in the program have the option of earning a K-12 endorsement to teach Russian, along with the bachelor’s degree. For information about the foreign languages Teacher Education Program and graduate programs in foreign language education, contact the Department of Teaching and Learning.

Students who plan to use a Russian minor to teach at the elementary and/or secondary level must contact the College of Education concerning requirements.

Language for Nonmajors

The program offers a sequence of courses that may be used to complete the General Education Program. Students who have had experience with Russian should take the Russian Foreign Language Placement Test, offered during summer orientation programs and monthly by Evaluation and Examination Service. The test helps determine the level at which a student should begin Russian language study at The University of Iowa. Students with no background in Russian should begin their study with 041:001. The sequence 041:001, 041:002, 041:003, and 041:004 can be used to complete the General Education Program foreign language component. The Russian program also offers course work in several East European languages, including Czech, Croatian, and Polish.
**Graduate Program**

Admission to the graduate program in Russian has been suspended.

**Summer and Study Abroad Programs**

The program strongly encourages students to participate in intensive programs of language study, both in the United States and in Russia. University of Iowa students participate in summer, semester, or academic year programs under the auspices of the American Council of Teachers of Russia (ACTR), the association that directs academic language training programs in Moscow and St. Petersburg.

Before they study abroad, many students advance and refine their Russian language skills in various intensive summer programs at major American universities, including The University of Iowa. Inquiries should be directed to the Russian program.

**Course Work for Nonmajors**

A number of classes are open to all University students and are offered in English. These include survey courses in Russian literature and culture, a monograph course on Tolstoy and Dostoevsky, and courses on women in Russian society, Russia today, and Russian civilization and folklore.

**Special Activities**

The International Crossroads Community is located in Hillcrest Residence Hall. It welcomes both American and international students to broaden their knowledge of international issues and foreign languages and cultures. Its programs, designed for students of Russian as well as other languages, include weekly language dinners with students and faculty, public festivals and celebrations of cultural holidays, educational presentations on topics such as study abroad and international careers, and music and theater performances.

**Language Media Center**

The University's Language Media Center provides facilities for language learning, teaching, and research. Equipment in the center includes state-of-the-art computer, audio, and video facilities as well as standard and short-wave radios, tape and cassette recorders, record players, and soundproof recording rooms. An electronic classroom, a soundproof workroom, and a library of tape, disc, and cassette recordings also are available.

**Courses**

**For Undergraduate and Graduate Students**

- **041:001 First-Year Russian I** 4 s.h.
  Basic language skills of listening, speaking, reading, and writing; fundamentals of Russian grammar. GE: foreign language.

- **041:002 First-Year Russian II** 4 s.h.
  Continuation of 041:001. GE: foreign language. Prerequisite: 041:001.

- **041:003 Second-Year Russian I** 4 s.h.
  Transition to upper-level study through oral practice, grammar exercises, tapes, videos, readings from the Russian press. GE: foreign language. Prerequisite: 041:002 or equivalent.

- **041:004 Second-Year Russian II** 4 s.h.
  Continuation of 041:003. GE: foreign language. Prerequisite: 041:003.

- **041:098 Introduction to Russian Culture** 3 s.h.
  Development of cultural history in Russia from middle ages to present; painting, music, architecture, literature viewed against their political, historical, and social settings. Taught in English. GE: foreign civilization and culture.

- **041:099 Russia Today** 3 s.h.
  Contemporary Russia, with focus on prevailing social, political, economic, ethnic, environmental conditions; attention to historical evolution of problems, current factors; what these factors might portend for the future. Taught in English. GE: foreign civilization and culture.

- **041:100 Russian Literature in Film** 3 s.h.
  Transposition between the media of literature and film.

- **041:101 Russian Literature in Translation 1800-1860** 3 s.h.
  Major writers, themes, genres, and movements, including Pushkin, Lermontov, Gogol, Turgenev, Chernyshyevsky, Goncharov, Dostoevsky; analytical and literary/historical approach, with attention to the polemic between Westernizers, Slavophiles. Taught in English. GE: humanities.

- **041:102 Russian Literature in Translation 1860-1917** 3 s.h.
041:103 Russian Literature since 1917 3 s.h.
Major writers, themes, genres, movements associated with post-1917 Russian literature, especially the literary ferment of the 1920s; regimentation of literary expression from the early 1930s to Stalin’s death; major trends in post-Stalin literature. Taught in English.

041:104 Health Care and Health Reforms in Russia 3 s.h.
Societal changes and their continuing effect on the Russian health care system; guest lectures from political science, public health, nursing, medicine, cultural anthropology. Same as 152:170, 174:170.

041:108 Special Readings arr.
Russian-language materials determined by student and instructor. Prerequisite: 16 s.h. of language instruction.

041:109 Beginning Composition and Conversation I 4 s.h.
Oral/aural skills developed through idiomatic usage, stylistics, phonetics, intuition, grammar review; supplemented by short stories, newspaper texts. Taught in Russian. Prerequisite: 041:004.

041:110 Beginning Composition and Conversation II 4 s.h.
Oral/aural skills developed through idiomatic usage, stylistics, phonetics, intuition, grammar review; supplemented by short stories, conversation handbooks, current periodicals. Taught in Russian. Prerequisite: 041:004.

041:111 Third-Year Russian I 4 s.h.
Advanced grammar, reading, conversation, and written skills through oral reports, compositions, conversation. Prerequisite: 041:004 or equivalent.

041:112 Third-Year Russian II 4 s.h.
Advanced grammar, reading, conversation, and written skills through oral reports, compositions, conversation. Prerequisite: 041:111 or equivalent.

041:113 Fourth-Year Russian I 4 s.h.
Proficiency building in vocabulary and grammatical foundations of native speech. Taught in Russian. Prerequisite: 041:112 or three years of college-level Russian or equivalent.

041:114 Fourth-Year Russian II 4 s.h.
Proficiency building in vocabulary and grammatical foundations of native speech. Taught in Russian. Prerequisite: 041:113 or three years of college-level Russian or equivalent.

041:115 Literary Genres in European Literature II 3 s.h.
Literary realism. Same as 008:120, 048:115.

041:121 First-Year Polish I 4 s.h.
Basic language skills—listening, reading, speaking, writing; fundamentals of grammar; emphasis on student participation; first of a two-semester sequence.

041:122 First-Year Polish II 4 s.h.
Continuation of 041:121. Prerequisite: 041:121.

041:123 Second-Year Polish I 4 s.h.
Proficiency in vocabulary and grammatical foundations of elementary Polish; use and recognition of oral, aural, written, and reading language skills. Prerequisite: 041:122.

041:124 Second-Year Polish II 4 s.h.
Continuation of 041:123. Prerequisite: 041:123.

041:125 Third-Year Polish I 3 s.h.
Advanced language skills—listening, speaking, reading, writing, advanced grammar; emphasis on student participation; first of a two-semester sequence. Prerequisite: 041:124 or equivalent.

041:126 Cult Films of the Last Soviet Generation 3 s.h.
Same as 048:126.

041:127 Third-Year Polish II 3 s.h.
Continuation of 041:125. Prerequisites: 041:125 or equivalent; closed to heritage speakers.

041:128 Topics in Russian Music and Culture 3 s.h.
A wide variety of works, from 19th-century operas to popular songs of the 1960s; musical and textual features that make the works distinctively Russian.

041:141 First-Year Czech I 4 s.h.
Basic language skills—listening, reading, speaking, writing; fundamentals of grammar; emphasis on student participation; first of a two-semester sequence.

041:142 First-Year Czech II 4 s.h.
Continuation of 041:141. Prerequisite: 041:141.

041:143 Second-Year Czech I 4 s.h.
Proficiency building in vocabulary and grammatical foundations of elementary Czech; use and recognition of oral, aural, written, and reading language skills. Prerequisite: 041:142 or equivalent.

041:144 Second-Year Czech II 4 s.h.
Continuation of 041:143. Prerequisite: 041:143.

041:147 Czech Post-World War II Society and Political History 3 s.h.
Survey of post-World War II social and political history, focusing on major events such as World War II, Prague Spring, and Velvet Revolution, from Czech and non-Czech perspectives; history, literature, and selected documentary and feature films. Taught in English.

041:155 Tolstoy and Dostoevsky 3-4 s.h.
Tolstoy’s War and Peace, Anna Karenina; Dostoevsky’s Crime and Punishment, The Brothers Karamazov; and short stories. Taught in English. Same as 008:155.

041:156 Invitation to Nabokov 3 s.h.
Nabokov’s works and his writings on Russian literature. Same as 008:156, 048:156.

041:160 Women in Russian Society 3 s.h.
Historical developments that have shaped women’s role in contemporary Russian society; readings in cultural history, political science, autobiographical and fictional literature, contemporary film. Taught in English.

041:164 Topics in Russian, East European, and Eurasian Studies arr.
Same as 048:164.

041:166 The Invisible Woman 3 s.h.
Pre- and post-1989 roles of women in three Central and East European countries; approaches from the social sciences and humanities. Same as 131:166.

041:168 Twentieth-Century Czech Authors 3 s.h.
Twentieth-century prose literature of Czechoslovakia; philosophical works of Capek, Hrabal, Kundera, Klima, Havel. Taught in English. Same as 048:154.

041:170 Rise of the Russian Novel 3 s.h.
Russian literary history, theory of the novel, genre theory, PUSHKIN to DOSTOEVSKY. Taught in English. Prerequisite: junior or higher standing. Same as 048:170.

041:171 First-Year Uzbek I 4 s.h.
Reading, listening, speaking, writing.

041:172 First-Year Uzbek II 4 s.h.
Continuation of 041:171. Prerequisite: 041:171 or consent of instructor.

041:180 Literature and Translation 3 s.h.
Same as 048:180, 160:180.

Social Work

Director: Salome Raheim
Professors: Lorraine Dorfman, Jim Hall (Pediatrics/Social Work/Community and Behavioral Health)
Professors emeriti: H. Wayne Johnson, Patricia L. Kelley, Thomas H. Walz
Associate professors: Amy Butler, Carol Coxhey, Carolyn Hartley, Susan Murty, Salome Raheim, Edward J. Saunders
Associate professor emeritus: William M. Theisen
Adjunct associate professors: Lois Braverman, Rita Melisiano, Brad Richardson
Clinical associate professors: Robert Jackson, Judith Rinehart
Assistant professors: Mercedes Bern-Klug, Miriam Landisman, Pamela Noel, Sara Sanders, Jeanne Saunders, Robert Schope
Assistant professor emerita: B. Eleanor Anstey
Adjunct assistant professors: Larry Allen, Mike Bandstra, James Cone, Greg Jensen, Paul Lambakis, Mari Samuelson, Stephen Trefz, Frank Ware, Stuart Zisman
Clinical assistant professors: Yvonne Farley, M. Billie Marchak, Julia Rembert, Robert Vander Beek
Adjunct instructors: Susan Ackelson, Ed Barnes, Nancie Blum, Jean Boger, Vareta Braden, Lou Buntz, John-Paul Chaisson, Jim Clark, Raygna Curry, Suzanne Dell, Monique DiCarlo, Sael Engel, Sr. Shirley Fineran, Judy Foote, Robert Freeman, Joel Fry, Dan Gristead, Sandra Hecht, Barbara Hirsch-Giller, William Hood, Sandra McGee, Kathryn McKinley, Lynn Meincke-Wohlers, Ron Mirr, Pam Moore, Mary Newcomb, Greg Nooney, Alison Oliver, Sarah Oliver, Loni Parrott, Kathleen Ruyte, Elizabeth Smith, Mark Smith, Diane Sonnevils, Scott Stange, Joy Sutter, Eileen Swoboda, Ellen Szabo, Michael Thompson, Diane Tonkyn, Molly Twigg, Pamela Valera, Harriet VanZele, Kristine Warford, Ross Wilburn, Brian Wilkes, Barbara Willoughby, Carol Wintersoub, Sue Wint, Joel Wulf, Joanne Young
Undergraduate degree: B.A. in Social Work
Undergraduate nondegree program: Minor in Social Work
Graduate degrees: M.S.W., Ph.D.
Web site: http://www.uiowa.edu/~socialwk

Using family-centered and community-based practice approaches, the school prepares social work scholars and practitioners with a commitment to social justice and social work values and ethics.

The school provides a program of professional training accredited by the Council on Social Work Education at the baccalaureate and master’s levels, aimed at developing effective intervention in multiple systems and using professional social work values and ethics. It also offers a Ph.D. program, which prepares students to conduct research that contributes to the knowledge base of social work, to be leaders in setting policy and practice, and to teach in colleges and universities.

Undergraduate Program

The B.A. program prepares students for beginning professional social work practice as generalists. Graduates find employment in public and private social services in home and community-based settings such as public welfare, child welfare, health, mental health, elderly services, and corrections. They are equipped to be informed community participants in social welfare issues.

Social work students are challenged to excel academically, think analytically, and apply theory to practice, in preparation for continuing their education at the graduate level.

Selective Admission

The School of Social Work seeks to maintain a heterogeneous student body by enrolling students who represent diverse backgrounds and cultural perspectives.

A limited number of students are admitted to the major. The application deadline is March 1. Admission to the undergraduate program in social work requires:

- completion of 042:022 Introduction to Social Work with a grade of C or higher (should be taken the sophomore year);
- a cumulative g.p.a. of at least 2.50 (exceptions may be made for persons who do not meet the grade-point average requirement if they are...
strong candidates on the basis of other criteria; and
completion of application forms and statement.
Meeting these requirements does not guarantee admission. Admission often is limited by available instructional resources and opportunities for field placement.

For more information about admission policies, contact the School of Social Work undergraduate coordinator or admissions coordinator.

**Bachelor of Arts**

B.A. students in social work must complete the College of Liberal Arts and Sciences General Education Program. The major requires 002:021 Human Biology; many students complete this course as part of the General Education Program. The minimum requirements for a B.A. in social work include the following:

- **002:021 Human Biology** 4 s.h.
- **Social work courses (begins with 042:022 Introduction to Social Work and culminates with a field experience)** 35 s.h.
- **Concentration area courses (see list of areas)** 12 s.h.
- **Social science courses (12-14 s.h.):**
  - **030:001 Introduction to American Politics** 3 s.h.
  - **031:001 Elementary Psychology** 3 s.h.
  - **034:001 Introduction to Sociology: Principles** 3-4 s.h.
- **One of these social science or quantitative studies elective courses:**
  - **06E:001 Principles of Microeconomics** 4 s.h.
  - **06E:002 Principles of Macroeconomics** 4 s.h.
  - **22S:002 Statistics and Society** 3 s.h.
  - **22S:025 Elementary Statistics and Inference** 3 s.h.
  - **113:003 Introduction to the Study of Culture and Society** 3 s.h.
  - **113:010 Anthropology and Contemporary World Problems** 3 s.h.
- **The school recommends that required course work be taken in the following sequence. Most social work courses are offered only once each year.**

**FIRST AND SECOND YEARS**

- **002:021 Human Biology** 4 s.h.
- **030:001 Introduction to American Politics** 3 s.h.
- **031:001 Elementary Psychology** 3 s.h.
- **034:001 Introduction to Sociology: Principles** 3-4 s.h.
- **042:022 Introduction to Social Work** 4 s.h.
- **One social science or quantitative elective course** 3-4 s.h.

**THIRD YEAR**

- **042:140 Human Behavior in the Social Environment** 4 s.h.
- **042:144 Introduction to Social Work Research** 4 s.h.
- **042:147 Discrimination, Oppression, and Diversity** 3 s.h.
- **042:171 Social Work Processes** 3 s.h.

**FOURTH YEAR**

- **042:141 Fundamentals of Social Work Practice** 3 s.h.
- **042:142 Interpersonal Skills Laboratory** 2 s.h.
- **042:143 Social Welfare Policy and Practice** 3 s.h.
- **042:189 Field Experience Seminar** 1 s.h.
- **042:193 Field Experience** 8-11 s.h.

**CONCENTRATION AREA**

The undergraduate program requires a minimum of 12 s.h. of course work in one of the concentration areas listed below. Most students choose either sociology or psychology as their concentration. Students who wish to meet this requirement in an area not listed must present a written request and rationale to the faculty adviser and undergraduate coordinator. Courses used to complete the General Education Program do not count toward the 12 s.h., nor do courses used to satisfy other requirements of the B.A. in social work.

- African American world studies
- Aging studies
- American studies
- Anthropology
- Business
- Communication studies
- Economics
- Education
- English
- Health and sport studies
- History
- Journalism and mass communication
- Leisure studies
- Political science
- Psychology
- Religious studies
- Sociology
- Spanish
- Women’s studies
Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

Admission to the major in social work is selective. The four-year graduation plan applies only to students who are admitted by the beginning of their fifth semester.

**Before the third semester begins:** at least one-quarter of the semester hours required for graduation

**Before the fifth semester begins:** 042:022, four courses that can be applied to the major (may include concentration area courses), admission to the major, and at least one-half of the semester hours required for graduation

**Before the seventh semester begins:** six more courses in the major and at least three-quarters of the semester hours required for graduation

**Before the eighth semester begins:** four or five more courses in the major and finalized field placement

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Honors

The School of Social Work has an honors program leading to a Bachelor of Arts with honors in social work. A cumulative University of Iowa g.p.a. of at least 3.33 is required for participation in the program, which enables students to do in-depth study in subjects that interest them.

Contact the University Honors Program for more information on honors study at Iowa.

Minor

Students pursuing a minor in social work must complete 042:022 Introduction to Social Work (or for transfer students, an equivalent course from another institution); maintain a g.p.a. of at least 2.00; and earn at least 12 s.h. in University of Iowa social work courses numbered 042:100 and above. Contact the B.A. coordinator for more information.

Graduate Programs

The school offers two graduate degrees: the Master of Social Work and a Ph.D. in social work.

Master of Social Work

The Master of Social Work prepares social workers for leadership in the profession and for advanced social work practice in one of two concentrations. The program’s general focus is on family systems and social change, both domestic and international.

The school offers the M.S.W. program at Des Moines, the Quad Cities, and Sioux City, as well as Iowa City. Each site provides a structured sequence of courses as well as opportunities for individualized plans of study. All sites give students access to the wealth of resources of a Research 1 University. The program’s two concentrations—family-centered practice and integrated practice—offer students knowledge and skills for working with children, elders, families, small groups, organizations, and communities. Students have the opportunity to develop competencies necessary for leadership in addressing unique social work challenges of the State of Iowa, including a high proportion of elders, recent immigrants to rural communities, and rural poverty.

The M.S.W. requires 60 s.h., including 25 s.h. earned in foundation-level courses and 35 s.h. in advanced courses. Students who hold an undergraduate degree from a Council on Social Work Education program earn the master’s degree with 48 s.h. All students must earn a minimum of 36 s.h. after admission to the M.S.W. program.

Students may be allowed 9 to 12 s.h. of graduate transfer credit for previous graduate work.

The school operates a year-round, sequenced graduate program that begins in the fall semester for full-time students who require the full 60 s.h. The program continues through the summer, which is a full semester. Full-time students generally earn the M.S.W. the spring semester of their second year. Those who require 48 s.h. have the option of enrolling full time or part time their first semester.

Full-time study and a four-year part-time program are available in Iowa City and Des Moines. A three-year sequence of courses is available at all sites, although the Sioux City and Quad Cities sites admit new cohorts only on a three-year cycle. All students follow a structured sequence
of courses. They must maintain a cumulative g.p.a. of at least 3.00 and must be promoted each semester in compliance with the school's student advancement policy. A thesis option is available.

Following is an outline of the full-time 60 s.h. program. For information about the three-year and four-year part-time sequences, contact the School of Social Work.

FIRST-YEAR FOUNDATION

Fall Semester
042:140 Human Behavior in the Social Environment 3 s.h.
042:143 Social Welfare Policy and Practice 3 s.h.
042:146 Microcomputer Laboratory 1 s.h.
042:147 Discrimination, Oppression, and Diversity 3 s.h.
042:148 Social Work Research Methods 3 s.h.

Spring Semester
042:150 Social Work Practice with Individuals, Families, and Groups 3 s.h.
042:151 Social Work Practice Skills Lab 1 s.h.
042:145 Organization and Community Practice 3 s.h.
042:270 Advanced Research 3 s.h.
042:290 Foundation Practicum in Social Work 3 s.h.
042:291 Foundation Practicum Seminar 1 s.h.

Summer Session
Electives (including preplacement field practice courses) 4-10 s.h.

SECOND-YEAR CONCENTRATION

Fall Semester
Elective 3 s.h.
One of these:
042:250 Family-Centered Theory and Practice I 3 s.h.
042:260 Integrated Social Work Theory and Practice I 3 s.h.
One of these:
042:292 Advanced Practicum in Family-Centered Practice I and II 5-6 s.h.
042:295 Advanced Practicum in Integrated Practice 5-6 s.h.
One of these:
042:293 Advanced Practicum Seminar in Family-Centered Practice I 1 s.h.
042:296 Advanced Practicum Seminar in Integrated Practice I 1 s.h.

Spring Semester
One of these:
042:251 Family-Centered Theory and Practice II 3 s.h.
042:261 Integrated Social Work Theory and Practice II 3 s.h.
One of these:
042:252 Advanced Social Policy for Family Practice 3 s.h.
042:262 Advanced Social Policy for Integrated Practice 3 s.h.
One of these:
042:292 Advanced Practicum in Family-Centered Practice I and II 5-6 s.h.
042:295 Advanced Practicum in Integrated Practice 5-6 s.h.
One of these:
042:294 Advanced Practicum Seminar in Family-Centered Practice II 1 s.h.
042:298 Advanced Practicum Seminar in Integrated Practice II 1 s.h.

Concentrations

In the advanced year of the master’s program, students choose one of two concentrations: family-centered practice or integrated practice. These advanced specialized curricula build on the school’s liberal arts perspective and on the professional foundation. Both are based on a comprehensive eco-systemic theoretical perspective, and both apply the principles that are part of the school’s mission statement, with a focus on culturally competent family-centered and community-based approaches.

FAMILY-CENTERED PRACTICE

The family-centered practice concentration teaches knowledge and skills necessary for advanced social work practice with individuals and families. These include clinical practice methods that mobilize and develop clients’ coping skills, empowering them to manage difficult situations, and culturally sensitive methods for collaborating with clients, their families, and other professionals in planning interventions. Students also learn about advocating for clients, facilitating client self-advocacy, coordinating services to meet multiple needs, and influencing social policy on behalf of clients.

The concentration prepares students to work with individuals and families at appropriate levels of intensity, mobilize existing strengths, and enhance coping skills. Using principles of family-centered practice, students learn to take
community and larger systems into account while working in partnership with individuals and families in all aspects of assessment and intervention planning. The concentration emphasizes sensitivity to a variety of family forms and to cultural diversity within family forms. “Family” is broadly defined to include step families, single-parent families, same-sex-couple families, grandparent-as-parent families, adult parent-adult child families, and traditional forms of families.

INTEGRATED PRACTICE

The integrated practice concentration teaches methods of advanced practice that empower organizational and community change at multiple system levels. Students learn skills for assessment, planning, and direct intervention in larger systems such as neighborhoods, social support networks, and service delivery systems, and for policy making. They develop skills for a broad range of interventions, including direct practice, case management, community education, community development and practice, management and administration, organizational and interorganizational planning and program development, team building, organization and program evaluation, and social policy advocacy. They also learn culturally sensitive methods to collaborate with families and communities; identify strengths, assets, and challenges; and develop services and programs that will meet clients’ needs.

Building on strengths and assets of organizations and communities, students learn how to mobilize community members in advocacy and change efforts—skills useful for case managers, service coordinators, supervisors, program planners and developers, and administrators. Students also learn how to apply advanced skills to advocacy, community assessment, planning and mobilizing resources, and influencing social policy.

The concentration prepares students for practice in varied settings, including hospitals and community health programs, schools, mental health centers, neighborhood and family resource centers, community- and family-based community service agencies, correctional facilities, and programs that serve the elderly, both in the community and in care facilities. In many of these settings, social workers work as interdisciplinary team members and team leaders within organizations. They also collaborate with community organizations, community residents, and service providers. Many social workers are involved in staff supervision, program development, and agency administration. Content areas include grant writing; intervention in multiple systems, including team and network building; policy practice; and design of evaluation methods for client assessment and program evaluation.

M.S.W. via Distance Education

The School of Social Work delivers the M.S.W. curriculum to three off-campus sites: Des Moines, the Quad Cities, and Sioux City. Each site is administered by the School of Social Work in cooperation with the Division of Continuing Education. Social work faculty members teach required courses at each center and are available for student advising. The off-campus programs have been evaluated by the Council on Social Work Education and The University of Iowa Graduate Council as providing a program comparable to that available on the Iowa City campus.

For program entry and application dates, contact the School of Social Work.

DES MOINES CENTER

The Des Moines Education Center is located in the state’s largest metropolitan area, in central Iowa. It offers courses sequenced to accommodate both part-time and full-time study. Students may complete the entire degree program at the Des Moines center, although they may travel to Iowa City for selected elective courses offered during the summer.

QUAD CITIES CENTER

The Quad Cities Graduate Center (QCGC) is located on the campus of Augustana College in Rock Island, Illinois, on the Iowa-Illinois border. The center offers a part-time program for a cohort admitted once every three years. Students in the Quad Cities part-time program can complete their degree entirely off-campus with the exception of some electives, which they can take during summer sessions in Iowa City or at other area colleges and universities. In addition to the part-time cohort students, there are some full- or part-time students from Iowa City serving in practicums in the Quad Cities. Courses in the Quad Cities program are taught by tenure-track, clinical, visiting, and adjunct faculty members on site and via the Iowa Communications Network.

SIoux CITY CENTER

The Tri-State Graduate Study Center is located in Sioux City, on Iowa’s western border. The Sioux City part-time program is nearly identical to the Quad Cities part-time program. Courses in Sioux City are taught by tenure-track, clinical, visiting,
and adjunct faculty members on site and via the Iowa Communications Network.

Admission

Admission to the M.S.W. program requires the following:

- a bachelor’s degree from an accredited college or university, with a reasonable distribution of courses in the liberal arts and sciences, including the humanities as well as the social, behavioral, and biological sciences;
- competence with word processing and spreadsheet application on personal computers;
- a g.p.a. of 3.00 or higher for the junior and senior years of undergraduate study, or for 12 s.h. of letter-graded graduate course work (exceptions may be granted; consult the School of Social Work);
- a Graduate Record Examination (GRE) General Test score at or near the 50th percentile for the applicant’s reference group;
- three letters of recommendation, including one regarding academic abilities and one from the applicant’s most recent employer (if the employment was social work-related); and
- a personal statement addressing criteria specified by the School of Social Work.

International applicants whose first language is not English must score 600 (paper-based) or 250 (computer-based) or higher on the Test of English as a Foreign Language (TOEFL).

Applications are accepted beginning September 1 and must be completed by February 1 to be considered for the next academic year.

The school seeks to maintain a heterogeneous student body by enrolling students who represent diverse backgrounds and cultural perspectives. Previous experience in the human services and cross-cultural experiences are desirable.

For a complete statement of graduate admission policies, contact the School of Social Work.

Financial Support

Students seeking financial assistance should apply for aid through The University of Iowa Office of Student Financial Aid. Students may apply for a limited number of research and teaching assistantships available from the School of Social Work. Application materials for research or teaching assistantships are available from the school each spring, or as positions become available. Aid received through the Office of Student Financial Aid does not preclude students from consideration for aid through the School of Social Work.

Joint Master’s Degrees

The school has formal agreements for joint graduate degrees with the College of Law and the Program in Urban and Regional Planning. To participate, students must apply and be admitted to each program. In each program, up to 12 s.h. of letter-graded graduate course work (exceptions may be granted; consult the Department of American Studies, the Department of Religious Studies, and the School of Journalism and Mass Communication. Students are encouraged to take courses in other departments whether or not they are pursuing joint degrees.

Cooperative Programs

Graduates of accredited M.S.W. programs may be eligible for associate membership in the American Association of Marriage and Family Therapists (AAMFT) upon fulfilling certain curriculum requirements at the graduate level. Courses are not automatically accepted; graduates need to demonstrate that specific courses meet the AAMFT’s requirements, usually by sending course outlines.

The School of Social Work participates in the Certificate in Aging Studies program through the College of Liberal Arts and Sciences (see Aging Studies in the Catalog). Students can earn the certificate concurrently with the M.S.W. program; they must apply independently to the Aging Studies Program coordinator.

The school cooperates with the College of Education to provide curricula that meet requirements for school social work endorsement in Iowa.

Doctor of Philosophy

The Ph.D. program in social work has three major goals: to train students to conduct research that contributes to the knowledge base of social work; to prepare students as leaders in social
work policy and practice with families, children, and the elderly; and to prepare students to teach social work in higher education institutions.

The program focuses on family and emphasizes the well-being of age groups at both ends of the family life cycle: children and the elderly. In a series of required classes and interdisciplinary studies, students develop theoretical, policy, and research skills necessary to advance understanding of children and the elderly within the family context.

This focus is especially appropriate today, when the family as an institution is highlighted in national and state social policy debates. Further, families increasingly are required to care for society's most vulnerable members, including the chronically ill, the mentally challenged, and the elderly. The program’s focus on children and the elderly within the context of family is unique among the region’s doctoral programs.

Requirements

The Ph.D. requires a total of 90 s.h. Students who enter the program with an M.S.W. are granted credit for 30 s.h. and must complete an additional 60 s.h. for the degree. Students with master’s degrees in related fields may apply to the M.S.W./Ph.D. program. They may be granted credit on a case-by-case basis. For information about the M.S.W./Ph.D. program, contact the School of Social Work.

The Ph.D. program’s semester hour requirement is satisfied through course work, research practicums, and dissertation work.

To become Ph.D. candidates, students must satisfy the program’s course work requirements, pass a comprehensive examination, and write a dissertation and defend it in an oral examination.

Each student’s program of study must be approved by his or her doctoral committee.

CORE COURSES

All Ph.D. students must complete the following core courses.

042:300 Proseminar in Social Work: Social Welfare, Policy Programs 1 s.h.
042:301 Knowledge Building in Social Work Practice 3 s.h.
042:302 Knowledge Building in Social Work Policy 3 s.h.
042:303 Research Practicum (taken twice) 6 s.h.
042:304 Advanced Research Seminar 3 s.h.
042:305 Social Work Pedagogy: Theory and Practice 3 s.h.

COMPETENCY REQUIREMENTS

Students must demonstrate scholarly competence in four areas. Some may need to take additional course work to satisfy the competency requirements.

Social work core curriculum (see “Core Courses”) 19 s.h.
Social work focal area (aging, child welfare, diversity, inequality and social justice, substance abuse, mental health) 8-9 s.h.
Minor in an outside discipline (psychology, sociology, or health management policy) 12 s.h.
Research methods, statistics, and data analysis (not included above) 9 s.h.

Admission

Students are admitted for full-time study. Applicants ordinarily must have a master’s degree in social work from a program accredited by the Council on Social Work Education (CSWE). Those with master’s degrees in related fields also may be eligible for admission. Prospective students also may apply to the M.S.W./Ph.D. program.

The school makes special efforts to recruit students from underrepresented minorities, especially Iowa residents. The program accepts four to five students each year.

All applicants should have an undergraduate g.p.a. of at least 3.00 and a composite Graduate Record Examination score of at least 1100 (verbal and quantitative) or an average of 550 on all three sections of the exam (verbal, quantitative, and analytical). All applicants must submit a completed Graduate College application form, undergraduate and graduate transcripts, Graduate Record Examination scores, a personal statement of professional goals, including area of interest and reason for pursuing the Ph.D. (two to three pages), a résumé, a sample of scholarly writing (scholarly publication or research or theoretical term paper), and four letters of recommendation (two must be academic references). International applicants whose first language is not English must submit scores on the Test of English as a Foreign Language (TOEFL).

Applicants must submit the application form, fee, and other materials to the Office of Admissions. An application packet and list of guidelines are available from the office. Applications are due no later than February 1 for the following academic year.
Financial Support
All doctoral students are guaranteed financial support for two years of the program. This support consists of research assistantships, teaching assistantships, or fellowships. Graduate assistants also are eligible for tuition scholarships, and students who hold assistantships of one-quarter time or more pay resident tuition.

Special Projects and Travel/Study Seminars
Students may become involved in special projects such as the National Resource Center for Family-Centered Practice and the School of Social Work gerontology end-of-life care programs.

The school also offers students the opportunity to participate in travel/study seminars. Urban, rural, national, and international seminars are available.

Continuing Education
Nondegree students may enroll for selected courses and workshops through Saturday Evening Classes in Iowa City and the School of Social Work’s off-campus programs. There are limits on the amount of graduate course work that may be applied to the master’s requirements for students who later enroll in the program.

Courses
Primarily for Undergraduates

042:022 Introduction to Social Work 4 s.h.
Social welfare as a social institution; settings, methodologies of social work practice; profession of social work; historical development of American social welfare; social work; a minimum of 45 hours volunteer work. Prerequisite: sophomore or higher standing or consent of instructor. Same as 034:022.

042:029 First-Year Seminar 1-2 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Prerequisite: first- or second-semester standing.

042:042 Intercultural Communication 3 s.h.
Same as 036:042.

042:112 Human Sexuality 1-3 s.h.

042:117 Improving Outcomes for People with Disabilities 3 s.h.
Social, psychological, and biological aspects; demographics of aging, health, economic issues, primary relationships, social services. Prerequisites: 031:001 or 034:001, and sophomore or higher standing. Same as 096:108, 153:108, 169:108.

042:129 Substance Use and Abuse 3 s.h.
Chemical dependency for helping professions; etiological, physiological, psychological, legal, sociological aspects; treatment methods. Prerequisite: junior or higher standing or consent of instructor.

042:142 Interpersonal Skills Laboratory 2 s.h.
Practice of interpersonal skills required in the helping relationship. Prerequisite: admission to social work B.A. program. Pre or corequisite: 042:141.

042:144 Introduction to Social Work Research 4 s.h.
Scientific approach to knowledge building, with emphasis on critical use of research; quantitative and qualitative methods, evaluation of practice, computerized data analysis, ethics and diversity in social work research. Prerequisite: admission to social work B.A. program or consent of instructor.

042:147 Social Work Processes 3 s.h.
Context of practice examined to understand structural factors that affect clients and communities; culturally competent practice using empowerment perspective. Prerequisite: admission to social work B.A. program. Pre or corequisite: 042:140 or consent of instructor.

042:149 Field Experience Seminar 1 s.h.
Opportunity for students to recount their experiences from generalist practice in agencies; application of knowledge, skills, and values of culturally competent social work. Prerequisite: completion of course work in major. Corequisite: 042:193.

042:157 Nonprofit Organizational Effectiveness I 3 s.h.
Same as 06J:147, 024:147, 025:176, 032:127, 049:175, 096:168.

042:158 Nonprofit Organizational Effectiveness II 3 s.h.

042:168 Family-Centered Practice and the School of Social Work's off-campus programs. There are limits on the amount of graduate course work that may be applied to the master’s requirements for students who later enroll in the program.

042:169 Clinical Social Work 2 s.h.
Opportunity for students to recount their experiences from generalist practice in agencies; application of knowledge, skills, and values of culturally competent social work. Prerequisite: completion of course work in major. Corequisite: 042:193.

042:171 Social Work Research 3 s.h.
Scientific approach to knowledge building, with emphasis on critical use of research; quantitative and qualitative methods, evaluation of practice, computerized data analysis, ethics and diversity in social work research. Prerequisite: admission to social work B.A. program. Pre or corequisite: 042:140 or consent of instructor.

042:172 Social Work Practice 3 s.h.
Context of practice examined to understand structural factors that affect clients and communities; culturally competent practice using empowerment perspective. Prerequisite: admission to social work B.A. program. Pre or corequisite: 042:140 or consent of instructor.

042:173 Clinical Social Work 2 s.h.
Opportunity for students to recount their experiences from generalist practice in agencies; application of knowledge, skills, and values of culturally competent social work. Prerequisite: completion of course work in major. Corequisite: 042:193.

042:174 Social Work Processes 3 s.h.
Context of practice examined to understand structural factors that affect clients and communities; culturally competent practice using empowerment perspective. Prerequisite: admission to social work B.A. program. Pre or corequisite: 042:140 or consent of instructor.

042:175 Nonprofit Organizational Effectiveness I 3 s.h.
Same as 06J:147, 024:147, 025:176, 032:127, 049:175, 096:168.

042:176 Nonprofit Organizational Effectiveness II 3 s.h.

042:189 Field Experience Seminar 1 s.h.
Opportunity for students to recount their experiences from generalist practice in agencies; application of knowledge, skills, and values of culturally competent social work. Prerequisite: completion of course work in major. Corequisite: 042:193.

042:191 Individual Study arr.
Project related to student interest carried out under direction of faculty member.

042:192 Honors in Social Work arr.
Supervised individual research. Prerequisite: honors standing.

042:193 Field Experience arr.
Supervised experience in selected social welfare organizations; application of knowledge and skill common to generalist practice in an agency setting. Prerequisites: completion of course work in the major, and social work senior standing or consent of instructor. Corequisite: 042:189.

For Undergraduate and Graduate Students

*Courses with numbers preceded by asterisks are required for the M.S.W. program.

042:108 Basic Aspects of Aging 3 s.h.
Social, psychological, and biological aspects; demographics of aging, health, economic issues, primary relationships, social services. Prerequisites: 031:001 or 034:001, and sophomore or higher standing. Same as 096:108, 153:108, 169:108.

042:112 Human Sexuality 1-3 s.h.
Physiological, psychological aspects; parameters defined by students, instructor. Same as 07C:112, 096:112.

042:117 Improving Outcomes for People with Disabilities 3 s.h.
Same as 07C:117, 096:117.

042:129 Substance Use and Abuse 3 s.h.
Chemical dependency for helping professions; etiological, physiological, psychological, legal, sociological aspects; treatment methods. Prerequisite: junior or higher standing or consent of instructor.
042:130 Family Development Specialist Model 3 s.h.
Use of family development specialist model of family-centered practice to facilitate improved family functioning, economic independence; relationship building, systems theory, family-centered case management, conflict management, empowerment strategies. Prerequisite: completion of family development specialist certification course.

*042:140 Human Behavior in the Social Environment 3-4 s.h.
Behavior and development in context of social, ecological systems and human diversity; overview of bio-psychosocial dimensions, individual behavior, and development throughout lifespan; contexts of diverse family, group, community, organization, and cultural systems. Prerequisite: admission to social work B.A. or M.S.W. program or consent of instructor.

*042:143 Social Welfare Policy and Practice 3 s.h.
Basic social welfare policies and programs; economic, social, ideological, and political conditions that have influenced formation and implementation of social policy, current structure of major social welfare policies. Prerequisite: admission to social work B.A. or M.S.W. program or consent of instructor.

*042:147 Discrimination, Oppression, and Diversity 3 s.h.
Theoretical and historical perspectives on racism, sexism, other forms of discrimination; applications to social work, culturally competent practice, change strategies. Prerequisite: admission to social work B.A. or M.S.W. program or consent of instructor.

042:185 Social Policy and the Elderly 3 s.h.
Public social policies, their impact on well-being of elderly, including women and minorities; U.S. and other nations' policies. Prerequisites: 042:143, an introductory course on aging, and junior or higher standing, or consent of instructor. Same as 153:185.

042:186 Death/Dying: Issues Across the Life Span 3 s.h.
Introduction to death and dying; historical, cultural, societal, personal perspectives. Prerequisite: admission to School of Social Work or Aging Studies Program, or consent of instructor. Same as 153:186.

042:190 Field Work in Gerontology arr.
Opportunities for students in various disciplines to relate their areas of study to elderly aging; interdisciplinary relationships, approaches to meeting needs of elderly. Same as 153:190.

042:194 Social Work Practice in Health Care Settings 2 s.h.
Introduction to organization, provision of social work services in health care settings; practice issues such as models of intervention, ethical questions, impact of cultural diversity on health care. Prerequisite: 042:141 or 042:150 or consent of instructor.

042:195 Introduction to Nursing Homes 3 s.h.
Same as 153:195.

042:196 Family Violence 2-3 s.h.
Child abuse and neglect, domestic violence, elder abuse; causes, policy aspects, identification, reporting, treatment, prevention.

042:197 Child Welfare Policy and Practice 3 s.h.
Public and private child welfare practice and organizations in the United States; historical and legal aspects, co-occurring issues, foster care, adoption, family preservation.

042:198 Social Work Practice with Developmentally Disabled 2 s.h.
Application of theory to assess family functioning and the impact of developmental disabilities; principles of family-centered care applied to practice; basic structure of service delivery systems: health and social services.

Human behavior, practice, social welfare policy. Prerequisite: consent of instructor.

Primarily for Graduate Students

*042:145 Organization and Community Practice 3 s.h.
Models underlying theories of organization, community practice; principles of macro social work and skill development in relationship building, needs assessment, decision making, planning, implementing, ethics, program and self-evaluation. Prerequisite: admission to M.S.W. program or consent of instructor.

*042:146 Microcomputer Laboratory 1 s.h.
Microcomputer in social work practice; user skill, software for a variety of applications in social service settings. Prerequisite: admission to M.S.W. program.

*042:148 Social Work Research Methods 3 s.h.
Knowledge and skills for evaluating practice and carrying out social work research; formulation of research questions; research design and methodology; sampling techniques; protection of human subjects; descriptive statistics; computerized data analysis. Prerequisite: admission to M.S.W. program.

*042:150 Social Work Practice with Individuals, Families, and Groups 3 s.h.
Models and underlying theories of empirically based direct social work practice; emphasis on an ecosystem strengths perspective; phases of helping relationship, strengths-based assessment, change process in interpersonal helping relationships. Prerequisites: 042:140 and admission to M.S.W. program. Corequisites: 042:151, 042:290, and 042:291 for 60 s.h. students.

*042:151 Social Work Practice Skills Laboratory 1 s.h.
Interpersonal skills practice in the helping relationship; small-group format. Prerequisite: admission to M.S.W. program or consent of instructor. Pre- or corequisite: 042:290. Corequisites: 042:150 and 042:291.

042:153 Programs and Services for Aging Adults 3 s.h.
Major gerontological programs and services, practitioners' need for basic aging-practice competence; aging network; income, employment, health maintenance programs; continuum of care (preventive and well-elderly services, in-home services, community-based services, institutional care); assessment; major elder health issues, informal care; end-of-life care. Same as 153:153.

042:204 Human Services Administration 2 s.h.
Effects of organizational structures/processes on individual performance; models of management, communication patterns, leadership styles; skill in technical writing, decision making, personnel and financial management, applied professional ethics. Prerequisite: completion of foundation courses or consent of instructor.

042:211 Individual and Family Developments: Life Span 3 s.h.
Infancy through senescence; families from their beginnings through their later years; theoretical, methodological issues. Same as 153:211.

042:216 Group Leadership in Human Sexuality 0-3 s.h.
Principles of group dynamics, group process; leadership skills for small, task-oriented discussion groups on human sexuality. Prerequisite: 042:113 or consent of instructor. Same as 07C:216, 096:216.

042:219 Aging and the Family 2-3 s.h.
Research related to aging and the family; intergenerational relations, marital status in later life, diversity of older families, caregiving, elder abuse, policy issues. Same as 153:219.
042:220 Family Law 3 s.h.
Legal systems, rights, processes related to families; marriage, divorce, custody, protective services, reproductive rights, adoption, commitment, delinquency, education, poverty, discrimination; roles of lawyers, social workers in legal system. Prerequisite: 042:143 or consent of instructor.

042:223 Cross-Cultural Social Work 2-3 s.h.
Theories, issues in practice with culturally different populations, including U.S. ethnic groups, women, gays and lesbians, persons with disabilities, recent immigrants. Prerequisite: 042:147 or consent of instructor.

042:224 Spirituality and Ethics in Social Work 2-3 s.h.
Knowledge, values, and skills that provide a framework for spiritually sensitive social work practice; preparation for responding competently and ethically to diverse spiritual perspectives, for recognizing and reflecting on one's own spiritual beliefs, and for identifying appropriate ways to apply personal beliefs to practice with varied populations while safeguarding client autonomy and self-determination.

042:228 Theories of Personality and Psychopathology 2 s.h.
Theories and their relevance to social work practice with diverse populations. Prerequisites: 042:140 and social work graduate standing, or consent of instructor.

042:229 Working with Groups 2 s.h.
Theory and practice of group work, group process, leadership styles and skills; fundamental theory, skills necessary to form and facilitate a small group. Prerequisite: completion of foundation courses or consent of instructor.

042:232 Therapy with Couples 2 s.h.
Married and other couples as social systems; theories of functional, dysfunctional systems; techniques of intervention. Prerequisite: completion of foundation courses or consent of instructor.

042:233 School Social Work Practice 2 s.h.
School as a social institution, activities of school social workers; theoretical, practice issues; current issues in field.

042:234 Social Work Practice and Use of the Diagnostic and Statistical Manual of Mental Disorders 3 s.h.
Major categories of psychopathology, DSM-IV system of classification, individual behavior and presentation of symptoms considered through DSM-IV multiaxial approach to diagnosis; effects of culture, developmental stage, and gender on presentation of mental disorders.

042:235 Object Relations in Social Work Practice 2 s.h.
Theories, practice skills; focus on object relations theory and therapy as a bridge between systemic perspective and working with individuals. Prerequisites: 042:250 and completion of foundation courses, or consent of instructor.

042:236 Interventions with Individuals 2 s.h.
Comparison of two or more intervention theories and approaches used in social work practice with individuals; attention to diverse populations and across life span. Prerequisite: completion of foundation courses or consent of instructor.

042:237 Social Work Practice with Children, Youth, and Families 2 s.h.
Preparation for practice in child welfare, family service agencies; family life cycle, child development, child maltreatment, problems of adolescence, social services for families and children, legal issues. Prerequisite: completion of foundation courses or consent of instructor.

042:238 Introduction to Play Therapy 2 s.h.
Major theories and techniques of play therapy, relevance to social work practice. Prerequisite: 042:150 or consent of instructor.

042:247 Nonprofit Organizational Effectiveness 1 3 s.h.

042:248 Nonprofit Organizational Effectiveness II 3 s.h.

042:250 Family-Centered Theory and Practice I 3 s.h.
Theoretical bases for family-centered practice; comparison and analysis; skill development in analyzing problem situations, implementing change strategies. Prerequisite: completion of M.S.W. foundation courses or consent of instructor.

042:251 Family-Centered Theory and Practice II 3 s.h.
Techniques for assessment, intervention in family-centered practice; evaluation of practice, theoretical and clinical bases for intervention. Prerequisite: 042:250 or consent of instructor.

042:252 Advanced Social Policy for Family Practice 3 s.h.
Systematic basis for examining social, economic, and political factors that influence formation of social policies; social policy implementation, impact of social policies on vulnerable individuals and families. Prerequisite: completion of M.S.W. foundation courses or consent of instructor.

042:254 Introductory Seminar: End-of-Life Services in Rural Communities 2-3 s.h.
Basic principles of hospice and palliative care, rural service delivery, community assessment.

042:255 Integrative Seminar in End-of-Life Care 1 s.h.
Integration of students' knowledge, skills, and values for practice in end-of-life care and bereavement, application to case studies and advanced practicum setting. Prerequisite: admission to end-of-life care area. Corequisite: 042:292 or 042:295.

042:260 Integrated Social Work Theory and Practice I 3 s.h.
Theories, skill development, evaluation, ethical issues in integrated social work practice; intermediate group work for culturally competent intervention, small group work. Prerequisite: completion of foundation courses or consent of instructor.

042:261 Integrated Social Work Theory and Practice II 3 s.h.
Continuation of 042:260; theories, evaluation, ethical issues; advanced group work for culturally competent intervention; case management, program development, funding evaluation, large task groups. Prerequisite: 042:260.

042:262 Advanced Social Policy for Integrated Practice 3 s.h.
Systematic basis for critical examination of social, economic, and political factors that influence formation of social policies; social policy implementation, impact of social policies on vulnerable populations, service providers, communities. Prerequisite: completion of M.S.W. foundation courses or consent of instructor.

042:270 Advanced Research 2-3 s.h.
Research project relevant to social work practice that builds on knowledge and skills developed in 042:148; data analysis, report of results; ethical principles applied to research. Prerequisites: 042:148 or consent of instructor, and admission to M.S.W. program.

042:271 Individual Study arr.
Project related to student interest; directed by faculty member.

042:272 Thesis arr.
042:275 Development Policy and Planning in the Third World 3 s.h.
Cross-cultural, interdisciplinary analysis of urbanization and development problems in developing nations. Same as 07B:275, 034:275, 044:275, 102:275, 113:275.

042:278 Personnel and Financial Management 2 s.h.
Human, financial resources required by communities and organizations for delivery of social services; skill development in personnel and financial management, microcomputer applications, evaluation of management outcomes. Prerequisite: completion of foundation courses or consent of instructor.

042:280 Human Behavior: Selected Aspects 3 s.h.
Topics not covered in another course. Repeatable.

042:281 Social Work Practice: Selected Aspects 3 s.h.
Topics not covered in another course; diversity, social justice and ethics issues related to a social work practice area. Repeatable.

042:285 Travel/Study Seminar 3 s.h.
Opportunity for cross-cultural learning through U.S. or international travel; focus on social welfare issues. Prerequisite: 042:143 or consent of instructor.

*042:290 Foundation Practicum in Social Work 3 s.h.
Generalist practice experience with individuals, families, small groups, organizations, communities; communication skills, change process, professional values and ethics applied at multiple system levels; students evaluate their own practice using a learning contract in an agency setting. Prerequisite: admission to M.S.W. program. Pre- or corequisites: 042:140, 042:143, 042:145, 042:146, 042:147, 042:150, 042:151, and 042:291.

*042:291 Foundation Practicum Seminar 1 s.h.
Integration of academic, experiential learning, self-assessment, peer feedback to promote model of professional accountability. Prerequisite: admission to M.S.W. program. Pre- or corequisites: 042:140, 042:143, 042:145, 042:146, 042:147, 042:150, 042:151, and 042:290. Corequisite: 042:290.

*042:292 Advanced Practicum in Family-Centered Practice I and II 3 s.h.
Two-semester field course; family-centered practice theory and skills implemented in interventions with individuals, families. Repeatable. Prerequisite: completion of M.S.W. foundation courses and consent of instructor. Corequisite: 042:293 (fall) or 042:294 (spring).

*042:293 Advanced Practicum Seminar in Family-Centered Practice I 1 s.h.
Two-semester field course; family-centered practice theory and skills implemented in interventions with individuals, families. Prerequisite: completion of M.S.W. foundation courses or consent of instructor. Corequisite: 042:292.

*042:294 Advanced Practicum Seminar in Family-Centered Practice II 1 s.h.

*042:295 Advanced Practicum in Integrated Practice 3 s.h.
Two-semester field course; integrated social work theories and interventions implemented in work with individuals, families, organizations, formal and informal networks. Repeatable. Prerequisite: completion of M.S.W. foundation courses. Pre- or corequisites: 042:290, 042:291, 042:292, and 042:297. Corequisite: 042:297 (fall) or 042:298 (spring).

*042:296 Advanced Practicum in School Social Work 3 s.h.
Field course; social work theories and interventions implemented in schools. Repeatable. Prerequisite: completion of M.S.W. foundation courses or consent of instructor.

*042:297 Advanced Practicum Seminar in Integrated Practice I 1 s.h.
Two-semester course; social work knowledge, skills, values, and professional identity integrated in content of advanced practice and direct multisystemic interventions. Corequisite: 042:295 or 042:296.

*042:298 Advanced Practicum Seminar in Integrated Practice II 1 s.h.

042:300 Proseminar in Social Work: Social Welfare, Policy Programs 3 s.h.
Faculty research related to families, children, and elderly theory, research designs, methodologies, findings, dissemination. Prerequisite: admission to Ph.D. program.

042:301 Knowledge Building in Social Work Practice 3 s.h.
Epistemology of social work practice theories, importance for knowledge building, practice theories of personal and interpersonal change, family life cycle development, empowerment. Prerequisite: admission to Ph.D. program or consent of instructor.

042:302 Knowledge Building in Social Work Policy 3 s.h.
Family, child, and elderly policy research viewed through philosophical, political science, economic, and social science theory; underlying assumptions in different views of social policy and theoretical analysis of formal argument. Prerequisite: admission to Ph.D. program or consent of instructor.

