The University of Iowa 2009-10 General Catalog

The General Catalog provides information about academic programs at The University of Iowa, one of three universities governed by the Board of Regents, State of Iowa. The Catalog also provides links to supporting offices at the University, a list of administrative officers, an A-Z list of University of Iowa faculty members, a University calendar, and information extracted from the Iowa Administrative Code regarding admission requirements and Iowa resident/nonresident standing.

The General Catalog is published for informational purposes and should not be construed as the basis of a contract between a student and The University of Iowa. Every effort is made to provide information that is accurate at the time of publication. However, information on courses, curricula, fees, policies, regulations, and other matters is subject to change any time during the period for which the Catalog is in effect.

This edition of the Catalog was published August 2009. For a PDF version of this Catalog and archived back editions, visit http://www.registrar.uiowa.edu/registrar and use the "Select a Catalog" drop-down menu.

The General Catalog is produced by the Office of the Registrar and the Office of University Relations. Your comments and suggestions are welcome. Questions concerning the Catalog may be directed to the Office of the Registrar at registrar-publications@uiowa.edu.

The University of Iowa has been accredited by the North Central Association of Colleges and Schools (30 North LaSalle Street, Suite 2400, Chicago, IL 60602; 312-263-0456) since the association's organization in 1913. The University is a member of the Association of American Universities and is associated with Indiana, Michigan State, Northwestern, Ohio State, Pennsylvania State, and Purdue Universities and the Universities of Illinois, Michigan, Minnesota, and Wisconsin in the Big Ten Conference. Along with the Big Ten universities, it also is associated with The University of Chicago in the Committee for Institutional Cooperation (CIC).

The University of Iowa prohibits discrimination in employment, educational programs, and activities on the basis of race, national origin, color, creed, religion, sex, age, disability, veteran status, sexual orientation, gender identity, or associational preference. The University also affirms its commitment to providing equal opportunities and equal access to University facilities. For additional information, contact the Office of Equal Opportunity and Diversity, 202 Jessup Hall, The University of Iowa, Iowa City, IA 52242-1316; 319-335-0705 (voice) and 319-335-0697 (text).
Academics at Iowa

The University of Iowa offers academic degree and nondegree programs at the undergraduate and graduate levels. It also offers postdoctoral study and other opportunities for nondegree study and research. The General Catalog describes the University's degree and nondegree programs at the undergraduate and graduate levels.

The following pages provide global information about undergraduate, graduate, and professional study across the University. They include lists of all undergraduate majors (including tracks and emphases), certificates, and minors, with links to the relevant Catalog sections; a link to the College of Liberal Arts and Sciences' undergraduate General Education Program; information about the undergraduate Four-Year Graduation Plan; information about graduate and professional study; descriptions of the University's course numbering and grading systems; and contact information for supporting offices (admissions, registrar, housing, student financial aid, and equal opportunity).

- Undergraduate Study
  - Undergraduate Majors and Pre-majors
  - Undergraduate Certificates
  - Undergraduate Minors
  - General Education Program
  - Four-Year Graduation Plan
- Graduate and Professional Study
- Course Numbering
- Grading
- Supporting Offices

For information about degree and nondegree programs in specific disciplines and interdisciplinary areas, including graduation requirements and courses offered, see the links under Colleges and Other Academic Units in the Catalog.

To find the Catalog section for a specific academic department or program, use the Catalog's A-Z Directory or the Catalog Contents index.
Undergraduate Study

University of Iowa undergraduate students may earn majors, certificates, and minors in more than 100 subject areas. Many majors have varied tracks or emphases, which students may choose according to their own educational goals and interests. Each program is described in the 2009-10 General Catalog, with information on courses and other graduation or completion requirements. Click on the program links under "Undergraduate Majors and Pre-majors," "Undergraduate Certificates," and "Undergraduate Minors."

- Undergraduate Majors and Pre-majors
- Undergraduate Certificates
- Undergraduate Minors

Students enrolled in the College of Liberal Arts and Sciences must complete the college's General Education Program in order to earn an undergraduate degree; other colleges also require General Education course work as part of their undergraduate curricula. For a detailed description of the program and its requirements, use the following link.

- General Education Program

Students who enter the University directly from high school may choose to participate in the Four-Year Graduation Plan, in which students agree to certain conditions that guide their study, and the University ensures availability of courses that students need in order to graduate in four years or provides remedies for delays in graduation due to lack of a course.

- Four-year Graduation Plan
Undergraduate Majors and Pre-majors

The University of Iowa offers the following undergraduate majors, pre-majors, and preparatory course work for selected professional degrees. Some majors offer Teacher Education Programs or the opportunity to earn a degree with teacher licensure, as indicated below. Each major links to the appropriate section of the 2009-10 General Catalog. Additional information about all majors is available on the Office of Admissions web site under Undergraduate Admissions: Majors & Programs.

Pre-majors

For information about the following pre-majors and preparatory course work for selected professional degrees, see the Office of Admissions web site Undergraduate Admissions: Majors & Programs.

Pre-Chiropractic
Dentistry (preparatory course work for the D.D.S.)
Law (preparatory course work for the J.D.)
Medicine (preparatory course work for the M.D.)
Pre-Mortuary Science
Pre-Optometry
Pharmacy (preparatory course work for the Pharm.D.)
Physical Therapy (preparatory course work for the D.P.T.)
Physician Assistant (preparatory course work for the M.P.A.S.)
Pre-Podiatric Medicine
Pre-Veterinary Medicine
Undergraduate Certificates

The University of Iowa offers a number of certificates for undergraduates, most in interdisciplinary areas. Colleges offering undergraduate certificates include the College of Liberal Arts and Sciences, the Tippie College of Business, the College of Public Health, and University College.

Certificate in Aging Studies
Certificate in American Indian and Native Studies
Certificate in American Sign Language and Deaf Studies: see American Sign Language
Certificate in Critical Cultural Competence
Certificate in Entrepreneurial Management: see Entrepreneurship
Certificate in Global Health Studies
Certificate in International Business
Certificate in Latin American Studies
Certificate in Medieval Studies
Certificate in Museum Studies
Certificate in Nonprofit Management
Certificate in Performing Arts Entrepreneurship
Certificate in Philosophies and Ethics of Politics, Law, and Economics
Certificate in Public Health
Certificate in Risk Management and Insurance
Certificate in Sexuality Studies
Certificate in Sustainability
Certificate in Technological Entrepreneurship: see Entrepreneurship
Postbaccalaureate Certificate in Classics; see Classics
Undergraduate Minors

Undergraduate minors are offered in numerous disciplines and interdisciplinary areas by the College of Liberal Arts and Sciences, the Tippie College of Business, and the College of Education.

General Education Program

All students entering the College of Liberal Arts and Sciences who wish to earn a Bachelor of Arts (B.A.), Bachelor of Science (B.S.), Bachelor of Fine Arts (B.F.A.), Bachelor of Liberal Studies (B.L.S.), or a Bachelor of Music (B.M.) degree must complete the CLAS General Education Program in addition to the requirements of their major and other requirements for graduation.

Undergraduate degree programs in other colleges include General Education requirements, which often may be satisfied with certain courses approved for the CLAS General Education Program.

For detailed information about CLAS General Education requirements and lists of courses approved in the CLAS General Education areas, see General Education Program (College of Liberal Arts and Sciences).
Four-Year Graduation Plan

The Four-Year Graduation Plan is a partnership between students and the University. Students who sign the Four-Year Graduation Plan agree to a number of conditions that guide their studies and their progress toward a degree. The University's colleges and departments also agree to certain conditions. They ensure the availability of courses that students need for graduation; they also guarantee that they will provide certain remedies to a student facing a delay in graduation due to lack of a course, as long as the student has met the conditions of the four-year plan. The Tippie College of Business and the Colleges of Engineering, Liberal Arts and Sciences, and Nursing participate in the four-year plan.

Only students who enter the University directly from high school are eligible to participate in the four-year plan. General information on the Four-Year Graduation Plan is available from the Office of Admissions. Information also is available from the participating colleges and the Academic Advising Center.
Graduate and Professional Study

The University of Iowa offers graduate and professional degrees and graduate certificate programs in a broad array of disciplines and interdisciplinary areas of study. Each of its 11 colleges offers master's degrees, and most offer doctoral degrees. Degree programs are presented by individual colleges, with most graduate degrees being granted by the Graduate College.

The Graduate College section of the Catalog provides a list of most University of Iowa graduate degrees as well as information about interdisciplinary graduate degree programs, joint degree programs, and certificate programs.

For information about degree and nondegree programs in specific disciplines and interdisciplinary areas, including graduation requirements and courses offered, see the appropriate General Catalog sections: Tippie College of Business, College of Dentistry, College of Education, College of Engineering, Graduate College, College of Law, College of Medicine, College of Nursing, College of Pharmacy, and College of Public Health.

Prospective graduate and professional students should apply through the Office of Admissions; see Graduate and Professional Admissions on the office's web site.
Course Numbering

Each course in the regular University curriculum has an identifying number, preceded by the number of the college, department, or program that administers the course. For example, 034:001 is the code for the course numbered 001 in the Department of Sociology (034), titled Introduction to Sociology Principles. Course numbers below 100 designate courses primarily for undergraduates, numbers 100 to 199 designate courses for undergraduate and graduate students, and numbers 200 and above designate courses primarily for graduate students.

**Grading**

The University uses a letter grading system for individual courses, except for the College of Law, which uses a numeric system for course grading. In order to compute grade-point average, letter grades are converted according to the following numerical scale. Grade-point averages are displayed at the bottom of students' grade reports and are truncated so as not to exceed 4.00. All of the following marks appear on the permanent record.

**Grade points for each semester hour**

Colleges and Other Academic Units

The University of Iowa offers academic programs and courses through its 11 colleges, University College, and the Division of Continuing Education. For information on each unit, including its constituent departments, programs, and schools and its academic programs (degrees, certificates, minors), click on the following links. University courses are listed under the units that offer them.

- College of Liberal Arts and Sciences
- Tippie College of Business
- College of Dentistry
- College of Education
- College of Engineering
- Graduate College
- College of Law
- Carver College of Medicine
- College of Nursing
- College of Pharmacy
- College of Public Health
- University College
- Division of Continuing Education
The College of Liberal Arts and Sciences (CLAS) is the oldest and largest of the 11 colleges that make up The University of Iowa. Students from all over the United States and more than 50 other nations study together in the college. Every University of Iowa undergraduate takes courses offered by the college, and more than 75 percent of undergraduates earn their degrees from the College of Liberal Arts and Sciences.

The college provides a comprehensive liberal arts education and advanced education in specialized areas. It offers more than 70 majors and certificates as well as a wide variety of minors and opportunities for interdisciplinary work. Students also may design their own majors through the Bachelor of Arts in interdepartmental studies.

In addition to their academic pursuits, students participate in the college in a variety of ways. They serve on the Dean's Student Advisory Committee and as members of the Educational Policy Committee and the General Education Curriculum Committee--collegiate committees that advise the deans on important educational issues. Students also are invited to serve on ad hoc committees within the college, and many departments have an undergraduate student group or association. CLAS students serve in the University of Iowa Student Government, too. Interested students should contact the appropriate committee or office.

CLAS Web Site

The College of Liberal Arts and Sciences web site contains a wealth of information for students and faculty members.

Students find information on academic policies and procedures on the For Students pages, including requirements of the CLAS General Education Program (see Student Academic Handbook). Information about scholarships, service opportunities, and upcoming deadlines also is available on the For Students pages.

The Departments and Programs link provides a list of CLAS administrative units (departments, programs, and schools) and undergraduate majors, certificates, and minors.

Faculty members turn to the CLAS web site for information on teaching and curriculum resources to use when advising and instructing students, and updates on important CLAS committees.

The CLAS web site also includes a home page for the Office of the Dean and for CLAS Academic Programs & Services as well as links to other helpful pages.

CLAS Academic Programs & Services

Located in Schaeffer Hall, at the center of campus, CLAS Academic Programs & Services is an integral part of the College of Liberal Arts and Sciences. The office, which is led by the associate dean for undergraduate programs and curriculum, welcomes students wishing to declare or change majors, file second-grade-only options, request permission to register late, add or drop a course late, or withdraw an entire registration after the established deadlines.

The office's staff members answer students' questions concerning academic requirements or programs, and they frequently meet with students concerning General Education Program requirements, graduation requirements, and collegiate policies that affect students.

Students in the College of Liberal Arts and Sciences may request exceptions to CLAS rules and requirements by petitioning CLAS Academic Programs & Services. All students should discuss their questions and need for an exception first with a staff member in the office.

The office's associate directors work closely with students on academic probation and counsel them on strategies for success. They also conduct semiannual reviews of students on academic probation and consider requests for reinstatement.

CLAS Academic Programs & Services recommends appropriate disciplinary action for academic fraud, such as acts of plagiarism, cheating, and forgery, and for other academic misconduct. It also handles dismissals from the College.

General Education Program

All students entering the College of Liberal Arts and Sciences who wish to earn a Bachelor of Arts (B.A.), Bachelor of Science (B.S.), Bachelor of Fine Arts (B.F.A.), Bachelor of Liberal Studies (B.L.S.), or a Bachelor of Music (B.M.)
degree must complete the CLAS General Education Program in addition to the requirements of their major and other requirements for graduation.

For General Education requirements, related academic policies, and lists of approved courses, see General Education Program under "College of Liberal Arts and Sciences Academic Program Index" below.

**CLAS Units and Academic Programs**

The College of Liberal Arts and Sciences includes nearly 40 administrative units ranging across the fine and performing arts, humanities and letters, social sciences, and natural and mathematical sciences. These units offer nearly 70 undergraduate majors and certificates as well as a wide variety of minors. They also offer more than 50 graduate programs (with degrees granted by the Graduate College).

**Undergraduate Majors, Certificates, and Minors**

The college offers undergraduate majors in a broad range of disciplines; for program descriptions and requirements, see the links under "College of Liberal Arts and Sciences Academic Program Index" below. In addition, several majors are offered to CLAS students by other colleges at the University, with the College of Liberal Arts and Sciences granting the degrees.

The Tippie College of Business offers a major in economics (B.A. and B.S.); the Carver College of Medicine offers majors in biochemistry (B.A. and B.S.) and in microbiology (B.S.); and the College of Education offers majors in elementary education (B.A. or B.S.) and in science education (B.S.). Link to information about these majors under "College of Liberal Arts and Sciences Academic Program Index" below.

The College of Education also offers a Teacher Education Program leading to licensure at the secondary level for students who have completed certain CLAS majors, such as English, mathematics, and art, and who wish to work with students in middle or high school. Students must apply for admission to College of Education programs; contact the college's Office of Teacher Education and Student Services.

Students who begin their study in the College of Liberal Arts and Sciences may earn undergraduate degrees in clinical laboratory sciences, nuclear medicine technology, and radiation sciences; see the Carver College of Medicine section of the Catalog for information about those majors.

The College of Liberal Arts and Sciences offers a broad array of certificates and minors for undergraduate students. In addition, the college collaborates with the University's International Programs office to offer the Certificate in Global Health Studies and the Certificate in Latin American Studies, and it offers the Certificate in International Business together with the Tippie College of Business. Link to information about CLAS certificates and minors under "College of Liberal Arts and Sciences Academic Program Index" below.

CLAS undergraduates may earn certificates and minors offered by other colleges, too. The Tippie College of Business offers the Certificate in Entrepreneurship, the Certificate in Risk Management and Insurance, and the minor in business administration. The College of Public Health offers the Certificate in Public Health. University College offers the Certificate in Museum Studies, the Certificate in Nonprofit Management, and the Certificate in Sustainability. The College of Education offers minors in educational psychology and in human relations. For lists of all undergraduate certificates and minors offered by the University, see Certificates and Minors in the Academics at Iowa/Undergraduate Study section of the Catalog.

Undergraduates also may take courses in book arts from the Center for the Book, a Graduate College program that offers a graduate certificate.

**Graduate Degrees and Certificates**

The College of Liberal Arts and Sciences offers graduate programs in most of its disciplines, with degrees granted by the Graduate College. Students may earn degrees at the master's and doctoral levels; graduate certificates are available in some areas of study. See Degrees Offered in the Graduate College section of the Catalog for a complete list of graduate degrees offered by the University.

For information about CLAS graduate programs, see the links under "College of Liberal Arts and Sciences Academic Program Index" below.

**Nondepartmental Courses**

Most College of Liberal Arts and Sciences courses are offered by the college's departments, programs, and schools. They are listed and described in the corresponding General Catalog sections; see the links under "College of Liberal Arts and Sciences Academic Program Index."
The college also offers the following nondepartmental courses.

610:029 First-Year Seminar 1-2 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Prerequisite: first- or second-semester standing.

610:030 Explorations in Computing, Mathematics, and Science 1 s.h.
Presentations by science and math faculty members, discussions with visiting scientists, visits to campus labs, off-campus science field trips; for students in Explorations in Computing, Mathematics, and Science Living-Learning Community. Prerequisite: first-year standing in CMS Learning Community.

610:040 Citizenship, Leadership, and Service I 1 s.h.
Presentations by faculty members, scholars, activists; guided discussions with visiting scholars and activists, other varied activities; for students in Citizenship, Leadership & Service Living-Learning Community. Prerequisite: enrollment in CLS Learning Community.

610:050 Citizenship, Leadership, and Service II 1 s.h.
Continuation of 610:040; individual volunteer opportunities, participation in service learning projects; presentations by faculty and community members, visits to University and community resources. Prerequisites: 610:040 and member of Citizenship, Leadership & Service Living-Learning Community.

610:099 Peer Mentoring 1-2 s.h.
Opportunities to participate in classroom and course activities as mentors for other students.
African American Studies

Chair: Carin M. Green  
Coordinator: Venise Berry  
Professor: Horace Porter (English/American Studies/African American Studies)  
Associate professors: Venise Berry (Journalism and Mass Communication/African American Studies), Tim Havens (Communication Studies/African American Studies), Tisch Jones (Theatre Arts/African American Studies), Michael Lomax (African American Studies/Leisure Studies), Sydné Mahone (Theatre Arts/African American Studies), Kevin Mumford (History/African American Studies), Leslie Schwalm (History/African American Studies/Women's Studies), Richard B. Turner (Religious Studies/African American Studies), Vershawn Young (Rhetoric/African American Studies)  
Assistant professors: Lena Hill (English/African American Studies), Michael Hill (English/African American Studies), Miriam Thaggert (English/African American Studies), Bridget Tsemo (Rhetoric/African American Studies), Deborah Whaley (American Studies/African American Studies)  
Undergraduate nondegree program: Minor in African American Studies  
Graduate degree: M.A. in African American World Studies  
Web site: http://www.uiowa.edu/~afam/index.html

African American studies focuses on the study of people of African descent in the United States and the African diaspora. The African American Studies Program originated in 1969 through courses intended to foster awareness of African Americans' role in the development of the United States and the world. Because a thorough understanding of the African American experience cannot be achieved through study restricted to the perspective of a single discipline, all students are required to pursue courses in the humanities, social sciences, and performing arts.

The African American Studies Program draws upon faculty from American studies, communication studies, education, health and sport studies, history, journalism and mass communication, religious studies, rhetoric, sociology, theatre arts, and women's studies. Future course work in political economy, gender and sexism, and the construction of race and identity is planned.

Undergraduate Programs

The program offers a Bachelor of Arts and a minor in African American studies.

Bachelor of Arts

The Bachelor of Arts in African American studies requires a minimum of 120 s.h., including at least 30 s.h. of work for the major. Students must maintain a g.p.a. of at least 2.00 in the major. Transfer credit is evaluated case-by-case and is limited to a maximum of 9 s.h. Students must complete the College of Liberal Arts and Sciences General Education Program.

INTRODUCTORY COURSES

Students are required to complete 129:062 Foundations in African American Studies, and either 129:060 Introduction to African American Society or 129:061 Introduction to African American Culture.

Foundations in African American Studies (129:062) explores the history and the methodology of African American studies. Starting with readings related to the formation of the discipline, the course shows students what an African American studies approach to interpretation entails and culminates in a research paper.

Introduction to African American Society (129:060) examines the construction of social and historical institutions in the United States and the African diaspora (e.g., Black church, Black family, gender, sexuality). The course may include readings in political science, religion, history, sociology, geography, anthropology, and other disciplines.

Introduction to African American Culture (129:061) presents themes in African American cultural studies. It includes readings in literature, music, film studies, religious studies, and the visual and performing arts.

AFRICAN AMERICAN STUDIES CORE

In addition to the two required introductory courses, all students must complete at least two courses from each of the three topical areas below (minimum of 18 s.h.). Additional courses may be approved for the topical areas; consult with an African American studies advisor.

History, Religion, and the Diaspora

Two of these:

07B:126 Twentieth-Century Educational Movements  
129:008 Literatures of the African Peoples  
129:050 Introduction to African American Religions  
129:063 African American Islam/International Perspective  
129:065 Introduction to African American History

2-3 s.h.  
3 s.h.  
3 s.h.  
3 s.h.  
3 s.h.
Twentieth-Century African American Religion: Civil Rights to Hip-Hop 3 s.h.
Black Culture and Experience (when topic is history, religion, or the diaspora) 3 s.h.
History of Slavery in the U.S.A. 3-4 s.h.
African and African American Interactions 3 s.h.
Topics in African American Studies (when topic is history, religion, or the diaspora) arr.
Topics in African Cinema 3 s.h.
Pre-Colonial African History 3 s.h.
African History Since 1880 3 s.h.
Black Global Metropolis: Sexual History 3 s.h.
African American History 1865-Present 3 s.h.
Themes in African American History 3 s.h.

Literature and Performing Arts

Two of these:
Selected African American Authors 3 s.h.
African American Literature Before 1900 3 s.h.
African American Literature Since 1900 3 s.h.
Black Culture and Experience (when topic is literature or performing arts) 3 s.h.
Racial Narrative and American Performance 3 s.h.
African American Literary/Rhetorical Criticism I 3 s.h.
African American Literary/Rhetorical Criticism II 3 s.h.
Topics in African American Studies (when topic is literature or performing arts) arr.
Midwest African American Literature and Culture 3 s.h.
African American Theatre I 3 s.h.
African American Autobiography 3 s.h.
Free Style Writing: Poetry, Plays, and Performances 3 s.h.
Black Feminist Tradition and Culture 3 s.h.
African American Drama 3 s.h.
African American Theatre II 3 s.h.

Media, Politics, and Society

Two of these:
Race, Ethnicity, and Media 3 s.h.
Race and Ethnicity in Sport 3 s.h.
African Americans and the Media 3 s.h.
Black Culture and Experience (when topic is media, politics, or society) 3 s.h.
Topics in African American Studies (when topic is media, politics, or society) arr.
The Civil Rights Movement 3 s.h.
Insurgency and Globalization of Discontent 3 s.h.

ELECTIVES

Students also must take two elective courses (minimum of 6 s.h.) selected from the three topical areas listed above. With the approval of an African-American studies advisor, students may substitute relevant courses offered by other departments for one or both electives; the substituted courses may not be cross-referenced with African American studies. Students must gain the advisor's approval before enrolling in a substitute course.

LANGUAGE REQUIREMENT

The language requirement for the African American studies major is the same as that of the College of Liberal Arts and Sciences General Education Program. Students are encouraged, but not required, to take African language (Swahili is currently offered) or Spanish language courses to fulfill the language requirement.

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they
may be offered by departments other than the major department.)

During the first year of study, students should focus on completing the General Education Program, perhaps including beginning Swahili to complete the foreign language component, or taking Spanish language course work.

**Before the third semester begins:** at least one-quarter of the semester hours required for graduation

**Before the fifth semester begins:** at least three courses in the major, including 129:062 Foundations in African American Studies, and 129:060 Introduction to African American Society or 129:061 Introduction to African American Culture; and at least one-half of the semester hours required for graduation

**Before the seventh semester begins:** four more courses in the major (for a total of seven) and at least three-quarters of the semester hours required for graduation

**Before the eighth semester begins:** at least nine courses in the major

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

**Honors**

The University of Iowa Honors Program provides a stimulating and integrative educational experience for undergraduate majors who perform at a high level. The honors program in African American studies offers students the opportunity to pursue special interests in individual in-depth research. Honors students in African American studies must be members of the University Honors Program, which requires students to maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University of Iowa Honors Program for more information). Honors students complete all of the required course work for the major (30 s.h.).

Students who wish to graduate with honors in African American studies are encouraged to register for up to 6 s.h. in 129:095 Honors Project. Work in this course enhances the student's ability to complete honors projects under the guidance of the supervising faculty member. Students take 129:095 Honors Project with the approval of their African American studies advisor, who typically supervises the course. Students may count up to 6 s.h. earned in 129:095 Honors Project toward the 33 s.h. required for the major.

Under the guidance of the African American studies advisor, the honors student defines a research project (thesis) using primary, secondary, or archival sources. The thesis may build upon the student's final project for the Senior Seminar (129:199), but research for the honors thesis must be distinct from that for the student's senior seminar paper and must be more thorough and sophisticated. Students make project proposals by the end of their junior year. Each student completes a thesis under the guidance of a supervising faculty member and presents the results as a senior essay to a committee of three faculty members, including the supervising African American studies faculty member, and two other African American studies faculty members of the student's choice. The student's committee may choose to hear an oral defense of the honors thesis, usually during the student's last semester.

Students should use one or more of their elective courses to develop the honors thesis.

**Minor**

The minor in African American studies requires a minimum of 15 s.h., including 12 s.h. taken at The University of Iowa. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass. Course work done for another major or minor may not be counted toward the minor in African American studies.

Students must take 129:062 Foundations in African American Studies. In consultation with their advisors, they should select either 129:060 Introduction to African American Society or 129:061 Introduction to African American Culture, and one course in each of the three topical areas (total of three topical area courses, 9 s.h.): history, religion, and the diaspora; literature and performing arts; and media, politics, and society. Two of the three topical area courses must be taken at The University of Iowa.

**Graduate Program**

African American studies is not accepting graduate students in 2009-10.

**Cocurricular Activities**

**Afro-American Cultural Center**

African American studies encourages students to use facilities of the Afro-American Cultural Center. The center serves as a museum and library of educational and cultural artifacts and exhibits of Black culture, providing cultural enrichment
for Black people of the Iowa City community and a cultural meeting place for Black students. It also attempts to provide a knowledge of Black culture that will promote diversity among all members of the University community.

**African American Studies Student Association**

The African American Studies Student Association aims to promote knowledge about people of African descent by sponsoring programs on various topics. Any University of Iowa student interested in African American studies is eligible to become a member.

**Seminar and Lecture Series**

The African American Studies Seminar Series and the Darwin Turner Lecture bring important scholars and creative artists such as Amiri Baraka, Michelle Wallace, and Valerie Smith to the University of Iowa campus.

The New Research in African American Studies lecture series, sponsored by the College of Liberal Arts and Sciences, focuses on research by faculty in the African American Studies Program.

**African American Studies Courses**

**For Undergraduates**

129:008 **Literatures of the African Peoples**

Works in English by authors of African descent from America, continental Africa, the Caribbean. Prerequisite: 08G:001. GE: Foreign Civilization & Culture, Humanities. Same as 08G:014.

129:029 **First-Year Seminar**

Small discussion class; topics chosen by instructor. Prerequisite: first-year standing.

129:050 **Introduction to African American Religions**

GE: Cultural Diversity, Humanities. Same as 032:034.

129:060 **Introduction to African American Society**

Social and cultural history of African Americans through framework of general works in anthropology, sociology, history. GE: Cultural Diversity, Social Sciences.

129:061 **Introduction to African American Culture**

Interdisciplinary look at Black culture in the United States through significant contributions of the humanities (music, art, literature, drama, philosophy) to development of Black culture. GE: Cultural Diversity, Humanities. Same as 045:030.

129:062 **Foundations in African American Studies**

Introduction to interdisciplinary methods in African American studies; overview of the discipline's central branches, including literature, religion, media and performing arts, history, political science. GE: Cultural Diversity.

129:063 **African American Islam/International Perspective**

Same as 032:063.

129:065 **Introduction to African American History**

GE: Cultural Diversity. Same as 16A:065.

129:069 **Selected African American Authors**

English majors may apply this course to the following area and/or period requirement. AREA: American Literature and Culture. PERIOD: 20th- and/or 21st-Century Literature. Same as 008:069.

129:076 **Race, Ethnicity, and Media**

Principal debates in media criticism about representation, circulation, and commodification of popular images of race and ethnicity. Communication studies majors may apply this course to the following area requirement. AREA: Theory. Prerequisites: 036:001 and g.p.a. of at least 2.60. Same as 036:076.

129:079 **Race and Ethnicity in Sport**

Structural and ideological barriers to racial and ethnic equality in sport, with focus on African American sport experiences; historical and contemporary issues, media representations. Same as 028:079.
129:095 Honors Project
Independent research and writing on interdisciplinary topic. Prerequisite: consent of instructor.

</table>
129:161 Insurgency and Globalization of Discontent
3 s.h.
Political theories of revolutionary African American and Japanese intellectuals, artists, and activists; how the theories have influenced social justice movements. Same as 039:161.

129:162 Midwest African American Literature and Culture
3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: American Literature and Culture. PERIOD: 20th- and/or 21st-Century Literature. Same as 008:162.

129:163 Pre-Colonial African History
3 s.h.
Africa to 1880; oral tradition, other sources; political development, ecological change, slavery and slave trade. GE: Foreign Civilization & Culture. Same as 16W:120.

129:164 African History Since 1880
3 s.h.
Africa in colonial, post-colonial period; economics, political structures of colonialism; social change, political life in the 20th century. GE: Foreign Civilization & Culture. Same as 16W:121.

129:175 African American Theatre I
3 s.h.
Works by African American playwrights and relevant historical documents, Africa through Black Renaissance; themes, history, sociopolitical context; artists forging theatrical paths under oppressive conditions; exploration through discussion, performance; literature-based course, workshop approach. Same as 049:190.

129:176 Special Topics
3 s.h.
Topics, issues, and debates about production or representation of popular images of race and ethnicity. Same as 036:159.

129:179 Independent Study
arr.
Topics vary. Prerequisite: consent of instructor.

129:181 African American Autobiography
3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: American Literature and Culture. PERIOD: 18th- and/or 19th-Century Literature, or 20th- and/or 21st-Century Literature. Same as 008:186, 049:186.

129:182 Free Style Writing: Poetry, Plays, and Performances
3 s.h.
Creative writing lab experience in reading, writing, and performing poetry and short plays; expansion of students' horizons of the self; arc of innovation in African American literature from Harlem Renaissance to present, with texts from Langston Hughes and Zora Neale Hurston to Saul Williams and Jill Scott; role of the artist in society and as outsider and insider; shifting perspectives on race, gender, class; musical influences and models, from blues to house music; sensuality, spirituality; artistic reflections on the cultural moment; effects of these on literary form and performance style; students create and perform a work for an audience. Same as 049:182.

129:183 Black Feminist Tradition and Culture
3 s.h.
Survey of selected theoretical texts chronicling shifting perspectives on feminism; comparative interdisciplinary survey of artistic works that reflect such perspectives. Same as 049:183.

129:184 Black Global Metropolis: Sexual History
3 s.h.
Dispersion of people of African descent into the global metropolis, from expansion of port cities in the slave trade to industrialization of European and American cities, decolonization of the Third World, and proliferation of spatial cultures in contemporary geography; readings cover prostitution in colonial New York, sexual danger in Victorian London, jazz age Chicago, sexual psyches in Algiers, black gay expatriates in Paris, social science in Harlem and Puerto Rico ghettos, black/white sex in Johannesburg, transsexuals in Rio de Janeiro, Black Panther sexual politics in urban America, global hip-hop sexualities. Same as 154:184, 16A:184.

129:186 African American Drama
3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: American Literature and Culture. PERIOD: 18th- and/or 19th-Century Literature, or 20th- and/or 21st-Century Literature. Same as 008:186, 049:186.

129:187 African American History 1865-Present
3 s.h.
African American history since Reconstruction; survey of African American politics and society from Reconstruction to present. Same as 16A:188.
129:189 Themes in African American History
Same as 16A:185.

129:191 African American Theatre II
Works by African American playwrights and relevant historical documents, Black Renaissance to present; themes, history, sociopolitical context; artists forging theatrical paths under oppressive conditions; exploration through discussion, performance; literature-based course, workshop approach. Same as 049:191.

129:199 Senior Seminar
African American, African, and African Caribbean culture and experience; comparative approach to synthesize students' earlier study. Prerequisites: African American studies senior standing and consent of instructor.

For Graduate Students

129:205 Gender and Race in Nineteenth-Century U.S.
Same as 016:205, 131:206.

129:212 Advanced Readings in Black Culture
Textual, social, political analyses of works by Black authors.

129:231 Crossing Borders Seminar

129:259 Seminar: Interpreting Oral Histories
Interpretations and methods applied by historians in various world regions to different forms of oral history, from old oral traditions to contemporary autobiographical testimony. Same as 016:259.

129:287 Readings: African American Women's History
Same as 016:287, 131:287.

129:312 Advanced Research in African American Culture
Seminar or independent study; for graduate students concentrating in African American studies. Prerequisite: basic African American studies courses.
Aging Studies

Chair: Edward J. Saunders
Coordinator: Mercedes Bern-Klug
Program advisor: Kathy Walter
Undergraduate nondegree programs: Certificate, Minor in Aging Studies
Graduate nondegree program: Certificate in Aging Studies
Web site: http://www.uiowa.edu/~interdi/aging/

The Aging Studies Program offers the Certificate in Aging Studies for undergraduate and graduate students and a minor in aging studies for undergraduates. The certificate program is designed to provide students with a multidisciplinary approach to gerontology. Its course work has been coordinated and sequenced to provide a broad background in aging for students from varied disciplines. All students plan their courses of study with their academic advisors in close cooperation with the Aging Studies Program advisor.

College of Liberal Arts and Sciences students also may pursue a Bachelor of Arts with an individually designed major in aging studies through the college's Interdepartmental Studies Program. See "B.A. with Aging Studies Focus" below.

Certificate

The Certificate in Aging Studies requires 21 s.h. The program is open to undergraduate, graduate, and nondegree students with aging-related career interests and needs. A student may not be awarded both a minor and a certificate in aging studies.

The certificate's required 21 s.h. must be earned in approved aging-related courses, including at least 18 s.h. in courses numbered 100 and above. Aging-related course work is defined as work that focuses principally on older persons, the aging process, or interventive methods or techniques whose target is the older adult or aging. Certificate students must complete a minimum of 15 s.h. in aging studies at The University of Iowa. A g.p.a. of at least 2.00 is required in all course work applied toward the certificate.

Certificate requirements include a core curriculum of six courses and an additional 2-5 s.h. of elective course work from the list of approved aging-related courses. Students may take core courses before or concurrently with other courses in the program. They should complete the core courses before taking the research project or the practicum course.

With the approval of their major department, students may apply certificate course work to their major or professional program of study.

Transfer credit is determined individually. Students who wish to apply credit earned at other institutions to the aging studies certificate should consult the aging studies coordinator.

Students in good standing should contact the Aging Studies Program advisor to notify the advisor of their intent to pursue the certificate and to develop an appropriate study plan. The aging studies advisor works with students and their major advisors to shape a study plan that complements their academic program and career interests. The aging studies advisor recommends a sequence in which course work should be taken and keeps a record of each student's approved program and progress.

Completion of the Certificate in Aging Studies is noted on the student's transcript.

Individuals who have earned a bachelor's degree at The University of Iowa may return to complete the requirements for the certificate. Graduate students and other students who hold a bachelor's degree are awarded the certificate when they have completed all certificate requirements.

The certificate requires the following course work.

CORE COURSES

All certificate students must complete the following six core courses.

153:108 Basic Aspects of Aging (GE: social sciences) 3 s.h.
153:135/042:135 Global Aging: Cultural Comparisons 3 s.h.
153:150/031:050 Psychology of Aging 3 s.h.
153:160 Biology of Aging 3 s.h.
153:190/042:190 Field Work in Gerontology 3-6 s.h.

153:130 Aging Studies Colloquium--Undergraduate 1 s.h.
or
153:230 Aging Studies Colloquium (graduate students) 1 s.h.
ELECTIVES

Students must complete an additional 2-5 s.h. of elective course work from the following lists of approved aging-related courses. Practicum and/or research courses offered by other academic departments may be accepted for elective credit if the content or focus is on aging. Students who wish to apply course work from other departments should consult the Aging Studies Program coordinator.

**Psychological Aspects of Aging**

- 025:139 Music Therapy Techniques: Adult Clients 3 s.h.
- 113:147 Special Topics in Anthropology (cross-cultural perspectives on death, dying, bereavement) 2-3 s.h.
- 153:030/096:030 Human Development and Behavior 3 s.h.
- 153:150/031:050 Psychology of Aging 3 s.h.

**Biological/Health Aspects of Aging**

- 003:530 Seminar: Communication Disorders and Aging 2 s.h.
- 028:036 Physical Activity Through the Life Span 3 s.h.
- 153:133/028:133 Nutrition Through the Life Span 3 s.h.
- 153:145/112:145 Introduction to Geriatric Dentistry 2 s.h.
- 153:160 Biology of Aging 3 s.h.
- 153:165/003:165 Communication Disorders and Aging 2 s.h.
- 153:166/028:166 Exercise for Special Populations 1 s.h.
- 153:410/096:410 Nursing Research of Biological Phenomena and Interventions for the Elderly 3 s.h.
- 153:420/096:420 Geriatric Mental Health Research 3 s.h.
- 153:430/096:430 Nursing Research in Sociocultural Phenomena and Interventions for the Elderly 3 s.h.

**Social and Cultural Aspects of Aging**

- 034:269 Seminar: Selected Topics in Family Sociology 3 s.h.
- 153:153/042:153 Programs and Services for Aging Adults 3 s.h.
- 153:168/169:168 Aging and Leisure 3 s.h.
- 153:185/042:185 Social Policy and the Elderly 3 s.h.
- 153:211/042:211 Individual and Family Development: Life Span 3 s.h.
- 153:219/042:219 Aging and the Family 2-3 s.h.

**Minor**

Undergraduate students in the Colleges of Liberal Arts and Sciences, Education, Engineering, Nursing, or the Tippie College of Business may complete the minor in aging studies. The minor must be approved by the student's college or major department. A student may not be awarded both a minor and a certificate in aging studies.

The minor in aging studies requires a minimum of 15 s.h. in aging-related course work, including 12 s.h. in advanced courses taken at The University of Iowa. For the minor, courses numbered above 100 are considered advanced. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass. The required introductory core course 153:108 Basic Aspects of Aging must be included in the 12 s.h. of advanced course work. Courses must be approved by the Aging Studies Program.

**B.A. with Aging Studies Focus**

Students in the College of Liberal Arts and Sciences who would like to design an individualized program in aging studies leading to a Bachelor of Arts must apply and be accepted to the Interdepartmental Studies Program. Entry to the program requires approval of a plan of study that includes 36 s.h. of upper-level course work. For more information, see Interdepartmental Studies in the Catalog.

</table>
Biogerontology; definition of aging and senescence, biological theories of aging, demographics, model systems foraging, premature aging syndromes, aging of organ systems in humans.

153:161 Rhetorical Issues in Health Care  3 s.h.
Role of rhetoric in health care practice, decisions, and ethics; rhetorical production of patient and professional selves in health care; varied practices, diverse perspectives, and situated production of medical and health care knowledge. Prerequisite: satisfactory completion of rhetoric general education requirement. Same as 010:161, 160:161.

153:165 Communication Disorders and Aging  2 s.h.
Introduction to speech, language, and hearing processes and disorders among older adults; survey of characteristics of communication and communication breakdown, remediation, and strategies for improving communication with older adults with communication disorders; primarily for nonmajors and service providers other than speech-language pathologists and audiologists. Offered spring semesters of even years. Same as 003:165.

153:166 Exercise for Special Populations  1 s.h.
Laboratory experiences in development and implementation of exercise testing and prescription for special populations, including children, elders, and individuals with chronic diseases. Pre- or corequisite: 028:138. Same as 028:166.

153:168 Aging and Leisure  3 s.h.
Status of the well elderly in relation to retirement issues, use of free time, and factors that support leisure activity; leisure services in long-term care. Same as 169:168.

153:185 Social Policy and the Elderly  3 s.h.
Public social policies, their affect on well-being of elderly, including women and minorities; U.S. and other nations’ policies. Prerequisites: 042:143, an introductory course on aging, and junior or higher standing; or consent of instructor. Same as 042:185.

153:186 Death/Dying: Issues Across the Life Span  3 s.h.
Introduction to death and dying; historical, cultural, societal, personal perspectives. Prerequisite: admission to School of Social Work or Aging Studies Program, or consent of instructor. Same as 042:186.

153:190 Field Work in Gerontology  arr.
Opportunities for students in various disciplines to relate their areas of study to elderly and aging; interdisciplinary relationships, approaches to meeting needs of elderly. Prerequisite: consent of instructor. Same as 042:190.

153:195 Introduction to Nursing Homes  3 s.h.
Overview of nursing home roles in context of long-term care system, characteristics of nursing home residents. Same as 042:195.

153:211 Individual and Family Development: Life Span  3 s.h.
Infancy through senescence; families from their beginnings through their later years; theoretical, methodological issues. Same as 042:211.

153:219 Aging and the Family  2-3 s.h.
Research related to aging and the family; intergenerational relations, marital status in later life, diversity of older families, caregiving, elder abuse, policy issues. Same as 042:219.

153:230 Aging Studies Colloquium  1 s.h.
Current trends, practices, and research in gerontology and geriatrics. Repeatable.

153:235 Object Relations in Social Work Practice  2 s.h.
Theories, practice skills; focus on object relations theory and therapy as a bridge between systemic perspective and working with individuals. Prerequisites: 042:250 and completion of foundation courses, or consent of instructor. Same as 042:235.

153:241 The Care of the Frail Elderly  3 s.h.
Clinical management of the elderly; emphasis on economic considerations, principles of gerontological care, common syndromes, ethical issues; clinical application experience in a long-term care setting. Prerequisites: 096:214, 096:222, and 096:224. Same as 096:241.
153:261 Epidemiology of Aging  1-2 s.h.
Epidemiologic methods for studying health and social problems of older persons; applications including research and public health practice and policy. Offered spring semesters. Prerequisite: 173:140. Same as 173:261.

153:410 Nursing Research of Biological Phenomena and Interventions for the Elderly  3 s.h.
Analysis, evaluation of research on health of elderly, aging process; emphasis on methodological issues, instrumentation appropriate for study of biological phenomena. Prerequisite: (for 153:410) Ph.D. enrollment. Same as 096:410.

153:420 Geriatric Mental Health Research  3 s.h.
Analysis, evaluation; emphasis on program evaluation, geriatric mental health services research, methodological issues. Prerequisite: (for 153:420) Ph.D. enrollment. Same as 096:420.

153:430 Nursing Research in Sociocultural Phenomena and Interventions for the Elderly  3 s.h.
Sociocultural issues for aging clients, corresponding nursing interventions; theoretical orientations to dynamics of aging, transitions and role changes, social/environmental issues. Prerequisite: (for 153:430) Ph.D. enrollment. Same as 096:430.
The American Indian and Native Studies Program (AINSP) is an interdisciplinary program that focuses on the histories, cultures, languages, literatures, and contemporary legal and political issues of Native Americans of the United States and other indigenous peoples of the Americas.

By taking AINSP courses, students begin to understand historical and contemporary social issues among indigenous peoples of the Americas. They acquire expertise for jobs involving cross-cultural work through experience with ethnic, social, and political diversity. They also gain a background for more specialized or advanced work in a variety of social science disciplines, including anthropology, psychology, geography, economics, education, history, and political science.

A certificate in AINSP complements degrees in professional areas such as health care, business, social work, and law.

**Undergraduate Programs**

The program offers the Certificate in American Indian and Native Studies and a minor in American Indian and native studies.

**Certificate**

The undergraduate Certificate in American Indian and Native Studies requires a minimum of 20 s.h. in courses chosen from the list of approved AINSP courses, with a g.p.a. of at least 2.00. Students plan their programs in close cooperation with AINSP faculty advisors. Course work must include the following.

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>149:049 Introduction to American Indian and Native Studies</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>149:101 American Indian and Native Studies Seminar (must be taken two semesters for a total of 2 s.h.)</td>
<td>1 s.h.</td>
</tr>
<tr>
<td>149:102 Introduction to American Indian History and Policy</td>
<td>3 s.h.</td>
</tr>
</tbody>
</table>

Additional course work, including courses selected from the list of approved AINSP courses (see "Associated Courses") 12 s.h.

Courses applied toward the AINSP certificate also may be used to complete the General Education Program or the requirements for a major or a minor. Students may count a maximum of 6 s.h. of course work from their major toward the AINSP undergraduate certificate. The certificate is awarded only upon completion of a bachelor's degree. Holders of Iowa baccalaureate degrees may return to complete the requirements for a certificate. Students may not earn both a certificate and a minor in American Indian and native studies.

**Minor**

The minor in American Indian and native studies requires a minimum of 15 s.h., including 12 s.h. in advanced courses taken at The University of Iowa. For the minor, courses numbered above 100 are considered advanced. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass. The minor must include the following.

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>149:049 Introduction to American Indian and Native Studies</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>or 149:102 Introduction to American Indian History and Policy</td>
<td>3 s.h.</td>
</tr>
</tbody>
</table>

149:101 American Indian and Native Studies Seminar 1 s.h.

Additional courses, including those selected from the list of approved AINSP courses (see "Associated Courses") 11 s.h.
Students may not apply more than 6 s.h. of course work used to complete a major toward the AINSP minor.

**Cultural Experience**

The program highly recommends that students have an in-depth American Indian cultural experience, usually through study or volunteer work, before they complete their undergraduate requirements. Consult AINSP faculty advisors about available options.

**Graduate Program**

The program offers the Certificate in American Indian and Native Studies for graduate students.

**Certificate**

The graduate Certificate in American Indian and Native Studies requires a minimum of 20 s.h. in courses numbered 100 or above chosen from the list of approved AINSP courses. Students must maintain a g.p.a. of at least 3.00 in AINSP courses counted toward the certificate. Course work must include the following.

- 149:102 Introduction to American Indian History and Policy 3 s.h.
- 149:299 Independent Study Project 2 s.h.
- Additional courses chosen from the list of approved AINSP courses (see "Associated Courses") 15 s.h.

Students may count a maximum of 6 s.h. of course work from their major field of study toward the AINSP graduate certificate.

Graduate students must apply to the academic coordinator to be admitted to the AINSP graduate certificate program. Students who earned an undergraduate certificate in the program may not receive a graduate certificate.

**Associated Courses**

In addition to those listed below, courses concerned in part with American Indians or with issues relevant to American Indians may be used as electives to satisfy requirements for the undergraduate certificate, the minor, and the graduate certificate, subject to AINSP faculty approval.

For course descriptions, see the appropriate department sections of the Catalog.

**ANTHROPOLOGY**

113:020 Introduction to Midwestern Prehistory 3 s.h.
113:117 The Maya: Archaeology and Ethnohistory 3 s.h.
113:163 Archaeology of Mesoamerica 3 s.h.
113:166 The Aztecs, Their Predecessors, and Their Contemporaries 3 s.h.
113:167 North American Archaeology 3 s.h.

**ART AND ART HISTORY**

01H:104 American Indian Art 3 s.h.
01H:105 Art of Pre-Columbian America 3 s.h.
01H:199 Topics in Art History (when content is appropriate) 3 s.h.

**EDUCATION**

07B:123 History of Ethnic/Minority Education 3 s.h.

**ENGLISH**

008:153 Native American Literature 3 s.h.
008:185 Native American Autobiography 3 s.h.
American Indian and Native Studies Courses

149:005 Literatures of Native American Peoples 3 s.h.
Genres of Native American literature, including oral literature; focus on written literature (fiction, essays, poetry, drama). Prerequisite: 08G:001. GE: Cultural Diversity, Humanities. Same as 08G:005.

149:020 Introduction to Midwestern Prehistory 3 s.h.
Prehistoric cultural sequence of Iowa viewed against background of North American prehistory; current and future research. Same as 113:020.

149:049 Introduction to American Indian and Native Studies 3 s.h.
Themes and methodologies in the study of American Indians and other indigenous peoples; approaches from anthropology, history, law, literature, other disciplines. Offered fall semesters. GE: Cultural Diversity. Same as 045:049.

149:060 Introduction to Native American Religions 3 s.h.
GE: Cultural Diversity. Same as 032:060.

149:065 Sex, Gender, and Nature in the Culture of Native America 3 s.h.
Historical notions of gender, sexuality, and marriage among selected Native American cultures; how these beliefs conflicted with colonial European Christian beliefs; native peoples’ sacred stories of creation and human origins compared with Euro-Christian perspectives; how Europeans’ sexual and gender violence toward native peoples served as a tool of colonial oppression and conquest.

149:070 Indians and Allies 3 s.h.
Social and cultural issues facing Native Americans.

149:076 American Indian Environmentalism 3 s.h.
Same as 032:076.

149:080 American Indian Activism 3 s.h.
Social/religious/political movements among indigenous people of North America, 18th century to present. Same as 032:082.

149:082 American Indian Women: Myth, Ritual, and Sacred Power 3 s.h.
Participation of women and girls in native religious traditions; obstacles to knowing and understanding native women’s religious roles and experiences. Same as 032:078.

149:085 Native American Material Culture 3 s.h.
Overview of American collectors and collections of Indian objects, prehistoric to contemporary. Same as 045:085.

149:099 Powwow Culture and History 3 s.h.
Service learning experience working on the American Indian powwow at The University of Iowa; academic study of history and culture of Native American powwows.

149:101 American Indian and Native Studies Seminar 1 s.h.
Historical and contemporary issues.

149:102 Introduction to American Indian History and Policy 3 s.h.
Same as 16A:110.

149:110 Native Peoples of North America 3 s.h.

149:113 Native American Literature 3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: American Literature and Culture. PERIOD: 20th- and/or 21st-Century Literature. Same as 008:153.

149:115 Native North America I: Precontact-1789 3 s.h.
Same as 16A:115.

149:116 Native North America II: 1789-Present 3 s.h.
Same as 16A:116.

149:121 Health of Indigenous Peoples 3 s.h.
Health problems and services for indigenous populations worldwide, from perspective of Fourth World postcolonial politics. Prerequisite: 113:003 or 113:010 or consent of instructor. Same as 113:121, 152:121.

149:158 Native American Women and Religious Change 3 s.h.
Native women's diverse experiences and their roles in native societies, examined through contact experiences between native and nonnative peoples; changes in women's roles in context of interactions between native people, missionaries, European colonists, and Americans; approaches to re-imaging women's early contact roles presented in cultural narratives, archaeology, history, ethnography, and missionary records. Same as 032:158, 131:159.

149:159 Southwestern Archaeology 3 s.h.
Anthropological overview of prehistoric cultures of the American Southwest; emphasis on understanding archaeological arguments concerning major processes in the past. Same as 113:159.

149:164 American Indian/First Nations Women 3 s.h.

149:167 North American Archaeology 3 s.h.
Prehistoric cultural development north of Mexico from initial occupation to European contact and conquest; emphasis on dynamics of culture change. Same as 113:167.

149:168 American Indians in the Arts 3 s.h.
Creation and impact of American Indian representation in literature, painting, film, music, other arts; native peoples' roles in the creative process.

149:178 Federal Indian Law 3 s.h.
Specialized body of law that allocates power and authority in Indian country and has grown up around Native American peoples and their reservations; sovereignty arrangements, jurisdiction, federal Indian policy, tribal self-government. Same as 091:303.

149:185 Native American Autobiography 3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: American Literature and Culture. PERIOD: 20th- and/or 21st-Century Literature. Same as 008:185.

149:195 Directed Cultural Experience arr.
In-depth American Indian cultural experience, usually study or volunteer work, under supervision of an AINSP faculty member.

149:197 Independent Study arr.

149:199 Special Topics: American Indian and Native Studies arr.
American Indians and other indigenous peoples; concepts, problems, issues. Prerequisite: consent of instructor.

Same as 016:243.
149:250 CIC American Indian Studies Graduate Seminar 3 s.h.
Topic varies. Taught four weekends per semester at The Newberry Library, Chicago. Prerequisites: graduate standing and CIC university enrollment.

149:299 Independent Study Project arr.
Repeatable. Prerequisite: consent of instructor.
The American Sign Language Program offers a four-semester course sequence in American Sign Language (ASL), the undergraduate certificate in American Sign Language and Deaf Studies, and courses for teacher licensure. Classroom instruction is supplemented by video materials and interactive software in the Language Media Center.

Undergraduate students may use the American Sign Language sequence 158:011 American Sign Language I, 158:012 American Sign Language II, 158:013 American Sign Language III, and 158:014 American Sign Language IV to complete the foreign language component of the College of Liberal Arts and Sciences General Education Program.

Certificate

The Certificate in American Sign Language and Deaf Studies requires 34 s.h. The interdisciplinary program teaches students about the history, culture, and language of the American deaf community.

Through the study of American Sign Language, students come into contact with a language that is semantically and grammatically very different from their own and that operates in a different sensory channel as well. Students who undertake the program encounter a rich and complex culture, including a rapidly growing literature recorded on film and videotape since the early 20th century.

The certificate program permits students to link study in three or more disciplines into an organized investigation of a language and culture. The Certificate in American Sign Language and Deaf Studies serves as a valuable confirmation for employers and graduate schools of a student's specialized knowledge in the field.

Any undergraduate student pursuing a degree from The University of Iowa may earn the certificate. Holders of University of Iowa bachelor's degrees who are not enrolled in graduate or professional programs may return to complete the certificate.

Students may earn the Certificate in American Sign Language and Deaf Studies, or a minor in American Sign Language, but not both.

Students may use each course required for the certificate to satisfy only one certificate requirement. But they may use a course to satisfy both a certificate requirement and a requirement for a major or for a minor in another discipline.

Courses used to satisfy certificate requirements may not be taken pass/nonpass.

A maximum of 6 s.h. of transfer work may be accepted toward certificate requirements, with the approval of the American Sign Language and deaf studies advisor.

REQUIRED COURSES

The Certificate in American Sign Language and Deaf Studies requires completion of the sequence 158:011, 158:012, 158:013, and 158:014, or demonstration of equivalent proficiency, and a total of at least 18 s.h. of approved courses in three or more different disciplines. At least 6 s.h. must be chosen from the following core courses.

158:100/16A:104 History of the American Deaf Community 3-4 s.h.
158:101 Topics in Deaf Studies 3 s.h.
158:102 American Deaf Culture 3 s.h.
158:103 American Sign Language Literature 3 s.h.
158:104 Issues in ASL and Deaf Studies 3 s.h.
158:106 Introduction to ASL Interpreting 3 s.h.
158:110/07U:110 Teaching Deaf and Hard of Hearing Students 3-4 s.h.
158:111 American Sign Language Conversation 3 s.h.

Certificate students also complete at least four courses (12 s.h.) in two or more of the following disciplines. They may petition to have courses that are not listed below approved for certificate requirements.
113:014 Language, Culture, and Communication 3 s.h.
113:173/103:150 Language and Gender 3 s.h.

Communication Sciences and Disorders
003:117 Psychology of Language 3 s.h.
003:185 Hearing Loss and Audiology 3 s.h.
003:244 Rehabilitative Audiology 3 s.h.

Education
07U:100 Foundations of Special Education (requires admission to the Teacher Education Program) 3 s.h.
07U:110/158:110 Teaching Deaf and Hard of Hearing Students 3-4 s.h.
07U:133 The Culturally Different in Diverse Settings 3 s.h.

History
16A:104/158:100 History of the American Deaf Community 3-4 s.h.
16A:106 Disability in American History 3 s.h.

Linguistics
103:011 Language and Society 3 s.h.
103:100 Introduction to Linguistics 3 s.h.
103:150/113:173 Language and Gender 3 s.h.

Minor
The minor in American Sign Language requires 15 s.h. of ASL course work, including 12 s.h. in courses numbered
100 or above taken at The University of Iowa, excluding 158:106 Introduction to ASL Interpreting, which does not count
ward the minor. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be
taken pass/nonpass. The minor must include 158:014 or demonstrated equivalent proficiency. Students may count a
maximum of one course taught in English toward the minor (158:100 History of the American Deaf Community or
158:110 Teaching Deaf and Hard of Hearing Students) and must enroll in the 4 s.h. option with discussion conducted
in ASL.

Hearing Impaired Endorsement for Teachers
The American Sign Language Program offers courses that fulfill requirements for the Hearing Impaired Endorsement
offered by the College of Education. The University of Iowa currently is the only institution in Iowa that offers this
endorsement program. Holders of the endorsement are authorized to serve deaf and hard-of-hearing students from
birth to age 21. Applicants to the program must hold or be in the process of completing requirements for an elementary
or secondary teaching license.

American Sign Language Courses
158:011 American Sign Language I 4 s.h.
Conversational skills, basic grammar of ASL; introduction to the ASL cultural community through readings, videos.
Taught in American Sign Language. First in a four-semester sequence. GE: Foreign Language First Level Proficiency.

158:012 American Sign Language II 4 s.h.
Continuation of 158:011; emphasis on ASL grammar and syntax; focus on culture through readings, videos. Taught in
American Sign Language. Prerequisite: 158:011 or consent of instructor. GE: Foreign Language Second Level
Proficiency.

158:013 American Sign Language III 4 s.h.
Continuation of 158:012; emphasis on ASL grammar and syntax; focus on culture through readings, videos. Taught in American Sign Language. Prerequisite: 158:012 or consent of instructor. GE: Foreign Language Second Level Proficiency.

American Studies

Chair: Kim Marra
Professors: Susan Birrell (Health and Sport Studies/Women's Studies/American Studies), Kim Marra (Theatre Arts/American Studies), Horace A. Porter (F. Wendell Miller Professor of English and American Studies), Lauren Rabinovitz (American Studies/Cinema and Comparative Literature), John Raeburn (American Studies/English)

Associate professors: Lafayette Adams (English/American Studies), Laura Rigal (English/American Studies), Harilaos Stecopoulos (American Studies/English), Nicholas Yăblon

Undergraduate degree: B.A. in American Studies

Undergraduate nondegree program: Minor in American Studies

Graduate degrees: M.A., Ph.D. in American Studies

Web site: http://www.uiowa.edu/~amstud

The Department of American Studies provides an interdisciplinary introduction to American culture, past and present. It helps students acquire a broad familiarity with the dynamics of cultural experience and explore aspects of life in the United States, such as popular and fine arts, institutions, values, gender and ethnic relations, artifacts, and the everyday life of a diverse citizenry.

Undergraduate Programs

The department offers a Bachelor of Arts and a minor in American studies.

Bachelor of Arts

The Bachelor of Arts in American Studies requires a minimum of 120 s.h., including 36 s.h. of work for the major. At least 24 s.h. for the major must be earned at The University of Iowa. American studies students must complete the College of Liberal Arts and Sciences General Education Program. The major in American studies stresses broad training in cultural analysis and communication. Although it offers no explicit vocational training, the program provides preparation for careers in business, education, government, journalism, or social service; for advanced study in the humanities, the social sciences, theology, or business; or for professional study in law or medicine. Internships can be arranged, through the University's Pomerantz Career Center.

A distinctive feature of the American studies major is the opportunity to develop broad training in cultural analysis as well as emphasis of particular interests within the study of American culture. With the help of their American studies advisors, students may elect to pursue one of three focus areas within American studies, or they may create an individual plan of study. Each focus area allows students to group courses in American studies and other departments around a specific interdisciplinary theme, topic, or set of social issues. Focus areas are described below.

Shortly after declaring a major, a student should meet with his or her faculty advisor to explore the range of course work available and to begin shaping an individual plan of study. By the student's second term in the major, the student and advisor should have agreed upon a plan of study and focus area for completing the major requirements.

The major in American Studies usually requires the following 12 courses. American studies courses must include 045:020 Sources for American Studies, 045:025 Diversity and American Identities, and 045:090 Seminar in American Cultural Studies. Requirements are as follows.

American studies requirement: six core courses, including 045:020, 045:025, and 045:090 18 s.h.

American history: two courses 6 s.h.

Special interest focus area: four courses in American studies and/or other departments 12 s.h.

American Studies Focus Areas

Students should consult regularly with the Department of American Studies about courses offered by American studies and other departments that count toward each focus area. A maximum of two courses from a single department outside American studies may be counted toward any one focus area.

ETHNIC STUDIES, DIVERSITY, AND DIFFERENCES

Students choose this focus to develop interdisciplinary understanding of an individual ethnic and/or racial group (e.g., Latino/a studies, Jewish-American studies) or to examine broadly gender, race, sexuality, social class, region, national origins, and age in the United States. Emphasis is on the historic emergence of categories of social difference, especially as revealed in cultural practices and artifacts, geography and cityscapes, leisure, and popular expression.

AMERICAN ARTS, LITERATURE, AND POPULAR CULTURE

Students who choose this focus examine artistic creations to discover how they are shaped by cultural preconceptions, norms, and standards, and how in turn these expressive forms affect ongoing developments in cultural life. Emphasis
is on skills in the formal analysis of artistic artifacts, historical inquiry, and cultural contextualization.

AMERICAN SOCIETY, POLITICS, AND EVERYDAY LIFE

Students who choose this focus consider the dynamics of social change, the emergence and fate of political movements, and the forms and practice of everyday life in America. The area encompasses the tradition of revolution in America, the effects of technological and economic change, and the roles of the family, workplace, and community from the colonial era to the digital age.

INDIVIDUALLY DESIGNED FOCUS AREA

Individually designed focus areas may concentrate on an interdisciplinary topic, theme, group of people, or time period. Students who wish to design their own interdisciplinary focus area should consult with their American studies advisor for appropriate courses.

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

Before the third semester begins: at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: declaration of the major, discussion of a plan of study with an American Studies advisor, and at least one-half of the semester hours required for graduation

Before the seventh semester begins: at least six courses from the plan of study and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: at least nine courses from the plan of study

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Honors

The American studies honors program offers students the opportunity to pursue special interests in individual, in-depth research. Honors candidates must be members of the University of Iowa Honors Program, which requires that students maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University of Iowa Honors Program for more information).

Under the guidance of the undergraduate honors advisor, honors candidates define a research project. Project proposals ideally are made by the end of the junior year. Each candidate completes the project under the guidance of a supervising faculty member and may register for up to 6 s.h. in 045:095 Honors Project.

Results of the research project are presented in a senior essay to a committee of three faculty members, including the supervising faculty member, the honors advisor, and a third faculty member of the student's choice. (When the honors advisor is the supervising faculty member, the candidate may select the other two faculty members.) The candidate's committee may choose to hear an oral defense of the final project, usually in the 12th week of the last semester.

Minor

Students interested in a minor in American studies should consult American studies faculty members. The minor in American studies requires a minimum of 15 s.h. in American studies courses, including 12 s.h. in advanced courses taken at The University of Iowa. For the minor, courses numbered above 045:001 are considered advanced. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass.

Graduate Programs

The department offers a Master of Arts and a Doctor of Philosophy in American studies.

Master of Arts

The M.A. in American studies requires a minimum of 36 s.h. of graduate credit. It may be a terminal degree or preliminary to a Ph.D. in American studies or another discipline. The following courses are required.

Two other core courses in American studies

M.A. students also select from five to eight additional courses relevant to a topic or period of cultural history. These courses may be grouped to address more than one topic and must be chosen from more than one discipline; they usually include at least two courses in American history and courses focusing on American diversity.

Master's degree candidates must perform satisfactorily in 045:400 Masters Preparation (3 s.h.), which includes a comprehensive examination on course work and basic concepts.

The M.A. also may be taken with thesis, for credit up to 6 s.h. Students should consult the program chair for details.

**Joint M.A./J.D.**

The Department of American Studies and the College of Law offer a joint Master of Arts/Juris Doctor. The M.A./J.D. provides a broad cultural context for the study and practice of law. Similar joint programs can be arranged in other professional fields, such as journalism and social work.

Separate application to each degree program is required. Applicants must be admitted to both programs before they can be admitted to the joint degree program.

**Doctor of Philosophy**

The Ph.D. program in American studies requires a minimum of 72 s.h. of graduate credit, which includes a core of American studies courses in interdisciplinary methods and substantial course work in two major fields. Course requirements are as follows.

- Two or more additional core graduate courses in American Studies 6 s.h.
- First major field (at least six courses) 18 s.h.
- Second major field (at least six courses) 18 s.h.
- Electives 6 s.h.
- Dissertation (up to 18 s.h.)

American studies Ph.D. students are permitted considerable flexibility in planning a program, but they must meet certain basic requirements.

The introductory seminars 045:200 Theory and Practice of American Studies I and 045:201 Theory and Practice in American Studies II should be taken as early as possible, one during each of the first two years in residence. The additional American Studies graduate courses provide further models for interdisciplinary inquiry.

The two major fields may be defined to correspond with the student’s strongest intellectual interests, but they must be interdisciplinary in concept and multidisciplinary in scope. Each must include course work from more than one of the University’s departments and programs. They also should be designed to emphasize a generous but well-defined period of American cultural history; therefore, historical knowledge is essential to all doctoral plans of study. The two major fields may, and usually should, have an intellectual relationship with each other.

The program expects doctoral students to address the cultural diversity of American life in their course work and reading.

**ADMISSION TO PH.D. CANDIDACY**

Advising is important. Each doctoral student and his or her faculty advisor map out a coherent plan of study that reflects the student's particular interests in American cultural studies. The plan of study usually has been formulated tentatively by the end of the first year in residence. During the first semester of the second year, the student submits the plan to the entire faculty, which reviews it and meets with the student to discuss it. When the faculty accepts the plan of study, the student is admitted to Ph.D. candidacy. In the next three or four semesters, the candidate completes the established plan and begins to prepare for comprehensive examinations.

**COMPREHENSIVE EXAMINATIONS**

The comprehensive exam comprises three written portions and an oral examination.

The position paper is always written in advance of the rest of the exam and under the supervision of an American studies faculty member. In it, the candidate lays out his or her general approach to American cultural studies and provides an exemplification of that approach.
The remaining two written exams explore the candidate's major fields; these are at least four hours long, but may be given on a take-home basis at the examiner's discretion. The oral examination covers material from the position paper and the two written exams.

**THESIS**

The final requirement for the Ph.D. in American studies is presentation of an acceptable thesis on an interdisciplinary topic whose investigation involves more than one field or discipline.

**Internships**

Qualified graduate students in American studies can arrange internships with a number of local agencies, including the State Historical Society of Iowa, the Division of Historic Preservation, the University of Iowa Museum of Art, the Iowa Humanities Board, Brucemore, the Herbert Hoover Presidential Library and Museum, and the Putnam Museum of History and Natural Science. With special permission, candidates conducting research during such on-the-job training may receive academic credit through 045:320 Independent Study or 045:350 Material Culture Internship. Other internships with social agencies, government, or business also may be arranged.

**American Studies Courses**

**Primarily for Undergraduates**

Theories and practices of youth subcultures, mainly 1970s-1990s American (e.g., punks, skinheads, rappers); how youth subcultures, as popular generational forms of identification, intersect with other compelling markers of collective identity, especially race, class, gender, and sexuality; relevant texts from varied media and genres, including fiction, sociology, film, music, popular fashion, others.

045:145 Immigration and American Culture 3 s.h.
Immigrants and immigrant communities.

045:147 American Disasters 3 s.h.
Fault lines of American society and culture as exposed during catastrophe; history of American disaster investigated through methods from cultural history, visual theory, sociology, and media studies; varied disasters 1800 to present, including those involving cities (Chicago fire, San Francisco earthquake, Chicago heat wave), transportation (Titanic, Challenger, Columbia), and environment (Union Carbide and Bhopal, Exxon Valdez); causes of catastrophes; how Americans react and are drawn to catastrophe (e.g., disaster films, jokes); related topics, including technology, urbanism, race, class, apocalyptic religion, journalism, popular culture.

045:150 Topics in American Cultural Studies 3 s.h.
Special topics in American history, literature, culture.

045:151 American Business Cultures 3 s.h.
Historical and contemporary records of business and corporate experiences as part of American life and thought, including representations of business in American novels, movies, history, autobiography; emphasis on questions of relationships between gender, ethnicity, class, and sexuality and corporate identities.

045:152 Fairs and Amusement Parks 3 s.h.
Nineteenth- and twentieth-century international expositions, amusement parks, and theme parks as cultural events of U.S. self-definition.

045:153 The Civil Rights Movement 3 s.h.
History of the American civil rights movement. Same as 129:153.

045:154 Food in America 3 s.h.
Cultural significance of production, distribution, and consumption of food in the United States.

045:159 Representations of Revolution 3 s.h.
Cultural politics of the revolutionary tradition in American culture from 1776 to 1976.

045:160 American Cityscapes 3 s.h.
Changing conventions in representation of American cities between the 1830s and 1930s; fiction and nonfiction, visual and audiovisual culture.

045:163 American Ruins 3 s.h.
Emergence and development of American fascination with ruins, from indigenous to urban-industrial remains; actual ruins and depiction of imagined ruins in art, literature, cinema.

045:165 The Culture of Nature 3 s.h.
How ideas of "the natural" and "the cultural" underpin beliefs, laws, and social practices; relationship between these two concepts; construction of notions of a natural world; idea of landscape and nature as a resource to be used, appreciated, articulated, or enjoyed; focus on analysis of relationships to animals.

045:170 American Regional Identities 3 s.h.
Regional identity across regions of the United States; literary, visual, and popular representations of regional identity.

045:174 The American Vacation 3 s.h.
Social history of vacations; cultural significance of contemporary patterns; focus on how experiences and meanings are shaped by race, class, gender. Same as 028:179.

045:175 Revolution in American Culture 3 s.h.
Emergence of revolutionary identities in American culture, 1776 to 1970.
045:185 America in the World
How U.S. activity influences lives worldwide. 3 s.h.

045:193 American Photography
Popular and art photographs as expressions of American life, thought. 3 s.h.

**Primarily for Graduate Students**

045:200 Theory and Practice of American Studies I
Theories, methods, cases in culture studies; emphasis on social science approaches. Prerequisite: American studies graduate standing or consent of instructor. 3 s.h.

045:201 Theory and Practice in American Studies II
Prerequisite: American studies graduate standing or consent of instructor. 3 s.h.

045:230 Seminar: Performing Arts in American Culture
American theater, dance, music, and performance. 3 s.h.

045:242 African American Cultural and Literary Criticism 1900-Present
Diverse range of African American cultural and literary criticism from 1900 to the present; the new negro; racial integration; race, gender, and sexuality; Black public intellectuals. Same as 008:242. 3 s.h.

045:250 Seminar: Topics in American Studies
American cultural history; urbanization, mass media, pluralism, assimilation. Repeatable. 3 s.h.

045:258 Seminar: Technology and American Culture
3 s.h.

045:293 Seminar in American Visual Culture
Visual expression, its relation to cultural history. Repeatable. 3 s.h.

045:299 American Studies Proseminar
Intensive reading on American cultural analysis topics; may include screenings, field trips, guest speakers, special events. Repeatable. 1-2 s.h.

045:300 American Film and American Culture
Relationships between film and culture as developed in a particular approach, period, subject. Same as 048:300. 3 s.h.

045:320 Independent Study
Repeatable. Prerequisite: consent of instructor. arr.

045:350 Material Culture Internship
Independent work in the field or in a field school, curating or interpreting material culture. Prerequisite: consent of instructor. 0-5 s.h.

045:400 Masters Preparation
Writing for M.A. exam. Prerequisites: American studies nonthesis M.A. candidacy and consent of instructor. 0-3 s.h.

045:450 M.A. Thesis
Prerequisite: consent of instructor. 0-6 s.h.

045:500 American Studies Position Paper
Writing for the Ph.D. comprehensive exam. Prerequisite: consent of instructor. 3 s.h.

045:600 Ph.D. Thesis
Repeatable. Prerequisite: consent of instructor. arr.
Anthropology

Chair: Russell Ciochon
Professors: Thomas H. Charlton, Michael Chibnik, Russell Ciochon (Anthropology/Pediatric Dentistry), Ellen Lewin (Women's Studies/Anthropology), Toni Tripp Reiner (Nursing/Anthropology)

Professors emeriti: Melanie Dreher (Nursing/Anthropology/Community and Behavioral Health), Mac Marshall, Margery Wolf

Associate professors: James Enloe, Robert Francis, Laura Graham, Meena R. Khandelwal (Anthropology/Women's Studies), Katina Lillios, Sonia Ryang, Scott Schnell, Glenn Storey (Classics/Anthropology)

Associate professors emeriti: Marshall B. McKusick, Douglas Midgett

Adjunct associate professors: Kevin Kelly, Alfrida Monagan

Assistant professors: Nanette Barkey (Community and Behavioral Health/Anthropology), Margaret Beck, Adi M. Hastings, Matthew E. Hill, Erica Prussing (Anthropology/Community and Behavioral Health), Nelson Ting

Adjunct assistant professors: John Doershuk, Erik Filean, Stephen C. Lensink, Dongwang Liu, Melody K. Pope

Adjunct instructor: Shirley J. Schermer

Undergraduate programs: B.A., B.S. in Anthropology

Undergraduate nondegree program: Minor in Anthropology

Graduate degrees: M.A., Ph.D. in Anthropology

Web site: http://www.uiowa.edu/~anthro

Anthropology is the comparative study of peoples and cultures past and present. The discipline's four major subfields--cultural anthropology, biological anthropology, linguistic anthropology, and archaeology--have important connections to other social sciences, physical and biological sciences, and to the arts and humanities.

Anthropology provides a framework for understanding the relation of human beings to their natural environment and to the social and cultural worlds they create and inhabit. The field provides insight into biological and sociocultural evolution and includes a focus on economic, social, and political organizations, symbolic systems, and social systems. Comparative studies of these and other aspects of past and present cultures yield information on regularities and differences.

Undergraduate Programs

The department offers a Bachelor of Arts and a Bachelor of Science in anthropology. Either program is appropriate preparation for advanced training or careers in anthropology, allied fields, and professional programs. Students who complete an anthropology major gain special understanding of human relations and expertise for jobs involving international or cross-cultural work, cultural resource management, and social and ethnic diversity in the United States.

Upon graduation, anthropology majors embark on careers in government work, international affairs, public health, gerontology, urban and regional planning, conservation, social work, marketing, museum work, and education. Others pursue graduate study in law, business, and health care as well as anthropology and related social science disciplines. Some are employed in cultural resource management.

The department also offers a minor in anthropology.

Bachelor of Arts, Bachelor of Science

The Bachelor of Arts in anthropology requires a minimum of 120 s.h., including 33 s.h. of work for the major. The Bachelor of Science in anthropology requires a minimum of 120 s.h., including 42 s.h. of work for the major. The B.A. is designed to offer a comprehensive overview of anthropology's four main subfields and the broadest possible cross-cultural background. The B.S. is designed for students with strong interest in physical anthropology, archaeological lab work, and quantitative approaches within sociocultural or linguistic anthropology.

B.A. and B.S. students may elect to complete one of three optional emphasis areas; see "Undergraduate Emphasis Areas" below.

All students majoring in anthropology, including transfer students, must earn a minimum of 15 s.h. for the major at The University of Iowa. Students may apply credit earned at approved field schools offered by other institutions toward the major, with Department of Anthropology approval.

Students must complete the College of Liberal Arts and Sciences General Education Program.

Students who declare anthropology as their major when they are admitted to the College of Liberal Arts and Sciences are advised at the Academic Advising Center until they have earned 24 s.h. Students who have earned more than 24 s.h. are advised in the department. Students are assigned an advisor based on faculty advisor loads and student interests.

Common Requirements

All anthropology majors (B.A. or a B.S.) must complete the following requirements.

One of these (students may count only one toward the major):

113:003 Introduction to the Study of Culture and Society 3 s.h.
113:010 Anthropology and Contemporary World Problems 3 s.h.
All of these:

113:012 Introduction to Prehistory 3 s.h.
113:013 Human Origins 3 s.h.
113:014 Language, Culture, and Communication 3 s.h.
113:050 Issues in Anthropology 3 s.h.
One 100-level course in archaeology (area or topical) or biological anthropology 3 s.h.
One 100-level course in sociocultural or linguistic anthropology 3 s.h.
One 100-level course in area studies 3 s.h.
Three 100-level electives 9 s.h.

Anthropology electives offer many choices, including courses dealing with biological anthropology, environment and culture, expressive culture (art, verbal arts, literature, music, and dance), gender, human evolution, human evolutionary anatomy, human osteology, human prehistory, identity, language and culture, medical anthropology, psychological anthropology, religion and ritual, and urban anthropology. Department faculty members offer area studies courses on Latin America, Africa, Europe, Japan, the Caribbean, the Middle East, South Asia, and Native North America.

**Additional Bachelor of Arts Requirements**

Students pursuing the B.A. are strongly encouraged to participate in archaeological field and laboratory research, independent studies in sociocultural anthropology, or linguistic anthropology research.

**Additional Bachelor of Science Requirements**

Students pursuing the B.S. must fulfill requirements in the following areas.

A quantitative, mathematical, or formal reasoning tool: at least two courses, minimum 6 s.h.

Directed laboratory or field research: at least one course, 3 s.h. (credit may be applied to honors major when appropriate)

Allied topical course work (related minor)

**Quantitative, Mathematical, or Formal Reasoning Tool**

Students must complete a minimum of 6 s.h. beyond the courses used to complete the General Education Program quantitative or formal reasoning component. Students select specific courses or course sequences in consultation with their advisors.

**Directed Laboratory or Field Research**

Students complete an approved directed research requirement (minimum of 3 s.h.) consisting of one of the following.

Laboratory research: a laboratory practicum in anthropology research labs or independent, faculty-guided, laboratory research, including use of the collections of the Office of the State Archaeologist.

Field research project: faculty-advised projects involving the collection of primary data in a fieldwork setting.

A University of Iowa field school program or approved equivalent (current field school is Plum Grove Historical Archaeology).

An approved internship: typical approved internships include work in cultural resource management firms, museums, and public health research or education projects. To receive research credit for an internship, students must make a final report to their faculty advisor, summarizing the work accomplished or presenting materials that document the nature of the work.

**Allied Topical Course Work**

Students complete a topical specialization in one of the following allied fields: biology, chemistry, computer science, economics, geography, geoscience, global health studies, health and sport studies, integrative physiology, linguistics, mathematics, psychology, science education, or statistics and actuarial science. Minors (or at least five courses) in other fields, chosen in consultation with the student's advisor, may be applied toward this requirement.

**Undergraduate Emphasis Areas**

The department offers three optional undergraduate emphasis areas: gender and culture, cultural resource and heritage management, and environmental anthropology. Students majoring in anthropology may use an emphasis
area to provide a particular focus in their study plan. Students in other majors may complete an emphasis area in
order to add a focus to the minor in anthropology.

Each emphasis area reflects broad issues bridging subfields in and outside of anthropology. Completion of an
emphasis area indicates considerable expertise and is noted on the student's transcript.

Each emphasis requires five courses (15 s.h.). With careful course selection, students majoring in anthropology can
complete an emphasis area without adding to the semester hours required for graduation.

Gender and Culture Emphasis

Anthropological research regarding gender and sexuality has grown dramatically in recent years, enhancing and
drawing from other theoretical and methodological approaches within the discipline. Such studies contribute a
cross-cultural perspective to the discussion surrounding these fundamental aspects of human experience, both in
academia and in public life.

The gender and culture emphasis requires five courses (15 s.h.) chosen from the following list. Each course provides
an integrated overview of essential theoretical and topical issues in the field.

Cultural Resource and Heritage Management Emphasis

In North America and throughout much of the rest of the world, modern land use continually threatens evidence of past
land use. Most archaeological excavations are conducted as cultural resource management (CRM), so it is essential
that all researchers who work with archaeological data and individuals committed to site preservation have a basic
understanding of CRM. Students who choose this emphasis learn about the field and about how to address related
ethical issues as well as technical and theoretical challenges.

The cultural resource and heritage management emphasis requires five courses (15 s.h.): a fundamental overview
course, two area electives, a technical/practical elective, and a field school course. Students may use some of these
courses to satisfy requirements for the major, such as the 100-level course in archaeology and the 100-level electives.

Fundamental overview course:
113:193 Special Topics in Archaeology   3 s.h.

Area elective courses--two of these (or one of these and one other Department of Anthropology area course):
113:110 Native Peoples of North America  3 s.h.
113:159 Southwestern Archaeology        3 s.h.
113:167 North American Archaeology      3 s.h.
113:172 Historical Archaeology: The Archaeology of the U.S.  3 s.h.
113:179 Pleistocene Peopling of the Americas   3 s.h.
113:181 Archaeology of the Great Plains  3 s.h.

Technical/practical elective course--one of these:
113:153 Raw Materials in Archaeology     3 s.h.
113:158 Animal Bones in Archaeology      3 s.h.
113:160 Introduction to Archaeological Ceramics  3 s.h.
113:162 Practicum in Archaeology         arr.
113:168 Archaeological Methods           3 s.h.
113:189 Approaches to Geoarchaeology     3 s.h.
213:190 Human Osteology 3 s.h.

Field school course—one of these:
113:199 Field Research in Archaeology arr.
An equivalent course from another university

Environmental Anthropology Emphasis

The interaction between humans and the environments they inhabit has long been a central issue in anthropology, and environmental degradation is a worldwide concern today. Pollution, loss of biodiversity, and global warming recognize no political boundaries, but attitudes and behaviors involving the natural environment vary widely from culture to culture. Understanding and incorporation of these varied perspectives will be vital to the development and successful use of workable solutions.

The environmental anthropology emphasis requires five courses (15 s.h.): two theory courses, which deal primarily with human-environmental interactions; and three area or topical electives, which deal in part with environment, ecology, and subsistence technologies. The following are sample courses in each area.

Theory courses:
113:113 Human Impacts on the Environment 3 s.h.
113:114 Environmentalism Cross-Culturally 3 s.h.
113:139 Religion and Environmental Ethics 3 s.h.
113:143 Environment and Culture 3 s.h.
213:152 Primate Conservation Biology 3 s.h.
113:215 Seminar: Ecological Anthropology 3 s.h.

Area or topical electives:
113:125 Japanese Society and Culture 3 s.h.
113:126 Animals, Culture, and Food 3 s.h.
113:131 Latin American Economy and Society 3 s.h.
113:157 Foodways and Cuisine in the Past 3 s.h.
113:158 Animal Bones in Archaeology 3 s.h.
113:161 Prehistoric People of the Ice Age 3 s.h.
113:164 Comparative Prehistory 3 s.h.
113:178 Hunter-Gatherer Ethnoarchaeology 3 s.h.
113:181 Archaeology of the Great Plains 3 s.h.
113:187 Cultures in Collision 3 s.h.
113:189 Approaches to Geoarchaeology 3 s.h.
113:196 The Archaeology of Ancient Egypt 3 s.h.

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan.

Bachelor of Arts

Before the third semester begins: at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: at least two courses in the major and one-half of the semester hours required for graduation

Before the seventh semester begins: at least seven courses in the major and at least three-quarters of the hours required for graduation

Before the eighth semester begins: at least eight courses in the major

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Bachelor of Science

Before the third semester begins: at least one anthropology course or other course in the major, and one-quarter of the semester hours required for graduation
Before the fifth semester begins: at least four anthropology courses or other courses in the major, one course in the minor area, one course for the quantitative or formal reasoning tool requirement, and one-half of the semester hours required for graduation

Before the seventh semester begins: at least seven courses in the major, three courses in the minor area, the second quantitative or formal reasoning tool course, and at least three-quarters of the hours required for graduation

Before the eighth semester begins: at least nine courses in the major, including the directed research requirement and four courses in the minor area

During the eighth semester: enrollment in all remaining course work in the major and in the minor area, all remaining General Education courses, and a sufficient number of semester hours to graduate

Honors

In addition to the regular requirements for a major in anthropology, honors students pursuing either a B.A. or B.S. conduct an independent research project that culminates in a 30-50 page thesis. The project includes completion of 113:186 Honors Research Seminar, offered only fall semesters, and registration for 113:176 Honors Research, typically the next semester. They also must take one of their anthropology courses at the graduate level. To graduate with honors, students must have a g.p.a. of at least 3.50 in anthropology and be a member of the University of Iowa Honors Program, which requires students to maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University of Iowa Honors Program for more information). For more information about honors in anthropology, contact the department's honors advisor.

Students pursuing a B.S. can count their directed research project or laboratory practicum towards the semester hours needed to complete honors requirements, but meeting the research requirement by itself does not meet the honors requirement. Students must work with their honors thesis advisor to structure their research so that it meets the added requirements of honors work.

Minor

The minor in anthropology requires a minimum of 15 s.h. in anthropology courses, including 12 s.h. in University of Iowa Department of Anthropology courses numbered 113:100 and above and 213:100 and above. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass.

Graduate Programs

The department offers a Master of Arts and a Doctor of Philosophy in anthropology. The graduate program emphasizes continuity from the Master of Arts to the Doctor of Philosophy. The department admits students who seek the Ph.D.; students seeking only the M.A. ordinarily are not admitted.

Graduate students must complete all M.A. requirements before advancing to the Ph.D. program. Entering graduate students are not required to have an undergraduate degree in anthropology. Applicants who hold an M.A. in anthropology from another institution may apply directly for admission to the Ph.D. program.

Once a student completes all requirements for the M.A., his or her committee makes a recommendation to the faculty concerning the students’ potential for completing the Ph.D. The committee recommends continuation or dismissal from the program.

Master of Arts

The M.A. in anthropology requires 30-36 s.h. of graduate credit, depending on the student's previous anthropological training. Students may count a maximum of no more than 9 s.h. earned in courses outside anthropology toward the M.A. in anthropology. The degree normally is awarded to students after two years in the graduate program.

During the first semester of the M.A. program, students are advised by the director of graduate studies. By the end of the second semester, they must select an advisor and begin forming an M.A. committee. In consultation with the committee, the student develops a research project and writes an M.A. paper. The committee must approve the M.A. paper by the end of the fourth semester of study. The student also publicly presents the paper. As an alternative to the M.A. paper, students may choose to write a formal M.A. thesis, which must follow the Graduate College thesis guidelines. Students must submit a final copy of their M.A. thesis or paper to the department.

GENERAL COURSE WORK

M.A. students must complete core seminars in at least three of four subfields, for a total of 9 s.h. Core seminars are chosen from the following.
In addition, all students are required to take 113:210 Anthropological Data Analysis or another course in statistics within the first three years of graduate study, preferably during the M.A. program (first two years of graduate study).

ELECTIVES

In consultation with their advisor and committee members, students select additional course work to complete the remaining semester hours required for the M.A. Elective hours may include courses in other disciplines, directed study, or up to 6 s.h. of M.A. thesis credit for students who choose the thesis option.

Doctor of Philosophy

The Doctor of Philosophy in anthropology requires a minimum of 72 s.h. of graduate credit. The Ph.D. represents a balance between general anthropological competence obtained at the M.A. level and professional specialization and competence for independent research and teaching in one of four subfields: sociocultural anthropology, linguistic anthropology, archaeology, and biological anthropology.

Ph.D. students also may elect to pursue a concentration in feminist anthropology or paleoanthropology. See "Concentrations" below.

To ensure focus on the student's research interests, the department has an integrated process of simultaneous preparation of reading lists, research proposals for submission to granting agencies, dissertation proposal, and position papers. In order to complete the degree, all doctoral candidates are required to complete appropriate course work and the Ph.D. comprehensive process, carry out original anthropological research, and write and defend a dissertation. Students work closely with their advisor and committee at all stages.

In the first semester after completing the M.A. (or the first semester in the program for students who enter with an M.A. in anthropology from another institution), the student selects an advisor. By the end of the second semester, the student selects a committee to oversee his or her completion of the comprehensive process.

Students immediately begin consulting with their advisor, and eventually their committees, to start compiling an annotated bibliography of works relevant to future research. The annotated bibliography is a working document for the student's use in the Ph.D. program; it is not a formal requirement and does not require formal review.

In the third and fourth semesters of the program, the student completes the comprehensive process. Then he or she may select a dissertation committee.

REQUIRED COURSE WORK

Students should take all lecture courses and seminars that are relevant to the areas they intend to cover in their position papers. A maximum of 18 s.h. earned in non-anthropology courses may be counted toward the 72 s.h. required for the Ph.D., including the maximum of 9 s.h. that can be counted toward the master's degree.

Students must not rely heavily upon independent study courses.

Students must take at least one theory course beyond the course they took to fulfill the master's requirements in their specialization subfield. This course should be chosen from one of the following lists.

**Sociocultural Anthropology**

- 113:215 Seminar: Ecological Anthropology 3 s.h.
- 113:220 Seminar: Feminist Anthropology 3 s.h.
- 113:223 Feminist Medical Anthropology 3 s.h.
- 113:240 Seminar Sociocultural Anthropology 3 s.h.
- 113:241 Economic Anthropology 3 s.h.
- 113:244 Seminar: Semiotics 3 s.h.
- 113:250 Seminar: Ritual and Performance 3 s.h.

**Linguistic Anthropology**

- 113:123 Language and Nationalism 3 s.h.
- 113:244 Seminar: Semiotics 3 s.h.
All doctoral students must demonstrate reading and/or speaking knowledge of one foreign language. They must meet this requirement before beginning dissertation research.

THE PH.D. COMPREHENSIVE PROCESS

The comprehensive process consists of writing position papers and preparing a research proposal and prospectus defense. According to individual needs and in consultation with the committee, a student selects the order of completing these two tasks.

Successful completion of the comprehensive process advances the student to Ph.D. candidacy.

To remain in good academic standing, students must complete the comprehensive process by the end of the fourth semester in the Ph.D. program. Students who do not adhere to this timeline are placed on departmental probation.

Research Proposal and Prospectus Defense

Working closely with the committee, the student drafts a research proposal for the program of dissertation research and defends a research prospectus before the Ph.D. committee. The defense is open to students and faculty. A copy of the student's dissertation prospectus must be made available in the department office one week before the defense.

Position Papers

Position papers are two essays of publishable quality. One essay concerns the student's geographical area of specialization; the other deals with his or her primary topical area. In some fields (e.g., biological anthropology), a geographical area may not be relevant. The essays are responses to questions the committee prepares in consultation with the student.

Position papers should demonstrate analysis, evaluation, synthesis, and control of a body of information (knowledge and comprehension). They should critique a major problem or debate (application and analysis), and they should develop a position on an issue and provide an explanation or theoretical justification for the position (evaluation and synthesis).

DISSERTATION

All Ph.D. candidates are required to carry out original anthropological research. Students typically conduct dissertation research after defending their research prospectus and writing position papers. Dissertations usually are based on fieldwork. Some are based on data from archival collections, laboratory projects, collections, or other source materials.

Concentrations

In addition to their required course work in the four Ph.D. subfields, students may complete a concentration in feminist anthropology or paleoanthropology. Each concentration reflects broad issues bridging subfields in and outside of anthropology.

Completion of a concentration indicates substantial expertise. It is recognized as a department credential and may be
added to a student's curriculum vitae.

FEMINIST ANTHROPOLOGY CONCENTRATION

The feminist anthropology concentration offers broad training in a growing specialization area that enhances and draws from other theoretical approaches in anthropology. Graduate students in anthropology and other disciplines may explore particular aspects of the field by taking feminist anthropology courses.

Course work in the concentration emphasizes feminist perspectives, theories, methods, and analytic techniques in anthropology. It improves students' academic job prospects in anthropology and other fields, especially women's studies and gender studies. It also helps students prepare for careers in applied or public anthropology.

Feminist anthropology students take 15 s.h. of course work in the concentration in addition to their regular core requirements. The 15 s.h. should be divided between graduate seminars and elective courses as noted below.

Concentration courses may fulfill requirements for graduate electives in anthropology.

Feminist anthropology was offered as a track in the Master of Arts in academic year 2006-07 and earlier. Students who took courses as part of the M.A. track may count them toward the Ph.D. concentration.

The following list of approved courses is subject to change; contact the Department of Anthropology for updates. Students may petition to count other courses in anthropology or other disciplines toward the concentration, if the courses or the students' work in them includes significant relevant content. Petitions are reviewed by the feminist anthropology faculty.

Graduate Seminars

Students complete at least two of these (minimum of 6 s.h.) and may count additional graduate seminar courses as elective credit.

113:220 Seminar: Feminist Anthropology 3 s.h.
113:221 Seminar: Feminist Ethnography 3 s.h.
113:223 Feminist Medical Anthropology 3 s.h.
113:273 Seminar: Language and Gender 3 s.h.
113:290 Feminist Perspectives on Biology and Culture 3 s.h.

Electives

Students must earn a minimum of 9 s.h. in electives and may count extra credit earned in graduate seminars toward the elective requirement.

113:102 Ethnography and Auto/Biography 3 s.h.
113:105 Mothers and Motherhood 3 s.h.
113:107 Gendering India 4 s.h.
113:133 The Anthropology of Women's Health 3 s.h.
113:141 History of Feminist Anthropology 3 s.h.
113:152 Japan and Other Cultural Constructs 3 s.h.
113:154 Anthropology of Sexual Minorities 3 s.h.
113:180 Women Writing Culture 3 s.h.
113:182 Women, Health, and Healing 3 s.h.

PALEOANTHROPOLOGY CONCENTRATION

The paleoanthropology concentration offers broad training that combines archaeology and biological anthropology, two traditional subfields of anthropology important in understanding the biocultural factors that have been critical in human evolution. The concentration combines course work in both biological and archaeological anthropology, complementing the specialized training that students from either subfield receive in their own specialization. Paleoanthropology courses emphasize integration of biological and cultural factors in the evolution of hominid species up to and including modern humans. They encompass primate and human evolutionary anatomy, technology and subsistence in Paleolithic archaeology, and modern human hunter-gatherers.

Paleoanthropology students take 15 s.h. of course work in the concentration in addition to their regular core requirements. The 15 s.h. should be divided between graduate seminars and elective courses as noted below.

Students may choose core seminars to fulfill requirements for both the M.A. general course work and the paleoanthropology concentration.
The following list of approved courses is subject to change; contact the Department of Anthropology for updates. Students may petition to count other courses in anthropology or other disciplines toward the concentration, if the courses or the students' work in them includes significant relevant content. Petitions are reviewed by the paleoanthropology faculty.

Graduate Seminars

All of these (9 s.h.):

113:268 Seminar: Archaeological Theory and Method 3 s.h.
113:285 Seminar: Biological Anthropology 3 s.h.
113:288 Seminar: Paleoanthropology 3 s.h.

Electives

At least two of these (6 s.h. minimum):

113:178 Hunter-Gatherer Ethnoarchaeology 3 s.h.
113:258 Seminar: Zooarchaeology 3 s.h.
213:169 Human Evolutionary Anatomy 3 s.h.
213:170 Primate Evolutionary Biology 3 s.h.
213:187 Human Evolution 3 s.h.
213:190 Human Osteology 3 s.h.

Admission

Applicants for admission to the graduate program in anthropology are considered regardless of their previous field of training. Students without previous training in anthropology may be expected to perform additional work necessary to achieve competence expected for their degree objective.

Students normally are admitted directly to the Ph.D. program. For students without an M.A. in anthropology, the first two years of the Ph.D. program are devoted to fulfilling the requirements of the M.A. After those requirements are completed, the student's committee recommends to the faculty whether the student should continue to work toward the Ph.D.

Students with an M.A. in anthropology from another institution may proceed directly into a Ph.D. program organized around their special research interests.

Applicants for admission to the graduate program must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

Applicants are required to submit the following:

- a completed University application form;
- transcripts of all previous undergraduate and graduate work;
- three letters of recommendation from individuals competent to judge the applicant's potential for graduate training;
- Graduate Record Examination (GRE) scores;
- at least one written example of previous work (for example, a term paper).

Applicants whose first or official language is not English and whose previous academic degrees were not earned at an English-language institution must submit scores on the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS).

Applicants with an M.A. from another university must submit a copy of their master's thesis; applicants who earned an M.A. without thesis or whose thesis is not yet complete should submit written copies of three papers completed in graduate school.

Financial Support

Financial assistance, usually in the form of teaching and research assistantships, is offered to the majority of graduate students in good standing for up to five years. Students making satisfactory and timely progress through the graduate program are in good standing. Eligibility for financial aid is reduced after two years in the M.A. program, after two years in the Ph.D. program, or after one year of postdoctoral fieldwork or research enrollment. The amount and types of aid
depend on departmental needs. The department usually awards financial aid to most entering graduate students every year.

Students are notified in writing of a provisional financial award before the semester or summer session for which the award has been granted. Although awards are made before the end of the previous semester, each award is contingent upon satisfactory completion of that semester's work by the awardee.

### Archaeological Field Research

Under the direction of University archaeologists, students acquire skills in data recovery and interpretive techniques. Opportunities are available for students to participate in archaeological field research in central Mexico, France, the Netherlands, Portugal, Sicily, the U.S. Southwest, or at various sites in the U.S. Midwest. Occasional fieldwork in East and Southeast Asia is available to graduate students in the paleoanthropology research program.

### Resources, Facilities

The department has access to the Iowa Archaeological Collections through the Office of the State Archaeologist and maintains its own archaeological collections (midwestern prehistoric and historical and comparative faunal material).

The department maintains a documented human osteology teaching collection amassed by the University of Iowa Carver College of Medicine and the Department of Anatomy and Cell Biology, and it holds a substantial documented human osteology research collection originally from Stanford University's medical school that is maintained jointly with the Office of the State Archaeologist.

Individual faculty members maintain field laboratories and conduct research outside the United States, maintaining ties with research institutions in foreign countries, including the Teotihuacán Archaeological Research Facility, in Mexico; the Laboratoire d'Ethnologie Préhistorique at Pincevent; the Centre de Recherches Archéologiques at Verberie, in France; the National Museum of Ethnology in Japan; the Institute of Technology Bandung (ITB), in Indonesia; the Gemeente Nijmegen, Bureau Archeologie, Nijmegen, the Netherlands, and the Deutsches Archäologisches Institut of Madrid.

The department also has well-equipped laboratories for the study of archaeology, biological anthropology, and a state-of-the-art multimedia linguistic anthropology laboratory.

The University is a charter member of the Human Relations Area Files (HRAF), an extensively annotated set of source materials on the peoples of the world--their environments, behavioral patterns, social lives, and cultures. Through HRAF and other library resources, anthropology students have access to source materials on more than 400 different cultures.

The University's exchange programs for Iowa students provide opportunities and some scholarships for study abroad.

### Faculty

Members of the anthropology faculty have studied and lived in Africa, Asia, the Caribbean, Europe, Mexico and Central America, Pacific Islands, South America, and the United States. Recent field research has been conducted in Angola, Belgium, Brazil, Cameroon, China, Czech Republic, Ecuador, Fiji, France, Greece, Honduras, India, Indonesia, Italy, Japan, Mexico, Mozambique, Myanmar (formerly Burma), the Netherlands, Peru, Philippines, Portugal, Russia, Tanzania, the Gambia, the United States, and Vietnam.

Current faculty interests include patterns of political and economic development of emerging nations; the trade in Mexican folk art, material culture, human rights; indigenous movements; visual culture and indigenous media; gender and the cultural politics surrounding sobriety in native North America; the cultural production of scientific knowledge about racial/ethnic disparities in infant mortality in U.S. public health; stress, blood pressure, and social support in Mozambique; coping strategies in post-war Angola; power, memory, and social inequality in ancient Iberia; language and gender; expressive culture and performance in the Brazilian Amazon; language and social justice; Sanskrit, colonial linguistics, cultural politics of language, religion, and ethnicity; spiritual tourism in India; community and conflict, ritualization, localized religion, and environmentalism in Japan; ethnic minorities in Japan; diasporas, love, and romantic relations, culture, and totalitarianism in North Korea; paleoanthropological investigations of Pleistocene karst caves in China and northern Vietnam; geological and paleoanthropological field surveys of the Plio-Pleistocene Sangiran Dome, in Java; Neanderthal craniofacial form, function, and evolutionary history; anatomical modernity and the origins of modern humans; historical archaeology of Iowa; molecular anthropology, primate molecular ecology, primate conservation biology, primate evolutionary history; precontact state systems and the historical archaeology of the Basin of Mexico; faunal and spatial analyses from Paleolithic sites in France and the Ukraine; regional interaction and migration in late-prehistoric North America; peopling of the Americas; human impacts on the environment in North America.
Anthropology Courses

For Undergraduates

**113:003 Introduction to the Study of Culture and Society**  
Comparative study of culture, social organization. GE: Social Sciences.  
3 s.h.

**113:010 Anthropology and Contemporary World Problems**  
Selected world problems from an anthropological perspective; current dilemmas and those faced by diverse human groups in recent times and distant past. GE: Social Sciences.  
3 s.h.

**113:012 Introduction to Prehistory**  
Data, theories of evolution of human cultures from end of Pleistocene to emergence of complex societies; emphasis on prehistoric cultural information from world areas from which relatively complete sequences are available. GE: Historical Perspectives.  
3 s.h.

**113:013 Human Origins**  
Processes, products of human evolution from perspectives of heredity and genetics, evolutionary theory, human biological characteristics, fossil record, artifactual evidence, biocultural behaviors. GE: Natural Sciences.  
3 s.h.

**113:014 Language, Culture, and Communication**  
Human language in context of animal communication; development, acquisition of language; biological base; language as a linguistic system in cultural social context. GE: Social Sciences.  
3 s.h.

**113:020 Introduction to Midwestern Prehistory**  
Prehistoric cultural sequence of Iowa viewed against background of North American prehistory; current and future research. Same as 149:020.  
3 s.h.

**113:029 First-Year Seminar**  
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g. films, lectures, performances, readings, visits to research facilities). Prerequisite: first- or second-semester standing.  
1 s.h.

**113:050 Issues in Anthropology**  
In-depth exploration of methodological and theoretical issues in contemporary anthropology; emphasis on critical reading of primary texts.  
3 s.h.

**113:051 Diversity in Action in American Society**  
Consequences of American racial and cultural diversity as related to contemporary social issues and professional careers; assumptions that define diversity as a problem for educators.  
1-3 s.h.

**113:060 Forensic Anthropology and CSI**  
Role and range of techniques used in forensic anthropology; how analysis of skeletal and nonskeletal remains is used in crime scene investigation; case studies.  
3 s.h.

**113:061 Anthropology of Tattoos and Body Modification**  
Cross-cultural perspective on corporal modification; how people communicate and inscribe cultural and personal significance on the body; tools used, from ink to scalpel.  
3 s.h.

**113:062 Anthropology of Violence**  
Sources and manifestations of violence; violence in varied contexts—war, genocide, colonialism, state violence, terrorism, domestic violence; anthropological perspective considering structural, economic, and symbolic violence.  
3 s.h.

**113:063 Fifth Great Ape: Our Primate Heritage**  
Human behavior and ecology viewed through the gap between nonhuman and human primates; adaptations, interactions of free-ranging species, cognition of higher primates in behavioral study.  
3 s.h.

**113:064 The Evolution of Human Sex**  
3 s.h.
How evolution has shaped our sexual behavior; patterns of mate choice, parental behavior, social organization, cooperation, and conflict as responses to selection pressure; sexual selection, reproductive strategies, mate choice, sex roles and practices.

113:065 **Anthropology, Science Fiction, and Fantasy** 3 s.h.
Connections between anthropology and science fiction and fantasy; science fiction and fantasy films and literature surveyed and examined in light of scholarly essays on anthropological concepts such as human evolution, race, gender, the anthropological *other*.

113:066 **The Anthropology of Virtual Worlds** 3 s.h.
How virtual reality intertwines with social existence; anthropological exploration of virtual worlds, from checking e-mail to setting up bar crawls on Facebook; forms of virtual identity, how virtual life affects language.

113:075 **Individual Study** 1-3 s.h.
Readings in area or subdivision of anthropology in which student has had basic course work. Prerequisite: consent of instructor.

**Advanced Courses**

**General Anthropology**

113:103 **Introduction to Museology** 3 s.h.
Overview of museum history, function, philosophy, collection and curatorial practices, governance and funding issues, exhibition evaluation, audience studies; American cultural institutions. GE: Humanities. Same as 024:102, 07S:112, 097:115.

113:147 **Special Topics in Anthropology** 2-3 s.h.
Problems, concepts involved in comparing and contrasting behavior and ideas of different cultures.

113:148 **Special Topics in Anthropology** 2-3 s.h.
Problems, concepts involved in comparing and contrasting behavior and ideas of different cultures.

113:149 **Special Topics in Anthropology** 2-3 s.h.
Problems, concepts involved in comparing and contrasting behavior and ideas of different cultures.

113:209 **Research Design and Proposal Writing** 3 s.h.
Anthropological research design; preparation of proposals for fieldwork or laboratory analysis.

113:210 **Anthropological Data Analysis** 3 s.h.
Quantitative procedures for analyzing field data, library materials; elementary statistics, introduction to computers.

113:215 **Seminar: Ecological Anthropology** 3 s.h.
Individual and group responses to ecological problems; causes and consequences of resource shortages, population growth, environmental destruction; conflicts over access to natural resources.

113:235 **Graduate Teaching Pro-Seminar** 1 s.h.
Graduate student teaching skills: developing course guidelines, leading discussion, grading, review sessions, dealing with problem students and complaints; development of syllabi and teaching portfolios; mentoring of less-experienced teaching assistants. Repeatable.

**Area Studies**

The following archaeology courses may be used to fulfill the area studies requirement: 113:117 The Maya: Archaeology and Ethnohistory, 113:130 Archaeology of the Iberian Peninsula, 113:150 Tribes and Chiefdoms of Ancient Europe, 113:159 Southwestern Archaeology, 113:163 Archaeology of Mesoamerica, 113:166 The Aztecs, Their Predecessors, and Their Contemporaries, 113:167 North American Archaeology, 113:177 Celtic Archaeology, 113:181 Archaeology of the Great Plains, 113:192 Greek Archaeology and Ethnohistory, 113:194 Roman Archaeology, and 113:196 The Archaeology of Ancient Egypt. No single course may be used to fulfill both area studies
and archaeology requirements.

</table>
Cultural politics involved in cultural representation; varied forms of cultural performance and display; social and power relationships between producers, consumers, represented subjects. Prerequisite: two courses chosen from 113:003, 113:010, 113:012, 113:013, and 113:014.

113:105 Mothers and Motherhood
Treatment of motherhood; role of motherhood and devaluation of social status. Same as 131:142.

113:106 The Anthropology of War and Peace
Fundamentals of human social conflict that lead to national wars, and how peace is made; perspectives from anthropological works. Prerequisite: 113:003 or 113:010.

113:108 Anthropology of Marriage and Family
Classic anthropological theories of kinship and marriage, including topics such as cousin marriage and incest; recent work on new reproductive technologies and transnational marriage. Same as 131:108.

113:109 Literature and Anthropology
Topics vary. Same as 008:151, 048:151.

113:114 Environmentalism Cross-Culturally
Culturally constructed perceptions of nature, and their expression through environmental movements; why such movements emerge, techniques they employ, factors that contribute to their success or failure; alternative ways of conceptualizing the environment. Prerequisite: 113:003 or 113:010.

113:116 Urban Anthropology
Cross-cultural approach to urban anthropology; urbanizing processes, migration and adaptation, aspects of class and ethnicity in urban settings, urban economic relations. GE: Social Sciences.

113:121 Health of Indigenous Peoples
Health problems and services for indigenous populations worldwide, from perspective of Fourth World postcolonial politics. Prerequisite: 113:003 or 113:010 or consent of instructor. Same as 149:121, 152:121.

113:124 Colonialism and Culture
Effects of the colonial encounter on the European colonizers and colonized populations: cultural effects and colonial modernities through varied thematic, sociohistorical, and geographic contexts. Prerequisite: 113:003 or 113:010 or consent of instructor.

113:128 Faces of Culture
Human subsistence and adaptation to environment in cultures from all continents; cross-culture comparisons and general themes.

113:133 The Anthropology of Women's Health
How female gender intersects with culture, environment, and political economy to shape health and illness; reproductive health, violence, drug use, cancer; readings in anthropology, public health. Prerequisite: 113:003 or 113:010 or 131:010 or consent of instructor. Same as 131:133, 172:133.

113:135 Psychological Anthropology
Cultural diversity in constructions of self, mind, and emotion; religious experience, altered states of consciousness, behavioral disorders. Prerequisite: 113:003 or 113:010.

113:136 Applied Anthropology
Practical health, environmental, and social problems viewed through an anthropological framework; how anthropological approaches are used to recognize and address applied problems.

113:137 The Anthropology of Love
The culturally diverse concept and practice of love as seen through cross-cultural and interdisciplinary texts on romantic and other forms of love.

113:139 Religion and Environmental Ethics

How humans conceptualize the biophysical environment through religious beliefs and practices; how images of the environment influence people's activities, how they are used by grassroots environmental movements. Prerequisite: junior or senior standing or consent of instructor. Same as 032:130, 033:139.

<td>Women Writing Culture</td>
<td>3 s.h.</td>
</tr>
<tr>
<td></td>
<td>Feminist ethnography and other kinds of feminist narratives that &quot;write culture&quot; while pushing the boundaries of how anthropologists define ethnography. Prerequisite: 113:003 or 131:010. Same as 131:165.</td>
<td></td>
</tr>
<tr>
<td>113:182</td>
<td>Women, Health, and Healing</td>
<td>3 s.h.</td>
</tr>
<tr>
<td></td>
<td>Women's experience as recipients and providers of health care; intersection of race, class, cultural variation, and women's health; reproductive and nonreproductive health concerns. Same as 131:143.</td>
<td></td>
</tr>
<tr>
<td>113:184</td>
<td>Anthropology and International Health</td>
<td>3 s.h.</td>
</tr>
<tr>
<td></td>
<td>Anthropological contributions to and critiques of the international health enterprise; case studies illustrating anthropology and international health's intersection, and their differences. Offered spring semesters. Same as 152:184, 172:131.</td>
<td></td>
</tr>
</tbody>
</table>
113:185 Medical Anthropology  
Major theoretical, methodological approaches; international health and development; biomedicine as a cultural system; ethnomedicine; anthropology and AIDS, human reproduction, epidemiology, ethnopsychiatry. Prerequisite: 113:003 or 113:010 or consent of instructor. Same as 152:185, 172:173.

113:191 Anthropology of Play  
Fundamental logic and variation of what is considered human play in diverse cultures. Prerequisite: 113:003 or 113:010.

113:201 Seminar: Anthropological Theory  
Contemporary theoretical issues in sociocultural anthropology.

113:202 Ethnographic Field Methods  
Basic data-gathering techniques for field research in sociocultural anthropology. Prerequisite: anthropology graduate standing or consent of instructor. Same as 172:202.

113:208 Foundations of Ethnomusicology  
Ethnomusicology in relation to domains of musical, humanistic, social science scholarship on expressive culture and artistic processes. Prerequisites: senior standing and consent of instructor. Same as 025:319.

113:220 Seminar: Feminist Anthropology  
Theory, methods, research, epistemology from a feminist perspective. Prerequisite: consent of instructor. Same as 131:220.

113:221 Seminar: Feminist Ethnography  
Feminist critiques of traditional ethnographies, informed by contemporary feminisms. Prerequisite: 113:220 or 131:220 or consent of instructor. Same as 131:245.

113:222 Reading Transnational Feminist Theory  
Issues in transnational feminist scholarship, including colonialism, globalization, the nation-state, religion, cultural traditions, and human rights, in global and U.S. domestic contexts; interdisciplinary readings with focus on anthropology, other social sciences. Same as 131:222.

113:223 Feminist Medical Anthropology  
Directions feminists have taken in medical anthropological scholarship; focus on ethnographies that have become classics of the genre and on influential theoretical and applied work. Prerequisite: consent of instructor. Same as 131:223.

113:240 Seminar Sociocultural Anthropology  
Social institutions in the world’s societies; problems in theory, method, interpretation. Prerequisite: anthropology graduate standing.

113:241 Economic Anthropology  
Economic decision making; social institutions associated with production, distribution, consumption of goods; effects of economic development programs. Prerequisite: anthropology graduate or honors standing or consent of instructor.

113:247 Crossing Borders Seminar  

113:248 Crossing Borders Proseminar  

113:250 Seminar: Ritual and Performance  
Approaches to comparative study of ritual in religious and secular contexts.

113:251 Seminar: Resistance in Theory and Practice  
Various forms of political resistance, some bold and dramatic (peasant rebellions), others more subtle and mundane (dissimulation, false compliance, pilfering); some resistance is symbolic (millenarian movements, rituals of conflict, status reversal); learning to recognize and attend to more subtle forms.
113:272 Seminar: Medical Anthropology
Recent developments and innovative theoretical advances in medical anthropology. Prerequisite: 113:185 or equivalent or consent of instructor. Same as 172:272.

Archaeology
The following archaeology courses may be used to fulfill the area studies requirement: 113:117 The Maya: Archaeology and Ethnohistory, 113:130 Archaeology of the Iberian Peninsula, 113:150 Tribes and Chiefdoms of Ancient Europe, 113:159 Southwestern Archaeology, 113:163 Archaeology of Mesoamerica, 113:166 The Aztecs, Their Predecessors, and Their Contemporaries, 113:167 North American Archaeology, 113:177 Celtic Archaeology, 113:181 Archaeology of the Great Plains, 113:192 Greek Archaeology and Ethnohistory, 113:194 Roman Archaeology, and 113:196 The Archaeology of Ancient Egypt. No single course may be used to fulfill both area studies and archaeology requirements.

113:113 Human Impacts on the Environment
Long-term patterns of human-environment interactions surveyed through archaeological case studies; varied scales of human impacts, including animal extinction, habitat destruction, agricultural practices, urban growth, state-level societies. GE: Social Sciences.

113:117 The Maya: Archaeology and Ethnohistory
The Maya of Guatemala, Honduras, El Salvador, Belize, and Mexico from the end of the Pleistocene to the 19th century C.E.; achievements in art, science, religion, and social and political systems.

113:126 Animals, Culture, and Food
The varied roles animals have played in human society through time; impact of humans on animal populations, ethical aspects of animals' roles in modern societies.

113:130 Archaeology of the Iberian Peninsula
Introduction to archaeology of the Iberian Peninsula, from earliest human occupation through period of Romanization.

113:138 Archaeological Approaches to Social Change
How archaeologists identify, explain, and interpret social change in the material record of the ancient past; archaeological evidence and explanations—drawn from case studies worldwide and theoretical perspectives—for population growth, migration, colonization, centralization, stratification, conflict, regionalism, devolution, specialization, and standardization. Prerequisite: 113:012.

113:150 Tribes and Chiefdoms of Ancient Europe
Archaeology of European societies between the Mesolithic and Iron Age; how ideas about Europe's prehistoric past have been used for political purposes. Prerequisite: 113:012 or graduate standing or consent of instructor.

113:153 Raw Materials in Archaeology
Raw materials used in traditional technologies such as ceramics, chipped stone tools, metallurgy; field trips, laboratory analyses, comparisons to prehistoric artifacts. Prerequisite: 113:012.

113:157 Foodways and Cuisine in the Past
Anthropological and archaeological perspective on cuisine; present-day links between food and culture; past cuisines viewed through written documents and archaeological data; histories of different foods.

113:158 Animal Bones in Archaeology
Use of faunal material in interpretation of archaeological remains, including skeletal anatomy, identification, taphonomy, determination of age and sex, seasonality, quantification, sampling, breakage and cutmarks, interpretations; laboratory sessions. Prerequisite: 113:012.

113:159 Southwestern Archaeology
Anthropological overview of prehistoric cultures of the American Southwest; emphasis on understanding archaeological arguments concerning major processes in the past. Same as 149:159.

113:160 Introduction to Archaeological Ceramics
Basic analytical techniques for archaeological ceramics, applied primarily to ceramics from midwestern and western North America; raw materials, manufacture, decoration and style, craft specialization, use, and discard. Prerequisite: 113:012 or consent of instructor.

113:161 Prehistoric People of the Ice Age 3 s.h.
Hominid occupation of Old World during Pleistocene; hominid fossils, artifacts, settlement patterns, climatic reconstruction, evolutionary processes; survey and evaluation. Prerequisites: 113:012 and 113:168, or consent of instructor.

113:162 Practicum in Archaeology arr.
Intensive, hands-on examination of a wide range of materials recently recovered from archaeological sites; pottery, lithics (stone tools and related items), plant remains, animal bones; for students with strong archaeological interests or archaeological field experience. Prerequisite: consent of instructor.

113:163 Archaeology of Mesoamerica 3 s.h.
Archaeological data related to the evolution of civilization in Mesoamerica; sequence from hunter-gatherers to A.D. 1519; emphasis on Central Mexico, Maya area, Oaxaca. Prerequisite: 113:012 or anthropology graduate standing or consent of instructor.

113:164 Comparative Prehistory 3 s.h.
Cultural evolution in Old World, New World; emphasis on developments from pre-agricultural societies to appearance of urban civilizations; focus on Mesoamerica, Central Andes, Near East, Egypt, Indus Valley, China. Prerequisite: 113:012 or anthropology graduate standing or consent of instructor.

113:165 Mesoamerican Reading, Writing, and Arithmetic 3 s.h.
Basic presentation of Aztec, Zapotec, and Maya literature and science; notational techniques used in writing and mathematics, taken from archaeology and ethnohistory; world views and cosmology viewed through literature and science. Prerequisite: 113:003 or 113:010 or 113:012 or 113:013 or 113:014 or graduate standing.

113:166 The Aztecs, Their Predecessors, and Their Contemporaries 3 s.h.
Background for development of Aztec state, nature of civilization encountered by Spaniards in 1519, contemporary peoples affected by Aztecs. Prerequisite: 113:012 or anthropology graduate standing or consent of instructor.

113:167 North American Archaeology 3 s.h.
Prehistoric cultural development north of Mexico from initial occupation to European contact and conquest; emphasis on dynamics of culture change. Same as 149:167.

113:168 Archaeological Methods 3 s.h.
Current theoretical approaches, methods used to investigate the past; site formation processes, taphonomy, sampling and research design, typology and seriation, subsistence-settlement reconstruction, cultural evolution. Prerequisite: 113:012.

113:169 Lithic Analysis in Archaeology 3 s.h.
Archaeological issues examined and addressed with lithic data; use of lithic data to study the past, specific techniques applied. Prerequisite: 113:012 or graduate standing.

113:172 Historical Archaeology: The Archaeology of the U.S. 3 s.h.
Cultures examined through archaeological and historical data. Prerequisite: 113:012.

113:174 Seminar: Taphonomy 3 s.h.
Taphonomy (study of fossil record in paleontology and archaeology); processes for accumulation, modification, and deposition of remains in prehistory; instruction by archaeologist and paleontologist. Prerequisite: graduate standing or consent of instructor. Same as 012:174.

113:177 Celtic Archaeology 3 s.h.
Archaeology and ethnohistory of Celtic societies of Iron Age Europe; patterns and variation in economies, sociopolitical organization, religion; relationships between Iron Age Celts and modern descendants.

113:178 Hunter-Gatherer Ethnoarchaeology 3 s.h.
Variability in adaptations of hunter-gatherers on a global scale; emphasis on subsistence, mobility, social organization; archaeological record of prehistoric hunter-gatherers interpreted through study of modern societies. Prerequisite: graduate standing or consent of instructor.

113:179 Pleistocene Peopling of the Americas 3 s.h.
Major themes in earliest human settlement of the Americas, including human mobility, subsistence, technology, human impacts on the environment.

113:181 Archaeology of the Great Plains 3 s.h.
Contrasting lifeways, diets, and technologies that humans used to survive on North America’s Great Plains, from Ice Age hunter-gatherers to Euroamerican homesteaders.

113:187 Cultures in Collision 3 s.h.
Survey of archaeological evidence for differences in human interactions between two or more cultural groups; issues such as ethnicity, war, economy, repression, multiethnic communities.

113:189 Approaches to Geoarchaeology 3 s.h.
Geoarchaeology as multidisciplinary contextual framework for human paleoecology; natural processes that create the archaeological record, approaches to reconstructing landscapes of the past as a context for archaeological deposits; weekend field trip. Prerequisite: 012:136 or 012:172 or 113:161 or 113:164 or consent of instructor. Same as 012:185.

113:192 Greek Archaeology and Ethnohistory 3 s.h.
Archaeology and ethnology of the Greek world, from end of Bronze Age to late Roman Empire; sociocultural processes that influence development and persistence of Greek civilization. Prerequisite: 113:012 or 113:013 or consent of instructor. Same as 20E:118.

113:193 Special Topics in Archaeology 3 s.h.

113:194 Roman Archaeology 3 s.h.
Archaeology and ethnology of Roman civilization from Iron Age eighth-century occupation of the Palatine Hill to the end of the Roman empire in the West, A.D. 476. Prerequisite: 113:012 or 113:013 or consent of instructor. Same as 20E:119.

113:196 The Archaeology of Ancient Egypt 3 s.h.
Introduction to the archaeology of ancient Egypt from predynastic times to Roman Egypt, including monumental architecture; patterns of everyday life; social, economic, and demographic considerations; history of archaeology in Egypt. Prerequisite: 113:012 or consent of instructor. Same as 20E:196.

113:199 Field Research in Archaeology arr.
Beginning skills in site surveying and excavation, lab work, record keeping at nearby prehistoric sites. Prerequisite: consent of instructor.

113:258 Seminar: Zooarchaeology 3 s.h.
Interpretation of faunal material in archaeology; intensive survey of classic and recent literature on taphonomy, skeletal anatomy, population parameters, seasonality, quantification and sampling, butchering patterns, ethnoarchaeology, social and economic inferences. Prerequisite: 113:158 or consent of instructor.

113:268 Seminar: Archaeological Theory and Method 3 s.h.
Development, current status of theory, method in Americanist archaeology. Prerequisite: anthropology graduate standing or consent of instructor.

113:269 Politics of the Archaeological Past 2-3 s.h.
How control over representation and management of the ancient past intersects with the identity of diverse groups, including archaeologists, indigenous peoples, national governments. Prerequisite: 113:268 or consent of instructor.

Biological Anthropology

113:115 The Neanderthal Enigma 3 s.h.
Survey of Neanderthals as the most widely known, yet enigmatic, fossil human lineage; history of discoveries; current interpretations of Neanderthal's origins, anatomy and behavior, relationship to today's people, extinction. Prerequisite: 113:013 or consent of instructor.

</tbody>
</table>
Current understandings of biocultural processes and events underlying Pleistocene human evolution; cross-disciplinary approach combining human paleontology and Paleolithic archaeology. Prerequisites: graduate standing or undergraduate honors standing or advanced undergraduate standing, and consent of instructor.

**113:290 Feminist Perspectives on Biology and Culture**  
Explores feminist analyses of the cultural and historical situatedness of scientific knowledge, topics range from human evolution and primatology to developmental biology and genetics to nuclear physics. Same as 131:290.

**Linguistic Anthropology**

**113:100 Introduction to Linguistics**  
Introduction to the study of human language: sounds and their contrasts and variation, words and meaningful subunits, sentence structure, historical change. Same as 08L:100, 103:100.

**113:122 Bad Language**  
Normative roles of language in society viewed in context of speech forms labeled marginal or deviant; nonstandard speech, joking registers, jargons, and obscene/indecent language from varied speech communities.

**113:123 Language and Nationalism**  
Varied cases of linguistic nationalism; how language has become a powerful symbol for expression of national identity across many contexts and circumstances.

**113:171 Multi-Media Ethnography**  
Skills and tools for using multimedia technologies in ethnographic research and presentations; students conduct research projects using audio and video recording equipment and develop media-based presentations; ethnographic emphasis on contextually situated social interaction. Prerequisite: 113:003 or 113:010 or 113:014 or consent of instructor.

**113:173 Language and Gender**  
Gender-related language variation; current research on gender-specific linguistic forms and usage in the United States and other language communities; introduction to relevant principles of linguistic theory and analysis. GE: Cultural Diversity. Same as 103:150.

**113:244 Seminar: Semiotics**  
Piercian semiotic and Saussurean semiological conceptual frameworks; focus on anthropological, linguistic issues.

**113:271 Seminar: Linguistic Anthropology**  
Fundamental concepts and methods employed in the anthropological study of language; principal areas of current research. Same as 103:220.

**113:273 Seminar: Language and Gender**  
Role of language and discourse in cultural constructions of gender identities and relations, including domination and subordination; theoretical perspectives, methodological approaches that have shaped thought on the language/gender nexus. Prerequisite: 113:220 or 131:220 or consent of instructor. Same as 103:221.

**Individual Reading and Research**

**113:176 Honors Research**  
Project chosen in consultation with honors advisor. Prerequisite: consent of instructor.

**113:183 Independent Study**  
Prerequisite: consent of instructor.

**113:186 Honors Research Seminar**  
Preparation for writing honors thesis, including project conception and research, proposal writing, oral and written presentations of student research. Prerequisite: honors standing in anthropology. Pre- or corequisite: 113:176.

**113:383 Independent Study: Anthropology**

Art and Art History

Director: John Beldon Scott
Associate professors: Thomas R. Aprile, Isabel Barbuzza, Robert Bork, Ronald M. Cohen, David O. Dunlap, Laurel Fannin, Julie Hochstrasser, Rita Jung, Barbara Mooney, Robert Rorex, Susan Chrysler White, Rachel Williams, Jon Winet
Assistant professors: Monica Correia, Bradley Dicharry, John Freyer, Sarah Kanouse, Brenda Longfellow, Mathew Rude
Lecturers: Thomas Christison, Julia Leonard, Laura Young
Undergraduate degrees: B.A., B.F.A. in Art, B.A. in Art History
Undergraduate nondegree programs: Minor in Art, Art History
Graduate degrees: M.A., M.F.A. in Art; M.A., Ph.D. in Art History
Web site: http://www.art.uiowa.edu/

The School of Art and Art History provides a creative, multidisciplinary environment for students of the studio arts, the history of art, and art education. Established in 1936, the school is firmly grounded in the College of Liberal Arts and Sciences. It encourages interaction among its diverse faculty as well as collaboration with related disciplines across campus.

Iowa's art and art history graduates enjoy success as practicing professional artists, professors of art history, teachers, museum directors and curators, theater designers, commercial designers, and art administrators.

During the 2009-10 academic year, courses originally scheduled in the Art Building and Art Building West are being held in other facilities, and the school's main office is located in Seashore Hall, close to the Pentacrest. Visit the School of Art and Art History web site and ISIS for information about studio, office, and classroom sites.

Studio Arts

The studio art program is based on the idea that the philosophical issues of society that are questioned and interpreted by artists are the basis for an artist's work. The diversity of concept and style among School of Art and Art History faculty members encourages students to seek and work toward a keen understanding of themselves as individuals capable of making their own personal statements as part of the philosophical continuum in art's history.

Studying the broad contexts in which art is made, understood, and used by society prepares studio art students to continue work in an academic setting as well as in museums, galleries, and a multiplicity of other venues. Graduate students are especially encouraged to examine the contexts of visual and verbal issues central to their own work and that of their contemporaries.

Undergraduate and graduate studio arts students may concentrate in ceramics, design, drawing, intermedia, jewelry and metal arts, painting, photography, printmaking, or sculpture.

Art History

Art history, a broad intellectual discipline, is central to the humanities. Diverse approaches characterize the school's art history faculty, who have interdisciplinary ties within and beyond the University. Their primary mission is to help students develop skills for exploring issues and problems central to the history of art as a whole as well as to its specialized areas. Because the major in art history stresses the development of critical visual thinking, it prepares students for graduate work in the history of art and for other professional fields as well.

Art Education

The Teacher Education Program in art prepares undergraduate and graduate students for licensure to teach art in grades K-12. Because teaching, like making art, is informed by experience, the art education area has established one of the nation's most extensive preservice teaching programs. Students conduct case studies of individuals making and responding to art, observe art classrooms, teach in a Saturday children's workshop, and participate in artist-in-residence programs in secondary schools. M.A. and Ph.D. students in art education draw on resources in American studies, anthropology, sociology, and the literature, science, and the arts program to prepare for positions as teachers in museums, colleges, or universities, or as art administrators.

Undergraduate Programs

The School of Art and Art History offers a Bachelor of Arts and a Bachelor of Fine Arts in art, and a Bachelor of Arts in art history. All three degrees include an optional Teacher Education Program, in collaboration with the College of Education. The school also offers a minor in art and a minor in art history.

Bachelor of Arts in Art

The Bachelor of Arts in art requires a minimum of 120 s.h., including at least 39 s.h. of work for the major. The program requires a foundation in art history as well as an understanding of the formal traditions and contemporary practices in art.
Undergraduate students concentrating in studio art begin in the program leading to the B.A. and pursue broad-based knowledge in at least four areas of studio art. Students who have proven ability may transfer into the B.F.A. program. Application for transfer to the B.F.A. normally is made early in the junior year. B.F.A. students may select an emphasis in ceramics, graphic design, three-dimensional (3-D) design, drawing, intermedia, jewelry and metal arts, painting, photography, printmaking, or sculpture.

B.A. students in art must earn at least 70 s.h. of credit in non-School of Art and Art History courses; they may count a maximum of 50 s.h. earned in courses offered by the school (art history, studio art, and art education combined) toward graduation. Cross-referenced courses offered by the school may not be counted as non-art electives. Students also must complete the College of Liberal Arts and Sciences General Education Program.

Teacher licensure requirements are the same for B.A. and B.F.A. students; see "B.A. or B.F.A. with Teacher Licensure (Art Education)" below.

### REQUIRED COURSE WORK

The major in art requires the following courses. Not all courses are offered every semester, including required courses. When making a study plan, students should consult with their advisors and ISIS to determine when specific courses will be offered.

Two art history courses chosen from these:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>01H:002</td>
<td>Arts of Africa</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>01H:005</td>
<td>Western Art and Culture Before 1400</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>01H:006</td>
<td>Western Art and Culture After 1400</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>01H:016</td>
<td>Asian Art and Culture</td>
<td>3 s.h.</td>
</tr>
</tbody>
</table>

Two additional art history courses chosen from these:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>01H:001</td>
<td>Art and Visual Culture</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>01H:004</td>
<td>Masterpieces: Art and Cultural Paradigms</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>01H:008</td>
<td>Themes in Global Art</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>01H:010</td>
<td>Tutorial for Majors: Art History as a Discipline</td>
<td>3 s.h.</td>
</tr>
</tbody>
</table>

Any course from 01H:021 through 01H:199

Two foundational studio arts courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>01A:003</td>
<td>Basic Drawing (prerequisite for all studio courses)</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>01A:004</td>
<td>Design Fundamentals (prerequisite for all studio courses)</td>
<td>4 s.h.</td>
</tr>
</tbody>
</table>

Two of these three-dimensional courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>01C:060</td>
<td>Ceramics I</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>01D:021</td>
<td>Problems in Design I: Form and Structure</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>01G:084</td>
<td>Introduction to Jewelry and Metal Arts</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>01J:090</td>
<td>Intermedia I</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>01N:015</td>
<td>Undergraduate Sculpture I</td>
<td>3 s.h.</td>
</tr>
</tbody>
</table>

Two of these two-dimensional courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>01D:028</td>
<td>Graphic Design I</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>01F:007</td>
<td>Life Drawing I</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>01K:009</td>
<td>Painting I</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>01M:011</td>
<td>Introduction to Printmaking</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>01L:034</td>
<td>Beginning Photography</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>or</td>
<td></td>
<td></td>
</tr>
<tr>
<td>01L:036</td>
<td>Beginning Digital Photography</td>
<td>3 s.h.</td>
</tr>
</tbody>
</table>
Electives chosen from School of Art and Art History courses must bring the total credit in art history, studio art, and art education to a minimum of 39 s.h.

**Transfer Students**

Transfer students majoring in art must complete a minimum of 12 s.h. in studio art at The University of Iowa. The studio hours must include work in at least two different studio areas.

Transfer students majoring in studio art must attend transfer portfolio review and show a portfolio of their art to faculty members, who determine students' placement in, or exemption from, the sequence of basic studio courses.

**Study Abroad**

Students who wish to study abroad must meet with the undergraduate advisor before they depart to review approval or pending approval of the studio art and art history courses they plan to take. Upon their return, they meet with the undergraduate advisor to determine which courses require portfolio review. Students may need to bring the original art work they completed during their study abroad back to campus for a portfolio review with a designated faculty member.

**Bachelor of Fine Arts in Art**

The Bachelor of Fine Arts in art requires a minimum of 120 s.h., including 62 s.h. of work for the major (art and art history courses). B.F.A. students may select an emphasis in ceramics, graphic design, three-dimensional (3-D) design, drawing, intermedia, jewelry and metal arts, painting, photography, printmaking, or sculpture.

Prospective B.F.A. students must apply to the program after completing at least two semesters of work in a studio concentration area but before completing 50 s.h. in art (normally early in the junior year). B.F.A. admission reviews are held once each semester. Students who wish to enter the B.F.A. program should consult the faculty in their studio concentration area for information about the required portfolio review.

B.F.A. students in art must earn at least 58 s.h. of credit in non-School of Art and Art History courses; they may count a maximum of 62 s.h. earned in courses offered by the school (art history, studio art, and art education combined) toward graduation. Cross-referenced courses offered by the school may not be counted as non-art electives. Students also must complete the College of Liberal Arts and Sciences General Education Program.

Teacher licensure requirements are the same for B.A. and B.F.A. students; see "B.A. or B.F.A. with Teacher Licensure (Art Education)" below.

B.F.A. students must complete all courses required for B.A. students; see "Required Course Work" under "Bachelor of Arts in Art" above.

In addition, B.F.A. students must complete three courses in a studio concentration area beyond the introductory or beginning course, as well as one introductory course and one advanced course in each of two additional studio areas (minor concentration areas).

B.F.A. students in drawing and painting are required to take 01F:106 Undergraduate Seminar in Drawing and Painting in addition to the three required studio courses for the concentration area. This course work does not count toward the minor concentration areas.

B.F.A. students in painting are required to complete the following sequence:

- 01K:009 Painting I 3 s.h.
- 01K:010 Painting II 3 s.h.
- 01K:049 Painting IV 4 s.h.

Students may enroll in other painting classes in addition to the above sequence.

B.F.A. students must present an exhibition of their studio work, preferably at the School of Art and Art History.

**B.A. and B.F.A. with Teacher Licensure (Art Education)**

Students majoring in art who are interested in teaching in elementary or secondary schools may earn a B.A. or B.F.A. in art with K-12 teacher licensure through the Art Education Program. Art education requires a broad foundation in formation traditions of studio art, substantive knowledge in art history, and art teacher certification course work.

Applications for admission to the Art Education Program must be submitted to the Teacher Education Program in the College of Education, in care of the Office of Teacher Education and Student Services. Application deadlines are June 15 for fall admission, October 15 for spring admission, and March 15 for summer admission.

**B.A. with Teacher Licensure (Art Education)**
The Bachelor of Arts with teacher licensure (art education) requires a minimum of 120 s.h., including at least 42 s.h. of work for the major (art and art history courses). Art education students concentrate in studio art and pursue broad-based knowledge in at least four areas of studio art.

B.A. students in art education must earn at least 70 s.h. of credit in non-School of Art and Art History courses; they may count a maximum of 50 s.h. earned in courses offered by the school (art history, studio art, and art education combined) toward graduation. Cross-referenced courses offered by the school may not be counted as non-art electives. Students also must complete the College of Liberal Arts and Sciences General Education Program.

**REQUIRED COURSE WORK**

The major in art with teacher licensure (art education) requires the following course work.

Two art history courses chosen from these (preferably taken during the first or second year):

- 01H:002 Arts of Africa – 3 s.h.
- 01H:005 Western Art and Culture Before 1400 – 3 s.h.
- 01H:006 Western Art and Culture After 1400 – 3 s.h.
- 01H:016 Asian Art and Culture – 3 s.h.

Two additional art history courses:

- 01H:001 Art and Visual Culture – 3 s.h.
- 01H:004 Masterpieces: Art and Cultural Paradigms – 3 s.h.
- 01H:008 Themes in Global Art – 3 s.h.
- 01H:010 Tutorial for Majors: Art History as a Discipline – 3 s.h.

Any course from 01H:021 through 01H:199

Two foundational studio courses:

- 01A:003 Basic Drawing – 3 s.h.
- 01A:004 Design Fundamentals – 4 s.h.

Three three-dimensional courses:

- 01C:060 Ceramics I – 3 s.h.
- 01C:061 Ceramics II – 3-4 s.h.
- 01G:084 Introduction to Jewelry and Metal Arts – 3 s.h.

Two of these two-dimensional courses:

- 01D:028 Graphic Design I – 3 s.h.
- 01F:007 Life Drawing I – 3 s.h.
- 01K:009 Painting I – 3 s.h.
- 01M:011 Introduction to Printmaking – 3 s.h.

- 01L:034 Beginning Photography – 3 s.h.
- or
- 01L:036 Beginning Digital Photography – 3 s.h.

Electives chosen from School of Art and Art History courses must bring the total credit in art history, studio art, and art education to a minimum of 42 s.h. Students often select two additional studio courses in an emphasis area.

**B.F.A. with Teacher Licensure (Art Education)**

The Bachelor of Fine Arts with teacher licensure (art education) requires a minimum of 120 s.h., including 62 s.h. of work for the major (art and art history courses). Art education students concentrate in studio art and pursue broad-based knowledge in at least four areas of studio art. B.F.A. students may select an emphasis in ceramics, graphic design, three-dimensional (3-D) design, drawing, intermedia, jewelry and metal arts, painting, photography, printmaking, or sculpture.
B.F.A. students in art education typically complete an additional semester of course work.

Prospective B.F.A. students must apply to the program after completing at least two semesters of work in a studio concentration area but before completing 50 s.h. in art (normally early in the junior year). B.F.A. admission reviews are held once each semester. Students who wish to enter the B.F.A. program should consult the faculty in their studio concentration area for information about the required portfolio review.

B.F.A. students in art must earn at least 58 s.h. of credit in non-School of Art and Art History courses; they may count a maximum of 62 s.h. earned in courses offered by the school (art history, studio art, and art education combined) toward graduation. Cross-referenced courses offered by the school may not be counted as non-art electives. Students also must complete the College of Liberal Arts and Sciences General Education Program.

B.F.A. students must complete all courses required for B.A. students; see "Required Course Work" under "B.A. with Teacher Licensure (Art Education)" above.

In addition, B.F.A. students must complete three courses in a studio concentration area beyond the introductory or beginning course, as well as one introductory course and one advanced course in each of two additional studio areas (minor concentration areas).

B.F.A. students in drawing and painting are required to take 01F:106 Undergraduate Seminar in Drawing and Painting in addition to the three required studio courses for the concentration area. Papermaking, calligraphy, and bookbinding courses may not be used as major or minor areas.

Before they student teach, B.F.A. students must present an exhibition of their studio work, preferably at the School of Art and Art History.

Transfer Students

Transfer students majoring in art with art education must complete a minimum of 3 s.h. in art history and 12 s.h. in studio art at The University of Iowa. The studio art credit must include work in at least two different studio areas.

Undergraduate transfer students majoring in studio art must show a portfolio of their art to faculty members on the Friday before a fall or spring semester begins. The faculty members determine each student’s placement in or exemption from the sequence of basic studio courses.

Bachelor of Arts in Art History

The Bachelor of Arts in art history requires a minimum of 120 s.h., including 45 s.h. of work for the major. The history of art is engaged in problems of historical analysis and the interpretation of culture, so the program provides students with a broad background in the humanities consistent with a liberal arts and sciences education. The undergraduate degree program provides students with a strong liberal arts background and prepares them for competitive placement in graduate schools across the country.

As students progress through the program, they become familiar with historical relationships between art objects and society, learn techniques of formal analysis, study patterns of patronage, and absorb methods for interpreting the meaning of paintings, sculptures, and architecture. In the course of their studies, art history majors develop their research abilities and writing skills.

The major in art history requires at least 45 s.h. in art history and studio art courses. Students may count a maximum of 50 s.h. earned in School of Art and Art History courses (art history, studio art, and art education combined) toward graduation; they must earn at least 70 s.h. of credit toward the B.A. in non-School of Art and Art History courses. Exception: students working toward two majors, one in art history and one in studio art, and students earning a major in art history and a minor in studio art may count more than 50 s.h. earned in art history, studio art, and art education courses (combined) toward graduation; they must complete 56 s.h. of credit in non-School of Art and Art History courses in order to graduate with a major in art history.

Students also must complete the College of Liberal Arts and Sciences General Education Program.

The major in art history requires the following courses.

All of these, taken before enrollment in courses 099 and above:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>01H:005 Western Art and Culture Before 1400</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>01H:006 Western Art and Culture After 1400</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>01H:007 Writing About the Visual Arts</td>
<td>3 s.h.</td>
</tr>
</tbody>
</table>

One of these:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>01H:002 Arts of Africa</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>01H:016 Asian Art and Culture</td>
<td>3 s.h.</td>
</tr>
</tbody>
</table>
All of these:

Three courses chosen from 01H:020 - 01H:098, excluding 01H:029  
01H:099 Undergraduate Seminar in the History of Art (taken fall of junior or senior year)  
Five upper-level courses chosen from 01H:100 - 01H:199  

9 s.h.  
3 s.h.  
15 s.h.  

Required studio course:

01A:003 Basic Drawing  
3 s.h.  

Additional studio course—one of these:

01C:060 Ceramics I  
01F:007 Life Drawing I  
01G:084 Introduction to Jewelry and Metal Arts  
01K:009 Painting I  
01M:011 Introduction to Printmaking  
01N:015 Undergraduate Sculpture I  

3 s.h.  
3 s.h.  
3 s.h.  
3 s.h.  
3 s.h.  
3 s.h.  

CREDIT IN DISCIPLINES OUTSIDE ART HISTORY

Art history students must take courses in at least three of the following disciplines, for a total of 12 s.h.: anthropology, classics, history, literature, philosophy, political science, religion, sociology, or others. Courses must be approved by the student's faculty advisor.

Transfer Students

Transfer students planning to major in art history should meet with the undergraduate advisor to discuss the requirements they may fulfill with transfer courses. Art history transfer courses must be reviewed by the art history division head to determine the student's placement in or exemption from required art history courses.

Study Abroad

Students who wish to study abroad must meet with the undergraduate advisor and the head of art history before they depart to review approval of the art history courses they plan to take. Upon their return, they meet with the art history division head to review their art history course work and confirm the credit they have earned.

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan.

B.A. in Art

Before the third semester begins: at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: at least four courses in the major and at least one-half of the semester hours required for graduation

Before the seventh semester begins: at least eight courses in the major and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: at least 11 courses in the major

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

B.F.A. in Art

Admission to the program leading to the B.F.A. in art is limited and depends on the department's evaluation of the student's work. In order to participate in the Four-Year Graduation Plan, students must be admitted to the degree program on schedule as determined by the art advisor.

Before the third semester begins: at least four courses in the major and at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: at least eight courses in the major, and at least one-half of the semester hours
required for graduation

**Before the seventh semester begins:** at least 14 courses in the major and at least three-quarters of the semester hours required for graduation

**Before the eighth semester begins:** at least 18 courses in the major

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

**B.A. in Art History**

**Before the third semester begins:** at least one-quarter of the semester hours required for graduation

**Before the fifth semester begins:** at least four courses in the major and at least one-half of the semester hours required for graduation

**Before the seventh semester begins:** at least eight courses in the major and at least three-quarters of the semester hours required for graduation

**Before the eighth semester begins:** at least 11 courses in the major

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

**Honors**

School of Art and Art History students who are members of the University of Iowa Honors Program may apply for honors in the art or art history major during the semester before graduation. In order to graduate with honors in art or art history, students must fulfill specific department requirements as described under "Honors in Art" and "Honors in Art History" below.

University of Iowa honors students must maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University of Iowa Honors Program for more information about honors study at Iowa).

**Honors in Art**

Honors students majoring in art must maintain a g.p.a. of at least 3.50 in the major. In order to earn a degree in art with honors, a student must complete an honors project supervised by a faculty member, prepare a statement of the sources of the studio work, and hold an exhibition of the honors project. The artist's statement can address the history of art, the history of ideas, or a personal philosophy and should be written under the supervision of faculty in the student's studio concentration area. Students must register for **01P:190 Honors in Studio Art** (0-3 s.h.).

**Honors in Art History**

Honors students majoring in art history must maintain a g.p.a. of at least 3.50 in the major. Students have two options for earning a degree in art history with honors.

**Option 1:** Students take two upper-division courses with honors designation and complete an extra project, such as an annotated bibliography, a supplemental paper or presentation, or a comparable project endorsed by the instructor. Then students enroll in a third upper-division course appropriate to their honors thesis topic and write the thesis (5,000 to 7,000 words) as part of the course, for an additional 1 s.h. Students register for **01H:190 Honors Research in Art History** (arr.).

**Option 2:** Students research and write an honors thesis of 10,000 to 15,000 words under the direction of an art history faculty member, earning 3 s.h. They register for **01H:190 Honors Research in Art History** (arr.). Students work with an art history faculty member as their honors thesis advisor. They must have the thesis advisor's approval before beginning work on their thesis project. The thesis should conform to the Graduate College format for theses; see the Manual of Rules and Regulations of the Graduate College in the Graduate College section of the Catalog. The title page must follow the University of Iowa Honors Program format; consult the Honors Program.

**Minor in Art**

The minor in art requires a minimum of 16 s.h. in art courses, including at least 12 s.h. in courses taken at The University of Iowa. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass. The minor must include **01A:003 Basic Drawing** (or an equivalent), and 12 s.h. of studio art (one introductory course and one advanced course in each of two studio areas). Students may substitute one art history course for one of the advanced studio courses. Before registering for a course, students must satisfy all prerequisites for the course.

Courses in art education, bookbinding, calligraphy, graphic design, and papermaking, and courses with prefixes 01B
and 01P do not count toward the minor in art.

Course work applied toward the minor in art may not be used to satisfy requirements for a major in art or in art history.

**Minor in Art History**

The minor in art history requires a minimum of 15 s.h. in art history courses, including 12 s.h. in advanced courses taken at The University of Iowa. For the minor, courses numbered 01H:021 Introduction to the Art of West Africa and above are considered advanced. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass. The minor must include one survey-level course chosen from 01H:002 Arts of Africa, 01H:005 Western Art and Culture Before 1400, 01H:006 Western Art and Culture After 1400, or 01H:016 Asian Art and Culture. Before registering for a course, students must satisfy all prerequisites for the course.

Course work applied toward the minor in art history may not be used to satisfy requirements for a major in art or art history.

**Graduate Programs**

The School of Art and Art History offers a Master of Arts and a Master of Fine Arts in art, and a Master of Arts and a Doctor of Philosophy in art history. The Master of Arts in art includes an art education option. The school also collaborates with the College of Education to offer an art education subtrack in the Doctor of Philosophy in education.

Prospective and current graduate students are encouraged to consult the online Art and Art History Graduate Bulletin for detailed information about graduate study in art.

**Master of Arts in Art**

The Master of Arts in art requires a minimum of 38 s.h. of graduate credit. The degree is offered with or without thesis and with majors in ceramics, design, drawing, intermedia and video art, metalsmithing and jewelry, painting, photography, printmaking, and sculpture.

The required 38 s.h. includes at least 12 s.h. in a major studio area; 6 s.h. in a minor studio area from one of the M.A. majors that offer at least 21 s.h. in studio courses; 3 s.h. in the history and theory of art, excluding readings and directed studies; a drawing course taken at The University of Iowa; and 6 s.h. of courses outside art and art history.

M.A. students must hold a B.A. or B.F.A. in art equivalent to that offered by The University of Iowa. Undergraduate deficiencies, if any, may be made up concurrently with graduate study but do not count toward the graduate degree requirements.

All M.A. students undergo a division-wide review for M.A. candidacy by the faculty during the third semester in residence. They also must submit a written artist's statement.

M.A. students choose the thesis or nonthesis option in consultation with their area advisor. They may earn 1 s.h. for writing a technical or substantial thesis by registering for 01A:302 M.A. Written Thesis, with approval of the thesis supervisor. Thesis credit earned in an M.A. program is not applicable toward M.F.A. requirements.

For more detailed information, consult the Art and Art History Graduate Bulletin.

**Master of Arts in Art, with Art Education**

The Master of Arts in art, with art education, requires 38 s.h. of graduate credit. Students must earn 18 s.h. of studio art and art history in a ratio of two to one (either 12 s.h. of graduate credit in studio art and 6 s.h. in art history, or 6 s.h. in studio art and 12 s.h. in art history); 8 s.h. in graduate seminars in art education; and 12 s.h. to be specified after the student begins the program. The degree also requires a written thesis based on research in art education, creative scholarship, or art history.

M.A. students must hold a B.A. or B.F.A. in art equivalent to that offered by The University of Iowa. They also must hold teaching licensure/certification in art. See "Admission" later in this Catalog section.

Art education majors may elect to take art history courses on a satisfactory-unsatisfactory basis.

**Master of Fine Arts in Art**

The Master of Fine Arts in art requires a minimum of 60 s.h. of graduate credit. The degree is offered with thesis and with majors in ceramics, design, drawing, intermedia and video art, jewelry and metal arts, painting, photography, printmaking, or sculpture. Following completion of the M.A., students may be invited into the M.F.A. Program.

The required 60 s.h. includes at least 18 s.h. in a major studio subject; at least 9 s.h. in a minor studio field selected
from the fields listed above; 6 s.h. in art history and theory of art; 6 s.h. in courses originating outside the school; and a
drawing course at The University of Iowa (if not already taken).

M.F.A. students must hold an M.A. in art equivalent to that offered by The University of Iowa. Transfer credit is decided
by faculty review.

All students must undergo an M.F.A. committee review. They also must complete a written theses and possibly a studio
thesis.

M.F.A. students may earn 1 s.h. for writing a technical or substantial thesis by registering for 01A:304 M.F.A. Written
Thesis, with approval of the thesis supervisor. Thesis credit earned in an M.A. program is not applicable toward M.F.A.
requirements.

**Master of Arts in Art History**

The Master of Arts in art history requires a minimum of 30 s.h. of graduate credit and is offered with thesis. M.A.
students are expected to acquire a broad knowledge of art history and to become familiar with major periods and
monuments of world art. They also become proficient scholars, receiving training in research methods and theory
necessary for subsequent scholarship at the Ph.D. level.

M.A. students must maintain a g.p.a. of at least 3.50. Only one semester of academic probation is allowed. All M.A.
candidates, including transfer students, must take at least 24 s.h. in residence at The University of Iowa.

M.A. students in art history must earn a grade of B or higher in semester-long courses (100-level or above) in five of
the following 10 distribution fields: African (including Oceanic), architecture, Asian, ancient (3000 B.C.E.-300 C.E.),
medieval, Renaissance, Baroque, 18th- and 19th-century European, American (including pre-Columbian, Native
American, and African American), and modern/contemporary. These courses must be taken after the B.A. is granted.

M.A. students must complete a substantial thesis that demonstrates their ability to conduct scholarly research and
convey ideas in writing appropriately for the discipline and for the student's specialization field.

**REQUIRED COURSES**

M.A. students in art history must satisfactorily complete 01H:200 History and Methods (3 s.h.) during their first fall
semester of enrollment and must register for an art history seminar in their first, second, and third semesters of
enrollment. They also must satisfactorily complete 01H:210 Art History Colloquium (1 s.h.) every semester that they
are enrolled for 9 s.h. or more; students who register for less than 9 s.h. are strongly encouraged to attend the
colloquium, as well.

Courses outside the curriculum of the School of Art and Art History's art history division do not carry art history credit.
Cross-referenced courses not taught by art history faculty members also do not carry art history credit.

**DIRECTED STUDIES**

Directed Studies (01H:300) is designed for graduate students who already have taken one or more advanced courses
in a specific art history field. It provides students with an opportunity to work one-to-one with a professor to continue
specific research interests developed in lecture courses or seminars, or on topics that eventually may be the subject of
a thesis or dissertation. Directed Studies cannot be substituted for a lecture course already offered in the program.
Students must discuss their decision to take Directed Studies with the professor involved and have the professor's
approval. The Directed Studies topic must be within the professor's range of expertise.

Students meet with their Directed Studies professor once a week. The hours of work and written assignments required
for Directed Studies must be equal to a comparable regularly scheduled course. Directed Studies is not available
through Guided Correspondence Study.

**LANGUAGE REQUIREMENT**

M.A. students must demonstrate proficiency in French or German by the end of their third semester. Proficiency is
determined by a translation exam administered under the direction of the art history division. Credit earned in language
courses does not count toward the degree.

**M.A. COMMITTEE**

The M.A. committee consists of the student's M.A. thesis advisor and two additional tenured or tenure-track faculty
members in art history.

**M.A. THESIS**
M.A. students must complete a written thesis on a topic chosen from one of the 10 distribution fields (see "Master of Arts in Art History" above). Students register for 01H:302 M.A. Written Thesis and may count 3 s.h. of thesis credit toward graduation. Students choose an M.A. thesis advisor who specializes in their concentration field. Students who wish to concentrate in more than one field must work closely with faculty members in both fields.

FINISH EXAMINATION

The final examination constitutes an oral defense of the written M.A. thesis. The final examination meeting with the M.A. committee normally takes place toward the end of the student's last semester of course work.

PH.D. COMMITTEE

Doctor of Philosophy in Art History

The Doctor of Philosophy in art history requires a minimum of 72 s.h. of graduate credit. Ph.D. students are expected to acquire great breadth and depth of knowledge in the discipline of art history, achieve a high level of expertise in a specialized field, and demonstrate professional speaking and writing skills. The program provides them with scholarly challenges, research skills, and mentoring necessary for professional development and successful careers.

Ph.D. students must maintain a g.p.a. of at least 3.50. They may count a maximum of 38 s.h. of work completed for the M.A. toward the Ph.D. Students are allowed only one semester of academic probation.

To establish academic residency, doctoral students must be enrolled full-time (at least 9 s.h.) at The University of Iowa for two semesters beyond their first 24 s.h. of graduate study; or they must enroll for at least 6 s.h. in each of three semesters during which they hold an assistantship of one-quarter-time or more. Resident tuition is assessed for assistantship semesters and adjacent summer sessions.

Ph.D. students major in one of the following 10 distribution fields: African (including Oceanic), architecture, Asian, ancient (3000 B.C.E.-300 C.E.), medieval, Renaissance, Baroque, 18th- and 19th-century European, American (including pre-Columbian, Native American, and African American), and modern/contemporary. Students also minor in two fields. The first minor must be in an art history distribution field that is not contiguous with the major field; the second may be in any art history distribution field or in a relevant discipline outside of art history, subject to the faculty's approval.

Ph.D. students must complete a publishable dissertation that makes an original contribution to the art history discipline and demonstrates evidence of superior understanding of critical issues in the student's chosen specialization field.

For more detailed information, consult the Art and Art History Graduate Bulletin.

REQUIRED COURSES

Ph.D. students must satisfactorily complete 01H:200 History and Methods (3 s.h.), even if they have completed a similar course at another institution (students who have completed the course for a master's degree or other previous work at Iowa are exempt). They must register for an art history seminar in their first three semesters of Ph.D. course work (or in their fifth, sixth, and seventh semesters of graduate study), before the Ph.D. readings course and comprehensive exam. They also must satisfactorily complete 01H:210 Art History Colloquium (1 s.h.) every semester that they are enrolled for 9 s.h. or more; students who register for less than 9 s.h. are strongly encouraged to attend the colloquium, as well.

Up to 6 s.h. of credit for dissertation research may be applied toward the 72 s.h. required for the degree. Courses outside the curriculum of the School of Art and Art History's art history division do not carry art history credit.

DIRECTED STUDIES

Normally, a maximum of 6 s.h. earned in 01H:300 Directed Studies may be applied toward the semester-hour requirement for the Ph.D., although doctoral students may petition the art history faculty for permission to apply up to 9 s.h.

LANGUAGE REQUIREMENT

Students must demonstrate proficiency in French or German for admission to the Ph.D. program. They also must demonstrate proficiency in a second non-English language relevant to their research area by the end of their third semester of Ph.D. work or before their dissertation topic is approved. Proficiency is determined by a translation exam administered under the direction of the art history division. Credit earned in language courses does not count toward the degree.
The Ph.D. committee consists of the student's faculty mentor, who is responsible for the major field, two members responsible for the two minor fields, and at least two additional members. Of these five, four must be tenured or tenure-track faculty members from the art history division. One must be from outside the division and must be a member of the Graduate College faculty. When appropriate, committees may include additional members.

COMPREHENSIVE EXAMINATION

Upon completion of course requirements, the Ph.D. candidate takes three written comprehensive examinations. The major exam consists of six questions and lasts six hours; the two minor exams each consist of three questions and last three hours. The exams normally are taken on two consecutive days.

The scope of the comprehensive exams is determined in consultation with the candidate’s degree committee supervisor and the committee members responsible for the two minor fields.

