The University of Iowa
2011-12 General Catalog

The General Catalog provides information about academic programs at The University of Iowa, one of three universities governed by the Board of Regents, State of Iowa. The Catalog also provides links to supporting offices at the University, a list of administrative officers, an A-Z list of University of Iowa faculty members, a University calendar, and information extracted from the Iowa Administrative Code regarding admission requirements and Iowa resident/nonresident standing.

The General Catalog is published for informational purposes and should not be construed as the basis of a contract between a student and The University of Iowa. Every effort is made to provide information that is accurate at the time of publication. However, information on courses, curricula, fees, policies, regulations, and other matters is subject to change any time during the period for which the Catalog is in effect.

This edition of the Catalog was published October 2011. For a PDF version of archived back editions, visit Office of the Registrar/General Catalog and use the drop-down menu under "Catalog Snapshots."

The General Catalog is produced by the Office of the Registrar and the Office of University Relations. Your comments and suggestions are welcome. Questions concerning the Catalog may be directed to the Office of the Registrar at registrar-publications@uiowa.edu.

The University of Iowa has been accredited by the North Central Association of Colleges and Schools since the association’s organization in 1913. The University is a member of the Association of American Universities and is associated with Indiana, Michigan State, Northwestern, Ohio State, Pennsylvania State, and Purdue Universities and the Universities of Illinois, Michigan, Minnesota, Nebraska, and Wisconsin in the Big Ten Conference. Along with the Big Ten universities, it also is associated with The University of Chicago in the Committee for Institutional Cooperation (CIC).

*The University of Iowa prohibits discrimination in employment, educational programs, and activities on the basis of race, national origin, color, creed, religion, sex, age, disability, veteran status, sexual orientation, gender identity, or associational preference. The University also affirms its commitment to providing equal opportunities
Academics at Iowa

The University of Iowa offers academic degree and nondegree programs at the undergraduate and graduate levels. It also offers postdoctoral study and other opportunities for nondegree study and research. The General Catalog describes the University’s degree and nondegree programs at the undergraduate and graduate levels.

The following pages provide global information about undergraduate, graduate, and professional study across the University. They include lists of all undergraduate majors (including tracks and emphases), certificates, and minors, with links to the relevant Catalog sections; a link to the College of Liberal Arts and Sciences’ undergraduate General Education Program; information about the undergraduate Four-Year Graduation Plan; information about graduate and professional study; descriptions of the University’s course numbering and grading systems; and contact information for supporting offices (admissions, registrar, housing, student financial aid, and equal opportunity).

- Undergraduate Study (p. 9)
  - Undergraduate Majors and Pre-majors (p. 10)
  - Undergraduate Certificates (p. 14)
  - Undergraduate Minors (p. 15)
  - General Education Program (p. 16)
  - Four-Year Graduation Plan (p. 17)

- Graduate and Professional Study (p. 18)
- Course Numbering (p. 19)
- Grading (p. 23)
- Supporting Offices (p. 24)

For information about degree and nondegree programs in specific disciplines and interdisciplinary areas, including graduation requirements and courses offered, see the links under Colleges and Other Academic Units (p. 25) in the Catalog.

To find the Catalog section for a specific academic department or program, use the Catalog’s A-Z Directory or the Catalog Contents index.
Undergraduate Study

University of Iowa undergraduate students may earn majors, certificates, and minors in more than 100 subject areas. Many majors have varied tracks or emphases, which students may choose according to their own educational goals and interests. Each program is described in the 2011-12 General Catalog, with information on courses and other graduation or completion requirements. Click on the program links under "Undergraduate Majors and Pre-majors," "Undergraduate Certificates," and "Undergraduate Minors."

• Undergraduate Majors and Pre-majors (p. 10)
• Undergraduate Certificates (p. 14)
• Undergraduate Minors (p. 15)

Students enrolled in the College of Liberal Arts and Sciences must complete the college's General Education Program in order to earn an undergraduate degree; other colleges also require General Education course work as part of their undergraduate curricula. For a detailed description of the program and its requirements, use the following link.

• General Education Program (p. 16)

Students who enter the University directly from high school may choose to participate in the Four-Year Graduation Plan, in which students agree to certain conditions that guide their study, and the University ensures availability of courses that students need in order to graduate in four years or provides remedies for delays in graduation due to lack of a course.

• Four-year Graduation Plan (p. 17)
Undergraduate Majors and Pre-majors

The University of Iowa offers the following undergraduate majors, pre-majors, and preparatory course work for selected professional degrees. Some majors offer Teacher Education Programs or the opportunity to earn a degree with teacher licensure, as indicated below. Each major links to the appropriate section of the 2011-12 General Catalog. Additional information about all majors is available on the Office of Admissions web site under Undergraduate Admissions: Majors & Programs.

Majors and Tracks/Emphases

Accounting (p. 782) (B.B.A.)
Actuarial Science (B.S.): see Statistics and Actuarial Science (p. 743)
American Studies (p. 50) (B.A.)
Ancient Civilization (B.A.): see Classics (p. 199)
Anthropology (p. 63) (B.A., B.S.)
Cultural Resource and Heritage Management Emphasis
Gender and Culture Emphasis
Environmental Anthropology Emphasis
Teacher licensure
Applied Physics (B.S.): see Physics and Astronomy (p. 622)
Art (B.A., B.F.A.): see Art and Art History (p. 85)
Option: Teacher Education Program
Art History (B.A.): see Art and Art History (p. 85)
Option: Teacher Education Program

Environmental Subtrack
Civil Engineering Practice Track (Civil or Environmental)
Engineering Sustainable World Track (Environmental)
Entrepreneurial Career Path Track (Civil or Environmental)
Environmental Health Engineering Track (Environmental)
Environmental Remediation and Control Track (Environmental)
Management Track (Civil or Environmental)
Structures, Mechanics, and Materials Track (Civil or Environmental)
Transportation Engineering Track (Civil or Environmental)
Urban and Regional Planning Track (Civil or Environmental)
Water Resources Engineering Track (Civil or Environmental)

Classical Languages (B.A.): see Classics (p. 199)
Teacher licensure

Clinical Laboratory Sciences (p. 1296) (B.S.)

Communication Studies (p. 229) (B.A.)

Comparative Literature (B.A.): see Cinema and Comparative Literature (p. 183)
Literature and Arts Track
World Language and Literature Track

Computer Science (p. 249) (B.A., B.S.)

Dance (p. 273) (B.A., B.F.A.)

Economics (p. 802) (B.A., B.B.A., B.S.)
Analytical Economics Track
Business Economics Track
Policy Economics Track

Electrical Engineering (B.S.E.): see Electrical and Computer Engineering (p. 1077)
Computer Engineering Subtrack
Electrical Engineering Subtrack

Elementary Education (p. 303) (B.A., B.S.)
Teacher licensure

Engineering (p. 1010) (B.S.E.)

English (p. 304) (B.A.)
Creative Writing Track
Option: Teacher Education Program

Environmental Sciences (p. 342) (B.A., B.S.)
Biosciences Track (B.S.)
Chemical Sciences Track (B.S.)
Geosciences Track (B.S.)
Hydrosciences Track (B.S.)

Ethics and Public Policy (p. 351) (B.A.)

Finance (p. 821) (B.A.)

French (B.A.): See French and Italian (p. 354)
French and Arabic Track
Language Track
Literature and Culture Track
Teaching Track

Gender, Women’s, and Sexuality Studies (p. 369) (B.A.)

Geography (p. 392) (B.A., B.S.)
Environmental Studies Track
Geographic Information Science Track
Geography and Social Change Track
Sustainability Track

Teacher licensure

Geoscience (p. 407) (B.A., B.S.)

German (p. 423) (B.A.)
Teacher licensure

Health and Human Physiology (p. 438) (B.A.)
Health Promotion Track
Health Studies Track

History (p. 460) (B.A.)
Teacher licensure

Human Physiology (B.S.): see Health and Human Physiology (p. 438)

Industrial Engineering (B.S.E.): see Mechanical and Industrial Engineering (p. 1090)

Biology Emphasis
Chemistry Emphasis
Earth Science Emphasis
Physics Emphasis
Teacher licensure

Social Work (p. 692) (B.A.)

Sociology (p. 709) (B.A., B.S.)
Criminology Track

Spanish (B.A.): see Spanish and Portuguese (p. 722)
Teacher licensure

Speech and Hearing Science (B.A.): see Communication Sciences and Disorders (p. 214)

Sport Studies (B.A.): see American Studies (p. 50)

Statistics (B.S.): see Statistics and Actuarial Science (p. 743)
Mathematical Statistics Track
Statistical Computing Track
Statistics in Business, Industry, Government, and Research Track

Theatre Arts (p. 758) (B.A.)

Women’s Studies: see Gender, Women’s, and Sexuality Studies (p. 369) (B.A.)

Pre-majors

For information about the following pre-majors and preparatory course work for selected professional degrees, see the Office of Admissions web site Undergraduate Admissions: Majors & Programs.

Pre-Chiropractic
Dentistry (preparatory course work for the D.D.S.)
Law (preparatory course work for the J.D.)
Medicine (preparatory course work for the M.D.)
Pre-Mortuary Science
Pre-Optometry
Pharmacy (preparatory course work for the Pharm.D.)
Physical Therapy (preparatory course work for the D.P.T.)
Physician Assistant (preparatory course work for the M.P.A.S.)
Pre-Podiatric Medicine
Pre-Veterinary Medicine
Undergraduate Certificates

The University of Iowa offers a number of certificates for undergraduates, most in interdisciplinary areas. Colleges offering undergraduate certificates include the College of Liberal Arts and Sciences, the Tippie College of Business, the College of Public Health, and University College.

Certificate in Aging Studies (p. 38)
Certificate in American Indian and Native Studies (p. 42)
Certificate in American Sign Language and Deaf Studies: see American Sign Language (p. 46)
Certificate in Critical Cultural Competence (p. 271)
Certificate in Disability Studies (p. 286)
Certificate in Entrepreneurial Management (p. 815)
Certificate in Fundraising and Philanthropy Communication (p. 367)
Certificate in Global Health Studies (p. 433)
Certificate in Human Rights (p. 1522)
Certificate in International Business (p. 492)
Certificate in Latin American Studies (p. 527)
Certificate in Leadership Studies (p. 1535)
Certificate in Medieval Studies (p. 567)
Certificate in Museum Studies (p. 578)
Certificate in Nonprofit Management (p. 1548)
Certificate in Performing Arts Entrepreneurship (p. 613)
Certificate in Public Health (p. 1457)
Certificate in Risk Management and Insurance (p. 859)
Certificate in Sustainability (p. 1565)
Certificate in Technological Entrepreneurship (p. 1116)
Certificate in Writing (p. 772)
Undergraduate Minors

Undergraduate minors are offered in numerous disciplines and interdisciplinary areas by the College of Liberal Arts and Sciences, the Tippie College of Business, and the College of Education.

General Education Program

All students entering the College of Liberal Arts and Sciences who wish to earn a Bachelor of Arts (B.A.), Bachelor of Science (B.S.), Bachelor of Fine Arts (B.F.A.), Bachelor of Liberal Studies (B.L.S.), or a Bachelor of Music (B.M.) degree must complete the CLAS General Education Program in addition to the requirements of their major and other requirements for graduation.

Undergraduate degree programs in other colleges include General Education requirements, which often may be satisfied with certain courses approved for the CLAS General Education Program.