042:303 Research Practicum 3 s.h.
Joint research with faculty; development of research design, choice or construction of measurement tools, selection of sample, collection and analysis of data, writing of a research report. Prerequisite: admission to Ph.D. program or consent of instructor.

042:304 Advanced Research Seminar 3 s.h.
Theory construction; methodological approaches useful in clinical, administrative, community practice; emphasis on ongoing projects in research practicum, dissertation proposal. Prerequisite: admission to Ph.D. program or consent of instructor.

042:305 Social Work Pedagogy: Theory and Practice 3 s.h.
Teaching methods, theories, related research in social work education; issues of cultural competence in educational programs, course design, and delivery. Prerequisite: admission to Ph.D. program.

Faculty research related to families, children, and elderly theory, research designs, methodologies, findings, dissemination. Prerequisite: admission to Ph.D. program or consent of instructor.
Sociology

Chair: Michael Lovaglia
Professors: Celesta Albonetti (Sociology/Law), Jennifer Glass (Sociology/Community and Behavioral Health), Jae-Oh Kim (Distinguished Service Professor), Kevin Leicht, Michael Lovaglia
Professors emeriti: Charles W. Mueller, James L. Price, Lyle W. Shannon
Associate professors: Karen V. Heimer, Lisa Troyer, Stephen G. Wieting
Associate professor emeritus: John R. Stratton
Assistant professors: Robert Baller, Mary Campbell, Jennifer Glanville, Steve Hitlin, Ray Muhammad, Mary Noonan, Anthony Paik, Wayne Santoro, Michael Sauder, Marla Velez

Undergraduate degrees: B.A., B.S. in Sociology
Graduate degrees: M.A., Ph.D. in Sociology
Web site: http://www.uiowa.edu/~soc

Undergraduate Programs

The undergraduate major in sociology provides a liberal arts and sciences education. Although the program does not prepare students for a specific career, it provides background for employment in fields such as human services, criminal justice, corrections, sales, public relations, advertising, personnel, applied social research, community organization, and teaching social science in secondary schools. It also provides a foundation for graduate or professional study in social work, urban planning, law, criminal justice, social policy, and similar areas. Finally, the degree prepares students to work toward advanced degrees in sociology, which qualify them for college or university teaching and work in academic, private, and governmental research.

Undergraduate students majoring in sociology may pursue either the Bachelor of Arts or the Bachelor of Science. Students interested in graduate degrees, postgraduate study, or professional careers in the social sciences are advised to seek the Bachelor of Science.

In addition to the specific courses required for each bachelor’s degree, both B.A. and B.S. majors are advised to take 6 s.h. of course work in at least one of these departments: anthropology, economics, geography, political science, or psychology.

Department requirements are the same for transfer students as for others. Transfer students majoring in sociology take at least 12 s.h. in sociology at The University of Iowa. Students must have their transferred courses approved by a sociology adviser for credit in the major.

Students who wish to obtain teacher licensure in the social sciences while majoring in sociology should contact the Department of Teaching and Learning in the College of Education.

Bachelor of Arts

The B.A. requires a minimum of 33 s.h. of course work. Several courses required for the major have specific course prerequisites, and in some cases, students must earn a minimum grade in a prerequisite course. In planning to complete the major, students must be careful to take courses in the proper sequence.

The following sociology courses cannot be used to complete the B.A. requirements: 034:029 First-Year Seminar, 034:197 Teaching Internship, and 034:198 Directed Individual Study.

INTRODUCTORY COURSES

These courses should be taken early, to lay the foundation for all other work in the major.

034:001 Introduction to Sociology: Principles 3-4 s.h.
22M:009 Elementary Functions (or a more advanced mathematics course) 4 s.h.

THEORY AND METHODS COURSES

These courses should be completed as early as possible. The college-level mathematics course is a prerequisite for 034:010. Students must earn a grade of C or higher in 034:009, 034:010, and 034:011 in order to complete the major. Students must take 034:009 and 034:010 before enrolling in 034:011.

034:009 Sociological Theory 3 s.h.
034:010 Quantitative Data Analysis 3 s.h.
034:011 Theory, Research, and Statistics 3 s.h.

ELECTIVES

Students complete 15 s.h. of elective course work in sociology, chosen from all the courses offered by the department (except 034:029, 034:197, and 034:198). Two electives must be

**CAPSTONE COURSE**
This special project illustrates the student's accomplishments in the major. It is taken during the student's last semester of major course work. In order to enroll in the capstone course, students must complete 034:011 with a grade of C or higher.

034:195 Capstone Course in Sociology 3 s.h.

**THE MAJOR PORTFOLIO**
When he or she graduates, each student is required to provide the department with a group of documents that will compose the student's Sociology Major Portfolio. The portfolio provides students with a record of their development in the department. It also is an attractive set of materials that can serve as evidence of interests and work for prospective employers and graduate schools.

The portfolio should include at least three documents: a paper from the first two years of sociology classes, such as a book review or statement comparing competing theories; a research paper that reports the findings of original research; and a statement summarizing an experience in which the student applied sociological knowledge, such as a report on an internship, a consideration of contributions that sociological information made to a summer job, or a reflection on a period of study abroad.

Together, the materials should display development toward technical correctness in citing others' work, accurate use of sociological concepts, technical proficiency in using research methods, and the ability to explain implications of research findings.

**Bachelor of Science**
The B.S. prepares students for graduate training in sociology. It requires a minimum of 45 s.h., with at least 30 s.h. in sociology. Several courses required for the major have specific course prerequisites, and in some cases, students must earn a minimum grade in a prerequisite course. In planning to complete the major, students must be careful to take courses in the proper sequence.

Several sociology courses cannot be used to complete the B.S. requirements, including 034:029 First-Year Seminar, 034:197 Teaching Internship, and 034:198 Directed Individual Study.

**INTRODUCTORY COURSES**
These courses should be taken early, to lay the foundation for all other work in the major.

034:001 Introduction to Sociology: Principles 3-4 s.h.

One of these sequences:
22M:025-22M:026 Calculus I-II 8 s.h.
22M:031-22M:032 Engineering Mathematics I-II 8 s.h.

**THEORY AND METHODS COURSES**
These courses should be completed as early as possible. The college-level mathematics course is a prerequisite for 034:010. Students must earn a grade of C or higher in 034:009, 034:010, and 034:011 in order to complete the major. Students must take 034:009 and 034:010 before enrolling in 034:011.

034:009 Sociological Theory 3 s.h.
034:010 Quantitative Data Analysis (or an approved course in statistics) 3 s.h.
034:011 Theory, Research, and Statistics 3 s.h.
22S:120 Probability and Statistics 4 s.h.

One of these:
026:103 Introduction to Symbolic Logic 3 s.h.
026:104 Introduction to Philosophy of Science 3 s.h.

**ELECTIVES**
Students complete 15 s.h. of elective course work in sociology, chosen from all the courses offered by the department (except 034:029, 034:197, and 034:198). Two of the electives must be taken after completing 034:011 (except 034:002, 034:029, 034:197, and 034:198).

**CAPSTONE COURSE**
This special project illustrates the student's accomplishments in the major. It is taken during the student's last semester of major course work. In order to enroll in the capstone course, students must complete 034:011 with a grade of C or higher.

034:195 Capstone Course in Sociology 3 s.h.

**THE MAJOR PORTFOLIO**
When he or she graduates, each student is required to provide the department with a group of documents that will compose the student's Sociology Major Portfolio. The portfolio provides students with a record of their development in the department. It also is an attractive set of materials that can serve as evidence of interests and work for prospective employers and graduate schools.
The portfolio should include at least three documents: a paper from the first two years of sociology classes, such as a book review or statement comparing competing theories; a research paper that reports the findings of original research; and a statement summarizing an experience in which the student applied sociological knowledge, such as a report on an internship, a consideration of contributions that sociological information made to a summer job, or a reflection on a period of study abroad.

Together, the materials should display development toward technical correctness in citing others' work, accurate use of sociological concepts, technical proficiency in using research methods, and the ability to explain implications of research findings.
sociology with a major in another field, particularly other social sciences, business, elementary education, or nursing. Requirements for the minor include a minimum of 15 s.h. of credit in sociology courses with a g.p.a. of 2.00 or higher; 12 of the 15 s.h. must be taken at The University of Iowa. The minor must include 034:009. No course accepted toward the minor may be taken pass/nonpass.

**Graduate Programs**

Graduate programs in sociology prepare students for professional and academic careers. Master of Arts students choose between programs that prepare them for doctoral studies or for professional positions applying sociology. The Doctor of Philosophy has a research emphasis and primarily prepares sociologists for positions in colleges and universities or research positions in academic, private, and government institutions. Opportunities for research using survey, experimental, and observational methods are readily available in the department.

**Master of Arts**

The M.A. requires 30 s.h. with a thesis or research paper, or 38 s.h. without. The program without thesis is intended for students seeking a terminal degree and for whom a wider range of course content in sociology is appropriate.

All candidates for the M.A. must complete the following with grades of B-minus or higher.

- 034:201 History of Sociological Theory 3 s.h.
- 034:214 Introduction to Sociological Data Analysis 3 s.h.
- 034:215 Sampling, Measurement, and Observation Techniques 3 s.h.
- 034:216 Linear Models in Sociological Research 3 s.h.

**Joint M.A./J.D.**

Students may earn a Master of Arts in sociology and the M.A. by taking less course work than would be necessary if the two degrees were pursued independently.

**Doctor of Philosophy**

The Ph.D. in sociology requires a minimum of 72 s.h. of graduate course work, including the post-M.A. course 034:218 Advanced Statistical Modeling of Data, 3 s.h. of elective course work in methods/statistics, and 3 s.h. of elective course work in theory. Most of the course work for the Ph.D. is taken in the student's two areas of interest. Candidates also must pass two area examinations, write and defend a dissertation prospectus, and write and successfully defend a dissertation.

Doctoral students take two area exams—one from list A, the other from list A, B, or C (list A has six standing committees, list B has two, as follows).

**List A:**
- social psychology; crime, law, and deviance; stratification; political sociology; organizations; and family

**List B:**
- theory, and methods

**List C:**
- an area not included in list A or B for which the student can identify an examining committee of three people, with both the area and the committee approved by the graduate committee

For a detailed statement of graduate study regulations, contact the Department of Sociology. Prospective doctoral candidates should examine this statement carefully.

**Training for Teaching Assistants**

All new students are expected to attend a three-day orientation for teaching assistants before the beginning of classes. In addition, a seminar on teaching pedagogy (034:382) is required for those who wish to teach their own courses.

**Admission**

Admission to graduate study in sociology usually requires an undergraduate g.p.a. of at least 3.25 and a score of 1100 or higher (quantitative plus verbal) on the Graduate Record Examination (GRE) General Test. International students whose first language is not English should submit scores from the Test of English as a Foreign Language (TOEFL). In addition to meeting admission
requirements of the Graduate College (see Manual of Rules and Regulations of the Graduate College), applicants must complete the sociology department application and use the department’s personal reference forms to obtain three letters of recommendation.

All application materials for fall admission must be received by January 1. The deadline for applying for departmental financial support is January 1. Evaluation of applications begins in early January.

Admission decisions are based on consideration of prior academic performance, personal reference letters, scores on the GRE General Test, and the applicant’s statement of reasons for pursuing advanced work in sociology at The University of Iowa. The department has no specific undergraduate course requirements for admission, but a background in the social sciences with some mathematical training is useful. A foreign language is not required for admission and there are no foreign language requirements for either the M.A. or Ph.D. in sociology. Inquiries concerning admission should be directed to the chair of the admissions committee, Department of Sociology.

Financial Support
The Department of Sociology offers four types of awards to graduate students: teaching assistantships, research assistantships, University of Iowa Presidential Fellowships, and Graduate Merit Fellowships. Out-of-state students who receive awards are charged resident tuition. Students who receive one-half-time teaching or research assistantships work 20 hours each week for faculty members on either teaching or research assignments.

Research Centers and Facilities
Center for the Study of Group Processes
The Center for the Study of Group Processes has an 18-room small-group laboratory with eight computer-controlled subject rooms that provide audiostreaming and psychophysiological recording capabilities, two large-group rooms with an adjoining observation room, an auditory control room, a sociophysiological instrumentation lab, a virtual social environment lab, and other flexible research office spaces.

Center for Criminology and Sociolegal Studies
The Center for Criminology and Sociolegal Studies is developing an interdisciplinary research and teaching program for the study of crime, law, deviance, social control, and mental health. It sponsors a colloquium series in crime, law, and social control, in which affiliates, graduate students, and outside speakers present their ongoing research, and a working-paper series in which members disseminate research papers to the academic community. The center also provides research support and a research infrastructure for faculty and graduate students and offers graduate research assistantships for interested students. Internship in Criminal Justice and Corrections (034:148) is administered through the center.

Center for Asian and Pacific Studies
The Center for Asian and Pacific Studies provides excellent opportunities for studying Asia from a social science perspective. It supports related Asia studies and offers a monthly seminar that features lively discussions by scholars from many different disciplines. Several sociology faculty members are affiliated with the center.

Computer Facilities
The department operates a remote computer terminal and a personal computer cluster for graduate students. Both terminals and personal computers can access mainframe computers that provide all of the important statistical and mathematical computing programs.

Courses
For Undergraduates
The following courses are open only to undergraduates. Courses without prerequisites open to first-year students are 034:001, 034:002, 034:021, 034:029, 034:066, 034:154, and 034:158. All other undergraduate courses are open to first-year students with stated prerequisites.

034:001 Introduction to Sociology: Principles 3-4 s.h.
How individuals are organized into social groups, ranging from intimate groups to bureaucracies, and how these influence individual behavior, nature and interrelationships of basic social institutions, such as family, education, religion, economy. GE: social sciences.
Advanced Courses

Social Theory

034:200 Graduate Proseminar 1-2 s.h.
General introduction to department and discipline for entering graduate students; departmental and graduate college requirements, program and career planning, interaction with faculty members, consideration of student interests and concerns. Two semesters beginning in fall.

034:201 History of Sociological Theory 3 s.h.
Idea of major 19th- and 20th-century social thinkers (e.g., Marx, Weber, Durkheim, Simmel, Mead).

034:202 Theory Construction and Analysis 3 s.h.
Contemporary theoretical issues and nature of theory, theory’s place in research, strategies of theory construction.

034:203 Seminar: Selected Topics in Sociological Theory 3 s.h.
Repeatable.

034:214 Introduction to Sociological Data Analysis 3 s.h.
Statistical measures for descriptive methods and association; logic of statistical inference, hypothesis testing, background essential to understanding linear models; models for categorical data analysis. Prerequisite: introductory statistics or consent of instructor.

034:215 Sampling, Measurement, and Observation Techniques 3 s.h.
Research designs; sampling designs and techniques; questionnaire construction, interviewing techniques; participant and nonparticipant observation; coding and preparation of data for analysis; measurement techniques, reliability, and validity. Prerequisite: 034:214 or consent of instructor.

034:216 Linear Models in Sociological Research 3 s.h.
Statistical techniques associated with general linear model; emphasis on multiple regression, its generalizations; corresponding computer programs. Prerequisite: 034:214 or consent of instructor.

034:217 Advanced Sociological Data Analysis 3 s.h.
Advanced statistics, including categorical data analysis, event history analysis, structural equation modeling, time series analysis, network analysis. Repeatable. Prerequisites: 034:214, 034:215, and 034:216; or consent of instructor.

034:218 Advanced Statistical Modeling of Data 3 s.h.
Models for analysis of categorical data, including loglinear, logit, related discrete data models. Prerequisites: advanced graduate standing and consent of instructor.

034:219 Seminar: Selected Topics in Research Methods and Data Analysis 3 s.h.
Repeatable.

Social Psychology

034:020 Principles of Social Psychology 3-4 s.h.
Introduction to theory and research in small groups; interpersonal and intergroup processes. GE: social sciences.

034:120 Collective Behavior and Social Movements 3 s.h.
Social unrest, crowd behavior; social movements treated as a form of social change. Prerequisite: 034:001 or 034:002 or consent of instructor.

034:220 Contemporary Approaches to Social Psychology 3 s.h.
Review and critical analysis of current theoretical approaches to and systems of social psychological analysis.
034:221 Seminar: Selected Topics in Social Psychology 3 s.h.
Selected theoretical and methodological issues. Repeatable.

034:291 Seminar: Collective Action and Social Movements 3 s.h.
Comparative, historical analysis of variations in social movements, their impact on social change.

Deviance, Delinquency, Crime, and Law

034:040 Criminology 3 s.h.
Nature and causes of crime; the criminal justice process, correctional treatment, crime prevention. Prerequisite: 034:001 or 034:002 or consent of instructor.

034:141 Juvenile Delinquency 3 s.h.
Delinquency as an individual and social problem; theories of the causes of juvenile delinquency; law enforcement and the juvenile court; methods of correction and prevention. Prerequisite: 034:001 or 034:002 or consent of instructor.

034:146 Deviance and Control 3 s.h.
Basic theories of deviance and analysis of social control settings and mechanisms with emphasis on the relationship between social control efforts and social deviance. Prerequisite: 034:040 or 034:141 or consent of instructor.

034:148 Internship in Criminal Justice and Corrections 1-5 s.h.
Supervised field work in a criminal justice or correctional agency. Prerequisites: 034:040 or 034:141, sociology major, junior standing, and consent of director of the Center for Criminology and Socio-Legal Studies.

034:149 Sociology of Criminal Punishment 3 s.h.
Sociological theories and research on criminal punishment; classical and contemporary theories; research on imprisonment and capital punishment. Prerequisite: 034:009.

034:182 Sociology of Law 3 s.h.
Conceptual, historical, and theoretical issues of law and operation of the criminal justice system; theory and research on law and the criminal justice system. Prerequisite: 034:001 or 034:002 or consent of instructor.

034:180 Criminal Legal System 3 s.h.
Discretionary decision making in the U.S. criminal courts, from arrest through sentencing; legal and sociological issues relevant to each stage of felony adjudication; sociological and social psychological theories of decision making in adjudication, empirical research testing these theories. Prerequisite: 034:001 or 034:002 or consent of instructor.

034:240 Seminar: Criminological Theories 3 s.h.
Theories of crime causation and their relationships to the cultures in which they have functioned.

034:244 Seminar: Selected Topics in Deviance and Control 3 s.h.
Critical analysis of current research; emphasis on theoretical contributions and methodological foundations. Repeatable.

Family, Life-Style, Children, Aging

034:018 Women and Society 3-4 s.h.
Role and status of women in society; sex differences, sex role socialization, theories about origin and maintenance of sexual inequalities, changes in social life cycle of women, implications for social institutions and processes, focus on contemporary United States. GE: cultural diversity. Prerequisite: 034:001. Same as 131:018.

034:066 The American Family 3 s.h.
Structure and process; change over the life cycle; interrelations with other institutions; historical changes; variations by social class and ethnic group. Prerequisite: 034:001.

034:134 Aging in Comparative Perspective 3 s.h.
Sociological foundations of world variation in aging; relationships between political and economic institutions of various societies, their treatment of the aging process. Prerequisite: 034:001 or 034:001 or consent of instructor. Same as 131:114.

034:159 Families in Comparative Perspective 3 s.h.
Family systems in comparative and historical perspective; comparison of the American family with families in both modern and premodern societies. Prerequisite: 034:001 or 034:001.

034:162 Work and Family Institutions 3 s.h.
Contemporary problems in the integration of work and family life; origins of work-family conflict in process of industrialization; effects of job-family conflicts on mothers, fathers, children, cross-cultural differences in dealing with work-family conflict. Prerequisite: 034:001 or 034:002 or consent of instructor. Same as 131:160.

034:206 Changing Families and Public Policy 3 s.h.
Current sociological research on public policies that affect family life and well-being; divorce and child custody policies, teen pregnancy and abortion, family poverty, child care and work-family policies. Same as 131:166.

034:266 Seminar: Selected Topics in Family Sociology 3 s.h.
Selected theoretical and methodological issues. Repeatable. Prerequisite: social science graduate standing or consent of instructor.

Social Institutions, Social Change

034:022 Introduction to Social Work 4 s.h.
Social welfare as a social institution; settings and methodologies of social work practice; profession of social work; historical development of American social welfare and social work; minimum of 60 hours volunteer work. Prerequisite: sophomore standing or consent of instructor. Same as 042:022.

034:151 Sociology of the Third World 3 s.h.
Analysis and measurement of development/underdevelopment; ideological perspectives on the Third World; the modern world system; selected issues in the study of social change in Asia, the Middle East, Latin America, Africa. Prerequisite: 034:001 or introductory course in economics or anthropology or consent of instructor. Same as 113:151.

034:153 Public Opinion 3 s.h.
Role of public opinion in making public policy; formation and change of political attitudes and opinion; political ideology; measurement of public opinion, understanding opinion polls. Prerequisite: 034:001 or consent of instructor. Same as 030:171.

034:154 Society and Politics in East Asia 3 s.h.
Japan, China, South and North Korea, Taiwan; major theoretical issues in social change and development through East Asian experiences in the modern era.
Social Class, Inequality, Race, Organizations, Politics

034:066 Social Inequality 3 s.h.
Major theoretical perspectives for understanding inequality in economics, power, prestige; the magnitude of social inequality in the United States; sex and race inequality; trends in and causes of social mobility; selected consequences of social inequality. GE: cultural diversity.

034:155 Sociology of Race and Ethnicity 3 s.h.
Sociological perspectives on sexuality, including theoretical and conceptual developments, empirical regularities, and social implications; sexual expression in the United States. Prerequisite: 034:001 or 034:002 or consent of instructor. Same as 154:155.

034:156 Gender Stratification Seminar 3 s.h.
Occupational gender segregation; gender gap in pay; role of family caregiving in women’s lower pay; devaluation of caregiving work; comparable worth. Same as 131:256.

034:157 Seminar: Sociology of Labor Markets 3 s.h.
Sociological and economic theories and research concerning area/regional/local labor markets, industrial sectors and the dual labor market, occupational/internal labor markets, other structural explanations of inequality.

034:158 Economy and Society 3 s.h.
Economic debates that faced advanced market economies in the 20th century with extensions to the developing world; development and maintenance of investment elites and labor markets, development and extension of state activity.

034:160 Organizations and Modern Society 3 s.h.
Approaches to the sociological study of economic and noneconomic organizations; the role of power and authority within the organization, and between the organization and its environment. Prerequisite: 034:001 or 034:020 or consent of instructor.

034:165 Sociology of Work and Occupations 3 s.h.
Work commitments, prestige of occupations, occupational and professional careers; occupational groups and organizations; alienation; women, minorities, and occupational structures; capitalism and occupations. Prerequisite: 034:001 or 034:020 or consent of instructor.

034:175 Community and Urban Sociology 3 s.h.
Impact of urbanization on social life, social networks; how social forces shape patterns of urban growth; racial segregation, gentrification; consequences of the growth of suburbs, urban crises, including concentrated poverty and crime. Prerequisite: 034:001 or 034:002 or consent of instructor.

034:181 Sociology of Popular Culture 3 s.h.
Analysis of the sociological bases, impact, and implications of popular culture; interrelationships of popular culture and major social institutions; popular culture and social change; social bases of taste, cultures and publics. Prerequisite: 034:001 or 034:002 or consent of instructor.

034:275 Development Policy and Planning in the Third World 3 s.h.
Cross-cultural and interdisciplinary analysis of problems associated with political and economic structures, in social change; illumination of theories of social change through case studies of educational systems in less developed nations. Prerequisite: 078:275, 042:275, 044:275, 102:275, 113:275.

034:310 Education and Social Change 2-3 s.h.
Role of educational institutions, in connection with political and economic structures, in social change; illumination of theories of social change through case studies of educational systems in less developed nations. Same as 078:210.

Teaching

034:150 Political Sociology 3 s.h.
Sociological analysis of political behavior and belief, group conflict and political process, group consensus, political institutions, power and policy-making systems; relationship of the political system to the social system. Prerequisite: 034:001 or consent of instructor.

034:152 Seminar: Economy and Society 3 s.h.
Survey, with focus on individual political behavior, development and operations of the state (state policies and state institutions), collective political behavior and social movements.

034:252 Political Sociology 3 s.h.
Survey, with focus on individual political behavior, development and operations of the state (state policies and state institutions), collective political behavior and social movements.

034:253 Social Stratification 3 s.h.
Classical and contemporary theories; current research on the causes and magnitude of inequality in economics, power, and prestige; social mobility; critical issues of stratification.

034:254 Seminar: Selected Topics in Social Stratification 3 s.h.
Prerequisite: social science graduate standing or consent of instructor.

034:255 Seminar: Practicum on Teaching Sociology 2-3 s.h.
Supervised preparation for teaching sociology courses; literature on teaching, course objectives, alternative teaching techniques; preparation of course syllabus, lectures, discussions, exams. Prerequisites: advanced graduate standing and consent of instructor.

Independent Reading and Research

034:382 Seminar: Practicum on Teaching Sociology 2-3 s.h.
Supervised preparation for teaching sociology courses; literature on teaching, course objectives, alternative teaching techniques; preparation of course syllabus, lectures, discussions, exams. Prerequisites: advanced graduate standing and consent of instructor.
Spanish and Portuguese

Chair: Thomas E. Lewis
Professors: Daniel Balderston (Spanish and Portuguese/Cinema and Comparative Literature), Oscar Hahn, Thomas E. Lewis, Adriana Méndez Rodenas
Associate professors: María José Barbosa, Walter Dobrian, María A. Duarte, Denise K. Filios, Paula M. Kempchinsky, Philip W. Klein, Judith E. Liskin-Gasparro, Kathleen Newman (Spanish and Portuguese/Cinema and Comparative Literature), Mercedes M. Niño-Murcia, Carlos E. Pinedos, Francisco J. Sánchez, Diana Vélez
Adjunct associate professors: Sue E. Otto, Leslie Schrier
Assistant professors: Brian Gollnick, Laura Gutiérrez, Eileen Willingham
Lecturers: Ozzie Díaz-Duque, Maria Nilsson
Undergraduate degrees: B.A. in Spanish, Portuguese
Undergraduate nondegree programs: Minor in Spanish, Portuguese
Graduate degrees: M.A., Ph.D. in Spanish
Web site: http://www.uiowa.edu/~spanport

The Department of Spanish and Portuguese provides course work for undergraduate and graduate majors in Spanish or Portuguese and for the satisfaction of foreign language requirements for baccalaureate and advanced degrees in other fields. Undergraduate majors in comparative literature often choose from the department’s courses to satisfy requirements in their major.

Undergraduate Programs

The department offers a Bachelor of Arts in Spanish and in Portuguese.

Elementary and intermediate courses in Spanish interrelate five performance goals—listening, reading, speaking, writing, and cultural knowledge—in a staged progression whose overall goal is to develop proficiency. The curriculum emphasizes acquisition of Spanish language skills in communicative contexts, enrichment of vocabulary through an introduction to Hispanic culture, and development of grammatical accuracy in speaking and writing.

The beginning course in Portuguese is for students without previous study or experience with the language. There also is a special Portuguese course for students who already know Spanish. Portuguese classes are small, providing for a great deal of individual attention in an informal language-learning environment. Courses emphasize speaking, comprehending, and reading Brazilian Portuguese. They also incorporate cultural material in the form of videos and music.

Bachelor of Arts in Spanish

The B.A. in Spanish is built on course work in Spanish peninsular and Spanish American literature, Hispanic cultures, Hispanic linguistics, and advanced language skills. The goal of the major is twofold: to study content areas related to the Spanish language, such as literature, culture, and linguistics; and to develop proficiency in the Spanish language in all four skills: speaking, listening, reading, writing. Students who major in Spanish may go on to graduate study in areas such as Spanish and Spanish American literature, Hispanic linguistics, or comparative literature. They also may combine their Spanish studies with other areas to prepare for career opportunities in international business, government, travel, or communications, where knowledge of another language and other cultures is essential.

The B.A. in Spanish requires 36 s.h. (12 courses) beyond the level of the General Education Program. The core requirements are one course each from the principal academic areas of the department (see “Required Courses”). The remaining eight courses may focus on one or more of these areas or may include a broad range of courses within the department. These eight elective courses may include course work in Spanish language skills as well as more advanced language courses that focus on specialized language functions and purposes. They also may include courses in Portuguese or in related areas from other departments, such as history, anthropology, or linguistics, subject to restrictions (see “Restrictions”). Spanish majors are required to take at least three courses numbered 035:170 or above. Senior Seminar (035:195) is recommended for all Spanish majors.

Required Courses

One course in Hispanic linguistics 3 s.h.
One course in Spanish peninsular literature 3 s.h.
One course in Spanish American literature 3 s.h.
One course in culture (peninsular or Spanish American) 3 s.h.
For lists of courses in each of these four areas, contact the Department of Spanish and Portuguese.
Elective courses in Spanish 24 s.h.
Total 36 s.h.

RESTRICTIONS
All course work taken for the major must be at the 100 level, including three numbered 035:170 through 035:198.
No more than five of the following courses or equivalent transfer or study abroad courses (as determined by the department's study abroad adviser) may be applied toward the major.

035:103 Writing in Spanish 3 s.h.
035:104 Hispanic Institute: Language 3 s.h.
035:106 Spanish for Native Speakers 3 s.h.
035:116 Advanced Composition and Conversation 3 s.h.
035:118 Business Spanish 3 s.h.
035:170 Advanced Spanish Review 3 s.h.
038:103 Composition and Conversation (Portuguese) 3 s.h.

No credit from 038:100 Accelerated Elementary Portuguese may be applied toward the Spanish major. Of the 5 s.h. earned in 038:101 Accelerated Intermediate Portuguese, 3 s.h. may be applied toward the Spanish major. A maximum of 6 s.h. of course work in Portuguese may be applied toward the Spanish major.

A maximum of 6 s.h. of related course work from outside the department may be applied toward the Spanish major. Related courses must be approved by the director of undergraduate studies and must be 100-level courses. For a list of approved related courses, contact the Department of Spanish and Portuguese.

A maximum of 6 s.h. in courses taught in English, either in the Department of Spanish and Portuguese or in other departments, may be applied toward the Spanish major.

A maximum of 15 s.h. of credit in approved courses may be transferred from other institutions toward the requirements for the major in Spanish.

Advanced undergraduates preparing to earn the B.A. with honors may enroll in graduate courses with permission of their adviser and the department chair. Ordinarily, permission is granted only to students who have completed a minimum of 30 s.h. of course work in the major and whose g.p.a. in the major is 3.75 or higher.

Elementary and Secondary Teaching Licensure in Spanish
Spanish majors interested in teaching Spanish at the elementary and/or secondary level must successfully complete the requirements for the Spanish major, as well as the requirements for teacher licensure students administered by the College of Education's Teacher Education Program in foreign language. For more information, contact the Department of Teaching and Learning.

Four-Year Graduation Plan in Spanish
The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

Before the third semester begins: Intermediate Spanish I (or equivalent second-year, first-semester competence in Spanish) and at least one-quarter of the semester hours required for graduation.

Before the fifth semester begins: two courses in Spanish beyond Intermediate Spanish II (or equivalent second-year, second-semester competence) and at least one-half of the semester hours required for graduation.

Before the seventh semester begins: four more courses in the major and at least three-quarters of the semester hours required for graduation.

Before the eighth semester begins: a total of nine courses in the major.

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate.

Honors in Spanish
Admission to the honors program in Spanish requires a cumulative University of Iowa g.p.a. of at least 3.33 and a g.p.a. of at least 3.50 in Spanish. Contact the University Honors Program for more information about honors study at
Graduation with honors in Spanish requires that one course (3 s.h.) taken to complete major requirements be chosen for honors designation, in consultation with the department honors adviser. It also requires registration for 3 s.h. in 035:198 Honors Research and Thesis. To complete 035:198 successfully, students must present an honors thesis written in Spanish and must present it orally to a faculty committee in a meeting conducted in Spanish.

Minor in Spanish

A minor in Spanish requires 15 s.h. of course work in Spanish with a g.p.a. of 2.00 or higher. At least 12 of the 15 s.h. must be earned at The University of Iowa or in a University of Iowa study abroad program in courses numbered 100 and above.

All courses applied toward the minor must be taught in Spanish. Courses elected for the minor may not be taken pass/fail.

International Study Programs in Spanish

The department participates in several study abroad programs. Its summer programs include the Board of Regents, State of Iowa, programs in Valladolid, Spain, the CIC Summer Program in Mexico, and the University Studies Abroad Consortium in Alicante, Madrid, and San Sebastián, Spain, and in Heredia, Costa Rica.

Included in the department’s semester or year-long programs are the CIEE Language and Area Studies Program (Alicante, Spain), the CIEE Language and Society Program (Seville, Spain), the CIEE Liberal Arts Program (Alcalá de Henares, Alicante, and Seville, Spain), the CIEE Humanities and Regional Studies Program (Barcelona, Spain), the CIEE Business and Society Program (Seville, Spain), and the University Studies Abroad Consortium (San Sebastián, Alicante, Madrid, and Bilbao, Spain; Santiago, Chile; Heredia and Puntarenas, Costa Rica; and Puebla, Mexico). Also included are CIEE programs in Buenos Aires, Argentina, and Santiago, Chile. For information about other foreign study programs in Spanish, contact the Office for Study Abroad.

Participation in a number of different programs allows the department to offer study abroad opportunities that take into account a variety of student interests and needs. Credit earned in these or other study abroad programs may be applied toward the requirements for the Spanish major or minor. The amount of credit that may be accepted varies according to the program.

Interested students should contact the department’s study abroad adviser. Credit earned in study abroad programs other than those listed above counts as transfer credit and is subject to the 15 s.h. maximum allowed for the major and the 3 s.h. maximum allowed for the minor.

Bachelor of Arts in Portuguese

Portuguese has the sixth or seventh highest number of speakers of all the languages in the world; it is spoken in Portugal, Brazil, Angola, Mozambique, Cape Verde, and Guine-Bissau. There are more speakers of Portuguese in South America than there are of Spanish; therefore knowledge of Portuguese and of Luso-Brazilian culture is extremely helpful for students interested in career opportunities in international business, government, or related fields.

The B.A. in Portuguese requires the following courses or their equivalents, for a total of 30 s.h. of course work beyond the second-year level. Courses listed under “Prerequisites” may not be counted toward the 30 s.h.

**PREREQUISITES**

038:100 Accelerated Elementary Portuguese 5 s.h.

One of these:
038:101 Accelerated Intermediate Portuguese 5 s.h.
038:102 Portuguese for Spanish Speakers 3 s.h.

**REQUIRED COURSES**

038:103 Composition and Conversation 3 s.h.
038:105-038:106 Brazilian Literature I-II 6 s.h.
038:107 Introduction to Portuguese Literature 3 s.h.
038:114 Culture and Civilization of the Portuguese-Speaking World 3 s.h.

**ELECTIVES**

Portuguese courses numbered above 3 s.h.
038:101 or 038:102 15 s.h.

A maximum of 6 s.h. may be taken in approved courses in related areas (e.g., art, anthropology, comparative literature, geography, history, Latin American studies, linguistics, sociology, Spanish).
Four-Year Graduation Plan in Portuguese

The following checkpoints list the minimum requirements students must complete in order to stay on the University's Four-Year Graduation Plan.

 Before the third semester begins: competence in first-year Portuguese and at least one-quarter of the semester hours needed for graduation

 Before the fifth semester begins: competence in intermediate Portuguese and at least one-half of the semester hours needed for graduation

 Before the seventh semester begins: three or four additional courses for the major and at least three-quarters of the semester hours needed for graduation

 Before the eighth semester begins: a total of seven courses in the major

 During the eighth semester: enrollment in remaining major course work, any remaining General Education courses, and sufficient semester hours to graduate

Minor in Portuguese

A minor in Portuguese requires 15 s.h. of course work in Portuguese with a g.p.a. of 2.00 or higher. At least 12 of the 15 s.h. must be taken at The University of Iowa or in a University of Iowa study abroad program in courses numbered 038:103 and above. Courses elected for the minor may not be taken pass/fail.

International Study Programs in Portuguese

The department offers a seven-week program in Salvador, Bahia, Brazil. The FLAS-approved program includes courses in language, culture, and literature. Contact the Office for Study Abroad for details.

Language for Nonmajors

The department offers several opportunities for students who wish to study Spanish and Portuguese—languages that are spoken in many cultures around the world and are important in the study of literature, art, film, and many other disciplines.

All new students—including transfer students—who have previous course work or other experience with Spanish should take the Spanish Foreign Language Placement Test, offered at no charge during summer orientation programs and monthly by Evaluation and Examination Service. The test helps determine the level at which a student should begin Spanish language study at The University of Iowa. Students should take the test before they register for their first University of Iowa Spanish course.

Students with experience in Portuguese may receive individual evaluations from the department.

The department's language courses are open to any student who has satisfied the specified prerequisites.

General Education Foreign Language Component

The department offers courses in Spanish and in Portuguese that may be used to complete the General Education Program foreign language component.

The first course in the Spanish sequence, 035:001, is most appropriate for students who have had no previous experience in Spanish. The Spanish Foreign Language Placement Test can help determine where other students should begin study. Entering students who have completed two years of secondary-level Spanish study typically begin with 035:005. Upon completion of elementary Spanish (either 035:002 or 035:005), students take intermediate Spanish (035:011 and 035:012). The accelerated course 035:013 combines 035:011 and 035:012 into one semester and may be appropriate for some students.

The Portuguese sequence 038:100 and 038:101 provides a full two-year course in two semesters. Taught in small sections, the sequence is open to any student with an interest in the language.

Other Courses for Nonmajors

Undergraduate students in other disciplines may complete portions of the College of Liberal Arts and Sciences General Education Program with 035:020 Contemporary Spanish American Narrative and 038:020 Contemporary Brazilian Narrative, which are taught in English. Culture and Civilization of the Portuguese-Speaking World (038:114) also is approved for General Education and is taught in English. The department offers several other literature, film, and cultural survey courses of general interest that are taught in English.
International Business Certificate

The College of Liberal Arts and Sciences and the Henry B. Tippie College of Business offer a joint program leading to a Certificate in International Business. The program entails study of international business and economics; international relations and institutions; a foreign language, such as Spanish or Portuguese; and related area studies. It is designed not only for students who intend to pursue careers in international business but also for those interested in gaining a better understanding of the global economy and a broader awareness of the political, historical, and social environment in which international business operates.

The wide range of electives in the program permits students to tailor areas of specialization to their interests and to complement majors in both liberal arts and sciences and business administration.

For more information, see International Business in the Catalog and contact CLAS Academic Programs & Services in the College of Liberal Arts and Sciences or the Undergraduate Program Office in the Tippie College of Business.

Latin American Studies Certificate

The department plays an important and active role in the Latin American Studies Program, an interdisciplinary undergraduate program focusing on the history, politics, social organization, economy, art, music, religion, and literature of Latin America. Work in the program may lead to a certificate or a minor in Latin American studies.

To receive the certificate, students must have sufficient competence in Spanish or Portuguese to do background readings in the language before enrolling in the required senior seminar. See Latin American Studies in the Catalog.

Graduate Programs

The department offers two graduate degrees: Master of Arts and Doctor of Philosophy in Spanish.

Master of Arts in Spanish

The M.A. program in Spanish has two emphases: literature, which provides training in literary analysis and broad knowledge of representative works in principal areas of Hispanic literature; and linguistics, which provides training in linguistic analysis and argumentation and broad knowledge of the principal subfields of Hispanic linguistics. Applicants to the M.A. program must have completed the equivalent of the undergraduate Spanish major with a g.p.a. of at least 3.00 in course work for the major.

The M.A. requires a total of 30 s.h. (10 courses), as follows.

Literature Emphasis

<table>

</tr>
</tbody>
</table>

At least eight of the 10 courses must be taken in the Department of Spanish and Portuguese and must be numbered above 035:170. The remaining two may be taken either in the Department of Spanish and Portuguese (numbered above 035:170) or in related departments, subject to approval by the director of graduate studies.

Linguistics Emphasis

</tr>
<tr>
<td></td>
<td>One elective</td>
<td>3 s.h.</td>
</tr>
</tbody>
</table>

Of these 10 courses, at least six must be offered by the Department of Spanish and Portuguese and numbered above 035:170. The remaining four may be offered by the Department of Spanish and Portuguese (numbered above 035:170) or the Department of Linguistics.
Language Tool Requirement

M.A. students must complete the equivalent of one year of college-level study of any approved second foreign language; Portuguese is highly recommended. They may satisfy this requirement either by examination or through courses taken at The University of Iowa or another accredited university; such course work does not count toward the 30 s.h. required for the M.A.

Maximum Study Loads

Maximum course registration is 15 s.h. of graduate-level course work during fall or spring semesters and 8 s.h. of graduate-level work during summer sessions. One-quarter-time and one-third-time teaching assistants are permitted to register for the maximum study loads. One-half-time teaching assistants may not register for more than 12 s.h. in fall or spring semesters or for more than 6 s.h. during summer sessions. Additional semester hours may be taken only with Graduate College approval.

Transfer Credit

A maximum of 9 s.h. of graduate credit in approved courses may be transferred from other institutions toward the 30 s.h. required for the M.A.

Examinations

The M.A. comprehensive examination includes written and oral components. The written portion consists of a two-hour examination in each of three areas; an oral examination follows, usually lasting 90 minutes. The examining committee is composed of four departmental faculty members.

Students in the literature emphasis may choose to be examined in three literature areas or in two literature areas and one linguistics area. At least one literature area must be in Spanish literature and at least one must be in Spanish American literature. If three literature areas are chosen, at least one must represent literature written before 1700 (peninsular and/or Spanish American).

Students in the linguistics emphasis may choose to be examined in three linguistics areas or in two linguistics areas and one literature area. At least one of the linguistics areas must be in syntax or phonology. For students in both emphases, the third examination area may be a film area.

For reading lists, contact the Department of Spanish and Portuguese.

Doctor of Philosophy in Spanish

Ph.D. students choose from two programs: one is dedicated to Hispanic literatures, the other to Hispanic linguistics. The literary studies program trains students in textual analysis and literary history, criticism, and theory. The linguistic studies program provides training in linguistic analysis and theory.

Both the literature and linguistics tracks require a minimum of 57 s.h. of course work (19 courses), of which 30 s.h. may have been earned for an M.A. in Spanish at The University of Iowa or at another institution, as approved by the director of graduate studies. The Ph.D. also requires 3-15 s.h. earned in 035:299 Thesis, for a total of 72 s.h. Course requirements for each track are as follows.

Program I: Literature Track

Students must earn at least 27 s.h. (9 courses) beyond the M.A. (or 19 courses beyond the bachelor's degree). Courses taken for the M.A. may be used to meet part of this requirement. The following course work is required.

Two courses in literary theory
Three courses in Spanish literature, at least one of which must be pre-1700 literature
Three courses in Spanish American literature
One course in cinema
Two 300-level seminars in literary studies
One literature course in another Romance language (see "Language and Literature Tool Requirements")

035:299 Thesis 3-15 s.h.

Each student's plan of study is tailored to his or her area of emphasis and must be approved by the student's advisory committee. Ph.D. course work in Spanish (taken after the M.A.) must be at the 200 and 300 levels, except the Romance literature course taken for the language tool requirement.

LANGUAGE AND LITERATURE TOOL REQUIREMENTS

Before the comprehensive examination, students must complete the equivalent of three years of college-level study in another Romance language and become well-acquainted with its literature in limited areas of specialization; the study of Luso-Brazilian literature is highly recommended. This requirement can be satisfied only through course work at The University of Iowa or another accredited university.
The equivalent of one year of college-level study of another approved foreign language also is required. If Portuguese is not the language chosen to fulfill the Romance literature requirement, it must be used for this requirement. Students who choose to write dissertations on topics in Spanish or Portuguese literature before 1700 must have one year of college-level Latin or the equivalent.

Students may satisfy the language tool requirement by examination or by course work at The University of Iowa or at another accredited university; language tool course work does not count toward the 72 s.h. required for the degree.

**Program II: Linguistics Track**

Students must earn at least 27 s.h. (9 courses) beyond the M.A. (or 19 courses beyond the bachelor’s degree). Courses taken for the M.A. may be used to meet part of this requirement.

The following course work is required.

Each student's plan of study is tailored to his or her area of emphasis and must be approved by the student’s advisory committee. Ph.D. course work in Spanish (taken after the M.A.) must be at the 200 and 300 levels, except some courses offered by the Department of Linguistics and the required third-year-level course in Portuguese (see "Language Tool Requirements").

**LANGUAGE TOOL REQUIREMENTS**

Students in the linguistics track must complete the equivalent of three years of college-level study of Portuguese, and the equivalent of one year of college-level study of each of two other languages. For students specializing in historical linguistics, one of those two languages must be Latin.

Students may satisfy the language tool requirement by examination or by course work at The University of Iowa or at another accredited university. The language tool course work does not count toward the 57 s.h. of pre-thesis course work required for the degree, except the third-year-level course work in Portuguese, which may be counted with the faculty adviser’s approval.

**Comprehensive Examination**

The purpose of the Ph.D. comprehensive examination is to determine whether the student has gained sufficient breadth and depth of research knowledge in Hispanic literatures or linguistics to enter the profession as a teacher-scholar. The examining committee is composed of five departmental faculty members or four departmental faculty members and a fifth faculty member from a related department.

The Ph.D. comprehensive examination includes written and oral components. The written portion consists of a three-hour examination in each of four areas; an oral examination follows, usually lasting two hours.

The four examination areas for each track are as follows.

**Literature Track**

Examination areas include a broad area in Spanish literary history, a broad area in Spanish American literary history, and two specialized areas of the student’s choice.

The two specialized areas of the student’s choice might involve further exploration of particular periods, genres, or movements within Spanish, Spanish American, and/or Luso-Brazilian literary and cultural history; or they might involve in-depth study of specific problems in Hispanic literary criticism or in literary theory. Areas involving cinema also may be included.

The reading lists for the broad areas are based on the departmental core reading lists for each genre and time period, with a supplemental list for each of the broad areas prepared by the student in consultation with the faculty member(s) directing the exam area. The student compiles the reading
lists for each of the specialized areas in consultation with the faculty member(s) directing the area.

At least one of these specialized areas must be related to the dissertation topic. The student must submit a three-page preprospectus abstract to the examining committee before the exam in the specialized area that relates to the dissertation topic. The abstract is discussed during the oral doctoral exam.

Linguistics Track
Examination areas include Spanish syntax, Spanish phonology, Spanish language acquisition, and an additional area, typically involving exploration of specialized topics in the core areas of syntax, phonology, or language acquisition, or study of particular topics in comparative Romance linguistics, Spanish dialectology, history of the Spanish language, Portuguese linguistics, comparative foreign language pedagogy, sociolinguistics, or linguistic theory.

The reading lists for the three required areas are based on the departmental core reading lists, with a supplemental list for each area prepared by the student in consultation with the faculty member(s) directing the area. The student compiles the reading list for the specialized area in consultation with the faculty member(s) directing that area. Of the four exam areas, two should be broad, and two—including the specialized topic—focused.

At least one of these specialized areas must be related to the dissertation topic. The student must submit a three-page preprospectus abstract to the examining committee before the exam in the specialized area that relates to the dissertation topic. The abstract is discussed during the oral doctoral exam.

Dissertation Prospectus
No later than the fourth week of the semester after the Ph.D. comprehensive examination is completed, the candidate submits a dissertation prospectus for the dissertation committee's approval. The dissertation committee is composed of five faculty members, one of whom must be from outside the department.

Financial Support
Teaching and research assistantships are available to qualified graduate students. Usually, two years of support are available for completion of the M.A. and three years beyond the receipt of the M.A. for the Ph.D. As long as their studies and performance meet department standards, graduate students continue to receive support over a reasonable period of time, but usually not for more than a total of six years. Applications for financial support should be made directly to the Department of Spanish and Portuguese.

Facilities
The Language Media Center (LMC) provides students and faculty with a broad range of services and facilities that include a state-of-the-art audio language laboratory, individual audio recording carrels, video viewing rooms for small groups, video viewing stations for individuals, and networked microcomputer and interactive multimedia workstations. The LMC maintains a number of instructional technology classrooms that have special video, audio, and computer equipment for in-class presentations. The center's extensive collection of international media resources on audio tape, videotape, computer diskette, videodisc, and CD-ROM serves learners at many levels and in many disciplines.

Courses
Basic Spanish
Students must have permission from the chair of the Department of Spanish and Portuguese to take an elementary course for credit after having completed a higher-level course for which the elementary course or its equivalent is a prerequisite.

- 035:001 Elementary Spanish I 4 s.h.
  Emphasis on oral and written skills. Taught in Spanish. Prerequisite: no previous study of Spanish. GE: foreign language.

- 035:002 Elementary Spanish II 4 s.h.
  Continuation of 035:001; emphasis on oral and written skills. Taught in Spanish. GE: foreign language. Prerequisite: 035:001 or equivalent.

- 035:005 Elementary Spanish Review 5 s.h.

- 035:011 Intermediate Spanish I 3-4 s.h.
  Communication in speaking and writing; cultural topics. Taught in Spanish. GE: foreign language. Prerequisite: 035:002 or 035:005 or equivalent.

- 035:012 Intermediate Spanish II 3-4 s.h.
  Continuation of 035:011. GE: foreign language. Prerequisite: 035:011 or equivalent.

- 035:013 Accelerated Intermediate Spanish 6 s.h.
  The 035:011-035:012 sequence in one semester. GE: foreign language. Prerequisite: 035:002 or 035:005 or equivalent, and consent of Spanish GE coordinator.
035:020 Contemporary Spanish American Narrative 3 s.h.
Themes and narrative techniques in major texts, 1960–present; overview of cultural, sociopolitical aspects. Taught in English, readings in English. GE: foreign civilization and culture or humanities. Prerequisite: 08G:001.

035:030 Contemporary Latin American News Colloquium 3 s.h.
Communication issues at transnational, national, and grassroots levels; emphasis on political, socioeconomic themes; contemporary affairs as reported in Latin American press, other media. Taught in English. Same as 130:020.

035:053 Special Work 1-3 s.h.

**Spanish—Level 1, Primarily for Undergraduates**

Students should take these courses at the start of the Spanish major.

035:103 Writing in Spanish 3 s.h.
Bridge from second-year Spanish to more advanced courses in Spanish language, linguistics, and literature; emphasis on skill development in writing, critical reading in Spanish, and oral communication. Taught in Spanish. Prerequisite: 035:012 or equivalent.

035:104 Hispanic Institute: Language 3 s.h.
Grammar essentials, written exercises, short compositions, conversational activities. Prerequisite: 035:012 or equivalent.

035:105 Hispanic Institute: Study/Life in Spain 1 s.h.

035:106 Spanish for Native Speakers 3 s.h.
Reading and writing, introduction to systematic study of Spanish grammar; for bilingual students who have already acquired listening and speaking skills in Spanish. Prerequisite: consent of instructor.

035:108 Taller de Escritura Creativa 3 s.h.
Development of writing skills in Spanish through creative writing. Taught in Spanish.

035:110 Readings in Spanish Literature and Culture 3 s.h.
Tools for improving reading skills; basic concepts for textual understanding, historical overview of literary works, with focus on literature of Spain. Prerequisite: 035:012 or equivalent.

035:111 Readings in Spanish American Literature and Culture 3 s.h.
Tools for improving reading skills; basic concepts for textual understanding, historical overview of literary works, with focus on Spanish American literature. Prerequisite: 035:012 or equivalent.

035:112 Introduction to Literary Analysis 3 s.h.
Close readings of literary texts from Spain and Spanish America; basic concepts of genre (narrative, poetry, theater, essay); writing about literary texts. Prerequisite: 035:012 or equivalent.

035:113 Screening Latin America 3 s.h.
Latin American film, histories of the four major national film industries; aesthetic and political debates surrounding the New Latin American Cinema movement of the 1960s and 1970s. Prerequisite: 035:012 or equivalent.

---

**Spanish—Level 2, Primarily for Undergraduates**

Students should have at least one Level 1 course before starting these courses. Some courses have additional prerequisites.

**Language Skills**

035:116 Advanced Composition and Conversation 3 s.h.
Grammar review; class presentations and discussions; evolution of student compositions through peer editing, instructor critique; author’s analysis; summary portfolio. Prerequisite: one Spanish course numbered above 035:100.