ORAL COMPREHENSIVE EXAMINATION

Within approximately one month of completing the three written exams, the candidate meets with his or her degree committee for the oral comprehensive examination, which concentrates on questions that arise from the written comprehensive exams.

DISSERTATION PROPOSAL

As soon as possible after completing the comprehensive examinations, the candidate submits a dissertation proposal to his or her degree committee supervisor and subsequently to the degree committee. The committee meets as a group with the candidate to discuss the dissertation proposal and to offer comments and suggestions. (The proposal must be submitted to the committee at least two weeks before the approval meeting.) The proposal includes a 1-2 page abstract, a 10-15 page précis (including a review of the state of the field), and a bibliography.

After the proposal has been approved by the committee, the candidate circulates an abstract to the entire art history faculty. He or she must give a public presentation on the dissertation topic no later than the end of the semester following the degree committee’s approval. The presentation is scheduled with the head of art history.

FINAL EXAMINATION

The completion of a written dissertation, which constitutes an original scholarly contribution to the field, and the successful completion of the final examination (the oral defense) of this dissertation fulfill the Ph.D. requirements.

Ph.D. in Education, with Art Education

The Doctor of Philosophy in education, with art education, requires a minimum of 60 s.h. of graduate credit beyond the master's degree. The program gives college teachers and researchers in art education and art supervisors in state departments of education and school systems an opportunity to continue their inquiry and creative work in art history and in studio art.

The program is administered by the College of Education, in cooperation with the School of Art and Art History. Students must apply for admission to the College of Education. Graduates are granted a Doctor of Philosophy in education, with art education subtrack.

The curriculum must be planned with the advisor and must include at least 15 s.h. in the School of Art and Art History, 15 s.h. in art education graduate seminars, 15 s.h. in a related area (e.g., aesthetics, anthropology, higher education, psychology, sociology), and 15 s.h. in thesis and tool courses.

Students must take both oral and written comprehensive examinations. The written examination consists of an in-depth research problem to be completed within 14 days, after which an oral examination on the project is held. The research problem is assigned by the examining committee, and the written portion of the examination is not intended to relate directly to the student's dissertation proposal.

Students also must complete a written dissertation for at least 12 s.h. of credit and are expected to prepare a dissertation proposal and defend it before the dissertation committee. An oral examination on the dissertation is the Ph.D. final examination.

Admission

Prospective graduate students must meet the School of Art and Art History's admission requirements for the specific degree programs they plan to enter. Prospective students must submit application materials to the University's Office
of Graduate Admissions and to the specific program they wish to enter. Program-specific application requirements and
deadline dates are listed in the appropriate sections below.

All applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and
Regulations of the Graduate College or the Graduate College section of the Catalog.

Applicants to all art and art history graduate programs must submit the following to the University's Office of Graduate
Admissions: a completed graduate application form (one area of interest must be specified on the form); an official
copy of all transcripts of undergraduate and/or graduate work completed by the application date; TOEFL scores (if
applicable); and the required application fee. Art history applicants also must submit Graduate Record Examination
(GRE) scores.

Applicants whose first or official language is not English and whose previous academic degrees were not earned at an
English-language institution must score as follows on the Test of English as a Foreign Language (TOEFL): for studio art
applicants, at least 550 (paper-based), 213 (computer-based), or 81 (Internet-based); for art history applicants, at least
600 (paper-based), 250 (computer-based), or 100 (Internet-based).

Deadline dates for submission of materials to the Office of Graduate Admissions are December 15 for art history
programs, and February 1 for studio art programs and art education programs; all are for fall admission.

The Office of Graduate Admissions notifies all applicants by mail of admission decisions. Acceptance notification
cannot be given over the phone by either the admissions office or the School of Art and Art History.

**M.A. and M.F.A. in Art**

Applications to the M.A. and M.F.A. programs in studio art, with all supporting materials and requests for financial aid,
must be received at the School of Art and Art History and the Office of Graduate Admissions by February 1 for fall
admission.

In addition to materials submitted to the Office of Graduate Admissions (see "Admission" above), applicants must
submit the following materials to the graduate secretary at the School of Art and Art History: a one-page statement of
purposes, official transcripts for all undergraduate and graduate work completed by the application date, three letters of
recommendation assessing potential as a graduate student, application for graduate awards (if desired), and
application for graduate scholarships and fellowships (if desired). They also must submit one of the following portfolios
(portfolios are returned by mail only to applicants who supply return postage.).

Note: CDs should contain 10-20 images measuring 5x7 inches, maximum of 150 DPI, as PDF or PowerPoint files.

- **Ceramics, design, intermedia and video art, jewelry and metal arts, or painting:** 8 slides, CDs, and/or photos of
  work in the major area; and 2 slides, CDs, or photos of work in a second studio area; CDs or DVDs may be submitted
  for intermedia.

- **Drawing:** 8 slides, a CD, or photos of drawings, including figure drawings; and 2 slides, CDs, or photos of work in a
  second studio area.

- **Photography:** 20 images of major field of work on slides, in prints, or on a CD; and 2-3 images in a second area on
  slides, in photos, or on a CD.

- **Printmaking:** 10-20 images on a CD, or slides with a selection of 4-6 original printed works, sent in a returnable
  portfolio.

- **Sculpture:** a selection of 20 slides or a CD with at least 10 sculptures or installations (multiview) and a slide of at least
  two drawings; for kinetic sculptures, a DVD.

  Each slide must be enclosed in a slide sheet and labeled with the name, title, portfolio medium, size, and approximate
date of work; the top should be indicated. An inventory list with the same information should be included. Extreme care
is taken in handling all portfolios, but the school cannot be responsible for reimbursement in the event of loss or
 damage.

Applications and all supporting materials are reviewed by a committee of art and art history faculty from the appropriate
area.

**M.A. in Art History**

Applications to the M.A. program in art history, with all supporting materials and requests for financial aid, must be
received at the School of Art and Art History and the Office of Graduate Admissions by December 15 for fall admission
in the following year.

Applicants must hold a bachelor's degree, preferably in art history or a related field.

Although exceptions may be made when other components of the application are strong, applicants should have a
combined verbal and quantitative score of at least 1200 and an analytical writing score of at least 5 on the Graduate
Record Exam (GRE) General Test; and an undergraduate g.p.a. of at least 3.25 on a 4.00 scale.

In addition to materials submitted to the Office of Graduate Admissions (see “Admission” above), the following materials must be submitted to the graduate secretary at the School of Art and Art History: transcripts from all colleges and universities the applicant has attended; three letters of recommendation assessing the applicant's potential for graduate study in art history (sent by the person making the recommendation); and a research paper (preferably from an art history course) or undergraduate thesis that demonstrates the applicant's potential to undertake research in art history.

Applicants also must submit a 1,000-word personal statement describing their intellectual development, academic interests, and career goals; the statement must name the University of Iowa faculty member under whose guidance the applicant hopes to work and tell how that faculty member's area of expertise, or how the art history program, is especially suited to the applicant's interests and goals.

Applicants to graduate programs in art history should consult the Art and Art History Graduate Bulletin on the School of Art and Art History web site.

**Ph.D. in Art History**

Applications to the Ph.D. program in art history, with all supporting materials and requests for financial aid, must be received at the School of Art and Art History and the Office of Graduate Admissions by December 15 for fall admission in the following year.

Applicants must hold an M.A. in art history or a related graduate degree and must be able to demonstrate proficiency in French and German. Proficiency in a second non-English language relevant to the student's research area is required by the end of the third semester of Ph.D. work; see "Language Requirement" under "Doctor of Philosophy in Art History" above.

Although exceptions may be made when other components of the application are strong, applicants should have a combined verbal and quantitative score of at least 1200 and an analytic writing score of at least 5 on the Graduate Record Exam (GRE) General Test; and a graduate g.p.a. of at least 3.50 on a 4.00 scale.

Students who completed an M.A. at The University of Iowa and who wish to apply for entrance into the Ph.D. program must make a formal application to the program. Applications are evaluated in the context of the entire applicant pool.

In addition to materials submitted to the Office of Graduate Admissions (see "Admission" above), the following materials must be submitted to the graduate secretary at the School of Art and Art History: transcripts from all colleges and universities the applicant has attended; three letters of recommendation, including one from the applicant's M.A. thesis supervisor, assessing the applicant's potential for doctoral study in art history (sent by the person making the recommendation); and a copy of an M.A. thesis or other substantial M.A. research paper.

Applicants also must submit a 1,000-word personal statement describing their purpose in pursuing graduate studies and their intellectual development, academic interests, and career goals; the statement must name the University of Iowa faculty member under whose guidance the applicant hopes to work and how that faculty member's area of expertise, or the art history program, is especially suited to the applicant's interests and goals.

Applicants to graduate programs in art history should consult the Art and Art History Graduate Bulletin on the School of Art and Art History web site.

**M.A. in Art Education**

Applications to the M.A. program in art education, with all supporting materials and requests for financial aid, must be received at the School of Art and Art History and the Office of Graduate Admissions by February 1 for fall admission.

Applicants to the M.A. program must hold a B.A. or B.F.A. in art equivalent to that offered by The University of Iowa. They also must hold teaching licensure/certification in art.

Applicants with course work deficiencies are required to remedy the deficiencies by taking appropriate courses.

In addition to materials submitted to the Office of Graduate Admissions (see "Admission" above), M.A. applicants must submit the following materials to the graduate secretary at the School of Art and Art History: a term paper or other example of ability to write in the field; a selection of slides or photographs of their creative work in two studio areas; three letters of recommendation assessing their potential for graduate study; and a one-page personal statement describing their purpose for pursuing graduate study.

**Ph.D. in Art Education**

Applications to the Ph.D. program in art education, with all supporting materials and requests for financial aid, must be received at the College of Education and the Office of Graduate Admissions by February 1 for fall admission.

Applicants to the Ph.D. program must hold an M.A. in art education from The University of Iowa or an equivalent degree from an accredited college or university. They also must have completed one year of successful teaching
experience in an elementary or secondary school.

Applicants with course work deficiencies are required to remedy the deficiencies by taking appropriate courses.

In addition to materials submitted to the Office of Graduate Admissions (see "Admission" above), Ph.D. applicants must submit the following materials to the Art Education Office: a portfolio consisting of 12 colored slide reproductions of their art work and two examples of their written work, which may be new or previous work.

Financial Support

Fellowships, teaching assistantships, research assistantships, and tuition scholarships are awarded to graduate students on the basis of artistic and/or scholarly record.

In the studio programs, financial aid to new students is possible, but most assistantships and scholarships are awarded to graduate students who have been in residence for at least a year. This gives faculty members an opportunity to observe their performance and potential.

Presidential Graduate Fellowships

The Graduate College awards Presidential Graduate Fellowships on the basis of a University-wide competition among incoming Ph.D. students. For information about the fellowships, including nomination and selection criteria and stipends, see Presidential Graduate Fellowship on the Graduate College web site.

Dean's Graduate Fellowships

The Graduate College awards Dean's Graduate Fellowships on the basis of a University-wide competition among graduate students. Criteria for the fellowships are similar to those for the Presidential Graduate Fellowship but are designed to support incoming students who are underrepresented in graduate education. For more information, see Dean's Graduate Fellowship on the Graduate College web site.

Teaching and Research Assistantships

Assistantships are awarded to graduate students on the basis of academic record, Graduate Record Examination (GRE) General Test scores, promise as scholars or artists, and demonstrated ability to do the job. Quality of performance in one's graduate program at Iowa is generally the major criterion for awarding teaching assistantships. The number of hours of work required depends on the amount of the award.

Scholarships and Fellowships

The School of Art and Art History offers a variety of scholarships and fellowships made possible by contributions from alumni who wish to support promising artists and scholars. These awards are made on the same basis as teaching and research assistantships.

Information and application materials for graduate scholarships and fellowships are included in the admissions package. They also are available from the School of Art and Art History main office in Seashore Hall.

Renewal or reappointment for fellowships and assistantships depends on adequate progress toward the degree (graduate students must accumulate at least 18 s.h. of graduate credit each calendar year and maintain a grade-point average above the required minimum) and satisfactory performance of assistantship duties.

Decisions on assistantships and financial aid generally are made during the latter part of the spring semester for the following academic year. Applications and all relevant materials should be on file by February 1. Applicants should verify the submission date; consult the school's main office.

Student Organizations

The undergraduate Art History Club and the graduate Art History Society sponsor activities for students. The Faculty/Graduate Student Art History Colloquium meets five times each semester to focus on professional development and issues of broad interest in art.

Resources and Facilities

Reference Collections

The art library contains 100,000 volumes, an outstanding periodical collection, and an extensive microfilm and microfiche archive.

The school's Office of Visual Materials contains 350,000 slides, 30,000 photographs, a videotape library, and a rapidly growing database that currently contains more than 125,000 digital images.
Museum of Art

The University of Iowa Museum of Art has a significant permanent collection that includes major holdings of 20th century and contemporary art, African and pre-Columbian art, English and American silver, European and American prints, drawings and photographs, and Etruscan, Iranian, and contemporary American ceramics. As well as serving as a resource for research in a wide variety of art history areas, the museum offers a program of exhibitions, lectures, and recitals.

Due to the Iowa River flooding of summer 2008, the museum's collections are being displayed and its events are being held in a variety of other facilities. Learn about current exhibitions and events, and their locations, by visiting the Museum of Art web site.

Interdisciplinary Resources

Colloquia, visiting artists and lecturer programs, and graduate workshops bring visitors to the school and provide open forums for discussion of issues in art and scholarship.

Among the school's major assets is the Project for the Advanced Study of Art and Life in Africa (PASALA), an interdisciplinary program that brings together faculty with international reputations in art history, anthropology, films, history, and literature to offer courses and independent study of art in West, Central, East, and South Africa. The result is a program of unusual breadth and depth of expertise. PASALA is among the most active of such programs in the country, organizing international symposia that discuss significant topical issues and publishing the proceedings in regular issues of *Iowa Studies in African Art*. PASALA offers scholarships and support for research in Africa and dissertation preparation to outstanding students. A major resource for PASALA is the Stanley Collection of African Art in The University of Iowa Museum of Art.

Art history participates in a collegewide program called Crossing Borders, which offers major financial support to designated graduate student fellows whose dissertation topics involve multiple foreign language areas. Fellows take team-taught seminars in a range of disciplines, with focus on interactions across cultural, regional, or national divides. They help plan an annual convocation, at which they and invited lecturers present their research.

The school also maintains an affiliation with the University's Department of American Studies, providing students with opportunities to study not only the history of American art but a variety of interdisciplinary programs in American history, literature, and politics.

Art Buildings

The School of Art and Art History's permanent facilities are temporarily closed while The University of Iowa renovates and rebuilds its arts campus in the wake of flooding on the Iowa River during summer 2008. The school's main office currently is located in Seashore Hall on the University's central campus, and classrooms and studio arts facilities are housed in a variety of locations. Visit the School of Art and Art History web site and ISIS for information about studio, office, and classroom sites.

The school's newest building and administrative center, Art Building West, opened in 2006. The building contains art history classrooms, the visual resources office, a gallery, a café, the Art Library, an auditorium, a media theater, a computer laboratory, and studios for graphic design, painting, and digital photography. Designed by architect Steven Holl, Art Building West has won numerous awards for its innovative design, including the 2007 American Institute of Architects Honor Award for Architecture.

Art and Art History Courses

Art History, Primarily for Undergraduates

**01H:001 Art and Visual Culture**
3 s.h.
Developments in Western art history from prehistoric times (ca. 25000 BCE) to the present; key monuments in architecture, painting, and sculpture in their wider cultural contexts; 19th- and 20th-century new media, such as photography. GE: Fine Arts, Humanities.

**01H:002 Arts of Africa**
3 s.h.
Arts, artists, and cultures of Africa; sculpture, paintings, pottery, textiles, architecture, human adornment. GE: Fine Arts, Humanities.

**01H:003 Art of Pre-Columbian America, Native America, and Oceania**
3 s.h.
GE: Cultural Diversity, Fine Arts, Humanities.

**01H:004 Masterpieces: Art and Cultural Paradigms**
3 s.h.
Masterpieces of Western art--how to look at, think about, and understand some of the world's most exciting works of architecture, painting, and sculpture; works from ancient Greece to Versailles under the absolute power of the Sun King; their construction, hidden meanings, historical content, and their meanings today. GE: Fine Arts, Humanities.

**01H:005 Western Art and Culture Before 1400** 3 s.h.
Survey to foster development of critical skills in thinking and writing about visual culture, and to familiarize students with broad outlines of artistic development in the Western tradition, from prehistory through later Middle Ages; aesthetic qualities of artworks, relationship between style, function, and meaning. GE: Fine Arts, Foreign Civilization & Culture, Historical Perspectives.

**01H:006 Western Art and Culture After 1400** 3 s.h.
Survey of the Western world's visual arts from Renaissance (ca. 1400) to the present; major movements and principal masters of Western Europe and the United States in their social and historical contexts; focus on stimulation of visual literacy and familiarity with outstanding cultural monuments. GE: Fine Arts, Foreign Civilization & Culture, Historical Perspectives.

**01H:007 Writing About the Visual Arts** 3 s.h.
Opportunity to develop understanding of and skill in using visual-arts writing conventions and linguistic competencies that are necessary for academic and professional success; formats such as exhibition reviews, art criticism, research writing, artist's statements; experience through exercises, formal essays, revision, workshops. Prerequisite: fulfillment of General Education rhetoric requirement. Same as 01A:005.

**01H:008 Themes in Global Art** 3 s.h.
Key themes in art from a global perspective; propaganda and power, social functions of art, word and image, ritual and body decoration, artistic exchange, religion. GE: Foreign Civilization & Culture.

**01H:010 Tutorial for Majors: Art History as a Discipline** 3 s.h.
Introduction to the discipline of art history, its historiography and methodology, and its practice in academia and the museum world; research methods, organization. Prerequisite: art history major or consent of instructor.

**01H:016 Asian Art and Culture** 3 s.h.
Art from India, China, and Japan in many media and forms, in their cultural and historical contexts; cultural distinctions of these Asian civilizations as seen through the visual arts; chronology used to highlight historical processes and provide perspectives on continuity and change. GE: Fine Arts, Foreign Civilization & Culture, Historical Perspectives. Same as 039:016.

**01H:021 Introduction to the Art of West Africa** 3 s.h.
Introduction to the visual arts of West Africa, including Burkina Faso, Mali, Nigeria, Ivory Coast, Liberia, Guinea, Ghana, and Sierra Leone; arts in cultural contexts--what objects meant to the people who created them, how they mirrored social, educational, political, and economic systems.

**01H:022 Introduction to the Art of Central Africa** 3 s.h.
Artistic production and media in Central Africa categorized by geographies but examined from perspectives of innovation, power, gender, performance, ancestry, religious beliefs, technology, death, and the body; breadth of Central Africa's artistic production, art history, and terminology; 20th-century debates around African art.

**01H:026 Introduction to Ancient Art** 3 s.h.
Art and architecture of the Mediterranean world ca. 3500 B.C.E. to death of Constantine (337 C.E.): Egyptian, Cycladic, Minoan, Mycenaean, Greek, Etruscan, and Roman cultures; artistic responses to life and death; impact of breakthroughs in technology and engineering on visual culture; role of art in empire building; interrelationships of art, politics, religion. Prerequisite: 01H:005 or consent of instructor. Same as 20E:026.

**01H:029 First-Year Seminar** 1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Prerequisite: first- or second-semester standing.

**01H:031 Introduction to the Art of China** 3 s.h.
Visual arts of China and their history; emphasis on understanding in context of Chinese civilization, history. Same as 039:028.
01H:033 Introduction to the Art of Japan
Chronological survey of Japan's visual arts in their historical and cultural contexts from Neolithic age to present; extensive use of slides, films, other visual materials. Same as 39J:033.

01H:040 Introduction to Medieval Art
How Medieval art has been known, collected, and appreciated in America; neomedeval buildings, exceptional museum holdings in New York; periodization, terminology, genres, styles, sources, original context, later history, and cultural impact of selected Medieval works of art in America.

01H:047 Introduction to Renaissance Art
Art, architecture in Europe from early Renaissance to 1600.

01H:053 Introduction to Baroque Visual Culture
Art, architecture in Europe from 1600 to 1700.

01H:062 Introduction to Nineteenth-Century Art
Major European artists, works, movements, aesthetic theories from late 18th century to 1900; works in their aesthetic, cultural, intellectual, political contexts; boundaries, definitions of movements such as Neo-Classicism, Romanticism, Realism, Impressionism, Post-Impressionism, Symbolism.

01H:066 Introduction to American Art
Survey of painting, sculpture, architecture, and photography in the United States from colonial era to mid-20th century; how the new country grappled with creating a visual culture unique to its own character and development; portraits, landscape paintings, sculpture, and architecture in an array of styles and media; circumstances of their creation, aspirations and preconceptions of their makers, perspectives of their audiences. Recommended: 01H:006. GE: Fine Arts, Humanities.

01H:073 Introduction to Modern/Contemporary Art
Modern European and American painting, sculpture, and architecture from 1880 to present; major art movements of modern art history. Prerequisite: 01H:005 or consent of instructor.

01H:084 Introduction to European Architecture
Overview of European monuments, Neolithic period to present; aesthetic and structural principles, major styles, architects.

01H:090 Introduction to Art and Religion
How religious and cult practices have influenced the shape of objects and monuments now considered superb examples of art and architecture; late antiquity to Renaissance; case studies; focus on initiation rituals.

01H:098 Undergraduate Topics in Art History
Varied topics in art history; for undergraduates. Prerequisite: art history major or consent of instructor.

01H:099 Undergraduate Seminar in the History of Art
Characteristic problems, methodological issues, critical thinking and writing. Offered fall semesters. Prerequisite: art history major or consent of instructor.

Art History for Undergraduate and Graduate Students
An introductory course in the appropriate art history area or consent of instructor is prerequisite for some courses numbered above 100. Courses designated "Themes in Art History" consider topics of current interest in the field, organized thematically rather than chronologically.

01H:104 American Indian Art
Sculpture, painting, architecture, crafts, arts of personal adornment of native peoples of North America. GE: Cultural Diversity.

01H:105 Art of Pre-Columbian America
Art, architecture of Mexico, Peru before Cortéz.
01H:106 African Kings
African art created to reflect the political and military power of African rulers; in-depth study.

01H:107 Art of West Africa
How art is used to solve problems and mark important passages in life.

01H:110 Egyptian Art
Sculpture, painting, architecture, and luxury arts from Pyramid Age to Death of Cleopatra. Prerequisite: 01H:005 or consent of instructor. Same as 032:104.

01H:119 Chinese Art and Culture
Archaeological discoveries, sculpture, painting, architecture, calligraphy, other arts of Greater China area in historical and cultural contexts of past 5,000 years. Prerequisite: 01H:006 or 01H:031 or consent of instructor. Same as 039:159.

01H:120 Chinese Painting I
Early Chinese painting from fourth century B.C.E. through 14th century C.E.; figural style, religious art, emergence of landscape, other nonreligious subjects, interconnectedness of painting and calligraphy as fine arts. Prerequisite: 01H:016 or 01H:031 or consent of instructor. Same as 039:120.

01H:123 Japanese Painting
Japanese painting in its historical, cultural contexts; focus on developments of successive eras--religious art; narrative, other literary connections; Zen; decorative traditions; popular arts; Japan and the modern world. Prerequisite: 01H:006 or 01H:033 or consent of instructor. Same as 39J:123.

01H:124 Themes in Asian Art History
Prerequisite: 01H:016 or 01H:016 or equivalent or consent of instructor. Same as 039:131.

01H:127 Classical Greek Art
Art, sacred architecture from early Classical through late fourth century B.C.E.; Athens in the Golden Age. Prerequisite: 01H:005 or 01H:026 or consent of instructor. Same as 20E:124.

01H:128 Greek Vase Painting
Greek ceramics as documents of religious beliefs, mythology, and daily life 1000-300 B.C.E. Prerequisite: 01H:005 or 01H:005 or consent of instructor.

01H:132 Art of Early Rome: Patrons and Politics
Art and architecture of Roman Italy and provinces from late Caesar Republic through reign of Hadrian, 80 B.C.E.-138 C.E. Prerequisite: 01H:005 or 01H:026 or consent of instructor. Same as 20E:128.

01H:133 Later Roman Art
Art and architecture of late imperial Rome and the provinces, from the Antonines through Constantine, C.E. 138-337. Prerequisite: 01H:005 or 01H:026. Same as 20E:130.

01H:134 Art and Culture in Ancient Pompeii
Art and architecture, as documents of ancient society and religion in towns destroyed by Mount Vesuvius in C.E. 79. Prerequisite: 01H:005 or 01H:026 or consent of instructor. Same as 20E:129.

01H:138 Gothic Architecture
Gothic architecture and its history, from varied perspectives (e.g., formal structural, symbolic, geometric, socioeconomic). Prerequisite: 01H:005 or 01H:040 or consent of instructor.

01H:140 The World of Giotto and Dante
Painting, sculpture, and architecture 1250-1400. Prerequisite: 01H:005 or 01H:006 or consent of instructor.

01H:141 Masaccio to Leonardo da Vinci
Painting, sculpture, and architecture 1400-1525. Prerequisite: 01H:005 or 01H:006 or consent of instructor.

01H:142 Leonardo, Raphael, and Their Contemporaries
The arts in Italy 1485-1550. Prerequisite: 01H:005 or 01H:006 or consent of instructor.
01H:144 Classical Architecture: Theory/Practice
Architectural design in the Italian Renaissance, Brunelleschi to Borromini. Prerequisite: 01H:005 or 01H:006 or consent of instructor.

01H:150 Seventeenth-Century Dutch and Flemish Painting
Painting in the age of Rubens, Rembrandt, Vermeer; rise of landscape, still life, genre. Prerequisite: 01H:006 or consent of instructor.

01H:155 The Romantic Revolution
Transformations in European art and culture 1750-1850, an age of artistic, political, cultural, intellectual crisis and revolutions; major artists, including David, Ingres, Gericault, Delacroix, Goya, Freidrich, Constable, Turner.

01H:157 Paris and the Art of Urban Life
City of Paris examined in varied historical, artistic, cultural contexts; interdisciplinary. Same as 009:130, 033:130.

01H:158 Realism, Impressionism, Post-Impressionism
Naturalism, Realism, the Impressionist landscape, painting of modern life, new trends in subjectivity and exoticism mid- to late-19th-century European art and culture; Courbet, Manet, Degas, Monet, Renoir, Seurat, Cezanne, Van Gogh, Gauguin, Ensor, Munch.

01H:159 Manet to Matisse
Development of modernism and the avant-garde in late 19th- and early 20th-century Paris; intersection of innovation and tradition, literature and art; role of theory and criticism in works of Manet, Degas, Seurat, Cezanne, Gauguin, Rodin, Matisse, and Picasso.

01H:160 Building a Nation: American Architecture to 1865
How ethnic groups shaped America’s cultural landscapes and architecture from colonial period to Civil War.

01H:162 National Images: American Art to 1865
Painting, sculpture, and architecture from colonial times to Civil War. Prerequisite: 01H:006 or 01H:066 or consent of instructor.

01H:163 American Renaissance and the Gilded Age
Architecture, painting, sculpture 1865-1913. Prerequisite: 01H:006 or 01H:066 or 01H:162 or consent of instructor.

01H:164 Nazi and Stalinist Art: Aesthetics of Power
Manipulative power of art, architecture, urbanism, and film in 20th-century totalitarian regimes, Italy, Germany, and Stalinist Soviet Union as well as Madrid, Warsaw, Beijing, Pyongyang, Baghdad; the dark side of art and its transnational character, particularly in architecture and urban planning; nature of propaganda and state-sponsored art, responses to modernism and industrialization, allure of militarism and empire, uses of historicism, role of public ritual and mass spectacle in totalitarianism; common currency of totalitarian art across national groups, cultures, ideologies; how aesthetics function as tools of modern autocracies, with lessons for ailing 21st-century democracies. Prerequisite: an introductory course in an appropriate area for art majors.

01H:165 American Western Art
Painting and sculpture of the western United States, primarily from Euro-American perspective. Prerequisite: 01H:006 or 01H:066 or consent of instructor.

01H:167 African American Art and Architecture
Visual and material culture of African Americans, including painting, sculpture, decorative arts, and film, examined from aesthetic and ideological perspectives.

01H:170 Modernism and Early Twentieth-Century American Art
American responses to European Modernism in painting, sculpture, architecture, and photography. Prerequisite: 01H:006 or 01H:066 or consent of instructor.

01H:171 Modern Art
European and American art 1900-1940. Prerequisite: 01H:006 or 01H:073 or consent of instructor.

### Art History, Primarily for Graduate Students

#### 01H:200 History and Methods
Critical thinking and research; readings in historical development of the discipline, from Renaissance to present; methodological paradigms and trends. 3 s.h.

#### 01H:210 Art History Colloquium
Current topics and research in art history. Repeatable. Prerequisite: art history graduate standing. 1 s.h.

#### 01H:247 Crossing Borders Seminar

#### 01H:300 Directed Studies
Repeatable. arr.

#### 01H:302 M.A. Written Thesis
Repeatable. arr.

#### 01H:310 Seminar: Problems in African Art
Repeatable. 2-3 s.h.

#### 01H:316 Seminar: Problems in Asian Art
Dialogue between arts and cultures of Asia and those of other major areas; varied research topics, such as Islamic arts in relation to those of Middle Ages and/or Renaissance in Europe; China and/or Japan in relation to Europe and/or the Americas, influences of Western arts and culture on Japan or China since World War II; students determine topics and research strategies in consultation with instructor; project. Repeatable. Prerequisite: art history experience or consent of instructor. 3 s.h.

#### 01H:330 Crossing Borders Proseminar

#### 01H:340 Seminar: Problems in Medieval Art
Major issues, methodologies. Repeatable. 3 s.h.

#### 01H:345 Seminar: Problems in Renaissance Art
Special problems, issues. Repeatable. 3 s.h.

#### 01H:353 Seminar: Problems in Baroque Art
Repeatable. 3 s.h.

#### 01H:359 Seminar: Problems in Nineteenth-Century Art
Repeatable. 3 s.h.

#### 01H:362 Seminar: Modern/Contemporary Art
Major issues, methodologies. Repeatable. Prerequisite: consent of instructor. 3 s.h.

#### 01H:366 Seminar: Problems in American Art
Repeatable. 3 s.h.

#### 01H:385 Seminar: Problems in Architectural History
Key themes, architects, and literature that informs the history of the built environment in varied cultural contexts. 3 s.h.

#### 01H:400 Ph.D. Readings
Repeatable. arr.

#### 01H:402 Ph.D. Thesis
Repeatable. arr.
Studio Art for Undergraduate and Graduate Students

Courses numbered through 099 are primarily for undergraduates and are not repeatable for credit except where indicated. Some courses numbered 100-199 are repeatable. Courses 01A:003 Basic Drawing and 01A:004 Design Fundamentals are prerequisites for all studio courses for art majors.

Fundamentals

01A:003 Basic Drawing
Two-dimensional visual language, media; space, form; color. Prerequisite: art major.

01A:004 Design Fundamentals
Two- and three-dimensional concepts and their relations; working with basic drawing instruments; problems in visual arts; artists' philosophies and techniques. Prerequisite: art major or consent of instructor.

01A:005 Writing About the Visual Arts
Opportunity to develop understanding of and skill in using visual-arts writing conventions and linguistic competencies that are necessary for academic and professional success; formats such as exhibition reviews, art criticism, research writing, artist's statements; experience through exercises, formal essays, revision, workshops. Prerequisite: fulfillment of General Education rhetoric requirement. Same as 01H:007.

01A:302 M.A. Written Thesis
Prerequisite: consent of thesis supervisor.

01A:304 M.F.A. Written Thesis
Prerequisite: consent of thesis supervisor.

Elements

01B:001 Elements of Art
Drawing, composition; selected reading. Prerequisite: non-art major. GE: Fine Arts.

01B:035 Elements of 3D Design
Introduction to 3D design using drafting, modeling, and virtual reality software; basic concepts of drafting, planning, and color theory; basic Auto CAD, 3ds Max Studio, Vizard, InDesign software; students design an object to be printed 2D and 3D and a conceptual space to be printed 2D and experienced virtually; student journal and portfolio. Prerequisite: nonart major.

01B:040 Elements of Jewelry and Metal Arts
Experience creating personalized jewelry and metal arts; varied concepts and tastes in contemporary jewelry and metal arts; materials; basic metalworking techniques such as soldering, riveting, hydraulic die forming, stone setting anodization of titanium and aluminum. Prerequisite: non-art major.

01B:050 Elements of Intermedia
Introduction to intermedia for non-art majors; conceptual, interdisciplinary approach to new and emerging art forms, including time-based media, video, collaborative, and community-based projects; research in online networks, web projects. Prerequisite: non-art major.

01B:051 Elements of Foil Imaging
Printmaking experience using the Iowa Foil Printer; aesthetic and technical research, documentation in Foil Imaging ... A New Art Form; hands-on opportunity to explore new dimensions of visual expression. Prerequisite: non-art major.

01B:075 Elements of Digital Photography
Introduction for non-art majors to history, aesthetics, and practice of photography as a fine art; includes demonstrations, workshops, critiques, final portfolio; photography time outside of class; digital camera required; $100-$150 for materials. Prerequisite: non-art major.

01B:080 Elements of Printmaking

**01B:090 Elements of Sculpture**

3 s.h.
Possibilities and definition of 3-D form, including time-based, performance, structural, installation, and kinetic sculpture. Prerequisite: non-art major. GE: Fine Arts.

**Ceramics**

Courses 01A:003 Basic Drawing and 01A:004 Design Fundamentals are prerequisites for all ceramics courses for art majors; 01B:001 Elements of Art is prerequisite for nonmajors.

**01C:060 Ceramics I**

3 s.h.
Basic handbuilding methods of forming, firing, glazing clay. Prerequisites: 01A:003 and 01A:004 for majors; 01B:001 for nonmajors. GE: Fine Arts.

**01C:061 Ceramics II**

3-4 s.h.
Basic wheel-throwing techniques; clay, glaze formulation and preparation in kiln firing. Prerequisite: 01C:060 or equivalent.

**01C:170 Ceramics III**

3-4 s.h.
Advanced throwing techniques; larger scale, more professional goals; projects may be more sculptural or one of a kind. Offered fall semesters. Prerequisites: 01C:060, 01C:061, and consent of instructor.

**01C:171 Ceramics IV**

3-4 s.h.
Advanced individual projects. Offered spring semesters. Prerequisites: 01C:170 and consent of instructor.

**01C:172 Ceramic Materials and Effects**

3-4 s.h.
Empirical, practical methods of glaze and body formulation; effects of various types of kilns and firing atmospheres on glaze materials, clay bodies; digital imaging used for testing and documenting results. Offered fall semesters of even years. Prerequisites: 01C:170 or equivalent, and consent of instructor.

**01C:173 Undergraduate Ceramics Workshop**

3-4 s.h.
Advanced undergraduate studio; critiques of student work and electronic portfolio development, visiting artist participation; may include field trips. Prerequisites: 01C:171 and consent of instructor.

**01C:174 Kiln Construction**

3-4 s.h.
Kiln theory, design, construction methods; may include participation in kiln construction. Offered fall semesters of odd years. Prerequisites: 01C:170 or equivalent, and consent of instructor.

**01C:190 Undergraduate Individual Instruction**

1-3 s.h.
Individual instruction in ceramics for advanced students. Prerequisite: consent of instructor.

**01C:270 Graduate Individual Instruction in Ceramics**

arr.
Repeatable. Prerequisites: knowledge of clay and glaze computation, ability to fire kilns; and consent of instructor.

**01C:275 Ceramics Workshop**

3-4 s.h.
Advanced graduate studio; critique of student work; visiting artists, field trips. Repeatable. Prerequisites: 01C:171 or equivalent, and consent of instructor.

**Design**

Courses 01A:003 Basic Drawing and 01A:004 Design Fundamentals are prerequisites for all design courses for art majors; 01B:001 Elements of Art is the prerequisite for nonmajors.

**01D:021 Problems in Design I: Form and Structure**

3 s.h.
Materials, their formal and structural possibilities. Offered fall semesters. Prerequisites: 01A:003 and 01A:004 for majors; 01A:004 for nonmajors; or consent of instructor.

**01D:022 Problems in Design II: Form and Function**

3 s.h.
How objects are designed and structured; modeling, graphic skills necessary for basic project development. Offered spring semesters. Prerequisite: 01D:021 or consent of instructor.

01D:023 Basic Drafting
How to prepare drawings for interior design projects; skills and techniques for translating 3-D design concepts to paper; drafting tools; conventions of notation and line weights and drafting in different scales; basic lettering; orthographic projections (e.g., floor plans, ceiling plans, elevations). Prerequisites: 01A:003 and 01A:004, or consent of instructor.

01D:025 Introduction to Portfolio Design
Preparation of presentation boards and portfolio production for print and job application; for students in 3-D design and related areas. Prerequisites: 01A:003 and 01A:004, or consent of instructor.

01D:028 Graphic Design I
Basic principles, techniques, and applications of graphic design, typography, composition, visual perception; creative, problem-solving aspects of graphic design. Prerequisites: 01A:003, 01A:004, and two art history courses.

01D:064 Introduction to Computer-Aided Design for 3-D Design
Basic principles of 2-D and 3-D computer-aided drafting; use of AutoCAD software to draw plans, elevations, and sections for objects and interior spaces. Prerequisites: 01A:003, 01A:004, and 01B:035 or consent of instructor.

01D:070 Introduction to Computer Modeling for 3-D Design
Basic knowledge and practical technical skills using 3DS Max Studio software; experience creating and manipulating basic forms and working with texture, background, light, and camera viewpoints; basic animation. Prerequisites: 01A:003 and 01A:004, or consent of instructor.

01D:075 Introduction to Virtual Reality for 3-D Design
Introduction to Vizard software; design of virtual 3-D space; translation of environments created in 3DS Max software into Vizard software. Prerequisite: 01D:070 or consent of instructor.

01D:082 Introductory Computer Graphic Design
Macintosh computer as creative tool for graphic design; composition, manipulation, organization of type and image; projects, demonstrations, discussions. Prerequisites: 01A:004 and 01D:028.

01D:125 Typography
Introduction to letterform and typographic fundamentals; designing with type—attention to composition, hierarchy, historical practice. Prerequisite: 01D:028.

01D:128 Computer Graphic Design
Advanced composition, manipulation of image and type; organization and pre-press file management using Macintosh platform. Prerequisites: 01D:028 and 01D:082, or consent of instructor.

01D:133 Graphic Design II
In-depth study and exploration of graphic design as creative and problem-solving tool of visual communication; translation of ideas and concepts into comprehensible visual language. Prerequisites: 01D:028, 01D:125, and consent of instructor.

01D:134 Graphic Design for the Web
Designing for the World Wide Web; composition, manipulation, organization of type and images; projects, demonstrations, discussions. Prerequisites: 01D:082 and 01D:133.

01D:135 Graphic Design Workshop I
Continuation of 01D:133; graphic design knowledge and skills applied to complex design problems such as visual identity, packaging, information design. Prerequisites: 01D:125 and 01D:133.

01D:137 Environmental Design I
Human interaction with the interior and exterior environment. Offered fall semesters of odd years. Prerequisite: 01D:021 or equivalent or consent of instructor. Same as 049:158.

01D:141 Interior Design I
3 s.h.
Relationship of interior space to its architecture, environment, human element; color, materials, furnishings, lighting; projects. Offered spring semesters. Prerequisites: 01B:035 and 01D:021, or consent of instructor.

01D:142 Color for Interior Design
Use of color for interior spaces; principles of color theory reviewed and applied to 3-D environments; color as a compositional element and psychological tool. Prerequisite: 01D:021 or equivalent or consent of instructor.

01D:144 Interior Design II
Continuation of 01D:141. Offered fall semesters of even years. Prerequisites: 01D:064 and 01D:141.

01D:175 Advanced Typography
In-depth exploration of typographic principles and experimentation. Prerequisite: 01D:125.

01D:190 Undergraduate Individual Instruction
Individual instruction in design for advanced students. Prerequisite: consent of instructor.

01D:194 Problems in Graphic Design
Design topics; content varies. Prerequisite: consent of instructor.

01D:235 Graphic Design Workshop II
Complex problems in graphic design; planning, development, organization of integrated design programs. Repeatable. Prerequisites: 01D:133, 01D:135, and consent of instructor.

01D:238 Environmental Design II
Continuation of 01D:137; design of virtual environments. Repeatable. Prerequisite: consent of instructor.

01D:240 Individual Instruction in Design
Repeatable.

01D:249 Advanced Problems in Design
Special issues and topics in design. Repeatable. Prerequisite: consent of instructor.

Drawing
Courses 01A:003 Basic Drawing01A:004 Design Fundamentals and are prerequisites for all drawing courses for art majors; 01B:001 Elements of Art is prerequisite for nonmajors.

All B.F.A. students in drawing and painting must take 01F:106 Undergraduate Seminar in Drawing and Painting. Offered fall semesters.

01F:007 Life Drawing I
Observational drawing of form in its spatial contexts; drawing in varied media; figural as well as nonfigural content. Prerequisites: 01A:003 and 01A:004; and 01B:001 for nonmajors.

01F:105 Concepts in Drawing
Drawing from topics at the intermediate level; observation, theory, media, form, content; emphasizes personal direction. Prerequisite: 01F:007. Same as 049:157.

01F:106 Undergraduate Seminar in Drawing and Painting
Contemporary issues, practical and professional skills, interdisciplinary concerns, education and career goals. Offered fall semesters. Prerequisite: 01F:105.

01F:109 Advanced Concepts in Drawing
Drawing from topics at the advanced level. Repeatable. Prerequisite: 01F:105.

01F:190 Undergraduate Individual Instruction
Individual instruction in drawing for advanced students. Prerequisite: consent of instructor.

01F:199 Special Topics in Drawing and Painting
Advanced issues in drawing and painting. Prerequisite: 01F:105.
01F:201 Graduate Drawing
Compositional and conceptual drawing as related to the student's major interest; varied media. Repeatable. Prerequisites: 6 s.h. of 01F:105 or equivalent, and consent of instructor.

01F:205 Individual Instruction in Drawing
Repeatable.

Jewelry and Metal Arts

Courses 01A:003 Basic Drawing and 01A:004 Design Fundamentals are prerequisites for all metalsmithing and jewelry courses for art majors; 01B:001 Elements of Art prerequisite for nonmajors.

01G:084 Introduction to Jewelry and Metal Arts
Basic metalworking techniques, including sheet metal fabrication, hammer forming, hydraulic die forming, soldering, riveting, repousse, etching, roll printing, anodizing, stone setting, patination; creation of jewelry, functional, and nonfunctional objects using metals, other materials. Prerequisites: 01A:003 and 01A:004 for majors, 01B:001 for nonmajors.

01G:185 Intermediate Jewelry and Metal Arts
Continuation of 01G:084; electroforming, electro-applique, casting, forging fold forming, inlay, stone setting, mold making; creation of conceptual and/or functional objects, jewelry, and prototype pieces for production art work using metals, other materials. Prerequisite: 01G:084.

01G:186 Advanced Jewelry and Metal Arts
Enameling, laser print transfer/resist, lathe usage, gold plating, kumboo; production of pieces using 3-D computer modeling, prototyping, other CNC industrial technologies, photo etching dropout processes; historical and current trends in crafts. Prerequisite: 01G:084.

01G:187 Mixed Media Workshop
Free exploration of all media and materials, including found objects; creation of conceptual and/or functional mixed media objects, jewelry, sculptures, installation pieces; pioneering use of new materials, development of new techniques, creation of diverse innovative art works. Prerequisite: 01G:084. Recommended: 01G:185 and 01G:186.

01G:188 Graduate Workshop
Independent studio work; personal aesthetics, conceptual and technical skills developed and refined; creation of work without boundaries of media; portfolios, exhibitions, professional goals. Prerequisites: 01G:185, 01G:186, and 01G:187; or equivalents.

01G:190 Undergraduate Individual Instruction
Individual instruction in metalsmithing and jewelry for advanced students. Prerequisite: consent of instructor.

01G:240 Individual Instruction in Metalsmithing and Jewelry

Intermedia

Courses 01A:003 Basic Drawing and 01A:004 Design Fundamentals are prerequisites for all intermedia courses for art majors; 01B:001 Elements of Art is prerequisite for nonmajors.

01J:090 Intermedia I
Interdisciplinary focus; emphasis on conceptual, installation, video, time-based media, performance art. Prerequisites: 01A:003 and 01A:004 for art majors.

01J:091 Intermedia II
Interdisciplinary investigation of materials and concepts in relation to time-based media, performance, video, installation; individual and collaborative projects. Prerequisite: 01J:090.

01J:100 Intermedia Topics
Areas of intermedia practice, including installation, video, Internet-based production, sound design, image and text, new media. Prerequisite: 01J:090 or consent of instructor.

01J:104 Media Art Lab
Study and production in the media arts--digital video, sound, installation/performance, Internet, new media art; conceptual development through readings, screenings; hands-on workshops using a range of media production equipment and platforms; in-class, short-term projects. Prerequisite: 01J:090 or equivalent, or consent of instructor. Recommended: experience with media technologies.

01J:105 Time-Based Media/Video I
Study and production in the media arts--digital video, sound, installation/performance, Internet, new media art; conceptual development through readings, screenings; hands-on workshops using a range of media production equipment and platforms; in-class, short-term projects. Prerequisite: 01J:090 or equivalent, and consent of instructor.

01J:106 Time-Based Media/Video II
Continuation of 01J:105. Prerequisite: 01J:105 or consent of instructor.

01J:108 Art and Ecology
Collaborative, creative research group; artistic responses to environmental sustainability and related social issues; critical approaches rooted in humanities, other disciplines. Prerequisite: 01J:090 for majors, or senior or graduate standing, or consent of instructor.

01J:110 Intermedia Workshop
Visual practice/visual theory; projects, critiques, visiting artists and scholars. Prerequisite: consent of instructor.

01J:115 What is Storytelling For?
Same as 033:115.

01J:140 Artists in the Community--Intermedia
Student participation in internships at Iowa City and Johnson county nonprofit organizations; interdisciplinary seminar.

01J:190 Undergraduate Individual Instruction
Individual instruction in intermedia for advanced students. Prerequisite: consent of instructor.

01J:201 Individual Instruction in Intermedia and Video Art
Repeatable.

01J:208 Intermedia Graduate Special Topics
Areas of intermedia practice, including installation, video, Internet-based production, sound design, image and text, new media. Repeatable. Prerequisite: consent of instructor.

Painting
Courses 01A:003 Basic Drawing and 01A:004 Design Fundamentals are prerequisites for all painting courses for art majors; 01B:001 Elements of Art is prerequisite for nonmajors.

01K:009 Painting I
Emphasis on observational painting, theory and development of pictorial ideas and skills. Prerequisite: 01F:007.

01K:010 Painting II
Materials, techniques, beginning of a personal painting language through observation and imagination. Prerequisites: 01K:009 and consent of instructor.

01K:046 Painting III
Painting, with contemporary issues overlying study in materials and techniques; language and direction of personal painting. Prerequisite: 01K:010.

01K:049 Painting IV
Individual projects as they aid the realization of a personal vision. Prerequisite: consent of instructor.

01K:190 Undergraduate Individual Instruction
1-3 s.h.
Individual instruction in painting for advanced students. Prerequisite: consent of instructor.

**01K:199 Special Topics in Painting and Drawing**
Advanced issues in painting, drawing. Prerequisite: 01K:010. 3-4 s.h.

**01K:206 Graduate Painting: Topics**
Individual painting projects in desired medium; topics vary. Prerequisite: consent of instructor. Corequisite: 01K:208. 3-4 s.h.

**01K:207 Graduate Drawing and Painting Workshop**
Group and individual criticism, team-taught. Prerequisite: consent of instructor. Corequisite: 01K:208. 3-4 s.h.

**01K:208 Graduate Drawing and Painting Forum**
Problems and issues of contemporary artists. Prerequisite: consent of instructor. 1 s.h.

**01K:215 Individual Instruction in Painting**
Repeatable. Prerequisite: consent of instructor. arr.

**Photography**
Courses 01A:003 Basic Drawing and 01A:004 Design Fundamentals are prerequisites for all photography courses for art majors; 01B:001 Elements of Art is prerequisite for nonmajors.

**01L:034 Beginning Photography**
Camera, light meter, darkroom; history, theory of photography. Prerequisites: 01A:003 and 01A:004 for majors; 01B:001 for nonmajors. 3 s.h.

**01L:036 Beginning Digital Photography**
How to use digital technology to make high-quality color and black-and-white photographs from scanned film and digital files; basic photography skills, including exposure, bracketing, composition; how to use raw files to make large digital prints; color profiles for fine digital printing. Prerequisites: 01A:003 and 01A:004. 3 s.h.

**01L:040 Introduction to Digital Imaging**
Working knowledge of digital image-making techniques, including image capture, image building/editing, printing/output options, work with Photoshop on Macintosh computers. 3-4 s.h.

**01L:101 Intermediate Photography Darkroom**
Darkroom techniques, including film developing and printing; theory and practice of photography as fine art and cultural phenomenon; development of visual literacy, students' critical awareness of their work. Prerequisite: 01L:034 or equivalent or consent of instructor. 3-4 s.h.

**01L:102 Intermediate Photography Digital**
Digital photography including landscape, portrait, collage, still life, manipulated images; black-and-white and color printing; computer technology; history of photography in political and social issues. Prerequisite: 01L:034 or equivalent or consent of instructor. 3-4 s.h.

**01L:105 Advanced Photography**
Individual projects; development of personal vision. Prerequisite: 01L:101. 3-4 s.h.

**01L:129 Materials and Techniques**
Concepts and techniques, from reading contemporary topics to understanding and applying nontraditional photographic processes and digital imaging. Prerequisites: 01L:101 and consent of instructor. 3-4 s.h.

**01L:134 Silkscreen**
Photographic, nonphotographic stencil techniques for silkscreen printing. Prerequisites: 01A:003 and 01A:004. Recommended: 01L:034. 3-4 s.h.

**01L:140 Digital Imaging**
Varied image editing programs, with focus on Photoshop, and the web; advanced. Prerequisite: intermediate photography experience or consent of instructor. 3-4 s.h.
01L:165 4x5 Camera and Lighting
Use of a 4 x 5 camera to correct perspective, depth of field; large format printing, negative processes. Prerequisite: 01L:101 or consent of instructor.

01L:190 Undergraduate Individual Instruction
Individual instruction in photography for advanced students. Prerequisite: consent of instructor.

01L:231 Individual Instruction in Photography
Repeatable. Prerequisite: consent of instructor.

01L:236 Graduate Photography Workshop
Projects; group critiques; readings. Prerequisite: consent of instructor.

Printmaking
Courses 01A:003 Basic Drawing and 01A:004 Design Fundamentals are prerequisites for all printmaking courses for art majors; 01B:001 Elements of Art is prerequisite for nonmajors.

01M:011 Introduction to Printmaking
Introduction to methods, materials, and concepts of printmaking. Prerequisites: art major, 01A:003, and 01A:004.

01M:021 Undergraduate Intaglio
Concepts, techniques; Renaissance and contemporary ideas, methods; emphasis on metal plate printing, including etching, drypoint, engraving, softground, aquatint. Prerequisites: 01A:003 and 01A:004 for majors; 01B:001 for nonmajors.

01M:024 Undergraduate Relief
Relief printmaking techniques. Prerequisites: 01A:003 and 01A:004 for majors, 01B:001 for nonmajors.

01M:031 Undergraduate Lithography
Fundamental techniques, characteristics of lithography; basic direct drawing, processing, printing of stone and plate images in black and white. Prerequisite: 01F:007 or equivalent.

01M:042 Undergraduate Monoprint
Concepts and techniques in using traditional and alternative printmaking media to produce unique, matrix generated prints. Prerequisite: 01M:021 or equivalent.

01M:121 Intaglio
Concepts, techniques; traditional through contemporary ideas, methods; emphasis on metal plate printing, including etching, drypoint, engraving, softground, aquatint. Prerequisite: graduate standing.

01M:122 Advanced Intaglio and Relief
Concepts and techniques of intaglio/relief; etching, engraving, drypoint, softground, aquatint, woodcut, linocut, color printing; emphasis on advanced methods, personal vision. Prerequisites: 01M:021, and 01M:024 or 01M:031 or equivalent.

01M:124 Relief
Concepts and techniques of relief printmaking, including woodcut, linocut, relief etching, black-and-white and color printing methods; traditional and contemporary approaches; for graduate students with no printmaking experience. Prerequisite: graduate standing.

01M:131 Lithography
Technical, aesthetic characteristics; basic direct drawing, processing, printing of stone and plate images in black and white. Prerequisite: graduate standing.

01M:132 Advanced Lithography
Technical, aesthetic aspects; emphasis on color printing, indirect image-forming and photo-mechanical processes. Prerequisites: 01M:021 or 01M:024, and 01M:031.
01M:141 Monotype
3-4 s.h.

01M:142 Monoprint
3-4 s.h.
Concepts, techniques in use of traditional and alternative printmaking media to produce unique, matrix-generated prints. Offered spring semesters. Prerequisites: 01M:021, and 01M:024 or 01M:031 or equivalent.

01M:151 Foil Imaging I
3-4 s.h.
Participation in development of a new art form involving creation of original prints and other works of art using hot stamped foil and Iowa Foil Printer. Prerequisite: consent of instructor.

01M:152 Foil Imaging II
3-4 s.h.
Advanced aesthetic and technical research for creation of original prints and other works of fine art using hot stamped foil and other printmaking techniques; individual instruction. Prerequisites: 01M:151 or equivalent, and consent of instructor.

01M:160 Special Workshop in Printmaking
2-3 s.h.
Issues, themes, or studio practice. Prerequisite: consent of instructor.

01M:170 Foil Workshop in Printmaking
2 s.h.
Hands-on experience creating foil prints; workshop format. One or two weeks. Offered summer session.

01M:190 Undergraduate Individual Instruction
1-3 s.h.
Individual instruction in printmaking for advanced students. Prerequisite: consent of instructor.

01M:250 Individual Instruction in Printmaking
arr.
Repeatable.

01M:260 Graduate Print Workshop
3-4 s.h.
Contemporary issues in printmaking; emphasis on development of personal work and independent studio practice through group critiques, special research projects, work in all print media. Repeatable. Prerequisites: 01M:122 and 01M:132, or equivalents.

Sculpture

Courses 01A:003 Basic Drawing and 01A:004 Design Fundamentals are prerequisites for all sculpture courses for art majors; 01B:001 Elements of Art is prerequisite for nonmajors.

01N:015 Undergraduate Sculpture I
3 s.h.
Basic sculptural concepts, processes, investigation of materials such as plaster, clay, wood; emphasis on developing formal language, acquiring basic skills; spatial, conceptual, technical issues. Prerequisites: 01A:003 and 01A:004 for majors; 01B:001 for nonmajors. GE: Fine Arts.

01N:016 Undergraduate Sculpture II
3-4 s.h.
Continuation of 01N:015; form, materials, processes, woodcarving, welding, concrete carving and direct application; expanding concept development; contemporary sculptural formats, collaborative process. Prerequisite: 01N:015.

01N:019 Sculpture Workshop
3-4 s.h.
Critiques with focus on concept and form development; new processes. Prerequisites: 01N:016 and consent of instructor.

01N:140 Topics in Sculpture
3-4 s.h.
Projects, reading; specialized conceptual forms and issues in contemporary sculpture, such as public art, installation. Prerequisites: 01N:015, 01N:016, and consent of instructor.

01N:150 Figure Modeling
3-4 s.h.
Exploration of the human form with live model; clay on a wire armature, portrait modeling, relief. Prerequisite: 01N:015.

01N:155 Advanced Figure Modeling
3-4 s.h.
Exploration of human form in clay on wire armature, from live model; portrait modeling and relief human anatomy; human form in full scale on welded armature. Prerequisites: 01F:007 and 01N:150, or equivalents or consent of instructor.

**01N:160 Mold Making**
All aspects of mold making—plaster, rubber, silicone; technical preparation for 01N:165. Prerequisites: 01N:015, 01N:016, and consent of instructor. 3-4 s.h.

**01N:165 Casting in Hot Metal**
Foundry work, wax working, mold making, and processes. Prerequisites: 01N:016 and 01N:160. 3-4 s.h.

**01N:190 Undergraduate Individual Instruction**
Individual instruction in sculpture for advanced students. Prerequisite: consent of instructor. 1-3 s.h.

**01N:260 Individual Instruction in Sculpture**
Repeatable. 3-4 s.h.

**01N:264 Graduate Sculpture Workshop**
Critique seminar with readings for graduate sculptors and nonsculpture graduate students. Repeatable. Prerequisite: consent of instructor. 3-4 s.h.

### Interdepartmental Courses

**01P:029 First-Year Seminar**
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Prerequisite: first- or second-semester standing. 1 s.h.

**01P:030 Art and Design Learning Community**
Varied studio art-related techniques taught in workshop setting. Saturdays and evenings. Prerequisite: first-year standing in Art and Design Learning Community. 1 s.h.

**01P:090 Issues in Contemporary Art**
3 s.h.

**01P:130 Cycling the American Discovery Trail: Iowa Route**
Bicycle touring on the American Discovery Trail, Iowa Route; gravel route (or paved, depending on weather), 60 miles per day for eight days, carrying camping and other gear, which students must supply; focus on poetics of adventure and landscape, and teamwork; assigned readings, digital portfolio, presentation of stories on UITV; good physical condition and bicycling experience required; expenses in addition to tuition. Prerequisite: consent of instructor. 3 s.h.

**01P:134 Scene Design I**
The development of theatre scenery; how to research, conceptualize, and express ideas in sketches, models, simple drafting. Same as 049:134. 3 s.h.

**01P:150 Comics, Graphic Novels: Introduction to Sequential Art**
Overview of contemporary American comic artists, history of comics and graphic novels in the United States; genres and structures in sequential art; students create works that combine design, images, texts, story. Prerequisite: satisfaction of rhetoric requirement. 3 s.h.

**01P:160 Introduction to Letterpress Printing**
Mechanics of letterpress printing, basic elements of typographic design as applied to letterpress edition printing; hand setting and printing from metal type on Vandercook proof presses; printing text and illustration from photopolymer plates; historical aspects of printing, early development of printing technologies, evolution of letterpress printing through 20th century. Same as 108:160. 3 s.h.

**01P:161 Handprinted Book: Design and Production**
3 s.h.
Exploration of problems in hand-printing books—choice of manuscript, editing, design, typesetting, proofreading, printing and binding; histories of printing and of the book, emphasis on 20th-century book design and literature. English majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: 20th- and/or 21st-Century Literature. Prerequisite: consent of instructor. Same as 008:187, 108:161.

01P:162 Digital Book Design 3 s.h.
Students plan, design, and produce a book using Adobe Creative Suite; page layout software, typography, page layout and design, book formatting, handling of image files, preparation of materials for print and other contemporary book media; history of book design, book design in contemporary publishing; visit to University of Iowa Libraries Special Collections. Prerequisites: 01D:125 or 108:160 or consent of instructor. Same as 108:162.

01P:163 Digital to Letterpress Book Design 3 s.h.
Digital typesetting and book design; chapbook production using photopolymer plates and Vandercook presses; text and content, book typography, practical and aesthetic considerations. Prerequisite: consent of instructor. Same as 108:163.

01P:164 Digital Design for Artists’ Books 3 s.h.
Introduction to concepts, techniques, and technologies used to design and produce artists' books with personal computers and graphic design software. Same as 108:164.

01P:165 Innovative Letterpress 3 s.h.
Creation of the visual book using letterpress printing; narrative, serialization, type as graphic, physical structure of the book; traditional letterpress printing, monoprinting, nontraditional letterpress techniques using technology ranging from metal to digital. Same as 108:165.

01P:170 Issues in Contemporary Art 3 s.h.
Current trends and developments in art and related culture; interdisciplinary approach. Prerequisites: art major and one introductory art course.

01P:180 Digital Portfolios in the Arts 1-3 s.h.
Students create a World Wide Web-based digital portfolio featuring their studio work and creative scholarship.

01P:185 Grant Writing in the Arts 3 s.h.
Same as 024:170.

01P:190 Honors in Studio Art 0-3 s.h.
Research, preparation, and exhibition of an honors project in studio art. Prerequisite: consent of instructor.

01P:199 Topics in Studio Arts 3 s.h.
Individual instruction by a faculty member.

Papermaking

01X:110 Papermaking 3 s.h.
History, fundamental techniques of Western and Eastern hand papermaking; projects in traditional sheet forming, basic paper chemistry, paper coloring. Offered fall semesters. Prerequisite: consent of instructor. Same as 108:110.

01X:120 Papermaking History and Technique 3 s.h.
Traditional Eastern and Western sheet forming techniques, history, aesthetics; emphasis on fiber selection and preparation. Offered spring semesters. Prerequisite: consent of instructor. Same as 108:132.

01X:130 Paperworks 3 s.h.
Conceptual and methodological approaches to 2-D and 3-D paper works; students create a body of works that couple the unique properties of paper-pulp medium with personal visual ideas and clarity of intent; contemporary issues in paper pulp and the medium’s relationship to larger art and craft contexts; for students with significant prior papermaking experience. Prerequisite: 01X:110 or 01X:210 or equivalent; or consent of instructor. Same as 108:130.
01X:210 Individual Instruction in Papermaking/Paperworks
Repeatable. Prerequisites: 01X:120 and consent of instructor.

Bookbinding

01Y:150 Bookbinding I: Materials and Techniques
Hands-on introduction to materials and techniques commonly used in bookbinding. Same as 108:150.

01Y:151 Bookbinding II
Build on skills acquired in 108:150; projects to complete six bindings based on historical and contemporary models; sewing styles, board attachments, endband types; nonadhesive and case-bound structures, varied materials and binding styles, their effects on structure, aesthetic considerations, further development of solid binding skills; historical development of particular binding practices. Prerequisite: 108:150 or consent of instructor. Same as 108:151.

01Y:152 Bookbinding III
Five bookbindings based on historical and contemporary models; differences in various binding practices, how these differences affect function, why the styles developed; experience choosing appropriate structures for particular uses; emphasis on fine tuning skills and techniques required for advanced binding practices; sewn endbands, rounding and backing, sewing on varied supports, board attachments, and covering methods. Prerequisites: (for 108:152) 108:150 and 108:151, or consent of instructor. Prerequisites: (for 01Y:152) 01Y:150 or 01Y:151 or 108:150 or 108:151, and consent of instructor. Same as 108:152.

01Y:153 Studies in Bookbinding
Topics related to hand binding. Prerequisite: consent of instructor. Same as 108:153.

01Y:154 Artists' Books
Nontraditional binding structures; emphasis on innovative techniques and how parts of the book function. Prerequisite: 01Y:150 or 108:150 or consent of instructor. Same as 108:154.

01Y:156 Boxes and Enclosures
Hands-on techniques for a variety of book enclosures; appropriateness, aesthetic issues concerning box design; Japanese wraparound case, drop-spine box, hinged and lidded boxes, slipcase; technical skill development. Prerequisite: 108:150 or consent of instructor. Same as 108:156.

01Y:157 Moveable/Sculptural Books
Varied formats for moveable and/or sculptural books; history; readings, hands-on model making. Same as 108:157.

01Y:158 Pop-Up Book Structures
Hands-on exploration of varied aspects of paper engineering for bookmaking; historical and modern models studied and executed. Prerequisite: 108:150 or consent of instructor. Same as 108:158.

Calligraphy

01Z:142 History of Western Letterforms
History of Western letterforms, with focus on tools, materials, techniques; the major hands, their place in history, their influence on modern times; creation of letterforms using appropriate tools; hands-on approach with emphasis on understanding rather than mastery. Same as 108:142.

01Z:143 Calligraphy: Foundational Hands
Fundamental calligraphic skills using Roman majuscule, Humanistic minuscule, Italic; basic layout and color theory incorporated into letter practice. Same as 108:143.

01Z:144 Calligraphy: Italic and Script Hands
Hands-on instruction in italic and pressure pen scripts; historical relationships, effects on modern letterforms. Same as 108:144.

01Z:146 Studies in Letter Arts

Special topics and advanced projects in calligraphy and letter arts. Prerequisite: 108:140 or 108:141 or 108:142 or 108:143 or consent of instructor. Same as 108:146.

**Art Education for Undergraduate and Graduate Students**

**01E:143 Composing Art Workshops**  
3-4 s.h.  
Application of studio methods to teaching children in Saturday Children's Art Class Program. Prerequisite: 01E:196. Same as 07E:122.

**01E:190 Undergraduate Individual Instruction**  
1-3 s.h.  
Individual instruction in art education. Prerequisites: 01A:003, 01A:004, and consent of instructor.

**01E:195 Methods and Materials: Art for the Classroom Teacher**  
2 s.h.  
Projects, techniques, processes in art for elementary majors; combination lecture and studio; painting, drawing, printmaking, sculpture, and crafts with materials and tools commonly available in the elementary schools. Prerequisite: admission to TEP. Same as 07E:122.

**01E:196 Art Learning**  
3-4 s.h.  
Overview; child, adolescent art; relationships with art, education; survey of literature; community art teaching experiences.

**01E:198 Art Education Studio**  
3-4 s.h.  
Art training related to processes of elementary, secondary school art teaching; studio methods applied to teaching children, adolescents. Prerequisite: 01E:196. Corequisite: 07S:090 for Teacher Education Program.

**01E:215 Visual Art Practice as Research: Portfolio**  
4 s.h.  
Storytelling with interactive media; strategies for conveying story performance, case studies, and visual conceptualization; portfolio, case study, or story inquiry project. Repeatable.

**01E:290 Individual Instruction in Art Education**  
arr.

**01E:367 Seminar: Current Issues in Art Education**  
3-4 s.h.  
Analysis of literature in art education and related disciplines. Repeatable. Same as 07S:367.

**01E:406 Research in the Arts and Humanities**  
arr.  
Individual research under supervision; applicable to thesis preparation, doctoral prospectus development. Repeatable. Same as 07E:406, 07S:406.
Asian and Slavic Languages and Literatures

Chair: Margaret Mills
Professors: W. South Coblin, Chuanren Ke, Philip Lutgendorf, Margaret H. Mills, Frederick Smith (Religious Studies/Asian and Slavic Languages and Literatures), Russell Valentino
Associate professors: Robert W. Leutner, Maureen Robertson (Asian and Slavic Languages and Literatures/Cinema and Comparative Literature), Helen Shen
Assistant professor emeritus: Christopher A. Wertz
Associate professors: Jennifer Feeley, Ikuko Yuasa
Assistant professor emerita: Miriam J. Gelfand
Lecturers: Irina Kostina, Jitka Sonkova, Xiaoyuan Zhao
Undergraduate degrees: B.A. in Asian Languages and Literature, Russian
Undergraduate nondegree programs: Minor in Asian Languages, Russian
Graduate degrees: M.A. in Asian Civilizations, Russian
Web site: http://www.uiowa.edu/~asll/

The Department of Asian and Slavic Languages and Literatures offers instruction in languages of Asia and eastern Europe as well as in the literatures, civilizations, and cultures of the regions. In addition to offering undergraduate and graduate degrees, the department welcomes students from across the University to enroll in courses that complement their degree programs or that satisfy personal interests.

Undergraduate Program

The department offers a Bachelor of Arts in Asian languages and literature and in Russian, a minor in Asian languages, and a minor in Russian.

The major in Asian languages and literature is intended for students who wish to concentrate on one of the language and literature programs offered by the department. Students interested in Asian studies may add a second major by pursuing a Bachelor of Arts in international studies with an emphasis in Asian studies; see International Studies in the Catalog.

The major in Asian languages and literature offers students the opportunity to develop advanced skills in an Asian language while they study the people, literatures, and cultures of Asia. Many students find that they can combine an Asian languages and literature major conveniently with a major in international studies, history, political science, art history, religion, sociology, journalism, business, anthropology, or other disciplines.

Graduates have found careers in education, government, communications, business, and other fields in the United States and abroad. The program also provides excellent background for advanced study in a variety of fields in the humanities and social sciences and for professional schools, such as law and business.

The Russian major trains students in both written and spoken Russian and in Russian literature, culture, and civilization. The department encourages students to pursue a second major (e.g., global health, history, linguistics, political science) and to develop their interests in related or complementary fields. Students interested in focusing on a broader interdisciplinary understanding of the region may pursue a second major in International Studies.

Training in Russian is often an important asset to careers in the natural and physical sciences, engineering, medicine, business, journalism, library and information science, and the social and military sciences. It also may be appropriate preparation for study of law or international relations as well as Slavic languages and literatures, comparative literature, and other humanistic disciplines.

Some governmental agencies are interested in job candidates who have advanced training in Russian; these agencies give preference to applicants who combine strong language proficiency with a well-rounded background in area studies. Students who develop an exceptional facility with the Russian language may pursue careers in literary and technical translation and interpretation.

Bachelor of Arts in Asian Languages and Literature

The Bachelor of Arts in Asian languages and literature requires a minimum of 120 s.h., including 30-40 s.h. of work for the major. Students choose from four tracks: Chinese, Hindi, Japanese, and Sanskrit; required credit for the major depends on choice of track. Transfer work is accepted to satisfy some requirements of the major, but at least half of the semester hours of advanced work required for the major must be earned at The University of Iowa. Students must complete the College of Liberal Arts and Sciences General Education Program.

CHINESE TRACK COURSES

Students must successfully complete 039:105 Second-Year Chinese: First Semester and 039:106 Second-Year Chinese: Second Semester (10 s.h.) at The University of Iowa with a grade of C or higher, or the equivalent, before they enroll in the following course work.

039:108 Classical Chinese: First Semester 3 s.h.
Third-Year Chinese: First Semester - Third-Year Chinese: Second Semester 6 s.h.
039:141 Chinese Literature: Poetry 3 s.h.

One of these:
039:142 Chinese Literature: Prose 3 s.h.
039:180 Modern Chinese Writers 3 s.h.

One of these advanced language courses (3 s.h.):
039:165 Fifth-Year Chinese: First Semester 3 s.h.
039:166 Fifth-Year Chinese: Second Semester 3 s.h.
039:171 Readings in Chinese Literature 3 s.h.
039:215 Individual Chinese for Advanced Students arr.

Students also must complete two of the following, to support the study of literature and culture.
01H:120 Chinese Painting I 3 s.h.
01H:124 Themes in Asian Art History 3 s.h.
16W:198 China Since 1927 3 s.h.
030:148 Government and Politics of China 3 s.h.
032:170 Topics in Asian Religions 3 s.h.
039:015 Introduction to Chinese Culture 3 s.h.
039:016 Asian Art and Culture 3 s.h.
039:032 Chinese Popular Culture 3 s.h.
039:034 The Languages of Asia in Cultural and Historical Perspective 3 s.h.
039:240 Seminar in Chinese Fiction 3 s.h.

Only courses that pertain to Chinese culture or to the methodology of literary or cultural studies can be counted toward this requirement. Content for the following courses may vary by semester or course section; see departmental advisor for approval.
008:129 Topics in Criticism and Theory 3 s.h.
008:161 Transnational and Postcolonial Writing by Women 3 s.h.
008:270 Introduction to Cultural Studies 3 s.h.
048:079 Undergraduate Translation Workshop 3 s.h.
048:155 Narratives Modes 3 s.h.
048:172 Narrative and the Cinema 3 s.h.

HINDI TRACK COURSES
039:126-039:127 Second-Year Hindi: First Semester - Second-Year Hindi: Second Semester 8 s.h.
039:184-039:185 Third-Year Hindi: First Semester - Third-Year Hindi: Second Semester (students may substitute 6 s.h. of 100-level courses in South Asian studies, with the approval of their major advisors) 6 s.h.
039:136 Indian Literature 3 s.h.

Additional advanced courses (100-level) in South Asian studies, including 1-3 s.h. of independent study 13 s.h.

A list of advanced courses is available from the department.

JAPANESE TRACK COURSES

Advanced courses in Japanese literature taught by faculty members in the department (e.g. 39J:141, 39J:142, 39J:143) 6 s.h.

Additional advanced courses taught by faculty members in the department 6 s.h.
Lists of advanced courses are available from the department.

**SANSKRIT TRACK COURSES**

039:186-039:187 Third-Year Sanskrit: First Semester - Third-Year Sanskrit: Second Semester (students may substitute 6 s.h. of advanced courses (100-level) in South Asian studies, with the approval of their major advisors) 6 s.h.
039:136 Indian Literature 3 s.h.
039:163 Indian Religious Texts 3 s.h.
Additional advanced courses (100-level) in South Asian studies, including 1-3 s.h. of independent study 12 s.h.

A list of advanced courses is available from the department.

Students of Sanskrit and Hindi are urged to fulfill the General Education Program requirement in historical perspectives (3 s.h.) by completing 016:007 Civilizations of Asia: South Asia.

**Bachelor of Arts in Russian**

The Bachelor of Arts in Russian requires a minimum of 120 s.h., including 31 s.h. of work for the major earned in advanced Russian courses. Students must complete the College of Liberal Arts and Sciences General Education Program.

The major in Russian requires the following courses.

One of these:

- 041:109 Beginning Composition and Conversation I 4 s.h.
- 041:110 Beginning Composition and Conversation II 4 s.h.

Both of these sequences:

- 041:111-041:112 Third-Year Russian I-II 8 s.h.
- 041:113-041:114 Fourth-Year Russian I-II 8 s.h.

Four of these (Russian/East European culture):

- 041:093 Slavic Folklore 3 s.h.
- 041:094 Religion and Culture of Slavs 3 s.h.
- 041:096 Islamic Women in Russia 3 s.h.
- 041:097 Istria 3 s.h.
- 041:098 Introduction to Russian Culture 3 s.h.
- 041:099 Russia Today 3 s.h.
- 041:100 Russian Literature in Film 3 s.h.
- 041:102 Russian Literature in Translation 1860-1917 3 s.h.
- 041:103 Russian Literature since 1917 3 s.h.
- 041:104 Health Care and Health Reforms in Russia 3 s.h.
- 041:148 Journey Through Time and Culture 3 s.h.
- 041:155 Tolstoy and Dostoevsky 3 s.h.
- 041:156 Invitation to Nabokov 3 s.h.
- 041:160 Women in Russian Society 3 s.h.
- 041:164 Topics in Russian, East European, and Eurasian Studies arr.
- 041:168 Twentieth-Century Czech Authors 3 s.h.

Students may substitute one of the following Slavic language two-course sequences for one of the four required Russian/East European culture courses (see list above). Availability of Croatian and Polish language courses varies.

- 041:141-041:142 First-Year Czech I-II 8 s.h.
- 041:143-041:144 Second-Year Czech I-II 8 s.h.
- 041:181-041:182 First-Year Croatian I-II 8 s.h.
Students majoring in Russian are urged to choose elective courses in economics, geography, history, political science, global health, and international studies. Nearly every avenue of professional training and employment requires a solid background in Russian area studies. For example, criteria for U.S. government employment include substantive knowledge in history, economics, political science, sociological disciplines, scientific specialties, demography, military-related skills, and in some cases cultural and religious background. In-depth knowledge of literature or linguistics without other substantive background may be of limited practical use in gaining employment.

B.A. with Teacher Licensure

Teacher Licensure in Chinese and Japanese

Chinese and Japanese majors interested in licensure to teach in elementary and/or secondary schools must successfully complete the requirements for a major, or the equivalent, plus designated pedagogy and linguistics courses in the Department of Asian and Slavic Languages and Literatures. In addition, students must be admitted to the College of Education's foreign language Teacher Education Program. Several courses in the College of Education are required, as is one semester of student teaching, taken in the senior year. Contact the College of Education's Department of Teaching and Learning for more information.

Students who plan to use a Chinese or Japanese minor to teach at the elementary and/or secondary level must contact the College of Education for requirements.

Teacher Licensure in Russian

Russian majors interested in licensure to teach in elementary and/or secondary schools must successfully complete the requirements for a major in Russian and must be admitted to the College of Education's foreign language Teacher Education Program. Several courses in the College of Education are required, as is one semester of student teaching in the senior year. All students in the program have the option of earning a K-12 endorsement to teach Russian along with the bachelor’s degree. For information about the foreign languages Teacher Education Program and graduate programs in foreign language education, contact the Department of Teaching and Learning (College of Education).

Students who plan to use a Russian minor to teach at the elementary and/or secondary level must contact the College of Education for requirements.

Four-Year Graduation Plan

B.A. in Asian Languages and Literature

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

Before the third semester begins: for students in Chinese and Japanese tracks, language work begun (students in the Hindi and Sanskrit tracks may begin language work in their sophomore year) and at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: at least first-year language competency and at least one-half of the semester hours required for graduation

Before the seventh semester begins: at least second-year language competency and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: at least third-year, first-semester language competency and one additional course in the major (two additional courses in the Japanese track)

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

B.A. in Russian

Before the third semester begins: competence in first-year Russian and at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: competence in second-year Russian and at least one-half of the semester hours required for graduation

Before the seventh semester begins: competence in third-year Russian, an additional course in the major, and at least three-quarters of the semester hours required for graduation
Before the eighth semester: competence in fourth-year Russian and two more courses in the major

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Honors

Honors in Asian Languages and Literature

Students who maintain a cumulative University of Iowa g.p.a. of at least 3.33 are encouraged to enroll in the University of Iowa Honors Program. With consent of the department chair and a faculty sponsor (an Asian specialist from any department), students register for 039:191 Honors Tutorial and 039:195 Senior Honors Thesis. To receive a B.A. with honors, students must complete an acceptable thesis based on original research.

Honors in Russian

Russian majors with junior or senior standing, a g.p.a. of at least 3.33 in Russian, and a cumulative University of Iowa g.p.a. of at least 3.33 may enroll in the honors program in Russian. An extensive reading program with discussions, regular reports, and a semester paper constitute each honors work unit of 3 s.h. Students may take up to 9 s.h. of honors in Russian. Contact the University of Iowa Honors Program for more information about honors study at Iowa.

Minor in Asian Languages

The minor in Asian languages requires a minimum of 15 s.h. (or 14 s.h. for the Hindi emphasis), including 12 s.h. in advanced courses taken at The University of Iowa. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass. Students may earn the minor with an emphasis in Chinese, Hindi, Japanese, or Sanskrit. Course work for each emphasis is as follows.

Students with a Hindi emphasis may complete the advanced course requirement with 11 s.h., and the minor with a total of 14 s.h. The courses 039:123 First-Year Hindi: First Semester and 039:124 First-Year Hindi: Second Semester do not count as advanced courses for the minor.

Students with a Japanese emphasis must choose one of the advanced courses from literature, culture, or linguistics courses. A list of courses approved for the minor is available from the department.

Minor in Russian

The minor in Russian requires a minimum of 15 s.h. in Russian, including 12 s.h. in advanced courses taken at The University of Iowa. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass. Students may count a maximum of 3 s.h. taught in English toward the minor. The department recommends that students choose 100-level courses for the minor, such as the sequences 041:109 Beginning Composition and Conversation I and 041:110 Beginning Composition and Conversation II, 041:111 Third-Year Russian I and 041:112 Third-Year Russian II, and 041:113 Fourth-Year Russian I and 041:114 Fourth-Year Russian II.

Courses for Nonmajors

The department offers several opportunities for students who wish to study the languages of Asia, South Asia, and eastern Europe. Language study is available in Chinese, Croatian, Czech, Hindi, Japanese, Korean, Russian, Sanskrit, and Uzbek.

Students who have had experience with Japanese or Russian should take the Japanese or Russian Foreign Language Placement Test, offered during summer orientation programs and at other times during the year by Evaluation and Examination Service. The tests help determine the level at which a student should begin Japanese or Russian language study at The University of Iowa. Students with backgrounds in Chinese, Hindi, Korean, or Sanskrit may receive individual evaluations from the department.

The department also offers survey courses in Russian literature and culture, a monograph course on Tolstoy and
Dostoevsky, and courses on women in Russian society, Russia today, and Russian and Slavic civilization and folklore, all taught in English.

**Foreign Language and General Education**

The department offers course sequences that students may use to fulfill the foreign language requirement of the General Education Program. Sequences are available in Chinese, Hindi, Japanese, Korean, Russian, and Sanskrit.

High school students, part-time University of Iowa students, and full-time UI students who do not plan to satisfy the General Education foreign language requirement with Chinese may wish to take the sequence 039:003 Beginning Chinese I, 039:004 Beginning Chinese II, 039:010 Beginning Chinese III, and 039:011 Beginning Chinese IV (none are approved for General Education in foreign language), followed by 039:105 Second-Year Chinese: First Semester and 039:106 Second-Year Chinese: Second Semester. Additional course work is available, including advanced Chinese, classical Chinese, and business Chinese.

Students with no background in Russian should begin their study with 041:001 First-Year Russian I. The sequence 041:001 First-Year Russian I, 041:002 First-Year Russian II, 041:003 Second-Year Russian I, and 041:004 Second-Year Russian II can be used to fulfill the General Education foreign language requirement.

**Certificate in International Business**

Students pursuing a B.A. in Asian languages and literature or in Russian may be interested in earning the Certificate in International Business, which is offered jointly by the Henry B. Tippie College of Business and the College of Liberal Arts and Sciences. The certificate offers a wide range of electives, permitting undergraduate students to tailor the program to their individual interests and to complement their majors. The certificate has a foreign language requirement, which students of Chinese, Japanese, Hindi, or Russian are likely to satisfy while completing the requirements for their major. It also includes courses in international business, relations, and institutions as well as area studies courses. For more information, see International Business in the Catalog.

**Graduate Programs**

The Department of Asian and Slavic Languages and Literatures offers a Master of Arts in Asian civilizations and in Russian. The department is not accepting graduate students in Russian for 2009-10.

The program prepares students for doctoral study in a variety of disciplines. The program is also of interest to students
with nonacademic career plans for whom graduate-level work in an Asian language and culture would be useful. Students in professional programs are encouraged to consider working concurrently toward a degree in Asian civilizations. Application materials are available from the department, as is specific information on program tracks (Hindi language and literature; Sanskrit language and literature; South Asian studies; Chinese literature and culture; Chinese linguistics; teaching Chinese as a foreign language; interdisciplinary Chinese studies; teaching Japanese as a foreign language; Japanese studies; and interdisciplinary Japanese studies).

Master of Arts in Asian Civilizations

The Master of Arts in Asian Civilizations requires a minimum of 30 s.h. of graduate credit, including 24 s.h. earned in residence at The University of Iowa. All students must maintain a g.p.a. of 3.00 or higher. Detailed information on degree requirements is sent to all applicants.

By the end of the first semester in residence, students propose a study plan developed in consultation with their advisor and in accordance with guidelines for specializations within the program.

By the end of the final semester in residence, students are expected to demonstrate, either by departmental examination or the successful completion of courses at the appropriate level, advanced competence in Chinese, Japanese, Hindi, or Sanskrit, defined generally as corresponding to the fourth-year level of language course work in Chinese or Japanese and the third-year level in Hindi and Sanskrit.

Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog. The Department of Asian and Slavic Languages and Literatures requires a g.p.a. of at least 3.00 for regular admission and a g.p.a. of at least 2.75 for conditional admission.

Applicants must submit a statement of purpose, a research paper written in English, three letters of recommendation, and GRE General Test scores. Applicants whose first language is not English must score at least 590 (paper-based), 243 (computer-based), or 97 (Internet-based) on the Test of English as a foreign language (TOEFL).

Both international and U.S. graduate applications requesting financial support for the following academic year are due February 1. All other applications are accepted until April 15 for fall admission and October 1 for spring admission.

Study Abroad

The department strongly urges its students to seek opportunities for summer language study and study abroad to accelerate the language acquisition process. The University's memberships in the American Institute of Indian Studies and the China Cooperative Language and Study Programs consortium help facilitate students' access to quality international programs in India and China. The government of the People's Republic of China offers scholarships for two students to live and study in Mainland China each year.

The UI-Nanzan Exchange allows Iowa students to pay Iowa tuition, room, and board while attending the Center for Japanese Studies at Nanzan University in Nagoya, Japan. There also is a cooperative agreement with the Landour Language School in the Himalayan foothills of India. The South Asian Studies Program has launched a new study abroad program in Mysore and Bangalore, India, where students have the opportunity to study a variety of aspects of traditional and modern Indian civilization.

Iowa students participate in summer, semester, or academic year programs in Russian under the auspices of the American Council of Teachers of Russian (ACTR), the association that directs academic language training programs in the cities of Moscow, St. Petersburg, and Vladimir.

Many students participate in summer, semester-long, and year-long study abroad programs in India, China, and Japan offered through other U.S. universities. In many cases credit is transferable, and it is possible for a student to study abroad and still complete the Four-Year Graduation Plan. There are many resources available for funding research and study abroad. It also may be possible for students to apply University of Iowa financial aid to their study abroad programs.

Contact the Department of Asian and Slavic Languages and Literatures or the Office for Study Abroad for more information.

Summer Study, Internships

The department offers an intensive course of language study (second year) each summer in which students complete the equivalent of one academic year of study (equivalent of one course for each of two semesters, totaling 8 s.h.).
Scholarships are available for summer intensive Russian.

Students are encouraged to enrich their programs of study through internships designed to combine work experience in Asia or the United States with study or research projects. The University's Pomerantz Career Center keeps a list of internships.

Activities

Student Associations

Students have many opportunities to enrich their studies in Asian languages and literature while living in Iowa City. The University sponsors student associations for students from many Asian countries, including mainland China, Japan, Korea, India, Pakistan, and Taiwan. All University of Iowa students are welcome to join. Various international community groups sponsor cultural events and holiday celebrations throughout the year.

International Crossroads Community

The International Crossroads Community, located in Hillcrest Residence Hall, welcomes both American and international students who wish to broaden their knowledge of international issues and foreign languages and cultures. Its programs include weekly language dinners with students and faculty, public festivals and celebrations of cultural holidays, educational presentations on topics such as study abroad and international careers, and music and theater performances. The community's Japanese House is a focal point for activities among resident and nonresident students and the Japanese Student Association.

Facilities

Language Media Center

The University's Language Media Center provides facilities for language learning, teaching, and research. Equipment in the center includes state-of-the-art computer, audio, and video facilities as well as standard and short-wave radios, tape and cassette recorders, record players, and soundproof recording rooms. An electronic classroom, a soundproof workroom, and a library of tape, disc, and cassette recordings also are available.

University of Iowa Libraries

Since 1960 the University of Iowa Libraries has routinely acquired most American titles in Asian studies and selected overseas scholarly publications in English and other Western languages. The Main Library's Asian collection includes approximately 80,000 volumes in Asian languages and about 140,000 Western-language volumes on Asian subjects. Since 1975, the University has been a member of the Library of Congress Foreign Currency Exchange Program for Indian books and periodicals. The library's nonprint media collection includes a growing number of Asian feature films. A Chinese-Japanese-Korean computer terminal gives students and faculty access to the growing Research Libraries Information Network database in Asian languages.

Financial Support

Undergraduate and graduate students have access to the following financial aid and scholarship resources. Contact the Department of Asian and Slavic Languages and Literatures for application information.

Cheng/Liu Scholarship: Undergraduate and graduate students currently majoring in Chinese in the Department of Asian and Slavic Languages and Literatures at The University of Iowa may apply for the Cheng/Liu Scholarship. The award can be used for summer Chinese language study.

Fairall Scholarship: Undergraduate or graduate majors who have attended and/or graduated from Iowa elementary or secondary schools may be nominated by the department to receive a Fairall Scholarship. Preference is given to Japanese studies students. Applications are available late spring, with scholarships to be awarded the following fall semester.

Foreign language and area studies fellowships: Only U.S. citizens are eligible. Graduate students combining work in Asian languages at an advanced level with interdisciplinary or professional programs may apply. The award is offered by International Programs for academic year and summer language study.

Graduate assistantships: The department offers teaching assistantships for graduate students in the program. All applicants to graduate study in the program receive information on applying for an assistantship. Assistantships are awarded each spring for the following academic year.

Graduate international research: Opportunities for funding research abroad include Stanley Fellowships for Graduate Student Research Abroad, CIREH Research Scholarships in International Health, Fulbright Grants, and Foreign
Summer language scholarships: Currently enrolled undergraduate and graduate students may compete for a Stanley-University of Iowa Foundation Support Organization Summer Language Scholarship, to be used for intensive summer language study in Chinese, Hindi, Japanese, or Sanskrit. Eight to ten awards of $2,000-$2,500 are made each summer. Applications are due March 1.

Support for undergraduate study abroad: Opportunities for undergraduates to study abroad include the Presidential Scholarships for Study Abroad and the Stanley Scholarships for International Research and Study.

Asian and Slavic Languages and Literatures Courses

Language for Undergraduate and Graduate Students

Chinese

039:001 Conversational Chinese I
Introduction to modern Chinese, with focus on communication "survival" skills for discussing oneself, family, daily activities, interests, personal preferences, food, shopping, travel, lodging; situational activities and performance.

039:002 Conversational Chinese II
Continuation of 039:001, with focus on speaking and listening.

039:003 Beginning Chinese I
Beginning Chinese; offered through UI Confucius Institute; first of a four-course sequence.

039:004 Beginning Chinese II
Continuation of 039:003; offered through UI Confucius Institute; second of a four-course sequence. Prerequisite: 039:003.

039:008 First-Year Chinese: First Semester
Sound system of Mandarin Chinese, basic sentence patterns; aural understanding, speaking, reading, writing. Offered fall semesters. Prerequisite: undergraduate standing. GE: Foreign Language First Level Proficiency.

039:009 First-Year Chinese: Second Semester
Continuation of 039:008. Offered spring semesters. Prerequisites: 039:008 and undergraduate standing. GE: Foreign Language Second Level Proficiency.

039:010 Beginning Chinese III
Continuation of 039:004; offered through UI Confucius Institute; third of a four-course sequence. Prerequisite: 039:004.

039:011 Beginning Chinese IV
Continuation of 039:010; offered through UI Confucius Institute; last of a four-course sequence. Prerequisite: 039:010.

039:105 Second-Year Chinese: First Semester
Continuation of 039:009. Offered fall semesters. Prerequisites: 039:009 and undergraduate standing. GE: Foreign Language Second Level Proficiency.

039:106 Second-Year Chinese: Second Semester
Continuation of 039:105. Offered spring semesters. Prerequisites: 039:105 and undergraduate standing. GE: Foreign Language Fourth Level Proficiency.

039:107 Accelerated Second-Year Chinese: First Semester
Intermediate Chinese. Prerequisites: grades of C or higher in 039:008 and 039:009, and one summer of Chinese study in China. GE: Foreign Language First Level Proficiency.

039:108 Classical Chinese: First Semester
Late Zhou period; readings from Zhanquo, Mengzi, Zhuangzi; focus on grammatical analysis, exact translation. Offered fall semesters. Prerequisite: 039:106.

039:109 Classical Chinese: Second Semester

039:110 Classical Chinese: Third Semester

039:111 Classical Chinese: Fourth Semester
Continuation of 039:108. Offered spring semesters. Prerequisite: 039:108.

039:114 Accelerated Second-Year Chinese: Second Semester
Intermediate Chinese. Prerequisite: grade of C or higher in 039:107. GE: Foreign Language Fourth Level Proficiency.

039:115 Third-Year Chinese: First Semester
Reading of advanced modern Chinese texts; speaking, writing. Offered fall semesters. Prerequisite: 039:106.

039:116 Third-Year Chinese: Second Semester
Continuation of 039:115. Offered spring semesters. Prerequisite: 039:115.

039:117 Business Chinese I
Skill development in communicating with Chinese counterparts on a number of domains in business translations; first of a two-course sequence. Prerequisite: 039:106.

039:118 Business Chinese II
Skill development in communicating with Chinese counterparts on a number of domains in business translations; second of a two-course sequence. Prerequisite: 039:117.

039:128 Fourth-Year Chinese: First Semester
Proficiency through oral and written discussions of modern texts. Offered fall semesters. Prerequisite: 039:116 or equivalent.

039:129 Fourth-Year Chinese: Second Semester
Offered spring semesters. Prerequisite: 039:128.

039:165 Fifth-Year Chinese: First Semester
Improvement of language skills in modern Chinese: listening, speaking, reading, writing; skill development in reading authentic texts related to topics of student interest. Prerequisite: 039:129.

039:166 Fifth-Year Chinese: Second Semester
Continuation of 039:165. Prerequisite: 039:165.

039:171 Readings in Chinese Literature
Readings for advanced modern Chinese learners to elevate reading and writing abilities; essays, fiction, poetry by contemporary Chinese writers. Taught in Chinese.

039:213 Advanced Classical Chinese
Readings from Zuozhuan, Guoyu, other texts of early classical period. Prerequisite: 039:109.

039:220 Literary Chinese I
Readings from literary and historical texts of Han and Wei-Jin periods. Prerequisite: 039:109 or consent of instructor.

Croatian

041:181 First-Year Croatian I
Basic language skills--listening, reading, speaking, and writing Croatian; fundamentals of grammar; emphasis on student participation; first of a two-semester sequence.

041:182 First-Year Croatian II
Continuation of 041:181. Prerequisite: 041:181.

041:183 Second-Year Croatian I
Continuation of 041:182; proficiency in vocabulary and grammatical foundations of understanding, speaking, reading, and writing Croatian (Bosnian, Serbian). Prerequisite: 041:182 or equivalent.

041:184 Second-Year Croatian II
Continuation of 041:183; basic grammatical forms; practice listening, speaking, and writing Croatian (Bosnian, Serbian). Prerequisite: 041:183 or equivalent.

041:119 Russian for Heritage Learners  
Linguistic problems (grammar and vocabulary), communicative problems (understanding of written and oral advanced Russian speech), cultural problems (similarities and differences between cultures); for Russian heritage speakers.

041:120 Russian for Heritage Learners II  
Continuation of 041:119.

Sanskrit

039:110 First-Year Sanskrit: First Semester  
Grammar, basic vocabulary; elementary readings. Offered fall semesters of even years. Prerequisite: undergraduate standing. GE: Foreign Language First Level Proficiency. Same as 20E:110.

039:111 First-Year Sanskrit: Second Semester  
Readings in epic and story literature. Offered spring semesters of odd years. Prerequisites: 039:110 and undergraduate standing. GE: Foreign Language Second Level Proficiency. Same as 20E:111.

039:112 Second-Year Sanskrit: First Semester  
Readings in epic and puranic texts. Offered fall semesters of odd years. Prerequisites: 039:111 or consent of instructor, and undergraduate standing. GE: Foreign Language Second Level Proficiency. Same as 20E:121.

039:113 Second-Year Sanskrit: Second Semester  
The Bhagavadgita and related religious/philosophical texts. Offered spring semesters of even years. Prerequisites: 039:112 or consent of instructor, and undergraduate standing. GE: Foreign Language Fourth Level Proficiency. Same as 20E:122.

039:186 Third-Year Sanskrit: First Semester  
Readings in philosophical and literary Sanskrit. Offered fall semesters. Prerequisite: 039:113.

039:187 Third-Year Sanskrit: Second Semester  
Continuation of 039:186. Offered spring semesters. Prerequisite: 039:186.

Uzbek

041:171 First-Year Uzbek I  
Reading, listening, speaking, and writing Uzbek.

041:172 First-Year Uzbek II  
Continuation of 041:171. Prerequisite: 041:171 or consent of instructor.

041:173 Second-Year Uzbek I  
Continuation of 041:172. Prerequisite: 041:172 or consent of instructor.

041:174 Second-Year Uzbek II  
Continuation of 041:173. Prerequisite: 041:173 or consent of instructor.

For Undergraduates

Asian Culture and Civilization

039:006 Introduction to Buddhism  
Basic tenets, religious paradigms, historical phases important in the development of Buddhism; from the Buddha's life to evolution of Mahāyāna Buddhism; readings from India, Tibet, China, Japan, Korea, Southeast Asia. GE: Foreign Civilization & Culture, Humanities. Same as 032:006.

039:007 Chinese Religions  
3 s.h.
Survey of Chinese religions; Chinese traditional religious beliefs and practices among the elite and the general population; recent developments in mainland China, Taiwan, and the West; religious ideas of Confucianism, Daoism, aspects of Buddhism, ancestor worship, cults of deities, practices such as spirit possession, faith healing, ghost marriages. Same as 032:010.

Key aspects of traditional and modern Chinese culture as insights into the Chinese experience and worldview; development of the Chinese language and writing system, calligraphy and brush painting, cultural geography, urban life, martial arts, mainstream popular culture, music, cuisine.

039:016 Asian Art and Culture 3 s.h.
Art from India, China, and Japan in many media and forms, in their cultural and historical contexts; cultural distinctions of these Asian civilizations as seen through the visual arts; chronology used to highlight historical processes and provide perspectives on continuity and change. GE: Fine Arts, Foreign Civilization & Culture, Historical Perspectives. Same as 01H:016.

039:018 Asian Humanities: India 3 s.h.
Introduction to four thousand years of South Asian civilization, through popular stories. GE: Foreign Civilization & Culture, Humanities. Same as 032:008.

039:019 Asian Humanities: China 3 s.h.
Literary and philosophical texts of China in English translation. GE: Foreign Civilization & Culture, Humanities. Same as 032:009.

039:020 Asian Humanities: Japan 3 s.h.
Introduction to premodern, modern, and contemporary Japanese images, myths, and literature in English translation. GE: Foreign Civilization & Culture, Humanities.

039:028 Introduction to the Art of China 3 s.h.
Visual arts of China and their history; emphasis on understanding in context of Chinese civilization, history. Same as 01H:031.

039:029 First-Year Seminar 1-2 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Prerequisite: first- or second-semester standing.

039:032 Chinese Popular Culture 3 s.h.
Introduction to popular culture from the People's Republic of China, Taiwan, Hong Kong, and the Chinese diaspora; shifting relationships among cultural production, media and technology, and political thought; influences of Japan, Korea, and the West; materials drawn from film, television shows, music, new media, popular literature, comics, magazines, advertising, fashion, art, and material culture; no previous knowledge of Chinese is required.

039:034 The Languages of Asia in Cultural and Historical Perspective 3 s.h.
Chinese, Japanese, Korean, Sanskrit and Hindi; cultural and ethnic factors which have affected and are affected by each language; nontechnical introduction to the structure of the language, discussion of the script in which the language is written, and the history of the language, including a brief outline of the political and cultural history of each pertinent linguistic area and the ways linguistic history has been affected by these factors.

039:036 Understanding Korean Culture Wave 3 s.h.
Introduction to the Korean culture wave and characteristics of contemporary Korean popular culture; lectures with discussions of readings, various audio-visual references (i.e., films, television dramas, music videos, cartoon, Internet contents, etc.).

039:055 Civilizations of Asia: China 3 s.h.
GE: Foreign Civilization & Culture, Historical Perspectives. Same as 016:005.

039:056 Civilizations of Asia: Japan 3-4 s.h.
GE: Foreign Civilization & Culture, Historical Perspectives. Same as 016:006.

039:057 Civilizations of Asia: South Asia 3-4 s.h.
GE: Foreign Civilization & Culture, Historical Perspectives. Same as 016:007.

039:064 Living Religions of the East
Religious beliefs, practices in India, China, Japan. GE: Foreign Civilization & Culture, Historical Perspectives. Same as 032:004.

3 s.h.

039:075 Asian Religious Classics
Works of South and East Asia; may include Bhagavad Gita, Life of Milarepa, Mencius, Great Learning, Chuang-tzu, Lotus Sutra, Platform Sutra, selected Korean and Japanese works. Same as 032:075.

3 s.h.

039:191 Honors Tutorial
arr.

039:195 Senior Honors Thesis
arr.

Japanese Culture and Civilization

39J:017 Religion in Japanese Culture
Introduction to Japanese religious and aesthetic traditions from early times through the early modern period; prehistoric artifacts, literature, poetry, drama, architecture, landscaping, tea practices, the visual arts. Same as 032:017.

3 s.h.

39J:033 Introduction to the Art of Japan
Chronological survey of Japan's visual arts in their historical and cultural contexts from Neolithic age to present; extensive use of slides, films, other visual materials. Same as 01H:033.

3 s.h.

Slavic Culture and Civilization

041:029 First-Year Seminar
Cultural, literary, architectural, and historical beauty of Prague, the capital of the Czech Republic. Prerequisite: first- or second-semester standing.

1-2 s.h.

Early Chinese painting from fourth century B.C.E. through 14th century C.E.; figural style, religious art, emergence of landscape, other nonreligious subjects, interconnectedness of painting and calligraphy as fine arts. Prerequisite: 01H:016 or 01H:031 or consent of instructor. Same as 01H:120.

039:122 Language/Politics of Culture in South Asia 3 s.h.
Key moments in the sociolinguistic history of premodern, colonial, and postcolonial linguistic communities in South Asia; roles of language in mediation of cultural and political processes. Same as 113:129.

039:131 Themes in Asian Art History 3 s.h.
Prerequisite: 01H:016 or 039:016 or equivalent or consent of instructor. Same as 01H:124.

039:136 Indian Literature 3 s.h.
Readings from medieval and modern periods in English translation. Same as 032:177.

039:139 Chinese Historical Phonology 3 s.h.
Phonology of Mandarin, other major Chinese dialect groups; reconstruction of the sound system of Middle and Old Chinese. Same as 103:139.

039:140 The Literature of Daoism 3 s.h.
Texts of philosophical, religious Daoism; Daoism in traditional Chinese political theory, literature, the arts, alchemy and medicine, sexual custom, combat. Taught in English. Same as 032:186.

039:141 Chinese Literature: Poetry 3 s.h.
Readings in classical and modern Chinese poetry in English translation. Same as 048:141.

039:142 Chinese Literature: Prose 3 s.h.
Readings in Chinese prose, primarily fiction, from third century B.C. to 1900 A.D., in English translation.

039:144 Introduction to Chinese Linguistics 3 s.h.
Aspects of modern Chinese linguistics, such as Chinese phonology, syntax, pedagogical grammar, history of the language. Taught in English. Same as 103:144, 164:181.

039:145 Topics in Asian Cinema 3 s.h.
Issues or topics in East or South Asian cinemas. English majors may apply this course to the following area and/or period requirement. AREA: Transnational Literature and Postcolonial Studies. PERIOD: 20th- and/or 21st-Century Literature. Same as 008:127, 048:106.
039:156 The Karma of Words  
Key issues in the relationship between Buddhism and the literary arts. Same as 032:156.  

3 s.h.

039:158 East-West Literary Relations  
Same as 048:158.  

3 s.h.

039:159 Chinese Art and Culture  
Archaeological discoveries, sculpture, painting, architecture, calligraphy, other arts of Greater China area in historical and cultural contexts of past 5,000 years. Prerequisite: 01H:006 or 01H:031 or consent of instructor. Same as 01H:119.  

3 s.h.

039:161 Insurgency and Globalization of Discontent  
Political theories of revolutionary African American and Japanese intellectuals, artists, and activists; how the theories have influenced social justice movements. Same as 129:161.  

3 s.h.

039:162 Turning East  
The global nature of pilgrimage, primarily religious travel in or to Asia; journeys to single sacred sites, travel circuits to multiple destinations, internal or metaphorical pilgrimages. Same as 032:163.  

3 s.h.

039:163 Indian Religious Texts  
Same as 032:171.  

3 s.h.

039:168 Topics in Asian Religions  
Same as 032:170.  

3 s.h.

039:170 Zen Buddhism  
Prerequisite: 032:004 or 032:006 or 032:010 or equivalent or consent of instructor. Same as 032:188.  

3 s.h.

039:172 Comparative Ritual  
Practice and theory; rituals from religions, including Hinduism, Buddhism, Christianity, Indian religions; theories of interpretation. Same as 032:172.  

3 s.h.

039:173 Transnational Chinese Cinemas  
Films from Mainland China, Hong Kong, Taiwan, and Chinese diasporic communities, silent era to present; relationship of film to nation-state, cultural interflows, media technologies, ideologies. English subtitles. Same as 048:174.  

3 s.h.

039:175 Topics in Asian History  
Same as 16W:178.  

3 s.h.

039:177 Second Language Classroom Learning  
Synthesis of empirical findings on children's and adults' learning of a second or foreign language; emphasis on theoretical underpinnings of approaches, methods, techniques in language teaching. Same as 07E:183, 07S:183, 164:171.  

3 s.h.

039:178 Government and Politics of the Far East  
Functions, institutions of government in countries of Far East; focus on social, economic, historical environments. GE: Foreign Civilization & Culture. Same as 030:143.  

3 s.h.

039:180 Modern Chinese Writers  
Readings in modern and contemporary Chinese fiction; in English translation. Same as 048:183.  

3 s.h.

039:188 East Meets West: The Western Reception of Eastern Religion  
Introduction of religious ideas and forms from India, China, and Japan into Europe and America to late 20th century, from Greeks to New Age. Same as 032:178.  

3 s.h.

039:192 East Meets West: A Cross-Cultural Course  
Perceptions in the modern period based on analyses of films, literary and philosophical texts from East and West. Same as 048:192.  

3 s.h.

039:196 China Since 1927  

3 s.h.
Communist revolution from 1920s to founding of People's Republic of China in 1949; Mao Zedong's radical policies, Cultural Revolution; Deng Xiaoping's economic reforms; China today. GE: Foreign Civilization & Culture. Same as 16W:198.

039:198 Topics in Asian Studies
Topics vary.

039:199 Asian Studies

Japanese Culture and Civilization

39J:103 Language in Japanese Society
3 s.h.
Aspects of the Japanese language that reflect culture, social structures of Japan; communication styles and strategies, cross-cultural communication, language in media, metaphors.

39J:109 Japanese Religion and Thought
Same as 032:116.

39J:123 Japanese Painting
3 s.h.
Japanese painting in its historical, cultural contexts; focus on developments of successive eras--religious art; narrative, other literary connections; Zen; decorative traditions; popular arts; Japan and the modern world. Prerequisite: 01H:006 or 01H:033 or consent of instructor. Same as 01H:123.

39J:125 Japanese Society and Culture
3 s.h.
Cultural anthropology of Japan, including historical tradition, religious ethos, social organization, human ecology, educational and political institutions; emphasis on how these aspects relate to and influence one another. GE: Foreign Civilization & Culture. Same as 113:125.

39J:129 Japan: Culture and Communication
3 s.h.

39J:130 Workshop in Japanese Literary Translation
3 s.h.
Workshop in translation from Japanese to English, with emphasis on literary translation; issues in theory and practice of translation; special features of Japanese as a source language for translation. Prerequisite: 39J:012 or equivalent.

39J:135 Postmodern Aesthetics and Japanese Culture
3 s.h.
Japanese postmodern trends (from Zen Buddhism to the habits of contemporary otaku consumers); examination of aesthetics including works of literature, film, visual art, and electronic media.

39J:141 Traditional Japanese Literature in Translation
From seventh century to early modern times. Same as 048:143.

39J:142 Modern Japanese Fiction in Translation
Nineteenth century to present. Same as 048:142.

39J:143 Topics in Japanese Literature in Translation
Topics vary.

39J:144 Major Authors in Modern Japanese Literature
Modern Japanese literary works in English translation.

39J:145 The Tale of Genji
Close reading in English of Murasaki Shikibu's Tale of Genji; tale's literary and social contexts, and later reception. Same as 048:144.

39J:146 Warriors Dreams
Images of the warrior in traditional Japanese literature, from poetry of the eighth century to romances of the 19th century; readings in English. Same as 048:147.

39J:155 Contemporary Japanese Culture
3 s.h.
Cultural texts and practices in contemporary Japan: literature, film, television, manga.

Japanese Culture, Linguistics, Pedagogy, Individual Study

39J:200 Japanese Linguistics  
Japanese language as linguistic system; basic linguistic terminology; sound systems, grammar, meanings, usages. Prerequisite: 39J:122 or consent of instructor.

39J:201 Second Language Acquisition Research and Theory I  
Theories regarding success and failure in acquisition of second or subsequent languages; research, issues. Same as 009:237, 035:201, 039:200, 164:201.

39J:202 Japanese as a Foreign Language: Practical Applications  
Instructional methodology, curriculum, and material design; hands-on experience. Prerequisite: 39J:122 or consent of instructor. Same as 164:276.

39J:203 Advanced Japanese Pedagogy  
Instructional methods and management issues relevant to teaching Japanese language at advanced levels. Prerequisite: 39J:202. Same as 164:222.

39J:204 Practicum in Teaching Japanese as a Foreign Language  
Teaching apprenticeship guided and supervised by a faculty member skilled in University curriculum and instruction.

39J:215 Individual Japanese for Advanced Students  
Repeatable.

39J:239 Special Topics in Japanese Linguistics  
Topics in applied linguistics and language pedagogy related to Japanese language. Same as 164:228.

39J:245 Seminar in Japanese Literature  
Repeatable. Prerequisites: three years of Japanese and consent of instructor.

39J:251 Readings in Modern Japanese  
Readings in modern Japanese. Repeatable. Prerequisite: consent of instructor.

39J:257 Readings: Japanese History  
Same as 016:294.

Slavic Linguistics, Pedagogy, Individual Study

041:234 Principles of Teaching and Learning Foreign Languages  
Prerequisite: consent of instructor. Same as 009:234, 013:221, 039:234.

041:276 Seminar: Russian Linguistics  
Topics may include Russian morphosyntax, colloquial Russian, Russian pragmatics, Slavic gender linguistics.

041:279 Independent Research  
Directed study. Prerequisite: consent of instructor.
The Bachelor of Liberal Studies (B.L.S.) is designed for students who wish to complete a bachelor's degree by distance education. The B.L.S. is a general undergraduate degree without a traditional academic major. Students work with their academic advisors to structure programs that meet their individual objectives.

B.L.S. students may plan programs designed to help them advance in their chosen careers, begin new careers, or prepare for graduate or professional study. Students who have specific career goals or advanced degree programs in mind should learn what educational background they will need in order to achieve their goals, and they should include appropriate course work in their B.L.S. programs.

Students may earn credit toward the degree through several types of courses, including Saturday & Evening Classes, web-based Guided Independent Study courses, semester-based web courses, extension courses at sites throughout Iowa, and regular session courses. Courses from any of the three Board of Regents, State of Iowa universities may be applied toward the degree, as may appropriate courses from other accredited institutions.

B.L.S. students may not earn minors.

For application information, see "Admission" below.

The B.L.S. is awarded by the College of Liberal Arts and Sciences and is administered by the Division of Continuing Education.

Bachelor of Liberal Studies

The Bachelor of Liberal Studies requires a minimum of 120 s.h., and is intended to be completed entirely by distance education. Students must earn at least 30 s.h. of credit toward the degree in University of Iowa courses after admission to the B.L.S. program. They must earn at least 60 s.h. of the minimum 120 s.h. at four-year colleges, including 45 s.h. in course work defined as upper-level. For the B.L.S., University of Iowa courses are considered upper-level if they are numbered 100 and above. Some courses numbered below 100 may be considered upper-level for the B.L.S.; for a list of these courses, contact Distance Education.

B.L.S. students are required to complete the College of Liberal Arts and Sciences General Education Program.

Students complete at least 12 s.h. of credit in three of the following five distribution areas (total of at least 36 s.h.). In each distribution area, 6 of the required 12 s.h. must be earned in upper-level courses.

- Humanities (e.g., literature, history, philosophy, religion)
- Communication and arts (e.g., journalism, speech, drama, art, music, writing)
- Natural sciences and mathematics (e.g., geology, biology, statistics, computer science)
- Social sciences (e.g., geography, psychology, economics, political science, anthropology)
- Professional fields (e.g., business, education, nursing, social work, library science)

Credit applied toward completion of the General Education Program does not count toward the B.L.S. distribution area requirements, but it does count toward the required 45 s.h. of upper-level course work, if applicable.

Students must maintain a cumulative g.p.a. of 2.00 or higher in all course work applied toward the degree, all course work completed after admission to the program, and all upper-level course work.

All College of Liberal Arts and Sciences policies regarding pass/nonpass and satisfactory/fail grading, academic standards, and so forth apply to B.L.S. students. See the CLAS Student Academic Handbook.

Admission

Individuals who wish to earn a B.L.S. must apply formally for admission to the program. Prospective students should contact the Distance Education office before applying.

The B.L.S. is designed for students who need to earn a bachelor's degree by distance education. Individuals who have access to the full range of the University's on-campus daytime classes should seek admission to the College of Liberal Arts and Sciences in order to earn a degree with a major.

B.L.S. application requirements vary depending on educational background.
New applicants to The University of Iowa must have 60 s.h. of approved transfer credit and a cumulative g.p.a. of at least 2.50. They also must have satisfied the following high school course requirements: four years of English/language arts, two years of a single foreign language, three years of science, three years of social studies, two years of algebra, and one year of geometry.

Former University of Iowa students applying for reentry must have a total of 60 s.h. of University of Iowa and approved transfer credit and a g.p.a. of at least 2.00 on all University of Iowa course work or all college course work completed.

Applicants who hold an Associate of Arts (A.A.) degree from an Iowa community college or from Waldorf College must have a g.p.a. of at least 2.00 and are considered to have satisfied all General Education Program requirements except foreign language.

Applicants who hold an A.A. from Black Hawk College (Illinois) must have a g.p.a. of at least 2.25 and are considered to have satisfied all General Education Program requirements except foreign language.

Applicants who hold an A.A. from another institution must have 60 s.h. of approved transfer credit and a cumulative g.p.a. of at least 2.50. They also must have satisfied the following high school course requirements: four years of English/language arts, two years of a single foreign language, three years of science, three years of social studies, two years of algebra, and one year of geometry. Transfer credit is evaluated course by course.

Applicants who have a total of 24-60 s.h. of University of Iowa and approved transfer credit and a cumulative g.p.a. of at least 2.50 are admitted to the University on liberal-studies-interest status. When they complete 60 s.h. and have a g.p.a. of at least 2.00 on all college course work completed, they become eligible for admission to the B.L.S. program.

Contact Distance Education for more information about the Bachelor of Liberal Studies.
Biochemistry

Head: Charles M. Brenner
Professors emeriti: Arthur Arnone, Thomas W. Conway, Rex Montgomery, Arthur A. Spector, Earle Stellwagen, Charles A. Swenson
Adjunct professors: Theresa Gioannini, Nancy C. Stellwagen, Joseph Walder
Associate professors: John Dagle, Adrian Elcock, Ramaswamy Subramanian, M. Todd Washington
Assistant professors: Kris DeMali, Ernesto Fuentes, Shahram Khademi, Peter Nagy
Lecturer: Elisabeth Swain
Undergraduate degrees: B.A., B.S. in Biochemistry
Graduate degrees: M.S., Ph.D. in Biochemistry
Web site: http://www.biochem.uiowa.edu/

Biochemistry is the study of the basic chemical processes that occur in all living systems. It is one of the most active sciences, and it provides a foundation for other biosciences.

Biochemists generally work in laboratories and/or classrooms. Those with a bachelor's degree are often employed as research assistants in industry, government, education, and health service, or in secondary school teaching, for which licensure is required.

Biochemists with advanced degrees—usually a doctorate—pursue teaching, research, and/or administrative careers in universities, medical schools, hospitals, private research agencies, government laboratories, biotechnology companies, and in food, drug, cosmetics, chemical, petroleum, and allied industries.

The Department of Biochemistry offers degree programs for undergraduates and for graduate students and administers the academic curriculum at both levels. The College of Liberal Arts and Sciences grants undergraduate degrees in biochemistry and oversees undergraduate academic policy relating to the student record. The Graduate College grants graduate degrees in biochemistry.

Undergraduate Programs

The Department of Biochemistry offers a Bachelor of Science and a Bachelor of Arts in biochemistry.

Students choose advanced science electives to supplement biochemical studies or to satisfy requirements of a double major or a minor in another discipline. In order to count science electives numbered below 100 toward a degree in biochemistry, students must have their advisor's approval.

Transfer credit for biochemistry courses requires the approval of an undergraduate advisor in biochemistry.

Students, especially those in the B.A. program, may include courses from other disciplines, such as business, pre-law, psychology, or journalism. This prepares them for one of the many vocations on which biochemistry has an impact.

Bachelor of Science

The Bachelor of Science in biochemistry requires a total of 120 s.h., including 73 s.h. of work for the major. The program prepares students to work in positions that require a mastery of general biochemistry. It is also excellent preparation for graduate study in biochemistry and related sciences or for study toward a professional degree in the health sciences.

The B.S. major in biochemistry requires the following course work. Biochemistry students also must complete the College of Liberal Arts and Sciences General Education Program.

All of these:

002:010-002:011 Principles of Biology I-II 8 s.h.
004:011-004:012 Principles of Chemistry I-II 8 s.h.
22M:025-22M:026 Calculus I-II 8 s.h.
029:081-029:082 Introductory Physics I-II 8 s.h.
099:001 Orientation and Introduction to the Field of Biochemistry 0 s.h.
099:101 Technical Communication in Biochemistry 1 s.h.
099:120 Biochemistry and Molecular Biology I 3 s.h.
099:130 Biochemistry and Molecular Biology II 3 s.h.
099:140 Experimental Biochemistry 4 s.h.
099:155 Research, Independent Study (required of all honors students) 6 s.h.
Advanced science electives, chosen in consultation with advisor 9 s.h.

One of these sequences:
004:121-004:122 Organic Chemistry I-II

Two of these:
004:131 Physical Chemistry I
004:132 Physical Chemistry II
099:241 Biophysical Chemistry I
099:242 Biophysical Chemistry II

One of these:
004:141 Organic Chemistry Laboratory
004:142 Organic Chemistry Laboratory for Majors (preferred)

Students may register for 099:155 Research, Independent Study only if they have earned an average grade of B or higher in 099:120 Biochemistry and Molecular Biology I, 099:130 Biochemistry and Molecular Biology II, and 099:140 Experimental Biochemistry and a grade of B-minus or higher in each 099:120 Biochemistry and Molecular Biology I, 099:130 Biochemistry and Molecular Biology II, and 099:140 Experimental Biochemistry; or have consent of advisor and instructor. Students may register for 099:115 Undergraduate Independent Study any time.

Students are encouraged to begin research by taking 099:115 Undergraduate Independent Study (may be taken for a total of 6 s.h.). There are no prerequisites. Students may arrange independently to take this course, or they may request assistance from an undergraduate advisor.

Bachelor of Arts

The Bachelor of Arts in biochemistry requires a total of 120 s.h., including 58 s.h. of work for the major. The B.A. major requires the following coursework. Biochemistry students also must complete the College of Liberal Arts and Sciences General Education Program.

All of these:
002:010-002:011 Principles of Biology I-II
004:011-004:012 Principles of Chemistry I-II
22M:025-22M:026 Calculus I-II
029:011-029:012 College Physics I-II
099:001 Orientation and Introduction to the Field of Biochemistry
099:101 Technical Communication in Biochemistry
099:120 Biochemistry and Molecular Biology I
099:130 Biochemistry and Molecular Biology II
099:140 Experimental Biochemistry
Advanced science electives, chosen in consultation with advisor

One of these sequences:
004:121-004:122 Organic Chemistry I-II

One of these:
004:131 Physical Chemistry I
004:132 Physical Chemistry II
099:241 Biophysical Chemistry I
099:242 Biophysical Chemistry II

In addition, B.A. students intending to go on to advanced degrees in the biological or health sciences are advised to include 4 s.h. or more of 099:115 Undergraduate Independent Study or 099:155 Research, Independent Study (senior research) in their programs.

B.A. or B.S. with Teacher Licensure
Biochemistry majors, especially those in the B.A. program, may qualify for teacher licensure by taking additional courses in teacher education. Consult the College of Education for details.

**Four-Year Graduation Plan**

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

**Bachelor of Science**

**Before the third semester begins:** 004:011 Principles of Chemistry I and 004:012 Principles of Chemistry II, 22M:025 Calculus I, 099:001 Orientation and Introduction to the Field of Biochemistry, and at least one-quarter of the semester hours required for graduation.

**Before the fifth semester begins:** the courses listed above, plus 002:010 Principles of Biology I and 002:011 Principles of Biology II; 004:121 Organic Chemistry I, 004:122 Organic Chemistry II, and 004:141 Organic Chemistry Laboratory; 22M:026 Calculus II; and at least one-half of the semester hours required for graduation.

**Before the seventh semester begins:** the courses listed above, plus 029:081 Introductory Physics I and 029:082 Introductory Physics II, 099:120 Biochemistry and Molecular Biology I, 099:130 Biochemistry and Molecular Biology II, and 099:140 Experimental Biochemistry, two science electives, and at least three-quarters of the semester hours required for graduation.

**Before the eighth semester begins:** the courses listed above, plus 004:131 Physical Chemistry I or 004:132 Physical Chemistry II or 099:241 Biophysical Chemistry I or 099:242 Biophysical Chemistry II, a science elective, and at least 3 s.h. of 099:155 Research, Independent Study.

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate.

**Bachelor of Arts**

**Before the third semester begins:** 004:011 Principles of Chemistry I and 004:012 Principles of Chemistry II; math through 22M:026 Calculus II or above; 099:001 Orientation and Introduction to the Field of Biochemistry; and at least one-quarter of the semester hours required for graduation.

**Before the fifth semester begins:** the courses listed above, plus 002:010 Principles of Biology I and 002:011 Principles of Biology II, 004:121 Organic Chemistry I and 004:122 Organic Chemistry II, and at least one-half of the semester hours required for graduation.

**Before the seventh semester begins:** the courses listed above, plus 029:081 Introductory Physics I and 029:082 Introductory Physics II, 099:120 Biochemistry and Molecular Biology I, 099:130 Biochemistry and Molecular Biology II, and 099:140 Experimental Biochemistry, two science electives, and at least three-quarters of the semester hours required for graduation.

**Before the eighth semester begins:** the courses listed above, plus 004:131 Physical Chemistry I or 004:132 Physical Chemistry II or 099:241 Biophysical Chemistry I or 099:242 Biophysical Chemistry II, a science elective, and at least 3 s.h. of 099:155 Research, Independent Study.

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate.

**Honors**

Qualified students may earn an honors degree in biochemistry. They must be members of the University of Iowa Honors Program, which requires students to maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University of Iowa Honors Program for more information). Honors students in biochemistry must complete 099:155 Research, Independent Study. They must present their research results in a report written in the form of a journal article and in an oral report presented at a special open departmental seminar.

**Graduate Program**

The Department of Biochemistry offers a Master of Science and a Doctor of Philosophy in biochemistry. Students admitted to the graduate program usually pursue the Ph.D. Qualified students may pursue a combined program leading to the M.D./Ph.D. (Medical Scientist Training Program).

**Master of Science**
The Master of Science in biochemistry requires a minimum of 30 s.h. of graduate credit, thesis research, and a thesis. See "Doctor of Philosophy" for information about the graduate curriculum.

**Doctor of Philosophy**

The Doctor of Philosophy in biochemistry requires a minimum of 72 s.h. of graduate credit. The focus of the graduate program is on the individual student. Students choose from three curricula to satisfy requirements for the degree: standard, biophysical emphasis, or molecular emphasis.

In the first year, students engage in formal course work and tutorial laboratory experiences that serve as the basis for selecting a topic for thesis research. They spend half of their time in courses and the other half working in four different faculty laboratories (099:261 Research Techniques), where they learn in the context of ongoing research.

All biochemistry graduate students take the following courses.

- **099:282 Seminar**
- **156:201 Fundamentals of Gene Expression**

**Standard curriculum students also take the following.**

- **099:241-099:242 Biophysical Chemistry I-II**
- **142:215 Transcription and Multifunctional Regulation by RNA**
- **Electives**

**Biophysical emphasis students also take the following.**

- **099:241-099:242 Biophysical Chemistry I-II**
- **Electives**

**Molecular emphasis students also take the following.**

- **099:241 Biophysical Chemistry I**
- **or**
- **099:242 Biophysical Chemistry II**
- **142:215 Transcription and Multifunctional Regulation by RNA**
- **Electives**

Once students are promoted to the second year of study, they choose research laboratories for Ph.D. thesis research and begin their thesis projects. They take courses that supplement their interests and preparation, including the following.

- **099:237 Topics in Biochemistry and Molecular Biology (at least 1 s.h.)**
- **099:238 Topics in Biophysical Chemistry (at least 1 s.h.)**
- **099:282 Seminar**
- **650:270 Principles of Scholarly Integrity**
- **Research Biochemistry (099:292) and elective science courses numbered 100 or above in other departments satisfy the remaining course requirements.**

Students take the comprehensive examination before the end of June in their second year, after which they are admitted formally to degree candidacy and begin to concentrate on thesis research. The program culminates in successful defense of completed thesis work before an examining committee.

In addition to meeting these requirements and those of the Graduate College, students are expected, as part of their training, to assist in teaching biochemistry for two semesters.

Throughout the program, students are associated with faculty-directed research groups. They receive close personal attention from the biochemistry faculty members who serve as research advisors.

**Admission**

The graduate program in biochemistry is flexible enough to accommodate students with bachelor's degrees in any of
the biological, biochemical, or physical sciences. Appropriate preparation includes one-year, college-level courses in organic and physical chemistry, biology, physics, and mathematics through calculus. Students are expected to have had one or more introductory courses in biochemistry.

Applicants must have an undergraduate g.p.a. of at least 3.00 and must submit acceptable verbal, quantitative, and analytical scores on the Graduate Record Examination (GRE) General Test. Applicants are encouraged to submit their scores on the GRE Subject Test in Chemistry; Biology; or Biochemistry, Cell, and Molecular Biology.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

**Financial Support**

Students admitted to the Ph.D. program in biochemistry routinely receive a stipend and tuition support.

**Research**

The department's current research interests include protein structure and function, protein folding, DNA bending, complex carbohydrate structure and function, chromatin, regulation of gene expression, mechanisms of transcription and replication, enzyme reaction mechanisms, intracellular signaling, differentiation, and membrane determinants of cell shape and motility. Visit the Department of Biochemistry web site for details.

**Facilities**

The Department of Biochemistry is located on the University of Iowa health sciences campus, where it has administrative, research, and teaching facilities in the Bowen Science Building. Departmental research groups also are located in the adjacent Medical Education and Research Facility, the Eckstein Medical Research Building, and in other research facilities.

The University of Iowa maintains a number of central research support facilities and equipment that promote campuswide interactions between research groups. These include the facilities for electron and confocal microscopy, fermentation, image analysis, high field NMR, high resolution mass spectrometry, and academic computing (through Information Technology Services). Carver College of Medicine research facilities are available to biochemistry researchers for nuclear magnetic resonance spectroscopy, flow cytometry, DNA synthesis, tissue culture hybridoma, gene transfer, X-ray crystallography analysis, and transgenic and gene targeting.

Individual faculty research laboratories are well-equipped for modern research, and there are many common-use laboratories, including instrument rooms, a reading room, cold rooms, tissue culture areas, preparation rooms, and a stockroom. Research is supported by office staff, stockroom supervisors, and a purchasing agent.

Together, the department and the central support facilities provide virtually all of the equipment required for modern biochemical research. Examples of such equipment include analytical and preparative ultracentrifuges; fluorescence, optical rotatory dispersion, high-field NMR, and rapid kinetic instruments; tissue culture rooms, gas chromatographs, preparative high performance liquid chromatographs, liquid scintillation counters, electrophoresis equipment, instrumentation for protein X-ray crystallography and microcalorimetry, automated DNA sequencers, and facilities for microarray analysis.

The department maintains a reading room stocked with primary books and journals used by biochemists. The Hardin Library for the Health Sciences is a large, complete library located on the health sciences campus. Excellent resources also are provided by branches of the University of Iowa Libraries and by computer access to bibliographic retrieval services.

Undergraduate Programs

The department offers a Bachelor of Arts, a Bachelor of Science, and a minor in biology.

Study in the Department of Biology prepares students for work in a wide variety of fields in educational institutions, government agencies, foundations, health care organizations, and businesses. Undergraduate programs prepare students for entry into research or service careers associated with private industry or government programs, and for primary and secondary teaching. They also prepare students for entry into advanced degree programs leading to careers in higher education and to independent research in a variety of biological fields, or for practice in health professions such as medicine, dentistry, pharmacy, nursing, veterinary medicine, medical technology, and physical therapy.

Bachelor of Science students choose one of six tracks. The Bachelor of Arts program and the comprehensive biology track in the Bachelor of Science provide highly diverse content. The remaining five B.S. tracks emphasize distinct areas: cell and developmental biology, evolutionary biology, genetics and biotechnology, neurobiology, and plant biology.

The B.A. and all six B.S. programs include a core curriculum consisting of the two-semester sequence 002:010 Principles of Biology I and 002:011 Principles of Biology II, 002:128 Fundamental Genetics, and 002:131 Evolution. Each program includes a total of 18-19 courses (63-70 s.h.) in biology, chemistry, physics, and mathematics. All course work prepares students for advanced graduate and professional training in biology and related subjects.

The department offers 002:196 Honors Investigations and 002:199 Introduction to Research to acquaint undergraduate students with the nature of practicing scientists’ work. Students associate with one of the department's research groups in experiments, discussion of current research, study of specialized topics, and attendance at research seminars. Admission to the University of Iowa Honors Program is required for 002:196 Honors Investigations. All students who are accepted by a Department of Biology faculty sponsor may take 002:199 Introduction to Research.

Students interested in field biology, zoology, or botany may take varied courses in these subjects offered during the summer at Iowa Lakeside Laboratory, Lake Okoboji, Iowa.

Students who wish to count course work done at another institution toward requirements for a biology degree at Iowa should consult with their biology advisor.

Bachelor of Science in Biology

The Bachelor of Science in biology requires a minimum of 120 s.h., including at least 63-70 s.h. (18 courses) of work for the major. It is divided into six tracks that emphasize the most dynamic and active areas in the biological sciences: cell and developmental biology, genetics and biotechnology, evolutionary biology, neurobiology, plant biology, and comprehensive biology. Students who pursue the B.S. must complete requirements in the chemistry/physics/mathematics foundation, the biology core, and one of the six tracks. Students must complete the College of Liberal Arts and Sciences General Education Program.

CHEMISTRY/PHYSICS/MATHEMATICS FOUNDATION

All of these:  
004:011-004:012 Principles of Chemistry I-II  8 s.h.  
004:121 Organic Chemistry I  3 s.h.

One of these sequences:  
029:011-029:012 College Physics I-II  8 s.h.
029:081-029:082 Introductory Physics I-II 8 s.h.

One of these:
22M:016 Calculus for the Biological Sciences 4 s.h.
22M:025 Calculus I 4 s.h.
22M:031 Engineering Mathematics I: Single Variable Calculus 4 s.h.

One of these:
22S:030 Statistical Methods and Computing (preferred for evolution track) 3 s.h.
22S:101 Biostatistics 3 s.h.

BIOLOGY CORE

002:010-002:011 Principles of Biology I-II 8 s.h.
002:128 Fundamental Genetics 4 s.h.
002:131 Evolution 4 s.h.

Tracks for the Bachelor of Science

Students pursuing the B.S. must select a single track. Each track includes seven courses. Students who choose 002:196 Honors Investigations to fulfill a track requirement must complete a minimum of 6 s.h. in that course. Honors Investigations may be used to fulfill a requirement only in a single category in each track. If it is used to fulfill the investigative laboratory requirement, it cannot also be used to fulfill the elective requirement; if it is used to fulfill the elective requirement, it cannot also be used to fulfill the investigative laboratory requirement.

CELL AND DEVELOPMENTAL BIOLOGY TRACK

The cell and developmental biology track provides education in the structure and function of cells and in the principles of development as they apply to animals and plants. This track is appropriate for students who wish to pursue graduate study in cellular and developmental biology, to prepare for professional study in medicine and other health-related fields, or to take positions in laboratories and companies engaged in cancer research and related fields.

Group 1 (Developmental Biology)

Both of these:
002:104 Introduction to Developmental Biology 3 s.h.
002:117 Plant Developmental Biology 3 s.h.

Group 2 (Biochemistry)

One of these:
099:110 Biochemistry 3 s.h.
099:120 & 099:130 Biochemistry and Molecular Biology I-II 6 s.h.

Group 3 (Cellular Biology)

One of these:
002:114 Cell Biology 3 s.h.
002:155 Cell Physiology 4 s.h.

Group 4 (Investigative Laboratory)

One of these:
002:133 Cell Biology Laboratory 3 s.h.
Group 5 (Electives)

At least two courses, which may include any combination of courses not taken for Group 3 and/or 4 and/or courses from the following list:

- 002:138 Genetics and Biotechnology Lab 3 s.h.
- 002:145 Introduction to Neurobiology 3 s.h.
- 002:150 Endocrinology 3 s.h.
- 002:168 Genes and Development 3 s.h.
- 002:171 Molecular Genetics 4 s.h.
- 002:180 Fundamental Neurobiology 4 s.h.
- 002:184 Developmental Neurobiology 3 s.h.
- 061:147 Survey of Immunology 4 s.h.
- 061:157 General Microbiology 5 s.h.

**EVOLUTIONARY BIOLOGY TRACK**

The evolutionary biology track provides education in the principles of evolution as they apply to understanding diversity within and among species, from genomic, ecological, and historical perspectives. This track is appropriate for students who wish to pursue graduate study in evolutionary biology and related fields or to take positions in laboratories utilizing population genetics or phylogenetic approaches such as forensics, fisheries, and human disease mapping.

**Group 1 (Evolution Core)**

- 002:134 Ecology 4 s.h.

One of these:

- 002:169 Introduction to Bioinformatics 4 s.h.
- 002:170 Bioinformatics 3 s.h.
- 002:178 Genomics 3 s.h.

One of these:

- 002:160 Molecular Phylogenetics 3 s.h.
- 002:162 Population Genetics and Molecular Evolution 3 s.h.

**Group 2 (Biochemistry)**

One of these:

- 099:110 Biochemistry 3 s.h.
- 099:120 & 099:130 Biochemistry and Molecular Biology I-II 6 s.h.

**Group 3 (Investigative Laboratory)**

One of these:

- 002:138 Genetics and Biotechnology Lab 3 s.h.
- 002:148 Field Ecology 4 s.h.
- 002:196 Honors Investigations (in evolution) 6 s.h.
Group 4 (Electives)

At least two courses, which may include any combination of courses not taken for Groups 1 and/or 3 and/or courses from the following list:

- 002:100 Plant Diversity and Evolution 4 s.h.
- 002:103 Biogeography 3 s.h.
- 002:108 Vertebrate Zoology 4 s.h.
- 002:136 Conservation Biology 4 s.h.
- 002:140 Systematics: Classifying Biodiversity 3 s.h.
- 002:143 Animal Behavior 4 s.h.
- 012:122 Evolution of the Vertebrates 3 s.h.
- 012:170 Evolution of Ecosystems 3 s.h.
- 22C:016 Computer Science I: Fundamentals 4 s.h.
- 22S:120 Probability and Statistics 4 s.h.
- 213:120 Primate Evolutionary Biology 3 s.h.
- 213:116 Modern Human Origins 3 s.h.
- 213:151 Anthropological Genetics 3 s.h.

GENETICS AND BIOTECHNOLOGY TRACK

The genetics and biotechnology track provides education in the key principles of transmission, maintenance, regulation, and manipulation of genes. This track is appropriate for students who wish to pursue graduate study in fields related to genetics or to enter the modern biotechnology industry. It also provides excellent preparation for professional study in medicine and other health-related fields.

Group 1 (Genetics Core)

Both of these:

- 002:171 Molecular Genetics 4 s.h.
- 061:170 Microbial Genetics 3 s.h.

One of these:

- 002:169 Introduction to Bioinformatics 4 s.h.
- 002:170 Bioinformatics 3 s.h.
- 002:178 Genomics 3 s.h.

Group 2 (Biochemistry)

One of these:

- 099:110 Biochemistry 3 s.h.
- 099:120 & 099:130 Biochemistry and Molecular Biology I-II 6 s.h.

Group 3 (Investigative Laboratory)

One of these:

- 002:138 Genetics and Biotechnology Lab 3 s.h.
- 002:196 Honors Investigations (in genetics/biotechnology) 6 s.h.

Group 4 (Electives)

At least two courses; may include any combination of courses not taken for Group 1; 099:130 Biochemistry and Molecular Biology I-II if 099:120 Biochemistry and Molecular Biology I and 099:130 Biochemistry and Molecular Biology II are chosen from Group 2, and/or the course that has not been taken for Group 3, and/or courses from the following list:
NEUROBIOLOGY TRACK

The neurobiology track provides education in nervous system function at all levels, from molecular to systems biology. This track is appropriate for students who wish to pursue graduate study in neurobiology and related areas, including psychology and the social sciences; to enter laboratories that study the therapeutic basis of neurological disorders; or to work in pharmaceutical companies. It also provides good preparation for professional study in medicine and other health-related fields.

Group 1 (Neurobiology Core)

All of these:

- 002:143 Animal Behavior 4 s.h.
- 002:145 Introduction to Neurobiology 3 s.h.
- 002:180 Fundamental Neurobiology 4 s.h.

Group 2 (Biochemistry)

One of these:

- 099:110 Biochemistry 3 s.h.
- 099:120 & 099:130 Biochemistry and Molecular Biology I-II 6 s.h.

Group 3 (Investigative Laboratory)

One of these:

- 002:133 Cell Biology Laboratory 3 s.h.
- 002:135 Developmental Biology Lab 3 s.h.
- 002:186 Neurobiology Laboratory 3 s.h.
- 002:196 Honors Investigations (in neurobiology) 6 s.h.
- 031:177 Field Methods: Animal Behavior Research 3 s.h.

Group 4 (Electives)

At least two courses, which may include any combination of a course not taken for Group 3 and/or courses from the following list:

- 002:114 Cell Biology 3 s.h.
- or
- 002:155 Cell Physiology 4 s.h.

- 002:104 Introduction to Developmental Biology 3 s.h.
- 002:124 Animal Physiology 3 s.h.
- 002:150 Endocrinology 3 s.h.
- 002:181 Neurophysiology 3 s.h.
- 002:184 Developmental Neurobiology 3 s.h.
PLANT BIOLOGY TRACK

The plant biology track provides education in how plants grow, how they have evolved, and how they interact with other organisms. This track is appropriate for students who wish to pursue graduate study in biology specializing in plants. It also is good preparation for positions in plant biotechnology companies that work in biofuels development, crop improvement, or CO₂ sequestration, or in agencies dedicated to the conservation of natural lands.

Group 1 (Plant Biology Core)

002:117 Plant Developmental Biology 3 s.h.

One of these:

002:100 Plant Diversity and Evolution 4 s.h.
002:103 Biogeography 3 s.h.
002:140 Systematics: Classifying Biodiversity 3 s.h.

One of these:

002:113 Ecological Plant Anatomy 4 s.h.
002:134 Ecology 4 s.h.
012:170 Evolution of Ecosystems 3 s.h.

Group 2 (Biochemistry)

One of these:

099:110 Biochemistry 3 s.h.
099:120 & 099:130 Biochemistry and Molecular Biology I-II 6 s.h.

Group 3 (Investigative Laboratory)

One of these:

002:138 Genetics and Biotechnology Lab 3 s.h.
002:196 Honors Investigations (in plant biology) 6 s.h.

Group 4 (Electives)

Students must take at least two courses, which may include 099:130 if 099:120 and 099:130 are chosen from group 2; and/or courses from the following list; and/or approved plant biology courses offered at Iowa Lakeside Laboratory (students should consult their advisors).

002:104 Introduction to Developmental Biology 3 s.h.
002:114 Cell Biology 3 s.h.
002:171 Molecular Genetics 4 s.h.
002:162 Population Genetics and Molecular Evolution 3 s.h.

COMPREHENSIVE BIOLOGY TRACK

The comprehensive biology track is designed for students who wish a diverse, well-balanced introduction to the major fields of biology. This track provides suitable educational background for graduate study in the biological sciences and science education and for work in laboratories that engage in research and applications in many fields of biology. It also provides broadly based preparation for professional study in medicine and other health-related fields.

Group 1 (Biochemistry)

One of these:

099:110 Biochemistry 3 s.h.
099:120 & 099:130 Biochemistry and Molecular Biology I-II 6 s.h.
Group 2 (Molecular Biology)

Students must take at least one course, either 099:130 Biochemistry and Molecular Biology II if 099:120 Biochemistry and Molecular Biology I and 099:130 Biochemistry and Molecular Biology II is chosen in group 1 or a course from the following list.

002:171 Molecular Genetics 4 s.h.
002:178 Genomics 3 s.h.

Group 3 (Cellular Biology)

At least one of these:

002:114 Cell Biology 3 s.h.
002:155 Cell Physiology 4 s.h.
002:180 Fundamental Neurobiology 4 s.h.

Group 4 (Developmental Biology)

At least one of these:

002:104 Introduction to Developmental Biology 3 s.h.
002:117 Plant Developmental Biology 3 s.h.

Group 5 (Organismal Physiology)

At least one of these:

002:124 Animal Physiology 3 s.h.
002:145 Introduction to Neurobiology 3 s.h.
002:150 Endocrinology 3 s.h.

Group 6 (Population Biology)

At least one of these:

002:100 Plant Diversity and Evolution 4 s.h.
002:103 Biogeography 3 s.h.
002:134 Ecology 4 s.h.
002:140 Systematics: Classifying Biodiversity 3 s.h.

Group 7 (Investigative Laboratory)

At least one of these:

002:133 Cell Biology Laboratory 3 s.h.
002:135 Developmental Biology Lab 3 s.h.
002:136 Conservation Biology 4 s.h.
002:138 Genetics and Biotechnology Lab 3 s.h.
002:148 Field Ecology 4 s.h.
002:186 Neurobiology Laboratory 3 s.h.
002:196 Honors Investigations 6 s.h.
031:177 Field Methods: Animal Behavior Research 3 s.h.
Iowa Lakeside Laboratory courses (students consult their advisors) 4-5 s.h.
**Suggested First-Year Schedule**

The following first-year schedule of science courses is recommended for students seeking either the B.S. or B.A. in biology.

**First-Semester Science Courses**

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>004:011 Principles of Chemistry I</td>
<td>4 s.h.</td>
</tr>
<tr>
<td>Calculus or mathematics leading to calculus</td>
<td>3-4 s.h.</td>
</tr>
</tbody>
</table>

**Second-Semester Science Courses**

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>002:010 Principles of Biology I</td>
<td>4 s.h.</td>
</tr>
<tr>
<td>004:012 Principles of Chemistry II</td>
<td>4 s.h.</td>
</tr>
<tr>
<td>Calculus (if not taken during the first semester)</td>
<td>4 s.h.</td>
</tr>
</tbody>
</table>

**Bachelor of Arts in Biology**

The Bachelor of Arts in biology requires a minimum of 120 s.h., including at least 66-70 s.h. (19 courses) of work for the major. The B.A. is broadly based. It introduces students to key concepts in important areas of biology and, compared to the B.S., gives them more flexibility in choosing elective courses.

B.A. students must complete a chemistry/physics/math foundation; a biology core identical to that required for the B.S.; one course in each of three breadth menus; one course with a laboratory; and three elective courses, which may include one course in the history or philosophy of science. Students must complete the College of Liberal Arts and Sciences General Education Program.

The B.A. prepares students for graduate study in the biological sciences and is especially appropriate for those interested in careers in biological science education at all levels. It also provides suitable preparation for professional positions in laboratory or field research or for professional study in medicine and other health-related fields.

**CHEMISTRY/PHYSICS/MATHEMATICS FOUNDATION**

All of these:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>004:011-004:012 Principles of Chemistry I-II</td>
<td>8 s.h.</td>

BIOLOGY CORE

002:010-002:011 Principles of Biology I-II 8 s.h.
002:128 Fundamental Genetics 4 s.h.
002:131 Evolution 4 s.h.

BREADTH MENUS

At least one course from each of the following three breadth menus:

Molecular and Cellular Biology

002:114 Cell Biology 3 s.h.
002:155 Cell Physiology 4 s.h.
002:171 Molecular Genetics 4 s.h.

Developmental Biology and Physiology

002:104 Introduction to Developmental Biology 3 s.h.
002:117 Plant Developmental Biology 3 s.h.
002:124 Animal Physiology 3 s.h.
002:145 Introduction to Neurobiology 3 s.h.
002:150 Endocrinology 3 s.h.

Ecology and Evolutionary Biology

002:100 Plant Diversity and Evolution 4 s.h.
002:103 Biogeography 3 s.h.
002:134 Ecology 4 s.h.
002:140 Systematics: Classifying Biodiversity 3 s.h.

COURSE WITH A LABORATORY

One of these (must not have been used as a breadth menu course):

002:100 Plant Diversity and Evolution 4 s.h.
002:108 Vertebrate Zoology 4 s.h.
002:113 Ecological Plant Anatomy 4 s.h.
002:133 Cell Biology Laboratory 3 s.h.
002:135 Developmental Biology Lab 3 s.h.
002:136 Conservation Biology 3 s.h.
002:138 Genetics and Biotechnology Lab 3 s.h.
002:148 Field Ecology 4 s.h.
002:186 Neurobiology Laboratory 3 s.h.
002:196 Honors Investigations 6 s.h.
012:121 Principles of Paleontology 3 s.h.
031:177 Field Methods: Animal Behavior Research 3 s.h.
061:157 General Microbiology 5 s.h.
099:140 Experimental Biochemistry 4 s.h.
Iowa Lakeside Laboratory courses (students consult their advisors) 4-5 s.h.

ELECTIVES

At least three courses, which may include any course chosen from a breadth menu or from the list of courses with a laboratory that has not been used to satisfy those requirements, any other 2-4 s.h. course numbered 100 or above offered by the Department of Biology, any approved advanced biology course taught at the Iowa Lakeside Laboratory
(students consult their advisors), and/or any course(s) chosen from the following list:

- 012:122 Evolution of the Vertebrates 3 s.h.
- 012:170 Evolution of Ecosystems 3 s.h.
- 027:155 Skeletal Muscle Biology 3 s.h.
- 061:147 Survey of Immunology 4 s.h.
- 213:116 Modern Human Origins 3 s.h.
- 213:151 Anthropological Genetics 3 s.h.
- 213:152 Primate Conservation Biology 3 s.h.
- 213:170 Primate Evolutionary Biology 3 s.h.
- 213:188 Primate Behavior and Ecology 3 s.h.

One of the electives may be chosen from these:

- 016:136/152:136 History of Medicine in Western Society 3 s.h.
- 16E:139 Ancient and Medieval Science 3 s.h.
- 16W:137/152:137 History of Public Health 3 s.h.
- 16W:138/152:138 History of International Health 3 s.h.
- 026:104 Introduction to Philosophy of Science 3 s.h.
- 032:162 Genes and the Human Condition 3 s.h.
- 044:131/152:131 Geography of Health 3 s.h.

In addition, students who have passed 004:121 Organic Chemistry I, 004:122 Organic Chemistry II, and 099:110 Biochemistry may use 099:110 Biochemistry as a biology elective.

Introduction to Research (002:199) for 3 s.h. may be counted only once toward the elective requirement for the B.A.

**Suggested First-Year Schedule**

The following first-year schedule of science courses is recommended for students seeking either the B.S. or B.A. in biology.

**First-Semester Science Courses**

- 004:011 Principles of Chemistry I 4 s.h.
- Calculus or mathematics leading to calculus 3-4 s.h.

**Second-Semester Science Courses**

- 004:012 Principles of Chemistry II 4 s.h.
- 002:010 Principles of Biology I 4 s.h.
- Calculus (if not taken during the first semester) 4 s.h.

**Four-Year Graduation Plan**

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan. (Courses in the major are those required to complete the major, exclusive of courses in the chemistry/physics/mathematics foundation.)

**Bachelor of Science**

**Before the third semester begins:** math through calculus I, 004:011 Principles of Chemistry I, 004:012 Principles of Chemistry II, 002:010 Principles of Biology I, and at least one-quarter of the semester hours required for graduation

**Before the fifth semester begins:** the courses listed above, plus 002:011 Principles of Biology II, 004:121 Organic Chemistry I, 22S:030 Statistical Methods and Computing or 22S:101 Biostatistics, two other courses in the major, and at least one-half of the semester hours required for graduation

**Before the seventh semester begins:** the courses listed above, 029:011 College Physics I and 029:012 College Physics II or equivalents, plus five or six more courses in the major, and at least three-quarters of the semester hours required for graduation

**Before the eighth semester begins:** the courses listed above, plus two or three more courses in the major
During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Bachelor of Arts

Before the third semester begins: math through calculus I, 004:011 Principles of Chemistry I, 004:012 Principles of Chemistry II, 002:010 Principles of Biology I, and at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: the courses listed above, 002:011 Principles of Biology II, 004:121 Organic Chemistry I, 22S:030 Statistical Methods and Computing or 22S:101 Biostatistics, three other courses in the major, and at least one-half of the semester hours required for graduation

Before the seventh semester begins: the courses listed above, 029:011 College Physics I and 029:012 College Physics II or equivalents, plus five or six more courses in the major, and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: the courses listed above, plus two or three more courses in the major

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Honors

Biology majors who are members of the University of Iowa Honors Program may enroll in the Honors Program in Biology, which gives talented students membership in a small, active group of undergraduates with common interests. Honors students gain an introduction to the pursuits of practicing scientists by associating with one of the department's research groups and participating in an independent research project guided by a faculty member (the research supervisor). Honors students write a thesis that should be based on an interesting biological problem, which is usually identified by the research supervisor. The thesis should clearly document that the student has acquired the necessary experimental skills to address specific questions and test specific hypotheses related to the research problem. Honors Seminar in Biology (002:198), or equivalent seminar, provides students with an ideal opportunity to improve their skills in seminar presentation and in writing scientific English. Throughout undergraduate residence, biology honors students may also take advantage of enrollment in honors sections of courses within the department and the college.

Membership in the University of Iowa Honors Program requires that students maintain a cumulative University of Iowa g.p.a. of at least 3.33. To graduate with honors in biology, students must complete the requirements for a B.S. or B.A. in biology with a g.p.a. of at least 3.33 in all course work in the biology major taken at The University of Iowa (including all biology courses and cognates in chemistry, physics, biochemistry, mathematics, and statistics). In addition, students must fulfill the following requirements: complete 2 s.h. in either 002:198 Honors Seminar in Biology or an advanced-level biology seminar course; complete a minimum of 6 s.h. (taken over two or more semesters) of 002:196 Honors Investigations; write a brief research proposal summarizing the background and goals of their proposed honors research; upon completion of their research, submit an acceptable honors thesis; and give a brief oral presentation of their research findings to other biology honors students.

Students pursuing a B.S. in biology may apply 6 s.h. of 002:196 Honors Investigations toward the investigative laboratory requirement in an appropriate track. Students pursuing a B.A. in biology may apply 6 s.h. of 002:196 Honors Investigations toward the elective laboratory course requirement and count the 2 s.h. earned in 002:198 Honors Seminar in Biology toward the elective requirement.

Biology majors interested in pursuing an honors degree should contact the biology honors advisor as early as possible, preferably in their sophomore or junior year, so that they may be matched with an appropriate lab.

Minor

The minor in biology requires a minimum of 15 s.h. in biology courses, including 12 s.h. in 100-level courses offered by the Department of Biology at The University of Iowa or in approved Iowa Lakeside Laboratory courses. Students must maintain a g.p.a. of at least 2.00 in the minor and in the 100-level courses. Course work in the minor may not be taken pass/nonpass. Students may not use transfer courses to satisfy the 100-level course requirement.

Graduate Programs

The Department of Biology offers a Master of Science, with and without thesis, and a Doctor of Philosophy in biology. The department emphasizes the Ph.D.

The department's graduate programs emphasize original research and the skills essential for publishing and communicating research findings to the biology community. They prepare students for careers in the academic research community, education, industry, and government.
Research programs in the department cover most areas of the biological sciences: cell biology, developmental biology, ecology, evolution, genetics, neurobiology, and plant biology. Doctoral students who wish to specialize in one of four subtracks choose from cell and developmental biology, evolution, genetics, or neurobiology. For each track's requirements, see Graduate Programs on the Department of Biology web site.

When a new graduate student is admitted, he or she is assigned a temporary advisor. The student and advisor meet before registration to discuss the student's educational background and to formulate a study plan for the first year. Students may be advised to take specific course work to enhance their background in certain areas.

During the first year, students whose preparation in chemistry, genetics, mathematics, and physics does not meet the department's graduate entry requirements must remedy deficiencies by taking appropriate course work.

Minimum entry requirements are:

- two semesters of organic chemistry or one semester of organic chemistry and one semester of biochemistry;
- one semester of calculus;
- two semesters of college physics; and
- 20 s.h. of course work in biology.

A student with a bachelor's degree outside the biological sciences may request modification of certain area requirements; the Graduate Affairs Committee decides whether portions of the requirements may be waived. Students also take 002:128 Fundamental Genetics during the first year, unless they are excused from this requirement by the Graduate Affairs Committee. After the first year, students are advised by their research sponsor and dissertation committee.

**Master of Science**

The Master of Science in biology requires 30 s.h. of graduate credit with thesis, and 34 s.h. of graduate credit without thesis. All M.S. students take a seminar (2 s.h.) with a substantial writing and oral presentation requirement and two advanced lecture-based courses in biology. Students receive academic credit for courses required for an M.S. or Ph.D. but not for courses taken to remedy undergraduate deficiencies.

Thesis students may count a maximum of 9 s.h. of research credit toward the degree. Remaining course work is tailored to the student's background and career goals and is selected in consultation with the student's advisory committee. The thesis is based on original research. After the thesis is accepted by the student's supervisor and advisory committee, the student must pass an oral examination based on the thesis research and on related subjects.

Nonthesis students must write a library research report for a maximum of 4 s.h. of credit. They may apply up to 8 s.h. of research credit toward the degree. The nonthesis program may include credit earned in biology or cognate sciences; course work is tailored to the student's background and career goals and is selected in consultation with the student's advisory committee.

On completion of the 34 s.h. and acceptance of the research report by the faculty sponsor, the student must pass a written examination covering the graduate program in biology, including the area of the research report.

**Doctor of Philosophy**

The Doctor of Philosophy in biology requires a minimum of 72 s.h. of graduate credit.

The department expects new Ph.D. students to do research in three laboratories on a rotating basis during their first academic year (August-May). Students consult with their temporary advisors and with prospective faculty research sponsors before identifying their preferences for research rotations. They choose a permanent laboratory affiliation based on their rotations.

During the first academic year, students are required to enroll in the department's colloquium, which is based on a weekly Friday seminar series. In the second semester, the colloquium includes a discussion component based on the weekly seminar series. During the first two years, students must enroll in at least two advanced lecture courses, one seminar course (2 s.h.) that has a significant writing component, and a course on scientific writing designed for graduate students.

Additional formal course work and proficiency requirements for each Ph.D. student are determined by the dissertation committee on the basis of the student's background and current and prospective research interests. The dissertation committee also determines what portion of the formal course or proficiency requirements the student must complete before the comprehensive examination. In this examination, students must demonstrate knowledge of biology fundamentals and the analytic and synthetic skills necessary to become creative, independent scientists. Once they complete the course work and proficiency requirements and pass the comprehensive examination, students may be admitted to full candidacy for the Ph.D.
Students also must demonstrate teaching skills by assisting in instruction as teaching assistants for at least two semesters.

The program culminates in students’ preparation of a dissertation based on original, independent research. Students must pass a final examination that covers the thesis and its specialized field before the Ph.D. is awarded.

Admission

Application materials for the graduate program must be sent both to the University's Office of Admissions and to the Department of Biology graduate admissions committee. Complete instructions are listed on the application form; contact the Department of Biology or visit its web site. Applicants should have official transcripts from each undergraduate and graduate institution they have attended sent to both the Office of Admissions and the Department of Biology. They also should arrange to have official scores from the Graduate Record Examination (GRE) General Test (verbal, quantitative, and analytical writing) sent to both offices. A valid B.S. or B.A. from an accredited institution is required.

Applicants whose first language is not English must score at least 570 (paper-based), 230 (computer-based), or 88 (Internet-based) on the Test of English as a Foreign Language (TOEFL), and have their score sent to the Office of Admissions. International applicants whose first language is not English are required to take an English proficiency exam when they first enroll for classes.

Successful applicants for graduate admission usually have a g.p.a. of at least 3.00 and score above 1200 on the Graduate Record Examination (GRE) General Test (combined verbal and quantitative). These criteria are general guidelines for the admissions committee, which also considers letters of recommendation, research experience, and other appropriate criteria.

The department recommends that applicants also take the Graduate Record Examination advanced biology test and submit their scores. Although most applicants have completed undergraduate programs in biology, the department also considers applicants with backgrounds in biophysics, botany, biochemistry, molecular biology, microbiology, and other related areas.

Applications should be submitted by February 1 and must include the GRE test scores. In order to meet the deadline, applicants must take the GRE in October or earlier. Late applications are considered as placement and funding permit.