For detailed information about CLAS General Education requirements and lists of courses approved in the CLAS General Education areas, see General Education Program (p. 381) (College of Liberal Arts and Sciences).
Four-Year Graduation Plan

The Four-Year Graduation Plan is a partnership between students and the University. Students who sign the Four-Year Graduation Plan agree to a number of conditions that guide their studies and their progress toward a degree. The University’s colleges and departments also agree to certain conditions. They ensure the availability of courses that students need for graduation; they also guarantee that they will provide certain remedies to a student facing a delay in graduation due to lack of a course, as long as the student has met the conditions of the four-year plan. The Tippie College of Business and the Colleges of Engineering, Liberal Arts and Sciences, and Nursing participate in the four-year plan. Only students who enter the University directly from high school are eligible to participate in the four-year plan. General information on the Four-Year Graduation Plan is available from the Office of Admissions. Information also is available from the participating colleges and the Academic Advising Center.
Graduate and Professional Study

The University of Iowa offers graduate and professional degrees and graduate certificate programs in a broad array of disciplines and interdisciplinary areas of study. Each of its 11 colleges offers master’s degrees, and most offer doctoral degrees. Degree programs are presented by individual colleges, with most graduate degrees being granted by the Graduate College.

The Graduate (p. 1117) College section of the Catalog provides a list of most University of Iowa graduate degrees as well as information about interdisciplinary graduate degree programs, joint degree programs, and certificate programs.

For information about degree and nondegree programs in specific disciplines and interdisciplinary areas, including graduation requirements and courses offered, see the appropriate General Catalog sections: Tippie College of Business (p. 775), College of Dentistry (p. 861), College of Education (p. 897), College of Engineering (p. 1010), Graduate (p. 1117) College, College of Law (p. 1215), College of Liberal Arts and Sciences (p. 26), College of Medicine (p. 1261), College of Nursing (p. 1396), College of Pharmacy (p. 1425), and College of Public Health (p. 1446).

Prospective graduate and professional students should apply through the Office of Admissions; see Graduate and Professional Admissions on the office’s web site.
Course Numbering

Each course in the regular University curriculum has an identifying number, preceded by the number of the college, department, or program that administers the course. For example, 034:001 is the code for the course numbered 001 in the Department of Sociology (034), titled Introduction to Sociology Principles. Course numbers below 100 designate courses primarily for undergraduates, numbers 100 to 199 designate courses for undergraduate and graduate students, and numbers 200 and above designate courses primarily for graduate students.

Grading

The University uses a letter grading system for individual courses, except for the College of Law, which uses a numeric system for course grading. In order to compute grade-point average, letter grades are converted according to the following numerical scale. Grade-point averages are displayed at the bottom of students’ grade reports and are truncated so as not to exceed 4.00. All of the following marks appear on the permanent record.

**Grade points for each semester hour**

A+ 4.33  
A  4.00  
A- 3.67  
B+ 3.33  
B  3.00  
B- 2.67  
C+ 2.33  
C  2.00  
C- 1.67  
D+ 1.33  
D  1.00  
D- 0.67  
F  0

**Not used in computing grade-point average:**

H Honors (Medicine and Pharmacy)  
H- Near Honors (Medicine)  
N Nonpass  
P Pass

S Satisfactory  
U Unsatisfactory

**Other marks on the permanent record:**

I Incomplete  
O No grade reported  
R Registered, no grade required  
W Withdrawn  
= Changed grade  
# Grade not included in G.P.A.  
* Undergraduate honors section
Supporting Offices

Prospective undergraduate, graduate, and professional students should apply to the University through the Office of Admissions. Several other University of Iowa offices provide major services to entering and continuing students.

Application for admission (undergraduate, graduate, and professional programs):

Office of Admissions
The University of Iowa
107 Calvin Hall
Iowa City, IA 52242-1396
Phone: toll-free nationwide 1-800-553-4692; direct dial 1-319-335-3847
E-mail: admissions@uiowa.edu
Web site: http://www.uiowa.edu/admissions

Registration, residency status, transcripts, tuition and fees, services for veterans, verifications, course offerings, classroom scheduling:

Office of the Registrar
The University of Iowa
1 Jessup Hall
Iowa City, IA 52242-1316
Phone: 1-319-335-0238
E-mail: registrar@uiowa.edu
Web site: http://www.registrar.uiowa.edu

Student housing information, application:

University Housing and Dining
The University of Iowa
4141 Burge Hall
Iowa City, IA 52242-1298
Phone: 1-319-335-3000
E-mail: reshall-housing@uiowa.edu
Web site: http://www.housing.uiowa.edu

Scholarships, grants, loans, student employment:

Office of Student Financial Aid
The University of Iowa
208 Calvin Hall
The University of Iowa
Iowa City, IA 52242-1315
Phone: 1-319-335-1450
E-mail: financial-aid@uiowa.edu

- College of Law (p. 1215)
- Carver College of Medicine (p. 1261)
- College of Nursing (p. 1396)
- College of Pharmacy (p. 1425)
- College of Public Health (p. 1446)
- University College (p. 1505)
- Division of Continuing Education (p. 1579)
College of Liberal Arts and Sciences

Dean
Linda Maxson

Executive associate dean
Raúl Curto

Associate dean for undergraduate programs and curriculum
Helena Dettmer

Associate dean for research and development
Joseph K. Kearney

Web site: http://www.clas.uiowa.edu/

The College of Liberal Arts and Sciences (CLAS) is the oldest and largest of the 11 colleges that make up The University of Iowa. Students from all over the United States and more than 50 other nations study together in the college. Every University of Iowa undergraduate takes courses offered by the college, and more than 75 percent of undergraduates earn their degrees from the College of Liberal Arts and Sciences.

The college provides a comprehensive liberal arts education, offering more than 70 majors and certificates as well as a wide variety of minors and opportunities for interdisciplinary work. Students also may design their own majors through the college’s Interdepartmental Studies Program.

In addition to their academic pursuits, students participate in the college in a variety of ways. They serve on the Dean’s Student Advisory Committee and as members of the Educational Policy Committee and the General Education Curriculum Committee—collegiate committees that advise the deans on important educational issues. Students are invited to serve on ad hoc committees within the college as well, and many departments have an undergraduate student group or association. CLAS students also serve in the University of Iowa Student Government. Interested students should contact the appropriate committee or office.

CLAS Web Site

The College of Liberal Arts and Sciences web site contains a wealth of information for students and faculty members.

Students find information on academic policies and procedures on the For Students pages, including requirements of the CLAS General Education Program (see Academic Policies Handbook). Information about scholarships, service opportunities, and upcoming deadlines also is available on the For Students pages.

The CLAS Administrative Units link provides a list of the college’s departments, programs, and schools as well as its undergraduate majors, certificates, and minors.

Faculty members turn to the CLAS web site for information on teaching and curriculum, resources to use when advising and instructing students, and updates on important CLAS committees.

The CLAS web site also includes a home page for the Dean’s Office and for CLAS Academic Programs & Student Development as well as links to other helpful pages.

CLAS Academic Programs & Student Development

Located in Schaeffer Hall, at the center of campus, CLAS Academic Programs & Student Development is an integral part of the College of Liberal Arts and Sciences. The office, which is led by the associate dean for undergraduate programs and curriculum, welcomes students wishing to declare or change majors, file second-grade-only options, request permission to register late, add or drop a course late, or withdraw an entire registration after the established deadlines.

The office’s staff members answer students’ questions concerning academic requirements or programs, and they meet with students concerning General Education Program requirements, graduation requirements, collegiate policies that affect students, and a range of other issues, including strategies for successful completion of a degree.

Students in the College of Liberal Arts and Sciences may request exceptions to CLAS rules and requirements in the office of Academic Programs & Student Development. All students should discuss their questions and need for an exception first with a staff member in the office.

The office’s associate directors work closely with students on academic probation and counsel them on strategies for success. They also conduct semiannual reviews of students on academic probation and consider requests for reinstatement.

CLAS Academic Programs & Student Development recommends appropriate disciplinary action for academic fraud, such as acts of plagiarism, cheating, and forgery, and for other academic misconduct. It also handles dismissals from the college.
General Education Program

All students entering the College of Liberal Arts and Sciences who wish to earn a Bachelor of Arts (B.A.), Bachelor of Science (B.S.), Bachelor of Fine Arts (B.F.A.), Bachelor of Liberal Studies (B.L.S.), or Bachelor of Music (B.M.) degree must complete the CLAS General Education Program in addition to the requirements of their major and other requirements for graduation.

For General Education requirements, related academic policies, and lists of approved courses, see General Education Program (p. 381) under "Index: Academic Programs" on this page.

CLAS Units and Academic Programs

The College of Liberal Arts and Sciences includes nearly 40 administrative units ranging across the fine and performing arts, humanities and letters, social sciences, and natural and mathematical sciences. These units offer nearly 70 undergraduate majors and certificates as well as a wide variety of minors. They also offer more than 50 graduate programs (with degrees granted by the Graduate College).

Undergraduate Majors, Certificates, and Minors

The college offers undergraduate majors in a broad range of disciplines. In addition, several majors are offered to CLAS students by other colleges at the University, with the College of Liberal Arts and Sciences granting the degrees. The Tippie College of Business offers a major in economics (B.A. and B.S.); the Carver College of Medicine offers majors in biochemistry (B.A. and B.S.) and in microbiology (B.S.); and the College of Education offers majors in elementary education (B.A. and B.S.) and in science education (B.S.). For descriptions of the majors and their requirements, see the links under "Index: Academic Programs" on this page.

The College of Education also offers a Teacher Education Program leading to licensure at the secondary level for students who have completed certain CLAS majors, such as English, mathematics, and art, and who wish to work with students in middle school or high school. Students must apply for admission to the Teacher Education Program; contact the College of Education’s Office of Education Services.

Students who begin their study in the College of Liberal Arts and Sciences may earn undergraduate degrees in clinical laboratory sciences, nuclear medicine technology, and radiation sciences; see the Carver College of Medicine (p. 1261) section of the Catalog for information about those majors.

The College of Liberal Arts and Sciences offers a broad array of certificates and minors for undergraduate students. In addition, the college collaborates with the University’s International Programs office to offer the Certificate in Global Health Studies and the Certificate in Latin American Studies, and it partners with the Tippie College of Business to offer the Certificate in International Business. Link to information about CLAS certificates and minors under "Index: Academic Programs" on this page.

CLAS undergraduates may earn certificates and minors offered by other colleges as well. The Tippie College of Business offers the Certificate in Entrepreneurship, the Certificate in Risk Management and Insurance, and the minor in business administration. The College of Public Health offers the Certificate in Public Health. University College offers the Certificate in Leadership Studies, the Certificate in Nonprofit Management, and the Certificate in Sustainability. The College of Education offers minors in educational psychology and in human relations. For lists of all undergraduate certificates and minors offered by the University, see Certificates (p. 14) and Minors (p. 15) in the Academics at Iowa/Undergraduate Study section of the Catalog.

Undergraduates also may take courses in book arts from the Center for the Book (p. 1149), a Graduate College program.

Graduate Degrees and Certificates

The College of Liberal Arts and Sciences offers graduate programs in most of its disciplines, with degrees granted by the Graduate College. Students may earn degrees at the master’s and doctoral levels; graduate certificates are available in some areas of study. See “Degrees Offered” in the Graduate (p. 1117) College section of the Catalog for a complete list of graduate degrees offered by the University.

For information about CLAS graduate programs, see the links under "Index: Academic Programs" on this page.

Nondepartmental Courses

Most College of Liberal Arts and Sciences courses are offered by the college’s departments, programs, and schools. They are listed and described in the corresponding General Catalog
sections; see the links under "Index: Academic Programs" on this page.