035:118 Business Spanish 3 s.h.
Clear, concise business writing; emphasis on linguistic and cultural proficiency. Prerequisite: one Spanish course numbered above 035:100.

**Hispanic Linguistics**

035:121 Introduction to Hispanic Linguistics 3 s.h.
Basic linguistic theory as applied to analysis of Spanish language; systematic study of sound patterns, sentence construction, word formation; meanings, historical linguistics, sociolinguistics. Prerequisite: one Spanish course numbered above 035:100.

035:122 Spanish Sound Structure 3 s.h.
Articulation of Spanish sounds—description and practice; how Spanish sounds are organized into classes, relations among the different classes, how they are implemented in context, patterns they exhibit. Prerequisite: one Spanish course numbered above 035:100.

035:123 Foundations in Sociolinguistics 3 s.h.
Dialects, speech communities, variation, choosing a code, solidarity and politeness, language and gender, language planning. Prerequisite: one Spanish course numbered above 035:100.

035:124 Introduction to Bilingualism 3 s.h.
Spanish–English bilingualism in the United States; language usage, maintenance, attitudes, shift, transfer, code-switching. Prerequisite: one Spanish course numbered above 035:100.

035:127 Social History of the Romance Languages 3 s.h.
Evolution of Romance languages from Roman Empire to present; emphasis on the sociopolitical context in which spoken Latin of the Roman Empire evolved into Romance languages. Prerequisite: 035:121 or 035:123 or equivalent.

035:128 Applied Spanish Linguistics 3 s.h.
How Spanish functions as a communicative system, as revealed through linguistic analysis; linguistic research on language acquisition to facilitate language learning and teaching in the classroom. Prerequisite: 035:121 or equivalent.

035:129 Structure of the Spanish Language 3 s.h.
Detailed analysis of sentence grammar, contrasting Spanish structures with English ones; topics include pronouns, subordinate and relative clauses, word order, types of Spanish-English constructions, characteristics of questions, negations, passives, and commands. Prerequisite: 035:121 or equivalent.

---

035:100, 101, 102, 110, 120, 130, and 140 are taught in Spanish. Courses numbered above 100 are taught in English.
Spanish American Literature and Culture

035:130 Spanish American Civilization 3 s.h.
Pre-Columbian, colonial, modern periods; socioeconomic structure, form of government, culture. Prerequisite: one Spanish course numbered above 035:100.

035:131 Contemporary Spanish American Fiction 3 s.h.
Major 20th-century short-story writers and novelists (Borges, Cortázar, Fuentes, García Márquez, Rulfo, etc.) through representative works. Prerequisite: one Spanish course numbered above 035:100.

035:132 Spanish American Poetry 3 s.h.
Poetry as a literary genre, short history of its development, early forms in Spanish America, poets from Modernism to present; readings from writers including Rubén Darío, Pablo Neruda, César Vallejo, Ocampo, Paz, J.L. Borges. Prerequisite: one Spanish course numbered above 035:100.

035:133 Spanish American Theater 3 s.h.
Short history, leading 20th-century Spanish American dramatists, including Florencio Sánchez, Villarrutia, Uslí, Castellanos, Marqués, Gambaro, Wolf, Catalladó, Díaz, Berman. Prerequisite: one Spanish course numbered above 035:100.

035:134 Spanish American Short Story 3 s.h.
Works by 19th- and 20th-century Spanish American writers; emphasis on reading strategies and historical, cultural, literary backgrounds. Prerequisite: one Spanish course numbered above 035:100.

035:135 Latinos in the United States 3 s.h.
Latina/o cultural practices and products as dynamic expressions that affirm, contest, resist and are shaped in and against the mappings of race, class, nation, gender, sexuality, colonialism. Prerequisite: one Spanish course numbered above 035:100.

035:136 Culture and Language in the Andes 3 s.h.
The Andean world; transformations wrought by arrival of Europeans; continuity, change in principles of organization with emphasis on indigenous responses to conquest and continued domination by non-Andeans. Prerequisite: one Spanish course numbered above 035:100.

035:137 Introduction to Chicano Literature and Culture 3 s.h.
Recent fiction and poetry by Chicanos and Chicanas writers. Taught in English. Prerequisite: one Spanish course numbered above 035:100. Same as 088:152.

035:139 Spanish American Love Poetry 3 s.h.
Development of the love theme in Spanish American lyric poetry during Romantic, Modernist, Avant-Garde periods; Darío, Mistral, Neruda, Paz, Cardenal. Prerequisite: one Spanish course numbered above 035:100.

035:140 Spanish American Literature of Fantasy 3 s.h.
Principal manifestations from 19th-century origins to culmination in 20th-century masterpieces; analysis. Prerequisite: one Spanish course numbered above 035:100.

035:142 Introduction to Caribbean Studies 3 s.h.
Same as 087:142.

035:143 Cuban American Literature and Culture 3 s.h.
Experiences of Cuban exiled in United States, emergence of a literature and culture based on sense of dispossession, marginality, memory of island past. Taught in English. GE: cultural diversity. Prerequisite: 08G:001 or equivalent. Same as 048:106.

035:144 Latin American Women Writers 3 s.h.
Focus on 20th century; how Latin American women subjects view themselves in looking-glass of literature; textual practice specific to women; psychoanalytic approaches, contemporary feminist criticism. Prerequisite: one Spanish course numbered above 035:100. Same as 131:162.

035:145 Latin America Cinema 3 s.h.
Latin American film; histories of the four major national film industries; aesthetic and political debates surrounding the New Latin American Cinema movement of the 1960s and 1970s. Taught in English. Prerequisite: one Spanish course numbered above 035:100 or one course numbered above 048:100. Same as 048:145.

035:147 Topics in National Literatures/Cultures 3 s.h.
Prerequisite: one Spanish course numbered above 035:100.

035:148 Topics in Cinema, Literature and Society 3 s.h.
Concept of national cultures examined through major texts in literary and film history in one Latin American nation. Prerequisite: one Spanish course numbered above 035:100.

035:149 Colonial Spanish American Culture 3 s.h.
Facets of the Spanish American Colonial world, including literature, arts, music, architecture, and other forms of cultural expression; major themes and concepts, including discovery, conquest, evangelization, intercultural contact, memory, identity. Taught in Spanish. Prerequisite: one Spanish course numbered above 035:100.

035:150 Spanish Civilization 3 s.h.
Political, religious, social, economic background; important cultural, literary movements. Prerequisite: one Spanish course numbered above 035:100.

035:151 Renaissance and Golden Age Literature 3 s.h.
Introduction to literary questions of 15th to 17th centuries in Spain; understanding of literary Spanish and cultural issues of the period—end of the feudal mind, beginning of individualism, poetry, emergence of theatre, crisis of empire. Prerequisite: one Spanish course numbered above 035:100.

035:152 Modern Spanish Literature 3 s.h.
Important trends from Romanticism to generation of 1927. Prerequisite: one Spanish course numbered above 035:100.

035:153 Don Quijote 3 s.h.
Close reading of Cervantes’ comic novel about utopia and alienation in early modern Spain. Prerequisite: one Spanish course numbered above 035:100.

035:154 Hispanic Institute: Culture 3 s.h.
Overview of geography, history (political, economic, social); architecture, painting, music of Spain; readings, slides, video and audio cassettes, visits to local sites of cultural significance. Prerequisite: 036:012 or equivalent.

035:155 Hispanic Institute: Literature 3 s.h.
Introduction to poetry, narrative, and theater in Spanish literature; textual commentary and critical interpretations of major representative works of selected historical periods. Prerequisite: one Spanish course numbered above 035:100 or equivalent.

035:159 Hispanic Fiction to Film 3 s.h.
Major literary works of Spain and Spanish America as texts and as films. Prerequisite: one Spanish course numbered above 035:100.

035:160 Medieval Spanish Literature in Context 3 s.h.
Introduction to Medieval Spanish literature, culture, history; Poema del Cid and the Reconquest; Milagros de Nuestra Señora and the Camino de Santiago; Libro de buen amor and popular culture; Cancionero and the Troubador dynasty. Prerequisite: one Spanish course numbered above 035:100.

035:161 Masterpieces of Modern Spanish Literature 3 s.h.
Works of the last 30 years of the 19th century, up to the outbreak of the Spanish Civil War, Realism, Naturalism, generation of 1898, generation of 1913, generation of 1927. Prerequisite: one Spanish course numbered above 035:100.
Spanish—Level 3, for Undergraduate and Graduate Students

Undergraduates should take the following courses during their last semesters of enrollment. These courses are also open to M.A. students. All of these courses require a research paper. Prerequisites vary.

035:170 Advanced Spanish Review 3 s.h.
Attention to problem areas of vocabulary and grammar; structured practice of realistic communication tasks; advanced level. Prerequisites: at least two Spanish courses numbered above 035:100.

035:172 Topics in Cultural Studies 3 s.h.
Prerequisites: two Spanish courses numbered above 035:100.

035:173 Colonial Spanish American Literature 3 s.h.
Readings from the formative period of Spanish American culture; may include discovery and conquest, ethnicity and gender, dissent and popular resistance. Prerequisite: one Spanish literature course numbered above 035:130.

035:174 Contemporary Mexican Theater and Performance 3 s.h.
Contemporary theatrical and performance production in Mexico since the 1960s. Prerequisite: one Spanish literature course numbered above 035:130.

035:175 Cultural Identity in Caribbean Literature 3 s.h.
Main currents in 20th-century Hispanic Caribbean literature: americanismo literario, poesía negra, testimonial narrative centered on slavery and women's fiction; Caribbean cultural context in music, humor, Afro-Caribbean rituals. Prerequisite: one Spanish literature course numbered above 035:130.

035:176 Latin American Studies Seminar 3 s.h.

035:177 Topics in Spanish American Literature 3 s.h.
Prerequisite: one Spanish literature course numbered above 035:130.

035:178 Survey of Twentieth-Century Puerto Rican Literature 3 s.h.

035:180 Spanish Golden Age Fiction 3 s.h.
Literature and society in first centuries of Spanish Modernity, Renaissance and Baroque periods, love and the self, alienation, utopias, the body and morals, cultural dimensions of genres. Prerequisite: one Spanish literature course numbered above 035:130.

035:181 Topics in Spanish Literature 3 s.h.
Prerequisite: one Spanish literature course numbered above 035:130.

035:182 Spanish Picaresque Literature 3 s.h.
Major texts on the Spanish Golden Age’s archetypal rogue and pseudo-autographical narratives; questions of poverty, social mobility in beginning of modern Spanish society; male, female social offenders; Lazarillo de Tormes, Guzmán de Alfarache, La hija de Cleofe. Prerequisite: one Spanish literature course numbered above 035:130.

035:183 Spain 1700-1900 3 s.h.
Literature and culture of modernization in Spain during the eighteenth and nineteenth centuries; literary and cultural periods including the Enlightenment, Romanticism, Realism, Modernism. Prerequisite: one Spanish literature course numbered above 035:130.

035:185 Topics in Hispanic Linguistics 3 s.h.
Prerequisite: 035:121 or equivalent.

035:186 Introduction to Spanish Syntax 3 s.h.
Basic principles of transformational syntax as applied to analysis of Spanish syntactic structure; extensive syntactic analysis. Prerequisite: 035:121 or equivalent.

035:187 Spanish American Dialectology 3 s.h.
Analysis and comparison of selected morpho-syntactic aspects of the dialects of several Spanish American countries; basic historical issues of Spanish American dialectology (regional and social dialects, dialect zones, peninsular dialect base, etc.). Prerequisite: 035:121 or equivalent.

035:188 History of the Spanish Language 3 s.h.
Development of phonetic, morphological, syntactical proprieties of the Spanish language from its Latin roots; emphasis on internal history and process of expansion from a minor dialect (Castilian) to a significant world language. Prerequisite: 035:121 or equivalent.

035:189 Introduction to Spanish Phonology 3 s.h.
Sound patterns of Spanish, how various theoretical approaches solve basic problems in Spanish phonology; identification of linguistic universals, how they are manifested in the sound structure of Spanish. Prerequisite: 035:121 or 035:122 or equivalent.

035:190 Chicano Cinema 3 s.h.
History of Chicano independent and industry film and television production since the Chicano political and cultural movement began in the 1960s. Taught in English. Prerequisite: one Spanish literature or culture course numbered above 035:100 or one film studies course. Same as 048:190.

035:191 Topics in Latin American Cinema 3 s.h.
Taught in English. Prerequisite: one Spanish literature or culture course numbered above 035:130 or one film studies course. Same as 048:178.

035:192 Topics in Film Studies 3 s.h.
Prerequisite: one Spanish literature or culture course numbered above 035:130 or one film studies course.

035:193 Sexualities in Hispanic Cultures 3 s.h.
Historical, social, and theoretical concepts of sexuality in Spanish, Spanish American, and U.S. Latino/a cultures; constructions of gender and sexual identity. Taught in English. Prerequisite: 154:110 or consent of instructor. Same as 154:185.

035:194 Topics in Literary Studies 3 s.h.
Prerequisite: at least one Spanish literature course numbered above 035:130.

035:195 Senior Seminar 3 s.h.
Analysis of works of a major author or theme from the Latin American or the Peninsular traditions or on a focused set of problems in Hispanic linguistics.

035:196 Spanish-to-English Translation Workshop 3 s.h.
Translation theory and practice of literary translation; effectiveness of translations done by students, markets for literary translation, copyright law, authors’ rights. Prerequisite: two Spanish literature courses numbered 035:130 or above.
### 035:198 Honors: Research and Thesis
Prerequisite: honors standing.
2-3 s.h.

### 035:199 Special Work
1-3 s.h.

## Spanish—Primarily for Graduate Students

### 035:200 Foreign Language Teaching Methods
3 s.h.
Readings in pedagogical theory and practice and second-language acquisition; experience designing activities for teaching and assessment, with critiques based on current theories and approaches; development of reflective practices toward one's own language teaching.

### 035:201 Second Language Acquisition Research and Theory I
3 s.h.
Theories of second language acquisition; perspectives (linguistic, psychological, sociological, etc.) that inform SLA theory; paradigms and approaches used in SLA research and in learning to read literature critically and intelligently; research project designed by students. Same as 009:237, 039:200, 39:201, 164:201.

### 035:202 Second Language Acquisition Research and Theory II
3 s.h.
Same as 039:201, 164:202.

### 035:204 Introduction to Spanish Linguistic Analysis
3 s.h.
Introduction to goals and concepts of generative linguistics as applied to Spanish: main subfields of linguistics; skill development in linguistic analysis, argumentation.

### 035:207 Topics in Comparative Romance Linguistics
3 s.h.
Comparative study of phonology, morphology, or syntax of the main Romance languages as informed by linguistic theory; diachronic or synchronic perspective. Repeatable. Prerequisite: 035:204 or equivalent. Recommended: additional graduate course work in linguistics. Same as 20E:201, 103:262.

### 035:209 Spanish Phonology
3 s.h.
Modern approaches to synchronic phonology as applied to Spanish; focus on traditional descriptive problems, recent generative analyses. Prerequisite: phonology or linguistics course.

### 035:210 Spanish Syntax
3 s.h.
Spanish syntactic constructions examined in framework of selected syntactic theory; emphasis on development of syntactic argumentation. Prerequisite: 035:204 or equivalent. Recommended: additional course work in syntax.

### 035:211 Topics in Hispanic Linguistics
3 s.h.
Taught in Spanish or English. Repeatable. Prerequisite: graduate standing.

### 035:212 Multimedia and Second Language Acquisition
3 s.h.
Same as 009:238, 013:253, 164:211.

### 035:221 Spanish American Dialectology
3 s.h.
Regional and social dialects, dialect zones, peninsular dialect base; indigenous and African influences; linguistic analysis of representative data samples of Spanish American speech.

### 035:225 Topics in Literary Studies
3 s.h.
Repeatable.

### 035:226 Topics in Cultural Studies
3 s.h.
Repeatable.

### 035:227 Topics in SLA: Writing
3 s.h.
Theory, research approaches, and assessment in second language writing. Taught in English. Same as 010:275, 164:227.

### 035:228 Topics in SLA: Speaking
3 s.h.
Same as 009:236, 164:221.

### 035:230 Spanish American Narrative: Nineteenth Century
3 s.h.
Review of narrative, with emphasis on Romanticism.

### 035:231 Spanish American Narrative: Modern and Regional
3 s.h.

### 035:232 Spanish American Theater
3 s.h.
Theater from pre-Columbian era up to and emphasizing contemporary theater.

### 035:233 Spanish American Poetry of the Twentieth Century
3 s.h.
Principal works of vanguard poets and characteristics of their poetry; Vicente Huidobro, César Vallejo, Pablo Neruda, Jorge Luis Borges, Octavio Paz, Nicanor Parra.

### 035:234 Spanish American Poetry Before 1918
3 s.h.
European and Spanish American forebears of modernism; modernistic poetic motifs in verse and prose; early modernists; Rubén Darío and flowering of modernism; death and transfiguration of the swan.

### 035:235 Contemporary Spanish American Narrative
3 s.h.
Narrative from mid-20th century to present; emphasis on the Boom, post-Boom.

### 035:239 Queer Theory
3 s.h.
Same as 008:239, 048:239.

### 035:240 Topics in Culture and Politics
3 s.h.
Comparative and interdisciplinary approaches to current theoretical debates regarding culture and politics. Repeatable. Same as 048:240.

### 035:245 Spanish American Short Story of Fantasy
3 s.h.
Theories of Tzvetan Todorov, Irène Bessière on literature of fantasy; diachronic study of literature of fantasy, from Juan Montalvo’s ‘Gaspar Blandón’ to work of Biny coppia, Julio Cortázar, other authors including Darío, Lugones, Nervo, Borges, Carpentier, Fuentes, García Márquez.

### 035:246 Women Writers of Latin America
3 s.h.
Emergence of a new female subject in 20th-century Latin American women’s writing; Latin American women writers’ contribution to contemporary feminist thought. Same as 131:246.

### 035:247 Readings: Latin American History
arr.
Questions that have preoccupied major Latin American pensadores of 19th and 20th centuries: constitutional organization, secularization of society, colonial heritage, race and nationality, the Indian, “Latin democracy,” cultural identity, social revolution, economic dependency and development. Same as 016:288.

### 035:248 Topics in Film Studies
3 s.h.
Repeatable.

### 035:250 Medieval Spanish Literature
3 s.h.
Critical reading of canonical medieval texts in their cultural context; application of modern theory to medieval texts; works such as El Poema del Cid, El Romanceiro Veijo, Milagros de Nuestra Señora, El Conde Lucanor, El Libro de Buen Amor.

### 035:254 Drama of the Golden Age
3 s.h.
Theater, spectacle, public entertainment; social conditions of Baroque theater in Spain; ideological, moral messages; Lope de Vega's model for mass-oriented art; depiction of ideal society; heroes, transgressors; role of women.

### 035:255 Spanish Renaissance and Baroque Literature
3 s.h.
Critical analysis of social, moral, political function of literature in early modern Spain; Renaissance and Baroque poetry; La Celestina, parnaso literature; Don Quijote; narratives of the court; modern subjectivity; the question of genre.

Prerequisite: consent of instructor.
Speech Pathology and Audiology

Chair: Paul J. Abbas
Professors: Paul J. Abbas (Speech Pathology and Audiology/Otolaryngology—Head and Neck Surgery), Ruth A. Bentler, Kate E. Geiter (Music/Speech Pathology and Audiology), Richard R. Hurtig, Ingo R. Titze (Speech Pathology and Audiology/Music, UI Foundation Distinguished Professor), J. Bruce Tomblin (Speech Pathology and Audiology/Otolaryngology—Head and Neck Surgery), Spriestersbach Distinguished Professor in the Liberal Arts), Chris W. Turner (Speech Pathology and Audiology/Otolaryngology—Head and Neck Surgery), Richard S. Tyler (Otolaryngology—Head and Neck Surgery/Speech Pathology and Audiology)
Adjunct professors: Fariborz Alipour-Haghighi, Lorraine Ramig
Associate professors: Douglas Baynton (History/Speech Pathology and Audiology), Carolyn Jane Brown (Speech Pathology and Audiology/Otolaryngology—Head and Neck Surgery), Eileen Finnegan (Speech Pathology and Audiology/Otolaryngology—Head and Neck Surgery), Penelope K. Hall, Michael P. Karnell (Otolaryngology—Head and Neck Surgery/Speech Pathology and Audiology), Karla McGregor, Jerald B. Moon, Patricia M. Zebrowski
Associate professor emeritus: Charles V. Anderson
Associate professors (clinical): Toni D. Cilek, Ann M. Fennell, Lenore Holte, Danielle Kelsay, Linda Louko, Diane P. Niebuhr, Anne K. Wallace
Adjunct associate professors: Carolyn Jean Brown, Charles A. Miller, Ronald C. Scherer, Katherine Verolzini, Gerald N. Emmermann
Assistant professors: Kirrie Ballard, Sandie Bass-Ringdahl, Jean Gordon, Amanda Owen
Assistant professors (clinical): Karen Bryant, Stephanie Heckstein
Adjunct assistant professors: Tannin Fuja, Kelly Schmidt-Clay, Alice Smith, Brad Story, Gail Takahashi
Adjunct instructors in practicum instruction: Barbara Anderson, Julie Bridges, Paige Burden, Deborah Downey, Katherine Emrich, Barbara A. Gienapp, Peggy Gingerich, Daniel Hansen, Emily Hart, Rebecca Hubbard, Claudia L. Knutson, Marthia Barth Leick, Mary Lowder, Pena Lubrica, Mary F. Lukas, Joan D. Marttila, Elizabeth Merrifield, Rebecca R. Miller, Aaron Packer, Debra K. Robins, Janette Rogers, Sandra D. Show, Caroline B. Simons, Christine Troxell
Adjunct lecturer: Alice Smith
Undergraduate degree: B.A. in Speech and Hearing Science
Graduate degrees: M.A. in Speech Pathology and Audiology, Ph.D. in Speech and Hearing Science, Au.D. in Audiology
Web site: http://www.shc.uiowa.edu

The courses and degree programs of the Department of Speech Pathology and Audiology are planned to meet the needs of students preparing for careers in clinical service, college and university teaching, and research concerned with speech, language, or hearing processes and disorders. The department also offers courses for students with vocational and professional goals in other fields—for example, engineering, psychology, education, speech, theatre arts, dentistry, and medicine—whose preparation may be enriched by the study of speech and hearing processes and their disorders.

Advanced degree holders in this field provide clinical services for people with speech, hearing, or language problems in hospitals, community clinics, rehabilitation facilities, elementary and secondary schools, and private practice. They teach in colleges and universities and conduct research in laboratories concerned with communication processes and disorders.

All of the department’s professional programs leading to the M.A. or Au.D. are accredited by the Council on Academic Accreditation of the American Speech-Language-Hearing Association.

Undergraduate Program

Since the master’s degree or Au.D. is the minimum level of preparation for persons seeking professional careers in this field, the undergraduate curriculum leading to the B.A. in speech and hearing science does not qualify an individual to work professionally in the field. Instead, it is designed primarily to prepare students for graduate work. Hence, the undergraduate program emphasizes the normal processes of speech, hearing, and language. The undergraduate program also may be taken by students earning College of Liberal Arts and Sciences degrees who are not seeking careers in this field.

Course Requirements

The B.A. in speech and hearing science requires eight core courses offered by the department and seven cognate courses offered by other departments. Students may choose cognate courses that also help complete the College of
Liberal Arts and Sciences General Education Program. The requirements are as follows.

All of these:
003:015 Introduction to Speech and Hearing Processes and Disorders 3 s.h.
003:110 Phonetics: Theory and Applications 3 s.h.
003:111 Basic Acoustics for Speech and Hearing 3 s.h.
003:112 Anatomy and Physiology of Speech Production 4 s.h.
003:113 Introduction to Hearing Science 4 s.h.
003:116 Basic Neuroscience for Speech and Hearing 3 s.h.
003:117 Psychology of Language 3 s.h.
003:118 Language Development 3 s.h.
031:001 Elementary Psychology 3 s.h.

One of these:
07P:025/22S:025 Elementary Statistics and Inference 3 s.h.
07P:143/22S:102 Introduction to Statistical Methods 3 s.h.
22S:030 Statistical Methods and Computing 3 s.h.

One of these:
029:008 Basic Physics (with lab) 4 s.h.
*029:011 College Physics 4 s.h.

One of these:
031:013 Introduction to Clinical Psychology 3 s.h.
042:108 Basic Aspects of Aging 3 s.h.

One of these:
07P:106 Child Development 3 s.h.
031:014 Introduction to Child Development 3 s.h.

One of these:
*002:002 Introductory Animal Biology (with lab) 4 s.h.
*002:010 Principles of Biology 1 (with lab) 4 s.h.
002:021 Human Biology (with lab) 4 s.h.

*Courses marked with an asterisk are preferred.

A good background in mathematics is essential for success in many courses required for the B.A. in speech and hearing science. All students who graduate with an undergraduate degree in speech and hearing science are required to have completed a college-level trigonometry course successfully. First-year calculus is encouraged, particularly for those who are interested in pursuing a graduate degree in audiology.

Transfer students must complete a minimum of 15 s.h. in departmental courses at The University of Iowa.

Students have the opportunity and are encouraged to obtain 25 hours of supervised clinical observation, a prerequisite for participation in clinical practicums at the graduate level. This requirement is satisfied by completion of independent observations or required observations made for elective departmental courses.

**Four-Year Graduation Plan**

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

Note: The major requires specific mathematics and science competencies that may be satisfied with courses approved for General Education.

**Before the third semester begins:** at least one-quarter of the semester hours required for graduation

**Before the fifth semester begins:** three courses in the major and at least one-half of the semester hours required for graduation

**Before the seventh semester begins:** nine courses in the major and at least three-quarters of the semester hours required for graduation

**Before the eighth semester begins:** 12 courses in the major

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

**Honors**

The junior/senior-year program leading to the B.A. with honors in speech and hearing science is open to students who at the beginning of their junior year have completed at least 10 s.h. of course work that can be counted toward a major in the department and have earned a g.p.a. of at least 3.33 in all major course work and all course work at the University.

At any time during their undergraduate study, students who have a cumulative University of Iowa g.p.a. of at least 3.33 and who did not enter the University as honors students may enroll in
the University Honors Program [contact the University Honors Program for more information]. Students with a g.p.a. of 3.33 or higher may enter the department’s honors program upon recommendation of the departmental honors adviser. To graduate with honors, students must be members of the University Honors Program and must complete both 003:097 Honors Seminar and 003:098 Honors Thesis. Students register for 003:097 in the spring of their junior year and for 003:098 in both fall and spring of their senior year.

**Graduate Programs**

**M.A. With Research Emphasis (General Emphasis)**

The general M.A. program is designed for students who intend to pursue a Ph.D. or who seek additional education but do not intend to work professionally in the United States as speech language pathologists or audiologists. It typically includes a substantial portion of the courses in the professional M.A. and Au.D. curricula. Students who enroll in the general M.A. program are required to complete a thesis and defend their research successfully at a final oral examination.

In addition to a thesis, the M.A. with general emphasis requires a minimum of 38 s.h. of graduate credit and typically requires two years to complete. The specific course work required depends on the background and interests of the student.

**M.A. With Speech-Language Pathology Emphasis**

The M.A. with professional emphasis in speech-language pathology prepares clinicians in speech-language pathology or audiology to be able to function independently in a variety of clinical settings. Graduates of the program meet all academic and practicum requirements for clinical certification by the American Speech-Language-Hearing Association and for licensure by the state of Iowa. The program is designed to ensure that upon graduation, the student will meet requirements for immediate professional employment.

M.A. students usually have a background of undergraduate courses in speech and hearing science, psychology of language, and human behavior that is equivalent to an undergraduate major in this field at The University of Iowa.

Before registering in the program, entering M.A. students receive descriptive materials about basic science core courses considered to be required preparation for the M.A. program, and clinical core courses required for the M.A. for which comparable courses taken at the undergraduate level may be accepted. Decisions about incorporating background course work in these areas are made by the faculty adviser in consultation with the student and the instructors of the basic science or clinical core courses. Entering students must have completed the following courses or their equivalents.

- 003:110 Phonetics: Theory and Applications 3 s.h.
- 003:112 Anatomy and Physiology of Speech Production 4 s.h.
- 003:113 Introduction to Hearing Science 4 s.h.
- 003:115 Basic Neuroscience for Speech and Hearing 3 s.h.
- 003:117 Psychology of Language 3 s.h.
  or 003:218 Psycholinguistics (preferred) 3 s.h.
- 003:118 Language Development 1-3 s.h.
- 07P:025 Elementary Statistics and Inference 3 s.h.

Biology, mathematics, or physics courses (at least one biology or physics course) 6 s.h.

Behavioral or social science courses (at least one psychology course) 6 s.h.

Students pursuing the professional M.A. with speech-language pathology emphasis must complete at least 4 s.h. of work related to research. This may be accomplished by any combination of enrollment in seminars (2 s.h. each) and/or research hours. Completion of the research hours may consist of work toward a thesis or preparation of a paper involving one or a combination of the following: literature review, prospectus development, and presentation of data. A paper is required at the end of each semester’s enrollment. An exception to this requirement can be made in the case of research hours leading to a thesis.

Candidates for an M.A. with professional emphasis in speech-language pathology are not required to complete a thesis, although all students demonstrating research aptitude and interest are encouraged to do so. Students who do not elect the thesis option are required to take final written comprehensive examinations.

A typical M.A. program with professional emphasis usually takes two calendar years to complete but may take longer, depending on the student’s background and personal interests.
CORE REQUIREMENTS

All students seeking an M.A. with professional emphasis in speech-language pathology must take the following.

003:135 Foundations of Clinical Practice I 3 s.h.
003:136 Foundations of Clinical Practice II 1 s.h.
003:137 Foundations of Clinical Practice III 1 s.h.

In addition, they must take the following courses unless they completed equivalent courses as undergraduates.

003:114 Introduction to Voice Disorders 2 s.h.
003:115 Structural Disorders 2 s.h.
003:116 Basic Neuroscience for Speech and Hearing 3 s.h.
003:140 Manual Communication 1 s.h.
003:145 Developmental Speech and Language Disorders 3 s.h.
003:146 Neurogenic Disorders of Speech 2 s.h.
003:183 Introduction to Stuttering 2 s.h.
003:185 Hearing Loss and Audiometry 3 s.h.
003:244 Rehabilitative Audiology 3 s.h.

Students must take 003:510 Seminar: Introduction to Research in Speech and Hearing (1 s.h.) during the fall semester of their first year.

They must take 003:515 Proseminar (0 s.h.) during the fall and spring semesters of their first year.

Also required are additional semester hours of practicum registration sufficient to meet supervised, direct clinical experience requirements for the Certificate of Clinical Competence of the American Speech-Language-Hearing Association and the Iowa license, and to provide broad, supervised practicum experience.

In addition to the core requirements listed above, all students preparing to be speech-language pathologists must take a minimum of 12 s.h. from the following.

003:201 Principles of Voice Production 3 s.h.
003:206 Speech and Language Disorders of Young Children: Birth to Five Years 2 s.h.
003:207 Speech and Language Disorders of Older Children: Five to Eighteen Years 2 s.h.
003:208 Communication Problems of Developmental Disorders and Disabilities 2 s.h.
003:213 Voice Habilitation 2 s.h.
003:222 Speech and Hearing Anatomy (dissection) 2 s.h.
003:228 Stroboscopy 1 s.h.
003:233 Aphasia 2 s.h.
003:234 Motor Speech Disorders 2 s.h.
003:236 Swallowing Disorders 2 s.h.
003:237 Cleft Palate and Related Disorders 2 s.h.
003:260 Designing Assistive Devices 1-3 s.h.
003:282 Phonological Development and Disorders 2 s.h.
003:283 Stuttering 2 s.h.
003:350 Preceptorship in Augmentative Communication 1 s.h.
07E:104 Remedial Methods in Speech and Hearing 2 s.h.

Students also must earn a total of 4 s.h. in 003:590 Research; or 4 s.h. by taking two seminar courses (e.g., 003:521 and 003:523); or 4 s.h. in a combination of research and seminar courses.

M.A. With Audiology Emphasis

Students considering an M.A. with emphasis in audiology who want to work in a clinical setting following graduation should consult their advisers. All students working toward an M.A. in audiology must take the following.

003:219 Fundamentals of Laboratory Instrumentation 3 s.h.
003:240 Hearing Aids I 3 s.h.
003:242 Hearing Aids II 3 s.h.
003:244 Rehabilitative Audiology 3 s.h.
003:245 Pediatric Audiology 2 s.h.
003:246 Advanced Audiology 3 s.h.
003:247 Medical Audiology 3 s.h.
003:290 Objective Measures 3 s.h.

They also must take two seminars, and two advanced courses chosen from the following.

003:222 Speech and Hearing Anatomy 2 s.h.
003:224 System and Signal Theory for Speech and Hearing Sciences 3 s.h.
003:230 Advanced Hearing Science and Speech Perception 4 s.h.
003:243 Hearing Aid Assembly and Repair 2 s.h.
003:249 Cochlear Implants 2 s.h.
003:256 Physiology of Hearing 3-4 s.h.
003:292 Advanced Rehabilitative Audiology 2 s.h.
07E:104 Remedial Methods in Speech and Hearing 2 s.h.

Students may select additional practicum, research, and elective course work.
Students planning to work as audiologists in a school setting must take 07E:104 Remedial Methods in Speech and Hearing along with appropriate practicum experiences.

**Requirements for Employment**

A number of states, including Iowa, require a state license in speech-language pathology or audiology for persons who work in settings other than the public schools. Students who meet the requirements listed above for the M.A. with professional emphasis also meet the academic requirements for the license in Iowa as well as in most other states. In 2007 the requirements to earn ASHA national certification in audiology will change. Certification will require a clinical doctoral degree or the equivalent. Currently, it is not known how this change will affect state licensure. Students preparing for careers in audiology should consult their advisers.

**Public School Licensure**

Students preparing for clinical positions in public schools typically must meet school licensure or certification requirements of the states in which they plan to work. The following criteria meet the requirements for endorsement as speech-language pathologists or audiologists in Iowa and most other states.

- A master’s degree with professional emphasis in speech-language pathology or audiology
- Completion of an approved human relations component
- Completion of courses that cover the education of the disabled and the gifted and talented (e.g., exceptional persons, education of the gifted)
- Completion of the requirements in speech-language pathology or audiology and the 20 s.h. professional education sequence, including 07E:104 Remedial Methods in Speech and Hearing and 07E:192 Special Area Student Teaching as a speech-language pathologist or audiologist; course work in the following areas must be completed to meet the professional education sequence:
  - **Curriculum** (e.g., reading, methods, curriculum development)
  - **Foundations** (e.g., philosophy of education, foundations of education)
  - **Educational measurement** (e.g., tests and measurements, measures and evaluations of instruction)
  - **Educational psychology** (e.g., educational psychology, counseling theories and techniques)
  - **Special education** (e.g., introduction to special education, exceptional persons, learning disabilities)
  - **Child development** (e.g., human growth and development, principles and theories of child development, history and theories of early childhood education)

  Note: General Education courses (e.g., introduction to psychology, sociology, history, literature, and humanities) do not meet the requirements of the professional education sequence.

**Clinical Doctorate in Audiology (Au.D.)**

Students who wish to work as audiologists are encouraged to earn a clinical doctorate in audiology (Au.D.). The four-year program is designed for students with an undergraduate degree in speech pathology and hearing science. Students must complete the following courses; they may be excused from taking courses whose equivalents they completed successfully during undergraduate study.

- 22M:016 Calculus for the Biological Science (or one semester of calculus) 4 s.h.
- 003:135 Foundations of Clinical Practice I 3 s.h.
- 003:145 Developmental Speech and Language Disorders 3 s.h.
- 003:219 Fundamentals of Laboratory Instrumentation 3 s.h.
- 003:224 System and Signal Theory for Speech and Hearing 3 s.h.
- 003:226 Hearing Loss Prevention 2 s.h.
- 003:230 Advanced Hearing Science and Speech Perception 4 s.h.
- 003:240 Hearing Aids I 3 s.h.
- 003:242 Hearing Aids II 3 s.h.
- 003:244 Rehabilitative Audiology 3 s.h.
- 003:245 Pediatric Audiology 2 s.h.
- 003:246 Advanced Audiology 3 s.h.
- 003:247 Medical Audiology 3 s.h.
- 003:249 Cochlear Implants 2 s.h.
- 003:256 Physiology of Hearing 3-4 s.h.
- 003:290 Objective Measures 3 s.h.
- 003:292 Advanced Rehabilitative Audiology 2 s.h.
- 003:311 Clinical Practice in Audiology arr.

Students also must select a minimum of three courses from the following electives; one must be a seminar. With their advisers’ consent, students
may substitute other University of Iowa course work to satisfy this requirement.

003:222 Speech and Hearing Anatomy 2 s.h.
003:243 Hearing Aid Assembly and Repair 2 s.h.
003:526 Seminar: Rehabilitative Audiology 2 s.h.
003:535 Seminar: Evoked Potentials 2 s.h.
003:537 Seminar: Clinical Audiology 2 s.h.
003:538 Seminar: Auditory Physiology 2 s.h.
07E:104 Remedial Methods in Speech and Hearing 2 s.h.
068:199 Basic Otolaryngologic Science 2 s.h.
132:180 Fundamental Neuroscience 4 s.h.
158:101 Topics in Deaf Studies 3 s.h.
158:110 Teaching Deaf and Hard of Hearing Students 3 s.h.

Doctor of Philosophy

The Ph.D. program provides flexible, comprehensive training for the scholar-researcher interested in communication processes and their disorders. Students with diverse backgrounds in the natural and behavioral sciences are encouraged to apply and develop their skills in an atmosphere of interdisciplinary research.

The program reflects the broad interests of its multidisciplinary faculty, whose members have diverse backgrounds in speech, language, hearing, engineering, physiology, physics, psychology, linguistics, and bioengineering. Faculty members are committed to an interdisciplinary approach to questions at every level of the speech and language production/perception system.

The purpose of the doctoral program is to provide the integrated knowledge necessary for a productive career in speech-language pathology and audiology, communication science, and related areas.

The department encourages candidates with special interests, goals, or backgrounds to develop individualized programs of study. There are no required courses for the Ph.D.; rather, a program of study is developed by each student in consultation with a faculty committee. The course of study is developed from courses offered by the department, courses in other areas (e.g., physics, engineering, psychology, mathematics, statistics, physiology, neurology, anatomy, and others), and special reading and research experiences.

The following courses are offered by the department of Speech Pathology and Audiology primarily for Ph.D. students. (Students interested in specific areas of research and selected publication citations of the faculty are encouraged to write to the department.)

003:201 Principles of Voice Production 3 s.h.
003:218 Psycholinguistics 3 s.h.
003:219 Fundamentals of Laboratory Instrumentation 3 s.h.
003:224 System and Signal Theory for Speech and Hearing 3 s.h.
003:230 Advanced Hearing Science and Speech Perception 4 s.h.
003:250 Acoustics of Speech 4 s.h.
003:251 Biomechanics of Speech 4 s.h.
003:252 Physiology of Speech Production 5 s.h.
003:256 Physiology of Hearing 3-4 s.h.
003:511 Introduction to Doctoral Research (taken spring of the first year) 1 s.h.

In addition, seminars offered by the department cover a broad range of topics relevant to doctoral study.

Students in the Ph.D. program usually are expected to register for research credit (003:590 Research) during each semester of residence and to register for and participate in 003:515 Proseminar.

Knowledge in each of the areas of hearing, speech, language, mathematics, statistics, computer science, and instrumentation is required of all students. Decisions regarding the extent of this knowledge and how it is obtained (e.g., course work or independent study) are made jointly by the student and the student's faculty committee.

Doctoral students who have not written a master's thesis must complete the equivalent of a master's thesis project as well as the comprehensive examination. They also must successfully complete and submit a dissertation based on original research.

Admission, Appointments

The Department of Speech Pathology and Audiology has requirements for admission and graduate appointments that supplement those specified by the Graduate College. A brief summary of department requirements is presented below. More detailed information is available from the director of graduate studies.

Application Form

All applicants for admission to graduate study in the Department of Speech Pathology and Audiology must complete the Graduate College application form. In addition, they must complete
the departmental information form, available from the department.

**Admission to the M.A. and Au.D. Programs**

The department bases M.A. admission on applicants’ credentials relative to those presented by other applicants for the same term. While an undergraduate g.p.a. above 3.20 does not ensure admission, the department admits few applicants with an undergraduate g.p.a. below 3.20. Completed applications must be received no later than January 15 for enrollment the next summer session or fall semester. Later applications are considered only in special situations. Applications to begin study spring semester are considered only under special circumstances and only if received no later than the preceding November 1.

**Admission to the Ph.D. Program**

Completed applications should be received by February 1 for summer session and fall semester and November 1 for spring semester. Applicants who want to be considered for graduate appointments must file the admission application by February 1. Applicants usually are notified of action on their admission within six weeks of the application deadline.

**Application for Graduate Appointments**

The following information applies to all financial appointments administered by the department.

- Graduate appointments usually begin only in fall semester. Students beginning study spring semester or summer session are considered for appointments for the following fall semester.
- Scores on the Graduate Record Examination (GRE) General Test are required for consideration for financial assistance.
- Appointment applications must be received by January 15 to ensure consideration for an appointment beginning the following fall semester.
- Initial appointment offers generally are made between April 1 and June 1; however, the department continues to make offers after this time.

**Clinical Facilities**

The clinical training program benefits greatly from the fact that Iowa City is the principal health center of the state, and from the ready availability of its health service facilities for clinical training of students in speech-language pathology and audiology.

The University of Iowa Affiliated Speech and Hearing Services include the Wendell Johnson Speech and Hearing Clinic; the division of speech and hearing in the University Hospitals and Clinics (UIHC) Department of Otolaryngology—Head and Neck Surgery; UIHC Consolidated Speech and Swallowing Services, which provides services to the Departments of Neurology, Child Psychiatry, and Otolaryngology—Head and Neck Surgery; speech and hearing services in the Center for Disabilities and Development; Pediatrics Regional Child Health Specialty Clinics; and the audiology and speech pathology service in the Veterans Affairs Iowa City Health Care System. Directors of these programs form the Council on Speech Pathology and Audiology at The University of Iowa.

The Wendell Johnson Speech and Hearing Clinic serves the University and the general public. Included in its services are outpatient evaluation and rehabilitation programs for speech, hearing, and language problems and one-week intensive summer programs in stuttering, language development, reading, and aural rehabilitation. These clinical programs give students supervised clinical experience with a wide variety of speech, hearing, and language disorders.

In addition to the clinical training in the Wendell Johnson Speech and Hearing Clinic, training also may be acquired in supervised clinical practice with elementary school children through various state area education agencies; and in supervised clinical practice in speech, language, and hearing services provided by the University of Iowa Hospitals and Clinics Consolidated Speech and Swallowing Services, the Regional Child Health Specialty Clinics, Center for Disabilities and Development, and the Veterans Affairs Iowa City Health Care System.

Public and private departments and programs in addition to those mentioned above often contribute to the cooperative professional training, research, and service programs.
Research Facilities

Facilities in the Wendell Johnson Speech and Hearing Center include audiometric testing suites, diagnostic and remediation suites, equipment for diagnosis and therapy, a closed-circuit television system, and laboratories and equipment for acoustic, physiologic, and perceptual studies of speech, and for audiologic, psychoacoustic, and neurophysiologic studies of hearing. Mechanical and electronic shops and trained technical personnel are available for assistance in research instrumentation.

Cooperation with varied departments in the Carver College of Medicine and the College of Dentistry makes additional laboratory facilities available for research on problems in speech and hearing. The participation and cooperation of specialists from various fields, including psychology, child development, education, engineering, statistics, and medicine, further broaden the scope of research activities in speech and hearing.

Courses

For Undergraduates

003:015 Introduction to Speech and Hearing Processes and Disorders 3 s.h.
Speech, language, auditory behavior as fields of scientific study; major types of speech, hearing, language disorders. Offered fall and spring semesters.

003:029 First-Year Seminar 1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor, may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Prerequisite: first or second semester standing.

003:090 Research Practicum arr.
Individual or small group participation in faculty research projects. Prerequisite: consent of instructor.

003:097 Honors Seminar 2 s.h.
Research topics and procedures in speech and hearing sciences; ongoing faculty research, research opportunities, possible research projects. Prerequisite: honors standing with intent to complete an honors thesis.

003:098 Honors Thesis 2 s.h.
Close work with a faculty mentor. Prerequisite: 003:097.

For Undergraduate and Graduate Students

003:110 Phonetics: Theory and Applications 3 s.h.
Basic concepts: articulatory and acoustic description of speech sound production, dialect variations, language differences; development of phonetic transcription skills with emphasis on English phonetics, clinical applications to developing and disordered speech. Offered fall semesters.

003:111 Basic Acoustics for Speech and Hearing 3 s.h.
Principles of sound, simple harmonic motion, sound pressure and intensity, decibels, complex waves, Fourier analysis, resonance and filters, distortion, transmission of sound. Offered spring semesters. Prerequisite: a math course numbered 22M:005 or above, and 029:008 or 029:011.

003:112 Anatomy and Physiology of Speech Production 4 s.h.
Normal anatomy, physiology of structures used to produce speech; principles, methods for instrumental study of speech production. Offered spring semesters. Prerequisite: 003:110 or 103:110. Pre- or corequisite: 003:111 or consent of instructor.

003:113 Introduction to Hearing Science 4 s.h.
Normal auditory process; anatomy and physiology of auditory system; subjective correlates of auditory stimuli. Offered fall semesters. Prerequisite: 003:111 or consent of instructor.

003:114 Introduction to Voice Disorders 2 s.h.
Basic foundations for management of voice disorders. Offered spring semesters. Prerequisite: 003:112.

003:115 Structural Disorders 2 s.h.
Therapy approaches used to treat speech production and swallowing disorders associated with disorders that affect structure and physiology of the speech and swallowing mechanism; basic knowledge necessary for clinical practice by clinicians who do not specialize in management of patients with head and neck cancer, cleft palate, or neurological disorders. Offered fall semesters.

003:116 Basic Neuroscience for Speech and Hearing 3 s.h.
Basic anatomy, physiology of central nervous system, emphasis on neural systems involved in normal and disordered communication. Offered fall semesters. Prerequisite: course in biological sciences or zoology or physiology, or consent of instructor. Same as 103:177.

003:117 Psychology of Language 3 s.h.
Theoretical, empirical investigations of linguistic behavior, behaviorists, rationalist models in context of formal linguistic structure and context of models of speech perception and production. Offered spring semesters. GE: social sciences. Prerequisite: 103:100 or consent of instructor. Same as 103:171.

003:118 Language Development 1-3 s.h.
Models of children’s language acquisition; child language/communication development from infancy through school age, in context of current developmental research. Offered spring semesters. GE: social sciences. Prerequisites: 031:001 or 031:003, and 103:100 or consent of instructor for undergraduates; consent of instructor for graduate students. Same as 103:176.

003:135 Foundations of Clinical Practice I 3 s.h.
Basic concepts of clinical practice, including models of diagnosis, fundamentals of clinical data collection and measurement, treatment planning, professional writing. Offered fall semesters. Prerequisites: 003:015, 003:110 or 103:110, 003:112, 003:116, and 07P:025; or equivalents; or consent of instructor. Corequisite: 003:136.

003:136 Foundations of Clinical Practice II 1 s.h.
Advanced concepts of clinical practice, including principles of human behavior change, clinical decision making, generalization, transfer and maintenance, models of service delivery, ethical practice, advanced professional writing. Offered spring semesters. Prerequisite: 003:135 or consent of instructor.

003:137 Foundations of Clinical Practice III 1 s.h.
Advanced principles of clinical practice, including risk management, public policy and models of third-party reimbursement, professional issues. Offered fall semesters. Prerequisite: 003:136.
003:140 Manual Communication 1 s.h.
Training in use of sign systems in manual communication.

003:145 Developmental Speech and Language Disorders 3 s.h.
The nature of developmental disorders—basic concepts, including behavioral characteristics, developmental patterns, etiology theories, assessment and intervention principles in phonology, semantics, morphology, syntax. Offered fall semesters.
Prerequisites: 003:015, 003:110 or 103:110, 003:112, and 003:116; or consent of instructor.

003:146 Neurogenic Disorders of Language 3 s.h.
Language disorders secondary to acquired brain damage in adults; clinical intervention issues. Offered fall semesters. Prerequisites: 003:015, 003:110 or 103:110, 003:112, and 003:116; or consent of instructor.

003:147 Neurogenic Disorders of Speech 2 s.h.
Speech disorders secondary to acquired brain damage in adults; clinical intervention issues. Offered spring semesters. Prerequisite: 003:116.

003:165 Communication Disorders and Aging 2 s.h.
Introduction to speech, language, and hearing processes and disorders among older adults; survey of characteristics of communication and communication breakdown, remediation, and strategies for improving communication with older adults with communication disorders; primarily for nonmajors and service providers other than speech-language pathologists and audiologists. Offered summer sessions of odd years. Same as 153:165.

003:183 Introduction to Stuttering 2 s.h.
Theoretical perspectives on the nature of stuttering, including onset and development, basic phenomena, beginning treatment principles. Offered spring semesters. Prerequisite: 003:112.

003:185 Hearing Loss and Audiometry 3 s.h.
Introduction to profession of audiology; overview of hearing disorders, evaluation, treatment; basic pure-tone and speech audiometry. Offered fall semesters. Pre- or corequisite: 003:113.

003:186 Problems: Speech/Hearing Processes and Disorders arr.
Consent of instructor required.

For Graduate Students

003:201 Principles of Voice Production 3 s.h.
Basic physical, physiological, pedagogical principles in understanding professional, nonprofessional, impaired voice production; vocal anatomy; voice classification; control of loudness, pitch, register, quality, efficient, inefficient use of voice; instrumentation for voice analysis, synthesis. Offered fall semesters. Same as 025:201.

003:202 Methods of Teaching Voice 3 s.h.
Comparison of pedagogical techniques; attitude assessment, language aptitude, physical, emotional characteristics; mental images modifying respiratory, phonatory, articularatory behavior; vocal hygiene; performance anxiety; student/teacher relationships. Offered spring semesters. Prerequisite: consent of instructor. Same as 025:202.

003:204 Voice for Performers 2 s.h.

003:206 Speech and Language Disorders of Young Children: Birth to Five Years 2 s.h.
Disorders resulting from phonological, semantic, pragmatic, and morphosyntactic deficits; receptive, expressive problems; special assessment and intervention procedures. Offered fall semesters of even years. Prerequisite: 003:145 or equivalent.

003:207 Speech and Language Disorders of Older Children: Five to Eighteen Years 2 s.h.
Predominant patterns of language impairment in children, adolescents; approaches to clinical management, emphasis on language skills for educational success. Offered spring semesters of even years. Prerequisite: 003:145 or consent of instructor.

003:208 Communication Problems of Developmental Disorders and Disabilities 2 s.h.
Nature, clinical management of communication problems of children and adults with mental retardation, pervasive developmental disorders, cerebral palsy. Offered fall semesters of odd years. Prerequisite: 003:145 or equivalent.

003:209 Language Disorders: Multicultural Issues 2 s.h.
Language evaluation and treatment from a multicultural perspective; how speech-language pathologists, audiologists should provide nonbiased services to clients from other cultures; dialects versus disorders. Offered three-week summer session. Prerequisites: 003:145 or equivalent or consent of instructor.

003:210 Clinical Ethics in Audiology and Speech 2 s.h.
Issues in clinical ethics; application of clinical ethics concepts to audiology and speech pathology practice; development of tools to resolve clinical dilemmas. Offered summer sessions.

003:213 Voice Habilitation 2-3 s.h.
Application of methods of intervention in development, training, rehabilitation of vocal behavior; motor learning, efficacy of treatment strategies, factors affecting compliance with recommended therapy. Offered fall semesters. Prerequisites: 003:114 or equivalent, and 003:201. Same as 025:356.

003:218 Psycholinguistics 3 s.h.
Theoretical, empirical issues in psycholinguistics; models demonstrating relation of formal language structure to psychological operations used in speech perception, production; laboratory emphasis on paradigmatic research in psycholinguistics. Offered fall semesters. Prerequisite: consent of instructor. Same as 103:218.