Students applying for admission to the M.S. with thesis program in biology should have a bachelor's degree in one of the biological sciences. Students with bachelor's degrees in other areas may need to register as nondegree students (A9 or G9) and make up the equivalent of the department's bachelor's degree program prior to consideration for admission. Nondegree students must complete chemistry, physics, and calculus requirements in addition to the biology courses listed in the undergraduate program. Nondegree students should consult the department's graduate program administrator before applying for admission.

The M.S. degree without thesis is an exit degree. Students are not permitted to enter as graduate students with this degree objective.

For more information, visit the Department of Biology web site.

Financial Support

All graduate students making satisfactory progress toward the Ph.D. receive stipend and full tuition support from non-University of Iowa fellowships, teaching assistantships, or research assistantships available through individual research grants administered by faculty members or by the University. First-year Ph.D. students are supported by department fellowships during the research rotation period.

Facilities

The department is housed in three contiguous buildings, with modern facilities and equipment for state-of-the-art research. A new research and teaching building was completed in spring 2000, and extensive renovation of the preexisting facilities was completed in spring 2004.

Facilities include the Keck Dynamic Image Analysis Facility, which couples sophisticated state-of-the-art microscopy and computerized motion analysis to permit three-dimensional real-time analysis of cell movement in vitro and in situ. The Carver Center for Comparative Genomics houses the department's DNA sequencing, quantitative PCR, functional genomics/microarray facilities, and informatics facilities.
A well-staffed microscopy and imaging facility, including access to a newly established confocal microscope, is available for teaching and research.

Two large greenhouses are used in plant research and education.

The department also houses animal-care facilities suitable for mice, rats, rabbits, *Xenopus laevis*, and zebra fish. These facilities are managed by the University's animal care unit, which is accredited by the Association for Assessment and Accreditation of Laboratory Animal Care. A central University facility provides assistance in the preparation of transgenic mice.

The department is also the home of the Developmental Studies Hybridoma Bank, which is affiliated with the National Institute of Health. The hybridoma bank collects and distributes monoclonal antibodies that originate in laboratories all over the world. Its collection now contains more than 700 monoclonal antibodies that are distributed to users internationally for a modest fee.

In addition to department facilities, campuswide facilities include a DNA oligonucleotide synthesis and enzyme lab, oligopeptide synthesis and sequencing equipment, and mass- and NMR spectroscopy facilities. The Center for Biocatalysis and Bioprocessing is available for growing large amounts of microorganisms (e.g., 100 liters) for use in protein isolation.

**Iowa Lakeside Laboratory**

The Iowa Lakeside Laboratory is a field station run cooperatively by The University of Iowa, Iowa State University, and the University of Northern Iowa. Located on West Lake Okoboji, in northwestern Iowa, the laboratory affords excellent conditions for summer study in field biology, limnology, phycology, aquatic ecology, pollination biology, and plant taxonomy. It offers a wide variety of summer courses at the undergraduate and graduate levels. Students should check with their advisors to determine whether specific courses may be counted toward requirements for graduation. See Iowa Lakeside Laboratory (University College) in the Catalog or visit the Iowa Lakeside Laboratory web site.

**Biology Courses**

Many courses include field and/or laboratory components.

**For Precollege Students**

**002:004 Secondary Student Training Program**

Special projects. Prerequisite: secondary school enrollment.

**Primarily for Undergraduates**

**002:001 Introduction to Botany**

Biology of plant life; emphasis on structure, function, reproduction, inheritance, diversity, evolution. Prerequisite: one year of high school chemistry. GE: Natural Sciences.

**002:002 Introductory Animal Biology**

Fundamental principles: cells and macromolecules, energy metabolism, organismic physiology, genetics, development, ecology, and evolution. Prerequisite: one year of high school chemistry. Recommended: 004:007. GE: Natural Sciences.

**002:010 Principles of Biology I**

Structure and function of cells; structure, function, reproduction of higher plants and vertebrate animals; first of two-semester course sequence. Prerequisite: 004:011. GE: Natural Sciences.

**002:011 Principles of Biology II**

Continuation of 002:010; genetics, development, immunology, ecology, evolution. Prerequisites: 002:010 and 004:011. GE: Natural Sciences.

**Elementary Topics of General Interest**

These courses are not open to graduate students and do not provide credit toward a biology major.

**002:021 Human Biology**

4 s.h.
Molecular and cellular basis of human life; integration of humans and the biosphere through photosynthesis, respiration; structure, function of human tissues, organs, organ systems; reproduction, genetics, impact of molecular biology and genetic engineering; lecture, laboratory. GE: Natural Sciences.

**002:022 Ecology and Evolution**  
Evolution and diversity of living things, their patterns on Earth, their organization in ecological systems; dynamics of evolutionary processes. GE: Natural Sciences.

**002:029 First-Year Seminar**  
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities, field trips). Prerequisite: first- or second-semester standing.

**002:040 Biology of the Brain**  
Experimental studies of brain structure and function; consciousness; self; nature of mental illness; genetic and environmental determinants of behavior; for nonscience majors. GE: Natural Sciences.

**002:081 Human Genetics in the Twenty-First Century**  
Heredity in human families, populations; genetic basis of normal, abnormal traits; chromosome behavior; molecular basis of genetics; sex determination. GE: Natural Sciences.

**002:087 Spring Flora**  
Recognition and identification of spring-flowering herbaceous plants, native woodland trees and shrubs, woody landscape plants; family characteristics, use of taxonomic key.

**002:095 Plants and Human Affairs**  
How plants are useful to people: food, clothing, shelter, medicines, psychoactive agents; plants' social, economic, ecological significance. GE: Natural Sciences.

**For Undergraduate and Graduate Students**

**002:100 Plant Diversity and Evolution**  
Major groups, including algae, bryophytes, ferns and fern allies, gymnosperms, primitive angiosperms; emphasis on evolutionary implications of structure, reproductive biology, ecological adaptations; extant representatives of each plant group, reference to paleobotanical evidence. Prerequisite: 002:001, or 002:010 and 002:011, or equivalents.

**002:101 Teaching Internship in Biology**  
Training in teaching the laboratory component of a large General Education biology course; weekly session with instructor, shadowing and assisting a graduate teaching assistant in a lab section, leading laboratory exercises. Prerequisites: grade of B or higher in 002:010 and 002:011, junior or senior standing, and consent of instructor.

**002:103 Biogeography**  
Patterns of plant and animal distribution and their interpretation; historical geography, including glaciation, plate tectonics; ecological geography, including physical factors such as climate, geology. Prerequisite: 002:001, or 002:010 and 002:011, or 044:003, or consent of instructor. Same as 044:103.

**002:104 Introduction to Developmental Biology**  
Fundamental mechanisms in differentiation, organogenesis, morphogenesis; and pattern formation; mechanistic approach at molecular, cellular, tissue levels of organizations. Prerequisites: grades of C- or higher in 002:011 and 002:128; and 004:012.

**002:108 Vertebrate Zoology**  
Vertebrate diversity, success in relation to evolutionary history, and adaptive radiation of fish, amphibians, reptiles, birds, mammals; physiological, morphological, behavioral, life history adaptations; vertebrate zoogeography, systematics, patterns of reproduction, social systems. Prerequisites: 002:010 and 002:011, or consent of instructor.

**002:113 Ecological Plant Anatomy**  
Fundamental tissue systems of vascular plants, emphasis on seed plants; development, differentiation of each cell
Fundamental tissue systems of vascular plants, emphasis on seed plants; development, differentiation of each cell type, arrangement in primary and secondary plant body; focus on relationships between structure, function. Prerequisite: 002:001, or 002:010 and 002:011, or equivalents.

**002:114 Cell Biology**
3 s.h.
Structures of cells and organelles in relation to their functions at molecular, cellular levels; emphasis on higher eukaryotic cells. Prerequisites: 002:010 and 002:011, and 004:012 or equivalent.

**002:117 Plant Developmental Biology**
3 s.h.
Developmental processes throughout life cycle of vascular plants; current knowledge of mechanisms, control; emphasis on molecular, genetic approaches to development, including transposon tagging, transformation. Prerequisite: 002:128.

**002:124 Animal Physiology**
3 s.h.
Principles of cellular and systems physiology; emphasis on experimental and quantitative aspects. Prerequisites: 002:010, 002:011, and 029:011 or 029:081 or consent of instructor. Pre- or corequisite: 029:012 or 029:082.

**002:128 Fundamental Genetics**
3-4 s.h.
Nature, function of genetic material: classical, molecular, developmental aspects. Prerequisites: 002:010, 004:012, and grade of C- or higher in 002:011. Pre- or corequisite: 004:121.

**002:131 Evolution**
4 s.h.
Nature, evidence, analysis, implications, molecular/genetic basis; historical record, phylogeny, speciation, adaptation, investigative methods. Prerequisites: grade of C- or higher in 002:128, and 22M:016 or 22M:025 or 22M:031 or 22S:030 or 22S:101.

**002:133 Cell Biology Laboratory**
3 s.h.
Conceptual understanding and technical skills in fluorescence microscopy and digital imaging, mammalian cell culture, tissue fractionation, centrifugation, electrophoresis, and expression of recombinant proteins. Prerequisites: 002:010 and 002:011. Pre- or corequisite: a 100-level course in biology, biochemistry, or microbiology.

**002:134 Ecology**
4 s.h.
Adaptations of organisms to their physical and biological environments; organism-environment interactions; population biology; interactions between species; ecology of communities, ecosystems; human impact on ecosystems. Prerequisites: 002:010, 002:011, and 22M:016 or 22M:025 or 22M:031. Same as 159:134.

**002:135 Developmental Biology Lab**
3 s.h.
Experimental manipulation of embryos to examine mechanisms of early development, including gametogenesis and fertilization, cleavage, gastrulation, pattern formation and organogenesis; in vivo imaging of development, methods to visualize gene expression and independent research; model organisms including sea urchin, fish, frog, chick, mouse. Prerequisites: 002:104 and 002:128, or consent of instructor.

**002:136 Conservation Biology**
4 s.h.
Definition and measurement of biodiversity, causes of biodiversity loss; conservation biology of populations, habitats, and ecosystems; practical application of conservation principles, value of biodiversity; field projects to develop skill in assessing and measuring important characteristics of natural areas, and in creating and presenting management plans. Prerequisites: 002:010, 002:011, and 002:134; or consent of instructor.

**002:138 Genetics and Biotechnology Lab**
3 s.h.

**002:140 Systematics: Classifying Biodiversity**
3 s.h.
Nature of species, isolating mechanisms, hybridization; problems of convergence, homology; plant mating systems; types of information used in making taxonomic decisions. Prerequisite: 002:001, or 002:010 and 002:011, or equivalents.

**002:143 Animal Behavior**
4 s.h.
Genetics, sensory physiology, migration, development of behavior, circadian rhythms, foraging strategies, aggression, sexual and parental behavior, group selection, social behavior. Prerequisites: 002:010 and 002:011.

002:207 Research Method and Theory  2 s.h.
Materials and methods of scientific investigation; lab techniques; library resources usage, NCBI data base training; lab safety; research ethics; reading, writing, presenting scientific papers. Prerequisite: new graduate student in the biology program.

Prerequisite: consent of instructor.

002:220 Advanced Microscopy Biomedical Research  arr.
Technically advanced microscopy methods for research; individualized laboratory experience with opportunity to explore application of microscopy methods. Prerequisites: (for 060:220) an introductory microscopy course and consent of instructor. Prerequisites: (for 002:220) 002:218 or 060:218 or 061:218, or 012:156 or 052:156 or 060:156 or equivalent, and consent of instructor. Prerequisites: (for 061:220) an introductory EM course and consent of instructor. Same as 060:220, 061:220.

002:228 Fundamental Genetics--Graduate  1 s.h.

002:234 Seminar: Writing in Natural Sciences  2 s.h.
Writing and critiquing skills in the natural sciences. Prerequisite: consent of instructor.

002:265 Neuroscience Seminar  0-1 s.h.
Research presentations. Offered fall and spring semesters. Prerequisite: consent of instructor. Same as 031:265, 060:265, 072:265, 132:265.

002:270 Biosciences Critical Thinking and Communication  2 s.h.
Selected papers and oral and written presentations tied to students' research rotations; introductory seminar. Repeatable. Prerequisite: consent of instructor. Same as 072:342, 156:265.

002:280 Fundamental Neurobiology--Graduate  4 s.h.
Overview of neuroscience; emphasis on cellular level.

002:301 Research: Biology  arr.
Repeatable.

002:303 Independent Study in Biology  arr.
Repeatable. Prerequisite: consent of instructor.
Chemistry Programs

The Department of Chemistry offers a Bachelor of Arts, a Bachelor of Science, and a minor in chemistry. An undergraduate degree in chemistry provides a strong foundation for success in graduate and professional study and for positions in academic or industrial chemistry.

Bachelor of Science

The Bachelor of Science in chemistry requires a minimum of 120 s.h., including 68 s.h. of work for the major, with 46 s.h. in chemistry courses. Students earn 17 s.h. in five foundation chemistry courses and 29 s.h. in advanced chemistry courses. They must earn at least 20 s.h. in advanced chemistry courses at The University of Iowa. The five foundation courses are principles of chemistry I-II, organic chemistry I-II, and organic chemistry lab. All subsequent chemistry courses are built on the foundation courses.

Students must complete the College of Liberal Arts and Sciences General Education Program. The B.S. program is certified by the American Chemical Society. Current and projected demand for Bachelor of Science graduates in chemistry is excellent in research and in control and process-development work. The program also provides all the prerequisites for graduate work in chemistry or biochemistry and in other biomedical areas with a molecular focus.

Courses in the chemistry major have prerequisites, so they must be taken in the correct order. Most advanced courses are taught only once a year. Students should plan carefully, in consultation with their academic advisors. They should take 004:021 Basic Measurement during the first semester of the second year.

The B.S. requires the following course work.

### Chemistry

#### One of these sequences:

- **004:011-004:012 Principles of Chemistry I-II**: 8 s.h.
- **004:018-004:019-004:020 Chemical Science I-II - Chemical Science Laboratory**: 8 s.h.

#### One of these sequences:

- **004:121-004:122 Organic Chemistry I-II**: 6 s.h.
- **004:123-004:124 Organic Chemistry I for Majors - Organic Chemistry II for Majors (preferred)**: 6 s.h.

#### One of these:

- **004:141 Organic Chemistry Laboratory**: 3 s.h.
- **004:142 Organic Chemistry Laboratory for Majors (preferred)**: 3 s.h.

All of these:

- **004:021 Basic Measurement (first semester of second year)**: 3 s.h.
- **004:111-004:112 Analytical Chemistry I-II**: 6 s.h.
- **004:125 Inorganic Chemistry**: 2 s.h.
- **004:131-004:132 Physical Chemistry I-II**: 6 s.h.
- **004:143 Analytical Measurements**: 3 s.h.
004:144 Physical Measurements  3 s.h.
004:153 Inorganic Chemistry Laboratory  3 s.h.
004:170 Advanced Inorganic Chemistry  3 s.h.

Integral Calculus

One of these sequences:

22M:025-22M:026 Calculus I-II (preferred)  8 s.h.

Introductory Physics

One of these sequences:

029:011-029:012 College Physics I-II  8 s.h.
029:081-029:082 Introductory Physics I-II (preferred)  8 s.h.

SCIENCE ELECTIVES AND RESEARCH

Students must earn a total of at least 6 s.h. in advanced science elective courses and in 004:162 Undergraduate Research. A partial list of courses that satisfy the chemistry elective requirement is available on the department's web site (see Undergraduate Program/Degrees). Generally, advanced courses in related science disciplines beyond the introductory level and math-related courses with a prerequisite of calculus II or equivalent are accepted. Students should consult their advisors to gain approval for a course that is not on the list.

Bachelor of Arts

The Bachelor of Arts in chemistry requires a minimum of 120 s.h., including 53 s.h. of work for the major, with 37 s.h. in chemistry courses. Students earn 17 s.h. in five foundation chemistry courses and 20 s.h. in advanced chemistry courses. They must earn at least 11 s.h. in advanced chemistry courses at The University of Iowa.

The five foundation courses are principles of chemistry I-II, organic chemistry I-II, and organic chemistry lab. All subsequent chemistry courses are built on the foundation courses.

The B.A. program in chemistry provides a more general education, with a concentration in fundamental chemistry and a wider choice of electives than the B.S. program includes. Advanced courses in chemistry, biology, mathematics, physics, or other scientific areas are recommended.

Students must complete the College of Liberal Arts and Sciences General Education Program.

Bachelor of Arts graduates in chemistry may qualify to be high school teachers, provided they meet teacher licensure requirements. By choosing appropriate electives, students can meet entrance requirements for chemistry, biochemistry, medicine, dentistry, or other graduate or professional programs while satisfying the B.A. requirements in chemistry. Graduates also may pursue careers and education in business, law, and other areas.

Courses in the chemistry major have prerequisites, so they must be taken in the correct order. Most advanced courses are taught only once a year. Students should plan carefully, in consultation with their academic advisors. Students should take 004:021 Basic Measurement during the first semester of the second year.

The B.A. requires the following course work.

Chemistry

One of these sequences:

004:011-004:012 Principles of Chemistry I-II  8 s.h.
004:018-004:019-004:020 Chemical Science I-II - Chemical Science Laboratory  8 s.h.

One of these sequences:

004:121-004:122 Organic Chemistry I-II  6 s.h.
6 s.h.

One of these:
004:141 Organic Chemistry Laboratory  
3 s.h.
004:142 Organic Chemistry Laboratory for Majors (preferred)  
3 s.h.

One of these:
004:143 Analytical Measurements  
3 s.h.
004:144 Physical Measurements  
3 s.h.
004:153 Inorganic Chemistry Laboratory  
3 s.h.

All of these:
004:021 Basic Measurement (first semester of second year)  
3 s.h.
004:111-004:112 Analytical Chemistry I-II  
6 s.h.
004:125 Inorganic Chemistry  
2 s.h.
004:131-004:132 Physical Chemistry I-II  
6 s.h.

Integral Calculus

One of these sequences:
22M:025-22M:026 Calculus I-II (preferred)  
8 s.h.
8 s.h.

Introductory Physics

One of these sequences:
029:011-029:012 College Physics I-II  
8 s.h.
029:081-029:082 Introductory Physics I-II (preferred)  
8 s.h.

B.A. or B.S. with Teaching Licensure

Chemistry courses required for the B.S. or B.A. satisfy the major requirements for teaching in secondary schools. A minor in chemistry satisfies the requirements for a teaching emphasis in chemistry (see Science Education in the Catalog).

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

Note: Courses in the chemistry major have prerequisites. Students must take required courses in the correct sequence in order to satisfy prerequisites and avoid regression; a typical chemistry course schedule and a regression list are available on the department's web site (see Undergraduate Program/Degrees). Most advanced courses are taught only once a year. Students should plan carefully, in consultation with their academic advisors. They should take 004:021 Basic Measurement during the first semester of the second year.

Bachelor of Arts

Before the third semester begins: math through calculus I, 004:011 Principles of Chemistry I and 004:012 Principles of Chemistry II or 004:018 Chemical Science I, 004:019 Chemical Science II, and 004:020 Chemical Science Laboratory or equivalent course work, and at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: the courses listed above; calculus II; organic chemistry I, II, and lab; physics I and II; and at least one-half of the semester hours required for graduation
Before the seventh semester begins: the courses listed above, four more courses in the major, and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: the courses listed above, and one or two more courses in the major

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Bachelor of Science

Before the third semester begins: math through calculus I, 004:011 Principles of Chemistry I and 004:012 Principles of Chemistry II or 004:018 Chemical Science I, 004:019 Chemical Science II, and 004:020 Chemical Science Laboratory or equivalent course work, and at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: the courses listed above; calculus II; physics I and II; organic chemistry I, II, and lab; three other courses in the major; and at least one-half of the semester hours required for graduation

Before the seventh semester begins: the courses listed above, six more courses in the major, and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: the courses listed above, and three more courses in the major

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Honors

To graduate with honors in chemistry, a student must be a member of the University Honors Program, which requires students to maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University of Iowa Honors Program for more information). Honors students in chemistry must take 004:162 Undergraduate Research, complete a research project acceptable to their research advisors, and write an honors thesis based on that research. Students are encouraged, but not required, to present their research at local and regional meetings and to publish their results in professional journals. Students who complete 6 s.h. of 004:162 Undergraduate Research may earn additional honors research credit through an honors practicum.

Minor

The minor in chemistry requires a minimum of 15 s.h. in courses offered by the Department of Chemistry at The University of Iowa, including 12 s.h. in advanced courses. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass.

Advanced courses are numbered above 100 and below 280, except 004:162 Undergraduate Research and 004:191 Graduate Chemistry Orientation. Students normally complete the minor by taking the introductory sequence 004:011 Principles of Chemistry I and 004:012 Principles of Chemistry II (or 004:018 Chemical Science I, 004:019 Chemical Science II, and 004:020 Chemical Science Laboratory) followed by the 12 s.h. of advanced course work, which most commonly consists of the organic chemistry sequence 004:121 Organic Chemistry I, 004:122 Organic Chemistry II, and 004:141 Organic Chemistry Laboratory (or 004:123 Organic Chemistry I for Majors, 004:124 Organic Chemistry II for Majors, and 004:142 Organic Chemistry Laboratory for Majors) plus one more 3 s.h. chemistry course, such as 004:111 Analytical Chemistry I, 004:131 Physical Chemistry I, 004:132 Physical Chemistry II, 004:170 Advanced Inorganic Chemistry, or 004:172 Advanced Organic Chemistry.

Resources, Activities

The department offers undergraduate students majoring in chemistry and other students interested in chemistry a number of opportunities to enrich their classroom studies.

Undergraduate Chemistry Center

The Chemistry Center serves all students who take chemistry courses as well as the department's professors and teaching assistants. The center maintains waiting lists and offers other assistance with registration; returns examinations and homework assignments and maintains a file of lecture hand-outs; provides a lending library of chemistry textbooks that can be checked out; and maintains bulletin boards with information on all lower-level chemistry courses. Information about student organizations and departmental scholarships and awards also is available at the Chemistry Center.

Student Organizations

Students may join the Undergraduate Chemical Society, a student affiliate of the American Chemical Society (ACS). Chapter activities include dinner meetings with guest speakers; a chemistry tutoring service for other students;
participation in local and national meetings of the ACS; and participation in chemistry outreach programs. Students in UCS develop leadership, organization, and speaking skills valuable throughout their college experience and in their subsequent careers.

The department has a chapter of Alpha Chi Sigma, a co-ed chemistry fraternity. The Alpha Theta Chapter is open to students in chemistry, biochemistry, chemical engineering, and related fields. Alpha Chi Sigma sponsors many social and professional events throughout the year.

The department also supports the activities of Women in Science and Engineering (WISE), whose aim is to increase women's participation and advancement as students, faculty members, and professional staff; promote a supportive study and work environment for women; integrate women's ideas, strengths, and approaches into research, teaching, and service; and inform the public of educational and career opportunities for women in scientific and technical fields. WISE sponsors a living-learning community in Stanley Hall (a University residence hall) for first-year female students majoring in science or engineering, the Student-to-Student Support in Science mentoring program, a service learning program, and the WISE Discourse and Dining series.

Scholarships and Awards

A number of awards and scholarships are available to chemistry majors, including the American Institute of Chemists Award, the Undergraduate Award in Analytical Chemistry, the Chemistry Alumni Awards (one each for a sophomore, a junior, and a senior), the Merck Index Award, and the Viksnins, Harris & Padys PLLP Award.

Chemistry majors also may apply for the Donald J. and Margaret Burton Scholarship, Ken Sando Scholarship, Shoemaker-Strickler Scholarship, and Russell K. Simms Scholarship.

Graduate Programs

The department offers a Master of Science, with and without thesis, and a Doctor of Philosophy in chemistry.

Master of Science

The Master of Science in chemistry requires a minimum of 30 s.h. of graduate credit. The degree is offered with or without thesis, in analytical, inorganic, organic, and physical chemistry. M.S. students must demonstrate minimal proficiency in analytical, inorganic, organic, and physical chemistry by passing specific examinations or by enrolling in suitable core courses. This requirement must be completed by the end of the second year of enrollment. A g.p.a. of at least 3.00 is required for admission to the master's examination.

Doctor of Philosophy

The Doctor of Philosophy in chemistry requires a minimum of 72 s.h. of graduate credit. Ph.D. study in analytical, inorganic, organic, and physical chemistry includes minimal proficiency examinations, core courses as necessary, a minimum of 11 s.h. of advanced course work, and research.

Students who meet the course requirements with a cumulative g.p.a. of 3.00 or higher are admitted to the oral comprehensive examination upon presentation and preliminary approval of their written research proposal and research progress report; they must take the oral comprehensive examination no later than the end of their second year of enrollment.

Upon completing Ph.D. research, candidates prepare the dissertation. The final examination consists of an oral defense of the thesis, at which time the candidate presents at least one manuscript of the publishable portion of his or her thesis.

Admission

Applicants for graduate admission should have a bachelor's degree in chemistry, preferably with a g.p.a. of 3.00 or higher. Most admitted graduate students receive financial support. For application information, contact the Department of Chemistry or visit its web site.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

Facilities

The Department of Chemistry office, support facilities, and faculty offices are located in the Chemistry Building, as is laboratory and classroom space dedicated to teaching and research activities. Several faculty members have offices and laboratories in the Iowa Advanced Technology Laboratories, across the street from the Chemistry Building. See
the Department of Chemistry web site for information about facilities and advanced instrumentation available for instruction and research.

**Chemistry Courses**

**Primarily for Undergraduates**

Students planning to take more than one year of chemistry should take 004:011 Principles of Chemistry I and 004:012 Principles of Chemistry II. Students who require only one year of chemistry with no laboratory component may take 004:007 General Chemistry I and 004:008 General Chemistry II. Students who have not had high school chemistry or do not have strong math and/or chemistry preparation should consider taking 004:007 General Chemistry I before 004:011 Principles of Chemistry I; academic advisors and the Chemistry Diagnostic Test can help students determine whether to take 004:007 General Chemistry I before 004:011 Principles of Chemistry I.

**004:004 Secondary Student Training Program** 3-4 s.h.
Special projects. Prerequisite: secondary school enrollment.

**004:005 Technology and Society** 3 s.h.
Nonmathematical exploration of selected areas of technology; basic science background, current technological applications, implications for society; for nonscience majors. Prerequisite: closed to students who have taken college chemistry courses. GE: Natural Sciences.

**004:006 Technology and Society Laboratory** 1 s.h.
Laboratory for 004:005; demonstrations, student experiments. Prerequisite: closed to students who have earned more than 3 s.h. in chemistry courses. Pre- or corequisite: 004:005. GE: Natural Sciences.

**004:007 General Chemistry I** 3 s.h.
Atomic structure, chemical bonds, mole relations, stoichiometry, states of matter, acids and bases, reaction rates, electrochemistry, nuclear chemistry. Prerequisite: elementary algebra. GE: Natural Sciences.

**004:008 General Chemistry II** 3 s.h.
Organic chemistry and biochemistry. Prerequisite: 004:007 or high school chemistry. GE: Natural Sciences.

**004:009 Supplemental Chemistry Lab** 1 s.h.
Lab techniques, elementary synthesis, measurement, analysis, case-study lectures and experiments; safety glasses, appropriate dress, compliance with laboratory safety protocols required. Prerequisite: grade of C or higher in 004:018 or 004:019 or consent of instructor.

**004:011 Principles of Chemistry I** 4 s.h.
Chemical bonding and chemical reactions; atomic and molecular structure, chemical equations, stoichiometry, gases, liquids, thermodynamics of phase changes, solutions, equilibrium, acids, bases, pH, elementary organic chemistry; the solid state, including modern materials; lecture, discussion, laboratory. Prerequisite: 22M:002, or ACT math subscore of 24 and MPT II score of 20, or ACT math subscore of 24 and MPT III score of 10. Recommended: Chemistry Diagnostic Test score of 15. GE: Natural Sciences.

**004:012 Principles of Chemistry II** 4 s.h.
Continuation of 004:011; colligative properties of solutions, chemical thermodynamics, electrochemistry, chemical kinetics, chemical bonding, aspects of industrial chemistry, nuclear chemistry; lecture, discussion, laboratory. Prerequisite: 004:011. GE: Natural Sciences.

**004:016 Principles of Chemistry Lab** 2 s.h.
Laboratory techniques. Prerequisites: grades of C or higher in 004:018 and 004:019. GE: Natural Sciences.

**004:018 Chemical Science I** 3 s.h.
GE: Natural Sciences.

**004:019 Chemical Science II** 3 s.h.
GE: Natural Sciences.

**004:020 Chemical Science Laboratory** 2 s.h.

</table>
Preparation, purification, identification, analysis of chemical compounds, principally organic compounds. Prerequisites: 004:011 and 004:012, or 004:016 or 004:020; 004:121 or 004:123; and chemistry, biochemistry, or chemical engineering major. Corequisite: 004:124.

004:143 Analytical Measurements  
Modern theory and practice of laboratory methods; emphasis on experimental techniques and data analysis in spectroscopy, chromatography, electrochemistry. Prerequisite: 004:111. Corequisite: 004:112.

004:144 Physical Measurements  
Laboratory experience using advanced instrumental and computational methods to generate and analyze data relevant to modern physical chemistry. Prerequisites: 004:021 and chemistry major. Pre- or corequisite: 004:131 or 004:132.

004:153 Inorganic Chemistry Laboratory  
Preparation and characterization of a variety of inorganic, organometallic, and coordination compounds of the main group and transition elements; emphasis on synthetic techniques, methods for characterization of inorganic species. Prerequisites: 004:125, and 004:141 or 004:142; or consent of instructor.

004:162 Undergraduate Research  
Prerequisite: consent of advisor.

004:170 Advanced Inorganic Chemistry  
Modern principles, including crystal field/ligand field/molecular orbital theory, inorganic reaction mechanisms, coordination chemistry, bioinorganic chemistry, main group and transition metal organometallic chemistry, solid-state inorganic chemistry. Prerequisites: 004:125 and 004:132. Pre- or corequisite: 004:153.

004:171 Advanced Analytical Chemistry  
Emphasis on fundamental aspects of electrochemistry, atomic and molecular spectroscopy, chemical separations. Prerequisites: 004:112, 004:131, and 004:132.

004:172 Advanced Organic Chemistry  
Basic concepts from perspectives of structure, mechanism, synthesis, stereochemistry. Prerequisite: 004:122 or 004:124.

004:173 Atmospheric and Environmental Chemistry  
Fundamental chemical processes of importance in the atmosphere, soil, and water, with emphasis on kinetics and photochemistry of homogeneous and heterogeneous reactions, atmospheric structure and dynamics, global geochemical cycling, chemistry-climate relationships, environmental remediation strategies; experimental methods in field and laboratory studies. Pre- or corequisite: 004:131 or 004:132.

004:175 Introduction to Polymer Chemistry  
Synthesis, structures, characterization, properties, and applications of polymers. Prerequisites: 004:122 and 004:125.

004:191 Graduate Chemistry Orientation  
Pedagogy, safety and research issues relevant to advanced chemistry careers. Prerequisite: senior standing.

Primarily for Graduate Students

004:201 Special Topics in Inorganic Chemistry  
Repeatable. Prerequisite: 004:170.

004:202 Coordination Chemistry and Spectroscopy  
Structure and bonding of d-block metal complexes, theory and application of relevant spectroscopic methods, inorganic reaction mechanisms, transition metals in catalysis. Prerequisite: 004:170.

004:203 Organometallic Chemistry  
Emphasis on organometallic compounds of transition metal elements. Prerequisite: 004:170.

004:204 Physical Methods in Inorganic Chemistry  
3 s.h.
Application of physical methods to problems; recent developments; emphasis on magnetic resonance spectroscopy. Prerequisite: 004:170.

004:205 Bioinorganic Chemistry 2-3 s.h.
The role of metal ions in biology from an inorganic chemical perspective; emphasis on structure and mechanism for transition metal-containing metallo-enzymes. Prerequisite: 004:170 or equivalent.

004:206 Solid-State and Materials Chemistry 3 s.h.
Introduction to the chemical concepts of solid-state chemistry; focus on synthesis and characterization of various inorganic materials; structure/property relationships, real-world examples. Prerequisite: 004:170 or equivalent.

004:207 Electrochemistry 2-3 s.h.
Fundamental aspects, including mass transport and electron transfer, electrochemical methodology (e.g., voltammetry and potentiometry), determination of homogeneous and heterogeneous reaction mechanisms. Prerequisites: 004:111, 004:112, and 004:171.

004:208 Spectroscopy 3 s.h.
Principles of atomic and molecular absorption and emission spectroscopy in ultraviolet, visible, and infrared regions of the spectrum, including fluorescence, phosphorescence, Raman spectroscopy; applications to analytical problems, with emphasis on modern instrumentation and methodology. Prerequisites: 004:111, 004:112, and 004:171.

004:209 Separations 3 s.h.
Separation science; emphasis on gas and liquid chromatography, including mobile and stationary phases, instrumentation, detection, applications and sheet method, supercritical fluid chromatography, capillary electrophoresis, solid phase extraction techniques. Prerequisites: 004:111, 004:112, and 004:171.

004:210 Chemical Sensors 2 s.h.
Theory, practical limitations, analytical utility based on immobilized reagents with electrochemical, thermal, optical transduction mechanisms. Prerequisites: 004:111 and 004:112, or 004:171.

004:213 Special Topics in Analytical Chemistry arr.
Content varies. Repeatable.

004:214 Chemical Systems Modeling 2 s.h.
Basic processes and techniques; these methods applied to systems relevant to students' own research. Prerequisite: 004:111 or 004:112 or 004:171 or equivalent.

004:215 Biophotonics 3 s.h.
Structure, dynamics of biomolecules and their optical spectroscopy; ultrasensitive fluorescence spectroscopy, vibrational spectroscopy, optical activity and circular dichroism, time-resolved spectroscopy. Prerequisites: 004:111, 004:112, and 004:171.

004:220 Electrochemistry of Polymer Films 1 s.h.
Use of electrochemical methods to characterize polymer and thin films; transport through polymer films and composites, electrochemistry of polymer films. Prerequisite: physical chemistry course.

004:221 Spectroscopic Methods in Organic Chemistry 3-4 s.h.
Methods and techniques of structure determination for organic compounds. Prerequisite: 004:172 or equivalent.

004:225 Organic Chemistry Special Topics 1-3 s.h.
Prerequisite: 004:172 or equivalent.

004:228 Mechanisms of Organic Reactions 3 s.h.
Application of basic mechanistic concepts.

004:229 Advanced Organic Synthesis 3 s.h.
Preparation of complex organic compounds. Prerequisite: 004:172.

004:231 Statistical Thermodynamics I 3 s.h.
Fundamentals of classical thermodynamics and equilibria; ensembles; noninteracting systems; theory of phase transitions; Monte-Carlo methods; classical fluids; nonequilibrium systems. Prerequisite: 004:131.

The Department of Cinema and Comparative Literature presents film, literature, translation, and relations with the other arts as subjects of international and interdisciplinary study. It provides a basis for intensive work in literature, literary theory, critical methods, film studies, and the production of literary translations and film, video, and digital arts.

The department encourages study in comparative arts, with particular emphasis on cinema, where the program’s resources are especially strong. Students and faculty members have easy access to the resources of the International Writing Program and the Institute for Cinema and Culture.

The cinema and comparative literature faculty offers expertise in the languages and cultural study of the Americas, China, Croatia, England, France, Germany, India, Ireland, Italy, Japan, Russia, Spain, and Sub-Saharan Africa. Specific expertise and direction are available in translation and in film and audiovisual history, production, and theory.

In addition to its own faculty, the department calls on faculty members in other disciplines, including American studies, Asian and Slavic languages and literatures, classics, communication studies, English, French and Italian, German, history, Spanish and Portuguese, theatre arts, and women's studies.

**Undergraduate Programs**

The Department of Cinema and Comparative Literature offers a Bachelor of Arts in cinema and a Bachelor of Arts in comparative literature. It also offers a minor in cinema and a minor in comparative literature.

The majors in cinema and in comparative literature provide individualized programs in the interdisciplinary study of literature and the study and production of film and audiovisual arts. The program is designed to promote cultural awareness, to increase speaking and writing skills, and to develop capacities for systematic reasoning.

**Bachelor of Arts in Cinema**

The Bachelor of Arts in cinema requires a minimum of 120 s.h., including 33 s.h. of work for the major. Students must complete 21 s.h. in University of Iowa course work and may count a maximum of 6 s.h. of course work from another major, minor, or certificate to the B.A. in cinema. All B.A. students must complete the College of Liberal Arts and Sciences General Education Program.

The major in cinema is an individualized, interdisciplinary study of film and the production of creative work in film, video, and interactive multimedia. It is designed to promote cultural and artistic awareness, to increase speaking and writing skills, and to develop capacities for systematic reasoning and effective production in cinema arts.

All students are expected to gain a perspective on both the study and the production of film, video, or digital media while becoming acquainted with the historical, critical, and theoretical issues of the area. In conjunction with an appropriate overall curriculum, the major in cinema can offer effective preparation for continuing study or creative work in the humanities, arts, and cinema; provide a solid foundation for careers in film, video, television, and digital production; and lead to careers in arts administration, advertising, and business.

The B.A. in cinema requires the following course work.

- 048:001 Introduction to Film Analysis 3 s.h.
- 048:025 Introduction to Critical Reading and Viewing 3 s.h.
- 048:034 Modes of Film and Video Production 4 s.h.
- 048:095 Undergraduate Seminar 3 s.h.

One of these:

- 048:030 Introduction to Film Theory 3 s.h.
048:100 Introduction to Criticism and Theory 3 s.h.
048:120 Issues in Film Theory 3 s.h.

At least one film studies or film production course at the 100 level 3 s.h.
Additional cinema and comparative literature course work, including at least 9 s.h. of advanced film studies or film and video production courses numbered 048:051 or above 14 s.h.

**Bachelor of Arts in Comparative Literature**

The Bachelor of Arts in comparative literature requires a minimum of 120 s.h., including 33 s.h. of work for the major. Students must complete 21 s.h. in University of Iowa course work and may count a maximum of 6 s.h. of course work from another major, minor, or certificate to the B.A. in comparative literature. All B.A. students must complete the College of Liberal Arts and Sciences General Education Program.

The major offers two tracks: language and literature, and literature and arts. Students work with faculty advisors close to their track to develop coherent, individualized programs of study that reflect their interests and developing skills.

Students share a common set of basic courses in the literatures of widely divergent cultures and historical periods, in translation, and in interaction among the arts. All students are expected to gain an international perspective on literature and the arts, and to become acquainted with interdisciplinary approaches to cultural study.

The successful pursuit of comparative literature requires study of at least one foreign cultural tradition, with appropriate emphasis on language, literature, and the arts in historical context. Familiarity with the literatures and cultures of other nations goes hand-in-hand with theoretical inquiry and reflection on basic issues, such as the nature and value of storytelling in literature and other arts—for instance, film, song, and painting. Translation between languages and among different arts represents another basic center of theory and practice. Individual courses of study may extend into other disciplines, including history, philosophy, linguistics, anthropology, law, and psychology.

In conjunction with an appropriate overall curriculum, the major in comparative literature can offer effective preparation for professional studies in fields such as law and business, or for employment in fields that value critical thinking and international understanding. It also offers excellent preparation for graduate work in the humanities.

The B.A. in comparative literature requires the following course work.

**COMMON COURSES**

All students take these, for a total of 18 s.h.

048:025 Introduction to Critical Reading and Viewing 3 s.h.
048:040-048:041 Major Texts in World Literature I - Major Texts of World Literature II 6 s.h.
048:095 Undergraduate Seminar 3 s.h.
048:100 Introduction to Criticism and Theory 3 s.h.
Comparative literature elective(s) numbered above 048:050 3 s.h.

**Tracks**

Students take a total of 15 s.h. of work in one track.

**FOREIGN LANGUAGE AND LITERATURE TRACK**

To complete this track, students take 9 s.h. of courses in one foreign literature, read in the original language. One course in composition and conversation may count toward the major. (Language courses taken to complete the General Education Program may not be included.)

Students take an additional 6 s.h. of course work in cinema and comparative literature or a related area (e.g., English and American literature, film, linguistics, anthropology, philosophy, history) or in a second foreign literature.

**LITERATURE AND ARTS TRACK**

To complete this track, students take 12 s.h. of advanced work (100-level or above) in a single fine arts area. They may count one course in advanced performance, practice, or production toward the major, with consent of the director of undergraduate studies.

One additional 3 s.h. course must focus explicitly on arts and literature in comparative perspective.
Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

B.A. in Cinema

Note: The major in cinema requires only one course in film, video, and digital production: 048:034 Modes of Film and Video Production. This is the only production course included in the assurances of the Four-Year Graduation Plan. More advanced courses in production may be used to complete the major, but admission to these courses is limited and depends on student achievement in prerequisite production courses.

Before the third semester begins: at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: at least two courses in the major (including 048:001 Introduction to Film Analysis, and 048:025 Introduction to Critical Reading and Viewing or 048:034 Modes of Film and Video Production) and at least half of the semester hours required for graduation

Before the seventh semester begins: at least six courses in the major (including 048:001 Introduction to Film Analysis, 048:025 Introduction to Critical Reading and Viewing, and 048:034 Modes of Film and Video Production), and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: at least nine courses in the major

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

B.A. in Comparative Literature

Note: Because the major in comparative literature may require competency in a language in which the student will take advanced work, the student may need to acquire this language competency through course work early in the plan. Such course work is not reflected in these checkpoints.

Before the third semester begins: at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: at least two courses in the major and at least one-half of the semester hours required for graduation

Before the seventh semester begins: at least six courses in the major and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: at least nine courses in the major

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Honors

To graduate with honors in cinema or comparative literature, students must be members of the University of Iowa Honors Program, which requires that students maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University of Iowa Honors Program for more information). They must identify an area that extends beyond regularly offered course work and must complete a project in consultation with one or two faculty members, including the major advisor. Contact the Department of Cinema and Comparative Literature for details.

Minor in Cinema

The minor in cinema requires 15 s.h. of University of Iowa cinema courses, including at least 12 s.h. in courses numbered 048:051 and above. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass. Students must choose courses with a primary emphasis in cinema. Contact the Department of Cinema and Comparative Literature for a list of approved courses.

Minor in Comparative Literature

The minor in comparative literature requires 15 s.h. of University of Iowa comparative literature courses, including at least 12 s.h. in courses numbered 048:040 and above. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass. Students must choose courses with a primary emphasis in comparative literature. Contact the Department of Cinema and Comparative Literature for a list of approved courses.
Graduate Programs

The department offers a Master of Arts and a Doctor of Philosophy in film studies; a Master of Arts and a Doctor of Philosophy in comparative literature; a Master of Fine Arts in film and video production; and a Master of Fine Arts in translation.

Master of Arts in Film Studies

The Master of Arts in film studies requires 36 s.h. of graduate credit. The focus is on film in an international context, with required distributions of course work in U.S. cinema, European cinema, world cinemas, and film production, documentary film, animation, or experimental film.

Students meet formal degree requirements with course work and a written examination on two areas, which the student selects from one list focusing on film theory and another list focusing on film history. Exams are offered annually in January.

Master of Arts in Comparative Literature

The Master of Arts in comparative literature requires 36 s.h. of graduate credit. The focus is on literature in an international context, with concentration on two or more national literatures and on the theory and study of literature in general. In consultation with faculty advisors, students combine courses in comparative literature and allied departments to design a coherent program of study.

Students satisfy formal degree requirements with a written examination on reading lists that they and their advisors agree upon, or with a written thesis and an oral examination on the thesis and its relation to problems and issues in comparative literature. The M.A. also may be awarded upon successful completion of the comprehensive examination for the Ph.D.

Master of Fine Arts in Film and Video Production

The Master of Fine Arts in film and video production requires 54 s.h. of graduate credit earned in creative and scholarly course work aimed at producing a body of artistic work in film and/or video. A comprehensive exam on an aspect of film and/or video theory in January of the second year, an oral portfolio review, a thesis paper, and a creative thesis project complete the formal degree requirements.

Master of Fine Arts in Translation

The Master of Fine Arts in translation requires 48 s.h. of graduate credit, of which 24 s.h. must be earned at The University of Iowa. The program promotes a specialized form of writing, the study of languages and cultures, and the dissemination of international literatures through a curriculum that combines the creative, linguistic, and critical aspects of translation.

Students develop their skills, knowledge, and critical ability with courses in original-language literary texts, critical theory, and creative writing. Required participation in the Iowa Translation Workshop provides hands-on practice in translation every semester. Students also have opportunities to work closely on translation projects with visiting writers in the International Writing Program.

Course work includes study of foreign literature(s), creative writing, translation studies, and criticism. M.F.A. students may expect to take courses offered by foreign language departments and the creative writing programs as well as comparative literature courses.

M.F.A. students must complete a thesis—usually a book-length collection of poems, literary essays, or stories, or a short novel—translated from the original language into English and accompanied by a critical introduction.

Admission to the program is granted on the basis of a submitted portfolio, including translations into English and original writing in English, or a paper on a literary topic, as well as supporting evidence of competence.

Doctor of Philosophy in Film Studies

The Doctor of Philosophy in film studies requires a minimum of 72 s.h. of graduate credit earned in course work concentrated in film history and film theory. With the consultation and guidance of a faculty committee, students prepare for a qualifying examination in the first or second year, formulate and pursue a plan of study proposing areas to be mastered before the dissertation, present a predissertation exam on these areas, and write a dissertation in the area of advanced research.

Doctor of Philosophy in Comparative Literature
The Doctor of Philosophy in comparative literature requires a minimum of 72 s.h. of graduate credit. Students study at least three literatures, one in historical depth and two others in limited areas of specialization. Students are encouraged to include an interdisciplinary area of concentration. All students devote a portion of their programs to comparative study, bringing the several areas into focus. Specific areas and interrelations of areas are determined by the student in consultation with appropriate faculty members.

The Ph.D. dissertation should demonstrate the candidate's ability to write a substantial piece of scholarship or criticism. Translation of a work of sufficient significance and linguistic complexity, preceded by a critical introduction, may serve as an acceptable dissertation. The final oral exam centers on the dissertation and its background.

Admission

The study of literature across linguistic and geographical borders calls for training in languages. A thorough knowledge of at least one foreign language is required for admission to the M.A. program; knowledge of at least two foreign languages is a prerequisite for Ph.D. study.

For more information, see the procedural guide for graduate students in comparative literature, available from the department.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

Resources

Institute for Cinema and Culture

The Institute for Cinema and Culture promotes international film culture on the University of Iowa campus by supplementing the curriculum of the Department of Cinema and Comparative Literature with regular film screenings and public events, often in collaboration with other departments and programs. The institute helps departments, faculty members, and student groups present films and relevant speakers to an interdisciplinary audience. It is especially dedicated to providing Iowa students and faculty members the opportunity to view and study important films from nations and cultures otherwise underrepresented in course offerings and at local theaters.

Each semester the institute offers 048:112 Proseminar in Cinema and Culture, a course with public screenings devoted to a single national cinema or a focused topic in world film. It also regularly sponsors a range of campus film festivals and hosts the Cinematheque series, which showcases rare and unusual films each semester.

Iowa Translation Workshop

The Iowa Translation Workshop (048:260) is offered every semester as a required course for M.F.A. students in translation. The workshop is closely coordinated with the International Writing Program, which brings 30 or more writers from other countries to Iowa City each fall semester for 10 weeks of activities on the University of Iowa campus. Students in the fall Iowa Translation Workshop may work closely with one or more writers in translating their works into English. Translators from outside the M.F.A. in translation program also may join the workshop, with the instructor's consent.

### 048:011 Films and Screenplays
Films and their origins in original screenplays or adaptations; the screenplay as a distinct form of creative writing. English majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: 20th- and/or 21st-Century Literature. Same as 008:011.

### 048:012 Film and Society
Relationships between cinema and society in historical and contemporary contexts; censorship, social issues, cinematic treatment of minorities and social groups.

### 048:020 U.S. Film
American film industry; social and artistic perspectives.

### 048:021 Introduction to European Film
Major works, movements, and recent developments in European cinema; German Expressionism, Soviet montage, Italian Neorealism, French New Wave; social, cultural, political contexts. GE: Humanities.

### 048:022 World Film
Filmmaking and film culture outside the United States; key works from Asia, Africa, the Middle East, Latin America; social, cultural, political contexts.

### 048:023 Documentary Film
Key works and movements in international nonfiction film, from early cinema to present; formal, historical, philosophical issues in documentary practices.

### 048:024 Introduction to Latin American Film
Introduction to filmmaking and films in Latin America through an overview, emphasis on one or more Latin American countries, or a specific theme in Latin American cinema.

### 048:025 Introduction to Critical Reading and Viewing
Critical approaches to literature and audiovisual media (film, video, interactive multimedia); selected texts, scholarly and critical responses to them. Prerequisite: completion of rhetoric requirement.

### 048:026 Introduction to Asian Film
Introduction to filmmaking and films in Asia through an overview, emphasis on one or more Asian countries, or a specific theme in Asian cinema.

### 048:029 First-Year Seminar
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities, field trips). Prerequisite: first- or second-semester standing.

### 048:030 Introduction to Film Theory
Classical film theory--formalist and realist theories, authorship, genre; contemporary film theory--semiotics, feminism, psychoanalysis, ideological criticism, postmodernism, queer theory.

### 048:034 Modes of Film and Video Production
Introduction to nonfiction, fiction, and experimental modes of film and video production; video exercises and nonlinear editing.

### 048:040 Major Texts in World Literature I
Reading, analysis of major literary texts from writing's origins to 1600 in the Mediterranean, Asia, Africa; interrelationship of literature and history. GE: Humanities. Same as 008:040.

### 048:041 Major Texts of World Literature II
Reading and analysis of major literary texts from the 17th century to the present, in chronological sequence; emphasis on interrelationship of literature and history. Prerequisite: completion of rhetoric requirement. GE: Humanities. Same as 008:041.

### 048:050 Introduction: East European and Central Asian Cultures

Introduction to study of major East European, Russian, and Eurasian cultures. Same as 187:050.

048:051 Film Criticism 3 s.h.
Evaluation and analysis of film, from journalistic reviews to academic scholarship; principles and theoretical positions.

048:052 Gender and Film 3 s.h.
Representations of femininity, masculinity, sexual identity, how they relate to society, culture; examples from feminist, psychoanalytic, queer theory.

048:053 Introduction to Film Sound 3 s.h.
Sound as an acoustic, technological, aesthetic, and historical issue; functions of voice, music, sound effects.

048:064 Film/Video Production: Alternative Forms 3 s.h.
Hands-on workshops in video blogs, camerealess filmmaking, activist video, or similar content. Prerequisites: 048:034 and consent of instructor.

048:065 Film Production: Material of 16mm Film 3 s.h.
Basic 16mm motion picture camera, editing, and sound techniques; individual and group exercises. Prerequisite: 048:034.

048:066 Video Production: Nonfiction 3 s.h.
Single-camera shooting on location, with emphasis on editing; group exercises oriented to nonfiction forms. Prerequisite: 048:034.

048:067 Screenwriting: Long Form 3 s.h.
Visualization, sequencing, dialog; preparation of treatment, screenplay for fiction film; script problems. Prerequisite: 048:034.

048:068 Video Production: Fiction 3 s.h.
Development of fiction video making technique through group projects in the studio and on location, and nonlinear editing. Prerequisite: 048:034.

048:070 Styles and Genres 3 s.h.
Major film types (musicals, science fiction, westerns, film noir) and their cultural significance.

048:071 Film Authors 3 s.h.
A major director or comparison of directors; director's role in industrial and collaborative contexts, relations between biography and criticism, function of individual styles.

048:078 Undergraduate Translation Seminar 3 s.h.
Translation studies for undergraduates; topics related to practice of literary translation.

048:079 Undergraduate Translation Workshop 3 s.h.
Translation exercises, discussion of translation works in progress; alternative strategies for translation projects. Prerequisite: working knowledge of a language other than English. Same as 08W:079.

048:081 Film and Literature 3 s.h.
Relationships among films, novels, plays, adaptations; shared and distinct formal elements of cinematic and literary texts, their cultural functions. English majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: 20th- and/or 21st-Century Literature. Same as 008:081.

048:091 Internship arr.
Opportunity to apply skills; faculty supervision, on or off campus. Prerequisites: cinema and comparative literature major and consent of instructor.

048:095 Undergraduate Seminar 3 s.h.
Focus on a significant text or critical problem. Prerequisites: junior or senior standing and cinema and comparative literature major, or consent of instructor.

048:098 Honors Tutorial arr.

048:121 Film and Video Production: Selected Topics  
Student productions focusing on a particular genre, issue, or process; 16mm, video, or audio, such as experimental film or video, collaborative projects, nonfiction, narrative, and so forth. Prerequisite: 048:065 or 048:066 or 048:068.  3 s.h.

048:123 Film and Video Production: Image Design  
Strategies, techniques, and technologies used in moving image production; emphasis on generic lighting practices, composition; short projects using film, videotape. Prerequisite: 048:065 or 048:066 or 048:068.  3 s.h.

048:124 Film Production: Advanced 16mm Film  
Processes and approaches to the short film; students produce a seven-minute, sync-sound project, including film shooting and digital editing. Prerequisites: 048:065 or 048:121 or 048:123 or 048:134.  4 s.h.

048:125 Screenwriting: Short Form  
Exercises and projects in writing, developing, and workshopping screenplays for short film or video; budgeting, location scouting, other preproduction activities. Prerequisite: 048:065 or 048:066 or 048:067 or 048:068.  3 s.h.

048:126 Cult Films of the Last Soviet Generation  
Same as 041:126.  3 s.h.

048:128 Racial Narrative and American Performance  
Same as 010:128, 129:128.  3 s.h.

048:129 African American Cinema and Culture  
African American contribution to U.S. cinema in context of African American and American culture. Same as 045:129.  3 s.h.

048:130 Digital Production: Animation  
Intermediate 3-D modeling, motion graphics; student projects culminating in CDR or video presentation. Prerequisite: 048:034.  3 s.h.

048:131 Film/Video/Audio Production: Sound Design  
Concepts and techniques in sound design for film and video; exercises, projects in sound/image relationships using location recording equipment and digital audio workstation for editing, mixing. Prerequisite: 048:065 or 048:066 or 048:068.  3 s.h.

048:132 Video Production: Advanced Video  
Independent short video projects to enhance conceptualization, fiction and nonfiction storytelling skills, camera and editing techniques. Prerequisite: 048:066 or 048:068.  3 s.h.

048:133 Film and Video Production: Editing  
Editing digital video for impact, mood, and story; hands-on exercises, screenings, readings, and workshops using Avid and Final Cut Pro editing software. Prerequisite: 048:065 or 048:066 or 048:068.  3 s.h.

048:134 Theory and Practice of Film/Video Production  
Focus on a type of film (documentary, animation, experimental) or an issue in film theory (sound, narrative structure, point of view); application of theoretical issues; individual productions. Prerequisite: consent of instructor.  1-3 s.h.

048:135 Issues in Film and Video Production  
Proposal and grant writing, conceptualization, budgeting, and research on varied distribution models for independent films. Prerequisite: 048:065 or 048:066 or 048:067 or 048:068.  3 s.h.

048:141 Chinese Literature: Poetry  
Readings in classical and modern Chinese poetry in English translation. Same as 039:141.  3 s.h.

</table>
Contemporary written and oral African literary texts, literary theories relevant to study of African literatures. Same as 008:159, 187:159.

048:160 Issues in Rhetoric and Culture 3 s.h.
Rhetorical theory and criticism as culturally embedded practices; rhetorical production of selves and social difference; relationships between rhetoric and literature, philosophy, popular texts. Communication studies majors may apply this course to the following area requirement. AREA: Context. Prerequisites: (for 036:146) 2.60 cumulative g.p.a., 036:001, and completion of research and criticism and theory requirements. Same as 008:181, 010:160, 036:146, 160:160.

048:161 Transnational and Postcolonial Writing by Women 3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: Transnational Literature and Postcolonial Studies. PERIOD: 20th- and/or 21st-Century Literature. Same as 008:161.

048:162 Pan-Caribbean Literary Currents 3 s.h.
Twentieth-century fiction, film, and cultural practices in the Hispanic, Francophone, and Anglophone Caribbean; cultural essays to complement literary readings; pan-Caribbean cultural practices—music and carnival celebrations. Taught in English. Prerequisite: (for 048:162) junior or senior standing. Prerequisites: (for 035:171) two literature courses. Same as 035:171.

Evolving practices explored through genre, period, movement, or topic, in conjunction with relevant models of analysis; readings in English. Prerequisite: rhetoric.

048:164 Topics in Russian, East European, and Eurasian Studies arr.
Same as 041:164.

048:165 Topics in Polish Literature and Culture 3 s.h.
Major developments in Polish literature and culture; questions of Polish history, politics, and identity, and their expression in literature, the arts, and cinema; Poland's place in Europe, in national and comparative contexts.

048:166 Topics in Literature and Theory 3 s.h.

048:167 Gender and Sexuality in French Cinema 3 s.h.
Cultural, historical, semiotic approach to studying construction of gender identity and sexual codes in French cinema from 1920s to present. Taught in English. Prerequisite: 009:111 or 048:001 or 048:002 or 131:010 or consent of instructor. Same as 009:148, 131:167.

048:168 Post-Colonial Literature in France 3 s.h.
Literatures and cultures of Arabo-French (Beur) and Afro-French immigrations. Prerequisites: 009:111 and 009:112, or equivalents. Same as 009:168.

048:169 Issues in Gender and Sexuality 3 s.h.
Significance of gender and/or sexuality to cinema, in general or in a period, genre, film type, or national cinema; theoretical approaches, including feminist and queer theory.

048:170 Topics in Cinema and Culture 3 s.h.
One or more national cinemas in relation to social, historical, and cultural contexts. Prerequisite: 048:001.

048:171 Film Authors 3 s.h.
A major director or comparison of directors; theoretical approaches to study of film authorship.

048:172 Narrative and the Cinema 3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: 20th- and/or 21st-Century Literature. Same as 008:172.

048:173 Styles and Genres 3 s.h.
Film types, their cultural significance.

048:174 Transnational Chinese Cinemas 3 s.h.
Films from Mainland China, Hong Kong, Taiwan, and Chinese diasporic communities, silent era to present; relationship of film to nation-state, cultural interflows, media technologies, ideologies. English subtitles. Same as 039:173.

**048:175 Topics in Film and Literature** 3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: 20th- and/or 21st-Century Literature. Same as 008:175.

**048:176 Modes of Translation Studies** 3 s.h.
Surveys of the vast and growing number of approaches to translation studies; rhetorical, theoretical, practical, artistic, commercial, intermedial issues. Same as 160:176.

**048:177 Literature and Art** 3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: 18th- and/or 19th-Century Literature, or 20th- and/or 21st-Century Literature. Same as 008:177.

**048:178 Topics in Latin American Cinema** 3 s.h.
Taught in English. Prerequisite: one Spanish literature or culture course numbered above 035:130 or one film studies course. Same as 035:191.

**048:179 Literature and Society** 3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: 20th- and/or 21st-Century Literature. Same as 008:179.

**048:180 Literature and Translation** 3 s.h.
Translation in the broadest sense; originality, authority, authorship, accuracy, ownership, audience; issues problematizing differences between medium and message. Same as 041:180, 160:180.

**048:183 Modern Chinese Writers** 3 s.h.
Readings in modern and contemporary Chinese fiction; in English translation. Same as 039:180.

**048:184 Topics in REEES** 3 s.h.
Varied topics; interdisciplinary focus on Russian, East European, and Eurasian studies. Same as 187:185.

**048:185 Global Women's Cinema** 3 s.h.
Introduction to contemporary women's cinema and feminist filmmaking from around the world; emphasis on the post-1968 period and on cinema produced outside the United States. Prerequisite: 048:001 or 048:002 or 131:010. Same as 131:185.

**048:186 Special Topics in Literature and History** 3 s.h.
Topics at the intersection of literature, society, history, and ethics; readings vary.

**048:189 Russian Thinkers** 3 s.h.
Same as 026:184, 041:189.

**048:190 Chicano Cinema** 3 s.h.
History of Chicano independent and industry film and television production since the Chicano political and cultural movement began in the 1960s. Taught in English. Prerequisite: one Spanish literature or culture course numbered above 035:130 or one film studies course. Same as 035:190.

**048:191 Early Modern Culture** 3 s.h.
Prerequisites: (for 009:191) 009:111 and 009:112, or equivalents. Same as 009:191.

**048:192 East Meets West: A Cross-Cultural Course** 3 s.h.
Perceptions in the modern period based on analyses of films, literary and philosophical texts from East and West. Same as 039:192.

**048:195 Selected Authors** 3 s.h.
Writings by one or more authors; close readings, literary theory.
048:196 Cuban American Literature and Culture 3 s.h.
Experiences of Cuban exiles in the United States; emergence of a literature and culture based on sense of dispossession, marginality, and memory of island past. Taught in English. Prerequisite: 08G:001 or equivalent. GE: Cultural Diversity. Same as 035:143.

048:197 Techniques of Translation 3 s.h.
Prerequisite: 009:112 or consent of instructor. Same as 009:197.

048:199 Individual Study arr.
Prerequisite: advanced B.A. enrollment with international and comparative literary projects, or M.A. enrollment in comparative literature.

048:200 Advanced Film/Video Production Workshop 1-4 s.h.
Individual film, video, interactive, or screenwriting project; common problems, screenings of work in progress, criticism. Prerequisite: 048:124 or 048:132.

048:205 International Translation Workshop 1-3 s.h.
International writers pair with University of Iowa translators to write new works of poetry and fiction in English; second-language fluency not required for international writers. Same as 181:205.

048:211 Comparative Stylistics 3 s.h.
Translation from English to French, including literary texts. Same as 009:210.

048:217 Introduction to Contemporary Literary Theory 3 s.h.
How major theories construct literary text; structuralist, semiotic, psychoanalytic, Marxist, reader response, Derridian criticism. Taught in English. Same as 035:281.

048:223 Romantic Literature 3 s.h.
Same as 008:223.

048:233 Seminar in Chinese Fiction 3 s.h.
Novels, novelettes; 16th to 18th centuries (Ming and Qing periods). Prerequisite: ability to read original texts. Same as 039:240.

048:234 Readings in South Asian Literature 3 s.h.
Same as 008:234.

048:239 Queer Theory 3 s.h.
Same as 008:239.

048:244 Crossing Borders Proseminar 1 s.h.

048:247 Crossing Borders Seminar 2-3 s.h.

048:250 Writing About Cinema 1-3 s.h.
Directed research, writing, revision of graduate work in film studies.

048:259 Issues in Translation 3 s.h.
Contemporary and historical theories.

048:260 Translation Workshop 3 s.h.
Prerequisites: at least one foreign language and consent of instructor. Same as 08W:260, 181:260.

048:270 Seminar Issues in the History of Translation 3 s.h.
Selected readings, current debate on translation's history and theory. Same as 08W:265.

Classics

Classics is the study of ancient languages, literatures, and cultures of the Mediterranean basin from approximately 2000 B.C.E. to 600 C.E. It embraces three civilizations—the Minoan-Mycenaean, Greek, and Roman; two languages—Greek and Latin; and a geographical area including Europe, North Africa, Egypt, and the Near East. The Department of Classics provides a basis for understanding and interpreting the contribution of the ancient world to life in the present and the future.

Undergraduate Programs

The department offers a Bachelor of Arts in ancient civilization and in classical languages (Greek and/or Latin). Both majors provide a solid foundation for graduate study in classics, European literature, law, history, art, philosophy, and religion. Graduates have become secondary school and university teachers, lawyers, doctors, librarians, museum curators, and bankers.

The department also offers minors in ancient civilization, classical languages, Greek, and Latin.

Bachelor of Arts in Classical Languages

The Bachelor of Arts in classical languages requires a minimum of 120 s.h., including at least 36 s.h. of work for the major. The program trains students to read the ancient Greek and/or Latin languages and acquaints them with the major works of Greek and/or Roman literature.

Students learn about the history of ancient Greece of the eighth through the fourth centuries B.C.E., where most of the modern Western notions of political, artistic, and social life are rooted. They also develop an understanding of the Roman Republic and Empire, when Rome established its hegemony over the Mediterranean basin, laid the foundation of law for the Western World, and spread Greece's culture to the West.

The major requires the following course work. Transfer credit is evaluated on an individual basis. Students must complete the College of Liberal Arts and Sciences General Education Program.

Intermediate or advanced Greek and/or Latin courses (20G:011 through 20G:199, 20L:011 through 20L:199) 18 s.h.
Greek or Latin prose composition (20G:176 or 20L:171) 3 s.h.
Additional Department of Classics courses at any level, with no more than 9 s.h. in 20E courses 15 s.h.

The advanced undergraduate Greek courses 20G:120 Archaic and Classical Periods I and 20G:121 Archaic and Classical Periods II, and 20G:122 Classical and Hellenistic Periods I and 20G:123 Classical and Hellenistic Periods II are offered every other year and may be repeated or taken in any sequence. They cover a broad range of prose and poetry in historical context.

The advanced undergraduate Latin courses 20L:120 Latin Literature of the Republic I and 20L:121 Latin Literature of the Republic II, and 20L:122 Latin Literature of the Empire I and 20L:123 Latin Literature of the Empire II are offered every other year and may be repeated or taken in any sequence. They cover a range of Latin prose and poetry in historical context from the mid-Republic to the third century C.E.

To comply with the Board of Regents, State of Iowa policy on student outcomes assessment, the Department of Classics has established a method to assess the achievement level of B.A. students completing one of the department's majors. Every student maintains a portfolio that details his or her progress in attaining the objectives of the major. The student submits the portfolio to the undergraduate advisor by midterm of the semester in which the student intends to graduate. Formal approval of the portfolio is required for graduation. Consult the undergraduate advisor for details.

B.A. with Teacher Licensure in Latin

For information about Teacher Education Programs and licensure, contact the Office of Teacher Education and Student Services in the College of Education; see Education in the Catalog.
Bachelor of Arts in Ancient Civilization

The Bachelor of Arts in ancient civilization requires a minimum of 120 s.h., including at least 30 s.h. of work for the major. The program is sponsored by the Departments of Classics, History, and Religious Studies and the School of Art and Art History. It concentrates on the ancient civilization of the Mediterranean world, draws on courses offered by various University departments, and allows students to create individual programs.

Although the major is not preparation for graduate study in classics, it provides a sound basis for preparing teachers at the secondary school and junior college levels. It also provides a sound liberal arts and sciences basis for preprofessional training in law, medicine, and other professions.

The major requires the following course work. At least 15 of the required 30 s.h. must be earned in advanced work (20E courses at the 100 level, and Latin and Greek language courses numbered 20G:011 and 20G:012, or 20L:011 and 20L:012, or above). Transfer credit is evaluated on an individual basis. Students must complete the College of Liberal Arts and Sciences General Education Program.

Ancient art 6 s.h.
Ancient history 6 s.h.
Ancient philosophy or religion 6 s.h.
Classics, may be 20E courses or Latin or Greek language courses 9 s.h.
Appropriate courses in art, history, philosophy, religion, or linguistics 3 s.h.

To comply with the Board of Regents, State of Iowa policy on student outcomes assessment, the Department of Classics has established a method to assess the achievement level of B.A. students completing one of the department's majors. Every student maintains a portfolio that details his or her progress in attaining the objectives of the major. The student submits the portfolio to the undergraduate advisor by midterm of the semester in which the student intends to graduate. Formal approval of the portfolio is required for graduation. Consult the undergraduate advisor for details.

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

B.A. in Ancient Civilization

Before the third semester begins: at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: at least two courses in the major and at least one-half of the semester hours required for graduation

Before the seventh semester begins: at least six courses in the major and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: at least eight courses in the major

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

B.A. in Classical Languages: Greek and Latin

Before the third semester begins: 20L:001 Elementary Latin I and 20L:002 Elementary Latin II, or 20G:001 Classical and New Testament Greek I and 20G:002 Classical and New Testament Greek II; and at least one-quarter of the semester hours required for graduation

Before the seventh semester begins: sixth semester of Latin and fourth semester of Greek, or sixth semester of Greek and fourth semester of Latin, two more courses in the major, and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: enrollment in at least two or three additional courses in the major

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education
courses, and a sufficient number of semester hours to graduate

**B.A. in Classical Languages: Greek Only**

**Before the third semester begins:** 20G:001 Classical and New Testament Greek I, 20G:002 Classical and New Testament Greek II, and at least one-quarter of the semester hours required for graduation

**Before the fifth semester begins:** 20G:011 Second-Year Greek I, 20G:012 Second-Year Greek II, and at least one-half of the semester hours required for graduation

**Before the seventh semester begins:** three or four more courses in the major and at least three-quarters of the semester hours required for graduation

**Before the eighth semester begins:** two or three more courses in the major

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

**B.A. in Classical Languages: Latin Only**

**Before the third semester begins:** 20L:001 Elementary Latin I, 20L:002 Elementary Latin II, and at least one-quarter of the semester hours required for graduation

**Before the fifth semester begins:** 20L:011 World of Cicero, 20L:012 Golden Age of Roman Poetry, and at least one-half of the semester hours required for graduation

**Before the seventh semester begins:** three or four more courses in the major and at least three-quarters of the semester hours required for graduation

**Before the eighth semester begins:** two or three more courses in the major

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

**Honors**

Membership in the University of Iowa Honors Program requires that students maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University of Iowa Honors Program for more information). Classics seniors who are members of the Honors Program and who have attained a g.p.a. of at least 3.50 in their first three years of classics courses may graduate with honors in classical languages or ancient civilization by completing two courses in honors reading, one each semester of the senior year, for 3 s.h. of credit each. The readings and discussions are on an ancient author or a field in ancient history or literature chosen by students and the instructor. At the end of the second semester, students present a long paper, which is read and judged for honors by two members of the department. Students who write an honors thesis in classical languages must be enrolled at the same time in the appropriate advanced language courses.

**Minor in Ancient Civilization**

The minor in ancient civilization requires a minimum of 15 s.h., including at least 12 s.h. in advanced courses taken at The University of Iowa. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass. A maximum of 6 s.h. of work for another University of Iowa major, minor, or certificate and up to 3 s.h. of lower-level transfer credit may be counted toward the minor.

Department of Classics courses in Greek numbered 20G:011 Second-Year Greek I or above and in Latin numbered 20L:011 World of Cicero or above are considered advanced for the minor in ancient civilization. Appropriate courses in art, religion, history, and philosophy may be counted toward the minor in ancient civilization, if approved by the undergraduate advisor. Students who have taken high school Greek or Latin should consult the advisor.

**Minor in Classical Languages**

The minor in classical languages requires a minimum of 18 s.h., including 12 s.h. in advanced courses taken at The University of Iowa. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass. Students may count one relevant classics department course taught in English (prefix 20E) toward the minor. A maximum of 6 s.h. of work for another University of Iowa major, minor, or certificate and up to 3 s.h. of lower-level transfer credit may be counted toward the minor.

The sequences 20G:011 Second-Year Greek I and 20G:012 Second-Year Greek II, 20L:011 World of Cicero and 20L:012 Golden Age of Roman Poetry, and Department of Classics courses numbered 100 and above are considered advanced for the minor in classical languages. Students may satisfy the requirements for the minor by completing 20G:011 Second-Year Greek I and 20G:012 Second-Year Greek II, 20L:011 World of Cicero and 20L:012 Golden Age...
of Roman Poetry, plus two 100-level courses, one of which may be a relevant 20E course in Greek or Roman history, culture, or literature. For a list of relevant courses, contact the undergraduate advisor. Students who have taken high school Greek or Latin should consult the advisor.

**Minor in Greek**

The minor in Greek requires a minimum of 15 s.h., including at least 12 s.h. in advanced courses taken at The University of Iowa. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass. Students may count one relevant classics department course taught in English (prefix 20E) toward the minor. A maximum of 6 s.h. of work for another University of Iowa major, minor, or certificate and up to 3 s.h. of lower-level transfer credit may be counted toward the minor.

The sequence 20G:011 Second-Year Greek I and 20G:012 Second-Year Greek II, and Department of Classics courses numbered 100 and above are considered advanced for the minor in Greek. Students may satisfy the requirements for the minor by completing 20G:011 Second-Year Greek I and 20G:012 Second-Year Greek II plus two 100-level courses, one of which may be a relevant 20E course in Greek history, culture, or literature. For a list of relevant courses, contact the undergraduate advisor. Students who have taken high school Greek should consult the advisor.

**Minor in Latin**

The minor in Latin requires a minimum of 15 s.h., including at least 12 s.h. in advanced courses taken at The University of Iowa. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass. Students may count one relevant classics department course taught in English (prefix 20E) toward the minor. A maximum of 6 s.h. of work for another University of Iowa major, minor, or certificate and up to 3 s.h. of lower-level transfer credit may be counted toward the minor.

The sequence 20L:011 World of Cicero and 20L:012 Golden Age of Roman Poetry, and Department of Classics courses numbered 100 and above are considered advanced for the minor in Latin. Students may satisfy the requirements for the minor by completing 20L:011 World of Cicero and 20L:012 Golden Age of Roman Poetry plus two 100-level courses, one of which may be a relevant 20E course in Roman history, culture, or literature. For a list of relevant courses, contact the undergraduate advisor. Students who have taken high school Latin should consult the advisor.

**Language for Nonmajors**

Nonmajors who wish to study Greek or Latin and who have background in either language should take either the Greek Foreign Language Placement Test or the Latin Foreign Language Placement Test, offered during summer orientation programs and monthly by Evaluation and Examination Service. The tests help determine the level at which a student should begin Greek or Latin language study at The University of Iowa.

Students who want to fulfill the College of Liberal Arts and Sciences General Education Program foreign language requirement by studying Greek should take 20G:001 Classical and New Testament Greek I, 20G:002 Classical and New Testament Greek II, 20G:011 Second-Year Greek I, and 20G:012 Second-Year Greek II. Students must complete all four courses to fulfill the General Education Program requirement.

**Postbaccalaureate Certificate in Classics**

The Postbaccalaureate Certificate in Classics requires 18 s.h. in Department of Classics courses numbered 100 and above (upper-level and graduate courses). The program is designed for students who have a baccalaureate and wish further study in Greek and Latin in order to be competitive for admission to a graduate program in classics. Entry to most graduate programs requires study of both Latin and Greek, normally a minimum of three years in one language and two years in the other.

The certificate is designed to be completed in two semesters by students who enter with two years of Latin and one to two years of Greek, or vice versa. It requires 18 s.h. in Department of Classics courses numbered 100 or above (upper-level and graduate courses), including at least 12 of the required 18 s.h. must be earned in Greek and Latin language courses. The remaining 6 s.h. may be earned in approved advanced 20E courses. Transfer credit is not
accepted toward the certificate. Students must maintain a g.p.a. of at least 3.00 to remain in good standing and complete the program.

A suggested plan of study for a student who enters the program with two years of Latin and one year of Greek is as follows.

Fall semester:
20E:198 Postbaccalaureate Seminar 0 s.h.
20G:011 Second-Year Greek I 3 s.h.
20L:120 Latin Literature of the Republic I 3 s.h.
20L:171 Elementary Latin Composition 3 s.h.

Spring semester:
20G:012 Second-Year Greek II 3 s.h.
20L:121 Latin Literature of the Republic II 3 s.h.
One elective with prefix 20E, 20G, or 20L numbered 100 or above 3 s.h.

A suggested plan of study for a student who enters the program with two years of Latin and two years of Greek is as follows.

Fall semester:
20E:198 Postbaccalaureate Seminar 0 s.h.
20G:120 Archaic and Classical Periods I 3 s.h.
20L:120 Latin Literature of the Republic I 3 s.h.
20L:171 Elementary Latin Composition 3 s.h.

Spring semester:
20G:121 Archaic and Classical Periods II 3 s.h.
20L:121 Latin Literature of the Republic II 3 s.h.
One elective with prefix 20E, 20G, or 20L numbered 100 or above 3 s.h.

Students who complete the program successfully receive a certificate from the College of Liberal Arts and Sciences and a letter from the Department of Classics.

Admission

Applicants must have a baccalaureate degree from an accredited college or university and a minimum of two years of language study (two years of Latin or two years of Greek, or one year of each). In unusual circumstances, students with less language preparation may be admitted.

Applicants who are not enrolled in a graduate or professional program may apply to The University of Iowa as undergraduate transfer students; they must state on their application that they are applying to the College of Liberal Arts and Sciences for admission to the classics postbaccalaureate certificate program. They must submit transcripts confirming preparation for certificate language study, a statement of purpose, scores on the Graduate Record Examination (GRE) General Test, a writing sample, and three letters of recommendation from faculty members at their baccalaureate institution.

Graduate Programs

The department offers a Master of Arts in classics, Greek, and Latin; and a Doctor of Philosophy in classics.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

Master of Arts

The Master of Arts in classics, Greek, or Latin requires a minimum of 30 s.h. in courses numbered 101 and above. Students may count a maximum of 12 s.h. earned in courses numbered 101-199 toward the degree. Courses taken to compete the Postbaccalaureate Certificate in Classics do not count toward the degree.

Students must pass a sight examination in the language(s) studied and an examination on literature and history.
Doctor of Philosophy

The Doctor of Philosophy in classics requires a minimum of 72 s.h. of graduate credit, including the courses listed below (27 s.h.). Students may count no more than 12 s.h. earned in courses numbered 101-199 toward the degree. Courses taken to complete the Postbaccalaureate Certificate in Classics may not be counted toward the degree.

Students also must take precomprehensive and comprehensive examinations and write a dissertation.

REQUIRED COURSES

20G:176 Greek Composition (or equivalent) 3 s.h.
20G:204 Archaic Greek Literature 3 s.h.
20G:205 Classical and Hellenistic Literature 3 s.h.
20L:204 Republican Literature 3 s.h.
20L:205 Imperial Literature 3 s.h.
20L:272 Advanced Latin Composition (or equivalent) 3 s.h.
Two graduate-level courses in cognate subjects such as anthropology, art history, linguistics, philosophy, or rhetoric 6 s.h.
Other interdisciplinary courses (with approval of the graduate advisor)

The remaining course work is made up of Department of Classics and other courses.

PH.D. EXAMINATIONS

Ph.D. students must take precomprehensive exams in Latin sight reading and Greek sight reading and must attempt one sight reading exam by the end of their first year of graduate study. Competence in reading both German and French must be demonstrated by the end of the second year of study.

Students must take the second-year exam at the end of their second year. The remaining exams may be taken in any sequence. Students must file a request for the fourth-year comprehensive exam at least three weeks before the date of the exam.

Sight-Reading Exam

Latin: four hours, written
Greek: four hours, written

Second-Year Exam

Literature and history: four hours, written

Fourth-Year Comprehensive Exam

Greek and Roman history/material culture based on reading list: three hours, written
Latin literature, based on reading list: three hours, written
Greek literature, based on reading list: three hours, written
If a student performs unsatisfactorily on either or both of the Latin and Greek reading list exams, the director of graduate studies sets up an oral exam in order to review questions on which the student did not exhibit sufficient knowledge.

Special field or author (Greek): four hours, written
Special field or author (Latin): four hours, written

Facilities

The University of Iowa Main Library and the Art Library house extensive collections of classical texts and uninterrupted runs of classical periodicals from 1850 that facilitate research in the major areas of Greek and Roman civilization. The Department of Classics has a varied collection of slides on classical subjects and a small library of reference works, texts, and issues of classical and archaeological journals. The department's classical museum contains a small collection of coins, vases, and facsimiles in bronze from Mycenae, Pompeii, and Herculaneum.
The University is a supporting institution of the American School of Classical Studies at Athens, the American Academy in Rome, and the Intercollegiate Center for Classical Studies in Rome. Consult the director of undergraduate studies for more information.

The department offers students the opportunity to participate in an archaeological dig during the summer. Contact the Department of Classics in mid-February for details.

**Classics Courses**

**Classics in English for Undergraduates**

All readings for these courses are in English except Sanskrit courses 20E:110 First-Year Sanskrit: First Semester, 20E:111 First-Year Sanskrit: Second Semester, 20E:121 Second-Year Sanskrit: First Semester, and 20E:122 Second-Year Sanskrit: Second Semester; no previous knowledge of Greek or Latin is necessary.

20E:009 **Classics and Cinema** 3 s.h.
Cinematic depictions of the classical world compared with scholarly views; selected films and primary ancient sources of the same period.

20E:014 **Hero, God, Mortal: Literature of Greece** 3 s.h.
Ancient Greek literature and culture as it responded to Homer; may include genre (e.g., epic to tragedy), religion, changing concept of hero, interaction with Mediterranean cultures, myth versus history. GE: Foreign Civilization & Culture, Humanities.

20E:015 **Love and Glory: Literature of Rome** 3 s.h.
Main themes and works of ancient Roman literature; works reflecting conflict of personal desire and public self in Rome. GE: Foreign Civilization & Culture, Humanities.

20E:020 **Greek and The New Testament** 3 s.h.
Cultural history and intellectual tradition of the Greek-speaking eastern Mediterranean to explore why early Christians chose to preserve New Testament writings in Greek.

20E:026 **Introduction to Ancient Art** 3 s.h.
Art and architecture of the Mediterranean world ca. 3500 B.C.E. to death of Constantine (337 C.E.); Egyptian, Cycladic, Minoan, Mycenaean, Greek, Etruscan, and Roman cultures; artistic responses to life and death; impact of breakthroughs in technology and engineering on visual culture; role of art in empire building; interrelationships of art, politics, religion. Prerequisite: 01H:005 or consent of instructor. Same as 01H:026.

20E:029 **First-Year Seminar** 1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Prerequisite: first or second-semester standing.

20E:030 **Greek Civilization** 3 s.h.
History, literature, art, architecture, religion, social life ca. 3000 B.C.E. to second century B.C.E. GE: Historical Perspectives.

20E:031 **Roman Civilization** 3 s.h.
History, literature, politics, religion, social structure from eighth century B.C.E. to second century C.E. GE: Historical Perspectives.

20E:050 **Word Power: Building English Vocabulary** 3 s.h.
Analysis of unfamiliar English words through knowledge of the history and meaning of word parts. English majors may apply this course to the following area and/or period requirement. PERIOD: 20th- and/or 21st-Century Literature. Prerequisite: one semester of rhetoric. Same as 08N:050.

20E:051 **Word Power II: Building English Vocabulary--Advanced** 3 s.h.
Continuation of 20E:050; vocabulary building through additional Latin and Greek bases; vocabulary recognition through analysis of Greek and Latin elements of English words; how words change over time. Prerequisite: 20E:050.

20E:071 **Middle East and Mediterranean, Alexander to Suleiman** 3 s.h.

20E:075 **Ancient Sports and Leisure**  
Sports, games, and hobbies in the ancient world, primarily Greece and Rome, 1500 B.C.E. to 500 C.E.; ancient Olympic games, Roman festival games; anthropology of sport.  
3 s.h.

20E:076 **The Olympics: Ancient and Modern**  
Origins and development of the ancient and modern Olympics; the Olympic spirit, political and religious contexts, and athletics through literature and material culture. Same as 028:072.  
3 s.h.

20E:090 **Education in Classical Antiquity**  
Education in the Greek and Roman worlds from Homer into late antiquity.  
3 s.h.

### Classics in English for Undergraduate and Graduate Students

All of these, except the Sanskrit courses, are taught in English.

20E:101 **Ancient Egypt and the Ancient Near East**  
Same as 16E:101.  
3 s.h.

20E:103 **Medical and Technical Terminology**  
Memorization of word stems and basic medical terms, practice on computer terminal; no formal classes.  
2 s.h.

20E:106 **Warfare in Ancient Mediterranean Society**  
Same as 16E:106.  
3 s.h.

20E:109 **Women in Antiquity**  
Attitudes toward women and the role of women in ancient Greek and Roman society; ancient authors, male and female, and modern critics. Same as 131:109.  
3 s.h.

20E:110 **First-Year Sanskrit: First Semester**  
Grammar, basic vocabulary; elementary readings. Offered fall semesters of even years. Prerequisite: undergraduate standing. GE: Foreign Language First Level Proficiency. Same as 039:110.  
4 s.h.

20E:111 **First-Year Sanskrit: Second Semester**  
Readings in epic and story literature. Offered spring semesters of odd years. Prerequisites: 039:110 and undergraduate standing. GE: Foreign Language Second Level Proficiency. Same as 039:111.  
4 s.h.

20E:112 **Classical Mythology**  
Ancient Greek and Roman myths, their interpretation by Western civilization; emphasis on flexibility of myth and its importance for art, literature, anthropological, psychological studies. GE: Humanities. Same as 008:125.  
3 s.h.

20E:113 **Middle Egyptian I**  
Introduction to the language (c. 2200-1350 B.C.E.) and script (hieroglyphics) of ancient Egypt.  
3 s.h.

20E:114 **Middle Egyptian II**  
Continuation of 20E:113; introduction to the language (c. 2200-1350 B.C.E.) and script (hieroglyphics) of ancient Egypt. Prerequisite: 20E:113.  
3 s.h.

20E:115 **Greek Religion and Society**  
From Bronze Age to the Hellenistic period, in context of Mediterranean culture; evidence such as choral hymn, inscribed prayers, magical curses inscribed on lead, architecture, sculpted offerings to the gods. GE: Humanities. Same as 032:164.  
3 s.h.

20E:117 **Concepts of the City: Rome**  
Physical and cultural development of the city of Rome from early republic to emperor Constantine and rise of Christianity in fourth century C.E.  
3 s.h.
20E:118 Greek Archaeology and Ethnohistory 3 s.h.
Archaeology and ethnology of the Greek world, from end of Bronze Age to late Roman Empire; sociocultural processes that influence development and persistence of Greek civilization. Prerequisite: 113:012 or 113:013 or consent of instructor. Same as 113:192.

20E:119 Roman Archaeology 3 s.h.
Archaeology and ethnology of Roman civilization from Iron Age eighth-century occupation of the Palatine Hill to the end of the Roman empire in the West, A.D. 476. Prerequisite: 113:012 or 113:013 or consent of instructor. Same as 113:194.

20E:120 Concepts of the City: Athens 3 s.h.
Athens from Bronze Age to present; city’s role in development of political democracy and religion.

20E:121 Second-Year Sanskrit: First Semester 3 s.h.
Readings in epic and puranic texts. Offered fall semesters of odd years. Prerequisites: 039:111 or consent of instructor, and undergraduate standing. GE: Foreign Language Second Level Proficiency. Same as 039:112.

20E:122 Second-Year Sanskrit: Second Semester 3 s.h.
The Bhagavadgita and related religious/philosophical texts. Offered spring semesters of even years. Prerequisites: 039:112 or consent of instructor, and undergraduate standing. GE: Foreign Language Fourth Level Proficiency. Same as 039:113.

20E:124 Classical Greek Art 3 s.h.
Art, sacred architecture from early Classical through late fourth century B.C.E.; Athens in the Golden Age. Prerequisite: 01H:005 or 01H:026 or consent of instructor. Same as 01H:127.

20E:128 Art of Early Rome: Patrons and Politics 3 s.h.
Art and architecture of Roman Italy and provinces from late Caesar Republic through reign of Hadrian, 80 B.C.E.-138 C.E. Prerequisite: 01H:005 or 01H:026 or consent of instructor. Same as 01H:132.

20E:129 Art and Culture in Ancient Pompeii 3 s.h.
Art and architecture, as documents of ancient society and religion in towns destroyed by Mount Vesuvius in C.E. 79. Prerequisite: 01H:005 or 01H:026 or consent of instructor. Same as 01H:134.

20E:130 Later Roman Art 3 s.h.
Art and architecture of late imperial Rome and the provinces, from the Antonines through Constantine, C.E. 138-337. Prerequisite: 01H:005 or 01H:026. Same as 01H:133.

20E:133 Advanced Topics in Mythology 3 s.h.
In-depth exploration of issues in mythology raised in 20E:112; theories of myth, comparative mythology, reception of myth; experience applying methodologies and approaches to specific myths or clusters of myths in Greco-Roman and world traditions. Prerequisite: 20E:112 or equivalent.

20E:136 Food in Ancient Mediterranean Society 3 s.h.
Practices and values influenced by consumption and production of food in ancient Mediterranean societies; varied topics, including methods of food production and distribution, hierarchies of status as associated with food, food and ethnic identity, food and health, food and religion; focus on classical Greek and Roman society, also Egypt, the ancient Near East, and Persia; group presentations, several short papers, research project. Recommended: familiarity with Greek and Roman civilization and history. Same as 16E:102.

20E:140 Magic in the Ancient World 3 s.h.
Ancient Greek and Roman writings on magic, including ancient spells and charms. Prerequisite: completion of rhetoric requirement.

20E:141 Studies in Latin Literature 3 s.h.
In-depth look at specific authors or genres, as indicated in the subtitle, focusing on Latin literary texts from second century B.C.E. to fifth century C.E. and the post-antique reception of those texts. Taught in English.

20E:150 Gender and Sexuality in the Ancient World 3 s.h.
Survey of gender and sexuality issues in the social, political, and religious life of ancient Greece and Rome; evidence from literature, the visual arts, archaeology. Prerequisites: completion of rhetoric requirement and sophomore standing. GE: Foreign Civilization & Culture. Same as 131:152, 154:121.

20E:180 Teaching in the Classics 3 s.h.
Instructional approaches and issues in teaching ancient language and civilization at secondary and college levels. Prerequisite: 20G:002 or 20L:002 or equivalent or consent of instructor.

20E:190 Honors Readings arr.
Discussion, readings, research for a paper on ancient civilization. Prerequisite: ancient civilization major.

20E:196 The Archaeology of Ancient Egypt 3 s.h.
Introduction to the archaeology of ancient Egypt from predynastic times to Roman Egypt, including monumental architecture; patterns of everyday life; social, economic, and demographic considerations; history of archaeology in Egypt. Prerequisite: 113:012 or consent of instructor. Same as 113:196.

20E:198 Postbaccalaureate Seminar 0 s.h.
Current work of postbaccalaureate students; preparation of writing sample and portfolio. Prerequisite: postbaccalaureate certificate enrollment.

20E:199 Private Assignments arr.
Readings in classical literature in translation.

Classics in English for Graduate Students

20E:201 Topics in Comparative Romance Linguistics 3 s.h.
Comparative study of phonology, morphology, or syntax of the main Romance languages as informed by linguistic theory; diachronic or synchronic perspective. Repeatable. Prerequisite: 035:204 or equivalent. Recommended: additional graduate course work in linguistics. Same as 035:207, 103:262, 164:262.

20E:220 Proseminar in Classics 1 s.h.
Texts, techniques, and trends in classical scholarship; areas and subtopics of classical scholarship.

20E:230 Classical Rhetoric 3 s.h.
Discourse in the ancient world. Same as 008:267, 010:301, 036:310.

Greek for Undergraduates

20G:001 Classical and New Testament Greek I 5 s.h.
Introduction to ancient Greek; Greek readings from all periods, from Homer and classical Greek poetry and prose to Christian writings and beyond; focus on classical and New Testament works, Greek culture and thought; comprehension, vocabulary, structure of Greek words and sentences; first of two-semester sequence. GE: Foreign Language First Level Proficiency.

20G:002 Classical and New Testament Greek II 5 s.h.
Continuation of 20G:001; focus on classical and New Testament works, Greek culture and thought, comprehension, vocabulary, structure of Greek words and sentences; increased emphasis on original texts. Prerequisite: 20G:001. GE: Foreign Language Second Level Proficiency.

20G:011 Second-Year Greek I 3 s.h.
Focus on reading Greek prose authors, such as Xenophon and Plato. Prerequisite: 20G:002 or equivalent. GE: Foreign Language Second Level Proficiency.

20G:012 Second-Year Greek II 3 s.h.
Continuation of 20G:011; focus on reading and interpretation of Greek poetry. Prerequisite: 20G:011. GE: Foreign Language Fourth Level Proficiency.
### Greek for Undergraduate and Graduate Students

**20G:120 Archaic and Classical Periods I**  
Readings in major Greek authors of the Archaic and Classical periods. Prerequisites: 20G:012 or equivalent, and consent of instructor.  

**20G:121 Archaic and Classical Periods II**  
Continuation of 20G:120. Prerequisite: 20G:012 or equivalent.  

**20G:122 Classical and Hellenistic Periods I**  
Readings in Greek literature of the Classical and Hellenistic periods. Prerequisite: 20G:012 or equivalent or consent of instructor. Same as 032:122.  

**20G:123 Classical and Hellenistic Periods II**  
Continuation of 20G:122. Prerequisite: 20G:012 or equivalent. Same as 032:123.  

**20G:176 Greek Composition**  
Review of Greek morphology, syntax, sentence structure; composition of sentences, short passages in Greek.  

**20G:190 Honors Readings**  
Discussion, readings, research for a paper on Greek literature, history, or civilization. Prerequisite: classical languages major.  

**20G:199 Private Assignments**  
Directed reading and study with faculty member.  

### Greek for Graduate Students

Courses numbered 20G:222 Archaic Poetry and 20G:223 Hellenistic Literature cover topics from the major genres and periods of Greek literature. They are offered on a four-year cycle.  

Courses numbered 20G:222 Archaic Poetry, 20G:223 Hellenistic Literature, and 20G:228 Classical Greece cover authors, genres, and topics of the major periods of Greek history. Specific topics are determined by the instructor's expertise and research interests. Ph.D. students are exposed to topics in all major periods at least once in four years of course work.  

**20G:202 Advanced Reading**  
Prerequisite: classics graduate standing.  

**20G:204 Archaic Greek Literature**  
Introductory survey of Greek literature and language from Homer to end of the fifth century.  

**20G:205 Classical and Hellenistic Literature**  
Introductory survey of Greek literature and language in and after the fourth century B.C.E.  

**20G:222 Archaic Poetry**  
Topics chosen from Homer, Hesiod, Homeric hymns or lyric poetry. Repeatable.  

**20G:223 Hellenistic Literature**  
Authors, genres, and topics from the death of Alexander to the accession of Augustus. Repeatable.  

**20G:228 Classical Greece**  
Authors, genres, and topics from the fourth and fifth centuries B.C.E. Repeatable.  

**20G:229 Roman Greece**  
Greek authors of the Second Sophistic, including Plutarch, Lucian, and Philostratus; seminar.
20G:291 Greek Thesis
For Ph.D. students writing a dissertation. Repeatable. Prerequisite: Ph.D. candidacy.

Latin for Undergraduates

20L:001 Elementary Latin I
Focus on reading Latin and on Roman culture. GE: Foreign Language First Level Proficiency.

20L:002 Elementary Latin II

20L:005 Accelerated Latin

20L:011 World of Cicero
Focus on reading Latin prose authors, such as Caesar and Cicero. Prerequisite: 20L:002 or two years of high school Latin. GE: Foreign Language Second Level Proficiency.

20L:012 Golden Age of Roman Poetry
Focus on reading and interpretation of Roman poets, such as Vergil and Catullus. Prerequisite: 20L:011 or equivalent. GE: Foreign Language Second Level Proficiency.

Latin for Undergraduate and Graduate Students

20L:120 Latin Literature of the Republic I
Prose or poetry by major authors of the republic. Prerequisite: 20L:012 or equivalent.

20L:121 Latin Literature of the Republic II
Continuation of 20L:120. Prerequisite: 20L:012 or equivalent.

20L:122 Latin Literature of the Empire I
Prose or poetry by major authors of the empire. Prerequisite: 20L:012 or equivalent.

20L:123 Latin Literature of the Empire II
Continuation of 20L:122. Prerequisite: 20L:012 or equivalent.

20L:171 Elementary Latin Composition
Review of Latin morphology, syntax, sentence structure; composition of sentences, short passages in Latin.

20L:190 Honors Readings
Discussions, readings, research for a paper on Roman literature, history, or civilization. Prerequisite: classical languages major.

20L:199 Private Assignments
Directed reading and study with faculty member for advanced students.

Latin for Graduate Students

Courses numbered 20L:222 Augustan Poetry through 20L:225 cover topics from the major genres and periods of Latin literature. They are offered on a four-year cycle.

Courses numbered 20L:220 Republican Rome, 20L:228 Late Roman Empire, and 20L:229 High Empire cover authors,
genres, and topics of the major periods of Roman history. Specific topics are determined by the instructor’s expertise and research interests. Ph.D. students are exposed to topics in all major periods at least once in four years of course work.

Communication Sciences and Disorders

Chair: Paul J. Abbas

Professors: Paul J. Abbas (Communication Sciences and Disorders/Otolaryngology—Head and Neck Surgery), Ruth A. Bentler, Carolyn Jane Brown (Communication Sciences and Disorders/Otolaryngology—Head and Neck Surgery), Kate E. Gelfer (Music/Communication Sciences and Disorders), Richard R. Hurtig (Starch Faculty Fellow), Karen Kirk, Karla K. McGregor, Ingo R. Titze (Communication Sciences and Disorders/Music, UI Foundation Distinguished Professor), J. Bruce Tomblin (Communication Sciences and Disorders/Otolaryngology—Head and Neck Surgery, Spiers/Spiers-Starch Professor), Chris W. Turner (Communication Sciences and Disorders/Otolaryngology—Head and Neck Surgery), Richard S. Tyler (Otolaryngology—Head and Neck Surgery/Communication Sciences and Disorders)

Professors emeriti: Erich S. Luschei, Kenneth L. Moll, Hughlett L. Morris, Arnold M. Small, Duane C. Spiers/Starch Professor, Duane R. Van Demark

Professor (clinical): Lenore Holte

Adjunct professors: Fariborz Alipour-Haghighi, Lorraine Ramig

Associate professors: Douglas Baynton (History/Communication Sciences and Disorders), Eileen Finnegan (Communication Sciences and Disorders/Otolaryngology—Head and Neck Surgery), Jean K. Gordon, Michael P. Karmel (Otolaryngology—Head and Neck Surgery/Communication Sciences and Disorders), Jerald B. Moon, Patricia M. Zebrowski

Associate professors emeriti: Charles V. Anderson, Penelope, K. Hall

Associate professors (clinical): Toni D. Cilek, Ann M. Fennell, Danielle Kelsay, Linda Louko, Diane P. Niebuhr, Anne K. Wallace

Adjunct associate professors: Carolyn Jean Brown, Charles A. Miller, Ronald C. Scherer, Katherine Verdolini, Gerald N. Zimmermann

Assistant professors: Sandie Bass-Ringdahl, Melissa Duff, Shawn J. Goodman, Amanda Owen

Assistant professors (clinical): Karen Bryant, Stephanie Fleckenstein

Adjunct assistant professors: Sarah Klemuk, Alice Smith, Brad Story, Gail Takahashi

Adjunct instructors in practicum instruction: Barbara Anderson, Emily Andrews, Julie Bridges, Paige Burden, Deborah Downey, Suzanne Dunn, Jessica Egge, Leisha Eiten, Kelly Macauley Frost, Katherine Emrich Seerveld, Barbara A. Gienapp, Peggy Gingerich, Daniel Hansen, Diana Hanson, Emily Hart, Rebecca Hubbard, Maura Kenworthy, Judith Knabe, Claudia L. Knutson, Marsha Barth Leick, Maggie Lenkowski, Mary Lowder, Pena Lubrica, Mary F. Lukas, Beth MacPherson, Joan D. Martilla, Elizabeth Merrifield, Rebecca R. Miller, Kelly Neppl, Aaron Packer, Debra K. Robin, Janette Rogers, Sandra D. Show, Christine Troxell, Michael Tysklind, Tanya Van Voorst

Undergraduate degree: B.A. in Speech and Hearing Science

Graduate degrees: M.A. in Speech Pathology and Audiology, Ph.D. in Speech and Hearing Science, Au.D.

Web site: http://www.shc.uiowa.edu

The courses and degree programs of the Department of Communication Sciences and Disorders are planned to meet the needs of students preparing for careers in clinical service, college and university teaching, and research concerned with speech, language, or hearing processes and disorders. The department also offers courses for students with vocational and professional goals in other fields—for example, engineering, psychology, education, speech, theatre arts, dentistry, and medicine—whose preparation may be enriched by the study of speech and hearing processes and their disorders.

Advanced degree holders in communication sciences and disorders provide clinical services for people with speech, hearing, or language problems in hospitals, community clinics, rehabilitation facilities, elementary and secondary schools, and private practice. They teach in colleges and universities and conduct research in laboratories concerned with communication processes and disorders.

The department’s professional programs leading to the M.A. or Au.D. are accredited by the Council on Academic Accreditation of the American Speech-Language-Hearing Association (ASHA).

Undergraduate Program

The department offers a Bachelor of Arts in speech and hearing science. The program emphasizes the normal processes of speech, hearing, and language.

The Master of Arts or Doctor of Audiology is the minimum level of preparation for persons seeking professional careers in communication sciences and disorders. The undergraduate curriculum leading to the B.A. in speech and hearing science does not qualify an individual to work professionally in the field. Instead, it is designed primarily to prepare students for graduate work. It also may be pursued by students earning College of Liberal Arts and Sciences degrees who are not seeking careers in speech pathology and audiology.

Bachelor of Arts

The Bachelor of Arts in speech and hearing science requires a minimum of 120 s.h., including 55-56 s.h. of work for the major. Requirements include nine core courses offered by the department and eight cognate courses offered by other departments. Students must complete the College of Liberal Arts and Sciences General Education Program. Transfer students must complete a minimum of 15 s.h. toward the major at The University of Iowa. Requirements for the major are as follows.

CORE COURSES

All of these:

003:015 Introduction to Speech and Hearing Processes and Disorders 3 s.h.
003:110 Phonetics: Theory and Applications 3 s.h.
003:111 Basic Acoustics for Speech and Hearing 3 s.h.
003:112 Anatomy and Physiology of Speech Production 4 s.h.
003:113 Introduction to Hearing Science 4 s.h.
003:116 Basic Neuroscience for Speech and Hearing 3 s.h.
COGNATE COURSES

Students may choose cognate courses that help fulfill the College of Liberal Arts and Sciences General Education Program.

Both of these:

031:001 Elementary Psychology 3 s.h.
103:100 Introduction to Linguistics 3 s.h.

One of these:

07P:025/22S:025 Elementary Statistics and Inference 3 s.h.
07P:143/22S:102 Introduction to Statistical Methods 3 s.h.
22S:030 Statistical Methods and Computing 3 s.h.
22S:101 Biostatistics 3 s.h.

One of these:

004:007 General Chemistry I 3 s.h.
004:011 Principles of Chemistry I 4 s.h.
029:008 Basic Physics (preferably with lab) 4 s.h.
029:011 College Physics I 4 s.h.

One of these:

031:013 Introduction to Clinical Psychology 3 s.h.
031:050 Psychology of Aging 3 s.h.
031:063 Abnormal Psychology: Health Professions 3 s.h.
042:108 Basic Aspects of Aging 3 s.h.

One of these:

07P:106 Child Development 3 s.h.
031:014 Introduction to Developmental Science 3 s.h.

One of these:

002:002 Introductory Animal Biology (with lab) 4 s.h.
002:010 Principles of Biology I (with lab) 4 s.h.

One of these:

22M:015 Mathematics for the Biological Sciences 4 s.h.
22M:016 Calculus for the Biological Sciences 4 s.h.
22M:025 Calculus I 4 s.h.

First-year calculus is encouraged, particularly for those who are interested in pursuing a graduate degree in audiology.

CLINICAL OBSERVATION

Students have the opportunity and are encouraged to obtain 25 hours of supervised clinical observation, a prerequisite for participation in clinical practicums at the graduate level. This requirement is satisfied by completion of independent observations or required observations made for elective departmental courses.

Four-Year Graduation Plan
The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

Note: The major requires specific mathematics and science competencies that may be satisfied with courses approved for the General Education Program.

Before the third semester begins: at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: three courses in the major and at least one-half of the semester hours required for graduation

Before the seventh semester begins: nine courses in the major and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: 12 courses in the major

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Honors

The junior/senior-year program leading to the B.A. with honors in speech and hearing science is open to students who, at the beginning of their junior year, have completed at least 10 s.h. of course work that can be counted toward a major in the department and have earned a g.p.a. of at least 3.50 in all course work at the University.

At any time during their undergraduate study, students who have a cumulative University of Iowa g.p.a. of at least 3.33 and who did not enter the University as honors students may enroll in the University of Iowa Honors Program (contact the University of Iowa Honors Program for more information). Students with a g.p.a. of 3.50 or higher may enter the department's honors program upon recommendation of the departmental honors advisor. To graduate with honors, students must be members of the University of Iowa Honors Program and must complete both 003:097 Honors Seminar and 003:098 Honors Thesis. Students register for 003:097 Honors Seminar in the spring of their junior year and for 003:098 Honors Thesis in both fall and spring of their senior year.

Graduate Programs

The department offers a Master of Arts in speech pathology and audiology, with two emphases: research (general), and professional (speech-language pathology). It also offers the Doctor of Audiology (Au.D.), and a Doctor of Philosophy in speech and hearing science.

The M.A. with research emphasis and the Ph.D. are designed to train scholar-researchers; they do not provide preparation for professional work as speech-language pathologists or audiologists.

The M.A. with professional emphasis and the Au.D. provide training for individuals who wish to do clinical work in speech-language pathology or audiology. Graduates of the M.A. professional emphasis program meet all academic and practicum requirements for clinical certification by the American Speech-Language-Hearing Association (ASHA) and for licensure by the State of Iowa. The Au.D. is required for ASHA national certification in audiology. Students preparing for clinical positions in public schools must meet school licensure or certification requirements of the states in which they plan to work. See "M.A. with Professional Licensure" later in this section.

Master of Arts with Research Emphasis

The Master of Arts in speech pathology and audiology with research emphasis (general emphasis) requires a minimum of 38 s.h. of graduate credit. The program is designed for students who intend to pursue a Ph.D. or who seek additional education but do not intend to work professionally in the United States as speech-language pathologists or audiologists. It typically includes a substantial portion of the courses in the M.A. with professional emphasis and Au.D. curricula.

Students in the M.A. research emphasis program are required to complete a thesis and defend their research successfully at a final oral examination.

The program typically requires two years to complete. Specific course work required depends on the student's background and interests.

Master of Arts with Professional Emphasis

The Master of Arts in speech pathology and audiology with professional emphasis in speech-language pathology
requires a minimum of 38 s.h. of graduate credit. The program prepares clinicians in speech-language pathology or audiology to be able to function independently in a variety of clinical settings. Graduates of the program meet all academic and practicum requirements for clinical certification by the American Speech-Language-Hearing Association and for licensure by the State of Iowa. The program is designed to ensure that upon graduation, the student will meet requirements for immediate professional employment.

M.A. students usually have a background of undergraduate courses in speech and hearing science, psychology of language, and human behavior that is equivalent to an undergraduate major in speech and hearing science at The University of Iowa.

Before registering in the program, entering M.A. students receive descriptive materials about basic science core courses considered to be required preparation for the M.A. program, and required M.A. clinical core courses for which the department may accept comparable courses taken at the undergraduate level. Decisions about incorporating background course work in these areas are made by the faculty advisor in consultation with the student and the instructors of the basic science or clinical core courses. Entering students must have completed the following courses or their equivalents.

- 003:110 Phonetics: Theory and Applications 3 s.h.
- 003:111 Basic Acoustics for Speech and Hearing 3 s.h.
- 003:112 Anatomy and Physiology of Speech Production 4 s.h.
- 003:113 Introduction to Hearing Science 4 s.h.
- 003:116 Basic Neuroscience for Speech and Hearing 3 s.h.

or

- 003:117 Psychology of Language 3 s.h.
- 003:218 Psycholinguistics 3 s.h.

- 003:118 Language Development 1-3 s.h.
- 003:185 Hearing Loss and Audiometry 3 s.h.
- 07P:025 Elementary Statistics and Inference 3 s.h.

Biology, physics, chemistry, or mathematics courses (must include at least one biology, physics, or chemistry course) 6 s.h.

Behavioral science or social science courses (must include at least one psychology course) 6 s.h.

Students pursuing the M.A. with professional emphasis must complete at least 4 s.h. of work related to research. This may be accomplished by any combination of enrollment in seminars (2 s.h. each) and/or research hours. Completion of the research hours may consist of work toward a thesis or preparation of a paper involving one or a combination of the following: literature review, prospectus development, and presentation of data. A paper is required at the end of each semester's enrollment. An exception to this requirement can be made in the case of research hours leading to a thesis.

Candidates for an M.A. with professional emphasis in speech-language pathology are not required to complete a thesis, although all students demonstrating research aptitude and interest are encouraged to do so. Students who do not elect the thesis option are required to take final written comprehensive examinations.

A typical M.A. professional emphasis program usually takes two calendar years to complete but may take longer, depending on the student's background and personal interests.

**CORE REQUIREMENTS**

All students seeking an M.A. with professional emphasis in speech-language pathology must take the following.

- 003:135 Foundations of Clinical Practice I 1-3 s.h.
- 003:136 Foundations of Clinical Practice II 1 s.h.
- 003:137 Foundations of Clinical Practice III 1 s.h.

In addition, they must take the following courses unless they completed equivalent courses as undergraduates.

- 003:114 Introduction to Voice Disorders 2 s.h.
- 003:115 Structural Disorders 2 s.h.
- 003:116 Basic Neuroscience for Speech and Hearing 3 s.h.
- 003:140 Manual Communication 1 s.h.
Students must take 003:510 Seminar: Introduction to Research in Speech and Hearing (1 s.h.) during the fall semester of their first year.

They must take 003:515 Proseminar (0 s.h.) during the fall and spring semesters of their first year.

Also required are additional semester hours of practicum registration sufficient to meet supervised, direct clinical experience requirements for the Certificate of Clinical Competence of the American Speech-Language-Hearing Association and the Iowa license, and to provide broad, supervised practicum experience.

In addition to the core requirements listed above, all students preparing to be speech-language pathologists must earn a minimum of 12 s.h. from the following.

003:201 Principles of Voice Production 3 s.h.
003:206 Language Disorders in Children 0-18 Yrs 3 s.h.
003:213 Voice Habilitation 2 s.h.
003:222 Speech and Hearing Anatomy (dissection) 2 s.h.
003:228 Stroboscopy 1 s.h.
003:233 Aphasia 2 s.h.
003:236 Swallowing Disorders 2 s.h.
003:237 Cleft Palate and Related Disorders 2 s.h.
003:260 Designing Assistive Devices 1-3 s.h.
003:282 Phonological Development and Disorders 2 s.h.
003:283 Stuttering 2 s.h.
003:350 Preceptorship in Augmentative Communication 1 s.h.
07E:104 Remedial Methods in Speech and Hearing 2 s.h.

Students also must earn a total of 4 s.h. in 003:590 Research or 4 s.h. in a combination of research and seminar courses.

**M.A. with Professional Licensure**

**M.A. with Licensure to Work Outside Public Schools**

A number of states, including Iowa, require a state license in speech-language pathology or audiology for persons who work in settings outside the public schools. Students who meet the requirements listed below for the M.A. in speech pathology and audiology with professional emphasis also meet the academic requirements for the license in Iowa as well as in most other states. In 2007 the requirements to earn American Speech-Language-Hearing Association national certification in audiology changed. Certification now requires a clinical doctoral degree (Doctor of Audiology) or the equivalent. Students preparing for careers in audiology should consult their advisors.

**M.A. with Public School Licensure**

Students preparing for clinical positions in public schools typically must meet school licensure or certification requirements of the states in which they plan to work. The following criteria meet the requirements for endorsement as speech-language pathologists or audiologists in Iowa and most other states.

- A master's degree with professional emphasis in speech-language pathology or audiology or the equivalent
- Completion of an approved human relations component
- Completion of courses that cover the education of the disabled and the gifted and talented (e.g., exceptional persons, education of the gifted)
- Completion of the requirements in speech-language pathology or audiology and the 20 s.h. professional education sequence, including 07E:104 Remedial Methods in Speech and Hearing and 07E:192 Special Area Student Teaching as a speech-language pathologist or audiologist; course work in the following areas must be completed to meet the professional education sequence:

  **Curriculum** (e.g., reading, methods, curriculum development)

  **Foundations** (e.g., philosophy of education, foundations of education)
Educational measurement (e.g., tests and measurements, measures and evaluations of instruction)

Educational psychology (e.g., educational psychology, counseling theories and techniques)

Special education (e.g., introduction to special education, exceptional persons, learning disabilities)

Child development (e.g., human growth and development, principles and theories of child development, history and theories of early childhood education)

Note: General Education Program courses (e.g., introduction to psychology, sociology, history, literature, and humanities) do not meet the requirements of the professional education sequence.

Doctor of Audiology

The Doctor of Audiology (Au.D.) requires 95 s.h. of graduate credit. Individuals who wish to work as audiologists in the United States must hold a clinical doctoral degree or the equivalent.

The four-year Au.D. program is designed for students with an undergraduate degree in speech and hearing science. Au.D. students must complete the following courses. They may be excused from taking courses whose equivalents they completed successfully during undergraduate study.

22M:016 Calculus for the Biological Sciences (or one semester of calculus) 4 s.h.
003:135 Foundations of Clinical Practice I 1-3 s.h.
003:145 Developmental Speech and Language Disorders 3 s.h.
003:219 Fundamentals of Laboratory Instrumentation 3 s.h.
003:224 System and Signal Theory for Speech and Hearing Science 3 s.h.
003:230 Advanced Hearing Science and Speech Perception 3 s.h.
003:238 Capstone Requirement 1 s.h.
003:240 Hearing Aids I 3 s.h.
003:242 Hearing Aids II 3 s.h.
003:244 Rehabilitative Audiology 3 s.h.
003:245 Pediatric Audiology 3 s.h.
003:246 Advanced Audiology 3 s.h.
003:247 Medical Audiology 2 s.h.
003:249 Cochlear Implants 1-3 s.h.
003:255 Educational Audiology 3 s.h.
003:256 Physiology of Hearing 3-4 s.h.
003:290 Auditory Evoked Potentials 3 s.h.
003:291 Vestibular Assessment and Rehabilitation 3 s.h.
003:292 Advanced Rehabilitative Audiology 3 s.h.
003:311 Clinical Practice in Audiology 2-3 s.h.

07P:243 Intermediate Statistical Methods 4 s.h.
or
171:161 Introduction to Biostatistics 3 s.h.

Students also must select at least one of the following electives. With their advisors' consent, they may substitute other University of Iowa course work to satisfy this requirement.

003:222 Speech and Hearing Anatomy 2 s.h.
003:526 Seminar: Rehabilitative Audiology 2 s.h.
003:537 Seminar: Audiology 2 s.h.
003:538 Seminar: Hearing Science 2 s.h.
07E:104 Remedial Methods in Speech and Hearing 2 s.h.
068:199 Basic Otolaryngologic Science 2 s.h.
132:180 Fundamental Neurobiology 4 s.h.
158:101 Topics in Deaf Studies 3 s.h.
158:110 Teaching Deaf and Hard of Hearing Students 3 s.h.
Doctor of Philosophy

The Doctor of Philosophy in speech and hearing science requires a minimum of 72 s.h. of graduate credit. The program provides flexible, comprehensive training for scholar-researchers interested in communication processes and their disorders. Students with diverse backgrounds in the natural and behavioral sciences are encouraged to apply and develop their skills in an atmosphere of interdisciplinary research.

The Ph.D. program reflects the broad interests of its multidisciplinary faculty, whose members have diverse backgrounds in speech, language, hearing, engineering, physiology, physics, psychology, linguistics, and bioengineering. Faculty members are committed to an interdisciplinary approach to questions at every level of the speech and language production/perception system.

The purpose of the doctoral program is to provide the integrated knowledge necessary for a productive career in speech-language pathology and audiology, communication science, and related areas.

The department encourages candidates with special interests, goals, or backgrounds to develop individualized programs of study. There is no standard curriculum for the Ph.D.; rather, a program of study is developed by each student in consultation with a faculty committee. The course of study is developed from courses offered by the department, courses in other areas (e.g., physics, engineering, psychology, mathematics, statistics, physiology, neurology, anatomy, and others), and special reading and research experiences.

The following courses are offered by the department of Communication Sciences and Disorders primarily for Ph.D. students. (Students interested in specific areas of research and selected publication citations of the faculty are encouraged to write to the department.)

- 003:201 Principles of Voice Production (3 s.h.)
- 003:218 Psycholinguistics (3 s.h.)
- 003:219 Fundamentals of Laboratory Instrumentation (3 s.h.)
- 003:224 System and Signal Theory for Speech and Hearing Science (3 s.h.)
- 003:230 Advanced Hearing Science and Speech Perception (3 s.h.)
- 003:251 Biophysics of Speech and Hearing (4 s.h.)
- 003:256 Physiology of Hearing (3-4 s.h.)
- 003:310 Scientific Writing (3 s.h.)
- 003:511 Introduction to Doctoral Research (taken spring of the first year) (1 s.h.)

In addition, seminars offered by the department cover a broad range of topics relevant to doctoral study.

Students in the Ph.D. program usually are expected to register for research credit (003:590 Research) during each semester of residence and to register for and participate in 003:515 Proseminar.

Knowledge in each of the areas of hearing, speech, language, mathematics, statistics, computer science, and instrumentation is required of all students. Decisions regarding the extent of this knowledge and how it is obtained (e.g., course work or independent study) are made jointly by the student and the student's faculty committee.

Doctoral students who have not written a master's thesis must complete the equivalent of a master's thesis project as well as the comprehensive examination. They also must successfully complete and submit a dissertation based on original research.

Admission

The Department of Communication Sciences and Disorders has requirements for admission that supplement those specified by the Graduate College. A brief summary of department requirements is presented below. More detailed information is available from the department's director of graduate studies.

All applicants for admission to graduate study in the Department of Communication Sciences and Disorders must complete the Graduate College application form. In addition, they must complete the department's information form, available from the Department of Communication Sciences and Disorders.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

M.A. and Au.D. Admission

The department bases M.A. admission on applicants' credentials relative to those presented by other applicants for the same term. While an undergraduate g.p.a. above 3.20 does not ensure admission, the department admits few applicants with an undergraduate g.p.a. below 3.20.
Completed applications must be received no later than January 15 for entry the next summer session or fall semester. Later applications are considered only in special situations. Applications for spring semester entry are considered only under special circumstances and only if received no later than the preceding November 1.

**Ph.D. Admission**

Completed applications should be received by February 1 for summer session and fall semester entry and November 1 for spring semester entry. Applicants who want to be considered for graduate appointments must file the admission application by February 1. Applicants usually are notified of action on their admission within six weeks of the application deadline.

**Financial Support**

The following information applies to all financial appointments administered by the department. For more detailed information, contact the Department of Communication Sciences and Disorders director of graduate studies.

Graduate appointments usually begin only in fall semester. Students beginning study spring semester or summer session are considered for appointments for the following fall semester.

Appointment applications must be received by January 15 to ensure consideration for an appointment beginning the following fall semester. Initial appointment offers generally are made between April 1 and June 1; however, the department continues to make offers after this time.

Scores on the Graduate Record Examination (GRE) General Test are required for consideration for financial assistance.

**Facilities**

**Clinical Facilities**

The clinical training program benefits greatly from Iowa City's standing as the principal health center of the state, and from the ready availability of health service facilities for clinical training of students in speech-language pathology and audiology.

The University of Iowa Affiliated Speech and Hearing Services include the Wendell Johnson Speech and Hearing Clinic; the division of speech and hearing in the University of Iowa Hospitals and Clinics (UIHC) Department of Otolaryngology--Head and Neck Surgery; UIHC Consolidated Speech and Swallowing Services, which provides services to the Departments of Neurology, Child Psychiatry, and Otolaryngology--Head and Neck Surgery; speech and hearing services in the Center for Disabilities and Development; Pediatrics Regional Child Health Specialty Clinics; and the audiology and speech pathology service in the Veterans Affairs Iowa City Health Care System. Directors of these programs form the Council on Speech Pathology and Audiology at The University of Iowa.

The Wendell Johnson Speech and Hearing Clinic serves the University and the general public. Included in its services are outpatient evaluation and rehabilitation programs for speech, hearing, and language problems; one-week intensive summer programs in stuttering, language development, reading, and aural rehabilitation; and a six-week summer preschool program for hearing-impaired children. These clinical programs give students supervised clinical experience with a wide variety of speech, hearing, and language disorders.

In addition to the clinical training in the Wendell Johnson Speech and Hearing Clinic, training also may be acquired in supervised clinical practice with elementary school children through various state area education agencies; and in supervised clinical practice in speech, language, and hearing services provided by the University of Iowa Hospitals and Clinics Consolidated Speech and Swallowing Services, the Regional Child Health Specialty Clinics, Center for Disabilities and Development, and the Veterans Affairs Iowa City Health Care System.

Public and private departments and programs in addition to those mentioned above often contribute to the cooperative professional training, research, and service programs.

**Research Facilities**

Facilities in the Wendell Johnson Speech and Hearing Center include audiometric testing suites, diagnostic and remediation suites, equipment for diagnosis and therapy, a closed-circuit television system, and laboratories and equipment for acoustic, physiologic, and perceptual studies of speech, and for audioligic, psychoacoustic, and neurophysiologic studies of hearing. Mechanical and electronic shops and trained technical personnel are available for assistance in research instrumentation.

Cooperation with varied departments in the Carver College of Medicine and the College of Dentistry makes additional laboratory facilities available for research on problems in speech and hearing. The participation and cooperation of specialists from various fields, including psychology, child development, education, engineering, statistics, and
medicine, further broaden the scope of research activities in speech and hearing.

Communication Sciences and Disorders Courses

For Undergraduates

003:015 Introduction to Speech and Hearing Processes and Disorders 3 s.h.
Speech, language, auditory behavior as fields of scientific study; major types of speech, hearing, language disorders. Offered fall and spring semesters.

003:029 First-Year Seminar 1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Prerequisite: first- or second-semester standing.

003:096 Research Practicum arr.
Individual or small group participation in faculty research projects. Prerequisite: consent of instructor.

003:097 Honors Seminar 2 s.h.
Research topics and procedures in speech and hearing sciences; ongoing faculty research, research opportunities, possible research projects. Prerequisite: honors standing with intent to complete an honors thesis.

003:098 Honors Thesis 2 s.h.
Close work with a faculty mentor. Prerequisite: 003:097.

For Undergraduate and Graduate Students

003:110 Phonetics: Theory and Applications 3 s.h.
Basic concepts: articulatory and acoustic description of speech sound production, dialect variations, language differences; development of phonetic transcription skills with emphasis on English phonetics, clinical applications to developing and disordered speech. Offered fall semesters.

003:111 Basic Acoustics for Speech and Hearing 3 s.h.
Principles of sound, simple harmonic motion, sound pressure and intensity, decibels, complex waves, Fourier analysis, resonance and filters, distortion, transmission of sound. Offered spring semesters. Prerequisite: 029:008 or 029:011.

003:112 Anatomy and Physiology of Speech Production 4 s.h.
Normal anatomy, physiology of structures used to produce speech; principles, methods for instrumental study of speech production. Offered spring semesters. Prerequisite: 003:110. Pre- or corequisite: 003:111 or consent of instructor.

003:113 Introduction to Hearing Science 4 s.h.
Normal auditory process; anatomy and physiology of auditory system; subjective correlates of auditory stimuli. Offered fall semesters. Prerequisite: 003:111 or consent of instructor.

003:114 Introduction to Voice Disorders 2 s.h.
Basic foundations for management of voice disorders. Offered spring semesters. Prerequisite: 003:112.

003:115 Structural Disorders 2 s.h.
Therapy approaches used to treat speech production and swallowing disorders associated with disorders that affect structure and physiology of the speech and swallowing mechanism; basic knowledge necessary for clinical practice by clinicians who do not specialize in management of patients with head and neck cancer, cleft palate, or neurological disorders. Offered fall semesters.

003:116 Basic Neuroscience for Speech and Hearing 3 s.h.
Basic anatomy, physiology of central nervous system; emphasis on neural systems involved in normal and disordered communication. Offered fall semesters. Prerequisite: course in biology or zoology or physiology, or consent of instructor. Same as 103:177.
003:117 Psychology of Language
3 s.h.
Theoretical, empirical investigations of linguistic behavior; behaviorist, rationalist models in context of formal linguistic structure and context of models of speech perception and production. Offered spring semesters. Prerequisite: 103:100 or consent of instructor. GE: Social Sciences. Same as 103:172.

003:118 Language Development
1-3 s.h.
Models of children's language acquisition; child language/communication development from infancy through school age, in context of current developmental research. Offered spring semesters. Prerequisites: (for 003:118) 031:001 and 103:100 or consent of instructor for undergraduates; consent of instructor for graduate students. Prerequisite: (for 103:176) 103:100 or 103:172 or consent of instructor. GE: Social Sciences. Same as 103:176.

003:119 Clinical Research and Evaluating Treatment Efficacy
2 s.h.
Introduction to design and conduct of research and evidence-based clinical practice, observation and measurement, population sampling, group and single-subject research designs, treatment research, data organization and analysis, and presenting research results in graphic and written form; issues concerning research ethics and the protection of human subjects in research; for clinical graduate students in audiology or speech-language pathology.

003:122 Speech Production: Anatomy and Physiology
4 s.h.
Anatomy and physiology of the respiratory, phonatory, and articulatory systems and the systems' roles during speech production; approaches to instrumental assessment of speech physiologic events.

003:140 Manual Communication
1 s.h.
Training in use of sign systems in manual communication.

003:145 Developmental Speech and Language Disorders
3 s.h.
The nature of developmental disorders--basic concepts, including behavioral characteristics, developmental patterns, etiology theories; assessment and intervention principles in phonology, semantics, morphology, syntax. Offered fall semesters. Prerequisites: 003:015, 003:110 or 103:110, 003:112, and 003:118; or consent of instructor.

003:146 Neurogenic Disorders of Language
3 s.h.
Language disorders secondary to acquired brain damage in adults; clinical intervention issues. Offered fall semesters. Prerequisites: 003:015, 003:110 or 103:110, 003:112, and 003:116; or consent of instructor.

003:147 Neurogenic Disorders of Speech
2 s.h.
Speech disorders secondary to acquired brain damage in adults; clinical intervention issues. Offered spring semesters. Prerequisite: 003:116.

003:165 Communication Disorders and Aging
2 s.h.
Introduction to speech, language, and hearing processes and disorders among older adults; survey of characteristics of communication and communication breakdown, remediation, and strategies for improving communication with older adults with communication disorders; primarily for nonmajors and service providers other than speech-language pathologists and audiologists. Offered spring semesters of even years. Same as 153:165.

003:183 Introduction to Stuttering
2 s.h.
Theoretical perspectives on the nature of stuttering, including onset and development, basic phenomena, beginning treatment principles. Offered spring semesters. Prerequisite: 003:112.

003:185 Hearing Loss and Audiometry
3 s.h.
Introduction to profession of audiology; overview of hearing disorders, evaluation, treatment; basic pure-tone and speech audiometry. Offered fall semesters. Pre- or corequisite: 003:113.

003:186 Problems: Speech/Hearing Processes and Disorders
arr.
Prerequisite: consent of instructor.

For Graduate Students

003:135 Foundations of Clinical Practice I
1-3 s.h.
Basic concepts of clinical practice, including models of diagnosis, fundamentals of clinical data collection and measurement, treatment planning, professional writing. Offered fall semesters. Prerequisites: 003:015, 003:110 or 103:110, 003:112, 003:118, and 07P:025, or equivalents; and graduate standing; or consent of instructor. Corequisite: 003:145.

**003:136 Foundations of Clinical Practice II**
1 s.h.
Advanced concepts of clinical practice, including principles of human behavior change, clinical decision making, generalization, transfer and maintenance, models of service delivery, ethical practice, advanced professional writing. Offered spring semesters. Prerequisites: 003:135 and graduate standing, or consent of instructor.

**003:137 Foundations of Clinical Practice III**
1 s.h.
Advanced principles of clinical practice, including risk management, public policy and models of third-party reimbursement, professional issues. Offered fall semesters. Prerequisites: 003:136 and graduate standing.

**003:201 Principles of Voice Production**
3 s.h.
Basic physical, physiological, pedagogical principles in understanding professional, nonprofessional, impaired voice production; vocal anatomy, voice classification; control of loudness, pitch, register, quality; efficient, inefficient use of voice; instrumentation for voice analysis, synthesis. Offered fall semesters of odd years. Same as 025:201.

**003:202 Methods of Teaching Voice**
3 s.h.
Attitude, musicianship, foreign language aptitude, physical and emotional characteristics; mental images used to modify respiratory, phonatory, articulatory behavior; vocal hygiene; performance anxiety; student-teacher relationships; administration in vocal schools, professional organizations. Offered spring semesters. Same as 025:202.

**003:204 Voice for Performers**
2 s.h.
Comparison of Kinesthetic techniques for singing and acting voice; relaxation, posture, breathing, tone quality, diction, interpretation. Prerequisite: enrollment in Summer Vocology Institute, Denver, Colorado. Same as 025:216, 049:201.

**003:206 Language Disorders in Children 0-18 Yrs**
3 s.h.
Disorders resulting from phonological, semantic, pragmatic, and morphosyntactic deficits; receptive, expressive problems; special assessment and intervention procedures. Offered fall semesters of even years. Prerequisite: 003:145 or equivalent.

**003:213 Voice Habilitation**
2-3 s.h.
Application of methods of intervention in development, training, rehabilitation of vocal behavior; motor learning, efficacy of treatment strategies, factors affecting compliance with recommended therapy. Offered fall semesters. Prerequisites: 003:114 or equivalent, and 003:201. Same as 025:356.

**003:218 Psycholinguistics**
3 s.h.
Theoretical, empirical issues in psycholinguistics; models demonstrating relation of formal language structure to psychological operations used in speech perception and production; laboratory emphasis on paradigmatic research in psycholinguistics. Offered fall semesters. Prerequisite: consent of instructor. Same as 103:218.

**003:219 Fundamentals of Laboratory Instrumentation**
3 s.h.
Electrical circuits, emphasis on application to instrumentation used in speech and hearing; laboratory focus on instrumentation. Offered spring semesters.

**003:221 Instrumentation for Voice Analysis**
2 s.h.
Same as 025:357.

**003:222 Speech and Hearing Anatomy**
2 s.h.
Laboratory course in anatomy of speech and hearing mechanisms; instruction in dissection techniques. Offered summer sessions. Prerequisite: 003:112 or equivalent.

**003:224 System and Signal Theory for Speech and Hearing Science**
3 s.h.
Principles of linear-systems theory applied to speech and auditory research, including system functions, filter properties, convolution, Fourier Series, Fourier transform. Offered fall semesters. Prerequisite: introductory calculus.

**003:228 Stroboscopy**
1 s.h.
How to perform videolaryngoscopy using a rigid scope and applying knowledge of normalcy and pathophysiology; how to interpret findings; describe and report them concisely. Offered summer sessions. Prerequisite: 003:114.

003:230 Advanced Hearing Science and Speech Perception 3 s.h.
Perception of speech and other sounds by human listeners, how these perceptual abilities relate to the physiology of the auditory system; perception of speech by hearing-impaired listeners through hearing aids or cochlear implants. Offered spring semesters. Prerequisite: (for 003:230) 003:113 or consent of instructor. Prerequisites: (for 103:230) background in phonetics, speech science, and hearing science; or consent of instructor. Same as 103:230.

003:233 Aphasia 2 s.h.
Assessment, diagnosis, and treatment of aphasia and other acquired language and cognition-based communication disorders. Offered spring semesters. Prerequisites: 003:117, and 003:146 or equivalent; or consent of instructor. Corequisite: 003:136.

003:234 Acquired Cognitive-Communication Disorders arr.
Cognitive, neuropsychological, and social aspects of communication and the management of acquired cognitive-communication disorders associated with traumatic brain injury, right hemisphere damage, and neurodegenerative diseases. Prerequisites: 003:116 and 003:146, or consent of instructor.

003:236 Swallowing Disorders 2 s.h.
Physiology of normal, abnormal swallowing; assessment, treatment of swallowing disorders in adults, children. Offered fall semesters. Prerequisites: 003:112, 003:115 or equivalent, and 003:116; or consent of instructor.

003:237 Cleft Palate and Related Disorders 2 s.h.
Nature, etiologies, principles of treatment of common disorders associated with cleft lip and palate, associated disorders. Offered spring semesters. Prerequisite: 003:115 or equivalent.

003:238 Capstone Requirement 1 s.h.
Individual work with a faculty member on audiology topics; final Au.D. project. Offered spring semesters. Prerequisite: consent of instructor.

003:240 Hearing Aids I 3 s.h.
Hearing aids, diagnostic procedures; laboratory emphasis on measurement procedures. Offered spring semesters. Prerequisite: 003:185 or consent of instructor.

003:242 Hearing Aids II 3 s.h.
Evaluation, verification procedures; emphasis on advanced technologies, strategies. Offered fall semesters. Prerequisite: 003:240 or consent of instructor.

003:244 Rehabilitative Audiology 3 s.h.
Theory, procedures for assessment, rehabilitation of speech, hearing, language deficits of people with hearing impairment. Offered spring semesters. Prerequisites: 003:145 and 003:185, or equivalents.

003:245 Pediatric Audiology 3 s.h.
Theory, procedures for assessment, rehabilitation of pediatric populations; laboratory emphasis on test administration. Offered fall semesters. Prerequisite: 003:185 or consent of instructor.

003:246 Advanced Audiology 3 s.h.
Theory, procedures for assessment of hearing loss in adult and pediatric populations; experience in test administration through supervised laboratory sessions. Offered fall semesters. Prerequisite: 003:185 or consent of instructor.

003:247 Medical Audiology 2 s.h.
Genetic, acquired, traumatic pathologies that affect auditory systems; nature, etiology, principles of assessment, treatment. Offered spring semesters of odd years. Prerequisite: 003:185.

003:249 Cochlear Implants 1-3 s.h.
Introduction to cochlear implantation; history of cochlear implantation, introduction to cochlear technology, basics of device programming and trouble shooting, candidacy issues, outcomes in children and adults, auditory rehabilitation specific to cochlear recipients, the auditory brainstem implant, future trends in cochlear implantation. Offered fall semesters. Prerequisites: 003:185 and 003:244.
003:251 Biophysics of Speech and Hearing 4 s.h.
Cellular, molecular, and macromechanical description of tissues in the ear and the larynx involved in sound reception and production; basic elements of molecular and cell biology, continuum mechanics, and nonlinear dynamics in the transduction of acoustic waves to tissue vibration to cell response. Offered fall semesters of even years. Prerequisites: two semesters of calculus, basic biology, and physics.

003:255 Educational Audiology 2 s.h.
Training in skills necessary for working with the school-age population; case management and aural rehabilitation, amplification and classroom hearing technology, identification and assessment practices, federal legislation that affects services. Offered fall semesters. Prerequisites: 003:185, and 003:244 or equivalent; and 003:240 for Au.D. students.

003:256 Physiology of Hearing 3-4 s.h.
Anatomy of auditory system, cochlear mechanics, electrophysiology of peripheral and central auditory nervous system; laboratory emphasis on physiological techniques for study of ear. Offered spring semesters. Prerequisites: 003:113, 003:224, and consent of instructor.

003:260 Designing Assistive Devices 1-3 s.h.
System design (hardware and software) useful in building augmentative and alternative communication devices for the profoundly impaired; opportunity to build systems for theoretical and/or applied purpose; interdisciplinary, clinical perspectives. Offered summer sessions. Prerequisite: consent of instructor.

003:282 Phonological Development and Disorders 2 s.h.
Advanced topics in phonological development and disorders; current theoretical approaches to phonological analysis and typical phonological acquisition applied to assessment and intervention with children who have phonological disorders. Offered spring semesters. Prerequisites: 003:110 or 103:110, 003:118, 003:135, and 003:145; or consent of instructor.

003:283 Stuttering 2 s.h.
Issues, approaches to treatment of children, adults. Offered fall semesters. Prerequisite: 003:183 or equivalent. Corequisite: 003:135 or equivalent, or consent of instructor.

003:290 Auditory Evoked Potentials 3 s.h.
Introduction to evoked potentials for assessing audiologic function. Offered spring semesters. Prerequisites: 003:219 and consent of instructor.

003:291 Vestibular Assessment and Rehabilitation 1-3 s.h.
Introduction to otoacoustic emissions, vestibular theory, and testing techniques. Offered fall semesters.

003:292 Advanced Rehabilitative Audiology 3 s.h.
Current and developing procedures for assessment, habilitation of adults and children with hearing losses. Offered spring semesters. Prerequisite: consent of instructor.

003:301 Practicum: Speech-Language Pathology arr.
Supervised clinical practice. Repeatable. Prerequisite: M.A. professional emphasis. Corequisite: 003:135 or equivalent.

003:302 Practicum: Speech-Language Assessment arr.
Supervised clinical practice involving evaluation of individuals for speech or language impairments. Repeatable. Prerequisites: M.A. professional emphasis and consent of instructor.

003:304 Speech Pathology Student Teaching arr.
Supervised teaching and observation in an area of speech pathology in the elementary schools. Prerequisite: consent of instructor.

003:310 Scientific Writing 3 s.h.
Principles of writing for scientific posters, journal articles, grant proposals; effective communication of concepts and data.

003:311 Clinical Practice in Audiology arr.
Varied topics relevant to professional issues in audiology clinical practice; presentations by clinical faculty members and guest speakers. Repeatable. Prerequisites: M.A. professional emphasis or Au.D. enrollment, and consent of instructor.

**003:312 Practicum: Hearing Measurement**
Evaluation of individuals for hearing impairment and its impact; clinical practice. Repeatable. Prerequisites: M.A. professional emphasis and consent of instructor.

**003:314 Audiology Student Teaching**
Supervised teaching and observation in an area of audiology in the elementary schools.

**003:315 Clinical Rotations in Audiology**

**003:316 Advanced Externship in Audiology**

**003:350 Preceptorship in Augmentative Communication**
Approaches to development of alternate modes of communication for individuals with limited oral communication. Offered fall semesters. Prerequisite: consent of instructor.

**003:510 Seminar: Introduction to Research in Speech and Hearing**
Philosophy of science; basic principles of research; issues in conducting research; review of research opportunities in the department. Offered fall semesters.

**003:511 Introduction to Doctoral Research**
Topics related to development and execution of research; doctoral program, use of library, human and animal subject issues, philosophy of science, use of common research tools, reading and writing research papers, research grant preparation. Offered fall and spring semesters. Prerequisite: consent of instructor.

**003:515 Proseminar**
Presentation of research ideas, results by faculty, students. Repeatable.

**003:520 Seminar: MA Language**
Research literature related to language. Offered spring semesters of odd years. Repeatable. Prerequisite: consent of instructor.

**003:522 Seminar: Speech**
Topics in speech. Offered fall semesters. Repeatable. Prerequisite: consent of instructor.

**003:526 Seminar: Rehabilitative Audiology**
Theoretical issues, research literature. Offered fall semesters. Repeatable. Prerequisite: consent of instructor.

**003:528 Seminar: Ph.D. Language**
Theoretical issues related to language. Offered spring semesters. Repeatable.

**003:530 Seminar: Communication Disorders and Aging**
Emphasis on application of gerontology to speech-language pathology, audiology. Repeatable. Offered summer sessions of even years. Prerequisite: consent of instructor.

**003:537 Seminar: Audiology**
Selected topics. Offered spring semesters. Repeatable. Prerequisite: consent of instructor.

**003:538 Seminar: Hearing Science**
Selected topics. Offered spring semesters of even years. Repeatable. Prerequisite: consent of instructor.

**003:590 Research**
Repeatable. Prerequisite: consent of instructor.
The Department of Communication Studies focuses on the study of human communication as a social practice. Scholarship and teaching in the department center on the role that human communication processes play in the construction, maintenance, reinforcement, and reformation of various aspects of social, professional, and institutional life.

The department provides a liberal-arts-based undergraduate education that prepares students to meet the complex communication challenges of the 21st century. It provides top-ranked doctoral education and is a national and international leader in research and knowledge dissemination.

The department has three areas of specialization. The rhetoric and public advocacy specialization focuses on how citizens use public argumentation and other rhetorical processes to bring about cultural, social, and political changes. The media studies specialization focuses on modern media in their cultural, economic, historical, political, and social contexts to understand how society and social relations shape and are shaped by media practices. The interpersonal communication and relationships specialization focuses on how the communicative practices of relating in everyday life construct, shape, sustain, and change who people are as individuals, as well as the quality of their lives.

The Department of Communication Studies encourages exploration of the practical, political, social, and aesthetic dimensions of symbolic exchange and awareness of the relationships among these dimensions. The department has produced many influential scholars and artists and has been a hub for the intersection of programs and projects of the University and other institutions.

Undergraduate Programs

The department offers a Bachelor of Arts and a minor in communication studies. First-year students interested in pursuing a degree in communication studies are advised at the Academic Advising Center. Students who have earned 30 s.h. or more and who have a cumulative (University of Iowa and transfer) g.p.a. of at least 2.60 can declare the major and are advised in the department by the communication studies academic counselor.

Bachelor of Arts

The Bachelor of Arts in communication studies requires a minimum of 120 s.h., including 30 s.h. of work for the major. Students must complete the College of Liberal Arts and Sciences General Education Program.

The curriculum is designed to encourage learning that progresses from a basic understanding of communication as symbolic action to intermediate and advanced courses that emphasize four approaches to communication: the practice of communication, the context of communication, communication research and criticism, and communication theory. Students may choose to focus on specific areas of the field in order to build creative combinations of course work that suit their individual learning and career goals.

Students may count up to 50 s.h. of communication studies course work toward the degree. Guided Independent Study and transfer courses may be accepted as long as the student meets University of Iowa and College of Liberal Arts and Sciences residency requirements and the department approves the courses; a maximum of 15 s.h. of transfer credit may be counted toward the degree. Students must have a cumulative g.p.a. of at least 2.60 to take most communication studies courses.

Students work with the department academic counselor to develop study plans that meet the requirements of the major. They may check their progress toward the degree by logging on to ISIS (Iowa Student Information Services).

Students may discuss their career goals and interests with faculty members.

Students complete the following course work.

Core Concepts

All majors begin their studies with 036:001 Core Concepts in Communication Studies (3 s.h.). This course is
prerequisite to most other major courses. It introduces and builds on introductory concepts and theories and orients students to the organization and goals of the major.

036:001 Core Concepts in Communication Studies 3 s.h.

Practice

Practice courses focus on communication production and practice. Students acquire practical skills and learn to recognize and understand the interpersonal, public, or technical communication practices of others.

At least 6 s.h. from these:

- 036:011 Group Communication 3 s.h.
- 036:012 Interpersonal Communication 3 s.h.
- 036:013 Practicum in Debate 1 s.h.
- 036:014 Elements of Debate 3 s.h.
- 036:015 Persuasive Communication 3 s.h.
- 036:016 Business and Professional Communication 3 s.h.
- 036:017 Theory and Practice of Argument 4 s.h.
- 036:018 Leadership and Organizational Procedures 2 s.h.
- 036:019 Organizational Leadership 2-3 s.h.
- 036:020 Clothing as Nonverbal Communication 3 s.h.
- 036:021 Oral Interpretation 3 s.h.
- 036:022 Introduction to Media Production 4 s.h.
- 036:025 Writing for Television and Radio 3 s.h.
- 036:028 Communication Studies Internship arr.
- 036:030 Rhetorical Process 3 s.h.
- 036:041 Gender Roles and Communication 3 s.h.
- 036:080 Radio Production 3 s.h.
- 036:081 Television Production 3 s.h.
- 036:085 Media Industries and Organizations 3 s.h.
- 036:094 Topics in Production 3 s.h.
- 036:105 Workshop in Teaching Communication and Forensics arr.

Context

Context courses explore how communication practices and meanings are shaped by context—for example, historical, cultural, social, interpersonal, or institutional settings. Context courses provide students with a better understanding of communication practices useful in professional careers such as business, education, health care, and law.

At least 6 s.h. from these:

- 036:040 Communication and Conflict 3 s.h.
- 036:042 Intercultural Communication 3 s.h.
- 036:043 Rhetoric, Science, and Technology 3 s.h.
- 036:044 Rhetoric and Public Advocacy 3 s.h.
- 036:048 The Rise of Electronic Media 3 s.h.
- 036:051 Politics of Popular Culture 3 s.h.
- 036:052 Introduction to Health Communication 3 s.h.
- 036:083 Cultural History of Radio 3 s.h.
- 036:084 Cultural Approaches to Mass Communication 3 s.h.
- 036:086 Global Media Studies 3 s.h.
- 036:087 Culture and Intellectual Property Law 3 s.h.
- 036:090 Topics in Communication Studies 3 s.h.
- 036:091 Organizational Communication 3 s.h.
- 036:093 Rhetoric of War 3 s.h.
- 036:095 Queer Rhetorics 3 s.h.
- 036:100 Independent Study arr.
- 036:101 Honors Workshop 1 s.h.
- 036:102 Honors Thesis 3 s.h.
- 036:140 Communication and Relationships 3 s.h.

**Research and Criticism**

Research and criticism courses emphasize communication study methods and approaches as well as how those methods and approaches are interpreted and evaluated. These courses focus on the application of interpretive schemas and analytical models to communicative practices or bodies of discourse. Students work directly with primary materials such as institutional data, transcripts of conversations, speeches, historical documents, media programs, and performances.

**Theory**

Theory courses examine the process of abstracting, modeling, and conceptualizing communicative relationships and interactions. Students learn how scholars have described and explained communication practices as behavior, cultural and social forms and formations, expressions of commonality and difference, mediated discourses, and symbolic interaction. They explore particular bodies of theory and investigate the process of theorizing in communication studies.

**Electives**

Students earn 9 s.h. of elective credit in advanced courses.

Advanced courses numbered 036:075 and above, including 3 s.h. in courses numbered 036:110 or above 9 s.h.
Internships

Internships enable students to supplement their course work with professional experiences relevant to careers in communication-related fields. The department's internship program is open only to communication studies majors.

To earn academic credit for internships, students must obtain approval for their internship experience and site before they register for 036:028 Communication Studies Internship (arr.). Internship academic credit is awarded for an analytical paper and daily log submitted at the end of the internship and for the number of hours worked. Internships can be completed during fall semester, spring semester, or summer session.

Visit the department's web site for information on communication studies internships.

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan. Students who have signed the four-year graduation agreement should consult the department for details.

Before the third semester begins: at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: at least two courses in the major and at least one-half of the semester hours required for graduation

Before the seventh semester begins: at least six courses in the major and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: at least eight courses in the major

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Honors

The department encourages outstanding undergraduates to take part in the honors program. To graduate with honors in communication studies, students must maintain a cumulative University of Iowa g.p.a. of at least 3.33, join the University of Iowa Honors Program, and fulfill the following course requirements.

036:101 Honors Workshop (seminar offered fall semesters only) 1 s.h.
036:102 Honors Thesis (usually taken final semester before graduation) 3 s.h.

In special cases, independent study course work may be substituted for the Honors Workshop, with the honors officer's permission. Additional course work may be required by the student's honors advisor.

To begin work toward a degree with honors in communication studies, students choose a faculty member to supervise their honors project and act as their honors advisor.

Students who enroll in the honors program are eligible to take courses offered through the University of Iowa Honors Program and to add an honors designation to any other departmental course by completing an agreement with the course instructor for special work in that course.

For detailed information, see Honors Program in Communication Studies on the department's web site.

Minor

The minor in communication studies requires a minimum of 15 s.h. in communication studies courses, including 12 s.h. in courses taken at The University of Iowa numbered 036:040 and above. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass. The minor must include 036:001 Core Concepts in Communication Studies.

Forensics/Debate

Students in the forensics/debate program have the opportunity to participate in on-campus debates, in developmental programs designed to improve speech activities in the state, and as members of competitive intercollegiate debate teams. Forensics scholarships are available. Students interested in debate should enroll in 036:013 Practicum in Debate or 036:014 Elements of Debate.
Graduate Programs

The department offers a Doctor of Philosophy in communication studies with specializations in interpersonal communication and relationships, media studies, and rhetoric and public advocacy. The department offers a Master of Arts to students who have their committee's approval.

Master of Arts

The M.A. in communication studies requires a minimum of 30 s.h. of graduate credit and usually is granted to students in the process of pursuing the Ph.D. All students take 036:200 Introduction to Research (2 s.h.), 036:201 Issues in Teaching (1 s.h.), and at least two courses numbered 200 or above. They also prepare a graduate seminar paper that involves significant original research. For a detailed description of M.A. requirements, see the Communication Studies Graduate Student Handbook.

Doctor of Philosophy

The Doctor of Philosophy requires a minimum of 82 s.h. of graduate credit, including dissertation credit. All students take 036:200 Introduction to Research and 036:201 Issues in Teaching, and earn at least 10 s.h. of dissertation credit in 036:399 Ph.D. Dissertation.

Ph.D. students must successfully complete a qualifying examination during their second or third semester and a comprehensive (pредissertation) examination in their major research area during their fifth or sixth semester, and write a substantial scholarly dissertation. The must take a 3 s.h. course in each of the program's three areas of specialization. Students must maintain a cumulative g.p.a. of at least 3.00 throughout the graduate program.

Admission usually is for fall semester entry. Applicants whose materials are received at the department by January 1 receive preference for admission and financial support. Admission decisions are based on undergraduate achievement, letters of reference, Graduate Record Examination (GRE) General Test scores, the statement of purpose, and samples of scholarly work.

Interpersonal Communication and Relationships

The communication and relationships program is centered on theory complemented by strength in quantitative and qualitative research methods. It focuses on scholarly issues that arise from face-to-face, everyday communication practices. It emphasizes personal relationship and family processes, identity construction, persuasion, and culture.

The goal of the program is to produce scholars who possess sophisticated knowledge of theory and methodology, who are careful consumers of theories and methods, and who can develop their own approaches to communication phenomena. The program emphasizes systematic analysis of the forms, functions, and meanings of messages within various contexts. Its broad social-scientific orientation springs from the belief that many methodological approaches are appropriate to studying and building theoretical explanations of communication.

Graduate students typically enter the program to earn a Ph.D. Advisors and committee members work closely with individual students to select courses from communication studies and other University departments and plan teaching and research experiences that will prepare students well for the employment they seek after graduation.

Media Studies

The graduate program in media studies focuses on the interplay of institutions, texts, and audiences in mediated communication systems. Its central aim is to examine modern media--radio, television, advertising, music, new media, and a wide range of other popular cultural expressions--within their historical, social, political, economic, and cultural contexts. It also uses the mass media as sites for asking basic questions about culture, society, politics, and modernity.

Like the department's other graduate programs, media studies has a strong interdisciplinary flavor. Students draw not only on allied areas in the Department of Communication Studies but on fields across the University.

Rhetoric and Public Advocacy

The program in rhetoric and public advocacy is built on foundation courses in classical and 20th-century rhetorical theory and in an overview of 20th-century rhetorical criticism. Courses from a rhetorical perspective include rhetorical theory, rhetorical criticism, visual rhetoric and politics, public address and public culture, studies in argumentation and freedom of speech, work in science and technology as well as academic inquiry, and historical methods. Cognate work of interest to rhetoricians also can be found in interpersonal communication and relationship studies as well as media studies.

The Ph.D. in rhetorical studies is designed to give students a mature grasp of the specialties and perspectives embraced by the field and to develop research competence essential to a life of productive scholarship.

Work in related disciplines--political science, history, sociology, English, cinema and comparative literature,
anthropology, American studies, and journalism—complements rhetorical studies course offerings. Faculty from the Departments of Rhetoric, Political Science, and American Studies cross-reference their courses on rhetorical topics in this program.

The Project on Rhetorics of Inquiry (POROI) offers a certificate program, allowing doctoral students to specialize in the study of how academic fields use argumentative and linguistic strategies to generate and control knowledge. Many doctoral students also do extensive work in media studies or interpersonal communication to improve their range of teaching opportunities and their research skills.

**Admission**

Applicants to graduate programs in communication studies must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

**Facilities**

The Samuel L. Becker Communication Studies Building is designed to meet the department's research and technological needs.

**Communication Studies Courses**

Courses numbered below 200 are intended primarily for undergraduates; those numbered 200 and above are for graduate students. Graduate students may take 100-level courses for credit, with their committee's approval. Not all courses are offered each semester.

**For Undergraduates**

To register for most undergraduate communication studies courses, students must have earned 30 s.h. and have a cumulative g.p.a. of at least 2.60. However, registration for the following General Education courses is open to all undergraduates, regardless of their grade-point average: 036:017 Theory and Practice of Argument, 036:070 Communication and Everyday Life, and 036:074 Media and Society. Registration in 036:029 First-Year Seminar is open to first- and second-semester students regardless of grade-point average.

**036:001 Core Concepts in Communication Studies**

Introduction to fundamental ideas in communication studies; concepts important for understanding communication in history and today. Prerequisites: g.p.a. of at least 2.60 and 30 s.h. of credit.

**036:002 Workshop in Debate and Forensics**

Public argument on questions of value and policy; opportunities for demonstration and practice in discussion and debate. Corequisite: enrollment in the National Summer Institute in Forensics.

**036:011 Group Communication**

Application of group problem-solving techniques; leadership, group participation; projects in social decision, action. Communication studies majors may apply this course to the following area requirement. AREA: Practice. Prerequisites: g.p.a. of at least 2.60 and 30 s.h. of credit.

**036:012 Interpersonal Communication**

Informal social interaction between individuals; evaluation of students' own interpersonal skills. Communication studies majors may apply this course to the following area requirement. AREA: Practice. Prerequisites: g.p.a. of at least 2.60 and 30 s.h. of credit.

**036:013 Practicum in Debate**

Specialized research, case construction, argument preparation, and practice for intercollegiate policy debate competition. Communication studies majors may apply this course to the following area requirement. AREA: Practice. Prerequisites: g.p.a. of at least 2.60 and participation in A. Craig Baird Debate Forum.

**036:014 Elements of Debate**

Debate and debate procedures; teaching debate in school settings, directing interscholastic debate programs. Communication studies majors may apply this course to the following area requirement. AREA: Practice. Prerequisites: g.p.a. of at least 2.60 and 30 s.h. of credit.

Implications of communication theories, conflict theories; applications to everyday life. Communication studies majors may apply this course to the following area requirement. AREA: Context. Prerequisites: 036:001 and g.p.a. of at least 2.60.

036:041 Gender Roles and Communication 3 s.h.
Gender roles and communication processes; function of communication in gender role development. Communication studies majors may apply this course to the following area requirement. AREA: Practice. Prerequisites: 036:001 and g.p.a. of at least 2.60. Same as 131:041.

036:042 Intercultural Communication 3 s.h.
Relationships among culture-based assumptions, values, thought patterns, communication behavior; theory and practice. Communication studies majors may apply this course to the following area requirement. AREA: Context. Prerequisites: 036:001 and g.p.a. of at least 2.60. Same as 042:042, 187:042.

036:043 Rhetoric, Science, and Technology 3 s.h.
Role of technology in contemporary culture; representation of technology in film and advertising, technology's role in the physical and biological sciences, cultural implications of the information revolution. Communication studies majors may apply this course to the following area requirement. AREA: Context. Prerequisites: 036:001 and g.p.a. of at least 2.60.

036:044 Rhetoric and Public Advocacy 3 s.h.
Rhetoric of campaigns at national, state, local levels; in election years, discussions with candidates, media representatives; individual investigations. Communication studies majors may apply this course to the following area requirement. AREA: Context. Prerequisites: 036:001 and g.p.a. of at least 2.60.

036:048 The Rise of Electronic Media 3 s.h.
Technical, economic, legal development of electronic media in the United States; embedment in social institutions such as family, nation, consumer culture. Communication studies majors may apply this course to the following area requirement. AREA: Context. Prerequisites: 036:001 and g.p.a. of at least 2.60.

036:051 Politics of Popular Culture 3 s.h.
Critical cultural approach to study of popular culture (e.g., television shows, movies, music); mainstream media, alternative forms of mass communication. Communication studies majors may apply this course to the following area requirement. AREA: Context. Prerequisites: 036:001 and g.p.a. of at least 2.60.

036:052 Introduction to Health Communication 3 s.h.
Research, concepts, and theories on communication about health; interpersonal communication in contexts of provider-patient, family, and social support; mass communication and health, including health communication campaigns, public relations, advertising; how news media and Internet present health information. Communication studies majors may apply this course to the following area requirement. AREA: Context. Prerequisites: 036:001 and g.p.a. of at least 2.60.

036:060 Communication Inquiry 3 s.h.
Social scientific methods used to generate knowledge about interpersonal, group, and mediated communication. Communication studies majors may apply this course to the following area requirement. AREA: Research and Criticism. Prerequisites: 036:001 and g.p.a. of at least 2.60.

036:061 Persuasion in Society 3 s.h.
Theories of public persuasion, types of persuasive campaigns and movements in society; rhetorical analysis of advertising, political processes, social unrest. Communication studies majors may apply this course to the following area requirement. AREA: Research and Criticism. Prerequisites: 036:001 and g.p.a. of at least 2.60.