The college also offers the following nondepartmental courses.

**610:020 Writing Commons: A Community of Writers** 1-3 s.h.
Exploration of the art and craft of writing, including fiction, nonfiction, poetry, scientific and technical writing, and other genres of professional writing (i.e., grants, proposals, scripts, treatments); readings and discussion of work by published writers; readings by visiting authors; workshop format.

**610:029 First-Year Seminar** 1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.

**610:030 Explorations in Computing, Mathematics, and Science** 1 s.h.
Presentations by science and math faculty members, discussions with visiting scientists, visits to campus labs, off-campus science field trips; for students in Explorations in Computing, Mathematics, and Science Living-Learning Community. Requirements: first-year standing in CMS Learning Community.

**610:040 Citizenship, Leadership, and Service I** 1 s.h.
Presentations by faculty members, scholars, activists; guided discussions with visiting scholars and activists, other varied activities; for students in Citizenship, Leadership & Service Living-Learning Community. Requirements: enrollment in CLS Learning Community.

**610:050 Citizenship, Leadership, and Service II** 1 s.h.
Continuation of 610:040; individual volunteer opportunities, participation in service learning projects; presentations by faculty and community members, visits to University and community resources. Prerequisites: 610:040. Requirements: member of Citizenship, Leadership, and Service Living-Learning Community.

**610:060 Life Design: Building Your Future** 1 s.h.
How interests and talents can be paired up to achieve a fulfilling life; what students are passionate about; address questions (i.e., How can you identify what you’re good at? How can you build a life of purpose and meaning? How can you cultivate mentors? What is the relationship between ambition, drive, and success? What major might be the best fit and how can University resources help your academic and personal success?); portfolio of reflective exercises, activities, journal assignments.

**610:099 Peer Mentoring** 1-2 s.h.
Opportunities to participate in classroom and course activities as mentors for other students.

**610:100 Writing: Independent Project** 1 s.h.
Independent writing project; for students pursuing the Certificate in Writing or wishing to pursue a writing project independently.

**610:175 Undergraduate Internship** arr.
Professional experience related to student’s major or other interests; students must have an approved internship on or off campus. Requirements: undergraduate standing and a minimum of 24 s.h. of course work with at least 12 s.h. in University of Iowa courses.

African American Studies

Chair
Carin M. Green

Coordinator
Tim Havens

Professors
Kevin Mumford (History/African American Studies), Horace Porter (English/American Studies/African American Studies), Leslie Schwalm (History, African American Studies/Gender, Women’s and Sexuality Studies), Richard B. Turner (Religious Studies/African American Studies),

Associate professors
Venise Berry (Journalism and Mass Communication/African American Studies), Tim Havens (Communication Studies/African American Studies), Tisch Jones (Theatre Arts/African American Studies), Michael Lomax (African American Studies/Leisure Studies), Sydné Mahone (Theatre Arts/African American Studies), Katrina Sanders (Educational Policy and Leadership Studies, African American Studies), Miriam Thaggert (English/African American Studies), Deborah Whaley (American Studies/African American Studies)

Assistant professors
Lena Hill (English/African American Studies), Michael Hill (English/African American Studies), Bridget Tsemo (Rhetoric/African American Studies)

Undergraduate degree: B.A. in African American Studies
Undergraduate nondegree program: Minor in African American Studies
Graduate degree: M.A. in African American World Studies
Web site: http://www.uiowa.edu/~afam/index.html

African American studies focuses on the study of people of African descent in the United States and the African diaspora. The African American Studies Program originated in 1969 through courses intended to foster awareness of African Americans' role in the development of the United States and the world. Because a thorough understanding of the African American experience cannot be achieved through study restricted to the perspective of a single discipline, all students are required to pursue courses in the humanities, social sciences, and performing arts.

The African American Studies Program draws upon faculty from American studies, communication studies, education, health and sport studies, history, journalism and mass communication, religious studies, rhetoric, sociology, theatre arts, and women's studies.

Undergraduate Programs

- Major in African American studies (Bachelor of Arts)
- Minor in African American studies

Bachelor of Arts

The Bachelor of Arts with a major in African American studies requires a minimum of 120 s.h., including at least 30 s.h. of work for the major. Students must maintain a g.p.a. of at least 2.00 in the major. Transfer credit is evaluated case-by-case and is limited to a maximum of 9 s.h. Students must complete the College of Liberal Arts and Sciences General Education Program (p. 381).

INTRODUCTORY COURSES

Students are required to complete 129:062 Foundations in African American Studies, and either 129:060 Introduction to African American Society or 129:061 Introduction to African American Culture.

Foundations in African American Studies (129:062) explores the history and the methodology of African American studies. Starting with readings related to the formation of the discipline, the course shows students what an African American studies approach to interpretation entails and culminates in a research paper.

Introduction to African American Society (129:060) examines the construction of social and historical institutions in the United States and the African diaspora (e.g., Black church, Black family, gender, sexuality). The course may include readings in political science, religion, history, sociology, geography, anthropology, and other disciplines.

Introduction to African American Culture (129:061) presents themes in African American cultural studies. It includes readings in literature, music, film studies, religious studies, and the visual and performing arts.

The following introductory courses are required.

129:062 Foundations in African American Studies 3 s.h.
129:060 Introduction to African American Society 3 s.h.
or
129:061 Introduction to African American Culture 3 s.h.
AFRICAN AMERICAN STUDIES CORE

In addition to the two required introductory courses, all students must complete at least two courses from each of the three topical areas below (minimum of 18 s.h.). Additional courses may be approved for the topical areas; consult with an African American studies advisor.

History, Religion, and the Diaspora
Two of these:

ELECTIVES

Students also must take two elective courses (minimum of 6 s.h.) selected from the three topical areas listed above. With the approval of an African-American studies advisor, students may substitute relevant courses offered by other departments for one or both electives; the substituted courses may not be cross-referenced with African American studies. Students must gain the advisor’s approval before enrolling in a substitute course.

Two electives selected from the three topical areas above, or approved substitutes 6 s.h.

LANGUAGE REQUIREMENT

The language requirement for the African American studies major is the same as the World Languages requirement of the College of Liberal Arts and Sciences General Education Program (p. 381). Students are encouraged, but not required, to take African language courses (Swahili is currently offered) or Spanish language courses to fulfill the World Languages requirement.
Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

During the first year of study, students should focus on completing the General Education Program, perhaps including Swahili or Spanish course work to begin satisfying the World Languages requirement.

Before the third semester begins: at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: at least three courses in the major, including 129:062 Foundations in African American Studies, and 129:060 Introduction to African American Society or 129:061 Introduction to African American Culture; and at least one-half of the semester hours required for graduation

Before the seventh semester begins: four more courses in the major (for a total of seven) and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: at least nine courses in the major

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Honors

The University of Iowa Honors Program provides a stimulating and integrative educational experience for undergraduate majors who perform at a high level. The honors program in African American studies offers students the opportunity to pursue special interests in individual in-depth research. Honors students in African American studies must be members of the University Honors Program, which requires students to maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University of Iowa Honors Program for more information). Honors students in African American studies complete all of the required course work for the major (30 s.h.).

Students who wish to graduate with honors in the African American studies major are encouraged to register for up to 6 s.h. in 129:095 Honors Project. Work in this course enhances the student’s ability to complete honors projects under the guidance of the supervising faculty member. Students take 129:095 Honors Project with the approval of their African American studies advisor, who typically supervises the course. Students may count up to 6 s.h. earned in 129:095 Honors Project toward the 30 s.h. required for the major.

Under the guidance of the African American studies advisor, the honors student defines a research project (thesis) using primary, secondary, or archival sources. Students make project proposals by the end of their junior year. Each student completes a thesis under the guidance of a supervising faculty member and presents the results as a senior essay to a committee of three faculty members, including the supervising African American studies faculty member and two other African American studies faculty members of the student’s choice. The student’s committee may choose to hear an oral defense of the honors thesis, usually during the student’s last semester.

Students should use one or more of their elective courses to develop the honors thesis.

Minor

The minor in African American studies requires a minimum of 15 s.h., including 12 s.h. taken at The University of Iowa. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass. Course work done for another major or minor may not be counted toward the minor in African American studies.

Students must take 129:062 Foundations in African American Studies. In consultation with their advisors, they should select either 129:060 Introduction to African American Society or 129:061 Introduction to African American Culture, and one course in each of the three topical areas (total of three topical area courses, 9 s.h.): history, religion, and the diaspora; literature and performing arts; and media, politics, and social institutions. Two of the three topical area courses must be taken at The University of Iowa.

Graduate Program

- Master of Arts in African American world studies

African American studies is not accepting graduate students in 2011-12.

Cocurricular Activities

Afro American Cultural Center

African American studies encourages students to use facilities of the Afro American Cultural Center. The center serves as a museum and library of
educational and cultural artifacts and exhibits of African American culture, providing cultural enrichment for the Iowa City community and promoting diversity among all members of the University community. It also provides a cultural meeting place for African American students.

**African American Studies Student Association**

The African American Studies Student Association aims to promote knowledge about people of African descent by sponsoring programs on various topics. Any University of Iowa student interested in African American studies is eligible to become a member.

**Seminar and Lecture Series**

The African American Studies Seminar Series and the Darwin Turner Lecture bring important scholars and creative artists to the University of Iowa campus. Guests of the lecture and seminar series have included Amiri Baraka, Michelle Wallace, and Valerie Smith.

The New Research in African American Studies lecture series, sponsored by the College of Liberal Arts and Sciences, focuses on research by faculty in the African American Studies Program.

**Courses**

**For Undergraduates**

**129:008 Literatures of the African Peoples**

Works in English by authors of African descent from America, continental Africa, the Caribbean. Prerequisites: 010:002 or 010:003, and 08G:001. Requirements: successful completion of the rhetoric requirement and then 08G:001. GE: Literary, Visual, and Performing Arts; Values, Society, and Diversity. Same as 08G:014.

**129:060 Introduction to African American Society**

Social and cultural history of African Americans through framework of general works in anthropology, sociology, history. GE: Social Sciences; Values, Society, and Diversity.

**129:061 Introduction to African American Culture**

Interdisciplinary look at Black culture in the United States through significant contributions of the humanities (music, art, literature, drama, philosophy) to development of Black culture. GE: Values, Society, and Diversity. Same as 045:030.

**129:062 Foundations in African American Studies**

Introduction to interdisciplinary methods in African American studies; overview of the discipline’s central branches, including literature, religion, media and performing arts, history, political science. GE: Values, Society, and Diversity.

**129:063 African American Islam**

**129:065 Introduction to African American History**

**129:069 Selected African American Authors**

English majors may apply this course to the following area and/or period requirement. AREA: American Literature and Culture. PERIOD: 20th- and/or 21st-Century Literature. Same as 008:069.

**129:029 First-Year Seminar**

Small discussion class; topics chosen by instructor. Requirements: first-year standing.

**129:050 Introduction to African American Religions**

3 s.h.
129:076 Race, Ethnicity, and Media
3 s.h.
Introduction to debates about media portrayals of race and ethnicity; focus primarily on entertainment media; use of general analytic perspectives--stereotype analysis, aesthetic analysis, history--applied to real-world examples; address one or more racial/ethnic groups in the United States. Communication studies majors may apply this course to the following area requirement. AREA: Theory. Prerequisites: 036:001, 036:005, 036:012 or 036:070, 036:017 or 036:030, and 036:074. Requirements: g.p.a. of at least 2.50 and completion of Foundations of Communication requirement. Same as 129:076. Same as 036:076.