003:219 Fundamentals of Laboratory Instrumentation 3 s.h.
Electrical circuits, emphasis on application to instrumentation used in speech and hearing; laboratory focus on instrumentation. Offered spring semesters.

003:221 Instrumentation for Voice Analysis 2 s.h.
Same as 025:357.

003:222 Speech and Hearing Anatomy 2 s.h.
Laboratory course in anatomy of speech and hearing mechanisms; instruction in dissection techniques. Offered summer sessions. Prerequisite: 003:112 or equivalent.

003:224 System and Signal Theory for Speech and Hearing 3 s.h.
Principles of linear-systems theory applied to speech and auditory research, including system functions, filter properties, convolution, Fourier Series, Fourier transform. Offered spring semesters. Prerequisite: introductory calculus.

003:226 Hearing Loss Prevention 2 s.h.
Incidence and prevalence of hearing loss; risk factors and assessment, noise and chemical exposure guidelines; hearing protection devices; education and motivation. Offered summer sessions. Prerequisite: 003:219 or consent of instructor.

003:228 Stroboscopy 1 s.h.
How to perform videolaryngoscopy using a rigid scope and applying knowledge of normalcy and pathophysiology; how to interpret findings; describe and report them concisely. Offered summer sessions. Prerequisite: 003:114.
Offered summer sessions. Prerequisite: 003:185 or consent of instructor. Nature, etiology, principles of assessment, treatment.

003:247 Medical Audiology 3 s.h.
Prerequisite: 003:185 or consent of instructor. Supervised laboratory sessions. Offered fall semesters.

Pediatric populations; experience in test administration through hearing aids or cochlear implants. Offered spring semesters. Prerequisite: 003:115 or equivalent.

003:246 Advanced Audiology 3 s.h.
Theory, procedures for assessment, rehabilitation of children and adults, auditory rehabilitation specific to cochlear implant recipients, the auditory brainstem implant, future trends in cochlear implantation. Offered fall semesters. Prerequisites: 003:185 and 003:244.

003:250 Acoustics of Speech 4 s.h.
Sound generation, propagation, radiation in human speech production; acoustic phonetics; analysis, synthesis, perception of speech. Offered fall semesters of odd years. Prerequisites: 003:111, 003:112, and a year of calculus; consent of instructor. Same as 103:275.

003:251 Biomechanics of Speech 4 s.h.
Mechanics of air and tissue movement in speech production; muscle physiology and mechanics; computer simulation of articulatory and phonatory processes. Offered fall semesters of even years. Prerequisites: 003:111 and 003:112 or equivalents, and a year of calculus; consent of instructor.

003:252 Physiology of Speech Production 5 s.h.
Current information, theory on physiological bases of speech production, emphasis on research techniques. Offered fall semesters of even years. Prerequisites: 003:112 and 003:219, or consent of instructor. Same as 103:277.

003:256 Physiology of Hearing 3-4 s.h.
Anatomy of auditory system, cochlear mechanics, electrophysiology of peripheral and central auditory nervous system; laboratory emphasis on physiological techniques for study of ear. Offered fall semesters. Prerequisites: 003:113, 003:224, and consent of instructor.

003:260 Designing Assistive Devices 1-3 s.h.
System design (hardware and software) useful in building augmentative and alternative communication devices for the profoundly impaired; opportunity to build systems for theoretical and/or applied purpose; interdisciplinary, clinical perspectives. Offered summer sessions. Prerequisite: consent of instructor.

003:282 Phonological Development and Disorders 2 s.h.
Advanced topics in phonological development and disorders; current theoretical approaches to phonological analysis and typical phonological acquisition applied to assessment and intervention with children who have phonological disorders. Offered spring semesters. Prerequisites: 003:110 or 003:116, 003:135, and 003:145; consent of instructor.

003:283 Stuttering 2 s.h.
Issues, approaches to treatment of children, adults. Offered fall semesters. Prerequisite: 003:183 or equivalent. Corequisite: 003:135 or equivalent; consent of instructor.

003:290 Objective Measures 3 s.h.
Introduction to evoked potential techniques for assessing auditory and vestibular function. Offered spring semesters. Prerequisites: 003:219 and consent of instructor.

003:292 Advanced Rehabilitative Audiology 2 s.h.
Current and developing procedures for assessment, habilitation of adults and children with hearing losses. Offered spring semesters. Prerequisite: consent of instructor.

003:301 Practicum: Speech-Language Pathology 3 s.h.
Supervised clinical practice. Repeatable. Prerequisite: M.A. professional emphasis. Corequisite: 003:135 or equivalent.

003:302 Practicum: Speech-Language Assessment 3 s.h.
Supervised clinical practice involving evaluation of individuals for speech or language impairments. Repeatable. Prerequisites: M.A. speech language pathology emphasis and consent of instructor.

Statistics and Actuarial Science

Chair: Luke Tierney

Professors emeriti: Jonathan D. Cryer, Leonard S. Feldt (Psychological and Quantitative Foundations/Statistics and Actuarial Science), Robert V. Hogg, Timothy J. Robertson, Robert F. Woolson (Biostatistics/Statistics and Actuarial Science)

Associate professors: Mary Kathryn Cowles (Statistics and Actuarial Science/Biostatistics), Joseph B. Lang, Osnat Stramer

Associate professor emeritus: John J. Birch

Adjunct associate professor: B. John Manistre

Assistant professors: N.D. Shyamalkumar, Jun Yan

Adjunct assistant professor: James A. Sconing

Adjunct instructor: Mary D. Russo

Lecturer: Grace Chan

Undergraduate degrees: B.S. in Statistics, Actuarial Science

Undergraduate nondegree program: Minor in Statistics

Graduate degrees: M.S. in Actuarial Science (Statistics); M.S., Ph.D. in Statistics

Web site: http://www.stat.uiowa.edu

During the 20th century, probability and statistics developed into an important scientific discipline essential to all fields of study that rely on information obtained from data. Author H.G. Wells acknowledged the importance of statistical reasoning when he stated, “Statistical thinking will one day be as necessary for efficient citizenship as the ability to read and write.”

Today’s world is bombarded with numerical information. Informed decisions rely on the ability to separate fact from fiction by applying valid statistical analyses. Statisticians can provide crucial guidance in determining what information is reliable and which predictions may be trusted. They often help search for clues to the solution of a scientific mystery and sometimes keep investigators from being misled by false impressions.

The work of a statistician may range from the theoretical (developing new methodologies and statistical theory) to the applied (working with scientists and decision makers to collect, analyze, and interpret data). Regardless of the areas in which they work, statisticians need a strong background in mathematics and computer use. Because uncertainty and data arise in many settings, statisticians have the opportunity to work on a variety of projects in industry, education, government, and research. Thousands of statisticians serve in medicine, law, agriculture, public policy, marketing, manufacturing, engineering, and other fields in the social and natural sciences. The diversity of applications is an exciting aspect of the field and is one reason why the demand for well-trained statisticians continues to be strong.

An actuary is a business executive, professionally trained in the mathematical sciences. Actuaries specialize in the evaluation of financial risk—most often in the context of life, health, and casualty insurance, where they design, analyze, and refine various programs to meet the insurance needs of society. Most actuaries are employed by insurance companies, where they have responsibilities for all phases of the development and maintenance of their company’s products. They have considerable influence on the financial soundness of their company through work in pricing insurance policies and in compiling data for financial statements.

Some actuaries are employed as consultants. Their actuarial services are used by smaller insurance companies and by individual employers who need actuarial guidance in establishing insurance and retirement programs for their employees. A growing number of actuaries work in the area of asset/liability management. Some of these actuaries are employed by investment and consulting firms; others are employed by insurance companies.

Actuaries have been called financial architects and social mathematicians, because their combined analytical and business skills help to solve a growing variety of financial and social problems. The actuarial profession is a demanding yet rewarding career choice.
Graduates of the Department of Statistics and Actuarial Science have enjoyed great success in finding employment at all levels of the profession’s fields.

**Undergraduate Programs**

The Bachelor of Science can be earned in statistics or in actuarial science.

**Bachelor of Science in Statistics**

The B.S. in statistics requires 10 core courses that provide essential instruction in statistical methods, applications, and theory. In addition, students concentrate on their particular interest areas by choosing one of the following three emphasis tracks, in which they complete at least four courses.

Statistics in Business, Industry, Government, and Research: This track emphasizes statistical applications and data analysis. It is appropriate for students interested in careers as applied statisticians.

Statistical Computing: The statistical computing track emphasizes statistical applications and requires additional coursework in computing. It prepares students for statistical work that requires computing expertise for data management, analysis, and reporting.

Mathematical Statistics: The mathematics statistics track provides a solid foundation in statistical theory and applications. It requires additional coursework in mathematics and is good preparation for graduate study in statistics.

The B.S. in statistics requires the following course work.

**CORE COURSES**

All students must complete the following.

**Computer Science**

22C:016 Computer Science I 4 s.h.

**Mathematics**

One of these sequences:

- 22M:025-22M:026 Calculus I-II 8 s.h.
- 22M:027 Introduction to Linear Algebra 4 s.h.

**Statistics**

22S:030 Statistical Methods and Computing 3 s.h.

*22S:130-22S:131 Introduction to Mathematical Statistics I-II 6 s.h.
22S:152 Applied Linear Regression 3 s.h.
22S:158 Experimental Design and Analysis 3 s.h.
171:163 Introduction to the Design of Sample Surveys 3 s.h.

*The department recommends that well-prepared students who elect the Mathematical Statistics track take 22S:153 and 22S:154 in place of 22S:130 and 22S:131 to satisfy the core requirement in statistics.

**Special Emphasis Tracks**

Students take four courses from one of the following tracks.

**STATISTICS IN BUSINESS, INDUSTRY, GOVERNMENT, AND RESEARCH**

171:164 Research Data Management 3 s.h.

Three of these:

- 22S:133 Quality Control 3 s.h.
- 22S:138 Bayesian Statistics 3 s.h.
- 22S:156 Applied Time Series Analysis 3 s.h.
- 22S:161 Applied Multivariate Analysis 3 s.h.
- 22S:162 Applied Generalized Regression 3 s.h.
- 22S:167 Environmental and Spatial Statistics 3 s.h.
- 22S:168 Intermediate Experimental Design 3 s.h.
- 22S:173 Statistical Consulting 3 s.h.
- 171:173 Intermediate Design of Sample Surveys 3 s.h.
- 171:174/22S:160 Introductory Longitudinal Data Analysis 3 s.h.

**STATISTICAL COMPUTING**

22C:022 Object-oriented Software Development 4 s.h.

171:164 Research Data Management 3 s.h.

Two of these:

- 22C:072 Elementary Numerical Analysis 3 s.h.
- 22S:138 Bayesian Statistics 3 s.h.
- 22S:156 Applied Time Series Analysis 3 s.h.
- 22S:161 Applied Multivariate Analysis 3 s.h.
- 22S:162 Applied Generalized Regression 3 s.h.
- 22S:166 Computing in Statistics 3 s.h.
- 22S:167 Environmental and Spatial Statistics 3 s.h.
- 22S:168 Intermediate Experimental Design 3 s.h.
- 22S:173 Statistical Consulting 3 s.h.
171:174/22S:160 Introductory Longitudinal Data Analysis 3 s.h.

**MATHEMATICAL STATISTICS**

22M:055 Fundamental Properties of Spaces and Functions I 3 s.h.

One of these:
22M:028 Calculus III 4 s.h.
22M:056 Fundamental Properties of Spaces and Functions II 4 s.h.

Two of these:
22S:138 Bayesian Statistics 3 s.h.
*22S:153-154 Mathematical Statistics I-II 6 s.h.
22S:156 Fundamental Properties of Spaces and Functions II 4 s.h.
22S:160 Applied Generalized Regression 3 s.h.
22S:161 Applied Multivariate Analysis 3 s.h.
22S:162 Applied Generalized Regression 3 s.h.
22S:167 Environmental and Spatial Statistics 3 s.h.
22S:168 Intermediate Experimental Design 3 s.h.
22S:173 Statistical Consulting 3 s.h.
22S:195-196 Probability and Stochastic Processes I-II 6 s.h.

*If 22S:153 and 22S:154 are used to satisfy the core requirements, they may not be used to satisfy the emphasis requirement.

**Bachelor of Science in Actuarial Science**

Actuaries achieve professional status by passing a series of examinations administered by the Society of Actuaries and/or the Casualty Actuarial Society. These examinations are challenging. Mastering the examination material requires tenacity and a substantial commitment of time.

The B.S. in actuarial science prepares students for careers in the actuarial profession and helps them learn material included in the professional examinations. Students take a variety of actuarial science courses. In addition, preparation for business aspects of the actuarial profession requires the study of accounting, law, finance, insurance, and economics. Courses relating to communication skills, such as writing and speaking, are also important.

Due to the demanding nature of the actuarial science major and the difficulty of the professional examinations, the department maintains a selective admission program for actuarial science. Students must apply and be admitted to the major.

Students interested in becoming actuaries should declare pre-actuarial science as their major when they enter the University. Ordinarily, students apply for admission to the actuarial science major in the fall semester of their sophomore year. Students should apply no later than March 1 two years before they expect to graduate.

Students admitted to the actuarial science major usually have completed at least 40 s.h. at the University or another postsecondary institution, including a two-course calculus sequence, a course in linear algebra, a course in elementary real analysis, and a course in probability. The admission decision is based on a student's performance in these courses and other courses relevant to success in the major. The trend in grades from semester to semester also is considered. ACT scores are helpful in evaluating transfer students.

Students who have a thorough understanding of mathematics, as reflected by their performance in prerequisite math course work, tend to be most successful in actuarial science.

For application forms and more information about selective admission, contact the Department of Statistics and Actuarial Science.

Permission to substitute course work taken at another institution for required courses at Iowa is decided case-by-case.

The B.S. in actuarial science requires the following course work.

**Computer Science**

22C:016 Computer Science I 4 s.h.

**Economics**

06E:001 Principles of Microeconomics 4 s.h.
06E:002 Principles of Macroeconomics 4 s.h.

**Mathematics**

22M:025-22M:026 Calculus I-II 8 s.h.
22M:027 Introduction to Linear Algebra 4 s.h.
22M:055-22M:056 Fundamental Properties of Spaces and Functions I-II 7 s.h.

**Statistics and Actuarial Science**

22S:130-22S:131 Introduction to Mathematical Statistics I-II 6 s.h.
22S:174 Quantitative Methods for Actuaries 3 s.h.
22S:175 Actuarial Models 3 s.h.
22S:180 Mathematics of Finance 4 s.h.
22S:181-22S:182 Life Contingencies I-II 7 s.h.

In exceptional cases, the adviser may grant permission to waive 22S:130 and/or 22S:131.
Sample Schedule

The following is a sample schedule for completing actuarial science degree requirements.

**FIRST YEAR**

**Fall Semester**
- 06E:001 Principles of Microeconomics 4 s.h.
- 22C:016 Computer Science I 4 s.h.
- 22M:025 Calculus I 4 s.h.

**Spring Semester**
- 06E:002 Principles of Macroeconomics 4 s.h.
- 22M:027 Introduction to Linear Algebra 4 s.h.
- 22M:026 Calculus II 4 s.h.

**SECOND YEAR**

**Fall Semester**
- 22M:055 Fundamental Properties of Spaces and Functions I 3 s.h.
- 22S:130 Introduction to Mathematical Statistics I 3 s.h.

**Spring Semester**
- 22M:056 Fundamental Properties of Spaces and Functions II 4 s.h.
- 22S:131 Introduction to Mathematical Statistics II 3 s.h.
- 22S:180 Mathematics of Finance 4 s.h.

**THIRD YEAR**

**Fall Semester**
- 22S:153 Mathematical Statistics I 3 s.h.
- 22S:174 Quantitative Methods for Actuaries 3 s.h.

**Spring Semester**
- 22S:154 Mathematical Statistics II 3 s.h.
- 22S:175 Actuarial Models 3 s.h.
- 22S:181 Life Contingencies I 3 s.h.

**FOURTH YEAR**

**Fall Semester**
- 22S:182 Life Contingencies II 4 s.h.

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

Much of the work in the discipline is sequential, so students must begin requirements for the major as soon as possible. Individual study plans must be made carefully. Students who first enroll for a spring semester must consult the department to confirm a four-year plan.

**B.S. in Statistics**

Courses must be taken in sequence, so students must begin work early.

**Before the third semester begins:** one or two courses in the major and at least one-quarter of the semester hours required for graduation

**Before the fifth semester begins:** four courses in the major and at least one-half of the semester hours required for graduation

**Before the seventh semester begins:** seven or eight courses in the major and at least three-quarters of the semester hours required for graduation

**Before the eighth semester begins:** nine or ten courses in the major

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

**B.S. in Actuarial Science**

**Before the third semester begins:** 22M:025 and 22M:026, 22M:027, and at least one-quarter of the semester hours required for graduation

**Before the fifth semester begins:** 22M:055 and 22M:056, 22S:130 and 22S:131, and at least one-half of the semester hours required for graduation

**Before the seventh semester begins:** 22C:016, 22S:153 and 22S:154, 22S:174, 22S:175, 22S:180 and 22S:181, and at least three-quarters of the semester hours required for graduation

**Before the eighth semester begins:** 22S:182

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate
Honors

Qualified undergraduate students may earn a degree with honors.

To graduate with honors in statistics or in actuarial science, a student must be a member of the University Honors Program which requires that students maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University Honors Program for more information).

Honors students in statistics also must have a g.p.a. of at least 3.40 in departmental courses required for the major and must complete an honors project or suitable alternative. A student planning to graduate with honors should contact the statistics honors adviser.

Honors students in actuarial science also must have a g.p.a. of at least 3.40 in all departmental courses numbered 120 and above and a cumulative University of Iowa g.p.a. of at least 3.40. They must complete three courses beyond those required for the B.S., chosen from the following list.

- 22S:150 Regression, Time Series, and Forecasting 3 s.h.
- 22S:176 Credibility and Loss Distributions 4 s.h.
- 22S:185 Asset and Liability Management 3 s.h.
- 22S:197 Readings in Statistics and/or Actuarial Science (honors project) 1-3 s.h.
- An approved economics or finance course 3 s.h.

Students who choose to complete an honors project may earn up to 3 s.h. of credit in 22S:197 Readings in Statistics and/or Actuarial Science.

Students are responsible for making arrangements with a faculty member to supervise their honors project.

Minor

Students can earn a minor in statistics by taking 22S:030, 22S:152, and three of the following: 22S:120, 22S:130, 22S:131, 22S:153, 22S:154, 22S:156, 22S:158, 22S:162, 22S:163, 22S:167, and 22S:195. Selections from this list must include either 22S:120 or the sequence 22S:130-22S:131. Students must have a g.p.a. of at least 2.00 in all courses taken for the minor.

There is no minor in actuarial science.

Graduate Programs

Master of Science

Each M.S. student has a committee of three or four members, which is responsible for recommending action on the student's degree. For nonthesis programs, the committee's recommendation usually is based on two written examinations on topics covered in the required courses. For thesis programs, the committee's final recommendation usually is based on an oral defense of the thesis, although it also may be based on a single written examination over the topics covered in the student's program of study.

M.S. in Statistics

The M.S. in statistics prepares students for careers as professional statisticians or for entry into the Ph.D. program. It includes a solid foundation in statistical computing, regression analysis, experimental design, and mathematical statistics, plus electives in statistical methods and/or theory. Students have the opportunity to concentrate on theory, applications, or a combination of the two.

M.S. students may choose to write a thesis, which substitutes for two courses. The thesis defense usually replaces the master’s final exam.

NONTHESIS PROGRAM

The following course work is required for the M.S. in statistics without thesis. A computer programming proficiency test is administered during departmental orientation. Students who display inadequate programming skills are required to take a programming course.

- 22S:166 Computing in Statistics 3 s.h.
- 22S:173 Statistical Consulting 3 s.h.
- 22S:193-22S:194 Statistical Inference I-II 6 s.h.
- 22S:195 Probability and Stochastic Processes I 3 s.h.

At least four of these:
- 22S:138 Bayesian Statistics 3 s.h.
- 22S:156 Applied Time Series Analysis 3 s.h.
- 22S:161 Applied Multivariate Analysis 3 s.h.
- 22S:162 Applied Generalized Regression 3 s.h.
- 22S:163 Nonparametric Statistical Methods 3 s.h.
- 22S:167 Environmental and Spatial Statistics 3 s.h.
- 22S:168 Intermediate Experimental Design 3 s.h.
Statistics and Actuarial Science

22S:190 Mathematical Methods for Statistics 3 s.h.
22S:196 Probability and Stochastic Processes II 3 s.h.
Any 200-level statistics course 3 s.h.
An elective approved by the adviser

THESIS PROGRAM
The M.S. in statistics with thesis requires the following course work. A computer programming proficiency test is administered during departmental orientation. Students who display inadequate programming skills are required to take a programming course.

22S:164-22S:165 Applied Statistics I-II 7 s.h.
22S:166 Computing in Statistics 3 s.h.
22S:173 Statistical Consulting 3 s.h.
22S:191 Individual Study 6 s.h.
22S:193-22S:194 Statistical Inference I-II 6 s.h.
22S:195 Probability and Stochastic Processes I 3 s.h.
At least two of these:
22S:138 Bayesian Statistics 3 s.h.
22S:156 Applied Time Series Analysis 3 s.h.
22S:161 Applied Multivariate Analysis 3 s.h.
22S:162 Applied Generalized Regression 3 s.h.
22S:163 Nonparametric Statistical Methods 3 s.h.
22S:167 Environmental and Spatial Statistics 3 s.h.
22S:168 Intermediate Experimental Design 3 s.h.
22S:190 Mathematical Methods for Statistics 3 s.h.
22S:196 Probability and Stochastic Processes II 3 s.h.
An elective approved by the adviser

The M.S. in actuarial science is a nonthesis program. It requires at least 36 s.h. of course work, as follows.

One of these sequences:
22S:193-22S:194 Statistical Inference I-II 6 s.h.
(for well-prepared students)
All of these:
22S:174 Quantitative Methods for Actuaries 3 s.h.
22S:175 Actuarial Models 3 s.h.
22S:176 Credibility and Loss Distributions 4 s.h.
22S:180 Mathematics of Finance 4 s.h.
22S:181-22S:182 Life Contingencies I-II 7 s.h.
At least three of these:
22S:150 Regression, Time Series, and Forecasting 3 s.h.
22S:171 Topics in Actuarial Science 3 s.h.
22S:185 Asset and Liability Management 3 s.h.
An approved economics or finance course 3 s.h.
A relevant non-actuarial science graduate course approved by the student's adviser

Students may include 06F:100 Introductory Financial Management in their plan of study, as long as they also include a more advanced course with 06F:100 as a prerequisite.

Doctor of Philosophy
The Ph.D. in statistics prepares students for careers in research, applications, and teaching. Students choose one of four concentration areas for their course work: biostatistics; probability/mathematical statistics; statistical modeling; and actuarial science/financial mathematics.

Biostatistics emphasizes exposure to various biostatistical methods, such as survival analysis, categorical data analysis, and longitudinal data analysis. It prepares students for consulting and other positions in industry.

Probability/mathematical statistics emphasizes a broad, solid foundation in techniques and underpinnings of mathematical statistics. Its focus on breadth and depth is intended to produce well-rounded, knowledgeable scholars. It is excellent preparation for academic positions in mathematical statistics and industrial or government positions that require broadly trained statisticians with a strong understanding of statistical theory.

M.S. in Actuarial Science
The M.S. in actuarial science prepares students for actuarial careers by emphasizing the theory that underlies risk processes and the application of this theory to practical problems of insurance pricing and management. The required course work helps the students prepare for the professional examinations administered by the Society of Actuaries and/or the Casualty Actuarial Society.
Statistical modeling emphasizes the theory and application of a broad array of statistical models, such as linear, generalized linear, nonlinear, categorical, spatial, correlated response, and nonparametric regression models. This concentration area prepares students to specify and choose appropriate models; fit the models using available statistical software; and make sound statistical conclusions and interpretive statements. It is excellent preparation for students interested in academic, industrial, or government positions that involve data modeling and analysis.

Actuarial science/financial mathematics emphasizes the theory of actuarial science, finance, and asset-liability management. It is excellent preparation for academic positions in universities that offer actuarial science programs or for positions in the insurance, pension, and financial industries.

The actuarial science/financial mathematics program is highly mathematical and selective. Most students are admitted after earning an M.S. in actuarial science at The University of Iowa. Regardless of their area of concentration, students must complete a minimum of 72 s.h. of course work, including work done in the M.S. program. They must pass comprehensive exams and write a dissertation. The Ph.D. program takes about three years to complete once the M.S. has been earned.

The Ph.D. in statistics requires the following course work.

In addition, each semester in which a graduate student registers for at least 6 s.h., he or she must include at least one 2 s.h. course offered by the Department of Statistics and Actuarial Science, excluding 22S:191, 22S:197, and 22S:299.

During the graduate program, students may take course work or seminars in other departments to achieve doctoral program’s auxiliary goals: to relate an area of specialization to other fields of
knowledge, to acquire the ability to use electronic digital computing equipment, or to learn the language skills needed to read foreign scientific journals and respond in personal contacts with foreign scholars.

**Comprehensive Exam**

Ph.D. students take a comprehensive examination after completing most of the course work on their approved plan of study, typically during the third year of graduate study.

The comprehensive examination consists of a written core examination and an oral examination on statistical inference, linear models, and probability. These topics are generally covered in 22S:193, 22S:194, and 22S:195; 22S:203; 22S:253; and 22S:255. Study guides for the core examination are available from the department.

A program that does not conform to the prescribed requirements but is of high quality may be approved by the department chair.

**Financial Support**

Limited funds are available to help support outstanding applicants. Fellowships, teaching assistantships, and research assistantships provide an attractive stipend plus resident tuition status for students who are appointed at least one-quarter time. In some cases, these awards are further enhanced by a full or partial tuition scholarship.

Students who wish to be considered for financial assistance for their third year in the program should request a Ph.D. candidacy review no later than the spring semester of their second year.

**Facilities**

The Department of Statistics and Actuarial Science is housed in Schaeffer Hall, adjacent to Old Capitol, a National Historic Landmark and the center of campus. The department operates two computer labs in Schaeffer Hall. One, which also is used as an electronic classroom, contains 30 IBM PCs. The second houses 18 high-end UNIX workstations. Students use these labs for both class work and research.

**Statistical Consulting Center**

Because statisticians often team with other scientists in research projects, it is important that students gain experience working in groups. The department provides that experience in the Statistical Consulting Center, which helps members of the University community plan experiments and carrying out the analysis of experimental data. Under faculty supervision, graduate students may participate in these activities as part of their training.

Although the majority of Statistical Consulting Center projects involve statistical problems arising in thesis research conducted by students in other departments, the center also seeks involvement in larger research projects and proposal writing.

**Courses**

**Primarily for Undergraduates**

Once students have earned credit in a Department of Statistics and Actuarial Science course numbered above 105, they cannot earn credit in one numbered below 105. Students may earn credit for only two of these: 22S:002, 22S:008, 22S:025 (same as 07P:025), and 22S:030. Credit for 22S:002 can be earned only if the course is taken before 22S:008, 22S:025 (same as 07P:025), and 22S:030. Students may receive credit for only one course from each of these pairs: 22S:030 and 22S:105, 22S:101 and 22S:102, and 22S:120 and 22S:130.

- **22S:002 Statistics and Society** 3 s.h.
  Statistical ideas and their relevance to public policy, business, and the social, health, and physical sciences; focus on critical approach to statistical evidence. GE: quantitative or formal reasoning. Prerequisite: 22M:001 or equivalent.

- **22S:008 Statistics for Business** 4 s.h.
  Descriptive statistics, elementary probability, estimation and testing, regression, correlation; statistical computer packages. GE: quantitative or formal reasoning. Prerequisite: 22M:002 or equivalent.

- **22S:025 Elementary Statistics and Inference** 3 s.h.
  Graphing techniques for presenting data, descriptive statistics, correlation, regression, prediction; logic of statistical inference, elementary probability models, estimation and tests of significance. GE: quantitative or formal reasoning. Prerequisite: 22M:001 or equivalent. Same as 07P:025.

- **22S:030 Statistical Methods and Computing** 3 s.h.
  Methods of data description and analysis using SAS; descriptive statistics, graphical presentation, estimation, hypothesis testing, sample size, power; emphasis on learning statistical methods and concepts through hands-on experience with real data. GE: quantitative or formal reasoning. Prerequisite: 22M:002.
22S:039 Probability and Statistics for the Engineering and Physical Sciences 3 s.h.
Descriptive statistics, exploratory data analysis, random variables, important discrete and continuous distributions, point and interval estimation, tests of hypotheses, regression, design of experiments, including factorial and fractional factorial designs. Prerequisite: 22M:032 or equivalent.

22S:043 Engineering Probability and Statistics 3 s.h.
Probability, Bayes Theorem, random variables, joint and conditional distributions, expectation, covariance, important discrete and continuous distributions, functions of random variables, moment-generating function, sampling distributions, central limit theorem; statistical inference, including confidence intervals and hypothesis testing. Prerequisite: 22M:032.

For Undergraduate and Graduate Students

22S:101 Biostatistics 3 s.h.
Statistical methods primarily for research in health sciences and related fields; descriptive statistics, estimation, tests of hypotheses. Prerequisite: 22M:001 or equivalent.

22S:102 Introduction to Statistical Methods 3 s.h.
Same as 07P:143.

22S:105 Statistical Methods and Computing 3 s.h.
Methods of data description and analysis using SAS; descriptive statistics, graphical presentation, estimation, hypothesis testing, sample size, power, emphasis on learning statistical methods and concepts through hands-on experience with real data. Prerequisite: 22M:032.

22S:120 Probability and Statistics 4 s.h.
Models, discrete and continuous random variables and their distributions, estimation of parameters, testing statistical hypotheses. Prerequisites: 22M:026 or 22M:032.

22S:130 Introduction to Mathematical Statistics I 3 s.h.
Descriptive statistics, probability, discrete and continuous distributions, sampling, sampling distributions. Prerequisites: 22M:026 or 22M:032.

22S:131 Introduction to Mathematical Statistics II 3 s.h.
Estimation, testing statistical hypotheses, linear models, multivariate distributions, nonparametric methods. Prerequisite: 22S:130.

22S:133 Quality Control 3 s.h.
Prerequisite: 22S:039. Same as 056:162.

22S:138 Bayesian Statistics 3 s.h.
Bayesian statistical analysis, with focus on applications; Bayesian and frequentist methods compared; Bayesian model specification, choice of prior, computational methods; hands-on Bayesian data analysis using appropriate software; interpretation and presentation of analysis results. Prerequisite: 22S:120 or equivalent. Same as 07P:148.

22S:140 Design and Analysis of Biomedical Studies 3 s.h.
Prerequisite: 171:161. Same as 171:162.

22S:148 Intermediate Statistical Methods 4 s.h.
Prerequisite: 22S:102 or equivalent. Same as 07P:243.

22S:150 Regression, Time Series, and Forecasting 3 s.h.
Regression analysis, forecasting, time series methods; use of statistical computing packages. Prerequisites: 22S:154 or 22S:194.

22S:152 Applied Linear Regression 3 s.h.
Regression analysis with focus on applications; model formulation, checking, selection, interpretation and presentation of analysis results; simple and multiple linear regression, logistic regression; ANOVA; hands-on data analysis with SAS software. Prerequisite: 22S:030 or 22S:039 or 22S:043 or 22S:120 or equivalent. Same as 056:176.

22S:153 Mathematical Statistics I 3 s.h.
Probability, conditional probability, random variables, distribution and density functions, joint and conditional distributions, various families of discrete and continuous distributions, mgf technique for sums, convergence in distribution, convergence in probability, central limit theorem. Prerequisites: 22M:027 and 22M:038, or equivalents.

22S:154 Mathematical Statistics II 3 s.h.
Transformations, order statistics, point estimation, sufficient statistics, Rao-Blackwell theorem, delta method, confidence intervals, likelihood ratio tests, applications. Prerequisite: 22S:153 or equivalent.

22S:155 Applied Time Series Analysis 3 s.h.
General stationary, nonstationary models, autocovariance autocorrelation functions; stationary, nonstationary autoregressive integrated moving average models; identification, estimation, forecasting in linear models; use of statistical computer packages. Offered spring semesters. Prerequisites: 22S:131, and 22S:152 or 22S:164.

22S:157 Correlation and Regression 4 s.h.
Prerequisite: 22S:148 or equivalent. Same as 07P:244.

22S:158 Experimental Design and Analysis 3 s.h.
Single- and multifactor experiments; analysis of variance; multiple comparisons; contrasts; diagnostics, fixed, random, and mixed effects models; designs with blocking and/or nesting, two-level factorials and fractions thereof; use of statistical computer packages. Prerequisites: 22S:030 and 22S:152.

22S:159 Design of Experiments 4 s.h.
Prerequisite: 22S:148. Same as 07P:246.

22S:160 Introductory Longitudinal Data Analysis 3 s.h.
Same as 171:174.

22S:161 Applied Multivariate Analysis 3 s.h.
MANOVA, discriminant analysis, factor analysis, principal components, canonical analysis, numeric scaling, cluster analysis, categorical data analysis, use of multivariate statistical computer packages. Offered fall semesters. Prerequisites: 22S:152 and 22S:158, or equivalents, and facility with matrix algebra. Same as 07P:245.

22S:162 Applied Generalized Regression 3 s.h.
Normal linear models and likelihood theory; generalized linear models, nonlinear normal errors models, model fitting, correlated response models, correlated response model fitting. Prerequisites: introductory statistics and applied linear models.

22S:163 Nonparametric Statistical Methods 3 s.h.
One- and two-sample location tests and estimation methods, measures of association and analysis of variance, emphasis on relationship with classical parametric procedures. Prerequisite: 22S:120 or 22S:148 or consent of instructor. Same as 07P:247.

22S:164 Applied Statistics I 4 s.h.
Introduction to computing environment and statistical packages, descriptive statistics, basic inferential methods (confidence intervals, chi-square tests); linear models (regression and ANOVA models—specification and assumptions, fitting, diagnostics, selection, testing, interpretation). Prerequisites: 22S:120 or equivalent, and facility with matrix algebra.
22S:165 Applied Statistics II 3 s.h.
Design of experiments, analysis of designed experiments, sample survey design. Prerequisite: 22S:164 or equivalent.

22S:166 Computing in Statistics 3 s.h.
Database management; graphical techniques; importing graphics into word-processing documents (e.g., LaTeX); creating reports in LaTeX, SAS, IML, and macro language; simulation methods (Monte Carlo studies, bootstrap, etc.). Prerequisites: 22S:164 and 22S:165, or equivalents.

22S:167 Environmental and Spatial Statistics 3 s.h.
Methods for sampling environmental populations, sampling design, trend detection and estimation, geostatistics, kriging, variogram estimation, lattice data analysis, analysis of spatial point patterns. Prerequisites: 22S:152 and 22S:154, or equivalents.

22S:168 Intermediate Experimental Design 3 s.h.
Continuation of 22S:165, which is prerequisite; factorial and fractional factorial designs; response surface methods; canonical analysis; longitudinal data analysis; advanced topics in design. Prerequisite: 22S:165.

22S:171 Topics in Actuarial Science 3 s.h.
Prerequisite: consent of instructor.

22S:172 Topics in Statistics 3 s.h.
Prerequisite: 22S:154 or consent of instructor.

22S:173 Statistical Consulting 3 s.h.
Realistic supervised data analysis experiences, including statistical packages, statistical graphics, writing statistical reports, dealing with complex or messy data. Offered fall and spring semesters. Prerequisites: 22S:152 and 22S:158, or 22S:164 and 22S:165.

22S:174 Quantitative Methods for Actuaries 3 s.h.

22S:175 Actuarial Models 3 s.h.
Poisson processes, Markov chains, frequency and severity distributions, individual and collective models, simulation. Offered spring semesters. Prerequisite: grade of C or higher in 22S:174.

22S:176 Computing in Actuarial Science 3 s.h.
Prerequisite: consent of instructor.

22S:180 Mathematical Methods for Statistics 3 s.h.
Real numbers, point set theory, limit points, limits, sequences and series, Taylor series (multivariate), uniform convergence, Riemann-Stieltjes integrals. Prerequisite: statistics graduate standing or consent of instructor.

22S:181 Individual Study arr.
Prerequisite: consent of adviser.

22S:185 Asset and Liability Management 3 s.h.
Interest rate risk; immunization; duration analysis; cash flow matching; fundamental theorem of asset pricing; term structure of interest rate models. Prerequisite: grade of C or higher in 22S:175 or 22S:181, or consent of instructor.
22S:238 Bayesian Analysis 3 s.h.
Decision theory, coherence and utility, subjective probability, likelihood principle, conjugate families, structure of Bayesian inference, asymptotic approximations for posterior distributions, sequential experiments, exchangeability, hierarchical models, nonparametric Bayes procedures, empirical Bayes methods, numerical and Markov chain Monte Carlo methods. Prerequisites: 22S:190 and 22S:194.

22S:248 Computer Intensive Statistics 3 s.h.
Computer arithmetic: random variate generation; numerical optimization; numerical differentiation, integration, and linear algebra; smoothing techniques; bootstrap methods; cross-validation; MCMC; EM and related algorithms; other topics per student/instructor interests. Prerequisites: 22S:164 or 171:201, and proficiency in Fortran or C or C++ or Java.

22S:253 Advanced Inference I 3 s.h.
Concepts of convergence, asymptotic methods including the delta method, sufficiency, asymptotic efficiency, Fisher information and information bounds for estimation, maximum likelihood estimation, the EM-algorithm, Bayes estimation, decision theory. Prerequisites: 22S:190 and 22S:194.

22S:254 Advanced Inference II 3 s.h.
Hypothesis testing, asymptotics of the likelihood ratio test, asymptotic efficiency, statistical functionals, robustness, bootstrap and jackknife, estimation with dependent data. Prerequisite: 22S:253.

22S:255 Linear Models 4 s.h.
Linear spaces and matrix theory, multivariate normal distribution and distributions of quadratic forms, full-rank and non-full-rank linear models, estimability, interval estimation, hypothesis testing, random and mixed models, applications. Prerequisites: 22S:164, 22S:165, and 22S:194.

22S:256 Multivariate Analysis 3 s.h.
Multivariate distributions, tests and estimates, multivariate general linear model, MANOVA, discriminant analysis, canonical correlation, factor analysis, principal components. Prerequisite: 22S:255.

22S:273 Advanced Topics in Actuarial Science arr.
Repeatable. Prerequisite: consent of instructor.

Repeatable. Prerequisite: consent of instructor.

22S:293 Seminar: Probability arr.

Repeatable. Prerequisite: consent of instructor.

22S:296 Seminar: Iowa Environmental Informatics 1 s.h.
Current research in environmental informatics. Repeatable.

22S:299 Reading Research arr.
Repeatable. Prerequisite: consent of adviser.
Women's Studies

Chair: Margaret H. Mills (Russian)
Professors: Susan Birell (Health and Sport Studies/Women's Studies/American Studies), Ellen Lewin (Women's Studies/Anthropology)
Associate professors: Johanna Schoen (History/Women's Studies), Rosemarie Scullion (French and Italian/Women's Studies)
Associate professor emerita: Sue Lafky
Assistant professors: Tamara Ho (Women's Studies/English), Meena Khandelwal (Anthropology/Women's Studies)

Undergraduate degree: B.A. in Women's Studies
Undergraduate nondegree program: Minor in Women's Studies
Graduate degree: Ph.D. in Women's Studies
Web site: http://www.uiowa.edu/~women

Women's studies is a multidisciplinary department focusing on the study of women in culture, society, history, and literature. Its major goal is to bring to the University community new research on women and gender—research frequently overlooked by traditional disciplines. By taking courses through many departments, students become acquainted with feminist scholarship and its methodologies in the humanities and the social sciences.

Faculty from across the University participate in the Department of Women's Studies as affiliated faculty members (for a complete list, see the department's web site). Other University of Iowa faculty members occasionally offer courses and participate in the department's research, study, and interdisciplinary activities.

Undergraduate Programs

The department offers a Bachelor of Arts and a minor for undergraduates.

Bachelor of Arts

The Bachelor of Arts in women's studies emphasizes breadth, depth, and interdisciplinary study. Objectives of the major include knowledge of the field's history, facility with major theoretical debates, knowledge of feminist issues outside the United States and Western Europe, knowledge of one major area of feminist scholarly concern, and familiarity with debates in other areas. Students apply this knowledge to an individual research project in their senior year.

The B.A. in women's studies is awarded upon successful completion of at least 35 s.h. of course work culminating in the senior research seminar. Other requirements for the major include 2 s.h. of practicum work that reflects the importance of community needs and current social issues in framing questions of women's studies scholarship and in assessing the usefulness of relevant research.

Students may declare the major in women's studies at any time. They are advised by the Academic Advising Center until they have completed 131:010 or 131:055. Transfer credit is evaluated case-by-case and is limited to 9 s.h.

Requirements

Students complete the undergraduate core and 18 s.h. of elective course work.

UNDERGRADUATE CORE

The B.A. core consists of six courses (17 s.h.). Two introductory courses (131:010 and 131:055) are prerequisites for all other courses in the major; they orient students to the major conceptual areas that constitute women's studies as an interdisciplinary field. Gender, Race, and Class (131:055) introduces basic issues of race, class, and gender systems in the United States and provides a foundation for the majors in women's studies or African American world studies. Students take 131:199 Senior Research Seminar in their last semester.

The undergraduate core is as follows.

131:010 Introduction to Women's Studies 3 s.h.
131:055 Gender, Race, and Class in the U.S. 3 s.h.
*131:105 Women's Studies Practicum 2 s.h.
131:151 Feminist Theory 3 s.h.
A women's studies course with an international focus 3 s.h.
131:109 Senior Research Seminar 3 s.h.

*Students who took 131:010 Introduction to Women's Studies prior to fall 2004 for 4 s.h. need only 1 s.h. of practicum work.
In addition to the undergraduate core, each student chooses 18 s.h. (six courses) of additional course work, 12 s.h. of which must be upper-level courses chosen in consultation with the student's adviser. Only 6 s.h. of the elective courses may be chosen from lower-level courses, and those must be courses with women's studies course numbers.

Students are encouraged to pursue a course of study that emphasizes both breadth and depth. Students should choose a focus area of at least three or four courses in an area in which they would like to gain deeper knowledge. The area may be within a specific discipline, such as literature, anthropology, or history, which will be especially useful for double majors. Students may count up to three courses they have taken to complete a second major toward the major in women's studies.

The specialization area need not be limited to a traditional discipline. Students may seek more specialized education in fields such as sexuality studies or international issues. Breadth also is important; advisers direct students who have taken several courses in one area to take additional electives in another area.

Electives may be chosen from courses offered or cross-referenced in women's studies or from courses in other departments approved for the major. For a list of approved courses, contact the Department of Women's Studies or visit its website.

Students may request permission to use other upper-level courses as women's studies electives. At least half of the course content must address gender, and as much as possible, the student's written and other work in the course should focus on gender. For more information on requesting permission to use a course, contact the department.

The Women's Studies Department does not participate in the Four-Year Graduation Plan. Students are encouraged to design a graduation plan with their women's studies adviser.

Qualified students may earn the B.A. with honors in women's studies. Students who wish to graduate with honors must be members of the University Honors Program, which requires students to maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University Honors Program for more information). They also must maintain a g.p.a. of at least 3.50 in the major. Honors students write an honors thesis as part of their senior research seminar.

Undergraduate students may complete a minor in women's studies by taking 15 s.h. of course work chosen from courses associated with the department, with a g.p.a. of at least 2.00. The minor must include 131:010 Introduction to Women's Studies. It also must include 12 s.h. of 100-level course work; or 131:055 Gender, Race, and Class in the U.S. plus 9 s.h. of 100-level course work. It is strongly recommended that students include 131:151 Feminist Theory.

Students may not count more than 3 s.h. of course work used to complete a major toward requirements for the women's studies minor.

Nonmajors who are interested in women's studies but who chose not to pursue a minor in the department can take a set of electives. Students contemplating a concentration in women's studies are advised to take 131:010 Introduction to Women's Studies.

The Ph.D. program in women's studies is committed to feminist research, teaching, and scholarship. It emphasizes the application of theoretical and methodological models developed from the broad range of cultural issues that affect both women and men. While pressing for inclusion of feminist critiques and theories in the curricula of specific disciplines, it also advocates training in interdisciplinary, international feminist approaches.

Students who complete their Ph.D. at Iowa are expected to gain a firm grounding in the history of feminist inquiry, histories of feminisms, and feminist pedagogy; the ability to move easily among the disciplines in their research and teaching; and a broad understanding from interdisciplinary work balanced with depth from concentration in a single discipline.

To prepare students to seriously contest traditional practices in a discipline, the program
requires a minimum of 18 s.h. in one discipline or interdisciplinary field of inquiry, and close work with a faculty member from that discipline on relevant research projects.

**Curriculum**

The doctorate requires a minimum of 72 s.h. beyond the baccalaureate. All Ph.D. students must complete the following.

<table>
<thead>

**GRADUATE CORE**

- 131:203 Proseminar (taken the first semester) | 1 s.h. |
- 131:205 Graduate Practicum | 1 s.h. |
- 131:210 Feminist Pedagogy (required of all women’s studies teaching assistants) | 3 s.h. |
- 131:228 Readings: History of Feminisms (Ph.D. candidates enroll for 3 s.h.) | arr. |

**QUALIFYING PAPER**

Students complete a qualifying paper in the second semester of their second year in residence, demonstrating their theoretical and methodological strengths and their intellectual development in feminist studies.

**COMPREHENSIVE EXAMS**

Once students have successfully completed their qualifying papers, they are eligible to begin the three comprehensive exams that show competence in their chosen specializations, as recommended by their advisory committee and approved by the faculty members who oversee the Ph.D. program.

The exams may be submitted any time following completion of the qualifying paper, but generally, they are expected after the third year. When they are completed satisfactorily, the student is admitted to candidacy and can begin work toward the dissertation.

**Admission Requirements**

All applicants must have a bachelor’s degree with a g.p.a. of at least 3.00. Applicants must demonstrate a commitment to feminist scholarship. A writing sample, a statement of purpose in pursuing the Ph.D., transcripts from all undergraduate and graduate work undertaken, GRE General Test scores, and three letters of recommendation from faculty members familiar with the applicant’s academic work must be submitted before an application can be considered.

International applicants must submit a current TOEFL score.

The statement of purpose should describe how the applicant sees her- or himself in the world and why he or she wants to pursue graduate study in general and women’s studies in particular. The department uses the statement of purpose and the sample of academic writing to evaluate applicants’ ability to present their views forcefully and gracefully, as well as their ability to analyze, critique, and interpret.

The department does not offer a master’s degree.

**Financial Support**

The department strives to offer financial support to students for at least their first two years in the program. Research assistantships and teaching assistantships also are available through other departments. Students who hold assistantships of one-quarter time or more pay in-state tuition.

**Courses**

**Core Courses**

- 131:010 Introduction to Women’s Studies | 3 s.h. |
  Introduction to feminist interdisciplinary study of women’s lives, with emphasis on race, class, sexual orientation; work, family, culture, political and social change. GE: cultural diversity.
- 131:040 Topics in Women’s Studies | 3 s.h. |
- 131:050 Girl Speak | 3 s.h. |
  Voices, concerns, activism of young women worldwide; how they express their points of view in international forums and youth organizations, via the Internet, in music and popular culture.
- 131:055 Gender, Race, and Class in the U.S. | 3 s.h. |
  How the intersection of gender, race, class affects individual experience, national ideology, social institutions; interdisciplinary perspective. GE: cultural diversity.
- 131:105 Women’s Studies Practicum | 1-2 s.h. |
  Experience in volunteer work for organizations that provide services for women. Prerequisites: 131:010 and consent of instructor.
- 131:131 Feminist Manifestos and Tracts | 3 s.h. |
  Manifestos and political tracts from 18th-century treatises on women’s rights to contemporary zines and web sites, which might not be easily identified as political tracts.
- 131:135 Women, Medicine, and Society | 3 s.h. |
  Ideas about women’s biological and social roles, their impact on women as patients and health care providers; differences in class, ethnicity, and sexuality in the healing process; interdisciplinary approach. Offered through Guided Independent Study.
### College of Liberal Arts and Sciences

#### 131:149 International Feminism 3 s.h.
Evolution and impact of women's movements in different regions of the Third World.

#### 131:150 Topics in Women's Studies 3 s.h.
Representative topics: American Indian/First Nations Women; population and the environment; feminism and the family; women, health, and healing; women of color. Prerequisite: 131:010.

#### 131:151 Feminist Theory 3 s.h.
Historical and contemporary feminist analyses of women's position in culture and society; variety of theoretical approaches, political perspectives; contemporary issues, controversies. Prerequisite: 131:010.

#### 131:153 Feminist Cultural Studies 3 s.h.
Intellectual/political project of feminist cultural studies; everyday practices and popular discourses critical for the formation of gender and sexuality in the United States. Prerequisite: 131:010 or graduate standing or consent of instructor.

#### 131:163 U.S. Minority Women Writers 3 s.h.
Literature that reflects the experience of U.S. minority women and women of color; gender, race, ethnicity, religion, sexuality. Prerequisite: 131:010.

#### 131:179 Independent Readings and Research in Women's Studies 1-3 s.h.
Topic not covered in regular curriculum. Prerequisites: 131:010 and consent of instructor.

#### 131:198 Honors Senior Thesis 3 s.h.
Supervised research, writing. Prerequisites: honors standing, completion of course work for minor in women's studies, and consent of instructor.

#### 131:199 Senior Research Seminar 2-3 s.h.
Individual research projects designed around a shared theme, such as violence against women, or women and the law. Prerequisites: 131:010 or equivalent, and two other women's studies courses; or consent of instructor.

#### 131:200 Foundations for Feminist Inquiry I 3 s.h.
Theory, critique, methodology, practice. Prerequisite: consent of instructor.

#### 131:203 Proseminar 1 s.h.
Presentations by faculty and advanced graduate students on their current research, introduction to a range of feminist scholarship. Prerequisite: standing in women's studies.

#### 131:205 Graduate Practicum 1 s.h.
Practicum experiences in a theoretical context. Repeatable. Prerequisite: consent of instructor.

#### 131:207 French Theory and the Politics of Gender 3 s.h.
Structuralist, poststructuralist, and deconstructionist theory regarding the influence of French thought after World War II on the development of feminism and gender theory.

#### 131:210 Feminist Pedagogy 3 s.h.
Scholarship on teaching and learning, with practical applications for the classroom. Prerequisite: consent of instructor.

#### 131:215 Women's Issues: A Transnational View 3 s.h.
Legal rights, violence against women, health, environment, economics, education, human rights; women's efforts to organize around these issues in specific countries and transnationally. Prerequisite: consent of instructor.

#### 131:231 Politics and the Body 3 s.h.
Public sphere theory and other conceptions of the political through examination of the category of the body; logic of abstraction in conceptions of the political that allow for the privileging of some bodies and the marginalization of others.

#### 131:250 Topics in Women's Studies 3 s.h.
Special topics in women's studies.

#### 131:275 Gender and Economic Development 3 s.h.
How the field developed, focus on some defining texts; critiques of development, especially Third World and Poststructuralist critiques.

#### 131:279 Independent Study 3 s.h.
Prerequisite: consent of instructor.

#### 131:425 Ph.D. Thesis 3 s.h.
Repeatable. Prerequisite: consent of instructor.

### Cross-Referenced Courses

#### 131:018 Women and Society 3-4 s.h.
Women's roles and status; sex differences, gender role socialization, theories about origin and maintenance of sexual inequalities, changes in women's social life cycles, implications for social institutions and processes; focus on contemporary United States. GE: cultural diversity. Same as 034:018.

#### 131:041 Gender Roles and Communication 3 s.h.
Analysis of research and theory on gender roles and communication processes, including function of communication in sex role development. Same as 056:041.

#### 131:067 Survey of U.S. Women's History 3 s.h.
Same as 164:007.

#### 131:078 Women, Sport and Culture 3 s.h.
Feminist analysis of girls' and women's sports experiences, including reproduction of gender through sport, recent changes in women's intercollegiate athletics, media representations of women's sport, feminist critiques, alternatives to sport. Same as 028:078.