036:062 Feminist Critical Practice 3 s.h.
Feminist approaches to communicative practices. Communication studies majors may apply this course to the following area requirement. AREA: Research and Criticism. Prerequisites: 036:001 and g.p.a. of at least 2.60.

036:064 Media, Advertising, and Society 3 s.h.
Media advertising in contemporary culture; marketing to ethnic, class, gender groups. Communication studies majors may apply this course to the following area requirement. AREA: Research and Criticism. Prerequisites: 036:001 and g.p.a. of at least 2.60.

Development of media systems, content strategies, and audience formations internationally, comparatively. Communication studies majors may apply this course to the following area requirement. AREA: Context. Prerequisites: 036:001, 036:048 or 036:064 or 036:065 or 036:074 or 036:075 or 036:076, and g.p.a. of at least 2.60.

036:087 Culture and Intellectual Property Law 3 s.h. How culture and media are shaped by intellectual property laws. Communication studies majors may apply this course to the following area requirement. AREA: Context. Prerequisites: 036:001, 036:074, completion of research and criticism requirement, and g.p.a. of at least 2.60.

036:088 Mass Communication and American Democracy 3 s.h. Philosophical foundations of American democracy; focus on contemporary issues of news, media and politics, culture, technology, freedom of speech. Communication studies majors may apply this course to the following area requirement. AREA: Theory. Prerequisites: 036:001, 036:044 or 036:051 or 036:061 or 036:074 or 036:075 or 036:076, and g.p.a. of at least 2.60.

036:089 Nonverbal Communication 3 s.h. Theoretical approaches to nonverbal communication as it occurs in everyday context and situations. Communication studies majors may apply this course to the following area requirement. AREA: Theory. Prerequisites: 036:001, 036:012 or 036:040 or 036:041 or 036:042 or 036:070, and g.p.a. of at least 2.60.

036:090 Topics in Communication Studies 3 s.h. Topics vary. Communication studies majors may apply this course to the following area requirement. AREA: Context. Prerequisites: 036:001 and g.p.a. of at least 2.60.

036:091 Organizational Communication 3 s.h. Contemporary concepts of communication's meaning and function in organizations. Prerequisites: 036:001, 036:012 or 036:016, completion of research and criticism and theory requirements, and g.p.a. of at least 2.60.

036:093 Rhetoric of War 3 s.h. Argumentation and rhetorical strategies for going to war, for opposing war, for managing public opinion during the reverses of war, and for making peace; examples from ancient and modern wars in the light of classical rhetorical theory and as affected by modern media. Communication studies majors may apply this course to the following area requirement. AREA: Context. Prerequisites: 036:001, completion of research and criticism and theory requirements, and g.p.a. of at least 2.60.

036:094 Topics in Production 3 s.h.

036:095 Queer Rhetorics 3 s.h. Queer theory: overview; use in communication venues such as television and film, and in everyday life; development of critical thinking skills in relation to cultural constructions of gender, sexuality, race, and other identity categories. Communication studies majors may apply this course to the following area requirement. AREA: Context. Prerequisite: 036:001. Same as 131:095, 154:095.

036:100 Independent Study arr. Creative or research project under faculty supervision. Communication studies majors may apply this course to the following area requirement. AREA: Context. Prerequisites: 036:001, g.p.a. of at least 2.60, and consent of instructor, advisor, and department chair.

036:101 Honors Workshop 1 s.h. Preparation for honors thesis prospectus; coordination of student's individual thesis work, introduction to issues in research design, methods. Communication studies majors may apply this course to the following area requirement. AREA: context. Prerequisites: 036:001, g.p.a. of at least 3.33, and honors standing.

036:102 Honors Thesis 3 s.h. Individual research, writing, or creative production under faculty supervision. Communication studies majors may apply this course to the following area requirement. AREA: Context. Prerequisites: 036:001, 036:101, g.p.a. of at least 3.33, and honors standing.

036:105 Workshop in Teaching Communication and Forensics arr.
Methods, materials, progression, evaluation in teaching and supervising students in courses and class activities; opportunities for observation, demonstration, practice in teaching theater, discussion and debate, individual speech, dramatic and forensic events. Prerequisite: g.p.a. of at least 2.60. Same as 07S:178.

Evolution of consumer culture in the United States since the mid-19th century. Communication studies majors may apply this course to the following area requirement. AREA: Context. Prerequisites: 036:001, 036:074, 036:064 or 036:065 or 036:075 or 036:076, and g.p.a. of at least 2.60.

036:151 Cultural History of Television 3 s.h. Changing structure, content of U.S. television since World War II. Communication studies majors may apply this course to the following area requirement. AREA: Context. Prerequisites: 036:001, 036:074, 036:064 or 036:065 or 036:075 or 036:076, and g.p.a. of at least 2.60.

036:152 Latin American Media 3 s.h. History of Latin American media development; debates over U.S. media and cultural imperialism in the region. Communication studies majors may apply this course to the following area requirement. AREA: Context. Prerequisites: 036:001, 036:074, 036:064 or 036:065 or 036:075 or 036:076, and g.p.a. of at least 2.60.

036:153 Communication Technologies in History 3 s.h. How media has altered culture, society, and human consciousness throughout the history of civilization; examination of human history and communication mediated by a variety of tools and formats (i.e., language, writing, printing, calendars, clocks, photography, the telegraph, the telephone, the phonograph, film, radio, television, computers, etc.); 21st-century technology and communication; senior-level seminar. Communication studies majors may apply this course to the following area requirement. AREA: Context. Prerequisites: 036:001, 036:074, 036:064 or 036:065 or 036:075 or 036:076, and g.p.a. of at least 2.60.

036:155 Visual Rhetoric 3 s.h. Role of visual and material culture in American life; strategic use of images and objects, rather than language, to move audiences to attitude, action. Communication studies majors may apply this course to the following area requirement. AREA: Context. Prerequisites: 036:001, 036:051 or 036:065 or 036:074 or 036:093, completion of research and criticism and theory requirements, and g.p.a of at least 2.60.

036:157 Advanced Topics in Communication Studies 3 s.h. Issues or problems in particular communication contexts. Communication studies majors may apply this course to the following area requirement. AREA: Context. Prerequisites: 036:001, completion of research and criticism and theory requirements, and g.p.a of at least 2.60.

036:158 Rhetoric and Past Public Controversy 3 s.h. Role of rhetoric in public controversy in particular historical time periods; focus on various perspectives, diverse voices, and multiple arguments informing particular movements/issues. Communication studies majors may apply this course to the following area requirement. AREA: Context. Same as 010:141.

036:159 Special Topics 3 s.h. Topics, issues, and debates about production or representation of popular images of race and ethnicity. Same as 129:176.

036:165 Introduction to Rhetorical Criticism 3 s.h. Rhetorical discourses, situations. Communication studies majors may apply this course to the following area requirement. AREA: Research and Criticism. Prerequisites: 036:001, 036:043 or 036:044 or 036:061, completion of research and criticism and theory requirements, and g.p.a of at least 2.60.

036:170 Theories of Persuasion 3 s.h. Persuasion beyond advertisements, political speeches, and sales pitches; persuasion in interpersonal contexts; theories of persuasion examined from three points of view--psychological, social, cultural. Communication studies majors may apply this course to the following area requirement. AREA: Theory. Prerequisites: 036:001, 036:015 or 036:017 or 036:040 or 036:043 or 036:061 or 036:093, completion of research and criticism and theory requirements, and g.p.a. of at least 2.60.

036:173 Technoculture and the Information Society 3 s.h. The Internet and new media in economic, political, and historical context; perspectives from cultural theory, examples from business, popular culture, the arts. Communication studies majors may apply this course to the following area requirement. AREA: Theory. Prerequisites: 036:001, 036:074, completion of research and criticism requirements, and g.p.a. of at least 2.60.
036:176 Advanced Relational Theory  
Relational communication as a persuasive activity and a way of knowing in the world; theories of relational communication vis á vis rhetorical theories, theories of knowledge. Communication studies majors may apply this course to the following area requirement. AREA: Theory. Prerequisites: 036:001, 036:040 or 036:041 or 036:070 or 036:089, completion of research and criticism requirements, and g.p.a of at least 2.60.

For Graduate Students

Graduate students also may take 100-level courses for credit, with approval of their committee.

036:200 Introduction to Research  
Communication studies as a field of scholarship; selection of research problems, major lines of research represented in the department, bibliographical tools for scholarship in the field.

036:201 Issues in Teaching  
Continuation of 036:200; issues, practical tasks, and concerns relevant to effective college or university classroom teaching.

036:210 Introduction to Rhetorics of Inquiry  
How connections between discourses that don't seem connected suggest innovative arguments and ways of crossing boundaries between disciplines. Same as 160:200.

036:220 Rhetorical Criticism  
Approaches to rhetorical analysis of communicative artifacts, acts, events; rhetorical-critical essay writing. Same as 010:230.

036:222 Feminist Cultural Studies  

036:223 Deliberation, Advocacy, Civic Engagement  
Practices of public deliberation in governance and civil society; counterpublic sphere discourses.

036:224 Movements and Media  

036:225 Seminar: Social Movements  

036:241 Theories of Mass Communication  
Major concepts, theories, schools of thought in media studies, mass communication.

036:242 Studies and Practices of Audio and Video Production  

036:250 Introduction to Rhetoric of Science  
How science is related to social and political practices, examined by placing philosophical and pedagogical controversies about scientific method into their historical and rhetorical contexts. Same as 160:250.

036:270 Health Communication  
Theories, concepts, research associated with health communication; interpersonal and mass communication approaches. Offered summer sessions. Same as 172:240.

036:299 Graduate Independent Study  

036:310 Classical Rhetoric  

036:311 Modern Rhetoric  
History of modernist rhetorical theory in the 20th century; relationships with philosophy, social and physical sciences, cultural change. Same as 008:268, 160:311.

036:383 Seminar: Constructs, Communication, and Identity
Concepts of identity and sociality in George Kelly's Personal Construct Theory; their connection to theories of rhetoric, especially Burke, and social community, especially Mead.

036:387 Communication, Cognition, and Emotion
Theoretical and empirical work that integrates communication, cognition, emotion; role of social cognition in communication, theories of emotion, types of emotional experiences; approaches to understanding emotion from perspectives in psychology, social cognition, communication; emotion-related issues such as influence of gender, effects of mood.

036:395 Research Practicum
Individual projects.

036:399 Ph.D. Dissertation
Undergraduate Programs

The department offers a Bachelor of Arts, a Bachelor of Science, and a minor in computer science and in informatics. Both the B.A. and B.S. provide students with the necessary training for employment in careers such as software development and information management. Students who do not want to pursue a computer science career should consider earning a minor in computer science to acquire fundamental knowledge of the use and applications of computers. The department encourages students in both B.A. and B.S. programs to consider earning a second major, certificate, or minor.

Undergraduates majoring in computer science develop competence in programming principles and methodologies, problem-solving techniques, mathematics, and computer systems. Computer science training is critical for many careers in science, engineering, and business.

Qualified undergraduate students who plan to earn the Master of Computer Science degree may apply for the joint Bachelor of Arts/Master of Computer Science program or the joint Bachelor of Science/Master of Computer Science program. The joint programs allow students to count a limited amount of advanced credit toward requirements for both the undergraduate and the graduate degree, enabling them to earn both degrees in five years, less time than is required to earn them separately.

Informatics brings the computational sciences together with the arts, the humanities, and the biological, health, information, natural, and social sciences in an interdisciplinary effort to solve problems. It uses algorithmic techniques and the power of computing to acquire and manipulate data, extract new knowledge, and ultimately examine existing and new problems from broad perspectives.

The informatics major combines fundamental and practical computing knowledge with a choice of cognate areas from the liberal arts and sciences, providing students with the necessary background and specialized skills to work at the interface of computing and another discipline. The major also provides good preparation for graduate study in a variety of disciplines.

Students may declare a major in computer science or in informatics and be admitted to the department's B.A. or B.S. programs at any time on or after admission to the University. Students are admitted to the informatics B.A. program without a chosen cognate area; they may declare a cognate at any time. After admission to the major, computer science students must maintain a g.p.a. of 2.00 or higher in all course work in order to graduate; informatics students must maintain a g.p.a. of at least 2.00 in the informatics core, the statistics course, and the elective(s).

All students are advised at the Academic Advising Center until they have completed 22C:019 Discrete Structures (computer science students) or 22C:080 Programming for Informatics (informatics students). Computer science students being advised at the advising center also may consult with computer science faculty members; informatics students being advised at the center also should consult with the department's informatics program director.

Transfer students who have taken a course approved as equivalent to a required computer science or informatics course are exempt from that course. Transfer course grades are included in the computer science or informatics grade-point average.

Students should consult the Department of Computer Science web site or visit the department's office for information about general policies, elective areas, and internships, scholarships, and student groups, such as the University's chapter of the Association for Computing Machinery (ACM) and Women in Informatics and Computer Science (WICS).

Advanced Placement

The Computer Science Advanced Placement Program test can be used to gain credit for elective semester hours. See Advanced Placement Credit Policy under Prospective Students on the Department of Computer Science web site.
**Early Admission to the Graduate College**

Undergraduate computer science or informatics students who have 6 s.h. or less to earn toward graduation may apply for early admission to the Graduate College. Early admission allows students in their final undergraduate semester to take courses for graduate credit in addition to the courses they need to complete their bachelor's degrees.

**Bachelor of Arts in Computer Science**

The Bachelor of Arts in computer science requires a minimum of 120 s.h., including at least 41 s.h. of work for the major. The B.A. program is designed for students who wish to gain considerable knowledge in computer science and have flexibility in selecting electives. Students preparing for careers in the computing field are encouraged to supplement the base requirements with additional computer science courses. The program's flexibility makes it suitable for combination with other majors.

All students must complete the College of Liberal Arts and Sciences General Education Program. Students who are enrolled in the B.A. program but who might switch to the B.S. program should choose their General Education natural science courses carefully; see "Natural Science Sequences" under "Bachelor of Science," below.

The B.A. major in computer science requires the following core courses. They may not be taken pass/nonpass. Students also must take one advanced computer science elective.

### COMPUTER SCIENCE CORE

All of these:

ADVANCED ELECTIVES

Bachelor of Arts students must earn at least 3 s.h. in advanced electives.

- 22C:072/22M:072 Elementary Numerical Analysis 3 s.h.
- 22C:096 Topics in Computer Science (with department approval) arr.
- 22C:099 Honors in Computer Science or Informatics (may be counted once as an advanced course) arr.

Any 100-level computer science course numbered above 22C:110

With department approval, students may count most 22C courses numbered above 200 as advanced courses.

Bachelor of Science in Computer Science

The Bachelor of Science in computer science requires a minimum of 120 s.h., including at least 63 s.h. of work for the major. The B.S. program is more rigorous than the B.A. and is designed to provide in-depth training for students who may pursue graduate work in computer science. However, the choice between the B.A. or the B.S. should be dictated by students' personal career goals. The B.S. is not required for graduate study, and many students not interested in graduate study may choose the B.S. to enhance their skills and job prospects.

All students must complete the College of Liberal Arts and Sciences General Education Program. When chosen carefully, courses that fulfill the General Education Program natural sciences requirement also satisfy the Department of Computer Science natural science requirement (see "Natural Science Sequences," below).

B.S. students complete all requirements for the B.A. major in computer science. They also complete an additional mathematics course, a course on computation theory, another computer science elective, two technical electives, and the natural science requirement. These courses cannot be taken pass/nonpass.

COMPUTER SCIENCE CORE

All of these:

- 22C:016 Computer Science I: Fundamentals 4 s.h.
- 22C:019 Discrete Structures 3 s.h.
- 22C:021 Computer Science II: Data Structures 4 s.h.
- 22C:022 Object-Oriented Software Development 4 s.h.
- 22C:031 Algorithms 3 s.h.
- 22C:111 Programming Language Concepts 3 s.h.

One of these:

- 22C:060 Computer Organization 3 s.h.
- 055:035 Computer Architecture and Organization 3 s.h.

One of these:

- 22C:112 Operating Systems 3 s.h.
- 22C:113 Introduction to Systems Software 3 s.h.
- 22C:118 Introduction to Networks and Their Applications 3 s.h.
- 22C:169 Computer Security 3 s.h.

MATHEMATICS CORE

Calculus I--one of these:

- 22M:025 Calculus I 4 s.h.

Calculus II--one of these:

- 22M:026 Calculus II 4 s.h.
- 22M:032 Engineering Mathematics II: Multivariable Calculus 4 s.h.
Linear algebra:
22M:027 Introduction to Linear Algebra 4 s.h.

Probability and statistics—one of these:
22S:039 Probability and Statistics for the Engineering and Physical Sciences 3 s.h.
22S:120 Probability and Statistics 4 s.h.
Another probability and statistics course with a calculus prerequisite, approved by a computer science advisor

ADVANCED ELECTIVES

Bachelor of Science students must earn at least 6 s.h. in advanced electives.

22C:072/22M:072 Elementary Numerical Analysis 3 s.h.
22C:096 Topics in Computer Science (with department approval) arr.
22C:099 Honors in Computer Science or Informatics (may be counted once as an advanced course) arr.
Any 100-level computer science course numbered above 22C:110

With department approval, students may count most 22C courses numbered above 200 as advanced courses.

COMPUTATION THEORY

One of these:
22C:131 Limits of Computation 3 s.h.
22C:135 Theory of Computation 3 s.h.

TECHNICAL ELECTIVES

Bachelor of Science students must earn 6 s.h. in technical electives. Advanced elective courses in computer science or in any other department, approved by an advisor, can be counted as technical electives. For a list of approved technical electives, see Technical Electives for the B.S. under Courses on the Department of Computer Science web site.

NATURAL SCIENCE SEQUENCES

For the B.S., students take two or more courses in a sequence (totaling at least 7 s.h.) in a cognate area of natural science. The natural science sequence is intended to enhance the student's perspective by providing a deeper understanding of the scientific method. Typically, it consists of a sequence of courses taken in the same science department. Students often choose courses that also fulfill the General Education Program natural sciences requirement. Some possible choices are listed below; the department chair may approve others.

CLEP/APP credit may be used to satisfy part or all of the natural science requirement only if the appropriate science department at The University of Iowa accepts the credit as equivalent to one or more of the specific courses listed below.

Astronomy
029:061 General Astronomy I 4 s.h.
029:062 General Astronomy II 4 s.h.

Biology/Chemistry
002:010 Principles of Biology I 4 s.h.
002:011 Principles of Biology II 4 s.h.
004:011 Principles of Chemistry I 4 s.h.
Chemistry

004:011 Principles of Chemistry I  4 s.h.
004:012 Principles of Chemistry II  4 s.h.

Geography

044:003 Introduction to Earth Systems Science  4 s.h.
044:005 Foundations of GIS  3 s.h.

Geoscience

012:003 Earth History and Resources  4 s.h.
or
012:005 Introduction to Geology  4 s.h.
012:008 Introduction to Environmental Science  3-4 s.h.

Physics

One of these sequences:
029:027-029:028 Physics I-II  8 s.h.
029:081-029:082 Introductory Physics I-II (recommended)  8 s.h.

Bachelor of Arts, Bachelor of Science in Informatics

The Bachelor of Arts in informatics requires a minimum of 120 s.h., including at least 43-50 s.h. of work for the major. The Bachelor of Science in informatics requires a minimum of 120 s.h., including at least 53-55 s.h. of work for the major. Both majors combine informatics course work that provides a strong foundation in computing with course work in a cognate discipline. Required credit for the major depends on the choice of cognate area.

The Bachelor of Arts major offers the cognate areas of fine and applied arts (art, music), human-computer interaction, health sciences, linguistics, social sciences (economics, geography, sociology), and individualized cognates.

The Bachelor of Science major offers the cognate areas of bioinformatics and individualized cognates.

All informatics students complete the informatics core, one (B.A.) or two (B.S.) electives, a statistics course, and a set of courses in their chosen cognate area. Students also must complete the College of Liberal Arts and Sciences General Education Program.

Students are expected to possess an appropriate high school background in mathematics.

INFORMATICS CORE

The informatics core consists of six required computing courses (at least 18 s.h.) that emphasize data manipulation, databases, and networking. It provides more applications-oriented content than the traditional computer science curriculum yet is designed to offer students a sound basis in underlying computer sciences themes and techniques.

One of these:
22C:080 Programming for Informatics  4 s.h.
22C:104 Introduction to Informatics  3 s.h.

All of these:
22C:005 Introduction to Computer Science  3 s.h.
22C:082 Human-Computer Interaction  3 s.h.
22C:084 Databases for Informatics  3 s.h.
22C:086 Networking and Security for Informatics  3 s.h.
22C:094 Informatics Project  3 s.h.
INFORMATICS ELECTIVES

B.A. students must complete at least one course (3 s.h.) and B.S. students must complete at least two (6 s.h.) from a list of approved computing informatics electives. In addition to the courses listed below, students may have additional choices from the Department of Electrical and Computer Engineering, the Department of Management Sciences, and the School of Library and Information Science; consult the informatics program director for additional choices.

22C:096 Topics in Computer Science (section approved by advisor) 3 s.h.
22C:109 Programming Languages and Tools (section approved by advisor) 3 s.h.
A computer science course numbered above 22C:110 3 s.h.

STATISTICS COURSE

B.A. and B.S. students must complete one introductory statistics course. Some cognates require a specific statistics course or an alternative statistics course not on this list (e.g., 034:010 Quantitative Data Analysis for the human-computer interaction cognate). Students should consult with their advisor to choose a statistics course appropriate for their cognate area.

One of these (3-4 s.h.):

22S:008 Statistics for Business 4 s.h.
22S:025 Elementary Statistics and Inference 3 s.h.
22S:030 Statistical Methods and Computing 3 s.h.
22S:039 Probability and Statistics for the Engineering and Physical Sciences 3 s.h.
22S:101 Biostatistics 3 s.h.
22S:102 Introduction to Statistical Methods 3 s.h.
22S:120 Probability and Statistics 4 s.h.

Bachelor of Arts Cognates

Detailed requirements for each cognate are listed on the Department of Computer Science web site.

ART

The informatics major with an art cognate requires 46 s.h. of work for the major, including 21 s.h. in cognate courses. Students learn about the design and maintenance of Web services, applications of modern computerized artistic tools, and benefits and limitations of computers as a digital medium. They also gain insight into computerized tool design that is guided by knowledge of an artist's requirements. The art cognate may lead to careers in web development, technology coordination for artistic productions, development of digital artistic tools, and artistic or technical development for entertainment companies. Cognate courses are primarily in art history, design, elements of art, and photography.

All of these:

01A:003 Basic Drawing 3 s.h.
01D:028 Graphic Design I 3 s.h.
01D:082 Introductory Computer Graphic Design 3 s.h.

Two of these:

01H:001 Art and Visual Culture 3 s.h.
01H:002 Arts of Africa 3 s.h.
01H:003 Art of Pre-Columbian America, Native America, and Oceania 3 s.h.
01H:004 Masterpieces: Art and Cultural Paradigms 3 s.h.
01H:005 Western Art and Culture Before 1400 3 s.h.
01H:006 Western Art and Culture After 1400 3 s.h.
01H:007 Writing About the Visual Arts 3 s.h.
01H:008 Themes in Global Art 3 s.h.
01H:010 Tutorial for Majors: Art History as a Discipline 3 s.h.
01H:016 Asian Art and Culture 3 s.h.
01H:021 Introduction to the Art of West Africa 3 s.h.
01H:022 Introduction to the Art of Central Africa 3 s.h.
01H:028 Introduction to Ancient Art 3 s.h.
01H:031 Introduction to the Art of China 3 s.h.
01H:033 Introduction to the Art of Japan 3 s.h.
01H:040 Introduction to Medieval Art 3 s.h.
01H:047 Introduction to Renaissance Art 3 s.h.
01H:053 Introduction to Baroque Visual Culture 3 s.h.
01H:062 Introduction to Nineteenth-Century Art 3 s.h.
01H:066 Introduction to American Art 3 s.h.
01H:073 Introduction to Modern/Contemporary Art 3 s.h.
01H:084 Introduction to European Architecture 3 s.h.
01H:090 Introduction to Art and Religion 3 s.h.
01H:098 Undergraduate Topics in Art History 3 s.h.
01H:099 Undergraduate Seminar in the History of Art 3 s.h.

At least 6 s.h. from these; 3 s.h. must be 100-level:
01D:064 Introduction to Computer-Aided Design for 3-D Design 3 s.h.
01D:128 Computer Graphic Design 3 s.h.
01D:133 Graphic Design II 3 s.h.
01L:040 Introduction to Digital Imaging 3-4 s.h.
01L:140 Digital Imaging 3-4 s.h.

ECONOMICS

The informatics major with an economics cognate requires at least 48 s.h. of work for the major, including 24 s.h. in cognate courses, which are primarily from economics.

All of these:

22M:017 Calculus and Matrix Algebra for Business 4 s.h.
06E:001 Principles of Microeconomics 4 s.h.
06E:002 Principles of Macroeconomics 4 s.h.
06E:104 Microeconomic Theory 3 s.h.
06E:105 Macroeconomics 3 s.h.

Two of these:

06E:111 Personnel Economics 3 s.h.
06E:113 Health Economics 3 s.h.
06E:117 Money, Banking, and Financial Markets 3 s.h.
06E:119 Policy Analysis 3 s.h.
06E:125 Global Economics and Business 3 s.h.
06E:129 Economic Growth and Development 3 s.h.
06E:133 Environmental and Natural Resource Economics 3 s.h.
06E:135 Regional and Urban Economics 3 s.h.
06E:141 Industry Analysis 3 s.h.
06E:145 Transportation Economics 3 s.h.
06E:158 American Economic History 3 s.h.
06E:160 Household Finance 3 s.h.
06E:164 Economies in Transition 3 s.h.
06E:165 Sports Economics 3 s.h.
06E:169 Introductory Topics in Economics arr.
06E:171 Antitrust Economics 3 s.h.
06E:172 Law and Economics 3 s.h.
06E:173 International Economics 3 s.h.
06E:174 Monetary Economics 3 s.h.
06E:175 Labor Economics 3 s.h.
06E:176 Public Sector Economics 3 s.h.
06E:177 Industrial Organization 3 s.h.
06E:179 History of Economic Thought 3 s.h.
GEOGRAPHY

The informatics major with a geography cognate requires 48 s.h. of work for the major, including 23 s.h. in cognate courses, which are primarily from geography.

All of these:

044:001 Introduction to Human Geography 4 s.h.
044:003 Introduction to Earth Systems Science 4 s.h.
044:005 Foundations of GIS 3 s.h.

One of these:

044:010 The Contemporary Global System 4 s.h.
044:011 Population Geography 3 s.h.
044:015 Introduction to Political Geography 3 s.h.
044:019 Contemporary Environmental Issues 3 s.h.
044:030 The Global Economy 3 s.h.
044:035 World Cities 3 s.h.

One of these:

044:110 GIS for Environmental Studies: Introduction 3 s.h.
044:112 Mapping American Cities and Regions 3 s.h.
044:180 Field Methods in Physical Geography 2-4 s.h.
044:181 Field Methods: Mapping and Mobile Computing 3 s.h.

Two of these:

044:105 Introduction to Environmental Remote Sensing 3 s.h.
044:110 GIS for Environmental Studies: Introduction 3 s.h.
044:112 Mapping American Cities and Regions 3 s.h.
044:113 Principles of Geographical Information Systems 3 s.h.
044:125 Environmental Impact Analysis 4 s.h.
044:128 GIS for Environmental Studies: Applications 3 s.h.
044:136 Planning Livable Cities 3 s.h.
044:137 Health and Environment: GIS Applications 3 s.h.
044:139 Spatial Analysis and Location Models 3 s.h.
044:145 Advanced Geographic Remote Sensing 4 s.h.

HEALTH SCIENCES

The informatics major with a health sciences cognate requires 50 s.h. of work for the major, including 25 s.h. in cognate courses. The health sciences cognate is intended for students interested in applications of computing to the health sciences. It may lead to careers in medical research or hospital settings and to graduate-level professional degree programs in public health or to graduate study in health or medical informatics. Cognate courses are from anatomy and cell biology, biology, chemistry, health and sport studies, nursing, and psychology.

One of these:

002:002 Introductory Animal Biology 4 s.h.
002:010 Principles of Biology I 4 s.h.

One of these:
004:007 General Chemistry I 3 s.h.
004:011 Principles of Chemistry I 4 s.h.

One of these:
027:053 Human Anatomy 3 s.h.
060:110 Principles of Human Anatomy 3 s.h.

All of these:
028:075 Health in Everyday Life 3 s.h.
028:141 Health Promotion Theory and Practice 3 s.h.
028:145 Health Promotion Processes 3 s.h.
031:001 Elementary Psychology 3 s.h.

One of these:
031:014 Introduction to Developmental Science 3 s.h.
096:030 Human Development and Behavior 3 s.h.

HUMAN-COMPUTER INTERACTION

The informatics major with a cognate in human-computer interaction requires a minimum of 45 s.h. of work for the major, including 20-23 s.h. in cognate courses. The cognate is intended for students interested in designing useful and usable technologies. It can lead to careers in interaction design, web design, implementation of user interfaces and evaluation of human-computer interactions, as well as provide valuable skills for graduate studies in human-computer interaction.

The cognate's courses are drawn largely from psychology, sociology, and industrial engineering. Four required courses include foundational aspects of psychology or sociology, an examination of basic human abilities and performance relevant to information technology use, and an introduction to research topics in human-computer interaction.

Students must complete either the psychology area or the sociology area.

Psychology

Students who choose the psychology area must satisfy the statistics requirement for the informatics core by taking 22S:008 Statistics for Business, 22S:025 Elementary Statistics and Inference, 22S:101 Biostatistics, or 22S:102 Introduction to Statistical Methods. The psychology area requires the following courses.

All of these (14 s.h.):
031:002 Biological Psychology 4 s.h.
031:010 Research Methods in Psychology 4 s.h.
031:016 Introduction to Cognitive Psychology 3 s.h.
22C:196 Topics in Computer Science (topic must be human-computer interaction) 3 s.h.

Two of these (6 s.h.):
031:014 Introduction to Developmental Science 3 s.h.
031:015 Introduction to Social Psychology 3 s.h.
031:123 Psychology of Learning 3 s.h.
031:133 Sensation and Perception 3 s.h.

Sociology

Students who choose the sociology area must satisfy the statistics requirement for the informatics core by taking 034:010 Quantitative Data Analysis. The sociology area requires the following courses.

All of these (12-13 s.h.):
034:001 Introduction to Sociology Principles 3-4 s.h.
034:009 Sociological Theory 3 s.h.
034:011 Research Methods 3 s.h.
22C:196 Topics in Computer Science (topic must be human-computer interaction) 3 s.h.

Three of these (9-10 s.h.):

034:020 Principles of Social Psychology 3-4 s.h.
034:125 Small Group Analysis 3 s.h.
056:144 Human Factors 3 s.h.
056:147 Ergonomics 3 s.h.
056:148 Human-Centered System Design 3 s.h.

LINGUISTICS

The informatics major with a linguistics cognate requires 46 s.h. of work for the major, including at least 21 s.h. in cognate courses. Linguistics, the scientific study of human languages, is directly related to psychology, anthropology, and computer science as well as to more applied fields such as second language acquisition or speech and hearing science. The cognate focuses on computational representations of syntax and semantics for processing natural language. Cognate courses are drawn primarily from linguistics.

All of these:

103:100 Introduction to Linguistics 3 s.h.
103:110 Articulatory and Acoustic Phonetics 3 s.h.
103:111 Syntactic Analysis 3 s.h.
103:112 Phonological Analysis 3 s.h.
103:140 Introduction to Computational Linguistics 3 s.h.

Language history--one of these:

103:131/08L:131 History of the English Language 3 s.h.
103:139/039:139 Chinese Historical Phonology 3 s.h.

Old language--one of these:

008:141 Old English Beowulf 3 s.h.
103:132/008:140 Elementary Old English 3 s.h.
20E:110/039:110 First-Year Sanskrit: First Semester 4 s.h.

20L:012 Golden Age of Roman Poetry 3 s.h.

MUSIC

The informatics major with a music cognate requires 48 s.h. of work for the major, including 23 s.h. in cognate courses. The music cognate is intended for students interested in audio recording, manipulation of sound, and digital media. It may help students prepare for careers in the entertainment industry. Cognate courses are primarily from the music, with some from cinema and comparative literature and from theatre arts. Entering students must possess basic musicianship skills; an audition may be required for admission.

All of these:

025:001 Fundamentals of Music for Majors 3 s.h.
025:002 Musicianship and Theory I 4 s.h.

INDIVIDUALIZED COGNATES

Students interested in developing individualized cognates may work with an informatics faculty advisor. Individualized cognates may be drawn primarily from one department or an appropriate mix of departments. In the Bachelor of Arts, individualized cognates require an approved set of cognate courses totaling 18-25 s.h.

Bachelor of Science Cognates

Detailed requirements for the cognate are listed on the Department of Computer Science web site.

BIOINFORMATICS

The informatics major with a bioinformatics cognate requires 55 s.h. of work for the major, including 27 s.h. in cognate courses. The bioinformatics cognate is intended for students interested in applications of computing to the biological sciences. It may lead to careers in laboratory research, data management, and other related areas. It also is preparation for graduate programs in bioinformatics or genetics. The cognate offers a choice of several areas: genome bioinformatics, phylogenics and evolution, proteomics, and systems biology. Cognate courses are drawn primarily from biology and chemistry.

All students in the bioinformatics cognate must complete the following two sequences.

002:010-002:011 Principles of Biology I-II  
004:011-004:012 Principles of Chemistry I-II

Students also must complete one of the following four areas.

**Genome Bioinformatics**

Both of these:

002:128 Fundamental Genetics  
002:131 Evolution

Two of these:

002:170 Bioinformatics  
002:174 Computational Genomics  
002:176 Microarray Data Analysis

**Phylogenetics and Evolution**

Both of these:

002:128 Fundamental Genetics  
002:131 Evolution
Two of these:

002:134 Ecology  
002:160 Molecular Phylogenetics  
002:162 Population Genetics and Molecular Evolution

0 s.h.

3 s.h.

3 s.h.

Proteomics

All of these:

002:133 Cell Biology Laboratory  
004:121 Organic Chemistry I  
009:120 Biochemistry and Molecular Biology I  
009:241 Biophysical Chemistry I

3 s.h.

3 s.h.

3 s.h.

3 s.h.

Systems Biology

Both of these:

004:121 Organic Chemistry I  
061:157 General Microbiology

3 s.h.

5 s.h.

One of these:

002:124 Animal Physiology  
061:147 Survey of Immunology  
061:160 Microbial Physiology  
061:170 Microbial Genetics

3 s.h.

4 s.h.

3 s.h.

3 s.h.

INDIVIDUALIZED COGNATES

Individualized cognates may be drawn primarily from one department or an appropriate mix of departments. In the Bachelor of Science, individualized cognates require an approved set of cognate courses totaling 27-31 s.h. Students interested in developing individualized cognates should contact the Department of Computer Science for the name of an informatics faculty advisor.

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

B.A. in Computer Science

Before the third semester begins: math through calculus I, three courses in the major (e.g., 22C:016 Computer Science I: Fundamentals, 22C:019 Discrete Structures, and 22C:021 Computer Science II: Data Structures), and at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: math through calculus II, two more courses in the major (e.g., 22C:022 Object-Oriented Software Development and 22C:060 Computer Organization), and at least one-half of the semester hours required for graduation

Before the seventh semester begins: at least two more courses in the major and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: at least one more course in the major

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

B.S. in Computer Science

These checkpoints do not include the required natural science sequence, which students usually complete as part of their General Education Program natural science component.
Before the third semester begins: math through calculus I, three courses in the major (e.g., 22C:016 Computer Science I: Fundamentals, 22C:019 Discrete Structures, and 22C:021 Computer Science II: Data Structures), and at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: math through calculus II, at least two more courses in the major (e.g., 22C:022 Object-Oriented Software Development and 22C:060 Computer Organization), and at least one-half of the semester hours required for graduation

Before the seventh semester begins: at least three more courses in the major and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: at least two more courses in the major

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

B.A., B.S. in Informatics

Note: Much of the work in informatics and in the cognate area needs to be taken in sequence, so students must begin fulfilling major requirements as early as possible.

Before the third semester begins: 22C:005 Introduction to Computer Science, 22C:080 Programming for Informatics, one or two courses in the cognate area, the statistics course, and at least one-quarter of the semester hours required to graduate

Before the fifth semester begins: the three mid-level informatics courses (22C:082 Human-Computer Interaction, 22C:084 Databases for Informatics, and 22C:086 Networking and Security for Informatics), the statistics course (if not already completed), two or three more courses in the cognate area, and at least one-half of the semester hours required to graduate

Before the seventh semester begins: 22C:094 Informatics Project, an informatics elective course, two or three courses in the cognate area, and at least three-quarters of the semester hours required to graduate

Before the eighth semester begins: a second informatics elective course (for BS students) and courses in the cognate area

During the eighth semester: enrollment in all remaining course work in the major; all remaining General Education courses, and a sufficient number of semester hours to graduate

Honors

In order to pursue honors study in the Department of Computer Science, students must be members of the University of Iowa Honors Program, which requires them to maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University of Iowa Honors Program for more information).

To graduate with honors in computer science or informatics, students must complete 4-6 s.h. of 22C:099 Honors in Computer Science or Informatics and submit an acceptable honors thesis. Students are responsible for finding a faculty member willing to supervise their honors project. The faculty member must approve the proposed project and a timetable for the work. Students register for 22C:099 Honors in Computer Science or Informatics under the thesis supervisor's instructor number. See the Computer Science Undergraduate Student Handbook for details. Students may count 3 s.h. of 22C:099 Honors in Computer Science or Informatics toward an advanced or technical elective for the B.S. in computer science.

Minor in Computer Science

The minor in computer science requires a minimum of 17 s.h. in computer science, including 12 s.h. in courses taken at The University of Iowa. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass. Students excused from courses required for the minor may substitute other computer science electives. The minor requires the following courses.

All of these:

22C:016 Computer Science I: Fundamentals 4 s.h.
22C:019 Discrete Structures 3 s.h.
22C:021 Computer Science II: Data Structures 4 s.h.

At least one of these:

22C:022 Object-Oriented Software Development 4 s.h.
22C:031 Algorithms 3 s.h.
22C:060 Computer Organization 3 s.h.

Students choose one additional computer science course to complete the required 17 s.h.

Students may not use the following courses to satisfy requirements for the minor.

22C:001 Computer Literacy 3 s.h.
22C:002 First-Year Seminar 1 s.h.
22C:005 Introduction to Computer Science 3 s.h.
22C:080 Programming for Informatics 4 s.h.
22C:082 Human-Computer Interaction 3 s.h.
22C:084 Databases for Informatics 3 s.h.
22C:086 Networking and Security for Informatics 3 s.h.
22C:094 Informatics Project 3 s.h.
22C:104 Introduction to Informatics 3 s.h.

Students in electrical and computer engineering who have completed 055:033 Introduction to Software Design, 057:017 Computers in Engineering, and 059:006 Engineering Problem Solving II are considered to have satisfied the requirements for 22C:016 Computer Science I: Fundamentals and 22C:022 Object-Oriented Software Development.

Students may declare the computer science minor on ISIS; application triggers an audit for the minor that is available on ISIS the next day of the academic session.

Minor in Informatics

The minor in informatics requires a minimum of 16 s.h., including at least 12 s.h. in courses taken at The University of Iowa. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass.

Students earning a major in computer science or in management information systems (Tippie College of Business) may not earn a minor in informatics.

The informatics minor must include the informatics core (13 s.h.) and one statistics course (3-4 s.h.), as follows.

Informatics core--all of these:

22C:005 Introduction to Computer Science 3 s.h.
22C:080 Programming for Informatics 4 s.h.
22C:084 Databases for Informatics 3 s.h.

Informatics core--one of these:

22C:082 Human-Computer Interaction 3 s.h.
22C:086 Networking and Security for Informatics 3 s.h.

Statistics--one of these:

22S:008 Statistics for Business 4 s.h.
22S:025 Elementary Statistics and Inference 3 s.h.
22S:030 Statistical Methods and Computing 3 s.h.
22S:039 Probability and Statistics for the Engineering and Physical Sciences 3 s.h.
22S:101 Biostatistics 3 s.h.
22S:102 Introduction to Statistical Methods 3 s.h.
22S:120 Probability and Statistics 4 s.h.

Students may declare the informatics minor on ISIS; application triggers an audit for the minor that is available on ISIS the next day of the academic session.

Combined B.A./M.C.S. and B.S./M.C.S.

The joint Bachelor of Arts/Master of Computer Science and Bachelor of Science/Master of Computer Science programs allow qualified students to obtain an undergraduate and a graduate degree in computer science in five years. The B.A./M.C.S. and B.S./M.C.S. each require a total of 140 s.h., which is 12 s.h. less than the sum of the requirements for both degrees.
Students in the joint programs must complete all requirements for each degree. They may count a maximum of 12 s.h. (four courses) toward both degrees; the four courses must be taken during the fourth year, after admission to the joint program, and must satisfy degree requirements of both the B.A. or B.S., and the M.C.S.

When a student withdraws from the joint program before completing his or her bachelor's degree, credit earned in the four courses is counted only toward the undergraduate degree.

Students are granted the B.A. or B.S. when they complete all requirements for the undergraduate degree.

Students apply for admission to the joint program during their third year as undergraduates and enter the program at the beginning of their fourth year. They usually complete the joint program comfortably in one year after finishing their B.A. or B.S. requirements.

Applicants to the joint program must be enrolled as B.A. or B.S. students in computer science at The University of Iowa; must have completed a minimum of 80 s.h. at the time of admission to the joint program, with at least 30 s.h. earned at The University of Iowa; and must have a cumulative University of Iowa g.p.a. of at least 3.25, and a g.p.a. of at least 3.25 in the computer science major (computed on math prerequisites and core computer science course work taken at The University of Iowa).

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

Applicants must submit an application for admission to the program, a statement of purpose, three letters of recommendation, and transcripts from all colleges attended; they also must apply to the Graduate College. Graduate Record Examination scores are not required. Applicants whose first language is not English must submit scores on the Test of English as a Foreign Language (TOEFL) or the International English Testing System (IELTS).

For more detailed information, visit the Department of Computer Science web site.

**Graduate Programs**

The department offers three graduate degree programs: the Master of Computer Science (M.C.S.), and a Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) in computer science.

The M.C.S. is a nonresearch, course-based program for students who wish to enhance their careers with advanced knowledge of computer science. The Ph.D. emphasizes preparation for research, teaching, and scholarly work in academic settings or private, industrial, or government laboratories. The M.S. is granted only to students working toward the Ph.D.

Admission decisions are based on prior academic performance, letters of reference, scores on the Graduate Record Examination (for Ph.D. applicants), and the applicant's statement about background and purpose. Students need not have a master's degree to begin the Ph.D. program or to receive the Ph.D. A student admitted without a master's degree may choose to receive an M.S. or M.C.S. while working toward the doctorate.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

Current and prospective graduate students should consult the Computer Science Graduate Student Handbook, available from the department's office or on its web site. The handbook provides detailed information about specific degree requirements, such as required courses, examinations, and dissertation requirements. For general information about the department, faculty, and research activities, contact the Department of Computer Science or visit its web site.

**Master of Computer Science**

The Master of Computer Science (M.C.S.) requires a minimum of 32 s.h. of graduate credit. Students must complete at least 26 s.h. at The University of Iowa.

Basic M.C.S. requirements are as follows. Consult the Computer Science Graduate Student Handbook for detailed information about M.C.S. requirements and graduate study policies.

**FOUNDATIONS**

One of these:

- 22C:131 Limits of Computation 3 s.h.
- 22C:135 Theory of Computation 3 s.h.
- 22C:231 Design and Analysis of Algorithms 3 s.h.
SYSTEMS

One of these:

22C:160 High Performance Computer Architecture 3 s.h.
22C:166 Distributed Systems and Algorithms 3 s.h.
22C:181 Formal Methods in Software Engineering 3 s.h.
22C:185 Programming Language Foundations 3 s.h.
22C:186 Introduction to Compiler Construction 3 s.h.

COLLOQUIUM

M.C.S. students must earn at least 2 s.h. in 22C:399 Research Seminar: Colloquium Series.

ELECTIVES

M.C.S. students fill their remaining 24 s.h. with a combination of computer science graduate courses, reading and project courses, and non-computer science graduate courses approved by their advisor.

Students must take at least six computer science graduate courses (18 s.h.), numbered 22C:120 or above, excluding 22C:191 Research for Thesis, 22C:197 Readings in Computer Science, 22C:198 Individual Programming Projects, 22C:290 Readings for Research, and 22C:399 Research Seminar: Colloquium Series. They may count a maximum of 6 s.h. of computer science independent study courses and/or technical or quantitative non-computer science graduate courses, approved by their advisor, toward the elective requirement. Up to 3 s.h. of independent study courses (22C:191 Research for Thesis, 22C:197 Readings in Computer Science, 22C:198 Individual Programming Projects, and 22C:290 Readings for Research) may be counted toward the requirement.

Master of Science

The Master of Science in computer science is offered only to students working toward a Ph.D. in computer science. Students who are interested primarily in a master’s degree and do not intend to pursue a more advanced degree should apply to the M.C.S. program.

Doctor of Philosophy

The Doctor of Philosophy in computer science requires a minimum of 72 s.h. of graduate credit, three examinations (qualifying, comprehensive, and final), and a dissertation.

Basic Ph.D. requirements are as follows. Consult the Computer Science Graduate Student Handbook for detailed information about Ph.D. requirements and graduate study policies.

CORE REQUIREMENT

Both of these:

22C:231 Design and Analysis of Algorithms 3 s.h.
22C:135 Theory of Computation 3 s.h.

BREADTH

Ph.D. students must complete at least three of the following courses, with at least one course selected from each area (9 s.h.).

Systems and software:

22C:160 High Performance Computer Architecture 3 s.h.
22C:169 Computer Security 3 s.h.
22C:196 Topics in Computer Science (section approved by advisor) 3 s.h.

Networks and distributed systems:
PRACTICE

Ph.D. students must complete at least one course (3 s.h.) with significant practical or implementation-oriented content. Each semester the department designates courses that satisfy this requirement. The following are typical selections.

<table>
<thead>
<tr>
<th>Course Number</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>

</tr>
</tbody>
</table>

COGNATE AREA

Ph.D. students are required to select, in consultation with their advisor, a total of 9 s.h. in courses that constitute coherent coverage of an external cognate area. Choices include, but are not limited to, mathematics, statistics, genetics, biology, and engineering disciplines.

COLLOQUIUM

Ph.D. students must earn at least 4 s.h. in 22C:399 Research Seminar: Colloquium Series.

ELECTIVES

Ph.D. students fill their remaining semester hours with a selection of computer science graduate courses (excluding those numbered 22C:101 through 22C:119) and non-computer science graduate courses approved by their advisor.

QUALIFYING EXAM

Ph.D. students are required to pass a qualifying examination by the end of their second year of graduate study. Once students select a topic in consultation with their advisor, they are assigned a three-member faculty examination panel by the department. Then they prepare a written prospectus for review by the committee, followed by an oral presentation.

COMPREHENSIVE EXAM

The comprehensive examination is an evaluation of the student's mastery of a research area at or near completion of formal course work, and before preparation of the dissertation. The exam may be written, oral, or both, at the department's discretion, and is administered by a faculty committee. The comprehensive exam typically should be completed by the end of the student's third year and no later than the end of the fourth year in the Ph.D. program.

DISSERTATION

Each Ph.D. student must write a dissertation, a significant, original contribution to the field of computer science. Once students obtain some preliminary results and can identify and describe the boundaries of their dissertation, they prepare a written proposal for their committee's review. The dissertation must be prepared in accordance with the format specified in the Graduate College Thesis Manual.

FINAL ORAL EXAMINATION
Once the dissertation is complete and has been reviewed by the student's committee, a final oral examination is administered on campus. This examination must take place no sooner than the semester following successful completion of the comprehensive examination and no later than five years after completion of the comprehensive exam.

**Computer Science Courses**

**Courses for Graduate Students from Other Disciplines**

Competence and exposure to computer science are not only useful, they often are prerequisite to advanced study and research in many disciplines. For most graduate students from other disciplines, an appropriate first course is 22C:104 Introduction to Informatics.

**Primarily for Undergraduates**

22C:001 Computer Literacy 3 s.h.
Computer literacy; nature, uses, limitations of computers and computing; impact of computer technology on society; privacy, ethics, security; overview of computer organization; introduction to applications, including communications, word processing, desktop publishing, spreadsheets, graphics, databases, World Wide Web. No credit for students who have completed a higher-numbered 22C course or 06K:070.

22C:002 First-Year Seminar 1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Prerequisite: first- or second-semester standing.

22C:005 Introduction to Computer Science 3 s.h.
Broad overview; representation of information, microprocessor fundamentals, databases, networks, graphics, impact and limitations of technology, multimedia web page development, Flash movie clips. Prerequisite: closed to students who have completed a computer science course numbered 22C:021 or above. GE: Quantitative or Formal Reasoning.

22C:016 Computer Science I: Fundamentals 4 s.h.
Programming using Java with emphasis on software engineering practice; programming constructs, data types, problem-solving strategies, data structures, object-oriented programming. Prerequisite: 22M:005 or 22M:013 or 22M:015 or the equivalent high school or college mathematics background. GE: Quantitative or Formal Reasoning.

22C:019 Discrete Structures 3 s.h.
Mathematical methods used in computer science, including logic, proof techniques (with induction), functions, relations, algorithm analysis, recurrence relations, counting methods, combinatorics, graphs, trees. Prerequisite: grade of C- or higher in 22C:016. Recommended: calculus I.

22C:021 Computer Science II: Data Structures 4 s.h.
Design, implementation and analysis of data structures and algorithms, including linked lists, stacks, queues, hash tables, trees, graphs; complexity analysis; recursion; dynamic data structures. Prerequisite: grade of C- or higher in 22C:016. Pre- or corequisite: 22C:019.

22C:022 Object-Oriented Software Development 4 s.h.
Object-oriented design and software development methodology; team programming projects; GUIs, event handling, network programming, concurrency, data representation, IO programming. Prerequisite: grade of C- or higher in 22C:016. Pre- or corequisite: 22C:019.

22C:031 Algorithms 3 s.h.
Algorithm design techniques (divide and conquer, dynamic programming, greedy) and analysis techniques (big O notation, recurrence); sorting (merge sort, heapsort, and quicksort); searching (B-trees, AVL trees or red black trees, hashing); basic graph algorithms (depth-first and breadth-first search, minimum spanning trees, shortest paths); NP-completeness. Prerequisites: grade of C- or higher in 22C:021, and 22M:025 or 22M:031.

22C:060 Computer Organization 3 s.h.
Computer building blocks: representing data, computer arithmetic, instruction sets, assembly language, digital logic, control units, ALU design, register operations, memory organization, IO. Prerequisite: grade of C- or higher in 22C:021.

22C:131 Limits of Computation
Turing machines, undecidability and complexity: reductions, Cook's theorem and NP-completeness, approximation algorithms and randomized algorithms. Prerequisite: grade of C- or higher in 22C:031 or equivalent.

22C:135 Theory of Computation
Finite automata; regular sets and expressions; context-free and context-sensitive grammars, their properties; push-down automata; standard, universal, and linear-bound Turing machines; relationships between formal languages and automata; undecidability and its consequences. Prerequisite: grade of C- or higher in 22C:031 or equivalent.

22C:137 Theory of Graphs
Connectivity properties, including Euler, Hamilton cycle problems; graph colorings, matchings; characterization of families of graphs such as trees, planar graphs, networks; graph algorithms, their applications. Prerequisite: 22M:050 or equivalent or consent of instructor. Same as 22M:152.

22C:141 Knowledge Discovery
Knowledge discovery process, including data reduction, cleansing, transformation; advanced modeling techniques from classification, prediction, clustering, association; evaluation and integration. Prerequisite: consent of instructor. Same as 06K:275.

22C:142 Knowledge Discovery and Data Mining
Concepts and techniques in knowledge discovery and data mining (KDD); data preprocessing, exploration, association analysis, classification, prediction, clustering. Prerequisites: 22C:031 or 22C:104, and some probability/statistics.

22C:144 Database Systems
Introduction to database systems including querying using SQL, design using ER diagrams, developing relational databases, programming web applications using PHP or JDBC. Prerequisites: grades of C- or higher in 22C:021 and 22C:022, or equivalents.

22C:145 Artificial Intelligence
Introduction to artificial intelligence covering problem-solving methods, heuristic search, knowledge representation, automated reasoning, planning, game playing, machine learning, and neural networks. Prerequisite: grade of C- or higher in 22C:031 or equivalent.

22C:146 Introduction to Computational Linguistics
Introduction to computational linguistics; focus on theory and practice of natural language processing and syntactic and semantic analysis. Same as 103:140.

22C:151 Computer Graphics
Introduction to computer graphics algorithms and techniques, with emphasis on interactive 3-D graphics; coordinate systems and frames, modeling and viewing transformations, rendering, shading, lighting, texture, bump, environment mapping, animation, ray tracing, radiosity. Prerequisites: grades of C- or higher in 22C:031 and 22M:027, or equivalents.

22C:160 High Performance Computer Architecture
Problems involved in designing and analyzing current machine architectures using hardware description language (HDL) simulation and analysis, hierarchical memory design, pipeline processing, vector machines, numerical applications, multiprocessor architectures and parallel algorithm design techniques; evaluation methods to determine relationship between computer design and design goals. Prerequisite: 22C:112 or 22C:113 or 055:035. Same as 055:132.

22C:166 Distributed Systems and Algorithms
Models of distributed systems, program correctness--safety and liveness properties, causality, logical and vector clocks, mutual exclusion, distributed snapshot, leader election, distributed algorithms for graph-theoretic problems, fault-tolerance--masking versus nonmasking types, checkpointing, stabilization, consensus--byzantine generals problem, fault-tolerant broadcast and multicast, management of replicated data.

22C:169 Computer Security
Mechanism versus policy; authentication, access control, security domains; perimeter security, defense in depth; cryptographic protocols; key management and distribution; security assessment. Prerequisite: grade of C- or higher in 22C:060 or equivalent.

### 22C:170 Numerical Analysis: Nonlinear Equations and Approximation Theory  
3 s.h.
Root finding for nonlinear equations; polynomial interpolation; polynomial approximation of functions; numerical integration. Prerequisites: 22M:027 and 22M:028, or 22M:037 or 22M:056 or equivalent or consent of instructor; and knowledge of computer programming. Same as 22M:170.

### 22C:171 Numerical Analysis: Differential Equations and Linear Algebra  
3 s.h.
Numerical methods for initial value problems for ordinary differential equations; direct and iterative methods for linear systems of equations; eigenvalue problems for matrices. Prerequisites: 22M:027 and 22M:028; or 22M:037 or 22M:056 or equivalent or consent of instructor; knowledge of computer programming; and 22M:100. Same as 22M:171.

### 22C:174 Optimization Techniques  
3 s.h.
Basic theory of optimization, use of numerical algorithms in solution of optimization problems; linear and nonlinear programming, sensitivity analysis, convexity, optimal control theory, dynamic programming, calculus of variations. Prerequisites: 22M:027, 22M:028 or 22M:056, and 22M:072 or equivalent; or consent of instructor. Same as 22M:174.

### 22C:177 High Performance and Parallel Computing  
3 s.h.
Parallel scientific computing methods such as parallel algorithms for dense and sparse matrices; implementation using libraries such as MPI; current topics such as grid computing. Prerequisites: a linear algebra course or a numerical analysis course, and a programming language. Same as 22M:178.

### 22C:180 Fundamentals of Software Engineering  
3 s.h.
Problem analysis, requirements definition, specification, design, implementation, testing/maintenance, integration, project management; human factors; management, technical communication; design methodologies; software validation, verification; group project experience. Prerequisite: 22C:022 or 055:033, and senior or graduate standing in computer science or electrical and computer engineering. Same as 055:180.

### 22C:181 Formal Methods in Software Engineering  
3 s.h.
Models, methods, and their application in all phases of software engineering process; specification methods; verification of consistency, completeness of specifications; verification using tools. Prerequisite: grade of C- or higher in 22C:180 or consent of instructor. Same as 055:181.

### 22C:182 Software Engineering Languages and Tools  
3 s.h.
Object-oriented programming concepts (objects, classes, single and multiple inheritance, polymorphism and dynamic binding); object-oriented languages and environments such as JAVA and Eiffel; introduction to design patterns and software architectures such as Model-View-Controller and application frameworks; component-based software development; use of standard component frameworks such as CORBA and COM/DCOM. Prerequisites: 22C:180 or 055:180, experience with an object-oriented programming language, and consent of instructor. Same as 055:182.

### 22C:183 Software Engineering Project  
3 s.h.
Team software development project using concepts and methodologies learned in earlier software engineering classes; practical aspects of large-scale software development. Prerequisites: 22C:180 and 22C:182, or consent of instructor. Same as 055:183.

### 22C:185 Programming Language Foundations  
3 s.h.
Introduction to formal foundations of programming languages using a variety of models, including attribute grammars, operational, axiomatic, denotational, and algebraic techniques; proofs of program equivalence, correctness, termination. Prerequisites: grades of C- or higher in 22C:031 and 22C:111, or equivalents.

### 22C:186 Introduction to Compiler Construction  
3 s.h.
Concept, design, implementation; simple one-pass compiler; lexical analysis—token specification and recognition, automatic scanner generation; syntax analysis—context-free grammars, top-down, bottom-up, and operator precedence parsing, LL- and LR-parser techniques, treating ambiguous grammars, error recovery; intermediate code generation—postfix notation, three-address code, syntax trees; code optimization—local, global, loop; large programming project. Prerequisites: grades of C- or higher in 22C:031, 22C:111, and 22C:112 or 22C:113, or equivalents.
22C:191 Research for Thesis
Prerequisite: consent of instructor.

22C:196 Topics in Computer Science
Complements material in other courses. Prerequisite: consent of instructor.

22C:197 Readings in Computer Science
Topics not covered in other courses; individual study. Prerequisite: consent of instructor.

22C:198 Individual Programming Projects
Prerequisite: consent of instructor.

For Graduate Students

22C:104 Introduction to Informatics
3 s.h.
Fundamentals of computer science: algorithms, complexity, relational databases, systems concepts, programming in Perl. Prerequisite: non-computer science major.

22C:231 Design and Analysis of Algorithms
3 s.h.
Review of design and analysis techniques; advanced data structures (binomial and Fibonacci heaps, disjoint sets); graph algorithms (network flows, matching, min-cut); NP-completeness, randomization and approximation algorithms; special topics (string matching, computational geometry, number theoretic algorithms). Prerequisite: 22C:031 or 22C:131 or equivalent.

22C:242 Data Mining and Machine Learning
3 s.h.
Topics in machine learning theory and support vector machines (SVM); state-of-the-art data mining and machine learning explored through student projects and discussion of research papers. Prerequisites: 06K:275 or 22C:141 or 22C:142.

22C:244 Database System Implementation
3 s.h.
Advanced database topics including file organizations, storage management, architectures, query optimization, transaction management, recovery, and concurrency control; optional topics include distributed databases and integration. Prerequisite: 22C:144 or equivalent.

22C:245 Advanced Artificial Intelligence
3 s.h.
In-depth treatment of one of these: automated deduction (e.g., first-order logic, natural deduction, resolution, model elimination, equational reasoning, search plans for theorem proving, theorem proven design), constraint satisfaction, model construction, planning, AI programming languages and techniques, machine learning, philosophies of machine intelligence. Prerequisite: 22C:145 or equivalent.

22C:251 Advanced Computer Graphics
3 s.h.
Topics such as global illumination and rendering; volume rendering; animation; curves and surfaces, advanced modeling and mapping techniques; graphics hardware; real-time graphics for virtual environments. Prerequisite: 22C:151 or consent of instructor.

22C:290 Readings for Research
Prerequisites: Ph.D. standing in computer science and consent of instructor.

22C:294 Seminar on Systems and Networks
Prerequisite: consent of instructor.

22C:296 Seminar on Computer Science
Prerequisite: consent of instructor.

22C:299 Research for Dissertation
Prerequisites: Ph.D. candidacy (post-comprehensive exam) in computer science and consent of advisor.

22C:391 Research Seminar: Algorithms
1 s.h.
Research papers in algorithm design and analysis. Repeatable. Prerequisite: 22C:131 or consent of instructor.

22C:398 Research Seminar: Programming Languages 0 s.h.
Repeatable. Prerequisite: consent of instructor.

22C:399 Research Seminar: Colloquium Series 1 s.h.
Graduate colloquium. Repeatable.
The Creative Writing Program (Iowa Writers' Workshop) is a world-renowned graduate program for fiction writers and poets. It was the first creative writing program in the United States to offer a degree, and it became a model for many contemporary writing programs. In addition to its Master of Fine Arts program, it also offers writing courses for undergraduates.

Creative writing classes at The University of Iowa began in the 1890s, and in 1922 the University became the nation's first institution of higher education to accept creative work as theses for advanced degrees. The Iowa Writers' Workshop began in 1936, drawing distinguished fiction writers and poets who would lecture and stay to discuss students' work; some came for a full year of teaching.

Today the program's faculty and alumni include nationally and internationally prominent poets, novelists, and short story writers; many have won Pulitzer Prizes, National Book Awards, and other major literary honors. In 2003 the Iowa Writers' Workshop received a National Humanities Medal from the National Endowment for the Humanities—the first awarded to a university and only the second given to an institution rather than an individual.

To learn more about the Creative Writing Program's history and faculty, visit the Iowa Writers' Workshop web site.

Graduate Program

The Program in Creative Writing offers instruction that leads to a Master of Fine Arts degree in English.

Unusually well-qualified students in the Department of English Ph.D. program may obtain permission to submit a creative dissertation for that degree. In such a case, the Program in Creative Writing assumes responsibility for granting permission for the option of the creative dissertation and for approving the dissertation once it is completed. Contact the director of graduate study in the Department of English for more information.

Master of Fine Arts

The Master of Fine Arts in English (creative writing) requires 48 s.h. of graduate credit taken over four semesters in residence at The University of Iowa. Students specialize in fiction or poetry. Work toward the degree culminates in a creative thesis.

The program is flexible and individualized. Approximately half of the credit required for the degree is earned in writing courses; the rest may be earned in other graduate courses. Up to 18 s.h. of graduate transfer credit may be counted toward the degree, but transfer credit does not change the residency requirement.

Students must enroll in 08C:251 Fiction Workshop or 08C:252 Poetry Workshop during each semester of residence in the program. In each course, groups of 10-15 students read and critique each others' work.

The program's seminars provide students with a thorough knowledge of their chosen literary form and related aspects of craft. Seminars include 08C:270 Form of Fiction, 08C:275 Form of Poetry, 08C:490 Seminar: Problems in Modern Fiction, and 08C:495 Seminar: Problems in Modern Poetry. Each focuses on a single aspect of modern poetry or fiction, such as a single writer's work or a body of work with a common theme or purpose.

In addition to taking Creative Writing Program courses, many M.F.A. students choose courses offered by other University of Iowa departments and programs, such as the interdisciplinary Center for the Book (Graduate College), the Department of Theatre Arts, the Department of Cinema and Comparative Literature, and the Department of English.

During the last semester of the program, each student must take the M.F.A. examination, an essay exam that may be written outside of the classroom. Students also submit their graduate thesis during the last semester (08C:590 M.F.A. Thesis); the thesis is a fiction or poetry manuscript of substantial length.

Admission

Applicants to the Creative Writing Program (Iowa Writers' Workshop) must meet the program's admission requirements as well as those of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

A creative writing manuscript is the most important element of the application for admission to the workshop. Submissions for poetry should include 10-12 poems. Submissions for fiction should include two or three short stories or
a section of a novel, or both, usually 30-38 double-spaced pages (may not exceed 100 double-spaced pages).

Other application materials include a personal statement, official transcripts from all universities and colleges attended, the graduate application form, three letters of recommendation, an application for graduate awards, and an application to the Graduate College. Graduate Record Exam (GRE) General Test scores are optional, but they may make applicants more competitive for a wider range of financial assistance.

For detailed information on application materials and procedures, see Graduate Admissions/Admission to the Workshop on the Iowa Writers' Workshop web site.

**Financial Support**

Financial assistance is available to Creative Writing Program students in the form of teaching assistantships, research assistants, and fellowships. See Applying for Financial Aid on the Iowa Writer's Workshop web site.

**Creative Writing Program Courses**

The Creative Writing Program offers courses for undergraduates as well as graduate students. Some undergraduate courses require enrollment in the Department of English undergraduate creative writing track. Enrollment in some graduate-level courses requires admission to the M.F.A. program.

**For Undergraduates**

See "Courses" in the Department of English section of the Catalog for course descriptions and prerequisites to enrollment.

Critical Cultural Competence

Coordinator: Edward Saunders
Undergraduate nondegree program: Certificate in Critical Cultural Competence

The College of Liberal Arts and Sciences offers the Certificate in Critical Cultural Competence. The certificate program helps students develop an appreciation for their own cultural identities. It also helps them become critically self-reflective in their orientation to differences in other people's cultural identities as defined by matters such as race, ethnicity, gender, class, and sexual orientation.

The certificate program is open to undergraduate students across the University. It is administered by the School of Social Work.

Certificate

The Certificate in Critical Cultural Competence requires 18 s.h. of course work. Ideally, students begin the certificate during their second year of undergraduate study.

Certificate students build the knowledge, skills, and attitudes they will need in order to increase their effectiveness in relating to others across cultural differences and in domestic and international environments that are increasingly diverse.

Intended outcomes for students who complete the certificate are:

- greater appreciation of cultural differences;
- increased ability to interact with individuals of diverse backgrounds;
- adoption of a philosophy of treating people fairly, equitably, and thoughtfully;
- critical self-reflection and awareness of one's own culture;
- ability to assess and understand culture-related privilege and disprivilege; and
- concern with issues of power and privilege, and social justice.

The certificate requires the following course work.

- 208:120 Foundations of Critical Cultural Competence 3 s.h.
- Three electives covering at least two diversity categories 9 s.h.
- One elective with an immersion-learning or service-learning component 3 s.h.
- 208:190 Integrative Seminar in Critical Cultural Competence 3 s.h.

Students begin the certificate with 208:120 Foundations of Critical Cultural Competence, which is offered spring semesters and is prerequisite to the course work that follows. They complete a minimum of three elective courses (9 s.h.) that cover at least two diversity categories; a maximum of two electives may be taken from the same department, and two of the three electives must be 100-level or above. An additional experiential elective (3 s.h.) with an immersion-learning or service-learning component is required. Students complete the certificate's requirements with the capstone course, 208:190 Integrative Seminar in Critical Cultural Competence, which is offered spring semesters.

In collaboration with the certificate program's coordinator, students establish study plans while completing the foundation course. The coordinator works with the academic advisor in the student's major to ensure that the study plan complements the student's academic program and career interests. The program coordinator approves the final study plan, recommends the sequence in which course work should be taken, schedules required courses, and keeps a record of each student's approved program and progress.

Once a student fulfills the requirements for the certificate and completes an undergraduate degree, the certificate is noted on his or her transcript.

For more information, contact the School of Social Work.

Critical Cultural Competence Courses

208:120 Foundations of Critical Cultural Competence 3 s.h.
Experiential and theoretical foundation; cultural competence as a concept and practice; conceptual frameworks and models for understanding cultural differences and similarities within, among, and between groups of people with whom others interact in their professional, personal, public, and private lives; appreciating differences while learning to be self-reflective; adjustment of perceptions, behaviors, styles for effective interaction with people from different ethnic, racial, sexual, gender, class groups.

208:190 Integrative Seminar in Critical Cultural Competence 3 s.h.
Capstone course; application of knowledge to one's areas of study; community settings where cultural competence is required; challenges and benefits of behaving in culturally competent ways in varied contexts; review and critique of educational experiences in the certificate program; development of skills in community education related to cultural competence; group project to benefit the University and/or community; development of a plan to integrate critical cultural competence into careers. Prerequisite: completion of other required certificate courses. Pre- or corequisite: one certificate course.
Dance

Director, Division of Performing Arts: Alan MacVey
Acting chair: Alan MacVey
Professors: Alan Sener, Armando Duarte
Professor emerita: Françoise Martinet
Associate professors: Charlotte Adams, George de la Peña, Rebekah Kowal
Associate professors emeritae: Alicia Brown, Helen Chadima
Assistant professors: Eloy Barragán, Deanna Carter, Jennifer Kayle
Adjunct assistant professors: Paul Cunliffe, Lyle Juraok
Lecturer: Jim Albert
Undergraduate degrees: B.A., B.F.A. in Dance
Undergraduate nondegree program: Minor in Dance
Graduate degree: M.F.A. in Dance
Web site: http://dance.uiowa.edu

The Department of Dance offers degree programs for undergraduates and graduate students. The undergraduate major in dance provides a liberal arts and sciences education and thorough preparation for careers in professional dance, choreography, and education, as well as preparation for graduate studies.

The department offers as many as 14 concerts every year, providing dance students with numerous opportunities for performance and choreography. Each year the University of Iowa Dance Company performs Dance Gala on campus, and since 1986, the department's touring company, Dancers in Company, has given students an opportunity to perform in Iowa and surrounding states.

Dance faculty members regularly present their choreography in national and international venues, giving University student performers the opportunity to further develop their performance skills. Periodic master classes with noted guest teachers, choreographers, and touring companies add diversity to the dance experience.

The department is one of four academic units that make up the Division of Performing Arts.

Undergraduate Programs

The department offers a Bachelor of Arts, a Bachelor of Fine Arts, and a minor in dance. It also participates in offering the Certificate in Performing Arts Entrepreneurship, offered through the Division of Performing Arts.

Students must audition on campus in order to be admitted to a degree program or the minor in dance, as well as for placement in advanced dance classes.

Bachelor of Arts

The Bachelor of Arts in dance requires a minimum of 120 s.h., including 53 s.h. of work for the major (50 s.h. in dance and 3 s.h. in a required anatomy course). The program is designed for students who want to acquire a strong liberal arts and sciences background while pursuing a comprehensive undergraduate dance education. The degree stresses performance and choreography as well as dance theory courses, including dance history, dance kinesiology, and dance production.

Students must audition on campus, during the semester before they enter the University, in order to be admitted to a degree program in dance. They must audition for placement in dance classes before they register for classes. Nonmajors and students minoring in dance may register only for beginning and continuing levels of ballet and modern dance, but they may register for all levels of jazz and Afro-Cuban dance. Contact the Department of Dance, the undergraduate program coordinator, or the Office of Admissions for additional information.

Students must complete the College of Liberal Arts and Sciences General Education Program.

All B.A. students must complete 027:053 Human Anatomy (3 s.h.). The required 50 s.h. in Department of Dance courses must include two semesters of 137:113 Major Ballet II or 137:114 Major Modern Dance II with a grade of B-minus or higher. Two semesters of 137:124 Major Modern Dance III, 137:123 Major Ballet III, or 137:130 Major Modern Dance IV also satisfy this requirement. At least half of all semester hours in the major must be earned at The University of Iowa. No more than 50 s.h. in Department of Dance courses may be counted toward the 120 s.h. required for the B.A.

Students who select cross-referenced, non-dance department courses to satisfy the core course requirements must take additional dance electives to complete the required 50 s.h. in Department of Dance courses.

CORE COURSES

027:053 Human Anatomy 3 s.h.
137:040 Introduction to Dance Studies 1 s.h.
137:050 Dance Production 3 s.h.
137:051/049:045 Production: Run Crew (2 s.h. required)  1-2 s.h.
137:080/188:080 Dance and Society  3 s.h.
137:147/049:108 Dance Kinesiology  3 s.h.
137:181 Dance History  3 s.h.

025:010 Fundamentals of Music  3 s.h.
or
137:060 Music Fundamentals in Dance  2 s.h.

STUDIO COURSES

137:034 Beginning/Contact Improvisation  2 s.h.
or
137:134 Improvisation I  2 s.h.

137:070 Choreography I  2 s.h.
137:071 Choreography II  2 s.h.

DANCE TECHNIQUE

Dance majors must take 6 s.h. each of ballet and of modern dance technique; students choose 20 s.h. from the following. All courses may be repeated.

137:022 Intermediate Jazz  2 s.h.
137:023 Intermediate Ballet  2 s.h.
137:024 Intermediate Modern  2 s.h.
137:103 Major Ballet I  1-3 s.h.
137:104 Major Modern Dance I  1-3 s.h.
137:113 Major Ballet II  1-3 s.h.
137:114 Major Modern Dance II  1-3 s.h.
137:123 Major Ballet III  1-3 s.h.
137:124 Major Modern Dance III  1-3 s.h.
137:130 Major Modern Dance IV  1-2 s.h.
137:133 Ballet Pointe II  1 s.h.

DANCE ELECTIVES

Credit earned in Department of Dance courses (prefix 137) that is not used to satisfy core, studio, or dance technique degree requirements is counted toward the dance elective requirement. Dance electives complete the 50 s.h. of dance courses required for the Bachelor of Arts.

The required number of semester hours in dance electives varies depending on whether the student completes the core with dance courses or with cross-referenced courses from another department, or has a core requirement waived.

Bachelor of Fine Arts

The Bachelor of Fine Arts in dance requires a minimum of 120 s.h., including 78 s.h. of work for the major (75 s.h. in dance and 3 s.h. in a required anatomy course). In contrast to the B.A., the B.F.A. emphasizes choreography and performance through an additional 25 s.h. of choreography, performance, and technique. Students may be admitted to the B.F.A. program after they have completed a minimum of 30 s.h. at The University of Iowa. Students who have achieved the equivalent of major II technique and who show academic and professional promise are selected by department faculty for admission to the program.

Students must complete the College of Liberal Arts and Sciences General Education Program.

All B.F.A. students must complete 027:053 Human Anatomy (3 s.h.). The required 75 s.h. in Department of Dance courses must include three semesters of 137:123 Major Ballet III or 137:130 Major Modern Dance IV with a grade of B-minus or higher. B.F.A. students are required to maintain a cumulative g.p.a. of at least 3.50 in dance department
courses. They also must earn at least half of the semester hours in the major at The University of Iowa. No more
than 75 s.h. in Department of Dance courses may be counted toward the 120 s.h. required for the B.F.A.
The department encourages B.F.A. students to register for cross-referenced core courses under the Department of
Dance course number (prefix 137). Cross-referenced courses are those with more than one course number (e.g., 137:05
137:051/049:049 Production: Run Crew).

CORE COURSES

B.F.A. students should register for cross-listed courses under the Department of Dance course number (prefix 137).

DANCE ELECTIVES

B.F.A. students choose advanced-level elective course work by selecting one of the following three options.

Option 1 (one pedagogy course):

<table>
<thead>
<tr>
<th>Course Number</th>
<th>Course Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>137:143</td>
<td>Elementary Ballet Pedagogy</td>
<td>3 s.h.</td>
</tr>
</tbody>
</table>

or
137:144 Teaching of Modern Dance 3 s.h.

Option 2 (one advanced history or theory course):
137:202 Theories of Dance and the Body 3 s.h.
or
137:182 The Contemporary Dance Scene 3 s.h.

Option 3 (two choreography courses):
137:171 Choreography IV 2 s.h.
137:172 Independent Choreography 1 s.h.

Credit earned in Department of Dance courses (prefix 137) that is not used to satisfy core, studio, or dance technique degree requirements is counted toward the dance elective requirement. Dance electives complete the 75 s.h. of dance courses required for the Bachelor of Fine Arts.

The required number of semester hours in dance electives varies depending on whether the student completes the core with dance courses or with cross-referenced courses from another department, or has a core requirement waived.

Senior Project

B.F.A. students culminate their experience with senior projects in choreography or performance. The senior project also may be taken for honors credit.

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

Department of Dance course work beyond 50 s.h. for a B.A. and 75 s.h. for a B.F.A. does not apply toward semester hours required for graduation.

Bachelor of Arts

Before the third semester begins: 12 s.h. of courses in the major and at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: 24-32 s.h. of courses in the major and at least one-half of the semester hours required for graduation

Before the seventh semester begins: 36-48 s.h. of courses in the major and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: 42-50 s.h. of courses in the major

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Bachelor of Fine Arts

Before the third semester begins: 16 s.h. of courses in the major and at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: 25-40 s.h. of courses in the major and at least one-half of the semester hours required for graduation

Before the seventh semester begins: 45-60 s.h. of courses in the major and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: 57-75 s.h. of courses in the major

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Honors

In order to pursue honors studies in the Department of Dance, a student must be a member of the University of Iowa Honors Program, which requires students to maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact
the University of Iowa Honors Program for more information). Honors students in dance must maintain a g.p.a. of at least 3.50 in UI dance department courses.

The honors program in dance is designed to serve and recognize outstanding students in the areas of choreography, performance, and special projects. It requires 8-10 s.h. To complete the honors program in dance, students must take two courses for honors credit and complete an honors project. All honors projects must be approved by the dance department faculty.

**Minor**

The minor in dance requires a minimum of 15 s.h. in University of Iowa Department of Dance courses, including 12 s.h. in 100-level courses. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass. Students must audition on campus in order to be admitted to the minor and for placement in dance classes. Auditions are offered four times per year. For audition information, contact the department or visit the Department of Dance web site.

**Graduate Program**

The department offers a Master of Fine Arts in dance, with a choice of choreography or performance track. Students must audition on campus in order to be admitted to the M.F.A. program.

**Master of Fine Arts**

The Master of Fine Arts in dance requires a minimum of 60 s.h. of graduate credit. The program is designed to be completed in four to six semesters in residence. Students who demonstrate accomplishment in dance performance and/or choreography may apply for admission to the M.F.A. program. Applicants select the choreography or the performance track before they are admitted.

Admission is based on a review of videotaped choreographic and performance work; letters of recommendation; application materials; and an on-campus audition, in which applicants teach one or more classes and take advanced classes in ballet and modern technique.

Advanced technique (ballet and/or modern) and demonstrated accomplishment in performance or choreography are prerequisites for admission to the M.F.A. program.

The M.F.A. requires the following course work.

**DANCE CORE**

A total of 19 s.h. of core course work is required for both the performance and the choreography track.

137:143 Elementary Ballet Pedagogy 3 s.h.
or
137:144 Teaching of Modern Dance 3 s.h.

137:200 Graduate Seminar in Dance 2 s.h.
137:201 Graduate Production Practicum 1 s.h.
137:202 Theories of Dance and the Body 3 s.h.

137:234 Graduate Improvisation I 1-2 s.h.
or
137:235 Graduate Improvisation II 2 s.h.

137:277 Thesis (8 s.h. required) arr.

**DANCE TECHNIQUE**

The performance track requires 18 s.h. from the following, the choreography track requires 12 s.h.; courses may be repeated. Performance track students must take a minimum of 4 s.h. of modern dance and 4 s.h. of ballet.

137:103 Major Ballet I 1-3 s.h.
137:104 Major Modern Dance I 1-3 s.h.
137:213 Graduate Majors Ballet II 1-3 s.h.
EMPHASIS COURSES

A total of 14 s.h. is required for both the choreography and the performance track.

Choreography Track

137:206 Graduate Dance Performance (1 s.h. each performance, 2 s.h. total) 1 s.h.
137:274 Graduate Independent Choreography (1 s.h. each project, 4 s.h. total) 1 s.h.

A total of 8 s.h. from these:

137:270 Graduate Choreography I 2 s.h.
137:271 Graduate Choreography II 2 s.h.
137:272 Graduate Choreography III 2 s.h.
137:273 Graduate Choreography IV 2 s.h.
137:275 Collaborative Performance 1-4 s.h.

Performance Track

M.F.A. performance track candidates must earn 12 s.h. in performance courses and 2 s.h. in choreography courses.

137:107 Repertory Dance Company (4 s.h. per year, 0-8 s.h. total) 0-4 s.h.
137:206 Graduate Dance Performance (1 s.h. each performance, 4-12 s.h. total) 1 s.h.
137:274 Graduate Independent Choreography (1 s.h. each project, 2 s.h. total) 1 s.h.
or
A course from the choreography sequence (137:270-137:273) 2 s.h.

ELECTIVES

M.F.A. candidates in performance must earn a total of 9 s.h. in elective courses numbered 100 or above. A minimum of 6 s.h. must be earned in non-dance department courses. The remaining 3 s.h. must be earned in 137:147 Dance Kinesiology, 137:181 Dance History, or 137:182 The Contemporary Dance Scene.

M.F.A. candidates in choreography must earn a total of 15 s.h. in elective courses numbered 100 or above. A minimum of 6 s.h. must be earned in non-dance department courses; 6 s.h. must be earned in a course or courses that provide research material for the thesis. The remaining 3 s.h. must be earned in 137:147 Dance Kinesiology, 137:181 Dance History, or 137:182 The Contemporary Dance Scene.

Facilities

The Department of Dance houses six technique studios, a movement training lab, a media classroom and library, a media laboratory, an audio recording laboratory, and its own theater for dance concerts.

Dance Courses

Primarily for Undergraduates

137:001 Beginning Tap 1-2 s.h.
Elementary techniques, steps, and performance skills for rhythm and show tap styles; enhancement of rhythmic ability through exercises, improvisation, creative activities; may include history of tap. Tap shoes required. GE: Fine Arts.

137:002 Beginning Jazz 1-2 s.h.
Basic movement fundamentals, terminology, performance skills of jazz dance; enhancement of flexibility, strength, body alignment, coordination, balance, kinesthetic awareness, personal range of motion, and musicality; warm-up, locomotion, center combinations; may include history of jazz dance. GE: Fine Arts.

**137:003 Beginning Ballet** 1-2 s.h.
Basic movement fundamentals, terminology, performance skills of ballet; enhancement of flexibility, strength, body alignment, coordination, balance, kinesthetic awareness, personal range of motion, and musicality; barre and center combinations; terminology; may include history of ballet. GE: Fine Arts.

**137:004 Beginning Modern Dance** 1-2 s.h.
Basic movement fundamentals, terminology, performance skills of modern dance; enhancement of flexibility, strength, body alignment, coordination, balance, kinesthetic awareness, personal range of motion, and musicality; warm-up, locomotion, center combinations; may include history of modern dance. GE: Fine Arts.

**137:011 Continuing Tap** 1-2 s.h.
Continuation of 137:001. GE: Fine Arts.

**137:012 Continuing Jazz** 1-2 s.h.
Continuation of 137:002; skills for technique and performance of jazz dance; enhancement of flexibility, strength, body alignment, coordination, balance, kinesthetic awareness, personal range of motion, and musicality; warm-up, locomotion, center combinations; may include history of jazz dance. GE: Fine Arts.

**137:013 Continuing Ballet** 1-2 s.h.
Continuation of 137:003; skills necessary for technique and performance of ballet; enhancement of flexibility, strength, body alignment, coordination, balance, kinesthetic awareness, personal range of motion, and musicality; barre and center combinations; terminology; may include history of ballet. GE: Fine Arts.

**137:014 Continuing Modern Dance** 1-2 s.h.
Continuation of 137:004; skills necessary for the technique and performance of modern dance; enhancement of flexibility, strength, body alignment, coordination, balance, kinesthetic awareness, personal range of motion, and musicality; warm-up, locomotion, center combinations; may include history of modern dance. GE: Fine Arts.

**137:022 Intermediate Jazz** 1-2 s.h.
Low intermediate technique and performance training in jazz dance; flexibility, strength, body alignment, and coordination as foundation for more advanced dance artistry, including mobility, musicality, style; warm-up, locomotion, center combinations; may include history of jazz dance. Prerequisite: audition. GE: Fine Arts.

**137:023 Intermediate Ballet** 1-2 s.h.
Low intermediate technique and performance training in ballet; flexibility, strength, body alignment, and coordination as foundation for more advanced dance artistry, including more difficult steps, musicality, mobility, balance; basic ballet terminology, including steps, head, body, arm positions; variations in timing, changes of facing. GE: Fine Arts.

**137:024 Intermediate Modern** 1-2 s.h.
Low intermediate technique and performance training in modern dance; flexibility, strength, body alignment, and breath as foundation for more advanced dance artistry, including musicality, mobility, balance, improvisation; variations in timing, changes of facing. GE: Fine Arts.

**137:029 First-Year Seminar** 1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Prerequisite: first- or second-semester standing.

**137:030 Ballet Pointe I** 1 s.h.
Basic techniques and training for ballet pointe; repetition and analysis of steps and combinations, assimilation of new material; barre and center exercises, pirouettes and turns commonly performed en pointe, learning and performing variations drawn from repertory. Prerequisite: previous ballet training and experience.

**137:034 Beginning/Contact Improvisation** 1-2 s.h.
Concepts of dance improvisation and contact improvisation; cultivation of creative freedom through the use and invention of movement; range of expression broadened through personal movement capacity, spontaneity and imagination, ability to make and commit to movement choices; new approaches to moving and movement elements such as time, space, motion, qualities, dynamics; shared weight, support, counter-balancing, elementary partnering; studio course.

137:040 Introduction to Dance Studies
Introduction to dance studies in the liberal arts; breadth and diversity of contemporary scholarship on dance; dance history, criticism, ethnography, theory, conditioning and injury prevention, improvisation, choreography, technology.

137:047 Topics in Body Conditioning
Somatic training techniques that address conditioning needs of dancers—yoga for dancers, pilates, release techniques; other somatic studies related to injury prevention, concentration, flexibility, efficient movement, strength training. Prerequisite: dance major or minor standing.

137:050 Dance Production
Scenic design, costuming, lighting, audio/video, publicity; visits by professional guest lecturers, field trips to creative shops; projects.

137:051 Production: Run Crew
Experience as run crew member in scenery, props, or costumes; or light board, sound board, or follow-spot operator; for mainstage production. Prerequisite: 049:044 or 137:050 or consent of instructor. Same as 049:045.

137:060 Music Fundamentals in Dance
Relationship between dance and music; basic musical concepts, including rhythm, melody, major and minor scales, key signatures and intervals, triads, seventh chords, tonality; concepts experienced through free and guided movement exploration and improvisation; brief history of 20th century to present; visits by performers and presenters.

137:070 Choreography I
Introduction to theories and practices of creating choreography; locating varied sources for movement; elementary considerations of choreographic form; development of ideas, impulses, and initial inspirations into short works; fundamentals of giving and receiving critical feedback; articulation of thoughts and experience as composers and watchers of choreography; exposure to choreographic concerns supported by video and reading.

137:071 Choreography II
Continuation of 137:070; development of intermediate choreographic skills; emphasis on cultivation of individual choreographic voice through expansion of vocabulary, discovery of complex ways to form and arrange, and use of widening range of methods and types of resources.

137:080 Dance and Society
Role of dance and other forms of physical culture in nations worldwide, including the United States, Brazil, West Africa, France, Germany; relationships between dance and culture (e.g., function of dance in spiritual, celebratory, social, political contexts) examined through ethnographic techniques; exchange of dance forms and ideas about the body from old to new worlds and back; aesthetic issues related to concert dance (e.g., performance, choreography, spectatorship, criticism, production). GE: Fine Arts, Humanities. Same as 188:080.

137:103 Major Ballet I
Builds on 137:023; intermediate technical and performance training in ballet; flexibility, strength, body alignment, and coordination as foundation for introduction of more advanced aspects of dance artistry, including steps, musicality, mobility, balance; terminology related to barre and center vocabulary, including steps, head, body, and arm positions; practice of steps and combinations, variations in timing, changes of facing. Prerequisite: consent of instructor. GE: Fine Arts.

137:104 Major Modern Dance I
Builds on 137:024; intermediate technical and performance training in modern dance; physical and mental skills for transition to more advanced dance—physical stamina, strength, flexibility, articulation, coordination, musicality, phrasing; basic physical concepts underlying clear and efficient movement; assimilation of new movement material; center of gravity and its role in body mobilization and control; personal movement choices, and expressive range. Prerequisite: consent of instructor. GE: Fine Arts.
137:106 Dance Performance 0-1 s.h.
Credit for rehearsal hours and performance of dance works in produced dance concerts. Prerequisite: audition and/or concert adjudication. GE: Fine Arts.

137:107 Repertory Dance Company 0-4 s.h.
Advanced repertory studies; learning and performing multiple works by professional guest artists, faculty, and invited graduate students; collaborative creation and performing in community outreach lecture-demonstration throughout Iowa and the region. Prerequisite: audition.

137:113 Major Ballet II 1-3 s.h.
High intermediate training in ballet technique and performance; physical and mental skills necessary for more advanced work--physical stamina, strength, flexibility, articulation, coordination, musicality, phrasing, basic physical concepts underlying clear and efficient movement, capacity to assimilate new movement material, awareness of the center of gravity and its role in mobilization and control of the body. Prerequisite: consent of instructor. GE: Fine Arts.

137:114 Major Modern Dance II 1-3 s.h.
High intermediate technical and performance training in modern dance; physical and mental skills necessary for more advanced work--physical stamina, strength, flexibility, articulation, coordination, musicality, phrasing, basic physical concepts underlying clear and efficient movement, capacity to assimilate new movement material, awareness of the center of gravity and its role in mobilization and control of the body, consciousness of personal movement choices and expressive range. Prerequisite: consent of instructor. GE: Fine Arts.

137:120 Floor Barre 2 s.h.
Introduction to Beamish-based floor barre technique. Prerequisites: 137:023 and consent of instructor.

137:123 Major Ballet III 1-3 s.h.
Advanced training in ballet technique and performance; physical and mental skills necessary for professional work--physical stamina, strength, flexibility, articulation, coordination, musicality, phrasing, basic physical concepts underlying clear and efficient movement, capacity to assimilate new movement material, awareness of the center of gravity and its role in mobilization and control of the body. Prerequisite: consent of instructor. GE: Fine Arts.

137:124 Major Modern Dance III 1-3 s.h.
Advanced technical and performance training in modern dance; physical and mental skills necessary for professional work--physical stamina, strength, flexibility, articulation, coordination, musicality, phrasing, basic physical concepts underlying clear and efficient movement, capacity to assimilate new movement material, awareness of the center of gravity and its role in mobilization and control of the body, consciousness of personal movement choices and expressive range; may include partnering exercises for investigation of weight exchange, timing, expressivity. Prerequisite: consent of instructor. GE: Fine Arts.

137:130 Major Modern Dance IV 1-2 s.h.
Professional technique and performance training in modern dance. Prerequisite: consent of instructor.

137:133 Ballet Pointe II 1-2 s.h.
Intermediate/advanced techniques and training for ballet pointe work; repetition and analysis of steps and combinations, assimilation of new material; barre and center exercises, pirouettes and turns commonly performed en pointe, learning and performing variations drawn from repertory. Prerequisite: consent of instructor.

137:134 Improvisation I 1-2 s.h.
Introduction to movement as research; experimental process as vehicle for invention, creative freedom, aesthetic range; development of kinesthetic imagination, awareness, creative problem solving; introduction to issues of artistic originality and authenticity; practical integration of improvisation and composition through spontaneous manipulation of time, space, and energy; knowledge of creative process supported by reading and individual research.

137:135 Improvisation II 2 s.h.
Advanced concepts in compositional improvisation; in-depth individual exploration, spontaneous ensemble composition; increasing authenticity, depth, and range; integrity in relating to the whole ensemble; connecting creative process to other bodies of knowledge; making contact with emerging premise; reading and discussion as integration of conceptual and experiential; speaking and writing as improvisational process. Prerequisites: 137:134 and consent of instructor.
137:137 Partnering Class  
The art of partnering in dance, from salsa to Swan Lake; power sharing on the dance floor, including supported poses, balance, musical and physical timing, unity of movement, eloquence of gesture; for advanced dancers with strong coordination skills.

137:139 Acting for Dancers  
Beginning acting for dancers; spontaneity and expression, sources of action and reaction through theater games; emotional journey in effective drama and comedy; drama, comic structure, and tension through character and script analysis. Prerequisite: consent of instructor.

137:140 Honors Project in Dance  
Research, choreographic, reconstruction, or performance project under guidance of a faculty advisor. Prerequisite: senior standing.

137:141 B.F.A. Senior Project in Dance  
Senior year choreographic/performance capstone to complete B.F.A. in dance under supervision of faculty adviser; culminates in public showing or produced concert. Prerequisites: admitted to B.F.A. degree program in dance and senior standing.

137:143 Elementary Ballet Pedagogy  
Methods, materials, concepts for teaching ballet techniques.

137:144 Teaching of Modern Dance  
Practices of teaching modern dance; information and experience for developing an individualized approach to teaching; educational methodology for defining essential elements of a modern class, approaches for planning and structuring classes.

137:147 Dance Kinesiology  
Body science related to demands of dance; structural and muscular analysis for efficient, effective dance training and prevention of injuries; investigation of skeletal and ligamentous structure for working knowledge of how the body produces movement; joint actions and restrictions, common injuries to those sites; attachments of the voluntary muscles, pathways and potential actions; neuromuscular analysis of an action; functional skeletal alignment; how individual differences may affect movement performance. Prerequisite: 027:053. Same as 049:108.

137:149 Honors Studies in Dance  
Choreography, performance, production, Labanotation, dance history, or pedagogy. Prerequisite: g.p.a. of 3.33 or higher.

137:157 Brazilian Carnival  
Dance, music, historical, and social contents of Brazilian Carnival production, critical theories of performance, religious backgrounds, and theatre making in carnival parades. Prerequisite: consent of instructor.

137:160 Movement for Performers  
Movement as support for sound production, artistic expression, and wellness; Bartenieff Fundamentals, Laban Movement Analysis, or principles of the Alexander Technique as methods of organizing and integrating body movement and expanding expressive range; studio course with practice, journal, observations, project applying movement skills to student's area of performance/study. Same as 025:167, 049:105, 188:167.

137:161 The Arts in Performance  

137:170 Choreography III  
Continuation of 137:071; increased emphasis on invention, clarity, sophistication, and development of complete works; creation of sharply defined mature movement worlds; increasingly thorough consideration of sources and methods, responsibility for applying course work to self-defined artistic concerns and emerging individual aesthetic; advanced theories and methods through video, reading, choreographic research.

137:171 Choreography IV  

Continuation of 137:170; advanced theories and practices of choreography; complex concepts, methods, applications; analytical and creative connections with bodies of knowledge across the liberal arts and sciences; complete development of multiple works; advanced practice in critical feedback and articulation of ideas about process and product; development through reading, video, extensive creative research.

137:172 Independent Choreography
Credit for creation of independent choreographic project, developed under guidance of faculty advisor, that results in production of a dance work. Prerequisite: consent of faculty project advisor.

137:174 Introduction to Afro-Cuban Dance
Introduction to the dance, drumming, and songs of the Afro-Cuban folkloric traditions; emphasis on dance. May participate in UI Afro-Cuban Drum and Dance ensemble. Pre- or corequisite: 137:175 or 188:175. Same as 188:174.

137:175 Afro-Cuban Drum and Dance Performance
Dance repertoire for the UI Afro-Cuban Drum and Dance Ensemble. Performance pieces based on dance, drumming, songs of the Afro-Cuban folkloric traditions. May participate in UI Afro-Cuban Drum and Dance Ensemble. Prerequisites: audition and 025:173 or 137:174 or 188:173 or 188:174. Same as 188:175.

137:181 Dance History
Dance history in the 19th and 20th centuries; changes in dance training and technique, theory, composition, performance practices in context of broader social, political, and cultural trends; how dance and choreographic practices have changed over time, relationships between social ideas about embodiment and production of dance forms, precedents for contemporary dance practices in past forms.

137:182 The Contemporary Dance Scene
Historical, theoretical, and practical elements of contemporary dance; the term "postmodern" and its associations with dance, performing arts, contemporary culture; relationships between process and product, identity and subjectivity, artistic intent and authorship, meaning and intertextuality; possibility of art as a form of dissent; theory and practice placed in a dialectic; analysis and synthesis of previous research. Same as 188:182.

137:190 Independent Study
Credit for an individual student-designed project coordinated with a faculty advisor. Prerequisites: sophomore or higher standing and consent of instructor.

Primarily for Graduate Students

137:200 Graduate Seminar in Dance
Research, careers, administrative, educational, professional, artistic topics.

137:201 Graduate Production Practicum
Scenery and costume design, lighting, audio/video, publicity.

137:202 Theories of Dance and the Body
Theoretical trends in studies of dance and physical bodies; performative and choreographic aspects of being. Same as 188:202.

137:206 Graduate Dance Performance
Credit for rehearsal hours and performance of dance works in produced dance concerts. Repeatable. Prerequisite: audition and/or concert adjudication.

137:213 Graduate Majors Ballet II
High intermediate technique and performance training; physical and mental skills necessary for more advanced work—physical stamina, strength, flexibility, articulation, coordination, musicality, phrasing, basic physical concepts underlying clear and efficient movement, capacity to assimilate new movement material, awareness of the center of gravity and its role in mobilization and control of the body. Repeatable.

137:214 Graduate Majors Modern II

High intermediate technical and performance training in modern dance; physical and mental skills necessary for more advanced work—physical stamina, strength, flexibility, articulation, coordination, musicality, phrasing, basic physical concepts underlying clear and efficient movement, capacity to assimilate new movement material, awareness of the center of gravity and its role in mobilization and control of the body, consciousness of personal movement choices and expressive range. Repeatable.

Division of Performing Arts

**Director:** Alan MacVey  
**Degree:** B.A. in Performing Arts Entrepreneurship  
**Undergraduate nondegree program:** Certificate in Performing Arts Entrepreneurship

The Division of Performing Arts includes the Department of Dance, the School of Music, and the Department of Theatre Arts. The division fosters interdisciplinary collaboration among these units, coordinates artistic and academic activities, and sponsors a full array of performances and symposia. Performances are supported by professional staff in the division's Performing Arts Production Unit.

The division's individual academic units offer undergraduate and graduate courses and degree programs in creative, performance, scholarly, and theoretical areas. They present an extensive schedule of dance productions, faculty and student recitals, ensemble concerts, and mainstage and gallery theater productions.

The division also partners with the John Pappajohn Entrepreneurial Center, in the Tippie College of Business, to offer the Certificate in Performing Arts Entrepreneurship. The certificate program combines course work in accounting, marketing, and financial management with courses focused on arts management and leadership practices in commercial as well as nonprofit arts organizations.
Economics

The Department of Economics offers degree programs for undergraduates and for graduate students.

Undergraduate Programs

The department offers three undergraduate degrees: a Bachelor of Arts (B.A.) and a Bachelor of Science (B.S.) in economics awarded by the College of Liberal Arts and Sciences, and a Bachelor of Business Administration (B.B.A.) in economics awarded by the Tippie College of Business.

The B.A. is designed to achieve a balance of economic theory, mathematical tools, and field applications. The B.S. maintains a similar balance but emphasizes development of analytical tools; it prepares students for graduate work in economics or related business and technical fields. The B.B.A. emphasizes economic foundations of business fields: accounting, finance, marketing, business law, and management.

Each program provides an excellent educational background for a variety of positions in business and government. Graduates find employment in banking, financial institutions, industrial firms, and trade organizations and in federal, state, and local government agencies dealing with economic policy, regulation, and analysis. Economics also provides excellent preparation for the study of law and for graduate study in fields such as business management, public administration, hospital and health administration, urban and regional planning, transportation, journalism, political science, and statistics.

All students majoring in economics choose one of three tracks: business economics, policy economics, or analytical economics. The business economics track is designed for students who intend to work in the private sector. The policy economics track is for students interested in earning a degree in law or a graduate degree in a discipline that is not highly quantitative, or in seeking a decision-making position in the public or private sector. The analytical economics track is for students interested in earning a degree in law or a graduate degree in a discipline that is not highly quantitative, or in seeking a decision-making position in the public or private sector. The analytical economics track is

Bachelor of Arts

The Bachelor of Arts in economics requires a minimum of 120 s.h., including 32 s.h. of work for the major. The program provides a balance of economic theory, mathematical tools, and field applications. It offers good educational background for a variety of positions in business and government as well as for the study of law and for graduate study.

The major requires a set of courses in mathematics and statistics (11 s.h.), a set in economic theory (6 s.h.), and a set of applied field courses (15 s.h.). Students must choose one of three tracks: business economics, policy economics, or analytical economics. The applied field courses vary depending on the student's choice of track.

The business economics track is designed for students who intend to work in the private sector. The policy economics track is for students interested in earning a degree in law or a graduate degree in a discipline that is not highly quantitative, or in seeking a decision-making position in the public or private sector. The analytical economics track is
for students planning to earn a graduate degree in a discipline that is highly quantitative or who plan to pursue technical and/or analytical work in the public or private sector.

All B.A. students in economics must complete the College of Liberal Arts and Sciences General Education Program.

Students may count a maximum of 6 s.h. of transfer or correspondence credit toward the required 21 s.h. in 100-level economics courses; additional transfer or correspondence credit must be approved by the director of undergraduate studies. Students should take the economic theory courses (06E:104 Microeconomic Theory or 06E:106 Advanced Microeconomics, and 06E:105 Macroeconomics) at The University of Iowa.

Students should pay close attention to the order in which they take courses, since some courses are prerequisites for others; see “Prerequisites” below. For help in developing a study plan, visit the Department of Economics web site.

The economics major (B.A.) requires the following courses.

**Mathematics and Statistics Courses**

- 06E:071 Statistics for Strategy Problems 3 s.h.
- 22M:017 Calculus and Matrix Algebra for Business 4 s.h.
- 22S:008 Statistics for Business 4 s.h.

**Economic Theory Courses**

- 06E:104 Microeconomic Theory 3 s.h.
  or
- 06E:106 Advanced Microeconomics 3 s.h.
- 06E:105 Macroeconomics 3 s.h.

**Applied Field Courses**

Five courses are required; course selection is determined by the student’s choice of track.

**Business Economics Track**

Five of these:

- 06A:002 Managerial Accounting 3 s.h.
- 06E:111 Personnel Economics 3 s.h.
- 06E:117 Money, Banking, and Financial Markets 3 s.h.
- 06E:125 Global Economics and Business 3 s.h.
- 06E:141 Industry Analysis 3 s.h.
- 06E:160 Household Finance 3 s.h.
- 06J:048 Introduction to Management 3 s.h.

**Policy Economics Track**

Four of these:

- 06E:113 Health Economics 3 s.h.
- 06E:119 Policy Analysis 3 s.h.
- 06E:125 Global Economics and Business 3 s.h.
- 06E:129 Economic Growth and Development 3 s.h.
- 06E:133 Environmental and Natural Resource Economics 3 s.h.
- 06E:135 Regional and Urban Economics 3 s.h.
- 06E:145 Transportation Economics 3 s.h.
- 06E:164 Economies in Transition 3 s.h.
- 06E:165 Sports Economics 3 s.h.
- 06E:171 Antitrust Economics 3 s.h.
- 06E:172 Law and Economics 3 s.h.
One additional economics course numbered 06E:111 - 06E:189

Analytical Economics Track

Four of these:

06E:173 International Economics 3 s.h.
06E:174 Monetary Economics 3 s.h.
06E:175 Labor Economics 3 s.h.
06E:176 Public Sector Economics 3 s.h.
06E:177 Industrial Organization 3 s.h.
06E:183 Natural Resource Economics 3 s.h.
06E:187 Mathematical Economics 3 s.h.

Prerequisites

Prerequisites for most 100-level courses in economics: 06E:001 Principles of Microeconomics and 06E:002 Principles of Macroeconomics, or consent of instructor

Prerequisites for 06E:104 Microeconomic Theory: 06E:001 Principles of Microeconomics and 22M:017 Calculus and Matrix Algebra for Business, or consent of instructor

Prerequisites for 06E:105 Macroeconomics: 06E:002 Principles of Macroeconomics and 22M:017 Calculus and Matrix Algebra for Business

Prerequisite for 06E:071 Statistics for Strategy Problems: 22S:008 Statistics for Business

Prerequisites for courses numbered 06E:171 and above: 06E:104 Microeconomic Theory or 06E:105 Macroeconomics, or both, depending on the course

Bachelor of Science

The Bachelor of Science in economics requires a minimum of 120 s.h., including 33-35 s.h. of work for the major. The program addresses economic theory, mathematical tools, and field applications, with an emphasis on developing skill using analytic tools. It offers good educational background for a variety of positions in business and government as well as for the study of law and for graduate study.

The major requires a set of courses in mathematics and statistics (15-17 s.h.), a set in economic theory (6 s.h.), and a set of applied field courses (12 s.h.). Students must choose one of three tracks: business economics, policy economics, or analytical economics. The applied field courses vary depending on the student's choice of track.

The business economics track is designed for students who intend to work in the private sector. The policy economics track is for students interested in earning a degree in law or a graduate degree in a discipline that is not highly quantitative, or in seeking a decision-making position in the public or private sector. The analytical economics track is for students planning to earn a graduate degree in a discipline that is highly quantitative or who plan to pursue technical and/or analytical work in the public or private sector.

All B.S. students in economics must complete the College of Liberal Arts and Sciences General Education Program.

Students may count a maximum of 6 s.h. of transfer or correspondence credit toward the required 18 s.h. in 100-level economics courses; additional transfer or correspondence credit must be approved by the director of undergraduate studies. Students should take the economic theory courses (06E:104 Microeconomic Theory or 06E:106 Advanced Microeconomics, and 06E:105 Macroeconomics) at The University of Iowa.

Students should pay close attention to the order in which they take courses, since some courses are prerequisites for others; see "Prerequisites" below. For help in developing a study plan, visit the Department of Economics web site.

The economics major (B.S.) requires the following courses.

Mathematics and Statistics Courses

06E:184 Introduction to Econometrics 3 s.h.
22M:025 Calculus I 4 s.h.
22M:026 Calculus II 4 s.h.
22S:120 Probability and Statistics 4 s.h.
or
22S:130-22S:131 Introduction to Mathematical Statistics I-II 6 s.h.

The department recommends that students planning to pursue a graduate degree in economics take 22S:130 Introduction to Mathematical Statistics I and 22S:131 Introduction to Mathematical Statistics II in place of 22S:120 Probability and Statistics, and that they take additional courses in mathematics, including 22M:027 Introduction to Linear Algebra, 22M:028 Calculus III, and 22M:100 Introduction to Ordinary Differential Equations.

Economic Theory Courses

06E:104 Microeconomic Theory 3 s.h.
or
06E:106 Advanced Microeconomics 3 s.h.

06E:105 Macroeconomics 3 s.h.

Applied Field Courses

Four courses are required; course selection is determined by the student's choice of track.

Business Economics Track

Four of these:

06A:002 Managerial Accounting 3 s.h.
06E:111 Personnel Economics 3 s.h.
06E:117 Money, Banking, and Financial Markets 3 s.h.
06E:125 Global Economics and Business 3 s.h.
06E:141 Industry Analysis 3 s.h.
06E:160 Household Finance 3 s.h.
06J:048 Introduction to Management 3 s.h.

Policy Economics Track

Three of these:

06E:113 Health Economics 3 s.h.
06E:119 Policy Analysis 3 s.h.
06E:125 Global Economics and Business 3 s.h.
06E:129 Economic Growth and Development 3 s.h.
06E:133 Environmental and Natural Resource Economics 3 s.h.
06E:135 Regional and Urban Economics 3 s.h.
06E:145 Transportation Economics 3 s.h.
06E:164 Economies in Transition 3 s.h.
06E:165 Sports Economics 3 s.h.
06E:171 Antitrust Economics 3 s.h.
06E:172 Law and Economics 3 s.h.

One additional economics course numbered 06E:111 - 06E:189

Analytical Economics Track

Three of these:

06E:173 International Economics 3 s.h.
06E:174 Monetary Economics 3 s.h.
06E:175 Labor Economics 3 s.h.
06E:176 Public Sector Economics 3 s.h.
06E:177 Industrial Organization 3 s.h.
06E:183 Natural Resource Economics 3 s.h.
06E:187 Mathematical Economics 3 s.h.

One additional economics course numbered 06E:111 - 06E:189

Prerequisites

Prerequisites for most 100-level courses in economics: 06E:001 Principles of Microeconomics and 06E:002 Principles of Macroeconomics

Prerequisites for 06E:104 Microeconomic Theory: 06E:001 Principles of Microeconomics and 22M:017 Calculus and Matrix Algebra for Business, or consent of instructor

Prerequisites for 06E:105 Macroeconomics: 06E:002 Principles of Macroeconomics and 22M:017 Calculus and Matrix Algebra for Business

Prerequisites for courses numbered 06E:171 and above: 06E:104 Microeconomic Theory or 06E:105 Macroeconomics, or both, depending on the course

Prerequisite for 06E:184 Introduction to Econometrics: 22S:120 Probability and Statistics or 22S:131 Introduction to Mathematical Statistics II

Bachelor of Business Administration

The Bachelor of Business Administration in economics requires a minimum of 120 s.h., including 18 s.h. of work for the major. The program emphasizes economic foundations of business fields: accounting, finance, marketing, business law, and management. It provides good educational background for a variety of positions in business and government as well as for the study of law and for graduate study.

All students must complete the B.B.A. common requirements: the General Education courses, the prerequisites for admission to the Tippie College of Business, and the business core; see "Common Requirements" under Bachelor of Business Administration in the Tippie College of Business section of the Catalog.

The major requires a set of courses in mathematics and statistics, which students take as part of the B.B.A. common requirements; a set in economic theory (6 s.h.); and a set of applied field courses (12 s.h.). Students majoring in economics choose one of three tracks: business economics, policy economics, or analytical economics. The applied field courses vary depending on the student's choice of track.

The business economics track is designed for students who intend to work in the private sector. The policy economics track is for students interested in earning a degree in law or a graduate degree in a discipline that is not highly quantitative, or in seeking a decision-making position in the public or private sector. The analytical economics track is for students planning to earn a graduate degree in a discipline that is highly quantitative or who plan to pursue technical and/or analytical work in the public or private sector.

Students may request permission to apply a limited amount of transfer or correspondence credit toward requirements for the major, but they should take the economic theory courses (06E:104 Microeconomic Theory or 06E:106 Advanced Microeconomics, and 06E:105 Macroeconomics) at The University of Iowa.

Students should pay close attention to the order in which they take courses, since some courses are prerequisites for others; see "Prerequisites" below. For help in developing a study plan, visit the Department of Economics web site.

The economics major (B.B.A.) requires the following courses.

Mathematics and Statistics Courses

Students take these courses as part of the B.B.A. common requirements.

06E:071 Statistics for Strategy Problems 3 s.h.
22M:017 Calculus and Matrix Algebra for Business 4 s.h.
22S:008 Statistics for Business 4 s.h.

Economic Theory Courses

06E:104 Microeconomic Theory 3 s.h.
Applied Field Courses

Four courses are required; course selection is determined by the student's choice of track.

Business Economics Track

Four of these:

- 06E:111 Personnel Economics 3 s.h.
- 06E:117 Money, Banking, and Financial Markets 3 s.h.
- 06E:125 Global Economics and Business 3 s.h.
- 06E:141 Industry Analysis 3 s.h.
- 06E:160 Household Finance 3 s.h.

Policy Economics Track

Three of these:

- 06E:113 Health Economics 3 s.h.
- 06E:119 Policy Analysis 3 s.h.
- 06E:125 Global Economics and Business 3 s.h.
- 06E:129 Economic Growth and Development 3 s.h.
- 06E:133 Environmental and Natural Resource Economics 3 s.h.
- 06E:135 Regional and Urban Economics 3 s.h.
- 06E:145 Transportation Economics 3 s.h.
- 06E:164 Economies in Transition 3 s.h.
- 06E:165 Sports Economics 3 s.h.
- 06E:171 Antitrust Economics 3 s.h.
- 06E:172 Law and Economics 3 s.h.

One additional economics course numbered 06E:111 - 06E:189

Analytical Economics Track

Three of these:

- 06E:173 International Economics 3 s.h.
- 06E:174 Monetary Economics 3 s.h.
- 06E:175 Labor Economics 3 s.h.
- 06E:176 Public Sector Economics 3 s.h.
- 06E:177 Industrial Organization 3 s.h.
- 06E:183 Natural Resource Economics 3 s.h.
- 06E:187 Mathematical Economics 3 s.h.

One additional economics course numbered 06E:111 - 06E:189

Prerequisites

Prerequisites for most 100-level courses in economics: 06E:001 Principles of Microeconomics and 06E:002 Principles of Macroeconomics, or consent of instructor

Prerequisites for 06E:104 Microeconomic Theory: 06E:001 Principles of Microeconomics and 22M:017 Calculus and Matrix Algebra for Business, or consent of instructor

Prerequisites for 06E:105 Macroeconomics: 06E:002 Principles of Macroeconomics and 22M:017 Calculus and Matrix Algebra for Business
Prerequisite for 06E:071 Statistics for Strategy Problems: 22S:008 Statistics for Business
Prerequisites for courses numbered 06E:171 and above: 06E:104 Microeconomic Theory or 06E:105 Macroeconomics, or both, depending on the course

Four-Year Graduation Plan

Bachelor of Arts, Bachelor of Science

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

These checkpoints apply to both the Bachelor of Arts and the Bachelor of Science.

Before the third semester begins: at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: at least one-half of the semester hours required for graduation, 06E:001 Principles of Microeconomics and 06E:002 Principles of Macroeconomics, and the math component of quantitative courses required for major

Before the seventh semester begins: three-quarters of the semester hours required for graduation, 06E:104 Microeconomic Theory and 06E:105 Macroeconomics, and one 100-level economics course

Before the eighth semester begins: three 100-level economics courses and the statistics component of the quantitative course requirement

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Bachelor of Business Administration

The following checkpoints are designed for students who enter the University as first-year pre-business students. In order to stay on the plan, students must maintain the grade-point average required for guaranteed admission to the Tippie College of Business and must apply for admission to the college by the established deadline.

Students must take 06B:100 Foundations of Business during their first year after admission to the Tippie College of Business.

Before the third semester begins: 06E:001 Principles of Microeconomics or 06E:002 Principles of Macroeconomics, 22M:017 Calculus and Matrix Algebra for Business, and 22S:008 Statistics for Business, or equivalents; and at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: 06A:001 Introduction to Financial Accounting, 06A:002 Managerial Accounting, and 06E:001 Principles of Microeconomics or 06E:002 Principles of Macroeconomics (whichever has not already been taken), or equivalents; all General Education requirements; and at least half of the semester hours required for graduation

Before the seventh semester begins: business core requirements, approximately half of the course work in the major (varies by major), and three-quarters of the semester hours required for graduation

Before the eighth semester begins: approximately three-quarters of course work in the major

During the eighth semester: all remaining course work in the major, and a sufficient number of semester hours to graduate

Honors

Bachelor of Arts, Bachelor of Science

Students in the College of Liberal Arts and Sciences working toward a B.A. or B.S. in economics are encouraged to take part in the honors program in economics, which provides opportunities for high-achieving students to pursue special research interests. Honors students in economics must be members of the University of Iowa Honors Program, which requires students to maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University of Iowa Honors Program for more information).

To enter the honors program in economics, students must complete 06E:104 Microeconomic Theory and 06E:105 Macroeconomics before the senior year. Honors students typically register for 06E:194 Honors Seminar in the fall of the senior year. Then they define and complete a research project under the guidance of a supervising faculty member, earning up to 6 s.h. in 06E:195 Honors Thesis in Economics. The thesis is presented orally to a committee of three faculty members, typically the undergraduate honors advisor, the student's research supervisor, and a third
A faculty member agreed upon by the student and the honors advisor.

Interested students should consult the honors advisor by the second semester of their junior year.

**Bachelor of Business Administration**

The Tippie College of Business offers qualified B.B.A. students the opportunity to pursue honors study. For more information, contact the Undergraduate Program Office or see "B.B.A. with Honors" in the Tippie College of Business section of the Catalog.

**Minor**

The minor in economics requires a minimum of 15 s.h. in economics courses, including 12 s.h. taken at The University of Iowa in courses numbered above 06E:100. Students must maintain a g.p.a. of at least 2.00 in the minor.

**Course Work for Nonmajors**

Students in the College of Liberal Arts and Sciences may wish to use economics courses as part of other majors or the General Education Program. The introductory courses 06E:001 Principles of Microeconomics and 06E:002 Principles of Macroeconomics are approved for General Education in social sciences; they introduce the field of economics and the specialized topics of upper-division courses. The intermediate theory courses 06E:104 Microeconomic Theory and 06E:105 Macroeconomics provide a deeper foundation in the core theories and methods of the discipline. They serve as preparation for upper-division field courses or as terminal courses in an economics study plan.

Course work in economics can be related to majors in many other fields. For example, political science majors could elect 06E:119 Policy Analysis and 06E:125 Global Economics and Business; global studies majors, 06E:133 Environmental and Natural Resource Economics; pre-law students, 06E:171 Antitrust Economics and 06E:172 Law and Economics; mathematics and engineering majors, 06E:104 Microeconomic Theory and 06E:187 Mathematical Economics; and statistics majors, 06E:184 Introduction to Econometrics.

Some students combine related interests by pursuing double majors in economics and another field, such as computer science, geography, global studies, history, mathematics, political science, sociology, or statistics.

**Undergraduate Economics Forum**

Students are invited to join the undergraduate Economics Forum. The group sponsors programs to help students plan for careers or graduate study and holds social events, special lectures, and round-table discussions. It provides opportunities for students to meet other economics majors and department faculty members.

**Graduate Programs**

The department offers a Master of Arts and a Doctor of Philosophy in economics. It also offers a joint Doctor of Philosophy/Juris Doctor with the College of Law; see "Joint Ph.D./J.D." later in this section.

**Master of Arts**

The Master of Arts is offered only to students working toward a Ph.D. in economics.

**Doctor of Philosophy**

The Doctor of Philosophy in economics requires a minimum of 72 s.h. of graduate credit. The program provides rigorous training in economic theory, econometrics, and applied economics. It has six components: a coordinated sequence of core courses, a qualifying examination, a research paper, a set of major field courses, a dissertation proposal and comprehensive examination, and a dissertation.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog. Application deadline for admission and financial support is January 15 for fall semester entry.

**CORE SEQUENCE**

**First Semester**

- 06E:200 Economic Analysis I  
- 06E:203 Microeconomics I  
  
- 3 s.h.  
- 3 s.h.
Second Semester

06E:201 Economic Analysis II 3 s.h.
06E:205 Microeconomics II 3 s.h.
06E:206 Macroeconomics II 3 s.h.

Third Semester

06E:221 Econometrics 3 s.h.

Fourth Semester

06E:222 Applied Econometrics 3 s.h.

QUALIFYING EXAMINATION

The qualifying examination is normally taken the summer after the first year.

RESEARCH PAPER

The research paper is normally completed the summer after the second year.

MAJOR FIELD COURSES

Each student chooses a major study area in addition to the core courses. The requirement for the major area is a minimum of 24 s.h. of intensive study in a field and in courses that enable students to understand the relationship between their specialty and related fields.

DISSERTATION PROPOSAL AND COMPREHENSIVE EXAMINATION

Students must defend a dissertation proposal in a comprehensive examination within one year of completing the research paper requirement.

DISSERTATION

Submission of the completed dissertation and an oral defense of the dissertation research completes the Ph.D. program.

Joint Ph.D./J.D.

The Department of Economics and the College of Law offer a joint Ph.D./J.D. program; see Juris Doctor in the College of Law section of the Catalog. Separate application to each degree program is required. Applicants must be admitted to both programs before they can be admitted to the joint degree program.

Special Seminar

Each year the department offers a seminar program that brings eminent economists from other universities and from government agencies to The University of Iowa campus. Presentations by Department of Economics faculty members and students also are featured.

Economics Courses

Primarily for Undergraduates

Note: 06E:001 Principles of Microeconomics and 06E:002 Principles of Macroeconomics may be taken in either order or simultaneously. They are approved for General Education in social sciences for B.A. and B.S. students.
06E:001 Principles of Microeconomics
Organization, workings of modern economic systems; role of markets, prices, competition in efficient allocation of resources and promotion of economic welfare; alternative systems; international trade. B.B.A. students cannot use this course for GE: social sciences. GE: Social Sciences.

06E:002 Principles of Macroeconomics
National income and output, employment and inflation; money, credit; government finance; monetary, fiscal policy; economic growth, development; international finance. B.B.A. students cannot use this course for GE: social sciences. GE: Social Sciences.

06E:029 First-Year Seminar
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities).

06E:071 Statistics for Strategy Problems
Continuation of 22S:008; working knowledge of statistical techniques, scientific data-based approach to problem formulation and solution, statistical techniques in the context of real data analysis, assessment of defects in statistical analyses, using data for making business decisions, choosing appropriate statistical procedures, developing skill in communicating statistical results to audiences without knowledge of statistics. Prerequisites: 22M:017 and 22S:008.

06E:104 Microeconomic Theory
Economic theory of the behavior of consumers, producers, and other economic agents; role of markets in coordinating economic activity, conditions that markets require for efficient allocation of resources; market imperfections; strategic behavior of economic actors. Prerequisites: 06E:001 and 22M:017, or consent of instructor.

06E:105 Macroeconomics
Measurement of macroeconomic indicators; economic growth and business cycles; use of macroeconomic models to study the role of government fiscal and monetary policies. Prerequisites: 06E:002 and 22M:017; or consent of instructor.

06E:106 Advanced Microeconomics
Mathematical treatment of the economic theory of the behavior of consumers, producers, and other economic agents; the role of markets in coordinating economic activity and the conditions required by those markets for an efficient allocation of resources; market imperfections; and the strategic behavior of economic actors. Prerequisites: 06E:001, and 22M:017 or equivalent (22M:025 preferred).

06E:111 Personnel Economics
Microeconomic analysis of labor markets, related institutions; labor supply decisions made by workers, labor demand decisions made by firms, market equilibrium; economic analysis of unions; returns to education; family decisions. Prerequisites: 06E:001 and 06E:002, or consent of instructor.

06E:113 Health Economics
Structure of America's health care industry, economic analysis applied to its problems of production, pricing, distribution; cost-effectiveness, financing of medical costs, role of government. Prerequisites: 06E:001 and 06E:002, or consent of instructor.

06E:117 Money, Banking, and Financial Markets
Role of money, institutions in determination of income, employment, prices in domestic and world economy. Prerequisites: 06E:001 and 06E:002, or consent of instructor.

06E:119 Policy Analysis
Economic functions of government in modern economies; economic decision making; budgetary processes; effects of government expenditures, taxation on allocation of resources, distribution of income, economic growth, stability. Prerequisites: 06E:001 and 06E:002, or consent of instructor.

06E:125 Global Economics and Business
Modern theories of international trade and investment; role of tariffs and other restrictions of international trade; foreign exchange markets, international monetary arrangements, international economic policy. Prerequisites: 06E:001 and 06E:002, or consent of instructor.

<td></td>
</tr>
</tbody>
</table>
06E:174 Monetary Economics
Demand for and supply of money; money's role in economy; empirical studies of money's impact; problems with monetary control. Prerequisites: 06E:104 and 06E:105, or consent of instructor.

06E:175 Labor Economics
Labor supply and demand; investments in human capital, compensating wage differentials, discrimination, long-term contracts, occupational choice, family decisions, unions, immigration. Prerequisite: 06E:104.

06E:176 Public Sector Economics
Economic functions of government; budgetary processes; effects of government expenditures, taxation on resource allocation, income distribution, economic growth and stability. Prerequisites: 06E:104 and 06E:105, or consent of instructor.

06E:177 Industrial Organization
Market structure; effects of business practices, informational problems on market structure; appraisal of antitrust policies, government regulation of business. Prerequisite: 06E:104.

06E:179 History of Economic Thought
Evolution of economics as a social science; ideas of Smith, Ricardo, Malthus, Marx, Marshall, Keynes, and their major critics. Prerequisites: 06E:104 and 06E:105.

06E:183 Natural Resource Economics
Economics of natural resources; interaction between economic theory, empirical evidence, and public policy; land, water, fish, trees, minerals; externalities. Prerequisite: 06E:104 or consent of instructor.

06E:184 Introduction to Econometrics
Single equation linear statistical models, estimation and hypothesis testing; serial correlation, heteroscedasticity, generalized least squares estimation; specification analysis; errors in variables; emphasis on interpretation, application of econometric models, methods, use of computers. Prerequisite: 22S:120 or equivalent.

06E:187 Mathematical Economics
Mathematical structure of economic principles, problems, systems; may include constrained optimization, choice under uncertainty, general equilibrium and welfare economics, dynamical systems and control theory, game theory. Prerequisites: 06E:104 and 06E:105, or consent of instructor.

06E:189 Advanced Topics in Economics
Topics vary. Prerequisites: 06E:104 and 06E:105, or consent of instructor.

06E:190 Federal Reserve Challenge
Experience doing what Federal Reserve economists do every day: study the real U.S. economy, make forecasts and policy recommendations, defend their views to academic and professional economists; development of analytical skills, teamwork, how to build presentations. Prerequisites: 06E:104 and 06E:105, or consent of instructor.

For Advanced Undergraduates

06E:194 Honors Seminar
Research topics and methods in business. Prerequisites: business honors standing and consent of business honors director. Same as 06B:194.

06E:195 Honors Thesis in Economics
Independent student project directed by faculty or staff advisor; culminates in thesis that conforms to University Honors Program guidelines; may include empirical research, library research, applied projects. Prerequisites: 06B:194 or 06E:194, and admission to the Tippie College of Business honors program.

06E:196 Readings and Independent Study in Economics

06E:199 Academic Internship
Participation in approved internship program (e.g., Washington Center Internships). Prerequisite: consent of instructor.

**Primarily for Graduate Students**

With consent of the department chair, qualified undergraduates may enroll in courses listed for graduate students.

- **06E:200 Economic Analysis I**
  Basic metric topology, convex analysis, function spaces, measure theory and integration.
  3 s.h.

- **06E:201 Economic Analysis II**
  Behavior under uncertainty, macroeconomic models; dynamic programming, asset pricing, saving, consumption.
  3 s.h.

- **06E:203 Microeconomics I**
  Consumer choice theory, producer theory, choice under uncertainty, basic game theory. Offered fall semesters.
  Prerequisite: consent of instructor.
  3 s.h.

- **06E:204 Macroeconomics I**
  Economic growth, business cycles, money and inflation. Offered fall semesters.
  Prerequisite: 06E:201 or consent of instructor.
  3 s.h.

- **06E:205 Microeconomics II**
  General equilibrium and welfare analysis, adverse selection, the principal-agent problem, social choice, mechanism design.
  Offered spring semesters.
  Prerequisite: 06E:203 or consent of instructor.
  3 s.h.

- **06E:206 Macroeconomics II**
  Dynamic macroeconomic models; stochastic macroeconomics; time consistency equilibrium business cycle theory.
  Offered spring semesters.
  Prerequisite: 06E:204 or consent of instructor.
  3 s.h.

- **06E:211 Mathematical Economics I**
  Convex analysis in economic theory; ordinal and cardinal preference relations, quasiconcave, concave numerical representations; separation principle for convex sets—linear programming, concave programming; Brouwer fixed point theorem; existence of competitive equilibrium.
  Prerequisite: 06E:205 or consent of instructor.
  3 s.h.

- **06E:221 Econometrics**
  Statistical inference in single and multiple equation stochastic models, models with nonindependent or nonidentically distributed error structure, dynamic models; OLS, GLS, IV, ML estimation; asymptotic distribution theory; exact, asymptotic hypothesis tests.
  Prerequisite: 22S:154 or equivalent.
  3 s.h.

- **06E:222 Applied Econometrics**
  Empirical problems; multiple linear regression, nonlinear regression, maximum likelihood, hazard functions, univariate and multivariate time series, flexible functional forms.
  Prerequisite: 06E:221.
  3 s.h.

- **06E:223 Econometric Theory I**
  Inference from data and theory in economic models; emphasis on decision making and simulation methods.
  Prerequisite: 06E:222 or consent of instructor.
  3 s.h.

- **06E:234 International Business-M.B.A.**
  Problems in international business; how to export, how to deal with import competition, international joint ventures; country studies.
  Prerequisite: consent of instructor.
  3 s.h.

- **06E:235 International Trade Theory**
  The theory of international trade, including basic models of international trade; capital and labor mobility and trade; protection of international trade; the political economy of international trade; empirical applications of international trade.
  Prerequisite: consent of instructor.
  3 s.h.

- **06E:241 Macroeconomics III**
  Current research in macroeconomics; development of research topics with emphasis on theoretical and empirical analysis.
  Prerequisites: 06E:205 and 06E:221.
  3 s.h.

Elementary Education

Web site: http://www.education.uiowa.edu/teach

Undergraduate Programs

The College of Liberal Arts and Sciences, in collaboration with the College of Education, offers a Bachelor of Arts and a Bachelor of Science with a major in elementary education. Both degrees are awarded by the College of Liberal Arts and Sciences.

The elementary education major prepares students to teach kindergarten through sixth grade. Students complete course work in education foundations and methods and in one of the following areas of specialization: art, English language arts, history, mathematics, music, reading, science, social science, special education, or speech/communication theatre. Students must complete the College of Liberal Arts and Sciences General Education Program and must satisfy all other requirements for graduation with a bachelor's degree.

Students interested in pursuing a degree in elementary education must first be admitted to the College of Liberal Arts and Sciences; admission to the College of Education's elementary education program is not guaranteed. In order to be considered for admission to the elementary education program, undergraduates must complete a minimum of 33 s.h. of course work with a cumulative g.p.a. of at least 2.70. All students must submit Praxis I test scores with their application to the Teacher Education Program (TEP). Students should visit with an advisor or speak with Teacher Education Program staff about complete admission requirements.

For information about the elementary education curriculum, student teaching, and teacher licensure and certification, see "Teacher Education and Licensure/Certification" in the Teaching and Learning (College of Education) section of the Catalog.
The Department of English offers courses in literature, cultural studies, language, and writing. In these courses, students read poetry, fiction, essays, criticism, and theory to acquire methods for understanding literature and culture. In addition to providing these essential elements of a liberal arts and sciences education, the department's courses can augment students' specialized interests in other fields. The department also participates in the interdisciplinary Departments of American Studies, Cinema and Comparative Literature, and Women's Studies, the African American Studies Program, the American Indian and Native Studies Program, the Center for the Book, and the Project on Rhetorics of Inquiry (POROI).

The department has a historic commitment to teaching creative and nonfiction writing. Its graduate programs in writing have earned long-standing renown, and in fall 2008, it added a new creative writing track to the English undergraduate major. Admission to the track is selective.

Although most students in the Ph.D. program are preparing for careers as teachers and scholars, and many in the M.F.A. nonfiction writing program and the Iowa Writers' Workshop are preparing for lives as storytellers, essayists, and poets, the B.A. and M.A. programs provide valuable training for careers in a variety of fields. Students who have earned English degrees from The University of Iowa write for advertising firms, newspapers, and book publishers; teach in primary and secondary schools; practice law and medicine; work in business and industry; and participate in state or federal government. As far as possible, a student's course of study is arranged to meet his or her individual needs and objectives.

Undergraduate Programs

The Department of English offers a Bachelor of Arts and a minor in English.

The department offers courses in literature, film, critical theory, cultural studies, language, and writing. In these courses, students study poetry, fiction, essays, criticism, film, and theory to acquire methods for understanding the history and significance of texts in the cultures from which they emerge.

The program also challenges students to strive for excellence as writers. It offers several classes in creative writing as well as in nonfiction writing; see "Writing for Undergraduates" later in this Catalog section. It also offers a creative writing track in the undergraduate major (admission to the track is selective); see "Bachelor of Arts" below.

Students who plan to apply to the College of Education for a degree in secondary education (English) should consult with an advisor in that program as early as possible. The education degree demands that students choose particular courses in the English major in order to meet state requirements. See "B.A. with Teacher Licensure" later in this section.

Students interested in an English major should consult advisors in the English undergraduate advising office. Visit the Department of English web site for details about the program, faculty, courses, and upcoming events.

Bachelor of Arts

The Bachelor of Arts in English requires a minimum of 120 s.h., including at least 33 s.h. (11 courses) of work for the major. Students may apply to enter the creative writing track in the English major; admission is selective (see "Creative Writing Track" below).

Students must earn at least 18 s.h. of credit for the major at The University of Iowa. Transfer students may count a maximum of 15 s.h. of approved transfer credit toward the major. Students also must complete the College of Liberal
Arts and Sciences General Education Program.

The following English courses may not be counted toward the 33 s.h. required for the English major: all 08G and 08A courses, 08C:001 Creative Writing Studio Workshop, and 08N:020 Introduction to Creative Nonfiction.

All English majors must complete 008:005 Introduction to the English Major: Theory and Practice; students are encouraged to enroll in the course as soon as they declare the English major.

Other course work for the major is divided into six areas and three historical periods. Students must complete a total of eight area courses (see "Areas" below) and six historical period courses (see "Historical Periods" below). Since most courses satisfy both an area and a historical period requirement, most students complete the historical period requirements as they complete the area requirements and are able to choose additional elective course work to complete the major.

The following course lists are organized by area and historical period. The course description for each course states that course's area and historical period designation (see "Courses" in this Catalog section or visit the University's ISIS web site). Information and course lists are also available on the Department of English web site and from advisors.

Undergraduate courses listed under the headings "Special Topics," "Linguistics and Language," and "Translation Studies" (see "Courses" in this Catalog section) do not fulfill area or period requirements for the English major, but they may be used to earn credit for the major.

Areas

Students must complete at least one course (3 s.h.) from each of the following six areas. Each student also must choose one of the six areas as a concentration area and take an additional two courses in that area, for a total of three courses (9 s.h.) in one area, and eight area courses in all.

Literary Theory and Interdisciplinary Studies

008:001 Modern Fiction 3 s.h.
008:002 Postmodern Fiction 3 s.h.

COURSES APPROVED FOR GENERAL EDUCATION

Courses numbered 08G cannot be counted toward the 33 s.h. required for the English major, so students majoring in English should not use 08G courses to complete the College of Liberal Arts and Sciences General Education Program. Although 08G:001 The Interpretation of Literature is a part of the General Education Program, English majors should substitute a course approved for General Education in the humanities area for 08G:001 The Interpretation of Literature.

Creative Writing Track

Students majoring in English may be eligible to enter the creative writing track. The track places the same emphasis on training creative and intelligent readers as does the English major.

The creative writing track requires 13 s.h., as described under "Creative Writing Track Requirements" below. In addition, creative writing track students must fulfill all requirements for the English major as stated under "Bachelor of Arts" above, including 008:005 Introduction to the English Major: Theory and Practice and the 6 s.h. of University of Iowa introductory-level writing courses that are required for admission to the track. They also must complete the College of Liberal Arts and Sciences General Education Program.

Selective Admission

Admission to the creative writing track is selective; students must apply and be admitted to the track. To apply, students should have junior or senior standing. They must meet the following requirements:

- a cumulative g.p.a. of at least 3.33 in English (based on all English courses taken, including creative writing courses); and
- completion of at least 9 s.h. in University of Iowa English courses, excluding those with prefixes 08N and 08C.

They also must have completed 6 s.h. in University of Iowa introductory-level writing courses chosen from the
following list.

08C:023 Creative Writing 3 s.h.
08C:097 Fiction Writing 3 s.h.
08C:098 Poetry Writing 3 s.h.
08C:167 Undergraduate Writers' Seminar 3 s.h.
08N:080 Nonfiction Writing 3 s.h.
08N:090 Intermediate Nonfiction Writing 3 s.h.
048:078 Undergraduate Translation Seminar (section 1) 3 s.h.
048:079 Undergraduate Translation Workshop 3 s.h.
049:062 Playwriting I 3 s.h.
049:063 Playwriting II 3 s.h.

Exceptions may be made for students who have not taken an introductory course but who have taken 08C:166 Undergraduate Writers' Workshop: Poetry or 08C:163 Undergraduate Writers' Workshop: Fiction.

Students may apply to the creative writing track during preregistration each semester. For information and application forms, visit the Department of English web site.

Registration in creative writing track courses requires admission to the track.

Creative Writing Track Requirements

The creative writing track requires 13 s.h., including 10 s.h. of writers' seminars and an additional 3 s.h. writing course.

Writers' seminars are the hub of the creative writing track. They give students the opportunity to engage creatively in the relationship between reading and writing; to explore questions of craft, literary traditions, and aesthetics; and to learn how to read literature with a writer's eye.

During a single semester, creative writing track students enroll in 8WS:120 (2 s.h.) and in a writers' seminar (3 s.h.) of their choice, based on one of five genres: fiction, poetry, nonfiction, literary translation, and playwriting. In the writer's seminar, students do intensive work in their genre of choice, with other students who have chosen the same genre. At the same time, students in all genres meet once weekly in Writers' House Seminar, which draws on Iowa's creative writing tradition to provide a common experience that includes readings, talks, performances, master classes and class discussions and prepares students for participation at events led by visiting writers. The curriculum for the Writers' House Seminar includes works by or about the visiting writers, literature that helps contextualize the readings, and exercises designed to heighten students' involvements at events.

Students take the two-course combination of Writers' House Seminar and the genre-specific writers' seminar twice, once in each of two different semesters, for a total of 10 s.h. (5 s.h. each semester). They also must complete an additional 3 s.h. writing course; see "Additional Writing Course" below.

Required courses for the creative writing track are as follows.

Writers' Seminars

Students take 8WS:120 Writer's House Seminar twice, each time during the same semester in which they take their choice of the genre-based writers' seminars listed below. They may take the same genre-based seminar twice, or they may choose two different genre-based seminars (in two different semesters). In meeting the requirement of taking the two-course combination twice (8WS:120 and the genre-based seminar), students may register for the combination in two consecutive semesters, or they may skip a semester.

8WS:120 Writer's House Seminar (taken twice) 2 s.h.

Two of these genre-based seminars, each taken concurrently with 8WS:120:

8WS:121 Writers' Seminar: Fiction 3 s.h.
8WS:122 Writers' Seminar: Poetry 3 s.h.
8WS:123 Writers' Seminar: Nonfiction 3 s.h.
8WS:124 Writers' Seminar: Literary Translation 3 s.h.
8WS:125 Writers' Seminar: Playwriting 3 s.h.

Additional Writing Course

One of these:

008:198 Undergraduate Honors Project 1-2, 3, 4 s.h.
08C:163 Undergraduate Writers' Workshop: Fiction 3 s.h.
In order to take 008:198 Undergraduate Honors Project (an honors thesis in creative writing), students must be members of the University of Iowa Honors Program, must have completed all of the writers' seminars required for the creative writing track, must be on course to complete all requirements for the English major, and must have departmental approval.

**B.A. with Teacher Licensure**

Students planning to teach English in secondary schools must complete the requirements for the major in English and gain admission to the Teacher Education Program. Contact the College of Education Office of Teacher Education and Student Services for application forms and information.

By the end of the program, students must have completed the following courses.

**ENGLISH (PART OF THE ENGLISH MAJOR)**

A Shakespeare course
Three American literature courses
A British literature course
08N:141/07S:155 Approaches to Teaching Writing (area: nonfiction and creative writing) 3 s.h.
08P:182/07S:182 Language and Learning (area: literary theory and interdisciplinary studies) 2-3 s.h.
08P:198/07S:193 Reading and Teaching Adolescent Literature (area: literary theory and interdisciplinary studies) 3 s.h.
One nonfiction or creative writing course in addition to 08N:141

A Shakespeare course
Three American literature courses
A British literature course
08N:141/07S:155 Approaches to Teaching Writing (area: nonfiction and creative writing) 3 s.h.
08P:182/07S:182 Language and Learning (area: literary theory and interdisciplinary studies) 2-3 s.h.
08P:198/07S:193 Reading and Teaching Adolescent Literature (area: literary theory and interdisciplinary studies) 3 s.h.
One nonfiction or creative writing course in addition to 08N:141

**EDUCATION**

07B:180 Human Relations for the Classroom Teacher 3 s.h.
07E:102/07S:102 Technology in the Classroom 2 s.h.
07P:075 Educational Psychology and Measurement 3 s.h.
07S:100 Foundations of Education 3 s.h.
07S:114 Introduction and Practicum: Secondary English 3 s.h.
07S:115 Methods: Secondary English 3 s.h.
07S:187 Seminar: Curriculum and Student Teaching 1-3 s.h.
07S:190 Orientation to Secondary Education 0-1 s.h.
07S:191 Observation and Laboratory Practice in the Secondary School 6 s.h.
07S:192 Observation and Laboratory Practice in the Secondary School 6 s.h.
07S:194 Methods: Secondary Reading 2-3 s.h.
07U:100 Foundations of Special Education 3 s.h.
One college-level mathematics or statistics course

07B:180 Human Relations for the Classroom Teacher 3 s.h.
07E:102/07S:102 Technology in the Classroom 2 s.h.
07P:075 Educational Psychology and Measurement 3 s.h.
Admission

Applicants to the Teacher Education Program in English must have completed a minimum of 40 s.h., including at least 12 s.h. in English before they can be admitted (the following courses do not count toward the 12 s.h.: all 08G courses, 08N:141 Approaches to Teaching Writing, 08P:182 Language and Learning, and 08P:198 Reading and Teaching Adolescent Literature). Applicants must have a University of Iowa g.p.a. and a cumulative g.p.a. of at least 2.70 as well as an English major g.p.a. of at least 3.00. Applicants must submit an application to the College of Education, including PRAXIS I scores, an Iowa criminal history check, letters of recommendation, and proof of a 10-hour preadmission volunteer field experience.

Minor Licensure in English

Students who seek licensure for secondary teaching in fields other than English may seek minor licensure in English. First-year courses in rhetoric, speech, or writing do not count toward this requirement.

The English minor licensure program includes the following course work.

An American literature course
A British literature course
A course in creative or nonfiction writing
An additional English course
07S:115 Methods: Secondary English 3 s.h.
07S:194 Methods: Secondary Reading 2-3 s.h.
08N:141/07S:155 Approaches to Teaching Writing 3 s.h.
08P:182/07S:182 Language and Learning 2-3 s.h.
08P:198/07S:193 Reading and Teaching Adolescent Literature 3 s.h.

An American literature course
A British literature course
A course in creative or nonfiction writing
An additional English course
07S:115 Methods: Secondary English 3 s.h.
07S:194 Methods: Secondary Reading 2-3 s.h.
08N:141/07S:155 Approaches to Teaching Writing 3 s.h.
08P:182/07S:182 Language and Learning 2-3 s.h.
08P:198/07S:193 Reading and Teaching Adolescent Literature 3 s.h.

While this program meets minimum requirements for licensure, the department recommends that students who want to teach English have considerably more training in the field.

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan.

Before the third semester begins: at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: at least two courses in the major and at least one-half of the semester hours required for graduation

Before the seventh semester begins: at least six courses in the major and at least three-quarters of the semester hours required for graduation
Before the eighth semester begins: at least eight courses in the major

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Honors

The English major with honors gives talented students the opportunity to enhance their course of study through honors proseminars and thesis writing. Each year the department offers six honors proseminars covering a wide range of subject areas and historical periods. Honors proseminars are limited to 18 students, carry 4 s.h. credit, and meet three hours each week. These courses require substantial reading and research and culminate in a 15-20 page essay.

Students register for 008:098 Honors Proseminar.

To register for a proseminar, students must have a University of Iowa g.p.a. of at least 3.30 and must have completed three English courses (not including introductory courses in nonfiction or creative writing) with a g.p.a. of at least 3.30 in English. The department also recommends that students complete 008:005 Introduction to the English Major: Theory and Practice before taking an honors proseminar. To enroll in a proseminar, students must obtain a special permission code number from the honors director.

All students interested in taking honors course work are encouraged to join the English Honors Program as soon as they qualify. Students may join online at http://www.uiowa.edu/~enghonor or at the English Honors Program office.

Students who wish to graduate with honors in English must take two honors proseminars, complete a two-semester thesis project, and maintain a University of Iowa g.p.a. of at least 3.30 and a g.p.a. of at least 3.50 in English. In some cases, other academic course work can be substituted for the second proseminar. Students who wish to pursue this option should contact the honors director.

The two-semester thesis project includes 008:120 Honors Thesis Workshop (fall) and 008:198 Undergraduate Honors Project (independent study) for a total of 6 s.h. To enroll in 008:120 Honors Thesis Workshop, students must have completed one honors proseminar with a grade of A- or better and must have a University of Iowa g.p.a. of at least 3.30 and a g.p.a. of at least 3.50 in English.

The English Honors Program has established careful guidelines for each of the six types of honors theses accepted by the department: literary and cultural studies; nonfiction writing; electronic writing and multimedia production; English education; creative writing; and the interdisciplinary thesis for double honors, which allows a student to earn honors in two departments with one longer project. Information on thesis guidelines is available on the English Honors Program web site and in the handout A Guide to the English Honors Program, available in the Department of English office.

Contact the University of Iowa Honors Program for more information about honors study at Iowa.

Minor

The minor in English requires a minimum of 15 s.h. in English courses, including 12 s.h. in courses taken at The University of Iowa. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass. Students may count a maximum of 3 s.h. of approved transfer credit toward the minor. Before taking courses for the minor, students must complete the General Education Program requirement 08G:001 The Interpretation of Literature.

The minor must include at least 6 s.h. in literature (prefix 008); the remaining 9 s.h. may be selected from additional courses in literature, from most courses in writing (prefixes 08C and 08N), or from courses in linguistics (prefix 08L). The following courses do not count toward the minor: all 08A and 08G courses, 08C:001 Creative Writing Studio Workshop, and 08N:020 Introduction to Creative Nonfiction.

Students may declare the English minor on ISIS. In order for the minor to be recorded, students must indicate completion of the minor on their Application for Degree.

Students who would like help declaring the minor or in planning how to meet its requirements may stop by the advising office or schedule an appointment with an advisor by contacting the undergraduate English secretary.

Writing for Undergraduates

Many undergraduate students come to The University of Iowa because of the Iowa Writers' Workshop (see "Writing Programs" later in this section). The workshop is a graduate program, but any student may take the undergraduate courses taught there: 08C:023 Creative Writing, 08C:097 Fiction Writing, 08C:098 Poetry Writing, and 08C:001 Creative Writing Studio Workshop. However, 08C:001 Creative Writing Studio Workshop does not fulfill requirements for the English major or minor.

Admission to the undergraduate workshops in fiction and poetry (08C:163 Undergraduate Writers' Workshop: Fiction
and 08C:166 Undergraduate Writers' Workshop: Poetry) requires the instructor's consent. Students who wish to participate in these workshops must submit samples of their poetry or fiction to the Iowa Writers' Workshop office no earlier than a week before registration and no later than the last day of registration for that semester.

Students majoring in English may apply to the major's Creative Writing Track; see "Bachelor of Arts" earlier in this Catalog section.

Nonfiction writing is also a major area of interest for faculty and students in the department of English. Students may enroll for courses that stress practice in forms of nonfiction writing and for courses that focus on nonfiction literature. Students who wish to participate in 08N:150 Undergraduate Essay Workshop and other courses with special permission requirements should check with the instructor of the course before registering. Introduction to Creative Nonfiction (08N:020) does not fulfill requirements for the English major or minor.

Undergraduate majors may concentrate in nonfiction and creative writing with any combination of 08N or 08C courses (except 08C:001 Creative Writing Studio Workshop and 08N:020 Introduction to Creative Nonfiction).

Graduate Programs

The department offers an M.A., an M.F.A., and a Ph.D. in English. The M.A. introduces students to the professional study of literature, and the Ph.D. prepares them to serve as faculty members at colleges and universities.

The M.F.A. is offered in creative writing and in nonfiction writing. The M.F.A. in creative writing features advanced courses in writing fiction and poetry. Students in creative writing study at the Iowa Writers' Workshop, renowned as a pioneer in teaching writers since its founding in 1936. The M.F.A. in nonfiction writing is one of the few programs in the nation that offers a full range of graduate courses in the area.

Direct application to the Ph.D. program is generally encouraged for prospective M.A. students. But some consider the M.A. an appropriate step in their professional training. These students may have had an undergraduate major in a different field or may want more preparation for other reasons. Some may intend to complete their studies elsewhere. Students interested in careers in any area of book studies (professional writing, editing, web design, or publishing) may wish to pursue the M.A. as a terminal degree, as may teachers seeking to enhance their credentials or students pursuing intellectual growth unrelated to a specific career.

M.A. and Ph.D. students in English mix freely in graduate courses, share the same access to faculty, and meet the same standards of quality in their work.

Exam for the Master of Arts in Teaching

The department administers the English component of the exam for the Master of Arts in Teaching (M.A.T.) in coordination with the College of Education. M.A.T. students should contact the Department of Teaching and Learning or visit the College of Education web site for information.

Master of Arts

The Master of Arts in English requires a minimum of 30 s.h. of graduate credit. The program's focus is literary studies. The required 30 s.h. includes 24 s.h. earned in residence at The University of Iowa with a g.p.a. of at least 3.25. Students who wish to transfer to Iowa's Ph.D. program must complete two semesters or 15 s.h. of course work in literature (whichever comes first) before applying for admission to the doctoral program.

COURSE WORK

Each student must take the following courses at the 200 level or above. Applicable transfer courses must be approved by the director of graduate study in English.

One course in criticism and theory

One course in criticism and theory

Four courses from the following five areas:

British or American literature and culture before 1500
British or American literature and culture 1500-1660
British or American literature and culture 1660-1800
British or American literature and culture 1800-1900
British or American literature and culture of the 20th Century
British or American literature and culture before 1500
British or American literature and culture 1500-1660
British or American literature and culture 1660-1800
British or American literature and culture 1800-1900
British or American literature and culture of the 20th Century

Elective courses constitute half of the total credit for the degree and may be chosen from graduate courses both in and outside the English department. Students may wish to explore opportunities for interdisciplinary study, language study, experience in theory and practice of writing, or specialization in a field of literary scholarship.

Department of English graduate courses are repeatable with the written approval of the department's director of graduate studies.

Completion of the M.A. requires either a thesis or a portfolio. Students submit a written description of their choice to the director of the program before the semester in which they plan to graduate.

M.A. THESIS

Students who choose to write an M.A. thesis must submit a brief prospectus approved by a thesis director before they register for thesis credit and at least one semester before they submit the thesis. The thesis committee consists of the thesis director, the director of the M.A. program, and one other faculty member. The thesis is evaluated by the committee as either satisfactory or unsatisfactory.

A copy of the thesis must be presented to the Graduate College for approval. For detailed information about Graduate College deadlines and policies, see the Manual of Rules and Regulations of the Graduate College.

PORTFOLIO

Near the end of their course work, students who do not choose the thesis option must submit a portfolio of work to the M.A. examination committee, which consists of the director of the M.A. program and two other English faculty members. All three read the full portfolio. To pass, the candidate must win a majority vote of the committee members.

Students take the first step toward preparing to submit a portfolio by meeting with the director of the M.A. program to discuss the portfolio. Soon after this meeting, and no less than three weeks before the exam date, the student presents to the director a draft of the portfolio's introductory statement. The director may suggest changes either before or after approving the statement. Once the director approves the statement, the student must provide the director with three copies of the full portfolio at least two weeks before the date of the examination.

The work in the portfolio should demonstrate the student's knowledge of literature as a broad historical and theoretical inquiry. Students submit approximately 50 pages (12,500 words) of their best work, along with an introductory statement of five to seven pages. The body of the portfolio should contain revised versions of papers originally produced for classes. The introductory statement should explain the contents of the portfolio, contextualize each paper, and give a brief overview of the writing. Students are expected to describe the research methods used in assembling their portfolios and the critical practices that ground their work.

Master of Fine Arts (Nonfiction Writing)

The Master of Fine Arts in nonfiction writing requires 48 s.h. of graduate credit; a thesis is required. The program is broadly devoted to literary nonfiction. It is designed primarily for persons who wish to become nonfiction writers, but it also may be appropriate for those who wish to teach, edit, or pursue other activities in the field of nonfiction. Normally, the program takes three years to complete.

The required 48 s.h. includes at least 30 s.h. earned in residence at The University of Iowa and 24 s.h. of work in program-designated courses. Electives may be chosen widely, from courses in the English department as well as any other University departments.

Department of English graduate courses are repeatable with the written approval of the department's director of graduate studies.

In addition to the course work, students are required to enroll for at least 4 s.h. and no more than 8 s.h. of thesis credit. The thesis may be a single extended piece of nonfiction, a collection of shorter nonfiction pieces, or a collection of essays. Whatever the project, the thesis is expected to be of publishable quality.

For more information, consult the director of the Nonfiction Writing Program.
Master of Fine Arts (Creative Writing)

The Master of Fine Arts in creative writing requires a minimum of 48 s.h. of graduate credit. The degree is offered through the Program in Creative Writing (Iowa Writers' Workshop), a two-year residency program that culminates in a creative thesis—a novel, a collection of stories, or a book of poetry.

Throughout the program, workshop students craft their manuscripts and engage in an exchange of ideas about writing and reading with each other and with the renowned teacher-authors who make up the workshop's faculty.

Admission to the program in competitive.

For details about the M.F.A. in creative writing and about the workshop, see Creative Writing (Iowa Writers' Workshop) in the Catalog.

Doctor of Philosophy

The Doctor of Philosophy in English requires a minimum of 72 s.h. of graduate credit. The program is designed as preparation for the teaching, publishing, and administrative service required of college and university faculty members.

Concentrations are offered in areas such as literary history and critical theory, as well as interdisciplinary areas such as cultural studies and transnational studies.

Of the required 72 s.h., at least 30 s.h. must be earned in residence at The University of Iowa with a g.p.a. of at least 3.50.

Ph.D. requirements include the following.

Formal admission to candidacy by a vote of the Graduate Steering Committee, usually during the third semester of doctoral study

Course work in any four of the following historical periods, as expressed in texts of the English-speaking and -writing world (usually but not always British or American):

- Literature and culture before 1500
- Literature and culture 1500-1660
- Literature and culture 1660-1800
- Literature and culture 1800-1900
- Literature and culture of the 20th century

Three English department seminars taken at The University of Iowa

Fulfillment of the language requirement, usually by completion of an advanced undergraduate course (100-level or above) in a language other than English

A comprehensive examination that consists of the following: a portfolio of five scholarly questions based on a period of literary history (usually British or American); a review essay and annotated bibliography in a special area of interest; two course syllabi; an article to be submitted for publication; and an introduction to the portfolio that synthesizes its parts in preparation for a two-hour oral exam

A dissertation, beginning with a formal presentation of the prospectus to a faculty committee

A final examination in defense of the dissertation

All doctoral candidates are required to gain some teaching experience, preferably in the College of Liberal Arts and Sciences Department of Rhetoric and in General Education Program literature courses.

For application forms and a complete description of the Ph.D. program, contact the department's graduate program associate.

Admission
For information about admission requirements, see Admissions Guidelines for Graduate Students in English on the department's web site. Applications for admission must be postmarked by the following deadlines:

M.A. and Ph.D.: postmark deadline is January 7.  
M.F.A. (creative writing): postmark deadline is January 3.  
M.F.A. (nonfiction writing): postmark deadline is December 15.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

Financial Support

Graduate scholarships, fellowships, and teaching and research assistantships are awarded on a competitive basis. The department strives to provide six years of support for all doctoral students who are in good standing, which requires a University of Iowa g.p.a. of at least 3.50 and full-time student standing.

Financial aid applications are considered only from students who have applied or been admitted to a degree program in the Graduate College. Applications and all necessary supporting material must be submitted by the end of January for the following academic year. Forms are available from the Department of English and the University's Office of Admissions.

Writing Programs

For the past 70 years, The University of Iowa has been a national leader in virtually all areas of teaching writing. Today it offers graduate degrees in both creative and nonfiction writing, gives undergraduate English majors the opportunity to pursue a track in creative writing or a concentration in nonfiction writing, and makes writing courses available to qualified undergraduate non-English majors.

The Program in Creative Writing is conducted at the Iowa Writers' Workshop. Founded in 1936, the workshop counts scores of distinguished poets and novelists among its alumni. Writers compete for admission to the program, where they work with the outstanding teacher-authors that make up the workshop's faculty.

The workshop also brings numerous prominent authors to campus each year for lectures and readings.

The University of Iowa M.F.A. program in nonfiction writing is one of the few programs in the nation that offers a full range of graduate course work in the area. It also gives undergraduates the opportunity to pursue a concentration in nonfiction writing.

For information about the graduate degrees and about undergraduate opportunities in creative writing and in nonfiction writing, see "Master of Fine Arts (Nonfiction Writing)," "Master of Fine Arts (Creative Writing)," and "Writing for Undergraduates" earlier in this section of the Catalog. To learn more about the creative and nonfiction writing programs, visit Iowa Writers' Workshop and Nonfiction Writing Program.

Facilities, Resources

The University of Iowa Libraries collection is strong in all areas of English and American literature. Partly because of the influence of the Iowa Writers' Workshop, University Libraries has particular strengths in 20th-century fiction and poetry, including manuscript collections of 20th-century authors.

Several periodicals are published under the department's aegis. The Iowa Review, Walt Whitman Quarterly Review, and Philological Quarterly offer opportunities for especially qualified graduate students to work as research assistants or editorial associates. The Iowa Journal of Cultural Studies, edited by English department graduate students, features creative and scholarly work by students in English and related areas.