129:079 Race and Ethnicity in Sport
3 s.h.
Structural and ideological barriers to racial and ethnic equality in sport, with focus on African American sport experiences; historical and contemporary issues, media representations. Same as 028:079.

129:093 Black Culture and Experience
3 s.h.
Topics vary.

129:095 Honors Project
arr.
Independent research and writing on interdisciplinary topic.

129:097 Race, Sport, and Globalization
3 s.h.
Introduction to current discussion surrounding the link between sport, race, and globalization; critical cultural studies perspective used to examine the meaning of race and sport within a global context; labor migration of talented athletes, identity politics, and dynamics of equality in sport along such lines as race, class, and gender; examination of African American diaspora within a sport context to study the political, economic, and social construction of race and sport on African and Asian continents. Same as 169:097.

For Advanced Undergraduate and Graduate Students

129:102 Black Popular Music
3 s.h.
History and expressive culture of people of African descent living in America through popular music forms; historical time span between the 17th and 21st centuries; poetry, music, cultural analysis, film, and art as sources for the study of Black music; genres covered include spirituals and gospel, blues, jazz, rock, rhythm and blues, Afropunk, alternative and neo soul, and hip-hop. Requirements: 045:030 and 129:060. Same as 045:102.

129:108 Malcolm X, King, and Human Rights
3 s.h.
Religion and politics of Malcolm X and Martin Luther King, Jr. in the context of U.S. civil rights and international human rights in West Africa and the Muslim world; emphasis on civil rights connections to Gandhi, the Nobel Peace prize, and other international experiences that have impacted Pan Africanists, such as Stokely Carmichael, who worked on human rights. Recommendations: international studies major or undergraduate standing. Same as 032:108.

129:116 African American Literature Before 1900
3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: American Literature and Culture. PERIOD: 18th- and/or 19th-Century Literature. Same as 008:116.

129:117 African American Literature Since 1900
3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: American Literature and Culture. PERIOD: 20th- and/or 21st-Century Literature. Same as 008:117.

129:119 African Literature
3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: Transnational Literature and Postcolonial Studies. PERIOD: 20th- and/or 21st-Century Literature. Same as 008:119.

129:122 African Americans and the Media

129:181 African American Autobiography
English majors may apply this course to the following area and/or period requirement. AREA: American Literature and Culture. PERIOD: 20th-and/or 21st-Century Literature. Same as 008:137.

129:182 Free Style Writing: Poetry, Plays, and Performances
Creative writing lab experience in reading, writing, and performing poetry and short plays; expansion of students' horizons of the self; arc of innovation in African American literature from Harlem Renaissance to present, with texts from Langston Hughes and Zora Neale Hurston to Saul Williams and Jill Scott; role of the artist in society and as outsider and insider; shifting perspectives on race, gender, class; musical influences and models, from blues to house music; sensuality, spirituality; artistic reflections on the cultural moment; effects of these on literary form and performance style; students create and perform a work for an audience. Same as 049:182.

129:183 Black Feminist Tradition and Culture
Survey of selected theoretical texts chronicling shifting perspectives on feminism; comparative interdisciplinary survey of artistic works that reflect such perspectives. Same as 049:183.

129:184 Black Global Metropolis: Sexual History
Dispersion of people of African descent into the global metropolis, from expansion of port cities in the slave trade to industrialization of European and American cities, decolonization of the Third World, and proliferation of spatial cultures in contemporary geography; readings cover prostitution in colonial New York, sexual danger in Victorian London, jazz age Chicago, sexual psyches in Algiers, black gay expatriates in Paris, social science in Harlem and Puerto Rico ghettos, black/white sex in Johannesburg, transsexuals in Rio de Janeiro, Black Panther sexual politics in urban America, global hip-hop sexualities. Same as 131:184, 16A:184.

129:186 African American Drama
English majors may apply this course to the following area and/or period requirement. AREA: American Literature and Culture. PERIOD: 18th-and/or 19th-Century Literature, or 20th- and/or 21st-Century Literature. Same as 008:186, 049:186.

129:187 African American History 1865-Present
African American history since Reconstruction; survey of African American politics and society from Reconstruction to present. Same as 16A:188.

129:189 Themes in African American History

129:191 African American Theatre II
Works by African American playwrights and relevant historical documents, Black Renaissance to present; themes, history, sociopolitical context; artists forging theatrical paths under oppressive conditions; exploration through discussion, performance; literature-based course, workshop approach. Same as 049:191.

129:195 Television and African American Culture
Role of television in African American culture; examination of debates; topics include stereotyping, authenticity, effects of programming, aesthetics, and television's relationship to other forms of cultural expression. Communication studies majors may apply this course to the following area requirement. AREA: Theory. Prerequisites: 036:001, 036:005, 036:012 or 036:070, 036:017 or 036:030, and 036:074. Requirements: g.p.a. of at least 2.50, completion of Foundations of Communication requirement, and 6 s.h. of intermediate-level course work. Same as 036:172.

129:199 Senior Seminar
African American, African, and African Caribbean culture and experience; comparative approach to synthesize students' earlier study. Requirements: African American studies senior standing.
For Graduate Students

129:205 Gender and Race in Nineteenth-Century U.S.

129:212 Advanced Readings in African American Culture
Textual, social, political analyses of works by Black authors.

129:231 Crossing Borders Seminar
2-3 s.h.

129:259 Seminar: Interpreting Oral Histories
Interpretations and methods applied by historians in various world regions to different forms of oral history, from old oral traditions to contemporary autobiographical testimony. Same as 016:259.

129:287 Readings: African American Women's History

129:312 Advanced Research in African American Culture
Seminar or independent study; for graduate students concentrating in African American studies. Requirements: basic African American studies courses.
Aging Studies

Chair
Edward J. Saunders

Coordinator
Mercedes Bern-Klug

Program advisor
Mercedes Bern-Klug

Undergraduate nondegree programs:
Certificate, Minor in Aging Studies

Graduate nondegree program: Certificate in Aging Studies

Web site: http://www.uiowa.edu/~socialwk/agingstudies

The Aging Studies Program offers undergraduate and graduate programs and a selection of courses open to students in all majors.

Undergraduate students in the College of Liberal Arts and Sciences who would like to focus on aging studies as their major or as a second major should consider the individualized plan of study track offered by the Interdepartmental Studies Program. See Interdepartmental Studies (p. 482) in the Catalog.

The Aging Studies Program is administered by the School of Social Work (p. 692).

Undergraduate and Graduate Programs

• Certificate in Aging Studies (undergraduate and graduate)
• Minor in aging studies (undergraduate)

Certificate

The Certificate in Aging Studies requires 21 s.h. The program takes a multidisciplinary approach to gerontology. Its course work has been coordinated and sequenced to provide a broad background in aging for students from varied disciplines.

The certificate program is open to undergraduate and graduate students with aging-related career interests and needs. Individuals who hold University of Iowa bachelor’s degrees may return to earn the certificate. Completion of the certificate is noted on the student’s transcript.

A student may earn the Certificate in Aging Studies or the minor in aging studies, but not both.

Students should talk with the Aging Studies Program coordinator about their intent to earn the certificate. They work with their academic advisors and the coordinator to develop an individual plan of study that complements their degree program and career interests. The coordinator keeps a record of each student’s progress in his or her approved certificate study plan.

The certificate’s required 21 s.h. must be earned in approved aging-related courses. At least 18 s.h. must be earned in courses numbered 100 and above. Aging-related course work is defined as work that focuses principally on older persons, the aging process, or interventional methods or techniques whose target is the older adult or aging. Certificate students must complete a minimum of 15 s.h. in aging studies at The University of Iowa. A g.p.a. of at least 2.00 is required in all certificate course work.

Certificate requirements include a core curriculum of six courses and an additional 2-5 s.h. of elective course work from the list of approved aging-related courses. Students may take core courses before or concurrently with other courses in the program. They should complete the core courses before they do the research project or take the practicum course.

Transfer credit is determined individually; consult the Aging Studies Program coordinator.

The Certificate in Aging Studies requires the following course work.

CORE COURSES

All certificate students must complete the following six core courses.

153:108 Basic Aspects of Aging (GE: social sciences) 3 s.h.
153:135/042:135 Global Aging 3 s.h.
153:150/031:050 Psychology of Aging 3 s.h.
153:160 Biology of Aging 3 s.h.
153:190/042:190 Aging Studies Internship 3-6 s.h.
153:130 Aging Studies Colloquium--Undergraduate 1 s.h.

or

153:230 Aging Studies Colloquium (graduate students) 1 s.h.

ELECTIVES

Students must complete an additional 2-5 s.h. of electives selected from courses offered by the Aging Studies Program (prefix 153) and/or from approved aging-related courses offered by other academic units, which are listed below by focus area. Additional practicum and/or research
courses offered by other academic units may be accepted for elective credit if they focus on aging; students who wish to apply course work from other departments should consult the Aging Studies Program chair.

**Minor**

Undergraduate students in the Colleges of Liberal Arts and Sciences, Education, Engineering, Nursing, or the Tippie College of Business may complete the minor in aging studies. The minor must be approved by the student’s college or major department. A student may earn the Certificate in Aging Studies or the minor in aging studies, but not both.

The minor in aging studies requires a minimum of 15 s.h. in aging-related course work, including 12 s.h. in advanced courses taken at The University of Iowa. For the minor, courses numbered above 100 are considered advanced. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass. The required introductory core course 153:108 Basic Aspects of Aging must be included in the 12 s.h. of advanced course work. Courses must be approved by the Aging Studies Program.

**Courses**

**153:029 First-Year Seminar**

Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.

**153:108 Basic Aspects of Aging**

**153:120 Service Learning in Aging Studies**

Experiential learning in settings with older adults. Prerequisites: 153:108.

**153:124 Independent Study in Gerontology**

Individual projects and/or research.

**153:130 Aging Studies Colloquium--Undergraduate**

Current trends, practices, and research in gerontology and geriatrics. Requirements: aging studies enrollment.

**153:135 Global Aging**

Demographic factors that contribute to the worldwide phenomena of population aging in context of WHO Active Aging and the United Nation’s Principles for Older Persons frameworks. Same as 042:135, 152:153.

**153:144 Medicare and Medicaid Policy**

Health policies most pertinent to Americans over age of 65. Same as 174:144.
153:145 Introduction to Geriatric Dentistry  
2 s.h.
Biological, psychological, social aspects of aging; normal aging, disease processes, pathological changes that affect oral health treatment of dental diseases and patient management. Requirements: D.D.S. enrollment or completion of dental hygiene program. Same as 112:145.

153:146 Health Promotion for Older Adults  
3 s.h.
Problems, strategic efforts toward long-term goal of health promotion; disease prevention; slowing the decline caused by chronic conditions to extend independent, rewarding lives. Same as 096:146, 169:146.

153:147 End-of-Life Care for Adults and Families  
2-4 s.h.

153:150 Psychology of Aging  
3 s.h.
The later years of human life viewed from perspectives of developmental psychology, biology, sociology. Prerequisites: 031:001. Same as 031:050.

153:153 Programs and Services for Aging Adults  
3 s.h.
Major gerontological programs and services, practitioners’ need for basic aging-practice competence; aging network; income, employment, health maintenance programs; continuum of care (preventive and well-elderly services, in-home services, community-based services, institutional care); assessment; major elder health issues, informal care; end-of-life care. Same as 042:153.