#### 131:107 Gendering India 3 s.h.
Same as 113:107.

#### 131:109 Women in Antiquity 3 s.h.
Same as 20E:109.

#### 131:111 Religion and Women 3 s.h.
Sexism and its disavowal in biblical narrative, law, wisdom texts, Gospels, epistles; contemporary impact. GE: humanities. Same as 032:111.

#### 131:124 Gender and the Environment 3 s.h.
Relationships between gendered human activities and environmental problems in developed and less-developed regional contexts; role of women's activism in environmental movements; analysis of ecofeminist perspective. Prerequisite: 044:019 or introductory women's studies course. Same as 044:124.

#### 131:133 The Anthropology of Women's Health 3 s.h.
Same as 113:133, 172:133.

#### 131:141 History of Feminist Anthropology 3 s.h.
Development and evolution of feminist critiques in cultural anthropology, readings from studies by women ethnographers, classic writings that sought to give women cross-cultural visibility, recent experimental texts. Prerequisite: 113:003 or 131:010. Same as 113:141.

#### 131:142 Motherhood and Reproduction 3 s.h.
Women's reproductive specialization and roles as mothers as determinants of status; treatment of motherhood and reproduction in feminist theory and scholarship. Same as 113:105.

#### 131:143 Women, Health, and Healing 3 s.h.
Women's experience as recipients and providers of health care; intersection of race, class, cultural variation, and women's health; reproductive and nonreproductive health concerns. Same as 113:182.
131:148 Population, Environment, and Development 3 s.h.
Habits and politics of population and environmental programs; focus on theoretical and activist feminist attempts to make policies more sensitive to issues of race, class, gender. Prerequisite: 131:010. Same as 152:148.

131:152 Gender and Sexuality in the Ancient World 3 s.h.
GE: foreign civilization and culture. Same as 20E:150, 154:121.

131:156 Sexuality and Culture 3 s.h.
Same as 113:156.

131:157 Gender on Stage 3 s.h.
How gendered bodies and roles are displayed on stage; popular, elite, experimental, traditional, mass-media theater; dance, music; topics include performing gender in everyday life; theorizing spectatorship, politics of drag, feminist theater. Same as 045:157.

131:158 Sexuality in the United States 3 s.h.
Same as 16A:154.

131:159 Native American Women and Religious Change 3 s.h.
Same as 032:158, 149:158.

131:160 Work and Family Institutions 3 s.h.
Contemporary problems in the integration of work and family life; origins of work/family conflict in process of industrialization; effects of job/family conflicts on mothers, fathers, children; cross-cultural differences in dealing with work/family conflict. Prerequisite: 034:001 or 034:002 or 131:010 or consent of instructor. Same as 045:162.

131:161 Women in Literature 2-3 s.h.
Women as portrayed in literature and as writers and/or readers of literature; genres, periods, authors; feminist perspectives on study of literature. Same as 008:052.

131:162 Latin American Women Writers 3 s.h.
Same at 035:164.

131:164 American Indian/First Nations Women 3 s.h.
Same as 149:164.

131:165 Women Writing Culture 3 s.h.
Feminist ethnography and other kinds of feminist narratives that “write culture” while pushing the boundaries of how anthropologists define ethnography. Prerequisite: 113:003 or 131:010. Same as 113:160.

131:166 The Invisible Woman 3 s.h.
Same as 041:166.

131:167 Gender and Sexuality in French Cinema 3 s.h.
Cultural, historical, semiotic approach to studying construction of gender identity and sexual codes in French cinema from 1920s to present. Prerequisite: 009:111 or 048:001 or 048:002 or 131:010 or consent of instructor. Same as 009:148, 048:167.

131:169 Changing Concepts of Women in Literature 3 s.h.
Textual, cultural changes in concepts of women presented in and between periods of literary history; changes in novel’s genre and on influential theoretical and applied work. Prerequisite: consent of instructor. Same as 113:223.

131:171 U.S. Women’s History to 1870 3 s.h.
American history through women’s eyes; emphasis on interaction of biology, economics, politics, ideology; how traditional historical generalizations change when women’s experience is considered; legal history, women’s education. Same as 16A:171.

131:172 Women in America: 1870-Present 3 s.h.
From passage of Fourteenth Amendment to present; emphasis on suffrage movement, economic roles, educational patterns. Same as 16A:172.

131:174 Gender and Society in the U.S. 1940-Present 3 s.h.
Same as 16A:174.

131:181 Society and Gender in Europe, 1200-1789 3 s.h.
How ideas about community were influenced by gender ideologies inscribed in patterns of authority—household, church, state; range of human endeavor—intellectual, psychological, biological, community organization—social, economic, legal, sexual. GE: foreign civilization and culture. Same as 10E:125.

131:182 Society and Gender in Europe, 1750-Present 3 s.h.
Social structures, gender roles in modern Europe; changes in politics, social organization, social relationship of sexes (education, sexuality, occupation), forms of social protest (feminism, socialism). Same as 162:146.

131:188 Prose by Women Writers 3 s.h.
Nonfiction, largely contemporary; style and content, redefinition of form and tradition of essay; Woolf, Didion, Dillard, Walker. Same as 008:188.

131:194 Introduction to Feminist Criticism 3 s.h.
Feminist literary criticism of the past 20 years; emphasis on intersection of race, colonialism, sexuality, gender issues. Prerequisite: 131:010 or equivalent for undergraduates. Same as 008:194.

131:197 Gender in Chinese Literature and Culture 3 s.h.
Changing image of woman in modern Chinese history through analysis of literary texts, films by women authors of different periods. Same as 039:197.

131:201 Foundations for Feminist Inquiry II 3 s.h.
Continuation of 131:200. Prerequisite: consent of instructor. Same as 010:201, 036:316.

131:204 Feminist Research Seminar arr.
Feminist research methodologies; how to conduct original research, write a research proposal and research paper, and read and critique others’ work. Repeatable. Same as 016:277.

131:206 Gender and Race in Nineteenth Century U.S. arr.
Same as 016:205, 129:205.

131:220 Seminar: Feminist Anthropology 3 s.h.
Contemporary, traditional anthropological issues from a feminist perspective. Background in feminist theory, anthropology required. Same as 113:220.

131:223 Feminist Medical Anthropology 3 s.h.
Directions feminists have taken in medical anthropological scholarship; focus on ethnographies that have become classics of the genre and on influential theoretical and applied work. Prerequisite: consent of instructor. Same as 113:223.

131:224 Seminar: Feminist and Gender Archaeology 3 s.h.
Same as 113:224.

History of sexuality within the family, its move into the marketplace, social customs and taboos, methods of birth control and abortion, religion, medical and psychological writings, state policies. Same as 016:225.

131:228 Readings: History of Feminisms arr.
Same as 016:228.

131:233 Readings: Women, Men, and Gender in Modern Europe arr.
Same as 016:233.

131:243 Feminist Cultural Studies 3 s.h.
Same as 008:243, 010:243, 016:222.
131:245 Seminar: Feminist Ethnography 3 s.h.
Feminist critiques of traditional ethnographies; analysis of ethnographies informed by contemporary feminism. Prerequisite: consent of instructor. Same as 113:221.

131:246 Women Writers of Latin America 3 s.h.
Same as 035:246.

131:254 History of Women in Sports 3 s.h.
Women's sport involvement from ancient times to present; focus on social class, attitudes, religion, race, ethnicity, medical opinion, economic considerations, political events, educational philosophies that have influenced women's participation. Same as 028:278.

131:256 Gender Stratification Seminar 3 s.h.
Occupational gender segregation, gender gap in pay, role of family caregiving in women's lower pay, devaluation of caregiving work and comparable work. Same as 034:256.

131:254 Postcolonial Feminist Theory 3 s.h.
Role of colonial histories and postcolonial legacies on past and contemporary relations of power in varied geographical contexts, through interdisciplinary feminist perspective; processes of gender and racialization relative to uneven global flows of media, capital, people. Prerequisite: 131:151 or cultural studies course. Same as 010:264.

131:266 Changing Families and Public Policy 3 s.h.
Current sociological research on public policies that affect family life and well-being, divorce and child custody policies, teen pregnancy and abortion, family poverty, child care and work/family policies. Same as 034:266.

131:270 Readings in the History of Women and Gender in the U.S.A. arr.
Older literature as well as work of last decade; focus on use of gender as an analytical device, changing social relations of the sexes over long periods of time, concept of separate spheres, sex segregation in the workplace, gender and deviance, feminism and politics, women's history as intellectual history. Same as 016:270.

131:274 Postcolonial Women's Writing 3 s.h.
Same as 016:274.

131:283 Feminist Theory: Historians' Perspectives arr.
Same as 016:283.

Same as 016:284.

Same as 016:287, 129:287.

131:290 Feminist Perspectives on Biology and Culture 3 s.h.
Physical anthropology and prehistoric archaeology from feminist perspective; emphasis on gender investigation methods of the past; role of women investigators, and criticism of male-centered theories for human evolution and prehistoric events, such as the domestication of plants. Prerequisite: consent of instructor. Same as 113:290.
Majors Offered with Other Colleges

The College of Liberal Arts and Sciences works with the Tippie College of Business, the College of Education, and the Carver College of Medicine to offer several undergraduate majors.

Faculty members from the Department of Economics in the business college provide advising and teach courses students need to earn a B.A. or B.S. in economics. Faculty members from the Departments of Biochemistry and Microbiology in the Carver College of Medicine provide courses and advising for students in the undergraduate programs in biochemistry and microbiology.

Faculty members from the College of Education provide major course work and advising for the B.S. in Science Education. They also support the B.A. and B.S. in elementary education. The undergraduate elementary education program is designed to prepare students to teach kindergarten through sixth grade. Elementary education students complete the College of Liberal Arts and Sciences General Education Program. They also complete course work in education foundations and methods and in one of the following areas of specialization: art, early childhood, English language arts, history, mathematics, music, reading, science, social science, or special education.

Students interested in pursuing a degree in elementary education must first be admitted to the College of Liberal Arts and Sciences. Admission to the College of Education's elementary education program is not guaranteed. In order to be considered for admission to the elementary education program, undergraduates must complete a minimum of 30 s.h. of course work with a cumulative g.p.a. of at least 2.70. All students must submit Praxis I test scores with their application to the Teacher Education Program (TEP).

Students who begin their study in the College of Liberal Arts and Sciences also can earn undergraduate degrees in Clinical Laboratory Sciences, Nuclear Medicine Technology, and Radiation Sciences from the Carver College of Medicine.
Biochemistry

Biochemistry is the study of the basic chemical processes that occur in all living systems. One of the most active sciences, it provides a foundation for other biosciences.

Biochemists generally work in laboratories and/or classrooms. Those with a bachelor's degree are often employed as research assistants in industry, government, education, and health service, or in secondary school teaching, for which licensure is required.

Biochemists with advanced degrees—usually a doctorate—pursue teaching, research, and/or administrative careers in universities, medical schools, hospitals, private research agencies, government laboratories, biotechnology companies, and in food, drug, cosmetics, chemical, petroleum, and allied industries.

Undergraduate Programs

The College of Liberal Arts and Sciences administers undergraduate programs and grants undergraduate degrees in biochemistry. The Department of Biochemistry offers programs of study leading to the Bachelor of Science and the Bachelor of Arts. Requirements are outlined below.

Students choose advanced science electives to supplement biochemical studies or to satisfy requirements of a minor or a double major. In order to count science electives numbered below 100 toward the degree, students must have their adviser's approval.

Transfer credit for biochemistry courses requires the approval of an undergraduate adviser in biochemistry.

Bachelor of Science

The B.S. program in biochemistry prepares students to work in positions that require a mastery of general biochemistry. It is also excellent preparation for graduate study in biochemistry and related sciences or for study toward a professional degree in the health sciences.

The B.S. in biochemistry requires 73 s.h. in addition to completion of the College of Liberal Arts and Sciences General Education Program. Courses required for the B.S. are as follows.

All of these:
- 002:010-002:011 Principles of Biology I-II 8 s.h.
- 004:011-004:012 Principles of Chemistry I-II 8 s.h.
- 22M:025-22M:026 Calculus I-II 8 s.h.
- 029:081-029:082 Introductory Physics I-II 8 s.h.
- 099:001 Orientation and Introduction to the Field of Biochemistry 0 s.h.
- 099:101 Technical Communication in Biochemistry 1 s.h.
- 099:120 Biochemistry and Molecular Biology I 3 s.h.
- 099:130 Biochemistry and Molecular Biology II 3 s.h.
- 099:140 Research, Independent Study (required of all B.S. students, including all honors students) 6 s.h.

Advanced science electives, chosen in consultation with adviser 9 s.h.

One of these sequences:
- 004:121-004:122 Organic Chemistry I-II 6 s.h.
- 004:123-004:124 Organic Chemistry for Majors I-II (preferred) 6 s.h.

Two of these:
- 004:131 Physical Chemistry I 3 s.h.
- 004:132 Physical Chemistry II 3 s.h.
- 009:241 Biophysical Chemistry I 3 s.h.
- 009:242 Biophysical Chemistry II 3 s.h.

Web site: http://www.biochem.uiowa.edu/
One of these:
004:141 Organic Chemistry Laboratory 3 s.h.
004:142 Organic Chemistry Laboratory for Majors (preferred) 3 s.h.

*Students may register for 099:155 only if they have earned an average grade of B or better in 099:120, 099:130, and 099:140 and a grade of B-minus or better in each of 099:120, 099:130, and 099:140; or have consent of adviser and instructor. Students may register for 099:115 any time.

Students are encouraged to begin research by taking 099:115 Undergraduate Independent Study (may be taken for a total of 6 s.h.). There are no prerequisites. Students may arrange independently to take this course, or they may request assistance from an undergraduate adviser.

**Biochemistry**

The B.A. in biochemistry requires 58 s.h. in addition to completion of the College of Liberal Arts and Sciences General Education Program. The required courses are as follows.

All of these:
002:010-002:011 Principles of Biology I-II 8 s.h.
004:011-004:012 Principles of Chemistry I-II 8 s.h.
22M:025-22M:026 Calculus I-II 8 s.h.
029:011-029:012 College Physics 8 s.h.
099:001 Orientation and Introduction to the Field of Biochemistry 0 s.h.
099:101 Technical Communication in Biochemistry 1 s.h.
099:120 Biochemistry and Molecular Biology I 3 s.h.
099:130 Biochemistry and Molecular Biology II 3 s.h.
099:140 Experimental Biochemistry 4 s.h.
Advanced science electives, chosen in consultation with adviser 6 s.h.

One of these sequences:
004:121-004:122 Organic Chemistry I-II 6 s.h.
004:123-004:124 Organic Chemistry for Majors I-II (preferred) 6 s.h.

One of these:
004:131 Physical Chemistry I 3 s.h.
099:241 Biophysical Chemistry I 3 s.h.
099:242 Biophysical Chemistry II 3 s.h.

In addition, B.A. students intending to go on to advanced degrees in the biological or health sciences are advised to include 4 s.h. or more of 099:115 Undergraduate Independent Study or 099:155 Research, Independent Study (senior research) in their programs.

**Teacher Licensure**

Biochemistry majors, especially those in the B.A. program, may qualify for teacher licensure by taking additional courses in teacher education. Consult the College of Education for details.

**Four-Year Graduation Plan**

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

**Bachelor of Science**

Before the third semester begins: 004:011 and 004:012, 22M:025, 099:001, and at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: the courses listed above, plus 002:010 and 002:011; 004:121, 004:122, and 004:141; 22M:026; and at least one-half of the semester hours required for graduation

Before the seventh semester begins: the courses listed above, plus 029:081 and 029:082, 099:120, 099:130, and 099:140, two science electives, and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: the courses listed above, plus 004:131 or 004:132 or 099:241 or 099:242, a science elective, and at least 3 s.h. of 099:155

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

**Bachelor of Arts**

Before the third semester begins: 004:011 and 004:012; math through 22M:026 or higher; 099:001; and at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: the courses listed above, plus 002:010 and 002:011, 004:121 and 004:122, and at least one-half of the semester hours required for graduation

Before the seventh semester begins: the courses listed above, plus 029:011 and 029:012, 099:120, 099:130, and 099:140, two science
electives, and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: the courses listed above, plus 004:131 or 099:241 or 099:242, and a science elective

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Honors

Qualified students may earn an honors degree in biochemistry. They must be members of the University Honors Program, which requires students to maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University Honors Program for more information). Honors students in biochemistry must complete 099:155 Research, Independent Study. They must present their research results in a report written in the form of a journal article and in an oral report presented at a special open departmental seminar.

Combined Programs

Students, especially those in the B.A. program, may include courses from other disciplines, such as business, pre-law, psychology, or journalism. This prepares them for one of the many vocations on which biochemistry has an impact.

Graduate Program

The Carver College of Medicine and the Graduate College coordinate the graduate program in biochemistry and other biosciences; graduate degrees are granted through the Graduate College. See Carver College of Medicine and Graduate College in the Catalog for general information about study in medicine and graduate study at the University.

The Department of Biochemistry offers a program of study leading to the M.S. and Ph.D. Students admitted to the graduate program in biochemistry usually pursue the Ph.D. Qualified students may pursue a combined program leading to the M.D./Ph.D. (Medical Scientist Training Program).

The focus of the graduate program is on the individual student. Students choose from three curricula to satisfy requirements for the degree: standard, biophysical emphasis, or molecular emphasis.

In the first year, students engage in formal course work and tutorial laboratory experiences that serve as the basis for selecting a topic for thesis research. They spend half their time in courses and the other half working in four different faculty laboratories (099:261 Research Techniques), when they learn research techniques in the context of ongoing research.

All biochemistry graduate students take the following courses.

- 099:282 Seminar 0-1 s.h.
- 156:201 Principles in Molecular and Cell Biology 4 s.h.

Graduate students in the standard curriculum also must take the following.

- 099:241-099:242 Biophysical Chemistry I-II 6 s.h.
- 142:215 Molecular Biology of Gene Expression 3 s.h.
- Electives 6 s.h.

Graduate students in the biophysical emphasis also must take the following.

- 099:241-099:242 Biophysical Chemistry I-II 6 s.h.
- Electives 9 s.h.

Graduate students in the molecular emphasis also must take the following.

- 099:241 Biophysical Chemistry I or 099:242 Biophysical Chemistry II 3 s.h.
- 142:215 Molecular Biology of Gene Expression 3 s.h.
- Electives 9 s.h.

Once students are promoted to a second year of study, they choose research laboratories for Ph.D. thesis research and begin their thesis projects. They take courses that supplement their interests and preparation, including the following required courses.

- 050:270 Responsible Conduct in Research 0 s.h.
- 099:237 Topics in Biochemistry 2 s.h.
- 099:282 Seminar 0-1 s.h.

Research Biochemistry (099:292) and elective science courses numbered 100 or above in other departments satisfy the remaining course requirements.

Students take the comprehensive examination before the end of June in their second year, after which they are admitted formally to degree candidacy and begin to concentrate on thesis research. The program culminates in successful
defense of completed thesis work before an examining committee.

In addition to meeting these requirements and those of the Graduate College, students are expected, as part of their training, to assist in teaching biochemistry for two or three semesters.

Throughout the program, students are associated with small research seminar groups and receive close personal attention from the biochemistry faculty members who serve as research advisers.

Admission

The graduate program in biochemistry is flexible enough to accommodate students with bachelor's degrees in any of the biological, biochemical, or physical sciences. Appropriate preparation includes one-year, college-level courses in organic and physical chemistry, biology, physics, and mathematics through calculus. Students are expected to have had one or more introductory courses in biochemistry.

Applicants must have an undergraduate g.p.a. of at least 3.00 and must submit acceptable verbal, quantitative, and analytical scores on the Graduate Record Examination (GRE) General Test. Applicants are encouraged to submit their score on the GRE Subject Test in Chemistry; Biology; or Biochemistry, Cell, and Molecular Biology.

Financial Support

Students admitted to the Ph.D. program in biochemistry routinely receive a stipend and tuition support.

Research

The department's current research interests include protein structure and function, protein folding, DNA bending, complex carbohydrate structure and function, regulation of gene expression, mechanisms of transcription and replication, enzyme reaction mechanisms, intracellular signaling, differentiation, and membrane determinants of cell shape and motility. Visit the Department of Biochemistry web site for details.

Facilities

Many of the Department of Biochemistry's research and teaching facilities are located on a single floor in the Bowen Science Building, where the Departments of Anatomy and Cell Biology, Microbiology, Pharmacology, and Physiology and Biophysics also are located. Several of the department's research groups are located in the adjacent Medical Education and Biomedical Research Facility.

The University of Iowa maintains a number of central research support facilities and equipment that promote campuswide interactions between research groups. These include the facilities for electron microscopy, fermentation, image analysis, high field NMR, high resolution mass spectrometry, and academic computing (through Information Technology Services). Carver College of Medicine research facilities are available to biochemistry researchers for nuclear magnetic resonance, flow cytometry, DNA synthesis, tissue culture hybridoma, gene transfer, X-ray analysis, and transgenic and gene targeting.

Individual faculty research laboratories are well-equipped for modern research, and there are many common-use laboratories, including instrument rooms, a reading room, cold rooms, tissue culture areas, preparation rooms, and a stockroom. Research is supported by staff in instrument shops, animal quarters, photography and illustration service, and by office staff, stockroom supervisors, and a purchasing agent.

Together, the department and the central support facilities provide virtually all of the equipment required for modern biochemical research. Examples of such equipment include analytical and preparative ultracentrifuges; fluorescence, optical rotary dispersion, high-field NMR, ultraviolet-visible, and rapid kinetic instruments; amino acid analyzers and protein sequencers, gas chromatographs, preparative high performance liquid chromatographs, liquid scintillation counters, electrophoresis equipment, instrumentation for protein X-ray crystallography and microcalorimetry, and automated DNA sequencers.

The department maintains a reading room stocked with primary books and journals used by biochemists. The Hardin Library for the Health Sciences is a large, complete library located on the Health Sciences Campus. Excellent resources also are provided by branches of the University of Iowa Libraries and by computer access to bibliographic retrieval services.
Courses

099:001 Orientation and Introduction to the Field of Biochemistry 0 s.h.
Biochemistry and its application to other areas of basic sciences; biochemical studies, research, careers.

099:101 Technical Communication in Biochemistry 1 s.h.
Practical aspects of writing formal scientific papers and making oral presentations on technical topics. Prerequisites: 099:120 or 099:130 or 099:140 or consent of instructor; and junior or senior standing.

099:110 Biochemistry 3 s.h.
Basic concepts in modern biochemistry and molecular biology; understanding of life processes in molecular terms.

099:115 Undergraduate Independent Study arr.
Experience in an active biochemistry research lab, learning and performing experiments relevant to the current projects in that lab; research experience in preparation for meeting the requirements for 099:155; arranged in advance by student and faculty member. Prerequisite: first-year, sophomore, or junior standing.

099:120 Biochemistry and Molecular Biology I 3 s.h.
Structures of nucleic acids, proteins, carbohydrates, lipids and their participation in cellular transport, catalysis, oxidative reactions; first course of two-semester sequence that concludes with 099:130. Prerequisites: two semesters of general chemistry and one of organic chemistry. Recommended: 002:010, 002:011, and an additional organic chemistry course.

099:130 Biochemistry and Molecular Biology II 3 s.h.
Metabolism of lipids and nitrogen-containing compounds; regulation and integration of metabolism; information transfer in procaryotes and eucaryotes; recombinant DNA techniques; chemistry and enzymology of replication, transcription, translation, cell transformation, and regulation of gene expression. Prerequisite: 099:120.

099:140 Experimental Biochemistry 4 s.h.
Quantitative and qualitative experiments on identification, fractionation, and characterization of constituents of biochemical systems; use of modern instruments and techniques for spectrophotometry, chromatography, electrophoresis, centrifugation, radioisotope studies; emphasis on experimental design and interpretation. Prerequisites: 004:016 or 004:020, and 099:120.

099:155 Research, Independent Study 2-6 s.h.
Independent study and research in areas of interest to the student; arranged in advance by student and biochemistry faculty member. Prerequisites: 099:120, 099:130, and 099:140.

099:161 Biochemistry for Dental Students 4 s.h.
Concepts of biochemistry and their application to understanding of clinical problems. Prerequisites: 004:121 or consent of instructor; and D.D.S. enrollment or consent of instructor. Recommended: 004:122.

099:162 Biochemistry for Pharmacy Students 4 s.h.
Concepts of biochemistry and their application to understanding of clinical problems. Prerequisites: 004:121 and Pharm.D. enrollment, or consent of instructor. Recommended: 004:122.

099:163 Medical Biochemistry 4 s.h.
Concepts of biochemistry; their application to understanding of clinical problems. Prerequisite: M.D. enrollment.

099:164 Biochemistry for Physician Assistant Students 3 s.h.
Aspects of general biochemistry necessary for understanding the biochemical basis of human disease; analysis of appropriate clinical cases. Prerequisite: 099:110 or equivalent biochemistry survey.

099:226 Enzyme Kinetics and Bioorganic Mechanisms 1-2 s.h.
Principles and applications of steady-state and transient enzyme kinetics; mechanisms of catalysis of biochemical reactions. Prerequisite: 099:120 or consent of instructor.

099:237 Topics in Biochemistry 1-2 s.h.
Topics in the physical-chemical or molecular biology areas of biochemistry. Repeatable. Prerequisite: 099:130.

099:241 Biophysical Chemistry I 3 s.h.
Quantitative analysis of biochemical systems; application of thermodynamics, equilibria, spectroscopy, X-ray crystallography to study of structure and function of macromolecules. Prerequisites: one year of biochemistry and consent of instructor. Recommended: physical chemistry course.

099:242 Biophysical Chemistry II 3 s.h.
Equilibrium and kinetic measurements of proteins obtained using absorbance, fluorescence and dichrocic spectrometry, electrophoresis, mass spectrometry, ultracentrifugation, and chromatography; enzyme kinetics and catalysis.

099:261 Research Techniques 1-5 s.h.
Laboratory rotation for first-year graduate students in biochemistry.

099:275 Perspectives in Biocatalysis 1 s.h.

099:282 Seminar 0-1 s.h.
How to evaluate reports of scientific investigations critically; techniques for presenting scientific information.

099:292 Research Biochemistry arr.
Thesis research.
Economics

Chair: Marlynne Beth Ingram
Professors: William P. Albrecht, Gary C. Fethke (Leonard A. Hadley Professor of Leadership), Robert Forsythe (Leonard A. Hadley Chair in Leadership), John W. Fuller, John F. Geweke (Harlan E. McGregor Professor of Economic Theory), Sthari Govindan, Marlynne Beth Ingram, Forrest D. Nelson, George R. Neumann (George Daly Professor of Economics), Harry J. Paarsch, B. Ravikumar (Henry B. Tippie Research Professor of Economics), Raymond G. Riezman (Henry B. Tippie Research Professor of Economics), Srihari Govindan, Marlynne Beth Ingram, Forrest D. Nelson, George R. Neumann (George Daly Professor of Economics), Charles H. Whiteman (C. Woody Thompson Professor of Economics), Stephen D. Williamson (Chester A. Phillips Professor of Financial Economics).
Professors emeriti: Carol C. Fethke, Hyman Joseph, Gerald L. Nordquist, Thomas F. Pogue, Larry Sgontz, Calvin D. Steibert, S.Y. Wu
Associate professor: John L. Solow
Associate professor emeritus: Michael S. Balch
Assistant professors: Marina Azzimonti, Ayca Kaya, Fernando Leiva, Matthew F. Mitchell, Elena Pastorino, Galina Vereshchagina

Undergraduate Programs

The department offers three undergraduate degrees in economics: the Bachelor of Arts (B.A.) and Bachelor of Science (B.S.) awarded by the College of Liberal Arts and Sciences and the Bachelor of Business Administration (B.B.A.) awarded by the Henry B. Tippie College of Business.

Each baccalaureate program provides an excellent educational background for a variety of positions in business and government. Graduates find employment in banking, financial institutions, industrial firms, and trade organizations and in federal, state, and local government agencies dealing with economic policy, regulation, and analysis. Economics also provides excellent preparation for the study of law and for graduate study in fields such as business management, public administration, hospital and health administration, urban and regional planning, transportation, journalism, political science, and statistics.

The B.A. is designed to achieve a balance between economic theory, mathematical tools, and field applications. The B.S. maintains a similar balance but emphasizes development of analytic tools; it prepares students for graduate work in economics or related business and technical fields. The B.B.A. emphasizes economic foundations of business fields: accounting, finance, marketing, business law, and management.

Bachelor of Arts

The B.A. in economics requires 32 s.h. in the major. Students should pay close attention to the order in which they take courses, since some courses are prerequisites for others. The Handbook for Economics Majors, available from the department, offers help in developing a study plan.

The following courses are required.

All of these:
06E:071 Statistics for Strategy Problems 3 s.h.
22M:017 Calculus and Matrix Algebra for Business (students who have taken 22M:025 or 22M:031 may use that class) 4 s.h.
22S:008 Statistics for Business 4 s.h.
A total of 21 s.h. in 100-level economics theory and field courses, as follows.

All of these:
06E:104 Microeconomic Theory 3 s.h.
06E:105 Macroeconomics 3 s.h.
Two advanced field courses chosen from 06E:170 through 06E:189 6 s.h.
Three additional courses chosen from 06E:111 through 06E:189 9 s.h.

Unless otherwise approved by the director of undergraduate studies, no more than 6 of the 21 s.h. required in 100-level economics courses may be satisfied by transfer or correspondence credit. Students should take 06E:104 and 06E:105 at The University of Iowa.

PREREQUISITES
Prerequisites for most 100-level courses in economics: 06E:001 and 06E:002, or consent of instructor
Prerequisites for 06E:104: 06E:001 and 22M:017, or consent of instructor
Prerequisites for 06E:105: 06E:002, 06E:104, and 22M:017
Prerequisite for 06E:071: 22S:008
Prerequisites for courses numbered 06E:170 and above: 06E:104 and 06E:105

Bachelor of Science
The B.S. in economics requires a minimum of 33 s.h. in the major. Students should pay close attention to the order in which they take courses, since some courses are prerequisites for others. The Handbook for Economics Majors, available from the department, offers help in developing a study plan.

The following courses are required.

This sequence:
22M:025-22M:026 Calculus I-II 8 s.h.
One of these:
22S:120 Probability and Statistics 4 s.h.
22S:130-22S:131 Introduction to Mathematical Statistics I-II 6 s.h.
A total of 21 s.h. in 100-level economics theory and field courses, as follows.

All of these:
06E:104 Microeconomic Theory 3 s.h.
06E:105 Macroeconomics 3 s.h.
06E:184 Introduction to Econometrics 3 s.h.
Two additional advanced field courses numbered from 06E:170 through 06E:189 6 s.h.
Two additional courses chosen from 06E:111 through 06E:189 6 s.h.

Unless otherwise approved by the director of undergraduate studies, no more than 6 of the 21 s.h. required in 100-level economics courses may be satisfied by transfer or correspondence credit. Students should take 06E:104 and 06E:105 at The University of Iowa.

For students planning to pursue a graduate degree in economics, 22S:130 and 22S:131 are recommended in place of 22S:120.

PREREQUISITES
Prerequisite for 22S:120 and 22S:130: 22M:022 or 22M:026
Prerequisites for most 100-level courses in economics: 06E:001 and 06E:002, or consent of instructor
Prerequisites for 06E:104: 06E:001 and 22M:017, or consent of instructor
Prerequisites for 06E:105: 06E:002, 06E:104, and 22M:017
Prerequisites for 06E:071: 22S:008
Prerequisites for courses numbered 06E:170 and above: 06E:104 and 06E:105
Prerequisite for 06E:184: 22S:120 or 22S:131

Bachelor of Business Administration
In addition to the B.B.A. common requirements of the Tippie College of Business, the B.B.A. in economics requires 18 s.h. in 100-level economics courses, including the following. Students should take 06E:104 and 06E:105 at The University of Iowa. Students should pay close attention to the order in which they take courses, since some courses are prerequisites for others. The Handbook for Economics Majors, available from the department, offers help in developing a study plan.

All of these:
06E:104 Microeconomic Theory 3 s.h.
06E:105 Macroeconomics 3 s.h.
Two field courses numbered from 06E:170 through 06E:189 6 s.h.
Two additional courses numbered from 06E:111 through 06E:189 6 s.h.
PREREQUISITES
Prerequisites for most 100-level courses in economics: 06E:001 and 06E:002, or consent of instructor
Prerequisites for 06E:104: 06E:001 and 22M:017, or consent of instructor
Prerequisites for 06E:105: 06E:002, 06E:104, and 22M:017
Prerequisite for 06E:071: 22S:008
Prerequisites for courses numbered 06E:170 and above: 06E:104 and 06E:105

Four-Year Graduation Plan

B.A. and B.S. Students
The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

Before the third semester begins: at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: at least one-half of the semester hours required for graduation, 06E:001 and 06E:002, and the math component of quantitative courses required for major

Before the seventh semester begins: three-quarters of the semester hours required for graduation, 06E:104 and 06E:105, and one 100-level economics course

Before the eighth semester begins: three 100-level economics courses, including one advanced course (numbered 06E:170 through 06E:189), and the statistics component of the quantitative course requirement

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

B.B.A. Students
The following checkpoints are designed for students who enter the University as first-year pre-business students. In order to stay on the plan, students must maintain the grade-point average required for guaranteed admission to the Tippie College of Business and must apply for admission to the college by the established deadline.

Students must take 06J:100 Foundations of Business during their first semester after admission to the Tippie College of Business.

Before the third semester begins: 06E:001 or 06E:002, 22M:017, and 22S:008, or equivalents; and at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: 06A:001, 06A:002, and 06E:001 or 06E:002 (whichever has not already been taken), or equivalents; all General Education requirements; and at least half of the semester hours required for graduation

Before the seventh semester begins: business core requirements, approximately half of the course work in the major (varies by major), and three-quarters of the semester hours required for graduation

Before the eighth semester begins: approximately three-quarters of course work in the major

During the eighth semester: all remaining course work in the major, and a sufficient number of semester hours to graduate

Honors

B.A. and B.S. Students
Students in the College of Liberal Arts and Sciences working toward a B.A. or B.S. in economics are encouraged to take part in the honors program in economics, which provides opportunities for high-achieving students to pursue special research interests. Honors students in economics must be members of the University Honors Program, which requires students to maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University Honors Program for more information).

To enter the honors program, students must complete 06E:104 Microeconomic Theory and 06E:105 Macroeconomics before the senior year. Honors students typically register for 06E:194 Honors Seminar in the fall of the senior year. Then they define and complete a research project under the guidance of a supervising faculty member, earning up to 6 s.h. in 06E:195 Senior Thesis in Economics. The thesis is presented orally to a committee of three faculty members, typically the undergraduate honors adviser, the
student’s research supervisor, and a third faculty member agreed upon by the student and the honors adviser. Interested students should consult the honors adviser by the second semester of their junior year.

B.B.A. Students

The Tippie College of Business offers qualified B.B.A. students the opportunity to pursue honors study. For more information, contact the Undergraduate Program Office or see “B.B.A. with Honors” in the Tippie College of Business section of the Catalog.

Minor

The minor in economics requires at least 15 s.h. in economics with a g.p.a. of at least 2.00; 12 of the 15 s.h. must be taken at The University of Iowa in courses numbered above 06E:100.

Course Work for Nonmajors

Students in the College of Liberal Arts and Sciences may wish to use economics courses as part of other majors or the General Education Program. The introductory courses 06E:001 Principles of Microeconomics and 06E:002 Principles of Macroeconomics are approved for General Education in social sciences; they introduce the field of economics and the specialized topics of upper-division courses. The intermediate theory courses 06E:104 Microeconomics Theory and 06E:105 Macroeconomics provide a deeper foundation in the core theories and methods of the discipline. They serve as preparation for upper-division field courses or as terminal courses in an economics study plan.

Course work in economics can be related to majors in many other fields. For example, history majors might take 06E:178 American Economic History; political science majors could elect 06E:119 Economics of the Government Sector and 06E:125 International Economics; global studies majors, 06E:133 Environmental and Natural Resource Economics; pre-law students, 06E:171 Antitrust: Legal and Economic Analysis and 06E:172 Law and Economics; mathematics and engineering majors, 06E:104 Microeconomic Theory and 06E:187 Introduction to Mathematical Economics; and statistics majors, 06E:184 Introduction to Econometrics. The Handbook for Economics Majors lists economics courses that complement studies in other fields.

Some students combine related interests by pursuing double majors in economics and another field, such as computer science, geography, global studies, history, mathematics, political science, sociology, or statistics.

Undergraduate Economics Forum

Students are invited to join the Undergraduate Economics Forum. The group sponsors programs to help students plan for careers or graduate study andholds social events, special lectures, and round-table discussions. It provides opportunities for students to meet other economics majors and department faculty members.

Graduate Programs

The Doctor of Philosophy in economics provides rigorous training in economic theory, econometrics, and applied economics. The program has six components: a coordinated sequence of core courses, a qualifying examination, a research paper, a set of major field courses, a dissertation proposal and comprehensive examination, and a dissertation. Application deadline for admission and financial support is February 15 for fall semester entry. The Master of Arts is offered only to students working toward a Ph.D. in economics.

CORE SEQUENCE

First Semester

- 06E:200 Economic Analysis I 3 s.h.
- 06E:203 Microeconomics I 3 s.h.
- 06E:204 Macroeconomics I 3 s.h.

Second Semester

- 06E:201 Economic Analysis II 3 s.h.
- 06E:205 Microeconomics II 3 s.h.
- 06E:206 Macroeconomics II 3 s.h.

Third Semester

- 06E:221 Econometrics 3 s.h.

Fourth Semester

- 06E:222 Applied Econometrics 3 s.h.

QUALIFYING EXAMINATION

The qualifying examination is normally taken the summer after the first year.
RESEARCH PAPER
The research paper is normally completed the summer after the second year.

MAJOR FIELD COURSES
Each student chooses a major study area in addition to the core courses. The requirement for the major area is a minimum of 24 s.h. of intensive study in a field and in courses that enable students to understand the relationship between their specialty and related fields.

DISCUSSION PROPOSAL AND COMPREHENSIVE EXAMINATION
Students must defend a dissertation proposal in a comprehensive examination within one year of completing the research paper requirement.

DISCUSSION
Submission of the completed dissertation and an oral defense of the dissertation research completes the Ph.D. program.

Joint Ph.D./J.D. Program
The Department of Economics and the College of Law offer a Joint Ph.D./J.D. program.

Special Seminar
Each year the department offers a seminar program that brings eminent economists from other universities and from government agencies to The University of Iowa campus. Presentations by Department of Economics faculty members and students also are featured.

Courses

Primarily for Undergraduates
Note: 06E:001 and 06E:002 may be taken in either order or simultaneously. They are approved for General Education in social sciences for B.A. and B.S. students.

06E:001 Principles of Microeconomics 3-4 s.h.
Organization, workings of modern economic systems; role of markets, prices, competition in efficient allocation of resources; and promotion of economic welfare; alternative systems; international trade. GE: social sciences (except for B.B.A. students).

06E:002 Principles of Macroeconomics 3-4 s.h.
National income and output, employment and inflation; money, credit, government finance; monetary, fiscal policy; economic growth, development; international finance. GE: social sciences (except for B.B.A. students).

06E:071 Statistics for Strategy Problems 3 s.h.
Continuation of 22S:008; working knowledge of statistical techniques, scientific data-based approach to problem formulation and solution, statistical techniques in the context of real data analysis, assessment of defects in statistical analyses, using data for making business decisions, choosing appropriate statistical procedures, developing skill in communicating statistical results to audiences without knowledge of statistics. Prerequisites: 22M:017 and 22S:008.

06E:104 Microeconomic Theory 3 s.h.
Economic theory of consumer behavior, producer behavior, role of markets in coordinating economic decisions; conditions for efficient resource allocation by market mechanisms; market imperfections, strategic behavior. Prerequisites: 06E:001 and 22M:017; or consent of instructor.

06E:105 Macroeconomics 3 s.h.
Measurement of national product, unemployment, inflation; determination of national income, price level, role of stabilization policies; economic growth, dynamics of inflation. Prerequisites: 06E:002, 06E:104, and 22M:017; or consent of instructor.

06E:111 Labor Economics 3 s.h.
Microeconomic analysis of labor markets, related institutions; labor supply decisions made by workers, labor demand decisions made by firms, market equilibrium; economic analysis of unions; returns to education; family decisions. Closed to students who have taken or are taking 06E:175. Prerequisites: 06E:001 and 06E:002; or consent of instructor.

06E:113 Health Economics 3 s.h.
Structure of America’s health care industry, economic analysis applied to its problems of production, pricing, distribution; cost-effectiveness, financing of medical costs, role of government. Prerequisites: 06E:001 and 06E:002, or consent of instructor.

06E:117 Money, Banking, and Financial Markets 3 s.h.
Role of money, institutions in determination of income, employment, prices in domestic and world economy. Prerequisites: 06E:001 and 06E:002; or consent of instructor.

06E:119 Economics of the Government Sector 3 s.h.
Economic functions of government in modern economies; economic decision making; budgetary processes; effects of government expenditures, taxation on allocation of resources, distribution of income, economic growth, stability. Prerequisites: 06E:001 and 06E:002, or consent of instructor.

06E:125 International Economics 3 s.h.
Modern theories of international trade and investment; role of tariffs and other restrictions of international trade; foreign exchange markets, international monetary arrangements, international economic policy. Prerequisites: 06E:001 and 06E:002; or consent of instructor.

06E:129 Economic Growth and Development 3 s.h.
Determinants of rising living standards; accumulation of physical and human capital; predictions of economic growth models compared to observed changes in living standards. Prerequisites: 06E:001 and 06E:002; or consent of instructor.

06E:133 Environmental and Natural Resource Economics 3 s.h.
Environmental and resource use problems; efficient mechanisms and other policies for environmental protection, management of common property resources. Prerequisites: 06E:001 and 06E:002; or consent of instructor.

06E:135 Regional and Urban Economics 3 s.h.
Theory of location and regional development; central place theory; why cities exist and trade with one another, models of land use patterns, rents; empirical tests of models; policy applications. Prerequisites: 06E:001 and 06E:002; or consent of instructor.
06E:141 Economics of American Industries 3 s.h.
Structural evolution; imperfect competition, resource allocation; development of public policy on monopoly; selected industries. Prerequisites: 06E:001 and 06E:002, or consent of instructor.

06E:145 Introduction to the Economics of Transportation 3 s.h.
Transportation markets—intercity, rural, urban; transportation modes—rail, highways, air, water pipelines; issues in environmental and economic regulation, finance, policy, planning, management, physical distribution. Same as 044:133, 102:133.

06E:160 Economics of Families and Households 3 s.h.
Micro and macroeconomic theory applied to economic decisions of families, households; practical and theoretical issues in income generation, spending and saving decisions, risk management and asset allocation, investments, and intergenerational wealth transfers. Prerequisites: 6 s.h. of 100-level economics courses and junior or senior standing, or consent of instructor.

06E:164 Economics in Transition 3 s.h.
Emerging markets and newly industrialized nations in Asia, Latin America, the former Soviet Union; developments in these regions over past decades—financial crises, industrialization, economic reform, privatization, impact of globalization, development of human capital, income distribution; role of institutions in the transition from poor to rich nation. Prerequisites: 06E:001 and 06E:002, or consent of instructor.

06E:171 Antitrust: Legal and Economic Analysis 3 s.h.
Topics in Federal antitrust policy; merger policy, monopolization, predatory pricing, collusion, vertical restrictions, resale price maintenance, enforcement; case law, economics-litigation. Prerequisite: 06E:104 or 091:208 or consent of instructor. Same as 091:201.

06E:172 Law and Economics 2-3 s.h.
Law examined through analytic tools of microeconomics; impact of legal rules on resource allocation, risk bearing, distribution of economic well-being. Prerequisites: 06E:104 and 06E:105, or consent of instructor.

06E:173 Advanced International Economics 3 s.h.
Neoclassical model of international trade, imperfect competition and international trade and investment, role of trade barriers; regional trade agreements and the World Trade Organization. Prerequisites: 06E:104 and 06E:105, or graduate standing.

06E:174 Monetary Economics 3 s.h.
Demand for and supply of money; money's role in economy, empirical studies of money's impact; problems with monetary control. Prerequisites: 06E:104 and 06E:105, or consent of instructor.

06E:175 Economic Analysis of Labor Markets 3 s.h.
Labor supply and demand, investments in human capital, compensating wage differentials, discrimination, long-term contracts, occupational choice, family decisions, unions, immigration. Prerequisites: 06E:104, 06E:105, elementary calculus and statistics.

06E:176 Public Sector Economics 3 s.h.
Economic functions of government; budgetary processes; effects of government expenditures, taxation on resource allocation, income distribution, economic growth and stability. Prerequisite: 06E:104 and 06E:105, or consent of instructor.

06E:177 Industrial Organization 3 s.h.
Market structure; effects of business practices, informational problems on market structure; appraisal of antitrust policies, government regulation of business. Prerequisites: 06E:104 and 06E:105.

06E:178 American Economic History 3 s.h.
Emphasis on role of population, technology. Prerequisites: 06E:104 and 06E:105 for economics majors; 06E:001 and 16A:061 for non-economics majors. Same as 16A:144.

06E:179 History of Economic Thought 2-3 s.h.
Evolution of economics as a social science; ideas of Smith, Ricardo, Malthus, Marx, Marshall, Keynes, and their major critics. Prerequisites: 06E:104 and 06E:105.

06E:184 Introduction to Econometrics 3 s.h.
Single equation linear statistical models, estimation and hypothesis testing; serial correlation, heteroscedasticity, generalized least squares estimation, specification analysis, errors in variables; emphasis on interpretation, application of econometric models, methods, use of computers. Prerequisite: 225:120 or equivalent.

06E:187 Introduction to Mathematical Economics 3 s.h.
Mathematical structure of economic principles, problems, systems; may include constrained optimization, choice under uncertainty, general equilibrium and welfare economics, dynamical systems and control theory, game theory. Prerequisite: 06E:104 or consent of instructor.

06E:189 Topics in Economics arr.
Varied content. Prerequisite: consent of instructor.

For Advanced Undergraduates

06E:194 Honors Seminar 3 s.h.
Preparation for writing senior honors thesis. Prerequisite: consent of instructor.

06E:195 Senior Thesis in Economics arr.
Independent research leading to senior honors thesis. Prerequisite: consent of instructor.

06E:196 Readings and Independent Study in Economics arr.

06E:199 Internship arr.
Participation in approved internship program (e.g., Washington Center Internships). Prerequisite: consent of instructor.

Primarily for Graduate Students

06E:200 Economic Analysis I 3 s.h.
Theory of the competitive firm, theory of the consumer, noncompetitive models of the firm, optimization, constrained optimization, comparative statics, introduction to game theory.

06E:201 Economic Analysis II 3 s.h.
Behavior under uncertainty, macroeconomic models; dynamic programming, asset pricing, saving, consumption.

06E:203 Microeconomics I 3 s.h.
Price theory; emphasis on problem formulation and solving, economic intuition; producer and consumer behavior, competitive and noncompetitive markets, welfare economics. Offered fall semesters. Prerequisite: 06E:200 or consent of instructor.

06E:204 Macroeconomics I 3 s.h.
Economic growth, business cycles, money and inflation. Offered fall semesters. Prerequisite: 06E:201 or consent of instructor.

06E:205 Microeconomics II 3 s.h.
Behavior under uncertainty, general equilibrium and welfare analysis, models with asymmetric information. Offered spring semesters. Prerequisite: 06E:203 or consent of instructor.
### Macroeconomics II 06E:206 3 s.h.
Dynamic macroeconomic models; stochastic macroeconomics; time consistency equilibrium business cycle theory. Offered spring semesters. Prerequisite: 06E:204 or consent of instructor.

### Mathematical Economics I 06E:211 3 s.h.
Convex analysis in economic theory; ordinal and cardinal preference relations; quasiconcave, concave numerical representations; separation principle for convex sets—linear programming, concave programming; Brouwer fixed point theorem; existence of competitive equilibrium. Prerequisite: 06E:205 or consent of instructor.

### Mathematical Economics II 06E:212 3 s.h.
Theories of n-person games, noncooperative or cooperative; applications to general economic equilibrium analysis. Prerequisite: 06E:211.

### Econometrics 06E:221 3 s.h.
Statistical inference in single and multiple equation stochastic models, models with nonindependent or nonidentically distributed error structure, dynamic models; OLS, GLS, IV, ML estimation; asymptotic distribution theory; exact, asymptotic hypothesis tests. Prerequisite: 22S:154 or equivalent.

### Applied Econometrics 06E:222 3 s.h.
Empirical problems; multiple linear regression, nonlinear regression, maximum likelihood, hazard functions, univariate and multivariate time series, flexible functional forms. Prerequisite: 06E:221.

### Econometric Theory I 06E:223 3 s.h.
Statistical theory underlying econometric inference; emphasis on estimation, hypothesis testing in linear models. Prerequisite: 06E:221.

### International Business 06E:234 3 s.h.
Problems in international business; how to export, how to deal with import competition, international joint ventures; country studies. Prerequisite: consent of instructor.

### International Trade Theory 06E:235 3 s.h.
The theory of international trade, including basic models of international trade; capital and labor mobility and trade; protection of international trade; the political economy of international trade; empirical applications of international trade. Prerequisite: consent of instructor.

### Macroeconomics III 06E:241 2-6 s.h.
Current research in macroeconomics; development of research topics with emphasis on theoretical and empirical analysis. Prerequisites: 06E:205 and 06E:221.

### Monetary Theory 06E:245 2-3 s.h.
Research at the frontier of monetary theory and policy; overlapping generations models, search models of money, representative agent monetary models, intermediation and banking theory; and financial contracts.

### Labor Economics 06E:250 3 s.h.
Problems and models, including intertemporal models of labor markets; uncertainty and labor market activity; retirement decisions, economic theories of fertility; economics of discrimination; job search models; economic models of unions; bargaining and strikes, public sector labor markets; determinants of income distribution, emphasis on empirical verification of theory. Prerequisites: 06E:205, and 06E:184 or 06E:221.

### Industrial Organization 06E:271 2-4 s.h.
The firm, monopolistic competition, oligopoly and workable competition; industrial organization, nature of equilibrium under uncertainty. Prerequisites: 06E:205 and 06E:211.
Study in the Department of Microbiology is dedicated to the branch of biological sciences that deals with the smallest living things: bacteria, archaea, fungi, algae, protozoa, and viruses. It is coupled with immunology, the study of the response of higher organisms to foreign substances.

Microbiology and immunology are at the forefront of the modern biological revolution. Microbes are often the experimental subjects of choice for examining basic genetic and biological phenomena because of their small size, rapid growth rate, and relative simplicity. A significant portion of contemporary biochemical research employs microbiological and immunological methods.

Current research is making theoretical and practical advances concerning microbial species and viruses that infect animals, including man, plants, and other microbes; the use of comparative genomics, gene expression profiling, and recombinant DNA methods to analyze basic biological processes and generate valuable products; the nature and occurrence of microbial life in extreme or unusual environments; microbial synthesis and modification of antibiotics and other natural products; the role of microbes in stabilization of the biosphere by recycling and detoxifying waste products; the genetics and regulation of metabolic processes; and the genetics and regulation of the immune response, including characterization of mechanisms used by bacteria to signal one another and characterization of interactions between different types of immune cells and their targets.

Microbiology is an excellent major for undergraduate students who want a good general education with emphasis on an important and interesting branch of biological sciences. Graduates find employment opportunities in government, hospitals, public health laboratories, research laboratories, and industrial laboratories (food, dairy, chemical, pharmaceutical, and genetic engineering companies). Those who pursue advanced degrees have more advanced career opportunities in these same areas as well as in college and university teaching.

Undergraduate Program

The College of Liberal Arts and Sciences administers undergraduate programs and grants undergraduate degrees in microbiology.