The Department of English and the Iowa Writers' Workshop sponsor a rich and extensive series of readings and lectures by poets, fiction writers, and scholars, all open to students in the department.

The Association of Graduate Students in English sponsors social and intellectual events during the year and provides a forum for student opinion. All graduate students in the department are members.

English Courses

Individual descriptions for most English courses are not included because content and emphasis may vary considerably from one semester to the next. For detailed descriptions of each semester's courses, visit the University's ISIS web site.
Courses for Non-English Majors

08A:080 Nonfiction Writing for Non-English Majors 3 s.h.
08A:104 Personal Writing for Non-English Majors 3 s.h.
08A:106 Literature and Culture of 20th-Century America for Non-English Majors 3 s.h.
08A:113 Writing for Business and Industry for Non-English Majors 3 s.h.

08A:135 Forms of the Essay for Non-English Majors 3 s.h.
08A:142 Popular Literature for Non-English Majors 3 s.h.
08A:188 Prose by Women Writers for Non-English Majors 3 s.h.

General Education

Note: 08C:001 Creative Writing Studio Workshop and 08N:020 Introduction to Creative Nonfiction do not count toward the English major or minor.

08C:001 Creative Writing Studio Workshop 3 s.h.
Experience reading and writing fiction, poetry, and personal narrative in a workshop setting; study of published work and critical discussion from a writer's standpoint; critique of class members' work. GE: Fine Arts, Humanities.

08N:020 Introduction to Creative Nonfiction 3 s.h.
Creative nonfiction genres explored through readings, discussion, and writing exercises; introduction to the workshop environment; for English nonmajors. GE: Fine Arts.

Literature, General Education

All students who seek a degree from the College of Liberal Arts and Sciences, except English majors, must take 08G:001 08G:001 The Interpretation of Literature as part of the General Education Program. English majors should substitute any course that is approved for General Education in the humanities, except those numbered 08G.

Course 08G:001 (or its equivalent by examination or transfer) is a prerequisite for courses 08G:002 Biblical and Classical Literature through 08G:015 Women and Literature. The pass/nonpass option is available only for students in the Colleges of Nursing and Engineering with consent of the student's advisor and the instructor. Students must successfully complete the rhetoric requirement before they take 08G courses.

08G:001 The Interpretation of Literature 3 s.h.
Ways of reading; focus on reader, text, contexts; poetry, short fiction, drama, novels. GE: Interpretation of Literature.

08G:002 Biblical and Classical Literature 3 s.h.
Literatures of ancient cultures--Jewish and Christian, Greek and Roman--that have deeply affected later civilizations. Prerequisite: 08G:001. GE: Humanities.

08G:003 Medieval and Renaissance Literature 3 s.h.
English and European poetry, prose, drama circa 400-1700 in dialogue with contemporary concerns. Prerequisite: 08G:001. GE: Humanities.

08G:004 Heroes and Villains 3 s.h.
Heroes, heroines, and villains as products of the imagination; literary representations of heroes, heroines, and villains in varied social and historical situations; how their representation shapes our understanding of heroism and of villainy. Prerequisite: 08G:001; closed to students who have taken 08G:012. GE: Humanities.
08G:005 Literatures of Native American Peoples
Genres of Native American literature, including oral literature; focus on written literature (fiction, essays, poetry, drama). Prerequisite: 08G:001. GE: Cultural Diversity, Humanities. Same as 149:005.

08G:006 Fictions
Selected masterpieces and recent developments in the art of storytelling in poetry and prose. Prerequisite: 08G:001.
GE: Humanities.

08G:007 Poetry
Poetry from major periods of development as well as contemporary verse; emphasis on distinctive language, major formal patterns of poetry. Prerequisite: 08G:001. GE: Humanities.

08G:008 Drama
Plays from a wide range of periods; relationship of text to performance. Prerequisite: 08G:001. GE: Humanities.

08G:009 American Lives
Major works of American literature. Prerequisite: 08G:001. GE: Humanities.

08G:011 Literature and Sexualities
Works from various genres, time periods, cultures that reflect and construct a wide range of sexual identities. Prerequisite: 08G:001. GE: Cultural Diversity, Humanities.

08G:012 Comic and Tragic Literature
Interrelations of comic and tragic literature, including film and other popular media, and their connection with human experience; comic and tragic forms and their uses in different social and historical situations. Prerequisite: 08G:001; closed to students who have taken 08G:004. GE: Humanities.

08G:014 Literatures of the African Peoples
Works in English by authors of African descent from America, continental Africa, the Caribbean. Prerequisite: 08G:001. GE: Foreign Civilization & Culture, Humanities. Same as 129:008.

08G:015 Women and Literature
Works from various genres and time periods focusing on a wide range of women's experiences. Prerequisite: 08G:001. GE: Humanities.

Literature, Primarily for Undergraduates

English department courses are open to all undergraduates who have satisfied the rhetoric requirement. Undergraduates are encouraged to complete the required course 008:005 Introduction to the English Major: Theory and Practice as soon as they declare the English major. Students also are encouraged to take one or more introductory departmental courses (008:030 Introduction to Cultural Studies through 008:038 Introduction to the Essay) before attempting 100-level courses.

Courses 008:098 Honors Proseminar, 008:198 Undergraduate Honors Project, and 008:199 Special Project for Undergraduates may be repeated. Most courses with the 008 prefix may not be repeated; see course descriptions for exceptions. Some may be repeated if the subject matter is different from that of a course a student already has taken; students must have written consent from the department's undergraduate advising office.

008:001 Modern Fiction
English majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: 20th- and/or 21st-Century Literature.

008:002 Postmodern Fiction
English majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: 20th- and/or 21st-Century Literature.

008:005 Introduction to the English Major: Theory and Practice
History and practice of English as a discipline; four central aspects of literary study.

08N:113 Writing for Business and Industry
English majors may apply this course to the following area and/or period requirement. PERIOD: 20th- and/or 21st-Century Literature.

3 s.h.

08N:119 Writing for Interdisciplinary Audiences
English majors may apply this course to the following area and/or period requirement. PERIOD: 20th- and/or 21st-Century Literature. Same as 024:119, 153:119, 154:119.

3 s.h.

08N:120 Advanced Nonfiction Writing
Essay writing; focus on workshop environment. English majors may apply this course to the following area and/or period requirement. PERIOD: 20th- and/or 21st-Century Literature. Prerequisites: undergraduate standing, and 08N:080 or consent of instructor.

3 s.h.

08N:125 Freelance Reporting and Writing
Approaches to writing and marketing articles to magazines, newspapers, other publications; developing ideas, researching periodical markets, writing queries, writing and rewriting articles for publication. English majors may apply this course to the following area and/or period requirement. PERIOD: 20th- and/or 21st-Century Literature. Prerequisites: 019:098 and journalism major, or consent of undergraduate director. Same as 019:125.

4 s.h.

08N:130 Special Readings in Nonfiction
A particular author, genre, or structure in nonfiction; close readings of published essays; focus on students' writing in relation to the special topic. English majors may apply this course to the following area and/or period requirement. PERIOD: 20th- and/or 21st-Century Literature. Prerequisites: undergraduate standing, and 08N:080 or 08N:090 or consent of instructor.

3 s.h.

08N:133 Advanced Writing for Business
English majors may apply this course to the following area and/or period requirement. PERIOD: 20th- and/or 21st-Century Literature.

3 s.h.

08N:140 Editing a Literary Magazine
Introduction to literary magazines; hands-on experience. English majors may apply this course to the following area and/or period requirement. PERIOD: 20th- and/or 21st-Century Literature. Prerequisites: successful completion of four English courses and consent of instructor.

3 s.h.

08N:141 Approaches to Teaching Writing
Theories, practices, strategies, and history of writing and teaching writing. English majors may apply this course to the following area and/or period requirement. PERIOD: 20th- and/or 21st-Century Literature. Same as 07S:155.

3 s.h.

08N:145 Multimedia Writing
Multidisciplinary sessions mixing media production, creative nonfiction, and literary theory; topics ranging from hypertext authoring and electronic magazine publishing to sound art and digital video; principles and practices of writing for alternative media, theoretical understanding of how various media frame the situation; radio essay, video essay, interactive animation, web authoring, electronic magazine publishing. English majors may apply this course to the following area and/or period requirement. PERIOD: 20th- and/or 21st-Century Literature. Prerequisite: consent of instructor.

3 s.h.

08N:146 Film and Writing
Writers' introduction to digital video; compelling forms of nonfiction filmmaking from the film essay to the environmental documentary; how to convert texts into film, conduct interviews, and shoot and edit digital video; emphasis on careful analysis and making of whitely films.

3 s.h.
08N:147 Graphic Writing
The photo essay and the graphic memoir, two modes of nonfiction that have steadily increased in prominence and popularity; key texts in both genres (i.e., Dorothea Lange’s *American Exodus*, Marjane Satrapi's *Persepolis*, or Art Spiegelman's *Maus*); writing and producing photo essays and short graphic memoirs.

08N:148 Radio and Writing
Writing with sound; introduction to radio essays and documentaries with focus on digital audio; analyze key radio works and essayists; produce voiceovers, record interviews, mix music, edit sound and spoken texts in making radio art.

08N:150 Undergraduate Essay Workshop
Experience working on new nonfiction projects, drafting and preparing one piece throughout a semester; individualized work to promote understanding of and creation in genres of nonfiction writing. English majors may apply this course to the following area and/or period requirement. PERIOD: 20th- and/or 21st-Century Literature. Prerequisites: undergraduate standing, successful completion of two 08N courses, submission of manuscript, and consent of instructor.

08N:183 Invention
How to get writing going, keep it going, and write in an authentic meaningful way. English majors may apply this course to the following area and/or period requirement. PERIOD: 20th- and/or 21st-Century Literature. Same as 160:183.

08N:192 Dublin Writing Workshop
Intensive writing workshops for aspiring creative writers; study abroad in Dublin, Ireland. English majors may apply this course to the following area and/or period requirement. AREA: Nonfiction and Creative Writing. PERIOD: 20th- and/or 21st-Century Literature.

08N:199 Undergraduate Project in Nonfiction Writing
English majors may apply this course to the following area and/or period requirement. PERIOD: 20th- and/or 21st-Century Literature.

08N:202 Teaching Nonfiction
Theories and practices of teaching nonfiction writing; writing workshop approaches, strategies to encourage response and revision, connections between reading and writing, diversity of form, language, and assessment.

Writers' Seminars

8WS:120 Writer's House Seminar
In-depth focus on works by and about visiting writers and literature that contextualizes their work; multiple genres; seminar. Prerequisite: English major and admission to Undergraduate Creative Writing track.

8WS:121 Writers' Seminar: Fiction
In-depth exploration and analysis of creative works in fiction. Prerequisites: English major and admission to Undergraduate Creative Writing track. Corequisite: 8WS:120.

3 s.h.

008:225 Late Victorian and Edwardian Literature
3 s.h.

008:226 Readings in African Literature
3 s.h.

008:228 Studies in African American Literature
3 s.h.

008:229 Introduction to Contemporary Theory
3 s.h.

008:234 Readings in South Asian Literature
3 s.h.
Same as 048:234.

008:235 Readings in Twentieth-Century Literatures I
3 s.h.

008:236 Readings in Twentieth-Century Literatures II
3 s.h.

008:237 Indigenous Writings
3 s.h.

008:238 Readings in American Indian Literature
3 s.h.

008:239 Queer Theory
3 s.h.
Same as 048:239.
008:240 Readings in American Literary Genres  
3 s.h.

008:241 Topics in Contemporary Literature  
3 s.h.

008:242 African American Cultural and Literary Criticism 1900-Present  
Diverse range of African American cultural and literary criticism from 1900 to the present; the new negro; racial integration; race, gender, and sexuality; Black public intellectuals. Same as 045:242.  
3 s.h.

008:243 Feminist Cultural Studies  
3 s.h.

008:247 American Literary Magazines  
Aspects of American literary magazines, from city journals to monthly periodicals; from historical moment to marketplace demand.  
3 s.h.

008:249 Modernist Studies  
3 s.h.

008:250 Readings in American Literature  
American literature of the 18th century. Repeatable.  
3 s.h.

008:251 Inter-American Cultural Studies  
Key literary and critical texts in the emerging fields of inter-American hemispheric, and Latina/Latino American studies.  
3 s.h.

008:252 Readings in Latina/o Literary and Cultural Studies  
Survey of Latina/o literature and criticism to prepare for comprehensive exam; organized by thematic units that stress canonical and emerging research areas in Latina/o literary and cultural studies.  
3 s.h.

008:253 Shakespeare  
Same as 049:213.  
3 s.h.

008:254 Readings in American Literature II  
Nineteenth-century American literature. Repeatable.  
3 s.h.

008:258 Readings in American Literature III  
3 s.h.

008:260 Modes of Critical Analysis  
Critical practice applicable to English language and literature.  
3 s.h.

008:261 Studies in Postmodernism  
Aspects of postmodernism as aesthetic practice and critical theory in literary and cultural studies.  
3 s.h.

008:263 Issues in Rhetoric and Culture  
Rhetorical theory and criticism as culturally embedded practices; rhetorical production of selves and social difference; relationships between rhetoric and literature, philosophy, popular texts. Repeatable. Same as 010:360, 160:360.  
3 s.h.

008:267 Classical Rhetoric  
3 s.h.

008:268 Modern Rhetoric  
History of modernist rhetorical theory in the 20th century; relationships with philosophy, social and physical sciences, cultural change. Same as 036:311, 160:311.  
2-4 s.h.

008:270 Introduction to Cultural Studies  
Interdisciplinary approaches to literature and culture.  
3 s.h.

008:272 Topics in Interdisciplinary Studies  
3 s.h.
008:274 Postcolonial Women's Writing
Same as 131:274.

008:275 Literature as Letters
3 s.h.

008:276 Writing and Revolution
3 s.h.

008:280 Reading the Image
Assessment and preparation of strategies for interdisciplinary discussion of image textualization.
3 s.h.

008:283 New Media Poetics
3 s.h.

Graduate Special Topics

008:313 Digital Rhetoric
Current discourse (utopic, dystopic, other strands) about the Internet as it shapes and is shaped by competing forces.
Repeatable. Same as 160:313, 650:313.
3 s.h.

008:315 Current Issues in Rhetoric
Ethical, social, or cultural issues; rhetoric's role in their contemporary significance; traditional aspects of rhetoric, their pertinence to present concerns. Same as 010:340, 036:317, 160:340.
3 s.h.

Seminars
Advanced work in literary history, criticism, and theory; concentration varies from semester to semester.

008:231 Crossing Borders Seminar
2-3 s.h.

008:402 Seminar: Medieval Literature and Culture
Same as 048:402.
arr.

008:407 Seminar: Renaissance Literature
Same as 048:407.
arr.

008:418 Seminar: Bodies Politic
3 s.h.

008:421 Seminar: Restoration and Eighteenth-Century Literature
arr.

008:431 Seminar: Romantic Literatures
arr.

008:432 Seminar: Victorian Literature
arr.

008:440 Seminar: Studies in the Twentieth Century
arr.

008:450 Seminar: Postcolonial Studies
Same as 048:454.
3 s.h.

008:452 Walt Whitman
Walt Whitman's writings and career.
3 s.h.

008:458 Seminar: American Literature and Culture
arr.

008:459 Seminar: Reading Place and Scale
3 s.h.

008:460 Seminar: Problems in Aesthetics and Literary Theory
arr.
Same as 048:460.

008:461 Seminar: Literary Criticism and Theory
Analysis of issues in current literary criticism and theory and of texts from related fields, such as aesthetics, cultural studies, political science, psychology, and philosophy.

008:462 Seminar: Cultural Studies

Independent Study

008:500 Advanced Studies in an Author

Linguistics and Language

The undergraduate courses below do not fulfill area or period requirements for the English major but may be used to earn elective credit for the major.

08L:100 Introduction to Linguistics
Introduction to the study of human language: sounds and their contrasts and variation, words and meaningful subunits, sentence structure, historical change. Same as 103:100, 113:100.

08L:131 History of the English Language
Development of phonological and grammatical structure of English, from Old to Modern English; dialectal differentiation in English. Prerequisite: 103:100 or equivalent. Same as 103:131.

Professional Training

The following courses offer theoretical and practical training for those who plan to teach.

08P:182 Language and Learning
2-3 s.h.
How language reflects and constructs learners' identities and cultures; readings related to oral and written language, native and second language development, linguistic diversity; discussion of the relationship of language theory to schools of language instruction. English majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. Same as 07E:182, 07S:182.

08P:190 Methods: Secondary English 3 s.h.
Organizational techniques, methods, materials for teaching high school English; experience in simulated teaching situations during laboratory sessions, integrated with lectures and discussions. Prerequisite: 07S:114. Same as 07S:115.

08P:198 Reading and Teaching Adolescent Literature 3 s.h.
Reading and evaluation of literature suitable for junior and senior high school students. English majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. Same as 07S:193.

08P:204 Literature for Children II 3 s.h.
Current theory, research, and practice in reading and responding to children's literature; genre and topic vary. Same as 07E:204, 07S:204.

08P:300 Introduction to Qualitative Methods in Literacy Research 3 s.h.
Conceptual and practical exploration of selected research methods, including pilot data collection, analysis, and reporting. Repeatable. Same as 07E:370, 07S:370.

08P:405 M.A. Seminar: English Education arr.
Significant developments in English education; primary and collateral readings. Prerequisite: consent of instructor. Same as 07S:315.

08P:425 Ph.D. Seminar in Language, Literacy, and Culture arr.
Historical, recent research and theory in literacy education; topics vary. Repeatable. Prerequisite: consent of instructor. Same as 07E:415, 07S:415.

Nonfiction Writing

Courses 08N:250 Forms of Nonfiction, 08N:255 Forms of the Essay, 08N:262 Readings in Nonfiction, 08N:350 Essay Writing Workshop, and 08N:355 Nonfiction Writing Workshop may be repeated. Others may be repeated with consent of the instructor and the director of graduate studies.

Practice in Writing

These courses give intensive attention to composition and exposition and to formal and thematic problems, both in the meditative essay and in extended works of nonfiction.

08N:250 Forms of Nonfiction arr.

08N:255 Forms of the Essay arr.

08N:320 Uncreative Writing 3 s.h.
Forgery, frauds, hoaxes, avatars, and impersonations across writing and the arts; how modernist notions of chance, procedure, and repetition, and aesthetics of boredom influence current writing and art practices; experience using strategies of appropriation, replication, plagiarism, piracy, sampling, and plundering as compositional methods for writing. Repeatable. Same as 160:320.

08N:340 Writing for Learned Journals 1-4 s.h.
Help for graduate students in bringing written work to publishable form; analysis of target journals' audiences and interests; submission, response to criticism. Same as 160:300, 650:300.

08N:350 Essay Writing Workshop arr.

08N:355 Nonfiction Writing Workshop arr.
The courses combine theory and analysis of nonfiction writing with practical experimentation in writing. They are intended for people who want to practice, criticize, and/or teach nonfiction writing.

**Theory and Practice of Writing**

08N:262 Readings in Nonfiction  
Same as 160:262.

08N:270 Twenty-first-Century Nonfiction

08N:365 Overseas Writing Workshop

08N:375 Teaching in a Writing Center  
Seminar/practicum to prepare graduate students to teach in the University of Iowa Writing Center or similar settings; seminar component on writing and reading processes, tutoring strategies, English-as-a-second-language issues; practicum experience tutoring in the Writing Center. Same as 010:375.

**Independent Study**

08N:550 Special Project in Nonfiction Writing

08N:580 Thesis in Nonfiction Writing

**Creative Writing**

All may be repeated.

**Workshops and Seminars**

Open only to Iowa Writers' Workshop students or to others with consent of instructor.

08C:251 Fiction Workshop

08C:252 Poetry Workshop

08C:270 Form of Fiction  
3 s.h.

08C:275 Form of Poetry  
3 s.h.

08C:297 Fiction Writing  
3 s.h.  
Reading and discussion of published stories and those written by class members, with the aim of improving writing through careful reading and reflection, spirited discussion, and written comments. Repeatable.

08C:298 Poetry Writing  
3 s.h.  
Careful writing and reading of poems by students as well as by established poets; thorough discussion in a supportive context. Repeatable.

08C:490 Seminar: Problems in Modern Fiction

08C:495 Seminar: Problems in Modern Poetry

**Independent Study**

08C:195 Undergraduate Project in Creative Writing
Period: 20th- and/or 21st-century literature. Prerequisite: consent of instructor.

08C:555 Graduate Project in Creative Writing
08C:590 M.F.A. Thesis

Translation Studies
The undergraduate courses below do not fulfill area or period requirements for the English major but may be used to earn elective credit for the major.

08W:079 Undergraduate Translation Workshop 3 s.h.
Translation exercises, discussion of translation works in progress; alternative strategies for translation projects. Prerequisite: working knowledge of a language other than English. Same as 048:079.

08W:260 Translation Workshop 3 s.h.
Prerequisites: at least one foreign language and consent of instructor. Same as 048:260, 181:260.

08W:265 Seminar Issues in the History of Translation 3 s.h.
Selected readings, current debate on translation's history and theory. Same as 048:270.
Environmental Sciences

Coordinator: Stephen D. Hendrix
Executive committee chair: Mark K. Reagan

Affiliated faculty: Jonathan M. Adrain (Geoscience), Marc P. Armstrong (Geography), Richard G. Baker (Geoscience), David A. Bennett (Geography), E. Arthur Bettis III (Geoscience), Christopher A. Brochu (Geoscience), Ann F. Budd (Geoscience), Gregory R. Carmichael (Chemical and Biochemical Engineering), Josep Comeron (Biology), Robert W. Cruden (Biology), Jeffrey Dorale (Geoscience), C. Thomas Foster Jr. (Geoscience), Jane A. Gilotti (Geoscience), Vicki H. Grassian (Chemistry), Philip H. Heckel (Geoscience), Diana G. Horton (Biology), Naresh Kumar (Geography), Sarah C. Larsen (Chemistry), Johna Leddy (Chemistry), Marc A. Linderman (Geography), John Logsdon (Biology), Bryant F. MacAllister (Biology), Leonard R. MacGillivray (Chemistry), George P. Malanson (Geography), William C. McClelland (Geoscience), Maurine Neiman (Biology), David W. Peate (Geoscience), R. Rajagopal (Geography), Mark K. Reagan (Geoscience), Jeffry T. Schabilion (Biology), Michelle M. Scherer (Civil and Environmental Engineering), Jerald L. Schnoor (Civil and Environmental Engineering), Holmes A. Semken (Geoscience), Hallie J. Sims (Geoscience), Nelson Ting (Anthropology), Ingrid Ukstins Peate (Geoscience), Larry J. Weber (Civil and Environmental Engineering), Frank Weirich (Geoscience), You-kuan Zhang (Geoscience)

Undergraduate degree: B.S. in Environmental Sciences
Undergraduate nondegree program: Minor in Environmental Sciences
Web site: http://www.uiowa.edu/~envsci

The Environmental Sciences Program provides rigorous interdisciplinary training in the scientific study of the environment. It promotes an understanding of the earth as a complex network of interacting organic and inorganic systems. The program's four tracks--environmental biosciences, environmental chemical sciences, environmental geosciences, and environmental hydrosciences--reflect the diversity in the broad field of environmental sciences and take advantage of the College of Liberal Arts and Sciences' disciplinary strengths, offering students an opportunity to develop particular areas of expertise.

Hands-on field experience is a crucial component of the program. Students are strongly encouraged to engage in research and study abroad.

The Department of Geoscience is the administrative home for the Environmental Sciences Program.

Undergraduate Programs

The program offers a Bachelor of Science and a minor in environmental sciences.

Bachelor of Science

The B.S. in environmental sciences requires a minimum of 120 s.h., including 83-85 s.h. of work for the major. Students must complete the College of Liberal Arts and Sciences General Education Program; courses required for the major in environmental sciences also may be used to satisfy the General Education Program requirements.

Environmental sciences students complete requirements in three areas: the science and mathematics foundation, the environmental sciences foundation, and one of four environmental sciences tracks. Each student is assigned an advisor who specializes in his or her track.

The science and mathematics foundation develops fundamental skills and comprehension in biology, chemistry, geology, mathematics, and statistics. The environmental sciences foundation includes an introductory course in environmental science and an array of courses that focus on remote sensing techniques, design and use of geographic information technologies, the geomorphic and environmental processes that shape the earth's surface, and ecological factors that influence the distribution and abundance of organisms.

Each of the four environmental sciences tracks focuses on one aspect of environmental sciences:

Environmental biosciences (green) track--biological systems and ecological approaches;
Environmental chemical sciences (yellow) track--environmental systems and chemistry;
Environmental geosciences (brown) track--earth materials and surficial geologic processes; and
Environmental hydrosciences (blue) track--hydrogeology and hydrogeologic systems, and water chemistry.

The tracks aim to prepare scientists who can tackle problems that require particular areas of expertise, and to help students develop the skills needed for future employment or graduate study.

Requirements for the major are as follows.

SCIENCE AND MATHEMATICS FOUNDATION

Students must complete at least 31 s.h. of course work for the science and mathematics foundation, as follows.

All of these:

- 002:010-002:011 Principles of Biology I-II 8 s.h.
- 004:011-004:012 Principles of Chemistry I-II 8 s.h.
012:005 Introduction to Geology 4 s.h.
22M:025-22M:026 Calculus I-II 8 s.h.

One of these:
22S:039 Probability and Statistics for the Engineering and Physical Sciences 3 s.h.
22S:101 Biostatistics 3 s.h.
22S:105 Statistical Methods and Computing 3 s.h.

**ENVIRONMENTAL SCIENCES FOUNDATION**

Students must complete at least 19 s.h. of course work for the environmental sciences foundation, as follows.

All of these:
159:008 Introduction to Environmental Science 4 s.h.
159:100 Environmental Sciences Seminar (section 1 for 0 s.h. and section 2 for 1 s.h.) 1 s.h.
159:102 Earth Surface Processes 3 s.h.
159:110 Introduction to Applied Remote Sensing 4 s.h.
159:134 Ecology 4 s.h.
044:005 Foundations of GIS 3 s.h.

**Tracks**

Environmental sciences students must choose one of the following four tracks. Each track includes required general sciences courses, track foundation courses, field study courses, and elective courses.

**ENVIRONMENTAL BIOSCIENCES (GREEN) TRACK**

The environmental biosciences track provides the essential skills for entry-level positions that require a good knowledge of biotic systems and the ability to inventory biologic resources. The track’s aim is to produce scientists who are capable of tackling environmental problems in which links and interactions with life sciences are crucial and in which a substantial knowledge of biological/ecological sciences is required. The track also provides a strong foundation for graduate or professional training in disciplines such as ecology, wildlife management, and natural resource management.

Students must complete at least 33 s.h. of environmental biosciences track course work, including one 4 s.h. field course at Iowa Lakeside Laboratory.

**General Sciences**

004:121 Organic Chemistry I 3 s.h.

Students are encouraged to take at least one semester of physics.

**Environmental Biosciences Foundation**

Both of these:
002:128 Fundamental Genetics 4 s.h.
002:131 Evolution 4 s.h.

At least 7 s.h. from these:
002:100 Plant Diversity and Evolution 4 s.h.
002:103/044:103 Biogeography 3 s.h.
002:108 Vertebrate Zoology 4 s.h.
002:113 Ecological Plant Anatomy 4 s.h.
002:140 Systematics: Classifying Biodiversity 3 s.h.
012:107 Marine Ecosystems and Conservation 3 s.h.
012:122 Evolution of the Vertebrates 3 s.h.
012:170 Evolution of Ecosystems 3 s.h.
Environmental Biosciences Field Study

At least 4 s.h. from these Iowa Lakeside Laboratory courses:

- 00L:103 Aquatic Ecology 4 s.h.
- 00L:105 Plant Taxonomy 4 s.h.
- 00L:109 Freshwater Algae 4 s.h.
- 00L:115 Field Mycology 4 s.h.
- 00L:117 Ecology and Systematics of Diatoms 4 s.h.
- 00L:121 Plant Ecology 4 s.h.
- 00L:122 Prairie Ecology 4 s.h.
- 00L:126 Ornithology 4 s.h.
- 00L:128 Fish Ecology 4 s.h.
- 00L:129 Vertebrate Ecology and Evolution 4 s.h.
- 00L:163 Conservation Biology 4 s.h.

Environmental Biosciences Electives

Students must complete at least 11 s.h. of elective course work, with at least 7 s.h. from the following list. An additional field study course (see "Environmental Biosciences Field Study" above) may be used for 4 s.h. of the 11 s.h. of elective course work. A maximum of one policy course may be included in the 11 s.h. of electives (06E:133 Environmental and Natural Resource Economics, 044:019 Contemporary Environmental Issues, 044:122 Environmental Conservation in the United States, and 044:125 Environmental Impact Analysis).

- 002:124 Animal Physiology 3 s.h.
- 002:143 Animal Behavior 4 s.h.
- 002:162 Population Genetics and Molecular Evolution 3 s.h.
- 002:196 Honors Investigations arr.
- 002:199 Introduction to Research 3 s.h.
- 004:111 Analytical Chemistry I 3 s.h.
- 004:112 Analytical Chemistry II 3 s.h.
- 06E:133 Environmental and Natural Resource Economics 3 s.h.
- 012:108 Introduction to Oceanography 2 s.h.
- 012:121 Principles of Paleontology 3 s.h.
- 012:173 Quaternary Environments 3 s.h.
- 22S:148 Intermediate Statistical Methods 4 s.h.
- 044:019 Contemporary Environmental Issues 3 s.h.
- 044:101 Climatology 3 s.h.
- 044:122 Environmental Conservation in the United States 3 s.h.
- 044:123 Landscape Ecology 3 s.h.
- 044:125 Environmental Impact Analysis 4 s.h.
- 044:126 Wetlands: Function, Geography, and Management 3 s.h.
- 213:152 Primate Conservation Biology 3 s.h.

ENVIRONMENTAL CHEMICAL SCIENCES (YELLOW) TRACK

The environmental chemical sciences track provides the essential skills for entry-level positions that require a basic understanding of chemical principles and a working knowledge of basic chemical concepts as applied in the environment. The track's aim is to produce scientists who are capable of tackling environmental problems in which chemical and molecular processes play an important role. The track also provides a strong foundation for graduate or professional training in environmental chemistry.

Students must complete at least 35 s.h. of environmental chemical sciences track course work.
General Sciences

One of these sequences:
029:011-029:012 College Physics I-II  8 s.h.
029:081-029:082 Introductory Physics I-II  8 s.h.

Environmental Chemical Sciences Foundation

004:111-004:112 Analytical Chemistry I-II  6 s.h.

One of these sequences:
004:121-004:122 Organic Chemistry I-II  6 s.h.

One of these:
004:131 Physical Chemistry I  3 s.h.
004:132 Physical Chemistry II  3 s.h.

Chemical Sciences Lab and Field Study

Both of these:
004:141 Organic Chemistry Laboratory  3 s.h.
004:143 Analytical Measurements  3 s.h.

Environmental Chemical Sciences Electives

Students must complete at least 6 s.h. of elective courses, chosen from the following list. (Students may petition the chemistry department's environmental sciences advisor to use appropriate 100- and 200-level courses taught in the chemistry department as electives.) A maximum of one policy course may be included in the 6 s.h. of electives (06E:133 Environmental and Natural Resource Economics, 044:019 Contemporary Environmental Issues, 044:122 Environmental Conservation in the United States, and 044:125 Environmental Impact Analysis).

004:125 Inorganic Chemistry  2 s.h.
004:162 Undergraduate Research  1-3 s.h.
004:173 Atmospheric and Environmental Chemistry  3 s.h.
06E:133 Environmental and Natural Resource Economics  3 s.h.
012:149 Elements of Geochemistry  3 s.h.
012:152 Isotope Geochemistry  3 s.h.
012:194 Environmental Field Methods  3 s.h.
044:019 Contemporary Environmental Issues  3 s.h.
044:101 Climatology  3 s.h.
044:122 Environmental Conservation in the United States  3 s.h.
044:125 Environmental Impact Analysis  4 s.h.
053:152 Environmental Chemistry I  3 s.h.
053:153 Environmental Chemistry Laboratory  3 s.h.
053:252 Environmental Chemistry II  3 s.h.
099:110 Biochemistry  3 s.h.
004:131 Physical Chemistry I (if not taken as a foundation course)  3 s.h.
or
004:132 Physical Chemistry II (if not taken as a foundation course)  3 s.h.
ENVIRONMENTAL GEOSCIENCES (BROWN) TRACK

The environmental geosciences track provides the essential skills for entry-level positions that require a basic understanding of geologic principles and a working knowledge of basic geologic concepts applied in the environmental industry. The track's aim is to produce scientists who are capable of tackling environmental problems in which earth materials and surficial geologic processes are of primary importance. The track also lays a strong foundation for graduate study in environmental geology, engineering geology, and natural hazards assessment.

Students must complete at least 34 s.h. of environmental geosciences track course work.

General Sciences

029:008 Basic Physics 4 s.h.

Students are strongly encouraged to take additional course work in physics.

Environmental Geosciences Foundation

All of these:
012:041 Mineralogy 4 s.h.
012:052 Petrology 4 s.h.
012:092 Structural Geology 4 s.h.
012:136 Soil Genesis and Geomorphology 3 s.h.
012:179 Geology for Engineers 3 s.h.

Environmental Geosciences Field Study

012:093 Geologic Field Methods 3 s.h.

One of these:
00L:142 Watershed Hydrology and Surficial Processes 4 s.h.
044:180 Field Methods in Physical Geography 3 s.h.

Environmental Geosciences Electives

Students must complete at least 6 s.h. of elective courses, chosen from the following list. A maximum of one policy course may be included in the 6 s.h. of electives (06E:133 Environmental and Natural Resource Economics, 044:019 Contemporary Environmental Issues, 044:122 Environmental Conservation in the United States, and 044:125 Environmental Impact Analysis).

06E:133 Environmental and Natural Resource Economics 3 s.h.
012:108 Introduction to Oceanography 2 s.h.
012:114 Energy and the Environment 3 s.h.
012:119 Directed Study arr.
012:130 Sedimentary Geology/Stratigraphy 3 s.h.
012:138 Fluvial Geomorphology 3 s.h.
012:139 Integrated Watershed Analysis 3 s.h.
012:140 Natural Hazards 3 s.h.
012:149 Elements of Geochemistry 3 s.h.
012:152 Isotope Geochemistry 3 s.h.
012:166 Hydrogeology 3 s.h.
012:172 Glacial and Pleistocene Geology 3 s.h.
012:178 Applied Geostatistics 3 s.h.
012:180 Survey of Geophysical Methods 3 s.h.
012:191 Geotectonics 3 s.h.
044:019 Contemporary Environmental Issues 3 s.h.
044:101 Climatology 3 s.h.
044:122 Environmental Conservation in the United States 3 s.h.
044:125 Environmental Impact Analysis 4 s.h.
053:050 Natural Environmental Systems 3 s.h.
The environmental hydrosciences track provides the essential skills for entry-level positions that require a basic understanding of geologic principles and a working knowledge of hydrogeology and hydrogeochemistry. The track's aim is to produce scientists who are capable of tackling environmental problems that emphasize hydrogeologic systems and for which substantial knowledge of hydrogeology and water chemistry are essential. The track also lays a strong foundation for graduate education in hydrogeology, hydrology, geochemistry, and aqueous chemistry.

Students must complete at least 34 s.h. of environmental hydrosciences track course work.

---

**ENVIRONMENTAL HYDROSCIENCE (BLUE) TRACK**
Four-Year Graduation Plan

The Four-Year Graduation Plan is not available for the environmental sciences major. Students work with their advisors on individual graduation plans.

Honors

Qualified students are encouraged to pursue an honors degree in environmental sciences. Honors study offers students an opportunity to engage in independent research under the guidance of a faculty sponsor chosen from the Environmental Science Program’s affiliated faculty representing six departments (anthropology, biology, chemistry, civil and environmental engineering, geography, and geoscience). Students also learn how to write the results of their research in the format of a scientific paper, and they have the experience of formally presenting their research as either a short seminar or a poster.

Environmental sciences students who wish to graduate with honors must be members of the University of Iowa Honors Program, which requires students to maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University of Iowa Honors Program for more information).

To graduate with honors in environmental sciences, students must fulfill the following requirements:

- complete a B.S. in environmental sciences with a g.p.a. of at least 3.33 in all environmental sciences course work (science and mathematics foundation, environmental sciences foundation and environmental sciences tracks);
- submit a research proposal to the honors director within two months of the beginning of the semester in which the research is initiated;
- complete a minimum of 6 s.h. of honors research taken over two semesters (002:196 Honors Investigations, 004:162 Undergraduate Research, 012:119 Directed Study, or 044:195 Undergraduate Research, depending on the departmental affiliation of the faculty sponsor);
- prepare a thesis presenting the research in the format of a scientific paper with abstract, introduction, methods, results, discussion, and conclusions; the thesis must include a title page and abstract formatted according to the specifications of the Honors Program and must be submitted to the honors director at least one week before the Honors Program deadline for submission; and
- present either a short seminar or a poster about the research at a professional meeting and/or at The University of Iowa.

Beginning in their sophomore or junior year, students should identify potential faculty sponsors by conducting a web-based survey of the research interests of the program’s affiliated faculty. The student should contact potential sponsors to determine who would be willing to sponsor an honors student and what research projects the student might undertake. Students who choose a sponsor whose faculty appointment is not in the College of Liberal Arts and Sciences must choose a cosponsor who does have a faculty appointment in CLAS.

After the student has identified a sponsor and the two have agreed on a project, the sponsor guides the student in the preparation of a research proposal that identifies the background, goals, methods, and significance of the research project. The proposal serves as the foundation of the honors thesis, which the student prepares under the sponsor’s supervision upon completion of the research. Once the thesis is nearing completion or is completed, the student presents a short seminar or a poster detailing the purpose of the research.

Minor

The minor in Environmental Sciences requires a minimum of 16 s.h. in University of Iowa environmental sciences courses. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass. The following courses are required.

159:008/012:008 Introduction to Environmental Science (with lab) 4 s.h.

One environmental sciences foundation course, chosen from these:
Students also choose 8 s.h. of course work in one of the four environmental sciences tracks (environmental biosciences, environmental chemical sciences, environmental geosciences, and environmental hydrosciences; see "Tracks" earlier in this Catalog section). The courses must include one track foundation course (3-4 s.h.) and one track field study course (2-4 s.h.).

**Environmental Sciences Courses**

**159:008 Introduction to Environmental Science**
3-4 s.h.
Biological and physical character of the Earth; interaction of humans with the environment, including impacts on ecosystems, climate, natural processes, resources; alternative options, including sustainability, waste management, energy, land reform. GE: Natural Sciences. Same as 012:008.

**159:009 Introduction to Environmental Sciences Laboratory**
1 s.h.
Laboratory component of 012:008. Prerequisites: environmental sciences or geoscience major; and 012:008 or 159:008 for 3 s.h., or equivalent course work without a laboratory component; or consent of instructor. GE: Natural Sciences. Same as 012:009.

**159:100 Environmental Sciences Seminar**
0-1 s.h.
Role of sciences in environmental issues and problems; progression from observation to evaluation to design of better questions and experiments. Prerequisite: environmental sciences major.

**159:102 Earth Surface Processes**
3 s.h.
Basic geomorphic and environmental processes that shape the earth's surface; emphasis on erosion, transport, deposition by land mass movement (creep, landslides, earth flow), fluid agents (wind, water, ice); methods used to study these processes. Prerequisite: 012:005 or 012:008 or 044:003 or 159:008 or consent of instructor. Same as 012:102.

**159:110 Introduction to Applied Remote Sensing**
4 s.h.
Remote sensing of the earth's surface from aircraft, satellites; aerial photograph interpretation; remote sensing systems, methods, data analysis using electromagnetic spectrum and digital processing techniques, including visible, infrared, microwave radiation; remote sensing applied to geologic and environmental problems. Prerequisite: college physics or physical geology or equivalent. Same as 012:110.

**159:134 Ecology**
4 s.h.
Adaptations of organisms to their physical and biological environments; organism-environment interactions; population biology; interactions between species; ecology of communities, ecosystems; human impact on ecosystems. Prerequisites: 002:010, 002:011, and 22M:016 or 22M:025 or 22M:031. Same as 002:134.

**159:153 Geocomputing**
1-3 s.h.
Computer applications in geoscience; visualization, data management, interactive modeling, computer graphics. Same as 012:153.

**159:194 Environmental Field Methods**
3 s.h.
Integrated, comprehensive, field-based overview of environmental sampling concepts and methods for geoscience and hydroscience. Three weeks. Same as 012:194.
French and Italian

Chair: Roland Racevskis
General education language coordinators: Deborah Contrada (Italian), Peter Eubanks (French)
Professors: Cinzia Blum, Wendelin Guentner, Geoffrey R. Hope, Michel Laronde, Roland Racevskis, Steven Ungar (French and Italian/Cinema and Comparative Literature)
Professors emeriti: Jacques A. Bourgeaqc, Florindo Cerreta, Simone Delaty, John T. Nothnagle
Associate professors: Deborah L. Contrada, Anny Dominique Curtius, Rosemarie Scullion (French and Italian/Women's Studies)
Lecturers: Hope Fitzgerald, Jack Johnson, Katja Limatta
Undergraduate degrees: B.A. in French, Italian
Undergraduate nondegree programs: Minor in French, Italian
Graduate degrees: M.A., Ph.D. in French
Web site: http://www.uiowa.edu/~frenchit

The department introduces students to the cultures of France, the Francophone world, Italy, and parts of the Middle East, providing an understanding of those countries' historical and contemporary importance. It also facilitates development of proficiency in the French, Italian, and Arabic languages and fosters critical appreciation of French, Francophone, Italian, and Arabic literature and civilization.

Undergraduate Programs

The department offers a Bachelor of Arts and a minor in French and in Italian. It also offers a variety of electives for nonmajors and provides flexible means to complete the College of Liberal Arts and Sciences General Education Program foreign language requirement and to satisfy individual needs and interests.

Students majoring in French or Italian may combine their studies with courses in education to prepare for jobs in high school teaching. They may go on to graduate study in areas such as French, Italian, comparative literature, and other interdisciplinary areas as preparation for college-level teaching. Or they may combine other skills and studies with their major in French or Italian to prepare for challenging career opportunities in international government, business, finance, travel, communications, and other fields where the knowledge of a foreign language is essential.

Bachelor of Arts in French

The Bachelor of Arts in French requires a minimum of 120 s.h., including 31-35 s.h. of work for the major. Students complete a set of four foundation courses (10 s.h.) plus the requirements for one of four tracks (21-25 s.h.): the French and Arabic track; the language track; the literature and culture track; or the teaching track. Students also must complete the College of Liberal Arts and Sciences General Education Program.

Students must maintain a g.p.a. of at least 2.00 in all major course work, including all University of Iowa course work in the major. Majors must maintain portfolios documenting their progress toward attaining the objectives of the French major.

Transfer course work is acceptable, and students are encouraged to participate in study abroad, but the last two courses in the major ordinarily must be completed at The University of Iowa. Transfer work for application to the major is evaluated on an individual basis by the faculty in charge of study abroad.

Upon declaring the major (or later, but before the senior year), students choose an emphasis in one of the following four tracks.

French and Arabic Track

The French and Arabic track is designed for students interested in combining study of the French and Arabic languages with history, politics, and religions of Middle Eastern cultures and with a major in another area, such as comparative studies, political science, geography, or history.

Requirements for the French and Arabic track include the following seven or eight courses (25 s.h.) in addition to the 10 s.h. of foundation course work in French.

Three courses in French language, or literature and culture, taught in French, of which at least one course must be numbered above 009:150
Two or three courses in Arabic language beyond first year (must total 10 s.h.)
Two courses on Middle Eastern cultures (prefix 009), taught in French or English, or approved courses from other departments

**Language Track**

The language track is designed for students with an interest in language and translation. Students work in specific areas such as international business, comparative stylistics, and translation.

Requirements for the language track include the following seven courses (21 s.h.) in addition to the 10 s.h. of foundation course work in French.

009:115 Business French 3 s.h.
009:197 Techniques of Translation 3 s.h.

Five courses in French language, or literature and culture

All language track students take 009:115 Business French and 009:197 Techniques of Translation. Of the remaining five courses, only one may be taught in English under the French department prefix (009). This restriction does not apply to courses taught in English with an additional semester hour in French. Students must complete at least two courses numbered above 009:150, including the required course 009:197 Techniques of Translation.

Courses in French stylistics and textual analysis, another language, economics, political science, and/or business administration are recommended as adjunct electives.

**Literature and Culture Track**

The literature and culture track is designed for students who are interested in combining study of French and Francophone literatures and cultures with a major in another area, such as cinema, communication studies, comparative literature, history, international studies, political science, or journalism.

Requirements for the literature and culture track include the following seven courses (21 s.h.) in addition to the 10 s.h. of foundation course work in French.

Five courses in literature and culture

Two courses in language, or literature and culture

Only one of these courses may be taught in English under the French department prefix (009). This restriction does not apply to courses taught in English with an additional semester hour in French. At least two courses must be numbered above 009:150.

**Teaching Track**

French majors interested in obtaining licensure to teach in elementary and/or secondary schools must successfully complete the requirements for a major in French in the teaching track and must be admitted to the College of Education's foreign language Teacher Education Program (TEP). Several courses in the College of Education are required, as is one semester of student teaching. Contact the Department of Teaching and Learning for details.

Requirements for the teaching track include the following seven courses (21 s.h.) in addition to the 10 s.h. of foundation course work in French.

Four courses in literature and culture

Three courses from these areas: language, literature and culture, or pedagogy

Only one of these courses may be taught in English under the French department prefix (009). This restriction does not apply to courses taught in English with an additional semester hour in French. At least two courses must be numbered above 009:150.

Students who plan to use a French minor to teach at the elementary and/or secondary level must contact the College of Education concerning requirements. See College of Education in the Catalog.

**Bachelor of Arts in Italian**

The B.A. in Italian requires a minimum of 120 s.h., including 31 s.h. of work for the major. Students must complete the College of Liberal Arts and Sciences General Education Program. Requirements for the major are as follows.

018:011-018:012 Intermediate Italian-II 8 s.h.
018:105 Modern Italian Fiction 3 s.h.
018:106 Modern Italian Poetry and Drama 3 s.h.
018:111-018:112 Advanced Italian-Advanced Italian 8 s.h.
018:119 Medieval Italian Literature 3 s.h.
018:120 Medieval and Renaissance Italian Literature 3 s.h.
An additional course taught in Italian, numbered above 018:103 3 s.h.

B.A. with Teacher Licensure

French majors seeking licensure to teach in elementary and/or secondary schools should choose the French teaching track. See "Teaching Track" under "Bachelor of Arts in French" above.

Italian majors interested in licensure to teach in elementary and/or secondary schools must successfully complete the requirements for a major in Italian, including an additional 2 s.h. in either 018:013 Everyday Italian I or 018:014 Everyday Italian II, and must be admitted to the College of Education’s foreign language Teacher Education Program. Several courses in the College of Education are required, as is one semester of student teaching. Contact the Department of Teaching and Learning for details.

Students who plan to use an Italian minor to teach at the elementary and/or secondary level must contact the College of Education concerning requirements. See College of Education in the Catalog.

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan.

B.A. in French

Before the third semester begins: competence in first-year French and at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: second-year Intermediate French II (009:012) and at least one-half of the semester hours required for graduation

Before the seventh semester begins: two semesters of third-year French (009:111 Introduction to Reading and Writing in Literature and 009:112 French Grammar), one or two other courses in the major, and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: 009:106 Oral Expression in French II and three more courses in the major; for students in the French language track, 009:115 Business French and 009:197 Techniques of Translation

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

B.A. in Italian

Before the third semester begins: competence in first-year Italian and at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: competence in second-year Intermediate Italian II (018:012) and at least one-half of the semester hours required for graduation.

Before the seventh semester begins: four courses in the major numbered above 018:103 and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: a total of at least five courses in the major numbered above 018:103

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Honors

The department participates in the University of Iowa Honors Program. To gain admission to honors in French or Italian, a student must have a University of Iowa g.p.a. of at least 3.33 and a department g.p.a. of at least 3.50, and must be a member of the University of Iowa Honors Program. Students register for 009:198 Honors Research and Thesis (in French)/018:198 Honors Research and Thesis (in Italian), and one honors-designated course numbered above 009:160 (in French) or 018:103 (in Italian). Students must complete an honors thesis or equivalent (for example, translation, comparative stylistics, cultural studies, or research paper) in French or Italian and must present their work to a faculty committee.
Minor in French

The minor in French requires a minimum of 15 s.h., including 12 s.h. in advanced courses; 9 s.h. of the 12 s.h. in advanced courses must be taken at The University of Iowa. For the minor, courses numbered 009:105 and above are considered advanced. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass. Credit from the University of Iowa Summer Program in Lyon is counted as University of Iowa credit; 6 s.h. earned in other programs abroad may be applied to the minor. Courses taught in English do not count toward the minor in French.

Minor in Italian

The minor in Italian requires a minimum of 15 s.h., including 12 s.h. in courses numbered 018:105 and above taken at The University of Iowa. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass. Students must take 018:132 Images of Modern Italy for 4 s.h. in order to count it toward the minor. All courses for the minor must be taught in Italian.

Language for Nonmajors

Nonmajors who wish to study French and who have a background in the language should take the French Foreign Language Placement Test, offered online through Evaluation and Examination Service. The test helps determine the level at which a student should begin French language study at The University of Iowa.

Students without a background in French should begin with 009:001 Elementary French I.

Students who wish to fulfill the General Education Program foreign language requirement with French can choose from the following sequences.

Nonmajors who wish to study Italian and who have a background in the language should consult with the department before the beginning of classes to determine the level at which they should begin Italian language study at The University of Iowa.

Students without a background in Italian should begin with 018:001 Elementary Italian.

Students who wish to fulfill the General Education Program foreign language requirement with Italian should complete the following course sequence: 018:001 Elementary Italian, 018:002 Elementary Italian II, 018:011 Intermediate Italian, and 018:012 Intermediate Italian II. Students with strong language-learning abilities or background in another romance language can choose the sequence 018:103 Intensive Elementary Italian, 018:011 Intermediate Italian, and 018:012 Intermediate Italian II.

The Department of French and Italian is the administrative home for Arabic language and literature courses. It offers elementary and intermediate Arabic as well as conversational Arabic, for which intermediate Arabic is prerequisite. See "Courses" at the end of this Catalog section.

Students without a background in Arabic should begin with 195:101 Elementary Modern Standard Arabic I.

Study Abroad

Summer Program in France

The department sponsors the University of Iowa Summer Program in Lyon, France. Eligibility for the program requires a good basic knowledge of French (two years of college-level preparation is recommended), but students need not be French majors. Centered in Lyon, the six-week program combines formal class work in language skills, courses in the culture and civilization of France, and visits to points of cultural and historical interest. Students may earn 8-9 s.h. in the program.

Summer Program in Quebec

The department participates in the Committee on Institutional Cooperation (CIC) Summer French Program in Quebec at the Université de Laval. The CIC is a nonprofit organization whose purpose is to foster cooperative educational opportunities among the Big Ten universities and the University of Chicago. Affiliated with the Cours d'été pour non-francophones de l'Université de Laval, the program is designed to offer qualified students the opportunity to
increase their command of French in a French-speaking environment and to introduce them to the heritage and cultural traditions of a unique and vital segment of North American culture. To participate in the program, students must have taken at least two semesters of French.

Foreign Language House

The French and Italian department maintains close connections with the Maison Française in the International Crossroads Community at Mayflower Residence Hall. Residents initiate cultural and educational programs with the participation of the faculty and other students, providing a unique opportunity to combine living with language learning.

Graduate Programs

The department offers the Master of Arts and the Doctor of Philosophy in French.

The faculty's expertise allows for courses in the traditionally recognized historical periods of French literature, various literary genres, and critical theories as well as the francophone literatures of Canada, North and Sub-Saharan Africa, and the Caribbean. The department has particular strengths in interdisciplinry studies, notably in the areas of comparative arts, film studies, history, and second language acquisition.

Emphasis on language proficiency, composition, and stylistics remains integral to the M.A. program. Along with the literature-centered M.A., the department offers an M.A. in French education.

For more detailed information on graduate degrees in French, contact the Department of French and Italian or visit its web site. The department also publishes the Guide for Graduate Students and Assistants.

Master of Arts

The Master of Arts in French requires a minimum of 30 s.h. of graduate credit and is offered with or without thesis. Thesis students may earn up to 6 s.h. of the required 30 s.h. for thesis work. They must take a written and oral examination on their areas of study and must defend their thesis at the time of the comprehensive examination. A thesis prospectus must be accepted one year before the student defends the thesis.

Nonthesis students must pass a written and oral examination. With permission of the director of graduate studies and the department chair, nonthesis students may take up to 6 s.h. of the required 30 s.h. outside the department or transfer up to 6 s.h. of course work taken at another institution.

All M.A. students must complete the following course work.

- 009:208 Introduction to Graduate Study in French 1 s.h.
- 009:210 Comparative Stylistics 3 s.h.
- At least four graduate-level literature or culture courses numbered 200 and above

M.A. with French Education Emphasis

The Master of Arts with French education emphasis requires a minimum of 38 s.h. of graduate credit in French. The program is intended primarily for prospective secondary school and junior college teachers. Candidates must pass a final written and oral examination.

All M.A. in French education students must complete the following course work.

- 009:208 Introduction to Graduate Study in French 1 s.h.
- 009:210 Comparative Stylistics 3 s.h.
- 009:234 Principles of Teaching and Learning Foreign Languages 3 s.h.
- Courses in French literature numbered 200 and above (minimum requirement) 9 s.h.

Doctor of Philosophy

The Doctor of Philosophy in French requires a minimum of 72 s.h. of graduate credit, including credit earned for the M.A. The program is designed to prepare students for research, teaching, and professional service normally required of college and university faculty members.

The Ph.D. takes at least three years of graduate study, including at least one year spent in residence at The University of Iowa. Students must pass a comprehensive examination and make a successful oral defense of their dissertation.

Requirements include the following.
### Admission

Applicants to the M.A. program in French must have completed the equivalent of The University of Iowa undergraduate major in French. The M.A. in French is prerequisite to admission to the Ph.D. program in French. Successful completion of the M.A. program, however, does not necessarily qualify a student for doctoral study.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

Applicants for fall semester whose application materials are received in the department by January 15 have the best chance to be admitted and receive financial aid. They must submit academic transcripts, letters of recommendation from three persons familiar with their past academic work, Graduate Record Examination (GRE) General Test results, a statement of purpose in taking graduate work, and one or more samples of original writing, one of which should be in French, that show their ability to pursue graduate work in French (an honors thesis, term paper, seminar paper, or other course papers).

### Financial Support

Teaching and research assistantships are offered through the department, and University fellowships and scholarships are available through the Graduate College. Contact the Department of French and Italian for details.

Teaching assistants in the department must take 009:234 Principles of Teaching and Learning Foreign Languages.

Exchange assistantship agreements with the University of Pau, the University of Picardie (Amiens), and the University of Poitiers provide one year of residence in France for a limited number of graduate students.

### French and Italian Courses

The department offers courses in French, Italian, and Arabic. For a detailed description of courses offered each semester, contact the Department of French and Italian. French courses are conducted in French and Italian courses are conducted in Italian, unless otherwise indicated. Students may not receive credit for a course that is prerequisite to, or whose equivalent is prerequisite to, a higher-level course they have already completed.

French courses numbered 150-199 are intended primarily for advanced undergraduates; graduate students should consult with their advisor before registering for these courses.

Only one course in English may be used to fulfill requirements for the undergraduate major in French. This restriction does not apply to courses taught in English with an additional semester hour in French. Students should consult with their advisor before registering.

Students who have had significant experience with French through study or foreign residence should consult with the department before enrolling in any French course.

Continuation of 195:130; advanced Arabic grammar and syntax, composition writing, formal conversation (similar to conversations on Arabic mass media); classical Arabic texts, other materials written for persons whose first or official language is Arabic. Prerequisite: 195:130.

195:133 **Study Abroad: Language (Advanced)** 3 s.h.
Modern Standard Arabic (MSA); speaking, reading, listening, and writing. Prerequisite: non-native speaker of Arabic; heritage speaker of Arabic should contact the course supervisor for appropriate placement. Recommended: two or more years of Arabic language.

195:153 **Independent Study** arr.
Independent study with an instructor of material not covered in other regularly offered courses. Prerequisite: consent of instructor.
General Education Program

Web site: http://www.clas.uiowa.edu/students/academic_handbook/vi.shtml

All students entering the College of Liberal Arts and Sciences who wish to earn Bachelor of Arts (B.A.), Bachelor of Science (B.S.), Bachelor of Fine Arts (B.F.A.), Bachelor of Liberal Studies (B.L.S.), or Bachelor of Music (B.M.) degrees must complete the requirements of the CLAS General Education Program.

General Education Requirements

There are nine required areas within the General Education Program and 12 different categories of courses. To fulfill the area requirements, students may select from numerous subjects and departments, with all General Education courses providing a foundation in critical thinking, reading, and writing. More advanced General Education courses allow students to pursue a wide range of interests relating to or in addition to their major well into their senior year.

Rhetoric: a minimum of 4-8 s.h.

Foreign Language: fourth-semester proficiency or the departmental equivalent.

Interpretation of Literature: a minimum of 3 s.h. English majors should select an alternate course from the Humanities area to fulfill this requirement.

Historical Perspectives: a minimum of 3 s.h.

Humanities: a minimum of 3 s.h.

Natural Sciences: a minimum of 7 s.h.; must include one lab.

Quantitative or Formal Reasoning: a minimum of 3 s.h.

Social Sciences: a minimum of 3 s.h.

Distributed General Education: at least 6 s.h., with a minimum of 3 s.h. taken from two different categories listed below:

- Cultural Diversity
- Fine Arts
- Foreign Civilization and Culture
- Health and Physical Activity
- Historical Perspectives
- Humanities
- Social Sciences

Academic Policies Pertaining to General Education

Students should be aware of all additional academic policies that pertain to the General Education Program. See "General Education Policies and Other Information" later in this Catalog section.

Note: The University accepts credit by examination for some areas of the General Education Program, including AP, CLEP, and IB credit. Visit the Office of Admissions web site for specific information. Transfer credit also may be used to fulfill some areas. Please consult with the Office of Admissions.

Areas and Course Lists

Rhetoric

Rhetoric courses help students to develop skills in speaking, writing, listening, and critical reading, and to build competence in research, analysis, and argumentation. Because these skills are basic to the rest of a student's study in the College of Liberal Arts and Sciences, students must register for their assigned rhetoric course during their first year at Iowa. All transfer students, regardless of the number of semester hours they transfer, must complete the rhetoric requirement of the General Education Program. The admission degree audit shows The University of Iowa rhetoric requirement that must be completed.
Students required to enroll in English as a Second Language (ESL) classes as a result of their English proficiency evaluation must complete all ESL classes before registration in any rhetoric class. Required ESL courses are prerequisites to rhetoric courses.

**RHETORIC COURSE LIST**

010:005/033:005 Rhetoric of Scientific Inquiry has been removed from the list of approved courses in the Rhetoric area.

- 010:001 Rhetoric I 4 s.h.
- 010:002 Rhetoric II 4 s.h.
- 010:003 Accelerated Rhetoric 4 s.h.
- 010:004 Writing and Reading 3 s.h.
- 010:006 Speaking and Reading 3 s.h.

**Foreign Language**

Foreign Language courses provide students with speaking, listening, reading, and writing skills in a second language. These courses also provide some knowledge of the culture(s) in which the language is spoken. To fulfill the Foreign Language requirement of the General Education Program, students must:

- complete the fourth-year level of a foreign language in high school; or
- complete the last course in the designated course sequence of an approved foreign language at The University of Iowa, or the equivalent course at another college or university, or during study abroad; or
- pass an achievement test measuring proficiency in a foreign language equivalent to that usually attained after four semesters of college study.

**Proficiency Examinations**

Students proficient in a language for which they have received no formal instruction (or formal instruction below the fourth-semester level) may validate their proficiency with an examination.

Students with knowledge of Chinese, French, German, ancient Greek, Japanese, Latin, Russian, or Spanish should take one of the University of Iowa placement examinations. These placement tests help students choose appropriate foreign language courses. Students may use the results of the proficiency examination to fulfill the Foreign Language requirement of the General Education Program if their score on the examination is at the level accepted by the department offering the exam.

Students do not earn semester hours by taking these examinations.

WebCape placement tests in French, German, and Spanish require an additional oral evaluation by the department offering the language.

Placement and proficiency examinations in American Sign Language, Arabic, Croatian, Czech, Hindi, Italian, Korean, Polish, Portuguese, Sanskrit, Swahili, and Uzbek are arranged by contacting the appropriate department.

Students proficient in a language not regularly offered at The University of Iowa visit with CLAS Academic Programs & Services to ask about assessment. In some cases, arrangements can be made for a proficiency evaluation, but evaluations are available only for a limited number of languages. Students may fulfill the Foreign Language requirement of the General Education Program through such an evaluation, but such evaluations do not result in earned semester hours counted toward graduation.

Students proficient in a language for which testing is not available must fulfill the Foreign Language requirement of the General Education Program by another method.

**GUIDELINES FOR TAKING PROFICIENCY/PLACEMENT EXAMS**

Students proficient in more than one language may take the placement exam in each language.

Students who have been enrolled in a University of Iowa course in a particular language past the deadline for adding courses may not take the placement exam in that language.

Ordinarily, students may take a placement exam in a particular language only once. Students may repeat an exam only if they have had a significant language learning experience outside the classroom since they first took the exam.

Students seeking exceptions to these guidelines should consult with the appropriate department for permission to take the proficiency/placement test.

**WHEN A STUDENT'S FIRST LANGUAGE IS NOT ENGLISH**
Students who completed secondary school in a language other than English, hold non-immigrant visas, and meet the College of Liberal Arts and Sciences English proficiency requirement may use English to fulfill the Foreign Language requirement of the General Education Program. The English proficiency requirement may be satisfied by:

- a score of 600 or above (paper-based) or 280 or above (computer-based) on the Test of English as a Foreign Language (TOEFL); or
- successful completion of required English as a Second Language (ESL) courses as determined by an English proficiency evaluation conducted by the Department of Linguistics; or
- validation of English proficiency by the coordinator of English as a Second Language.

Note: Currently, The University of Iowa also accepts the International English Testing System (IELTS) as certification of English language proficiency for admission of students whose first language is not English; IELTS is accepted as an alternative to TOEFL. IELTS cut-off scores are 6.5 for undergraduate admission and 7.0 for graduate admission, with no subscore lower than 6.0. All students who submit IELTS scores must take the on-campus English Proficiency Evaluation (EPE) prior to their first University of Iowa registration.

Students who completed secondary school (grades 9-12 or 10-12) in English may not use English to fulfill the Foreign Language requirement of the General Education Program. These students must fulfill the Foreign Language requirement of the General Education Program in another way.

Approved General Education Course Sequences

The College of Liberal Arts and Sciences offers a number of course sequences that can be used to fulfill the Foreign Language requirement of the General Education Program. To avoid duplication or regression, students are advised to consult the appropriate foreign language department before registering.

American Sign Language

Courses in American Sign Language (ASL) are offered by the American Sign Language Program. The following sequence of four courses may be used to fulfill the General Education Foreign Language requirement: 158:011 American Sign Language I, 158:012 American Sign Language II, 158:013 American Sign Language III, and 158:014 American Sign Language IV. Students with previous knowledge of American Sign Language should consult the ASL program for placement.

Arabic

Courses in Arabic are offered by the Department of French and Italian. The following sequence may be used to fulfill the General Education Foreign Language requirement: 195:101 Elementary Modern Standard Arabic I, 195:102 Elementary Modern Standard Arabic II, 195:111 Intermediate Modern Standard Arabic I, and 195:112 Intermediate Modern Standard Arabic II.

Chinese

Courses in Chinese are offered by the Department of Asian and Slavic Languages and Literatures. Students may use various combinations of courses approved for General Education to fulfill the Foreign Language requirement. For students with no knowledge of Chinese, the department recommends 039:008 First-Year Chinese: First Semester, 039:009 First-Year Chinese: Second Semester, 039:105 Second-Year Chinese: First Semester, and 039:106 Second-Year Chinese: Second Semester. Heritage learners and students who have studied Chinese abroad may wish to complete the sequence with 039:107 Accelerated Second-Year Chinese: First Semester and 039:114 Accelerated Second-Year Chinese: Second Semester. Consult the department for more information.

French

Courses in French are offered by the Department of French and Italian. Students may use various combinations of courses approved for General Education to fulfill the Foreign Language requirement. For students with no knowledge of French, the department recommends 009:001 Elementary French I, 009:002 Elementary French II, 009:011 Intermediate French I, and 009:012 Intermediate French II. Students who have previous knowledge of French may begin with 009:010 First-Year French Review, and continue with 009:011 Intermediate French I and 009:012 Intermediate French II; or they may be evaluated as ready for 009:011 Intermediate French I or 009:012 Intermediate French II. Consult the department for appropriate placement.

German

Courses in German are offered by the Department of German. Students may use varied combinations of courses
approved for General Education to fulfill the Foreign Language requirement. For students with no knowledge of German, the department suggests 013:011 Elementary German I, 013:012 Elementary German II, 013:021 Intermediate German I, and 013:022 Intermediate German II. Students with previous knowledge of German may begin with the review course 013:014 First-Year German Review and continue with 013:021 Intermediate German I and 013:022 Intermediate German II; or they may be evaluated as ready for 013:021 Intermediate German I or 013:022 Intermediate German II.

The department also offers accelerated intensive courses, 013:013 Intensive Elementary German and 013:025 Intensive Intermediate German, which may be appropriate for students with strong language learning abilities or experience. The intensive courses may be combined with nonintensive courses to create other sequences that can be used to fulfill the General Education Foreign Language requirement. Consult the Department of German to identify an appropriate course sequence.

Greek

Courses in Greek are offered by the Department of Classics. Students with no previous knowledge of Greek should fulfill the General Education Foreign Language requirement by taking 20G:001 Classical and New Testament Greek I, 20G:002 Classical and New Testament Greek II, 20G:011 Second-Year Greek I, and 20G:012 Second-Year Greek II. Students with previous knowledge of Greek should consult the department for appropriate placement.

Hindi

Courses in Hindi are offered by the Department of Asian and Slavic Languages and Literature. Students with no previous knowledge of Hindi should fulfill the General Education Foreign Language requirement by taking 039:123 First-Year Hindi: First Semester, 039:124 First-Year Hindi: Second Semester, 039:126 Second-Year Hindi: First Semester, and 039:127 Second-Year Hindi: Second Semester. These courses are open to entering first-year students. Students with knowledge of Hindi should consult the department for appropriate placement.

Italian

Courses in Italian are offered by the Department of French and Italian. Students with no previous knowledge of Italian should fulfill the General Education Foreign Language requirement by taking 018:001 Elementary Italian, 018:002 Elementary Italian II, 018:011 Intermediate Italian, and 018:012 Intermediate Italian II. Students who have strong language learning abilities or a background in another romance language may complete the requirement with 018:103 Intensive Elementary Italian, 018:011 Intermediate Italian and 018:012 Intermediate Italian II. Students with previous knowledge of Italian should consult the department for appropriate placement.

Japanese

Latin

Portuguese

Courses in Portuguese are offered by the Department of Spanish and Portuguese. Only one sequence is approved to fulfill the General Education Foreign Language requirement: 038:100 Accelerated Elementary Portuguese followed by 038:101 Accelerated Intermediate Portuguese. These courses are open to entering first-year students.
Russian

Courses in Russian are offered by the Department of Asian and Slavic Languages and Literature. Students without previous knowledge of Russian should fulfill the General Education Foreign Language requirement by taking 041:001 First-Year Russian I, 041:002 First-Year Russian II, 041:003 Second-Year Russian I, and 041:004 Second-Year Russian II. Students with knowledge of Russian should consult the program for appropriate placement.

Sanskrit

Courses in Sanskrit are offered by the Department of Asian and Slavic Languages and Literature. Students with no previous knowledge of Sanskrit should fulfill the General Education Foreign Language requirement by taking 039:110 First-Year Sanskrit: First Semester, 039:111 First-Year Sanskrit: Second Semester, 039:112 Second-Year Sanskrit: First Semester, and 039:113 Second-Year Sanskrit: Second Semester. These courses are open to entering first-year students. Students with previous knowledge of Sanskrit should consult the department for appropriate placement.

Spanish

Courses in Spanish are offered by the Department of Spanish and Portuguese. Students may use varied combinations of courses approved for General Education to fulfill the General Education Foreign Language requirement. For students with no knowledge of Spanish, the department recommends 035:001 Elementary Spanish I, 035:002 Elementary Spanish II, 035:011 Intermediate Spanish I, and 035:012 Intermediate Spanish II. Students with previous knowledge of Spanish may wish to fulfill the requirement with 035:005 Elementary Spanish Review, 035:011 Intermediate Spanish I, and 035:012 Intermediate Spanish II. The accelerated course 035:013 Accelerated Intermediate Spanish, which combines 035:011 Intermediate Spanish I and 035:012 Intermediate Spanish II, may be appropriate for some students. Students with previous knowledge of Spanish should take the Spanish Foreign Language Placement Test to help determine proper placement.

Swahili

Courses in Swahili are offered by the Department of Linguistics. One sequence is approved to fulfill the General Education Foreign Language requirement: 103:125 Elementary Swahili I, 103:126 Elementary Swahili II, 103:127 Intermediate Swahili I, and 103:128 Intermediate Swahili II. These courses are open to entering first-year students. Students with knowledge of Swahili should consult the Department of Linguistics for placement.

OTHER COURSE SEQUENCES

A student who successfully completes a four-semester foreign language sequence that has not been approved for General Education may have the sequence substitute for a proficiency test and thus fulfill the General Education requirement.

The department offering the sequence should contact Graduation Analysis directly on behalf of the student to have the degree evaluation updated to show completion of the General Education Foreign Language requirement. Departments do not need to notify the College of Liberal Arts and Sciences of the update.

Departments that offer foreign language sequences through the fourth semester of proficiency on a regular basis may want to instruct students on this possible General Education credit by noting it on the appropriate ISIS course description. These departments also should pursue the possibility of General Education status for the foreign language sequence as soon as feasible.

Interpretation of Literature

The skills students develop in Rhetoric classes are expanded in Interpretation of Literature courses. Working in small classes, students focus on the major genres of literature (short and long fiction, poetry, drama) and increase their abilities to read and analyze a variety of texts.

All students must complete an Interpretation of Literature course (3 s.h.) or have equivalent transfer credit or credit by examination. Exception: students who major in English may take a course approved in the Humanities area as a substitute for an Interpretation of Literature course.

Historical Perspectives

Courses in Historical Perspectives help students understand a period(s) of the past in its(their) own terms; comprehend the historical processes of change and continuity; sharpen their analytical skills in the evaluation of evidence; and develop their ability to generalize, explain, and interpret historical change.

All students must complete at least 3 s.h. of course work approved in this area. Students may use a second 3 s.h. of course work approved in this area to partially fulfill the Distributed General Education requirement of the General Education Program.

HISTORICAL PERSPECTIVES COURSE LIST

01H:005 Western Art and Culture Before 1400 3 s.h.
01H:006 Western Art and Culture After 1400 3 s.h.
01H:016/039:016 Asian Art and Culture 3 s.h.
016:001 Western Civilization I 3-4 s.h.
016:002 Western Civilization II 3-4 s.h.
016:003 Western Civilization III 3-4 s.h.
016:005/039:055 Civilizations of Asia: China 3 s.h.
016:006/039:056 Civilizations of Asia: Japan 3 s.h.
016:007/039:057 Civilizations of Asia: South Asia 3-4 s.h.
016:011 Issues in Human History: The Vietnam War in Historical Perspective 3 s.h.
016:012 Issues in Human History: Communities and Society in History 3 s.h.
016:014 Issues in Human History: Europe’s Expansion Overseas 3 s.h.
016:015 Issues in Human History: Gender in Historical Perspective 3 s.h.
016:017 Issues: Twentieth-Century Crisis 3 s.h.
016:020 Issues in Medieval Society 3 s.h.
016:022 Issues: Nature and Society in Historical Perspective 3 s.h.
016:023 Issues in European Politics and Society 3 s.h.
019:091 Cultural and Historical Foundations of Communication 3 s.h.
20E:030 Greek Civilization 3 s.h.
20E:031 Roman Civilization 3 s.h.
025:144 History of Music I 3 s.h.
025:146 History of Music II 3 s.h.
026:033 Philosophy and Human Nature 3 s.h.
026:034 Philosophy and the Just Society 3 s.h.
032:001 Judaism, Christianity, and Islam 3 s.h.
032:004/039:064 Living Religions of the East 3 s.h.
032:025/016:035 Medieval Religion and Culture 3 s.h.
032:026/016:036 Modern Religion and Culture 3 s.h.
032:030 Introduction to Islam 3 s.h.
041:094 Religion and Culture of Slavs 3 s.h.
049:002 Theatre and Society: Ancients and Moderns 3 s.h.
049:003 Theatre and Society: Romantics and Rebels 3 s.h.
049:112 History of Theatre and Drama I 3 s.h.
049:113 History of Theatre and Drama II 3 s.h.
113:012 Introduction to Prehistory 3 s.h.

Humanities

The Humanities category focuses on the ways in which individuals and cultures have interpreted and understood themselves, others, and the world. Humanities courses may explore the nature and meaning of artistic forms (across the spectrum of the fine arts and literature of the past and present), human values and value systems (including current and historical ideas in philosophy and religion), and other expressions of human aspiration, belief, and creation. The courses teach verbal, analytic, perceptual, and imaginative skills needed to interpret and examine culture, community, identity formation, and the human experience.

All students must complete at least 3 s.h. of course work approved in this area. Students may use a second 3 s.h. of course work approved in this area to partially fulfill the Distributed General Education requirement of the General Education Program.

</table>
Natural Sciences

Courses in the Natural Sciences area explore the scope and major concepts of a scientific discipline. Students learn the attitudes and practices of scientific investigators: logic, precision, experimentation, tentativeness, and objectivity. In courses with a laboratory component, students gain experience in the methods of scientific inquiry.

All students must complete at least 7 s.h. of course work approved in this area, including at least one course with a lab component.

NATURAL SCIENCES COURSE LIST

Effective fall 2007, the Department of Biological Sciences reintroduced 002:040 Biology of the Brain as a 3 s.h. nonlaboratory course without prerequisites and approved for the Natural Sciences area. It is not accepted for the major in biology.

Effective fall 2007, 002:145 Introduction to Neurobiology is no longer approved for the Natural Sciences area, but it continues as a 3 s.h. course for upper-level undergraduates with 002:010 and 002:011 as prerequisites. It is accepted for the major in biology. Students who are taking and who will take 002:145 Introduction to Neurobiology before Fall 2007 and wish to repeat it for a second-grade-only option should enroll in 002:40 Biology of the Brain. Students who take 002:040 Biology of the Brain in fall 2007 or later are charged with duplication if they took 002:145 Introduction to Neurobiology before fall 2007.

Courses with a lab component are noted (lab).

002:001 Introduction to Botany (lab) 4 s.h.
002:002 Introductory Animal Biology (lab) 4 s.h.
002:010 Principles of Biology I (lab) 4 s.h.
002:011 Principles of Biology II (lab) 4 s.h.
002:021 Human Biology (lab) 4 s.h.
002:022 Ecology and Evolution 3 s.h.
002:040 Biology of the Brain 3 s.h.
002:081 Human Genetics in the Twenty-First Century 3 s.h.
002:095 Plants and Human Affairs 2-3 s.h.
004:005 Technology and Society 3 s.h.
004:006 Technology and Society Laboratory (lab) 1 s.h.
004:007 General Chemistry I 3 s.h.
004:008 General Chemistry II 3 s.h.
004:011 Principles of Chemistry I (lab) 4 s.h.
004:012 Principles of Chemistry II (lab) 4 s.h.
004:016 Principles of Chemistry Lab (lab) 2 s.h.
004:018 Chemical Science I 3 s.h.
004:019 Chemical Science II 3 s.h.
004:020 Chemical Science Laboratory (lab) 2 s.h.
012:003 Earth History and Resources (with lab 4 s.h.; without lab 3 s.h.) 3-4 s.h.
012:004 Evolution and the History of Life (with a lab 4 s.h.; without lab 3 s.h.) 3-4 s.h.
012:005 Introduction to Geology (lab) 4 s.h.
012:007 Age of Dinosaurs (lab) 4 s.h.
012:008/159:008 Introduction to Environmental Science (with lab 4 s.h.; without lab 3 s.h.) 3-4 s.h.
012:009/159:009 Introduction to Environmental Sciences Laboratory 1 s.h.
Courses in the Quantitative or Formal Reasoning area help develop analytical skills through the practice of quantitative or formal symbolic reasoning. Courses focus on presentation and evaluation of evidence and argument; understanding the use and misuse of data; and organization of information in quantitative or other formal symbolic systems, including those used in computer science, linguistics, mathematics, philosophy, and statistics.

All students must complete at least 3 s.h. of coursework approved in this area. Students may fulfill this requirement of the General Education Program by completing a course that lists an approved course as a prerequisite.

**QUANTITATIVE OR FORMAL REASONING COURSE LIST**

Effective fall 2006, the Department of Mathematics removed 22M:011 from the list of courses approved in the Quantitative or Formal Reasoning area.

- **22C:005** Introduction to Computer Science 3 s.h.
- **22C:016** Computer Science I: Fundamentals 4 s.h.
- **22M:006** Logic of Arithmetic 3 s.h.
- **22M:009** Elementary Functions 4 s.h.
- **22M:010** Finite Mathematics 4 s.h.
- **22M:012** Theory of Arithmetic 3 s.h.
- **22M:013** Mathematics for Business 4 s.h.
- **22M:015** Mathematics for the Biological Sciences 4 s.h.
- **22M:016** Calculus for the Biological Sciences 4 s.h.
- **22M:017** Calculus and Matrix Algebra for Business 4 s.h.
- **22M:025** Calculus I 4 s.h.
- **22M:031** Engineering Mathematics I: Single Variable Calculus 4 s.h.
- **22S:002** Statistics and Society 3 s.h.
- **22S:008** Statistics for Business 4 s.h.
- **22S:025/07P:025** Elementary Statistics and Inference 3 s.h.
- **22S:030** Statistical Methods and Computing 3 s.h.
- **026:036** Principles of Reasoning 3 s.h.
- **033:060** Scientific Reasoning 3 s.h.
- **036:017** Theory and Practice of Argument 4 s.h.
- **103:013** Language and Formal Reasoning 3 s.h.
- **143:080** Honors Seminar in Quantitative and Formal Reasoning 3 s.h.
**Social Sciences**

Courses in the Social Sciences area focus on human behavior and the institutions and social systems that shape and are shaped by that behavior. Courses provide an overview of one or more social science disciplines, their theories, and methods.

All students must complete at least 3 s.h. of course work approved in this area. Students may use a second 3 s.h. of course work approved in this area to partially fulfill the Distributed General Education requirement of the General Education Program.

**SOCIAL SCIENCES COURSE LIST**

- 003:117/103:172 Psychology of Language 3 s.h.
- 003:118/103:176 Language Development 3 s.h.
- 06E:001 Principles of Microeconomics 4 s.h.
- 06E:002 Principles of Macroeconomics 4 s.h.
- 019:090 Social Scientific Foundations of Communication 3 s.h.
- 019:095 Media and Consumers 3 s.h.
- 030:001 Introduction to American Politics 3 s.h.
- 030:030 Introduction to Political Thought and Political Action 3 s.h.
- 030:041 Introduction to the Politics of Russia and Eurasia 3 s.h.
- 030:043 Introduction to Politics in the Muslim World 3 s.h.
- 030:045 Introduction to Comparative Politics 3 s.h.
- 030:050 Introduction to Political Behavior 3 s.h.
- 030:060 Introduction to International Relations 3 s.h.
- 030:061 Introduction to American Foreign Policy 3 s.h.
- 030:070 Introduction to Political Communication 3 s.h.
- 030:140 Government and Politics of Europe 3 s.h.
- 031:001 Elementary Psychology 3 s.h.
- 031:013 Introduction to Clinical Psychology 3 s.h.
- 031:014 Introduction to Developmental Science 3 s.h.
- 031:016 Introduction to Cognitive Psychology 3 s.h.
- 034:001 Introduction to Sociology Principles 3-4 s.h.
- 034:002 Social Problems 3-4 s.h.
- 034:020 Principles of Social Psychology 3-4 s.h.
- 036:070 Communication and Everyday Life 3 s.h.
- 036:074 Media and Society 3 s.h.
- 044:001 Introduction to Human Geography 4 s.h.
- 044:010 The Contemporary Global System 4 s.h.
- 044:011 Population Geography 3 s.h.
- 044:019 Contemporary Environmental Issues 3 s.h.
- 044:030 The Global Economy 3 s.h.
- 044:161 African Development 3 s.h.
- 103:011 Language and Society 3 s.h.
- 103:055 Languages of the World 3 s.h.
- 113:003 Introduction to the Study of Culture and Society 3 s.h.
- 113:010 Anthropology and Contemporary World Problems 3 s.h.
- 113:014 Language, Culture, and Communication 3 s.h.
- 113:113 Human Impacts on the Environment 3 s.h.
- 113:116 Urban Anthropology 3 s.h.
- 129:060 Introduction to African American Society 3 s.h.
- 143:060 Honors Seminar in Social Sciences 3 s.h.
- 169:070 Perspectives on Leisure and Play 3 s.h.
Cultural Diversity

Cultural Diversity courses foster greater understanding of the diversity of cultures in the United States and provide knowledge and critical understanding of these cultures. Most courses focus on one or more nondominant cultures or peoples of the United States. Some courses include comparative study with cultures outside the United States, but the primary focus is on the U.S. experience.

Students may use 3 s.h. of course work approved in this area to partially fulfill the Distributed General Education requirement of the General Education Program.

Foreign Civilization and Culture courses provide students with knowledge about one or more foreign civilizations, cultures, or societies outside of the United States. Courses are designed to stimulate students' interest in further study of foreign civilizations, cultures, and societies and to foster international and intercultural understanding.

Students may use 3 s.h. of course work approved in this area to partially fulfill the Distributed General Education requirement of the General Education Program.

FOREIGN CIVILIZATION AND CULTURE COURSE LIST

01H:005 Western Art and Culture Before 1400 3 s.h.
01H:006 Western Art and Culture After 1400 3 s.h.

137:123 Major Ballet III 1-3 s.h.
137:124 Major Modern Dance III 1-3 s.h.
Health and Physical Activity

Health and Physical Activity courses help students acquire knowledge and skills that are conducive to good health and well-being.

Students may use 3 s.h. of course work approved in this area to partially fulfill the Distributed General Education
requirement of the General Education Program.

HEALTH AND PHYSICAL ACTIVITY COURSE LIST

Courses with prefix 22S meet for eight weeks and are graded satisfactory/fail only. In order to remove incompletes or use the second-grade-only option, students must complete or retake the same activity or sport at the same level, regardless of when the course was originally taken.

General Education Policies and Other Information

P/N, S/F, S/U Graded Course Work

Students may not choose the pass/nonpass (P/N) grading option for courses they wish to use to complete the General Education Program. Courses approved for General Education may be taken P/N only when they are to be used as elective semester hours.

Only under special circumstances will courses approved for S/F or S/U grading be approved for General Education. The Educational Policy Committee and the General Education Curriculum Committee must approve S/F or S/U grading
for a course approved for General Education.

(See more information on P/N and S/F or S/U in the Grading section of the Student Academic Handbook.)

Majors, Minors, Certificates, and the General Education Program

Students may use courses approved for General Education that are offered by their major departments to complete the General Education Program, and they may use the same course to satisfy a requirement of the major and to complete the General Education Program. Students may use course work they will apply toward earning a minor to complete the General Education Program. Course work used to complete a certificate program also may be used to complete the General Education Program. However, see "No More That Three Courses from One Department" below.

No More Than Three Courses from One Department

Students may use no more than three courses from any one department in completing the General Education Program. Courses taken to fulfill the foreign language requirement of the General Education Program are excluded from this rule.

Repeatable Courses

Courses that may be repeated for credit may be approved in any General Education area. Students may use more than one repeatable course in completing the General Education Program; however, students may use only 3 s. h. of credit from any one repeatable course in completing the General Education Program.

Courses Approved in More Than One Area

A course may be approved in more than one General Education area. Students may use a course to fulfill any requirement of the General Education Program for which it is approved, but may not use a single course in more than one area in completing the General Education Program.

Courses Approved for Honors Credit

Students who are admitted as honors students or who join the Honors Program may enroll in special honors sections of courses approved for General Education. The Honors Program also offers some honors seminars that are approved for General Education, which students may use to complete the General Education Program.

Courses in Common

Entering first-year students may enroll in Courses in Common, a program that offers the opportunity to take three courses approved for General Education with the same group of students.

Students with Disabilities

Students with documented learning disabilities or physical disabilities may need accommodation in order to complete the General Education Program. Accommodations are arranged by Student Disability Services in consultation with instructors, departments, and CLAS Academic Programs & Services. Please visit with Student Disability Services as soon as acceptance of admission to Iowa has been made.

Transfer Courses, Credit by Examination, and the General Education Program

Students may use transfer course work and credit earned through examinations to complete the General Education Program. Transfer credit is evaluated by the Office of Admissions, and courses accepted for completion of the General Education Program are shown on the degree evaluation.

Students may use credit earned by examination, including Advanced Placement Program (AP), College Level Examination Program (CLEP), and International Baccalaureate (IB) tests to complete the General Education Program. For AP, CLEP, and IB exam equivalencies, see Credit by Exam on the Office of Admissions web site.

The University's Foreign Language Placement Test may be used to fulfill the foreign language requirement of the General Education Program.

Students with Degrees from Two-Year Institutions

Students who receive degrees from two year institutions participating in articulation agreements with The University of Iowa are considered to have satisfied all requirements of the General Education Program, except foreign language, if
the program of study for which the degree was awarded includes the following:

- a minimum of 60 s.h. (90 quarter hours) of credit acceptable toward graduation (mathematics courses comparable to 22M:001 Basic Algebra I, 22M:002 Basic Algebra II, and 22M:003 Basic Geometry are not accepted toward graduation); and
- completion of an agreed-upon group of courses; and
- a g.p.a. of at least 2.00.

Representatives from the cooperating institutions and the Regents universities meet periodically to review the provisions of the articulation agreements.

For more information about transfer policies and General Education Program requirements, contact the Office of Admissions.
Geography

Chair: Marc P. Armstrong
Professors: Marc P. Armstrong, Rex D. Honey, George P. Malanson, R. Rajagopal, Gerard Rushton
Professors emeriti: James B. Lindberg, Michael L. McNulty, David R. Reynolds
Associate professor: David A. Bennett
Associate professor emerita: Rebecca S. Roberts
Assistant professors: Naresh Kumar, Marc A. Linderman, Kathleen Stewart, Erika Wise
Adjunct assistant professors: Edwin Brands, David L. McGinnis, Mary P. Skopec, William J. Smith Jr., Peter J. Weyer
Lecturer: Claire E. Pavlik

Undergraduate degrees: B.A., B.S. in Geography
Undergraduate nondegree program: Minor in Geography
Graduate degrees: M.A., Ph.D. in Geography
Web site: http://www.uiowa.edu/~geog

Geography is concerned with place and environment and the ongoing processes of change within and between social and physical systems. Geography's importance to scholarly inquiry is rooted in the complexity of the social and environmental problems with which the science deals. Three concepts at the core of the discipline—space, place, and scale—provide theoretical constructs and methodological tools for a science that investigates the complex character of social and environmental phenomena.

Geographers examine issues such as distribution and consumption of natural resources, air and water quality, climate changes and ecosystem dynamics, growth and development of urban areas, population dynamics, politics and practice of international development, and social justice. They view society and the environment as a physical/social/cultural system. They apply uniquely geographical perspectives and tools, as well as knowledge from other social and scientific disciplines, to analyze the emergent properties of these systems.

Department of Geography graduates find employment opportunities in government, nongovernmental organizations, and business. For example, many geographers are employed in resource management, urban and regional development, site selection, and market area analysis. They analyze problems in the distribution and interactions among physical, ecological, social, and political systems.

Geography students acquire skills in computer-based cartography and geographic information systems (GIS) software used to investigate and solve many environmental and social problems. Opportunities for graduates with GIS training are growing rapidly in both private and governmental organizations.

The geography faculty has developed an undergraduate instructional program that serves students majoring or minoring in geography as well as students in other disciplines who are interested in taking geography courses as part of a liberal education. Courses in geography are commonly required of students preparing to teach at the elementary and secondary school levels and those who want to pursue careers in urban and regional planning. They also provide a background for many related professions, including law, health care, environmental or transportation engineering, and international business.

The University's Geographic Information System Instructional Lab (GISIL) is located in the Department of Geography; see "Facilities, Resources" later in this Catalog section.

The department also participates in the University's internship program for students; see "Internships" later in this Catalog section.

Undergraduate Programs

The department offers a Bachelor of Science, a Bachelor of Arts, and a minor in geography.

The department participates in a number of University interdisciplinary programs that have international, area studies, urban, or environmental components. Undergraduate students have access to the Geographic Information System Instructional Lab for GIS instruction and research.

Bachelor of Science, Bachelor of Arts

The Bachelor of Science in geography requires a minimum of 120 s.h., including 46 s.h. of work for the major. The Bachelor of Arts in geography requires a total of 120 s.h., including 38 s.h. of work for the major. Either program is appropriate preparation for advanced training or careers in geography. Students with strong interest in quantitative analysis and model building should pursue the B.S. and are encouraged to master an appropriate computer programming language.

All students take a common set of foundation courses and complete the requirements for one of three tracks: geography and social change, environmental studies, or geographic information science. B.S. students take additional mathematics course work.

Students must complete the College of Liberal Arts and Sciences General Education Program.
Transfer students majoring in geography must earn a minimum of 15 s.h. for the major in residence at The University of Iowa. Consistent with the CLAS maximum hours rule, students may count no more than 50 s.h. earned in their major department toward graduation.

**Common Requirements**

All geography majors must complete the following courses.

All of these:

- 044:001 Introduction to Human Geography 4 s.h.
- 044:003 Introduction to Earth Systems Science 4 s.h.
- 044:005 Foundations of GIS 3 s.h.

One of these, in addition to any course required to fulfill a track requirement:

- 044:010 The Contemporary Global System 4 s.h.
- 044:011 Population Geography 3 s.h.
- 044:015 Introduction to Political Geography 3 s.h.
- 044:019 Contemporary Environmental Issues 3 s.h.
- 044:030 The Global Economy 3 s.h.
- 044:035 World Cities 3 s.h.

One of these:

- 044:109 Introduction to Geographic Visualization 3 s.h.
- 044:110 GIS for Environmental Studies: Introduction 3 s.h.
- 044:112 Mapping American Cities and Regions 3 s.h.
- 044:180 Field Methods in Physical Geography 3 s.h.
- 044:181 Field Methods: Mapping and Mobile Computing 3 s.h.

One of these:

- 044:150 Senior Project Seminar 3 s.h.
- 044:151 Senior Thesis 3 s.h.

**Statistics for the Bachelor of Arts**

Bachelor of Arts students must complete a minimum of 3 s.h. in statistics by taking one of the following courses or a statistics course equivalent to or numbered above one of these.

- 07P:143/22S:102 Introduction to Statistical Methods 3 s.h.
- 22S:008 Statistics for Business 4 s.h.
- 22S:025/07P:025 Elementary Statistics and Inference 3 s.h.
- 22S:039 Probability and Statistics for the Engineering and Physical Sciences 3 s.h.
- 22S:101 Biostatistics 3 s.h.
- 22S:130 Introduction to Mathematical Statistics I 3 s.h.
- 22S:131 Introduction to Mathematical Statistics II 3 s.h.

**Statistics for the Bachelor of Science**

Bachelor of Science students must complete a minimum of 3 s.h. in statistics by taking one of the following courses or a statistics course equivalent to or numbered above one of these.

- 07P:143/22S:102 Introduction to Statistical Methods 3 s.h.
- 22S:130 Introduction to Mathematical Statistics I 3 s.h.
- 22S:131 Introduction to Mathematical Statistics II 3 s.h.

**ADDITIONAL BACHELOR OF SCIENCE REQUIREMENT**

Bachelor of Science students must satisfy a mathematics requirement consisting of one of the following sequences.

- 22M:015-22M:016 Mathematics for the Biological Sciences - Calculus for the Biological Sciences 8 s.h.
Tracks

All geography majors must complete one of the three tracks described below: geography and social change, environmental studies, or geographic information science. Students should pay close attention to prerequisites for the upper-level courses in each track so that they can develop a study plan that allows them to complete their major in a timely way. Students in the environmental studies or geography and social change tracks who wish to gain additional experience in theory and application of geographic information systems (GIS) should take 044:113 Principles of Geographical Information Systems and at least an additional 6 s.h. in GIS-based courses offered by the Department of Geography.

GEOGRAPHY AND SOCIAL CHANGE TRACK

The geography and social change track is designed for students preparing for positions in government, nongovernment organizations, international development agencies, and business. It also provides preparation for graduate study in geography or planning, or for professional programs such as law, business, or policy analysis. The track provides an understanding of increasing globalization, including processes of urban and regional development or underdevelopment; the roles of elites, classes, institutions, and social movements; the role of the natural environment in effecting social change in different parts of the world; and the processes through which policy decisions are reached. Course work in the track covers social and economic theories of location and regional formation, methods of spatial analysis and geographic modeling, global and regional political economy, and theories of community conflict and social change.

Students develop requisite skills in quantitative analysis and the development, management, and application of geographic information systems and computer methods. They have opportunities to work on applied problems, such as assessing sites for their growth potential, identifying the best locations for service facilities, evaluating the impact of major projects, and forecasting the populations of small areas. The geography and social change track also provides opportunities for students interested in international development to examine competing theories intended to explain international and regional inequalities, and to investigate and evaluate the patterns and practice of development worldwide.

In addition to satisfying the common requirements for all geography majors, students in the geography and social change track must complete the following.

044:010 The Contemporary Global System 4 s.h.
Upper-level geography courses 11 s.h.

Students choose the upper-level courses (11 s.h.) in consultation with their advisors. They may not count 044:150 Senior Project Seminar or the independent study courses 044:151 Senior Thesis, 044:195 Undergraduate Research, and 044:199 Honors Thesis toward this requirement. Students in the geography and social change track who wish to gain additional experience in theory and application of geographic information systems (GIS) should take 044:113 Principles of Geographical Information Systems and at least an additional 6 s.h. in GIS-based geography courses.

The following upper-level courses are recommended.

044:104 Environment and Development 3 s.h.
044:131 Geography of Health 2-3 s.h.
044:133 Transportation Economics 3 s.h.
044:135 Urban Geography 3 s.h.
044:137 Health and Environment: GIS Applications 3 s.h.
044:139 Spatial Analysis and Location Models 3 s.h.
044:164 The Middle East 3 s.h.
044:170 Geography of Justice 3 s.h.
044:177 Environmental Justice 3 s.h.
044:178 Consequences of Global Environmental Change 3 s.h.
044:181 Field Methods: Mapping and Mobile Computing (a course chosen to fulfill one requirement cannot be used to fulfill a second) 3 s.h.
044:194 Geographic Perspectives on Development 3 s.h.
ENVIRONMENTAL STUDIES TRACK

The environmental studies track is designed for students interested in the interrelationships among social and natural processes that affect the environment. The track prepares students for careers or pursuit of personal interests in resource management, physical geography, climatology, environmental policy or law, global environmental change, sustainable development, or other complex environmental issues. Graduates may find employment in an environmental profession such as landscape ecology or climatology; environmental planning and regulation; or environmental law, policy, and politics.

The environmental studies track offers training in field observation, remote sensing, geographical information systems, quantitative analysis/computing, and cartographic representation. It also provides a sound foundation or graduate or professional-level studies in the natural or social aspects of the environment.

In addition to satisfying the common requirements for all geography majors, students in environmental studies track must complete the following.

044:019 Contemporary Environmental Issues 3 s.h.
Upper-level geography courses 12 s.h.

Students choose the upper-level courses (12 s.h.) in consultation with their advisors. They may not count 044:150 Senior Project Seminar or the independent study courses 044:151 Senior Thesis, 044:195 Undergraduate Research, and 044:199 Honors Thesis toward this requirement. Students in the environmental studies track who wish to gain additional experience in theory and application of geographic information systems (GIS) should take 044:110 GIS for Environmental Studies: Introduction or 044:128 GIS for Environmental Studies: Applications, and at least an additional 6 s.h. in GIS-based geography courses.

The following upper-level courses are recommended.

044:101 Climatology 3 s.h.
044:103 Biogeography 3 s.h.
044:104 Environment and Development 3 s.h.
044:105 Introduction to Environmental Remote Sensing 3 s.h.
044:123 Landscape Ecology 3 s.h.
044:125 Environmental Impact Analysis 4 s.h.
044:126 Wetlands: Function, Geography, and Management 3 s.h.
044:127 Environmental Quality: Science, Technology, and Policy 3 s.h.
044:128 GIS for Environmental Studies: Applications 3 s.h.
044:131 Geography of Health 2-3 s.h.
044:137 Health and Environment: GIS Applications 3 s.h.
044:141 Introduction to Geographic Databases 3 s.h.
044:145 Advanced Geographic Remote Sensing 4 s.h.
044:170 Geography of Justice 3 s.h.
044:178 Consequences of Global Environmental Change 3 s.h.
044:180 Field Methods in Physical Geography (a course chosen to fulfill one requirement cannot be used to fulfill a second) 2-4 s.h.

GEOGRAPHIC INFORMATION SCIENCE TRACK

The geographic information science track is designed for students preparing for positions in government agencies, nongovernment organizations, international development agencies, and business. It also provides preparation for graduate study in geography, planning, and other disciplines. The track focuses on the design, implementation, and use of geographic information systems. Courses address how geographic data are acquired, stored, accessed, displayed, managed, and analyzed.

Students in the geographic information science track learn to address problems involved in modeling environmental systems, identifying the best locations for service facilities, assessing environmental impacts, and forecasting the populations of small areas. They use the department's Geographic Information Systems Instructional Lab (GISIL) extensively to develop expertise in using GIS software.

Course work in the track covers methods of spatial analysis and geographical modeling and involves database management and computer programming.
In addition to the common requirements for all geography majors, students in the geographic information science track must complete the following.

22C:005 Introduction to Computer Science 3 s.h.
or
22C:016 Computer Science I: Fundamentals 4 s.h.

Upper-level geography courses 11 s.h.

Students choose the upper-level courses (11 s.h.) in consultation with their advisors. They may not count 044:150 Senior Project Seminar or the independent study courses 044:151 Senior Thesis, 044:195 Undergraduate Research, and 044:199 Honors Thesis toward this requirement. Students in the GIScience track are encouraged to add breadth to their degree by taking additional upper-level courses in the department. Students interested in the application of GIS to environmental issues should select courses from the department’s environmental studies area; those interested in socioeconomic issues should select courses from the department’s geography and social change area.

The following upper-level courses are recommended.

044:105 Introduction to Environmental Remote Sensing 3 s.h.
044:109 Introduction to Geographic Visualization 3 s.h.
044:110 GIS for Environmental Studies: Introduction 3 s.h.
044:112 Mapping American Cities and Regions 3 s.h.
044:113 Principles of Geographical Information Systems 3 s.h.
044:125 Environmental Impact Analysis 4 s.h.
044:127 Environmental Quality: Science, Technology, and Policy 3 s.h.
044:128 GIS for Environmental Studies: Applications 3 s.h.
044:131 Geography of Health 1-3 s.h.
044:137 Health and Environment: GIS Applications 3 s.h.
044:139 Spatial Analysis and Location Models 3 s.h.
044:141 Introduction to Geographic Databases 3 s.h.

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

Bachelor of Arts

The B.A. degree requires 38 s.h. in the major.

Before the third semester begins: one of the introductory courses in the major and at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: five courses in the major and at least one-half of the semester hours required for graduation

Before the seventh semester begins: 11 courses in the major and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: 14 courses in the major

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Bachelor of Science

The B.S. degree requires 46 s.h. in the major.

Before the third semester begins: two of the introductory courses in the major and at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: six courses in the major and at least one-half of the semester hours required for graduation

Before the seventh semester begins: 12 courses in the major and at least three-quarters of the semester hours required for graduation
Before the eighth semester begins: 15 courses in the major

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Honors

Honors in geography is for students of superior ability who want to pursue studies beyond the typical undergraduate level. To graduate with honors, students must become a member of the University of Iowa Honors Program, which requires that students maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University of Iowa Honors Program for more information). They must be admitted to the honors program in geography by the first semester of the senior year and must maintain a g.p.a. of at least 3.33 in geography. They also must prepare and present an honors thesis, which consists of original research under the direction of a faculty member. The thesis is reviewed by a three-member faculty committee.

Students complete their thesis by taking 044:199 Honors Thesis. The senior course 044:150 Senior Project Seminar may be substituted for 044:199 Honors Thesis, as long as the student continues work on the thesis under the direction of a faculty member.

Minor

The minor in geography requires a minimum of 15 s.h. in geography courses, including 12 s.h. in 100-level courses taken at The University of Iowa. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass. Students are encouraged to concentrate their course work in tracks--geography and social change, environmental studies, or geographic information science (see "Tracks" above). Those who wish assistance in selecting courses may contact the department secretary to request assignment of a minor advisor.

Courses for Nonmajors

Students in the College of Liberal Arts and Sciences as well as other academic units at the University may find geography courses useful to their own study programs. The beginning-level courses 044:001 Introduction to Human Geography, 044:011 Population Geography, 044:019 Contemporary Environmental Issues, and 044:030 The Global Economy are approved for the social sciences component of the College of Liberal Arts and Sciences General Education Program; 044:010 The Contemporary Global System and 044:161 African Development are approved for the social sciences and foreign civilization and culture components of the General Education Program; and 044:003 Introduction to Earth Systems Science is approved for the natural sciences component of the General Education Program. These courses serve as part of a liberal education.

Other courses may be taken as electives, including 044:015 Introduction to Political Geography and 044:035 World Cities.

Graduate Programs

The department offers a Master of Arts and a Doctor of Philosophy in geography. The graduate programs focus on investigating the environmental consequences of human decisions on local, regional, and global scales.

Geographical information science and the theories and models of environmental and social sciences are central to the department's studies. Within this broad domain, the department is developing strengths in environmental justice, environmental modeling, land use and its environmental consequences, health geography, and information technology and development.

The M.A. and Ph.D. prepare students to carry on creative and productive research in selected areas of geography. University of Iowa graduates hold positions on college and university faculties, in private research organizations, and in business and government.

The department provides opportunities for graduate students to gain practical teaching experience through service as departmental teaching assistants or graduate instructors.

Graduate students present research papers at conferences and have regularly won awards. Students are involved in faculty research that leads to coauthored publications; they also publish their own. Graduate students compete successfully for intramural and extramural funding for graduate education and research.

Master of Arts

The Master of Arts in geography requires a minimum of 30 s.h. of graduate credit and is designed to be completed in four semesters. However, students earn more than the required credit in completing the degree, using the additional work to increase their breadth of knowledge in geography and to tailor their study programs to their individual interests.
A maximum of 6 s.h. of thesis credit may be applied toward the degree. Students may complete an M.A. specialization in geographic information science by taking specific course work.

Graduate students demonstrate competence by completing appropriate course work; and completing an M.A. exam, or completing and defending an M.A. thesis, or completing the Ph.D. comprehensive exams.

For detailed information about M.A. requirements, see the *Manual for Graduate Degree Requirements, Department of Geography*; contact the Department of Geography.

**Doctor of Philosophy**

The Doctor of Philosophy in geography requires 72 s.h. of graduate credit and is designed to be completed in four or five years. The degree prepares students for college and university teaching and for advanced research. It provides study programs that lead to broad knowledge of a field of geography and its literature and to special expertise in a subfield.

Students can enter the Ph.D. program upon completing an undergraduate degree or with advanced standing corresponding to previous graduate education.

All Ph.D. students take the following courses. They take 044:350 Geography Colloquium (1 s.h.) each semester in residence.

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>044:210 Fundamentals of Geography</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>044:211 Research and Writing in Geography</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>044:350 Geography Colloquium (taken each semester)</td>
<td>1 s.h.</td>
</tr>
<tr>
<td>Two courses in geography numbered above 044:200</td>
<td>6 s.h.</td>
</tr>
<tr>
<td>Two research seminars chosen from 044:315 through 044:319 (3 s.h. each)</td>
<td>6 s.h.</td>
</tr>
</tbody>
</table>

Before students can be admitted to candidacy for the Ph.D., they must submit an original research paper to a faculty committee for approval. Students who complete an M.A. or M.S. thesis can submit it to fulfill this requirement. Before taking the comprehensive examination, which consists of both written and oral components, each student must submit an area review paper to his or her Ph.D. committee. This paper, which must be approved by the student's Ph.D. advisor, consists of a critical review of research in the student's concentration area.

The comprehensive examination covers the student's concentration area and his or her general field in the discipline. After obtaining the dissertation supervisor's approval, the student submits a dissertation proposal to the dissertation committee for critical comments and approval. The student then must complete and defend the dissertation.

For detailed information about Ph.D. requirements, see the *Manual for Graduate Degree Requirements, Department of Geography*; contact the Department of Geography.

**Admission**

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

A bachelor's degree in geography is not required for admission to graduate study in geography, but applicants must have an undergraduate background relevant to the field. Strength in social or environmental science and interest in exploring the regional and spatial perspectives that characterize modern geography are important in admission decisions. Depending on their prior training, graduate students may be required to take courses that are prerequisites for course work in their chosen area of graduate study; credit earned in prerequisites does not count toward the graduate degree.

Application materials include an undergraduate transcript with grade-point average, scores on the Graduate Record Examination (GRE) General Test, three letters of recommendation, and an essay in which the applicant states his or her reasons for wanting to study geography at The University of Iowa.

Applicants whose first language is not English must take the Test of English as a Foreign Language (TOEFL). Their scores must be sent to the University's Office of Admissions.

New graduate students whose first language is not English are required to take the Speaking Proficiency English Assessment Kit (SPEAK) test when they arrive at the University; eventually they take the English Language Performance Test (ELPT). Students must be fully certified by the ELPT before they begin their fourth semester in order to be considered for funding in succeeding semesters. Students who do not pass the SPEAK test and ELPT are required to take Teaching Assistant Preparation in English (TAPE) courses until they have achieved proficiency in spoken English.

**Financial Support**
A number of graduate teaching and research assistantships are available. In addition, outstanding applicants and underrepresented minorities are eligible for several fellowships. Awards are based on merit. In making awards, the department pays particular attention to grade-point average, especially for the junior and senior years; score on the Graduate Record Examination (GRE) General Test; letters of recommendation; and fit of the student's objectives with department specializations. Applications for graduate appointments must be received by February 1. Applications for fellowships are due by January 15.

Internships

The Department of Geography is a participant in the University's internship program, which provides opportunities for both undergraduate and graduate students to participate in paid and unpaid activities related to their academic programs. The Pomerantz Career Center works with students to develop appropriate internships.

Facilities, Resources

The department houses three geographic information computational laboratories, which support a variety of GIS software packages, including the latest software from ESRI (ArcGIS) and Erdas (Imagine).

The University's Geographic Information Systems Instructional Lab (GISIL) is located in the Department of Geography. The lab is a center for teaching GIS as well as a place where students conduct geographic and GIS-related research. It is equipped with 20 networked student workstations, instructional support technology (e.g., CRT projection), and a suite of peripherals.

Environmental modeling and GIS research laboratories contain state-of-the-art machines. The department provides Windows and Linux platforms, digitizers, scanners, plotters, and printers. Projects requiring massive storage have access to the advanced GIS and modeling facility in the Center for Global and Regional Environmental Research. The University of Iowa is a charter member of Internet2, with a high-performance network link to the Department of Geography. The University also is a member of the University Consortium on Geographic Information Science.

To aid studies of water resources and physical geography, the department has a laboratory for analysis of vegetation, sediment, soil, water quality, and tree rings, and a variety of field equipment, including portable meteorological stations and data loggers.

Faculty and graduate students participate in multidisciplinary working groups through the University's Program in Applied Mathematical and Computational Sciences, Center for Global and Regional Environmental Research, Center for Health Effects of Environmental Contamination, International Programs, Institute for Rural and Environmental Health, Iowa Quaternary Studies Group, and Public Policy Center.

The University's Main Library has a collection of more than 115,500 maps, 3,600 atlases and reference works, and around 100,000 aerial photographs, primarily of Iowa.

Geography Courses

Primarily for Undergraduates

044:001 Introduction to Human Geography 4 s.h.
Application of geographic principles to contemporary social, economic, and political problems; urban growth; problems of the ghetto; diffusion of innovations; territoriality and perception. GE: Social Sciences.

044:003 Introduction to Earth Systems Science 4 s.h.
Elementary principles of physical geography: physics of weather and climate, hydrological systems, geomorphological and geological forces, pedological processes, and ecological processes and patterns; geographic explanation of physical environment, with principles applied to the human use system; environmental pollution and natural hazards. GE: Natural Sciences.

044:005 Foundations of GIS 3 s.h.
Cartography, map analysis, and geographic information systems; map projections and scale; data collection, remote sensing, and GPS; data structures and organization; cartometry; symbolization and visualization.

044:010 The Contemporary Global System 4 s.h.
Problems of the global system and ways to address them; global economy and environment, state and security, social justice and human rights. GE: Foreign Civilization & Culture, Social Sciences.
044:011 Population Geography
Spatial considerations of population growth and distribution; minorities within a population; poverty; housing; social organization and disorganization; social systems, including education, religion, recreation, medical and social services; diffusion of ideas and traits over space. GE: Social Sciences.

044:015 Introduction to Political Geography
Emphasis on application of geographical and economic theory in understanding historical development and restructuring of political economies at global, national, and local levels; development of nation states, nationalism, imperialism, geopolitics, economic restructuring, electoral geography.

044:019 Contemporary Environmental Issues
Political, economic, cultural, technologic, ecological, and ethical issues associated with natural resource and environmental problems, including population, global climate change, food production, tropical deforestation, soil erosion, waste management. GE: Social Sciences.

044:020 Discovery in Geography

044:029 First-Year Seminar
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Prerequisite: first- or second-semester standing.

044:030 The Global Economy
Location and spatial organization of the world's major types of economies; agriculture, energy and minerals, manufacturing, transportation; trade and service centers. GE: Social Sciences.

044:035 World Cities
Urbanization as a process; specific concepts and theories of urbanization through global patterns, regional urban systems, individual metropolitan areas.

044:100 Readings for Undergraduates
Supervised readings in geography. Prerequisite: consent of instructor.

For Undergraduate and Graduate Students

044:101 Climatology
Boundary layer processes that drive atmospheric dynamics; exchanges of energy and water at simple and complex surfaces; global climate change records, theories, models; impacts of climate on society. Prerequisite: 044:003 or consent of instructor. Same as 012:104.

044:103 Biogeography
Patterns of plant and animal distribution and their interpretation; historical geography, including glaciation, plate tectonics; ecological geography, including physical factors such as climate, geology. Prerequisite: 002:001, or 002:010 and 002:011, or 044:003, or consent of instructor. Same as 002:103.

044:104 Environment and Development
Environmental impacts of industrial and rural development explored through Third World case studies (Latin America, Africa, South and East Asia); environmental degradation from perspectives of political economy and ecology; class, gender, and indigenous peoples' issues; industry-agriculture linkages.

044:105 Introduction to Environmental Remote Sensing
Basic concepts and principles of remote sensing; sources of data; georegistration; digital processing and classification of remotely sensed images for extraction of environmental information; linkage of remote sensing techniques with GIS analysis.

044:106 Foundations of GIS
Cartography, map analysis, and geographic information systems; map projections and scale; data collection, remote sensing, GPS; data structures and organization; cartometry; symbolization and visualization.
044:109 Introduction to Geographic Visualization
Basic concepts and techniques that underlie cartographic representation and the broader field of geographic visualization; digital cartographic practices; how scientific visualization, information visualization, and user interface design contribute to geographic visualization; map symbolization, scale and generalization, animation and dynamic map design, multimedia, virtual and mixed environments, interfaces for GIS; experience applying cartographic and visualization techniques. Prerequisite: 044:005.

044:110 GIS for Environmental Studies: Introduction
Methods of managing and processing geographic information for environmental analysis; basic concepts, structures, theories of geographic information system (GIS), basic analytical techniques, and hands-on experience in GIS operations. Prerequisite: 044:005 or consent of instructor.

044:112 Mapping American Cities and Regions
Foundation concepts for GIS-based analysis of urban, social, and economic data for the United States; geo-referenced sources of U.S. national and state data; application to contemporary social issues. Prerequisite: 044:005 or consent of instructor.

044:113 Principles of Geographical Information Systems
Issues in establishment of geographic information systems: spatial data encoding, raster-vector options, spatial and attribute resolution, cartographic data models, linkages to spatial analysis procedures, display techniques for decision support, institutional setting. Prerequisite: 044:005 or consent of instructor.

044:115 Cultural Geographies of North America
Historical and contemporary perspectives on the contested cultural geographies of North America; processes underlying the social construction and reproduction of place, region, and place-based identities.

044:122 Environmental Conservation in the United States
Varied natural environments of the United States; problems arising from conflicting land uses; consideration of public land use policy, environmental impacts of different land uses, problems of habitat preservation and endangered species. Prerequisite: 044:003 or 044:019 or consent of instructor.

044:123 Landscape Ecology
Effects of spatial pattern on spatial processes in ecology; characteristics of matrix, patch, corridor; fragmentation, deforestation, habitat loss; spatial flows of energy, matter, genetic information; relationship to human impact, global climate change. Prerequisite: 044:103 or a 100-level course in ecology.

044:125 Environmental Impact Analysis
Environmental impact assessment methodologies; emphasis on cost-benefit-risk, cost-effectiveness and incremental analysis, and overlay and graphic techniques; optimal resource use, system simulation; field trips to local environmental control facilities. Prerequisite: 044:019. Same as 102:125.

044:126 Wetlands: Function, Geography, and Management
Biotic aspects of water resources production; geographical basis of biophysical processes in drainage basins; spatial aspects of stream ecology; regional characterization of wetland structure and process. Prerequisite: 044:101 or 044:103. Same as 012:126.

044:127 Environmental Quality: Science, Technology, and Policy
Geographical perspectives in the study and interpretation of chemicals in the environment; environmental standards under existing laws; local, regional, national, international case studies in environment and health; socioeconomic and institutional considerations in designing environmental protection strategies. Prerequisite: 22S:025 or equivalent or consent of instructor.

044:128 GIS for Environmental Studies: Applications
Applications of geographic information system (GIS) techniques in environmental change analysis (especially land use/cover change), environmental assessment, hazard/risk analysis, environmental decision making. Prerequisite: 044:110 or consent of instructor.

044:131 Geography of Health
1-3 s.h.
Provision of health care in selected countries, with particular reference to the Third World; focus on problems of geographical, economic, cultural accessibility to health services; disease ecology, prospective payment systems, privatization, medical pluralism. Same as 152:131.

**044:133 Transportation Economics** 3 s.h.
Overview of transportation markets—intercity, rural, urban; transportation modes—rail, highway, air, water, pipeline, transit; issues in finance, policy, planning, management, physical distribution, and environmental, economic, and safety regulation. Prerequisites: 06E:001 and 06E:002, or consent of instructor. Same as 06E:145, 102:133.

**044:134 Health and Environment: GIS and Spatial** 3 s.h.
Use of GIS and spatial analysis methods to focus on three areas: handling spatial data, exploratory spatial data analysis, and causality analysis of geographic phenomena.

**044:135 Urban Geography** 3 s.h.
Central ideas of modern urban geography, their links to social theory; focus on interrelation between social change, urban environment; evolution of urban systems, emergence of the capitalist city, urban social and residential differentiation, local politics of uneven development.

**044:136 Planning Livable Cities** 3 s.h.
Development of livable cities in the United States; economic, physical, environmental, and political forces that shape their growth; impact of planning, how it shapes the future of cities. Same as 102:101.

**044:137 Health and Environment: GIS Applications** 3 s.h.
Applications of GIS and spatial analysis for studying health outcomes and exposure to environmental contaminants at different geographical scales. Prerequisite: 044:131 or 044:134 or consent of instructor.

**044:139 Spatial Analysis and Location Models** 3 s.h.
Application of location models within GIS environments to support decision making; small area demographic forecasting, location-allocation models, regionalization problems, shortest path models, other spatial analysis methods used to support spatial decisions. Prerequisite: 044:005.

**044:141 Introduction to Geographic Databases** 3 s.h.
Fundamentals of database design and use for geographic or environmental domains; major database models and how they support geographic data; introduction to SQL for formulating database queries; experience using software for applying key database concepts. Prerequisites: 044:005 and undergraduate standing, or graduate standing and consent of instructor.

**044:142 Simulation in Environmental Geography** 3 s.h.
How computer simulations are used in environmental studies, with focus on landscape ecology (spatial patterns of organisms and ecosystems); basics of performing simulations; principles and applications of simulation through readings and performing simulations; frontiers of simulation use in the field; hands-on experience writing computer simulations that capture environmental processes (e.g., changing climate, predator-prey relations, nutrient flux), and analyzing the outcomes. Prerequisites: advanced courses in environmental geography or environmental science and senior standing.

**044:145 Advanced Geographic Remote Sensing** 4 s.h.
Theory and practice of remote sensing and digital image processing; practical applications to human-environment interactions. Prerequisite: 044:105.

**044:150 Senior Project Seminar** 3 s.h.
Development of a research project and preparation of a research report. Offered spring semesters. Prerequisite: senior standing.

**044:151 Senior Thesis** 3 s.h.
Original research. Prerequisites: senior standing and consent of instructor.

**044:161 African Development** 3 s.h.
Problems of economic, political, spatial integration in Africa; patterns and processes of economic development and nation building. GE: Foreign Civilization & Culture, Social Sciences.
044:164 The Middle East  
Middle East cultures, political economy, conflict; significance of the Middle East in world affairs, vice versa.  3 s.h.

044:170 Geography of Justice  
Geographical analysis of social and environmental justice; justice from various cultural perspectives; cultural struggles over human rights.  3 s.h.

044:174 Health, Work, and the Environment  
Current topics in occupational and environmental health; how the United States protects workers, protects people from environmental agents, and reduces environmental harm. Same as 175:101.  3 s.h.

044:177 Environmental Justice  
Review of theoretical positions for examining environmental justice, application of those theories to environmental controversies around the globe.  3 s.h.

044:178 Consequences of Global Environmental Change  
Physical components of global change, their relationship to environmental policy concerns; consequences manifested on local, regional, international scales. Prerequisites: 044:003 or 159:008, and 044:019; or consent of instructor.  3 s.h.

044:180 Field Methods in Physical Geography  
Methods of measuring climate, vegetation, soil, landforms, water; projects in areas including field meteorology, tree-ring sampling, topographic surveying, vegetation sampling, water quality sampling, use of global positioning systems; introduction to research design.  2-4 s.h.

044:181 Field Methods: Mapping and Mobile Computing  
Development and application of mobile geographic information technologies; key issues associated with global positioning systems (GPS), wireless technologies, field-based data collection and analysis, ubiquitous computing, and location-based services; experience using GPS, advanced mobile computing technologies, mobile GIS software to construct geographic datasets, and data sampling techniques.  3 s.h.

044:183 Quaternary Environments  
Archaeological, botanical, zoological, physical, chemical means of reconstructing glacial and interglacial environments; techniques, results; interdisciplinary approach; field trips. Prerequisite: consent of instructor. Same as 012:173.  3 s.h.

044:186 Soil Genesis and Geomorphology  
Introduction to soil genesis, soil geomorphology, and classification including the basics of soil profile description and soil-landscape, soil-vegetation, and soil-climate relationships; emphasis on study of soils as the interface between living and non-living Earth systems and the role of soils in sustaining ecosystems and human societies; short field excursions and a weekend field trip. Prerequisites: college earth science and chemistry. Same as 012:136.  3 s.h.

044:188 Applied Geostatistics  
Applications of geostatistical methods to geology, geography, hydrology, environmental sciences, and engineering; variogram, Kriging, analysis of spatial-varied data with varied computer software in participants' specialties. Same as 012:178.  3 s.h.

044:194 Geographic Perspectives on Development  
Theoretical and empirical studies of the regional development process, with emphasis on developing countries; alternative regional development theories and changes in development theories in the literature of geography, related disciplines. Prerequisites: satisfaction of introductory geography and social change requirements, or consent of instructor.  3 s.h.

044:195 Undergraduate Research  
Supervised research in geography. Prerequisite: consent of instructor.  arr.

044:197 Special Topics  
Contemporary fields of inquiry, such as political economy, regional/African development, biophysical systems, GIS, locational analysis, water resources, economic geography, demographic analysis, environment, urbanization, transportation.  arr.

044:199 Honors Thesis  
arr.
For Graduate Students

044:200 Readings
Supervised readings by graduate students in topics of their choice. Prerequisite: consent of instructor.  
arr.

044:210 Fundamentals of Geography
Geography as an academic discipline; history, advances, epistemology, common themes.  
3 s.h.

044:211 Research and Writing in Geography
Identification of research areas; research questions and hypotheses; methodological decisions; research proposal and paper writing.  
3 s.h.

044:225 Environmental/Social Systems Analysis
Linear optimization and related models; recent applications in water resources management, pollution control, economics, public policy; potential future applications in designing water quality monitoring networks. Prerequisite: consent of instructor.  
3 s.h.

044:241 Integrating Time Into GIS
Fundamental concepts for integrating temporal elements into geographic information systems (GIS); conceptual and formal models of time, models of change, event-based modeling, modeling of moving entities; topics related to fundamentals of spatiotemporal databases and query languages. Prerequisites: advanced courses in GIS and graduate standing.  
3 s.h.

044:242 Simulations in Landscape Ecology
Dynamics of land use and land cover change explored through advanced use of computer simulations in landscape ecology; how simulation is used in the field; simulations based on landscape ecology questions, with analysis of results using typical landscape ecology metrics. Prerequisites: 044:142 and graduate standing.  
3 s.h.

044:243 Modeling Space and Time
How to generate time-space-resolved estimates of sociophysical environmental contexts with the aid of modern geo-spatial technologies; how to model social, behavioral, and health outcomes with reference to multilevel time-space-resolved sociophysical environmental contexts; environmental contexts from air pollution and pesticide concentration to neighborhood diversity; statistical modeling of varied social, behavioral, and health outcomes such as dropping out of college, smoking, excessive weight, asthma, mental and physical disability. Prerequisites: a course in statistics and good understanding of correlation and regression.  
3 s.h.

044:265 Planning Sustainable Transportation
Theories and methods of exerting public control over passenger and freight transportation; social and environmental regulation; effects of changing finance, regulation, and pricing policies, including privatization, tolls, impact fees. Same as 102:265.  
1-3 s.h.

044:286 Crossing Borders Seminar
2-3 s.h.

044:287 Crossing Borders Proseminar
1 s.h.

044:296 Topics in Geographic Information Science
Current theoretical research issues in geographic information science; intensive readings. Repeatable. Prerequisite: 044:113 or consent of instructor.  
3 s.h.

044:297 Special Topics
Contemporary fields of inquiry, such as political economy, regional/African development, biophysical systems, GIS, locational analysis, water resources, economic geography, demographic analysis, environment, urbanization, transportation.

Geoscience faculty and students study the many physical, chemical, and biological systems that compose the earth. Using modern observational, analytical, and computational methods, they examine how the planet's interior, surface, hydrosphere, and atmosphere have evolved since the earth was born in the solar system 4.6 billion years ago. Topics commonly studied in the department include how plate movements cause earthquakes, volcanoes, and mountain building; global climate change and how climate change and catastrophic events cause changes in biodiversity; how and where economic resources are generated in the earth; and how these resources are located and used in modern society.

The geoscience curriculum provides students with hands-on experience analyzing rocks, minerals, fossils, soils, and waters, generally in a small classroom setting. Much of this experience is obtained in laboratory and field courses. Field courses include travel to other states or countries to view earth materials and fossils in the context of their natural surroundings.

The master's degree is regarded by most hiring agencies as the working degree. The doctoral degree is required for college and university teaching positions. However, an undergraduate degree is fully satisfactory in certain teaching, government, and industrial situations.

Many of The University of Iowa's geoscience graduates find employment with resource companies, environmental corporations, and educational institutions. Others continue in graduate school or take jobs with government or conservation agencies. Some intend to enter law, business, or fields such as urban planning, environmental studies, engineering, archaeology, science education, or oceanography as advanced areas. Geoscience provides skills useful for all of these.

Each year more than 1,800 students enroll in 012:003 Earth History and Resources, 012:004 Evolution and the History of Life, 012:005 Introduction to Geology, 012:007 Age of Dinosaurs, 012:008 Introduction to Environmental Science, 012:114 Energy and the Environment, and 012:140 Natural Hazards. All of these courses are approved by the College of Liberal Arts and Sciences for the natural sciences requirement of the General Education Program.

Many of the department's faculty members are involved in the interdisciplinary Environmental Sciences Program (see Environmental Sciences in the Catalog).

Undergraduate Programs

The department offers a Bachelor of Science, a Bachelor of Arts, and a minor in geoscience. Students majoring in geoscience take at least an academic year's work in three allied scientific areas--physics, chemistry, and mathematics--and a semester of biology in addition to a course in each major area of geology.

B.S. or B.A. with Double Major or Minor

Geoscience students may elect to pursue an additional major or a minor in a related discipline, usually chemistry, physics, biology, engineering, environmental sciences, or anthropology. See Earning a Degree (Earning Two or More Majors, Earning Multiple Undergraduate Degrees, and Certificates and Minors) in the College of Liberal Arts and Sciences Student Academic Handbook.

Independent Research for Geoscience Majors

A junior or senior who is ready to pursue independent research for credit in geoscience may assist a faculty member or graduate student with a current research project (012:019 Directed Study) or may initiate a small-scale project involving a combination of field, laboratory, and library investigation (012:119 Directed Study). Independent study is
encouraged and may result in an honors thesis (012:010 Honors Thesis in Geoscience) or a senior thesis (012:011 Senior Thesis in Geoscience) that is published subsequently. Students completing an honors or senior thesis must enroll in 012:190 Undergraduate Geoscience Colloquium for one semester during their final year of study.

**Bachelor of Science**

The Bachelor of Science in geoscience requires a minimum of 120 s.h., including at least 69 s.h. (18 courses) of work for the major (38 s.h. in geoscience courses and at least 31 s.h. in supporting disciplines). The program is designed to prepare students for immediate employment after graduation or to enter a graduate program in geology.

Students must complete the College of Liberal Arts and Sciences General Education Program. The department recommends that they fulfill the foreign language requirement with French, German, Russian, or Spanish and the social sciences requirement with an approved course in economics, geography, or anthropology.

Transfer students must complete a minimum of 15 s.h. of course work in the Department of Geoscience.

The geoscience major for a B.S. requires the following course work.

One of these:

- 012:003 Earth History and Resources 4 s.h.
- 012:005 Introduction to Geology (preferred) 4 s.h.

All of these:

- 012:004 Evolution and the History of Life 4 s.h.
- 012:041 Mineralogy 4 s.h.
- 012:052 Petrology 4 s.h.
- 012:092 Structural Geology 4 s.h.
- 012:093 Geologic Field Methods 3 s.h.
- 012:113 Summer Field Course 6 s.h.

At least two geoscience electives 6-7 s.h.

One of these:

- 012:121 Principles of Paleontology 3 s.h.
- 012:149 Elements of Geochemistry 3 s.h.
- 012:166 Hydrogeology 3 s.h.
- 012:180 Survey of Geophysical Methods 3 s.h.

At least 8 s.h. of calculus, including one of these:

- 22M:026 Calculus II 4 s.h.
- 22M:032 Engineering Mathematics II: Multivariable Calculus 4 s.h.

B.S. students complete an additional course in mathematics (numbered 22M:027 Introduction to Linear Algebra and above), computer science (numbered 22C:005 Introduction to Computer Science and above), or statistics (numbered 22S:030 Statistical Methods and Computing and above).

They also complete the following course work in chemistry, physics, and biology (these are minimum requirements).

At least 8 s.h. of college-level chemistry is required, including the following, equivalent courses, or more advanced courses; chemistry courses numbered below 004:011 Principles of Chemistry I cannot be used to satisfy the chemistry requirement for the B.S. in geoscience.

- 004:011-004:012 Principles of Chemistry I-II 8 s.h.

At least 8 s.h. of college-level physics is required, as follows; physics courses numbered below 029:011 cannot be used to satisfy the physics requirement for the B.S. in geoscience.

One of these sequences:

- 029:011-029:012 College Physics I-II 8 s.h.
- 029:081-029:082 Introductory Physics I-II 8 s.h.
At least one biological science course that includes a laboratory (4 s.h.) is required. Students with an interest in paleontology are encouraged to take 002:010 Principles of Biology I and 002:011 Principles of Biology II.

**RECOMMENDED OPTIONS**

All B.S. students should take elective courses from the following groups in order to broaden their undergraduate experience and prepare themselves for graduate study or professional employment. Students who have clear career goals are advised to take three or more elective courses from the group that fits their needs most closely. Students also may seek a broad education in geoscience by choosing elective courses from a number of groups.

Bachelor of Arts

The Bachelor of Arts in geoscience requires a minimum of 120 s.h., including at least 51 s.h. (17-18 courses) of work for the major (35 s.h. in geoscience courses and at least 16 s.h. in supporting disciplines). The program is designed to provide students with a varied background in geology and a broader choice of electives than is practical in the B.S. program. The B.A. is intended for students who are interested in the fundamentals of geology or earth science teaching (see Teaching and Learning, College of Education, in the Catalog). Completing the minimum requirements for this degree may not adequately prepare a student for an entry-level professional job in geology.

Students must complete the College of Liberal Arts and Sciences General Education Program. The department recommends that they fulfill the foreign language requirement with French, German, Russian, or Spanish and the social sciences requirement with an approved course in economics, geography, or anthropology.

Transfer students must complete a minimum of 15 s.h. of course work in the Department of Geoscience.

The geoscience major for a B.A. requires the following course work.

One of these:

012:003 Earth History and Resources  
012:005 Introduction to Geology
All of these:
012:041 Mineralogy 4 s.h.
012:052 Petrology 4 s.h.
012:190 Undergraduate Geoscience Colloquium 1-2 s.h.

One or both of these:
012:004 Evolution and the History of Life 4 s.h.
012:121 Principles of Paleontology 3 s.h.

One to four of these:
012:092 Structural Geology 4 s.h.
012:130 Sedimentary Geology/Stratigraphy 3 s.h.
012:136 Soil Genesis and Geomorphology 3 s.h.
012:138 Fluvial Geomorphology 3 s.h.
012:161 Stratigraphy 3 s.h.
012:166 Hydrogeology 3 s.h.

B.A. students must complete the following course work in mathematics and chemistry (these are minimum requirements).

College-level mathematics (may include computer science and statistics) 10 s.h.

At least two college-level chemistry courses (either Option 1 or Option 2) are required; chemistry courses numbered below 004:007 General Chemistry I cannot be used to satisfy the chemistry requirement for the B.A. in geoscience.

Option 1:
004:007-004:008 General Chemistry I-II 6 s.h.

Option 2:
004:011-004:012 Principles of Chemistry I-II 8 s.h.

FIELD REQUIREMENT

To complete the major, students must have field experience. They may take two semesters of 012:018 Geology Field Trip: Selected National Parks or 012:116 Field Trip, or one semester of each of these courses (total of 4 s.h.). Or they may take one semester of 012:093 Geologic Field Methods, 012:113 Summer Field Course, or the Iowa Lakeside Laboratory session.

012:018 Geology Field Trip: Selected National Parks 2, 4 s.h.
012:116 Field Trip 2, 4 s.h.
012:093 Geologic Field Methods 3 s.h.
012:113 Summer Field Course 6 s.h.
One natural science session at Iowa Lakeside Laboratory

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

Note: These checkpoints show the range of required course work; the B.A. program requires 17-18 courses, and the B.S. requires 18.

The geoscience major requires field trip experiences, many of which take place during vacation periods during or between semesters, or during the summer session. These checkpoints do not include the field trip requirements.
Before the third semester begins: competence in math through trigonometry, first required chemistry course, and at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: three to five courses in the major (including the remainder of the chemistry requirement and continuation of the mathematics requirement) and at least one-half of the semester hours required for graduation

Before the seventh semester begins: 7-11 courses in the major and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: 10-14 courses in the major

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Honors

Qualified students may earn a degree with honors in geoscience. Honors program students must complete a senior thesis (012:010 Honors Thesis in Geoscience) and maintain a cumulative University of Iowa g.p.a. of at least 3.33 in order to graduate with honors (contact the University of Iowa Honors Program for more information). They also must obtain approval of their honors thesis contract from their advisor and the department's undergraduate committee; have a cumulative g.p.a. of at least 3.33 in geoscience courses; earn a grade of B or higher in the Honors Thesis in Geoscience (012:010); and earn a grade of B or higher in 012:190 Undergraduate Geoscience Colloquium in their thesis year.

Minor

The minor in geoscience requires a minimum of 15 s.h. in geoscience courses, including 12 s.h. in advanced-level courses offered by the Department of Geoscience at The University of Iowa. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass. Courses 012:041 Mineralogy, 012:052 Petrology, 012:092 Structural Geology, 012:093 Geologic Field Methods, and all geoscience courses numbered 100 and above are considered advanced for the minor.

College-level courses in mathematics, physics, chemistry, and biology usually are required as collateral work for geology students. Those seeking a minor in geoscience should be sufficiently prepared in the areas of supporting sciences before they take advanced courses in geoscience.

Recommended advanced courses in geoscience that deal with important areas of earth materials and earth processes are as follows.

National Honor Society

The department sponsors a chapter of Sigma Gamma Epsilon National Honor Society for the Earth Sciences. Students with an overall g.p.a. of at least 2.80 and at least 3.20 in geoscience courses are considered for membership after they have completed a minimum of 16 s.h. of course work in geoscience. Consult the departmental honors advisor for more information.
Graduate Programs

The Department of Geoscience offers a Master of Science, with and without thesis, and a Doctor of Philosophy in geoscience.

All geoscience graduate students are responsible for meeting requirements and deadlines. They should acquaint themselves with the Manual of Rules and Regulations of the Graduate College, particularly sections IX, X, and XII (see Graduate College in the Catalog), and with the University calendar (for deadline dates and so forth).

The department provides detailed information about current graduate degree requirements and timelines for making satisfactory progress toward a degree in the document "The University of Iowa Guidelines for Graduate Study in Geoscience"; see Graduate Programs in Geoscience on the department's web site and click Graduate Student Guidelines, under Additional Information.

Entering graduate students are required to complete 012:207 Geologic Orientation during their first fall semester after enrolling in the program. M.S. students must complete 012:201 Geoscience Seminar Series each of their first four semesters in the M.S. graduate program, and Ph.D. students must complete the course each of their first six semesters in the Ph.D. program.

By the first month of their second semester after enrolling in the M.S. or Ph.D. program, students must select an advisor. Also during their second semester after enrolling, they must consult with faculty members and arrange for an advisory committee, which must be approved by the department chair by the end of their second semester.

Throughout their graduate study, all M.S. and Ph.D. students must maintain a g.p.a. of at least 3.00 on all course work required for their degree and on all graduate-level geoscience course work. Students whose g.p.a. drops below 3.00 are placed on academic probation.

Geoscience graduate students are encouraged to present their research at local, regional, national, or international meetings. The department provides partial funding for travel to such meetings.

Master of Science

The Master of Science in geoscience requires a minimum of 30 s.h. of graduate credit. The program is designed primarily to prepare students for professional careers in geoscience, or for more advanced studies. M.S. students may count up to 8 s.h. of research credit toward the 30 s.h. required for the degree. They must earn at least 24 s.h. toward the degree in University of Iowa courses taken after they enroll in the program. M.S. students are required to complete 012:201 Geoscience Seminar Series each of their first four semesters in the M.S. program.

M.S. thesis students are responsible for obtaining their advisory committee’s approval of a suitable program of course work and for satisfactory development of research plans as outlined in a thesis proposal, which should be completed and approved by the department chair before the end of the second semester of full-time study. Thesis students must deliver a half-hour public presentation of their thesis, followed by an oral defense, supporting research, and related topics. They also must take a final examination, for which members of their advisory committee act as examiners.

Individuals interested in pursuing the M.S. without thesis must obtain the department chair’s permission. The program is designed for students with extensive geological background and experience. Requirements for the nonthesis option are similar to those for the M.S. with thesis, except that in place of the thesis, nonthesis students submit a manuscript that their thesis committee deems acceptable for submission for publication. The student may choose to submit a previously published manuscript. Nonthesis students also must take a final examination that covers course work and the work done in place of the thesis.

Doctor of Philosophy

The Doctor of Philosophy in geoscience requires a minimum of 72 s.h. of graduate credit. The program is designed primarily to train students to be independent researchers and/or teachers, and to bring students to the forefront of a specialized area of geoscience.

Ph.D. students usually enter the program with established fields of interest and a research advisor already selected. Under exceptional circumstances, a student may be admitted to the Ph.D. program without an established field of interest.

After earning their first 24 s.h. of graduate credit, Ph.D. students must spend at least two semesters enrolled in full-time study (9 s.h. per semester) at The University of Iowa. They are required to include in their plan of study at least 18 s.h. of regular course work taught by tenured or tenure-track faculty members of the Department of Geoscience. Students must earn the 18 s.h. after being admitted to the Ph.D. program. Directed study and research credit do not count toward the 18 s.h.
Students must complete 012:207 Geologic Orientation by the end of their first year of enrollment in the Ph.D. program. They are also required to complete 012:201 Geoscience Seminar Series each of their first six semesters after being admitted to the Ph.D. program.

Entering Ph.D. students must consult with a research advisor or the department's director of graduate study before they enroll in courses. By the first month of their second semester of doctoral study, all Ph.D. students must select an advisor; the advisor must be a tenured or tenure-track faculty member of the Department of Geoscience and must be approved by the department chair. Each student also must select a thesis topic and forward it to the department chair for approval by the end of the first month of the second semester of doctoral study.

During the second semester of doctoral study, each Ph.D. student should propose an advisory committee of at least five faculty members, including the advisor. The advisor and at least one committee member must be tenured or tenure-track faculty members of the Department of Geoscience. A majority of the committee's members should be from the Department of Geoscience, and one member must be a University of Iowa graduate faculty member from outside the Department of Geoscience. The committee must be approved by the department chair.

Before the end of the second semester of doctoral study, each student must obtain his or her committee's approval of a suitable plan of study, which is then submitted to the department chair for approval. In consultation with the advisor and other faculty members, each doctoral candidate prepares a formal dissertation proposal, which must be submitted to the department chair by the end of the candidate's third semester of doctoral study and before the bulk of the candidate's research is completed. The proposal must receive the committee's unanimous approval.

Students should complete most of their course work before taking the comprehensive examination, which consists of both written and oral portions and which must be passed before the end of the fourth semester of doctoral study.

Once Ph.D. candidates have passed the comprehensive examination, they are required to register each semester until they receive the degree. Candidates who have completed their plan of study may register for 000:002 Doctoral Continuous Registration or 000:003 Doctoral Final Registration.

Students must submit their written dissertation to the committee at least two weeks before the final examination. All Ph.D. candidates must deliver a one-hour public presentation associated with the dissertation defense.

**Admission**

Applicants to graduate programs in geoscience must hold a bachelor's degree from a college or university accredited by a regional accrediting association. They must have a g.p.a. of at least 3.00 (M.S. applicants) or at least 3.20 (Ph.D. applicants), or a combined verbal and quantitative score of at least 1100 and an analytical writing score of at least 4.5 on the Graduate Record Exam (taken since October 1, 2002).

Applicants with a g.p.a. of at least 2.30 (M.S. applicants) or at least 2.70 (Ph.D. applicants) may be admitted on conditional status. They must enroll in at least 8 s.h. of graduate course work during each session and must attain regular status at the end of the second session of registration.

Applicants whose first language is not English must score at least 550 (paper-based), 213 (computer-based), or 81 (Internet-based) on the Test of English as a Foreign Language (TOEFL).

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

The department also admits students who are not candidates for a degree. Such students, called professional improvement students, must meet the same standards as applicants to the master's program.

**Financial Support**

The Department of Geoscience offers merit-based graduate assistantships. All admitted graduate students are eligible for assistantships.

M.S. students may hold an assistantship for two academic years and Ph.D. students for up to four. In order to retain their appointments from semester to semester, students must perform satisfactorily in the assistantship and must continue to make satisfactory progress toward completion of their degrees. Students who begin graduate study without an assistantship may become eligible for one as appointments become available.

Students must demonstrate proficiency in English before they can be considered for a teaching assistantship. Teaching assistants are evaluated each semester for teaching proficiency and communication skills, through student evaluations and observation by a supervising instructor. Research assistantships are typically funded by individual faculty grants; they vary depending on the nature of the funded project. Duties often involve activities such as sample collection and preparation; collection, analysis, and interpretation of analytical or measurement data; preparation of maps and diagrams; and assistance with fieldwork.

Outstanding students who are entering their first year of graduate school and are enrolled in doctoral programs may
apply for a Presidential Graduate Fellowship, which provides three academic years and all summers without formal work assignments, freeing students to pursue their own research.

The department also awards a significant number of tuition scholarships based on merit.

Facilities

Resources and equipment available for research in the Department of Geoscience include the following.

Computer facilities: five teaching classrooms with 10-12 networked PC workstations; a computing classroom with 20 PCs and 10 Macs with GIS, GMS, remote sensing, image analysis, and specialized computational software packages; a student computer room with 6 PCs and 2 Macs; and a number of multiprocessor workstations in research laboratories.

Environmental and Hydrogeology Laboratory: permeameters and tensionometers; pumping and slug/bail test units with transducers and data-loggers; water-quality analysis facility; advanced groundwater modeling and geostatistics software; advanced data logging systems for field research; 3-D sensor arrays (wind and water systems); and facilities for field instrumentation design and construction.

Environmental Instrumentation Laboratories: storage, testing, and teaching facility focusing on field instrumentation; assembly, housing, and testing of climatic, meteorological, fluvial, water quality and associated environmental instrumentation data recording systems and sampling systems.

Geomorphic Computing Laboratory: high-end visualization, digitizing, remote sensing and GIS systems; and high-end multiprocessor workstations.

Geoscience Library: a branch of University of Iowa Libraries that serves the University community, the Iowa Geological Survey Bureau, and the public; more than 55,000 volumes to support research, study, and teaching, including publications of state, federal, and international geological surveys and field trip guidebooks; more than 73,000 geological maps, including the newest versions of U.S. topographic quadrangle maps.

Morphometric laboratories: reflex microscope and microscribe for capturing 3-D data; high-resolution digital cameras and microscopes for 2-D image analysis; and laboratories for micro- and macro-fossil preparation.

Paleontological Repository: more than a million specimens, including some 25,000 type and referred specimens, with 6,000-7,000 primary types; invertebrate, vertebrate, and plant fossils of all geologic ages, and more than 90 percent Paleozoic invertebrates; the fifth-largest university collection in North America (CONARIP 1977).

Petrology laboratories: clean laboratory for preparation of samples for elemental and isotopic analysis; alpha-spectrometry laboratory; image analysis; heating freezing stage; petrographic microscopes; photo microscopy; wet-chemistry facilities; rock preparation and mineral separation; UNIX, Windows, and Mac workstations for data analysis and modeling; and one atm gas-mixing furnace for melt inclusion homogenization.

Quaternary Materials Laboratory: pipette grain-size analysis apparatus; chittick apparatus; Sedigraph 5100 X-ray particle-size analyzer; wet-chemistry facilities; C-H-N element analyzer; a Flotech flotation system; and a Giddings drill rig.

Scanning Electron Microscope: Hitachi S-3400N, a variable-pressure scanning electron microscope (SEM) equipped with a motorized stage, large chamber, and digital image capture; capable of imaging specimens with no metal coating, or specimens that are slightly hydrated or porous, as well as conventionally processed specimens; equipped with a Bruker AXS Quantax 400 X-ray microanalysis system; XFlash silicon drift detector with excellent energy resolution and light element detection, providing ultra-fast acquisition of line scans and elemental maps.

Sedimentary geology laboratories: water ion chromatograph; image analysis; sedigraph X-ray particle-size analyzer; and a soil/sediment characterization laboratory.

Thin-section and rock preparation laboratory: diamond saws and specialized grinding equipment used to prepare ultrathin slices (30 microns thick) of rocks and fossils for microscopic and electron microprobe analysis.

Cooperative Activities

The department does collaborative work with the Iowa Geological Survey Bureau and the Office of the State Archaeologist of Iowa. Geoscience students sometimes work on projects for the survey.

The Departments of Anthropology, Biology, Chemistry, Civil and Environmental Engineering, Geography, and Geoscience share services, expertise, joint instruction, and equipment. The geoscience department is an important participant in the Iowa Quaternary Studies group, an interdisciplinary program that promotes projects combining work in anthropology, biology, geography, geology, and statistics. Course work, degree programs, and facilities are shared among departments. The geoscience department and its faculty also support and actively participate in the
interdisciplinary Environmental Sciences Program, which offers a Bachelor of Science degree.

### Field Trips

Field trips are integral parts of several courses in geoscience, with frequent weekend general-interest events. The geology of the Iowa City region is characterized by Quaternary glacial sediments on a largely Paleozoic sedimentary section a few hundred meters thick, overlying a Precambrian crystalline basement. Marine and terrestrial fossil assemblages, extensive reefs, and unique geode sites are located within a few hours’ drive. Numerous Pleistocene glaciations are represented in Iowa, and field studies of landforms, exposures, and cores continue to yield information on sedimentology, stratigraphy, soil formation, paleopedology, and fossil biotas from both glacial and interglacial deposits.

Spring break provides time for longer trips, which are open to all geoscience students. In recent years, students have traveled to the southern Appalachians, Arizona, Death Valley, the Florida Keys, Hawaii, New Mexico, the Ozarks, Puerto Rico, and Texas. Advanced classes have visited California, Colorado, Kansas, Oklahoma, Wisconsin, and Ontario, Canada.

### Geoscience Courses

Not all courses are offered every year.

#### Primarily for Undergraduates

<td></td>
</tr>
<tr>
<td>012:108</td>
<td>Introduction to Oceanography</td>
<td>2 s.h.</td>
</tr>
</tbody>
</table>
Descriptive, chemical, physical, biological, geological aspects of oceans; impact on weather, climate, shorelines, food supply, other aspects of civilization. Offered spring semesters. Recommended: knowledge of basic chemistry, biology, physics, earth science.

012:110 Introduction to Applied Remote Sensing 4 s.h.
Remote sensing of the earth's surface from aircraft, satellites; aerial photograph interpretation; remote sensing systems, methods, data analysis using electromagnetic spectrum and digital processing techniques, including visible, infrared, microwave radiation; remote sensing applied to geologic and environmental problems. Prerequisite: college physics or physical geology or equivalent. Same as 159:110.

012:113 Summer Field Course 6 s.h.
Description and mapping of rock units and geologic structures in the Wasatch and Uinta Mountains, Park City, Utah. Offered summer sessions. Prerequisites: 012:041, 012:052, 012:092, and 012:093.

012:114 Energy and the Environment 3 s.h.
Scientific concepts related to potentially significant energy sources of the 21st century; environmental impacts, positive and negative, of each energy source as well as geologic and geographical distributions and applications. Prerequisite: college earth science course or graduate standing or consent of instructor. GE: Natural Sciences.

012:116 Field Trip 2 s.h.
Field trip to an area of geologic interest, such as carbonate area of Florida, Grand Canyon (Arizona), Rio Grande Rift (New Mexico), Death Valley (California, Nevada), Appalachian Mountains (Virginia); preceded by weekly discussions of destination's geology. Offered spring semester. Prerequisite: consent of instructor.

012:119 Directed Study arr.
Special topics, independent research. Prerequisite: consent of instructor.

012:120 Collection Care and Management 3 s.h.
How a museum's management policy relates to its administrative, legal, and ethical obligations to its collections; acquisitions, deaccessions, collection use, data standards, storage environment, health, safety, documentation. Same as 024:120.

012:121 Principles of Paleontology 3 s.h.
Patterns of evolution in fossil record; species and analysis of their evolutionary relationships; paleoecology, paleocommunity evolution; evolutionary radiation and mass extinctions; large-scale relationships between biodiversity and climatic change. Offered fall semesters.

012:122 Evolution of the Vertebrates 3 s.h.
Evolutionary history of vertebrates revealed by fossils and information from living animals; biogeographic, stratigraphic, paleoecological aspects of selected groups, especially mammals and dinosaurs; transitions from aquatic to terrestrial life, origins of flight, major events in vertebrate history (including mass extinctions and explosive radiations). Prerequisite: introductory course in geoscience or bioscience.

012:126 Wetlands: Function, Geography, and Management 3 s.h.
Biotic aspects of water resources production; geographical basis of biophysical processes in drainage basins; spatial aspects of stream ecology; regional characterization of wetland structure and process. Prerequisite: 044:101 or 044:103. Same as 044:126.

012:130 Sedimentary Geology/Stratigraphy 3 s.h.
Basic concepts of sedimentology, stratigraphy, depositional environments, sedimentary petrology; hands-on analyses of sediments and sedimentary rocks, including thin-section petrography; lecture/laboratory. Offered spring semesters. Prerequisite: 012:041. Corequisite: 012:052.

012:136 Soil Genesis and Geomorphology 3 s.h.
Introduction to soil genesis, soil geomorphology, and classification including the basics of soil profile description and soil-landscape, soil-vegetation, and soil-climate relationships; emphasis on study of soils as the interface between living and non-living Earth systems and the role of soils in sustaining ecosystems and human societies; short field excursions and a weekend field trip. Prerequisites: college earth science and chemistry. Same as 044:186.

012:138 Fluvial Geomorphology 3 s.h.
Hydrologic principles, stream channel processes, and fluvial geomorphology within drainage basin systems; spatial and temporal variations in water distribution, analysis of hydrological data, flow mechanisms, sediment transport, forecasting procedures, hydrograph construction, modeling. Prerequisite: 012:102 or another 100-level geology or hydraulics course; or consent of instructor. Same as 053:128.

012:139 Integrated Watershed Analysis
3 s.h.
Integration of existing knowledge of physical, hydrological, and environmental processes with management issues and challenges in water resources and environmental management; aspects of water quantity and quality, water use and treatment; basin management issues related to forestry, agriculture, urbanization, floods, droughts.

012:140 Natural Hazards
3 s.h.
How earth-atmosphere-hydrosphere-space systems produce events catastrophic to humans on the scale of individual lives to civilizations; root causes of earthquakes, landslides, volcanic eruptions, floods, hurricanes, tsunami, tornadoes, and asteroid impact, and their local, national, and global impact; spatial and temporal occurrences of these hazards; methods and processes for hazard preparedness, response, and recovery; social, economic, and policy aspects that affect and compound the magnitude of disasters associated with natural phenomena; case studies drawn from contemporary and ancient societies. Prerequisite: 012:003 or 012:005 or 012:008 or 044:003 or 159:008. GE: Natural Sciences.

012:141 Analytical Methods
2 s.h.
Theory and practice of analyzing the chemical, isotopic, and mineralogical compositions of rocks, organic materials, and waters; use of modern analytical instruments. Offered spring semesters. Prerequisites: 004:007, 012:052, and 029:012 or 029:082.

012:142 Vertebrate Osteology and Phylogeny
3 s.h.
Anatomy of the vertebrate skeleton from developmental, functional, and phylogenetic perspectives; relationship between skeletal, muscular, and nervous systems; history of the skeleton through modern forms; lecture and laboratory. Prerequisite: 012:122 or 213:190 or consent of instructor.

012:144 Phylogenetics and Biodiversity
3 s.h.
Methods available for reconstructing evolutionary history and measuring biodiversity, including distance, parsimony, likelihood, and taxic approaches; applications to molecular and morphological systematics, historical biogeography, study of diversity through time. Prerequisites: 012:004 or 012:121, or 002:010 and 002:011, or consent of instructor.

012:145 Morphometrics
3 s.h.
Quantitative methods for collection and analysis of morphologic data, including 2-D and 3-D geometric morphometrics and use of multivariate statistical methods to study size and shape; applications of morphometric techniques to study development and its evolution, variation within and among species, morphologic disparity, related topics in paleontology and evolutionary biology. Prerequisite: 012:004 or 012:121 or consent of instructor.

012:146 Techniques in Paleontology
3 s.h.
Paleontological data acquisition and analysis, including Fossil collection, preparation, imaging, description; computerized data compilation, manipulation, analysis. Prerequisites: 002:010, and 002:011 or 012:004 or 012:121; or consent of instructor.

012:149 Elements of Geochemistry
3 s.h.
Introduction to application of chemical principles to solution of geologic problems concerning earth and environmental processes; origin of elements, chemical differentiation of Earth and the solar system, geochronology, application of radiogenic and stable isotopes, chemical equilibrium, elementary thermodynamics and kinetics, carbonate and silicate stability relationships, chemical weathering, adsorption, trace element behavior, oxidation-reduction reactions, characterization of surface and ground waters, and ocean chemistry. Prerequisites: 004:008 and 012:005, or consent of instructor.

012:152 Isotope Geochemistry
3 s.h.
Radiogenic and stable isotope systematics, applications to geological, cosmological, and environmental problems. Prerequisite: consent of instructor.

012:153 Geocomputing
1-3 s.h.
Computer applications in geoscience; visualization, data management, interactive modeling, computer graphics. Same as 159:153.
012:156 Scanning Electron Microscopy and X-Ray Microanalysis
Microscopy methods for research; all aspects of research, from sample preparation to imaging to data analysis; when to use a particular microscopy procedure; theory, operation, and application of scanning electron microscopy, scanning probe microscopy, laser scanning microscopy, X-ray microanalysis. Prerequisites: a physical science course and consent of instructor. Same as 052:156, 060:156.

012:160 Advanced Collection Care and Management
3 s.h.
Builds on 024:120; types of museum objects and materials, their care and management; care, storage, and use of paper, books, photographs, works of art, electronic information media, textiles, furniture, archaeological artifacts, natural history specimens, archives; digitization projects, integrated pest management, risk assessment, museum security, museum construction and renovation, grant writing; for students planning museum careers or for professions that require care of collections. Prerequisite: 012:120 or 024:120 or consent of instructor. Same as 024:140.

012:161 Stratigraphy
3 s.h.
Genesis of sedimentary rocks, geologic time, stratigraphic nomenclature, biostratigraphic and physical correlation methods, mass extinctions, seismic and sequence stratigraphy, basin analysis and modeling, stratigraphic field methods. Offered fall semesters. Prerequisite: 012:052 or consent of instructor.

012:162 Seismic Stratigraphy
1 s.h.
Display, processing, and interpretation of a 3-D reflection seismic data set from the Permian Basin, Tex., via standard petroleum-industry computer programs; advantages, drawbacks, and pitfalls of seismic data; how successful interpretation depends on integrating properly processed seismic data with well-log information and up-to-date geologic concepts of sedimentology and stratigraphy. Corequisite: 012:161 or consent of instructor.

012:166 Hydrogeology
3 s.h.
Water flow and contaminant transport in subsurface environment; basic principles and laws of physical, chemical, and biological processes in geological formations for sustainable development of groundwater resources; groundwater hydrology, regional aquifer systems, well hydraulics, aquifer tests, groundwater contamination and remediation, management and sustainability of groundwater resources. Prerequisite: senior or graduate standing.

012:170 Evolution of Ecosystems
3 s.h.
Evolutionary history of terrestrial and marine ecosystems; ecological processes from population to ecosystem levels; community assembly, trophic levels, networks, biodiversity dynamics; practical aspects of paleoecological data collection, statistical analysis, modeling. Prerequisites: two courses in geoscience, biology, environmental sciences, anthropology, or geography; or consent of instructor.

012:171 Evolution of Plants
3 s.h.
Evolutionary history of plants over geologic time: relationships, morphology, and fossil record of major plant lineages; patterns and processes in evolution of plant morphology and diversity; ecological innovations and evolution of terrestrial ecosystems; relationships between biotic and environmental change; paleobotanical tools in stratigraphy, paleoclimateology, sedimentology; practical aspects of paleobotanical data collection, statistical analysis, modeling; field trip. Prerequisites: two courses in geoscience, anthropology, biology, environmental science, or geography; or consent of instructor.