153:160 Biology of Aging  
3 s.h.
Biogerontology; definition of aging and senescence, biological theories of aging, demographics, model systems foraging, premature aging syndromes, aging of organ systems in humans.

153:161 Rhetorical Issues in Health Care  
3 s.h.
Role of rhetoric in health care practice, decisions, and ethics; rhetorical production of patient and professional selves in health care; varied practices, diverse perspectives, and situated production of medical and health care knowledge. Requirements: satisfactory completion of rhetoric General Education requirement. Same as 010:161, 160:161.

153:165 Communication Disorders and Aging  
2 s.h.
Introduction to speech, language, and hearing processes and disorders among older adults; survey of characteristics of communication and communication breakdown, remediation, and strategies for improving communication with older adults with communication disorders; primarily for nonmajors and service providers other than speech-language pathologists and audiologists. Offered spring semesters of even years. Same as 003:165.

153:168 Aging and Leisure  
3 s.h.
Status of the well elderly in relation to retirement issues, use of free time, and factors that support leisure activity; leisure services in long-term care. Same as 169:168.

153:185 Social Policy and the Elderly  
3 s.h.
Public social policies, their affect on well-being of elderly, including women and minorities; U.S. and other nations’ policies. Prerequisites: 042:143. Requirements: an introductory course on aging, and junior or higher standing. Same as 042:185.

153:186 Death/Dying: Issues Across the Life Span  
3 s.h.
Introduction to death and dying; historical, cultural, societal, personal perspectives. Requirements: admission to School of Social Work or Aging Studies Program. Same as 042:186.
153:189 Aging Studies Internship Seminar 1 s.h.

153:190 Aging Studies Internship arr.
Opportunities for students in various disciplines to relate their areas of study to elderly and aging; interdisciplinary relationships, approaches to meeting needs of elderly. Same as 042:190.

153:195 Introduction to Nursing Homes 3 s.h.
Overview of nursing home roles in context of long-term care system, characteristics of nursing home residents. Same as 042:195.

153:211 Individual and Family Development: Life Span 3 s.h.
Infancy through senescence; families from their beginnings through their later years; theoretical, methodological issues. Same as 042:211.

153:219 Aging and the Family 2-3 s.h.
Research related to aging and the family; intergenerational relations, marital status in later life, diversity of older families, caregiving, elder abuse, policy issues. Same as 042:219.

153:230 Aging Studies Colloquium 1 s.h.
Current trends, practices, and research in gerontology and geriatrics. Repeatable.

153:241 The Care of the Frail Elderly 3 s.h.
Clinical management of the elderly; emphasis on economic considerations, principles of gerontological care, common syndromes, ethical issues; clinical application experience in a long-term care setting. Prerequisites: 096:214, 096:222, and 096:224. Same as 096:241.

153:261 Epidemiology of Aging 1-2 s.h.
Epidemiologic methods for studying health and social problems of older persons; applications including research and public health practice and policy. Offered spring semesters. Prerequisites: 173:140. Same as 173:261.

153:410 State of the Science in Biobehavioral Research on Aging 3 s.h.
Analysis, evaluation of research on health of elderly, aging process; emphasis on methodological issues, instrumentation appropriate for study of biological phenomena. Requirements: (for 153:410) Ph.D. enrollment. Same as 096:410.

153:420 State of the Science in Geriatric Mental Health Research 3 s.h.
Analysis, evaluation; emphasis on program evaluation, geriatric mental health services research, methodological issues. Requirements: (for 153:420) Ph.D. enrollment. Same as 096:420.

153:430 Nursing Research in Sociocultural Phenomena and Interventions for the Elderly 3 s.h.
Sociocultural issues for aging clients, corresponding nursing interventions; theoretical orientations to dynamics of aging, transitions and role changes, social/environmental issues. Requirements: (for 153:430) Ph.D. enrollment. Same as 096:430.
American Indian and Native Studies

**Director**

**Undergraduate nondegree programs:**
Certificate, Minor in American Indian and Native Studies

**Graduate nondegree program:** Certificate in American Indian and Native Studies

**Web site:** [http://www.uiowa.edu/~ainsp/](http://www.uiowa.edu/~ainsp/)

The American Indian and Native Studies Program (AINSP) is an interdisciplinary program that focuses on the histories, cultures, literatures, and contemporary legal and political issues of Native Americans of the United States and other indigenous peoples of the Americas.

Students taking AINSP courses begin to understand historical and contemporary social issues among indigenous peoples of the Americas. They acquire expertise for jobs involving cross-cultural work through experience with ethnic, social, and political diversity. They also gain a background for more specialized or advanced work in a variety of social science disciplines, including anthropology, economics, education, geography, history, political science, psychology, and religious studies.

A certificate in AINSP complements degrees in professional areas such as health care, business, social work, and law.

The American Indian and Native Studies Program is administered by the Department of American Studies (p. 50).

## Undergraduate Programs

- Certificate in American Indian and Native Studies
- Minor in American Indian and native studies

### Certificate

The undergraduate Certificate in American Indian and Native Studies requires a minimum of 21 s.h. in courses approved for AINSP. Students must maintain a g.p.a. of at least 2.00 in work for the certificate.

The undergraduate certificate program is open to current undergraduate students and to individuals who hold University of Iowa bachelor’s degrees and are not enrolled in graduate or professional degree programs. Completion of the certificate is noted on the student’s transcript.

A student may earn the certificate or the minor in American Indian and native studies, but not both. Students plan their programs in close cooperation with AINSP faculty advisors. They may count a maximum of 6 s.h. of course work from their major toward the AINSP undergraduate certificate. Courses applied toward the AINSP certificate also may be used to complete the General Education Program (p. 381) or the requirements for a major or a minor.

The AINSP undergraduate certificate requires the following course work.

**All of these:**

- 149:049 Introduction to American Indian and Native Studies 3 s.h.
- 149:102 Introduction to American Indian History and Policy 3 s.h.
- 149:113 Native American Literature 3 s.h.

**At least 3 s.h. from these:**

- 149:076 American Indian Environmentalism 3 s.h.
- 149:110 Native Peoples of North America 3 s.h.
- 149:195 Directed Cultural Experience arr.
- 149:197 Independent Study arr.
- 149:199 Special Topics: American Indian and Native Studies arr.

**And:**

Electives chosen from courses listed under "Associated Courses" and "American Indian and Native Studies Courses" below

9 s.h.

### Minor

The minor in American Indian and native studies requires a minimum of 15 s.h., including 12 s.h. taken at The University of Iowa. Students must maintain a g.p.a. of at least 2.00 in the minor.
Course work in the minor may not be taken pass/nonpass. Students may count a maximum of 6 s.h. of course work from their major toward the AINSP minor.

The minor includes the following course work.

149:049 Introduction to American Indian and Native Studies 3 s.h.

One of these:

149:102 Introduction to American Indian History and Policy 3 s.h.
149:113 Native American Literature 3 s.h.

At least 3 s.h. from these:

149:076 American Indian Environmentalism 3 s.h.
149:110 Native Peoples of North America 3 s.h.
149:195 Directed Cultural Experience arr.
149:197 Independent Study arr.
149:199 Special Topics: American Indian and Native Studies arr.

And:

Electives numbered 070 or above chosen from courses listed under "Associated Courses" and "American Indian and Native Studies Courses" below 6 s.h.

**Cultural Experience**

The program highly recommends that students have an in-depth American Indian cultural experience, usually through study or volunteer work, before they complete their undergraduate requirements. Consult AINSP faculty advisors about available options.

**Graduate Program**

- Certificate in American Indian and Native Studies

**Certificate**

The graduate Certificate in American Indian and Native Studies requires a minimum of 20 s.h. in courses approved for AINSP and numbered 100 or above (see "Associated Courses" and "American Indian and Native Studies Courses" below). Graduate students must maintain a g.p.a. of at least 3.00 in work toward the certificate. They may count a maximum of 6 s.h. of course work from their major field of study toward the AINSP graduate certificate.

Graduate students must apply to the academic coordinator to be admitted to the AINSP graduate certificate program. Students who earned an undergraduate certificate in the program may not receive a graduate certificate.

The AINSP graduate certificate requires the following course work.

149:102 Introduction to American Indian History and Policy 3 s.h.
149:299 Independent Study Project 2 s.h.

Electives numbered 100 or above chosen from courses listed under "Associated Courses" and "American Indian and Native Studies Courses" below 15 s.h.

**Associated Courses**

The following courses are approved for AINSP. Other courses that are concerned in part with American Indians or other indigenous peoples of the Americas, or with issues relevant to them, may be used as electives to satisfy requirements for the undergraduate certificate, the minor, and the graduate certificate, subject to AINSP faculty approval.

For course descriptions, see the appropriate department sections of the Catalog.

**ANTHROPOLOGY**

113:163 Archaeology of Mesoamerica 3 s.h.
113:167 North American Archaeology 3 s.h.

**ART AND ART HISTORY**

01H:104 American Indian Art 3 s.h.
01H:105 Art of Pre-Columbian America 3 s.h.
01H:199 Topics in Art History (when content is appropriate) 3 s.h.

**EDUCATION**

07B:123 History of Ethnic/Minority Education 3 s.h.

**ENGLISH**

008:153 Native American Literature 3 s.h.

**HISTORY**

16A:131 The Frontier in American History to 1840 3 s.h.
Courses

149:005 Literatures of Native American Peoples 3 s.h.
Genres of Native American literature, including oral literature; focus on written literature (fiction, essays, poetry, drama). Prerequisites: 010:002 or 010:003, and 08G:001. Requirements: successful completion of the rhetoric requirement and then 08G:001. GE: Literary, Visual, and Performing Arts; Values, Society, and Diversity. Same as 08G:005.

149:049 Introduction to American Indian and Native Studies 3 s.h.
Themes and methodologies in the study of American Indians and other indigenous peoples; approaches from anthropology, history, law, literature, other disciplines. Offered fall semesters. GE: Values, Society, and Diversity. Same as 045:049.

149:060 Sacred World of Native Americans 3 s.h.

149:065 Sex, Gender, and Nature in the Culture of Native America 3 s.h.
Historical notions of gender, sexuality, and marriage among selected Native American cultures; how these beliefs conflicted with colonial European Christian beliefs; native peoples' sacred stories of creation and human origins compared with Euro-Christian perspectives; how Europeans' sexual and gender violence toward native peoples served as a tool of colonial oppression and conquest.

149:070 Indians and Allies 3 s.h.
Social and cultural issues facing Native Americans.

149:076 American Indian Environmentalism 3 s.h.

149:082 American Indian Women: Myth, Ritual, and Sacred Power 3 s.h.
Participation of women and girls in native religious traditions; obstacles to knowing and understanding native women’s religious roles and experiences. Same as 032:078.

149:085 Native American Material Culture 3 s.h.
Overview of American collectors and collections of Indian objects, prehistoric to contemporary. Same as 045:085.

149:099 Powwow Culture and History 3 s.h.
Service learning experience working on the American Indian powwow at The University of Iowa; academic study of history and culture of Native American powwows.

149:101 American Indian and Native Studies Seminar 1 s.h.

149:102 Introduction to American Indian History and Policy 3 s.h.

149:107 History of Mexico 3 s.h.
Mexican history since the eve of the Spanish invasion, with focus on the national period; may include ethnic groups, conquest and demographic disaster, native survival, labor and migration, social protest and rebellions, nationhood, regional differences, religions, popular culture, economic growth and distribution, state building, international relations; survey. Same as 16W:107.

149:110 Native Peoples of North America 3 s.h.