Bachelor of Science

Undergraduate students majoring in microbiology at The University of Iowa must complete the College of Liberal Arts and Sciences General Education Program. The B.S. requires a minimum of 21 s.h. in microbiology, including at least 12 s.h. taken at The University of Iowa. All University of Iowa courses must be chosen from those numbered 061:147 and above. No more than 2 s.h. of 061:161 (061:171 for honors students) and no more than 2 s.h. of 061:163 may be counted toward the 21 s.h. requirement. Students may count 061:218, but not 061:220, toward the requirement.

Students may take microbiology courses more advanced than 061:157 General Microbiology only if they receive a grade of C or higher in
Microbiology majors must take the following in addition to required microbiology courses.

- 002:010-002:011 Principles of Biology I-II 8 s.h.
- 004:011-004:012 Principles of Chemistry I-II 8 s.h.
- 004:121-004:122 Organic Chemistry I-II 6 s.h.
- 004:141 Organic Chemistry Laboratory 3 s.h.
- 029:011-029:012 College Physics 8 s.h.
- 099:120 Biochemistry and Molecular Biology I 3 s.h.
- 099:130 Biochemistry and Molecular Biology II 3 s.h.

One of these:
- 22M:016 Calculus for the Biological Sciences 4 s.h.
- 22M:025 Calculus I 4 s.h.

In addition, the following courses may be recommended for some students:

- 08N:080 Nonfiction Writing 3 s.h.
- *171:161 Introduction to Biostatistics 3 s.h.

*Some medical schools require a biostatistics course for admission.

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

**Before the third semester begins:** 002:010; 004:011, and 004:012; an approved calculus class; and at least one-quarter of the semester hours required for graduation

**Before the fifth semester begins:** 002:011; 004:121, 004:122, and 004:141; 061:157; and at least one-half of the semester hours required for graduation

**Before the seventh semester begins:** five more courses in the major and at least three-quarters of the semester hours required for graduation

**Before the eighth semester begins:** another 10-12 s.h. of course work

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining required General Education courses, and a sufficient number of semester hours to graduate

Honors

Microbiology majors who are members of the University Honors Program may enroll in the honors program in microbiology. Membership in the University Honors Program requires that students maintain a cumulative University of Iowa g.p.a. of at least 3.33. Microbiology honors students must also maintain a g.p.a. of at least 3.33 in microbiology courses. The program requires 25 s.h. of course work in microbiology, including 6 s.h. in 061:171 Honors Undergraduate Research in Microbiology, which constitutes an introduction to experimental research. At the end of the research, students present written and oral reports. Students who successfully complete these requirements receive the B.S. with honors.

Minor

An undergraduate minor in microbiology requires at least 15 s.h. of credit in microbiology courses with a g.p.a. of at least 2.00. Students must take at least 12 of the 15 s.h. at The University of Iowa. All University of Iowa courses must be chosen from those numbered 061:147 and above.

No more than 2 s.h. of 061:161 or 061:171 and 2 s.h. of 061:163 may be counted toward the 15 s.h. requirement. Students may count 061:218, but not 061:220, toward the minor.

Graduate Programs

The Carver College of Medicine administers graduate programs in microbiology; graduate degrees are granted through the Graduate College. See Carver College of Medicine and Graduate College in the Catalog for general information about study in medicine and graduate study at the University.

Generally, students admitted to the graduate program pursue the Ph.D. All students admitted
to advanced degree programs are expected to assist in departmental teaching.

The objectives of the graduate programs in microbiology are to help students become highly qualified in microbiology research and teaching.

The program offers study in six subdisciplines: pathogenic bacteriology, microbial genetics, immunology, microbial physiology, animal virology, and bioinformatics. Several areas involve interdisciplinary training both within and outside the department, so students receive broad experience during their course of study. Students also may pursue interdisciplinary Ph.D. programs in genetics, immunology, and molecular biology.

During their first year, students rotate in three laboratories of their choice and are advised by the Graduate Student Advisory Committee. At the end of the first year, they choose a research supervisor who chairs their advisory committee. The committee provides intellectual and research guidance for the student’s training.

The Department of Microbiology cooperates with other University of Iowa departments to give students ample access to diverse course offerings, seminars, and research programs. For example, microbiology students may participate in courses and seminars in clinical laboratory microbiology, immunology, genetics, cellular and molecular biology, biocatalysis/biotechnology, and electron microscopy.

Master of Science

M.S. students are required to take a minimum of 12 s.h. of microbiology courses in three of the department’s six subdisciplines. They may substitute a course already taken (at The University of Iowa or elsewhere) for a course requirement, with the M.S. advisory committee’s approval. Additional course requirements depend on students’ interests and the advice of the examining committee. Students must write a thesis based on their own research and defend it satisfactorily in an oral examination. No more than 9 s.h. of credit for thesis research may be counted toward the Graduate College’s minimum requirement of 30 s.h. for the Master of Science.

Doctor of Philosophy

The Ph.D. requires a minimum of 15 s.h. of credit in graduate-level courses. Students may substitute a course already taken (at The University of Iowa or elsewhere) for a course requirement, with the Ph.D. advisory committee’s approval. They also must pass a comprehensive examination before their sixth semester in the program and write a thesis based on their own research. The thesis must be defended satisfactorily in an oral examination.

Admission

Applicants must meet the admission requirements of the Graduate College. They should have a cumulative g.p.a. of at least 3.00 and must have completed courses in biological sciences, chemistry (inorganic and organic), mathematics including calculus, and physics. Those admitted with deficiencies must complete the relevant course work during their first year of graduate study. Admission is determined through a review and formal vote by the faculty. Preference is given to students applying for the Ph.D. program.

Facilities

The department shares the Bowen Science Building with the Departments of Anatomy and Cell Biology, Biochemistry, Pharmacology, and Physiology and Biophysics. Laboratory space and modern equipment are available for teaching and research.

Courses

061:005 Microbes and Our World 2 s.h.
Bacteria, viruses, and parasites and their role in shaping human health, industry, current affairs, history.

061:103 Principles of Infectious Diseases 5 s.h.
Principles and methods essential to study of microorganisms, their isolation and identification; microorganisms in infectious diseases; current immunology concepts. Prerequisite: M.D. enrollment.

061:104 Principles Infectious Diseases—Physician Assistant 4 s.h.
Principles and methods essential to study of microorganisms, their isolation and identification; microorganisms in infectious diseases; current immunology concepts. Prerequisite: Physician Assistant Program enrollment.

061:112 Pharmacy Microbiology 3 s.h.
Medical microbiology: bacteriology, immunology, pathogenic bacteriology, virology, mycology, parasitology. Prerequisite: pre-pharmacy standing.

061:113 Dental Microbiology 3 s.h.
Medical microbiology: bacteriology, immunology, pathogenic bacteriology, virology, mycology, parasitology. Prerequisite: D.D.S. enrollment.

061:147 Survey of Immunology 4 s.h.
Major features of the evolutionary, ontogenic, and comparative development of innate and adaptive immune systems and their functions at the cellular and molecular levels. Prerequisite: strong background in biology, including physiology. Pre- or corequisite: biochemistry.
061:157 General Microbiology 3 s.h.
Principles of microbial diversity, microbial genetics, physiology, and metabolism, pathogenic microbiology, virology, immunology, industrial and environmental microbiology; laboratory emphasis on basic techniques. Prerequisites: 002:010 and 002:011. Corequisites: 004:121.

061:159 Pathogenic Bacteriology 5 s.h.
Pathogenic bacteria, with emphasis on mechanisms of pathogenicity, laboratory methods for isolation, identification; laboratory emphasis on advanced methods for study of pathogenic bacteria. Prerequisites: grade of C or higher in 061:157 and consent of instructor.

061:160 Microbial Physiology 3 s.h.
Bacterial genomes, cell structure, growth, energy metabolism, biosynthesis, mechanisms of signal transduction and regulation; laboratory supplement in 061:180. Prerequisite: grade of C or higher in 061:157.

061:161 Undergraduate Research in Microbiology arr.
Experimental research under faculty supervision. Prerequisites: grade of C or higher in 061:157 and consent of instructor.

061:163 Seminar: Microbiology 2 s.h.
Current topics in microbiology, immunology. Prerequisite: grade of C or higher in 061:157.

061:164 Health Sciences Microbiology 4 s.h.
Overview of bacteria, viruses, and eukaryotic microorganisms that cause human disease; microbial structure, growth control and reproduction; immunology in the context of host defense mechanisms. Prerequisite: pre-pharmacy or pre-nursing student standing or consent of instructor. Pre-or corequisite: 002:002 or 002:010 or 002:021.

061:168 Introduction to Animal Viruses 3, 5 s.h.
Basic physical, chemical, biological properties of animal viruses, their association with human disease; optional laboratory with emphasis on methods in basic, clinical, and molecular virology. Prerequisites: grade of C or higher in 061:157 and consent of instructor.

061:170 Microbial Genetics 3 s.h.
Genetics of bacteria, bacteriophages; laboratory supplement in 061:175. Prerequisite: grade of C or higher in 061:157 or consent of instructor.

061:171 Honors Undergraduate Research in Microbiology arr.
Experimental research under faculty supervision. Prerequisites: junior or senior standing and g.p.a. of at least 3.33.

061:175 Microbiological Genetics Laboratory 3 s.h.
Basic principles of genetic analysis of bacteria and bacteriophage. Prerequisite: consent of instructor. Pre-or corequisite: 061:170.

061:180 Microbial Physiology Laboratory 2 s.h.

061:188 Microbial Biotechnology 3 s.h.
Industry-relevant microbiology, molecular biology, fermentation, cell culture, downstream processing; overview of industrial organisms; processes to make enzymes, bulk chemicals, antibiotics; safety, economic, regulatory aspects. Prerequisite: grade of C or higher in 061:157.

061:190 Web-Based Nursing Microbiology 4 s.h.
Nursing microbiology, principles of immunology, web-based instruction. Prerequisite: pre-nursing standing or consent of instructor. Pre-or corequisite: 002:002 or 002:010 or 002:021.

061:201 Graduate Immunology I 3 s.h.
Prerequisites: courses in college biology, genetics, general chemistry, and introductory immunology. Recommended: biochemistry course. Same as 148:201.

061:202 Graduate Immunology II 3 s.h.
Inter cellular adhesion in the immune system, regulation of inflammation and lymphocyte traffic; immunological tolerance, autoimmune diseases, immune responses to viruses and parasites; problem-oriented experimental approaches, relevant journal articles. Same as 148:202.

061:207 Advanced Topics in Immunology 3 s.h.
Literature, skill in scientific presentation. Prerequisites: 061:201 and 061:202, or 148:201 and 148:202, or equivalents; and consent of instructor. Same as 148:291.

061:210 Advance Prokaryotic Molecular Biology 3 s.h.

061:217 Integrated Topics in Infectious Diseases 1 s.h.
Clinical cases used to raise questions in host-parasite interactions; case/scientific exposes followed by related journal club discussions at next class session. Prerequisite: consent of instructor.

061:218 Microscopy for Biomedical Research 3 s.h.
Methods of tissue preparation for transmission, scanning electron microscopy, fixation, embedding, ultra-thin sectioning and staining; theory, use, maintenance of electron microscopes; associated photographic techniques; advanced techniques such as immune EM, freeze-fracture. Prerequisites: biological science course and consent of instructor. Same as 002:216, 060:218.

061:220 Advanced Microscopy Biomedical Research arr.
Individually designed projects, library searches, seminar and workshop participation. Prerequisites: introductory EM course and consent of instructor. Same as 002:220, 060:220.

061:226 Advanced Topics in Microbial Development 2 s.h.
Lectures and journal club discussions on molecular and cellular mechanisms of bacterial and viral adaptation and survival in animate and inanimate environments. Prerequisite: consent of instructor. Pre-or corequisites: 142:220, 061:160 or 061:260, and 061:170 or 061:270.

061:259 Graduate Pathogenic Bacteriology 5 s.h.
Pathogenic bacteria, with emphasis on mechanisms of pathogenicity, laboratory methods for isolation, identification; laboratory emphasis on advanced methods for study of pathogenic bacteria; research literature. Prerequisite: consent of instructor.

061:260 Graduate Microbial Physiology 3 s.h.
Bacterial genomes, cell structure, growth, energy metabolism, biosynthesis, mechanisms of signal transduction and regulation; laboratory supplement in 061:280.

061:261 Graduate Research in Microbiology arr.
Prerequisites: microbiology graduate standing and consent of instructor.

061:263 Graduate Student Research Seminar 1 s.h.
Presentation of thesis work in progress. Prerequisite: microbiology graduate standing or consent of instructor.

061:264 Directed Study in Microbiology arr.
Prerequisites: microbiology graduate standing and consent of instructor.

061:265 Topics in Virology Literature 1 s.h.
Papers of current interest in primary virology literature. Prerequisite: consent of instructor.

061:267 Graduate Introduction to Animal Viruses 3, 5 s.h.
Basic physical, chemical, biological properties of animal viruses, their association with human diseases; optional laboratory with emphasis on methods in basic, clinical, and molecular virology; discussion topics in the primary literature. Prerequisite: consent of instructor.

</table>
The academic programs in science education include preparation in more than one discipline of science; a consideration of science from a philosophical, historical, and sociological perspective; an introduction to applied science (technology); and an education sequence. Because science education is transdisciplinary, program planning requires the cooperation and involvement of a variety of University departments and colleges. Most of the formal requirements are drawn from courses offered in these varied departments.

Undergraduate Program

The undergraduate program in science education represents a transdisciplinary major in science for students interested in education.

The science education major is not intended to prepare students for advanced study in one area of science. When graduates of the Science Education Program elect to pursue graduate studies in a single area of science, they often must complete additional courses in that discipline after they are admitted to the Graduate College.

All of the emphasis areas in science education have the following characteristics in common.

- Depth in a general area of science equivalent to three years or six semesters of sequential study
- Preparation in a second area of science equivalent to two years or four semesters of sequential study
- Introduction to two other fields of science
- A specified proficiency in mathematics as a tool of science (with more mathematics study required for the physical science emphases than for the biological ones)
- A view of science from a historical/philosophical/cultural perspective
- Experience with the application of scientific knowledge

Bachelor of Science

The B.S. in science education requires 58-67 s.h. earned in selected courses in College of Liberal Arts and Sciences science departments, science applications courses, and courses in the history, philosophy, and sociology of science. Students may choose from four emphasis areas within the science education major: biological sciences, earth science, chemistry, and physics. Students who wish to be certified to teach science must complete the professional education requirements, a 42 s.h. sequence.

Students who wish to earn a B.S. degree in science education choose one of the following three options.

Option I (59-64 s.h.): Complete two emphasis areas and the broad science field block

Option II (minimum of 58 s.h.): Complete one emphasis area, 15 s.h. in a second emphasis area, the broad science field block, and at least 6 s.h. of additional course work in other emphasis area(s)

Option III (64-67 s.h.): Complete one emphasis area, 12 s.h. in each of the other emphasis areas, and complete 097:128 and 097:130

Biology Emphasis Area

Total of 28 s.h.

All of these:

002:010-002:011 Principles of Biology I-II 8 s.h.
002:081 Human Genetics in the Twenty-First Century 3 s.h.
002:100 Plant Diversity and Evolution 4 s.h.
002:123 Plant Biochemistry 3 s.h.
097:103 Societal and Educational Applications of Biological Sciences 3 s.h.

One of these:

002:110 Plant Physiology 3 s.h.
002:124 Animal Physiology 3 s.h.
One of these:
002:134 Ecology 4 s.h.
002:148 Field Ecology 4 s.h.

CHEMISTRY EMPHASIS AREA
Total of 25 s.h.
All of these:
004:011-004:012 Principles of Chemistry I-II 8 s.h.
004:111 Analytical Chemistry I (fall) 3 s.h.
004:121 Organic Chemistry I 3 s.h.
004:125 Inorganic Chemistry (spring) 2 s.h.
004:141 Organic Chemistry Lab 3 s.h.
097:106 Societal and Educational Applications of Chemical Concepts 3 s.h.
One of these:
004:122 Organic Chemistry II 3 s.h.
004:131 Physical Chemistry 3 s.h.
099:110 Biochemistry (spring) 3 s.h.

EARTH SCIENCE EMPHASIS AREA
Total of 27 s.h.
All of these:
012:004 Evolution and History of Life 4 s.h.
012:005 Introduction to Geology 4 s.h.
012:008 Introduction to Environmental Science 4 s.h.
012:041 Mineralogy 4 s.h.
012:108 Introduction to Oceanography 2 s.h.
012:114 Energy and the Environment 3 s.h.
097:102 Societal and Educational Applications of Earth Science and Environmental Science 3 s.h.
One of these:
012:102 Earth Surface Processes 3 s.h.
012:104 Climatology 3 s.h.
012:121 Principles of Paleontology 3 s.h.
012:136 Soil Genesis and Geomorphology 3 s.h.

PHYSICS EMPHASIS AREA
Total of 24-26 s.h.
One of these sequences:
029:011-029:012 College Physics 8 s.h.
029:081-029:082 Introductory Physics I-II 8 s.h.
One of these:
029:029 Physics III 4 s.h.
029:083 Modern Physics 3 s.h.
One of these:
029:050 Stars, Galaxies, and the Universe 4 s.h.
029:061 General Astronomy 4 s.h.
One of these:
029:128 Electronics 4 s.h.
029:131 General Laboratory (Saturday & Evening Classes) 3 s.h.
All of these:
029:115 Intermediate Mechanics 3 s.h.
097:105 Societal and Educational Applications of Physical Sciences 3 s.h.

BROAD FIELD SCIENCE BLOCK
097:102 Societal and Educational Applications of Earth Science and Environmental Science 3 s.h.
097:103 Societal and Educational Applications of Biological Sciences 3 s.h.
097:105 Societal and Educational Applications of Physical Sciences 3 s.h.
097:106 Societal and Educational Applications of Chemical Concepts 3 s.h.
097:128 Meaning of Science 2 s.h.
097:130 Science in Historical Perspective 2 s.h.

Four-Year Graduation Plan
The Four-Year Graduation Plan is not available to students majoring in science education.

Teacher Licensure
Candidates for a bachelor's degree in science education may, but are not required to, be admitted to the Teacher Education Program (TEP) in the College of Education. In order to be considered for admission to the TEP, students must have completed a minimum of 40 s.h. of science course work with a cumulative g.p.a. of at least 2.70. A limited number of applicants are accepted to the TEP, so having the required grade-point average does not ensure admission. Admission decisions are based on grade-point averages in science courses and other criteria relevant to teaching.

For procedures and deadlines for TEP applications, see Teaching and Learning (College of Education) in the Catalog. Interested students must apply to the College of Education for admission to the Teacher Education Program.

TEP students must complete the College of Liberal Arts and Sciences General Education Program, the requirements for a science education major, and the following professional education courses, which total 42 s.h.

07B:180 Human Relations for the Classroom Teacher 3 s.h.
07P:075 Educational Psychology and Measurement 3 s.h.
Science Education

07S:100 Foundations of Education 3 s.h.
07S:102/07E:102 Technology in the Classroom 2 s.h.
07S:151 Science Teaching and Practicum with Early Learners 3 s.h.
07S:152 Methods of Teaching Science 3 s.h.
07S:153 Instructional Issues in Teaching Science (taken with 07S:179) 3 s.h.
07S:179 Secondary School Science Practicum (taken with 07S:153) 2 s.h.
07S:190 Orientation to Secondary Education 1 s.h.
07S:195 Teaching Reading in Secondary Content Areas 1 s.h.
07U:100 Foundations of Special Education 3 s.h.

These three taken concurrently:
07S:187 Seminar: Curriculum and Student Teaching (section 91) 3 s.h.
07S:191 Observation and Laboratory Practice in the Secondary School 6 s.h.
07S:192 Observation and Laboratory Practice in the Secondary School 6 s.h.

One college-level math course (excluding 22M:001, 22M:002, and 22M:003) also is required.

Minors in Science Teaching

Four science teaching minors are available for persons with teaching majors in other academic areas: biology, chemistry, earth science, and physics. Students must complete a major emphasis area and a science methods course, approved by the Science Education Program.

Special Rules

Since the Science Education Program may involve many faculty advisers and several colleges and departments, some special rules and regulations apply to science education students. They include the following.

- At least 10 s.h. of graded credit in science must be earned at The University of Iowa.
- No credit from the CLEP Natural Science General Examination may be used toward the major in science education.
- Courses used for the major may not be taken pass/nonpass; grades from all courses used for the science education major are used in computing a student’s grade-point average in the major, both at The University of Iowa and overall.
- Since mathematics forms an integral part of so many aspects of modern science, all science education students are urged to complete appropriate advanced courses in both pure and applied mathematics (including statistics and computer science) so that they may be qualified to do graduate work and quantitative research later.

Honors

To graduate with honors, students must maintain a University of Iowa g.p.a. of at least 3.33, in addition to other science education requirements. Contact the University Honors Program for more information.

Graduate Programs

The Science Education Program offers graduate studies leading to the Master of Arts in Teaching, Master of Science, and Doctor of Philosophy. For information about science education graduate programs, see Teaching and Learning (College of Education) in the Catalog. The M.A.T., M.S., and Ph.D. are described under “Secondary Education.”

Research

Each faculty member in science education is responsible for one or more areas of research. Major interests include studies of effective teaching and learning, science through writing, philosophy and sociology of science, individualized learning, social issues in science and technology, curriculum planning and development, professional development, intellectual development related to teaching and learning science, studies of effective use of hands-on activities, and evaluation and assessment of science instruction and programs.

Special Programs

A wide range of funded programs provides ample opportunity for students to be involved in innovative development and research in science education. Of special importance is the Science Education Center’s commitment to improvement of science programs, toward which it works with teachers from Iowa and throughout the country. Special in-service programs guide teachers in adapting innovative instructional methods, including problem-solving methods, STS, and laboratory-centered instruction. Other programs promote development and revision of science curricula K-12, science literacy, and programs for gifted and talented students.
International Programs

Science education faculty members have collaborated on a number of international research and development projects in countries including Brazil, China, Italy, Spain, Portugal, Israel, Nigeria, Malaysia, Indonesia, Korea, Australia, Taiwan, South Africa, Mexico, Venezuela, Estonia, Turkey, and India. Activities have included faculty exchanges and numerous cross-national studies.

International students enrich the opportunities for graduate studies at the Science Education Center. Many have enrolled from Indonesia, Korea, Malaysia, Nigeria, Taiwan, and other nations around the world. Relationships are maintained, and new collaborative efforts are under way each year.

Courses

The following are special courses offered by the Science Education Program to supplement the undergraduate emphasis areas in science education and to provide science options for elementary education majors.

097:102 Societal and Educational Applications of Earth Science and Environmental Science
Major ideas and principles of earth and environmental sciences; emphasis on common applications in today's world.

097:103 Societal and Educational Applications of Biological Sciences
Basic conceptual themes of biology, how they have been derived; emphasis on a current social issue related to biology.

097:105 Societal and Educational Applications of Physical Sciences
Major ideas of physics and how they have been derived; emphasis on how such ideas affect modern society.

097:106 Societal and Educational Applications of Chemical Concepts
Principles of chemistry as applied in industry, communication, daily living.

097:107 Textile Science 3 s.h.
Same as 049:142.

097:113 Race to Save the Planet 3 s.h.
Today's environmental issues; solutions, constructive ideas, new approaches worldwide; environmental affairs from Neolithic agricultural revolution to present.

097:115 Introduction to Museology 3 s.h.

097:119 Directed Study arr.

097:128 Meaning of Science 2-3 s.h.
Scientific enterprise from social, ethical, cultural, epistemological viewpoints.

097:130 Science in Historical Perspective 2-3 s.h.
Science and its related contemporary social issues from historical development perspective.

097:140 Problems in Integrating the Teaching of Environmental Science 2-3 s.h.
Environmental education resources in the community—human, governmental, natural; environmental education in K-12 teaching.
Students in the College of Liberal Arts and Sciences have many opportunities for interdisciplinary study. In addition to majors offered by the college’s departments and interdisciplinary programs, students may earn certificates and sometimes minors from programs in the college’s Division of Interdisciplinary Programs. The Aging Studies Program and the American Indian and Native Studies Program offer certificates and minors to undergraduates. The Medieval Studies, Museum Studies, and Sexuality Studies Programs offer certificates.

The college and the University’s International Programs office cosponsor certificates and minors in the Global Health Studies and Latin American Studies Programs. The College of Public Health offers the Certificate in Public Health, which students in the College of Liberal Arts and Sciences can earn.

Students can earn the Certificate in International Business, cosponsored by the College of Liberal Arts and Sciences and the Tippie College of Business; the Certificate in American Sign Language and Deaf Studies, from the American Sign Language Program; and the Certificate in Philosophy and Ethics of Politics, Law, and Economics, sponsored by the PEOPLE program. Undergraduates also can take courses in book arts from the Center for the Book, which offers a graduate certificate.
American Sign Language

Chair: Richard Hurtig
Associate professor: Douglas Baynton
Adjunct instructors: Amy Cook, Tim Sheets
Language coordinator: Kimela Nelson
Undergraduate nondegree program: Certificate in American Sign Language and Deaf Studies
Web site: http://www.uiowa.edu/~asliowa

The American Sign Language Program offers a four-semester course sequence in American Sign Language (ASL), an undergraduate Certificate in American Sign Language and Deaf Studies, and courses for teacher licensure. Classroom instruction is supplemented by video materials and interactive software in the Language Media Center.

Students may use the American Sign Language sequence 158:011, 158:012, 158:013, and 158:014 to complete the foreign language component of the College of Liberal Arts and Sciences General Education Program.

Certificate

The Certificate in American Sign Language and Deaf Studies is an interdisciplinary program in which students learn about the history, culture, and language of the American deaf community. Through the study of American Sign Language, students come into contact with a language that is semantically and grammatically very different from their own and that operates in a different sensory channel as well. Students who undertake the program encounter a rich and complex culture, including a rapidly growing literature recorded on film and videotape since the early 20th century.

The certificate program permits students to link study in three or more disciplines into an organized investigation of a language and culture. A Certificate in American Sign Language and Deaf Studies serves as a valuable confirmation for employers and graduate schools of a student's specialized knowledge in the field.

Any undergraduate student pursuing a degree from The University of Iowa may earn the certificate. Holders of University of Iowa baccalaureate degrees who are not enrolled in graduate or professional programs may return to complete the certificate requirements.

Certificate courses also may be used to satisfy major or minor requirements, but they may not be used to satisfy more than one certificate requirement. Courses used to satisfy certificate requirements may not be taken pass/nonpass.

Up to 6 s.h. of transfer work may be accepted toward certificate requirements, with the approval of the American Sign Language and deaf studies adviser.

REQUIRED COURSES

The Certificate in American Sign Language and Deaf Studies requires completion of the sequence 158:011, 158:012, 158:013, and 158:014, or demonstration of equivalent proficiency, and a minimum of 18 s.h. of approved courses from at least three different departments. At least 6 s.h. must be chosen from the following core courses.

158:100/16A:104 History of the American Deaf Community 3-4 s.h.
158:101 Topics in Deaf Studies 3 s.h.
158:102 American Deaf Culture 3 s.h.
158:103 American Sign Language Literature 3 s.h.
158:104 Issues in ASL and Deaf Studies 3 s.h.
158:110/07U:110 Teaching Deaf and Hard of Hearing Students 3 s.h.
158:111 American Sign Language Conversation 3 s.h.

Certificate students also complete at least four courses (12 s.h.) from two or more of the following departments. They may petition to have courses that are not listed below approved for certificate requirements.

Anthropology
113:014 Language, Culture, and Communication 3 s.h.
113:173/103:150 Language and Gender 3 s.h.
113:179 Language and Identity 3 s.h.

Education
07U:100 Foundations of Special Education (requires admission to the Teacher Education Program) 3 s.h.
07U:110/158:110 Teaching Deaf and Hard of Hearing Students 3 s.h.
07U:133 The Culturally Different in Diverse Settings 3 s.h.
Teacher Licensure for Hearing Impaired Endorsement

The American Sign Language Program offers courses that fulfill requirements for the Hearing Impaired Endorsement offered by the College of Education. The University of Iowa currently is the only institution in Iowa that offers this endorsement program. Holders of this endorsement are authorized to serve deaf and hard-of-hearing students from birth to age 21. Applicants to the program must hold or be in the process of completing requirements for an elementary or secondary teaching license.

Courses

158:011 American Sign Language I
Conversational skills, basic grammar of ASL; introduction to the ASL cultural community through readings, videos. Taught in American Sign Language. First in a four-semester sequence. GE: foreign language.

158:012 American Sign Language II
Continuation of 158:011; emphasis on ASL grammar and syntax; focus on culture through readings, videos. Taught in American Sign Language. GE: foreign language. Prerequisite: 158:011 or consent of instructor.

158:013 American Sign Language III
Continuation of 158:012; emphasis on ASL grammar and syntax; focus on culture through readings, videos. Taught in American Sign Language. GE: foreign language. Prerequisite: 158:012 or consent of instructor.

158:014 American Sign Language IV
Continuation of 158:013. Taught in American Sign Language. GE: foreign language. Prerequisite: 158:013 or consent of instructor.

158:100 History of the American Deaf Community
Creation of a distinct language and culture of deaf people in America during the 19th and 20th centuries. Same as 16A:104.

158:102 American Deaf Culture
Cultural practices, beliefs, values of the American deaf community. Taught in American Sign Language. Pre- or corequisite: 158:014 or consent of instructor.

158:103 American Sign Language Literature
Introduction to the world of ASL literature, as recorded on videotape or film and in live performance; traditional folklore, story telling, poetry, drama, oratory, jokes, and nonfiction narrative; analysis of genres in their social and cultural contexts as expressions of deaf experience; how historical and current issues in deaf culture are represented in literary form. Taught in American Sign Language. Pre- or corequisite: 158:014 or consent of instructor.

158:104 Issues in ASL and Deaf Studies
Current issues in American Sign Language and the American deaf community, such as linguistics, culture, literacy.

158:110 Teaching Deaf and Hard of Hearing Students
Recognition and response to variability in the deaf population—how the deaf best learn and are best taught; how to teach varied subject matter addressing the diversity in large and small groups of deaf students; issues in testing, use of technology, ethnic and cultural diversity, classroom management, educational program options. Prerequisite: consent of instructor. Same as 07U:110.

158:111 American Sign Language Conversation
Improvement of receptive and expressive conversational ASL skills through small group discussion, class presentations. Taught in American Sign Language. Pre- or corequisite: 158:013 or consent of instructor.
Global Health Studies

**Director:** Paul Greenough  
**Undergraduate nondegree programs:** Minor, Certificate in Global Health Studies  
**Graduate nondegree program:** Certificate in Global Health Studies  
**Web site:** [http://intl-programs.uiowa.edu/academic/ghsp/index.htm](http://intl-programs.uiowa.edu/academic/ghsp/index.htm)

The Global Health Studies Program offers a certificate and a minor focusing on the themes, processes, and institutions that influence health and disease. Among these are technology, culture, politics, religion, legal structure, history, and economy.

As a field, global health studies assumes that health is subject everywhere to dynamic processes of change that have impact worldwide. Thus, health issues and health care in the United States and other developed countries are part of the field of global health studies.

The Global Health Studies Program emphasizes career and vocational aspects of global health work. It provides an understanding of related phenomena, such as infections and chronic diseases, fitness and longevity, climate change and natural disasters, environmental hazards, use of illicit and proprietary drugs, interventions against violence, war and injuries, new biomedical technologies, reproductive health and family planning, links between health and human rights, health care services and insurance programs, and non-Western health cultures and alternative therapies.

It also promotes an institutional focus that enables students and faculty members from different departments, colleges, and disciplines University-wide to meet on the common ground of their shared interests in global health issues.

The program attracts students from a wide range of disciplines: public health, health and pre-health sciences, health economics, nursing, social sciences, environmental engineering, anthropology, history, law, business, journalism, social work, and education.

**Certificate**

The Certificate in Global Health Studies is available to both undergraduate and graduate students. It requires completion of 25 s.h. of work in core courses, electives, and health or environmental health-related research, usually in a foreign country. Course work may be chosen from courses offered by the Global Health Studies Program (see “Courses”) and by other departments and programs (see “Affiliated Courses”). Students may be granted credit toward the certificate retroactively for course work they completed up to two years before beginning the program.

To enter the program, students must already be enrolled at The University of Iowa. They must maintain a g.p.a. of 3.00 or higher in the 25 s.h. of work for the certificate.

Certificate requirements are as follows.

**CORE COURSES**

Students complete the following.

- 152:111/173:111/175:111 International Health 3 s.h.
- 152:150 Global Health Seminar (may be repeated for elective credit) 3 s.h.
- 152:151 Proseminar in Global Health 1 s.h.
- 152:152 Global Health Conference (may be repeated for elective credit) 1 s.h.

**ELECTIVES**

Students complete 17 s.h. from the list of approved electives and may apply up to 6 s.h. earned for study abroad to the 17 s.h. requirement. Students may petition to take courses not on the approved list, providing that these courses can be shown to include substantial material related to global health. Contact the Global Health Studies Program for details.

**FOREIGN STUDY OR RESEARCH**

Students must complete a study or research project of four to eight weeks duration, typically in a foreign setting but under some circumstances in the United States. They may develop and conduct a research project, participate in a health-related study abroad program, assist a faculty member with research, or complete an internship on a global/environmental health issue.

Projects require approval by the Global Health Studies Program steering committee and must be supervised by a faculty member. Academic credit
for research or internship experiences may be applied to the elective requirement.

Financial support may be available for some projects. Contact the Global Health Studies Program.

**Foreign Language Study**

Students should complete four semesters of modern language study or course work that fulfills or is equivalent to the College of Liberal Arts and Sciences General Education Program foreign language component. This certificate requirement can be waived for students whose first language is not English.

The Global Health Studies Program steering committee may require students to take additional language study in preparation for a research or internship program. Graduate students interested in learning an infrequently taught language to facilitate their participation in a foreign experience should investigate the Autonomous Language Learning Network (ALLNET) in the International Center. Language study undertaken abroad during an internship or study abroad program may be considered for elective credit toward the 25 s.h. required for the certificate.

**Public Presentation**

During the semester following the foreign experience, students present their foreign research project results to a special session of 152:150 Global Health Seminar or to an equivalent public forum, such as a departmental seminar. Students also must submit a two- to three-page project report summarizing their research, study abroad, or internship experiences.

**Minor**

The interdisciplinary minor in global health studies is designed for undergraduate students who wish to study health issues in a global context. It draws on a set of courses offered by the Global Health Studies Program and the Departments of Anthropology, Economics, Geography, History, Sociology, and Psychology; the Program in Literature, Science, and the Arts; and the Colleges of Engineering, Law, Nursing, and Public Health, and the Carver College of Medicine.

The minor in global health studies requires completion of at least 15 s.h. of core and/or elective courses. Courses may be chosen from those offered by the Global Health Studies Program (see “Courses”) or by other departments and programs (see “Affiliated Courses”). Because the program is interdisciplinary, students should choose course work from at least two different disciplines, and they are strongly encouraged to include a core course from those listed under requirements for the certificate. A period of study abroad focused on global health issues is highly recommended.

Each student’s plan of study for the minor is developed according to the student’s interests and in consultation with a program adviser and the Office for Study Abroad.

Students must earn a g.p.a. of 2.00 or higher in all work for the minor and must complete at least 12 s.h. for the minor at The University of Iowa.

**Special Opportunities**

The Global Health Studies Program organizes both on-campus and international activities and research opportunities for students and faculty members, enabling them to become acquainted with major global health issues. Several scholarships, academic fellowships, international fellowships, and research and study abroad programs supplement the global health studies certificate program. These are sponsored by the University and a variety of agencies. Contact the Global Health Studies Program for details.

**Study Abroad Programs**

The Global Health Studies Program participates in the following study-abroad programs.

- **Latin American Health, Nutrition, and Environmental Issues: study abroad in the Dominican Republic (summer and fall semesters)**
- **Environmental studies in Slovenia: three-week intensive courses taught in summer and focusing on global environmental health policy development, atmospheric pollution sources and control, and environmental epidemiology**
- **Health and environment studies in The Gambia**
- **Reproductive health and sexuality: De LaSalle University, Manila, the Philippines**
- **Health and environment studies: School of Environmental Management and Sustainable Development, Katmandu, Nepal**
- **Center for Health Policy Studies, Mahidol University, Thailand**
- **Institute of Health Studies, Hyderabad, India**
International Fellowships, Internship

Stanley Fellowships for Graduate and Undergraduate Student Research Abroad:
Graduate fellowships are primarily for M.A. and M.S. students proposing to conduct thesis
research, but proposals also are welcome from Ph.D. or professional students who would benefit
from a period of preliminary research abroad.

CIREH International Health Research Fellowships: The Center for International Rural
and Environmental Health provides support to graduate students conducting research projects in
health and environmental health that require international travel to developing countries and
newly democratized countries in central and eastern Europe.

CIREH International Internship Program: The Center for International Rural and Environmental
Health supports participation in a summer internship program designed to enable students
who are midway through a graduate degree program to participate in a summer internship
that provides them with international experiences related to public, environmental, and
occupational health issues in central and eastern Europe.

Affiliated Courses

In addition to courses offered by the Global Health Studies Program (see "Courses"), students
may use the following courses to complete requirements for the certificate or minor.

AGING STUDIES
153:108 Basic Aspects of Aging 3 s.h.

ANTHROPOLOGY
113:136 Applied Anthropology (when topic is environmental and community
health) 3 s.h.
113:157 Alcohol and Culture 3 s.h.

COMMUNITY AND BEHAVIORAL HEALTH
172:130 Social Determinants of Health 3 s.h.
172:150 Health Behavior and Health Education 3 s.h.

ECONOMICS
06E:113 Health Economics 3 s.h.

EDUCATION
07B:195 Research in Cross-Cultural Settings 3 s.h.

LITERATURE, SCIENCE, AND THE ARTS
033:153 Hard Cases: Science Policy and Values (when topic is health related) 3 s.h.

NURSING
096:175 Issues in International Nursing and Health Care 3 s.h.

PUBLIC HEALTH
170:101 Introduction to Public Health 3 s.h.
170:171 Problems in Public Health (when topic is tobacco control and
prevention) arr.

SOCIOLOGY
034:134 Aging in Comparative Perspective 3 s.h.

Courses

152:111 International Health arr.
Same as 173:111, 175:111.
152:112 Global Environmental Health Policy 3 s.h.
152:120 Global Health and Human Rights 3 s.h.
Prerequisite: junior or senior standing or consent of instructor.
152:121 Health of Indigenous Peoples 3 s.h.
Same as 113:121, 149:121.
152:125 Topics in Global Health 3 s.h.
152:131 Geography of Health 1-3 s.h.
Same as 044:131.
152:136 History of Medicine in Western Society 3 s.h.
Same as 016:136.
152:137 History of Public Health 3 s.h.
Same as 16W:137.
152:138 History of International Health 3 s.h.
Same as 16W:138.
152:148 Population, Environment, and Development 3 s.h.
Same as 131:148.
152:150 Global Health Seminar 2-3 s.h.
Local and global dimensions of health and disease. Offered fall
and spring semesters.
152:151 Proseminar in Global Health 1 s.h.
Important health problems and issues of a global and interrelated
nature that affect the developed and developing world.
152:152 Global Health Conference 1 s.h.
Spring research conference on major global health issues.
Prerequisite: conference registration.
152:155 U.S. Health Care System Global Perspective 3 s.h.
Exceptionalism of the American health care system from historical, institutional, economic, clinical, and ethical perspectives. Same as 16W:139.

152:158 Promoting Health Globally 2 s.h.
Major global health threats (e.g., infectious disease, violence, tobacco, and nutrition); the impact of culture, history, and economics on health disparities and remedies. Prerequisite: junior or senior standing, or certificate student standing. Same as 028:147.

152:162 Principles of Environmental Engineering 4 s.h.
Same as 053:055.

152:165 Water and Global Health 2-3 s.h.
Relationship between water quality and human health and welfare worldwide.

152:170 Health Care and Health Reforms in Russia 3 s.h.
Same as 041:104, 174:170.

152:171 Global Health Informatics Workshop 2-3 s.h.
Assessment of digital communication resources in studying and responding to significant global health problems in Third World nations. Prerequisite: junior or senior standing, or certificate student standing.

152:175 Issues in International Nursing and Health Care 3 s.h.
Same as 096:175.

152:182 U.S. Health Experiences of Immigrants, Migrants, and Refugees 3 s.h.
Unique health challenges and health care experiences of recent immigrants, refugees, migrants.

152:184 Anthropology and International Health 3 s.h.
Same as 113:184, 172:131.

152:185 Medical Anthropology 3 s.h.
Same as 113:185.

152:190 Third World Research: Cases and Results 3 s.h.
Global health research in the Third World; case studies of health-related issues.

152:199 Special Projects in Global Health arr.
Prerequisite: consent of instructor.

152:200 Field Methods for International Research 3 s.h.
Field research in area studies or social science outside North America; research design, IRB review and field ethics, recording and preserving data, conduct of interviews, pros and cons of using research assistants, using archives, personal security, general principles, theoretical positions, case studies. Prerequisite: graduate standing or consent of instructor.

152:217 Health Insurance and Managed Care 3 s.h.
Same as 174:217.

152:250 Critical Development Seminar, Graduate 1 s.h.
Local and visiting speakers. Repeatable.

152:252 Environmental Health Policy 3 s.h.
Same as 053:204, 175:252.

152:257 Epidemiology of Infectious Diseases 3 s.h.
Same as 173:255.

152:281 Medical Geography 3 s.h.
Same as 044:281.
Division of Interdisciplinary Programs

**Director:** Lauren Rabinovitz (American Studies/Communication Studies)

The College of Liberal Arts and Sciences has long recognized that research and learning cannot always be contained within one discipline and that interactions between experts in different disciplines benefit researchers and students alike. One locus of interdisciplinary activity in the college is the Division of Interdisciplinary Programs. The division provides a structure that facilitates teaching, research, and service that cut across established boundaries.

The division provides an administrative umbrella for several of the college's programs. The Program in Literature, Science, and the Arts, the Interdepartmental Studies Program, and the Leisure Studies Program offer undergraduate majors. The Aging Studies, American Indian and Native Studies, Medieval Studies, Museum Studies, and Sexuality Studies Programs offer certificates and, in some cases, minors. The Center for the Book offers a graduate certificate and courses that undergraduates may choose as electives.

Located in the Jefferson Building, the Division of Interdisciplinary Programs provides a home for its constituent programs and centralizes administrative activities. The division home facilitates access to academic advising for students and administrative support for faculty members.
The Aging Studies Program is designed to provide undergraduate and graduate students with a multidisciplinary approach to gerontology. The program consists of courses that have been coordinated and sequenced to provide a broad background in aging for students from various disciplines. All students plan their course of study with their academic advisers in close cooperation with the Aging Studies Program adviser.

Certificate

The Certificate in Aging Studies is open to all interested graduate students, undergraduate students, and nondegree students whose career interests and needs are served by completing the program. The certificate requires 21 s.h. of approved aging-related courses numbered 100 and above. Aging-related course work is defined as University of Iowa courses that focus principally on older persons, the aging process, or interventive methods or techniques whose target is the older adult or aging. A g.p.a. of at least 2.00 is required in all course work applied toward the certificate.

Certificate requirements include a core curriculum of six courses and an additional 2-5 s.h. of elective course work from the list of approved aging-related courses.

With the approval of their major department, students may apply course work to their major or professional program of study. They must take 6 s.h. outside the major department. A minimum of 15 s.h. of course work in aging studies must be completed at The University of Iowa.

Transfer credit is determined individually. Students who wish to apply credit earned at other institutions to the aging studies certificate should consult the aging studies coordinator.

Students may take core courses before, or concurrently with, other courses in the program. The research project or the practicum course should not be taken until the core courses are completed.

Students in good standing may establish study plans with the Aging Studies program adviser, who works with them and their major advisers to shape a study plan that complements their academic program and career interests.

Students should contact the Aging Studies Program to develop an appropriate study plan. The Aging Studies Program schedules required courses, recommends the sequence in which course work should be taken, and keeps a record of each student’s approved program and progress.

When a student completes an undergraduate degree and fulfills the requirements for the aging studies certificate, the program notifies the registrar, who records completion of the program on the student’s transcript. Holders of Iowa baccalaureate degrees may return to complete the requirements for the certificate. Graduate students and other students who hold a baccalaureate degree are awarded the certificate when they have completed all certificate requirements.

Students are encouraged to advise the Aging Studies Program of their intent to pursue the certificate. In order to receive the certificate, they must contact the Aging Studies Program when they submit their Application for Degree, before graduation.

A student may not be awarded both a minor and a certificate in aging studies.

The following course work is required.

**CORE COURSES**

Basic Aspects of Aging 3 s.h.

153:134/034:134 Aging in Comparative Perspective 3 s.h.

153:150/031:050 Psychology of Aging 3 s.h.

153:160 Biology of Aging 3 s.h.

153:190/042:190 Field Work in Gerontology 3-6 s.h.
153:130 Aging Studies Colloquium—Undergraduate or 153:230 Aging Studies Colloquium (graduate students) 1 s.h.

**ELECTIVES**

Students must complete an additional 2-5 s.h. of elective course work from the following lists of approved aging-related courses. Practicum and/or research courses offered by other academic departments may be accepted for elective credit if the content or focus is aging-specific. Students who wish to apply course work from other departments should consult the Aging Studies Program coordinator.

**Psychological Aspects of Aging**

025:139 Music Therapy Techniques: Adult Clients 3 s.h.
113:147 Special Topics in Anthropology (cross-cultural perspectives on death, dying, bereavement) 2-3 s.h.
153:030/096:030 Human Development and Behavior 3 s.h.
153:150/031:050 Psychology of Aging 3 s.h.
153:193/032:117 Death, Dying, and Tradition 2-3 s.h.

**Biological/Health Aspects of Aging**

003:530 Seminar: Communication Disorders and Aging 2 s.h.
028:036 Physical Activity Through the Life Span 3 s.h.
153:133/028:133 Nutrition Through the Life Span 3 s.h.
153:145/112:145 Introduction to Geriatric Dentistry 2 s.h.
153:146/169:146 Health Promotion for Older Adults 3 s.h.
153:160 Biology of Aging 3 s.h.
153:165/003:165 Communication Disorders and Aging 2 s.h.
153:166/028:166 Exercise for Special Populations 1 s.h.
153:410/096:410 Nursing Research of Biological Phenomena and Interventions for the Elderly 3 s.h.
153:420/096:420 Geriatric Mental Health Research 3 s.h.
153:430/096:430 Nursing Research in Sociocultural Phenomena and Interventions for the Elderly 3 s.h.

**Social and Cultural Aspects of Aging**

032:268/050:167 Readings in Biomedical Ethics arr.
034:269 Seminar: Selected Topics in Family Sociology 3 s.h.
153:134/034:134 Aging in Comparative Perspective 3 s.h.
153:153/042:153 Programs and Services for Aging Adults 3 s.h.
153:163/032:163 Introduction to Biomedical Ethics 2-3 s.h.
153:168/169:168 Aging and Leisure 3 s.h.
153:185/042:185 Social Policy and the Elderly 3 s.h.
153:211/042:211 Individual and Family Development: Life Span 3 s.h.
153:219/042:219 Aging and the Family 2-3 s.h.

**Minor**

Undergraduate students in the Colleges of Liberal Arts and Sciences, Education, Engineering, Nursing, or the Tippie College of Business may complete a minor in aging studies by taking 15 s.h. in courses outside their major. The courses must be approved by the Aging Studies Program, and the minor must be approved by the student’s college or major department.

Students are required to complete an introductory core course (153:108) and one course in each of three focus areas: psychological aspects of aging, biological/health aspects of aging, and social and cultural aspects of aging. At least 12 of the 15 s.h. must be taken in advanced courses (numbered 100 or above) at The University of Iowa. Students must have a g.p.a. of at least 2.00 in all work in aging studies.

**Interdepartmental Studies B.A. Option**

Students in the College of Liberal Arts and Sciences who would like to design an individualized program in aging studies leading to a Bachelor of Arts must apply and be accepted to the Interdepartmental Studies Program. Entry to the program requires approval of a plan of study that includes 36 s.h. of upper-level course work. Students enrolled in the program also may meet the requirements for a certificate or minor in aging studies.
Courses

153:020 First-Year Seminar 1-2 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Prerequisite: first- or second-semester standing.

153:030 Human Development and Behavior 3 s.h.
Developmental stages of the human organism from conception through senescence; physiological, intellectual, emotional, social factors. Prerequisite: 031:001. Same as 096:030.

153:108 Basic Aspects of Aging 3 s.h.

153:110 Growing Old in a New Age 3 s.h.
Process of aging, including physiological, psychological, social aspects; myths of aging; impact of elderly on global demographics; ethical dilemmas of an aging society.

153:112 Gerontology: Multidisciplinary Perspectives 3 s.h.
Major theoretical approaches and current research in biology, health, psychology, sociology, and social policy as applied to study of aging.

153:119 Writing for Interdisciplinary Audiences 3 s.h.

153:124 Independent Study in Gerontology arr.
Individual projects and/or research. Prerequisite: consent of instructor.

153:130 Aging Studies Colloquium—Undergraduate 1 s.h.
Research topics and procedures in gerontology and geriatrics; ongoing faculty research. Prerequisite: Aging Studies enrollment.

153:133 Nutrition through the Life Span 3 s.h.
How body processes and nutritional needs change with age and physiological state; effects of food-drug-medication interactions, anorexia, bulimia, and adolescent pregnancy; emphasis on food and health habits that minimize nutrition-related problems. Prerequisite: 028:038. Same as 028:133.

153:134 Aging in Comparative Perspective 3 s.h.
Sociological foundations of world variation in aging; relationships between societies' political and economic institutions and their treatment of the aging process. Prerequisites: 034:001 or 034:020 or consent of instructor. Same as 034:134.

153:144 Medicare and Medicaid Policy 3 s.h.
Health policies most pertinent to Americans over the age of 65. Same as 174:144.

153:145 Introduction to Geriatric Dentistry 2 s.h.
Biological, psychological, social aspects of aging; normal aging, disease processes, pathological changes that affect treatment, patient management. Prerequisite: completion of dental hygiene program or D.D.S. enrollment. Same as 112:145.

153:146 Health Promotion for Older Adults 3 s.h.
Problems, strategic efforts toward long-term goal of health promotion; disease prevention; slowing decline of chronic conditions to allow independent, rewarding lives. Same as 096:146, 169:146.

153:147 End of Life Care for Adults and Families 2-4 s.h.
End-of-life issues in care of adults, older adults, and their families. Same as 046:146, 050:147, 096:147.

153:148 Personal Training Management 3 s.h.
Same as 169:148.

153:150 Psychology of Aging 3 s.h.
The later years of human life viewed from perspectives of developmental psychology, biology, sociology. Prerequisite: 031:001 or equivalent. Same as 031:050.

153:153 Programs and Services for Aging Adults 3 s.h.
Same as 042:153.

153:160 Biology of Aging 3 s.h.
Biogerontology; definition of aging and senescence, biological theories of aging, demographics, model systems foraging, premature aging syndromes, aging of organ systems in humans. Prerequisite: 153:108.

153:163 Introduction to Biomedical Ethics 2-3 s.h.
Ethical dimensions of modern life sciences; emphasis on problems of method. Same as 032:163.

153:165 Communication Disorders and Aging 2 s.h.
Introduction to speech, language, and hearing processes and disorders among older adults; survey of characteristics of communication and communication breakdown, remediation, and strategies for improving communication with older adults with communication disorders; primarily for nonmajors and service providers other than speech-language pathologists and audiologists. Offered summer sessions of odd years. Same as 063:165.

153:166 Exercise for Special Populations 1 s.h.
Development, implementation, instruction of exercise programs for special populations. Prerequisite: 028:138 or consent of instructor. Same as 028:166.

153:168 Aging and Leisure 3 s.h.
Status of the well elderly in relation to issues of retirement, use of free time, and factors supporting leisure activity; leisure services in long-term care. Same as 169:168.

153:185 Social Policy and the Elderly 3 s.h.
Public social policies, its effect on well-being of elderly, including women and minorities; U.S. and other nations' policies. Prerequisites: 042:143 and an introductory course on aging (042:108), or consent of instructor, and junior or higher standing. Same as 042:185.

153:186 Death and Dying: Issues Across the Life Span 3 s.h.
Introduction to death and dying, historical, cultural, societal, and personal perspectives. Prerequisite: admission to social work or aging studies, or consent of instructor. Same as 042:186.