012:172 Glacial and Pleistocene Geology
3 s.h.
Introduction to glaciers and glacial and interglacial Earth systems; linkages among glacial, oceanic, and atmospheric systems and their effects on landscapes and biota over the past two million years; how oceans, atmosphere, and glaciers interact and landscape effects of past glacial and interglacial cycles. Prerequisite: physical geology or physical geography or anthropology.

012:173 Quaternary Environments
3 s.h.
Archaeological, botanical, zoological, physical, chemical means of reconstructing glacial and interglacial environments; techniques, results; interdisciplinary approach; field trips. Prerequisite: consent of instructor. Same as 044:183.

012:174 Seminar: Taphonomy
3 s.h.
Taphonomy (study of fossil record in paleontology and archaeology); processes for accumulation, modification, and deposition of remains in prehistory; instruction by archaeologist and paleontologist. Prerequisite: graduate standing or consent of instructor. Same as 113:174.
012:175 Mineral and Petroleum Exploration Geology 3 s.h.
Fundamentals of resource exploration philosophy and methods, with project-based presentation of techniques and strategies for mineral exploration and petroleum exploration; integration and evaluation of geological, geochemical, and geophysical techniques for mineral exploration; hydrocarbon systems and seismic interpretation for petroleum exploration. Corequisites: 012:052 and 012:092.

012:178 Applied Geostatistics 3 s.h.
Applications of geostatistical methods to geology, geography, hydrology, environmental sciences, and engineering; variogram, Kriging, analysis of spatial-varied data with varied computer software in participants' specialties. Same as 044:188.

012:179 Geology for Engineers 3 s.h.
Introduction to the concepts of geology, earth materials, and earth processes as they relate to civil and environmental engineering practice; physical properties of rock and soil, hydrogeology and biogeochemistry of groundwater aquifers, hydrological and watershed processes. Prerequisite: engineering sophomore standing. Same as 053:105.

012:180 Survey of Geophysical Methods 3 s.h.
Geophysical methods used to address geological and engineering problems (e.g., finding petroleum and mineral deposits, studying groundwater resources, tracing contaminant plumes, evaluating archaeological sites); methods including gravity, magnetics, radiometrics, refraction and reflection seismography, geophysical well logging, and geoelectrical methods (direct current, frequency- and time-domain electromagnetics, induced polarization, magnetic resonance surveying, ground-penetrating radar); capabilities, drawbacks, costs; planning and budgeting surveys, processing the resulting digital data. Prerequisite: introductory geology or physics.

012:184 Groundwater Modeling 3 s.h.
Groundwater flow and contaminant transport modeling; numerical methods, applications of groundwater modeling to water supply, groundwater resources evaluation, remediation design using software; GMS (MODFLOW, MODPATH, and MT3D). Prerequisites: 012:166 or 053:103, and 22M:026. Same as 053:104.

012:185 Approaches to Geoarchaeology 3 s.h.
Geoarchaeology as multidisciplinary contextual framework for human paleoecology; natural processes that create the archaeological record, approaches to reconstructing landscapes of the past as a context for archaeological deposits; weekend field trip. Prerequisite: 012:136 or 012:172 or 113:161 or 113:164 or consent of instructor. Same as 113:189.

012:186 Contaminant Hydrogeology 3 s.h.
Physical and chemical processes that govern mass transport, transformations, retardation, and attenuation of contaminants in groundwater; survey of sampling, monitoring, and groundwater remediation techniques; analytical and numerical solutions of equations using spreadsheets, computers. Same as 053:186.

012:188 Environmental Seminar 1 s.h.
Lectures on the environment by faculty members from the University, other colleges and universities, researchers and professionals from state and federal agencies.

012:189 Global Change Seminar 1-2 s.h.
Current global change issues, including climate change, ecosystem changes and conservation, energy; seminar format with student presentations.

012:190 Undergraduate Geoscience Colloquium 1-2 s.h.
Presentation and discussion of current research by undergraduates. Prerequisite: consent of instructor.

012:191 Geotectonics 3 s.h.
Dynamic processes responsible for crustal genesis, plate movements, mountain building; plate boundary zones; sedimentologic, structural, petrologic, geophysical characteristics of major tectonic settings; multidisciplinary approach; week-long field trip. Prerequisite: 012:092.

012:193 Sustainability Project arr.
Individual or group sustainability project supervised by a faculty member; regular meetings, data collection and interpretation, final project report. Prerequisite: consent of instructor.

012:194 Environmental Field Methods 3 s.h.
Integrated, comprehensive, field-based overview of environmental sampling concepts and methods for geoscience and hydroscience. Three weeks. Same as 159:194.

**012:196 Advanced Subsurface Hydrology** 3 s.h.
Basic and advanced concepts in subsurface fluid mechanics, well hydraulics, methods to characterize and model spatial variability, numerical modeling, and mathematical methods in hydrogeology. Prerequisite: 012:166 or engineering equivalent. Corequisites: 012:187 or 053:181, and 012:186 or 053:186. Same as 053:196.

**Primarily for Graduate Students**

**012:201 Geoscience Seminar Series** 1 s.h.
Scholarly work and research in geoscience. Repeatable.

**012:207 Geologic Orientation** 1 s.h.
Department degree requirements, programs; field survey of local geology; tips for TAs; introduction to specialized facilities; for new graduate students.

**012:210 Hydrogeology Seminar** 3 s.h.
Innovative experimental and modeling studies in hydrogeology; experimental need, design, mathematical formulation, assumptions, data collection techniques; data analysis and its importance to groundwater modeling. Prerequisite: 012:166 or consent of instructor. Same as 053:215.

**012:225 Paleontology Seminar** 1-3 s.h.

**012:233 Carbonate Petrology** 2 s.h.
Identification of constituents and interpretation of genesis, structures, environments of formation, and patterns and processes of diagenesis in limestones; laboratory-based. Prerequisite: familiarity with optical microscope and sedimentation principles.

**012:235 Depositional Environments** 3-4 s.h.
Modern patterns of sedimentation; emphasis on interpreting depositional environments of ancient sedimentary rocks and deciphering resulting stratigraphic patterns. Prerequisite: knowledge of basic sedimentary geology and paleontology.

**012:238 Process Geomorphology** 1-3 s.h.
Topics in process geomorphology ranging from fluvial dynamics to mass movement to sediment transport and related environmental processes. Repeatable. Prerequisite: consent of instructor.

**012:239 Advanced Watershed Analysis Seminar** 1-3 s.h.
Integration of existing knowledge of physical, hydrological, and environmental processes with management issues and challenges in water resources and environmental management; aspects of water quantity and quality, water use and treatment, and basin management issues related to forestry, agriculture, urbanization, floods, droughts. Repeatable.

**012:251 Igneous Petrology** 3 s.h.
Phase equilibria, isotope and trace element geochemistry, geochemical modeling; generation, differentiation of magmas in context of plate tectonic theory. Prerequisite: 012:052 or consent of instructor.

**012:253 Geochronology** 3 s.h.
How to evaluate published ages, and assumptions/errors involved; how to select and sample suitable materials for dating, and choose a suitable dating method and analytical technique; opportunity to develop skills for research and professional careers. Prerequisite: 012:149 or 012:152 or equivalent or consent of instructor.

**012:255 Metamorphic Petrology** 3 s.h.
Nature and origin of metamorphic rocks examined through thermodynamics, experimental data, geologic observations. Prerequisite: 012:052 or consent of instructor.

**012:257 Tectonics and Petrology Seminar** 1-2 s.h.
Topics in tectonics, structural geology, petrology. Repeatable. Prerequisite: consent of instructor.

012:293 Advanced Structural Geology 3 s.h.
Kinematic and dynamic analysis of deformed rocks; microstructural analysis; strain analysis, field investigations of highly deformed rocks. Repeatable. Prerequisite: 012:092 or consent of instructor.

012:310 Research: Geoscience arr.
Independent research related to theses or dissertations in geoscience. Repeatable.
The Department of German provides education in the language, literature, and culture traditionally designated as German, as expressed in the language and cultural heritage of Germany, Austria, and Switzerland. Its faculty members engage in research and teaching activities focused on German language, literature, and culture from both disciplinary and interdisciplinary perspectives. Graduate programs in German build on the department's strengths and those of other departments to provide strong, individualized graduate training. The department is committed to helping students identify and pursue their own historical and theoretical interests in the study of German language and literature. The Master of Arts provides for comprehensive study with a concentration in German literature or Germanic linguistics. The Doctor of Philosophy is highly flexible, allowing students to create their own program of literary, cultural, and linguistic studies. The department also offers courses approved for General Education in foreign languages, humanities, and foreign civilization and culture; language training for students in other graduate programs; and courses that meet the interdisciplinary needs of undergraduate and graduate students throughout the University.

University graduates with degrees in German frequently enter the teaching profession. They also find positions in government, foreign service, and commercial enterprise.

Undergraduate Programs

The department offers a Bachelor of Arts and a minor in German.

Bachelor of Arts

The Bachelor of Arts in German requires a minimum of 120 s.h., including at least 30 s.h. of work for the major. Students who plan to complete the undergraduate teaching major in German in conjunction with the College of Education should see "B.A. with Teacher Licensure" below.

Students must complete the College of Liberal Arts and Sciences General Education Program.

Students who begin a German major with no previous German language experience must complete the following course sequences or their equivalents.

013:011 Elementary German I  4 s.h.
013:012 Elementary German II  4 s.h.
013:021 Intermediate German I  4 s.h.
013:022 Intermediate German II  4 s.h.

This requirement also may be satisfied by various combinations of 013:013 Intensive Elementary German, 013:014 First-Year German Review, and 013:025 Intensive Intermediate German. However, 013:013 Intensive Elementary German and 013:014 First-Year German Review do not count toward the major in German.

The required 30 s.h. for the major must include at least five upper-level German courses taken at The University of Iowa. Students may count a maximum of two Department of German courses taught in English (prefix 13E) toward requirements for the major if they enroll in a section that includes a German language component. Note: 013:101 Introduction to German Literature is prerequisite to all other German literature courses.

013:101 Introduction to German Literature  3 s.h.
013:103 Composition and Conversation I  3 s.h.
013:104 Composition and Conversation II  3 s.h.
013:116 Advanced Composition and Conversation  3 s.h.

Linguistics--one of these:

013:107 Introduction to German Linguistics  3 s.h.
013:165 History of the German Language 3 s.h.

Culture—one of these:

013:105 German Cultural History 3 s.h.
013:115 Contemporary German Civilization 3 s.h.

Four 100-level electives offered by the Department of German.

German majors, both graduate and undergraduate, are urged to supplement their degree programs with relevant courses in areas such as German history, philosophy, and business.

B.A. with Teacher Licensure

German majors interested in licensure to teach in elementary and/or secondary schools must successfully complete the requirements for a major in German and must be admitted to the College of Education’s foreign language teacher education program. Several courses in the College of Education also are required, as is one semester of student teaching in the senior year. Contact the Department of Teaching and Learning for more details.

Students who plan to use a German minor to teach at the elementary and/or secondary level must contact the College of Education concerning requirements.

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan.

Before the third semester begins: language competency equal to first-year German and at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: language competency equal to second-year German and at least one-half of the semester hours required for graduation

Before the seventh semester begins: four courses in the major and at least three-quarters of the semester hours required for graduation

Before the eighth semester: two to three additional courses in the major

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Honors

Honors in German is open to exceptional students who are members of the University of Iowa Honors Program, which requires students to maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University of Iowa Honors Program for more information). To participate in honors in German, students must have completed three years of college-level German, or the equivalent, with a g.p.a. of at least 3.50 in upper-division German courses.

Participating students register for the following courses.

013:190 Honors Program in German 3 s.h.
013:191 Honors Research and Thesis 3 s.h.

Honors students are expected to engage in readings and discussions in German literature and culture and to write essays in German and English. Students meet with their faculty director of studies on a regular basis.

The program concludes with presentation of an honors thesis to a faculty committee of at least three members.

Minor

The minor in German requires a minimum of 15 s.h. in college-level German courses, including 12 s.h. in 100-level courses taken at The University of Iowa; however, students may count up to 6 s.h. earned in study abroad at a university in a German-speaking country toward the minor. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass.

All Department of German courses taught in German and numbered 013:100 and above count toward the minor. Students may count one German course taught in English (prefix 13E) toward the minor if they enroll in a section that includes a German language component.
Language for Nonmajors

The department offers a number of opportunities for students who wish to study German. Students who have had experience with the language should take the Foreign Language Placement Test in German online, offered by Evaluation and Examination Service. The test helps determine the level at which a student should begin German language study at The University of Iowa.

Students with no background in German should begin their study with 013:011 Elementary German I.

Students who wish to use German to complete the foreign language component of the General Education Program can choose from a number of course sequences. All of the following satisfy the requirement. Students are encouraged to talk with departmental advisors about the varied sequences.

013:013 Intensive Elementary German, 013:021 Intermediate German I, 013:022 Intermediate German II
013:011 Elementary German I, 013:012 Elementary German II, 013:021 Intermediate German I, 013:022 Intermediate German II
013:014 First-Year German Review, 013:021 Intermediate German I, 013:022 Intermediate German II
013:011 Elementary German I, 013:012 Elementary German II, 013:025 Intensive Intermediate German
013:013 Intensive Elementary German, 013:025 Intensive Intermediate German
013:014 First-Year German Review, 013:025 Intensive Intermediate German

Joint B.A./M.A.

The department offers a joint Bachelor of Arts/Master of Arts for undergraduate majors who plan to earn an M.A. in German. The program permits students to count 12 s.h. of appropriate course work toward both degrees and to enter advanced German courses while they are still undergraduates. It is designed to be completed in five years. Students in the program receive the B.A. when they have satisfied all requirements for the bachelor's degree, and they receive the M.A. when they have completed all master's degree requirements.

The joint B.A./M.A. is appropriate for students who enter the University from high school with advanced German language preparation. It is attractive to highly motivated students who plan to study abroad and who plan to pursue a Ph.D. in German or second language acquisition. It may serve as preparation for other programs, such as those related to international studies, library science, business with an international focus, or international relations. Students seeking careers in teaching or other fields may pursue the joint degree as a credential.

Joint program students must fulfill all requirements for the B.A. They ordinarily spend two semesters in their junior year enrolled in the study abroad program at the University of Freiburg, in Germany (see "Study Abroad" below) unless they have satisfied this requirement another way (e.g., a year abroad during high school or a study abroad program with similar content).

During the last two semesters of their senior year, they may take up to 12 s.h. of graduate-level courses, which may be counted toward both degrees, as follows: 6 s.h. may be counted toward the course requirements for the undergraduate German major, and 6 s.h. may be counted as undergraduate electives. Once they complete all B.A. requirements, they complete the remaining M.A. requirements.

Students must maintain an undergraduate German g.p.a. of at least 3.50; if they fail to meet this standard for more than one semester, they may be required to leave the program. They must have an overall undergraduate g.p.a. of at least 3.00 when they achieve graduate standing.

Applicants must be admitted to the joint program before the beginning of their seventh semester (senior year). They must be University of Iowa undergraduate students; must have completed 80 s.h. or be in the process of completing 90 s.h. of undergraduate work; and must have completed or be in the process of completing at least 21 s.h. of 100-level course work in the German major. They must have completed or be in the process of completing a study abroad program in a German-speaking country, or have satisfied this requirement another way. They also must have a g.p.a. of 3.50 when they apply to the program, or a letter from a Department of German faculty member recommending an exception.

Students pay undergraduate tuition and fees during their first semester in the joint program (normally their seventh semester); beginning with their second semester in the program (normally their eighth semester), they begin paying graduate tuition and fees. Students may hold a graduate appointment beginning with their second semester in the joint program.

Study Abroad

The Department of German participates in an academic year abroad program for undergraduates at the Albert-Ludwigs Universität in Freiburg, Germany. The Freiburg program is offered by a consortium made up of Michigan State University, The University of Iowa, The University of Michigan, and The University of Wisconsin-Madison.
Students arrive during the first week of September and participate in a four-week intensive language program. Then they take a blend of special program classes and regular German university courses. Organized field trips are designed to give students a broader perspective of German culture. Vacation periods permit extensive travel throughout Europe, and students are encouraged to use weekends for shorter trips in the region.

To apply, students must have reached at least junior standing by the beginning of the program, must have completed at least the first four semesters of college German or the equivalent, and must be in good academic standing at a U.S. college or university.

Students earn resident credit in all courses successfully completed in the program. They may count up to 21 s.h. earned at Freiburg toward the major in German. Credit also counts toward the minor in German. Students in other majors should consult with their advisor or their department's undergraduate director.

Contact the Department of German or the Office for Study Abroad for more information.

**Graduate Programs**

The department offers a Master of Arts in German, with and without thesis and with a literature or linguistics concentration; and a Doctor of Philosophy in German, with a literature, linguistics, or combined literature and linguistics concentration. It also offers a joint Bachelor of Arts/Master of Arts for advanced undergraduates; see "Joint B.A./M.A." earlier in this Catalog section.

Courses in the department are offered in two broad categories: German literature (e.g., 013:295 German Literature from Naturalism to Expressionism), and Germanic linguistics (e.g., 013:241 History of the German Language, 013:255 Semantics).

**Master of Arts**

The Master of Arts in German requires a minimum of 33 s.h. of graduate credit. It is offered with and without thesis.

M.A. students choose one of two concentrations: German literature and Germanic linguistics. The German literature concentration requires seven literature courses (21 s.h.) and four linguistics courses (12 s.h.). The Germanic linguistics concentration requires seven linguistics courses (21 s.h.) and four literature courses (12 s.h.).

M.A. students are expected to complete at least 24 s.h. in the Department of German. All M.A. course work taken outside the department requires the graduate advisor's approval.

**Graduate Language Tools: M.A.**

Before taking the M.A. exam, students must demonstrate reading knowledge of a foreign language other than German, at a level equivalent to two years of college study or four years of high school study.

Students may demonstrate competence by submitting proof that they have taken the required course work with a g.p.a. of at least 3.00, or by passing an exam at the fourth-semester college level as determined by the appropriate language department.

**Doctor of Philosophy**

The Doctor of Philosophy in German requires a minimum of 75 s.h. of graduate credit, including at least 27 s.h. in post-M.A. courses and a dissertation. No more than 12 s.h. of post-course-work dissertation credit may be counted toward the degree.

Ph.D. students choose one of three concentrations: German literature, Germanic linguistics, or combined literature and linguistics. In addition to satisfying the course requirements of their concentration, students must develop an independent research program that combines core and specialty areas within their concentration. These areas form the basis for the student's qualifying exam, comprehensive exam, and dissertation.

German literature students must complete five literature courses (15 s.h.) and must earn 12 s.h. of the required 27 s.h. in post-M.A. courses in the Department of German.

Germanic linguistics students must complete at least five linguistics courses (15 s.h.) and must earn 12 s.h. of the required 27 s.h. in post-M.A. courses in the Department of German.

Combined literature and linguistics students must complete at least five concentration area courses (15 s.h.) and must earn 21 s.h. of the required 27 s.h. in post-M.A. courses in the Department of German. They plan the balance of their courses with their advisory committee, generally taking four courses in their dissertation area.

All Ph.D. course work taken outside the department requires the graduate advisor's consent.
CORE AND SPECIALTY READING LISTS

By the end of their second semester in the Ph.D. program, students must have compiled a core area reading list and a specialty area reading list. The expectations for each list vary by concentration.

German Literature Concentration

The core area reading list for the literature concentration comprises 70-100 works that cover at least three genres from a distinct historical period of German literature. For sample reading lists, contact the Department of German.

The specialty area reading list for the literature concentration comprises approximately 40 works from a specific field of literary research: a genre, body of theory, major author(s), or second historical period.

Germanic Linguistics Concentration

The core area reading list for the linguistics concentration comprises lists one and two in all six areas of the Department of German linguistics reading list. Students also select one of the six areas as a specialty concentration for the qualifying exam and assemble a reading list of 10-20 titles from the relevant list three of the linguistics reading list. The linguistics reading list is available from the department's linguistics faculty members.

The specialty area reading list for the linguistics concentration comprises 10-20 titles from list three in one of the six areas of the Department of German linguistics reading list. The specialty list for the comprehensive exam must be in an area different from that for the core area of the qualifying exam.

Literature and Linguistics Concentration

The core area reading list for the combined literature and linguistics concentration comprises 35-50 works of literature in at least two genres from a specific literary period, and all titles from lists one and two in these areas of the Department of German linguistics reading list.

The specialty area reading list for the combined literature and linguistics concentration follows the guidelines for the linguistics or literature specialty area list, depending on the student's preference. The specialty area concentration must be distinct from that of the research paper: students who choose literature as the specialty area write a research paper that concerns linguistics, and those who choose linguistics as the specialty area write a research paper that concerns literature.

Graduate Language Tools: Ph.D.

Students must demonstrate a reading knowledge of two languages determined by the advisor to be pertinent to the student's research interests.

Students may demonstrate competence by submitting proof that they have taken the required course work with a g.p.a. of at least 3.00, or by passing an exam at the fourth-semester college level as determined by the appropriate language department.

QUALIFYING AND COMPREHENSIVE EXAMS

Students prepare five essay questions on the basis of their core area reading list, in consultation with their qualifying exam committee, which approves the final list. The committee selects three of the questions for the student to answer in writing on the exam. Approximately one week after the written exam, the committee and student convene for a one-hour oral exam based on the core area reading list and the student's written exam responses.

No later than two weeks before the oral exam, the student must submit two essays to the comprehensive exam committee. One is a review essay (10-15 pages) that analyzes key issues in a selection of works from the student's specialty area reading list, together with an annotated bibliography that covers titles from the reading list not addressed in the essay. The other is a research essay (25-35 pages) of publishable quality written in consultation with the comprehensive exam committee chair; the essay may be based on a seminar paper of exceptional quality or a potential chapter of the student's dissertation. The student takes a final two-hour oral examination focusing on the review essay and research paper, ordinarily during finals week. After the oral exam, the student produces a written dissertation prospectus for approval by the dissertation committee.

Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.
Financial Support

Teaching assistantships, research assistantships, and partial tuition scholarships are available for qualified graduate students. The department awards the Wilson and the Funke prizes to students of distinction.

Facilities

Students have the opportunity to improve their comprehension and command of German by working with recorded materials in the Language Media Center. They also may benefit from the multimedia courseware and digital video recordings from German television.

An extensive collection of works and periodicals in the University of Iowa Libraries facilitates research in all major areas of German literature and Germanic linguistics and at all levels of study.

The International Crossroads Community is an on-campus housing option for undergraduate and graduate students.

German Courses

Primarily for Undergraduates

013:011 Elementary German I 4 s.h.
Understanding and speaking "everyday German"; reading and writing skills; acquaintance with the German-speaking world through discussion, readings, videos. GE: Foreign Language First Level Proficiency.

013:012 Elementary German II 4 s.h.

013:013 Intensive Elementary German 4-6 s.h.
Elementary German I and II combined in one intensive course. GE: Foreign Language Second Level Proficiency.

013:014 First-Year German Review 5 s.h.
Accelerated course in preparation for third-semester German. Prerequisite: at least two years of high-school German. GE: Foreign Language Second Level Proficiency.

013:021 Intermediate German I 4 s.h.
Proficiency in spoken and written German; German-speaking cultures of central Europe, their historical background; emphasis on refinement of reading skills. Prerequisite: 013:012 or 013:014 or equivalent. GE: Foreign Language Second Level Proficiency.

013:022 Intermediate German II 4 s.h.
Continuation of 013:021. Prerequisite: 013:021 or equivalent. GE: Foreign Language Fourth Level Proficiency.

013:025 Intensive Intermediate German 4-6 s.h.
Intermediate German I and II combined in one intensive course. Prerequisite: 013:012 or 013:013 or 013:014 or equivalent. GE: Foreign Language Fourth Level Proficiency.

013:029 First-Year Seminar in German 1 s.h.
Opportunity to work closely with a faculty member on a topic the faculty member is researching or has expertise; introduction to the intellectual life of the German-speaking world and its presence at The University of Iowa.

For Undergraduate and Graduate Students

013:100 Individual German  arr.
Prerequisite: German major or minor or consent of instructor.

013:101 Introduction to German Literature 3 s.h.
Literary works from various genres. Taught in German. Prerequisite: 013:022 or equivalent.

013:103 Composition and Conversation I 3 s.h.

</table>
Survey of past 200 years of German short stories and novellas; definition of self against "other"; how narrative reinforces identity of self and delineates difference through conflict, terms in which narrative define self (e.g., moral, psychological, sexual, historical, cultural, political), how it stimulates process of reader identification; how narrative complicates or undermine categories of self and other, sameness and difference; Ludwig Tieck, E.T.A. Hoffmann, Heinrich von Kleist, Gottfried Keller, Thomas Mann, Arthur Schnitzler, Franz Kafka, Ingeborg Bachmann. Taught in German. Corequisite: 013:101 or equivalent.

013:145 Twentieth-Century Literary History in Scenes/Stories 3 s.h.
Short texts of all genres reflecting on the vast historical changes (especially World War I, Third Reich) in 20th-century Germany. Prerequisite: 013:101 or equivalent.

013:150 Beautiful Souls and Scandalous Writing 3 s.h.
Varied works of and about the 18th century; fairy tales, plays, short novels, poems, and other texts by authors such as Lichtenberg, Goethe, Naubert, Schiller, Schlegel, Sueskind; gender roles ascribed to women and men. Prerequisite: 013:101.

013:151 New Literature and Film from Switzerland 3 s.h.
New directions in Swiss literature and film of late 20th and early 21st centuries; genres, authors, and works including youth fiction and biographical fiction by Eveline Hasler, Gabrielle Aloith, or Corinne Hofmann, a novel by Zoe Jenny, detective fiction by Hansjörg Schneider, popular fiction by Milena Moser; Swiss identity, social and economic issues, migration and immigration, literary works on film, travels to faraway places and times, crosscultural love stories, mystery. Taught in German. Prerequisite: 013:101 or equivalent.

013:165 History of the German Language 3 s.h.
History of the German language; its Indo-European roots, important characteristics of the language's major periods. Prerequisite: 013:101 or 013:103 or 013:104 or equivalent.

013:190 Honors Program in German 3 s.h.
Individual work in literature, linguistics, and culture. Prerequisites: three years of college-level German or equivalent, and a g.p.a. of at least 3.50 in German.

013:191 Honors Research and Thesis 3 s.h.
Prerequisites: 013:190, honors standing, and consent of instructor.

013:198 Undergraduate Special Topics 3 s.h.

013:199 German Graduation Portfolio 0 s.h.
Submission of previous course work and language proficiency scores as a part of the departmental outcomes assessment.

German for Graduate Nonmajors

Graduate students not pursuing a degree in German also may take 013:013 Intensive Elementary German and 013:025 Intensive Intermediate German; see "For Undergraduate and Graduate Students," above.

013:128 German Reading for Graduate Students 4 s.h.
Grammar review, vocabulary building, extensive reading of sophisticated texts. Offered spring semesters. Prerequisites: 013:012 or 013:013 or 013:014 or equivalent, and non-German graduate standing.

For Graduate Students

013:200 Advanced Studies arr.
Special problems in German literature and linguistics. Repeatable. Prerequisite: German graduate standing.

013:220 The German Novel 3 s.h.
Representative works of German fiction from 17th century to present; historical development of the genre, importance of each work for its period. Repeatable.
013:221 Principles of Teaching and Learning Foreign Languages  
Prerequisite: consent of instructor. Same as 009:234, 039:234, 041:234.

013:224 The German Drama  
Repeatable.

013:241 History of the German Language  
Same as 103:231.

013:243 Early German Theater  
Development of German drama from the 10th to 18th century, beginning with Hrotsvitha of Gandersheim and ending with Johann Christoph Gottsched; the place of theater in contemporary society; the function of religious (passion) and secular (carnival) plays for the late medieval urban community; the role of Protestant plays in spreading religious reform; the purpose of court performance during the Baroque.

013:253 Multimedia and Second Language Acquisition  
Foreign language multimedia in the context of current second language acquisition theories and research; readings on interactivity, interface design, feedback, learner control, and acquisition of vocabulary, grammar, and culture; multimedia development project. Prerequisite: foreign language teaching methodology course or consent of instructor. Same as 009:238, 035:212, 164:211.

013:254 Advanced CALL Curriculum Development  
Advanced instruction in a variety of software and hardware tools for development of multimedia computer-assisted language learning (CALL) courseware; students develop software for a General Education Program or third-year language course in collaboration with course supervisor. Prerequisite: 164:212. Same as 009:239, 035:214, 164:214.

013:255 Semantics  
Meaning in natural language, with focus on German; lexical semantics (sense relations, semantic fields, componential analysis), modality, temporal and spatial deixis, aspect. Same as 164:298.

013:256 Modern German Syntax  
Analysis of syntax within a generative framework.

013:257 Morphology  
Word structure and formation in Modern German; inflection, derivation, compounding.

013:258 Modern German Phonetics and Phonology  
The sounds and sound system of Modern Standard German.

013:259 Grammar in Second Language Teaching/Learning  

013:260 Crossing Borders Proseminar  

013:262 Crossing Borders Seminar  

013:283 The Age of Goethe  
Storm and Stress (Goethe, Schiller, Klinger, Lenz) and the Weimar classicism (1794-1805) of Goethe and Schiller; interdependence of movements and their theoretical basis (Herder, Winckelmann) vis-à-vis representative works.

013:295 German Literature from Naturalism to Expressionism  

013:298 Special Topics in German Literature  
Repeatable. Prerequisite: German graduate standing. Same as 048:298.

13E:151 New Literature and Film from Switzerland: Beyond Heidi and Lucerne

New directions in current Swiss literature and film; recent developments in Swiss society, both in Europe and globally; Swiss-German literature as unique, and as part of German literature.
Global Health Studies

**Director:** Christopher Squier  
**Undergraduate nondegree programs:** Minor, Certificate in Global Health Studies  
**Graduate nondegree program:** Certificate in Global Health Studies  
**Web site:** [http://international.uiowa.edu/centers/global-health/default.asp](http://international.uiowa.edu/centers/global-health/default.asp)

The Global Health Studies Program examines how dynamic processes of change affect health worldwide. It views health issues and health care in developing and developed countries, including the United States, in light of themes, processes, and institutions that influence health and disease. Among these are technology, culture, politics, religion, legal structure, history, and economy.

The Global Health Studies Program emphasizes career and vocational aspects of global health work. It provides an understanding of related phenomena, such as infections and chronic diseases, fitness and longevity, climate change and natural disasters, environmental hazards, use of illicit and proprietary drugs, interventions against violence, war and injuries, new biomedical technologies, reproductive health and family planning, links between health and human rights, health care services and insurance programs, and non-Western health cultures and alternative therapies.

It also promotes an institutional focus that enables students and faculty members from different departments, colleges, and disciplines University-wide to meet on the common ground of their shared interests in global health issues.

The program attracts undergraduate, graduate, and professional students from a wide range of disciplines: public health, health and pre-health sciences, health economics, nursing, social sciences, environmental engineering, anthropology, history, law, business, journalism, social work, and education.

The program offers the Certificate in Global Health Studies for undergraduate and graduate students and a minor in global health studies for undergraduates.

**Certificate**

The Certificate in Global Health Studies requires 25 s.h. and is open to undergraduate and graduate students. It requires core courses, electives, and health or environmental health-related research, usually in a foreign country. Courses may be chosen from those offered by the Global Health Studies Program (see "Courses" below) and by other departments and programs (see "Approved Electives"). Students may be granted credit toward the certificate for course work they completed up to two years before beginning the program.

Students must maintain a g.p.a. of 3.00 or higher in work for the certificate.

To enter the program, students must already be enrolled at The University of Iowa. To apply, they must complete the certificate program application form, available from the Global Health Studies Program office.

Certificate requirements are as follows.

**CORE COURSES**

Students complete the following.

- 152:111/173:111/175:111 International Health  
- 152:150 Research Design in Global Health (may be repeated for elective credit)  
- 152:151 Proseminar in Global Health  
- 152:152 Global Health Conference (may be repeated for elective credit)

**ELECTIVES**

Students complete 17 s.h. of approved electives, including at least 9 s.h. in residence at The University of Iowa. Students may petition to take courses not on the approved list (see "Courses" and "Approved Electives"), providing they can show that the courses include substantial material related to global health. Contact the Global Health Studies Program for details.

**FOREIGN STUDY OR RESEARCH**

Students must complete a study or research project of six to eight weeks duration, typically in a foreign setting but under some circumstances in the United States. They may develop and conduct a research project, participate in a health-related study abroad program, assist a faculty member with research, or complete an internship on a global/environmental health issue.

Projects require approval by the Global Health Studies Program steering committee and must be supervised by a
faculty member. Students may apply up to 8 s.h. of academic credit for research or internship experiences to the elective requirement.

Financial support may be available for some projects. Contact the Global Health Studies Program.

Foreign Language Study

Students should complete four semesters of modern language study or course work that fulfills or is equivalent to the College of Liberal Arts and Sciences General Education Program foreign language component. This certificate requirement can be waived for students whose first language is not English.

The Global Health Studies Program steering committee may require students to take additional language study in preparation for a research or internship program. Students interested in learning an infrequently taught language to facilitate their participation in a foreign experience should investigate the Autonomous Language Learning Network (ALLNET) of International Programs.

Unless foreign language course work is integral to a study abroad program, it may not count toward the 25 s.h. required for the certificate.

Public Presentation

During the semester following the foreign experience, students present their foreign research project results to a special session of 152:150 Research Design in Global Health or to an equivalent public forum, such as a departmental seminar. Students also must submit a two- to three-page project report summarizing their research, study abroad, or internship experiences.

Approved Electives

In addition to courses offered by the Global Health Studies Program (see "Courses"), students may use the following courses to complete requirements for the certificate or minor.

Aging Studies

153:108 Basic Aspects of Aging 3 s.h.

Anthropology

113:133 The Anthropology of Women's Health 3 s.h.
113:136 Applied Anthropology (when topic is environmental and community health) 3 s.h.

Community and Behavioral Health

172:130 Social Determinants of Health 3 s.h.
172:150 Health Behavior and Health Education 3 s.h.

Economics

06E:113 Health Economics 3 s.h.

Education

07B:195 Research in Cross-Cultural Settings 3 s.h.

History

16W:140 Disease, Politics, and Health in South Asia 3 s.h.

Literature, Science, and the Arts

033:153 Hard Cases: Science Policy and Values (when topic is health related) 3 s.h.
Minor

The minor in global health studies requires a minimum of 15 s.h., including 12 s.h. in advanced courses taken at The University of Iowa. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass.

The minor is interdisciplinary, designed for undergraduates who wish to study health issues in a global context. It draws on a set of courses offered by the Global Health Studies Program and the Departments of Anthropology, Economics, Geography, History, Sociology, and Psychology; the Program in Literature, Science, and the Arts; and the Colleges of Engineering, Law, Nursing, and Public Health, and the Carver College of Medicine.

Students may choose from those offered by the Global Health Studies Program (see "Courses") or by other departments and programs (see "Approved Electives"). They should choose course work from at least two different disciplines and are strongly encouraged to include a core course from those listed under requirements for the certificate. A period of study abroad focused on global health issues is highly recommended.

Each student's plan of study for the minor is developed according to the student's interests and in consultation with a program advisor.

Activities and Resources

The Global Health Studies Program organizes both on-campus and international activities and research opportunities for students and faculty members, enabling them to become acquainted with major global health issues. Several scholarships, academic fellowships, international fellowships, and research and study abroad programs supplement the global health studies certificate program. These are sponsored by the University and a variety of agencies. Contact the Global Health Studies Program for details.

Global Health Studies Courses

152:111 International Health
Urgent health problems in the developing world and among disadvantaged populations in developed countries; biological, social, cultural, political aspects of international health problems; applications of research methods from epidemiology, environmental health, social sciences. Same as 173:111, 175:111.

152:112 Global Environmental Health Policy

152:120 Global Health and Human Rights
Prerequisite: junior or senior standing or consent of instructor.

152:121 Health of Indigenous Peoples
Health problems and services for indigenous populations worldwide, from perspective of Fourth World postcolonial politics. Prerequisite: 113:003 or 113:010 or consent of instructor. Same as 113:121, 149:121.

History and theory of insurance, comparative health systems, health systems and networks, HMOs, public health insurance, care for uninsured; emphasis on public policy. Prerequisites: 046:263 or 174:212 or equivalent health economics course, and 174:200 or equivalent U.S. health care system course; or consent of instructor. Same as 174:217.

152:252 Environmental Health Policy 3 s.h.
Major concerns in environment and human health, legislation enacted to deal with these concerns; emphasis on contemporary issues. Offered fall semesters of odd years. Prerequisite: (for 175:252) 175:197 or consent of instructor. Prerequisite: (for 053:204) 053:050. Same as 053:204, 175:252.

152:257 Epidemiology of Infectious Diseases 3 s.h.
Underlying epidemiological concepts of infection disease, including causation and surveillance; prevention and control; case studies. Offered fall semesters. Prerequisite: 173:140 or equivalent. Same as 173:255.
The Department of Health and Sport Studies offers programs of study at the undergraduate and graduate level that focus on health, sport, and physical activity as they are influenced by cultural, psychological, and behavioral factors. Graduates work in teaching, research, coaching, health promotion, and sport-related programs.

The department also houses the Health and Physical Activity Skills Program (formerly the Physical Education Skills Program). The Health and Physical Activity Skills Program offers courses that provide instruction and practice in lifetime sports, fitness training, and wellness activities aimed at enhancing physical health and well-being. Health and physical activity skills courses are approved in the health and physical activity area of the General Education Program.

Undergraduate Programs

The department offers a Bachelor of Arts in health and sport studies, with two tracks: health promotion and sport studies. It also offers a minor in health and sport studies.

The undergraduate major in health and sport studies provides students with learning experiences in the promotion of health and the historical and cultural context of sport and physical activity.

Admission to the major is selective.

Bachelor of Arts

The Bachelor of Arts in health and sport studies requires a minimum of 120 s.h., including work for the major, which varies by track. The health promotion track requires 43-50 s.h. of work for the major; the sport studies track requires 45 s.h. of work for the major.

All students majoring in health and sport studies complete the HSS foundation courses and requirements specific to each track; students should complete the foundation courses as early as possible. At least half of all credit in the major must be earned in residence at The University of Iowa. Students must complete the College of Liberal Arts and Sciences General Education Program.

Admission to health and sport studies is selective; students must apply for and be admitted to the major.

Admission and curriculum requirements for each track are listed under "Health Promotion Track" and "Sport Studies Track" below.

Health Promotion Track

Health promotion is a developing discipline committed to improving the health and quality of life of individuals and communities. Health promotion practitioners assess, plan, implement, and evaluate programs that increase health-enhancing behaviors, decrease health risk behaviors, and create environments that support healthy lifestyles.

The health promotion track integrates the theory and applied study of health education with the biological, behavioral, and social factors that affect health. Its content emphases include exercise prescription, active living, dietary assessment, and healthy eating. The curriculum blends natural science and social science approaches to focus on empowering individuals and building healthy communities through changes in lifestyle and the environment.

Community and clinical practicum experiences give students the opportunity to apply health promotion concepts and skills. Supervised capstone internships are available in a variety of organizational settings, both nationally and internationally.

Health promotion courses address certification competencies of the most prestigious national health promotion organizations. Certification competencies include the American College of Sports Medicine (ACSM) Health Fitness Instructor and the ACSM Personal Trainer; the National Strength and Conditioning Association (NSCA)--Certified Strength and Conditioning Specialist; and the National Commission for Health Education Credentialing Certified Health
Education Specialist (CHES).

Health promotion track graduates have a strong foundation for a variety of careers. They are prepared for health promotion positions in hospital- and corporate-based wellness programs, nonprofit health agencies, commercial fitness enterprises, municipal recreation programs, and federal and state health promotion agencies. Employment opportunities in these sectors have been good to excellent and are projected to increase according to the U.S. Department of Labor. The curriculum's rigor also prepares students for graduate study in other academic disciplines, including public health, and provides excellent preparation for professional study in health professions such as physical therapy and occupational therapy.

Students must apply for admission to the health promotion track. Applicants must have completed a minimum of 24 s.h. at The University of Iowa, including the prerequisite courses for admission listed below; transfer students must have completed a minimum of 12 s.h. at The University of Iowa and must have completed the same prerequisite course work in chemistry, biology, anatomy, and statistics.

Applicants to the health promotion track must have a cumulative g.p.a. of at least 2.70 and a University of Iowa g.p.a. of at least 2.70; having the required grade-point average does not guarantee admission to the track. Students with a cumulative or University of Iowa g.p.a. lower than 2.70 may apply for exceptional admission.

The following courses are prerequisites for admission to the health promotion track. The department determines whether to accept equivalent or higher-level courses that address the same content areas.

Biology—one of these:

- 002:002 Introductory Animal Biology 4 s.h.
- 002:010 Principles of Biology I 4 s.h.
- 002:021 Human Biology 4 s.h.

Chemistry—two of these:

- 004:007 General Chemistry I 3 s.h.
- 004:011 Principles of Chemistry I 4 s.h.
- 004:008 General Chemistry II 3 s.h.
- 004:012 Principles of Chemistry II 4 s.h.

Statistics/mathematics—one of these:

- 22S:008 Statistics for Business 4 s.h.
- 22S:025 Elementary Statistics and Inference 3 s.h.
- 22S:030 Statistical Methods and Computing 3 s.h.
- 22S:039 Probability and Statistics for the Engineering and Physical Sciences 3 s.h.
- 22S:101 Biostatistics 3 s.h.
- 22S:102 Introduction to Statistical Methods 3 s.h.
- 22S:120 Probability and Statistics 4 s.h.
- 22M:015 Mathematics for the Biological Sciences 4 s.h.
- 22M:016 Calculus for the Biological Sciences 4 s.h.
- 22M:017 Calculus and Matrix Algebra for Business 4 s.h.
- 22M:025 Calculus I 4 s.h.
- 22M:026 Calculus II 4 s.h.
- 171:161 Introduction to Biostatistics 3 s.h.

Anatomy—one of these:

- 027:053 Human Anatomy 3 s.h.
- 027:150 Gross Anatomy for Integrative Physiology 3 s.h.
- 060:113 Human Anatomy Online 4 s.h.
- 060:110 Principles of Human Anatomy 3 s.h.
Students must complete the application form for the health promotion track, available on the Department of Health and Sport Studies website (see Undergraduate Programs). Applications must be submitted to the director of undergraduate studies by October 15 for admission the following spring semester or by March 15 for admission the following fall semester.

Once students are admitted to the health promotion track, they should plan on at least three semesters of study to complete the requirements for the major.

Because health promotion is a highly interdisciplinary field, students are encouraged to pursue concentrated study in another area. They may earn one or more minors, a second major, or a certificate; or they may complete a cluster of courses related to study in a professional health program. Examples of minors and second majors related to health promotion include psychology, sociology, biology, integrative physiology, geography, and Spanish. Related certificates include the Certificate in Entrepreneurial Management, the Certificate in Aging Studies, and the Certificate in Global Health Studies.

Course work for the major in health and sport studies with health promotion track includes HSS foundation courses, the health promotion core, approved electives, and an internship option.

Students select approved elective courses in specialized content areas such as stress management, tobacco and alcohol, health communications, facility-based management, small business management, aging studies, and global health studies. These content areas allow students to tailor their health promotion program to specific interests and career paths.

The internship option is a capstone experience that provides students with community and clinical practicum experiences, giving them additional opportunities to apply health promotion concepts and skills. Supervised academic internships are available in a variety of organizational settings, both nationally and internationally.

The major in health and sport studies with health promotion track requires the following course work.

**HSS FOUNDATION COURSES**

Students should complete the HSS foundation courses as early as possible; all three are required (9 s.h.).

- 028:036 Physical Activity Through the Life Span 3 s.h.
- 028:074 Inequality in Sport 3 s.h.
- 028:076 Psychological Aspects of Sport and Physical Activity 3 s.h.

Once a student has declared a major in health and sport studies, he or she may not use Guided Independent Study courses to meet the HSS foundation course requirement. Once a transfer student has declared a major in health and sport studies, he or she may not use a course previously completed at another institution to meet the HSS foundation course requirement, unless a substitution is granted. Students who wish to substitute a transfer course for an HSS foundation course must complete a Request for Substitution of Courses form, available at the department office. Substitutions are granted only on the basis of course content duplication.

**HEALTH PROMOTION: CORE**

All of these (22 s.h.):

- 027:140 Exercise Physiology for Practitioners 3 s.h.
- 028:038 Understanding Food and Nutrition 3 s.h.
- 028:075 Health in Everyday Life 3 s.h.
- 028:138 Exercise Testing and Prescription 4 s.h.
- 028:141 Health Promotion Theory and Practice 3 s.h.
- 028:142 Worksite Health Promotion 3 s.h.
- 028:145 Health Promotion Processes 3 s.h.

**HEALTH PROMOTION: ELECTIVES**

Students complete 12 s.h. selected from the following list of approved electives; or they complete the internship option, which consists of 6 s.h. chosen from the following list plus 028:190 Preinternship Seminar and 028:191 Internship. In order to be eligible for an internship, students must earn a grade of C-minus or higher in each of their health promotion core and elective courses.
06T:120 Entrepreneurship and Innovation 3 s.h.
07C:130 Human Sexuality 3 s.h.
07C:185 Introduction to Substance Abuse 3 s.h.
028:020 Alcohol and Your College Experience 1 s.h.
028:021 Tobacco and Your College Experience 1 s.h.
028:022 Resiliency and Your College Experience 1 s.h.
028:023 Food and Your College Experience 1 s.h.
028:030 Principles of an Exercise Class 2 s.h.
028:031 Health-Related Muscular Fitness 2 s.h.
028:077 Understanding Peak Performance in Sport 2 s.h.
028:132 Fitness/Sport Nutrition 3 s.h.
028:133 Nutrition Through the Life Span 3 s.h.
028:134 Nutrition Intervention 3 s.h.
028:135 Global Health and Global Food 3 s.h.
028:143 Communicating Health and Physical Activity 3 s.h.
028:144 Peer Health Education 2 s.h.
028:147 Promoting Health Globally 2 s.h.
028:148 Practicum in Health Promotion 1-2 s.h.
028:166 Exercise for Special Populations 1 s.h.
028:174 Understanding Stress and Coping 3 s.h.
028:190 Preinternship Seminar (may be taken as an elective if not completing the internship option) 1 s.h.
028:194 Honors Readings 1-2 s.h.
028:195 Honors Problems 3-4 s.h.
071:120 Drugs: Their Nature, Action, and Use 2 s.h.
071:130 Drug Mechanisms and Actions 3 s.h.
152:152 Global Health Conference 1 s.h.
152:160 Global Health Seminar 3 s.h.

Health Promotion: Internship Option

Courses chosen from the preceding list of electives above 6 s.h.
028:190 Preinternship Seminar 1 s.h.
028:191 Internship 1 s.h.

Sport Studies Track

The sport studies track is for students who want to examine sport in its historical and contemporary cultural contexts. Course work in history, sociology, and psychology of sport and physical activity provides students with the critical skills necessary to understand sport as a significant aspect of cultural life. Sport's interactions with educational institutions, the media, the economy, and the political system are examined critically. The sport studies track also explores race, class, and gender differences in the sport experience.

Many students use their experience in the program to prepare for graduate school. For others, the required second concentration area or minor serves as an introduction to careers in a number of fields, such as sport journalism and athletic administration.

Students must apply for admission to the sport studies track. Applicants must have completed a minimum of 24 s.h. of course work, including 12 s.h. at The University of Iowa. They must have a cumulative g.p.a. of at least 2.50 and a University of Iowa g.p.a. of at least 2.50. They also must have satisfactorily completed 028:074 Inequality in Sport.

Applicants must complete the application form for the sport studies track, available on the Department of Health and Sport Studies web site (see Undergraduate Programs). They must submit a personal statement (one or two pages, typed, double-spaced), detailing the applicant's interest in the health and sport studies major and in the sport studies track.

Applications must be submitted to the director of undergraduate studies by October 15 for admission the following spring semester or by March 15 for admission the following fall semester.

Applications may be submitted during the semester in which the student completes the number of semester hours and/or the prerequisite course work required for admission to the track. In such cases, admission decisions are pending until the work in progress is completed.

Applicants who have a cumulative g.p.a. of 2.80 or above and who meet all other admission criteria are admitted to the
track, but they must complete the application process.

Students who believe they qualify for exceptional admission should submit a written appeal and any other supporting documentation or evidence that may be relevant to their appeal for admission to the sport studies track.

Course work for the major in health and sport studies with sport studies track includes HSS foundation courses, the sport studies core (one course from each of four content areas), approved electives, and a second concentration area or a minor. Requirements are as follows.

**HSS FOUNDATION COURSES**

Students should complete the HSS foundation courses as early as possible; all three are required (9 s.h.).

<table>

SPORT STUDIES: ELECTIVES

Students must complete at least 9 s.h. of approved elective courses offered by the Department of Health and Sport Studies. Courses from the following list and courses that were not used to fulfill the sports studies core, above, are recommended.

- 028:077 Understanding Peak Performance in Sport 2 s.h.
- 028:143 Communicating Health and Physical Activity 3 s.h.
- 028:147 Promoting Health Globally 2 s.h.
- 028:174 Understanding Stress and Coping 3 s.h.
- 028:180 Theory and Ethics of Coaching 3 s.h.
- 028:193 Independent Study arr.
- 028:194 Honors Readings 1-2 s.h.
- 028:195 Honors Problems 3-4 s.h.

Sport Studies: CONCENTRATION or Minor

Students in the sport studies track must complete a concentration in an area, program, or department outside health and sport studies (e.g., American studies, women’s studies, the Tippie College of Business, journalism and mass communication). The concentration requires 15 s.h. including 6 s.h. earned in 100-level courses or lower-level courses that are designated as advanced-level courses by the department or program that offers them. Students must select the concentration area in consultation with their advisor, and they must have their advisor’s written approval of the concentration. Courses taken for the concentration may not be taken pass/nonpass.

Students may elect to satisfy the concentration requirement by earning a minor in another discipline. It is the student’s responsibility to ensure that he or she has satisfied the requirements for the minor.

B.A. with Coaching Authorization or Endorsement

Individuals who seek athletic coaching certification in the State of Iowa must complete requirements set by the Iowa Board of Educational Examiners. The coaching authorization credential is open to all eligible persons who have completed the required course work. The coaching endorsement credential is available only to teachers. Courses that satisfy the required course work for both coaching authorization and coaching endorsement include the following.

- 027:053 Human Anatomy 3 s.h.
- 027:057 Basic Athletic Training 3 s.h.
- 027:117 Human Growth and Motor Development 3 s.h.
- 028:180 Theory and Ethics of Coaching 3 s.h.

Students should take 027:053 Human Anatomy and obtain first-aid certification before they take 027:057 Basic Athletic Training.

The following courses are highly recommended, but not required.

- 027:056 First Aid and CPR 2 s.h.
- 027:140 Exercise Physiology for Practitioners 3 s.h.

In addition, it is highly recommended that students obtain practical coaching experience. Such experience may be available through local public and private schools, recreation departments, and community groups.

For more information about coaching authorization or endorsement credentials, visit the Iowa Board of Educational Examiners web site.

Four-Year Graduation Plan

The Four-Year Graduation Plan is not available for the health and sport studies major. Students should work with their advisors to develop an individual graduation plan.

Honors

The Department of Health and Sport Studies is committed to offering high-quality academic opportunities to students.
One of those opportunities is honors study in the discipline. In order to graduate with honors in health and sport studies, students must go beyond the basic requirements of the major to demonstrate advanced understanding and skill development in sport, physical activity, and health promotion. They also must be members of the University of Iowa Honors Program.

Students must meet the following requirements in order to graduate with honors:

- maintain a g.p.a. of at least 3.33 in all University of Iowa and health and sport studies course work;
- successfully complete a health and sport studies honors designation course, research practicum, teaching practicum, or service learning course;
- successfully complete 028:194 Honors Readings (1-2 s.h.) under the supervision of a health and sport studies faculty member;
- successfully complete 028:195 Honors Problems (3-4 s.h.) under the supervision of a health and sport studies faculty member; in this course, students write an honors thesis, usually based on original research or creative work; and
- make an oral or poster presentation of the honors thesis in an approved venue, such as a department research seminar or a professional conference.

**Minor**

The minor in health and sport studies requires a minimum of 15 s.h. in courses offered by the University of Iowa Department of Health and Sport Studies with prefix 028, including 6 s.h. in 100-level courses. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass. Students select courses for the minor according to their interests and the recommendation of the undergraduate coordinator.

**Graduate Programs**

The department offers a Master of Arts and a Doctor of Philosophy in health and sport studies, both with two specialization areas: psychology of sport and physical activity, and sport studies. The department's graduate programs feature an interdisciplinary and multidisciplinary approach to curriculum and scholarship.

The psychology of sport and physical activity specialization integrates examination of the psychosocial aspects of participation in sport and physical activity with analysis of the health consequences of a sedentary lifestyle. The sport studies specialization takes a critical cultural studies approach to understanding sport in its historical and contemporary contexts.

**Master of Arts**

The Master of Arts in health and sport studies requires a minimum of 37 s.h. of graduate credit. The thesis option requires 31 s.h. of course work and 6 s.h. of thesis credit; the nonthesis option requires 37 s.h. of course work. The program offers specialization areas in psychology of sport and physical activity, and sport studies. Students in the psychology of sport and physical activity specialization may choose an emphasis in sport psychology or health promotion. The sport studies program focuses on cultural studies and the history of sport.

All M.A. students must complete a group of foundation courses, supplemented with work in their specialization area.

</tr>
</tbody>
</table>

**Psychology of Sport and Physical Activity Specialization**

The psychology of sport and physical activity specialization focuses on the dynamic interaction of psychological, cultural, and behavioral processes that inform and explain behavior in sport, health, and physical activity. The curriculum integrates the psychosocial aspects of participation in sport and physical activity with an analysis of the health consequences of a sedentary lifestyle.

In addition to providing a theoretical framework for understanding sport and health-related behavior, the specialization provides students with an opportunity to develop skills in exercise prescription and assessment, dietary assessment, and stress management. Practicums are available at the University of Iowa Student Health Service, University of Iowa
Hospitals and Clinics, Johnson County Public Health, and local community agencies.

Graduates go on to doctoral programs in sport, health, or associated fields, or they enter health promotion, athletic, or sport professions in government, nonprofit organizations, and business.

**Sport Studies Specialization**

Sport studies is an interdisciplinary program that draws on the insights of history, sociology, philosophy, and psychology to produce analyses of health, sport, and physical activity. Students supplement departmental course work with courses in other departments, such as American studies, African American studies, communication studies, women's studies, history, psychology, sociology, and business. Most graduates go on to doctoral study in cultural studies of sport or history of sport. The M.A. program also provides excellent theoretical grounding for doctoral work in athletic administration, sport management, or law.

**Doctor of Philosophy**

The Doctor of Philosophy in health and sport studies requires a minimum of 72 s.h. of graduate credit, with 66 s.h. beyond the master's degree.

The program offers two areas of specialization: psychology of sport and physical activity, and sport studies.

Most students enter the doctoral program after completing a master's degree.

All doctoral students must satisfy the residency requirement by enrolling as full-time students (minimum of 9 s.h.) for two semesters, or by enrolling in 6 s.h. for three semesters while holding an assistantship of one-third-time or more.

In addition, all doctoral students must complete the following three foundation courses, at least 3 s.h. of course work in advanced research methodologies, and a dissertation.

**FOUNDATION COURSES**

- 028:202 Critical Perspectives
- 028:204 Research Methodologies
- 028:300 Research Colloquium (total of 3 s.h.)

**Psychology of Sport and Physical Activity Specialization**

The psychology of sport and physical activity specialization focuses on psychological processes as they interact with social and cultural forces. Scholarship in this program advances understanding of behavior in sport and physical activity through evaluation of theories that predict behavior and through testing interventions that promote sport and physical activity. Interdepartmental study is central to the program; students may select course work in psychology, epidemiology, counselor education, and women's studies. The program provides students with the analytical and research skills necessary for teaching and scholarship at the university level.

**Sport Studies Specialization**

The sport studies specialization is an interdisciplinary program, grounded in sport history and cultural studies. It explores sport with insights from history, sociology, and the humanities as well as interdisciplinary fields such as American studies, African American studies, communication studies, and women's studies. Students develop analytical skills in order to produce research and cultural criticism of sport, leisure, dance, and physical activity. Careers in scholarship and teaching are the usual outcomes of this curriculum.

**Assistantships**

The department offers teaching assistantships and research assistantships. Teaching assistants teach health and physical activity skills courses, or they support undergraduate courses offered by the departments. Research assistants work directly with faculty members to support research programs. Apply to the Department of Health and Sport Studies chair.

**Health and Sport Studies Courses**

**028:020 Alcohol and Your College Experience**

Patterns of alcohol, drug use focused on college years; strategies for monitoring use, behavioral change plans for implementing lower-risk drinking practices; for drinkers and non-drinkers. GE: Health and Physical Activity.
028:021 Tobacco and Your College Experience  
Current behavior change theories related to tobacco use, cessation; nicotine replacement therapies (NRT), non-NRT methods; triggers, relapse prevention, cognitive behavioral skills, support systems; for smokers and non-smokers. GE: Health and Physical Activity.

028:022 Resiliency and Your College Experience  
Resiliency and psychological hardiness theories relevant to college life; resiliency and ability to cope with challenges; components of psychological fitness; skills for personal growth and emotional well-being. GE: Health and Physical Activity.

028:023 Food and Your College Experience  
Sociocultural perspective on the forces that facilitate "junk" diets, particularly during young adulthood; basic components of nutrition; opportunity to develop skills in diet planning and healthy eating.

028:029 First-Year Seminar  
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Prerequisite: first- or second-semester standing.

028:030 Principles of an Exercise Class  

028:031 Health-Related Muscular Fitness  
Educational and practical experience for designing resistance training and flexibility programs; competencies for certification with National Strength and Conditioning Association.

028:032 First Aid and CPR  
Leads to American Red Cross first aid and adult CPR certifications.

028:036 Physical Activity Through the Life Span  
Physical activity determinants in society; school, workplace, community-based health promotion interventions to improve activity levels; practicum experiences. GE: Health and Physical Activity.

028:038 Understanding Food and Nutrition  
Physiology, biochemistry of human nutrition; appropriate food sources; qualitative and quantitative evaluation of diets using standard references. Prerequisite: health and sport studies major.

028:072 The Olympics: Ancient and Modern  
Origins and development of the ancient and modern Olympics; the Olympic spirit, political and religious contexts, and athletics through literature and material culture. Same as 20E:076.

028:074 Inequality in Sport  
Sport experiences, barriers to participation based on sexism, racism, classism, ageism, heterosexism. Prerequisite: health and sport studies major.

028:075 Health in Everyday Life  
Personal health strategies; focus on disease prevention, wellness.

028:076 Psychological Aspects of Sport and Physical Activity  
Psychological theory and research related to sport and physical activity; motivation, aggression, attribution, socialization, competitive anxiety, leadership.

028:077 Understanding Peak Performance in Sport  
Concepts that underlie peak performance; hands-on experience through lecture/discussion, overnight assignments, activities; understanding of how to achieve peak performance in sport and physical activity, other areas of life.

028:078 Women, Sport, and Culture  
Feminist analysis of girls' and women's sport experiences; reproduction of gender through sport, recent changes in sport.
Feminist analysis of girls' and women's sport experiences; reproduction of gender through sport, recent changes in women's intercollegiate athletics, media representations of women in sport, feminist critiques, alternatives to sport. Same as 131:078.

028:079 Race and Ethnicity in Sport
Structural and ideological barriers to racial and ethnic equality in sport, with focus on African American sport experiences; historical and contemporary issues, media representations. Same as 129:079.

028:132 Fitness/Sport Nutrition
Relationship between nutrition, fitness and sport performance; basic nutrition, physiology, chemistry, psychology, food preparation. Prerequisites: 028:038 and health and sport studies major.

028:133 Nutrition Through the Life Span
How body processes and nutritional needs change with age and the physiological state; effects of food-drug-medication interactions, anorexia, bulimia, and adolescent pregnancy; emphasis on food and health habits that minimize nutrition-related problems. Prerequisites: (for 028:133) 028:038 and health and sport studies major. Prerequisite: (for 153:133) 028:038. Same as 153:133.

028:134 Nutrition Intervention
Strategies for meeting unique nutritional needs of individuals with limitations imposed by genetics, trauma, aging, medications, and so forth. Prerequisites: 028:038 and health and sport studies major.

028:135 Global Health and Global Food
Practices, patterns, and policies that contribute to the epidemics of obesity, diabetes, and heart disease in wealthy populations; environmental degradation, hunger, and malnutrition among impoverished populations; strategies to meet food and agricultural needs for the world; local/global aspects or perspectives on food/health concerns for Iowa and the international community. Same as 152:135.

028:138 Exercise Testing and Prescription
Basic techniques in physical fitness assessment, prescription of exercise for healthy and unhealthy adults, promotion of physical activity within communities; provides knowledge and skill competencies required for certification as American College of Sports Medicine health fitness instructor. Prerequisites: 027:140 and admission to health promotion program.

028:141 Health Promotion Theory and Practice
Principles of epidemiology and health behavior theories applied to multilevel frameworks for health promotion. Prerequisite: 028:075.

028:142 Worksite Health Promotion
Management and organizational theories; assessment, planning, implementation, and evaluation of clinical and work-setting (targeted) health promotion programs.

028:143 Communicating Health and Physical Activity
Development, implementation, evaluation of effective health communication interventions; identification of health education resources for targeted groups. Prerequisite: health and sport studies major or consent of instructor.

028:144 Peer Health Education
Experience acting as a peer educator, assisting students in their residential areas, presenting educational outreach programs on health topics, making referrals to campus and area agencies. Prerequisite: consent of instructor.

028:145 Health Promotion Processes
Assessment, planning, implementation, and evaluation of health promotion programs. Prerequisite: 028:141.

028:147 Promoting Health Globally
Major global health threats (e.g., infectious disease, violence, tobacco, and nutrition); the impact of culture, history, and economics on health disparities and remedies. Prerequisite: junior or senior standing, or certificate student. Same as 152:158.

028:148 Practicum in Health Promotion
1-2 s.h.
Experience in planning, implementing clinical and community health promotion strategies including nutrition, physical fitness, cardiac rehabilitation, respiratory rehabilitation. Prerequisite: consent of instructor.

028:166 Exercise for Special Populations 1 s.h.
Laboratory experiences in development and implementation of exercise testing and prescription for special populations, including children, elders, and individuals with chronic diseases. Pre- or corequisite: 028:138. Same as 153:166.

028:171 History of Baseball in America 3 s.h.
Forces that influenced political, economic, and social development of professional baseball in the United States; rise of major league baseball, its relationship to the minor leagues, and development of organized baseball industry.

028:172 History of Intercollegiate Athletics 3 s.h.
Forces that influenced political, economic, and social development of intercollegiate athletics; development of the National Collegiate Athletic Association and its relationship to the rise of the Division I conference.

028:174 Understanding Stress and Coping 3 s.h.
Recent theoretical concepts and scientific evidence regarding stress and its effects on body and mind; intervention methods, strategies for managing stress; opportunity for students to use intervention techniques to manage stress. GE: Health and Physical Activity.

028:175 Sport and the Media 3 s.h.
Reporstations of sport in television, the press, fiction, films, biographies, adolescent fiction.

028:176 Sport and Nationalism 3 s.h.
Role of sport in the phenomenon of nationalism; selected theories; case studies on Ireland, Australia, British West Indies, Cold War U.S., fascist Europe.

028:177 Western World Sport: Greeks to Present 3 s.h.
Development of Western sport; relation to social, political, economic, intellectual factors.

028:178 Sport in the U.S. to 1900 3 s.h.
Growth and institutionalization of sport from colonial times to 1900.

028:179 The American Vacation 3 s.h.
Social history of vacations; cultural significance of contemporary patterns; focus on how experiences and meanings are shaped by race, class, gender. Same as 045:174.

028:180 Theory and Ethics of Coaching 3 s.h.
Philosophical bases, ethical issues; theoretical, practical applications.

028:188 Twentieth-Century U.S. Sport 3 s.h.
Historic development of sport in the United States since 1900; economic forces, professional football and baseball. Prerequisite: 028:178.

028:190 Preinternship Seminar 1 s.h.
Preparation for internship experience.

028:191 Internship arr.
Directed practical field experience; program planning, implementation, evaluation, administrative procedures. Prerequisites: 028:190 and consent of instructor.

028:193 Independent Study arr.
Problem in a specific area. Prerequisite: consent of instructor.

028:194 Honors Readings 1-2 s.h.
Prerequisite: consent of instructor.

028:195 Honors Problems 3-4 s.h.
Prerequisite: consent of instructor.
028:198 Topics
Sport studies or health promotion topics. 1-3 s.h.

028:202 Critical Perspectives
Application of critical theories to cultural meanings and issues of sport, health, physical activity. 3 s.h.

028:204 Research Methodologies
Design, interpretation of research; emphasis on quantitative approaches. 3 s.h.

028:243 Planning and Evaluating Health Interventions
Theoretical and applied aspects of planning and evaluating health interventions in multiple settings, including culturally relevant programming. 3 s.h.

028:244 Seminar in Health and Physical Activity Behavior
Health behavior theories and their relevance to individual, interpersonal, and community-wide health promotion interventions. 3 s.h.

028:249 Epidemiology of Physical Activity
Physical activity/disease relationships examined through application of epidemiologic methods, including research design, interpretation of studies, selection of measures to fit research questions. Same as 173:245. 3 s.h.

028:250 Marketing, Finance, and Entrepreneurship
Economic practices, marketing research, promotional programs, financing strategies, entrepreneurship related to collegiate athletics. 3 s.h.

028:256 Governance and Policy Issues in Sport
Institutional, conference, national, and international issues in sport and sport governance; focus on gender equity, Title IX. 3 s.h.

028:257 Nonprofit Organizational Effectiveness I

028:258 Nonprofit Organizational Effectiveness II
Qualities for leadership of nonprofit organizations, including relationships with staff and volunteers; relationship of nonprofit and outside world; marketing, public relations, advocacy strategies for nonprofits. Prerequisite: (for 091:322) 091:320 or consent of instructor. Prerequisite: (for 174:248) 06J:247 or 024:247 or 174:247. Same as 021:265, 024:248, 032:228, 042:248, 06J:248, 091:322, 174:248. 3 s.h.

028:270 Social Psychology of Sport and Physical Activity
Theoretical and applied bases of social psychology of sport and exercise; motivation, arousal, group processes related to sport, physical activity. 3 s.h.

028:274 Philosophy of Sport
The meaning of sport as human experience; ethical, aesthetic dimensions. 3 s.h.

028:278 History of Women in Sports
Women's sport involvement from ancient times to present; focus on social class, attitudes, religion, race, ethnicity, medical opinion, economic considerations, political events, educational philosophies that have influenced women's sport participation. Same as 131:254. 3 s.h.

028:279 Sport and the African American Experience
Intersection of African American sport experiences and larger sporting culture; political, economic, social forces; effects of urbanization, rise of the modern city. 3 s.h.

028:290 Graduate Internship
Prerequisite: consent of instructor. 1-4 s.h.
028:291 Problems
Prerequisite: consent of instructor.

028:292 Practicum in College Teaching
arr.

028:294 Practicum: Athletics Administration
arr.

028:295 Graduate Research Workshop
Development of individual research projects for group discussion.
1 s.h.

028:298 Graduate Topics
Sport studies or psychology of sport and physical activity topics.
1-3 s.h.

028:299 Graduate Research Problems
Prerequisite: consent of instructor.
arr.

028:300 Research Colloquium
Research issues, current research projects of departmental faculty, graduate students. Repeatable.
0-1 s.h.

028:370 Seminar in Sport Psychology
Current theory, research; applied sport psychology techniques. Repeatable. Prerequisite: 028:270.
3 s.h.

028:372 Selected Issues in Sport Psychology
3 s.h.

028:374 Seminar in Sport History
Topics in sport history; theoretical and methodological issues. Repeatable. Prerequisite: HSS graduate student or consent of instructor.
3 s.h.

028:375 Cultural Analyses of Sport
Analytical strategies for studying sport; quantitative, qualitative techniques; materialist, feminist, cultural studies approaches. Repeatable. Prerequisite: consent of instructor.
3 s.h.

028:378 Seminar in Cultural Studies of Sport
Current theoretical debates in sociology of sport; applications of cultural studies to critical analysis of sport. Repeatable. Prerequisite: consent of instructor.
3 s.h.

028:386 Intercollegiate Athletics
Organization and administration of a Division I intercollegiate athletic program; current issues, problems.
3 s.h.

028:398 Thesis: M.A.
Repeatable. Prerequisite: consent of instructor.
1-6 s.h.

028:399 Thesis: Ph.D.
Repeatable. Prerequisite: consent of instructor.
arr.

Health and Physical Activity Skills
All Health and Physical Activity Skills courses (formerly known as Physical Education Skills) are approved as an option in the distributed general education portion of the General Education Program.

28S:006 Core Strengthening
GE: Health and Physical Activity.
1 s.h.

28S:007 Aerobics: Low Impact
GE: Health and Physical Activity.
1 s.h.

28S:009 Aquatic Exercise
GE: Health and Physical Activity.
1 s.h.
**28S:011 Badminton I**  
GE: Health and Physical Activity.

**28S:020 Fitness Walking**  
GE: Health and Physical Activity.

**28S:021 Flexibility**  
GE: Health and Physical Activity.

**28S:023 Golf**  
GE: Health and Physical Activity.

**28S:025 Hatha Yoga**  
GE: Health and Physical Activity.

**28S:029 Jogging I: Beginners**  
GE: Health and Physical Activity.

**28S:030 Jogging II**  
GE: Health and Physical Activity.

**28S:031 Karate I**  
GE: Health and Physical Activity.

**28S:033 Kick Boxing I**  
GE: Health and Physical Activity.

**28S:037 Lap Swimming I**  
Prerequisite: 28S:064 or consent of instructor. GE: Health and Physical Activity.

**28S:038 Lap Swimming II**  
Prerequisite: 28S:037 or consent of instructor. GE: Health and Physical Activity.

**28S:042 Personal Fitness**  
GE: Health and Physical Activity.

**28S:043 Pilates**  
GE: Health and Physical Activity.

**28S:045 Racquetball I**  
GE: Health and Physical Activity.

**28S:047 Relaxation Techniques**  
GE: Health and Physical Activity.

**28S:049 Sand Volleyball**  
GE: Health and Physical Activity.

**28S:052 Self Defense**  
GE: Health and Physical Activity.

**28S:053 Slow-Pitch Softball I**  
GE: Health and Physical Activity.

**28S:055 Soccer I: Outdoor**  
GE: Health and Physical Activity.

**28S:056 Soccer II: Outdoor**  
Prerequisite: 28S:055 or consent of instructor. GE: Health and Physical Activity.
28S:057 Soccer: Indoor
GE: Health and Physical Activity.

28S:058 Speed Walking
GE: Health and Physical Activity.

28S:059 Spinning
GE: Health and Physical Activity.

28S:061 Resistance Training
GE: Health and Physical Activity.

28S:063 Swimming I
GE: Health and Physical Activity.

28S:064 Swimming II
Prerequisite: 28S:063 or consent of instructor. GE: Health and Physical Activity.

28S:066 Table Tennis
GE: Health and Physical Activity.

28S:071 Tennis I
GE: Health and Physical Activity.

28S:075 Ultimate Frisbee
GE: Health and Physical Activity.

28S:077 Volleyball I
GE: Health and Physical Activity.

28S:078 Volleyball II
Prerequisite: 28S:077 or consent of instructor. GE: Health and Physical Activity.

28S:081 Weight Training I
GE: Health and Physical Activity.

28S:082 Weight Training II
Prerequisite: 28S:081 or consent of instructor. GE: Health and Physical Activity.
History

Chair: Colin Gordon
Professors: R. David Arkush, Constance A. Berman, Jeffrey L. Cox, James L. Giblin, Paul Greenough, Colin Gordon, Linda K. Kerber (May Brodbeck Professor in the Liberal Arts and Sciences), H. Shelton Stromquist, Katherine Tachau, Stephen Vlastos
Professors emeriti: T. Dwight Bozeman, Lawrence E. Gelfand, Ralph E. Giesey, Sarah Hanley, Ellis W. Hawley, Henry G. Horwitz, Jaroslaw Pelenski, Malcolm J. Rohrbough, David Schoenbaum, Alan B. Spitzer
Associate professors: Douglas Baynton (History/Communication Sciences and Disorders), Michel Gobat, Laura Gotkowitz, Elizabeth Heineman, Paul Kramer, Paula Michaels, Kevin Mumford (History/African American Studies), H. Glenn Penny, Marshall Poe, Jacki Rand, Johanna Schoen (History/Women's Studies), Leslie A. Schwalm (History/Women's Studies), Allen Steinberg
Lecturer: Kathleen Kamerick

Undergraduate degree: B.A. in History
Undergraduate nondegree program: Minor in History
Graduate degrees: M.A., Ph.D. in History
Web site: http://www.uiowa.edu/~history

The Department of History's purpose is to increase knowledge of human experience and provide students with opportunities to gain information about and learn methods for understanding their world in light of its past. In addition to offering these essential elements of a liberal education, the department trains professional historians and teachers of history and serves those who require knowledge of a period or aspect of history as background for their own specialized interests in other fields.

Faculty and students in the department participate in many of the University's interdisciplinary departments and programs, including American studies, African American studies, ancient civilizations, Asian studies, international studies, Latin American studies, and women's studies.

Undergraduate Programs

The department offers a Bachelor of Arts and a minor in history. Graduates of the B.A. program work in a variety of positions in business, education, public service, advertising, and journalism. Many plan further training in history, law, religion, library and information science, or social work.

History majors are encouraged to take courses in other fields that illuminate and expand the meaning of history courses and that introduce information and a variety of approaches to understanding how societies and cultures work.

For example, students majoring in history are encouraged to complete the College of Liberal Arts and Sciences General Education Program foreign language component by choosing a language that fits their interests in history. The history faculty particularly encourages study aboard programs that complement students' foreign area interests. Majors also are encouraged to improve their writing and speaking skills.

Bachelor of Arts

The Bachelor of Arts in history requires a minimum of 120 s.h., including 36 s.h. of work for the major. The program is designed for students with a general interest in history. Course requirements include a colloquium, which usually is taken during the sophomore year or the semester after the student elects a major in history. The required portfolio, which should consist of at least three papers the student has written while enrolled in history classes, is submitted to the student's advisor during the semester before graduation.

College Level Equivalency Program (CLEP) and Advanced Placement Program credit cannot be used as part of the history major. Transfer work that is equivalent to University of Iowa course work can be accepted toward the major, but at least 18 s.h. of work for the major, including the colloquium, must be earned at The University of Iowa.

Students must complete the College of Liberal Arts and Sciences General Education Program.

Undergraduate courses are divided into four areas: American history (prefix 16A), European history (16E), non-western world history (16W), and courses that have no area designation (016).

Students must complete 36 s.h. in history courses, as follows.

COLLOQUIUM

One of these:

16A:051 Colloquium for History Majors (American) 3 s.h.
16E:051 Colloquium for History Majors (European) 3 s.h.
16W:051 Colloquium for History Majors (World) 3 s.h.
History majors take the colloquium as soon as possible after declaring their major. Every colloquium includes assigned papers; students must include in their history portfolio at least one paper from their colloquium.

**OTHER REQUIRED COURSES**

At least 6 s.h. of American history, including at least one course numbered 16A:100 or above
At least 6 s.h. of European history, including at least one course numbered 16E:100 or above
At least 6 s.h. of non-western world history, including at least one course numbered 16W:100 or above
At least 3 s.h. of pre-1700 history (see "Pre-1700 Courses")

A course taken to fill the pre-1700 history requirement also may be counted toward the requirement in American, European, or non-western world history.

**HISTORY ELECTIVES**

In addition to the requirements listed above, the major requires 15 s.h. of elective courses in history (the total may include the colloquium). History electives may include no more than two of the following: 016:001 Western Civilization I, 016:002 Western Civilization II, 016:003 Western Civilization III, 016:005 Civilizations of Asia: China, 016:006 Civilizations of Asia: Japan, and 016:007 Civilizations of Asia: South Asia. Electives also may include all other courses offered by the department numbered above 016:040, 16A:040, 16E:040, and 16W:040. No more than 18 s.h. of American history (prefix 16A) may be counted toward the major.

**PRE-1700 COURSES**

The following courses fulfill the 3 s.h. requirement for pre-1700 history.

- 016:001 Western Civilization I 3-4 s.h.
- 016:002 Western Civilization II 3-4 s.h.
- 016:005 Civilizations of Asia: China 3 s.h.
- 016:006 Civilizations of Asia: Japan 3-4 s.h.
- 016:007 Civilizations of Asia: South Asia 3-4 s.h.
- 016:045 Middle East and Mediterranean, Alexander to Suleiman 3 s.h.
- 16A:115 Native North America I: Precontact-1789 3 s.h.
- 16A:131 The Frontier in American History to 1840 3 s.h.
- 16E:101 Ancient Egypt and the Ancient Near East 3 s.h.
- 16E:104 The World of Ancient Greece 3 s.h.
- 16E:106 Warfare in Ancient Mediterranean Society 3 s.h.
- 16E:107 The Hellenistic World and Rome 3 s.h.
- 16E:110 Medieval Civilization II 3 s.h.
- 16E:111 Medieval Intellectual History 300-1150 3 s.h.
- 16E:112 Medieval Intellectual History 1150-1500 3 s.h.
- 16E:113 Economic and Social History of Medieval Europe 3 s.h.
- 16E:116 Ireland in the Early Middle Ages 3 s.h.
- 16E:117 History of the Medieval Church 3 s.h.
- 16E:118 The Transition from Manuscript to Print 3 s.h.
- 16E:119 Women, Power, and Society in Medieval Europe 3 s.h.
- 16E:120 The Book in the Middle Ages 3 s.h.
- 16E:125 Society and Gender in Europe 1200-1789 3 s.h.
- 16E:126 The French Revolutions and Human Rights 3 s.h.
- 16E:139 Ancient and Medieval Science 3 s.h.
- 16W:111 Colonial Latin America 3 s.h.
- 16W:120 Pre-Colonial African History 3 s.h.
- 16W:172 Japan—Age of the Samurai 3 s.h.

**B.A. with Teacher Licensure**

Students who wish to qualify or licensure to teach social studies in secondary schools must complete the major in history and must earn at least 15 s.h. in U.S. history (16A), at least 15 s.h. in non-U.S. history (16E and 16W), and 15 s.h. in a related area chosen from economics, geography, anthropology, psychology, sociology, or American...
government. Courses taken as part of the history major, including Colloquium for History Majors (numbered 16A:051, 16E:051, or 16W:051), may be counted as part of the 15 s.h. in U.S. history and the 15 s.h. in non-U.S. history required for certification.

Students also must complete College of Education professional education courses required for teaching licensure. Not all political science courses count toward certification to teach American government. Course content must center around the American political system or American political issues.

For information about the Teacher Education Program (TEP) or the secondary social studies education program, consult the social studies program coordinator at the College of Education.

**Four-Year Graduation Plan**

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan.

**Before the third semester begins:** at least one-quarter of the semester hours required for graduation

**Before the fifth semester begins:** three courses in the major (including Colloquium for History Majors) and at least one-half of the semester hours required for graduation

**Before the seventh semester begins:** four more courses in the major and at least three-quarters of the semester hours required for graduation

**Before the eighth semester begins:** three more courses in the major and submission of the portfolio of written work to the student's advisor

**During the eighth semester:** enrollment in all remaining course work in the major (two courses), all remaining General Education courses, and a sufficient number of semester hours to graduate

**Honors**

The requirement for entry into the history department's honors program is the same as that for entry into the University of Iowa Honors Program: a cumulative University of Iowa g.p.a. of at least 3.33. Through its honors program, the department provides outstanding students with opportunities to enhance their history major in several ways.

The most significant part of the honors program in history is the honors thesis. The thesis is an extended research paper (30-50 pages), usually completed during the spring semester of the junior year or fall semester of the senior year. Research for the thesis is done under the supervision of a faculty member who specializes in the field in which the student undertakes his or her research. Students register for 3 s.h. of 016:091 Honors Seminar and 016:092 Honors Thesis in each of two semesters. The 6 s.h. count toward the total number of hours needed for the history major.

**Minor**

The minor in history requires a minimum of 15 s.h. in history courses, including 12 s.h. in advanced courses taken at The University of Iowa. For the minor, all courses numbered above 016:080, 16A:080, 16E:080, and 16W:080 are considered advanced. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass.

**Graduate Programs**

The department offers a Master of Arts and a Doctor of Philosophy in history. The graduate programs prepare students for occupations such as high school or college teaching, publishing, commercial research, foundations and nongovernmental organizations, and government or other public service. With additional specialized training, students of history become qualified for careers in archival work, library work, museum work, or historical site preparation and display. Some students enter the joint program leading to degrees in both law and history (see "Joint Law and Graduate Degree Programs" in the College of Law section of the Catalog).

Students interested in graduate work should obtain a copy of the current *Guide to Graduate Study at The University of Iowa* from the Department of History office. The guide is revised every spring to include the latest faculty listing, research interests of faculty members, detailed regulations on study toward advanced degrees, and other information for prospective students.

**Master of Arts**

The Master of Arts in history requires a minimum of 30 s.h. of graduate credit and is offered with two options: one for
students who plan to work toward the Ph.D., the other for students who do not. The two plans differ mainly in their concentration in fields: the Ph.D. track emphasizes development of research capabilities culminating in the essay; the non-Ph.D. track stresses breadth of learning.

The M.A. with Ph.D. track requires completion of a research essay. Students must earn at least 24 s.h. of the required 30 s.h. in Department of History courses, including at least two seminars, or one seminar and one readings course. One seminar or readings course must be taken in each of the first two semesters of residence. Students must earn 12 s.h. in the area of their essay topic and at least 6 s.h. in a second division, including either a seminar or a readings course.

The essay in the major division must be based on original research and should be approximately 10,000 to 15,000 words long. It usually begins as a term paper for the seminar in the major division and is completed the following semester under the supervisor's guidance. The finished product should emulate the character of articles in learned journals, just as the Ph.D. dissertation takes the form of a full-length scholarly monograph.

Requirements for the M.A. with non-Ph.D. track are similar to those for the Ph.D. track program. Students earn 24 of the required 30 s.h. in history. They earn 12 s.h. in one major division of history and must include at least one readings or seminar course. They earn an additional 12 s.h. in history by taking 6 s.h. in each of two other divisions of history, or 6 s.h. in one other division of history and 6 s.h. in a related department. The additional 12 s.h. in history must include at least one readings or seminar course.

After completing these requirements, or during the semester in which they will complete them, M.A. students must take an oral and written comprehensive examination in their major division.

**Doctor of Philosophy**

The Ph.D. requires at least 72 s.h. of graduate credit, including credit for work done for the master's degree.

Students who earn the M.A. with research essay at Iowa are admitted to the Ph.D. program on the favorable recommendation of the examining committee. Students who earn an M.A. at another university must meet the admission requirements of the Graduate College and the Department of History. They must submit a writing sample, such as a seminar paper or an M.A. thesis. They also must take a research seminar during their first two semesters in residence at Iowa.

Ph.D. students must complete at least eight 200-level courses of 4 s.h. each, taken in research seminars (not fewer than three) or graduate readings courses. At least five of the eight courses must be completed before the student takes the comprehensive examination. Courses taken at the M.A. level may be counted toward this requirement. The student also must take a graduate course in the philosophy of history, historiography, or methods of historical research.

The department has no general language requirement for the Ph.D., but the supervising faculty member may require the student to demonstrate a reading knowledge of one or more foreign languages and proficiency in the use of other study tools. Students may not complete the comprehensive examination until these requirements have been met.

The comprehensive written and oral examination covers three distinct fields, two of which must be in a major division that is chosen from the following divisions.

- The ancient world
- Medieval Europe
- Europe, early modern
- Europe, modern
- Russia and the former Soviet Union
- United States
- Latin America
- China
- Japan
- India
- Africa

Students may construct another field, subject to approval by the comprehensive exam committee.

The third field must be a division outside the student's major division or in a related department outside history. The committee may define and delimit the individual fields for examination. It may also set, separately for each field, the character of the written portion of the comprehensive examination, which may take the form of a syllabus, a critical bibliography, a topical paper, or any other form or combination of forms that the committee deems suitable. The oral portion of the comprehensive examination focuses on issues and problems arising from the examination papers.

The candidate must submit to the dissertation committee a written prospectus for the dissertation no later than the semester following completion of the comprehensive exams. The committee consists of at least five members, including at least one member from outside the department. It considers the prospectus and may approve it, reject it,
or require its revision. When the dissertation is completed in final form, the committee administers the final examination for the doctorate, a formal oral defense of the dissertation that usually lasts two hours.

**Admission**

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

Applicants must submit academic transcripts and Graduate Record Examination (GRE) General Test scores. They also must submit examples of original writing to the history department, such as a term paper, a seminar paper, or an honors thesis; letters of recommendation from three persons familiar with the student's past academic work; and a one- or two-page personal statement of the applicant's purpose in taking graduate work. All application materials are due by January 15 for entry the following August.

**Facilities**

The University of Iowa Libraries has unusual strength in all aspects of U.S. history. The Main Library houses the Henry A. Wallace papers and related collections, the Iowa Women's Archives, and other unique materials. In European history, special strengths include the fine collections of French and English materials. The State Historical Society of Iowa in Iowa City and the Herbert Hoover Presidential Library and Museum in West Branch also hold valuable research materials.

**History Courses**

Courses numbered 016:001 Western Civilization I through 016:040 Perspectives: Diversity in American History are approved for General Education, except 016:008 Civilizations of Africa, which is not approved for General Education. Some other courses are approved in the foreign civilization and culture General Education area. They cannot be taken pass/nonpass, even when they are taken as electives. Majors should take 16A:051 Colloquium for History Majors (American), 16E:051 Colloquium for History Majors (European), or 16W:051 Colloquium for History Majors (World) in the sophomore year or in the first semester after declaring the major. Other courses numbered below 200 are open to first-year students who already have fulfilled the General Education Program historical perspectives requirement. Courses numbered 200 and above are offered as occasion demands.

**For Undergraduates**

016:001 **Western Civilization I**  
Ancient and medieval. GE: Foreign Civilization & Culture, Historical Perspectives.  
3-4 s.h.

016:002 **Western Civilization II**  
Early modern world. GE: Foreign Civilization & Culture, Historical Perspectives.  
3-4 s.h.

016:003 **Western Civilization III**  
The modern world. GE: Foreign Civilization & Culture, Historical Perspectives.  
3-4 s.h.

016:005 **Civilizations of Asia: China**  
GE: Foreign Civilization & Culture, Historical Perspectives. Same as 039:055.  
3 s.h.

016:006 **Civilizations of Asia: Japan**  
GE: Foreign Civilization & Culture, Historical Perspectives. Same as 039:056.  
3-4 s.h.

016:007 **Civilizations of Asia: South Asia**  
GE: Foreign Civilization & Culture, Historical Perspectives. Same as 039:057.  
3-4 s.h.

016:008 **Civilizations of Africa**  
Introduction to the study of Africa; brief survey of African history; aspects of modern African life, including political and social issues, economic and health problems (including HIV-AIDS); classroom discussion of selected African films shown in class and selected African novels included in course reading.  
3 s.h.

016:011 **Issues in Human History: The Vietnam War in Historical Perspective**  
GE: Historical Perspectives.  
3 s.h.

</table>
**016:088 Introduction to New Media in the Humanities and Social Sciences**  4 s.h.
Use of New Media software in research, presentation, and instruction; includes HTML editors (Dreamweaver), wikis (Confluence), blogs (WordPress), collaborative mark-up programs (CommentPress), graphics editors (Illustrator), map editors (MapPoint, ArcView), photographic editors (Photoshop), audio editors (Garage Band, Soundbooth, Audio Hijack Pro), video editors (iMovie, Premiere Pro, Photo-To-Movie), and animation editors (Flash); projects.

**016:089 History Internship**  3-6 s.h.
Internship involving historical work. Prerequisite: consent of director of undergraduate studies and Pomerantz Career Center.

**016:090 Individual Study: Undergraduate**  arr.

**016:091 Honors Seminar**  0-3 s.h.

**016:092 Honors Thesis**  3 s.h.
Individual research and writing under supervision of faculty member; occasional group sessions with other students in the course.

---

**For Undergraduate and Graduate Students**

**World and General History**

**016:100 Historical Background of Contemporary Issues**  arr.

**16W:106 Society and Revolution in Cuba**  3 s.h.
Cuban society and revolutionary movements since the late colonial period, including the years since 1959.

**16W:107 History of Mexico**  3 s.h.
Mexican history since the eve of the Spanish invasion, with focus on the national period; may include ethnic groups, conquest and demographic disaster, native survival, labor and migration, social protest and rebellions, nationhood, regional differences, religions, popular culture, economic growth and distribution, state building, international relations; survey.

**16W:110 Topics in Latin American History**  3 s.h.

**16W:111 Colonial Latin America**  3 s.h.
Cultural, institutional continuity from 16th century to independence.

**16W:112 Introduction to Modern Latin America**  3 s.h.
Cultural, institutional continuity from independence to present.

**16W:114 Latin America and the U.S.: The Historical Perspective**  3 s.h.

**016:115 Policy Matters: Perspective on Contemporary Problems**  3 s.h.
Public policy issues in scholarly perspective; UI experts provide background introduction to weekly issues; presentations of new policy initiatives, roundtable on policy options; panels representing local, state, and national options and experience involving policy practitioners, legislators, and advocates.

**16W:115 Latin American Revolution**  3 s.h.

**16W:116 Dictatorships of Latin America**  3 s.h.
Dictatorships, truth commissions, politics of memory in modern Latin America; the political and socio-economic origins of authoritarian regimes as well as their forms of rule, sources of support, uses of violence, and eventual downfall; the experience of specific sectors of society under authoritarian regimes, forms of resistance to authoritarianism, memories of terror, efforts to forge peace and justice in the aftermath of horror; includes personal testimony, film, human rights, reports, historical studies.
16W:119 African and African American Interactions  
The slave trade, its legacy in Africa and the Americas; cultural, political interaction between Africans and African Americans; images of Africa in African American thought; Afrocentrism, its African critics. Same as 129:138.

016:120 Museum Literacy and Historical Memory  
Concepts and methods for understanding the role of museums in shaping knowledge and collective memory of history; institutionally based exhibits and collections, historical markers and public monuments, public holidays and events, media and artistic works that interpret the past; how events, people, and civic ambitions are memorialized and how memories of them are shaped; appearance of museums and related practices in the non-Western world after 1850. Prerequisite: honors standing or consent of instructor. Same as 024:115.

16W:120 Pre-Colonial African History  
Africa to 1880; oral tradition, other sources; political development, ecological change, slavery and slave trade. GE: Foreign Civilization & Culture. Same as 129:163.

16W:121 African History Since 1880  
Africa in colonial, post-colonial period; economics, political structures of colonialism; social change, political life in the 20th century. GE: Foreign Civilization & Culture. Same as 129:164.

16W:122 History and Environment in Africa

16W:124 Crossing the Indian Ocean  
Transnational history of Western Indian Ocean; explore cultural and economic networks in the Indian Ocean World; how Islam and colonization are common experiences of peoples in this region; Indian Ocean World historical diversity; analytical concepts such as migration, Islam, globalization.

16W:125 Women in African History  
Importance of female agency in African history; African women’s history in historiographical framework of women’s history, challenges historians face in exploring African women’s past; varied sources (e.g., novels, films, court records) from sub-Saharan Africa, urban and rural settings; current literature on African women, African women’s experiences in a comparative context.

16W:126 Islam in Sub-Saharan Africa  
Islamization of sub-Saharan Africa; process, history of Muslim societies from beginnings of Islamization to present; source material on Islam in sub-Saharan Africa, historiographical approaches; jihad; Islamic law, learning, networks; Muslim women; historical role of African Muslims in global Muslim community.

016:136 History of Medicine in Western Society  
Theories about the body, illness, medical practice in social, economic, intellectual contexts; role of healers, professionalization of practitioners; evolution of public, private medical institutions; interrelationships of science, medicine, technology. Same as 152:136.

16W:137 History of Public Health  
State-endorsed measures to avert or control disease in society. Same as 152:137.

16W:138 History of International Health  
Foremost problems of health and disease in colonial and postcolonial societies; topical approach. Same as 152:138.

16W:140 Disease, Politics, and Health in South Asia  
South Asia’s long-term success lengthening lives and stopping disease, weighed against its continuing burden of infection, violence, pollution, and class-based suffering.

16W:142 Palestine, Israel, and the World Since 1890

016:144 War and Peace in the Twentieth Century

16W:152 History of the Modern Middle East
16W:153 Topics in the Modern Middle East  
3 s.h.

16W:155 Europe and the U.S. in the Twentieth Century  
The U.S.-European transatlantic relationship over the 20th century in historical perspective; sense of common heritage transformed into program of political purpose; alliances in defense of a shared civilization—the West—challenged by nations and ideologies, from the Wilhelmine Empire to Nazi Germany, from U.S.S.R. to Islamist groups; reluctant American involvement in Europe, East European claims of inclusion, mutual frustrations and suspicions, differences in interpreting the shared tradition; diverging concepts of security, legitimacy, sovereignty, and history lessons underscored by U.S. role as sole superpower and European Union experiment in integration.  
3 s.h.

16W:157 Gender, Sexuality, and Human Rights  
History of gender and sexuality as components in international human rights activism and law; current debates, representative topics. Same as 131:157, 154:157.  
3 s.h.

16W:167 Patterns in World History  
Patterns in world history from the evolution of humankind to the present; basic texts in evolution, migration, social evolution.  
3 s.h.

16W:168 Cooperation in World History  
Origins and role of human cooperation in world history, from human evolution to present; basic evolutionary theory, origins of humans, character of human nature, emergence of human cooperation, human cooperation in comparative zoological perspective; evolution of cooperative institutions such as family, tribe, market, state, mass religion, science, Internet.  
3 s.h.

16W:172 Japan—Age of the Samurai  
Society, culture, and politics of feudal Japan; social class, gender, norms, and political and economic developments explored through cinema and literature. Same as 39J:172.  
3 s.h.

16W:173 Modern Japan  
Political, social, and cultural developments of Japanese feudalism; feature films, fiction. Same as 39J:173.  
3 s.h.

16W:174 History, Memory & Pacific War  
Contemporary meanings of the Pacific War in the collective memory of Americans and Japanese; readings and travel to war/peace memorials in Hawaii and Japan.  
3 s.h.

16W:175 Japan—U.S. Relations  
Political, social, economic, and cultural developments in Japan mid-19th to late-20th century. Same as 39J:175.  
3 s.h.

16W:178 Topics in Asian History  
Same as 039:175.  
3 s.h.

016:180 Readings: International Security  
3-4 s.h.

016:183 Vietnam War on Film  
3-4 s.h.

016:185 History and the New Media  
How to do history on the Internet; project/methods approach.  
3 s.h.

016:186 Modern Warfare, 1500-Present  
World military history from 15th century to present; development of weapons, tactics, strategies.  
3 s.h.

016:190 Teaching History: Approaches in Lesson Design  
3 s.h.

016:192 Traditions of Religious Reform  
Same as 032:192.  
3 s.h.

16W:198 China Since 1927  
3 s.h.
American History

16A:061 American History 1492-1877
3 s.h.
Discovery through Civil War, Reconstruction; emphasis on social history of colonial era and social, economic, political developments of Revolutionary, antebellum periods.

16A:062 American History 1877-Present
3 s.h.
Emphasis on social, political developments of Gilded Age, Progressive Era, Great Depression; the United States as a world power.

16A:065 Introduction to African American History
3 s.h.
GE: Cultural Diversity. Same as 129:065.

16A:066 Civil War and Reconstruction
3 s.h.

16A:067 Survey of U.S. Women's History
3 s.h.
Private lives and public roles of American women of different class, race, ethnic, religious backgrounds, colonial period to present; women's roles in American life, how women have shaped society, culture, politics; family life, work roles, political participation. Same as 131:067.

16A:069 Introduction to Mexican American History
3 s.h.
Introduction to major themes in Mexican American history from the 18th century to the present; settlement of Mexico's Far North by Spanish Mexican residents, their incorporation into the United States after a war of conquest, and the growth of Mexican Americans into the nation's largest Latino group.

16A:104 History of the American Deaf Community
3-4 s.h.
Creation of a distinct language and culture of deaf people in America during the 19th and 20th centuries. Taught in American Sign Language. Prerequisite: 158:014 or consent of instructor. Same as 158:100.

16A:106 Disability in American History
3 s.h.

16A:107 American Cultural History 1820-1920
3 s.h.
Culture as contested terrain; creation of cultural hierarchy (high and popular culture); struggles over the cultural construction of meaning; competing stories of America; advent and significance of mass culture.

16A:110 Introduction to American Indian History and Policy
3 s.h.
Same as 149:102.

16A:112 Mexican American History
3 s.h.
Survey of Chicana/o (Mexican American) history from 18th century to present; Mexican American society's diverse nature, explored through class, ethnic, gender, and regional divisions. Approved for GE: Cultural Diversity.

16A:113 Latina/o Immigration
3 s.h.
Immigration experiences of people arriving in the United States from other regions of the Americas (e.g., Mexico, Central America, the Caribbean, South America); what has fueled immigration—social, political, and economic developments in the United States and other nations; territorial conquest, colonialism, real and imagined borders, chain migration, formation of immigrant communities, acculturation, circular migration, social networks; how migration restructures gender relations; immigrant communities and pan-Latino identity in the United States.

16A:115 Native North America I: Precontact-1789
3 s.h.
Same as 149:115.

16A:116 Native North America II: 1789-Present
3 s.h.
Same as 149:116.
16A:117 U.S. Indian Policy in the American Indian Family 3 s.h.

16A:122 Varieties of American Religion 3 s.h.
World views of religious groups (e.g., Mormon, Scientology, Jehovah's Witness, Black Muslim, Unification Church of Sun Myung Moon). Same as 032:141.

16A:131 The Frontier in American History to 1840 3 s.h.

16A:132 The Frontier in American History 1840-Present 3 s.h.

16A:133 American West in Film 4 s.h.

16A:135 American West in the Twentieth Century 3-4 s.h.
Focus on growth, redistribution of political power, exploitation of and competition for natural resources, intermingling of diverse cultural groups.

16A:137 History of Iowa 3 s.h.

16A:139 The Social History of American Baseball 3 s.h.
History of baseball in the United States from its beginnings as a working-class recreation through the present; history of the game and the people who have played it; how the history of American society is viewed through the lens of baseball, how the game has contributed to social change; social class, race, urbanization, crime and political corruption, public health, big business and professionalism, spectatorship, entertainment and mass culture, national mythology, the exercise of legitimate authority (umpires!).

16A:141 Work and Society in Industrializing America 3 s.h.
Industrialization, formation of an American working class; changing patterns of labor organization, strike activity, politics; impact of ethnic, racial, gender divisions on working class communities, culture.

16A:142 American Labor in the Twentieth Century 3-4 s.h.
Competing philosophies and organizational strategies of workers in a maturing industrial economy; impact of world wars and Great Depression on American workers and their unions; rise of service sector, deindustrialization.

16A:144 American Economic History 3 s.h.
Emphasis on role of population and technology. Prerequisites: 06E:001 and 06E:002 or consent of instructor for economics majors; 06E:001 and 16A:061 for nonmajors. Same as 06E:158.

16A:146 Immigrant America 1845-1925 3 s.h.
Era of mass immigration in world context; formation, organization of immigrant communities; diverse processes of adaptation, assimilation; rural, urban contrasts; coercive Americanization, immigration restriction.

16A:147 History of Slavery in the U.S.A. 3-4 s.h.
Origins, development; focus on labor, family, gender, community, culture, resistance; South's defense of slavery; wartime collapse, destruction of slavery. Same as 129:137.

16A:148 Race, Gender, U.S. International History 3 s.h.
Interplay between the United States' 20th-century rise to world power and its racial and gender politics, in context of the dynamic interaction of U.S. domestic society and international relations; U.S. colonialism in the Caribbean and Pacific, struggles over migration, world wars as crucibles of social and political change, cultural politics of the Cold War, racial and gendered dimensions of the war on terror.

16A:149 Transnational America 1880-1939 arr.
The United States as a society increasingly embedded in global history during the late 19th- and early 20th-centuries; approaches for thinking about history in transnational ways; intensification of European, Asian, and Latin American immigration; cross-national dimensions of American reform; emergence of diasporic social movements; international scale of the corporate state; politics of colonialism and world war.

16A:150 The United States as Empire 3 s.h.
The U.S. rise to world power; continental empire-building in the 19th century; industrial, military and colonial power in the early 20th century; global hegemony from the mid-20th century to the present; white settler colonialism; overseas rule of Philippines and Puerto Rico; cultural Americanization; Cold War interventionism; post-9/11 unilateralism; meanings of American exceptionalism, intersections of U.S. nationalism with race and gender, remaking of domestic U.S. society within a changing global and imperial context.

16A:151 United States in World Affairs to 1900 3 s.h.
Origins of modern diplomatic practices; security, territorial and commercial expansion; legal, constitutional problems.

16A:152 United States in World Affairs 3 s.h.
America's emergence as leader in world affairs; imperialism, international collaboration, participation in world wars, the Cold War.

16A:153 U.S.A. in a World at War 1931-1945 3 s.h.
Significance of World War II to the United States.

16A:154 Sexuality in the United States 3 s.h.
Same as 131:158.

16A:155 Political Culture of U.S. Foreign Policy 3 s.h.
Political culture of U.S. foreign policy in historical perspective; connections and interactions between the domestic scene and international realities, from time of manifest destiny to national security state; domestic foundations of American power and its projection abroad, including constitutional framework, economic developments, rise of the state, role of media, public opinion, civilian-military relations; concepts of race, ethnic identifications, and religious and political beliefs have shaped understandings of patriotism, national interest, international responsibility; great debates in which American national identity and purpose are renegotiated.

16A:156 Major Topics in U.S. Foreign Policy 3 s.h.
Continuation of 16A:152; select themes in the history of U.S. foreign policy studied in greater detail; examination of major conflicts (i.e., World War Two, the Cold War or the Vietnam War, and recent engagements in the Middle East), drawing from a wide range of primary sources, film material, and secondary material.

16A:158 History of American Society 1820-1920 3-4 s.h.
Social foundation of the Civil War, Reconstruction; emergence of industrial and urban society, immigration, agrarian and working class protest, segregation, social reform, progressivism, nationalism, roots of imperialism.

16A:159 Warfare in American History: 1492-1924 3 s.h.
Impact of wars fought in North America on the development of American politics, society, and culture, from the arrival of Columbus to early 20th century.

16A:160 North America in the Atlantic World 3 s.h.

16A:161 Colonial North America, ca. 1600-1775 3 s.h.
Introduction to major themes in colonial American history prior to the American Revolution.

16A:162 American Revolutionary Period 1740-1789 3 s.h.
Political, military history of colonies 1754-1776; imperial upheaval; building a new nation; creation of federal system.

16A:163 Native Americans in the Age of Empires, ca. 1500-1815 3 s.h.
Overview of major issues in Native American history during the period of European Imperialism in North America. Recommended: junior or senior standing.

16A:165 The Gilded Age in America 3 s.h.
Emergence of industrial, urban America, from Civil War through 1890s; emphasis on social, political developments.

16A:166 The Progressive Era in America 3 s.h.
Protest and reform, imperialism, World War I, from 1890s to 1920.

16A:167 The New Era and the New Deal 1920-1940 3 s.h.
United States between the wars; emphasis on New Era system, impact of the Great Depression and response by the Hoover administration, the New Deal.

16A:168 The Contemporary U.S. 1940-Present 3 s.h.
United States as a global power; emphasis on World War II and Cold War, recent patterns of social and economic change, politics of 1950s, 1960s.

16A:171 U.S. Women's History to 1870 3 s.h.
American history through women's eyes; interaction of biology, economics, politics, ideology; how traditional historical generalizations change when women's experience is considered; legal history, women's education. Same as 131:171.

16A:175 Family, Gender, and Constitutional History 3 s.h.
Same as 091:252.

16A:176 U.S. Legal History 3 s.h.
History of the law in the United States, as it developed from era of the Revolution to present; interaction of courts and legislatures with social movements; readings on court decisions, social histories, fiction (film and prose).

16A:184 Black Global Metropolis: Sexual History 3 s.h.
Dispersion of people of African descent into the global metropolis, from expansion of port cities in the slave trade to industrialization of European and American cities, decolonization of the Third World, and proliferation of spatial cultures in contemporary geography; readings cover prostitution in colonial New York, sexual danger in Victorian London, jazz age Chicago, sexual psyches in Algiers, black gay expatriates in Paris, social science in Harlem and Puerto Rico ghettos, black/white sex in Johannesburg, transsexuals in Rio de Janeiro, Black Panther sexual politics in urban America, global hip-hop sexualities. Same as 129:184, 154:184.

16A:185 Themes in African American History 3 s.h.
Same as 129:189.

16A:188 African American History 1865-Present 3 s.h.
African American history since Reconstruction; survey of African American politics and society from Reconstruction to present. Same as 129:187.

European History

16E:065 Europe Since 1945 3 s.h.
Europe since World War II: recovery, cold war, social and economic change, global perspectives.

16E:101 Ancient Egypt and the Ancient Near East 3 s.h.
Same as 20E:101.

16E:102 Food in Ancient Mediterranean Society 3 s.h.
Practices and values influenced by consumption and production of food in ancient Mediterranean societies; varied topics, including methods of food production and distribution, hierarchies of status as associated with food, food and ethnic identity, food and health, food and religion; focus on classical Greek and Roman society, also Egypt, the ancient Near East, and Persia; group presentations, several short papers, research project. Recommended: familiarity with Greek and Roman civilization and history. Same as 20E:136.

16E:104 The World of Ancient Greece 3 s.h.

16E:106 Warfare in Ancient Mediterranean Society 3 s.h.
Same as 20E:106.

16E:107 The Hellenistic World and Rome 3 s.h.
Social, economic, political, intellectual history of Graeco-Roman world, from fourth century B.C.E. to Justinian's reign. GE: Foreign Civilization & Culture.

16E:108 The Twelfth Century Renaissance 3 s.h.
Social, economic, intellectual, and cultural rebirth of Europe in the 12th century; Latin learning and education; developments in vernacular literature, art, architecture, new religious orders and institutions, pilgrimage and Crusade.

Introduction to history of polities and peoples of western Eurasia from 10th century to Russian Revolution; formation and vicissitudes of the Russian Empire; ethnogenesis in western Eurasia; origins of the Rus’, Kievan Rus’ and its competitors, the Mongol invasion of Rus’, rise of Muscovy, Muscovite political system, birth of the Russian empire, Russian empire during republicanism and nationalism.

16E:178 Soviet Union 1917-1945
Revolution, foundation of Soviet Union; Leninism; major political, social, ideological developments during Stalinist period—collectivization, industrialization, terror; nationalities, foreign policy; World War II; Cold War; socialist state system. GE: Foreign Civilization & Culture.

16E:185 First World War
Social, economic, political, technological, military aspects of causes, conduct, consequences of war of 1914-18; fiction, contemporary documents, historical works, films.

For Graduate Students

016:201 First-Year Graduate Colloquium
Introduction to history graduate program.

016:202 Introduction to New Media in the Humanities and Social Sciences
Use of New Media software in research, presentation, and instruction; includes HTML editors (Dreamweaver), wikis (Confluence), blogs (WordPress), collaborative mark-up programs (CommentPress), graphics editors (Illustrator), map editors (MapPoint, ArcView), photographic editors (Photoshop), audio editors (Garage Band, Soundbooth, Audio Hijack Pro), video editors (iMovie, Premiere Pro, Photo-To-Movie), and animation editors (Flash); projects.

016:204 Readings: Slavery and Emancipation

016:205 Gender and Race in Nineteenth-Century U.S.
Same as 129:205, 131:206.

016:207 The American Civil War in History and Memory

016:209 Seminar: Medieval Social and Economic History

016:210 Readings: Medieval Women

016:211 Seminar: Medieval Intellectual History

016:212 Readings: Medieval Intellectual History

016:213 Seminar: History of Science

016:214 Readings: Medieval and Early Modern Universities

016:215 Graduate Readings: Monastic History
History of Christian monasticism in the medieval west; the developing monastic and religious orders, nuns of those groups; tertiaries, beguines, other orthodox penitent movements from the development of Christianity to the Reformation.

016:217 Source Criticism for Medieval Studies

016:218 Medieval Latin Paleography
016:220 Research Seminar
Research for students in all areas of history.

016:223 Seminar: Reformation Culture and Theology
Culture and theology of 16th-century Europe. Same as 032:223.

016:224 Seminar: History of Disability

016:225 Readings: History of Sexuality
History of sexuality within the family, its move into the marketplace; social customs and taboos, methods of birth control and abortion, religion, medical and psychological writings, state policies. Same as 131:225.

016:228 Readings: History of Feminisms
Same as 131:228.

016:229 Readings in the Arab Israeli Conflict

016:230 Readings in Modern Middle East History

016:231 Seminar: African History
Themes in African precolonial and modern history.

016:232 Readings in African History

016:233 Readings: Women, Men, and Gender in Modern Europe
Same as 131:233.

016:234 Readings: Colonialism and Empire in European History

016:235 Seminar: Modern Europe

016:236 Readings: Modern European History

016:237 European Encounters with North America
History of European-American relations over the past three hundred years; reading of primary texts such as de Tocqueville's *Democracy in America* and secondary works on Europeans' interests in North America and their confrontations with the United States.

016:238 Readings in the History of Modern France

016:239 Readings: War and Society in Modern Europe
Preparation, conduct, and aftermath of war; social-historical examination; conflicts on European territory, colonial wars, and wars of decolonization, from French Revolution through late 20th century.

016:242 Readings: British Imperialism

Same as 149:243.

016:244 Crossing Borders Proseminar

016:246 United States in the World
Historiographies that situate modern U.S. history in a global context; how historians study the American past beyond traditional, nation-centered frames; transnational histories of migration, nativism and exclusion; social movements; colonial empire-building; commercial and cultural Americanization; transfer of policy ideas; military occupations; decolonization; Cold War's impact on social reform; post-9/11 moment.
016:247 Crossing Borders Seminar

016:248 Seminar: Research in Race and Ethnicity
arr.

016:249 Teaching Seminar: Graduate Instructors
Issues and methods for effective history teaching at the college level.

016:250 Readings: History of Medicine and Health
arr.

016:251 Seminar: History of Medicine and Health
2-4 s.h.

016:254 Teaching Proseminar
2-4 s.h.
Preparation for leading undergraduate discussion sections for 016:001 - 016:003 Western Civilization I-III; specific subject matter preparation similar to that offered in graduate readings courses; for first-time graduate teaching assistants.

016:256 Theories of World History
Macrophistorical theories of world history; can a prominent theory or combination of theories explain the social evolution of humankind over hundreds of thousands of years; how to periodize world history; does history have a direction, and if so, what direction; the future of humankind.

016:259 Seminar: Interpreting Oral Histories
Interpretations and methods applied by historians in various world regions to different forms of oral history, from old oral traditions to contemporary autobiographical testimony. Same as 129:259.

016:260 Readings: Comparative Labor History
arr.

016:261 Seminar: American Colonial History
arr.

016:262 Readings: American Colonial History
arr.

016:263 The Art and Craft of Historical Writing
Focus on improving students' skills in historical writing; readings from exemplary texts, ancient to contemporary; all aspects of historical writing, from sentence composition and paragraph structure to evidence and narrative voice.

016:264 Seminar: Social History of the American Working Class
arr.

016:265 Seminar: American Social History
arr.

016:266 Readings: The Gilded Age and the Progressive Era
arr.

016:267 Seminar: Contemporary United States
arr.

016:268 Readings: Modern United States
arr.

016:269 Readings in Transnational U.S. History
Emerging historiographies that problematize national frameworks of history writing and reexamine U.S. history from transnational and global perspectives; methodological works on transnational, imperial, and global history; literatures on transnational migration, global production and trade, social movements, intercultural borrowing and exchange, and empire-building.

016:270 Readings in the History of Women and Gender in the U.S.A.
Same as 131:270.

016:271 Seminar: American Frontier
arr.

016:272 Readings: The American Frontier
arr.
016:273 Readings in American Social History
arr.

016:275 Seminar: American Religious Thought
Same as 032:213.
arr.

016:276 Seminar: Puritanism
Same as 032:214.
arr.

016:277 Feminist Research Seminar
Feminist research methodologies; how to conduct original research, write a research proposal and research paper, read and criticize others' work. Repeatable. Same as 131:204.
arr.

016:278 Research in Transnational U.S. History
Experience framing, organizing, and carrying out an original investigation on a theme in U.S. transnational history, followed by review and discussion of drafts; opportunity to explore transnational methodologies while developing professional skills of literature review, source interpretation, and collegial critique.
arr.

016:279 Seminar: Gender and Sexuality in U.S. Law
Same as 091:627.
arr.

016:280 Readings in Latina/o History
Introduction to major works and recent scholarship in Latina/Latino history.
ar.

016:281 Readings in Borderlands History
Comparative borderlands; articles on diverse topics from borderland regions worldwide (main focus on U.S.-Mexico borderlands, with inclusion of European, Asian, African, and Latin American borderlands); analysis of each article for its thesis, research questions, methodology, primary sources, and weaknesses; seminar.
ar.

016:284 Seminar: History of Women and Gender
Opportunity to pursue research for a single paper, M.A. thesis, or doctoral dissertation in the history of women and gender in the United States; interdisciplinary and internationally comparative projects; meetings and evaluations with attention to the craft of writing.
ar.

016:285 Readings: Gender in Latin American History
Same as 131:285.
ar.

016:286 Law and the Civil Rights Movement in Alabama 1955-65
Alabama and civil rights, from the Montgomery Bus boycott to the Selma March, major civil rights organizations and their most visible leaders, fair hearings for constitutional challenges in the Alabama federal court, courageous local lawyers, and resistance to the dismantling of segregation embodied by George C. Wallace; significance of law and legal institutions in advancing or retarding a political movement of extraordinary significance, complexity, and volatility; impact of legal developments arising from the Civil Rights Movement on other protest/reform movements in subsequent periods; perspectives from recent literature commemorating Brown v. Board of Education. Same as 091:652.
ar.

016:287 Readings: African American Women's History
Same as 129:287, 131:287.
ar.

016:288 Readings: Latin American History
Same as 035:247.
ar.

016:289 Archives Master Course
1 s.h.
ar.

016:290 Seminar: Post-Comprehensive
Historical fields, methodologies; emphasis on presentation, criticism of research materials. Prerequisite: Ph.D. comprehensive exams passed.
ar.

016:292 Readings in Chinese History
arr.
Same as 039:258.

016:294 Readings: Japanese History
Same as 39J:257.

016:295 Readings in Modern India

016:296 Individual Study: Graduate

016:297 Thesis

016:298 Predissertation Seminar
Preparing for dissertation work for students in all areas of history; thesis topic, relevant literature in the topic field, potential sources, primary research strategy, sources of research funding, research proposal; preparation for submitting applications for dissertation research fellowships and beginning of completing the thesis prospectus.

016:299 History Workshop: Theory and Interpretation
Integrative Physiology

Chair: Kevin C. Kregel

Professors:
- John P. Albright (Orthopaedics and Rehabilitation/Integrative Physiology)
- Annunziato Amendola (Orthopaedics and Rehabilitation/Integrative Physiology)
- Joseph A. Buckwalter (Orthopaedics and Rehabilitation/Integrative Physiology)
- Warren G. Darling (Integrative Physiology/Physical Therapy and Rehabilitation Science)
- Alan K. Johnson (Psychology/Integrative Physiology)
- Kevin C. Kregel
- Jerry A. Maynard (Integrative Physiology/Orthopaedics and Rehabilitation)
- Kenneth E. Mobily (Leisure Studies/Integrative Physiology)

Professor emeritus: Donald R. Casady

Associate professors:
- Kelly J. Cole (Integrative Physiology/Physical Therapy and Rehabilitation Science)
- Gina C. Schatteman
- Don D. Sheriff
- Harald Stauss

Associate professors emeriti:
- Gary F. Hansen
- N. Richard Hozaepfel

Assistant professor:
- Michel Ladouceur

Adjunct assistant professors:
- Jennifer L. Fagenbaum
- Shawn W. Flanagan
- Michael C. Lyons

Adjunct instructors:
- Matthew R. Doyle
- Diane L. Rotella
- Jennie L. Sertterh
- Michael A. Shaffer

Lecturers:
- Ray F. Fagenbaum
- Danny T. Foster
- Clayton R. Peterson
- Marc A. Pizzimenti

Undergraduate degrees:
- B.S. in Integrative Physiology, Athletic Training
- Minor in Integrative Physiology

Graduate degrees:
- M.S. in Exercise Science
- Ph.D. in Integrative Physiology

Web site: http://www.uiowa.edu/~iphysio/

The Department of Integrative Physiology offers undergraduate and graduate programs in integrative physiology. Graduate students may choose from five different areas of specialization for the M.S. with thesis, and from four different areas for the Ph.D. The department also offers an undergraduate major in athletic training, in conjunction with the Department of Orthopaedics and Rehabilitation in the Carver College of Medicine.

Undergraduate Programs

The Department of Integrative Physiology offers a Bachelor of Science in integrative physiology and in athletic training. It also offers a minor in integrative physiology.

Bachelor of Science in Integrative Physiology

The Bachelor of Science in integrative physiology requires a minimum of 120 s.h., including 63 s.h. of work for the major and the prerequisite courses for admission to the major. The program is designed primarily for individuals who intend to continue their education beyond the B.S. in the health professions, including medicine, dentistry, optometry, physician assistant, physical therapy, and podiatry, or for those who intend to pursue graduate degrees in basic life sciences.

The integrative physiology major includes study in anatomy, biomechanics, integrative physiology, neural control of movement, and the cognate areas of biology, chemistry, mathematics, physics, and statistics. Students also must complete the College of Liberal Arts and Sciences General Education Program.

Admission to the major in integrative physiology is selective; students must apply and be admitted to the major.

Prerequisites for Admission to the Major

Students must complete the following course work before they may be admitted to the major in integrative physiology. Completion of these requirements does not guarantee admission to the major.

- 002:010 Principles of Biology I (counts toward the major) 4 s.h.
- 004:011 Principles of Chemistry I (counts toward the major) 4 s.h.

One of these:
- 22M:016 Calculus for the Biological Sciences 4 s.h.
- 22M:025 Calculus I 4 s.h.
- A more advanced calculus course

One of these:
- 010:001-010:002 Rhetoric I-II 8 s.h.
- 010:003 Accelerated Rhetoric 4 s.h.

Students denied admission to the major may reapply in a subsequent semester.

GENERAL EDUCATION COURSES

The department recommends that B.S. students in integrative physiology fulfill the College of Liberal Arts and Sciences General Education Program natural sciences requirement by taking 004:011 Principles of Chemistry I,
004:012 Principles of Chemistry II, and 002:010 Principles of Biology I. It also recommends completing the General Education Program social sciences requirement with 031:001 Elementary Psychology. Transfer credit for course work in the major requires the approval of the undergraduate academic advisor.

Chemistry

Students must complete at least 4 s.h. beyond 004:011 Principles of Chemistry I, which is prerequisite for admission to the major and for 004:012 Principles of Chemistry II.
004:011 Principles of Chemistry I (prerequisite for admission to major) 4 s.h.
004:012 Principles of Chemistry II 4 s.h.

These additional courses are highly recommended.

004:121 Organic Chemistry I 3 s.h.
004:122 Organic Chemistry II 3 s.h.
004:141 Organic Chemistry Laboratory 3 s.h.

Mathematics

One of these:

22M:016 Calculus for the Biological Sciences 4 s.h.
22M:025 Calculus I 4 s.h.
22M:031 Engineering Mathematics I: Single Variable Calculus 4 s.h.

Physics

One of these sequences:

029:011-029:012 College Physics I-II 8 s.h.
029:081-029:082 Introductory Physics I-II 8 s.h.

Statistics

At least 3 s.h. from these:

07P:143 Introduction to Statistical Methods 3 s.h.
22S:101 Biostatistics 3 s.h.
22S:102 Introduction to Statistical Methods 3 s.h.
171:161 Introduction to Biostatistics 3 s.h.

RECOMMENDED ELECTIVES

The department recommends that students choose from the following electives in order to complete the 120 s.h. required for a B.S. in the College of Liberal Arts and Sciences. Courses in biology and chemistry also are listed under "Requirements in Other Subjects (Cognates)."

Anthropology

213:190 Human Osteology 3 s.h.

Biochemistry

099:110 Biochemistry 3 s.h.
099:120 Biochemistry and Molecular Biology I 3 s.h.
099:130 Biochemistry and Molecular Biology II 3 s.h.
099:140 Experimental Biochemistry 4 s.h.

Biology

002:108 Vertebrate Zoology 4 s.h.
002:114 Cell Biology 3 s.h.
002:124 Animal Physiology 3 s.h.
002:128 Fundamental Genetics 4 s.h.
002:143 Animal Behavior 4 s.h.
002:145 Introduction to Neurobiology 3 s.h.
002:150 Endocrinology 3 s.h.

Bachelor of Science in Athletic Training

The Bachelor of Science in athletic training requires a minimum of 120 s.h., including 57-58 s.h. of work for the major. The program provides concentrated studies and clinical experiences leading to national certification in athletic training.

Athletic trainers work with physically active individuals, including athletes, to help prevent injuries, offer advice about appropriate equipment, recognize and evaluate injuries, administer emergency treatment, and determine need for specialized medical care. Athletic trainers also work as part of health care teams involved in rehabilitation after injuries sustained in sports or physical activity.

Employment opportunities for graduates include work as health care professionals for sports medicine clinics and hospitals. Additional education usually is required for employment with professional teams as well as for university, college, and secondary school athletic teams. Teacher certification is recommended but not required.

Students who have not formally contacted the athletic training program director before enrolling at The University of Iowa should talk to an athletic training advisor or their academic advisor upon entering the University. Early advising for course selection is vital to ensure that students take prerequisites and sequenced skill development courses in the right order. Students should begin taking prerequisites for required major courses during their first year and should complete their final prerequisites after admission to the athletic training major.

In addition to requirements for the major, students must complete the College of Liberal Arts and Sciences General Education Program.

For current information on rules, procedures, and curriculum, contact the athletic training program director.

PREREQUISITE FOR APPLICATION

027:096 Exploring Athletic Training 1 s.h.

PREREQUISITES FOR COURSE WORK IN THE MAJOR

Prerequisites total 34-36 s.h., as follows:

One of these:

002:002 Introductory Animal Biology 4 s.h.
002:010 Principles of Biology I 4 s.h.

One of these sequences:

004:007-004:008 General Chemistry I-II 6 s.h.
004:011-004:012 Principles of Chemistry I-II 8 s.h.

One of these:

029:008 Basic Physics 4 s.h.
029:011 College Physics I 4 s.h.

All of these:

07P:075 Educational Psychology and Measurement 3 s.h.
22S:025/07P:025 Elementary Statistics and Inference 3 s.h.
027:053 Human Anatomy 3 s.h.
027:057 Basic Athletic Training 3 s.h.
028:032 First Aid and CPR (or community certifications) 2 s.h.
028:075 Health in Everyday Life (pathology is recommended substitute) 3 s.h.
031:001 Elementary Psychology 3 s.h.

REQUIRED COURSE WORK IN THE MAJOR

Students complete 57-58 s.h., as follows.

One of these:

027:140 Exercise Physiology for Practitioners 3 s.h.
027:141 Exercise Physiology 3 s.h.

One of these:

071:120 Drugs: Their Nature, Action, and Use 2 s.h.
071:130 Drug Mechanisms and Actions 3 s.h.

All of these:

07C:199 Counseling for Related Professions 3 s.h.
027:036-027:037 Practicum in Athletic Training I-II 4 s.h.
027:130 Human Physiology 3 s.h.
027:143 Physiology of Nutrition (or equivalent) 3 s.h.
027:171 Administration of Athletic Training Programs 2 s.h.
027:172 Clinical Sciences I 2 s.h.
027:180 Advanced Emergency Care for Athletic Trainers 2 s.h.
027:182-027:183 Clinical Sciences III-IV 6 s.h.
027:185 Clinical Sciences V: Rehabilitation 2 s.h.
027:186 Practicum in Athletic Training III (must be taken twice) 3 s.h.
027:197 Biomechanics of Human Motion 4 s.h.
027:253 Advanced Human Anatomy 6 s.h.
076:187 Practicum in Athletic Training IV (must be taken twice) 4 s.h.

College of Liberal Arts and Sciences students may be admitted to the athletic training major and begin clinical experience as sophomores. Applicants to the program must meet the following requirements:

- completion of at least 11 s.h. of graded college credit, including 027:096 with a grade of C or higher; course work taken pass/fail cannot be counted; and
- a g.p.a. of at least 2.50 on all undergraduate course work.

Preference is given to applicants with high scholastic standing, strong writing skills, and varied athletic training and health care experience. A personal interview may be required; the athletic training program contacts applicants invited for interviews.

Fulfillment of admission requirements does not ensure admission to the athletic training major. The program selects candidates who appear to be best qualified for the study and practice of athletic training. Students denied admission to the major may reapply in a subsequent fall semester.
All students admitted to the major in athletic training are required to comply with entrance and periodic health screening history and immunization, which is coordinated through the program's medical director.

**Four-Year Graduation Plan**

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

Note: Students must be admitted to the integrative physiology or athletic training majors on schedule in order to complete a four-year graduation plan.

**B.S. in Integrative Physiology**

_Before the third semester begins_: calculus, one other course in the major, and at least one-quarter of the semester hours required for graduation

_Before the fifth semester begins_: at least five more courses in the major and at least one-half of the semester hours required for graduation

_Before the seventh semester begins_: at least six more courses in the major and at least three-quarters of the semester hours required for graduation

_Before the eighth semester begins_: at least two more courses in the major

_During the eighth semester_: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

**B.S. in Athletic Training**

_Before the third semester begins_: three courses in the major and at least one-quarter of the semester hours required for graduation

_Before the fifth semester begins_: six courses in the major and at least one-half of the semester hours required for graduation

_Before the seventh semester begins_: nine courses in the major and at least three-quarters of the semester hours required for graduation

_Before the eighth semester_: 12 courses in the major

_During the eighth semester_: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

**Honors**

Qualified students may earn a degree with honors in integrative physiology. Students must be members of the University of Iowa Honors Program and must maintain a cumulative University of Iowa g.p.a. of at least 3.33. They must complete the honors research course sequence, 027:198 Honors Research I and 027:199 Honors Research II, and produce a written thesis that is deposited with the University of Iowa Honors Program. Honors candidates must make an oral presentation of the research and written thesis they completed in 027:198 Honors Research I and 027:199 Honors Research II, and the research and thesis must be judged to be of honors quality in order for the candidate to graduate with honors.

**Minor**

The minor in integrative physiology requires a minimum of 15 s.h. in Department of Integrative Physiology courses, including 12 s.h. in 100-level courses. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass. Transfer credit cannot be counted toward the minor.

College-level courses in mathematics, chemistry, and biology usually are required as prerequisite work for integrative physiology courses. Students seeking a minor in integrative physiology should have sufficient preparation in the supporting sciences before they take advanced courses in the department.

Students choose courses for the minor from the following list. Bachelor of Science students majoring in integrative physiology have priority for enrollment in 027:132 Human Physiology Laboratory, 027:142 Exercise Physiology Laboratory, 027:151 Gross Anatomy Lab for Integrative Physiology, and 027:197 Biomechanics of Human Motion; other students must have special permission to enroll in these courses.

027:053 Human Anatomy 3 s.h.
027:117 Human Growth and Motor Development 3 s.h.
027:130 Human Physiology 3 s.h.
027:132 Human Physiology Laboratory (requires special permission) 2 s.h.
027:140 Exercise Physiology for Practitioners 3 s.h.
027:141 Exercise Physiology 3 s.h.
027:142 Exercise Physiology Laboratory (requires special permission) 2 s.h.
027:143 Physiology of Nutrition 3 s.h.
027:145 Cardiovascular Physiology 3 s.h.
027:146 Molecules to Malady 3 s.h.
027:150 Gross Anatomy for Integrative Physiology 3 s.h.
027:151 Gross Anatomy Lab for Integrative Physiology (requires special permission) 2 s.h.
027:153 Embryology and Connective Tissue Anatomy 2 s.h.
027:155 Skeletal Muscle Biology 3 s.h.
027:160 Motor Control I: Neurophysiological Basis 3 s.h.
027:197 Biomechanics of Human Motion (requires special permission) 4 s.h.

**Graduate Programs**

The Department of Integrative Physiology offers a Master of Science in exercise science, with or without thesis, and a Doctor of Philosophy in integrative physiology. The M.S. with thesis is a research-oriented program designed for students planning to pursue a Ph.D. The M.S. without thesis is a terminal degree intended for athletic training students.

**Master of Science with Thesis**

The Master of Science with thesis requires a minimum of 30 s.h. of graduate credit. It is a research-oriented program designed primarily as a first step in graduate study leading to the Doctor of Philosophy. It introduces students to the nature and quality of research in integrative physiology and gives them an opportunity to specialize in an area of interest.

The M.S. with thesis offers five specialization areas: anatomy, athletic training, biomechanics, exercise and integrative physiology, and motor control.

Because the M.S. with thesis is regarded as the first step toward the Ph.D., the required undergraduate background course work depends on the area in which the candidate intends to specialize for doctoral study. Specific undergraduate courses in mathematics, chemistry, physics, biology, physiology, or psychology are required as prerequisites to some areas of specialization. These courses must be approved by the M.S. advisor and the professor in charge of the student's chosen specialization area.

The M.S. with thesis requires the following course work (total of 30 s.h.).

**COURSES OUTSIDE THE SPECIALIZATION AREA**

Two of these:

027:141-027:142 Exercise Physiology - Exercise Physiology Laboratory (not for students specializing in physiology) 5 s.h.
027:153 Embryology and Connective Tissue Anatomy 2 s.h.
027:155 Skeletal Muscle Biology (not for students specializing in motor control) 3 s.h.
027:160 Motor Control I: Neurophysiological Basis (not for students specializing in motor control) 3 s.h.
027:197 Biomechanics of Human Motion (not for students specializing in biomechanics) 4 s.h.
027:253 Advanced Human Anatomy (not for students specializing in anatomy or athletic training) 6 s.h.

**CORE COURSE REQUIREMENT**

One of these:

22S:101 Biostatistics 3 s.h.
22S:102 Introduction to Statistical Methods 3 s.h.

**SPECIALIZATION AREA COURSES**
Master of Science Without Thesis

The Master of Science without thesis requires a minimum of 30 s.h. of graduate credit, with a g.p.a. of at least 3.00. It is a terminal degree, intended for athletic training students. The program provides advanced study in clinical education and research for certified athletic trainers. It emphasizes development of a base of research and education, and application of that base to the knowledge and skills of the entry-level athletic trainer. Its focus is on a health care team approach to sports medicine, medical care management, wellness, pediatric/adolescent health, and special health populations.

The following undergraduate course work (total of 30 s.h.) is required background for the M.S. nonthesis program in athletic training. Students must have a g.p.a. of 3.00 in the required background course work.

Anatomy
Human anatomy: at least 3 s.h.
Human physiology: 3 s.h.

Athletic training core
Prevention: 3 s.h.
Evaluation and recognition: 3 s.h.
Modalities and rehabilitation: 3 s.h.
Administration: 2 s.h.

Integrative physiology core
Neural control: 3 s.h.
Exercise physiology: 3 s.h.
Biomechanics or kinesiology: 3 s.h.

Electives in related areas: 3-4 s.h.

Current emergency certifications
NATA certification

For the M.S. without thesis, students must complete 20 of the required 30 s.h. in integrative physiology. The degree requires the following course work.

INTEGRATIVE PHYSIOLOGY

Three of these:

027:141 Exercise Physiology 3 s.h.
027:145 Cardiovascular Physiology 3 s.h.
027:146 Molecules to Malady 3 s.h.
027:150 Gross Anatomy for Integrative Physiology 3 s.h.
027:153 Embryology and Connective Tissue Anatomy 2 s.h.
027:155 Skeletal Muscle Biology 3 s.h.
027:160 Motor Control I: Neurophysiological Basis 3 s.h.
027:197 Biomechanics of Human Motion 4 s.h.
027:253 Advanced Human Anatomy 6 s.h.

CLINICAL RESEARCH TOOLS

07P:243/22S:148 Intermediate Statistical Methods 4 s.h.
An approved tools or special interest area course 2-4 s.h.

ATHLETIC TRAINING

027:184 Seminar in Athletic Training 1-4 s.h.
027:200 Problems (repeatable) 2 s.h.
027:202 Practicum in College Teaching 3 s.h.
### General Requirements

At least 72 s.h. of graduate credit beyond the B.A. or B.S.

At least 10 s.h. of independent research, exclusive of the thesis requirement

### Core Course Requirements

<table>

</tbody>
</table>

### Electives

Maximum of 4 s.h.

### Doctor of Philosophy

The Doctor of Philosophy in integrative physiology requires a minimum of 72 s.h. of graduate credit. Ph.D. students should have a strong background in the natural sciences, a working knowledge of statistics and research methodology, and a specific interest in at least one area of specialization in the department. Students can acquire additional knowledge of statistics and research methodology after entering the program.

The Ph.D. program offers four specialization areas: anatomy, biomechanics, integrative physiology, and motor control.

All Ph.D. students must complete a dissertation in their specialization area and must submit an appropriate manuscript of the dissertation to a refereed professional journal for publication.

Many of the courses in the specialization areas are offered by departments other than integrative physiology. Faculty members from these departments frequently serve on comprehensive examination committees and on dissertation committees for the initial presentation of a candidate’s prospectus. They also participate in the final oral examination.

The Ph.D. requires the following course work.

### Scientific Area Courses

In order to ensure that integrative physiology Ph.D. students obtain a breadth of knowledge over the key scientific areas that constitute the basis of the major, each student must complete at least one course in each specialization area. This requirement may be met by transfer credit if approved by the student’s advisor. The areas of specialization are anatomy, biomechanics, integrative physiology, and motor control.

#### Specializations

Candidates are expected to obtain a broad knowledge base within their area of specialization. This normally entails approximately 30 s.h. of course work. The following courses are recommended choices for each area of specialization.

<table>
<thead>
<tr>

099:110 Biochemistry  3 s.h.
099:120 Biochemistry and Molecular Biology I  3 s.h.
099:130 Biochemistry and Molecular Biology II  3 s.h.
099:140 Experimental Biochemistry  4 s.h.

MOTOR CONTROL

027:155 Skeletal Muscle Biology  3 s.h.
027:160 Motor Control I: Neurophysiological Basis  3 s.h.
027:197 Biomechanics of Human Motion  4 s.h.
027:253 Advanced Human Anatomy  6 s.h.
027:314 Seminar in Motor Control  1 s.h.
051:150 Musculoskeletal Biomechanics  3 s.h.
057:019 Mechanics of Deformable Bodies  3 s.h.
060:234 Medical Neuroscience  4 s.h.
101:212 Biomedical Instrumentation and Measurement  4 s.h.
101:275 Analysis of Sensori-Motor Systems in Health and Disease  3 s.h.
101:285 Biomechanical Analysis in Rehabilitation  3 s.h.
Courses chosen from the following areas: computer science, neuroscience, anatomy, exercise physiology, psychology

Admission

Admission to the graduate programs in exercise science (M.S.) and integrative physiology (Ph.D.) is based on grade-point average and score on the Graduate Record Examination (GRE) General Test. Applicants to the M.S. programs must have an undergraduate g.p.a. of at least 3.00. Applicants to the Ph.D. program must have a g.p.a. of at least 3.00 on both undergraduate and previous graduate work.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

Deadlines for admission applications are October 15, March 15, and May 15; notification is made approximately two months after the respective application deadline.

Facilities

Classroom and research laboratories for anatomy, biomechanics, exercise physiology, and motor control are located in the Field House and in other buildings on campus. They provide excellent facilities for instruction and research at both the undergraduate and graduate levels.

Cooperative efforts with other departments facilitate specialization by allowing integrative physiology students to use additional special facilities and research equipment in other departments on campus (e.g., biology, biochemistry, molecular physiology and biophysics, orthopaedic surgery, internal medicine, pharmacology, and the College of Engineering).

Integrative Physiology Courses

Primarily for Undergraduates

027:036 Practicum in Athletic Training I  
Basic clinical skill instruction, evaluation, and integration for athletic trainers. Prerequisite: athletic training major.  
2 s.h.

027:037 Practicum in Athletic Training II  
Integration of basic physical skills and orientation to traditional settings; clinical experience for first-year students arranged through the athletic training program. Prerequisite: grade of C or higher in 027:036.  
2 s.h.

027:053 Human Anatomy  
General human anatomy covering most systems of the body. GE: Natural Sciences.  
3 s.h.

027:054 Human Anatomy Laboratory  
All major systems of the human body, understood through computer-generated images, models, histological slides, anatomical specimens.  
1 s.h.

027:056 First Aid and CPR  
American Red Cross certification: basic first aid, CPR procedures.  
2 s.h.

027:057 Basic Athletic Training  
Basic pathology, epidemiology, materials biology for prevention and immediate care of athletic injuries.  
3 s.h.

027:090 Scientific Basis of Human Movement  
Survey of scientific principles that underlie human movement; emphasis on biomechanical and physiological contributions.  
3 s.h.

027:096 Exploring Athletic Training  
Exploration of professional preparation for athletic trainers; application, career opportunities, professional organizations, awareness of basic athletic training principles.  
arr.

027:117 Human Growth and Motor Development  
3 s.h.
Human growth and biological maturation; focus on motor development from birth through puberty. Offered fall semesters. Recommended: anatomy, human physiology, or animal biology course.

027:198 Honors Research I
Research for honors thesis; selection of faculty mentor, preparation of research proposal, written and oral presentations of research proposal, literature review, participation in experiments designed to develop laboratory skills for research; first of a two-semester sequence. Prerequisite: honors standing.

027:199 Honors Research II
Completion of honors research begun in 027:198, analysis of data, writing and oral presentation of honors thesis; second of a two-semester sequence. Prerequisites: honors standing and grade of B or higher in 027:198.

For Undergraduate and Graduate Students

027:130 Human Physiology
Organ system approach to physiology, with focus on normal function of the human body; information on all levels of integration, from submolecular to whole organism, with emphasis on how the intact organism functions. GE: Natural Sciences.

027:132 Human Physiology Laboratory
Fundamental laboratory measurements; major physiological systems, experimental design, presentation of experimental data. Pre- or corequisite: 027:130 or equivalent.

027:140 Exercise Physiology for Practitioners
Effects of acute and chronic exercise on different physiological systems (energy, respiratory, circulatory, endocrine); fitness evaluation, weight-control strategies, training programs; preparation for ACSM Fitness Instructor Certification. Recommended: human physiology course.

027:141 Exercise Physiology
Mechanisms responsible for the acute and chronic effects of exercise on the different organ systems of the body. Offered fall semesters. Prerequisite: 027:130 or equivalent.

027:142 Exercise Physiology Laboratory
Supplements 027:141; principles of scientific investigation used to demonstrate acute and chronic effects of exercise. Prerequisite: consent of instructor.

027:143 Physiology of Nutrition
Metabolic and biological aspects of human energy production, relationship to energy consumption; systems or integrative approach.

027:145 Cardiovascular Physiology
Structure and function of cardiovascular system; heart, microcirculation, hemodynamics, regional circulation, reflex integration, regulation during physical stress. Prerequisite: 027:130 or equivalent. Recommended: calculus and physics.

027:146 Molecules to Malady
Changes in single molecules that lead to systemic physiological alterations in mammals; relationship of these changes to development, aging, exercise, and specific diseases; current methodologies for studying mammalian genetics and physiology. Prerequisite: 027:130 or equivalent.

027:148 Physiology of Aging
Aging's effects on cells, tissues, and organs; how aging influences function of major body organ systems and the whole organism; physiological mechanisms that underlie agerelated changes in body function and performance; integrative approach with focus on human aging. Prerequisites: 027:053 and 027:130, or equivalents.

027:150 Gross Anatomy for Integrative Physiology
Major systems of the body with emphasis on the nervous, muscular, connective tissue systems related to movement. Offered fall semesters. Prerequisite: integrative physiology major.
<table>
<thead>

<tbody>
<tr>
<td>027:151</td>
<td>Gross Anatomy Lab for Integrative Physiology</td>
<td>2 s.h.</td>
<td>Major systems of the body with emphasis on nervous, cardiovascular, muscular systems related to movement. Offered fall semesters. Prerequisite: integrative physiology major.</td>
</tr>
<tr>
<td>027:153</td>
<td>Embryology and Connective Tissue Anatomy</td>
<td>2 s.h.</td>
<td>Structure, growth, and development of connective, muscular, nerve tissues from embryologic to adult stages; specific joints, their structure and movements. Offered spring semesters.</td>
</tr>
<tr>
<td>027:155</td>
<td>Skeletal Muscle Biology</td>
<td>3 s.h.</td>
<td>Skeletal muscle structure, contractile mechanisms, production of movement, biomechanical properties; adaptation to increased use, disuse, injury. Offered spring semesters.</td>
</tr>
<tr>
<td>027:160</td>
<td>Motor Control I: Neurophysiological Basis</td>
<td>3 s.h.</td>
<td>Neuroanatomical and neurophysiological bases of human motor control; mechanisms for locomotion and posture, control of arm and hand movements, role of sensory information. Offered spring semesters. Prerequisite: anatomy or human physiology course.</td>
</tr>
<tr>
<td>027:165</td>
<td>Introduction to Human Pharmacology</td>
<td>3 s.h.</td>
<td>General pharmacology (e.g., administration, distribution, and elimination of drugs, dose response curves, adverse effects, placebos, homeopathy); pharmacotherapy of selected human diseases, pathophysiologic aspects of the disease, how different classes of drugs modify pathophysiologic effects to restore health or reduce disease's impact; focus on mechanisms of drug actions in humans; adverse effects, pharmacokinetic considerations, drug interactions; how to write prescriptions. Prerequisite: 027:130 or equivalent.</td>
</tr>
<tr>
<td>027:171</td>
<td>Administration of Athletic Training Programs</td>
<td>2 s.h.</td>
<td>Health care supervision, professional athletic training responsibilities, philosophies in athletic health care. Offered fall semesters. Prerequisite: 027:057.</td>
</tr>
<tr>
<td>027:172</td>
<td>Clinical Sciences I</td>
<td>2 s.h.</td>
<td>Theoretical knowledge base in therapeutic modalities. Offered spring semesters. Prerequisite: grade of C or higher in 027:036.</td>

<tr>
<td>027:173</td>
<td>Clinical Sciences II</td>
<td>1 s.h.</td>
<td>Orientation for musculoskeletal evaluation and equipment fit techniques. Offered summer sessions. Prerequisites: 027:172 and athletic training major.</td>
</tr>
<tr>
<td>027:180</td>
<td>Advanced Emergency Care for Athletic Trainers</td>
<td>1-2 s.h.</td>
<td>Coordinated initial professional emergency response certifications for athletic trainers; recertification for those holding valid certifications. Prerequisites: Red Cross First Aid and CPR certifications, or consent of instructor.</td>
</tr>
<tr>
<td>027:182</td>
<td>Clinical Sciences III</td>
<td>3 s.h.</td>
<td>Theoretical and practical skill development in the areas of musculoskeletal evaluation for ankle, knee, shoulder, and upper extremity. Offered fall semesters. Prerequisites: 027:173 and athletic training major.</td>
</tr>
<tr>
<td>027:183</td>
<td>Clinical Sciences IV</td>
<td>3 s.h.</td>
<td>Continuation of musculoskeletal evaluation, completion of EENT, chest, abdomen, and dermatologic evaluation; integration of rehabilitation programs. Offered spring semesters. Prerequisite: grade of C or higher in 027:182.</td>
</tr>
<tr>
<td>027:184</td>
<td>Seminar in Athletic Training</td>
<td>1-4 s.h.</td>
<td>Educational issues faced by approved clinical instructors in athletic training education programs. Offered fall semesters. Prerequisite: graduate standing.</td>
</tr>
<tr>
<td>027:185</td>
<td>Clinical Sciences V: Rehabilitation</td>
<td>2 s.h.</td>
<td>Rehabilitation for athletic trainers based on the theory and principles of therapeutic exercise; application of current research concepts. Prerequisites: 027:172 and athletic training major. Corequisite: 027:182.</td>
</tr>
<tr>
<td>027:186</td>
<td>Practicum in Athletic Training III</td>
<td>3 s.h.</td>
<td>Advanced clinical skill instruction, evaluation, and integration for athletic trainers. Prerequisite: grade of C or higher in 027:037.</td>
</tr>
</tbody>
</table>
027:195 Undergraduate Independent Study
Library or laboratory research related to a specific topic in human physiology, normally culminating with a written manuscript; work directed by a faculty member.

027:197 Biomechanics of Human Motion
Application of the principles of mechanics to investigation of human motion in two dimensions; system modeling, force system and equilibrium analysis, particle and rigid body kinematics, Newton's and Euler's equations of motion, work-energy and impulse-momentum integral principles. Offered spring semesters.

Primarily for Graduate Students

027:200 Problems
Repeatable. Prerequisite: consent of instructor.

027:201 Research
Repeatable. Prerequisite: consent of instructor.

027:202 Practicum in College Teaching
Prerequisite: consent of instructor.

027:241 Integrative Physiology Seminar
Current topics in cardiovascular physiology, vascular biology, free radical biology. Repeatable.

027:253 Advanced Human Anatomy
Offered summer sessions.

027:301 Non-Thesis Seminar
For candidates for the M.S. without thesis. Offered spring semesters.

027:314 Seminar in Motor Control
Current topics in neural control of movement, biomechanics, and rehabilitation sciences. Repeatable.

027:404 Thesis: M.S.
Repeatable.

027:405 Thesis: Ph.D.
Repeatable.
Interdepartmental Studies

Coordinator: David Gould
Degree: B.A. in Interdepartmental Studies
Web site: http://www.uiowa.edu/~indepart

The Interdepartmental Studies Program (ISP) provides an alternative to traditional undergraduate majors. It gives students the opportunity to design an individualized study plan or to choose a preapproved plan in one of three areas—business studies, health science, or recreation management. Each plan includes course work from a variety of departments.

Undergraduate Program

The program offers a Bachelor of Arts in interdepartmental studies. It does not offer a minor.

B.A. with Double Major or Second Degree

Interdepartmental studies students may earn a second Bachelor of Arts major (a double major). They may count a maximum of two of the same courses toward the requirements of both majors.

Students also may earn a second undergraduate degree (for example, a Bachelor of Science) while working toward a B.A. in interdepartmental studies.

See Earning Two or More Majors and Earning Multiple Undergraduate Degrees under Earning a Degree in the CLAS Student Academic Handbook.

B.A. with Certificates, Minors

Interdepartmental studies students also may earn certificates and minors in other programs, departments, or colleges. Courses used to meet requirements for a minor may not be counted toward the requirements for the major in interdepartmental studies.

See Certificates and Minors under Earning a Degree in the CLAS Student Academic Handbook.

Bachelor of Arts

The Bachelor of Arts in interdepartmental studies requires a minimum of 120 s.h., including 36-40 s.h. of work for the major. Students choose one of four tracks: individualized plan of study, business studies, health science, or recreation management. Credit required for the major depends on choice of track.

The individualized plan of study track requires students to design and gain approval for their own study plan. The business studies track, health science track, and recreation management track each provide a preapproved plan of study and a choice of emphasis areas.

Students must complete the College of Liberal Arts and Sciences General Education Program.

Individualized Plan of Study Track

The individualized plan of study track requires a minimum of 36 s.h. of work for the major, all taken at The University of Iowa. Students who choose the individualized plan of study track build their own study plan, creating a unique major that speaks to interests across departments and that integrates varied approaches to a particular topic (e.g., aging studies, international business, children's studies, environmental issues, health issues).

Students must submit their study plan for approval. The plan must include an essay that provides a clear statement of the area of intellectual focus; the reasons for preferring the ISP to any departmental program; a concrete discussion of how the advanced courses relate to each other, to personal interests, and to the central focus of the study plan; a description of academic goals for the bachelor's degree; a list of advanced-level course work already completed; and a list of advanced-level course work planned for all remaining semesters.

Each study plan is approved by a faculty advisory committee. Reviews are held once a semester. Deadlines are posted on the Interdepartmental Studies Program web site.

If the committee does not grant approval, the study plan may be returned to the student for revisions and resubmission at the next committee meeting. In some cases, the student may be referred to an appropriate departmental major.

Students are required to take the courses approved in the study plan. A limited number of substitutions may be allowed, but only if they are clearly consistent with the area of intellectual focus in the approved study plan, and only if they are approved in advance by the ISP advisor. Unauthorized substitutions may be designated as elective course work.
Significant changes in the focus of a student's study plan require the submission and approval of a revised study plan. The student's academic advisor determines whether changes warrant a revised plan.

See the Interdepartmental Studies Program web site for up-to-date information on the individualized plan of study track and rules for submission of study plans.

Students who choose the individualized plan of study track are advised by the Interdepartmental Studies Program coordinator and work closely with the Interdepartmental Studies Program office while designing the study plan. Students who intend to submit a study plan should contact the Interdepartmental Studies Program coordinator as early as possible.

**Business Studies Track**

The business studies track requires 36-40 s.h. of work for the major. It provides a preapproved plan of study that combines a generalized business background with a choice of three emphasis areas: workplace practices and perspectives, values and ethics, and arts management. Students also have the option of proposing their own business-related emphasis area to the faculty advisory committee.

Students must have achieved second-year standing to declare the business studies track.

Business studies track students must complete foundation course work (17-19 s.h.), business electives (5-6 s.h.), and one emphasis area (15 s.h.). A minimum of 15 s.h. for the major must be completed at The University of Iowa. The Academic Advising Center advises business studies track students; contact the center for more information about requirements.

**Foundation Courses**

Foundational math--all of these:

- **22M:017 Calculus and Matrix Algebra for Business** 4 s.h.
- **22S:008 Statistics for Business** 4 s.h.
  or
- **22S:025 Elementary Statistics and Inference** 3 s.h.

Foundational economics--both of these:

- **06E:001 Principles of Microeconomics** 4 s.h.
- **06E:002 Principles of Macroeconomics** 4 s.h.

Foundational accounting--one of these:

- **06A:001 Introduction to Financial Accounting** 3 s.h.
- **06T:050 Foundations in Entrepreneurship (if not used as business elective)** 2 s.h.

**Business Electives**

Two of these:

- **06A:002 Managerial Accounting** 3 s.h.
- **06E:071 Statistics for Strategy Problems** 3 s.h.
- **06F:100 Introductory Financial Management** 3 s.h.
- **06J:047 Introduction to Law** 3 s.h.
- **06J:048 Introduction to Management** 3 s.h.
- **06K:100 Operations Management** 3 s.h.
  or
- **06K:070 Computer Analysis** 3 s.h.
- **22C:001 Computer Literacy** 3 s.h.

- **06M:100 Introduction to Marketing Strategy** 3 s.h.
Workplace Practices and Perspectives Emphasis

Students must earn 15 s.h. in their chosen emphasis area. Students who choose the workplace practices and perspectives emphasis must complete at least one course from each of four components (speaking and writing, foundations and practices, cultural diversity, and entrepreneurship). The required 15 s.h. must include 9 s.h. earned in advanced courses (100 level or above). Advanced courses for each component are listed below.

Speaking and Writing Component

At least one chosen from these or from the advanced-level courses:

- 08C:001 Creative Writing Studio Workshop 3 s.h.
- 08N:020 Introduction to Creative Nonfiction 3 s.h.
- 20E:050/08N:050 Word Power: Building English Vocabulary 3 s.h.
- 036:012 Interpersonal Communication 3 s.h.
- 036:015 Persuasive Communication 3 s.h.
- 036:016 Business and Professional Communication 3 s.h.
- 036:017 Theory and Practice of Argument 4 s.h.
- 036:020/049:042 Clothing as Nonverbal Communication 3 s.h.
- 036:021/07E:021 Oral Interpretation 3 s.h.

Advanced-level courses:

- 01J:115/033:115 What is Storytelling For? 3 s.h.
- 06B:140 Business Writing 3 s.h.
- 08A:104 Personal Writing for Non-English Majors 3 s.h.
- 08A:113 Writing for Business and Industry for Non-English Majors 3 s.h.
- 08C:023 Creative Writing 3 s.h.
- 08C:097 Fiction Writing 3 s.h.
- 08C:108 Creative Writing for New Media 3 s.h.
- 08N:080 Nonfiction Writing 3 s.h.
- 08N:104 Personal Writing 3 s.h.
- 08N:113 Writing for Business and Industry 3 s.h.
- 08N:120 Advanced Nonfiction Writing 3 s.h.
- 08N:133 Advanced Writing for Business 3 s.h.
- 036:061 Persuasion in Society 3 s.h.
- 036:158/010:141 Rhetoric and Past Public Controversy 3 s.h.
- 113:100/08L:100/103:100 Introduction to Linguistics 3 s.h.
- 145:101 Creative Writing for Business 3 s.h.

Foundations and Practices Component

At least one chosen from these or from the advanced-level courses:

- 019:090 Social Scientific Foundations of Communication 3 s.h.
- 019:091 Cultural and Historical Foundations of Communication 3 s.h.
- 019:095 Media and Consumers 3 s.h.
- 036:001 Core Concepts in Communication Studies 3 s.h.
- 113:014 Language, Culture, and Communication 3 s.h.

Advanced-level courses:

- 034:162/131:060 Work and Family Institutions 3 s.h.
- 036:070 Communication and Everyday Life 3 s.h.
- 036:074 Media and Society 3 s.h.
- 036:143/010:131 Classical Rhetoric and Greek Culture 3 s.h.

Cultural Diversity Component

At least one chosen from these or from the advanced-level courses:
01H:003 Art of Pre-Columbian America, Native America, and Oceania 3 s.h.
08G:005/149:005 Literatures of Native American Peoples 3 s.h.
08G:011 Literature and Sexualities 3 s.h.
016:040 Perspectives: Diversity in American History 3 s.h.
16A:065/129:065 Introduction to African American History 3 s.h.
025:080 Jazz Cultures in America and Abroad 3 s.h.
032:016 Religion and Liberation 3 s.h.
032:060/149:060 Introduction to Native American Religions 3 s.h.
034:018/131:018 Gender and Society 3-4 s.h.
034:066 Social Inequality 3 s.h.
113:051 Diversity in Action in American Society 1-3 s.h.
129:060 Introduction to African American Society 3 s.h.
129:061/045:045 Introduction to African American Culture 3 s.h.
131:010 Introduction to Gender, Women’s, and Sexuality Studies 3 s.h.
131:055 Gender, Race, and Class in the U.S. 3 s.h.
149:049/045:049 Introduction to American Indian and Native Studies 3 s.h.

Advanced-level courses:

07B:154 Education, Race, and Ethnicity 2-3 s.h.
07U:133 The Culturally Different in Diverse Settings 3 s.h.
008:118 Jewish American Literature 3 s.h.
16A:104/158:100 History of the American Deaf Community 3-4 s.h.
16A:106 Disability in American History 3 s.h.
16A:112 Mexican American History 3 s.h.
019:165/129:122 African Americans and the Media 3 s.h.
025:141 History of Jazz 3 s.h.
042:112/096:112 Human Sexuality, Diversity, and Society 1-3 s.h.
103:150/113:173 Language and Gender 3 s.h.
113:110/149:110 Native Peoples of North America 3 s.h.

Entrepreneurship Component

At least one of these (all are advanced-level courses):

06E:119 Policy Analysis 3 s.h.
06T:120 Entrepreneurship and Innovation 3 s.h.
06T:133 Entrepreneurial Finance 3 s.h.
06T:134 Entrepreneurial Marketing 3 s.h.
06T:145 Legal Aspects of Entrepreneurship 3 s.h.
06T:146 Strategic Management of Technology and Innovation 3 s.h.
06T:147 Social Entrepreneurship 3 s.h.
06T:148 E-Commerce Strategies for Entrepreneurs 3 s.h.
06T:150 Managing the Growth Business 3 s.h.
06T:190 Seminar in Entrepreneurship 2-3 s.h.
06T:192 Entrepreneurship: Business Consulting 3 s.h.
06T:194 Entrepreneurship: Advanced Business Planning 3 s.h.
145:198 Independent Study arr.
145:199 Interdepartmental Studies Practicum arr.