149:113 Native American Literature 3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: American Literature and Culture. PERIOD: 20th- and/or 21st-Century Literature. Same as 008:153.

149:115 Native North America I: Precontact-1789 3 s.h.
149:116 Native North America II: 1789-Present 3 s.h.

149:121 Health of Indigenous Peoples 3 s.h.
Health problems and services for indigenous populations worldwide, from perspective of Fourth World postcolonial politics. Prerequisites: 113:003 or 113:010. Same as 113:121, 152:121.

149:158 Native American Women and Religious Change 3 s.h.
Native women's diverse experiences and their roles in native societies, examined through contact experiences between native and nonnative peoples; changes in women's roles in context of interactions between native people, missionaries, European colonists, and Americans; approaches to re-imaging women's early contact roles presented in cultural narratives, archaeology, history, ethnography, and missionary records. Same as 032:158, 131:159.

149:159 Southwestern Archaeology 3 s.h.
Anthropological overview of prehistoric cultures of the American Southwest; emphasis on understanding archaeological arguments concerning major processes in the past. Same as 113:159.

149:164 American Indian/First Nations Women 3 s.h.

149:167 North American Archaeology 3 s.h.
Prehistoric cultural development north of Mexico from initial occupation to European contact and conquest; emphasis on dynamics of culture change. Same as 113:167.

149:168 American Indians in the Arts 3 s.h.
Creation and impact of American Indian representation in literature, painting, film, music, other arts; native peoples' roles in the creative process.

149:178 Federal Indian Law 3 s.h.
Specialized body of law that allocates power and authority in Indian country and has grown up around Native American peoples and their reservations; sovereignty arrangements, jurisdiction, federal Indian policy, tribal self-government. Same as 091:303.

149:195 Directed Cultural Experience arr.
In-depth American Indian cultural experience, usually study or volunteer work, under supervision of an AINSP faculty member.

149:197 Independent Study arr.

149:199 Special Topics: American Indian and Native Studies arr.
American Indians and other indigenous peoples; concepts, problems, issues.

149:299 Independent Study Project arr.
Repeatable.
American Sign Language

Chair
Richard Hurtig

Professor
Richard Hurtig

Associate professor
Douglas Baynton

Lecturers
Freeman Harper, AmyRuth McGraw, Kelly Neppl, Timothy Sheets, Robert Vizzini

Undergraduate nondegree programs:
Certificate in American Sign Language and Deaf Studies; Minor in American Sign Language
Web site: http://clas.uiowa.edu/dwllc/asl

The American Sign Language Program offers two undergraduate programs and a number of courses open to all students. They include a four-semester course sequence in American Sign Language (ASL), courses for teacher licensure (see "Hearing Impaired Endorsement for Teachers" below), and courses on fingerspelling, deaf culture, ASL literature, ASL interpreting, and other topics. The four-course ASL sequence satisfies the World Languages requirement of the General Education Program (see "Language for General Education" below). Classroom instruction is supplemented by video materials and interactive software in the Language Media Center.

The American Sign Language Program is one of the academic units in the Division of World Languages, Literatures, and Cultures (p. 289).

Undergraduate Programs

• Certificate in American Sign Language and Deaf Studies
• Minor in American Sign Language

Certificate

The Certificate in American Sign Language and Deaf Studies requires 34 s.h. The interdisciplinary program teaches students about the history, culture, and language of the American deaf community.

Completion of the certificate is noted on the student’s transcript. It confirms for potential employers and prospective graduate schools that the student has specialized knowledge in the field.

The certificate program permits students to link study in two or more disciplines into an organized investigation of a language and culture. Through the study of American Sign Language, students learn a language that is semantically and grammatically very different from their own and that operates in a different sensory channel. They also encounter a rich and complex culture, including a rapidly growing literature recorded on film and videotape since the early 20th century.

Any undergraduate student pursuing a degree from The University of Iowa may earn the certificate. Students may earn the Certificate in American Sign Language and Deaf Studies or a minor in American Sign Language, but not both.

Students may use each course required for the certificate to satisfy only one certificate requirement. But they may use a course to satisfy both a certificate requirement and a requirement for a major or for a minor in another discipline. Courses used to satisfy certificate requirements may not be taken pass/nonpass.

A maximum of 6 s.h. of transfer credit may be accepted toward certificate requirements, with the approval of the American Sign Language and deaf studies advisor.

The Certificate in American Sign Language and Deaf Studies requires completion of the four-course sequence American Sign Language I-IV (16 s.h.) or demonstration of equivalent proficiency; 6 s.h. of core courses; and 12 s.h. of approved courses in two or more disciplines.

Language Sequence

Certificate students must complete the following sequence or be able to demonstrate equivalent proficiency.

158:011 American Sign Language I 4 s.h.
158:012 American Sign Language II 4 s.h.
158:013 American Sign Language III 4 s.h.
158:014 American Sign Language IV 4 s.h.

Core Courses

Students choose at least 6 s.h. from the following core courses.

158:100/16A:104 History of the American Deaf Community 3-4 s.h.
158:101 Topics in Deaf Studies 3 s.h.
158:102 American Deaf Culture 3 s.h.
158:103 American Sign Language Literature 3 s.h.
158:104 Issues in ASL and Deaf Studies 3 s.h.
158:106 Introduction to ASL Interpreting 3 s.h.
Discipline Courses

Students complete at least four courses (12 s.h.) in two or more of the following disciplines. They may petition to have courses that are not listed below approved for certificate requirements.

Anthropology

113:014 Language, Culture, and Communication 3 s.h.

Communication Sciences and Disorders

003:117 Psychology of Language 3 s.h.
003:118 Language Acquisition 1-3 s.h.
003:185 Hearing Loss and Audiology 3 s.h.
003:244 Rehabilitative Audiology 3 s.h.

Education

07U:100 Foundations of Special Education (requires admission to the Teacher Education Program) 3 s.h.
07U:110/158:110 Teaching Deaf and Hard of Hearing Students 3-4 s.h.
07U:133 The Culturally Different in Diverse Settings 3 s.h.

History

16A:104/158:100 History of the American Deaf Community 3-4 s.h.
16A:106 Disability in American History 3 s.h.

Linguistics

103:011 Language and Society 3 s.h.
103:100 Introduction to Linguistics 3 s.h.
103:150 Language and Gender 3 s.h.

Minor

The minor in American Sign Language requires 15 s.h. of ASL course work, including 12 s.h. in courses numbered 100 or above taken at The University of Iowa, except 158:106 Introduction to ASL Interpreting, which does not count toward the minor. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass. The minor must include 158:014 or demonstrated equivalent proficiency. Students may count a maximum of one course taught in English toward the minor (158:100 History of the American Deaf Community or 158:110 Teaching Deaf and Hard of Hearing Students) and must enroll in the 4 s.h. option with discussion conducted in ASL.

Language for General Education

The American Sign Language Program offers a four-course sequence that satisfies the World Languages requirement of the College of Liberal Arts and Sciences General Education Program (p. 381). The sequence includes the following courses.

158:011 American Sign Language I 4 s.h.
158:012 American Sign Language II 4 s.h.
158:013 American Sign Language III 4 s.h.
158:014 American Sign Language IV 4 s.h.

Hearing Impaired Endorsement for Teachers

The American Sign Language Program offers courses that fulfill requirements for the Hearing Impaired Endorsement offered by the College of Education. The University of Iowa currently is the only institution in Iowa that offers this endorsement program. Holders of the endorsement are authorized to serve deaf and hard-of-hearing students from birth to age 21. Applicants to the program must hold or be in the process of completing requirements for an elementary or secondary teaching license.

Courses

158:011 American Sign Language I 4 s.h.
Conversational skills, basic grammar of ASL; introduction to the ASL cultural community through readings, videos. Taught in American Sign Language. First in a four-semester sequence. GE: World Languages First Level Proficiency.

158:012 American Sign Language II 4 s.h.
Continuation of 158:011; emphasis on ASL grammar and syntax; focus on culture through readings, videos. Taught in American Sign Language. Prerequisites: 158:011. GE: World Languages Second Level Proficiency.
158:013 American Sign Language  III
Continuation of 158:012; emphasis on ASL grammar and syntax; focus on culture through readings, videos. Taught in American Sign Language. Prerequisites: 158:012. GE: World Languages Second Level Proficiency.

158:014 American Sign Language  IV

158:015 Fingerspelling and Numbers I
Development of expressive and receptive American Sign Language fingerspelling, loan sign, and number skills based on word, phrase, and number recognition. Eight weeks. Prerequisites: 158:011.

158:016 Fingerspelling and Numbers II
Development of expressive and receptive American Sign Language fingerspelling, loan sign, and number skills based on word, phrase, and number recognition. Eight weeks. Prerequisites: 158:015.

158:100 History of the American Deaf Community
Creation of a distinct language and culture of deaf people in America during the 19th and 20th centuries. Taught in American Sign Language. Prerequisites: 158:014. Same as 16A:104.

158:101 Topics in Deaf Studies
Current topics in deaf studies; skill development in communicative fluency in ASL. Taught in American Sign Language. Corequisites: 158:014, if not taken as a prerequisite.

158:102 American Deaf Culture
Cultural practices, beliefs, values of the American deaf community. Taught in American Sign Language. Corequisites: 158:014, if not taken as a prerequisite.

158:103 American Sign Language Literature
Introduction to the world of ASL literature, as recorded on videotape or film and in live performance; traditional folklore, story telling, poetry, drama, oratory, jokes, and nonfiction narrative; analysis of genres in their social and cultural contexts as expressions of deaf experience; how historical and current issues in deaf culture are represented in literary form. Taught in American Sign Language. Corequisites: 158:014, if not taken as a prerequisite.

158:104 Issues in ASL and Deaf Studies
Current issues in American Sign Language and the American deaf community, such as linguistics, culture, literacy. Corequisites: 158:014, if not taken as a prerequisite.

158:105 Deafness in the Media
Exploration of the construct of deafness through mainstream media (e.g., commercial television, movies, fictional and nonfictional literature in print and on the Internet); various ways deaf people are constructed and presented for hearing audiences from the past 20 years, including deaf as long-suffering victims, deaf as heroes overcoming adversity, deaf as rebels against the mainstream, and deaf as lonely outcasts. Taught in American Sign Language. Corequisites: 158:014, if not taken as a prerequisite.

158:106 Introduction to ASL Interpreting
Introduction to sign language interpreting; history and current nature of the field, available employment opportunities, certification, training, ethics. Corequisites: 158:013, if not taken as a prerequisite.

158:108 Independent Study
An American Sign Language/deaf studies topic; individual study.
158:110 Teaching Deaf and Hard of Hearing Students
3-4 s.h.
Issues in deaf education—management techniques, communication strategies, teaching strategies, instructional materials, hands-on activities, assessments, parent involvement; use of technology, ethnic and cultural diversity, classroom management, pre-reading techniques, literacy development, educational program options. Taught in American Sign Language. Corequisites: 158:014, if not taken as a prerequisite. Same as 07U:110.