153:190 Field Work in Gerontology arr.
Opportunities for students in various disciplines to relate their areas of study to elderly and aging, interdisciplinary, approaches to meeting needs of elderly. Prerequisite: consent of instructor. Same as 042:190.

153:193 Death, Dying, and Tradition 2-3 s.h.
Role of religion among persons suffering from life-changing and life-threatening illness. Same as 032:117.

153:195 Introduction to Nursing Homes 3 s.h.
Overview of nursing home care and care of residents; ethics of nursing home care. Prerequisite: 153:108, or consent of instructor; and junior or higher standing. Same as 042:195.

153:211 Individual and Family Development: Life Span 3 s.h.
Infancy through senescence; families from their beginnings through their later years; theoretical, methodological issues. Prerequisite: 153:108. Same as 042:211.

153:219 Aging and the Family 2-3 s.h.
Research related to aging and the family; intergenerational relations, marital status, diversity of older families, caregiving, elder abuse, policy issues. Same as 042:219.
153:230 Aging Studies Colloquium 1 s.h.
Research topics in gerontology, geriatrics. Repeatable.

153:261 Epidemiology of Aging 1-2 s.h.
Epidemiologic methods for assessing and interpreting the health status of older persons; applications for research studies and public health programs. Offered fall semesters. Prerequisite: 173:140. Same as 173:261.

153:410 Nursing Research of Biological Phenomena and Interventions for the Elderly 3 s.h.
Analysis, evaluation of research on elderly health, aging process; emphasis on methodological issues, instrumentation appropriate for study of biological phenomena. Prerequisite: Ph.D. enrollment. Same as 096:410.

153:420 Geriatric Mental Health Research 3 s.h.
Emphasis on program evaluation, geriatric mental health services research, methodological issues. Prerequisite: Ph.D. enrollment. Same as 096:420.

153:430 Nursing Research in Sociocultural Phenomena and Interventions for the Elderly 3 s.h.
Sociocultural issues for aging clients, corresponding nursing interventions; theoretical orientations to dynamics of aging, transitions and role changes, social/environmental issues. Prerequisite: Ph.D. enrollment. Same as 096:430.
The American Indian and Native Studies Program (AINSP) is an interdisciplinary program that focuses on the histories, cultures, languages, literatures, and contemporary legal and political issues of Native Americans of the United States and other indigenous peoples of the Americas.

By taking AINSP courses, students begin to understand historical and contemporary social issues among indigenous peoples of the Americas. They acquire expertise for jobs involving cross-cultural work through experience with ethnic, social, and political diversity. They also gain a background for more specialized or advanced work in a variety of social science disciplines, including anthropology, psychology, geography, economics, education, history, and political science.

A certificate in AINSP provides preparation for professional training in museum work, health care, business, and law.

**Undergraduate Programs**

Undergraduate students may earn a certificate or a minor in American Indian and native studies. All students plan their programs in close cooperation with AINSP faculty advisers.

**Certificate**

Students pursuing the undergraduate Certificate in American Indian and Native Studies must earn at least 20 s.h. in courses chosen from the list of approved AINSP courses, with a g.p.a. of at least 2.00. This course work must include the following.

149:049 Introduction to American Indian and Native Studies  3 s.h.
149:101 American Indian and Native Studies Seminar (taken two semesters)  2 s.h.
149:102 Introduction to American Indian History and Policy  3 s.h.
Additional course work, including courses selected from the list of approved AINSP courses [see “Associated Courses”]  12 s.h.

Courses applied toward the AINSP certificate also may be used to complete the General Education Program or the requirements for a major or a minor. However, students may not use more than 6 s.h. of course work from their major to satisfy the AINSP undergraduate certificate. The certificate is awarded only upon completion of a bachelor’s degree. Holders of Iowa baccalaureate degrees may return to complete the requirements for a certificate. Students may not earn both a certificate and a minor in American Indian and native studies.

Students are encouraged to register their intent to pursue the AINSP certificate with the Division of Interdisciplinary Programs. In order to receive the certificate, students must contact the division’s office when they submit their Application for Degree, before graduation.

**Minor**

To earn a minor in American Indian and native studies, students must complete 15 s.h. in courses chosen from the list of approved AINSP courses, with a g.p.a. of at least 2.00. At least 12 s.h. must be chosen from University of Iowa upper-level courses. Course work must include the following.

149:049 Introduction to American Indian and Native Studies  3 s.h.
149:101 American Indian and Native Studies Seminar  3 s.h.
149:102 Introduction to American Indian History and Policy  3 s.h.
Additional courses, including those selected from the list of approved AINSP courses [see “Associated Courses”]  11 s.h.
Students may not apply more than 6 s.h. of course work used to complete a major to complete the AINSP minor.

Cultural Experience

It is highly recommended that students have an in-depth American Indian cultural experience, usually through study or volunteer work, before they complete their undergraduate requirements. Consult AINSP faculty advisers about available options.

Graduate Program

Graduate students must apply to the academic coordinator to be admitted to the AINSP graduate certificate program. Students who earned an undergraduate certificate in the program may not receive a graduate certificate.

Students pursuing the graduate certificate must earn at least 20 s.h. in courses numbered 100 or above chosen from the list of approved AINSP courses. They also must maintain a p.g.p.a. of at least 3.00 in AINSP courses counted toward the certificate. The courses must include the following.

149:101 American Indian and Native Studies Seminar (taken two semesters) 2 s.h.
149:102 Introduction to American Indian History and Policy 3 s.h.
149:299 Independent Study Project 2 s.h.
Additional courses chosen from the list of approved AINSP courses (see "Associated Courses") 10 s.h.

Students may not use more than 6 s.h. of course work from their major field of study to satisfy the AINSP graduate certificate.

Associated Courses

In addition to those listed below, courses concerned in part with American Indians or with issues relevant to American Indians may be used as electives to satisfy requirements for the undergraduate certificate, the minor, and the graduate certificate, subject to AINSP faculty approval.

For course descriptions, see the appropriate department sections of the Catalog.

ANTHROPOLOGY

113:020 Introduction to Midwestern Prehistory 3 s.h.
113:117 The Maya 3 s.h.
113:163 Archaeology of Mesoamerica 3 s.h.
113:166 The Aztecs, Their Predecessors, and Their Contemporaries 3 s.h.
113:167 North American Archaeology 3 s.h.

ART AND ART HISTORY

01H:002 Arts of Africa 3 s.h.
01H:104 American Indian Art 3 s.h.
01H:105 Art of Pre-Columbian America 3 s.h.
01H:199 Topics in Art History (when content is appropriate) 3 s.h.

EDUCATION

07B:123 History of Ethnic and Minority Education 3 s.h.

ENGLISH

008:153 Native American Literature 3 s.h.
008:185 Native American Autobiography 3 s.h.

HISTORY

16A:131 The Frontier in American History to 1840 3 s.h.

Courses

149:005 Literatures of Native American Peoples 3 s.h.
Genres of Native American literature, including oral literature; focus on written literature (fiction, essays, poetry, drama); overview. GE: cultural diversity. Prerequisite: 08G:001. Same as 08G:005.

149:020 Introduction to Midwestern Prehistory 3 s.h.
Same as 113:020.

149:049 Introduction to American Indian and Native Studies 3 s.h.
Themes and methodologies in the study of American Indians and other indigenous peoples; approaches from anthropology, history, law, literature, other disciplines. Offered fall semesters. GE: cultural diversity.

149:060 Introduction to Native American Religions 3 s.h.
GE: cultural diversity. Same as 032:060.

149:066 Landscapes of the Sacred: Native American Literature and Art 3 s.h.
Same as 032:064.

149:070 Indians and Allies 3 s.h.
Contemporary social and cultural challenges facing American Indian individuals, families, and nations; addiction, mental illness, domestic violence, child abuse, incarceration, HIV/AIDS.

149:076 American Indian Environmentalism 3 s.h.
Same as 032:076.

149:080 American Indian Activism 3 s.h.
Socio-religio-political movements among indigenous people of North America, 18th century to present. Same as 032:082.

149:082 American Indian Women: Myth, Ritual, and Sacred Power 3 s.h.
Participation of women and girls in Native Religious traditions; obstacles to knowing and understanding Native women’s religious roles and experiences. Same as 032:088.

The University of Iowa Center for the Book represents a community of faculty, staff, students, and local book specialists with interests in all facets of book production, distribution, and use. Some members of the center actively research the history and circulation of the book, examining books' role in cultural and historical processes. They also look at how changes in book production affect the way books are viewed as artifacts. Specialists in book arts and technologies study the history and technique of book crafts, including letterpress and offset printing, typography, calligraphy, papermaking, and bookbinding. Still other specialists engage in the conservation or production of books, including artists' books and literary fine press publications.

The center offers classes; sponsors lectures, seminars, and workshops; and encourages the exchange of ideas among individuals with interests in the book. Associated faculty, staff, and graduate students in the Schools of Art and Art History and Library and Information Science; the Departments of History, English, and Computer Science; University of Iowa Libraries; the Iowa Writers' Workshop; and other areas offer a wide range of perspectives on the book as an aesthetic, cultural, and historical artifact. This interdisciplinary membership and the center's many facilities combine to provide an exceptional environment for studying the history of the book, its evolution, and its future.

Undergraduate students are invited to add dimension to their majors in English, art, journalism, history, and other disciplines by taking Center for the Book courses in book crafts and book studies. Undergraduates also may include an emphasis on book arts or on cultural and historical aspects of the book in the interdepartmental studies major.

Certificate Program

The center offers a graduate Certificate in Book Studies/Book Arts and Technologies through the Graduate College.

The program's principal objectives are:

- to place the interdisciplinary study of book history, arts, and technologies in academic and aesthetic contexts;
- to provide a structured program in art, English, history, library and information science, and other departments for graduate students who are seriously interested in book studies; and,
- to give nondegree, graduate-level students who wish to study the book a framework for their study.

Students have two options in pursuing the certificate. Graduate students enrolled in a degree program at Iowa may work concurrently toward the certificate and an M.A., M.F.A., or Ph.D. Students who wish to pursue the certificate but not a graduate degree may do so with nondegree status in the Graduate College.

Requirements

The certificate requires 24 s.h. of course work. At least 6 s.h. must be taken from the academic course list and 6 s.h. from the arts and technologies course list. Required course work also includes a final project—a substantial work supervised by a committee chosen by the student (see the center's publication Final Project Guidelines). For more information, contact the Center for the Book or visit its web site.

Admission

Admission requires active standing in the Graduate College. Applicants submit a statement of purpose and evidence of scholarly or creative
work to the center. For more information about admission, contact the Center for the Book.

Financial Support

Students may secure support from regular University sources (contact the Office of Student Financial Aid) or from outside funding agencies. Working assistships are available at the center's professional production workshops. Internships and part-time work are available to qualified student and nonstudent professionals, especially in the areas of bookbinding, papermaking, and letterpress printing.

Associated Course

22C:197 Readings in Computer Science 3 s.h.

Courses

108:110 Papermaking 3 s.h. History and fundamental techniques of Western and Eastern hand papermaking; projects in traditional sheet forming, basic paper chemistry, paper coloring. Offered fall semesters. Prerequisite: consent of instructor. Same as 01X:110.

108:111 Advanced Papermaking 3 s.h. Traditional Eastern and Western sheet forming techniques, history, aesthetics; emphasis on fiber selection and preparation. Offered spring semesters. Prerequisite: consent of instructor. Same as 01X:120.

108:130 Paperworks 3 s.h. Same as 01X:130.

108:135 Offset Productions Workshop 3 s.h. Same as 01L:135.

108:140 Calligraphy: Gothic Hands 3 s.h. The basic tool (broad-edged nib); disciplines and use of calligraphy, with the Fraktur hand as model; emphasis on proper methods of practice. Same as 01Z:140.

108:141 Calligraphy: Expressive Forms 3 s.h. Adaptation of historical Western-style letterforms to contemporary format; brush, broad-edged pen. Prerequisites: 108:140 or equivalent, and consent of instructor. Same as 01Z:141.

108:142 History of Western Letterforms 3 s.h. History of Western letterforms, with focus on tools, materials, techniques; the major hands, their place in history, their influence on modern times; creation of letterforms using appropriate tools; hands-on approach with emphasis on understanding rather than mastery. Same as 01Z:142.

108:143 Calligraphy: Foundational Hands 3 s.h. Fundamental calligraphic skills using Roman majuscule, Humanistic minuscule, Italic; basic layout and color theory incorporated into letter practice. Same as 01Z:143.

108:144 Calligraphy: Italic and Script Hands 3 s.h. Hands-on instruction in italic and pressure pen scripts; historical relationships, effects on modern letterforms. Same as 01Z:144.

108:146 Studies in Letter Arts 3 s.h. Special topics and advanced projects in calligraphy and letter arts. Prerequisite: 108:140 or 108:141 or 108:142 or 108:143 or consent of instructor. Same as 01Z:146.

108:150 Bookbinding I: Materials and Techniques 3 s.h. Hands-on introduction to materials and techniques commonly used in bookbinding. Same as 01Y:150.

108:151 Bookbinding II 3 s.h. Build on skills acquired in 108:150; projects to complete six bindings based on historical and contemporary models; sewing styles, board attachments, endband types, nonadhesive and case-bound varieties, varied materials and binding styles; their effects on structure, aesthetic considerations, further development of solid binding skills; historical development of particular binding practices. Prerequisite: 108:150 or consent of instructor. Same as 01Y:151.

108:152 Bookbinding III 3 s.h. Five bookbindings based on historical and contemporary models; differences in various binding practices, how these differences affect function, why the styles developed, experience choosing appropriate structures for particular uses; emphasis on fine tuning skills and techniques required for advanced binding practices; sewn endbands, rounding and backing, sewing on varied supports, board attachments, and covering methods. Prerequisites: 108:150 and 108:151, or consent of instructor. Same as 01Y:152.

108:153 Studies in Bookbinding 3 s.h. Topics related to hand bookbinding. Prerequisite: consent of instructor. Same as 01Y:153.

108:154 Artists’ Books 3 s.h. Nontraditional binding structures; emphasis on innovative techniques and how parts of the book function. Prerequisite: 01Y:150 or 108:150 or consent of instructor. Same as 01Y:154.

108:155 Historical Book Structures 3 s.h. Historical development of book structures examined through surviving examples, construction of historical models. Prerequisite: 01Y:150 or 108:150 or consent of instructor. Same as 01Y:150.

108:156 Boxes and Enclosures 3 s.h. Hands-on techniques for a variety of book enclosures; appropriateness, aesthetic issues concerning box design; Japanese wraparound case, drop-spine box, hinged and lidded boxes, slipcase; technical skill development. Prerequisite: 108:150 or consent of instructor. Same as 01Y:156.

108:157 Moveable/Sculptural Books 3 s.h. Varied forms for moveable and/or sculptural books; history, readings, hands-on model making. Same as 01Y:157.

108:158 Pop-up Book Structures 3 s.h. Hands-on exploration of varied aspects of paper engineering for bookmaking; historical and modern models studied and executed. Prerequisite: 108:150 or consent of instructor. Same as 01Y:158.

108:160 Introduction to Letterpress Printing 3 s.h. Mechanics of letterpress printing, basic elements of typography, design; an introduction to letterpress edition printing; hand setting and printing from metal type on Vandercook proof presses; printing text and illustration from photopolymer plates; historical aspects of printing, early development of printing technologies, evolution of letterpress printing through 20th century.

108:161 Handprinted Book: Design and Production 3 s.h. Exploration of problems in hand printing books—choice of manuscript, editing, design, typesetting, proofreading, printing and binding, histories of printing and of the book, emphasis on 20th-century book design and literature. Prerequisite: consent of instructor. Same as 008:187.

Certificate

The Certificate in Medieval Studies gives undergraduate students a way to link study in three or more disciplines into an organized investigation of a rich, varied historical period. Students can pursue the certificate as an elective interest or combine it with focused study in one of a number of areas—for instance, art and art history; cinema and comparative literature; classics; English; French and Italian; German; history; literature, science, and the arts; music; philosophy; religious studies; Spanish and Portuguese; theatre arts; or women's studies.

Courses applied toward the requirements of the certificate may be used to complete the College of Liberal Arts and Sciences General Education Program or requirements for a major or minor. However, students may not use more than 10 s.h. of course work used to complete a major, minor, or another certificate to satisfy requirements of the medieval studies certificate.

Holders of University of Iowa baccalaureate degrees may return to complete the requirements for a certificate. Up to 6 s.h. of transfer credit can be counted toward the certificate, with approval of the medieval studies advisory committee. Students should consult regularly with a medieval studies adviser in planning their course of study and while they work toward the certificate. Students are encouraged to declare the medieval studies certificate as the second field on their transcripts.

Requirements

Students must earn a minimum of 21 s.h. of credit in medieval studies course work from at least three departments and must demonstrate facility in a medieval language. All certificate students must take the following courses.

16E:110 Medieval Civilization (taken early in plan of study) 3 s.h.
008:101 Literature and Culture of the Middle Ages 3 s.h.

Course work in a medieval language (see "Language Requirement")
A history course [prefix 16E or 16W] from the list of approved courses 3 s.h.
A literary studies course from the list of approved courses 3 s.h.
A non-history, non-literary-studies course from the list of approved courses 3 s.h.

Students may need to take elective courses to meet the 21 s.h. requirement for the certificate, depending on how many semester hours they earn in satisfying the language requirement. Electives may be chosen from the list of associated courses.

LANGUAGE REQUIREMENT

Students must complete at least one course or course sequence in a medieval language. Those who intend to continue with graduate study in the Middle Ages are strongly encouraged to take the Latin sequence. Many language courses have prerequisites, some are offered irregularly, and some require special permission for undergraduate enrollment. Students should fulfill the language requirement early in their program of study. They may wish to consult with an adviser in the relevant language department for more information.

The following language courses are approved for the medieval studies certificate.

008:140 Elementary Old English 4 s.h.
013:243 Middle High German 3 s.h.
20L:011-20L:012 Second-Year Latin I-II 6 s.h.
035:250 Medieval Spanish Literature 3 s.h.

Students may substitute course work in another medieval language with the approval of the certificate advisory committee.

Students are encouraged to register their intent to pursue the Certificate in Medieval Studies with the Division of Interdisciplinary Programs. In order to receive the certificate, students must contact the division office when they submit their Application for Degree, before graduation.
## Associated Courses

The following courses are approved for the medieval studies certificate. Courses not on this list may be approved for satisfaction of certificate requirements. Students who wish to have a course approved should make a request to the Certificate in Medieval Studies coordinating committee. The coordinating committee revises the list of approved courses as necessary.

### Art and Art History
- **01H:040 Introduction to Medieval Art** 3 s.h.
- **01H:136 Early Medieval Art** 3 s.h.
- **01H:137 Romanesque and Gothic Art** 3 s.h.
- **01H:199 Topics in Art History (when topic is medieval)** 3 s.h.

### Center for the Book
- **108:181/008:130 Literature and the Book (when topic is medieval)** 3 s.h.
- **108:182/16E:120 The Book in the Middle Ages** 3 s.h.
- **108:183/16E:118/021:258 The Transition from Manuscript to Print** 3 s.h.

### Classics
- **20L:011 Second-Year Latin I** 3 s.h.
- **20L:012 Second-Year Latin II** 3 s.h.
- **20L:198 Medieval Latin** 3 s.h.

### English
- **008:060 Selected Works of the Middle Ages** 3 s.h.
- **008:101 Literature and Culture of the Middle Ages** 3 s.h.
- **008:140/103:132 Elementary Old English** 4 s.h.
- **008:141 Old English: Beowulf** 3 s.h.
- **008:142 Medieval Celtic Literature** 3 s.h.
- **008:144/049:181 Medieval Drama** 3 s.h.
- **008:146 Chaucer** 3 s.h.

### French
- **009:113 French Civilization** 3 s.h.

### German
- **13E:017 Medieval German Literature: Heroic and Erotic** 3 s.h.
- **013:243/103:252 Middle High German** 3 s.h.

### History
- **16E:051 Colloquium for History Majors (European) (when topic is medieval)** 3 s.h.
- **16E:110 Medieval Civilization** 3 s.h.
- **16E:111 Medieval Intellectual History** 3 s.h.

### Italian
- **018:119 Medieval Italian Literature** 3 s.h.
- **018:120 Medieval and Renaissance Italian Literature** 3 s.h.

### Music
- **025:144 History of Music I** 3 s.h.
- **025:145 Counterpoint Before 1600** 3 s.h.

### Philosophy
- **026:112 Medieval Philosophy** 3 s.h.
- **026:154 Augustine, Anselm, Abelard** 3 s.h.
- **026:155 Aquinas, Scotus, Ockham** 3 s.h.

### Religious Studies
- **032:025 Medieval Religion and Culture** 3 s.h.
- **032:080 Spirituality and Mysticism** 3 s.h.
- **032:119 Jewish Mysticism** 3 s.h.
- **032:132 Medieval and Reformation Religious Thought** 3 s.h.

### Spanish and Portuguese
- **035:160 Medieval Spanish Literature in Context** 3 s.h.
- **035:181 Topics in Spanish Literature (when content is medieval)** 3 s.h.

### Theatre Arts
- **049:181/008:144 Medieval Drama** 3 s.h.

### Courses

- **162:110 Medieval Civilization** 3 s.h.
  Same as 16E:110.
The College of Liberal Arts and Sciences has offered courses in museum studies continuously since 1910. Museum Studies Program students have become directors, curators, educators, and exhibit specialists in museums throughout the country. The Division of Interdisciplinary Programs provides administrative and program support for museum studies. Both graduate and undergraduate students may take courses offered by the Museum Studies Program; the Certificate in Museum Studies is offered for undergraduate students.

A major in one of the natural sciences (e.g., biological sciences or geology), anthropology, science education, art history, American studies, or history is recommended for students preparing for museum careers. Undergraduate students may add the museum studies certificate to any of these majors or use the interdepartmental studies major to design their own plan of study by coordinating course work relevant to their academic concentration areas and professional interests.

Courses offered by the Museum Studies Program provide an introduction to fundamental museological subjects, including background in the history, organization, function, and management of museums as well as experience in exhibition planning and design, collection management, and education outreach development.

Museum studies courses are of value not only to students intending to pursue careers in museums but also to those with related interests in the arts, sciences, or humanities. Museum studies is useful in many career areas, including archaeology, anthropology, history, American studies, communication studies, elementary and secondary education, historic preservation, library science, recreation and leisure, art history and studio art, and science education.

### Certificate

The certificate requires a minimum of 21 s.h. of credit. All students take 024:102 Introduction to Museology (3 s.h.), which provides a historical overview of museums’ development and function and introduces students to issues such as museum governance and financing, ethics and law, collection management, exhibition and educational programming, interpretation, and audience research. Ideally, this is the first course students take in the certificate program.

Students also select three courses (minimum of 9 s.h.), one from each of the following four categories, and two additional courses (minimum of 6 s.h.), from any of the four categories.

- **Museum administration and management**
- **History, theory, and culture**
- **Exhibition development and public education**
- **Collection management and care**

The Museum Studies Program web site lists courses that count toward the certificate. Students may request permission to use courses not on the program’s list, providing the content of the course and the student’s work in the course fits into one of the program’s defined areas.

After completing at least 15 s.h. of the foundation course work described above, students complete an internship (minimum of 3 s.h.). The academic coordinator works closely with students and affiliated faculty members to ensure that internships provide students with the instruction and experience they need.

Courses applied toward the museum studies certificate also may be used to complete the College of Liberal Arts and Sciences General Education Program or requirements for a major or minor. However, students may not use more than 6 s.h. of course work applied toward another major, certificate, or minor to complete the requirements of the Certificate in Museum Studies.

Students interested in the museum studies certificate are encouraged to meet with an adviser in the Division of Interdisciplinary Programs office. Those intending to complete a certificate should fill out the division’s form (available online and at the division office).
Museum Facilities

The University of Iowa has several excellent museum facilities. The Museum of Natural History, founded in 1858, is the oldest university museum west of the Mississippi River. It houses exhibits on North American and Iowa geology, biological sciences, and Native American cultures. Students can gain first-hand experience through supervised participation in its programs.

The University of Iowa Museum of Art houses significant collections of more than 9,000 objects and several outstanding collections, among them the Stanley Collection of African art, the Mauricio Lasansky print collection, and the Elliott Collection of pre-Columbian and 19th- and 20th-century art. The historic building that was Iowa’s last territorial and first state capitol from 1842 to 1857 has become the Old Capitol Museum. University of Iowa Hospitals and Clinics houses the Medical Museum, with artifacts and displays on the history of medicine.

Students also can learn from a number of smaller collections that are available on campus and in the Iowa City area.

Courses

024:102 Introduction to Museology 3 s.h.
Overview of museum history, function, philosophy, collection and curatorial practices, governance and funding issues, exhibition evaluation, audience studies; American cultural institutions. GE: humanities. Same as 075:112, 097:115, 113:103, 169:102.

024:104 Exhibition Planning and Design 3 s.h.
The process of developing exhibitions; creative problem solving, interpretative design, defining communication objectives, selecting objects and exhibit media, producing concept drawings, prototyping labels to produce a design brief. Prerequisite: 024:102 or consent of instructor.

024:108 The Image in America 3 s.h.
Same as 16A:108.

024:119 Writing for Interdisciplinary Audiences 3 s.h.

024:120 Collection Care and Management 3 s.h.
How a museum’s management policy relates to its administrative, legal, and ethical obligations to its collections; acquisitions, deaccessions, collection use, data standards, storage environment, health, safety, documentation. Same as 012:120.

024:147 Nonprofit Organizational Effectiveness I 3 s.h.
Operational and financial aspects of nonprofit management, including organization mission and governance; strategic planning necessary for effective management, including finance, budget, income generation, fund-raising, guest presenters. Offered via Iowa Communications Network. Same as 06:147, 025:176, 032:127, 042:157, 049:175, 096:168.

024:148 Nonprofit Organizational Effectiveness II 3 s.h.
Foundations of nonprofit institutions, including role, nature, history, tax treatment, political and legislative activities; role of director, officers; fiduciary duties and executive compensation, problems of external regulation, accreditation, ethics, funding, operating, legal issues. Offered via Iowa Communications Network. Same as 06:148, 025:177, 032:128, 042:158, 049:176, 096:169.

024:150 Directed Studies and Projects 3 s.h.
Advanced readings in historical development, educational philosophy, programs, operations of museums; individual projects coordinated with programs, exhibits, or collections of campus and area museums. Prerequisite: 024:102, 024:104, or 024:120.

024:161 Art, Law, and Ethics 3 s.h.
How law and ethics apply to individuals and institutions concerned with the visual arts; personal and professional ethics; communal, national, and international issues, 18th century to present; how creative production is embedded in a social, legal, and moral context; legal and moral questions that spring from visual arts activities; how law and ethics support and constrain the visual arts; group project. Same as 01H:182, 033:175, 091:192.

024:180 Museum Internship 3 s.h.
Working experience in functions, departments, programs of the sponsoring museum, relation to museum’s overall mission and museum field in general.

024:247 Nonprofit Organizational Effectiveness I 3 s.h.

024:248 Nonprofit Organizational Effectiveness II 3 s.h.
The Sexuality Studies Program is an interdisciplinary program that focuses on the history and construction of human sexualities and gender identities. It encompasses many areas of investigation, including anthropology, art, health care, law, literature, popular culture, psychology, sociology, and theatre, and offers courses in a number of departments. The program is multicultural and international in scope.

Students who complete the certificate program gain a better understanding of human sexuality and acquire valuable background knowledge applicable to a wide variety of humanities and social science fields and to careers in education, counseling, law, medicine, nursing, and other health professions.

Certificate

Students may formally declare their intention to complete the certificate at the CLAS Academic Programs & Services office and are encouraged to register their intent at the Division of Interdisciplinary Programs office. In order to receive the certificate, students must contact the division office when they submit their Application for Degree, before graduation.

Undergraduate students may earn the Certificate in Sexuality Studies by completing the following requirements. They plan their programs in close cooperation with sexuality studies advisers.

Students must earn 21 s.h. with a g.p.a. of at least 2.00 in courses chosen from the list of required and elective courses approved for the certificate.

Course work must include the following.

Both of these:
154:110 Introduction to Sexuality Studies 3 s.h.
154:180 Seminar in Sexuality Studies 3 s.h.

At least two of these:
154:060 Sexuality and Popular Culture in the Postwar U.S. 3 s.h.
154:120 Lesbian, Gay, Bisexual, and Transgender Identities 3 s.h.
154:130 Diverse Sexual Communities 3 s.h.
154:135 Performing America Queerly 3 s.h.
154:185 Sexualities in Hispanic Cultures 3 s.h.

The remaining 9 s.h. are earned in courses chosen from those offered by the Sexuality Studies Program or from the list of approved associated courses, which varies from year to year. For information, contact the Division of Interdisciplinary Programs.

In keeping with the interdisciplinary nature of sexuality studies, students are encouraged to choose these electives from different disciplines.

Courses applied toward the sexuality studies certificate also may be used to complete the College of Liberal Arts and Sciences General Education Program or to satisfy requirements of a major or minor.

Of the 21 s.h. required for the certificate, at least 9 s.h. must be earned at The University of Iowa. Transfer work is evaluated by the program coordinator.

The certificate is awarded upon completion of a bachelor's degree. Holders of Iowa baccalaureate degrees may return to complete the requirements for a certificate. Holders of baccalaureate degrees from other institutions who are not enrolled in a graduate or professional program at The University of Iowa may apply for admission to the College of Liberal Arts and Sciences and are awarded the certificate upon completion of the requirements.

Associated Courses

Other courses may be approved for the certificate.

AMERICAN STUDIES

045:060/008:050/154:060 Sexuality and Popular Culture in the Postwar U.S. 3 s.h.
045:155/049:115/154:135 Performing America Queerly 3 s.h.
045:157 Gender on Stage 3 s.h.
ART AND ART HISTORY
01H:128 Greek Vase Painting 3 s.h.
01H:199 Topics in Art History 3 s.h.

CINEMA AND COMPARATIVE LITERATURE
048:194/008:194/131:194 Introduction to Feminist Criticism 3 s.h.

COMMUNICATION STUDIES
036:075 Gender, Sexuality, and the Media 3 s.h.

EDUCATION
07C:112/042:112/096:112 Human Sexuality 3 s.h.

ENGLISH
08G:011 Literature and Sexualities 3 s.h.
008:050/045:060/154:060 Sexuality and Popular Culture in the Postwar U.S. 3 s.h.
008:095 Seminar in Interdisciplinary Studies 3 s.h.
008:179 Literature and Society (when content is appropriate) 3 s.h.
008:194 Introduction to Feminist Criticism 3 s.h.

FRENCH AND ITALIAN
009:148 Gender and Sexuality in French Cinema 3 s.h.

HEALTH AND SPORT STUDIES
028:078 Women, Sport, and Culture 3 s.h.

HISTORY
16A:154 Sexuality in the United States 3 s.h.
16A:174 Gender and Society in the U.S. 1940-Present 3 s.h.

LITERATURE, SCIENCE, AND THE ARTS
033:075 Cultural Diversity and Identity 3 s.h.

NURSING
096:112/042:112/07C:112 Human Sexuality 3 s.h.

RELIGIOUS STUDIES
032:071 Sexual Ethics 3 s.h.

SOCIAL WORK
042:112/07C:112/096:112 Human Sexuality 3 s.h.
042:199 Selected Aspects of Social Work and Social Welfare (when topic is social work practice with gays, lesbians, bisexuals) arr.

SOCIOLOGY
034:061 The American Family 3 s.h.
034:135/154:145 Sociology of Sexuality 3 s.h.

SPANISH AND PORTUGUESE
035:193 Sexualities in Hispanic Cultures 3 s.h.

THEATRE ARTS
049:115/045:155/154:135 Performing America Queerly 3 s.h.
049:118 American Women Playwrights: 19th and 20th Centuries 3 s.h.

Courses
154:029 First-Year Seminar 1-2 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Prerequisite: first- or second-semester standing.

154:060 Sexuality and Popular Culture in the Postwar U.S. 3 s.h.
Introduction to the study of postwar American popular culture from a sexuality studies perspective. Same as 008:050, 045:060.

154:069 Topics in Sexuality Studies 1-3 s.h.
Focus on a specific aspect of human sexuality; topics vary.

154:071 Sexual Ethics 3 s.h.
Same as 032:071.

154:095 Seminar in Interdisciplinary Studies 3-4 s.h.
Same as 008:095.

154:110 Introduction to Sexuality Studies 3 s.h.
Theoretical perspectives on human sexuality drawn from medicine, law, social sciences, the humanities; cultural meanings of heterosexual, lesbian, gay, bisexual, transgender identities.

154:119 Writing for Interdisciplinary Audiences 3 s.h.

154:120 Lesbian, Gay, Bisexual, and Transgender Identities 3 s.h.
Historical and contemporary experiences of sexual minorities; identity, community, culture, art, politics, representation, diversity, assimilation.

154:121 Gender and Sexuality in the Ancient World 3 s.h.
Approved for GE: foreign civilization and culture. Same as 20E:150, 131:152.

154:130 Diverse Sexual Communities 3 s.h.
Intersections of sexual identities with race, class, gender, age, religion, other personal identities associated with experiences of oppression, resistance.

154:135 Performing America Queerly 3 s.h.

154:145 Sociology of Sexuality 3 s.h.
Same as 034:135.
154:180 Seminar in Sexuality Studies  3 s.h.
Skill development in developing, presenting, discussing research on current topics in the field. Prerequisites: 154:110 and two additional 154-prefix courses, or consent of instructor.

154:185 Sexualities in Hispanic Cultures  3 s.h.
Historical, social, and theoretical concepts of sexuality in Spanish, Spanish-American, and U.S. Latino/a cultures; construction of gender and sexual identity. Prerequisite: 154:110 or consent of instructor. Same as 035:193.

154:199 Independent Study  1-3 s.h.
Directed readings, artistic or creative endeavor, research projects. Prerequisite: 154:110.
International Business

Coordinators: Patricia Mason-Browne (Liberal Arts and Sciences), Shari Piekarski (Business)

Undergraduate nondegree program: Certificate in International Business
Web site: http://www.biz.uiowa.edu/upo/ibc/

The Henry B. Tippie College of Business and the College of Liberal Arts and Sciences offer a Certificate in International Business. The program includes study of international business and economics, international relations and institutions, a foreign language, and the contemporary art, literature, culture, and/or politics of the related geographical area.

The certificate program is designed not only for undergraduate students who intend to pursue careers in international business but for any undergraduate interested in gaining a better understanding of the global economy and a broader awareness of the political, historical, and social environment in which international business operates. The range of courses in the program permits students to tailor areas of specialization suited to their individual interests and to complement majors in both liberal arts and sciences and in business.

When students complete the certificate requirements and graduate, the notation “Certificate in International Business” is added to their transcript. Direct questions to the Tippie College of Business Undergraduate Program Office or the CLAS Academic Programs & Services office.

Application

Undergraduate students pursuing a degree from The University of Iowa are eligible to work toward the Certificate in International Business. Students who already have earned a baccalaureate degree from The University of Iowa may return to complete or earn a certificate in international business if they are not enrolled in a graduate or professional program. Holders of baccalaureate degrees from other institutions who are not enrolled in a graduate or professional program may enroll at The University of Iowa to complete a Certificate in International Business. Contact the Office of Admissions.

Interested students must declare their intention to pursue the certificate with an international business certificate adviser and must submit a plan of study. Students admitted to the Tippie College of Business or advised at the college’s Undergraduate Program Office should consult the advising staff in that office. Students in the College of Liberal Arts and Sciences should consult an international business certificate adviser in the Academic Advising Center.

Requirements

The certificate requires 29 s.h. of course work plus satisfaction of the foreign language requirement (required credit varies according to language studied). Students must maintain a g.p.a. of at least 2.00 on all international business certificate course work. Courses used to satisfy the certificate may not be taken pass/nonpass. A course may not be used to satisfy more than one certificate requirement.

A minimum of 20 s.h. of certificate course work (other than language courses) must be completed at The University of Iowa or in approved study abroad programs. Students who want to use credit earned while studying abroad should consult an international business certificate adviser before leaving campus. University of Iowa Guided Independent Study (correspondence study) is accepted toward the certificate.

The certificate requires course work in international business, international relations and institutions, foreign language, and area studies, as follows.

INTERNATIONAL BUSINESS

These courses provide students with an essential understanding of economics, which is central to all business operation. They also help students develop knowledge of the functional areas of international business.

Both of these:
06E:001 Principles of Microeconomics 3-4 s.h.
06E:002 Principles of Macroeconomics 3-4 s.h.

Three of these (total of 9 s.h.):
06E:125 International Economics 3 s.h.
06E:129 Economic Growth and Development 3 s.h.
06E:164 Economies in Transition 3 s.h.
06E:173 Advanced International Economics 3 s.h.
06F:130 International Finance 3 s.h.
06J:146 International Business Environment 3 s.h.
06M:151 International Marketing Transactions 3 s.h.
091:282 International Business Norms and Regulation 3 s.h.
091:287 International Trade Law: Basic Principles 3 s.h.

INTERNATIONAL RELATIONS AND INSTITUTIONS

These courses familiarize students with comparative politics, social geography, foreign policy, and issues related to world population and the environment—topics relevant to decision making in the international business world.

Two of these (total of 6 s.h.):
16A:152 United States in World Affairs 3 s.h.
16W:138/152:138 History of International Health 3 s.h.
019:156 Comparative Communication Systems 3 s.h.
030:040 Introduction to the Politics of Industrial Democracies 3 s.h.
030:041 Introduction to the Politics of Russia and Eurasia 3 s.h.
030:042 Introduction to the Politics of Developing Areas 3 s.h.
030:060 Introduction to International Relations 3 s.h.
030:061 Introduction to American Foreign Policy 3 s.h.
030:142 European Union 3 s.h.
030:149 Problems in Comparative Politics 3 s.h.
030:150 Politics of Emerging Market Economies 3 s.h.
030:151 Political Leadership 3 s.h.
030:155 Social Movements and Collective Action 3 s.h.
030:156 Ethnic Conflict in the International Arena 3 s.h.
030:160 International Politics 3 s.h.
030:161 International Organization and World Order 3 s.h.
030:162 American Foreign Policies 3 s.h.
030:163 Chinese Foreign Policy 3 s.h.
030:164 International Systems: Continuity and Change 3 s.h.
030:165 International Conflict 3 s.h.
030:166 Global Political Communication 3 s.h.
030:167 Politics and the Multinational Enterprise 3 s.h.
030:168 Politics of Terrorism 3 s.h.
030:169 Problems of International Politics 3 s.h.

030:170 The Politics of International Economics 3 s.h.
030:173 Voluntary Organization and Politics in Comparative Perspective 3 s.h.
030:177 Globalization 3 s.h.
034:159 Families in Comparative Perspective 3 s.h.
036:042/042:042 Intercultural Communication 3 s.h.
044:010 The Contemporary Global System 4 s.h.
044:011 Population Geography 3 s.h.
044:015 Introduction to Political Geography 3 s.h.
044:030 The Global Economy 3 s.h.
044:035 World Cities 3 s.h.
044:044 International Development 3 s.h.
044:132 Geography of Contemporary Europe 3 s.h.
044:163 Geography of Newly Industrializing Countries 3 s.h.
044:172 Development Planning and Policy 3 s.h.
044:176 Social Consequences of Global Change 3 s.h.
044:194 Geographic Perspectives on Development 3 s.h.
091:193 Human Rights in the World Community: Problems of Law and Policy 3 s.h.
091:195 Introduction to Public International Law 3 s.h.
113:010 Anthropology and Contemporary World Problems 3 s.h.
113:134 Gender and Indian Diaspora 3 s.h.
113:137 Anthropology of Tourism 3 s.h.
113:143 Environment and Culture 3 s.h.
113:144 Culture and Consumption 3 s.h.
113:145 Economic Anthropology of the Third World 3 s.h.
113:151/034:151 Sociology of the Third World 3 s.h.
113:181/129:151 Race, Ethnicity, and International Relations 3 s.h.

FOREIGN LANGUAGE

This component enables students to develop an intermediate level of competence in a second language. Through language study, students not only gain insight into the culture of another region of the world, they also develop a deeper understanding of their own language and culture.

Students must complete an approved foreign language sequence. For questions about languages not listed below or about study abroad course work, see an international business certificate adviser.
Chinese
One of these sequences:
039:008-039:009 First-Year Chinese: First and Second Semesters 10 s.h.
039:100-039:101 Advanced First-Year Chinese: First and Second Semesters 10 s.h.
039:010-039:011 Second-Year Chinese: First and Second Semesters 10 s.h.

French
One of these sequences:
009:001-009:002 Elementary French I-II 8 s.h.
009:010 First-Year French Review 5 s.h.
All of these:
009:011-009:012 Intermediate French I-II 8 s.h.
A course for which 009:012 is prerequisite (may include Iowa Regents Program credit)

German
One of these:
013:011-013:012 Elementary German I-II (both courses) 8 s.h.
013:014 First-Year German Review 5 s.h.
One of these:
013:021-013:022 Intermediate German I-II (both courses) 8 s.h.
013:025 Intensive Intermediate German 6 s.h.
A course for which 013:022 or 013:025 is prerequisite

Hindi
039:123 First Year Hindi: First Semester 5 s.h.
039:124 First Year Hindi: Second Semester 5 s.h.
039:126 Second Year Hindi: First Semester 4 s.h.
039:127 Second Year Hindi: Second Semester 4 s.h.

Italian
One of these:
018:001-018:002 Elementary Italian I-II (both courses) 8 s.h.
018:103 Intensive Elementary Italian 6 s.h.
All of these:
018:011-018:012 Intermediate Italian I-II 8 s.h.
A course for which 018:012 is prerequisite

Japanese
One of these sequences:
39:010 & 39:012 First-Year Japanese: First and Second Semesters 10 s.h.

Portuguese
One of these:
038:100-038:101 Accelerated Elementary Portuguese and Accelerated Intermediate Portuguese (both courses) 0-10 s.h.
038:102 Portuguese for Spanish Speakers 3 s.h.
A course for which 038:101 or 038:102 is prerequisite

Russian
All of these:
041:001-041:002 First-Year Russian I-II 8 s.h.
041:003-041:004 Second-Year Russian I-II 8 s.h.
A course for which 041:004 is prerequisite

Spanish
One of these:
035:001-035:002 Elementary Spanish I-II (both courses) 8 s.h.
035:005 Elementary Spanish Review 5 s.h.
One of these:
035:011-035:012 Intermediate Spanish I-II (both courses) 8 s.h.
035:013 Accelerated Intermediate Spanish 6 s.h.
A course for which 035:012 is prerequisite

Swahili
All of these:

AREA STUDIES
These courses help students learn about the culture, contemporary history, art, literature, and politics of the geographic region in which their second language is spoken. They cover topics critical to understanding sociocultural influences on individuals with whom students share the world, and with whom they may conduct business.
Students complete 6 s.h. from one geographic area. The area should be appropriate to the language the student chooses for the language requirement.

**Asia**

Appropriate for these languages: Chinese, Hindi, or Japanese

Latin American Studies

Director: Daniel Balderston (Spanish and Portuguese)
Undergraduate nondegree programs: Certificate, Minor in Latin American Studies
Web site: http://intl-programs.uiowa.edu/academic/lasp/

The Latin American Studies Program (LASP) is interdisciplinary, focusing on the history, politics, social organization, economy, geography, music, religion, art, and literature of Central and South America, Mexico, and the Caribbean. Faculty members from across the College of Liberal Arts and Sciences participate in the Latin American Studies Program as affiliated faculty members. Other University of Iowa faculty members occasionally offer courses and participate in the program’s research, study, and interdisciplinary activities.

The Latin American Studies Program prepares students for graduate study or for Latin America-related careers in business, communications, government, bilingual/bicultural education, secondary teaching, community organizing, and international work.

In addition to its instructional activity, LASP sponsors a wide variety of activities, brings scholars of Latin America to campus, and fosters institutional linkages.

Students may earn an undergraduate Certificate in Latin American Studies or a minor. The certificate or minor may be earned in conjunction with the major in international studies. Or it may be combined with study in a number of other programs, including majors in anthropology, history, political science, and Spanish and Portuguese; minors in any of these disciplines; or the Certificate in International Business. All students plan their programs in close cooperation with Latin American studies advisers.

Programs

Certificate

Students pursuing the Certificate in Latin American studies must earn at least 24 s.h. with a g.p.a. of at least 2.00 in courses chosen from the list of LASP-approved courses (see “Approved LASP Courses”). These courses must include the following.

130:020 Contemporary Latin American News Colloquium 3 s.h.
130:176 Latin American Studies Seminar 3 s.h.

At least 6 s.h. in each of two or more of the following departments: anthropology, history, political science, Spanish and Portuguese 12 s.h.

Four semesters (or equivalent) of Spanish or Portuguese language course work

LASP-approved courses that apply toward the student’s major also may be applied toward the LASP certificate.

Courses applied toward the LASP certificate may be used to complete the General Education Program or the requirements for a major or a minor. The certificate is awarded only upon completion of a bachelor’s degree. Holders of Iowa baccalaureate degrees may return to complete the requirements for a certificate. A student may not be awarded both a minor and a certificate in Latin American studies.

Minor

To earn a minor in Latin American studies, students complete 15 s.h. in courses selected from the list of LASP-approved courses, with a g.p.a. of at least 2.00. To preserve the interdisciplinary character of the Latin American studies minor, students majoring in anthropology, history, political science, or Spanish and Portuguese may not count more than 6 s.h. from courses in their major department toward the minor. At least 12 of the 15 s.h. must be taken in advanced courses (100-level or above) at The University of Iowa. Students are strongly encouraged to take either or both of the following.

130:020 Contemporary Latin American News Colloquium 3 s.h.
130:176 Latin American Studies Seminar 3 s.h.

Study Abroad

It is highly recommended, though not required, that students have an in-depth Latin American cultural experience, usually through study abroad, before completing their undergraduate requirements.
In cooperation with the Office for Study Abroad, LASP faculty members facilitate student participation in programs in many different Latin American countries. Programs range from intensive language study to group programs with a special focus. University of Iowa-sponsored study abroad programs include summer programs with Universidad de Guanajuato in Mexico, Universidad de los Andes in Venezuela, and a health and nutrition program in Pontificia Universidad Católica Madre y Maestra in the Dominican Republic.

University of Iowa students may enroll in programs in Argentina, Brazil, Chile, Colombia, Costa Rica, Cuba, the Dominican Republic, Honduras, Mexico, and Uruguay. The University of Iowa cosponsors these programs through various consortiums.

Study abroad courses may be counted toward requirements for the certificate and the minor, subject to prior approval by the LASP director.

**Course Work**

In addition to the courses listed below, courses concerned in part with Latin America sometimes may be used as electives to satisfy the requirements for the certificate or the minor. Consult the LASP director. For course descriptions, see the appropriate department sections of the Catalog.

130:176 Latin American Studies Seminar 3 s.h.

Financial Aid

Students are encouraged to apply for a Stanley Undergraduate Scholarship for International Research/Fieldwork through University of Iowa International Programs. The scholarships are awarded to outstanding University of Iowa undergraduates who, in close consultation with a faculty member, propose well-conceived, small-scale research or fieldwork projects that require travel abroad. Students may conduct projects while participating in a study abroad program and may combine the scholarship with other awards and financial assistance. For information regarding other scholarships, contact LASP advisers, International Programs staff, and the LASP director.

Visitors, Activities

In addition to its instructional activity, LASP organizes a range of public programming activities each semester, including film series, photography and art exhibits, conferences, roundtable discussions, and lectures. Recent events have included an international conference on contemporary Cuba and speakers on cinema, indigenous movements, human rights, and art.
Philosophies and Ethics of Politics, Law, and Economics

Coordinator: Diane Jeske
Undergraduate nondegree program: Certificate in Philosophies and Ethics of Politics, Law, and Economics
Web site: http://www.uiowa.edu/~people

The College of Liberal Arts and Sciences offers an interdisciplinary program that leads to the Certificate in Philosophies and Ethics of Politics, Law, and Economics.

The Philosophies and Ethics of Politics, Law, and Economics (PEOPLE) Program is based on the assumption that societies institutionalize values; they guide conduct by regulating opportunities, prescribing behavior, and influencing beliefs and attitudes. The goal of the PEOPLE program is to help students understand and evaluate these complex relationships by examining them from a variety of perspectives.

The PEOPLE program may be especially attractive to students who are planning to attend law school after graduation. Students considering careers in planning, politics, or public administration also may find the PEOPLE program highly useful.

Undergraduates in economics, philosophy, political science, and sociology may discover that they will meet many of the PEOPLE program requirements in completing the requirements for their major or minor. However, a major or minor in one of these disciplines is not a requirement of the program.

Students who complete the PEOPLE program earn a certificate, and the notation “Certificate in the Philosophies and Ethics of Politics, Law, and Economics” appears on their transcripts. The certificate is awarded upon completion of a bachelor’s degree. Holders of Iowa baccalaureate degrees may return to complete the requirements for a certificate.

Certificate

Students must complete a 36 s.h. course of study with a g.p.a. of at least 2.00 to earn the PEOPLE certificate. The final 18 s.h. used to complete the certificate must be taken at The University of Iowa.

Because of the program’s multiple requirements, students are encouraged to begin the program as first-year students or sophomores; however, with careful planning, students who join the program as juniors can complete the requirements by their normal graduation date, especially if they already have taken several courses that satisfy PEOPLE requirements. Prospective certificate students should contact the PEOPLE program’s director.

The certificate program consists of two parts: the foundation, made up of six courses (18 s.h.), and the fields, also made up of six courses (18 s.h.). The foundation is the common element in the program. The five fields—economics, law, philosophy, political science, and sociology—provide opportunities for specialization.

Foundation

Students must take the following six courses. The first two (026:036 or 026:103, and 026:001 or 026:102) are best taken during the first or sophomore year.

One of these:
- 026:036 Principles of Reasoning 3 s.h.
- 026:103 Introduction to Symbolic Logic 3 s.h.

One of these:
- 026:001 Problems of Moral Reasoning 3 s.h.
- 026:102 Introduction to Ethics 3 s.h.

One of these:
- 026:132 Introduction to Political Philosophy 3 s.h.
- 026:135 Philosophy of Law 3 s.h.

One of these:
- 030:020 Introduction to Politics 3 s.h.
- 030:030 Introduction to Political Thought and Political Action 3 s.h.
- 030:050 Introduction to Political Behavior 3 s.h.
- 030:070 Introduction to Political Communication 3 s.h.

Courses

144:141 Law, Litigation, and Science  
arr.

144:142 Comparative Law  
2-3 s.h.
Comparative study of the world's main legal systems; emphasis on origins, development, characteristic features of civil law tradition, which includes most modern legal systems. Same as 091:224.

144:143 Jurisprudence  
2-3 s.h.
Selected legal philosophies, with emphasis on legal positivism and natural law, nature of jurisprudence, relationship between law and morality, authority, normativity, institutional nature of law, political obligation. Same as 091:288.
The Henry B. Tippie College of Business is composed of six academic departments: accounting, economics, finance, management and organizations, management sciences, and marketing.

The college's undergraduate and graduate programs are accredited by AACSB International—The Association to Advance Collegiate Schools of Business.

Research, executive development, and education activities are supported by the centers and institutes of the college: Hawkinson Institute of Business Finance, Institute for Economic Research, John Pappajohn Entrepreneurial Center, RSM McGladrey Institute of Accounting Education and Research, Institute for International Business, Business Communications Center, Small Business Development Center, and Emmett J. Vaughan Institute for Risk Management and Insurance.

**Undergraduate Program**

The Tippie College of Business offers the Bachelor of Business Administration (B.B.A.) in all six departments. Most B.B.A. students complete background studies either in the College of Liberal Arts and Sciences at The University of Iowa or at another institution and enter the Tippie College of Business as juniors. First-year students who have an Admission Index Score of at least 148 are eligible for the Early Admission Program. For more information on early admission, contact the college’s Undergraduate Program Office.