Values and Ethics Emphasis

Students must earn 15 s.h. in their chosen emphasis area. Students who choose the values and ethics emphasis must complete at least two courses from each of the two components (values and theories, institutions and policies).

Values and Theories Component

At least two of these:

019:140 Legal Issues in Mass Communication 3 s.h.
### Institutions and Policies Component

At least two of these:

- 026:001 Problems of Moral Reasoning 3 s.h.
- 026:132 Introduction to Political Philosophy 3 s.h.
- 030:115 The Presidency 3 s.h.
- 030:116 American Constitutional Law and Politics 3 s.h.
- 030:118 American Political Development 3 s.h.
- 030:120 Public Administration and Bureaucratic Politics 3 s.h.
- 030:152 The Legislative Process 3 s.h.
- 030:153 The Judicial Process 3 s.h.
- 030:158 The Criminal Justice System 3 s.h.
- 034:040 Criminology 3 s.h.
- 034:066 Social Inequality 3 s.h.
- 034:162/131:160 Work and Family Institutions 3 s.h.
- 034:175 Community and Urban Sociology 3 s.h.
- 034:186 Criminal Legal System 3 s.h.

### Arts Management Emphasis

Students must earn 15 s.h. in their chosen emphasis area. Students who choose the arts management emphasis must complete two courses from the administration component, one course from the history component, 3 s.h. from the production component, 3 s.h. from the elective component, and the internship (0 s.h.).

#### Administration Component

Two of these:

  or
- 06T:120 Entrepreneurship and Innovation 3 s.h.

#### History Component

One of these:

- 01H:002 Arts of Africa 3 s.h.
- 01H:003 Art of Pre-Columbian America, Native America, and Oceania 3 s.h.
- 01H:005 Western Art and Culture Before 1400 3 s.h.
- 01H:006 Western Art and Culture After 1400 3 s.h.
- 01H:016/039:016 Asian Art and Culture 3 s.h.
- 008:037 Introduction to Drama 3 s.h.
- 024:102/07S:112/097:115/113:103 Introduction to Museology 3 s.h.
- 025:014 Great Musicians 3 s.h.
- 025:080 Jazz Cultures in America and Abroad 3 s.h.
- 025:103 World Music 3 s.h.
- 025:104 Music of Latin America and the Caribbean 3 s.h.
World of the Beatles            3 s.h.
History of Jazz                 3 s.h.
American Popular Music          3 s.h.
Theatre and Society: Ancients and Moderns 3 s.h.
Theatre and Society: Romantics and Rebels 3 s.h.
Dance and Society               3 s.h.
The Arts in Performance         3 s.h.

Production Component

Complete 3 s.h. chosen from these:

Elements of Art                  3 s.h.
Digital Portfolios in the Arts   1-3 s.h.
Exhibition Planning              3 s.h.
Designing History Exhibits       3 s.h.
Introduction to Afro-Cuban Drumming (only one enrollment may count toward major) 1 s.h.
Art of the Theatre               3 s.h.
Basic Acting                     3 s.h.
Elements of Design               3 s.h.
Theatre Crafts                   3 s.h.
Theatre Design I                 3 s.h.
Beginning Tap (only one enrollment may count toward major) 1-2 s.h.
Beginning Jazz (only one enrollment may count toward major) 1-2 s.h.
Beginning Ballet (only one enrollment may count toward major) 1-2 s.h.
Beginning Modern Dance (only one enrollment may count toward major) 1-2 s.h.
Continuing Jazz (only one enrollment may count toward major) 1-2 s.h.
Continuing Ballet (only one enrollment may count toward major) 1-2 s.h.
Continuing Modern Dance (only one enrollment may count toward major) 1-2 s.h.
Beginning/Contact Improvisation (only one enrollment may count toward major) 1-2 s.h.
Dance Production                 3 s.h.
Music Fundamentals in Dance      2 s.h.
Introduction to Afro-Cuban Dance (only one enrollment may count toward major) 1 s.h.
Independent Study                arr.
Interdepartmental Studies Practicum arr.

Elective Component

One of these:

Grant Writing in the Arts        3 s.h.
Introduction to Management (if not already used to fulfill foundation course work requirement) 3 s.h.
Entrepreneurial Finance          3 s.h.
Entrepreneurial Marketing        3 s.h.
English Renaissance Drama        3 s.h.
Legal Issues in Mass Communication 3 s.h.
Art, Law, and Ethics             3 s.h.
Music, Culture, and Identity     3 s.h.
Introduction to the Study of Culture and Society 3 s.h.
Creative Writing for Business    3 s.h.

Or complete 3 s.h. from these:

Production: Run Crew             1-2 s.h.
Production: Crew Chief           2 s.h.
Recital Attendance for Non-Majors 1 s.h.
Recital Attendance               1 s.h.

Internship

Internship in Interdepartmental Studies 0 s.h.
Health Science Track

The health science track requires 37 s.h. of work for the major. It provides a preapproved plan of study that combines a generalized health background with a varied choice of emphasis areas: multidisciplinary science, entrepreneurship, aging, sexuality studies, global health, and health coach. Students also have the option of proposing their own health science-related emphasis area to the faculty advisory committee.

Students must have achieved second-year standing to declare the health science track.

Health science track students must complete foundation course work (22 s.h.) and one emphasis area (15 s.h.). A minimum of 15 s.h. for the major must be completed at The University of Iowa. The Academic Advising Center advises health science track students; contact the center for more information about requirements.

Foundation Courses

Foundational chemistry--two of these:

004:007 General Chemistry I 3 s.h.
or
004:011 Principles of Chemistry I 4 s.h.

004:008 General Chemistry II 3 s.h.
or
004:012 Principles of Chemistry II 4 s.h.

Foundational biology--one of these:

002:002 Introductory Animal Biology 4 s.h.
002:010 Principles of Biology I 4 s.h.
002:021 Human Biology 4 s.h.

Foundational math and statistics--one of these:

22S:008 Statistics for Business 4 s.h.
22M:009 Elementary Functions 4 s.h.
22S:025/07P:025 Elementary Statistics and Inference 3 s.h.
22M:015 Mathematics for the Biological Sciences 4 s.h.
22M:016 Calculus for the Biological Sciences 4 s.h.
22M:017 Calculus and Matrix Algebra for Business 4 s.h.
22M:025 Calculus I 4 s.h.
22S:101 Biostatistics 3 s.h.
22S:102/07P:143 Introduction to Statistical Methods 3 s.h.
171:161 Introduction to Biostatistics 3 s.h.

Foundational social science--one of these:

031:001 Elementary Psychology 3 s.h.
034:001 Introduction to Sociology Principles 3-4 s.h.
034:002 Social Problems 3-4 s.h.
113:003 Introduction to the Study of Culture and Society 3 s.h.
113:010 Anthropology and Contemporary World Problems 3 s.h.

Foundational science elective--one of these:

002:011 Principles of Biology II 4 s.h.
027:053 Human Anatomy 3 s.h.
060:110 Principles of Human Anatomy 3 s.h.

Foundational elective--one of these:

027:130 Human Physiology 3 s.h.
027:140 Exercise Physiology for Practitioners 3 s.h.
031:014 Introduction to Developmental Science 3 s.h.
096:030/153:030 Human Development and Behavior 3 s.h.
169:045 Health for Living 3 s.h.

145:125 Contemporary Nutrition 3 s.h.
or
027:143 Physiology of Nutrition 3 s.h.

Multidisciplinary Science Emphasis

Students must earn 15 s.h. in their chosen emphasis area. Students who choose the multidisciplinary science emphasis must complete 15 s.h. chosen from these.

002:114 Cell Biology 3 s.h.
002:128 Fundamental Genetics 3-4 s.h.
002:145 Introduction to Neurobiology 3 s.h.
002:150 Endocrinology 3 s.h.
08C:107/145:107 Creative Writing for the Health Professions 3 s.h.
061:157 General Microbiology 5 s.h.
099:110 Biochemistry 3 s.h.
099:120 Biochemistry and Molecular Biology I 3 s.h.
099:130 Biochemistry and Molecular Biology II 3 s.h.
145:127 Nutrition in Health and Performance 3 s.h.
145:198 Independent Study arr.
145:199 Interdepartmental Studies Practicum arr.

004:121 Organic Chemistry I 3 s.h.
or
004:123 Organic Chemistry I for Majors 3 s.h.

004:122 Organic Chemistry II 3 s.h.
or
004:124 Organic Chemistry II for Majors 3 s.h.

004:141 Organic Chemistry Laboratory 3 s.h.
or
004:142 Organic Chemistry Laboratory for Majors 3 s.h.

061:112 Pharmacy Microbiology 4 s.h.
or
061:164 Nursing Microbiology 4 s.h.

145:125 Contemporary Nutrition (if not used to fulfill foundation requirement) 3 s.h.
or
027:143 Physiology of Nutrition (if not used to fulfill foundation requirement) 3 s.h.

029:011 College Physics I 4 s.h.
or
029:081 Introductory Physics I 4 s.h.
Entrepreneurship Emphasis

Students must earn 15 s.h. in their chosen emphasis area. Students who choose the entrepreneurship emphasis must complete 15 s.h. chosen from these.

- 06A:001 Introduction to Financial Accounting 3 s.h.
- 06B:140 Business Writing 3 s.h.
- 06E:113 Health Economics 3 s.h.
- 06E:119 Policy Analysis 3 s.h.
- 06J:048 Introduction to Management 3 s.h.
- 06M:100 Introduction to Marketing Strategy 3 s.h.
- 06T:050 Foundations in Entrepreneurship 2 s.h.
- 06T:120 Entrepreneurship and Innovation 3 s.h.
- 06T:133 Entrepreneurial Finance 3 s.h.
- 06T:134 Entrepreneurial Marketing 3 s.h.
- 06T:145 Legal Aspects of Entrepreneurship 3 s.h.
- 06T:146 Strategic Management of Technology and Innovation 3 s.h.
- 06T:147 Social Entrepreneurship 3 s.h.
- 06T:148 E-Commerce Strategies for Entrepreneurs 3 s.h.
- 06T:150 Managing the Growth Business 3 s.h.
- 06T:190 Seminar in Entrepreneurship 2-3 s.h.
- 06T:192 Entrepreneurship: Business Consulting 3 s.h.
- 06T:194 Entrepreneurship: Advanced Business Planning 3 s.h.
- 08N:113 Writing for Business and Industry 3 s.h.
- 145:101 Creative Writing for Business 3 s.h.

Aging Emphasis

Students must earn 15 s.h. in their chosen emphasis area. Students who choose the aging emphasis must complete 15 s.h. chosen from these.

- 08C:107/145:107 Creative Writing for the Health Professions 3 s.h.
- 153:135/042:135 Global Aging: Cultural Comparisons 3 s.h.
- 153:146/096:146/169:146 Health Promotion for Older Adults 3 s.h.
- 153:150/031:050 Psychology of Aging 3 s.h.
- 153:153/042:153 Programs and Services for Aging Adults 3 s.h.
- 153:160 Biology of Aging 3 s.h.
- 153:168/169:168 Aging and Leisure 3 s.h.
- 153:195/042:195 Introduction to Nursing Homes 3 s.h.

Sexuality Studies Emphasis

Students must earn 15 s.h. in their chosen emphasis area. Students who choose the sexuality studies emphasis must complete 15 s.h. chosen from these.

- 07C:130 Human Sexuality 3 s.h.
- 08C:107/145:107 Creative Writing for the Health Professions 3 s.h.
Global Health Emphasis

Students must earn 15 s.h. in their chosen emphasis area. Students who choose the global health emphasis must complete 15 s.h. chosen from these.

145:127 Nutrition in Health and Performance 3 s.h.
145:198 Independent Study (only 3 s.h. may count toward major) 3 s.h.
145:199 Interdepartmental Studies Practicum (only 3 s.h. may count toward major) 3 s.h.
152:120 Global Health and Human Rights 2-3 s.h.
152:121/113:121/149:121 Health of Indigenous Peoples 3 s.h.
152:125 Topics in Global Health 1-3 s.h.
152:131/044:131 Geography of Health 1-3 s.h.
152:135/028:135 Global Health and Global Food 3 s.h.
152:136/016:136 History of Medicine in Western Society 3 s.h.
152:137/16W:137 History of Public Health 3 s.h.
152:138/16W:138 History of International Health 3 s.h.
152:150 Research Design in Global Health (only one enrollment may count toward major) 2-3 s.h.
152:152 Global Health Conference (only one enrollment may count toward major) 1 s.h.
152:158/028:147 Promoting Health Globally 2 s.h.
152:160 Global Health Seminar (only one enrollment may count toward major) 3 s.h.
152:170/041:104 Health Care and Health Reforms in Russia 3 s.h.
152:182 Health Experience of Immigrants, Migrants, and Refugees 3 s.h.
152:184/113:184/172:131 Anthropology and International Health 3 s.h.
152:185/113:185/172:173 Medical Anthropology 3 s.h.
152:199 Special Projects in Global Health (only one enrollment may count toward major) arr.

Health Coach Emphasis

Students must earn 15 s.h. in their chosen emphasis area. Students who choose the health coach emphasis must complete 15 s.h. chosen from these.

07C:130 Human Sexuality 3 s.h.
07C:175 Motivational Interviewing 3 s.h.
07C:178 Microcounseling 1-3 s.h.
07C:185 Introduction to Substance Abuse 3 s.h.
07C:190 Group Processes for Related Professions 3 s.h.
07C:199 Counseling for Related Professions 3 s.h.
08C:107/145:107 Creative Writing for the Health Professions 3 s.h.
02:053 Human Anatomy (if not taken as foundation course) 3 s.h.
02:117 Human Growth and Motor Development 3 s.h.
02:130 Human Physiology (if not taken as foundation course) 3 s.h.
02:140 Exercise Physiology for Practitioners (if not taken as foundation course) 3 s.h.
02:036 Physical Activity Through the Life Span 3 s.h.
02:174 Understanding Stress and Coping 3 s.h.
031:063 Abnormal Psychology: Health Professions 3 s.h.
031:152 Health Psychology 3 s.h.
042:112/096:112 Human Sexuality, Diversity, and Society 1-3 s.h.
042:129 Substance Use and Abuse 3 s.h.
042:196 Family Violence 2-3 s.h.
060:110 Principles of Human Anatomy (if not taken as foundation course) 3 s.h.
Recreation Management Track

The recreation management track requires 37 s.h. of work for the major. It provides a preapproved plan of study that combines a foundation in recreation management with a choice of two emphasis areas: the workplace practices and perspectives emphasis and the entrepreneurship emphasis. Students also have the option of proposing their own recreation-related emphasis area to the faculty advisory committee.

Recreation management track students must complete foundation course work (25 s.h.) and one emphasis area (12 s.h.). A minimum of 15 s.h. for the major must be completed at The University of Iowa. The Academic Advising Center advises recreation management track students; contact the center for more information about requirements.

Foundation Courses

All of these:
169:060 Leisure in Contemporary Society 3 s.h.
169:061 Recreation Leadership and Programming 3 s.h.
169:150 Recreation Administration 3 s.h.

Foundational management expertise--three of these:
145:199 Interdepartmental Studies Practicum (taken for 3 s.h.) arr.
169:152 Park and Recreation Facility Management 3 s.h.
169:153 Commercial Recreation Management 3 s.h.
169:156 Design of Recreation Facilities 3 s.h.
169:160 Introduction to Therapeutic Recreation 3 s.h.

Foundational leisure and sport--two of these:
028:036 Physical Activity Through the Life Span 3 s.h.
169:040/033:040 The Good Society 3 s.h.
169:045 Health for Living 3 s.h.
169:050/033:050 Making Choices: Interdisciplinary Perspectives 3 s.h.
169:070 Perspectives on Leisure and Play 3 s.h.
169:072 Leisure and the Liberal Arts 3 s.h.
169:080/033:080 Introduction to Place Studies 3 s.h.
169:168/153:168 Aging and Leisure 3 s.h.
Workplace Practices and Perspectives Emphasis

Students must earn 12 s.h. in their chosen emphasis area. Students who choose the workplace practices and perspectives emphasis must complete at least one course from each of three components (speaking and writing, foundations and practices, cultural diversity). The required 12 s.h. must include 6 s.h. earned in advanced courses (100 level or above). Advanced courses for each component are listed below.

Speaking and Writing Component

At least one chosen from these or from the advanced-level courses:

- 08C:001 Creative Writing Studio Workshop 3 s.h.
- 08N:020 Introduction to Creative Nonfiction 3 s.h.
- 08N:050/20E:050 Word Power: Building English Vocabulary 3 s.h.
- 036:012 Interpersonal Communication 3 s.h.
- 036:015 Persuasive Communication 3 s.h.
- 036:016 Business and Professional Communication 3 s.h.
- 036:017 Theory and Practice of Argument 4 s.h.
- 036:020/049:042 Clothing as Nonverbal Communication 3 s.h.

Advanced-level courses:

- 01J:115/033:115 What is Storytelling For? 3 s.h.
- 06B:140 Business Writing 3 s.h.
- 08A:104 Personal Writing for Non-English Majors 3 s.h.
- 08A:113 Writing for Business and Industry for Non-English Majors 3 s.h.
- 08C:023 Creative Writing 3 s.h.
- 08C:097 Fiction Writing 3 s.h.
- 08C:108 Creative Writing for New Media 3 s.h.
- 08N:080 Nonfiction Writing 3 s.h.
- 08N:104 Personal Writing 3 s.h.
- 08N:113 Writing for Business and Industry 3 s.h.
- 08N:120 Advanced Nonfiction Writing 3 s.h.
- 08N:133 Advanced Writing for Business 3 s.h.
- 036:061 Persuasion in Society 3 s.h.
- 036:158/010:141 Rhetoric and Past Public Controversy 3 s.h.
- 113:100/08L:100/103:100 Introduction to Linguistics 3 s.h.
- 145:101 Creative Writing for Business 3 s.h.

Foundations and Practices Component

At least one chosen from these or from the advanced-level courses:

- 019:090 Social Scientific Foundations of Communication 3 s.h.
- 019:091 Cultural and Historical Foundations of Communication 3 s.h.
- 019:095 Media and Consumers 3 s.h.
- 036:001 Core Concepts in Communication Studies 3 s.h.
- 113:014 Language, Culture, and Communication 3 s.h.

Advanced-level courses:

- 034:162/131:160 Work and Family Institutions 3 s.h.
- 036:070 Communication and Everyday Life 3 s.h.
- 036:074 Media and Society 3 s.h.
- 036:143/010:131 Classical Rhetoric and Greek Culture 3 s.h.

Cultural Diversity Component

At least one chosen from these or from the advanced-level courses:

- 01H:003 Art of Pre-Columbian America, Native America, and Oceania 3 s.h.
- 08G:005/149:005 Literatures of Native American Peoples 3 s.h.
- 08G:011 Literature and Sexualities 3 s.h.

or
Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan. (Courses in the major are those required to complete the major.)

Note: The Four-Year Graduation Plan is available only to ISP students in the individualized plan of study track.

Before the third semester begins: at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: at least one-half of the semester hours required for graduation

Before the seventh semester begins: an approved plan of study, at least six courses in the plan of study, and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: a total of at least nine courses in the plan of study

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Honors

Interdepartmental studies students qualify for membership in the University of Iowa Honors Program by maintaining a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University of Iowa Honors Program for more information). Graduating with honors usually includes the successful completion of the honors requirements in a particular department or program.

Students should initiate inquiries about graduating with honors by contacting the ISP coordinator. Students are encouraged to inquire early in their junior year to allow time for foundation course work. The director of the University of Iowa Honors Program can offer suggestions for contacting a supervising faculty member or committee from one or several appropriate departments. ISP students must submit an honors project approval form to the ISP coordinator and the honors program director.

Career Considerations

Since the major in interdepartmental studies affords opportunities outside the traditional degree pattern, students must create or choose study programs that meet their individual educational and career objectives. Those who plan to seek employment immediately after graduation should familiarize themselves with the educational background and qualifications required by employers and should include appropriate courses in their study programs.

Students preparing for advanced study should become familiar with the admissions requirements of graduate or professional schools that interest them. The earlier students decide to pursue graduate or professional study, the easier it is to complete necessary prerequisites.

Interdepartmental Studies Courses

145:101 Creative Writing for Business  3 s.h.
Opportunity to broaden understanding of literature, improve writing, and enhance ability to approach business problems in a creative and inspired manner; close reading and creative writing exercises used to develop appreciation of the written word, improve ability to express thoughts and ideas, and become more conscious of the quality of students' own written work. Prerequisite: rhetoric.

145:107 Creative Writing for the Health Professions  3 s.h.
Same as 08C:107.

145:108 Creative Writing for New Media  3 s.h.
Prepares creative writers for evolving marketplace of electronic text, media; experience writing in varied media such as the Internet, e-books, video games, mobile devices, emergent social narratives. Same as 08C:108.

145:109 Introduction to Arts Management  3 s.h.
Nonprofit performing arts management and administrative principles; practical applications, trends in the field; focus on arts organizations and their key administrative positions. Same as 049:109, 188:109.

145:110 Creative Writing for the Ecologically Aware: Stories in the Land  3 s.h.
How humans tether to their environment through stories; students write stories and through writing explore if there is a new tie to sustainable history. Same as 08C:110.

International Business

Coordinators: Patricia Mason-Browne (Liberal Arts and Sciences), Andy Tinkham (Tippie College of Business)

Undergraduate nondegree program: Certificate in International Business

Web site: http://tippie.uiowa.edu/undergraduate/programs/IBC.cfm

The Tippie College of Business and the College of Liberal Arts and Sciences offer the undergraduate Certificate in International Business. The program is open to all University of Iowa undergraduate students and individuals who hold a bachelor's degree from The University of Iowa or another institution and are not enrolled in a graduate or professional program. See "Admission" at the end of this Catalog section.

Certificate in International Business

The Certificate in International Business requires 29 s.h. and satisfaction of the certificate's foreign language requirement (required credit varies according to the language studied). The program is designed for undergraduate students who intend to pursue careers in international business as well as those interested in gaining a better understanding of the global economy and a broader awareness of the political, historical, and social environment in which international business operates.

The certificate program includes study of international business and economics, international relations and institutions, a foreign language, and the contemporary art, literature, culture, and/or politics of the related geographical area. The range of courses permits students to tailor areas of specialization suited to their individual interests and to complement majors in business and in liberal arts and sciences.

Students must maintain a g.p.a. of at least 2.00 on all certificate course work. Certificate courses may not be taken pass/nonpass. A course may not be used to satisfy more than one certificate requirement.

A minimum of 20 s.h. of certificate course work (other than language courses) must be completed at The University of Iowa or in approved study abroad programs. Students who want to use credit earned while studying abroad should consult an international business certificate advisor before leaving campus. University of Iowa Guided Independent Study (correspondence study) is accepted toward the certificate.

When students complete the certificate requirements and graduate, the Certificate in International Business is noted on their transcript. Contact the Tippie College of Business Undergraduate Program Office or the CLAS Academic Programs & Services office for more information.

The certificate requires course work in international business, international relations and institutions, foreign language, and area studies, as follows.

INTERNATIONAL BUSINESS

These courses provide students with an essential understanding of economics, which is central to all business operation. They also help students develop knowledge of the functional areas of international business.

Both of these:

06E:001 Principles of Microeconomics 4 s.h.
06E:002 Principles of Macroeconomics 4 s.h.

Three of these (total of 9 s.h.):

06E:125 Global Economics and Business 3 s.h.
06E:129 Economic Growth and Development 3 s.h.
06E:173 International Economics 3 s.h.
06F:130 International Finance 3 s.h.
06J:146 International Business Environment 3 s.h.
06M:151 International Marketing 3 s.h.
091:282 International Business Transactions 3 s.h.
091:287 International Trade Law: Basic Norms and Regulations 3 s.h.

INTERNATIONAL RELATIONS AND INSTITUTIONS

These courses familiarize students with comparative politics, social geography, foreign policy, and issues related to world population and the environment--topics relevant to decision making in the international business world.

Two of these (total of 6 s.h.):

**FOREIGN LANGUAGE**

This component enables students to develop an intermediate level of competence in a second language. Through language study, students not only gain insight into the culture of another region of the world, they also develop a deeper understanding of their own language and culture.

Students must complete an approved foreign language sequence. For questions about languages not listed below or about study abroad course work, see an international business certificate advisor.

Arabic
All of these:

Japanese

One of these sequences:

Both of these:

Portuguese

One of these:
038:100-038:101 Accelerated Elementary Portuguese - Accelerated Intermediate Portuguese (both courses) 0-10 s.h.
038:102 Portuguese for Spanish Speakers 3 s.h.

One course for which 038:101 or 038:102 is prerequisite

Russian

All of these:
041:001-041:002 First-Year Russian I-II 8 s.h.
041:003-041:004 Second-Year Russian I-II 8 s.h.

One course for which 041:004 is prerequisite

Spanish

035:001-035:002 Elementary Spanish I-II (both courses) 8 s.h.

One of these:
035:011-035:012 Intermediate Spanish I-II (both courses) 8 s.h.
035:013 Accelerated Intermediate Spanish 6 s.h.

One course for which 035:012 is prerequisite

Swahili

All of these:
103:125-103:126 Elementary Swahili I-II 8 s.h.
103:127-103:128 Intermediate Swahili I-II 8 s.h.

AREA STUDIES

These courses help students learn about the culture, contemporary history, art, literature, and politics of the geographic region in which their second language is spoken. They cover topics critical to understanding sociocultural influences on individuals with whom students share the world, and with whom they may conduct business.

Students complete 6 s.h. from one geographic area. The area should be appropriate to the language the student chooses for the language requirement.

Asia

Appropriate for these languages: Chinese, Hindi, or Japanese
01H:016/039:016 Asian Art and Culture 3 s.h.
01H:031/039:028 Introduction to the Art of China 3 s.h.

Undergraduate students pursuing a degree from The University of Iowa are eligible to work toward the Certificate in International Business. Students who already have earned a baccalaureate degree from The University of Iowa may return to complete or earn a certificate in international business if they are not enrolled in a graduate or professional program. Holders of baccalaureate degrees from other institutions who are not enrolled in a graduate or professional program may enroll at The University of Iowa to complete a Certificate in International Business. Contact the Office of Admissions.

Interested students must declare their intention to pursue the certificate with an international business certificate advisor and must submit a plan of study. Students admitted to the Tippie College of Business or advised at the college's Undergraduate Program Office should consult the advising staff in that office. Students in the College of Liberal Arts and Sciences should consult an international business certificate advisor in the Academic Advising Center.
International Studies

Director: Kristine Fitch
Undergraduate degree: B.A. in International Studies
Undergraduate nondegree program: Minor in International Studies
Graduate degree: M.A. in international studies
Web site: http://international.uiowa.edu/

International studies is not simply the study of diplomacy and relations among states. The International Studies Program requires all students to integrate theoretical knowledge about broad global processes and the methods used to study them, with in-depth examination of a particular region of the world or a major theme in international studies. It affords students the opportunity to integrate the study of history, politics, economics, expressive arts, culture, beliefs, and social systems.

Undergraduate Programs

The program offers a Bachelor of Arts and a minor in international studies. The major is an interdisciplinary program of study offered with either a geographic or a thematic emphasis. It prepares students for careers in business, government, international development agencies, nongovernmental organizations, philanthropic agencies, and the arts. It also is excellent preparation for graduate training in the social sciences, the arts, law, business, journalism, international affairs, and area studies.

The curriculum is designed to help students learn to appreciate world cultures, focus on themes of global significance, and master varied disciplinary approaches used to study international issues. For students interested in pursuing a double major, the international studies major complements a wide range of academic degree programs.

Bachelor of Arts

The Bachelor of Arts in international studies requires a minimum of 120 s.h., including 39 s.h. of work for the major. The program is flexible, drawing on courses across the humanities and social sciences. All students majoring in international studies are mentored by a faculty member who specializes in their geographic or thematic emphasis area. Students also work closely with an academic advisor to plan their program of study.

Students must complete the College of Liberal Arts and Sciences General Education Program.

Transfer course work equivalent to University of Iowa course work can be accepted toward the major, but at least 15 s.h. of course work for the major must be earned at The University of Iowa.

Students majoring in international studies must earn at least 12 s.h. of the required 39 s.h. in upper-level course work. An orientation course (1 s.h.) prepares students to fully engage in their interdisciplinary program of study, and a foundation course (3 s.h.) and two core courses (6 s.h.) introduce them to the major issues in international studies and the varied methods used to examine them. Foreign language proficiency is vital for participating in diverse societies and cultures, so foreign language study beyond the General Education Program requirement is required.

Students select a geographic or thematic emphasis area or develop one in consultation with their faculty advisor. Each student must complete a senior project (3 s.h.) related to his or her emphasis area, preparing for the project during the previous semester with a required research course (2 s.h.). International studies electives (6 s.h.) outside the student's emphasis area provide comparative perspectives.

Students who earn a Certificate in Latin American Studies, Global Health Studies, or International Business, or a minor in global health studies or Latin American studies may not choose the corresponding emphasis area for the international studies major.

The program encourages study abroad. See "Study Abroad Opportunity" below, for details.

DISTRIBUTION REQUIREMENTS

International studies students must undertake course work in at least four different departments and/or programs. They must complete at least 12 s.h. of upper-level course work: 6 s.h. in the emphasis area, 3 s.h. in the elective area, and 3 s.h. in the emphasis, elective, or foreign language area.

ORIENTATION COURSE

Within the first year after declaring a major in international studies, students must complete 187:010 Orientation to International Studies. The course introduces them to the interdisciplinary major and familiarizes them with international opportunities in their course of study.
FOUNDATION COURSE

Each student chooses at least 3 s.h. from the following course list, ordinarily early in the major. Foundation courses provide an overview of global issues and introduces a disciplinary approach to global topics, laying the groundwork for continuing study.

187:005 Making of the Modern Global System 3 s.h.
187:006 Developed and Developing Places 3 s.h.
187:007 The European Union 3 s.h.
187:020 Introduction to International Studies 3 s.h.
06E:125 Global Economics and Business 3 s.h.
030:060 Introduction to International Relations 3 s.h.
036:086 Global Media Studies 3 s.h.
044:010 The Contemporary Global System 4 s.h.
044:019 Contemporary Environmental Issues 3 s.h.
113:010 Anthropology and Contemporary World Problems 3 s.h.

CORE COURSES

Core courses serve as gateways to further focused study in the emphasis areas. Students choose 6 s.h. of core courses from the following list. In order to preserve the interdisciplinarity of the program, students must choose at least one course from a department or program different from the one that offered their foundation course. Students may not use the same course to fulfill both a foundation course requirement and a core course requirement.

187:005 Making of the Modern Global System 3 s.h.
187:006 Developed and Developing Places 3 s.h.
187:007 The European Union 3 s.h.
187:050 Introduction: East European and Central Asian Cultures 3 s.h.
187:060 The Middle East Today: A Social Inquiry 3 s.h.
187:080 Introduction to Human Rights 3 s.h.
187:142 Introduction to Caribbean Studies 3 s.h.
06E:125 Global Economics and Business 3 s.h.
06J:146 International Business Environment 3 s.h.
030:060 Introduction to International Relations 3 s.h.
030:061 Introduction to American Foreign Policy 3 s.h.
036:042/042:042/187:042 Intercultural Communication 3 s.h.
036:086 Global Media Studies 3 s.h.
044:010 The Contemporary Global System 4 s.h.
044:019 Contemporary Environmental Issues 3 s.h.
044:030 The Global Economy 3 s.h.
048:022 World Film 3 s.h.
048:040 Major Texts in World Literature I 3 s.h.
048:041 Major Texts of World Literature II 3 s.h.
103:055 Languages of the World 3 s.h.
113:010 Anthropology and Contemporary World Problems 3 s.h.
130:070 Introduction to Latin American Studies 3 s.h.
195:050 Topics in Middle East/Muslim World Studies I 3 s.h.

GEOGRAPHIC OR THEMATIC EMPHASIS AREA

Each student chooses one of the geographic emphasis or thematic emphasis areas listed below. The emphasis area is noted on the student's transcript. Students must complete at least four courses in the emphasis area, for a total of 12 s.h.; at least 6 of the 12 s.h. must be earned in upper-level course work (usually numbered 100 or above).

Courses approved in each emphasis area are listed below. Students may petition the international studies program by the specified deadline date each semester to include a course not on a list of approved emphasis area courses.

Geographic emphasis areas include Caribbean studies, African studies; East Asian studies; European studies; Latin American studies; Russian, East European, and Eurasian studies; Middle East and Muslim world studies; and South Asian studies.

Thematic emphasis areas include development; global artistic tradition and change; global resources and the
environment; global health; human rights; international business; international communication and information; international politics and international relations; postcolonial and diasporic studies; and war, peace, and security.

Other thematic emphasis areas for which sufficient courses exist may be developed by a student with the approval of an international studies faculty advisor.

**African Studies Emphasis**

Choose 12 s.h. from these:

- 01H:002 Arts of Africa 3 s.h.
- 01H:021 Introduction to the Art of West Africa 3 s.h.
- 01H:022 Introduction to the Art of Central Africa 3 s.h.
- 01H:107 Art of West Africa 3 s.h.
- 008:119/129:119 African Literature 3 s.h.
- 008:157 Topics in African Cinema 3 s.h.
- 009:120 French-Speaking Cultures 3 s.h.
- 009:163 Francophone Literature of the African Diaspora 3 s.h.
- 16E:130 Modern European Imperialism 3 s.h.
- 16W:061 Africa and the Atlantic Slave Trade 3 s.h.
- 16W:121/129:164 African History Since 1880 3 s.h.
- 16W:122 History and Environment in Africa 3 s.h.
- 16W:125 Women in African History 3 s.h.
- 16W:126 Islam in Sub-Saharan Africa 3 s.h.
- 044:161 African Development 3 s.h.
- 129:163/16W:120 Pre-Colonial African History 3 s.h.

**Caribbean Studies Emphasis**

Choose 12 s.h. from these:

- 008:114 Caribbean Literature and Culture 3 s.h.
- 16W:106 Society and Revolution in Cuba 3 s.h.
- 16W:112 Introduction to Modern Latin America 3 s.h.
- 16W:115 Latin American Revolution 3 s.h.
- 16W:121/129:164 African History Since 1880 3 s.h.
- 025:104 Music of Latin America and the Caribbean 3 s.h.
- 025:163 Steel Band 1 s.h.
- 035:143/048:196 Cuban American Literature and Culture 3 s.h.
- 035:171/048:162 Pan-Caribbean Literary Currents 3 s.h.
- 035:175 Cultural Identity in Caribbean Literature 3 s.h.
- 187:142/035:142 Introduction to Caribbean Studies 3 s.h.

**East Asian Studies Emphasis**

Choose 12 s.h. from these:

- 01H:016/039:016 Asian Art and Culture 3 s.h.
- 01H:119/039:159 Chinese Art and Culture 3 s.h.
- 01H:120/039:120 Chinese Painting I 3 s.h.
- 01H:123/39J:123 Japanese Painting 3 s.h.
- 01H:124/039:131 Themes in Asian Art History 3 s.h.
- 016:005/039:055 Civilizations of Asia: China 3 s.h.
- 016:006/039:056 Civilizations of Asia: Japan 3 s.h.
- 16W:175/39J:175 Japan--U.S. Relations 3 s.h.
- 16W:178/039:175 Topics in Asian History 3 s.h.
- 16W:183 Vietnam War on Film 3-4 s.h.
- 16W:198/039:196 China Since 1927 3 s.h.
- 026:145/032:175 Buddhist Philosophy 3 s.h.
- 030:143/039:178 Government and Politics of the Far East 3 s.h.
030:148 Government and Politics of China 3 s.h.
030:163 Chinese Foreign Policy 3 s.h.
030:179 Human Rights and Asian Values 3 s.h.
032:004/039:064 Living Religions of the East 3 s.h.
032:006/039:006 Introduction to Buddhism 3 s.h.
032:009/039:019 Asian Humanities: China 3 s.h.
032:010/039:007 Chinese Religions 3 s.h.
032:017/39J:017 Religion in Japanese Culture 3 s.h.
032:075/039:075 Asian Religious Classics 3 s.h.
032:163/039:162 Turning East 3 s.h.
032:170 Topics in Asian Religions 3 s.h.

</tbody>
</table>
Students must complete an additional 6 s.h. of international studies elective course work. Electives may be chosen from courses approved for the international studies emphasis areas, excluding any courses approved in the student's own emphasis area. At least 3 s.h. must be earned in upper-level course work.

LANGUAGE REQUIREMENT

All students must complete a minimum of two semesters of advanced foreign language study (work beyond the minimum required to complete the foreign language requirement of the General Education Program), or two semesters of a second foreign language at any level. This requirement may be fulfilled either by completing two semesters of upper-level study in the same language used to complete the General Education Program or by completing two semesters, or the equivalent, of a second foreign language.

In fulfilling the language requirement, most students are eligible to receive an additional 4 s.h. of ungraded credit under the Foreign Language Incentive Program (FLIP). This credit may be applied to the minimum 120 s.h. required for graduation, but it does not count toward requirements for the international studies major.

RESEARCH AND PROJECT PREPARATION

All students prepare for the required senior project by completing 187:095 Research and Final Project Preparation (2 s.h.), in which they learn research methodologies and prepare a detailed project proposal.

INTERNATIONAL STUDIES SENIOR PROJECT

All students enroll in 187:199 International Studies Senior Project during their last year of study. In this independent study course, students complete a research essay of 15-20 pages or produce a creative work focusing on a topic in their geographic or thematic emphasis area. The course is completed under the supervision of a faculty mentor in the emphasis area.

Study Abroad Opportunity

Students are strongly encouraged to incorporate an approved study abroad experience into their international studies major. Credit earned while studying abroad may be applied toward the requirements for the major, as appropriate. International studies majors who study abroad in an approved program may apply for a $1,000 scholarship from International Programs in addition to other financial aid and scholarships for which they are eligible. For scholarship requirements, deadlines, and application materials, see Study Abroad Guidelines and Scholarships on the International Studies web site.

It is important to plan ahead for study abroad. Students should meet with an advisor in the Office for Study Abroad shortly after choosing their geographic or thematic emphasis for help in selecting an appropriate study abroad program. Students planning to earn a bachelor's degree in four years must schedule study abroad advising appointments (see "Four-Year Graduation Plan," below).
Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete in order to stay on the University's Four-Year Graduation Plan.

Note: Students who intend to study abroad in their junior year should schedule an appointment during their fourth semester to meet with an advisor from the Office for Study Abroad. Those who intend to study abroad in their senior year should schedule an appointment during their sixth semester to meet with an advisor from the Office for Study Abroad.

Before the third semester begins: at least one-quarter of the semester hours required for graduation
Before the fifth semester begins: at least three courses in the major (7 s.h., a foundation course, one core course, and the orientation course) and at least one-half of the semester hours required for graduation
Before the seventh semester begins: at least seven courses in the major and at least three-quarters of the semester hours required for graduation
Before the eighth semester begins: at least 11 courses in the major, including the required research preparation course
During the eighth semester: enrollment in all remaining course work in the major (three courses), all remaining General Education courses, and a sufficient number of semester hours to graduate

Honors

Students may earn a B.A. with honors in international studies. The option is available to students with a cumulative University of Iowa g.p.a. of at least 3.33 and a g.p.a. of at least 3.33 in all course work applied to the international studies major and all course work that may be applied to the major. To graduate with honors, students are required to complete a minimum of 42 s.h., including three courses (9 s.h.) in a second emphasis area (this takes the place of the 6 s.h. international studies elective requirement). In place of 187:199 International Studies Senior Project, honors students must complete 187:198 Honors Thesis in International Studies and present their research in a poster session sponsored by International Programs.

Honors students must complete at least 15 s.h. in upper-level course work. At least 6 s.h. of the 42 s.h. required for the honors major must be earned in courses designated as honors courses. Students may enroll in honors courses offered by individual departments, or they may work with instructors to designate any approved international studies course as an honors course by adding additional writing requirements.

Contact the University of Iowa Honors Program for more information about honors study at Iowa.

Minor

The minor in international studies requires a minimum of 15 s.h. in courses approved for the international studies major, including 12 s.h. in upper-level courses taken at The University of Iowa, and 3 s.h. chosen from courses approved for the international studies core requirement. Students must choose 12 s.h. from the international studies major course lists, including emphasis areas, above. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass. Because the minor is interdisciplinary, students may apply a maximum of 6 s.h. from any single department or program toward the international studies minor.

Graduate Program

The International Studies Program offers a Master of Arts in international studies.

Master of Arts

The Master of Arts in international studies requires a minimum of 36 s.h. of graduate credit; a thesis or final project is required. The program is designed for students who seek an interdisciplinary approach to graduate study, especially those who have identified an area of international interest and who wish to pursue a tailor-made program on international issues.

The 36 s.h. required for the M.A. includes 33 s.h. of graded course work (thesis credit is not graded); 24 s.h. must be earned after admission to the M.A. program, with at least 8 s.h. earned in residence on the University of Iowa campus. Students must earn a minimum of 21 s.h. in formal classroom work (excluding independent study, research, thesis work, and special projects); no more than 9 s.h. of independent study, research, and thesis credit may be counted toward the degree. A maximum of 12 s.h. earned at another institution or in another University of Iowa graduate
program may be counted toward the degree.

Students must maintain a g.p.a. of at least 3.00 in all University of Iowa and transfer course work applied toward the degree.

Basic requirements for the M.A. are as follows.

Graduate-level seminars  9 s.h.
Foreign language study   6 s.h.
International research  0-6 s.h.
Additional course work  12-21 s.h.
Thesis or final project  0-3 s.h.

All M.A. students must submit a plan of study when they apply for admission to the program. The study plan must identify a focus area for the student's course work and research. During their first semester in the program, students review and revise the study plan in consultation with their advisory committee; changes must be approved in writing by the committee.

The advisory committee must include at least three tenured or tenure-track faculty members, who may be drawn from any college at the University. One of the committee members serves as the student's primary advisor and chairs the committee. Students should meet with their advisors at least once each semester, before registration for the next term. Additional meetings and consultations with the advisor and committee members should take place as needed.

International Programs provides a list of faculty mentors, searchable by focus area; see International Studies Mentor Directory on the International Program web site.

**Admission**

Applicants to the M.A. in international studies must meet the application requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

Prospective students are urged to consult with the program about their academic objectives.

Admission is for fall entry only; application deadline is February 15 for the following fall.

For detailed application information, see Application & Admission on the International Studies M.A. web page.

**International Studies Courses**

187:001 *International Studies Colloquium*  1 s.h.
Modules focusing on varied topics, taught by international studies faculty members.

187:002 *Issues in International Studies*  1 s.h.
Modules focusing on varied topics, taught by international studies faculty members.

187:003 *Issues in International Studies*  1 s.h.
Modules focusing on varied topics, taught by international studies faculty members.

187:004 *Issues in International Studies*  1 s.h.
Modules focusing on varied topics, taught by international studies faculty members.

187:005 *Making of the Modern Global System*  3 s.h.
Formation of the modern global system; capitalism, science and technology, representative government and nationalism, colonialism and decolonization; rise of these institutions in the West, response and adaptation by a nonwestern society.

187:006 *Developed and Developing Places*  3 s.h.
Geography and the world distribution of key cultural factors—population, religion, and per capita income; economic and demographic differences between developed and developing countries.

187:007 *The European Union*  3 s.h.
Brief history and rationale for the European Union; environmental, economic, social, and political aspects of this potential superpower.

Thesis for interdisciplinary M.A. with international studies emphasis. Repeatable.

1-3 s.h.
Journalism and Mass Communication

**Director:** David D. Perlmutter  
**Professors:** Julie Andsager, Daniel A. Berkowitz, Stephen G. Bloom, Pamela J. Creedon, John Kimmich, Judy Polumbaum  
**Professors emeriti:** Joseph Ascroft, Gilbert Cranberg, Carolyn Stewart Dyer, Hanno Hardt, Donald Smith, Kenneth Starck, Al Talbott  
**Associate professors:** Stephen Berry, Venise Berry, Frank Durham, Gigi Durham, Lyombe Eko, Donald McLeese, Jane Singer, Sujatha Sosale  
**Associate professors emeriti:** John Erickson, John Kottman, Sue Lafky, William Zima  
**Undergraduate degrees:** B.A., B.S. in Journalism and Mass Communication  
**Undergraduate nondegree program:** Minor in Mass Communication  
**Graduate degrees:** M.A. in Journalism; Ph.D. in Mass Communications  
**Web site:** [http://www.uiowa.edu/jmc](http://www.uiowa.edu/jmc)

**Undergraduate Programs**

The School of Journalism and Mass Communication offers a Bachelor of Arts and a Bachelor of Science in journalism and mass communication. Both degrees prepare students for careers in the field. The school also offers a minor in mass communication.

Journalistic writing is the core of the undergraduate programs. Students are required to take both professional and conceptual courses offered by the school; they develop professional skills while studying the historical, legal, cultural, and institutional roles of media in society. The programs also build upon the University's commitment to the liberal arts and sciences, requiring majors to complete extensive academic work outside the school.

Graduates find employment in a variety of areas such as newspapers, magazines, radio, television, online communications, public relations, publication design, photojournalism, and media research.

The school is accredited by the Accrediting Council on Education in Journalism and Mass Communications.

**Selective Admission**

To preserve the quality of its undergraduate program, the School of Journalism and Mass Communication has a selective admission policy. Undergraduate students with a declared interest in journalism are admitted to the major in one of two ways. First-year students who enter the University with honors standing in the College of Liberal Arts and Sciences or as Presidential Scholars, Old Gold Scholars, or Daily Iowan Scholars are guaranteed admission to the major as long as they have satisfied the necessary prerequisites. Most students are classified as having a "journalism and mass communication interest" and must apply for admission to the major, typically during the semester in which they will complete the following: 019:090 Social Scientific Foundations of Communication and 019:091 Cultural and Historical Foundations of Communication; all required rhetoric courses; and a total of at least 45 s.h. of course work (or 30 s.h. for students in the University of Iowa Honors Program).

The primary criterion for admission to major status is overall academic performance. Statement of interest, demonstrated writing ability, prior journalistic experience, participation in journalism student organizations, and performance in journalism courses also are considered for applicants with a demonstrated focus on journalism as a career. The number of students accepted each semester depends on the number of students already in the program and available resources. The school reviews applications with the goal of admitting the most qualified students.

For applications and deadline information, contact the School of Journalism and Mass Communication.

**Transfer Students**

Transfer students who wish to major in journalism are classified as having a "journalism and mass communication interest." They may apply to the major during the semester in which they complete at least 45 s.h. of course work at The University of Iowa and other institutions, including the rhetoric requirement and the foundation courses 019:090 Social Scientific Foundations of Communication and 019:091 Cultural and Historical Foundations of Communication. Courses taken at other institutions cannot be substituted for 019:090 Social Scientific Foundations of Communication or 019:091 Cultural and Historical Foundations of Communication.

The school may accept up to 7 s.h. of transfer credit in journalism toward the major in journalism and mass communication, or up to 3 s.h. toward the minor in mass communication; transfer courses must have been completed at a school accredited by the Association for Education in Journalism and Mass Communication. Course work taken at another school sometimes may be used to satisfy the second major or concentration area requirements. Transfer credit intended to meet School of Journalism and Mass Communication requirements must be approved by the head of undergraduate studies.

**Bachelor of Arts, Bachelor of Science**

The Bachelor of Arts and Bachelor of Science in journalism and mass communication require a minimum of 120 s.h., including 33 s.h. of work for the major. Students also must complete a second major or 24 s.h. in a second concentration area. They may count a maximum of 40 s.h. in journalism and mass communication credit toward graduation. A g.p.a. of at least 2.00 in the major is required.
Students must complete the College of Liberal Arts and Sciences General Education Program.

Each journalism student develops a study plan in consultation with an assigned faculty advisor.

The journalism major requires the following course work. Students must complete a minimum of 33 s.h., but no more than 40 s.h., in journalism and mass communication.

PREMAJOR FOUNDATION

019:090 Social Scientific Foundations of Communication 3 s.h.
019:091 Cultural and Historical Foundations of Communication 3 s.h.

JOURNALISM PROFESSIONAL SKILLS COURSES

019:078 Journalism Issues 1 s.h.
019:088 Multimedia Introduction 1 s.h.
019:098 Journalistic Reporting and Writing 3 s.h.
One intermediate reporting/writing course (019:120-019:129) 4 s.h.
A second reporting/writing course (019:120-019:129, 019:171) 4 s.h.
One workshop (019:130-019:139, 019:172-019:178) 4 s.h.
A third reporting/writing course or one workshop (019:120-019:129, 019:130-019:139, 019:171-019:178) 4 s.h.

CONCEPTUAL COURSES

019:140 Legal Issues in Mass Communication 3 s.h.
One advanced conceptual course (019:141-019:169) 3 s.h.

ELECTIVES (OPTIONAL)

Students may earn up to 7 s.h. in additional journalism and mass communication course work, but they may not count more than 40 s.h. of credit in the discipline toward graduation.

GRADUATION PORTFOLIO

Seniors must complete an approved graduation portfolio. Guidelines for portfolios are available at the school's Resource Center.

SECOND MAJOR OR CONCENTRATION AREA

Every student with a major in journalism must complete a second major or a concentration area outside the School of Journalism and Mass Communication. Study in the second major or concentration area enables students to acquire a substantial body of knowledge or expertise in a relevant area, learn how another discipline views the world, and/or develop a companion set of skills to those in journalism and mass communication.

Students who satisfy the requirement by completing a concentration area must choose 24 s.h. of related course work in one or more departments; at least 15 of the 24 s.h. must be earned in advanced courses (in most departments, advanced courses are numbered 100 or above). B.A. students who complete a minor in business administration are credited with completing a second concentration area. Course work in the concentration area must be arranged in consultation with the student's advisor; each student must have the advisor's written endorsement of the second major or concentration area before graduation.

Bachelor of Arts students must complete the requirements for the journalism and mass communication major (33 s.h.) and must satisfy the school's second major or concentration area requirement in one of two ways.

Option 1: complete a B.A. major in another department
Option 2: complete a 24 s.h. concentration of related courses in one or more departments that offer B.A. degrees, or complete a minor in business administration

SECOND MAJOR OR CONCENTRATION AREA

Bachelor of Science students must complete the requirements for the journalism and mass communication major (33 s.h.) and must satisfy the school's second major or concentration area requirement in one of two ways.
Bachelor of Science students must complete the requirements for the journalism and mass communication major (33 s.h.) and must satisfy the school's second major or concentration area requirement in one of two ways.

**Option 1:** complete a B.S. major in a natural, mathematical, or social science

**Option 2:** complete a 24 s.h. concentration of related courses in the social sciences (economics, geography, political science, psychology, or sociology) and/or the natural and mathematical sciences; and complete all the special math, research methods, statistics, computer science, and/or cognate science requirements required for the B.S. in the department in which the majority of concentration area courses are taken

### Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan.

Note: With the exception of students admitted to the major directly upon their first enrollment in the University, students are admitted to the School of Journalism and Mass Communication on a competitive, selective basis. The Four-Year Graduation Plan agreement applies only to students who are admitted to major status by the first semester of their sophomore year. Also, each student must complete a second major or a concentration area consisting of at least 24 s.h., of which 15 s.h. must be earned in advanced courses. These checkpoints show only the minimum requirements for a second concentration area, not the requirements for a second major.

**Before the third semester begins:** either 019:090 Social Scientific Foundations of Communication or 019:091 Cultural and Historical Foundations of Communication or both, and at least one-quarter of the semester hours required for graduation

**Before the fifth semester begins:** 019:098 Journalistic Reporting and Writing, an additional course in the major (e.g., 019:140 Legal Issues in Mass Communication), at least one second-area course, and at least one-half of the semester hours required for graduation

**Before the seventh semester begins:** two required professional skills courses; one advanced, conceptual, or elective course in the major; three additional second-area courses; and at least three-quarters of the semester hours required for graduation

**Before the eighth semester begins:** two additional required professional skills courses; one advanced, conceptual, or elective course in the major; and two more second-area courses

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General Education courses, all remaining courses in the second area, and a sufficient number of semester hours to graduate

### Honors

The University of Iowa Honors Program gives students with outstanding academic records the opportunity to do honors course work under faculty guidance.

To graduate with honors in journalism and mass communication, a student must have a g.p.a. of at least 3.50 in the major and must be a member of the University of Iowa Honors Program, which requires that students maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University of Iowa Honors Program for more information).

Honors students must complete 019:191 Honors Project (3 s.h.) under the supervision of a faculty member. The project may be a thesis or a professional project, typically completed during the last semester of the senior year. Students are encouraged but not required to take 019:190 Honors Readings (1 s.h.) (1-3 s.h.) to prepare for the project.

All majors with an overall g.p.a. of at least 3.33 are encouraged to take any journalism and mass communication course for honors credit and to make use of other honors opportunities in the school. Visit the Journalism Honors Program on the school's web site or contact the school's honors advisor for details.

### Minor

The minor in mass communication requires a minimum of 15 s.h. in mass communication courses, including 12 s.h. in advanced courses; conceptual courses numbered 019:140 Legal Issues in Mass Communication through 019:169 Introductory Topics in Mass Communication are considered advanced for the minor. Students must maintain a g.p.a. of at least 2.00 in the minor. Courses for the minor may not be taken pass/nonpass. Students are encouraged to take one of the following: 019:090 Social Scientific Foundations of Communication (3 s.h.), 019:091 Cultural and Historical Foundations of Communication (3 s.h.), and 019:095 Media and Consumers (3 s.h.).

The minor introduces students to the field of mass communication; it does not prepare them for careers in journalism.
National Honor Society

The School's chapter of Kappa Tau Alpha, the national society honoring scholarship in journalism and mass communication, was founded in 1936 and is named for former director Leslie G. Moeller. Students are considered for membership if their grade-point average places them in the top 10 percent of their class and they have completed at least five semesters of University work, including a minimum of 9 s.h. in journalism and mass communications skills courses. Contact the School's Kappa Tau Alpha advisor for details.

Graduate Programs

The school offers a Master of Arts in journalism, with two emphases: professional journalism, and mass communication. It also offers a Doctor of Philosophy in mass communications.

Master of Arts

The Master of Arts in journalism with professional journalism emphasis requires 30-35 s.h. of graduate credit, including successful completion of a master's project. The Master of Arts in journalism with mass communication emphasis requires 32 s.h. of graduate credit, including completion of a thesis. Each emphasis is described below. For more detailed descriptions, see the Graduate Studies Handbook or contact the School of Journalism and Mass Communication.

The M.A. program admits students for fall entry.

M.A. with Professional Journalism Emphasis

The Master of Arts with professional journalism emphasis is designed for students who have an academic or professional background in media communication and who wish to enhance their careers through specialized study in a specific area. It is a terminal degree, not preparation for doctoral study. Exceptional applicants without the required background may be accepted if they complete one noncredit preparatory course.

In consultation with an academic advisor, each student creates an individual program of courses chosen from inside and outside the school. Examples of areas inside the school are narrative writing, investigative reporting, publication design, and broadcast news. Some areas outside the school are the arts, law, political science, business, medicine, science, the environment, book arts, and race, gender, and sexuality studies.

Students who have a journalism background might develop a focus in an outside area for some of their electives. Those new to journalism and media communication may wish to focus their study on areas inside the school.

Building on conceptual and advanced skills courses, students complete the program with a master's project in a professional area, such as an in-depth reporting series; a design, multimedia, video, or documentary photography project; or applied research in mass communication.

All courses are chosen in consultation with the student's academic advisor.

The following courses are required.

- 019:225 Contemporary Problems in Journalism 3 s.h.
- 019:226 Master's Advanced Reporting and Writing 3 s.h.
- One conceptual course from 019:140-019:169, or 019:250 and above 3 s.h.
- Three advanced writing or workshop courses from the 019:120, 019:130, 019:170, 019:220 series 12 s.h.
- Three electives in journalism and mass communication or an outside focus area 9-12 s.h.
- 019:299 Masters Research (professional project) 3 s.h.

Students who have not taken a recent U.S. media law class must enroll in 019:140 Legal Issues in Mass Communication or an alternative media law course, with the instructor's consent and the advisor's approval.

M.A. with Media Communication Emphasis

The Master of Arts with media communication emphasis offers specialization in mass communication phenomena and emphasizes communication research, theory, and methodology. It prepares students for doctoral studies.

Students in the media communication emphasis take foundation courses in common with beginning Ph.D. students. Because of the program's interdisciplinary nature, students are expected to take courses outside the school, as determined in consultation with their advisors. The course work should provide students with sufficient theoretical and methodological preparation to complete the thesis.

The following courses are required.
Doctor of Philosophy

The Doctor of Philosophy in mass communications requires 80 s.h. of graduate credit. It is designed for students who have completed an M.A. thesis.

The program emphasizes interdisciplinary inquiry into media communication phenomena from cultural, historical, and social perspectives. It is defined by the scholarly interests of its faculty, which include historical, legal, critical, cultural, social, feminist, and international aspects of media communication, both verbal and visual; comparative communication; convergence; new media; health communication; popular culture; and globalization. Faculty members use qualitative or quantitative methods in their research and teaching.

The program is highly individualized. In consultation with his or her advisor, each student draws on courses offered by the School of Journalism and Mass Communication as well as other academic units to develop a course of study that reflects his or her academic background, experience, professional goals, and intellectual interests.

Students may count up to 30 s.h. of master's degree credit toward the 80 s.h. required for the Ph.D., with the graduate committee's approval, as long as the credit was earned in courses relevant to the Ph.D. study plan. The Graduate College does not accept transfer credit for professional skills courses. Students who have earned professional master's degrees must take additional Ph.D. course work.

The Ph.D. program admits students for fall entry.

The following courses are required.

019:231 Media Communication Theory I 3 s.h.
019:232 Media Communication Theory II 3 s.h.
019:235 Media Communication Research Methods I 3 s.h.
019:236 Media Communication Research Methods II 3 s.h.
019:220 Masters Seminar (taken twice for 1 s.h.) 2 s.h.
Advanced methods courses 3 s.h.
Electives (at least 6 s.h. in journalism and mass communication) 12 s.h.
019:299 Masters Research (thesis) 3 s.h.

For a more detailed description of the Ph.D. program, see the Graduate Studies Handbook or contact the School of Journalism and Mass Communication.

Joint J.D./M.A. and J.D./Ph.D.

The School of Journalism and Mass Communication and the College of Law offer a joint Juris Doctor/Master of Arts and a joint Juris Doctor/Doctor of Philosophy. The joint degree programs allow students to count a limited amount of credit toward both degrees. Separate application to each degree program is required. Applicants must be admitted to both programs before they can be admitted to the joint degree program. Admission for journalism and mass communication graduate programs is for fall entry.

For information about the J.D., see Juris Doctor (College of Law) in the Catalog.

Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.
Facilities and Resources

Adler Journalism and Mass Communication Building

The School of Journalism and Mass Communication moved into the Philip D. Adler Journalism and Mass Communication Building in January 2005. The 65,000-square-foot building has computer laboratories for audio, video, design, writing and web publishing, and a resource center. A photography laboratory is located nearby. The building also is home to offices of the Iowa High School Press Association; the Quill and Scroll Society, an international honor society for high school journalists; the University's award-winning student newspaper, The Daily Iowan, and Daily Iowan TV, a student-run newscast.

Iowa Center for Communication Study

The Iowa Center for Communication Study encourages and facilitates student and faculty research in communication. It also sponsors publications and provides editorial oversight for the Journal of Communication Inquiry.

Financial Support

More than $130,000 in scholarships and awards is disbursed to journalism and mass communication students each year. Scholarship information and applications are available each fall. Visit Journalism & Mass Communication Scholarships or contact the School of Journalism and Mass Communication.

The school offers research and teaching assistantships for graduate students; preference is given to Ph.D. students. Journalism and mass communication students have been successful in winning competitive fellowships open to all graduate students; applicants must be nominated by the graduate committee.

The school has a program of modest financial support for undergraduate and graduate student research projects.

Professional Enrichment

Internships

The school encourages undergraduate majors and Master of Science professional journalism emphasis students to complete at least one internship. The school's internship and assessment coordinator helps students find appropriate positions.

Undergraduate students may earn up to 3 s.h. of internship credit, registering with appropriate faculty sponsorship for 019:099 Journalism Internship (1-3 s.h.). Internships do not fulfill requirements for the major, but internship credit counts toward the maximum 40 s.h. of journalism and mass communication credit that may be applied toward the bachelor's degree. Students may take internships for no credit through 409:019 Internship in Journalism.

Students also are encouraged to pursue opportunities for journalism experience on campus through student-operated media, including The Daily Iowan, Daily Iowan TV, and KRUI-FM radio.

Job Placement

The school's internship and assessment coordinator helps students seeking career guidance and employment opportunities. The school compiles and publicizes notices of professional jobs open to journalism students and graduates. It also cooperates with the University's Pomerantz Career Center in providing career guidance and placement services as well as workshops and programs on seeking jobs.

Activities

The school engages in a variety of activities for the enrichment of students, faculty, and the entire campus. Speakers visit campus each year under lectureships funded by the John F. Murray and Leslie G. Moeller Fund. In addition, guest speakers are funded through the Hearst Visiting Professionals Program and the Hageboeck Daily Iowan Visiting Professionals Program. Campus organizations for students include Kappa Tau Alpha (KTA, a national society honoring scholarship in journalism); the National Association of Black Journalists (NABJ), the Public Relations Student Society of America (PRSSA), the Society of Professional Journalists (SPJ), the Radio and Television News Directors' Association (RTNDA), and Ed on Campus (EOC).

</table>
Principles; gathering, writing, editing, reporting the news; techniques and concepts as a foundation for understanding, successfully writing, and delivering broadcast news. Prerequisites: 019:098 and journalism major, or consent of undergraduate director.

019:124 Persuasive Writing 4 s.h.
Principles and practices of persuasive writing; focus on public relations; may include editorials, op-ed pieces, magazine essays, reviews. Prerequisites: 019:096, 019:098, and journalism major, or consent of undergraduate director.

019:125 Freelance Reporting and Writing 4 s.h.
Approaches to writing and marketing articles to magazines, newspapers, other publications; developing ideas, researching periodical markets, writing queries, writing and rewriting articles for publication. English majors may apply this course to the following area and/or period requirement. PERIOD: 20th- and/or 21st-Century Literature. Prerequisites: 019:098 and journalism major, or consent of undergraduate director. Same as 08N:125.

019:126 Arts and Culture Reporting and Writing 4 s.h.
Writing about arts and culture in a range of formats (e.g., news, profiles, features, criticism, essays); emphasis on original reporting that draws on resources, issues, people, and events on campus and in the community, especially in visual and performing arts. Prerequisites: 019:098 and journalism major, or consent of undergraduate director.

019:127 Narrative Journalism 4 s.h.
Process of writing the true story; development of skills in researching, interviewing, information gathering, organization, story-telling techniques, writing final story; story publication in magazines, newspapers, journals, online. Prerequisites: 019:098 and journalism major, or consent of undergraduate director.

019:128 Writing Across Cultures 4 s.h.
Forms of travel writing and other types of crosscultural reporting; skills, knowledge, understandings vital to writing well about an increasingly multicultural and diverse world. Prerequisites: 019:098 and journalism major, or consent of undergraduate director.

019:129 Feature Reporting and Writing 4 s.h.
Storytelling techniques for magazine, newspaper, web site features; stylistic flair; human elements in stories; research, interviewing, and reporting. Prerequisite: 019:098 and journalism major, or consent of undergraduate director.

019:130 Media Workshop 4 s.h.
Analysis and solution of problems with communication strategies and/or media products; public relations, newsletter production, radio, media research, web basics, global media, interviewing, PR fund-raising. Repeatable. Prerequisites: 019:098 and journalism major, or consent of undergraduate director.

019:131 Publication Design Workshop 4 s.h.
Problems of design, layout and production; practical and aesthetic considerations; digital techniques; creative projects. Prerequisites: 019:098 and journalism major, or consent of undergraduate director.

019:132 Photojournalism Workshop 4 s.h.
Techniques; basic craft, location shooting, editing photographs; group critiques of assignments. Prerequisite: consent of instructor.

019:134 Television News 4 s.h.
Electronic news gathering (ENG); conceptualization, shooting, editing basic news packages. Prerequisites: 019:098 and journalism major, or consent of undergraduate director.

019:135 Public Relations Practice Workshop 4 s.h.
Development and presentation of public relations campaigns for client organizations; communication theory and research techniques applied to analyzing and solving public relations problems through objective-based strategic planning. Prerequisites: 019:096, 019:098, and journalism major, or consent of undergraduate director.

019:136 Editing 4 s.h.
Principles and process of editing content for publication; micro- and macroediting, headline writing, other aspects of editing. Prerequisites: 019:098 and journalism major, or consent of undergraduate director.

019:138 Online Journalism 4 s.h.
Creation of original journalistic web sites incorporating writing, design, and structure; contemporary online media issues. Prerequisites: 019:098 and journalism major, or consent of undergraduate director.

019:140 Legal Issues in Mass Communication 3 s.h.
Issues affecting the media: freedom of expression, libel, privacy, access to information, protection of news sources, free press/fair trial, copyright, government regulation of broadcasting. Prerequisite: junior standing or consent of undergraduate director.

019:141 Classic and Contemporary Sports Writing 3 s.h.
Critical reading of sports reportage, including historical and current examples; social and cultural preoccupations and problems viewed through the prism of sports journalism.

019:142 Public Relations Case Studies 3 s.h.
Public relations concepts applied to analysis of public relations situations; development of solutions for public relations problems and opportunities. Prerequisite: 019:096.

019:150 Visual Communication 3 s.h.
History of modern visual communication from a cultural perspective; visual form, composition, spatial representation, color and other topics; in-depth study of selected artists, designers, photographers.

019:151 Communication Research Methods 3 s.h.
Fundamentals of scientific inquiry in the study of communication and mass communication behavior; language, concepts, procedures, application of behavioral research methods; field and experimental approaches.

019:152 History of Mass Communication in the U.S. 3 s.h.
Historical analysis of professional practices. Prerequisite: 019:091 or consent of instructor.

019:155 Critical Issues in Mass Media 3 s.h.
Critical issues related to the role and significance of mass media in contemporary society; content of the media, content's consequences for individuals and social groups.

019:156 Comparative Communication Systems 3 s.h.
Culture and communication as central to examining media in different social and political settings; emphasis on contemporary problems.

019:158 News-Editorial Problems 3 s.h.
Current issues in journalism, editing strategies; emphasis on press performance and practical problems journalists confront in their work.

019:159 Elections and the Media 3 s.h.
Relationship between political campaigns and mass media; critical evaluation of nature, role, function of media political coverage.

019:160 Media and Health 3 s.h.
Potential and limits of mass media's ability to educate the public about health; research and theory on the influence of information and entertainment media; theories, models, assumptions of mass communication in relation to public health issues. Same as 172:140.

019:161 Law, Media, and Current Issues 3 s.h.
Current topics in communication law. Prerequisite: 019:140 or consent of instructor.

019:164 Images and Society 3 s.h.
Development and uses of photography, film, and television as technologies of reproduction in contemporary culture.

019:165 African Americans and the Media 3 s.h.
GE: Cultural Diversity. Same as 129:122.

019:166 Communication Technology and Society 3 s.h.
Implications and effects of computer-based forms of communication, especially the Internet, for journalists, the media audience, and society at large.
019:167 Gender and Mass Media 3 s.h.
Media images and representations of the body in terms of gender; impact on people, society; media and body image, sexuality, gender roles, gender and power, race, ethnicity, class, age; critical analysis of mediated images.

019:168 Journalism Ethics 3 s.h.
Application of ethical principles in journalistic decision making; consideration of potentially conflicting values, loyalties, and goals that force professional journalists to make difficult choices.

019:169 Introductory Topics in Mass Communication 3 s.h.
Focus on particular area, issue, approach, or body of knowledge; may include international media, media criticism, new technologies, history of documentary photography, literary journalism, media management. Repeatable.

019:171 Advanced Reporting and Writing 4 s.h.
Project journalism; extended magazine pieces, explanatory/investigative journalism, series for newspapers, or task-force projects by entire class on a major issue, with goal of publication. Repeatable. Prerequisites: 019:098, one course from 019:120 - 019:129, and journalism major; or consent of undergraduate director.

019:172 Advanced Photojournalism 4 s.h.
Photojournalism skills; may include documentary photography, advanced photojournalism methods and techniques. Repeatable. Prerequisite: 019:132 or consent of instructor.

019:173 Advanced Media Workshop 4 s.h.
Journalism and mass communication skills; may include editing, broadcasting, design, multimedia. Repeatable. Prerequisites: 019:098, one course from 019:120 - 019:138, and journalism major; or consent of undergraduate director.

019:174 Advanced Television News 4 s.h.
Advanced training and experience in producing, writing, and reporting television news packages and newscasts; emphasis on meeting professional standards. Repeatable. Prerequisites: 019:098, 019:123, 019:134, and journalism major; or consent of undergraduate director.

019:175 Advanced Public Relations Writing 4 s.h.
Case-based study of corporate public relations practice; globalization issues, branding and integrated communication, crisis management. Prerequisites: 019:096, 019:098, 019:124, and journalism major; or consent of undergraduate director.

019:176 Visual Storytelling 4 s.h.
Experience with journalistic storytelling techniques, generating story ideas, researching, writing, producing, editing, and critiquing documentary features and other visual narratives; use of digital video and archival material to produce visual narrative pieces for broadcast and other media platforms. Prerequisites: 019:098, 019:123, 019:134, and journalism major; or consent of undergraduate director.

019:177 Convergence Journalism 4 s.h.
Use of multiple technologies for journalistic storytelling across media platforms, such as print, television, and Internet. Prerequisites: 019:098, 019:138, and journalism major; or consent of undergraduate director.

019:178 Iowa Journalist 4 s.h.
Experience in photojournalism and desktop publishing software consistent with real-world media and public relations objectives; students write, edit, design, and produce Iowa Journalist magazine. Prerequisites: 019:098, one course from 019:120 - 019:139, and journalism major; or consent of undergraduate director.

019:180 Special Projects in Mass Communication arr.
Research and readings to fit needs, interests of students. Prerequisite: consent of instructor.

019:181 Readings in Communication and Mass Communication 1-3 s.h.
Focus on a problem or issue. Prerequisite: consent of instructor.

019:182 Topics in Mass Communication 3 s.h.
**019:190 Honors Readings**  
Topic in journalism or mass communication, chosen by student. Repeatable. Prerequisites: honors standing and consent of instructor.  

**019:191 Honors Project**  
Independent research or project for honors students. Prerequisites: honors standing and consent of instructor.  

**019:192 Advanced Topics in Mass Communication**  
An area, issue, approach, or body of knowledge (globalization and news, critical issues in mass media, literary journalism, and so forth).  

**Primarily for Graduate Students**  

**019:220 Masters Seminar**  
Theoretical or methodological problems in mass communication. Repeatable.  

**019:225 Contemporary Problems in Journalism**  
Current issues in journalism and mass communication in the United States and the world.  

**019:226 Master’s Advanced Reporting and Writing**  
Writing workshop for new M.A. professional journalism emphasis students.  

**019:229 Master’s Media Project**  
Group project on topic chosen by students and instructor; research, investigation, and dissemination of findings in several media formats; advanced writing, visual, broadcast, or multimedia interest area.  

**019:231 Media Communication Theory I**  
Introduction to theory used by communication scholars.  

**019:232 Media Communication Theory II**  
Continuation of 019:231; social scientific theories.  

**019:235 Media Communication Research Methods I**  
Interpretive media studies research methods that involve field observation, interviews, textual analysis; use of contemporary, historical, legal resources.  

**019:236 Media Communication Research Methods II**  
Journalism and media communication research methods that involve collection of quantifiable data, including surveys, content analyses, experiments.  

**019:252 Social Meanings of News**  
How concept of news and news work has been studied in occupational, organizational, social, cultural contexts.  

**019:254 Communication and Change**  
Diverse perspectives on changing communication forms and their implications for media and society; theoretical and methodological approaches to research involving innovation.  

**019:255 Problems in International Communication**  
Representative topics: communication systems in national development and globalization; international and cross-cultural communication structure and theory; human rights; images, values; mass persuasion; laws, agreements; information channels, content, flow, effects; censorship, language, literacy.  

**019:256 Gender and Mass Communication**  
Approaches to the study of gender and communication; topics vary.  

**019:259 Theory of Popular Culture**
Major theoretical notions about popular culture and its intersection with the mass media.

**019:265 Approaches to Teaching**  
3 s.h.  
Institutional and disciplinary issues that influence the journalism/mass communication classroom, philosophies of teaching, and use of teaching strategies, techniques, and classroom technologies; for students planning to work in academia.

**019:279 Mass Communication Seminar**  
3 s.h.  
Readings, research.

**019:280 Masters Tutorial**  
arr.  
Topics in communication and mass communication inquiry. Prerequisite: consent of instructor.

**019:281 Masters Practicum**  
arr.  
Research, readings, projects to fit needs, interests of students. Prerequisite: consent of instructor.

**019:289 Masters Research**  
arr.  
Independent research for projects, theses. Repeatable. Prerequisites: consent of sponsoring faculty member, director of graduate studies, and instructor.

**019:320 Ph.D. Seminar**  
1 s.h.  
Forum on theoretical or methodological problems in mass communication. Repeatable. Prerequisite: consent of instructor.

**019:331 Advanced Communication Theory**  
3 s.h.  
Topics vary. Repeatable. Prerequisites: 019:231 and 019:232, or consent of instructor.

**019:332 Advanced Research Methods**  
3 s.h.  
Topics vary. Repeatable. Prerequisites: 019:235 and 019:236, or equivalents.

**019:333 Seminar in Media Communication**  
3 s.h.  
Topics vary. Repeatable.

**019:380 Ph.D. Tutorial**  
arr.  
Communication and mass communication inquiry. Prerequisite: consent of instructor.

**019:381 Ph.D. Research Practicum**  
arr.  
Conceptualization and execution of research projects. Prerequisite: consent of instructor.

**019:399 Dissertation**  
arr.  
Repeatable.
Latin American Studies

Director: Kristine Fitch (Communication Studies)
Undergraduate nondegree programs: Certificate, Minor in Latin American Studies
Web site: http://intl-programs.uiowa.edu/academic/lasp/index.shtml

The Latin American Studies Program (LASP) is interdisciplinary, focusing on the history, politics, social organization, economy, geography, music, religion, art, and literature of Central and South America, Mexico, and the Caribbean. Faculty members from across the College of Liberal Arts and Sciences participate in the Latin American Studies Program as affiliated faculty members. Other University of Iowa faculty members occasionally offer courses and participate in the program's research, study, and interdisciplinary activities.

The Latin American Studies Program prepares students for graduate study or for Latin America-related careers in business, communications, government, bilingual/bicultural education, secondary teaching, community organizing, and international work.

In addition to its instructional activity, LASP sponsors a wide variety of activities, brings scholars of Latin America to campus, and fosters institutional linkages.

Undergraduate Programs

The program offers the Certificate in Latin American Studies and a minor in Latin American studies. The certificate or minor may be earned in conjunction with a major in international studies, or it may be combined with study in a number of other programs, including majors in anthropology, history, political science, and Spanish and Portuguese; minors in any of these disciplines; or the Certificate in International Business. All students plan their programs in close cooperation with Latin American studies advisors.

Certificate

The Certificate in Latin American Studies requires a minimum of 24 s.h. in courses chosen from the list of LASP-approved courses (see "Approved LASP Courses" below). Students must maintain a g.p.a. of at least 2.00 in the certificate. Courses must include the following.

130:070 Introduction to Latin American Studies 3 s.h.
130:176 Latin American Studies Seminar 3 s.h.
At least 6 s.h. in each of two or more of the following departments: anthropology, history, political science, Spanish and Portuguese 12 s.h.
Four semesters (or equivalent) of Spanish or Portuguese language course work

LASP-approved courses that apply toward the student's major also may be applied toward the LASP certificate.

Courses applied toward the LASP certificate may be used to complete the College of Liberal Arts and Sciences General Education Program or the requirements for a major or a minor. The certificate is awarded only upon completion of a bachelor's degree. Holders of Iowa bachelor's degrees may return to complete the requirements for a certificate. A student may not be awarded both a minor and a certificate in Latin American studies.

Minor

The minor in Latin American studies requires a minimum of 15 s.h. in Latin-American studies-related courses, including 12 s.h. in advanced courses taken at The University of Iowa. For the minor, 100-level courses are considered advanced. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass.

Courses for the minor should be chosen from approved courses (see "Approved LASP Courses" below). Because the Latin American studies minor is interdisciplinary, students majoring in anthropology, history, political science, or Spanish and Portuguese may not count more than 6 s.h. from courses in their major department toward the minor. Students are strongly encouraged to take either or both of the following.

130:070 Introduction to Latin American Studies 3 s.h.
130:176 Latin American Studies Seminar 3 s.h.
Courses Approved for LASP

The following courses are approved for the Certificate in Latin American Studies and for the minor. Courses that are not listed here but that are concerned in part with Latin America sometimes may be used as electives to satisfy requirements for the certificate or the minor; see "Rotating Topics" below and consult the LASP director.

ANTHROPOLOGY

113:131 Latin American Economy and Society 3 s.h.
113:163 Archaeology of Mesoamerica 3 s.h.
113:166 The Aztecs, Their Predecessors, and Their Contemporaries 3 s.h.

ART

01H:105 Art of Pre-Columbian America 3 s.h.

CINEMA AND COMPARATIVE LITERATURE

048:024 Introduction to Latin American Film 3 s.h.
048:178 Topics in Latin American Cinema 3 s.h.

COMMUNICATION STUDIES

036:152 Latin American Media 3 s.h.

ENGLISH

008:133 Inter-American Studies (when content is Latin American) 3 s.h.

HISTORY

16W:106 Society and Revolution in Cuba 3 s.h.
16W:107 History of Mexico 3 s.h.
16W:110 Topics in Latin American History 3 s.h.
16W:111 Colonial Latin America 3 s.h.
16W:112 Introduction to Modern Latin America 3 s.h.
16W:114 Latin America and the U.S.: The Historical Perspective 3 s.h.
16W:115 Latin American Revolution 3 s.h.

INTERNATIONAL STUDIES

187:070/035:070/038:070/130:070 Introduction to Latin American Studies 3 s.h.
187:142 Introduction to Caribbean Studies 3 s.h.

LATIN AMERICAN STUDIES

130:070 Introduction to Latin American Studies (required for certificate students, recommended for minors) 3 s.h.
130:105 Independent Study arr.
130:176 Latin American Studies Seminar (required for certificate students, recommended for minors) 3 s.h.

MUSIC

025:104 Music of Latin America and the Caribbean 3 s.h.
025:163 Steel Band 1 s.h.
POLITICAL SCIENCE

030:144 Latin American Politics 3 s.h.
030:145 Latin American Political Parties 3 s.h.

PORTUGUESE

038:020 Contemporary Brazilian Narrative 3 s.h.
038:070/130:070/035:070/187:070 Introduction to Latin American Studies 3 s.h.
038:077 Brazil: The Erotic/Exotic Lure 3 s.h.
038:105 Brazilian Literature Before 1900 3 s.h.
038:106 Brazilian Literature After 1900 3 s.h.
038:112 Topics in Luso-Brazilian Literature (when topic is Latin American) 3 s.h.
038:115 Writing Brazil in the U.S. 3 s.h.
038:120 Topics in Luso-Brazilian Culture (when topic is Latin American) 3 s.h.

SPANISH

035:020 Contemporary Spanish American Narrative 3 s.h.
035:070/187:070/130:070/038:070 Introduction to Latin American Studies 3 s.h.
035:111 Readings in Spanish American Literature and Culture 3 s.h.
035:113 Screening Latin America 3 s.h.
035:130 Spanish American Civilization 3 s.h.
035:131 Contemporary Spanish American Fiction 3 s.h.
035:132 Spanish American Poetry 3 s.h.
035:134 Spanish American Short Story 3 s.h.
035:136 Culture and Language in the Andes 3 s.h.
035:140 Spanish American Literature of Fantasy 3 s.h.
035:142/187:142 Introduction to Caribbean Studies 3 s.h.
035:144/131:162 Latin American Women Writers 3 s.h.
035:145 Latin America Cinema 3 s.h.
035:171 Pan-Caribbean Literary Currents 3 s.h.
035:173 Colonial Spanish American Literature 3 s.h.
035:175 Cultural Identity in Caribbean Literature 3 s.h.
035:191/048:178 Topics in Latin American Cinema 3 s.h.

Rotating Topics

With prior approval, students may use these courses to satisfy requirements for the Certificate in Latin American Studies or for the minor when the course topic or focus is Latin America.

008:098 Honors Proseminar 4 s.h.
16W:051 Colloquium for History Majors (World) 3 s.h.
048:112 Proseminar in Cinema and Culture 1-2 s.h.
035:148 Topics in Cinema, Literature, and Society 3 s.h.
035:192 Topics in Film Studies 3 s.h.
035:195 Senior Seminar 3 s.h.
113:109 Literature and Anthropology 3 s.h.

Study Abroad

It is highly recommended, though not required, that students have an in-depth Latin American cultural experience, usually through study abroad, before completing their undergraduate requirements.

In cooperation with the Office for Study Abroad, LASP faculty members facilitate student participation in programs in
many different Latin American countries. Programs range from intensive language study to group programs with a special focus. University of Iowa-sponsored study abroad programs include summer programs with Universidad de Guanajuato in Mexico, Universidad de los Andes in Venezuela, and a health and nutrition program in Pontificia Universidad Católica Madre y Maestra in the Dominican Republic.

University of Iowa students may enroll in programs in Argentina, Brazil, Chile, Colombia, Costa Rica, Cuba, the Dominican Republic, Honduras, Mexico, and Uruguay. The University of Iowa cosponsors these programs through various consortiums.

Study abroad courses may be counted toward requirements for the certificate and the minor, subject to prior approval by the LASP director.

Financial Support

Students are encouraged to apply for a Stanley Undergraduate Scholarship for International Research/Fieldwork through University of Iowa International Programs. The scholarships are awarded to outstanding University of Iowa undergraduates who, in close consultation with a faculty member, propose well-conceived, small-scale research or fieldwork projects that require travel abroad. Students may conduct projects while participating in a study abroad program and may combine the scholarship with other awards and financial assistance. For information regarding other scholarships, contact LASP advisors, International Programs staff, and the LASP director.

Activities

In addition to its instructional activity, LASP organizes a range of public programming activities each semester, including film series, photography and art exhibits, conferences, roundtable discussions, and lectures. Recent events have included an international conference on contemporary Cuba and speakers on cinema, indigenous movements, human rights, and art.

Latin American Studies Courses

130:070 Introduction to Latin American Studies 3 s.h.
Cultures of Latin American countries with emphasis on cultural history and cultural production; interdisciplinary survey. Same as 035:070, 038:070, 187:070.

130:105 Independent Study arr.

130:176 Latin American Studies Seminar 3 s.h.
Leisure Studies

Chair: Kevin C. Kregel
Coordinator: Kenneth E. Mobily
Professors: Benjamin K. Hunnicutt (Leisure Studies/Literature, Science, and the Arts), Richard D. MacNeil (Leisure Studies/Aging Studies), Kenneth E. Mobily (Leisure Studies/Integrative Physiology), Michael L. Teague (Leisure Studies/Community and Behavioral Health)

Undergraduate degree: B.S. in Leisure Studies
Undergraduate nondegree program: Minor in Leisure Studies
Graduate degree: M.A. in Leisure Studies
Web site: http://www.uiowa.edu/~interdi/leisure/

Leisure plays an important role in our lives. The Leisure Studies Program contributes to the education of students in the College of Liberal Arts and Sciences by providing opportunities to study the phenomenon of leisure.

The program offers courses that help students learn how to use leisure time to enhance the quality of their lives. Several leisure studies courses may be used by students in all liberal arts and sciences majors to fulfill requirements of the General Education Program.

Leisure studies also offers undergraduate and graduate degree programs that prepare students for professional careers in the expanding fields of therapeutic recreation, child life, and recreational sport management. These degree programs prepare professionals to work in community, commercial, campus, and health care settings. The populations served by recreation professionals include the general public; students, colleges, and universities; children; and persons with disabilities or chronic conditions.

Undergraduate Programs

The program offers a Bachelor of Science in leisure studies with two tracks: therapeutic recreation and child life. It also offers a minor in leisure studies.

Bachelor of Science

The Bachelor of Science in leisure studies requires a minimum of 120 s.h., including work for the major, which varies by track. The therapeutic recreation track requires 56 s.h. of work for the major (38 s.h. in leisure studies courses and 18 s.h. of supporting course work from other departments). The child life track requires 46 s.h. of work for the major (34 s.h. in leisure studies courses and 12 s.h. of supporting course work from other departments).

Students also must complete the College of Liberal Arts and Sciences General Education Program.

Students may indicate their interest in the leisure studies major, with either track (therapeutic recreation or child life), when they are admitted to The University of Iowa or any time after that. But students must apply and be admitted to the major. Admission requirements for each track are listed under "Therapeutic Recreation Track" and "Child Life Track" below.

Therapeutic Recreation Track

Therapeutic recreation is a health-oriented field that involves providing recreation programs designed to improve or maintain the physical, emotional, mental, and social functioning of patients and consumers. Therapeutic recreation services involve a continuum of care that includes treatment using recreation activities to improve functional abilities; leisure education that helps individuals acquire skills, knowledge, and attitudes that facilitate an independent lifestyle; and recreation that uses activities to enhance health, growth, development, and independence through intrinsically rewarding leisure behavior.

Therapeutic recreation professionals are commonly employed in settings such as skilled nursing facilities, community recreation departments, state and community mental health institutions, general hospitals, physical rehabilitation centers, special recreation districts, correctional facilities, senior citizens' community-based programs, facilities for the mentally delayed, facilities for the emotionally disturbed, and substance-abuse programs.

Students must apply for admission to the leisure studies major. Admission requirements include completion of 24 s.h. at The University of Iowa (or 12 s.h. for transfer students), including completion of the prerequisite course work for the student's track (see below). Applicants must have a g.p.a. of at least 2.50 for all University of Iowa course work and a cumulative g.p.a. of at least 2.50; students with a University of Iowa or cumulative g.p.a. lower than 2.50 may apply for exceptional admission.

Admission requirements for the therapeutic recreation track include completion of the following prerequisite course work (12-14 s.h.).

Both of these:
Human Anatomy 3 s.h.
Elementary Psychology (or an equivalent or more advanced course addressing the same content areas) 3 s.h.

One of these:
Elementary Statistics and Inference 3 s.h.
Introduction to Statistical Methods 3 s.h.
Mathematics for the Biological Sciences 4 s.h.
Calculus for the Biological Sciences 4 s.h.
Statistics and Society 3 s.h.
Statistics for Business 4 s.h.
Elementary Statistics and Inference 3 s.h.
Introduction to Statistical Methods 3 s.h.

One of these:
Introduction to Sociology Principles 3-4 s.h.
Principles of Social Psychology 3-4 s.h.

Application forms are available on the Leisure Studies Program web site. Completed applications for the major with therapeutic recreation track must be submitted by October 15 for admission the following spring semester or by March 15 for admission the following fall semester.

The major in leisure studies with therapeutic recreation track requires the following course work.

**Therapeutic Recreation: Foundation**

All of these (25 s.h.):

169:060 Leisure in Contemporary Society 3 s.h.
169:061 Recreation Leadership and Programming 4 s.h.
169:150 Recreation Administration 3 s.h.
169:160 Introduction to Therapeutic Recreation 3 s.h.
169:161 Assessment and Evaluation in Therapeutic Recreation 3 s.h.
169:162 Therapeutic Recreation: Clientele 3 s.h.
169:163 Concepts and Issues in Therapeutic Recreation 3 s.h.
169:164 Therapeutic Recreation: Rehabilitation 3 s.h.

**Therapeutic Recreation: Supporting Electives**

Students must complete 18 s.h. of supporting elective course work, as follows.

Abnormal Psychology: Health Professions 3 s.h.
Abnormal Psychology 3 s.h.

Human Anatomy 3 s.h.
Human Development and Behavior 3 s.h.
Courses in human services (e.g., aging studies, psychology, sociology, social work, special education, counselor education) 9 s.h.

**Therapeutic Recreation: Internship**

Both of these (13 s.h.):
Preinternship Seminar 1 s.h.
Internship 12 s.h.
Child Life Track

Child life specialists are professionals with expertise in child development who advance effective coping through recreation, preparation for medical procedures and operations, patient and family education, and self-expression activities. Child life specialists provide services to support families and to promote children’s mastery of varied experiences, particularly children's health care events. They may provide care to children's families by assisting in accurate information processing and helping family members and other caregivers. Child life specialists also help educate other medical staff and community members regarding issues and needs of children involved in health care events or other stressful experiences. For more information about the profession, visit Child Life Council.

Students must apply for admission to the leisure studies major. Admission requirements include completion of 24 s.h. at The University of Iowa (or 12 s.h. for transfer students), including completion of the prerequisite course work for the student's track (see below). Applicants must have a g.p.a. of at least 2.50 for all University of Iowa course work and a cumulative g.p.a. of at least 2.50; students with a University of Iowa or cumulative g.p.a. lower than 2.50 may apply for exceptional admission.

Admission requirements for the child life track include completion of the following prerequisite course work (15-16 s.h.).

One of these:

- 027:053 Human Anatomy 3 s.h.
- 060:110 Principles of Human Anatomy 3 s.h.

All of these:

- 031:001 Elementary Psychology 3 s.h.
- 034:001 Introduction to Sociology Principles 3-4 s.h.
- 096:030 Human Development and Behavior 3 s.h.
- 169:070 Perspectives on Leisure and Play 3 s.h.

Application forms are available on the Leisure Studies Program web site. Completed applications for the major with therapeutic recreation track must be submitted by March 15 for admission the following fall semester (students may enter the child life track only in fall).

The major in leisure studies with child life track requires the following course work.

Child Life: Foundation

All of these (21 s.h.):

- 169:061 Recreation Leadership and Programming 4 s.h.
- 169:077 Introduction to Child Life 3 s.h.
- 169:160 Introduction to Therapeutic Recreation 3 s.h.
- 169:162 Therapeutic Recreation: Clientele 3 s.h.
- 169:165 Child Life: Methods and Materials 3 s.h.
- 169:166 Child Life: Seminar 3 s.h.
- 169:167 Child Life Practicum (taken twice) 2 s.h.

Child Life: Supporting Electives

Students must complete 12 s.h. of supporting elective course work, as follows. Other supporting courses may be added with consent of the student's advisor.

- 031:041 Loss and Trauma 3 s.h.
- 034:061 The American Family 3 s.h.
- 20E:103 Medical and Technical Terminology 2 s.h.
- 07E:114 Parent-Child Relationships 3 s.h.
- 07U:140 Characteristics of Disabilities 3 s.h.
- 07C:145 Marriage and Family Interaction 3 s.h.
- 07U:190 Interdisciplinary Issues in Disabilities 1-3 s.h.
- 07C:199 Counseling for Related Professions 3 s.h.
Child Life: Internship

Both of these (13 s.h.):

169:190 Preinternship Seminar 1 s.h.
169:192 Child Life Internship 12 s.h.

Four-Year Graduation Plan

The Four-Year Graduation Plan is not available for the leisure studies major. Students should work with their advisors to develop an individual graduation plan.

Honors

The honors program is designed for superior students. It gives participants some research experience and a perspective on some aspects of graduate study. To be eligible for honors, students must maintain a cumulative University of Iowa g.p.a. of at least 3.33. For honors program application forms, contact the Leisure Studies Program.

To qualify for a degree with honors in leisure studies, students must successfully complete 169:194 Honors Readings and 169:195 Honors Problems, for which they must complete a reading or research project under the supervision of a leisure studies faculty member and write a paper summarizing the project's results. Honor students also must maintain a cumulative University of Iowa g.p.a. of at least 3.33 throughout the rest of their degree work.

Contact the University of Iowa Honors Program for more information about honors study at Iowa.

Minor

The minor in leisure studies requires a minimum of 15 s.h. in leisure studies courses, including 12 s.h. in 100-level courses at The University of Iowa. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass. Students choose courses according to their interests and the recommendations of the leisure studies coordinator.

Graduate Program

The program offers a Master of Arts, with and without thesis, in leisure studies. Undergraduate preparation in leisure studies is not required for successful completion of the graduate program; students from diverse backgrounds are encouraged to apply. However, students may need to fulfill prerequisites specific to their specialization areas.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

Master of Arts

The Master of Arts in leisure studies requires a minimum of 33 s.h. of graduate credit with thesis, and 36 s.h. of graduate credit without thesis. Students choose one of two specialization areas: therapeutic recreation or recreational sport management. All M.A. students must complete a common group of core courses and work in their specialization area.

CORE REQUIREMENTS

All M.A. students must take these courses.

07P:143 Introduction to Statistical Methods 3 s.h.
169:200 Historical and Philosophical Perspectives on Leisure 3 s.h.
169:205 Research Methods and Leisure Behavior 3 s.h.
169:273 Work and Leisure in American Culture 3 s.h.

Therapeutic Recreation Specialization

The therapeutic recreation specialization prepares students to meet the challenges of outpatient- and community-based health care service delivery. The program stresses research and business skills that will enable graduates to find the best jobs in the field.

Therapeutic recreation specialists are increasingly called upon to deliver preventive outpatient services, such as
programs designed to prevent secondary impairments in persons with disabilities (e.g., arthritis exercise to manage pain, fall prevention for older adults); education for individuals with negative lifestyle habits (e.g., smoking, substance abuse); programs designed to restore meaning and purpose to life following traumatic events (e.g., following a spinal cord injury); and initiatives to help communities and businesses make services accessible to persons with disabilities.

Iowa's therapeutic recreation program emphasizes business skills and innovation in delivery of services. Economics and Financing (169:252) and classes in entrepreneurship and new business formation prepare students to enter the workforce ready to build therapeutic recreation businesses that are self-supporting or profitable.

Students also acquire research skills that they can apply directly to therapeutic recreation practice, for example, to assess the effectiveness of specific interventions or the demand for varied services in a community.

In addition to the M.A. common core requirements (above), therapeutic recreation specialization students must complete the following.

- 169:163 Concepts and Issues in Therapeutic Recreation 3 s.h.
- 169:252 Economics and Financing 3 s.h.
- 169:262 Procedures in Therapeutic Recreation 3 s.h.
- Cognate area courses (entrepreneurship in therapeutic recreation) 10 s.h.

Nonthesis students take an additional 6 s.h. of electives. Thesis students complete 6 s.h. of 169:398 M.A. Thesis.

Therapeutic recreation students must complete a practicum (169:289 Graduate Practicum in Therapeutic Recreation) to sit for the national certification examination.

**Recreational Sport Management Specialization**

The recreational sport management specialization prepares students for positions in public and private recreation and sport management. Students typically find employment in community or municipal recreation programs, campus recreation programs, or commercial recreation and sport operations.

In addition to the M.A. common core requirements (above), recreational sports management specialization students must complete the following.

- 169:250 Seminar in Recreation Management 3 s.h.
- 169:251 Risk Management 3 s.h.
- 169:252 Economics and Financing 3 s.h.
- Cognate area courses (business, communications, or cultural studies) 6-9 s.h.

Nonthesis students take an additional 6 s.h. of electives. Thesis students complete 6 s.h. of 169:398 M.A. Thesis.

**Internships**

Internships, available in several areas, are strongly recommended for graduate students.

**Assistantships**

The program offers a limited number of teaching assistantships; applications should be made directly to the leisure studies academic coordinator. Teaching assistants support General Education Program courses offered by the Leisure Studies Program.

**Leisure Studies Courses**

- **169:040 The Good Society** 3 s.h.
  Critiques of the existing social order, articulation of models of a good society with associated conceptions of the good life. GE: Humanities. Same as 033:040.

- **169:045 Health for Living** 3 s.h.
  Personal health strategies; focus on disease prevention, wellness. GE: Health and Physical Activity.

- **169:050 Making Choices: Interdisciplinary Perspectives** 3 s.h.
  GE: Humanities. Same as 033:050.

- **169:060 Leisure in Contemporary Society** 3 s.h.
  Basic philosophical, historical, scientific foundations and developments; function, settings of organized recreation.
169:061 Recreation Leadership and Programming 3 s.h.
Leadership principles, techniques; programming techniques.

169:070 Perspectives on Leisure and Play 3 s.h.
Relationships between leisure and economics, sociology, other social sciences; effect of leisure on individual and group behavior; antecedents, motives, consequences of leisure behavior. GE: Social Sciences.

169:072 Leisure and the Liberal Arts 3 s.h.
Integration of the ideal of a liberal education with worthy, meaningful use of free time in contemporary society; classic writings in the humanities. GE: Humanities.

169:076 Culture and Community in Human Services 3 s.h.
Roles played by culture and community in human services; aspects of culture and community-based perspectives, including race, ethnicity, gender, class, sexuality, religion; disproportionate influence that particular cultures and communities exert on the structures of society.

169:077 Introduction to Child Life 3 s.h.
Orientation to the field of child life services including services for hospitalized children and their families.

169:080 Introduction to Place Studies 3 s.h.
Same as 033:080.

169:108 Basic Aspects of Aging 3 s.h.
Social, psychological, and biological aspects; demographics of aging, health, economic issues, primary relationships, social services. Prerequisites: (for 042:108) 031:001 or 034:001, and sophomore or higher standing. GE: Social Sciences. Same as 042:108, 096:108, 153:108.

169:142 Health Promotion in the Workplace Setting 3 s.h.
Management and organizational theories; assessment, planning, implementation, and evaluation of clinical and workplace (targeted) health promotion programs.

169:146 Health Promotion for Older Adults 3 s.h.
Problems, strategic efforts toward long-term goal of health promotion; disease prevention; slowing the decline caused by chronic conditions to extend independent, rewarding lives. Same as 096:146, 153:146.

169:148 Personal Training Management 3 s.h.
Basics of personal training, including establishing a personal training business, screening, and assessing clients; current issues and certifications.

169:150 Recreation Administration 3 s.h.
Personnel, finance, budgets, liability, marketing.

169:151 Liability in Recreation and Sport 3 s.h.
Unintentional torts (negligence), civil liability, and criminal liability in recreation and sport settings; focus on community/commercial recreation and campus recreation settings.

169:152 Park and Recreation Facility Management 3 s.h.
Facilities management, personnel assignment and evaluation, fee structures, maintenance, programming, compliance with regulations and standards.

169:153 Commercial Recreation Management 3 s.h.
Basic management skills for profit-based recreation and sport businesses; operations, business plans, organizational behavior, risk management, inventory, purchasing, marketing.

169:155 Camp Administration 3 s.h.
Basics of camp administration; risk management, programming, general standards set by the American Camping Association.

169:156 Design of Recreation Facilities 3 s.h.
Horticulture, floriculture, landscape design, agronomy, turf management; their relation to planning and design of
recreation and park areas and facilities.

</tbody>
</table>
Historical and philosophical origins of leisure studies; historical issues related to leisure ideas, such as shorter hours, share-the-work, utopian vision of a better society.

169:205 Research Methods and Leisure Behavior 3 s.h.
The scientific process: research designs for experiments and surveys, questionnaire construction, sampling theory, basic data analysis.

169:250 Seminar in Recreation Management 3 s.h.
The sport/leisure industry and product characteristics of nonprofit, private/commercial, and public organizations; participant and spectator consumer behavior; fundamentals of market research in sport/leisure organizations.

169:251 Risk Management 3 s.h.
Legal knowledge necessary for effective management of sport, recreation, and physical activity programs, avoidance of legal problems; strategies for addressing issues such as right to participate, liability for injuries, risk management; legal statutes that govern sport, health, recreation organizations.

169:252 Economics and Financing 3 s.h.
Economic issues for sport/leisure services in nonprofit, private/commercial, and public sectors; strategic financial analysis for the nonfinancial manager; principles, issues in financing sport/leisure organizations.

169:262 Procedures in Therapeutic Recreation 3 s.h.
Current issues in the field; application of business and research principles to therapeutic recreation practice and program administration. Prerequisite: consent of instructor.

169:264 Therapeutic Recreation: Services 3 s.h.
Initiation, improvement, expansion of therapeutic recreation service for disabled persons; practice in program evaluation procedures; parallel practices in related fields. Prerequisite: consent of instructor.

169:273 Work and Leisure in American Culture 3 s.h.
Methods and insights of American studies and leisure studies applied to work/leisure relationship in American life; patterns and perceptions of work and leisure, leisure’s share and potential; changing American values.

169:289 Graduate Practicum in Therapeutic Recreation 3-9 s.h.

169:290 Graduate Internship 3-9 s.h.
Prerequisites: recreational sports management emphasis and consent of instructor.

169:291 Problems 3-9 s.h.
Prerequisite: consent of instructor.

169:299 Graduate Research Problems 3-9 s.h.
Prerequisite: consent of instructor.

169:301 Research Colloquium in Leisure Studies 3 s.h.
Current faculty research; individual work with faculty members on projects that will be presented in class.

169:398 M.A. Thesis 1-6 s.h.
Repeatable. Prerequisite: consent of instructor.
Linguistics

Linguistics is the scientific study of human languages, which are highly complex systems. Areas of study include word structure (morphology), speech sounds (phonetics) and their patterns of combination and contrast (phonology), sentence structure (syntax), and meaning relations (semantics).

Linguists study well-known and familiar languages, such as English, Spanish, Russian, and Chinese. They also study less well-known languages and even those languages about which little has been discovered. While human languages are different from one another in many ways, there are broad similarities among them, supporting the idea that the capacity for language is part of human cognitive functions.

The description of formal patterns of human language has a number of applications. Linguistics is connected to psychology and to speech and hearing, in studying how children learn language, how speakers process and interpret language, and how injuries and disorders affect both production and perception of speech. It is linked with anthropology and other social sciences in studying how language use relates to culture, region, class, and gender. Linguists and computer scientists collaborate to construct computational representations of syntax and semantics for processing natural languages.

Linguistics has important ties with instruction in foreign languages and in English as a second language. Studies of how languages are learned are based in part on analysis of the languages in question. They also are grounded strongly in theories of second language acquisition, which in turn are related to theories of how linguistic knowledge is represented in the mind.

People with linguistic training teach English as a second language and help clinicians retrain people with linguistic disabilities. Some help design school programs for minority groups or intelligence and achievement tests. Linguists also work in occupations related to law, the computer industry, and foreign languages.

Undergraduate Programs

The department offers a Bachelor of Arts and a minor in linguistics.

High scores on verbal, analytic, and quantitative aptitude tests are indicators of success in linguistics. Although few aspects of the field deal with numbers, students must be able to reason logically and explicitly and deal with formulas and abstract symbols. Depending on their vocational goals, prospective linguistics students should consider pursuing their studies either through the M.A. in linguistics with a professional focus or through the Ph.D., or they should take a second major. Appropriate companion fields include foreign languages, English, anthropology, sociology, speech pathology, psychology, mathematics, computer science, philosophy, and elementary and secondary education.

Bachelor of Arts

The Bachelor of Arts in linguistics requires a minimum of 120 s.h., including 24 s.h. of work for the major. The program prepares students to do basic language analysis in syntax-semantics (sentence patterns and their relation to meanings) and phonology (sound patterns). Elective courses in a variety of subspecialties enable students to tailor the program to their own interests.

The major requires the following course work.

103:100 Introduction to Linguistics 3 s.h.
103:110 Articulatory and Acoustic Phonetics 3 s.h.
103:111 Syntactic Analysis 3 s.h.
103:112 Phonological Analysis 3 s.h.

A course in language history (e.g., 103:131 or 103:139)
or
A course in an old language (classical Greek, Latin, Old English, Sanskrit)

Electives chosen in consultation with a faculty advisor 9 s.h.

Students must complete no fewer than 15 s.h. of requirements for the major at The University of Iowa, including 103:110 Articulatory and Acoustic Phonetics, 103:111 Syntactic Analysis, and 103:112 Phonological Analysis.

English Grammar (103:028) does not count toward the linguistics major.

Students must complete the College of Liberal Arts and Sciences General Education Program.

TESL Emphasis

As part of the major in linguistics, students may complete an emphasis in Teaching English as a Second Language (TESL). The TESL emphasis can prepare students to teach English to nonnative speakers abroad. It also is excellent preparation for graduate work in second language acquisition. TESL emphasis students complete the requirements for the linguistics major listed above, using the following course work to satisfy the electives requirement.

Both of these:

103:141 The Structure of English 3 s.h.
103:145 Methods of Teaching English as a Second Language 3 s.h.

One of these:

103:107 Practicum in Teaching English as a Second Language 3 s.h.
103:156 Child Language-Linguistic Perspectives 3 s.h.
103:161 Practical Phonetics 3 s.h.

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

Before the third semester begins: at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: Introduction to Linguistics (103:100) and at least one-half of the semester hours required for graduation

Before the seventh semester begins: two more courses in the major and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: two more courses in the major

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Honors

Members of the University of Iowa Honors Program may graduate with honors in linguistics by completing the major course work plus an honors thesis, which must be prepared in consultation with the student's academic advisor. Membership in the Honors Program requires that students maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University of Iowa Honors Program for more
Minor

The minor in linguistics requires a minimum of 15 s.h. in linguistics courses, including at least 12 s.h. in University of Iowa courses numbered 103:100 Introduction to Linguistics and above. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass. Courses for the minor must include 103:100 Introduction to Linguistics, 103:110 Articulatory and Acoustic Phonetics, 103:111 Syntactic Analysis, and 103:112 Phonological Analysis.

Language for Nonmajors

Students may use the four-semester sequence in Swahili (103:125 Elementary Swahili I, 103:126 Elementary Swahili II, 103:127 Intermediate Swahili I, and 103:128 Intermediate Swahili II) to fulfill the College of Liberal Arts and Sciences General Education Program foreign language requirement. The sequences also satisfy requirements for certain undergraduate programs, for example, those in the African American Studies Program.

Joint B.A./M.A. with TESL Focus

The Department of Linguistics offers a joint Bachelor of Arts/Master of Arts for undergraduate majors planning to earn a master's degree in linguistics with a Teaching English as a Second Language (TESL) focus. B.A./M.A. students take selected graduate-level courses while still undergraduates and may count 12 s.h. of advanced course work toward both degrees. Once students complete the requirements for the bachelor's degree, they are granted the B.A., and they usually complete the M.A. one year later.

As part of the undergraduate major, B.A./M.A. students take 103:141 The Structure of English, a course in language history, 103:100 Introduction to Linguistics, and 103:110 Articulatory and Acoustic Phonetics.

They substitute some graduate-level course work for normal undergraduate requirements. Instead of taking 103:111 Syntactic Analysis to fulfill the B.A. syntax requirement, they take 103:201 Introduction to Syntax, the first course in the mandatory two-course syntax sequence for M.A. students. Instead of taking 103:112 Phonological Analysis to fulfill the B.A. phonology requirement, they take 103:203 Introduction to Phonology, the first in the graduate two-course phonology sequence.

In addition, 103:145 Methods of Teaching English as a Second Language and 103:202 Syntactic Theory count toward both degrees and typically are taken during the senior year.

To be admitted to the program, students must be working toward an undergraduate major in linguistics, must have completed at least 80 s.h. of undergraduate course work (typically by the end of their fifth semester), and must have a g.p.a. of at least 3.50.

Graduate Programs

The department offers a Master of Arts, with or without thesis, and a Doctor of Philosophy in linguistics.

The graduate programs emphasize theory and research. Students interested in nonuniversity careers also may take courses in applied linguistics and other fields, either in connection with doctoral work or as an option in the M.A. program.

Iowa's Department of Linguistics has particular strengths in second language acquisition (SLA), phonology, and syntax.

The curriculum in second language acquisition includes courses that provide an overview and analysis of current SLA research conducted within the generative framework, with emphasis on explaining the linguistic competence of second language learners in terms of universal grammar (UG), the innate language acquisition device. Work focuses on experimental research investigating the influence of the first language,
theories of UG access, and related topics.

The phonology curriculum emphasizes current theoretical perspectives, including optimality theory, and the collection, description, and interpretation of novel phonological and phonetic data. Courses feature extensive work in data analysis and problem solving, focusing on construction and evaluation of phonological theories, particularly in light of new empirical data.

The syntax curriculum includes the dual emphases of empirical and theoretical perspectives. It offers a variety of foundational courses that build analytic and argumentation skills, as well as specialized course work on current issues in syntactic theory. The courses consist of intensive work in problem solving. They combine discovery and description of new linguistic data with exploration of the implications of such facts in testing and constructing syntactic theories.

**Master of Arts**

The Master of Arts in linguistics requires a minimum of 30 s.h. of graduate credit with thesis, or 37 s.h. without thesis.

All students take a required set of core courses in phonology, syntax, and language acquisition. Thesis students also complete at least 8 s.h. of electives and earn up to 6 s.h. for the thesis. Nonthesis students also complete 15 s.h. of Department of Linguistics course work, which may include a 9 s.h. focus (e.g., teaching English as a second language). A student's advisor must approve all courses that count toward the degree.

A student with a linguistics background may waive up to 6 s.h. of course work if the department determines that he or she completed comparable work before enrolling in the program.

Comprehensive examinations cover phonology, syntax, and applied linguistics (for students who choose this option).

The required core courses are as follows.

103:110 Articulatory and Acoustic Phonetics  3 s.h.
103:200 Proseminar: Morphosyntax  1 s.h.
103:201 Introduction to Syntax  3 s.h.
103:202 Syntactic Theory  3 s.h.
103:203 Introduction to Phonology  3 s.h.
103:204 Phonological Theory  3 s.h.
103:211 Generative Second Language Acquisition  3 s.h.

One of these:

103:113 Linguistic Field Methods  3 s.h.
103:210 Linguistic Structures  3 s.h.
103:217 Language Universals Linguistic Typology  3 s.h.

**Doctor of Philosophy**

The Doctor of Philosophy in linguistics requires a minimum of 72 s.h. of graduate credit, or 73 s.h. for graduates of the M.A. nonthesis program. The highly selective program provides students with a strong foundation in theoretical linguistics and helps them develop the skills they will need to explore the close relationship between linguistics and related disciplines.

The Ph.D. core includes the following course work (total of 18 s.h.).

Two upper-level syntax courses numbered 103:212 Advanced Syntactic Theory or above
Two upper-level phonology courses numbered 103:214 Advanced Phonological Theory or above
At least two seminars
An approved specialty area of 18 s.h. also is required, and students must achieve proficiency in a foreign language, as specified by department regulations.

To pass the comprehensive examination for the Ph.D., a student must gain approval for two papers of publishable quality. One must be in phonology or syntax. The other should be in an area of the student's choosing and must be distinct from the area of the first paper.

An oral defense of the dissertation and three years in residence at The University of Iowa are required. In addition, all candidates are required to gain supervised experience in teaching and research.

**Admission**

Applicants to the graduate program in linguistics must complete an application form, submit GRE General Test scores, and have three letters of recommendation sent to the Department of Linguistics. Students whose first language is not English must submit Test of English as a Foreign Language (TOEFL) scores. Applications for admission should be submitted as early as possible for the following academic year.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

**Financial Support**

Fellowships, teaching assistantships, and research assistantships are available to qualified graduate students. Applications are due no later than March 1 for the following academic year; earlier submission is strongly encouraged.

Exceptionally well-qualified applicants may be eligible for a Presidential Graduate Fellowship. Individuals interested in being nominated for a presidential fellowship should submit all application materials by January 15 for the following academic year.

Applications for all awards are considered only for students whose application for admission is complete.

**English as a Second Language**

ESL instruction is offered in three distinct, but related, programs: the ESL credit classes, the Iowa Intensive English Program (IIEP), and the Teaching Assistant Preparation in English Program (TAPE). These programs meet the needs of students whose first language is not English. The ESL credit classes help students raise their English proficiency so they can complete a degree successfully. The IIEP provides intensive instruction for students who must raise their English proficiency to gain admission to a university or college. The TAPE program helps students improve their oral competence in English so they may assume classroom teaching responsibilities.

**ESL Credit Classes**

English as a Second Language Credit Classes bridge the gap between full-time language instruction and full-time academic work, serving students who score 530-599 (paper-based) or 71-100 (Internet-based) on the Test of English as a Foreign Language (TOEFL). ESL courses are offered to increase proficiency in four skill areas: reading, writing, speaking, and listening. Courses also are offered in grammar and pronunciation. Each course carries 3 s.h. of credit, which undergraduates may count as elective credit toward graduation. Courses are taught by teaching assistants pursuing advanced degrees in linguistics.

Courses taken to meet the College of Liberal Arts and Sciences English proficiency requirement may not be taken P/N. ESL courses may not be taken S/U. All required ESL courses must be completed before registration in rhetoric courses. Once enrolled, students may not drop ESL courses.

**Iowa Intensive English Program (IIEP)**

The IIEP primarily serves students on conditional admission and persons who have not yet been admitted to
the University and who score below 530 (paper-based) or 71 (Internet-based) on the Test of English as a Foreign Language (TOEFL). The program offers intensive English instruction and a cultural, social, and academic orientation to the United States. Instruction emphasizes proficiency in spoken and written English, which is crucial to college and university work. Grammar and the basic language skills of writing, reading, listening comprehension, and speaking are taught each day at all levels, beginning through advanced.

Each student receives 20 hours of classroom instruction each week plus individual work in the language laboratory. Field trips and cultural and social experiences are an integral part of the program. Students enrolled in the IIEP have full access to all University facilities. The program welcomes international students preparing to enter universities and colleges as well as other adults who want to improve their English skills. Instruction is by full-time professional ESL instructors.

International students admitted to the IIEP receive a certificate of eligibility (Form I-20), which enables them to apply for a student visa at the nearest U.S. consulate or embassy. Application materials are available from the ESL Programs Office and on the Iowa Intensive English Program web site.

Teaching Assistant Preparation in English (TAPE)

The Teaching Assistant Preparation in English program (TAPE) is designed for graduate students whose first language is not English, who need additional work on English communication, and who will hold teaching assistantships while at The University of Iowa. Only students who need the program and who have sufficient competence in English to profit from it are eligible. TAPE courses are open to graduate students who have been evaluated for TA certification and to others if space is available. Students are taught by full-time professional ESL instructors.

Foreign Language Instruction

Instruction in Swahili is provided by native-speaking teachers through the department. Elementary and intermediate Swahili are taught every year. The classroom emphasis on oral communication skills is augmented by discussion of various aspects of the culture.

Facilities

The Department of Linguistics has two laboratories. One is equipped with 14 computer workstations for small group instruction, individual work, and student research in speech analysis, second language acquisition, computational linguistics, and other areas. The other has a soundproof booth connected to a computer with software for speech analysis. Remote terminals and personal computers are also available to students.

The departmental reading room, which contains a modest library, provides a common meeting place for faculty and students. Students have considerable influence on departmental affairs and enjoy a high degree of individual instruction.

Linguistics Courses

Primarily for Undergraduates

103:011 Language and Society 3 s.h.
Correlations between social and linguistic behavior; methods for discovering and describing socially significant language behavior; educational and political implications of findings. GE: Social Sciences.

103:013 Language and Formal Reasoning 3 s.h.
Semantics and sentence structure of English; word meanings, meaning connected to truth conditions, reasoning based on logical connectives and quantifiers, evaluation of valid and invalid arguments. GE: Quantitative or Formal Reasoning.

103:020 Introduction to the Study of Language 3 s.h.
Nontechnical introduction: classification of languages, writing systems, language and the brain, acquisition of first and second languages, bilingualism, animal communication, language and computing.

103:125 Elementary Swahili I
GE: Foreign Language First Level Proficiency.

103:126 Elementary Swahili II

103:127 Intermediate Swahili I

103:128 Intermediate Swahili II
GE: Foreign Language Fourth Level Proficiency.

103:129 Advanced Swahili
Advanced speaking, listening, reading, and writing skills. Prerequisite: 103:128 or equivalent.

103:130 Intensive Conversational Swahili
Extensive practice in production and comprehension of Swahili, primarily for students preparing to spend the summer in a Swahili-speaking area. Prerequisite: intermediate Swahili I or equivalent. Corequisite: 103:128.

103:131 History of the English Language
Development of phonological and grammatical structure of English, from Old to Modern English; dialectal differentiation in English. Prerequisite: 103:100 or equivalent. Same as 08L:131.

103:132 Elementary Old English
Reading knowledge of Old English; introduction to Anglo-Saxon literature and culture. English majors may apply this course to the following area and/or period requirement. AREA: Medieval and Early Modern Literature and Culture. PERIOD: Early Literatures Through 17th Century. Same as 008:140.

103:139 Chinese Historical Phonology
Phonology of Mandarin, other major Chinese dialect groups; reconstruction of the sound system of Middle and Old Chinese. Same as 039:139.

103:140 Introduction to Computational Linguistics
Introduction to computational linguistics; focus on theory and practice of natural language processing and syntactic and semantic analysis. Same as 22C:146.

103:141 The Structure of English
Descriptive analysis of English, including word and sentence structure; focus on relevance to teaching English as a second language. Offered fall semesters. Prerequisite: 103:111 or consent of instructor.

103:144 Introduction to Chinese Linguistics
Aspects of modern Chinese linguistics, such as Chinese phonology, syntax, pedagogical grammar, history of the language. Taught in English. Same as 039:144, 164:181.

103:145 Methods of Teaching English as a Second Language
Observations of ESL and intensive English classes at the University; design and presentation of short lessons, text evaluation, demonstrations of innovative approaches of the last decade; materials. Offered spring semesters. Prerequisites: 103:110 and 103:141. Same as 164:163.

103:150 Language and Gender
Gender-related language variation; current research on gender-specific linguistic forms and usage in the United States and other language communities; introduction to relevant principles of linguistic theory and analysis. GE: Cultural Diversity. Same as 113:173.

103:155 Morphology
Lexicon and principles of word formation; principal processes of inflection, derivation, and compounding found in the world's languages; relation to phonology, syntax; practice in morphological analysis from a variety of languages. Prerequisite: 103:100.
103:156 Child Language-Linguistic Perspectives  3 s.h.
Linguistic theory as applied to first-language learning, including acquisition of sounds, syntax and word meaning, acquisition strategies, properties of input, theories of first-language acquisition. Prerequisite: 103:100.

103:157 Linguistic Theory and Second Language Acquisition  3 s.h.
Introduction of research results obtained by generative second language acquisition framework and their implications for classroom teaching methods; current views of language architecture; focus on inflectional morphology and linguistic interfaces, which have been proposed to be severe bottlenecks for acquisition; research findings on acquisition of syntax, phonology, semantics, linguistic pragmatics; pedagogical implications of these findings. Prerequisites: 103:111 and 103:112, or equivalents. Same as 164:157.

103:161 Practical Phonetics  3 s.h.
Contemporary articulatory and acoustic research, including second-language acquisition, elicitation and computer analysis of primary linguistic data. Prerequisite: 103:110.

103:163 Philosophy of Language  3 s.h.
Contemporary topics. Prerequisite: consent of instructor. Same as 026:189.

103:172 Psychology of Language  3 s.h.
Theoretical, empirical investigations of linguistic behavior; behaviorist, rationalist models in context of formal linguistic structure and context of models of speech perception and production. Offered spring semesters. Prerequisite: 103:100 or consent of instructor. GE: Social Sciences. Same as 003:117.

103:175 Introduction to Semantics  3 s.h.
Overview of meaning in natural language mapped onto lexical and syntactic structures; formal logical and set theory description; discussion of truth conditions, compositionality, presupposition, definiteness, quantification in natural language. Prerequisite: course in syntax or consent of instructor.

103:176 Language Development  1-3 s.h.
Models of children's language acquisition; child language/communication development from infancy through school age, in context of current developmental research. Offered spring semesters. Prerequisites: (for 003:118) 031:001 and 103:100 or consent of instructor for undergraduates; consent of instructor for graduate students. Prerequisite: (for 103:176) 103:100 or 103:172 or consent of instructor. GE: Social Sciences. Same as 003:118.

103:177 Basic Neuroscience for Speech and Hearing  3 s.h.
Basic anatomy, physiology of central nervous system; emphasis on neural systems involved in normal and disordered communication. Offered fall semesters. Prerequisite: course in biology or zoology or physiology, or consent of instructor. Same as 003:116.

103:199 Special Projects  arr.
Theoretical and applied topics.

Primarily for Graduate Students

103:200 Proseminar: Morphosyntax  1 s.h.
Basic morphological analysis of languages other than English; morphological markers of syntactic relations (morphosyntax), such as case/agreement, possession, switch reference and other inflectional marking. Corequisite: 103:201.

103:201 Introduction to Syntax  3 s.h.
Methods and argumentation for formal analysis of sentence structure through induction from language data of central concepts and relations; hypothesis testing, empirical bases of theoretical concepts. Corequisite: 103:200. Same as 164:241.

103:202 Syntactic Theory  3 s.h.
Current syntactic theory examined through analysis of data sets, readings in recent research; emphasis on argument construction, statement of formal principles. Offered spring semesters. Prerequisite: 103:201. Same as 164:242.
### 103:203 Introduction to Phonology
Analysis of sound systems, focus on early generative phonological theory; extensive practice in analysis using data from a variety of languages; linguistic argumentation. Prerequisite: 103:110. Same as 164:203.

### 103:204 Phonological Theory
Post-SPE phonological theory, including autosegmental phonology, feature geometry, the syllable, optimality theory. Prerequisite: 103:203. Same as 164:244.

### 103:205 Topics in Linguistic Theory
Varied topics in linguistic theory; for graduate students. Prerequisite: consent of instructor.

### 103:206 First Language Acquisition
Child language from a crosslinguistic perspective. Prerequisites: 103:110, and 103:141 or 103:201. Same as 164:245.

### 103:210 Linguistic Structures
Grammatical and/or phonological structure of a selected language or language family. Repeatable with different language. Prerequisite: consent of instructor.

### 103:204 Phonological Theory
Overview of current second-language acquisition research in the generative linguistic framework; focus on characterizing second language learners' linguistic competence and how it is constrained by principles of universal grammar. Offered fall semesters. Prerequisites: 103:111 or 103:201, and 103:112 or 103:203. Same as 164:246.

### 103:212 Advanced Syntactic Theory
Recent developments in syntax; comparison of theories, argumentation, and uses of data. Repeatable. Same as 164:247.

### 103:211 Generative Second Language Acquisition
Overview of current second-language acquisition research in the generative linguistic framework; focus on characterizing second language learners' linguistic competence and how it is constrained by principles of universal grammar. Offered fall semesters. Prerequisites: 103:111 or 103:201, and 103:112 or 103:203. Same as 164:246.

### 103:214 Advanced Phonological Theory

### 103:216 Topics in Second Language Acquisition
Recent developments of selected issues in second language acquisition. Repeatable. Prerequisite: 103:211 or consent of instructor. Same as 164:249.

### 103:217 Language Universals Linguistic Typology
Proposed universal principles of linguistic structure; approaches to classification of languages on the basis of grammatical and phonological structure. Prerequisite: 103:201 or equivalent or consent of instructor.

### 103:218 Psycholinguistics
Theoretical, empirical issues in psycholinguistics; models demonstrating relation of formal language structure to psychological operations used in speech perception and production; laboratory emphasis on paradigmatic research in psycholinguistics. Offered fall semesters. Prerequisite: consent of instructor. Same as 003:218.

### 103:220 Seminar: Linguistic Anthropology
Fundamental concepts and methods employed in the anthropological study of language; principal areas of current research. Same as 113:271.

### 103:221 Seminar: Language and Gender
Role of language and discourse in cultural constructions of gender identities and relations, including domination and subordination; theoretical perspectives, methodological approaches that have shaped thought on the language/gender nexus. Prerequisite: 113:220 or 131:220 or consent of instructor. Same as 113:273.

### 103:230 Advanced Hearing Science and Speech Perception
Perception of speech and other sounds by human listeners, how these perceptual abilities relate to the physiology of the auditory system; perception of speech by hearing-impaired listeners through hearing aids or cochlear implants. Offered spring semesters. Prerequisite: (for 003:230) 003:113 or consent of instructor. Prerequisites: (for 103:230) background in phonetics, speech science, and hearing science; or consent of instructor. Same as 003:230.

### 103:231 History of the German Language
Same as 013:241.
103:232 Special Topics in German Linguistics
Repeatable. Same as 013:299, 164:299.

3 s.h.

103:262 Topics in Comparative Romance Linguistics
Comparative study of phonology, morphology, or syntax of the main Romance languages as informed by linguistic theory; diachronic or synchronic perspective. Repeatable. Prerequisite: 035:204 or equivalent. Recommended: additional graduate course work in linguistics. Same as 035:207, 164:262, 20E:201.

3 s.h.

103:300 Seminar: Spanish Linguistics
Repeatable with different topics. Same as 035:300.

3 s.h.

103:312 Seminar: Problems in Linguistics
Intensive study of theoretical and practical problems. Same as 164:342.

2-3 s.h.

103:390 Special Projects
arr.

103:400 Master's Thesis
arr.

103:450 Ph.D. Thesis
arr.

Special English Courses

ESL Credit Classes

The following courses are for students whose first language is not English. Courses taken to meet the College of Liberal Arts and Sciences English proficiency requirement may not be taken P/N. English as a Second Language (ESL) courses may not be taken S/U. In order to enroll in ESL courses, undergraduates must score 530 (paper-based), 197 (computer-based), or 71 (Internet-based) or higher on the Test of English as a Foreign Language (TOEFL), or the equivalent; graduate students must score 550 (paper-based), 215 (computer-based), or 81 (Internet-based) or higher on TOEFL, or the equivalent. Consent of ESL coordinator is required for all courses.

103:184 English as a Second Language: Conversation Skills
Speaking skills for the U.S. academic setting and society; pronunciation, grammar, vocabulary; structured opportunity to develop fluency. Prerequisite: consent of ESL coordinator.

3 s.h.

103:185 English as a Second Language: Pronunciation and Oral Skills
Development of skills appropriate to formal speaking; diagnosis and correction of persistent pronunciation problems; correct stress, intonation. Prerequisite: consent of ESL coordinator.

3 s.h.

103:186 English as a Second Language: Grammar
English structure; troublesome grammar patterns. Prerequisite: consent of ESL coordinator.

3 s.h.

103:187 English as a Second Language: Writing
Complex grammatical constructions, discourse considerations, formal vocabulary use expected of university students; organization styles, types of argumentation, analytic methods used in academic writing. Prerequisites: undergraduate standing and consent of ESL coordinator.

3 s.h.

103:188 English as a Second Language: Oral Skills for M.B.A. Students
Improvement of M.B.A. students’ oral skills; focus on career-oriented situations (interviews, presentations, discussions, meetings). Prerequisites: full-time M.B.A. study, enrollment by test, and consent of ESL coordinator.

3 s.h.

103:189 English as a Second Language: Reading Skills
Increasing reading speed and comprehension of university-level writing and vocabulary; exercises, discussion, and note-taking assignments to develop critical analysis skills. Prerequisite: consent of ESL coordinator.

3 s.h.

103:190 English as a Second Language: Writing Skills for Graduate Students

3 s.h.
Discourse considerations; styles of organization, types of argumentation, methods of analysis expected of graduate students. Prerequisites: TOEFL score of at least 550 (paper-based) or 213 (computer-based) or 81 (Internet-based) or equivalent, and graduate standing.

Iowa Intensive English Program (IIEP)

These courses are for students whose first language is not English. The Iowa Intensive English Program primarily serves students on conditional admission, those who have not yet been admitted to the University, and those who score below 530 (paper-based), 197 (computer-based), or 71 (Internet-based) on the Test of English as a Foreign Language (TOEFL).

103:001 Iowa Intensive English: Communication Skills 0 s.h.
Aural comprehension, spoken English; U.S. culture; information exchange, talking with Americans; cultural differences; beginning, intermediate, advanced. Prerequisite: consent of ESL coordinator.

103:002 Iowa Intensive English: Communication Skills for Professionals 0 s.h.
Listening and speaking skills for international professionals; conversational fluency, language for professional interactions (e.g., discussions and presentations). Prerequisite: consent of ESL coordinator.

103:003 Iowa Intensive English: Reading 0 s.h.
Effective reading: skills and practice of reading strategies using newspapers, popular magazines, schedules, documents, academic textbooks, correspondence, literature; beginning, intermediate, advanced. Prerequisite: consent of ESL coordinator.

103:004 Iowa Intensive English: Grammar 0 s.h.
Correct use of English grammatical structures; extensive practice to achieve competence in English communication; beginning, intermediate, advanced. Prerequisite: consent of ESL coordinator.

103:005 Iowa Intensive English: Writing 0 s.h.
Personal and formal writing; journal entries, letters, critiques, essay exams, short papers involving library use; revising and editing; beginning, intermediate, advanced. Prerequisite: consent of ESL coordinator.

Teaching Assistant Preparation in English (TAPE)

The TAPE program is designed for prospective teaching assistants whose first language is not English and who need additional work on English communication skills. Entry to the program is determined by a test.

103:006 TA Preparation in English: Fluency Building 0 s.h.
Pronunciation, fluency building, knowledge of the University of Iowa classroom. Prerequisite: consent of ESL coordinator.

103:007 TA Preparation in English: Pronunciation 0 s.h.
Intensive work toward maximum intelligibility; emphasis on stress, timing, intonation. Prerequisite: consent of ESL coordinator.

103:008 TA Preparation in English: Presentation Skills 0 s.h.
Intelligibility of speech and clarity of expression in presenting and responding; practice in videotaped lectures. Prerequisite: consent of ESL coordinator.

103:009 TA Preparation in English: Orientation 0 s.h.
Student expectations, typical teacher/student relationships, basic classroom management at the University. Prerequisite: consent of ESL coordinator.
Literature, Science, and the Arts

The Literature, Science, and the Arts Program (LSA) is in the process of closing and is no longer accepting new majors. The closure of the program was approved by the Board of Regents, State of Iowa in summer 2007.

Students who previously declared the LSA major must fulfill all requirements for the major and the Bachelor of Arts by July 29, 2011. Students who have not completed the major by this date will not be allowed to continue in the major and will need to declare a new program of study. The requirements for the major are stated below and are the same as in previous years.

Bachelor of Arts

The Bachelor of Arts in literature, science, and the arts requires a minimum of 120 s.h., including 54 s.h. of work for the major. LSA students must complete the College of Liberal Arts and Sciences General Education Program. A plan of study must include the following 24 s.h. of course work.

<table>
<thead>
<tr>
<th>Course Type</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>LSA courses</td>
<td>12 s.h.</td>
</tr>
<tr>
<td>Natural science and social science courses</td>
<td>12 s.h.</td>
</tr>
</tbody>
</table>

Students also must complete at least 30 s.h. of course work chosen from the following four areas. All areas must be represented; students choose 12 s.h. from each of two areas and 3 s.h. from each of the other two areas. Up to 15 s.h. of advanced course work used to complete the General Education Program may be applied to requirements of the major.

- Philosophy, religion, history
- Literature (may include literature courses taught in a language other than English; may not include courses with 08G prefix)
- Fine arts
- Foreign language (may not include courses used to complete the General Education Program foreign language component)

Students who fulfill the LSA foreign language requirement with 3 s.h. can use a course in culture, civilization, or literature taught in English by the department of the student's language of expertise. Students who fulfill the requirement with 12 s.h. cannot use courses taught in English.

By their second semester as majors, LSA students must submit a statement of purpose describing their goals. For information on writing the statement of purpose and descriptions of LSA courses for the current and coming semesters, see Requirements on the Program in Literature, Science, and the Arts web site.

Students must complete a minimum of 12 s.h. of LSA courses and at least 12 s.h. of other major courses at The University of Iowa.

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

Note: No course may satisfy more than one major requirement. Students prepare an individualized plan of study consisting of at least 14 courses, including one in foreign language beyond fourth-semester competency, so some students may need to do foreign language work early.

**Before the third semester begins:** at least one-quarter of the semester hours required for graduation

**Before the fifth semester begins:** a plan of study, language competency in the language of choice, and at least one-half of the semester hours required for graduation

**Before the seventh semester begins:** at least six courses from the plan of study and at least three-quarters of the semester hours required for graduation

**Before the eighth semester begins:** four more courses from the plan of study
During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Honors

Superior students who undertake a further program of independent study may earn the Bachelor of Arts with honors. To be admitted as candidates for a degree with honors, students must have the endorsement of the Program in Literature, Science, and the Arts advisor and must meet the requirements for the University of Iowa Honors Program. Membership in the Honors Program requires that students maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University of Iowa Honors Program for more information). Honors students submit an honors project to a faculty committee.

Literature, Science, and the Arts Courses

033:030 Introduction to Critical Thinking 3 s.h.
Concepts and skills required for critical thinking about what should and should not be taken as true; analysis and evaluation of a variety of complex extended arguments.

033:040 The Good Society 3 s.h.
Critiques of the existing social order, articulation of models of a good society with associated conceptions of the good life. GE: Humanities. Same as 169:040.

033:050 Making Choices: Interdisciplinary Perspectives 3 s.h.
GE: Humanities. Same as 169:050.

033:055 Revolutions in 19th-Century France 3 s.h.
GE: Humanities. Same as 009:055.

033:056 The Splendor of Cities 3 s.h.
Evolution of city structure in response to social, cultural, political, and economic forces; cities through time and across continents; varied resource materials, including video, novels, texts. Same as 102:055.

033:060 Scientific Reasoning 3 s.h.
Patterns of reasoning useful for understanding and evaluating scientific evidence, theory, controversy; historical and contemporary examples from the physical, biological, behavioral, biomedical sciences. GE: Quantitative or Formal Reasoning.

033:075 Cultural Diversity and Identity 3 s.h.
The nature of personal and cultural identity within a pluralistic society; race, ethnicity, national identity, class, sexuality, and gender as categories of cultural difference. Prerequisite: 010:002 or 010:003. GE: Cultural Diversity.

033:080 Introduction to Place Studies 3 s.h.
Same as 169:080.

033:110 Comparative Arts 3 s.h.
Cultural and aesthetic issues arising from side-by-side investigation of several art forms, including literature, cinema, painting, music, opera, architecture; periods, schools, styles, and their theories. Same as 048:110, 181:110.

033:115 What is Storytelling For? 3 s.h.
Same as 01J:115.

033:125 Germany in the World 3 s.h.
The Federal Republic of Germany's increasing prominence in post-Cold War international affairs, against backdrop of 20th-century history. Taught in English. GE: Foreign Civilization & Culture. Same as 13E:120.

033:130 Paris and the Art of Urban Life 3 s.h.
City of Paris examined in varied historical, artistic, cultural contexts; interdisciplinary. Same as 009:130, 01H:157.

033:139 Religion and Environmental Ethics 3 s.h.
How humans conceptualize the biophysical environment through religious beliefs and practices; how images of the environment influence people's activities, how they are used by grassroots environmental movements. Prerequisite: junior or senior standing or consent of instructor. Same as 032:130, 113:139.

</table>
Mathematics is a basic tool for understanding modern society as well as a crucial requirement for many careers in science, engineering, business, and the professions. Research in this living, dynamic subject is at the highest level in history.

An undergraduate degree in mathematics prepares students for a variety of careers in government and business, for secondary teaching, for graduate study, and, with proper planning, for a variety of professional programs. Graduate study is advisable for some business and governmental positions and for college and university teaching and research.

### Undergraduate Programs

The department offers a Bachelor of Science, a Bachelor of Arts, and a minor in mathematics. Students seeking either the B.A. or B.S. enroll in one of three programs: Program A is for students who plan to work in business or government or pursue graduate study in mathematics; program B is for students who seek secondary school teaching licensure; and program C is for those seeking specialization in a math-related area, such as actuarial science, biomathematics, business, computer science, economics, physics, statistics, and so forth. Program C may be especially appropriate for students who plan to seek a math-related job after earning a B.A. or B.S. in mathematics, rather than going on to graduate study.

**B.A. or B.S. with Double Major**

Students may choose to combine a major in mathematics with a major or second degree in computer science, statistics, actuarial science, or other disciplines. They must satisfy all requirements of program A, program B, or program C in mathematics as well as all requirements for the additional major or degree. For more information, consult an advisor and see Earning a Degree (Earning Two or More Majors, and Earning Multiple Undergraduate Degrees) in the College of Liberal Arts and Sciences Academic Handbook.

**Transfer from Engineering to Mathematics**

**Bachelor of Arts, Bachelor of Science**

The Bachelor of Arts in mathematics requires a minimum of 120 s.h., including at least 37-39 s.h. (11 courses) of work for the major. The Bachelor of Science in mathematics requires a minimum of 120 s.h., including at least 43-45 s.h. (13 courses) of work for the major. The semester hour requirement for each degree varies, depending on the student's choice of program A, B, or C.

At least 15 s.h. of post-calculus course work applied toward the major must be taken at The University of Iowa. Post-calculus courses are those numbered 22M:027 and above that have a calculus prerequisite. Students must maintain a g.p.a. of at least 2.00 in all course work for the major.

Students also must complete the College of Liberal Arts and Sciences General Education Program.

For policies concerning transfer credit, correspondence credit, credit by examination, cumulative grade-point average, rules relating to regression and duplication, and so forth, see the College of Liberal Arts and Sciences Student Academic Handbook. For information about duplication, regression, and use of the second-grade-only option for mathematics courses, contact the Department of Mathematics.

The Handbook for Undergraduate Majors is available from the Department of Mathematics and on its web site. The handbook provides details about schedule planning and career options. For more information on admission, financial
support, employment opportunities, the faculty, facilities, and other topics, visit The University of Iowa and Department of Mathematics web sites.

**Program A**

Program A is primarily for students who plan to work in business or government or to pursue graduate study in mathematics.

Students must complete seven core courses. In addition, B.A. students must complete at least four electives, and B.S. students must complete at least six.

**CORE COURSES**

A two-semester sequence of calculus I-II (8 s.h.) is required. Advanced placement credit, CLEP credit, and credit obtained through the Mathematics Incentive Program is accepted for all or part of the calculus requirement.

All of these:

- 22M:025-22M:026 Calculus I-II 8 s.h.
- 22M:027 Introduction to Linear Algebra 4 s.h.
- 22M:050 Introduction to Abstract Algebra I 3 s.h.
- 22M:055-22M:056 Fundamental Properties of Spaces and Functions I-II 7 s.h.
- 22M:100 Introduction to Ordinary Differential Equations 3 s.h.

More advanced courses may be substituted for the core courses, with Department of Mathematics approval.

**ELECTIVES**

B.A. students complete four electives (each 3-4 s.h.) chosen from the following list, including at least one upper-level mathematics course.

B.S. students complete six electives chosen from the following list, including at least three upper-level mathematics courses.

**Mathematics**

**Computer Science**

22C:016 Computer Science I: Fundamentals 4 s.h.

Any course numbered above 22C:020 that counts toward an undergraduate major in computer science, except 22C:197 and 22C:198

**Statistics and Actuarial Science**

Students can count only one of these: 22S:039 Probability and Statistics for the Engineering and Physical Sciences, 22S:120 Probability and Statistics, or 22S:130 Introduction to Mathematical Statistics I. None of them can be counted if taken after 22S:153 Mathematical Statistics I.

22S:039 Probability and Statistics for the Engineering and Physical Sciences 3 s.h.
22S:120 Probability and Statistics 4 s.h.
22S:130 Introduction to Mathematical Statistics I 3 s.h.
22S:131 Introduction to Mathematical Statistics II 3 s.h.
22S:138 Bayesian Statistics 3 s.h.
22S:150 Regression Time Series and Forecasting 3 s.h.
22S:153 Mathematical Statistics I 3 s.h.
22S:154 Mathematical Statistics II 3 s.h.
22S:156 Applied Time Series Analysis 3 s.h.
22S:158 Experimental Design and Analysis 3 s.h.

Program B

Program B is intended for students seeking secondary school teaching licensure. See the department's Handbook for Undergraduate Majors, and see Teaching and Learning (College of Education) in the Catalog.

CORE COURSES

A two-semester sequence of calculus I-II (8 s.h.) is required. Advanced placement credit, CLEP credit, and credit earned through the Mathematics Incentive Program is accepted for part or all of the calculus requirement.

All of these:

- 22C:016 Computer Science I: Fundamentals 4 s.h.
- 22M:025-22M:026 Calculus I-II 8 s.h.
- 22M:027 Introduction to Linear Algebra 4 s.h.
- 22M:028 Calculus III 4 s.h.
- 22M:050 Introduction to Abstract Algebra I 3 s.h.
- 22M:055 Fundamental Properties of Spaces and Functions I 3 s.h.
- 22M:070 Foundations of Geometry 3 s.h.
- 22S:120 Probability and Statistics 4 s.h.

One of these:

- 22M:150 Introduction to Discrete Mathematics 3 s.h.
- 22M:151 Discrete Mathematical Models 3 s.h.

More advanced courses may be substituted for the core courses, with Department of Mathematics approval.

ELECTIVES

B.A. students in Program B must take at least one additional course beyond calculus. B.S. students in Program B must take at least three additional courses beyond calculus, of which two must be numbered 22M:107 or above. With their advisor's approval, capable students are encouraged to substitute more advanced courses in the same subject area for any of the electives. The Handbook for Undergraduate Majors offers advice on course selection.

Program C

Program C provides a degree with specialization in a math-related area, such as the mathematics of making optimal business decisions, risk management and insurance, economics, physics, chemistry, biostatistics, biomathematics, computer science, and statistics and actuarial science. In consultation with the faculty advisor, each student prepares a program of studies tailor-made to his or her interests and academic or career goals. Building on a core of mathematics courses, students have considerable freedom to design their curriculum. The proposed program of studies must be approved by the mathematics department undergraduate committee. Students should submit their study plans on a Program C Plan of Study form, available at the mathematics department office. The Handbook for Undergraduate Majors has plans for choosing electives in several areas; students may use these or propose other plans.
CORE COURSES

A two-semester sequence of calculus I-II (8 s.h.) is required. Advanced placement credit, CLEP credit, and credit earned through the Mathematics Incentive Program is accepted for part or all of the calculus requirement.

- 22M:025-22M:026 Calculus I-II 8 s.h.
- 22M:027 Introduction to Linear Algebra 4 s.h.

One of these:

- 22M:028 Calculus III 4 s.h.
- 22M:056 Fundamental Properties of Spaces and Functions II 4 s.h.

One additional proof course (e.g., 22M:050 Introduction to Abstract Algebra I or 22M:055 Fundamental Properties of Spaces and Functions I)

More advanced courses may be substituted for the core courses, with Department of Mathematics approval.

ELECTIVES

Students choose six electives for the B.A. and eight for the B.S. Students choose electives according to their specialization area. At least three electives must be mathematical sciences courses (prefixes 22C, 22M, and 22S).

For a list of suggested subtracks and restrictions on electives in each subtrack, consult the Handbook for Undergraduate Majors.

B.A. or B.S. with Teacher Licensure

Mathematics majors seeking licensure to teach in elementary and/or secondary schools should choose program B (Bachelor of Arts or Bachelor of Science); see "Program B" above. For information about teacher licensure and the Teacher Education Program, see Teaching and Learning (College of Education) in the Catalog.

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

Note: Much of the work in mathematics must be taken in sequence, so students must begin major requirements as early as possible, and individual plans of study must be worked out carefully. The B.A. in mathematics typically requires 11 courses, and the B.S. requires 13. Students must choose program A, B, or C by the end of the third semester and must remain in their chosen program until they graduate in order to stay on track for the four-year graduation plan.

Before the third semester begins: course work through second-semester calculus and at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: two or three more courses in the major and at least one-half of the semester hours required for graduation

Before the seventh semester begins: three or four more major courses and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: two or three more major courses

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Honors

In order to graduate with honors in mathematics, a student must be a member of the University of Iowa Honors Program, which requires students to maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University of Iowa Honors Program for more information). Honors students in mathematics also must complete the regular requirements for an undergraduate major in mathematics with a g.p.a. of at least 3.40, and must complete either an honors project or the courses 22M:115 Introduction to Analysis I and 22M:116 Introduction to Analysis II, and 22M:120 Abstract Algebra I and 22M:121 Abstract Algebra II with a g.p.a. of 3.00 or higher. Other sequences, such as

Students planning an honors project are responsible for finding a faculty member willing to supervise the project. For help finding a project supervisor, contact the department. Students typically register for 22M:197 Individual Study and Honors in Mathematics for at least 3 s.h. For more information, contact the mathematics department honors advisor.

**Minor**

The minor in mathematics requires a minimum of 15 s.h. in mathematics courses, including 12 s.h. in advanced courses taken in the Department of Mathematics at The University of Iowa. Transfer credit and credit by examination do not count toward the 12 s.h. of advanced work. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass.

Students seeking a mathematics minor must maintain a g.p.a. of at least 2.00 in all work attempted in the department.

**Graduate Programs**

The department offers the Master of Science and the Doctor of Philosophy in mathematics.

**Master of Science**

The Master of Science in mathematics requires a minimum of 30 s.h. of graduate credit. Students earn the degree through courses and comprehensive examinations. There is no M.S. thesis. Requirements (courses and comprehensive examination areas) may be modified with the department's consent.

Four different programs (I, II, III, and IV) lead to the M.S. in mathematics. Program II is designed for secondary school teachers.

**Program I**

Program I prepares students for further study of pure and applied mathematics and for employment in government and business. M.S. students in program I take several courses and pass two comprehensive examinations. Students must earn a grade of B-minus or higher in six of the courses and maintain a g.p.a. of at least 2.75 in all mathematics courses taken for the degree.

The following courses are required.

- 22M:115-22M:116 Introduction to Analysis I-II 6 s.h.
- 22M:120-22M:121 Abstract Algebra I-II 6 s.h.
- 22M:132 General Topology 3 s.h.
- 22M:133 Introduction to Smooth Manifolds 3 s.h.
- 22M:142 Nonlinear Dynamics with Numerical Methods 3 s.h.
- 22M:144 Partial Differential Equations with Numerical Methods 3 s.h.

Each student must pass two M.S.-level comprehensive exams, chosen from algebra, analysis, differential equations with numerical methods, and topology.

**Program II**

Program II is designed for secondary school teachers. Program II requirements are the same as those for programs I and III, except that two mathematics education courses are required. All mathematics courses numbered 22M:100 or above may be used to satisfy the required 24 s.h. of course work. Students are encouraged to consult with the mathematics education faculty when planning their course of study.

**Program III**
Program III focuses on applied mathematics. Students in program III take several courses and pass two comprehensive examinations. Students must earn a grade of B-minus or higher in six of the courses and maintain a g.p.a. of at least 2.75 in all mathematics courses taken for the M.S.

The following courses are required.

All of these:

- 22M:115-22M:116 Introduction to Analysis I-II 6 s.h.
- 22M:142 Nonlinear Dynamics with Numerical Methods 3 s.h.
- 22M:144 Partial Differential Equations with Numerical Methods 3 s.h.
- 22M:170 Numerical Analysis: Nonlinear Equations and Approximation Theory 3 s.h.
- 22M:171 Numerical Analysis: Differential Equations and Linear Algebra 3 s.h.

Both courses in group A, or both courses in group B:

**Group A**

- 22M:132 General Topology 3 s.h.
- 22M:133 Introduction to Smooth Manifolds 3 s.h.

**Group B**

- 22M:140 Continuous Mathematical Models 3 s.h.
- 22M:151 Discrete Mathematical Models 3 s.h.

Each student must pass two M.S.-level comprehensive exams, chosen from analysis, differential equations with numerical methods, numerical analysis, and topology.

Program IV

Program IV is designed for nondepartmental students working toward the Ph.D. in areas that require mathematical knowledge. The program has no specific required courses. Course distribution requirements are the same as those for program I.

Students in program IV are considered to have passed the comprehensive examination for the master's degree in mathematics if they have maintained a g.p.a. of at least 3.00 in all mathematics courses taken for the M.S. in mathematics and have successfully completed the Ph.D. comprehensive examination in their chosen area.

Students in program IV are assigned a mathematics advisor, who works with them and their major advisor to plan an appropriate curriculum for the M.S. in mathematics. A suitable program of study should be approved by a mathematics advisor before the student takes the Ph.D. comprehensive examination, and a member of the mathematics faculty should serve on the Ph.D. comprehensive examination committee.

Doctor of Philosophy

The Doctor of Philosophy in mathematics requires a minimum of 72 s.h. of graduate credit. The program places strong emphasis on preparation for research and teaching. The department maintains no division between pure and applied mathematics. It cooperates in interdisciplinary doctoral programs with the College of Education (see Teaching and Learning in the Catalog) and the Program in Applied Mathematical and Computational Sciences.

Ph.D. students in mathematics must satisfy the following requirements for course work (credits and breadth), examinations, foreign language, and the Ph.D. thesis.

Students must spend at least three years in residence at a graduate college, including at least one year at The University of Iowa. They also should enroll in specific courses designated as preparatory for the Ph.D. examinations (consult the Department of Mathematics graduate studies director).

To further encourage mathematical breadth, students must earn at least 33 s.h. of graduate credit in regular courses equivalent to or more advanced than Ph.D. comprehensive examination preparatory courses. For a list of accepted 200-level and 300-level courses, and rules to ensure proper distribution, contact the department.

The Ph.D. examinations consist of a qualifying exam and a comprehensive exam. Students choose three areas from the department's list of qualifying examination areas: algebra, analysis, differential equations with numerical methods, and topology. For each qualifying area, there is a two-semester, 100-level course sequence designated as preparatory, although exams may differ from course content. The three parts of the qualifying exam are taken over a two-week period. One grade (pass, fail, conditional pass) is given on the entire three-part qualifying examination by a
committee of six faculty members, two from each exam area. If the grade is fail, the committee has the option to consider each part of the exam separately, offering the student the option of pass in one or two of the areas and fail in the other(s).

The Ph.D. comprehensive exam tests students on research-related topics.

Candidates also take an oral final examination on their dissertation material.

Ph.D. students are required to demonstrate reading proficiency in French, German, or Russian by passing a reading test administered by the appropriate language department, earning a grade of B or higher in the second semester of a sequence offered by the appropriate language department, or passing a special examination approved by the Department of Mathematics graduate committee. Courses that do not carry graduate credit can be used to satisfy this requirement, but they do not count toward the required 72 s.h. of graduate credit. Students must demonstrate language competence after enrolling in graduate school.

The most distinctive aspect of a Ph.D. is the thesis. The department expects the thesis to be an original mathematical work comparable in content and writing quality to that found in standard published research journals. The thesis is written under the supervision of a mathematics department faculty member and is approved by a committee.

**Admission**

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

**Master of Science**

Admission to M.S. programs I, II, and III is based on a combination of undergraduate course work and grades, letters of recommendation, and test scores. Numerical standards change every year or so; exceptions may be made to the following guidelines.

Applicants must have completed work in an undergraduate program equivalent to the bachelor's degree offered by the mathematics department, with an undergraduate g.p.a. of at least 3.20. Relevance and difficulty of courses are considered when evaluating grades; grades of C or lower in mathematics courses must be balanced by grades of A. Those whose preparation does not meet this requirement may be admitted conditionally and are asked to take specific courses that cover any deficiencies.

They also must score at least 700 on the quantitative section of the GRE General Test. Applicants whose first language is not English are required to demonstrate their competence in English, normally by scoring at least 620 (paper-based), 260 (computer-based), or 105 (Internet-based) on the Test of English as a Foreign Language (TOEFL). Applicants must submit three letters of recommendation.

**Doctor of Philosophy**

Admission to the Ph.D. program is based on a combination of undergraduate or graduate course work and grades, letters of recommendation, and test scores. Admission requirements are similar to those for the Master of Science, but the department generally seeks stronger grades and scores for doctoral admission: undergraduate or graduate g.p.a. of at least 3.40; GRE General Test quantitative score of at least 700; and for applicants whose first language is not English, scores of at least 620 (paper-based), 260 (computer-based), or 105 (Internet-based) on the Test of English as a Foreign Language (TOEFL).

**Mathematics Courses**

**For Lower-Division Undergraduates**

These courses are not open to graduate students except by special arrangement with the department chair. Credit earned in 22M:001 Basic Algebra I, 22M:002 Basic Algebra II, and 22M:003 Basic Geometry does not count toward degree requirements.

Although the sequences 22M:025 Calculus I and 22M:026 Calculus II, and 22M:031 Engineering Mathematics I: Single Variable Calculus and 22M:032 Engineering Mathematics II: Multivariable Calculus are similar, they cover the material in a different order and with different emphases. Students must consult with their advisor before taking the second semester of one sequence after taking the first semester of another. Students who consider taking 22M:026 Calculus II after 22M:016 Calculus for the Biological Sciences or 22M:017 Calculus and Matrix Algebra for Business must consult with their advisor.

**22M:001 Basic Algebra I** 3 s.h.

Percents, ratio and proportion, algebraic expressions and operations, simple products, linear and quadratic equations, simultaneous equations, exponents and radicals; emphasis on verbal problems.
**22M:002 Basic Algebra II**
Algebraic techniques, equations and inequalities, functions and graphs, exponential and logarithmic functions, systems of equations and inequalities. Prerequisite: 22M:001 or satisfactory score on math placement exam or one year of high school algebra.

**22M:003 Basic Geometry**
Angles, triangles, polygons, areas, Pythagorean theorem, similar triangles, circles, loci, related topics. Offered spring semesters. Prerequisite: 22M:001 or satisfactory score on math placement exam or one year of high school algebra.

**22M:005 Trigonometry**
Trigonometric functions, solutions of right and oblique triangles, complex numbers. Prerequisite: 22M:002, or satisfactory score on math placement exam, or two years of high school algebra and one year of high school geometry.

**22M:006 Logic of Arithmetic**
Mathematical and conceptual foundations of the natural numbers used in elementary school arithmetic teaching; multiple algorithmic approaches to arithmetic and its mathematical and contextual relationships, extensions to integers, rational and irrational numbers, multiple representations. Prerequisite: 22M:001 or satisfactory score on math placement exam or equivalent or consent of instructor. GE: Quantitative or Formal Reasoning.

**22M:009 Elementary Functions**
Functions, relations, coordinate systems; properties and graphs of algebraic, trigonometric, logarithmic, exponential functions; inverse trigonometric functions; properties of lines, conic sections. Prerequisite: 22M:005, or satisfactory score on math placement exam, or two years of high school algebra and one year of high school geometry. GE: Quantitative or Formal Reasoning.

**22M:010 Finite Mathematics**
Introduction to logic, set theory, linear equations and inequalities, linear programming, matrix algebra, combinatorial probability. Prerequisite: 22M:002 or satisfactory score on math placement exam or two-and-a-half years of high school mathematics. GE: Quantitative or Formal Reasoning.

**22M:012 Theory of Arithmetic**
Sets, cardinalities, reasoning in proofs, counterexamples, arithmetic with integers, rationals, irrationals, number theory, functions, algebraic expressions. Prerequisite: 22M:009 or a more advanced course or satisfactory score on math placement exam or equivalent or consent of instructor. GE: Quantitative or Formal Reasoning.

**22M:013 Mathematics for Business**
Algebraic techniques, functions and functional models, exponential and logarithmic functions and models, linear programming, informal introduction to calculus; examples and applications from management, economic sciences, related areas. Prerequisites: 22M:002, or satisfactory score on math placement exam, or two years of high school algebra and one year of high school geometry. GE: Quantitative or Formal Reasoning.

**22M:014 First-Year Seminar**
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Prerequisite: first- or second-semester standing.

**22M:015 Mathematics for the Biological Sciences**
Relations, functions, coordinate systems, graphing, polynomials, trigonometric functions, logarithmic and exponential functions; discrete mathematics, probability; examples and applications from biological sciences. Prerequisite: 22M:002 or satisfactory score on math placement exam or three years of high school mathematics. GE: Quantitative or Formal Reasoning.

**22M:016 Calculus for the Biological Sciences**
Differential, integral calculus; differential equations, multivariable calculus; applications to life sciences. Prerequisite: 22M:015; or satisfactory score on math placement exam; or three and one-half years of high school mathematics, including trigonometry. GE: Quantitative or Formal Reasoning.

**22M:017 Calculus and Matrix Algebra for Business**
Quantitative methods for treating problems arising in management, economic sciences, related areas; introduction to
differential and integral calculus, systems of linear equations and matrix operations. Prerequisite: 22M:002 or 22M:013
or satisfactory score on math placement exam. GE: Quantitative or Formal Reasoning.

**22M:025 Calculus I**
Fundamental concepts, methods, techniques of single-variable differential and integral calculus; differentiation,
techniques of integration, series, applications. Prerequisite: 22M:009; or 22M:002 and 22M:005; or three and one-half
years of high school mathematics, including analytic geometry and trigonometry. GE: Quantitative or Formal Reasoning.