158:111 American Sign Language Conversation
3 s.h.
Improvement of receptive and expressive conversational ASL skills through small group discussion, class presentations. Taught in American Sign Language. Corequisites: 158:014, if not taken as a prerequisite.
American Studies

Chair
Susan Birrell

Professors
Susan Birrell (American Studies/Gender, Women’s, and Sexuality Studies), Kim Marra (American Studies/Theatre Arts), Horace A. Porter (F. Wendell Miller Professor of English and American Studies), Lauren Rabinovitz (American Studies/Cinema and Comparative Literature)

Professors emeriti
Richard P. Horwitz, John Raeburn (American Studies/English), Albert E. Stone (American Studies/English)

Associate professors
Lafayette Adams (English/American Studies), Catriona Parratt, Laura Rigal (English/American Studies), Harilaos Stecopoulos (English/American Studies), Deborah Whaley (American Studies/African American Studies), Nicholas Yablon

Lecturer
Megan Chawansky

Undergraduate degrees:
• B.A. in American Studies
• B.A. in Sport Studies

Undergraduate nondegree programs:
• Minor in American Studies
• Minor in Sport Studies

Graduate degrees:
• M.A., Ph.D. in American Studies

Web site: http://www.uiowa.edu/~amstud

The Department of American Studies provides an interdisciplinary introduction to American culture, past and present. It helps students acquire a broad familiarity with the dynamics of cultural experience and explore aspects of life in the United States, such as sport, popular and fine arts, institutions, values, gender and ethnic relations, artifacts, and the everyday life of a diverse citizenry.

The department also is the administrative home of the American Indian and Native Studies Program, which offers a certificate for undergraduate and graduate students; see American Indian and Native Studies (p. 42) in the Catalog.

Undergraduate Programs

• Major in American studies (Bachelor of Arts)
• Major in sport studies (Bachelor of Arts)
• Minor in American studies
• Minor in sport studies

Bachelor of Arts: American Studies

The Bachelor of Arts with a major in American Studies requires a minimum of 120 s.h., including 36 s.h. of work for the major. Students must earn at least 24 s.h. for the major at The University of Iowa. All students must complete the College of Liberal Arts and Sciences General Education Program (p. 381).

The major in American studies stresses broad training in cultural analysis and communication. Although it offers no explicit vocational training, the program provides preparation for careers in business, education, government, journalism, or social service; for advanced study in the humanities, the social sciences, theology, or business; or for professional study in law or medicine. American studies students may arrange internships through the University’s Pomerantz Career Center.

A distinctive feature of the American studies major is the opportunity to develop broad training in cultural analysis as well as emphasis of particular interests within the study of American culture. With the help of their American studies advisors, students may elect to pursue one of five focus areas within American studies, or they may create an individual plan of study. Each focus area allows students to group courses in American studies and other departments around a specific interdisciplinary theme, topic, or set of social issues; see “American Studies Focus Areas” below.

Shortly after declaring the major, a student should meet with his or her faculty advisor to explore the range of course work available and to begin shaping an individual plan of study. By the student’s second term in the major, the student and advisor should have agreed upon a plan of study and focus area for completing the requirements for the major.

The major in American Studies usually requires the following 12 courses.

<table>

American Studies Focus Areas

Students should consult regularly with the Department of American Studies about
courses offered by American studies and other departments that count toward each focus area. A maximum of two courses from a single department outside American studies may be counted toward a single focus area.

ETHNIC STUDIES, DIVERSITY, AND DIFFERENCES

Students choose this focus to develop interdisciplinary understanding of an individual ethnic and/or racial group (e.g., Latino/a studies, Jewish-American studies) or to examine broadly gender, race, sexuality, social class, region, national origins, and age in the United States. Emphasis is on the historic emergence of categories of social difference, especially as revealed in cultural practices and artifacts, geography and cityscapes, leisure, and popular expression.

AMERICAN ARTS, LITERATURE, AND POPULAR CULTURE

Students who choose this focus examine artistic creations to discover how they are shaped by cultural preconceptions, norms, and standards, and how in turn these expressive forms affect ongoing developments in cultural life. Emphasis is on skills in the formal analysis of artistic artifacts, historical inquiry, and cultural contextualization.

AMERICAN SOCIETY, POLITICS, AND EVERYDAY LIFE

Students who choose this focus consider the dynamics of social change, the emergence and fate of political movements, and the forms and practice of everyday life in America. The area encompasses the tradition of revolution in America, the effects of technological and economic change, and the roles of the family, workplace, and community from the colonial era to the digital age.

THE POLITICS OF NATURE: ENVIRONMENT, SUSTAINABILITY, AND LANDSCAPE

Students who choose this focus explore how Americans from pre-Columbian times to the present have shaped and regarded the natural environment. Topics might include the perception of wilderness in early America; the relationship of Native American peoples to the land; the impact of industrialization and urban growth on the environment; the emergence of a cult of nature; the treatment and representation of animals; the mass production, distribution, and consumption of food; and the growing movement for sustainability in agriculture, architecture, urban planning, and individual lifestyles.

SPORT AND POPULAR AMUSEMENT

Students who choose this focus examine the various sports, recreational activities, and popular amusements enjoyed in the United States from colonial and early America to the present. They examine the relationship between work and play, the role of technology and the media, the commercialization of sport, and the politics of gender, race, class, sexuality, and disability.

INDIVIDUALLY DESIGNED FOCUS AREAS

Individually designed focus areas may concentrate on an interdisciplinary topic, theme, group of people, or time period. Students who wish to design their own interdisciplinary focus area should consult with their American studies advisor for appropriate courses.

Bachelor of Arts: Sport Studies

The Bachelor of Arts with a major in sport studies requires a minimum of 120 s.h., including 45 s.h. of work for the major (30 s.h. in sport studies and 15 s.h. in an outside specialization area or a minor). At least 24 s.h. of credit for the major must be earned at The University of Iowa. Students also must complete the College of Liberal Arts and Sciences General Education Program (p. 381).

Admission to the sport studies major is selective; see “Admission to the Sport Studies Major” below.

The sports studies major is for students who want to examine sport in its historical and contemporary cultural contexts. Course work provides students with the critical skills necessary to understand the cultural significance of sport as it relates to the media, the economy, the political system, and the educational system. A focus on the race, class, and gender differences in the sport experience is central to the major.

Many students use their experience in the program to prepare for graduate school. For others, the required second concentration area or minor serves as an introduction to careers in a number of fields, such as sport journalism, sport management, or coaching.

The major in sport studies requires the following course work.

SPORT STUDIES FOUNDATION

Students should complete the foundation courses as early as possible.

Both of these:

028:074 Inequality in American Sport 3 s.h.
045:001 Understanding American Cultures 3 s.h.
## SPORT STUDIES CORE

Students must complete one course from each of the following four content areas (total of 12 s.h.).

### Diversity in sport—one of these:
- 028:078 Women, Sport, and Culture 3 s.h.
- 028:079 Race and Ethnicity in Sport 3 s.h.

### International dimensions—one of these:
- 028:176 Sport and Nationalism 3 s.h.
- 028:177 Sport in the Western World 3 s.h.

### Contemporary sport in America—one of these:
- 028:175 Sport and the Media 3 s.h.
- 028:188 American Sport Since 1900 3 s.h.

### History of sport and leisure in America—one of these:
- 028:178 American Sport to 1900 3 s.h.
- 028:179 The American Vacation 3 s.h.

## ELECTIVES

Students must complete at least 12 s.h. of approved elective courses; the department suggests courses from the following list. Students may also include courses from the sport studies core (above) that they have not already taken.

- 06E:165 Sports Economics 3 s.h.
- 06T:151 Professional Sports Management 3 s.h.
- 16A:139 The Social History of American Baseball 3 s.h.
- 019:091 Media History and Culture 3 s.h.
- 019:095 Media and Consumers 3 s.h.
- 019:164 Images and Society 3 s.h.
- 20E:075 Ancient Sports and Leisure 3 s.h.
- 026:102 Introduction to Ethics 3 s.h.
- 027:076 Psychological Aspects of Sport and Physical Activity 3 s.h.
- 028:171 Baseball in America 3 s.h.
- 028:084/045:084 Sport and Film 3 s.h.
- 028:180 Theory and Ethics of Coaching 3 s.h.
- 028:191 Sport Studies Internship 3 s.h.
- 028:193 Independent Study arr.
- 028:194 Honors Project 1-3 s.h.
- 034:066 Social Inequality 3 s.h.
- 045:065 Disney in America 3 s.h.
- 045:152 Fairs and Amusement Parks 3 s.h.

## OUTSIDE SPECIALIZATION AREA OR MINOR

All sport studies students must complete 15 s.h. of course work in a specialization area outside the major (e.g., American studies; business; gender, women’s, and sexuality studies; journalism and mass communication). Work for the specialization must include 6 s.h. earned in 100-level courses or in courses that are designated advanced by the department or program that offers them. Specialization area courses may not be taken pass/nonpass.

Students select their specialization area in consultation with their advisor, and they must have their advisor’s written approval for specialization.

Students also may satisfy the specialization requirement by earning a minor in another discipline. It is the student’s responsibility to ensure that he or she has satisfied the requirements for the minor.

## Admission to the Sport Studies Major

Admission to the sport studies major is selective. To declare the major, students must have completed at least 24 s.h. of course work and must have an overall g.p.a. of at least 2.50. Students who meet these requirements may declare the major at the Academic Programs & Student Development office or through their advisors at the Academic Advising Center. Students who do not have a g.p.a. of at least 2.50 but would like to be considered for exceptional admission should file a written appeal that includes relevant documentation or evidence to the Department of American Studies.

## B.A. with Coaching Authorization or Endorsement

Students may prepare for coaching by completing additional course work that also qualifies them for a coaching authorization from the State of Iowa. The following courses are recommended.

- 027:053 Human Anatomy 3 s.h.
- 027:057 Basic Athletic Training 3 s.h.
- 027:117 Human Growth and Motor Development 3 s.h.
- 028:180 Theory and Ethics of Coaching 3 s.h.

Students who successfully complete the requirements for the coaching authorization must submit an application to the Iowa Board of Educational Examiners. For more information, visit...
Coaching Authorization FAQs on the board’s website.

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

Bachelor of Arts: American Studies

Before the third semester begins: at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: declaration of the major, discussion of a plan of study with an American Studies advisor, and at least one-half of the semester hours required for graduation

Before the seventh semester begins: at least six courses from the plan of study and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: at least nine courses from the plan of study

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Bachelor of Arts: Sport Studies

Before the third semester begins: completion of at least 30 semester hours

Before the fifth semester begins: acceptance into the sport studies major and completion of at least 60 semester hours

Before the sixth semester begins: area of specialization determined

Before the seventh semester begins: completion of at least six sport studies courses and at least 90 semester hours

Before the eighth semester begins: completion of at least eight sport studies courses and at least three courses in the area of specialization

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Honors

Honors in American Studies

The American studies honors program offers students the opportunity to pursue special interests in individual, in-depth research. Honors students must be members of the University of Iowa Honors Program, which requires that students maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University of Iowa Honors Program for more information).

Under the guidance of the undergraduate honors advisor, honors students define a research project. Project proposals ideally are made by the end of the junior year. Each student completes the project under the guidance of a supervising faculty member and may register for up to 6 s.h. in 045:095 Honors Project.

Results of the research project are presented in a senior essay to a committee of three faculty members, including the supervising faculty member, the honors advisor, and a third faculty member of the student’s choice. (When the honors advisor is the supervising faculty member, the student may select the other two faculty members.) The student’s committee may choose to hear an oral defense of the final project, usually in the 12th week of the last semester.

Honors in Sport Studies

The sport studies honors program offers students the opportunity to pursue special interests in individual, in-depth research. Honors students must be members of the University of Iowa Honors Program, which requires that students maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University of Iowa Honors Program for more information).

Under the guidance of an undergraduate advisor, honors students define a research project. Project proposals ideally are made by the end of the junior year. Each student completes the project under the guidance of a supervising faculty member and may register for up to 3 s.h. in 028:194 Honors Project.