**Undergraduate Advising**

All business students are advised at the Undergraduate Program Office in the Tippie College of Business. Pre-business students are advised at the University’s Academic Advising Center and at the college’s Undergraduate Program Office. Assignment to the Undergraduate Program Office for advising
depends on a student’s grade-point average, completion of certain courses, and/or the number of semester hours completed. Walk-in hours and scheduled appointments are available at both offices. For more information on advising, contact the college’s Undergraduate Program Office or the UI Academic Advising Center.

Honor Code

Integrity and honesty are essential to success in all facets of life. The purpose of the Tippie College of Business Honor Code is to promote honorable and ethical behavior. For more information about the honor code, visit http://www.biz.uiowa.edu/upo/advising/honorcode.html or contact the Undergraduate Program Office.

Bachelor of Business Administration

The B.B.A. requires a minimum of 120 s.h. of credit, including at least 48 s.h. earned in business courses and at least 60 s.h. earned in nonbusiness courses.

Students must earn 30 s.h. in residence following admission to the Tippie College of Business. At least 24 s.h. in courses offered by the business college and at least two-thirds of the semester hours in the student’s major must be earned at The University of Iowa. Nonresident instruction includes course work at colleges and universities other than The University of Iowa.

To graduate, B.B.A. students must have a cumulative g.p.a. of at least 2.00 in all college course work attempted, all college course work attempted in business, all college course work attempted in the major, all college course work attempted at The University of Iowa, all business course work attempted at The University of Iowa, and all course work in the major attempted at The University of Iowa.

Common Requirements

B.B.A. candidates must satisfy the following minimum common requirements or approved equivalents. For approved equivalents, consult the college’s Undergraduate Program Office.

GENERAL EDUCATION REQUIREMENTS

Students may not count courses taken to fulfill General Education requirements toward other requirements for the B.B.A.

Rhetoric (010:001-010:002, or 010:003) 4-8 s.h.
Natural sciences 3 s.h.
Historical perspectives 3 s.h.
Global and cultural studies 3 s.h.
Humanities (including 08G:001 Interpretation of Literature) 6 s.h.
Social sciences (excluding 06E:001 and 06E:002) 3 s.h.

PREREQUISITES FOR ADMISSION TO THE COLLEGE

06A:001 Introduction to Financial Accounting 3 s.h.
06A:002 Managerial Accounting 3 s.h.
06E:001 Principles of Microeconomics 4 s.h.
06E:002 Principles of Macroeconomics 4 s.h.
22M:017 Calculus and Matrix Algebra for Business 4 s.h.
22S:008 Statistics for Business 4 s.h.

BUSINESS CORE

06E:071 Statistics for Strategy Problems 3 s.h.
06F:100 Introductory Financial Management 3 s.h.
06J:047 Introduction to Law 3 s.h.
06J:048 Introduction to Management 3 s.h.
06J:100 Foundations of Business (taken first semester after admission to Tippie College of Business) 3 s.h.
06K:070 Computer Analysis 3 s.h.
06K:100 Operations Management 3 s.h.
06M:100 Introduction to Marketing Strategy 3 s.h.

MAJOR STUDY AREA

All B.B.A. students must complete a major area of study. The college offers majors in accounting, economics, finance, management, management information systems, and marketing. The requirements for each major are established by the college’s individual departments.

Students With Associate of Arts Degrees

Students who receive an Associate of Arts (A.A.) from community colleges participating in the Iowa Community College/Regents Articulation Agreement are considered to have met the General Education requirements in rhetoric, natural sciences, social sciences, historical perspectives, and humanities, but not the global and cultural studies (formerly foreign civilization and culture) requirements. The program of study for which the student was awarded the A.A. must have included:

- a minimum of 60 s.h. (or 90 quarter hours) of credit acceptable toward graduation from The University of Iowa | mathematics courses
comparable to 22M:001 Basic Algebra I, 22M:002 Basic Algebra II, and 22M:003 Basic Geometry are not accepted toward graduation; completion of the agreed-upon group of courses at the community college; and a g.p.a. of at least 2.00.

Students who use the provisions of the articulation agreement are granted a maximum of 60 s.h. of transferable credit from two-year colleges toward the 120 s.h. required for a B.B.A. Credit earned for the A.A. beyond the 60 s.h. transferable maximum is used in computing the student's grade-point average, and it may be used to satisfy course requirements, but it does not count toward the B.B.A. Transfer credit for business courses taken during the first and second years is counted toward the B.B.A. only if such courses are usually offered as lower-division courses at The University of Iowa.

Transfer Courses

Students who have taken courses at another institution that are similar to those approved for the common business requirements at Iowa may request that these courses be evaluated for transfer credit. Students who transfer fewer than enough hours to meet a common business requirement may use only approved courses to complete the remainder of the requirement. Only junior- and senior-level courses taken at accredited four-year institutions may be used to satisfy common business course requirements numbered 100 and above. Students must complete a minimum of 24 s.h. and at least two-thirds of the course work in the major at The University of Iowa. Guided Independent Study may be counted toward all requirements for graduation, subject to approval by the student’s major department.

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan.

Note: The following checkpoints are designed for students who enter the University as first-year pre-business students. In order to stay on the plan, students must maintain the grade-point average required for guaranteed admission to the Tippie College of Business and must apply for admission to the college by the established deadline. The Four-Year Graduation Plan is not available to students who choose to pursue a double major (two majors in the college).

Students must take 06J:100 Foundations of Business during their first semester after admission to the Tippie College of Business.

Before the third semester begins: 06E:001 or 06E:002, 22M:017, and 22S:008, or equivalents; and at least one-quarter of the semester hours required for graduation.

Before the fifth semester begins: 06A:001, 06A:002, and 06E:001 or 06E:002 (whichever has not already been taken), or equivalents; all General Education requirements; and at least half of the semester hours required for graduation.

Before the seventh semester begins: business core requirements, approximately half of the course work in the major (varies by major), and three-quarters of the semester hours required for graduation.

Before the eighth semester begins: approximately three-quarters of course work in the major (varies by major).

During the eighth semester: all remaining course work in the major, and a sufficient number of semester hours to graduate.

B.B.A. With Honors

The Tippie College of Business Honors Program offers outstanding students the opportunity to undertake independent study and to work closely with faculty members and other honors students. Students choose one of three paths toward graduation with honors: complete the junior honors seminar, generally in the spring of the junior year, and complete the honors thesis, generally in fall semester of the following academic year; or complete the economic honors seminar, generally in fall of senior year, and complete the thesis, generally in the spring of the same academic year; or complete three Tippie College of Business courses designated by the student or by ISIS as honors courses (prerequisites do not count toward this requirement). Students must obtain permission from the codirectors of the college’s honors program in order to designate a course as honors.

Students must have a g.p.a. of at least 3.50 to enter the Tippie Honors Program. To earn the B.B.A. with honors, students must successfully complete all college and honors program requirements with a g.p.a. of at least 3.50 in all courses taken at Iowa, all business courses taken at Iowa, all courses taken (including transfer courses), and all business courses taken (including transfer courses).
Pre-business students interested in the honors program are encouraged to participate in the University Honors Program until they are admitted to the business college.

**Double Majors in Business**

Students may earn a double major by meeting the requirements of more than one major in the Tippie College of Business. They receive one B.B.A. with two or more majors. During early registration, students pursuing a double major in the college may register only for courses in their first major. The remedies of the Four-Year Graduation Plan are not available for a second major. Students may be required to obtain permission from the Undergraduate Program Office in order to pursue a double major.

**Combined Degree Programs**

Undergraduate students may pursue combined undergraduate degrees in the Tippie College of Business and the College of Liberal Arts and Sciences or the College of Engineering.

**Business and Liberal Arts and Sciences**

The Tippie College of Business and the College of Liberal Arts and Sciences offer a combined degree program in which students earn two University of Iowa bachelor's degrees: a Bachelor of Business Administration (B.B.A.) from the Tippie College of Business and a Bachelor of Arts (B.A.), Bachelor of Science (B.S.), Bachelor of Fine Arts (B.F.A.), or Bachelor of Music (B.M.) from the College of Liberal Arts and Sciences.

The combined business/liberal arts and sciences degree program requires a total of 150 s.h.; at least 30 s.h. must be earned in Tippie College of Business courses, and at least 30 s.h. must be earned in College of Liberal Arts and Sciences courses.

Students in the program must complete all General Education Program components and all other requirements for both majors.

**Business and Engineering**

The Tippie College of Business and the College of Engineering offer a combined degree program in which students earn two University of Iowa bachelor's degrees: a Bachelor of Business Administration (B.B.A.) from the Tippie College of Business and a Bachelor of Science (B.S.E.) from the College of Engineering.

The combined business/engineering degree program requires a total of 158 s.h.; at least 30 s.h. must be earned in Tippie College of Business courses, and at least 30 s.h. must be earned in College of Engineering courses. Both degrees must be granted at the end of the same academic session.

Students in the program must complete all General Education components and all other requirements for both majors. They must enroll in appropriate mathematics and engineering courses early in their course of study in order to complete the program in a timely way. Because courses in natural sciences, mathematics, humanities, and social sciences count toward the B.B.A. and the B.S.E., students may count a single course toward both degrees.

B.B.A./B.S.E. students usually meet the degree requirements of both colleges in about five years; time required depends on the student’s choice of major study areas.

Students may not use the second-grade option for courses in the combined program.

Students are assigned two advisers, one in the Tippie College of Business Undergraduate Program Office, the other in their College of Engineering major department.

Contact the Tippie Undergraduate Program Office or the College of Engineering Student Development Center for specific degree requirements.

**Minors**

**Nonbusiness Minors**

Undergraduate students in the Tippie College of Business may earn a minor in another University of Iowa college. For example, students interested in international business might choose a foreign language as a minor. For the minor requirements, students should consult with an adviser in the appropriate department. To have the minor recorded on their transcripts, students must complete the “minor” section on the B.B.A. Application for Degree before submitting the
form to the Office of the Registrar early in their final semester, or when they apply for the degree using the ISIS system.

**Business Minor**

Students pursuing a major in another University of Iowa college may earn a minor in business administration. The courses listed below, or their equivalents, satisfy all requirements for the minor. At least 15 s.h. of courses taken for the minor must be completed in residence at The University of Iowa, and at least 15 s.h. must be course work completed in the Tippie College of Business. An overall g.p.a. of at least 2.00 is required for all courses in the minor and for all courses in the minor taken at Iowa. Courses in the minor may not be taken pass/nonpass.

- 22M:017 Calculus and Matrix Algebra for Business (students may substitute 22M:016, 22M:021, 22M:025, or 22M:035) 4 s.h.
- 22S:008 Statistics for Business (students may substitute 07P:025, 07P:143, 22S:025, 22S:039, 22S:102, or 22S:120) 4 s.h.
- 06A:001 Introduction to Financial Accounting 3 s.h.
- 06A:002 Managerial Accounting 3 s.h.
- 06E:001 Principles of Microeconomics 4 s.h.
- 06E:002 Principles of Macroeconomics 4 s.h.
- *06F:100 Introductory Financial Management (engineering majors may substitute 056:054, actuarial science majors may substitute 06F:117) 3 s.h.
- 06F:047 Introduction to Law 3 s.h.
- 06F:048 Introduction to Management 3 s.h.
- 06K:070 Computer Analysis (students may substitute 22C:016, 22C:021, 22C:109, 059:006, 059:017, or 07W:111) 3 s.h.
- *06M:100 Introduction to Marketing Strategy 3 s.h.

*Must be taken in junior or senior year

Students who will have completed all requirements for the minor in business administration when they graduate should indicate a business minor on the Application for Degree before submitting the form to the registrar’s office early in their final semester, or when they apply for the degree using the ISIS system.

### Entrepreneurship Programs for Undergraduates

#### Entrepreneurship Certificate for Business Students

The Tippie College of Business and the John Pappajohn Entrepreneurial Center offer University of Iowa students the opportunity to earn a Certificate in Entrepreneurship while pursuing their undergraduate degrees. The Colleges of Engineering and Liberal Arts and Sciences and the UI health science colleges also collaborate in the certificate program.

The certificate program helps prepare students to start and lead their own companies and expands their understanding of how entrepreneurial firms operate. It encourages innovation and creativity and develops skill in recognizing opportunity—all necessary for entrepreneurs and successful business leaders.

The program was named the 2004 National Model Undergraduate Entrepreneurship Program by the United States Association for Small Business and Entrepreneurship.

Entrepreneurship students learn from a select team of faculty members and business leaders distinguished by their ability to teach, model, and inspire the entrepreneurial process. They gain understanding of the entrepreneurial approach to acquiring and managing resources; acquire team-building skills critical to both small and large companies; and develop sound business planning skills necessary for launching new ventures and products.

The program includes networking opportunities with successful entrepreneurs and other business leaders, and experiential learning opportunities.

Students may begin working toward the Certificate in Entrepreneurship in their sophomore year. Entrepreneurship courses (prefix 06T) are counted as semester hours earned in business on the degree evaluation.

Undergraduate students in the Tippie College of Business, the College of Liberal Arts and Sciences, and the UI health sciences colleges must declare their intention to pursue the certificate. Forms are available from the Pappajohn Entrepreneurial Center and the Undergraduate Program Office in the Tippie College of Business. The Certificate in Entrepreneurship is noted on the student’s permanent record when the undergraduate degree is added to the transcript.
REQUIREMENTS

The Certificate in Entrepreneurship requires a minimum of 18 s.h. in entrepreneurship-related course work. Students may apply 6 s.h. of transfer credit toward the certificate, with approval of the entrepreneurship program director. Required courses are as follows.

- 06T:120 Entrepreneurship and New Business Formation 3 s.h.
- 06T:133 Capital Acquisition and Cash Flow Management 3 s.h.
- 06T:134 Entrepreneurial Marketing 3 s.h.
- 06T:150 Managing the Growth Business 3 s.h.

Nonbusiness students also must take 06T:116 Basics of Small Business Marketing (1 s.h.) or 06M:100 Introduction to Marketing Strategy (3 s.h.); and 06T:113 Basics of Small Business Accounting (1 s.h.) or 06A:020 Accounting for Nonbusiness Students (3 s.h.) or another approved accounting course.

Students earn an additional 6 s.h. in elective courses chosen from the following list. Students who wish to use a course not on the list must consult with the Pappajohn Entrepreneurial Center staff.

- 06T:141 Technology Applications for Entrepreneurs 3 s.h.
- 06T:142 Innovation and Change 3 s.h.
- 06T:145 Legal Aspects of Entrepreneurship 3 s.h.
- 06T:146 Strategic Management of Technology and Innovation 3 s.h.
- 06T:190 Seminar in Entrepreneurship 3 s.h.
- 06T:192 Entrepreneurship: Business Consulting 3 s.h.
- 06T:194 Entrepreneurship: Advanced Business Planning 3 s.h.
- 06T:199 Academic Internship 3 s.h.
- 06J:156 Dynamics of Negotiations 3 s.h.

Entrepreneurship Certificate for Engineering Students

The College of Engineering and the Tippie College of Business offer a joint program leading to the Certificate in Technological Entrepreneurship. See College of Engineering in the Catalog or contact engineering’s Student Development Center for details.

Major in Performing Arts Entrepreneurship

The Division of Performing Arts (College of Liberal Arts and Sciences) collaborates with the Pappajohn Entrepreneurial Center to offer a B.A. with a major in Performing Arts Entrepreneurship. Contact the Division of Performing Arts for details.

Courses

For a complete listing of entrepreneurship courses offered by the Tippie College of Business, see “Courses”/“Entrepreneurship Courses” at the end of this section.

International Business

Coordinators: Patricia Mason-Browne (Liberal Arts and Sciences), Shari Piekarski (Business)

Undergraduate nondegree program: Certificate in International Business
Web site: http://www.biz.uiowa.edu/upo/ibc/

The Henry B. Tippie College of Business and the College of Liberal Arts and Sciences offer a Certificate in International Business. The program includes study of international business and economics, international relations and institutions, a foreign language, and the contemporary art, literature, culture, and/or politics of the related geographical area.

The certificate program is designed not only for undergraduate students who intend to pursue careers in international business but for any undergraduate interested in gaining a better understanding of the global economy and a broader awareness of the political, historical, and social environment in which international business operates. The range of courses in the program permits students to tailor areas of specialization suited to their individual interests and to complement majors in both liberal arts and sciences and in business.

When students complete the certificate requirements and graduate, the notation “Certificate in International Business” is added to their transcript. Direct questions to the Tippie College of Business Undergraduate Program Office or the CLAS Academic Programs & Services office.

Application

Undergraduate students pursuing a degree from The University of Iowa are eligible to work toward the Certificate in International Business. Students who already have earned a baccalaureate degree from The University of Iowa may return to complete or earn a certificate in international business if they are not enrolled in a graduate or professional program. Holders of baccalaureate degrees from other institutions who are not enrolled in a graduate or
professional program may enroll at The University of Iowa to complete a Certificate in International Business. Contact the Office of Admissions.

Interested students must declare their intention to pursue the certificate with an international business certificate adviser and must submit a plan of study. Students admitted to the Tippie College of Business or advised at the college’s Undergraduate Program Office should consult the advising staff in that office. Students in the College of Liberal Arts and Sciences should consult an international business certificate adviser in the Academic Advising Center.

Requirements

The certificate requires 29 s.h. of course work plus satisfaction of the foreign language requirement (required credit varies according to language studied). Students must maintain a g.p.a. of at least 2.00 on all international business certificate course work. Courses used to satisfy the certificate may not be taken pass/nonpass. A course may not be used to satisfy more than one certificate requirement.

A minimum of 20 s.h. of certificate course work (other than language courses) must be completed at The University of Iowa or in approved study abroad programs. Students who want to use credit earned while studying abroad should consult an international business certificate adviser before leaving campus. University of Iowa Guided Independent Study (correspondence study) is accepted toward the certificate.

The certificate requires course work in international business, international relations and institutions, foreign language, and area studies, as follows.

INTERNATIONAL BUSINESS

These courses provide students with an essential understanding of economics, which is central to all business operation. They also help students develop knowledge of the functional areas of international business.

Both of these:
06E:001 Principles of Microeconomics 3-4 s.h.
06E:002 Principles of Macroeconomics 3-4 s.h.

Three of these (total of 9 s.h.):
06E:125 International Economics 3 s.h.
06E:129 Economic Growth and Development 3 s.h.
06E:164 Economics in Transition 3 s.h.
06E:173 Advanced International Economics 3 s.h.
06F:130 International Finance 3 s.h.
06J:146 International Business Environment 3 s.h.
06M:151 International Marketing 3 s.h.
091:282 International Business Transactions 3 s.h.
091:287 International Trade Law: Basic Norms and Regulation 3 s.h.

INTERNATIONAL RELATIONS AND INSTITUTIONS

These courses familiarize students with comparative politics, social geography, foreign policy, and issues related to world population and the environment—topics relevant to decision making in the international business world.

Two of these (total of 6 s.h.):
16A:152 United States in World Affairs 3 s.h.
16W:138/152:138 History of International Health 3 s.h.
019:156 Comparative Communication Systems 3 s.h.
030:040 Introduction to the Politics of Industrial Democracies 3 s.h.
030:041 Introduction to the Politics of Russia and Eurasia 3 s.h.
030:042 Introduction to the Politics of Developing Areas 3 s.h.
030:060 Introduction to International Relations 3 s.h.
030:061 Introduction to American Foreign Policy 3 s.h.
030:142 European Union 3 s.h.
030:149 Problems in Comparative Politics 3 s.h.
030:150 Politics of Emerging Market Economies 3 s.h.
030:151 Political Leadership 3 s.h.
030:155 Social Movements and Collective Action 3 s.h.
030:156 Ethnic Conflict in the International Arena 3 s.h.
030:160 International Politics 3 s.h.
030:161 International Organization and World Order 3 s.h.
030:162 American Foreign Policies 3 s.h.
030:163 Chinese Foreign Policy 3 s.h.
030:164 International Systems: Continuity and Change 3 s.h.
030:165 International Conflict 3 s.h.
030:166 Global Political Communication 3 s.h.
030:167 Politics and the Multinational Enterprise 3 s.h.
030:168 Politics of Terrorism 3 s.h.
030:169 Problems of International Politics 3 s.h.
030:170 The Politics of International Economics 3 s.h.
030:173 Voluntary Organization and Politics in Comparative Perspective 3 s.h.
030:177 Globalization 3 s.h.
034:159 Families in Comparative Perspective 3 s.h.
036:042/042:042 Intercultural Communication 3 s.h.
044:010 The Contemporary Global System 4 s.h.
044:011 Population Geography 3 s.h.
044:015 Introduction to Political Geography 3 s.h.
044:030 The Global Economy 3 s.h.
044:035 World Cities 3 s.h.
044:094 International Development 3 s.h.
044:132 Geography of Contemporary Europe 3 s.h.
044:163 Geography of Newly Industrializing Countries 3 s.h.
044:172 Development Planning and Policy 3 s.h.
044:176 Social Consequences of Global Change 3 s.h.
044:194 Geographic Perspectives on Development 3 s.h.
091:193 Human Rights in the World Community: Problems of Law and Policy 3 s.h.
091:195 Introduction to Public International Law 3 s.h.
113:010 Anthropology and Contemporary World Problems 3 s.h.
113:134 Gender and Indian Diaspora 3 s.h.
113:137 Anthropology of Tourism 3 s.h.
113:143 Environment and Culture 3 s.h.
113:144 Culture and Consumption 3 s.h.
113:145 Economic Anthropology of the Third World 3 s.h.
113:151/034:151 Sociology of the Third World 3 s.h.
113:181/129:151 Race, Ethnicity, and International Relations 3 s.h.

**FOREIGN LANGUAGE**

This component enables students to develop an intermediate level of competence in a second language. Through language study, students not only gain insight into the culture of another region of the world, they also develop a deeper understanding of their own language and culture.

Students must complete an approved foreign language sequence. For questions about languages not listed below or about study abroad course work, see an international business certificate adviser.

**Chinese**

One of these sequences:
039:008-039:009 First-Year Chinese: First and Second Semesters 10 s.h.
039:100-039:101 Advanced First-Year Chinese: First and Second Semesters 10 s.h.
039:105-039:106 Second-Year Chinese: First and Second Semesters 10 s.h.

**French**

One of these sequences:
009:001-009:002 Elementary French I-II 8 s.h.
009:010 First-Year French Review 5 s.h.
All of these:
009:011-009:012 Intermediate French I-II 8 s.h.
A course for which 009:012 is prerequisite (may include Iowa Regents Program credit)

**German**

One of these:
013:011-013:012 Elementary German I-II (both courses) 8 s.h.
013:014 First-Year German Review 5 s.h.
All of these:
013:021-013:022 Intermediate German I-II (both courses) 8 s.h.
013:025 Intensive Intermediate German 6 s.h.
A course for which 013:022 or 013:025 is prerequisite

**Hindi**

039:123 First Year Hindi: First Semester 5 s.h.
039:124 First Year Hindi: Second Semester 5 s.h.
039:126 Second Year Hindi: First Semester 4 s.h.
039:127 Second Year Hindi: Second Semester 4 s.h.

**Italian**

One of these:
018:001-018:002 Elementary Italian I-II (both courses) 8 s.h.
018:103 Intensive Elementary Italian 6 s.h.
All of these:
018:011-018:012 Intermediate Italian I-II 8 s.h.
A course for which 018:012 is prerequisite
Japanese
One of these sequences:

Portuguese
One of these:
038:100 & 038:101 Accelerated Elementary Portuguese and Accelerated Intermediate Portuguese (both courses) 0-10 s.h.
038:102 Portuguese for Spanish Speakers 3 s.h.
A course for which 038:101 or 038:102 is prerequisite

Russian
All of these:
041:001-041:002 First-Year Russian I-II 8 s.h.
041:003-041:004 Second-Year Russian I-II 8 s.h.
A course for which 041:004 is prerequisite

Spanish
One of these:
035:001 & 035:002 Elementary Spanish I-II (both courses) 8 s.h.
035:005 Elementary Spanish Review 5 s.h.
One of these:
035:011-035:012 Intermediate Spanish I-II (both courses) 8 s.h.
035:013 Accelerated Intermediate Spanish 6 s.h.
A course for which 035:012 is prerequisite

Swahili
All of these:

AREA STUDIES
These courses help students learn about the culture, contemporary history, art, literature, and politics of the geographic region in which their second language is spoken. They cover topics critical to understanding sociocultural influences on individuals with whom students share the world, and with whom they may conduct business.

Students complete 6 s.h. from one geographic area. The area should be appropriate to the language the student chooses for the language requirement.

Asia
Appropriate for these languages: Chinese, Hindi, or Japanese
01H:016/039:016 Asian Art and Culture 3 s.h.
016:005/039:055 Civilizations of Asia: China 3 s.h.
016:006/039:056 Civilizations of Asia: Japan 3 s.h.
16W:182/039:132 Vietnam War in Historical Perspective 3 s.h.
16W:194/039:134 Imperialism and Modern India 3 s.h.
16W:196/039:154 Modern China 1600s to 1920s 3 s.h.
16W:198/039:196 China since 1927 3 s.h.
026:144/032:174 Indian Philosophy 3 s.h.
026:145/032:175 Buddhist Philosophy 3 s.h.
030:042 Introduction to Politics of Developing Areas 3 s.h.
030:143/039:178 Government and Politics of the Far East 3 s.h.
030:148 Government and Politics of China 3 s.h.
030:163 Chinese Foreign Policy 3 s.h.
032:004/039:064 Living Religions of the East 3 s.h.
032:006/039:006 Introduction to Buddhism 3 s.h.
032:008/039:018 Asian Humanities: India 3 s.h.
032:009/039:019 Asian Humanities: China 3 s.h.
032:177/039:136 Indian Literature 3 s.h.
034:154 Society and Politics in East Asia 3 s.h.
039:015 Introduction to Chinese Culture 3 s.h.
039:020/032:007 Asian Humanities: Japan 3 s.h.
039:057/016:007 Civilizations of Asia: South Asia 3 s.h.
039:122/113:129 Language/Politics of Culture in South Asia 3 s.h.
039:145/008:127/048:106 Topics in Asian Cinema 3 s.h.
039:158/048:158 East-West Literary Relations 3 s.h.
039:180 Modern Chinese Writers 3 s.h.
039:192/048:192 East Meets West: A Cross-Cultural Course 3 s.h.
039:197/131:197 Gender in Chinese Literature and Culture 3 s.h.
039:199 Asian Studies arr. 3 s.h.
39J:103 Language in Japanese Society and Culture 3 s.h.
39J:144 Major Authors in Modern Japanese Literature 3 s.h.
39J:155 Contemporary Japanese Culture 3 s.h.
113:107/131:107 Gendering India 3 s.h.

Europe
Appropriate for these languages: French, German, Italian, Portuguese, or Spanish
01H:157/009:130/033:130 Paris and the Art of Urban Life 3 s.h.
008:124/048:127 Topics in British and Irish Film 3 s.h.
009:030 Cultural Misunderstandings: France and U.S.A. 3 s.h.
009:110 Introduction to French Literature: Twentieth Century 3 s.h.
009:114 French Civilization 3 s.h.
009:116 Cinema, Society, and Culture in 20th-Century France 3 s.h.
009:120 French-Speaking Cultures 3 s.h.
009:168/048:168 Post-Colonial Literature in France 3 s.h.
013:101 Introduction to German Literature 3 s.h.
013:105 German Cultural History 3 s.h.
013:108 The German Media 3 s.h.
013:112 Twentieth-Century German Literature 3 s.h.
013:115 Contemporary German Civilization 3 s.h.
013:117 Current Issues 3 s.h.
13E:119 German Film 3 s.h.
16E:135 Twentieth-Century Europe: The Nazi Era 3 s.h.
16E:136 Twentieth-Century Europe: The Cold War and After 3 s.h.
16E:144 Modern France, 1870-Present 3 s.h.
16E:146 France from 1815 to the Present 3 s.h.
16E:148/131:182 Society and Gender in Europe 1750-Present 3 s.h.
16E:152 Modern Britain 1870-Present 3 s.h.
16E:156 Germany since 1914: Weimar, Hitler, and After 3 s.h.
16E:161 Politics and Culture in Twentieth-Century Europe 3 s.h.
018:105 Modern Italian Poetry and Drama 3 s.h.
018:110 Topics in Latin American History 3 s.h.
018:112 Introduction to Modern Latin America 3 s.h.
018:114 Latin America and the U.S.: Historical Perspective 3 s.h.
018:115 Latin American Revolution 3 s.h.
030:042 Introduction to the Politics of Developing Areas 3 s.h.
030:144 Latin American Government 3 s.h.
030:145 Latin American Political Parties 3 s.h.
035:020 Contemporary Spanish American Narrative 3 s.h.
035:036/130:020 Contemporary Latin American News Colloquium 3 s.h.
035:111 Readings in Spanish American Literature and Culture 3 s.h.
035:121 Introduction to Hispanic Linguistics 3 s.h.
035:123 Foundations in Sociolinguistics 3 s.h.
035:130 Spanish American Civilization 3 s.h.
035:131 Contemporary Spanish American Fiction 3 s.h.
035:132 Spanish American Poetry 3 s.h.
035:133 Spanish American Theater 3 s.h.
035:134 Spanish American Short Story 3 s.h.
035:135 Latinos in the United States 3 s.h.
035:136 Culture and Language in the Andes 3 s.h.
035:144/131:162 Latin American Women Writers 3 s.h.
035:145/048:145 Latin American Cinema 3 s.h.

Latin America
Appropriate for these languages: Portuguese or Spanish
16W:110 Topics in Latin American History 3 s.h.
16W:112 Introduction to Modern Latin America 3 s.h.
16W:114 Latin America and the U.S.: Historical Perspective 3 s.h.

**Undergraduate Academic Rules and Procedures**

**Recognition for Academic Achievement**

**Dean’s List**

Undergraduate students in the Tippie College of Business who have a g.p.a. of 3.50 or higher on 12 s.h. or more of graded work during a given semester and who have no semester hours of I (incomplete) or O (no grade reported) during the same semester are recognized by inclusion on the Dean’s List for that semester.
President’s List

University of Iowa undergraduate students who have a g.p.a. of 4.00 on 12 s.h. or more of graded work and who have no semester hours of I (incomplete) or O (no grade reported) for two consecutive semesters (excluding summer sessions) are recognized by inclusion on the President’s List.

Graduation Honors

High scholastic achievement is recognized upon graduation in two ways: graduation with distinction based on grades only, and graduation with honors in business administration based on both grades and the completion of special work as outlined by the college.

To be eligible for either form of recognition, a student must complete 60 s.h. in residence as an undergraduate at The University of Iowa; 45 s.h. of that must be completed before the final registration.

Graduation With Distinction

The Office of the Registrar certifies to the Tippie College of Business dean the names of students eligible to graduate with distinction. The college awards degrees “with highest distinction” to students in the highest 2 percent of the graduating class, “with high distinction” to students in the next highest 3 percent, and “with distinction” to the next highest 5 percent.

Ranking is based on students’ grade-point averages for all college-level study undertaken before their final registration.

Admission

Admission standards are set by the undergraduate program committee. The Tippie College of Business usually admits undergraduate students at the beginning of their junior year. To be eligible for admission to the college, students must complete 60 s.h., satisfy prerequisite requirements, and submit all application materials by the deadline (April 1 for summer or fall admission, November 1 for spring admission). Late applications are not accepted. Students who apply for fall admission must state whether they intend to enroll in summer course work that should be included in their admission review.

All applications must be submitted online at http://www.biz.uiowa.edu/upo/admissions/admissions.html. Transcripts showing course work that satisfies the Tippie College of Business admission requirements must be submitted to the Office of Admissions by the 10th day of classes.

Admission to the Tippie College of Business is guaranteed to students who have reached junior standing, who meet the course requirements for admission, and who have earned a g.p.a. of at least 2.75 on the six prerequisite courses, on all college course work, and on all course work at Iowa. In addition, students admitted to The University of Iowa fall 1998 or later must have earned no grade lower than C on any prerequisite course. Admission to the major in accounting is guaranteed only to applicants who have a University of Iowa and cumulative g.p.a. of at least 3.00, a g.p.a. of at least 2.75 and no grade below C on all prerequisites, and a B-minus average in 06A:001 and 06A:002.

As part of the application, all students are required to complete supplemental information questions and submit a résumé. The supplemental information responses serve as writing samples and give students an opportunity to specify conditions (e.g., illness) or obligations (e.g., an ill family member) or address any instances of academic dishonesty. Letters of recommendation are not accepted.

Students who meet the grade-point average requirement may be denied admission upon evidence of postsecondary academic misconduct or other violations of the Tippie College of Business Honor Code. All incidents of academic misconduct must be detailed in the supplemental information area of the application.

Admission is not guaranteed for students who have a g.p.a. below 2.75 for one or more of the categories (the six prerequisites, all college course work, and all course work at Iowa). Students still may apply to the college and their applications may be considered by the admissions committee.

In addition to grade-point averages in selected categories, a student’s pattern of grades over time and other academic factors relevant to predicting success in the college also may be considered for admission purposes. The committee focuses on recent semesters to determine whether a student’s record reflects an upward trend in challenging and relevant course work. For more information about application and admission, contact the Undergraduate Program Office.
Nondegree Admission

Students visiting from another institution who wish to enroll in undergraduate courses to earn credit that can be transferred to their home institution may be granted permission to enroll as undergraduate nondegree students. Nondegree students are not guaranteed access to specific courses; they must have the approval of the undergraduate program director in the Tippie College of Business and may earn no more than 9 s.h. on nondegree status.

Early Admission

Highly qualified first-year students may be admitted directly to the Tippie College of Business through the Tippie Early Admission Program (EAP).

Beginning fall 2005, entering first-year students must have an Admission Index Score of 148 to qualify for the Tippie Early Admission Program. The Admission Index Score is calculated by doubling the ACT composite score and adding high school class percentile rank. Students whose high schools do not rank their students may qualify for the EAP if they have an ACT composite score of at least 29 (SAT of at least 1250) and a high school g.p.a. of at least 3.75.

Students who fall short of this standard or who have high school unit deficiencies may still be considered for the Early Admission Program if they show promise based on their course work, scores, and demonstrated leadership ability. They are evaluated individually.

Students must maintain a g.p.a. of at least 3.33 to remain in the Early Admission Program. Those who fall below that standard have one semester to raise their g.p.a. to at least 3.33 and return to good standing in the program. During this semester, they retain all privileges of EAP.

Students who fail to return to good standing are dismissed from the program and lose all privileges associated with it. But they remain students in the Tippie College of Business.

For more information about the Early Admission Program, contact the Undergraduate Program Office.

Reentry

Students who have been absent from the University for 12 months or more and who left in good standing must apply to the University’s Office of Admissions for reentry. Good standing is defined as not on probation or dismissed for any reason.

Students who have been absent for less than 12 months are not required to apply for reentry. They should contact the Tippie College of Business Undergraduate Program Office for advising before they register.

Students who have been enrolled in another college or university since leaving The University of Iowa are required to submit official transcripts along with their application for reentry. Completed application materials must be received at least two weeks before classes open.

Students who have been dismissed from the Tippie College of Business due to unsatisfactory scholarship, academic misconduct either at The University of Iowa or at another institution, or a violation of the Tippie College of Business Honor Code must file a petition with the Tippie College of Business requesting reinstatement.

Credit and Grading

Credit by Examination

Students may earn up to 32 s.h. of credit by examination by taking selected tests from the College-Level Examination Program (CLEP) and the Advanced Placement program of the College Board. For information on the CLEP and APP examinations, contact the University’s Evaluation and Examination Service. The Tippie College of Business Undergraduate Program Office has information on scores, credit, and course duplicates for all Advanced Placement and CLEP tests accepted by the college.

Maximum Schedule

During early registration, students admitted to the Tippie College of Business may register for a maximum of 16 s.h. Course schedules that exceed 16 s.h. require approval from the Undergraduate Program Office. After early registration, students may register for a maximum of 18 s.h. Course schedules of more than 18 s.h. for a fall or spring semester, 9 s.h. for the 6-8 week summer session, or 3 s.h. for the 3-week session require approval from the Undergraduate Program Office.

During early registration, students pursuing a double major (two majors in the college) may register only for courses in their first major.

Adding and Dropping Courses

Students may drop courses, except College of Law courses, any time before the deadline published in the University’s academic deadline.
calendar. Deadlines are different for regular and off-cycle courses. See Academic Deadlines for The University of Iowa on the Office of the Registrar website (http://www.registrar.uiowa.edu).

Students must obtain approval from the college that offers the course in order to request permission to add or drop a course after these deadlines.

**Administrative Drops for Lack of Prerequisite(s)**

Instructors or departments have the option to drop a student from a course if the student has not satisfied the required prerequisites correctly printed on ISIS. These administrative drops must take place during the first eight calendar days of the semester; the first two calendar days of the winter session, the three-week summer session, or any nonsession course; or the first four days of the six- or eight-week summer session. Administrative drops are made without assignment of a W (withdrawn). Students who are dropped from courses are notified. Students should not assume that they have been dropped from a course because they do not have the prerequisites.

**Administrative Drops for Nonattendance**

Instructors have the option to drop a student who has missed the first two class periods of a course, unless the student has offered an acceptable reason for beginning the course late. Administrative drops must be processed by the second day after the second time the student fails to attend the class. These administrative drops are made without assignment of a W (withdrawn). Students should not assume that they have been dropped from a course because they have not attended it.

**Pass/Nonpass**

Up to 16 s.h. required for a B.B.A. may be taken pass/nonpass with the consent of an adviser and the instructor. Students may not count more than 8 s.h. of pass/nonpass credit in the last 60 s.h. of course work. Students must be in good academic standing to be eligible for the pass/nonpass option. A maximum of two pass/nonpass courses may be taken in one semester.

Courses taken pass/nonpass may not be used to satisfy general education, core, or major business requirements. Major business requirements include any course that fulfills a major course requirement or is offered by the major department. Pass/nonpass registration must be completed during the first 10 days of a fall or spring semester or the first one-and-one-half weeks of a summer session, and it requires the approval of the adviser and the instructor. For courses taken pass/nonpass, an earned grade of C- or higher is recorded as a P; an earned grade of D+ or lower is recorded as an N. Pass/nonpass credit is not included in g.p.a. calculations.

**Satisfactory/Fail**

Up to 16 s.h. required for the B.B.A. may be taken satisfactory/fail. Grades of F are calculated in the grade-point average.

**Second-Grade-Only Option**

The second-grade-only option is not available to junior and senior students in the Tippie College of Business, including those in combined degree programs. Students in the Early Admission Program are eligible to apply for the second-grade-only option before they reach junior standing; they must follow the second-grade-only grading rules established by the College of Liberal Arts and Sciences. See the CLAS Student Academic Handbook or visit the college’s website (http://www.clas.uiowa.edu).

**Guided Independent Study**

University of Iowa Guided Independent Study is counted as resident credit and may be applied to all requirements for graduation, subject to approval by the student’s major department. Guided Independent Study courses can be taken any semester, up to four courses at a time.

Pre-business students who have performed poorly in an on-campus course that also is offered through Guided Independent Study may retake the course through Guided Independent Study for the second-grade-only option. Likewise, pre-business students who have performed poorly in a Guided Independent Study course may retake the course on campus for the second-grade-only option.

Guided Independent Study course work is included in financial aid calculations for University scholarships.

**Probation and Dismissal**

Students are placed on academic probation when their grade-point average in any of the following categories falls below 2.00: all course work undertaken, all course work undertaken at The
University of Iowa, all business course work undertaken, all business course work undertaken at The University of Iowa, all course work taken to satisfy requirements for the major, and all course work taken at The University of Iowa to satisfy requirements for the major. In probation decisions, a 3 s.h. minimum is used to calculate the grade-point average for all course work taken to satisfy requirements for the major, and all course work taken at The University of Iowa to satisfy requirements for the major.

When all of the above grade-point averages equal or surpass 2.00, students are removed from probation. They are required to meet with an academic adviser and sign an academic probation contract. Students on academic probation who withdraw registration after the deadline for dropping courses may be dismissed.

Students may be dismissed from the college at any time for unsatisfactory scholarship. While some probationary period usually precedes a dismissal, students in good academic standing who complete a term with extremely unsatisfactory grades may be placed on academic probation or dismissed immediately. Students dropped from the college for poor scholarship usually only after one year following the end of the term in which they were dismissed.

**Reinstatement**

Students dismissed for unsatisfactory scholarship for the first time ordinarily are not permitted to register again for one year. Students dismissed for the second time may or may not be granted a second reinstatement. Requests for reinstatement must be made in writing and should be addressed to the associate dean in the Undergraduate Program Office. Arrangements for a reinstatement interview must be made with the Undergraduate Program Office. The interview must take place between March 1 and July 1 for reinstatement for fall semester, or between October 1 and December 1 for reinstatement for spring semester. Most reinstatements include a limit on the number of semester hours the student may take upon reinstatement. Late requests are deferred to the following semester.

Students who are permitted to register following dismissal are registered on academic probation and ordinarily are allowed two semesters to achieve good standing. Very poor academic work in the first semester of a reinstatement may result in dismissal at the close of that semester.

**Returning for Baccalaureate Degrees**

**Returning for a Second Business Major**

Grades who have a B.B.A. from The University of Iowa and who are not enrolled in a graduate or professional program may complete the requirements for another business major except accounting (see “Reentry” earlier in this section). Those interested in pursuing a degree in accounting must be admitted to the Graduate College to earn the Master of Accountancy degree; see Accounting.

Students who return to The University of Iowa to complete another business major must meet the requirements for that major; they need not meet the residence requirement. It is their responsibility to notify the Office of the Registrar upon completion of the requirements for the second major so that a notation can be placed on their permanent record.

Students who hold a B.B.A. or equivalent degree from another college or university may not complete a second business major at The University of Iowa. They may apply for admission to complete an additional degree (see “Returning for an Additional Bachelor’s Degree”).

**Returning for an Additional Bachelor’s Degree**

Persons who hold a bachelor’s degree from another college at The University of Iowa and who are not enrolled in a graduate or professional program may return for an additional bachelor’s degree from the Tippie College of Business. They must satisfy all requirements for undergraduate admission to the business college. Once admitted, they must satisfy all requirements for the B.B.A. in their chosen major.

For information about pursuing an additional bachelor’s degree in accounting, see “Accounting as a Second Degree” below.

**Students With Baccalaureates From Other Institutions**

Students with a bachelor’s degree from another college or university may apply for admission to The University of Iowa to earn an additional undergraduate degree from the Tippie College of Business. The requirements are the same as those listed under “Returning for an Additional Bachelor’s Degree” above.
For information about pursuing an additional bachelor's degree in accounting, see “Accounting as a Second Degree” below.

**Accounting as a Second Degree**

Graduates who have a non-business bachelor's degree, either from The University of Iowa or from another college or university, may in some cases be considered for admission to the Tippie College of Business to pursue a second undergraduate major in accounting. Individuals interested in earning a second degree with a major in accounting should contact the Department of Accounting to discuss the B.B.A. or Master of Accountancy (M.Ac.); see Accounting in the Catalog.

Students may not earn a second major in accounting if they already have a B.B.A. from The University of Iowa or any undergraduate business degree from another college or university.

**Graduate Programs**

**Interdepartmental Graduate Programs**

The Tippie College of Business offers two interdepartmental graduate programs: Master of Business Administration (M.B.A.) and Doctor of Philosophy (Ph.D.) in business administration. M.B.A. candidates may pursue a second graduate degree in another college.

The Master of Arts in business administration is a nonthesis degree awarded only to students who begin the Ph.D. program and decide not to continue. Incoming students may not elect to pursue the M.A.

**Doctor of Philosophy**

The Doctor of Philosophy in business administration is designed for students preparing for research positions in business and government or for research and teaching positions at academic institutions. The program is flexible, permitting students to choose an specialization area according to their interests. Course work and related experience enable students to achieve competence in economic theory, statistical methods, and behavioral science as well as expertise in a major and minor study area. Students also have opportunities to develop research and teaching skills.

The Ph.D. requires a minimum of 72 s.h., including accepted transfer credit. Ph.D. course work consists of prerequisites (as necessary), the Ph.D. core, major and minor study areas, and dissertation research, described in brief below. For more detailed information about Ph.D. requirements, contact the individual departments, visit their web sites, or visit http://www.biz.uiowa.edu/phd.

**Core Courses**

Core courses develop research competence and provide background for specialized study. Graduate course requirements include behavioral sciences (3 s.h.), economics (6 s.h.), and research methods/statistics/quantitative analysis (12 s.h.).

Doctoral students consult with their advisers to develop a study plan that reflects the background and interests of individual students and satisfies core requirements.

**Major Study Area**

At least 12 s.h. of approved doctoral-level courses must be completed in one of the following areas: accounting, finance, human resource management, management information systems, marketing, operations management, organizational behavior, or quantitative methods.

**Minor Study Area**

Students must complete a minimum of 9 s.h. of doctoral-level courses beyond the Ph.D. core course requirements in one of the major study areas listed above or in a concentration outside the Tippie College of Business.

**Comprehensive Examinations**

Students must satisfactorily complete a comprehensive examination, consisting of written or oral parts or both, at the discretion of their major department.

**Dissertation**

Students must present a dissertation proposal at a forum attended by dissertation committee members and open to interested faculty members and graduate students, as established by the student's major department. Dissertation credit must total 15 s.h. Researching and writing the dissertation typically require two years of full-time effort.

**Final Examination**

Ph.D. candidates defend the dissertation in an oral examination attended by dissertation committee members and open to interested faculty members and graduate students.
ADMISSION

Applicants to the Ph.D. program must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

Applicants must take the Graduate Record Examination (GRE) or the Graduate Management Admission Test (GMAT General Test and have their scores sent to the University in order to be considered for admission. The Departments of Finance, Management and Organizations, Management Sciences, and Marketing accept test scores for either the GRE or GMAT. The Department of Accounting accepts only GMAT scores and the Department of Economics accepts only GRE scores. Required scores on these tests and their weight in admission decisions vary by department.

Applicants whose native language is not English must take the Test of English as a Foreign Language (TOEFL) and have their scores sent to the University.

Applicants must submit a completed Application for Graduate Admissions, official transcripts from all institutions attended, official test scores, and three letters of recommendation. Applications must be complete before admission decisions can be made.

Application Deadlines

Admission is for fall entry. Applications should be submitted as early as possible but no later than the following deadlines.

Accounting: January 31
Economics: February 15
Finance: January 31
Management and Organizations: February 1
Management Sciences: February 15
Marketing: January 15

Other Graduate Programs

The college offers the Master of Accountancy (M.Ac.) degree and a Ph.D. in economics; see Accounting and Economics in the Catalog.

Facilities

The Henry B. Tippie College of Business is located in the John Pappajohn Business Building, at the heart of the campus. The Pappajohn Business Building contains seminar and conference rooms, a computer laboratory, two auditoriums, three computer classrooms, a behavioral laboratory, a restaurant (Pat's Diner), the Marvin A. Pomerantz Business Library, and a variety of classroom facilities.

Extensive research materials for business and economics are maintained in the Main Library, and the facilities of Information Technology Services are available to all students. The computer laboratory in the John Pappajohn Business Building serves the instructional programs of the college, and the staff maintains a current library of computational programs, CD-ROMs, and data tapes to accommodate users’ needs.

Centers and Institutes

Hawkinson Institute of Business Finance

The Hawkinson Institute of Business Finance facilitates career opportunities in the investment banking and financial services industries for Tippie College of Business students. It also links faculty, alumni, and students with the financial services sector.

The institute trains high-achieving undergraduates for positions in the financial services industry, works with top recruiters who do not typically recruit at Iowa, and supports finance research through faculty fellowships. It also presents instructional seminars and participates in outreach efforts to industry.

Institute for Economic Research

The Institute for Economic Research engages in and supports economic research and establishes a formal mechanism for providing interaction with and economic advice to industry and government. The institute’s main objectives are to provide economic information, forecasts, and advice to business and public agencies; to provide a state focal point for applied economic research; and to promote and enhance academic research and teaching in economics.

Institute for International Business

The Institute for International Business is dedicated to the development and advancement of knowledge related to international business. The institute coordinates and augments resources
at the Henry B. Tippie College of Business to provide students at all levels with the education, experience, and skills they will need for success in the global marketplace. The institute seeks to strengthen links between academic research and Iowa corporations engaged in international activities. It also sponsors cultural events and seminars in the college.

**Emmett Vaughan Risk Management and Insurance Institute**

The Tippie College of Business, in partnership with the Iowa insurance industry, has established the Emmett J. Vaughan Institute of Risk Management and Insurance to provide innovative education and leadership in modern risk management and insurance.

The institute and the Department of Finance offer a risk management and insurance concentration, which provides students with a foundation for careers in corporate risk management, risk management consulting, employee benefits management, insurance brokerage, and underwriting. See Finance in the Catalog for details.

**RSM McGladrey Institute**

The RSM McGladrey Institute of Accounting Education and Research fosters educational excellence in accounting at The University of Iowa and encourages high-quality research by Iowa accounting faculty members. The institute sponsors varied educational initiatives and activities, including an annual national speaker series. It helps faculty members initiate research projects and disseminate the findings to the academic, business, government, and professional accounting communities.

**John Pappajohn Entrepreneurial Center**

The John Pappajohn Entrepreneurial Center (JPEC) offers a comprehensive entrepreneurship education and outreach program. The center’s undergraduate program was one of the first in the country to develop a campus-wide, interdisciplinary program of study.

Undergraduate students in several University of Iowa colleges may earn an entrepreneurship certificate in addition to their baccalaureate degrees (see “Entrepreneurship Programs for Undergraduates” earlier in this section).

Advanced entrepreneurship courses are available to all graduate and professional students across campus, and M.B.A. students may pursue an entrepreneurship concentration (see Tippie School of Management—M.B.A. Program in the Catalog).

The entrepreneurship curricula incorporate experiential learning opportunities that help students prepare to launch their own venture or become leaders in organizations. JPEC recently opened the Bedell Entrepreneurship Learning Laboratory, a facility dedicated to student entrepreneurs.

The center offers several programs for entrepreneurial business and individuals, including student field study projects, training, mentoring, seminars, and conferences. It provides training and a specialized curriculum to Iowa high school teachers in an effort to foster the development of innovative, creative, and entrepreneurial young Iowans. JPEC also partners with Iowa community colleges to deliver entrepreneurship training statewide.

**Small Business Development Center**

Since 1981, the University of Iowa Small Business Development Center has played an important role in helping enterprising Iowans manage or start their own businesses successfully. The center provides support for small business owners and entrepreneurs. Its personnel are trained to meet the various needs of small business management, including market, business, and financial planning, cash flow analysis, human resource planning, product commercialization, market research and analysis, strategic planning, international trade, and advertising and public relations.

**Business Writing Center**

The Business Writing Center offers a comprehensive communications program that provides professional written and oral communications training for undergraduate students, graduate and peer staff tutors, and faculty members of the Tippie College of Business. The center offers its services through four initiatives.

The Business Writing Center is a tutoring service that helps hundreds of undergraduates every semester, assessing and working on individual needs.
The Writing Intensive Course Program draws on the Business Communications Center for help in courses that require writing projects. The center's staff works closely with faculty members to study assignments, develop handouts, give targeted presentations, and tutor students individually.

The Team and Collaborative Writing Initiative focuses on team assignments, which are a critical part of the college's curriculum. The initiative trains students to become final project editors and to share documents with team members throughout the writing process.

The Business Writing Center offers courses in successful presentations and provides individual consultations for students who wish to enhance their oral communication skills.

### Pomerantz Career Center

Career development and on-campus recruiting services for undergraduate students are provided by the University of Iowa Pomerantz Career Center. The center offers workshops throughout the year on a variety of topics, including résumé and cover letter writing, employer research, interviewing skills, and negotiating job offers. It also presents a fall semester career fair and a summer job and internship fair during the spring semester. The Pomerantz Career Center staff helps students who are looking for internships and full-time employment. Employer recruiting is facilitated through web-based software. Contact the Pomerantz Career Center for more information.

### Alumni Relations

Relationships with alumni are maintained by staff in the Undergraduate Program Office and the Tippie School of Management Office and by the college's director of communication and external relations. The college circulates its magazine, *B01* (Business at Iowa), to alumni and friends of the college and hosts alumni events each semester ranging from individual visits to receptions on campus and in cities nationwide and worldwide. Members of the Business Student Ambassadors, an undergraduate student organization, serve as hosts and guides for alumni who visit the college.