**22M:026 Calculus II**
Continuation of 22M:025. Prerequisite: 22M:025 or consent of advisor.

**22M:027 Introduction to Linear Algebra**
Vector algebra and geometry of three-dimensional Euclidean space and extensions to n-space and vector spaces; lines
and planes, matrices, linear transformations, systems of linear equations, reduction to row echelon form, dimension,
rank, determinants, eigenvalues and eigenvectors. Prerequisite: 22M:025 or 22M:031 or consent of instructor.

**22M:028 Calculus III**
Multivariable calculus; vector functions, line integrals, total differentials, gradient, implicit functions, coordinate
systems, Taylor's expansion, extrema, multiple integrals, vector fields, surface integrals, Stokes' theorem. Prerequisite:
22M:026 or consent of instructor.

**22M:031 Engineering Mathematics I: Single Variable Calculus**
Limits, derivatives, max/min, other applications, mean-value theorem, approximating functions, concavity, curve
sketching, exponential models; Riemann sums, fundamental theorem; integration techniques, improper integrals,
approximations. Prerequisite: 22M:005 or 22M:009; or three and one-half years of high school mathematics, including
introduction to analytic geometry and trigonometry. GE: Quantitative or Formal Reasoning.

**22M:032 Engineering Mathematics II: Multivariable Calculus**
Vector geometry; functions of several variables; polar coordinates; partial derivatives, gradients, directional derivatives;
tangent lines and planes; max/min/parametric curves, curvature motion; multiple integrals; vector fields, flows;
integration on curves, work; divergence, flux, Green's theorem. Prerequisite: 22M:031, or score of 4 or higher on AP
Calc (AB) exam, or score of 3 or higher on AP Calc (BC) exam, or consent of instructor.

**22M:033 Engineering Mathematics III: Matrix Algebra**
Applications, computers for matrix calculations; matrix, vector arithmetic; linear independence, basis, subspace (in R2,
R3); systems of equations, matrix reduction; rank, dimension; determinants, applications; eigenvalues, eigenvectors;
diagonalization, principal axis theorem. Prerequisites: 22M:031, and engineering major or consent of department chair.

**22M:034 Engineering Mathematics IV: Differential Equations**
Ordinary differential equations and applications, with integrated use of computing, student projects; first-order
equations; higher order linear equations; systems of linear equations, Laplace transforms; introduction to nonlinear
equations and systems, phase plane, stability. Prerequisites: 22M:032, 22M:033, and engineering major or consent of
department chair.

**22M:037 Engineering Mathematics V: Vector Calculus**
Partial derivatives, max-min problems, integrals along curves, surfaces and solids, vector fields and conservation of
energy; curl, divergence, Stokes' theorem and the divergence theorem; the classical partial differential equations and
qualitative behavior of their solutions. Prerequisites: 22M:034 or consent of instructor, and engineering major or
consent of department chair.

**Elementary Topics of General Interest**
These courses are not open to graduate students except by special arrangement with the department chair.

**22M:050 Introduction to Abstract Algebra I**
Basic logic, proof methods, sets, functions, relations, mathematical induction; gradual transition from familiar number systems to abstract structures--division algorithm, unique factorization theorems; groups, subgroups, quotient groups, homomorphisms. Prerequisite: 22M:027. Corequisite: second-semester calculus or consent of instructor.

**22M:055 Fundamental Properties of Spaces and Functions I**
Elementary topological and analytic properties of real numbers; emphasis on ability to handle definitions, theorems, proofs. Prerequisite: second-semester calculus. Corequisite: 22M:027 or consent of instructor.

**22M:056 Fundamental Properties of Spaces and Functions II**
Multivariable analysis; Bolzano-Weierstrass theorem in three-dimensional Euclidean space, differential calculus, inverse and implicit function theorems, multiple integrals, surface and line integrals, differential forms and Stokes' theorem in n-dimensional Euclidean space. Prerequisites: 22M:055; closed to students who have taken 22M:028.

**22M:070 Foundations of Geometry**
Axiomatic development of common foundation for Euclidean, non-Euclidean geometry; constructions of non-Euclidean models, independence of parallel postulate. Prerequisite: 22M:026 or equivalent.

**22M:072 Elementary Numerical Analysis**
Computer arithmetic, root finding, polynomial approximation, numerical integration, systems of linear equations, ordinary differential equations; use of higher-level computer language such as Matlab, Maple, Mathematica. Prerequisite: grade of C- or higher in 22M:026 or 22M:032. Same as 22C:072.

**22M:081 Geometry for Elementary Teachers**
Points, lines, planes; measurement, two- and three-dimensional coordinate geometry, transformational geometry and vectors; applications of geometry to solve real-world problems. Offered spring semesters. Prerequisites: 22M:001 or equivalent, and elementary teacher certificate candidacy or certification.

**22M:095 Introduction to Research Opportunities**
Modern mathematics research areas and activities; seminar. Prerequisite: 22M:027 or consent of instructor.

**22M:096 Introduction to Mathematics Research**
Research experience; students study an elementary topic of active research, then work in groups under faculty supervision. Prerequisites: 22M:026 and 22M:027, or consent of instructor.

**For Upper-Division Undergraduates**
Graduate students in mathematics may not receive credit for 22M:100 Introduction to Ordinary Differential Equations, 22M:104 Introduction to Matrix Theory, 22M:105 Basic Analysis, or 22M:109 Classical Analysis.

**22M:100 Introduction to Ordinary Differential Equations**
First-order ordinary differential equations; second-order linear differential equations; series solutions; higher-order linear and matrix differential equations; existence and uniqueness theorems. Prerequisites: 22M:027 and 22M:028, or 22M:056 or equivalent; or consent of instructor.

**22M:104 Introduction to Matrix Theory**
Vector algebra and geometry of three-dimensional Euclidean space and extensions to n-space and vector spaces; lines and planes, matrices, linear transformations, systems of linear equations, reduction to row-echelon form, dimension, rank, determinants, eigenvalues, eigenvectors. Prerequisite: graduate standing.

**22M:105 Basic Analysis**
Elementary topological and analytical properties of real numbers; emphasis on ability to handle definitions, theorems, proofs; same material as 22M:055 for non-mathematics graduate students. Prerequisites: graduate standing, one year of calculus, and one semester of linear algebra.

**22M:107 History of Mathematics**

</table>
Basic concepts of general topological spaces and continuous functions: countability of sets, topological space, comparing topologies; subspace, order, and product topologies; closed sets and limit points, continuous functions, metric topology, quotient topology (including projective spaces and gluing cells), connectedness in the real line and in general spaces, components and local connectedness, compactness in Euclidean and general spaces, limit point compactness, local compactness, countability axioms, separation axioms, normal spaces and Urysohn's Lemma, complete metric spaces, convergence in function spaces. Prerequisite: 22M:055 or consent of instructor.

22M:133 Introduction to Smooth Manifolds
Calculus on smooth manifolds; smooth functions, mean value theorem, chain rule, smooth manifolds, tangent vectors, tangent spaces, inverse and implicit functions theorems, submersions and immersions, vectorfields, flows, multilinear algebra, differential forms, Stokes theorem. Prerequisites: 22M:027, 22M:055, and 22M:028 or 22M:056 or consent of instructor.

22M:140 Continuous Mathematical Models
Building and analyzing mathematical models involving differential equations for specific problems from engineering and the sciences; modeling project. Prerequisite: 22M:100 or equivalent or consent of instructor.

22M:142 Nonlinear Dynamics with Numerical Methods
Nonlinear differential equations, one- and two-dimensional flows, stability, phase plane analysis, limit cycles, bifurcations, chaos, fractals; Euler's, multistep, and Runge-Kutta numerical methods. Prerequisites: 22M:055 and 22M:100, or consent of instructor.

22M:144 Partial Differential Equations with Numerical Methods
Conservation laws, weak solutions, diffusion equation, Laplace's equation, finite difference methods, variational methods, finite element method. Prerequisite: 22M:028, 22M:055, and 22M:100 or consent of instructor.

22M:150 Introduction to Discrete Mathematics
Basic methods of enumerative combinatorics, inclusion-exclusion and generating functions, applications of group theory (Polya-Burnside theorem). Offered fall semesters. Prerequisite: 22M:050 or equivalent or consent of instructor.

22M:151 Discrete Mathematical Models
Case history approach to discrete models from various fields (e.g., genetics, psychology, health care, scheduling); construction, interpretation, analysis, simulation, testing of models; development of discrete mathematics. Prerequisite: 22M:027 or equivalent or consent of instructor.

22M:152 Theory of Graphs
Connectivity properties, including Euler, Hamilton cycle problems; graph colorings, matchings; characterization of families of graphs such as trees, planar graphs, networks; graph algorithms, their applications. Prerequisite: 22M:050 or equivalent or consent of instructor. Same as 22C:137.

22M:160 Introduction to Differential Geometry I
Space curves, differentiable manifolds, vector and tensor fields, integration of forms, covariant differentiation, intrinsic geometry of surfaces. Prerequisites: 22M:028 and 22M:055, or 22M:056 or 22M:100 or equivalent or consent of instructor.

22M:161 Introduction to Differential Geometry II
May include Riemannian geometry, rigidity theorems, minimal surfaces, connections, elementary Lie groups, relativity. Prerequisite: 22M:160 or equivalent or consent of instructor.

22M:170 Numerical Analysis: Nonlinear Equations and Approximation Theory
Root finding for nonlinear equations; polynomial interpolation; polynomial approximation of functions; numerical integration. Prerequisites: 22M:027 and 22M:028, or 22M:037 or 22M:056 or equivalent or consent of instructor, and knowledge of computer programming. Same as 22C:170.

22M:171 Numerical Analysis: Differential Equations and Linear Algebra
Numerical methods for initial value problems for ordinary differential equations; direct and iterative methods for linear systems of equations; eigenvalue problems for matrices. Prerequisites: 22M:027 and 22M:028; or 22M:037 or 22M:056 or equivalent or consent of instructor; knowledge of computer programming; and 22M:100. Same as 22C:171.

22M:174 Optimization Techniques

Basic theory of optimization, use of numerical algorithms in solution of optimization problems; linear and nonlinear programming, sensitivity analysis, convexity, optimal control theory, dynamic programming, calculus of variations. Prerequisites: 22M:027, 22M:028 or 22M:056, and 22M:072 or equivalent; or consent of instructor. Same as 22C:174.

**22M:178 High Performance and Parallel Computing** 3 s.h.
Parallel scientific computing methods such as parallel algorithms for dense and sparse matrices; implementation using libraries such as MPI; current topics such as grid computing. Prerequisites: a linear algebra course or a numerical analysis course, and a programming language. Same as 22C:177.

**22M:181 Topics in Technology Uses in Mathematics** 2 s.h.
Prerequisite: consent of instructor.

**22M:195 Current Issues in Mathematics Education** 1-3 s.h.
Recent curriculum developments, experimental programs, research relevant to classroom instruction, trends in education that may have a significant impact on mathematics programs. Same as 07E:235, 07S:235.

**22M:196 Topics in Mathematics**
Prerequisite: consent of instructor.

**22M:197 Individual Study and Honors in Mathematics**
Prerequisite: consent of advisor.

**22M:199 Readings in Mathematics**
Prerequisite: consent of instructor.

**Core Graduate Courses**

**22M:200 Introduction to Differential Topology** 3 s.h.
Manifolds, functions: tangent bundle, Morse-Sard theorem, transversality, submanifolds, tubular neighborhoods, normal bundles, vector fields, degree and intersection theory, fixed-point theory, Morse theory. Prerequisite: 22M:133 or equivalent or consent of instructor.

**22M:201 Introduction to Algebraic Topology** 3 s.h.
Homotopy, fundamental group and covering spaces, CW and simplicial complexes, simplicial homology, Euler characteristic. Prerequisite: 22M:132 or equivalent or consent of instructor.

**22M:203 Topology of Manifolds** 3 s.h.
Embedding, knotting, immersions; isotopy, homotopy, regular neighborhoods, engulfing, surgery, cobardism; three-, four-, and higher dimensional manifolds. Prerequisites: 22M:200 and 22M:201, or equivalents or consent of instructor.

**22M:205 Introduction to Algebra I** 3 s.h.
Abstract algebra: semigroups, groups, rings, integral domains, polynomial rings, division rings, fields, vector spaces, matrices, modules over rings, lattices, categories. Prerequisite: 22M:120 or equivalent or consent of instructor.

**22M:206 Introduction to Algebra II** 3 s.h.
Continuation of 22M:205. Prerequisite: 22M:205 or equivalent or consent of instructor.

**22M:210 Analysis I** 3 s.h.
Lebesgue measure and integral, fundamental theorem of calculus, abstract measures and integration, Fubini's theorem, Radon-Nikodym theorem, Riesz representation theorem, L-p spaces. Prerequisite: 22M:116 or equivalent or consent of instructor.

**22M:211 Analysis II** 3 s.h.
Hilbert space, Banach space techniques; Hahn-Banach theorem, open mapping theorem, principle of uniform boundedness; reflexivity, H-p spaces, Paley-Wiener theorem, space of functions analytic on the open unit disk. Prerequisites: 22M:118 and 22M:210, or equivalents or consent of instructor.
22M:213 Ordinary Differential Equations I
Existence, uniqueness, continuous dependence of solutions to initial value problems, autonomous systems; Poincare-Bendixon theory, linear systems and linearizations, perturbation, stability, periodic solutions, bifurcation, comparison and oscillation theorems, boundary value problems. Prerequisite: 22M:116 or equivalent or consent of instructor.

22M:214 Ordinary Differential Equations II
Continuation of 22M:213. Prerequisite: 22M:213 or equivalent or consent of instructor.

22M:216 Partial Differential Equations I
Elliptic equations; potential theory, maximum principle, a priori estimate, Dirichlet problem; initial value problem for parabolic equations; hyperbolic equations; Duhamel's principle, Cauchy problem; nonlinear equations, characteristics, canonical form, first-order systems. Prerequisite: 22M:116 or equivalent or consent of instructor.

22M:217 Partial Differential Equations II
Continuation of 22M:216. Prerequisite: 22M:216 or equivalent or consent of instructor.

22M:220 Introduction to Mathematical Logic I
Propositional calculus, first-order predicate calculus, GWdel completeness theorem, formal elementary number theory, GWdel incompleteness theorem. Prerequisite: graduate standing or consent of instructor.

22M:221 Introduction to Mathematical Logic II
Formal number theory, arithmetic hierarchy, Post theorem, formal recursive functions, Turing machines, Thu systems, world problems. Prerequisite: 22M:220 or equivalent or consent of instructor.

22M:224 First-Year Graduate Seminar
Introduction to mathematics graduate program. Prerequisite: first-year math graduate student.

Primarily for Graduate Students

22M:260 Differential Geometry I
Differential manifolds and functions, form, connections, curvature, related topics. Prerequisite: consent of instructor.

22M:261 Differential Geometry II
Continuation of 22M:260. Prerequisite: 22M:260 or equivalent or consent of instructor.

22M:270 Theoretical Numerical Analysis I
Theoretical foundations of numerical analysis, within framework of functional analysis; application areas including approximation theory, numerical methods for partial differential equations, integral equations; introduction to functional analysis. Prerequisites: 22M:115, 22M:116, 22M:170, and 22M:171; or equivalents; or consent of instructor.

22M:271 Theoretical Numerical Analysis II
Continuation of 22M:270. Prerequisite: 22M:270 or equivalent or consent of instructor.

22M:280 Introduction to Financial Mathematics
Financial mathematics; option pricing and portfolio optimization, stochastic integration, methods due to Ito and Feynman-Kac, Monte-Carlo simulation. Prerequisite: 22M:210 or equivalent or consent of instructor.

22M:303 Topics in Analysis
Measure theory, integration, general topology. Repeatable. Prerequisite: consent of instructor.

22M:305 Topics in Topology
May include homotopy theory, topology of 3-manifolds, 4-manifolds, or higher-dimensional manifolds, knotting and embedding problems, fiber bundles and characteristic classes, K-theory, PL manifolds, infinite-dimensional manifolds. Repeatable. Prerequisite: consent of instructor.

22M:313 Functional Analysis I
Locally convex topological vector spaces, duality, tensor products and nuclear spaces; Krein-Millman theorem, Choquet's theory; geometry of Banach spaces, nonlinear functional analysis; operators on Hilbert spaces, spectral theorem, algebras of operators. Prerequisite: 22M:211 or equivalent or consent of instructor.

22M:314 Functional Analysis II
Continuation of 22M:313. Prerequisite: 22M:313 or equivalent or consent of instructor.

22M:321 Topics in Applied Mathematics
Application of mathematics to other disciplines. Repeatable. Prerequisite: consent of instructor.

22M:324 Topics in Partial Differential Equations
Regularity theory, nonlinear analysis in partial differential equations, fluid dynamics, harmonic analysis, conservation laws, other topics. Repeatable. Prerequisite: consent of instructor.

22M:328 Topics in Logic
Theory of models, recursive functions, sets, deductions. Repeatable. Prerequisite: 22M:221 or equivalent or consent of instructor.

22M:330 Topics in Algebra
May include algebraic number theory, groups, representation theory, algebras, ideal theory, lattice theory. Repeatable. Prerequisite: 22M:206 or equivalent or consent of instructor.

22M:340 Homological Algebra
Modules, tensor products, groups of homomorphisms, categories, functors, homology functors, projective and injective modules, derived functors, torsion and extension functors, homological dimension. Prerequisite: 22M:206 or equivalent or consent of instructor.

22M:360 Topics in Mathematical Biology
Application of mathematics to biology. Prerequisite: consent of instructor.

22M:383 Seminar: Commutative Ring Theory
Repeatable. Prerequisite: consent of instructor.

22M:384 Seminar: Fourier Analysis
Repeatable. Prerequisite: consent of instructor.

22M:385 Seminar: Representation Theory
Repeatable. Prerequisite: consent of instructor.

22M:386 Seminar in Undergraduate Mathematics Education
Varied topics in teaching, learning, curriculum; philosophy, objectives, strategies, methods; use of technology, group learning, projects, discovery method, multiple approaches, other current issues. Repeatable. Prerequisite: consent of instructor.

22M:387 Seminar: Differential Geometry
Repeatable. Prerequisite: consent of instructor.

22M:389 Seminar: Algebra
Repeatable. Prerequisite: consent of instructor.

22M:390 Seminar: Operator Theory
Repeatable. Prerequisite: consent of instructor.

22M:391 Seminar: Logic and Foundations of Mathematics
Repeatable. Prerequisite: consent of instructor.

22M:392 Seminar: Topology
Repeatable. Prerequisite: consent of instructor.

22M:393 Seminar: Mathematical Physics

Repeatable. Prerequisite: consent of instructor.

22M:394 Seminar: Mathematical Biology
Repeatable. Prerequisite: consent of instructor.

22M:395 Seminar: Analysis
Repeatable. Prerequisite: consent of instructor.

22M:396 Seminar: Functional Analysis
Repeatable. Prerequisite: consent of instructor.

22M:397 Seminar: Partial Differential Equations
Repeatable. Prerequisite: consent of instructor.

22M:398 Seminar: Numerical Analysis
Repeatable. Prerequisite: consent of instructor.

22M:399 Reading Research
Repeatable. Prerequisite: consent of instructor.
Medieval Studies

Chair: Carin M. Green
Coordinator: Robert Bork
Undergraduate nondegree program: Certificate in Medieval Studies
Web site: http://www.uiowa.edu/~interdi/medieval/

The Medieval Studies Program enables undergraduate students to combine study in three or more disciplines into an organized investigation of the Middle Ages, a rich historical period that continues to influence today's culture. Students can pursue the Certificate in Medieval Studies as a distinct interest or combine it with focused study in areas such as art history, classics, comparative literature, languages (e.g., French, German, Italian, Portuguese, Spanish), music, philosophy, religion, theatre, or women's studies.

Certificate

The Certificate in Medieval Studies requires a minimum of 21 s.h. in medieval studies course work. The program is open to current undergraduate students, but graduates who hold University of Iowa bachelor's degrees may return to earn the certificate.

Courses used to complete the certificate may be counted toward requirements for the College of Liberal Arts and Sciences General Education Program or toward a major or minor. Up to 6 s.h. of transfer credit may be applied toward the certificate, with the approval of the medieval studies coordinating committee.

Students must include courses from at least three different departments in their work for the certificate; they may count a maximum of 10 s.h. from a single department or program toward the 21 s.h. required. All students must complete either 162:109 Medieval Civilization I or 162:110 Medieval Civilization II and should do so early in their study program. Remaining course work may be chosen from the list of associated courses below.

Students should consult regularly with a medieval studies advisor while planning and completing their study program.

The Medieval Studies Program strongly encourages students to complete course work in a language relevant to the medieval period. Latin is recommended for anyone intending to pursue graduate study in the field. Many language courses have prerequisites, and some are offered irregularly, so students should complete their language course work as early as possible. The following language courses are approved for the medieval studies certificate.

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Title</th>
<th>Hrs</th>

</table>

Sample Study Plans

Both study plans below fulfill certificate requirements. The first is tailored for a student intending to pursue graduate work in medieval studies, while the second might be designed by a student with a general interest in the period.

Sample plan one:

<table>
<thead>
<tr>
<th>Course Code</th>

Associated Courses

The following courses are approved for the medieval studies certificate. Courses not on this list may be approved for satisfaction of certificate requirements. Students who wish to have a course approved should make a request to the Certificate in Medieval Studies coordinating committee. The coordinating committee revises the list of approved courses as necessary.

ARABIC LANGUAGE AND LITERATURE

195:111 Intermediate Modern Standard Arabic I 5 s.h.
195:112 Intermediate Modern Standard Arabic II 5 s.h.

ART AND ART HISTORY

01H:040 Introduction to Medieval Art 3 s.h.
01H:199 Topics in Art History (when topic is medieval) 3 s.h.

CENTER FOR THE BOOK

108:182/16E:120 The Book in the Middle Ages 3 s.h.
108:183/16E:118/021:258 The Transition from Manuscript to Print 3 s.h.

CLASSICS

20L:011 World of Cicero 3 s.h.
20L:012 Golden Age of Roman Poetry 3 s.h.

ENGLISH

008:060 Selected Works of the Middle Ages 3 s.h.
008:101 Literature and Culture of the Middle Ages 3 s.h.
008:140/103:132 Elementary Old English 3 s.h.
008:141 Old English Beowulf 3 s.h.
008:142 Medieval Celtic Literature 3 s.h.
008:144/049:181 Medieval Drama 3 s.h.
008:146 Chaucer 3 s.h.

FRENCH

009:113 French Civilization 3 s.h.

GERMAN

13E:080 King Arthur Through the Ages 3 s.h.

HISTORY

16E:051 Colloquium for History Majors (European) (when topic is medieval) 3 s.h.
16E:109 Medieval Civilization I 3 s.h.
16E:110 Medieval Civilization II 3 s.h.
16E:111 Medieval Intellectual History 300-1150 3 s.h.
16E:112 Medieval Intellectual History 1150-1500 3 s.h.
16E:113 Economic and Social History of Medieval Europe 3 s.h.
16E:117 History of the Medieval Church 3 s.h.
16E:118/108:183/021:258 The Transition from Manuscript to Print 3 s.h.
16E:119 Women, Power, and Society in Medieval Europe 3 s.h.
16E:120/108:182 The Book in the Middle Ages 3 s.h.
16E:139 Ancient and Medieval Science 3 s.h.
16W:051 Colloquium for History Majors (World) (when topic is medieval) 3 s.h.

ITALIAN

018:119 Medieval Italian Literature 3 s.h.
018:120 Medieval and Renaissance Italian Literature 3 s.h.

MUSIC

025:144 History of Music I 3 s.h.
025:145 Counterpoint Before 1600 3 s.h.

PHILOSOPHY

026:112 Medieval Philosophy 3 s.h.

RELIGIOUS STUDIES

032:025 Medieval Religion and Culture 3 s.h.
032:100 Biblical Hebrew I 3 s.h.
032:101 Biblical Hebrew II 3 s.h.
032:132 Medieval and Reformation Religious Thought 3 s.h.

SPANISH AND PORTUGUESE

035:160 Medieval Spanish Literature in Context 3 s.h.
035:181 Topics in Spanish Literature (when topic is medieval) 3 s.h.

THEATRE ARTS

049:181/008:144 Medieval Drama 3 s.h.

Medieval Studies Courses

162:101 Literature and Culture of the Middle Ages 3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: Medieval and Early Modern Literature and Culture. PERIOD: Early Literatures Through 17th Century. Same as 008:101.

162:109 Medieval Civilization I 3 s.h.
Europe from the decline of Roman empire to the eleventh century; cultural, political, economic, artistic and architectural foundations of Western civilization. Same as 16E:109.

162:110 Medieval Civilization II 3 s.h.
Europe from the eleventh century to the Italian Renaissance; cultural, political, economic, artistic, and architectural foundations of Western civilization. GE: Foreign Civilization & Culture. Same as 16E:110.
Microbiology

Head: Michael A. Apicella

Professors: Michael A. Apicella (Internal Medicine), Robert F. Ashman (Internal Medicine), Gail A. Bishop (Internal Medicine), John E. Butler, Steven Clegg, Charles D. Cox, Michael G. Feiss, John T. Harty, David M. Lubaroff (Urology), Linda L. McCarter, Paul B. McCray (Pediatrics), William Nauseef (Internal Medicine), Stanley Perlman (Pediatrics), Richard J. Roller, Paul Rothman (Internal Medicine), George V. Stauffer, Mark F. Stinski, C. Martin Stoltzfus, Jerrold P. Weiss (Internal Medicine), Mary E. Wilson (Internal Medicine)

Professors emeriti: John Cazin Jr., David T. Gibson, Louis G. Hoffmann, William Johnson, Erich W. Six, Donald P. Stahly

Associate professors: Lee-Ann Allen (Internal Medicine), Bradley D. Jones, John R. Kirby, Al J. Klingelhoth (Radiation Oncology), Wendy J. Maury, Steven M. Varga, David S. Weiss, Timothy L. Yahr

Associate professor emeritus: Jose E. Rodriguez

Assistant professors: Craig D. Ellermeier, Alex Horswill, Jon Houtman, Howard Xue

Adjunct assistant professor: Marcia L. Cordts

Adjunct lecturers: Jennifer D. Boddicker, Linda M. Knudtson

Undergraduate degree: B.S. in Microbiology

Undergraduate nondegree program: Minor in Microbiology

Graduate degrees: M.S., Ph.D. in Microbiology

Web site: http://www.uiowa.edu/microbiology

Study in the Department of Microbiology is dedicated to the branch of biological sciences that deals with the smallest living things: bacteria, archaea, fungi, algae, protozoa, and viruses. It is coupled with immunology, the study of the response of higher organisms to foreign substances.

Microbiology and immunology are at the forefront of the modern biological revolution. Microbes are often the experimental subjects of choice for examining basic genetic and biological phenomena because of their small size, rapid growth rate, and relative simplicity. A significant portion of contemporary biochemical research employs microbiological and immunological methods.

Current research is making theoretical and practical advances concerning microbial species and viruses that infect animals, including man, plants, and other microbes; the use of comparative genomics, gene expression profiling, and recombinant DNA methods to analyze basic biological processes and generate valuable products; the nature and occurrence of microbial life in extreme or unusual environments; microbial synthesis and modification of antibiotics and other natural products; the role of microbes in stabilization of the biosphere by recycling and detoxifying waste products; the genetics and regulation of metabolic processes; and the genetics and regulation of the immune response, including characterization of mechanisms used by bacteria to signal one another and characterization of interactions between different types of immune cells and their targets.

The Department of Microbiology offers degree programs for undergraduates and for graduate students and administers the academic curriculum at both levels. The College of Liberal Arts and Sciences grants undergraduate degrees in microbiology and oversees undergraduate academic policy relating to the student record. The Graduate College grants graduate degrees in microbiology.

Undergraduate Program

The Department of Microbiology offers a Bachelor of Science and a minor in microbiology.

Microbiology is an excellent major for undergraduate students who want a good general education with emphasis on an important and interesting branch of biological sciences. Graduates find employment opportunities in government, hospitals, public health laboratories, research laboratories, and industrial laboratories (food, dairy, chemical, pharmaceutical, and genetic engineering companies). Those who pursue advanced degrees have more advanced career opportunities in these same areas as well as in college and university teaching.

Bachelor of Science

The Bachelor of Science in microbiology requires a minimum of 120 s.h., including 64 s.h. of work for the major (21 s.h. in microbiology and 43 s.h. in supporting course work). Students also must complete the College of Liberal Arts and Sciences General Education Program.

The required 21 s.h. of microbiology must include at least 12 s.h. earned in University of Iowa courses numbered 061:147 Survey of Immunology and above, except 061:164 Nursing Microbiology; students may count 061:218 Microscopy for Biomedical Research toward the requirement but not 061:220 Advanced Microscopy Biomedical Research. No more than 2 s.h. of 061:161 Undergraduate Research in Microbiology (or 061:171 Honors Undergraduate Research in Microbiology for honors students) and no more than 2 s.h. of 061:163 Seminar: Microbiology may be counted toward the requirement. In order to take microbiology courses more advanced than 061:157 General Microbiology, students must earn a grade of C or higher in 061:157 General Microbiology and must have the instructor's consent. The supporting science and mathematics course work required for the major may not be taken pass/nonpass.

Students must include 061:163 Seminar: Microbiology (2 s.h.) in the required 21 s.h. of microbiology; they must take the course for credit once during their last two semesters before graduation, but they are encouraged to take it for 0 s.h. during other semesters, once they have completed 061:157 General Microbiology.
In addition to the required 21 s.h. of microbiology, the major requires supporting course work as follows.

002:010-002:011 Principles of Biology I-II  
004:011-004:012 Principles of Chemistry I-II  
004:121-004:122 Organic Chemistry I-II  
004:141 Organic Chemistry Laboratory  
029:011-029:012 College Physics I-II  
099:120 Biochemistry and Molecular Biology I  
099:130 Biochemistry and Molecular Biology II  

One of these:  
22M:016 Calculus for the Biological Sciences  
22M:025 Calculus I  
22M:031 Engineering Mathematics I: Single Variable Calculus  

In addition, the following courses may be recommended for some students.  
08N:080 Nonfiction Writing  
171:161 Introduction to Biostatistics (some medical schools require a biostatistics course for admission)  

---

**Four-Year Graduation Plan**

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

**Before the third semester begins:** 002:010 Principles of Biology I; 004:011 Principles of Chemistry I, and 004:012 Principles of Chemistry II; an approved calculus class; and at least one-quarter of the semester hours required for graduation

**Before the fifth semester begins:** 002:011 Principles of Biology II; 004:121 Organic Chemistry I, 004:122 Organic Chemistry II, and 004:141 Organic Chemistry Laboratory; 061:157 General Microbiology; and at least one-half of the semester hours required for graduation

**Before the seventh semester begins:** five more courses in the major and at least three-quarters of the semester hours required for graduation

**Before the eighth semester begins:** another 10-12 s.h. of course work

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining required General Education courses, and a sufficient number of semester hours to graduate

**Honors**

Microbiology majors who are members of the University of Iowa Honors Program may enroll in the honors program in microbiology. Membership in the University Honors Program requires that students maintain a cumulative University of Iowa g.p.a. of at least 3.33. Microbiology honors students also must maintain a g.p.a. of at least 3.33 in microbiology courses. The program requires 25 s.h. of course work in microbiology, including 6 s.h. in 061:171 Honors Undergraduate Research in Microbiology, which introduces students to experimental research. At the end of the research, students present written and oral reports. Students who successfully complete these requirements receive the B.S. with honors.

**Minor**

The minor in microbiology requires a minimum of 15 s.h. in microbiology courses, including 12 s.h. in advanced courses taken at The University of Iowa. For the minor, courses numbered 061:147 Survey of Immunology and above, except 061:164 Nursing Microbiology, are considered advanced. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass. Students may count a maximum of 2 s.h. earned in 061 061:161 Undergraduate Research in Microbiology or 061:171 Honors Undergraduate Research in Microbiology, and 2 s.h. earned in 061:163 Seminar: Microbiology, toward the minor. They also may count 061:218 Microscopy for Biomedical Research, but not 061:220 Advanced Microscopy Biomedical Research.

**Graduate Programs**

The Department of Microbiology offers a Master of Science and a Doctor of Philosophy in microbiology. Graduate
study in the department is designed to help students become highly qualified in microbiology research and teaching. Admitted graduate students usually pursue the Ph.D.

Graduate study is offered in six subdisciplines: pathogenic bacteriology, microbial genetics, immunology, microbial physiology, animal virology, and bioinformatics. Several areas involve interdisciplinary training both within and outside the department, so students gain broad experience during their course of study. Students also may pursue interdisciplinary Ph.D. programs in genetics, immunology, and molecular and cellular biology.

During their first year, students rotate in three laboratories of their choice and are advised by the Graduate Student Advisory Committee. At the end of the first year, they choose a research supervisor who chairs their advisory committee. The committee provides intellectual and research guidance for the student’s training.

The Department of Microbiology cooperates with other University of Iowa departments to give students ample access to diverse course offerings, seminars, and research programs. For example, microbiology students may participate in courses and seminars in immunology, genetics, molecular and cellular biology, biocatalysis/biotechnology, and electron microscopy.

All students admitted to advanced degree programs are expected to assist in departmental teaching.

**Master of Science**

The Master of Science in microbiology requires a minimum of 30 s.h. of graduate credit. M.S. students are required to earn a minimum of 12 s.h. in microbiology courses chosen from three of the department's six subdisciplines. They may substitute a course they have already taken (at The University of Iowa or elsewhere) for a course requirement, with the M.S. advisory committee's approval. Additional course requirements depend on students' interests and the advice of the examining committee.

Students must write a thesis based on their own research and defend it satisfactorily in an oral examination. No more than 9 s.h. of credit for thesis research may be counted toward the 30 s.h. required for the Master of Science.

**Doctor of Philosophy**

The Doctor of Philosophy in microbiology requires a minimum of 72 s.h. of graduate credit. Ph.D. students are required to earn a minimum of 15 s.h. of credit in graduate-level microbiology courses. They may substitute a course they have already taken (at The University of Iowa or elsewhere) for a course requirement, with the Ph.D. advisory committee's approval.

Students must pass a comprehensive examination before their sixth semester in the program and write a thesis based on their own research. The thesis must be defended satisfactorily in an oral examination.

**Admission**

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog. They should have a cumulative g.p.a. of at least 3.00 and must have completed courses in biology, chemistry (inorganic and organic), mathematics including calculus, and physics. Those admitted with deficiencies must complete the relevant course work during their first year of graduate study. Admission is determined through a review and formal vote by the faculty. Preference is given to students applying for the Ph.D. program.

**Facilities**

The Department of Microbiology is situated on the University of Iowa health sciences campus, where it shares the Bowen Science Building with the Departments of Anatomy and Cell Biology, Biochemistry, Molecular Physiology and Biophysics, and Pharmacology. Laboratory space and modern equipment are available for teaching and research.

</tr>
</tbody>
</table>
Principles and methods essential to study of microorganisms, their isolation and identification; microorganisms in infectious diseases; current immunology concepts. Prerequisite: Physician Assistant Program enrollment.

- **061:112 Pharmacy Microbiology**
  4 s.h.
  Medical microbiology: bacteriology, immunology, pathogenic bacteriology, virology, mycology, parasitology. Prerequisite: pre-pharmacy standing.

- **061:113 Dental Microbiology**
  3 s.h.
  Medical microbiology: bacteriology, immunology, pathogenic bacteriology, virology, mycology, parasitology. Prerequisite: D.D.S. enrollment.

- **061:147 Survey of Immunology**
  4 s.h.
  Major features of the evolutionary, ontogenic, and comparative development of innate and adaptive immune systems and their functions at the cellular and molecular levels. Pre- or corequisite: biochemistry.

- **061:157 General Microbiology**
  5 s.h.
  Principles of microbial diversity, microbial genetics, physiology and metabolism, pathogenic microbiology, virology, immunology, industrial and environmental microbiology; laboratory emphasis on basic techniques. Prerequisites: 002:010 and 002:011. Corequisite: 004:121.

- **061:159 Pathogenic Bacteriology**
  5 s.h.
  Pathogenic bacteria, with emphasis on mechanisms of pathogenicity, laboratory methods for isolation, identification; laboratory emphasis on advanced methods for study of pathogenic bacteria. Prerequisites: grade of C or higher in 061:157 and consent of instructor.

- **061:160 Microbial Physiology**
  3 s.h.
  Bacterial genomes, cell structure, growth, energy metabolism, biosynthesis, mechanisms of signal transduction and regulation; laboratory supplement in 061:180. Prerequisite: grade of C or higher in 061:157.

- **061:161 Undergraduate Research in Microbiology**
  arr.
  Experimental research under faculty supervision. Prerequisites: grade of C or higher in 061:157 and consent of instructor.

- **061:163 Seminar: Microbiology**
  2 s.h.
  Current topics in microbiology, immunology. Prerequisite: grade of C or higher in 061:157.

- **061:164 Nursing Microbiology**
  4 s.h.
  Overview of bacteria, viruses, and eukaryotic microorganisms that cause human disease; microbial structure, growth control and reproduction; immunology in the context of host defense mechanisms. Prerequisite: pre-nursing student standing or consent of instructor. Pre- or corequisite: 002:002 or 002:010 or 002:021.

- **061:168 Introduction to Animal Viruses**
  3-5 s.h.
  Basic physical, chemical, biological properties of animal viruses, their association with human disease; optional laboratory with emphasis on methods in basic, clinical, and molecular virology. Prerequisites: grade of C or higher in 061:157 and consent of instructor.

- **061:170 Microbial Genetics**
  3 s.h.
  Genetics of bacteria, bacteriophages; laboratory supplement in 061:175. Prerequisite: grade of C or higher in 061:157 or consent of instructor.

- **061:171 Honors Undergraduate Research in Microbiology**
  arr.
  Experimental research under faculty supervision. Prerequisites: junior or senior standing and g.p.a. of at least 3.33.

- **061:175 Microbial Genetics Laboratory**
  3 s.h.
  Basic principles of genetic analysis of bacteria and bacteriophage. Prerequisite: consent of instructor. Pre- or corequisite: 061:170.

- **061:179 Bacterial Diversity**
  3-5 s.h.
  Analysis of bacteria from varied habitats; emphasis on the physiological basis and molecular characteristics of diversity. Corequisite: 061:170.

</table>
**061:260 Graduate Microbial Physiology**  
Bacterial genomes, cell structure, growth, energy metabolism, biosynthesis, mechanisms of signal transduction and regulation; laboratory supplement in 061:280.

**061:261 Graduate Research in Microbiology**  
Prerequisites: microbiology graduate standing and consent of instructor.

**061:263 Graduate Student Research Seminar**  
Presentation of thesis work in progress. Prerequisite: microbiology graduate standing or consent of instructor.

**061:264 Directed Study in Microbiology**  
Prerequisites: microbiology graduate standing and consent of instructor.

**061:265 Topics in Virology Literature**  
Papers of current interest in primary virology literature. Prerequisite: consent of instructor.

**061:267 Graduate Introduction to Animal Viruses**  
Basic physical, chemical, biological properties of animal viruses, their association with human diseases; optional laboratory with emphasis on methods in basic, clinical, and molecular virology; discussion topics in the primary literature. Prerequisites: grade of C or higher in 061:157 or equivalent, and consent of instructor.

**061:268 Biology and Pathogenesis of Viruses**  
Molecular biology of animal DNA and RNA viruses, interaction of these viruses with eukaryotic cells; mechanisms of viral latency, persistence, cellular transformation, oncogenesis; virology literature. Prerequisites: 061:168 or 061:267 or equivalent, and biology major.

**061:270 Graduate Microbial Genetics**  
Genetics of bacteria, bacteriophages; supplementary laboratory work in 061:271.

**061:271 Graduate Microbial Genetics Laboratory**  
Basic principles of genetic analysis in bacteria. Prerequisite: consent of instructor. Pre- or corequisite: 061:270.

**061:275 Perspectives in Biocatalysis**  

**061:279 Graduate Bacterial Diversity**  
Analysis of bacteria from varied habitats; emphasis on the physiological basis and molecular characteristics of diversity.

**061:280 Graduate Microbial Physiology Laboratory**  
Isolation and growth of bacteria, bacterial function products, nutrient transport, metabolic pathways, enzymes. Prerequisite: consent of instructor.

**061:299 Mechanisms of Parasitism Journal Club**  
Reviews of recent publications in molecular parasitology research and thesis research by training grant or journal club students. Same as 142:299.
Music

The University of Iowa School of Music is prominent in a fine arts community of international repute. It has long been recognized as one of the excellent university-based schools of music in the United States.

The school's on-campus enrollment of approximately 470 music majors is large enough to sustain strong programs in all areas of specialization, yet small enough to ensure the individual attention essential to each student's development.

The faculty consists of highly trained artist-teachers in each area of specialization and scholars of international distinction. Faculty ensembles in residence include the Iowa Woodwind Quintet, the Iowa Brass Quintet, and the Maia String Quartet. Private lessons with faculty members are offered in all band and orchestra instruments, voice, piano, and organ.

The school's undergraduate curricula offer all qualified students, whether music majors or nonmajors, the opportunity for further study of music. In addition to its comprehensive course offerings for majors, the school provides a substantial selection of courses especially recommended for nonmajors (see "Courses for Nonmajors").

The graduate curricula are designed primarily as preparation for teaching in secondary schools, colleges, and universities and for careers in performance and music therapy.

The School of Music is a charter member of the National Association of Schools of Music. The requirements for entrance and for graduation are in accordance with the published standards of the National Association of Schools of Music.

The department is one of four academic units that make up the Division of Performing Arts.

Undergraduate Programs

The school offers the Bachelor of Music, a Bachelor of Arts in music, and a minor in music. It also participates in offering the Certificate in Performing Arts Entrepreneurship, offered through the Division of Performing Arts.

The Bachelor of Music program offers concentrations in composition, music therapy, and performance; a second emphasis in jazz studies may be added to the performance concentration. Professional certification in music education and music therapy are available only through the B.M.

The Bachelor of Arts is a nonprofessional degree for students who are not planning careers as musicians or for those who wish to pursue a double major or earn more than one bachelor's degree.

All undergraduate enrollments require School of Music approval. Entering first-year and transfer students who plan to major in music must be accepted into a performance area through audition either in person or by recording before they register. Students who plan to major in composition also must submit examples of creative work; for details, see "Composition Concentration" below. All entering students must complete a theory diagnostic exam and a piano proficiency exam to determine appropriate placement in related courses.

Transfer students admitted to the School of Music must complete a minimum of one year of applied music (lower- or upper-level) and one year of major ensemble at The University of Iowa in order to earn a degree in music. Transfer students who have not completed the equivalent of the four-semester sequence of Musicianship and Theory I-IV (025:002 Musicianship and Theory I, 025:003 Musicianship and Theory II, 025:004 Musicianship and Theory III, and 025:005 Musicianship and Theory IV) must complete a theory diagnostic exam to determine appropriate placement in the musicianship and theory sequence. Transfer students who have not completed the equivalent of two semesters of class piano or a piano proficiency exam must meet piano proficiency requirements at The University of Iowa.
Bachelor of Music

The Bachelor of Music requires a minimum of 120 s.h.; many students earn more than 120 s.h. in fulfilling the requirements for their majors—for instance, those who choose the music therapy concentration or seek teacher certification. The College of Liberal Arts and Sciences maximum hours rule does not apply to the Bachelor of Music, so B.M. students may count more than 50 s.h. of course work in music toward the degree. All students must complete the College of Liberal Arts and Sciences General Education Program.

The program offers concentrations in composition, music therapy, and performance; a second emphasis in jazz studies may be added to the performance concentration. Bachelor of Music students may not choose guitar as their major instrument, and Bachelor of Arts students may not transfer to the B.M. program with guitar as their major instrument.

Students seeking professional certification in music education or music therapy should enroll in the B.M. program.

The Bachelor of Music requires the following School of Music course work.

GENERAL COURSE REQUIREMENTS

025:001 Fundamentals of Music for Majors (or successful completion of the undergraduate theory examination) 3 s.h.
025:071-025:072 Group Instruction in Piano I-II (or successful completion of proficiency exams I and II) 2 s.h.

Registration in 025:071 Group Instruction in Piano I and 025:072 Group Instruction in Piano II is corequisite with 025:002 025:002 Musicianship and Theory I and 025:003 Musicianship and Theory II, unless exempted by proficiency exam. Transfer students should complete this requirement in their first year of residence, unless exempted by proficiency exam.

025:074 Recital Attendance (six semesters) 6 s.h.

Six semesters of 025:074 Recital Attendance are required for all B.M. students, except music therapy students, who are required to take four semesters. Transfer students should plan to enroll in this course each of their remaining semesters, or until the requirement is met.

025:107 Techniques of Conducting 2 s.h.
025:144 History of Music I (western music of the Middle Ages, Renaissance, and Baroque) 3 s.h.
025:146 History of Music II (western music 1750-present) 3 s.h.
025:154 Senior Recital 1 s.h.

To complete the senior recital, students must have achieved upper-level applied status or be enrolled in upper-level applied music courses (see "Applied Music"). Music therapy students may complete a senior recital or a senior research project. Composition students substitute 025:099 Bachelor's Thesis for the senior recital. The senior recital, research project, or thesis must be completed at The University of Iowa.

One of these:

025:080 Jazz Cultures in America and Abroad 3 s.h.
025:103 World Music 3 s.h.
025:104 Music of Latin America and the Caribbean 3 s.h.
025:141 History of Jazz 3 s.h.
025:178 Music, Culture, and Identity 3 s.h.

At least 3 s.h. from these:

025:101 Introduction to Improvisation 3 s.h.
025:102 Intermediate Jazz Improvisation 2 s.h.
025:117 Arranging for Band 2 s.h.
025:118 Jazz Theory at the Piano 2 s.h.
025:145 Counterpoint Before 1600 3 s.h.
025:147 Counterpoint After 1600 3 s.h.
025:148 Instrumentation 2 s.h.
APPLIED MUSIC

Four years of applied music are required. Instruction is provided on two levels, lower and upper. Students must achieve upper-level status before they may present the senior recital. Readiness for upper-level applied music is determined by a jury examination in the area. The eighth semester of applied music may be waived for students who are enrolled in the Teacher Education Program and are student teaching. Students are allowed a maximum of six semesters (not including summer) in lower-level applied instruction. Those who want to continue lessons beyond the maximum allowable lower-level registration must do so under the nonmajor category.

Composition students are required to take 6 s.h. of lower-level applied music and 2 s.h. of secondary piano.

Music therapy students who complete a senior research project rather than a senior recital are required to take three years of lower-level applied music.

ENSEMBLE PARTICIPATION

Eight semesters of major ensemble participation are required. Students normally enroll in major ensemble participation during consecutive semesters, beginning early in their degree work, to ensure completion of the requirement in a timely manner. Ensemble assignments are made at the discretion of the major teacher and ensemble director. String students participate in University Orchestra and Chamber Orchestra. Wind and percussion students participate in the Symphony Band/Concert Band/University Band. Voice students participate in Camerata Singers, University Choir, Kantorei, and/or University Chorale. Keyboard students may substitute accompaniment for major ensemble participation for two semesters during their junior and/or senior years, with their major applied teacher's consent. Composition students may, with their advisor's consent, substitute two semesters of other ensembles during their junior and/or senior year.

Music therapy students who complete a senior research project rather than a senior recital are required to complete 6 s.h. of major ensemble participation.

Any student who wants to request adjustment of the major ensemble requirement must submit his or her request in writing to a review committee consisting of the ensemble director(s) involved, the studio instructor, and the associate director for undergraduate studies.

Major ensembles are as follows.

- 025:142 Camerata Singers 1 s.h.
- 025:181 University Choir 1 s.h.
- 025:185 Kantorei 1 s.h.
- 025:191 University Chorale (Women's Chorale) 1 s.h.
- 025:192 Orchestra 1 s.h.
- 025:194 Symphony Band/Concert Band/University Band 1 s.h.

ELECTIVES

Students may take advanced electives in performance (including chamber music and piano accompaniment), theory, composition, music education, music therapy, music history, diverse music cultures, music literature, conducting, and orchestration.

Performance Concentrations

A performance concentration is available in each of the orchestral areas—strings, brass, woodwinds, and percussion—and in voice, piano, and organ. Students must take at least an additional 17 s.h. beyond the School of Music general course requirements. This course work includes required courses and electives unique to each performance area. Course listings for each of the respective areas are available from the School of Music academic office. For degree requirement checklists, see http://www.uiowa.edu/~music/current/degreeprograms.htm.
JAZZ STUDIES EMPHASIS

Students with a performance concentration may add a second emphasis in jazz studies. To be admitted to the jazz studies emphasis, students must audition after they complete their first year. Students admitted to the emphasis are assigned to the jazz studies advisor in addition to their regular faculty advisor.

Senior recital and recital attendance requirements are the same as those for the Bachelor of Music. In addition to satisfying all course requirement for the B.M., jazz studies emphasis students must complete 21 s.h. of jazz course work. Many jazz studies courses fulfill other B.M. course requirements, including music electives.

Music Therapy Concentration

Admission to the music therapy concentration is based on successful completion (grade of C-plus or higher) of 025:087 Orientation to Music Therapy. In addition to the core courses in music therapy listed below, specific courses are required in biology, psychology, and music.

A six-month internship in an approved off-campus clinical facility is required. Following successful completion of the internship, students are eligible to take the board certification examination in music therapy.

Specific course requirements for music therapy are as follows.

All of these:

- 07S:144 Psychology of Music 2 s.h.
- 07S:149 Introduction to Music Research 2 s.h.
- 025:017 Secondary Performance--Voice 1 s.h.
- 025:071 Group Instruction in Piano I 1 s.h.
- 025:072 Group Instruction in Piano II 1 s.h.
- 025:073 Group Instruction in Piano III 1 s.h.
- 025:074 Recital Attendance (four semesters required) 4 s.h.
- 025:087 Orientation to Music Therapy 2 s.h.
- 025:091 Music Foundations in Therapy I 2 s.h.
- 025:092 Music Foundations in Therapy II 2 s.h.
- 025:094 Music Therapy Practicum (three semesters, for 1, 2, and 2 s.h., respectively) 5 s.h.
- 025:096 Music Techniques in Special Education and Recreation 3 s.h.
- 025:101 Introduction to Improvisation 3 s.h.
- 025:138 Music Therapy Techniques: Atypical Children 3 s.h.
- 025:139 Music Therapy Techniques: Adult Clients 3 s.h.
- 025:140 Internship in Music Therapy 2 s.h.

One of these:

- 025:007 Garage Band: The Basics 2 s.h.
- 025:117 Arranging for Band 2 s.h.
- 025:148 Instrumentation 2 s.h.

One of these:

- 025:098 Senior Project in Music Therapy 1 s.h.
- 025:154 Senior Recital 1 s.h.

Music therapy students who elect the senior recital option must take four years of applied music and attain upper-level status; they also must take 8 s.h. of major ensemble participation. Those who elect the senior research project option must take three years of applied music and 6 s.h. of major ensemble.

Composition Concentration

The composition concentration is open to students who have been admitted to a performance area in the School of Music. Before admission to the concentration, students normally must complete the four-semester sequence Musicianship and Theory I-IV (025:002 Musicianship and Theory I, 025:003 Musicianship and Theory II, 025:004 Musicianship and Theory III, and 025:005 Musicianship and Theory IV); 025:005 Musicianship and Theory IV is a prerequisite for 025:179 Composition (undergraduate composition lessons).
Applicants to the composition concentration must submit a portfolio of creative work to the composition faculty for evaluation and acceptance into the program. Students who wish to prepare a portfolio may register for 025:036 Secondary Performance--Composition.

Composition students must satisfy the degree requirements stated under "Bachelor of Music." The composition concentration requires additional course work in composition and music theory; contact the School of Music or visit http://www.uiowa.edu/~music/current/undergraduate.htm.

The Bachelor's Thesis (025:099) replaces the recital required of applied music students. It consists of one or more compositions, approved by a committee of three faculty members and performed on regularly scheduled School of Music recitals.

**B.M. with Teacher Licensure**

Undergraduate students seeking teacher certification must be enrolled in a Bachelor of Music program in performance. Teacher licensure in music education is earned by completing the appropriate licensure program (e.g., band, choral, string) in addition to the School of Music requirements for the Bachelor of Music. Students must be admitted to the College of Education's Teacher Education Program (TEP) before they may take required professional education courses. See "Admission to Teacher Education Program" below.

Music TEP students must maintain a University of Iowa g.p.a. and a cumulative g.p.a. of at least 2.70 in all course work, and a cumulative g.p.a. of at least 3.00 in course work for the music major. They must have a cumulative g.p.a. of at least 2.70 at the time of recommendation for licensure.

Music TEP students must complete at least 40 s.h. at The University of Iowa in order to be recommended for licensure. For more information, see Teaching and Learning (College of Education) in the Catalog.

All students must complete the College of Liberal Arts and Sciences General Education Program. In addition to the B.M. requirements in music, TEP students must take General Education courses that fulfill licensure requirements. The certification program requires music methods and techniques courses, professional education courses, and student teaching.

The following courses are required for all music TEP students.

- One college-level math course (excluding 22M:001, 22M:002, 22M:003)
- 07B:180 Human Relations for the Classroom Teacher 3 s.h.
- 07E:100/07S:100 Foundations of Education 3 s.h.
- 07E:102/07S:102 Technology in the Classroom 2 s.h.
- 07E:145 Methods and Materials: General Music 3 s.h.
- 07E:192 Special Area Student Teaching 6 s.h.
- 07P:075 Educational Psychology and Measurement 3 s.h.
- 07S:096 Introduction and Practicum: Music 2 s.h.
- 07S:140/025:164 Band Methods and Materials 3 s.h.
- 07S:143/025:105 Instrumental Techniques (taken three times) 6 s.h.
- 07S:145/025:108 Instrumental Conducting 3 s.h.
- 025:100 Class Strings (Section 001) 1 s.h.
- 025:182 Marching Band Techniques 1 s.h.
- 025:193 Marching Band 1 s.h.
- 025:196 Jazz Band Techniques 1 s.h.
- 025:095 Sight Reading Jazz 1 s.h.
or
025:197 Jazz Band 1 s.h.

STRING STUDENTS

String majors in the TEP take one semester of secondary performance on each of three string instruments other than their primary instrument (total of 3 s.h.).

The following courses are required.

025:100 Class Strings (Section 002, taken three times) 3 s.h.
025:114 Introduction to Band Instruments 2 s.h.
07S:145/025:108 Instrumental Conducting 3 s.h.
07S:150/025:112 String Methods and Materials 3 s.h.

VOCAL AND KEYBOARD STUDENTS

The following courses are required.

07S:147/025:109 Choral Methods 3 s.h.
07S:148/025:110 Choral Conducting and Literature 3 s.h.
025:073 Group Instruction in Piano III 1 s.h.
Secondary performance 1-2 s.h.

KEYBOARD STUDENTS (NONVOCAL)

Keyboard students who plan to teach in nonvocal areas complete the requirements in either the brass-woodwind-percussion area or the string area, as stated above.

Admission to Teacher Education Program

Application forms for admission to the Teacher Education Program are available from the Office of Teacher Education and Student Services at the College of Education. Application deadlines for the secondary Teacher Education Program are October 15 for entry the following spring and March 15 for entry the following fall. The Teacher Education Program in music accepts a limited number of applicants; meeting the minimum requirements (stated below) does not guarantee admission. Application also requires a proficiency exam and a personal statement.

Minimum requirements for admission to the music TEP are:

- admission to the School of Music;
- a University of Iowa g.p.a. and a cumulative g.p.a. of at least 2.70 at the time of admission to the program;
- a g.p.a. of at least 3.00 on all music course work;
- successful completion of 025:002-025:003 Musicianship and Theory I-II;
- completion of at least 33 s.h. of college credit;
- completion of a 10-hour volunteer practicum in a secondary school setting; and
- the PRAXIS I exam.

Bachelor of Arts

The Bachelor of Arts in music requires a minimum of 120 s.h., including 42-47 s.h. of work for the major. The B.A. program is designed for students who have strong abilities and interest in music but are not planning on a career as a musician, or who wish to pursue a double major or earn more than one bachelor's degree. Students must audition and be accepted into a performance area. They develop musicianship and performance skills and choose from a wide variety of music electives.

Students in many areas, from engineering and physics to history, art, and English, find that a B.A. in music is a good addition to their studies. Other students choose the B.A. in music to complement course work in business (especially the minor in business administration), foreign language and literature, or interdisciplinary fields such as American studies. Some students combine a B.A. in music with undergraduate preparation to study law or medicine.
All B.A. students must complete the College of Liberal Arts and Sciences General Education Program and satisfy all other requirements for graduation with a bachelor's degree. For more information, contact the School of Music and the Academic Advising Center.

The B.A. in music requires the following course work.

025:001 Fundamentals of Music for Majors (or successful completion of the undergraduate theory examination) 3 s.h.
025:002-025:003 Musicianship and Theory I-II 8 s.h.
025:071-025:072 Group Instruction in Piano I-II (or successful completion of proficiency exams I and II) 2 s.h.

Registration for 025:071 Group Instruction in Piano I and 025:072 Group Instruction in Piano II is corequisite with 025:002 Musicianship and Theory I and 025:003 Musicianship and Theory II, unless exempted by proficiency exam. Transfer students should complete this requirement in their first year of residence, unless exempted by proficiency exam.

025:074 Recital Attendance (two semesters) 2 s.h.
Lower-level applied music 4 s.h.
Major ensemble (minimum of four semesters) 4 s.h.

With approval, students may use 025:197 Jazz Band to satisfy the major ensemble requirement.

Two of these:
025:141 History of Jazz 3 s.h.
025:144 History of Music I 3 s.h.
025:146 History of Music II 3 s.h.

Performance electives (lower- or upper-level applied music, ensembles, or improvisation) 6 s.h.

At least 6 s.h. from these:
025:004 Musicianship and Theory III 4 s.h.
025:005 Musicianship and Theory IV 4 s.h.
025:103 World Music 3 s.h.
025:104 Music of Latin America and the Caribbean 3 s.h.
025:107 Techniques of Conducting 2 s.h.
025:117 Arranging for Band 2 s.h.
025:118 Jazz Theory at the Piano 2 s.h.
025:141 History of Jazz 3 s.h.
025:144 History of Music I 3 s.h.
025:146 History of Music II 3 s.h.
025:145 Counterpoint Before 1600 3 s.h.
025:155 Composition 2 s.h.
025:231 Jazz Composition and Arranging 2 s.h.
025:244 Transcription 2 s.h.

Music electives 6 s.h.

All music majors with scholarships must participate in a major ensemble and studio lessons each semester.

For a list of major ensembles, see "Ensemble Participation" under "Bachelor of Music" above.

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan.

In addition to the requirements listed under the checkpoints, all students must complete 2 s.h. in applied music and 1 s.h. in a major ensemble each semester.

The Four-Year Graduation Plan is not available for music therapy and music education.

Bachelor of Arts

The Bachelor of Arts in music requires 42-47 s.h. in School of Music courses.
Before the third semester begins: 15-18 s.h. of course work in the major, including 025:002 Musicianship and Theory I, 025:003 Musicianship and Theory II, 025:071 Group Instruction in Piano I, and 025:072 Group Instruction in Piano II; and at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: at least 23-32 s.h. of course work in the major and at least one-half of the semester hours required for graduation

Before the seventh semester begins: at least 33-41 s.h. of course work in the major and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: at least 40-46 s.h. of course work in the major

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Bachelor of Music

Students may apply more than 50 s.h. earned in School of Music courses toward the minimum 120 s.h. required for the B.M.

Before the third semester begins: 18 s.h. of course work in the major, including 025:002 Musicianship and Theory I, 025:003 Musicianship and Theory II, 025:071 Group Instruction in Piano I, and 025:072 Group Instruction in Piano II; and at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: at least 34 s.h. of course work in the major, including 025:004 Musicianship and Theory III and 025:005 Musicianship and Theory IV, and at least one-half of the semester hours required for graduation

Before the seventh semester begins: at least 50 s.h. of course work in the major and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: at least 56 s.h. of course work in the major

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Honors

Exceptional music majors who are members of the University of Iowa Honors Program and maintain a music g.p.a. of at least 3.80 may enroll in the School of Music's honors program. Membership in the Honors Program requires students to maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University of Iowa Honors Program for more information).

Throughout undergraduate residence, honors music students may enroll in honors sections of courses in the school and in the College of Liberal Arts and Sciences. They also may seek honors designation for any course, with the instructor's consent. All honors course work must be approved by the School of Music honors advisor at the beginning of the semester in which the work is to be done.

Honors students with junior or senior standing and a music g.p.a. of at least 3.80 may undertake work leading to the B.M. or B.A. with honors. Graduation with honors is awarded after completion of 6-8 s.h. of honors work; students must earn a minimum of 3 s.h. in 025:097 Honors in Music. Honors projects for which credit is given in 025:097 Honors in Music include honors performances (solo and/or ensemble); honors compositions (or transcriptions, orchestrations, arrangements); and honors essays, research papers, editions, or translations. A combination of at least two of these types of projects is required. None of the projects may duplicate projects assigned in other courses, nor may they be required for graduation (e.g., 025:154 Senior Recital).

Honors students in music are encouraged to take graduate-level courses. Advanced courses in music history, music theory, and languages are particularly recommended. Consult the School of Music honors advisor for more information.

Minor

The minor in music requires a minimum of 15 s.h. in music courses, including 12 s.h. in advanced courses and 8 s.h. taken at The University of Iowa. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work toward the minor may not be taken pass/nonpass.

Work for the minor must include one music theory course, one music history course, and 3 s.h. of performance courses (applied instruction or ensembles). Auditions with the instructor are required for admission to the lower-level applied instruction courses; admission to the theory courses is determined by results on the theory placement exam or completion of 025:001 Fundamentals of Music for Majors. Advanced courses include those numbered 025:100 Class Strings and above; courses in the four-semester sequence Musicianship and Theory I-IV (025:002 Musicianship and Theory I, 025:003 Musicianship and Theory II, 025:004 Musicianship and Theory III, and 025:005 Musicianship and
Theory IV); and all lower-level applied instruction courses for majors.

Students may count a maximum of 7 s.h. of transfer credit up to 7 s.h. toward the music theory, music history, and elective requirements. No transfer credit may be counted toward music performance requirements.

Courses for Nonmajors

Courses recommended for nonmajors who are interested in music include the following.

Group Piano I: Non-Music Majors (025:082) is available for nonmajors who wish to develop elementary keyboard skills for personal musical growth and enjoyment.

Participation in School of Music ensembles is open to all University students with the ensemble director's approval (for a list of major ensembles, see "Ensemble Participation" under "Bachelor of Music" above).

Applied music instruction is offered to nonmajors as instructors are available. Nonmajors interested in registering for 025:059 Performance Instruction for Nonmajors should consult music advisors.

National Honor Society

The School of Music sponsors a chapter of Pi Kappa Lambda, the national music honor society. Students of exceptional ability are recommended for membership by faculty members. For more information, consult the School of Music honors advisor.

Financial Support

A number of music performance-based merit scholarships are available to qualified undergraduate music majors. All music majors with scholarships must enroll in a major ensemble and studio lessons each semester. For information, write to the School of Music.

Graduate Programs

The School of Music offers four graduate degrees: Master of Arts, Master of Fine Arts, Doctor of Philosophy, and Doctor of Musical Arts. It also offers a graduate theory pedagogy minor and the graduate Certificate in Sacred Music.

Applicants to any of the graduate programs must audition and/or submit supporting materials in their area of concentration in order to be considered for admission. Information about Graduate College admission and curriculum requirements for each area in the School of Music is available from the school's academic office or at http://www.uiowa.edu/~music.

For detailed information about Graduate College admission and policies, see the Manual of Rules and Regulations of
ADVISORY EXAMINATIONS

Before they register, entering graduate students must take two School of Music advisory examinations: one in music theory, and one in music history and literature. M.A. students in music therapy are not required to take the advisory examination in music theory or music history. These examinations are given at the beginning of the fall semester on the two days (except Sunday) immediately preceding the opening of classes, and at the beginning of the spring and summer sessions by appointment. A leaflet describing the general content of these tests is available from the School of Music academic office.

ENSEMBLE PARTICIPATION

Graduate students in the performance and pedagogy tracks of all graduate programs are required to complete four semesters of major ensemble participation. Students normally enroll in major ensemble participation during consecutive semesters beginning early in their degree work, to ensure completion of the major ensemble requirements in a timely manner. Ensemble assignments are made at the discretion of the major teacher and ensemble director. For a list of major ensembles, see "Ensemble Participation" under "Bachelor of Music" above.

Keyboard majors may substitute piano accompanying for major ensemble participation, at their major applied teacher's discretion. Jazz studies majors substitute 025:197 Jazz Band for major ensemble participation. Theory, composition, music education, and music therapy majors have no major ensemble requirement. The M.A. in musicology requires one semester of any ensemble.

Any student who wants to request adjustment of this requirement must submit his or her request in writing to a review committee consisting of the major ensemble director(s) involved, the major teacher, and the School of Music associate director for graduate studies.

Master of Arts

The Master of Arts in music requires a minimum of 30-37 s.h. of graduate credit. The M.A. in performance, conducting, jazz studies, composition, music theory, musicology, music therapy, and music education requires a recital, capstone project, or thesis. Performance majors present a public recital in place of a written thesis. Music therapy majors complete a capstone research project. Jazz studies majors present a public recital and a separate performance project. The Master of Arts in music education is offered with thesis and nonthesis options. All M.A. programs—except music therapy and music education—must include the following requirements. For degree requirement checklists, see http://www.uiowa.edu/~music/current/degreqchecklists.htm.

Common M.A. Requirements

025:321 Introduction to Graduate Study in Music 2 s.h.

MUSIC THEORY

Students must earn 6 s.h.

025:240 Basic Analytical Techniques (unless exempt by advisory exam) 3 s.h.

Students exempted from 025:240 Basic Analytical Techniques through the advisory examination in music theory must substitute an additional theory elective chosen from the following.

025:145 Counterpoint Before 1600 3 s.h.
025:147 Counterpoint After 1600 3 s.h.
025:247 Post-Tonal Analysis 3 s.h.
025:249 Tonal Analysis 3 s.h.
025:256 Special Topics in Theory and Analysis 3 s.h.

Students also must choose one elective from these:

025:145 Counterpoint Before 1600 3 s.h.
025:147 Counterpoint After 1600 3 s.h.
025:241 History of Music Theory I 3 s.h.
025:242 History of Music Theory II 3 s.h.
025:247 Post-Tonal Analysis 3 s.h.
025:249 Tonal Analysis 3 s.h.
025:256 Special Topics in Theory and Analysis  3 s.h.
025:311 Advanced Post-Tonal Theory and Analysis  3 s.h.
025:312 Advanced Tonal Theory and Analysis  3 s.h.

MUSIC HISTORY

Students must earn 6 s.h.

025:301 Advanced History and Literature of Music I  3 s.h.
025:302 Advanced History and Literature of Music II  3 s.h.

Students exempted from 025:301 Advanced History and Literature of Music I and/or 025:302 Advanced History and Literature of Music II through the advisory examination in music history must substitute a music history course from the following list for each of the exemptions.

025:303 Medieval Music  3 s.h.
025:304 Renaissance Music  3 s.h.
025:305 Seventeenth-Century Music  3 s.h.
025:306 Eighteenth-Century Music  3 s.h.
025:307 Nineteenth-Century Music  3 s.h.
025:308 Music 1900-1945  3 s.h.
025:309 Music 1945-Present  3 s.h.
025:310 American Music  3 s.h.
025:313 Major Composers  3 s.h.
025:314 Genres of Music  3 s.h.
025:318 Topics in Ethnomusicology  3 s.h.
025:319 Foundations of Ethnomusicology  3 s.h.
025:323 Medieval Music Notations  3 s.h.
025:324 Renaissance Music Notations  3 s.h.
025:325 Music Editing  3 s.h.
025:330 Seminar in Musicology  3 s.h.
025:331 Performance Practices of Medieval and Renaissance Music  3 s.h.

Master of Fine Arts

The Master of Fine Arts in music requires a minimum of 60 s.h. of graduate credit. It is designed for students of superior ability in instrumental or vocal performance. M.F.A. students present at least two full-length recitals or programs and must write an M.F.A. Thesis (025:401)—a research paper of moderate length. The thesis may relate to some or all of the repertoire included on the recitals.

Students may earn a Master of Arts while working toward the Master of Fine Arts, but they must take two separate final examinations.

For degree requirement checklists, see http://www.uiowa.edu/~music/current/degreeprograms.htm.

Doctor of Philosophy

The Doctor of Philosophy in music requires a minimum of 72 s.h. of graduate credit. Ph.D. concentration areas include composition, musicology, music education, music theory, and music literature. The music literature program is designed for students who already have achieved a professional level of musical performance. These students are required to audition in their major performance area.

Information about specific admission and curricular requirements for each area is available from the School of Music academic office.

Common Ph.D. Requirements

Ph.D. students in composition, musicology, music theory, and music literature must complete the course requirements for the M.A. (see "Common M.A. Requirements" above). They also must complete the following.

One or more additional music theory course(s) listed in the M.A. requirements

One or more additional course(s) in music history, chosen from those listed in the M.A. requirements

One of these:
Proficiency in one or more foreign languages is required for Ph.D. students in composition, musicology, music theory, and music literature. Ph.D. students in music education should contact the School of Music for requirements.

**Doctor of Musical Arts**

Requirements for the D.M.A. in conducting and in performance and pedagogy are the same as for the Ph.D. (see "Common Ph.D. Requirements" under "Doctor of Philosophy" above), except that the D.M.A. requires three recitals or programs. At the performance area's discretion, a concerto performance with orchestra or other appropriate ensemble from the School of Music may be substituted for one of the recitals. Some performance areas allow one or more lecture recitals, with faculty approval. Singers may substitute one major opera role or one major solo contribution to an orchestra performance for one of their recitals. See the associate director of graduate programs for specific area requirements.

D.M.A. candidates also must complete a scholarly investigation of limited scope in a written essay or thesis.

**Certificate in Sacred Music**

The Certificate in Sacred Music requires 25 s.h. The certificate is an interdisciplinary graduate program with courses in sacred music, choral conducting and literature, keyboard, voice, religion, and art and art history. Students may earn the certificate while working toward a graduate degree. Individuals not enrolled in a graduate program also may complete the certificate, but they must be admitted to the Graduate College and have the consent of a faculty advisor. Successful completion of the certificate program is noted on the student's transcript.

**Theory Pedagogy Minor**

Any student admitted to a graduate degree program in the School of Music may earn the theory pedagogy minor by completing the following required courses.

One of these:

- 025:145 Counterpoint Before 1600
- 025:147 Counterpoint After 1600

Both of these:

- 025:236 Music Theory Pedagogy
- 025:237 Music Theory Colloquium (taken 2 times)

One of these:

- 025:249 Tonal Analysis
- 025:312 Advanced Tonal Theory and Analysis

One of these:

- 025:247 Post-Tonal Analysis
- 025:311 Advanced Post-Tonal Theory and Analysis

Two of these:

- 025:241 History of Music Theory I
- 025:242 History of Music Theory II
- 025:256 Special Topics in Theory and Analysis
- 025:311 Advanced Post-Tonal Theory and Analysis
- 025:312 Advanced Tonal Theory and Analysis
Financial Support

Qualified graduate students are invited to apply for teaching and research assistantships. Inquiries should be directed to the academic office of the School of Music.

Resources, Facilities

Center for New Music

The Center for New Music is a vital component of the School of Music’s composition program. Since its founding in 1966, the center has been both laboratory and showcase for late-20th and 21st-century music. It presents at least four concerts of contemporary works each academic season. It also provides a forum for visiting composers and other creative artists, bringing new music to a variety of outreach venues. Audition, rehearsal, and programming information is available at http://www.uiowa.edu/~cnm.

Rita Benton Music Library

The Rita Benton Music Library is currently located in the University’s Main Library. The music library holds more than 70,000 scores, including chamber music sets; 50,000 books, including bound journals; 3,500 microforms, chiefly manuscripts and early printed books; and 28,000 media items in all formats. It receives about 300 journals. Its rare book division has particular strengths in 18th- and 19th-century music theory treatises and instrumental methods, and an outstanding collection of keyboard and chamber music by Ignaz Pleyel. The library also houses the Goldman Band Collection. Music manuscripts of the composer Phillip Greeley Clapp, a former director of the school, are housed in Special Collections & University Archives.

The library’s large reference collection is supplemented by several online resources, including Music Index, IIMP, Grove Music Online, RILM, RISM, RIPM, WorldCat, and InfoHawk Catalog, the University’s online library catalog. Online resources for streamed audio include Classical Music Library, Naxos Music Library, Naxos Jazz, African-American Song, Smithsonian Global Sound, and the Database of Recorded American Music (DRAM).

Materials circulate to University of Iowa faculty and students and to institutions that have reciprocal agreements with the University. Individuals not affiliated with the University may qualify for borrower’s permits.

Music Courses

General

The following courses are especially appropriate for non-music majors. Other courses appropriate for nonmajors are 025:144 History of Music I and 025:146 History of Music II (see "Music History"); 025:080 Jazz Cultures in America and Abroad and 025:141 History of Jazz (see "Jazz Studies"); and most ensembles (see "Ensembles").

Instruction in 025:059 Performance Instruction for Nonmajors consists of a half-hour lesson per week. The course is offered on a fee-per-course basis, in addition to tuition. Students register under separate section numbers for different instruments.

025:007 Garage Band: The Basics 2 s.h.
Application of GarageBand software (Mac platform) using midi keyboards; composition and music theory for projects using drag-and-drop looping, multitrack recording, sound effects, mixing, importing music for composition. Prerequisites: prior musical experience (student can sing or play an instrument) and consent of instructor.

025:009 First-Year Seminar 1 s.h.
An aspect of performance, creativity, musical literature, or scholarship; seminar format with classroom participation, papers, projects, other assignments; may require attendance at lectures, rehearsals, or performances. Prerequisite: first- or second-semester standing.

025:010 Fundamentals of Music 3 s.h.
Music fundamentals through writing, listening, sightsinging, dictation, notation of pitch and rhythm, intervals, scales, key signatures, triads, and seventh chords. Offered by Saturday & Evening Classes. Prerequisite: non-music major.

025:013 Concepts and Contexts of Western Music 3 s.h.
Ideas, social and historical contexts, emergence of genres and styles, diverse performing traditions in music making of Europe and North America. GE: Fine Arts, Humanities.
025:014 Great Musicians  
Lives and works of important composers, performers. GE: Fine Arts, Humanities.

025:059 Performance Instruction for Nonmajors  
Bassoon, cello, clarinet, euphonium, flute, horn, oboe, organ, percussion, piano, saxophone, string bass, trombone, trumpet, tuba, viola, violin, or voice. Prerequisites: one year of instruction for piano and non-music major. GE: Fine Arts.

025:063 Survey of World Percussion  
Percussion music explored through a selection of nonwestern musical and cultural traditions; hands-on experience learning to play instruments from a variety of musical genres; music of Cuba, Brazil, Africa, Trinidad, Asia, other areas.

025:064 Recital Attendance for Non-Majors  
Musical experience through student, faculty recitals.

025:074 Recital Attendance  
Prerequisite: music major.

025:082 Group Piano I: Non-Music Majors  
Reading, technical study, chording, playing by ear, improvisation; for beginners. Prerequisite: non-music major. GE: Fine Arts.

025:083 Introduction to Hand Drumming  
Hand drumming techniques indigenous to several Afro-Caribbean cultures; hands-on instruction and coaching on varied ethnic instruments, lectures, listening sessions.

025:084 Group Piano II: Non-Music Majors  
Continuation of 025:082. Prerequisite: nonmusic major.

History of popular female musicians and the influence of their lyrics, music, and performances on American and British cultures; how women's musical careers have been influenced by civil rights, the British invasion (Beatles, Rolling Stones), second-wave feminism, postfeminism, Vietnam, counterculture, social injustice, music education, rock festivals, charity concerts.

025:103 World Music  
Varied perspectives on the relationship of music and culture, drawing from musical cultures around the world. GE: Fine Arts, Foreign Civilization & Culture.

025:104 Music of Latin America and the Caribbean  
Folk and popular musical traditions and their social contexts in Latin America, the Caribbean; listening skills; video/film screenings. GE: Fine Arts, Humanities.

025:106 Improvisation for Classical Musicians  
Theory and practice in beginning nonjazz improvisation; development of aural and rhythmic skills, creation of rhythms and melodies, use of timbres and extended techniques in expression, development of instrumental technique for improvisation, practical understanding of harmony and form, experience in solo and accompaniment roles, creation of short pieces as vehicles for improvisation. Prerequisite: one year of music theory or consent of instructor.

025:111 Special Topics  
One or more musical styles, genres, cultures, composers, or subjects.

025:137 World of the Beatles  
How the Beatles' music was influenced by American pop music, the drug culture, and the Avant Garde, nonwestern instruments and philosophy, anti-war sentiments, and world politics, and so forth; Beatlemania's impact on British and American cultures and its role in opening Eastern Europe to the West. Same as 188:137.

025:166 Popular Music in the United States  
Popular music and culture in the United States from early 20th century to present; basic musical style and performance analysis, social meaning and use.
025:167 Movement for Performers  2-3 s.h.
Movement as support for sound production, artistic expression, and wellness; Bartenieff Fundamentals, Laban
Movement Analysis, or principles of the Alexander Technique as methods of organizing and integrating body
movement and expanding expressive range; studio course with practice, journal, observations, project applying
movement skills to student's area of performance/study. Same as 049:105, 137:160, 188:167.

025:178 Music, Culture, and Identity  3 s.h.
Use of music as marker of social identity; focus on popular music in the United States and interplay among Latino,
African, and European-American musical cultures; listening skills.

Applied Music

Instruction consists of individual and/or class lessons, at the instructor's option, for a minimum of one hour per week
(students register for 2 s.h.), or one half-hour per week (students register for 1 s.h.). Majors are required to attend
weekly performance and pedagogy seminars in applied music. Offered on a fee-per-course basis, in addition to tuition.
Repeatable.

Guitar instruction is offered only at the lower level. Enrollment in 025:043 Lower Level Guitar is limited to three
Bachelor of Arts students. Students may not enroll in the Bachelor of Music program with guitar as their major
instrument.

LOWER-LEVEL UNDERGRADUATE MAJORS

025:040 Lower Level Voice  arr.
025:041 Lower Level Piano  arr.
025:042 Lower Level Organ  arr.
025:043 Lower Level Guitar  1 s.h.
Prerequisites: B.A. enrollment and audition.
025:044 Lower Level Violin  arr.
025:045 Lower Level Viola  arr.
025:046 Lower Level Cello  arr.
025:047 Lower Level String Bass  arr.
025:048 Lower Level Flute  arr.
025:049 Lower Level Oboe  arr.
025:050 Lower Level Clarinet  arr.
025:051 Lower Level Bassoon  arr.
025:052 Lower Level Saxophone  arr.
025:053 Lower Level Horn  arr.
025:054 Lower Level Trumpet  arr.
025:055 Lower Level Euphonium  arr.
025:056 Lower Level Trombone  arr.
025:057 Lower Level Tuba
025:058 Lower Level Percussion

UPPER-LEVEL UNDERGRADUATE MAJORS
025:119 Upper Level Voice
025:120 Upper Level Piano
025:121 Upper Level Organ
025:122 Upper Level Violin
025:123 Upper Level Viola
025:124 Upper Level Cello
025:125 Upper Level String Bass
025:126 Upper Level Flute
025:127 Upper Level Oboe
025:128 Upper Level Clarinet
025:129 Upper Level Bassoon
025:130 Upper Level Saxophone
025:131 Upper Level Horn
025:132 Upper Level Trumpet
025:133 Upper Level Euphonium
025:134 Upper Level Trombone
025:135 Upper Level Tuba
025:136 Upper Level Percussion

GRADUATE MAJORS
025:263 Major Voice
025:264 Major Piano
025:266 Major Organ
025:267 Major Violín
025:268 Major Viola
025:269 Major Cello
025:270 Major String Bass
025:271 Major Flute
025:272 Major Oboe
025:273 Major Clarinet
025:274 Major Bassoon
025:275 Major Saxophone
025:276 Major Horn
025:277 Major Trumpet
025:278 Major Euphonium
025:279 Major Trombone
025:280 Major Tuba
025:281 Major Percussion

SECONDARY PERFORMANCE INSTRUCTION FOR MAJORS

Instruction consists of one half-hour lesson per week. Offered on a fee-per-course basis, in addition to tuition.

025:017 Secondary Performance--Voice 1 s.h.
025:018 Secondary Performance--Piano 1 s.h.
025:019 Secondary Performance--Organ 1 s.h.
025:021 Secondary Performance--Violin 1 s.h.
025:022 Secondary Performance--Viola 1 s.h.
025:023 Secondary Performance--Cello 1 s.h.
025:024 Secondary Performance--String Bass 1 s.h.
025:025 Secondary Performance--Flute 1 s.h.
025:026 Secondary Performance--Oboe 1 s.h.
025:027 Secondary Performance--Clarinet 1 s.h.
025:028 Secondary Performance--Bassoon 1 s.h.
025:029 Secondary Performance--Saxophone 1 s.h.
025:030 Secondary Performance--Horn 1 s.h.

Conducting
See also 025:108 Instrumental Conducting, 025:109 Choral Methods, and 025:110 Choral Conducting and Literature, under the heading Music Education.

025:107 Techniques of Conducting  2 s.h.
Basic elements, score analysis.

025:158 Advanced Conducting  2 s.h.
Prerequisite: graduate standing.

025:200 Seminar in Advanced Band Literature and Band History  arr.
Band literature; history.

025:203 Advanced Choral Conducting I  1-3 s.h.

025:204 Advanced Choral Conducting II  1-3 s.h.

025:205 Advanced Choral Conducting III  1-3 s.h.

025:206 Advanced Choral Conducting IV  1-3 s.h.

025:225 Score Reading  1 s.h.

025:291 Orchestral Literature  2 s.h.

Ensembles
Courses may be repeated; consent of instructor required.

025:142 Camerata Singers  1 s.h.

025:162 All-University String Orchestra  1 s.h.
Repertoire, rehearsal pacing, and performance expectation geared to general students. Open to all UI students with no audition.

025:163 Steel Band  1 s.h.
Musical and cultural introduction to steel band music of Trinidad and other Caribbean musical styles, including calypso, soca, ska, and reggae. Prerequisite: consent of instructor.

025:171 Center for New Music Ensemble  1 s.h.
Participation in the Center for New Music; focus on contemporary composition and performance, 20th- and 21st-century repertoire and styles.

025:173 Introduction to Afro-Cuban Drumming  1 s.h.
Drumming, dance, songs from folkloric and ceremonial Afro-Cuban forms; emphasis on drumming; may include participation in Afro-Cuban drum and dance ensemble. Same as 188:173.

025:180 Large Pep Band  1 s.h.
Performing ensemble for men's basketball games during spring semester. Prerequisite: membership in 025:193 Marching Band and audition.

025:181 University Choir  1 s.h.
025:183 Chamber Orchestra  
025:185 Kantorei  
025:186 Piano Accompaniment  
Collaborative arts techniques, methods, and history. Prerequisite: keyboard major or consent of instructor.  
025:187 Piano Chamber Music  
Prerequisite: music major or consent of instructor.  
025:188 String Chamber Music  
025:190 Wind Chamber Music  
Preparation, performance of representative literature; sections for woodwinds, brass, flute, clarinet, horn, saxophone, double reed, trumpet, trombone, brass choir, tuba/euphonium ensemble.  
025:191 University Chorale  
Women's chorale.  
025:192 Orchestra  
025:193 Marching Band  
Offered fall semesters.  
025:194 Symphony Band/Concert Band/University Band  
Participation in Symphony Band, Concert Band, and/or University Band.  
025:195 Percussion Ensemble  
Range of styles and idioms, primarily written during the 20th and 21st centuries; historical or cultural aspects such as ancient rudimental drumming styles, ragtime, jazz, popular music, and music from Africa, the Caribbean, Brazil, Cuba, China. Prerequisite: consent of instructor.

**Jazz Studies**

025:080 Jazz Cultures in America and Abroad  
How to listen to jazz and recognize a variety of processes that are taking place in performances and recordings; historical, social, and political issues, including race and gender; the unique blend of jazz of a particular region; attendance at live performances, meet and interview musicians, critics, and educators. GE: Cultural Diversity, Fine Arts.  
025:095 Sight Reading Jazz  
Methods for sight-reading and interpreting jazz notation. Prerequisite: instrumental major.  
025:101 Introduction to Improvisation  
Introduction to the practice of improvisation through performance of repertoire and the development of practicing strategies; exercises in melody, harmony, rhythm and transcription that together form an integrated approach to developing improvisations. Prerequisites: 025:002 and audition.  
025:102 Intermediate Jazz Improvisation  
Improvisation in the jazz repertoire of standards, bebop, and major composers such as Thelonious Monk, Wayne Shorter; memorization and use of melodies, knowledge of chords to the thirteenth, chromatic harmony, development of rhythmic motifs/alteration, strategies for multiple chorus improvisations. Prerequisites: 025:002, 025:101, and audition.  
025:118 Jazz Theory at the Piano  
Development of skills for interpreting melodies and chord symbols in mainstream practice of jazz harmony at the piano; application of scales, development of voice leading for jazz harmonies, reharmonization, and analysis. Prerequisites: 025:002 and 025:072, or audition.
025:141 History of Jazz
Major 20th-century styles, artists, seminal works, and recordings; developments between 1917 and 1972. GE: Cultural Diversity.

025:196 Jazz Band Techniques
Development of skills for sight-reading and interpreting notated jazz. Prerequisite: audition.

025:197 Jazz Band
Rehearsals (four hours per week) and several concerts on and off campus. Prerequisite: audition.

025:224 Small Jazz Ensembles
Development of repertoire from standard jazz literature, arrangements and compositions by ensemble members; rehearsals (three hours per week) and performances on and off campus. Repeatable. Prerequisite: audition.

025:231 Jazz Composition and Arranging
Experience writing and arranging original jazz material for small and large ensembles, and presenting scores in computer notation; individual lessons. Repeatable. Prerequisite: 025:118 or score submission. Recommended: 025:117 and 025:157.

025:243 Advanced Jazz Improvisation
Builds on the skills learned in 025:102; contemporary techniques and styles used by current practitioners of improvisation; free improvisation, bitonal harmonies, through-composed forms, collective improvisation, nonwestern approaches. Repeatable. Prerequisites: 025:102 and audition.

025:244 Transcription
Individual projects to transcribe improvisations, small ensemble arrangements, large ensemble arrangements, or nonwestern techniques; use of computer notation programs and midi-realizations. Repeatable. Prerequisite: 025:102 or 025:118.

Music Education
Other music education courses are offered by the College of Education; see Teaching and Learning in the Catalog for listings and descriptions. Some courses have two numbers, one for the School of Music and the other for the College of Education. Students preparing for music teacher licensure should register under the education number.

Also see 025:196 Jazz Band Techniques under "Jazz Studies."

025:100 Class Strings
String playing and basic principles of string pedagogy. Prerequisite: teacher education student in music.

025:105 Instrumental Techniques
Repeatable. Same as 07S:143.

025:108 Instrumental Conducting
Advanced skills for instrumental conducting, score analysis, rehearsal techniques, literature selection. Prerequisite: 025:107. Same as 07S:145.

025:109 Choral Methods
Organization, implementation of effective choral music programs for all ages. Prerequisites: 07E:102 or 07S:102, 07S:190, 07S:096, and 025:107. Same as 07S:147.

025:110 Choral Conducting and Literature
Advanced skills appropriate to choral conducting, analysis, literature selection studied and implemented to develop a secure approach to choral art; students preparing to teach in the elementary or secondary schools must register under 07S:148. Prerequisites: 07S:147 and 025:107. Same as 07S:148.

025:112 String Methods and Materials
Methods for teaching bands in schools. Offered fall semesters. Prerequisites: (for 07S:150) 07E:102 or 07S:102, 07S:190, and 07S:096. Same as 07S:150.

025:308 Music 1900-1945
Repeatable. Prerequisite: 025:302 or consent of instructor. 3 s.h.

025:309 Music 1945-Present
Prerequisite: 025:302 or consent of instructor. 3 s.h.

025:310 American Music
Prerequisite: 025:302 or consent of instructor. 3 s.h.

025:313 Major Composers
Life and works of one or more important composers (announced before registration). Repeatable. 3 s.h.

025:314 Genres of Music
One or more major genres in the history of music (announced before registration). Repeatable. 3 s.h.

025:318 Topics in Ethnomusicology
Perspectives on analysis and representation of selected musical cultures from around the world. Repeatable. Prerequisite: consent of instructor. 3 s.h.

025:319 Foundations of Ethnomusicology
Ethnomusicology in relation to domains of musical, humanistic, social science scholarship on expressive culture and artistic processes. Prerequisites: senior standing and consent of instructor. Same as 113:208. 3 s.h.

025:320 Introduction to Musicology
Methods, materials of research in historical musicology; field of musicology. Offered fall semesters. Prerequisite: for 1 s.h. credit option, 025:321 or equivalent. Corequisite: for 3 s.h. credit option, 025:321. 1-3 s.h.

025:321 Introduction to Graduate Study in Music
Music library; reference materials; bibliography; research problems, methods; writing research papers. Offered fall and spring semesters. 2 s.h.

025:323 Medieval Music Notations
Chant neumes, medieval black notation, musical and textual paleography; transcription of early vocal and instrumental notations; editorial problems. Prerequisite: 025:301 or consent of instructor. 3 s.h.

025:324 Renaissance Music Notations
Renaissance white notation, keyboard tablatures, musical paleography; transcription of early vocal, instrumental notations; editorial problems. Prerequisite: 025:301 or consent of instructor. 3 s.h.

025:325 Music Editing
Principles and methods of music editing; use of primary source materials, establishment of music text, preparation of critical apparatus; project to prepare a critical edition of music for publication. Prerequisite: 025:321. 3 s.h.

025:330 Seminar in Musicology
One or more selected areas of music history. Repeatable. 3 s.h.

025:331 Performance Practices of Medieval and Renaissance Music
Practical approaches to performing vocal and instrumental music before 1600; theoretical, social issues bearing on performance. Prerequisite: 025:301 or consent of instructor. 3 s.h.

025:381 Readings in Music History
arr.

Music and Technology
Also see 025:250 Composition: Electronic Media I and 025:251 Composition: Electronic Media II listed under "Composition."

025:149 Audio Recording I
3 s.h.
Audio fundamentals, including sound generation, acoustical environments, forms of sound energy, basic audio systems; use of microphones (primarily stereo techniques), mixers, recorders, related equipment; introduction to Pro Tools digital recording, editing, and mixing on Macintosh; production of high-quality audio compact discs. Offered fall semesters. Prerequisite: consent of instructor.

025:152 Audio Recording II
Functionality with Pro Tools digital audio recording, editing, mixing, and mastering on Macintosh; basic digital theory; configuration of Macintosh G4 computer with Pro Tools hardware and software; music editing projects and production of multitrack recordings. Offered spring semesters. Prerequisites: 025:149 and consent of instructor.

025:161 Fundamentals of Piano Technology
Offered spring semesters.

Music Therapy

025:087 Orientation to Music Therapy
Theory, practice; typical clients and places of employment in music therapy.

025:091 Music Foundations in Therapy I
Skill development on social instruments such as guitar, autoharp, piano; song-leading skills and repertoire development for use in clinical music therapy sessions. Prerequisites: 025:087, music therapy major, and consent of instructor.

025:092 Music Foundations in Therapy II
Advanced skill development on guitar for use in clinical music therapy sessions; percussion techniques, and related skills used in therapeutic settings. Prerequisites: 025:091, music therapy major, and consent of instructor.

025:094 Music Therapy Practicum
Supervised clinical training with adult clients and children in variety of health care and educational settings. Prerequisites: 025:087, music therapy major, and consent of instructor.

025:096 Music Techniques in Special Education and Recreation
Music methods and materials appropriate for students with disabilities in special educational settings; overview of individualized educational planning for students with disabilities. Prerequisite: music therapy or music education major or consent of instructor.

025:098 Senior Project in Music Therapy
Prerequisite: consent of instructor.

025:138 Music Therapy Techniques: Atypical Children
Techniques, procedures for use in clinical, educational settings. Prerequisites: 025:087, music therapy major, and consent of instructor.

025:139 Music Therapy Techniques: Adult Clients
Techniques, procedures for work with adult clients with disabilities. Prerequisites: 025:087, music therapy major, and consent of instructor.

025:140 Internship in Music Therapy
Clinical training under direction of board certified music therapist. Prerequisites: core music therapy requirements and consent of instructor.

025:221 Special Studies in Music Therapy
Seminar. Repeatable. Prerequisites: music therapy major and consent of instructor.

025:283 Graduate Music Therapy Practicum
Seminar, clinical field work. Prerequisites: undergraduate music therapy practicum and consent of instructor.

025:285 Research in Music Therapy--Graduate
1 s.h.
Research methodology; foundation for subsequent semesters of research on capstone project in music therapy. Repeatable. Prerequisite: consent of instructor.

### History of Organ Building and Design

- **Code**: 025:226
- **Credits**: 2-3 s.h.
- **Description**: Development of organ design from Middle Ages to present; basic concepts of construction, maintenance. Repeatable.

### Organ Pedagogy

- **Code**: 025:228
- **Credits**: 2 s.h.
- **Description**: History, theory, practice from Renaissance to present; methods, literature appropriate for various levels.

### Organ Literature Special Topics

- **Code**: 025:229
- **Credits**: 2 s.h.
- **Description**: Specialized study in selected areas of organ literature. Repeatable.

### Hymnology

- **Code**: 025:252
- **Credits**: 1-2 s.h.
- **Description**: Survey of historic hymnody: ancient odes, Latin hymns, Reformation hymns and psalms; current developments in hymnody and hymnals; may be special topic study. Repeatable.

### Organ Literature Special Topics

- **Code**: 025:284
- **Credits**: arr.
- **Description**: Individual projects in church music: liturgies, hymnody, church choir repertory; religion and the arts.

### Piano

#### Group Instruction in Piano I

- **Code**: 025:071
- **Credits**: 1 s.h.
- **Description**: Beginning instruction for music majors whose principal performing medium is voice or an orchestral or band instrument; skill development in sight reading, technique, harmonization, transposition, improvisation, simple literature. Prerequisite: music major. Corequisite: 025:002.

#### Group Instruction in Piano II

- **Code**: 025:072
- **Credits**: 1 s.h.
- **Description**: Elementary to early intermediate instruction for music majors whose principal performing medium is voice or an orchestral or band instrument; continued skill development begun in 025:071; introduction of easy solo and ensemble literature. Prerequisite: 025:071 or successful completion of proficiency examination. Corequisite: 025:003.

#### Group Instruction in Piano III

- **Code**: 025:073
- **Credits**: 1 s.h.
- **Description**: Skills for the music therapy profession; sight-reading, harmonization, transposition, reading from a fake book, improvisation. Prerequisite: music therapy major.

#### Methods of Teaching Piano

- **Code**: 025:113
- **Credits**: 2 s.h.
- **Description**: Methods, materials, and teaching techniques for preschool students, precollege students, and adult learners. Prerequisite: keyboard major or consent of instructor.

#### Piano Pedagogy I

- **Code**: 025:232
- **Credits**: 2 s.h.
- **Description**: Principles of piano teaching at beginning to intermediate levels; developmental and learning theories, competing educational philosophies, and how these ideas and current piano pedagogy materials interact; preschool approaches; teaching children with ADHD, dyslexia, other learning disabilities; teaching gifted children; the adult beginner; performing arts medicine; the business of teaching.

#### Piano Pedagogy II

- **Code**: 025:233
- **Credits**: 2 s.h.
- **Description**: History of the piano and its technique and pedagogy; national schools of piano playing; relationship of technological changes in piano construction to piano technique, pedagogy, and composition; major methods and treatises, historical recordings and video clips; research leading to understanding of students' individual piano lineage.

#### Piano Literature I

- **Code**: 025:296
- **Credits**: 2 s.h.
- **Description**: Baroque era to Mozart or Chopin through 1900. Repeatable.

#### Piano Literature II

- **Code**: 025:297
- **Credits**: 2 s.h.
- **Description**: Beethoven through Schumann or 20th century. Repeatable.

#### Special Studies Piano Literature

- **Code**: 025:361
- **Credits**: arr.
- **Description**: Individual research in special aspects of piano literature; primarily for D.M.A. students. Repeatable.

#### Special Studies in Piano Accompaniment and Chamber Music

- **Code**: 025:362
- **Credits**: arr.
- **Description**: Advanced collaborative arts practicum. Prerequisite: 025:186 or consent of instructor.
### Recital and Thesis

**025:097 Honors in Music**  
Prerequisite: honors standing.  
1-4 s.h.

**025:099 Bachelor's Thesis**  
Prerequisite: consent of instructor.  
0-1 s.h.

**025:154 Senior Recital**  
1 s.h.

**025:199 Special Studies**  
arr.

**025:390 M.A. Performance Project**  
arr.

**025:400 M.A. Thesis**  
arr.

**025:401 M.F.A. Thesis**  
arr.

**025:402 M.A. Recital**  
arr.

**025:500 Ph.D. Thesis**  
arr.

**025:501 Composition Ph.D. Thesis**  
arr.

**025:502 D.M.A. Essay**  
arr.

**025:503 D.M.A. Recital**  
arr.

### Theory

**025:001 Fundamentals of Music for Majors**  
Rudiments of music—notation of pitch and rhythm, meter, scales, keys, intervals, triads; first of a five-semester sequence.  
3 s.h.

**025:002 Musicianship and Theory I**  
Principles of harmony; emphasis on aural skills, theoretical concepts, notation. Offered fall semesters. Prerequisite: 025:001 or equivalent or successful completion of music theory diagnostic exam. Corequisite: 025:071 or successful completion of piano proficiency exam.  
4 s.h.

**025:003 Musicianship and Theory II**  
Continuation of 025:002. Offered spring semesters. Corequisite: 025:072 or successful completion of piano proficiency exam.  
4 s.h.

**025:004 Musicianship and Theory III**  
Continuation of 025:002 and 025:003; focus on common-practice repertory. Offered fall semesters.  
4 s.h.

**025:005 Musicianship and Theory IV**  
Continuation of 025:002, 025:003, and 025:004; focus on late 19th- and early 20th-century repertories. Offered spring semesters.  
4 s.h.

**025:145 Counterpoint Before 1600**  
Two- and three-part counterpoint: Renaissance polyphony. Prerequisite: 025:003 for undergraduates, 025:240 for graduate students.  
3 s.h.

**025:147 Counterpoint After 1600**  
3 s.h.
Two- and three-part writing in the style of J.S. Bach; fugue. Prerequisite: 025:005 for undergraduates, 025:240 for graduate students.

025:153 Keyboard Harmony
Melody harmonization and figured-bass realization at the keyboard. Prerequisites: 025:005 for undergraduates, 025:240 for graduate students; and keyboard proficiency.

025:236 Music Theory Pedagogy
Methods and techniques of teaching college-level music theory, including harmony, sight singing, ear training. Prerequisite: 025:240. Corequisite: 025:237.

025:237 Music Theory Colloquium
Repeatable.

025:240 Basic Analytical Techniques
Theories and strategies of analysis applied to tonal and post-tonal music.

025:241 History of Music Theory I
Prerequisite: 025:240.

025:242 History of Music Theory II
Prerequisites: 025:240 and 025:241.

025:247 Post-Tonal Analysis
Prerequisite: 025:240.

025:249 Tonal Analysis
Prerequisite: 025:240.

025:256 Special Topics in Theory and Analysis
Repeatable. Prerequisite: 025:240.

025:311 Advanced Post-Tonal Theory and Analysis
Repeatable. Prerequisite: 025:247 or consent of instructor.

025:312 Advanced Tonal Theory and Analysis
Repeatable. Prerequisite: 025:249 or consent of instructor.

025:380 Readings in Music Theory

Voice and Opera

025:115 Diction for Singers I
Italian and German pronunciation for singing; basics of international phonetic alphabet; no previous background required.

025:116 Diction for Singers II
French and English pronunciation for singing. Prerequisite: 025:115.

025:150 Interpretation of German Art Song

025:151 Interpretation of Non-German Art Song
Art songs in English, French, Italian, Spanish; appropriate diction, style. Prerequisites: 025:115 and 025:116.

025:159 Graduate Diction
Advanced pronunciation of singing languages. Prerequisite: grade of B or higher in undergraduate diction in French, German, and Italian.

Performing Arts Entrepreneurship

Director, Division of Performing Arts: Alan MacVey
Coordinator: David McGraw
Advisor: David McGraw (Theatre Arts)
Undergraduate degree: B.A. in Performing Arts Entrepreneurship
Undergraduate nondegree program: Certificate in Performing Arts Entrepreneurship
Web site: http://www.uiowa.edu/~dpa

Undergraduate Programs

The Division of Performing Arts, in partnership with the John Pappajohn Entrepreneurial Center in the Tippie College of Business, offers the Certificate in Performing Arts Entrepreneurship. The program gives students the opportunity to pursue professional studies in the performing arts, in the framework of a liberal arts education, and to develop the skills required for creating market-based opportunities in the arts.

The Bachelor of Arts major in performing arts entrepreneurship is closing; no new enrollments are being accepted in the major. Students who previously declared the major must fulfill all requirements for the major and the B.A. by July 27, 2012, or they will not be allowed to continue in the major and will need to declare a new program of study. See "Bachelor of Arts" below.

Certificate

The undergraduate Certificate in Performing Arts Entrepreneurship requires a minimum of 29-33 s.h. The program is designed for students of dance, music, and theatre arts who wish to learn about the business of the performing arts and to develop the entrepreneurial skills necessary for promoting their artistic work.

Certificate students take entrepreneurship-related course work in accounting, financial management, and marketing as well as courses focused on arts management and leadership practices in both commercial and nonprofit organizations (20-24 s.h.). They also must complete course work in dance, music, or theatre arts (9 s.h.) and an internship in an arts organization (0 s.h.).

Students are strongly encouraged, but not required, to pursue a major in one of the performing arts.

The certificate requires the following course work. Students may not use a single course to satisfy more than one certificate requirement (e.g., a business course required for the certificate that is cross-listed in dance, music, or theatre arts may not also be counted toward the performing arts course requirement).

PERFORMING ARTS

Certificate students earn 9 s.h. in 100-level courses taken in one of three performing arts units: the Department of Dance, the School of Music, or the Department of Theatre Arts. Many 100-level courses have prerequisites; consult an advisor about course sequencing.

BUSINESS AND ENTREPRENEURSHIP

Students complete one course in each of these areas: accounting, marketing, financial management, new ventures/entrepreneurship, entrepreneurial marketing, e-commerce, arts management, and arts leadership. They also must complete 06T:050 Foundations in Entrepreneurship, an entrepreneurship prerequisite that is offered both on campus and online.

Prerequisite:

06T:050 Foundations in Entrepreneurship 2 s.h.

One of these:

06T:116 Basics of Small Business Marketing 1 s.h.
06M:100 Introduction to Marketing Strategy 3 s.h.
An approved college-level marketing course (transfer courses accepted)

One of these:

01P:185 Grant Writing in the Arts 3 s.h.
06T:133 Entrepreneurial Finance 3 s.h.
One of these:

- 06T:120 Entrepreneurship and Innovation 3 s.h.
- 188:111 New Ventures in the Arts 3 s.h.

All of these:

- 06T:134 Entrepreneurial Marketing 3 s.h.
- 06T:148 E-Commerce Strategies for Entrepreneurs 3 s.h.
- 188:109 Introduction to Arts Management 3 s.h.
- 188:195 Arts Leadership Seminar 3 s.h.

**INTERNSHIP**

Students may complete the required internship (0 s.h.) during any semester in the program. The Pomerantz Career Center coordinates a wide variety of internships; see Career Center Programs (University College) in the Catalog. Students also may choose other internship opportunities. The Iowa Arts Council and the Iowa Cultural Corridor Alliance maintain lists of recommended host organizations.

**Residence in Performing Arts Learning Community**

First- and second-year students studying performing arts entrepreneurship may apply to live in the Performing Arts Living-Learning Community, a coed floor in Currier Hall, across the Iowa River from the fine arts campus. The community includes students from art and art history, dance, film, music, and theatre arts.

**Bachelor of Arts**

The major in performing arts entrepreneurship is closing. The closure was approved by the Board of Regents, State of Iowa, in summer 2008. No new enrollments are being accepted in the major.

Students who previously declared the major in performing arts entrepreneurship must fulfill all requirements for the major and the Bachelor of Arts by July 27, 2012. Students who do not complete the major by this date will not be allowed to continue in the major and will need to declare a new program of study. The requirements for the major are stated below. They are the same as in previous years.

The Bachelor of Arts in performing arts entrepreneurship requires a minimum of 120 s.h., including 53-59 s.h. of work for the major. All students pursuing the major choose a primary area of study in dance, music, or theatre arts. They also choose a secondary area different from their primary area. All students complete three required courses in entrepreneurship, a capstone course, and an internship.

Students must complete the College of Liberal Arts and Sciences General Education Program.

Students may apply a maximum of 24 s.h. earned at other institutions toward the major in performing arts entrepreneurship. In order to be counted toward the major, all transfer course work must be reviewed and approved by the program.

Performing arts entrepreneurship students are advised by the Academic Advising Center until they have earned 24 s.h. Students are then assigned a faculty advisor from the Performing Arts Entrepreneurship Program.

Requirements for the major are as follows.

**PRIMARY AREA**

Students complete the requirements for the primary area of their choosing.

**Dance**

This primary area requires a total of 26 s.h., including at least 12 s.h. earned in University of Iowa courses numbered 137:100 or above. An audition is required; contact the Department of Dance for details.

Before enrolling in a course, students must satisfy the course's prerequisites. For course descriptions, including prerequisites, see the Department of Dance course listing in the Catalog.

One of these:

- 137:034 Beginning/Contact Improvisation 1-2 s.h.
- 137:134 Improvisation I 1-2 s.h.
All of these:

137:050 Dance Production 3 s.h.
137:080 Dance and Society 3 s.h.
Dance technique (any level, from ballet, modern, jazz, or Afro-Cuban drum and dance) 9 s.h.

Dance electives--6 s.h. from these:

137:051/049:045 Production: Run Crew 1-2 s.h.
137:070 Choreography I 2 s.h.
137:071 Choreography II 2 s.h.
137:106 Dance Performance 1 s.h.
137:147/049:108 Dance Kinesiology 3 s.h.
137:149 Honors Studies in Dance arr.
137:181 Dance History 3 s.h.
137:182 The Contemporary Dance Scene 3 s.h.
137:190 Independent Study arr.

Additional dance technique courses (any level, from ballet, modern, jazz, or Afro-Cuban drum and dance) 1-3 s.h.

One of these:

137:147/049:108 Dance Kinesiology 3 s.h.
137:181 Dance History 3 s.h.
137:182 The Contemporary Dance Scene 3 s.h.

Music

This primary area requires a total of 26 s.h. An audition is required. Contact the School of Music for details.

All of these:

025:001 Fundamentals of Music for Majors (unless exempted by proficiency exam) 3 s.h.
025:002 Musicianship and Theory I 4 s.h.
025:003 Musicianship and Theory II 4 s.h.
025:071 Group Instruction in Piano I (unless exempted by proficiency exam) 1 s.h.
025:072 Group Instruction in Piano II (unless exempted by proficiency exam) 1 s.h.

Music history--one of these:

025:103 World Music 3 s.h.
025:104 Music of Latin America and the Caribbean 3 s.h.
025:141 History of Jazz 3 s.h.
025:144 History of Music I 3 s.h.
025:146 History of Music II 3 s.h.
025:178 Music, Culture, and Identity 3 s.h.

All of these:

Applied music for lower-level undergraduates (students must audition to be accepted by a professor--register for 2 s.h. each for two semesters) 4 s.h.
Ensemble participation (placement by audition in choral, orchestra, band, or jazz ensembles) 4 s.h.
025:074 Recital Attendance (two sessions) 2 s.h.

Students who are exempted by proficiency exam from 025:001 Fundamentals of Music for Majors (3 s.h.), 025:071 Group Instruction in Piano I (1 s.h.), or 025:072 Group Instruction in Piano II (1 s.h.) must earn an equal number of semester hours in music electives.

Theatre Arts

This primary area requires a total of 25 s.h.

All of these:

049:025 Acting I 3 s.h.
049:044 Theatre Crafts 3 s.h.
049:060 Playscript Analysis 3 s.h.
049:112 History of Theatre and Drama I  
049:113 History of Theatre and Drama II  

Design—one of these:

049:043 Elements of Design  
049:133 Theatre Design I  
049:134 Scene Design I  
049:135 Costume Design I  
049:136 Lighting Design I  
049:146 Drawing and Rendering for the Theatre

One of these:

049:045 Production: Run Crew  
049:047 Production: Construction

One of these:

049:130 Directing I  
049:172 Senior Seminar  
049:194 Dramaturgy  
A playwriting course (049:063 or 049:165)

One of these:

049:109 Introduction to Arts Management  
049:125 Voice for the Actor  
049:127 Theatre Movement  
049:132 Stage Management  
049:133 Theatre Design I  
049:134 Scene Design I  
049:135 Costume Design I  
049:136 Lighting Design I  
049:140 Sound Design for the Theatre  
049:147 Technical Production I  
049:148 Technical Production: Special Topics

SECONDARY AREA

Students complete the requirements for the secondary area of their choosing.

Dance

This secondary area requires at least 15 s.h. of course work in dance. The following courses are required.

137:034 Beginning/Contact Improvisation  
137:080 Dance and Society  
Dance technique (any level, from ballet, modern, jazz, or Afro-Cuban drum and dance)  
Dance electives

Music

This secondary area requires at least 18 s.h. of course work (15 s.h. for students who are exempted from 025:001 Fundamentals of Music for Majors by proficiency exam). The following courses are required.

All of these:

025:001 Fundamentals of Music for Majors (unless exempted by proficiency exam)  
025:002 Musicianship and Theory I  
025:064 Recital Attendance for Non-Majors (taken twice)  
Ensemble or applied music courses  
Music electives

Music history—one of these:

025:103 World Music
025:104 Music of Latin America and the Caribbean 3 s.h.
025:141 History of Jazz 3 s.h.
025:144 History of Music I 3 s.h.
025:146 History of Music II 3 s.h.
025:178 Music, Culture, and Identity 3 s.h.

Theatre Arts

This secondary area requires at least 15 s.h. of course work in theatre arts, excluding 049:001 Art of the Theatre, 049:002 Theatre and Society: Ancients and Moderns, and 049:003 Theatre and Society: Romantics and Rebels. At least 12 of the 15 s.h. must be earned in University of Iowa courses chosen from the following list.

049:021 Basic Acting II 3 s.h.
049:025 Acting I 3 s.h.
049:043 Elements of Design 3 s.h.
049:044 Theatre Crafts 3 s.h.
049:060 Playscript Analysis 3 s.h.
049:062 Playwriting I 3 s.h.
049:063 Playwriting II 3 s.h.
049:101 Drama in the Classroom 3 s.h.
Courses numbered above 049:101

ENTREPRENEURSHIP STUDIES

Required courses total 9 s.h. Students also must complete 06T:050 Foundations in Entrepreneurship, an entrepreneurship prerequisite that is offered both on campus and online.

Prerequisite:
06T:050 Foundations in Entrepreneurship 2 s.h.

Required courses:
06T:133 Entrepreneurial Finance 3 s.h.
06T:134 Entrepreneurial Marketing 3 s.h.

One of these:
06T:120 Entrepreneurship and Innovation 3 s.h.
06T:125/049:111/145:111/188:111 New Ventures in the Arts 3 s.h.

CAPSTONE COURSE

One of these:
188:161/049:161 The Arts in Performance (or 137:161) 3 s.h.
188:195/049:195 Arts Leadership Seminar (or 145:195) 3 s.h.

INTERNSHIP

409:188 Internship in Performing Arts 0 s.h.

Four-Year Graduation Plan

The Four-Year Graduation Plan is not available to students pursuing the performing arts entrepreneurship major. Many students need an extra semester to complete the internship requirement. But some students may be able to graduate in four years by taking summer course work or a summer internship. Advisors work with students to develop individual graduation plans.

Honors

Students who are members of the University of Iowa Honors Program, have a g.p.a. of at least 3.33 in the major, and have approval from their primary advisor may undertake an honors project. Projects may be analytical, creative, or a combination of the two. They ordinarily require an oral presentation or performance for designated faculty members as well as a research and writing component, which is due upon the project's completion. Performing arts
entrepreneurship majors who are members of the University of Iowa Honors Program may take honors courses in their primary and secondary areas. Courses can be designated honors courses with permission of the faculty member who teaches the course, the department offering the course, and the University of Iowa Honors Program. Honors Program membership requires that students maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University of Iowa Honors Program for more information).

Performing Arts Entrepreneurship Courses

188:001 Cultural Connections
Forum for an interdisciplinary perspective on culture; exposure to all art forms; classtime presentations of live music, dance, and theater performances or rehearsals in conjunction with film and art.

188:080 Dance and Society
Role of dance and other forms of physical culture in nations worldwide, including the United States, Brazil, West Africa, France, Germany; relationships between dance and culture (e.g., function of dance in spiritual, celebratory, social, political contexts) examined through ethnographic techniques; exchange of dance forms and ideas about the body from old to new worlds and back; aesthetic issues related to concert dance (e.g., performance, choreography, spectatorship, criticism, production). GE: Fine Arts, Humanities. Same as 137:080.

188:109 Introduction to Arts Management
Nonprofit performing arts management and administrative principles; practical applications, trends in the field; focus on arts organizations and their key administrative positions. Same as 049:109, 145:109.

188:111 New Ventures in the Arts
Arts administration principles and trends as applied to creation of an arts-related enterprise; case studies; students create business plan for a new arts organization. Duplicates 06J:125 and 06T:120. Prerequisites: 06A:001 or 06T:050 or an approved college-level accounting course, and 06M:100; or graduate standing and consent of instructor. Corequisite: 06T:113. Same as 049:111, 06T:125, 145:111.

188:137 World of the Beatles
How the Beatles' music was influenced by American pop music, the drug culture, and the Avant Garde, nonwestern instruments and philosophy, anti-war sentiments, and world politics, and so forth; Beatlemania’s impact on British and American cultures and its role in opening Eastern Europe to the West. Same as 025:137.

188:156 Stage Makeup
Same as 049:156.

188:161 The Arts in Performance

188:167 Movement for Performers
Movement as support for sound production, artistic expression, and wellness; Bartenieff Fundamentals, Laban Movement Analysis, or principles of the Alexander Technique as methods of organizing and integrating body movement and expanding expressive range; studio course with practice, journal, observations, project applying movement skills to student's area of performance/study. Same as 025:167, 049:105, 137:160.

188:173 Introduction to Afro-Cuban Drumming
Drumming, dance, songs from folkloric and ceremonial Afro-Cuban forms; emphasis on drumming; may include participation in Afro-Cuban drum and dance ensemble. Same as 025:173.

188:174 Introduction to Afro-Cuban Dance
Introduction to the dance, drumming, and songs of the Afro-Cuban folkloric traditions; emphasis on dance. May participate in UI Afro-Cuban Drum and Dance ensemble. Pre- or corequisite: 137:175 or 188:175. Same as 137:174.

188:175 Afro-Cuban Drum and Dance Performance
Dance repertory for the UI Afro-Cuban Drum and Dance Ensemble. Performance pieces based on dance, drumming, songs of the Afro-Cuban folkloric traditions. May participate in UI Afro-Cuban Drum and Dance Ensemble. Prerequisites: audition and 025:173 or 137:174 or 188:173 or 188:174. Same as 137:175.

188:182 The Contemporary Dance Scene

Performing Arts Entrepreneurship
Historical, theoretical, and practical elements of contemporary dance; the term "postmodern" and its associations with dance, performing arts, contemporary culture; relationships between process and product, identity and subjectivity, artistic intent and authorship, meaning and intertextuality; possibility of art as a form of dissent; theory and practice placed in a dialectic; analysis and synthesis of previous research. Same as 137:182.

188:195 Arts Leadership Seminar 3 s.h. Performing arts management and administrative principles, practical applications, trends in arts leadership and advocacy. Prerequisite: (for 049:195) 049:109 or 049:111 or graduate standing in an arts discipline. Same as 049:195, 06T:155, 145:195.

188:202 Theories of Dance and the Body 3 s.h. Theoretical trends in studies of dance and physical bodies; performative and choreographic aspects of being. Same as 137:202.

188:275 Collaborative Performance 1-4 s.h. Collaborative experience with advanced artists from varied disciplines that culminates in a final performance; emphasis on sharing and investigating ideas, artistic intent, personal vision, and creating collaborative projects. Same as 049:275, 137:275.
Philosophies and Ethics of Politics, Law, and Economics

The College of Liberal Arts and Sciences offers an interdisciplinary program that leads to the undergraduate Certificate in Philosophies and Ethics of Politics, Law, and Economics.

The Philosophies and Ethics of Politics, Law, and Economics (PEOPLE) Program is based on the assumption that societies institutionalize values; they guide conduct by regulating opportunities, prescribing behavior, and influencing beliefs and attitudes. The goal of the PEOPLE program is to help students understand and evaluate these complex relationships by examining them from a variety of perspectives.

The PEOPLE program may be especially attractive to students who are planning to attend law school after graduation. Students considering careers in planning, politics, or public administration also may find the PEOPLE program highly useful.

Undergraduates in economics, philosophy, political science, and sociology may discover that they will meet many of the PEOPLE program requirements in completing the requirements for their major or minor. However, a major or minor in one of these disciplines is not a requirement of the program.

Students who complete the PEOPLE program earn a certificate, and the notation "Certificate in the Philosophies and Ethics of Politics, Law, and Economics" appears on their transcripts. The certificate is awarded upon completion of a bachelor's degree. Holders of Iowa bachelor's degrees may return to complete the requirements for a certificate.

Certificate

The Certificate in Philosophies and Ethics of Politics, Law, and Economics requires 36 s.h. The final 18 s.h. used to complete the certificate must be taken at The University of Iowa. Students must maintain a g.p.a. of at least 2.00 in the certificate.

Because of the program's multiple requirements, students are encouraged to begin the program as first-year students or sophomores; however, with careful planning, students who join the program as juniors can complete the requirements by their normal graduation date, especially if they already have taken several courses that satisfy PEOPLE requirements. Prospective certificate students should contact the PEOPLE program's coordinator.

The certificate program consists of two parts: the foundation, made up of six courses (18 s.h.), and the fields, also made up of six courses (18 s.h.). The foundation is the common element in the program. The five fields--economics, law, philosophy, political science, and sociology--provide opportunities for specialization.

FOUNDATION

Students must take the following six courses. The first two (026:036 Principles of Reasoning or 026:103 Introduction to Symbolic Logic, and 026:001 Problems of Moral Reasoning or 026:102 Introduction to Ethics) are best taken during the first or sophomore year.

One of these:
026:036 Principles of Reasoning 3 s.h.
026:103 Introduction to Symbolic Logic 3 s.h.

One of these:
026:001 Problems of Moral Reasoning 3 s.h.
026:102 Introduction to Ethics 3 s.h.

One of these:
026:034 Philosophy and the Just Society 3 s.h.
026:132 Introduction to Political Philosophy 3 s.h.
026:135 Philosophy of Law 3 s.h.

One of these:
030:020 Introduction to Politics 3 s.h.
030:030 Introduction to Political Thought and Political Action 3 s.h.
030:050 Introduction to Political Behavior 3 s.h.
030:070 Introduction to Political Communication 3 s.h.

One of these:
06E:001 Principles of Microeconomics 4 s.h.
06E:002 Principles of Macroeconomics 4 s.h.

One of these:
026:149 Undergraduate Seminar in Philosophy (requires consent of PEOPLE program director) 3 s.h.
033:153 Hard Cases: Science Policy and Values 3 s.h.
033:175/01H:182/024:161/091:192 Art, Law, and Ethics 3 s.h.

FIELDS

Students must choose two of the following fields and complete three courses in each.

Economics

One of these:
06E:104 Microeconomic Theory (if 06E:001 was taken for foundation requirement) 3 s.h.
06E:105 Macroeconomics (if 06E:002 was taken for foundation requirement) 3 s.h.

Two of these:
06E:119 Policy Analysis 3 s.h.
06E:125 Global Economics and Business 3 s.h.
06E:172 Law and Economics (cannot be used to satisfy both economics and law field requirements) 3 s.h.
06E:176 Public Sector Economics 3 s.h.
06E:179 History of Economic Thought 3 s.h.

Philosophy

Three of these:
026:102 Introduction to Ethics (if not taken for foundation requirement) 3 s.h.
026:104 Introduction to Philosophy of Science 3 s.h.
026:132 Introduction to Political Philosophy (if not taken for foundation requirement) 3 s.h.
026:133 Philosophy of History 3 s.h.
026:135 Philosophy of Law (if not taken for foundation requirement) 3 s.h.
026:180 Analytic Ethics 3 s.h.
026:182 History of Ethics 3 s.h.
026:185 Political Philosophy 3 s.h.
026:196 Philosophy of the Human Sciences 3 s.h.

Political Science

One of these:
030:116 American Constitutional Law and Politics 3 s.h.
030:118 American Political Development 3 s.h.
030:119 Problems in American Politics 3 s.h.

One of these:
030:132 Modern Political Theory 3 s.h.
030:133 Postmodern Political Theory 3 s.h.
030:138 Current Political Theory 3 s.h.

One of these:
030:126 American Public Policy 3 s.h.
030:136 Strategy in Politics 3 s.h.
030:152 The Legislative Process 3 s.h.
030:153 The Judicial Process 3 s.h.

Law

One of these:
026:135 Philosophy of Law (if not taken for foundation or another field requirement) 3 s.h.
144:143/091:288 Jurisprudence 3 s.h.

Two of these:
06E:172 Law and Economics (if not taken for economics field requirement) 3 s.h.
030:116 American Constitutional Law and Politics (if not taken for political science field requirement) 3 s.h.
091:193 Human Rights in the World Community 3 s.h.
091:195 Introduction to Public International Law 3 s.h.
144:142/091:224 Comparative Law 3 s.h.

Semester hours earned in PEOPLE courses taught by College of Law faculty members normally do not count toward requirements for a law degree.

Sociology

One of these:
034:001 Introduction to Sociology Principles 3 s.h.
034:009 Sociological Theory 3 s.h.

Two of these:
034:040 Criminology 3 s.h.
034:066 Social Inequality 3 s.h.
034:141 Juvenile Delinquency 3 s.h.
034:149 Sociology of Criminal Punishment 3 s.h.
034:150 Political Sociology 3 s.h.
034:182 Sociology of Law 3 s.h.

Philosophies and Ethics of Politics, Law, and Economics Courses

144:142 Comparative Law 2-3 s.h.
Comparative study of origins, development, and principal features of the world's main legal systems; common and civil law traditions; historical development of the main legal systems, their sources, ideologies, techniques; subjects important to international legal practice (e.g., international judicial assistance, application of foreign law in American courts; in-depth study of modern legal systems of the United States, Britain, France, Germany, Japan, Russia; introduction to other legal traditions, including preliterate tribal law, traditional Chinese and Islamic law. Same as 091:224.

144:143 Jurisprudence 2-3 s.h.
Selected legal philosophies, with emphasis on legal positivism and natural law; relationship between law and morality. Same as 091:288.
Philosophy

Chair: Diane Jeske
Professors: James Duerlinger, Richard Fumerton, Gregory Landini, David Stern
Professors emeriti: Laird Addis, Panayot Butchvarov, Phillip Cummins
Associate professors: David Cunning, Evan Fales, Diane Jeske
Assistant professors: Carrie Figdor, Ali Hasan
Undergraduate degree: B.A. in Philosophy
Undergraduate nondegree program: Minor in Philosophy
Graduate degrees: M.A., Ph.D. in Philosophy
Web site: http://www.uiowa.edu/~phil

Undergraduate Programs

The department offers a Bachelor of Arts and a minor in philosophy.

Undergraduate courses in philosophy are designed to impart knowledge of fundamental issues and main developments in philosophy while strengthening logical and analytic skills. A major in philosophy develops abilities useful for graduate or professional work in many fields—law, for example—and for any situation requiring clear, systematic thinking. A graduate degree is necessary for college teaching in philosophy.

Bachelor of Arts

The Bachelor of Arts in philosophy requires a minimum of 120 s.h., including at least 27 s.h. of work for the major. Courses numbered 026:061 Introduction to Philosophy through 026:198 Topics in Philosophy count toward the major. Students must complete the College of Liberal Arts and Sciences General Education Program.

All students complete the following courses.

026:103 Introduction to Symbolic Logic 3 s.h.
026:111 Ancient Philosophy 3 s.h.

One of these:

026:114 Seventeenth-Century Philosophy 3 s.h.
026:115 Modern Philosophy 3 s.h.
026:116 Eighteenth-Century Philosophy 3 s.h.

The final 12 s.h. in philosophy courses used to complete the major must be earned at The University of Iowa. The department may make exceptions for students who pursue approved study abroad during their senior year.

In addition to prerequisites listed for individual courses, considerations such as the order in which historical courses are taken are relevant to the effective structuring of the undergraduate major in philosophy. A student's department advisor or the director of undergraduate studies can provide more information.

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan.

Before the third semester begins: at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: at least one course in the major and at least one-half of the semester hours required for graduation

Before the seventh semester begins: at least five courses in the major and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: at least six courses in the major

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Honors

The department administers an honors program for undergraduate students of superior ability. In order to be admitted to the honors program in philosophy, a student must be a member of the University of Iowa Honors Program, which requires that students maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University of Iowa
Honors Program for more information), and must have taken and passed at least three philosophy courses for the major. In order to graduate with honors in philosophy, a student must complete the regular requirements for an undergraduate major in philosophy with a g.p.a. of at least 3.40 in philosophy courses and must write an acceptable honors thesis on a significant topic in philosophy that interests him or her. Contact the honors advisor for more information.

Minor

The minor in philosophy requires a minimum of 15 s.h. in philosophy courses, including 12 s.h. in 100-level courses offered by the Department of Philosophy at The University of Iowa. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass. Contact the undergraduate studies director for more information.

Graduate Programs

The department offers a Master of Arts and a Doctor of Philosophy in philosophy. Admission is granted only for the Ph.D. program. The M.A. is not offered as a terminal degree; it is awarded to students as they work successfully toward the Ph.D.

The graduate program is designed to train teachers and scholars in philosophy. The main areas in the graduate curriculum are metaphysics, epistemology, history of philosophy, logic, philosophy of science, and value theory. Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

Master of Arts

The Master of Arts in philosophy requires a minimum of 30 s.h. of graduate credit and is offered without thesis. The M.A. is not offered as a terminal degree; it is awarded to students as they work successfully toward the Ph.D.

Requirements include courses in metaphysics, epistemology, history of philosophy, ethics, logic, philosophy of science, and value theory. There is no foreign language requirement. Students must take an oral final examination. Contact the graduate studies director for more information.

Joint M.A./J.D.

The Department of Philosophy and the College of Law offer a joint Juris Doctor/Master of Arts. Students in the joint J.D./M.A. program may count 12 s.h. earned in the joint program toward both degrees. Students must earn 18 of the 30 s.h. required for the M.A. in graduate-level philosophy courses (the usual requirement is 24 s.h.). They also must earn a minimum of 36 s.h. in undergraduate and graduate philosophy courses combined (the usual requirement is 42 s.h.). Separate application to each degree program is required. Applicants must be admitted to both programs before they can be admitted to the joint degree program.

See Juris Doctor and Joint J.D./Graduate Degrees (College of Law) in the Catalog.

Doctor of Philosophy

The Ph.D. requires a minimum of 72 s.h. of graduate credit. Candidacy for the doctoral program is determined by a formal vote of the entire faculty of the Department of Philosophy, usually after the student has completed three semesters of graduate study in residence.

Requirements include courses in metaphysics, epistemology, history of philosophy, logic, philosophy of science, and value theory. Students are required to take a comprehensive examination, including both written and oral components, that covers their area of specialization. Upon successfully completing the exam, students begin work on a prospectus for their dissertation. There is no foreign language requirement. Contact the graduate studies director for more information.

Philosophy Courses

For more detailed descriptions of undergraduate and graduate courses offered during a given semester or summer session, visit the University’s ISIS web site before early registration.

For Undergraduates
The following courses are open only to undergraduates.

026:001 **Problems of Moral Reasoning**  
3 s.h.  
Ethical thought, with emphasis on its implications for contemporary moral controversies.

026:029 **First-Year Seminar: Paradoxes**  
1 s.h.  
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities, field trips). Prerequisite: first- or second-semester standing.

026:033 **Philosophy and Human Nature**  
3 s.h.  
Human nature and its relation to society, knowledge, religion, science, and freedom; philosophical and historical examination. GE: Historical Perspectives.

026:034 **Philosophy and the Just Society**  
3 s.h.  
The nature of individuals and governments and the obligations they have to each other; philosophical and historical examination of theories from Plato through the 19th century. GE: Historical Perspectives.

026:036 **Principles of Reasoning**  
3 s.h.  
Elementary logic and its applications. GE: Quantitative or Formal Reasoning.

026:061 **Introduction to Philosophy**  
3 s.h.  
Issues and arguments; topics may include rational belief, evidence, the self, causation, and the presuppositions of religion. GE: Humanities.

---

**For Undergraduate and Graduate Students**

The following courses are closed to first-year students.

026:102 **Introduction to Ethics**  
3 s.h.  
Analytical and historical introduction to ethical theories about issues such as the nature of goodness, the nature of right conduct. GE: Humanities.

026:103 **Introduction to Symbolic Logic**  
3 s.h.  
Main ideas and techniques of formal deduction.

026:104 **Introduction to Philosophy of Science**  
3 s.h.  
Fundamental issues in scientific method, inductive reasoning, explanation, the distinctive nature of science.

026:111 **Ancient Philosophy**  
3 s.h.  
Main trends and major figures, such as Plato and Aristotle.

026:112 **Medieval Philosophy**  
3 s.h.  
Main trends and major figures, such as Augustine and Aquinas. Same as 16E:114.

026:114 **Seventeenth-Century Philosophy**  
3 s.h.  
Main trends, central arguments, major positions; Bacon and Descartes to Leibniz and Locke.

026:115 **Modern Philosophy**  
3 s.h.  
Main trends and major figures from Descartes to Kant.

026:116 **Eighteenth-Century Philosophy**  
3 s.h.  
Main trends, central arguments, major positions; Berkeley to Kant.

026:118 **Twentieth-Century Philosophy**  
3 s.h.  
Main trends and major figures.

026:131 **Aesthetics**  
3 s.h.  
Major problems in philosophy of the arts.
026:132 Introduction to Political Philosophy
Major problems.

026:133 Philosophy of History
Major problems: objectivity, historiographic methods and theory of interpretation, nature of historical explanations, reduction.

026:134 Philosophy of Religion
Medieval to contemporary treatments of central issues: the nature of faith; the existence and nature of God; religion and ethics; the interpretation of religious texts. Same as 032:146.

026:135 Philosophy of Law
Introduction; the nature of law, legal authority, legal reasoning; issues in criminal law, such as punishment, responsibility; issues in property law; constitutional law. Prerequisite: 026:034 or 026:102 or 026:132 or consent of instructor.

026:138 Philosophical Problems of Artificial Intelligence
Major issues and controversies.

026:141 Existentialist Philosophy
Main ideas of existentialism; emphasis on Kierkegaard, Nietzsche, Heidegger, Sartre.

026:143 Philosophy East and West
Comparative analysis of ideas in Eastern and Western philosophy.

026:144 Indian Philosophy
Main ideas, major texts. Same as 032:174.

026:145 Buddhist Philosophy
Introduction to main ideas. Same as 032:175.

026:147 Philosophical Issues
A philosophical topic or controversy.

026:148 Readings in Philosophy
Prerequisite: honors standing.

026:149 Undergraduate Seminar in Philosophy
Selected problems. Prerequisite: consent of instructor.

026:150 Topics in Indian Philosophy
A single Indian philosopher or philosophical problem. Prerequisite: consent of instructor.

026:151 Topics in Ancient Philosophy
A single ancient philosopher or philosophical problem. Prerequisite: consent of instructor.

026:152 Plato
Main ideas, major texts. Prerequisite: consent of instructor.

026:153 Aristotle
Main ideas, major texts. Prerequisite: consent of instructor.

026:158 Descartes
Major works, such as the *Discourse on Method*, as well as lesser known works, such as *The World*. Prerequisite: consent of instructor.

026:160 Spinoza and Leibniz
Main ideas, major texts. Prerequisite: consent of instructor.
026:163 Berkeley and Hume
Comparative and critical examination of metaphysical and epistemological views of 18th-century empiricists George Berkeley and David Hume; theory of ideas, perception, skepticism, limits of knowledge, scientific and philosophical method, role of God in Berkeley’s and Hume’s philosophical systems.

026:166 Kant
Main ideas, major texts of Kant’s metaphysics and epistemology. Prerequisite: consent of instructor.

026:173 Heidegger
Main ideas and major texts of Heidegger; early and later periods, particular attention to Being and Time; focus on Heidegger’s analyses of being and being-in-the-world. Prerequisite: consent of instructor.

026:174 Sartre
Phenomenological and existentialist works. Prerequisite: consent of instructor.

026:176 Frege and Russell
Main ideas, major texts. Prerequisite: consent of instructor.

026:177 Wittgenstein
Main ideas, major texts. Prerequisite: consent of instructor.

026:179 Quine
Major ideas, major texts. Prerequisite: consent of instructor.

026:180 Analytic Ethics
Topics in contemporary ethics. Prerequisite: consent of instructor.

026:182 History of Ethics
Selected topics in the history of philosophical ethics. Prerequisite: consent of instructor.

026:184 Russian Thinkers
Same as 041:189, 048:189.

026:185 Political Philosophy
Selected topics. Prerequisite: consent of instructor.

026:186 Metaphysics
Fundamental topics; major works, both classical and contemporary. Prerequisite: consent of instructor.

026:187 Epistemology
Contemporary topics. Prerequisite: consent of instructor.

026:188 Philosophy of Mind
Contemporary topics. Prerequisite: consent of instructor.

026:189 Philosophy of Language
Contemporary topics. Prerequisite: consent of instructor. Same as 103:163.

026:190 Philosophical Foundations of Cognitive Science
Processes leading from stimulus to behavioral response in cognitive or mentalistic terms; motivations for cognitive explanations, nature of cognitive architecture, problem of mental representation; additional topics may include individuation of inputs and outputs, role of consciousness in cognition, relation between language and thought, nature of concepts. Prerequisite: consent of instructor.

026:191 Mathematical Logic
Presentation of central metatheorems relating to decidability, completeness, model theory; second-order logic. Prerequisite: consent of instructor.

026:192 Modal Logic

Formal techniques developed and applied to problems in analysis and modal semantics; related philosophical issues. Prerequisite: consent of instructor.

**026:194 Philosophy of Science** 3 s.h.
Central topics--for example, scientific explanation, confirmation, the meaning of scientific theories; survey of major 20th-century developments in these areas. Prerequisite: consent of instructor.

**026:196 Philosophy of the Human Sciences** 3 s.h.
Explanation and understanding, theories and reduction, values and ideology, freedom and causality. Prerequisite: consent of instructor.

**026:198 Topics in Philosophy** 3 s.h.
A single philosopher or philosophical problem. Prerequisite: consent of instructor.

**Primarily for Graduate Students**

All of the following courses are repeatable.

**026:220 Seminar: Philosophy of Language** 3 s.h.

**026:221 Seminar: Metaphysics** 3 s.h.

**026:222 Seminar: Epistemology** 3 s.h.

**026:223 Seminar: Philosophical Analysis** 3 s.h.

**026:224 Seminar: Philosophy of Science** 3 s.h.

**026:225 Seminar: Philosophy of Religion** 3 s.h.

**026:226 Seminar: Ethics** 3 s.h.

**026:227 Seminar: Ancient Philosophy** 3 s.h.

**026:229 Seminar: Modern Philosophy** 3 s.h.

**026:245 Research: Value Theory** arr.

**026:247 Research: Metaphysics and Epistemology** arr.

**026:249 Research: Logic and Philosophy of Science** arr.

**026:251 Research: History of Philosophy** arr.

**026:253 Thesis** arr.
Physics and Astronomy

Chair: Mary Hall Reno

Professors: David R. Andersen (Electrical and Computer Engineering/Physics and Astronomy), Thomas F. Boggess (Physics and Astronomy/Electrical and Computer Engineering), Michael E. Flatté, John A. Goree, Donald A. Gurnett (Carver/James A. Van Allen Professor of Physics), Richard Hichwa (Radiology/Physics and Astronomy/Materials), Karl E. Lonngren (Electrical and Computer Engineering/Physics and Astronomy), Mark T. Madsen (Radiology/Physics and Astronomy), Usha Mallik, Robert L. Merlino, Yannick Meurice, Robert L. Mutel, Yasar Onel, Wayne N. Polyzou, Mary Hall Reno, Vincent G.J. Rodgers, John W. Schweitzer, Jack D. Scudder, Frederick N. Skiff, Arthur L. Smirl (Physics and Astronomy/Electrical and Computer Engineering, Lowell Battershell Chair in Laser Engineering), Steven R. Spangler

Associate professors: Kenneth G. Gayley, Jane M. Nachtman, Charles R. Newsom, John P. Prineas, Markus Wohlgenannt

Assistant professors: Gregory Howes, Cornelia C. Lang, Randall McEntaffer, Craig Pryor

Undergraduate degrees: B.A., B.S. in Physics, Astronomy; B.S. in Applied Physics

Undergraduate nondegree programs: Minor in Physics, Astronomy

Graduate degrees: M.S. in Physics, Astronomy; Ph.D. in Physics (including specialization in Astronomy)

Web site: http://www.physics.uiowa.edu

The Department of Physics and Astronomy provides comprehensive and rigorous instruction in all basic aspects of its subjects. It also provides research facilities and guidance in selected specialties for advanced individual scholarly work.

Total departmental enrollment is approximately 1,700 each semester of the academic year and 150 during the summer session. All courses and advanced laboratories are taught by faculty members. Faculty members also supervise associated laboratories taught by graduate students.

Beyond the elementary level, typical course enrollment is 15-20; there is ample opportunity for individual work. Special introductory courses are offered for majors in physics and astronomy and for others with special interest in these subjects. There are about 80 undergraduate majors, half of whom are honors students, and 60 graduate students in physics or astronomy.

About 70 percent of graduates with bachelor's degrees pursue advanced study. Others find positions in government and industrial laboratories and in secondary school teaching. Some use their training as the basis for careers in other fields.

Graduates with an M.S. or Ph.D. in physics or astronomy have opportunities for employment in universities, colleges, and research laboratories in government and industry.

Undergraduate Programs

The department offers a Bachelor of Science, a Bachelor of Arts, and an undergraduate minor in physics and in astronomy. It also offers a double major in physics and astronomy and a Bachelor of Science in applied physics.

Bachelor of Science in Physics

The Bachelor of Science in physics requires a minimum of 120 s.h., including 60 s.h. of work for the major. It provides preparation for careers in industry, employment in research laboratories, and graduate study in physics and related sciences.

The B.S. major in physics requires the following courses or their equivalents. Students satisfy the following mathematics and laboratory requirements as well as the "Other Required Courses." The department encourages students to do additional work. Students also must complete the College of Liberal Arts and Sciences General Education Program.

MATHEMATICS

22M:025-22M:026 Calculus I-II 8 s.h.
22M:027 Introduction to Linear Algebra 4 s.h.
22M:028 Calculus III 4 s.h.

LABORATORY

029:132 Intermediate Laboratory 3 s.h.

One of these:

029:128 Electronics 4 s.h.
029:133 Advanced Laboratory 3 s.h.
Students who choose 029:128 Electronics as one of their two required laboratory courses are advised to take it before they take 029:132 Intermediate Laboratory.

OTHER REQUIRED COURSES

029:027-029:028 Physics I-II 8 s.h.
029:029-029:030 Physics III-IV 8 s.h.
029:115 Intermediate Mechanics 3 s.h.
029:118 Statistical Physics 3 s.h.
029:129-029:130 Electricity and Magnetism I-II 6 s.h.
029:140-029:141 Introduction to Quantum Mechanics I-II 6 s.h.

Two of these:

029:119 Introduction to Astrophysics I 3 s.h.
029:120 Introduction to Astrophysics II 3 s.h.
029:128 Electronics (may not be repeated) 4 s.h.
029:133 Advanced Laboratory 3 s.h.
029:171-029:172 Mathematical Methods of Physics I-II 6 s.h.
029:180 Introductory Optics 3 s.h.
029:182 Electro Optics 3 s.h.
029:184 Optical Signal Processing 3 s.h.
029:186 Radio Astronomy 3 s.h.
029:192 Elementary Particles and Nuclear Physics 3 s.h.
029:193 Introductory Solid State Physics 3 s.h.
029:194 Plasma Physics I 3 s.h.
029:195 Plasma Physics II 3 s.h.
029:196 Computational Physics 3 s.h.

Undergraduate majors who plan to pursue graduate study are advised to go as far as they can beyond the minimum requirements listed above, including further work in mathematics. In planning this work, they should be guided by the College of Liberal Arts and Sciences maximum hours rule: Students earning a B.A. or B.S. may apply a maximum of 50 s.h. earned in one department to the minimum 120 s.h. required for graduation, whether or not the course work is accepted toward requirements for the major; students who earn more than 50 s.h. from one department may use the additional semester hours to satisfy requirements for the major (if the department accepts them), and the grades they earn become part of their grade-point average; but they cannot apply the additional semester hours to the minimum 120 s.h. required for graduation.

Students earning a B.S. with a double major in physics and astronomy may count more than 50 s.h. earned in the Department of Physics and Astronomy to the 120 s.h. required for graduation, but they must earn at least 56 s.h. in course work outside the department in order to graduate.

Bachelor of Arts in Physics

The Bachelor of Arts in physics requires a minimum of 120 s.h., including 48 s.h. of work for the major. It is designed for students who wish to gain knowledge of physics but do not plan a research-oriented career in physics. The program is appropriate for those planning careers in medicine, law, science-related administration, business, technical writing, or secondary-school science teaching; see Science Education (College of Liberal Arts and Sciences) in the Catalog.

The B.A. requires fewer physics courses than the B.S. and provides for a wider choice of electives.

The B.A. major requires the following courses or their equivalents. The department encourages students to do additional work. Students also must complete the College of Liberal Arts and Sciences General Education Program.

22M:025-22M:026 Calculus I-II 8 s.h.
029:027-029:028 Physics I-II 8 s.h.
029:029-029:030 Physics III-IV 8 s.h.
029:115 Intermediate Mechanics 3 s.h.
029:118 Statistical Physics 3 s.h.
029:132 Intermediate Laboratory 3 s.h.
One of these:

029:128 Electronics 4 s.h.
029:129 Electricity and Magnetism I 3 s.h.

Additional science course work in a thematic area as approved by the student's advisor or the course work required for teacher licensure 12 s.h.

Students may earn a B.A. with a double major in the department; see "B.S. or B.A. with Double Major in Physics and Astronomy" below.

**Bachelor of Science in Applied Physics**

The Bachelor of Science in applied physics requires a minimum of 120 s.h., including 60-83 s.h. of work for the major. It is intended primarily for students interested in a broad program of study in physics combined with a significant concentration of courses in an applied field that has immediate application to industry. The degree provides a foundation for a wide range of employment opportunities in high-technology industries, including research and development, product design and testing, sales, and quality control. It also is designed to include exposure to physics sufficient to allow the student to continue with graduate studies in either physics or astronomy.

The program offers four areas of concentration: optics, solid-state electronics, computer science, and medical physics. A student also may design a customized concentration area in close consultation with his or her advisor, and with departmental approval.

An essential component of each concentration is successful completion of a one-semester industrial internship or practicum experience in a research laboratory (an applied physics thesis is required for the latter option). This requirement may result in the need for a ninth semester to fulfill all requirements.

Because of this, the Four-Year Graduation Plan is not available for the B.S. in applied physics. Well-prepared students will be able to complete the degree in four years. Students should work closely with their advisors on a graduation plan.

The B.S. in applied physics requires the following courses. Students are encouraged to take additional course work. Advisors can suggest electives that will enrich programs and help students prepare for graduate work. Students also must complete the College of Liberal Arts and Sciences General Education Program.

**COMMON REQUIREMENTS**

In addition to satisfying mathematics requirements (see listings under Bachelor of Science in Physics), students must successfully complete the following courses or their equivalents.

029:027-029:028 Physics I-II 8 s.h.
029:029-029:030 Physics III-IV 8 s.h.
029:115 Intermediate Mechanics 3 s.h.
029:129 Electricity and Magnetism I 3 s.h.
029:130 Electricity and Magnetism II 3 s.h.

One of these:

22C:016 Computer Science I: Fundamentals 4 s.h.
22C:021 Computer Science II: Data Structures 4 s.h.
029:118 Statistical Physics 3 s.h.
029:128 Electronics 4 s.h.
029:130 Electricity and Magnetism II 3 s.h.
029:132 Intermediate Laboratory 3 s.h.

**COMPUTER SCIENCE CONCENTRATION**

22C:022 Object-Oriented Software Development 4 s.h.
22C:031 Algorithms 3 s.h.
22C:060 Computer Organization 3 s.h.
Two additional 100-level computer science courses

**OPTICS CONCENTRATION**

Two additional advanced biology courses

**Bachelor of Science in Astronomy**

The Bachelor of Science in astronomy requires a minimum of 120 s.h., including 64 s.h. of work for the major. It provides a balanced and integrated program of astronomy, mathematics, and physics courses that prepare students for advanced study in astronomy or astrophysics. It also serves as an interesting choice of major for a liberal arts education.

The B.S. in astronomy requires the following courses or their equivalents. Students also must complete the College of Liberal Arts and Sciences General Education Program.

**MATHEMATICS**

- 22M:025-22M:026 Calculus I-II 8 s.h.
- 22M:027 Introduction to Linear Algebra 4 s.h.
- 22M:028 Calculus III 4 s.h.

**OTHER REQUIRED COURSES**

- 029:027-029:028 Physics I-II 8 s.h.
- 029:029-029:030 Physics III-IV 8 s.h.
- 029:061-029:062 General Astronomy I-II 8 s.h.
- 029:115 Intermediate Mechanics 3 s.h.
- 029:119-029:120 Introduction to Astrophysics I-II (classes are offered alternate years, students are responsible for registering when the class is available) 6 s.h.
- 029:129-029:130 Electricity and Magnetism I-II 6 s.h.
- 029:137 Astronomical Laboratory (classes are offered alternate years, students are responsible for registering when the class is available) 3 s.h.
- 029:140 Introduction to Quantum Mechanics I 3 s.h.

One of these:

- 029:128 Electronics 4 s.h.
- 029:132 Intermediate Laboratory 3 s.h.

One of these:

- 029:141 Introduction to Quantum Mechanics II 3 s.h.
- 029:194 Plasma Physics I 3 s.h.

Undergraduate majors who plan to pursue graduate study are advised to go as far as they can beyond the minimum requirements listed above, by taking one or more of the courses listed below. In planning this work, they should be guided by the College of Liberal Arts and Sciences maximum hours rule: Students earning a B.A. or B.S. may apply a maximum of 50 s.h. earned in one department to the minimum 120 s.h. required for graduation, whether or not the course work is accepted toward requirements for the major; students who earn more than 50 s.h. from one department may use the additional semester hours to satisfy requirements for the major (if the department accepts them), and the grades they earn become part of their grade-point average; but they cannot apply the additional semester hours to the minimum 120 s.h. required for graduation.

Students earning a B.S. with a double major in physics and astronomy may count more than 50 s.h. earned in the Department of Physics and Astronomy to the 120 s.h. required for graduation, but they must earn at least 56 s.h. in course work outside the department in order to graduate.

- 029:118 Statistical Physics 3 s.h.
- 029:141 Introduction to Quantum Mechanics II 3 s.h.
- 029:171-029:172 Mathematical Methods of Physics I-II 6 s.h.
- 029:180 Introductory Optics 3 s.h.
- 029:186 Radio Astronomy 3 s.h.
Bachelor of Arts in Astronomy

The Bachelor of Arts in astronomy requires a minimum of 120 s.h., including 52 s.h. of work for the major. It is designed for students who wish to gain considerable knowledge of astronomy but who do not plan a research-oriented career in the field. The B.A. is appropriate for those planning careers in secondary school science teaching or science-related administration; see Science Education (College of Liberal Arts and Sciences) in the Catalog. It also is appropriate for those preparing for professional school. The B.A. requires fewer physics and mathematics courses than the B.S., and thus provides for a wider choice of electives.

The B.A. in astronomy requires the following courses or their equivalents. Students also must complete the College of Liberal Arts and Sciences General Education Program.

- 22M:025-22M:026 Calculus I-II 8 s.h.
- 029:027-029:028 Physics I-II 8 s.h.
- 029:029-029:030 Physics III-IV 8 s.h.
- 029:061-029:062 General Astronomy I-II 8 s.h.
- 029:115 Intermediate Mechanics 3 s.h.
- 029:119-029:120 Introduction to Astrophysics I-II 6 s.h.
- 029:132 Intermediate Laboratory 3 s.h.
- 029:137 Astronomical Laboratory 3 s.h.

One of these:

- 029:118 Statistical Physics 3 s.h.
- 029:180 Introductory Optics 3 s.h.

One of these:

- 029:128 Electronics 4 s.h.
- 029:129 Electricity and Magnetism I (requires vector calculus as prerequisite) 3 s.h.

Students may earn a B.A. with a double major in the department; see "B.S. or B.A. with Double Major in Physics and Astronomy" below.

B.S. or B.A. with Double Major in Physics and Astronomy

Students working toward a Bachelor of Science or Bachelor of Arts with a double major in physics and astronomy must complete all requirements for both majors and must earn a minimum of 56 s.h. outside the Department of Physics and Astronomy in order to graduate. Students interested in earning a double major should consult with their advisors. See "Earning a Degree" in the College of Liberal Arts and Sciences Student Academic Handbook.

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

B.A. in Astronomy

Before the third semester begins: math through calculus I and II, physics I and II, and at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: physics III and IV, at least one more course in the major, and at least one-half of the semester hours required for graduation

Before the seventh semester begins: three more courses in the major and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: nine courses in the major

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education
courses, and a sufficient number of semester hours to graduate

**B.S. in Astronomy**

**Before the third semester begins:** calculus I and II, physics II, and at least one-quarter of the semester hours required for graduation

**Before the fifth semester begins:** math through vector calculus, physics III and IV, linear algebra, two other courses in the major, and at least one-half of the semester hours required for graduation

**Before the seventh semester begins:** four more courses in the major and at least three-quarters of the semester hours required for graduation

**Before the eighth semester begins:** three more courses in the major

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

**B.A. and B.S. in Physics**

**Before the third semester begins:** calculus II, physics II, and at least one-quarter of the semester hours required for graduation

**Before the fifth semester begins:** physics III and IV, introduction to linear algebra, calculus III, up to two more courses in the major, and at least one-half of the semester hours required for graduation

**Before the seventh semester begins:** two to four more courses in the major and at least three-quarters of the semester hours required for graduation

**Before the eighth semester begins:** two or three more courses in the major

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

**Honors**

Junior and senior physics and astronomy majors who are members of the University of Iowa Honors Program may take 6-8 s.h. of 029:099 Undergraduate Research and conduct an investigation with the guidance of a faculty member as part of their programs for the B.A. or B.S. with honors in physics, applied physics, or astronomy. They must present a written research report (honors thesis) and describe the results of the research at a departmental seminar.

Membership in the University of Iowa Honors Program requires that students maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University of Iowa Honors Program for more information).

**Minor in Physics**

The minor in physics requires a minimum of 15 s.h. in physics, including 12 s.h. taken at The University of Iowa, chosen from 029:029 Physics III, 029:030 Physics IV, and 100-level physics courses. Students must maintain a g.p.a. of at least 2.00 for all work in the minor. Course work in the minor may not be taken pass/nonpass. Before enrolling in 029:029 Physics III students must complete that course’s prerequisites (029:027 Physics I and 029:028 Physics II, or 029:081 Introductory Physics I and 029:082 Introductory Physics II).

There is no minor offered in applied physics.

**Minor in Astronomy**

The minor in astronomy requires a minimum of 15 s.h. in astronomy and physics courses, including 12 s.h. of upper-level course work and 12 s.h. taken at The University of Iowa. Students must maintain a g.p.a. of at least 2.00 for all work in the minor. Course work in the minor may not be taken pass/nonpass.

The upper-level course work must include 6 s.h. chosen from 029:119 Introduction to Astrophysics I, 029:120 Introduction to Astrophysics II, and 029:137 Astronomical Laboratory. Remaining work may be chosen from any 100-level astronomy or physics courses.

**Graduate Programs**

The department offers a Master of Science and a Doctor of Philosophy in physics, and a Master of Science in astronomy. Students who wish to pursue a program in astronomy beyond the M.S. may qualify for a Ph.D. in physics with a specialization and dissertation in astronomy or astrophysics. An M.S. is not prerequisite to a Ph.D.
All graduate students who intend to pursue a Ph.D. in physics must pass the qualifying exam (see "Doctor of Philosophy in Physics").

Each entering graduate student is assigned a faculty advisor, who assists in preparing a plan of study and in guiding the student's progress.

The Department of Physics and Astronomy participates in an interdisciplinary doctoral program, the Program in Applied Mathematical and Computational Sciences (see Graduate College in the Catalog).

**Master of Science in Physics**

The Master of Science in physics requires a minimum of 30 s.h. of graduate credit. It is offered with thesis, or critical essay, or by examination. The M.S. with thesis requires a thesis based on an original experimental or theoretical investigation by the student. The M.S. with critical essay requires a critical essay on the literature of a particular area of physics.

The M.S. may be a terminal degree or a step toward a Ph.D. In either case, the final examination is oral, conducted by a committee of three faculty members.

Students in the physics M.S. with thesis program earn the required 30 s.h. of graduate credit in courses numbered 170 or above, with at least 15 s.h. at the 200 level, a g.p.a. of at least 3.00, and a thesis based on an original experimental or theoretical investigation by the student. Students may earn a maximum of 6 s.h. in 029:220 Individual Critical Study or 029:281 Research: Physics. Up to one-third of the graduate program may be taken in related scientific fields other than physics and mathematics (e.g., chemistry, astronomy, geology, engineering).

Students in the physics M.S. with critical essay program earn the required 30 s.h. of graduate credit in courses numbered 170 or above, with at least 15 s.h. at the 200 level, a g.p.a. of at least 3.00, an independent study of the literature on a chosen topic, and preparation of a critical essay on that topic. Students may earn a maximum of 4 s.h. in 029:220 Individual Critical Study or 029:281 Research: Physics. Up to one-third of the graduate program may be taken in related scientific fields other than physics and mathematics (e.g., chemistry, astronomy, geology, engineering).

Students in the physics M.S. by examination program earn the required 30 s.h. of graduate credit with 18 s.h. in the core graduate courses 029:205 Classical Mechanics, 029:212 Statistical Mechanics I, 029:213 Classical Electrodynamics I, 029:214 Classical Electrodynamics II, 029:245 Quantum Mechanics I, and 029:246 Quantum Mechanics II, and the remaining 12 s.h. in courses numbered 170 or above. Students must maintain a g.p.a. of at least 3.00 in the core graduate courses. Students may earn a maximum of 4 s.h. in 029:220 Individual Critical Study or 029:281 Research: Physics. Up to one-third of the graduate program may be taken in related scientific fields other than physics and mathematics (e.g., chemistry, astronomy, geology, engineering).

The student's plan of study should provide for as much advanced work as aptitude and previous preparation permit.

**Master of Science in Astronomy**

The Master of Science in astronomy requires a minimum of 30 s.h. of graduate credit. It is offered either with or without thesis. The M.S. may be a terminal degree or a step toward a Ph.D. in physics with specialization and a dissertation in astronomy or astrophysics. In either case the final examination is oral, conducted by a committee of three faculty members.

Students in the astronomy M.S. with thesis program earn the required 30 s.h. in courses numbered 170 or above, with at least 15 s.h. at the 200 level, and a g.p.a. of at least 3.00. The 30 s.h. must include at least 6 s.h. chosen from 029:232 Theoretical Astrophysics I, 029:233 Theoretical Astrophysics II, 029:234 Stellar Structure and Evolution, and 029:235 Special Topics in Astrophysics. Students may earn a maximum of 6 s.h. in 029:220 Individual Critical Study and 029:282 Research: Astronomy. Seminars do not count for credit toward the 30 s.h. requirement. Up to one-third of the course work may be in graduate courses in related fields, such as meteorology, geology, and electrical engineering; selection of such courses is encouraged.