Honors students must make an oral or poster presentation of the honors thesis in a venue approved by the supervising faculty member.

Minor in American Studies

The minor in American studies requires a minimum of 15 s.h. in American studies courses, including 12 s.h. in advanced courses taken at The University of Iowa. For the minor, courses numbered above 045:001 are considered advanced. Students must maintain a g.p.a. of
at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass. Students interested in earning the American studies minor should consult with one of the department’s faculty members.

**Minor in Sport Studies**

The minor in sport studies requires a minimum of 15 s.h. in University of Iowa sport studies courses (prefix 028), including at least 6 s.h. in 100-level courses. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass. Transfer credit may not be counted toward the minor. Students select courses for the minor according to their interests and the recommendation of the undergraduate coordinator.

**Certificate in American Indian and Native Studies**

The Department of American Studies administers the American Indian and Native Studies Program, which offers a certificate for undergraduate and graduate students and a minor for undergraduates; see American Indian and Native Studies (p. 42) in the Catalog.

**Graduate Programs**

- Master of Arts in American studies (with or without thesis)
- Doctor of Philosophy in American studies (sport studies subtrack available)

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate (p. 1117) College section of the Catalog.

**Master of Arts**

The Master of Arts program in American studies requires a minimum of 36 s.h. of graduate credit and is offered with or without thesis. It may be a terminal degree or preliminary to a Ph.D. in American studies or another discipline.

All M.A. students take the following courses.

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>045:200</td>
<td>Theory and Practice of American Studies I</td>
<td>6</td>
</tr>
<tr>
<td>045:201</td>
<td>Theory and Practice of American Studies II</td>
<td>6</td>
</tr>
</tbody>
</table>

Two other core courses in American studies 6 s.h.

Students also select five to eight additional courses relevant to a topic or period of cultural history. These courses may be grouped to address more than one topic and must be chosen from more than one discipline; they usually include at least two courses in American history and courses focusing on American diversity.

Master’s degree candidates must perform satisfactorily in 045:400 Masters Preparation (3 s.h.), which includes a comprehensive examination on course work and basic concepts.

Students who choose the thesis option may earn up to 6 s.h. for thesis work. Students interested in the thesis option should consult the program chair for details.

**Joint M.A./J.D.**

The Department of American Studies and the College of Law offer a joint Master of Arts/Juris Doctor. The M.A./J.D. program provides a broad cultural context for the study and practice of law. Similar joint programs can be arranged in other professional fields, such as journalism and social work.

Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the joint degree program. For information about the J.D., see the College of Law (p. 1215) section of the Catalog.

**Doctor of Philosophy**

The Doctor of Philosophy program in American studies requires a minimum of 72 s.h. of graduate credit. Students may focus in American studies or choose the sport studies subtrack.

Each student works with his or her faculty advisor to map out a coherent plan of study that reflects the student’s particular interests. Students are permitted considerable flexibility in constructing their study plan, but they must meet certain basic requirements, which include foundation courses, area foundation courses, two interdisciplinary fields of concentration, a research skills course, elective course work, and a dissertation.

The two fields of concentration may be defined to correspond with the student’s strongest intellectual interests, but they must be interdisciplinary in concept and multidisciplinary in scope. Each must include course work from more than one of the University’s departments and programs. The two concentration areas may, and usually should, have an intellectual relationship with each other.

Students are expected to address the cultural diversity of American life in their course work and reading.
The Doctor of Philosophy requires the following work. Some course requirements are different for American studies and sports studies.

**Course Work**

**Required Foundation Courses**
All students complete the required foundation courses and should take them as early as possible.

- 045:200 Theory and Practice of American Studies I 3 s.h.
- 045:201 Theory and Practice in American Studies II 3 s.h.

**Area Foundation Courses**
American studies students:
- Two American studies graduate seminars 6 s.h.

Sport studies students:
- 028:276 Sport in U.S. Culture 3 s.h.
- 028:374 Seminar in Sport History 3 s.h.

**First Field of Concentration**
American studies students:
- Courses in an interdisciplinary field with a historical concentration, designed with the advisor and approved by the department's Plan of Study Committee 18 s.h.

Sport studies students:
- 028:278 Seminar: Women in Sport 3 s.h.
- 028:378 Seminar in Cultural Studies of Sport 3 s.h.
- Interdisciplinary sport studies courses 12 s.h.

**Second Field of Concentration**
American studies and sport studies students:
- Courses in an interdisciplinary field designed with the advisor and approved by the department's Plan of Study Committee 18 s.h.

**Research Skills**
American studies students:
- 045:550 Dissertation Writing Workshop 3 s.h.

Sport studies students:
- 028:295 Sport Studies Workshop 1 s.h.

**Additional Requirements**
American studies and sport studies students:
- Dissertation work (045:600 Ph.D. Thesis) and electives 21 s.h.

**ADMISSION TO PH.D. CANDIDACY**
Admission to Ph.D. candidacy signifies that the department judges the doctoral student qualified to take the comprehensive examination. Doctoral students advance to Ph.D. candidacy based on a review conducted during their second year in the Ph.D. program (typically during fall semester); the review assesses the student’s readiness to complete his or her studies through the comprehensive examination and the dissertation, which is an original work of scholarship. In addition to judging the student’s readiness for Ph.D. candidacy, the review provides a progress report on the student’s work and a tentative prognosis for future prospects in the field.

**COMPREHENSIVE EXAMINATION**
The comprehensive examination comprises three written exams and one oral exam. One of the written exams differs for students who were admitted to the Ph.D. program before fall 2007 and those who were admitted fall 2007 and after.

Students admitted before fall 2007 write the position paper in advance of the rest of the comprehensive examination and under the supervision of an American studies faculty member. In the position paper, the candidate lays out his or her general approach to American cultural studies and provides an exemplification of that approach.

Students admitted after fall 2007 complete Field #1: American Studies under the supervision of an American studies faculty member, who also chairs the comprehensive examination. The candidate takes a timed, take-home written exam of no less than four hours and no longer than two days; the exam details the candidate’s approach to American studies (methods and models), including his or her position and critical engagement with models of American studies scholarship.

The remaining two written exams explore the candidate’s major fields; these are at least four hours long and may be given on a take-home basis at the examiner’s discretion.

The oral exam covers material from the written exams and/or position paper.
**DISSECTATION**

The final requirement for the Ph.D. in American studies is the dissertation, a substantive book-length manuscript that involves interdisciplinary research and analysis and that represents an original contribution to knowledge. All Ph.D. dissertations must be approved by a committee of five faculty members, including at least two from the Department of American Studies.

**Internships**

Qualified graduate students in American studies can arrange internships with a number of local agencies, including the State Historical Society of Iowa, the Division of Historic Preservation, the University of Iowa Museum of Art, the Iowa Humanities Board, Brucemore, the Herbert Hoover Presidential Library and Museum, and the Putnam Museum. With special permission, candidates conducting research during such on-the-job training may receive academic credit through 045:320 Independent Study. Other internships with social agencies, government, or business also may be arranged.

**Resources**

The Department of American Studies is home to the Center for Ethnic Studies and the Arts, which is devoted to studying relationships among minority communities and the arts. The center supports individuals who specialize in individual ethnic studies as well as those interested in how cultural diversity defines and enriches the arts. To learn more, visit the Center for Ethnic Studies and the Arts web site.

**Courses**

**American Studies, Primarily for Undergraduates**

045:001 **Understanding American Cultures**

3 s.h.

The United States in historical, contemporary, and transnational perspective; social and cultural diversity and conflict in American life; debates on concepts of America, the American Dream, national culture, citizenship. GE: Values, Society, and Diversity.

045:005 **American Issues**

3 s.h.

Representative issues: radio and American culture; cultural history of the Civil War era; American history, literature, culture.

045:020 **Sources for American Studies**

3 s.h.

Variety of historic and contemporary sources, such as literature, law, photography, painting, film, TV, music, fashions, environments, events of everyday life.

045:025 **Diversity and American Identities**

3 s.h.

History and variety of American identities, examined through citizenship, culture, social stratification; conflict and commonalities among groups according to race, ethnicity, gender, class, sexuality; how art, literature, music, film, photography, and other cultural artifacts represent diversity of identities.

045:030 **Introduction to African American Culture**

3 s.h.

Interdisciplinary look at Black culture in the United States through significant contributions of the humanities (music, art, literature, drama, philosophy) to development of Black culture. GE: Values, Society, and Diversity. Same as 129:061.

045:049 **Introduction to American Indian and Native Studies**

3 s.h.

Themes and methodologies in the study of American Indians and other indigenous peoples; approaches from anthropology, history, law, literature, other disciplines. Offered fall semesters. GE: Values, Society, and Diversity. Same as 149:049.

045:050 **Food in America**

3 s.h.

Cultural significance of production, distribution, and consumption of food in the United States. GE: Values, Society, and Diversity.
045:060 Sex and Popular Culture in the Postwar U.S.  
Critical and historical introduction to representation of human sexuality in American popular culture from World War II to the present. GE: Values, Society, and Diversity. Same as 131:061.

045:065 Disney in America  
How Walt Disney Corporation has influenced American cultural values, ideals, and experiences through its evolution from an animation company in the 1920s, to a theme park company and television producer in the 1950s, to a media conglomerate today; the corporation’s national importance, Hollywood’s contributions to the Depression and World War II, postwar urban and community planning, America’s changing leisure behavior, advertising and childhood, modern business history, and exportation of American culture. Same as 048:062.

045:074 Inequality in American Sport  
Sport experiences, barriers to participation based on sexism, racism, classism, ageism, heterosexualism. Same as 028:074, 131:074.

045:075 American Popular Music  

045:080 American Political Humor  
How political humor reflects and influences American attitudes regarding government institutions, elected officials, the democratic process; how humor works; examples from Revolutionary War present and from varied media, including cartoons, fiction, film, television, the Internet.

045:084 Sport and Film  
Exploration of sport films as a distinct genre using narrative and formal analysis; focus on U.S. films. Same as 028:084.

045:085 Native American Material Culture  
Overview of American collectors and collections of Indian objects, prehistoric to contemporary. Same as 149:085.

045:090 Seminar in American Cultural Studies  
Interdisciplinary perspectives on a single theme or period.

045:095 Honors Project  
arr.  
Independent interdisciplinary research, writing.

045:100 Independent Study  
arr.  

American Studies for Undergraduate and Graduate Students

045:102 Black Popular Music  
History and expressive culture of people of African descent living in America through popular music forms; historical time span between the 17th and 21st centuries; poetry, music, cultural analysis, film, and art as sources for the study of Black music; genres covered include spirituals and gospel, blues, jazz, rock, rhythm and blues, Afropunk, alternative and neo soul, and hip-hop. Recommendations: 045:030 and 129:060. Same as 129:102.

045:105 Native Peoples of North America  

045:118 American Women Playwrights: 1776-Present  
How women in the United States have expressed themselves in theatre since 1776; diversity of voices in works by African American, Asian American, Latina, Native American, European American, lesbian playwrights; female-authored drama and production in relation to concurrent male-authored traditions and socioeconomic, political, cultural phenomena. Same as 049:118.
045:123 American Literature and History
Examination of fictional histories (novels about history), their relationship to historical interpretation. English majors may apply this course to the following area and/or period requirement. AREA: American Literature and Culture. PERIOD: 18th- and/or 19th-Century Literature, or 20th- and/or 21st-Century Literature. Same as 008:123.

045:129 African American Cinema and Culture
African American contribution to U.S. cinema in context of African American and American culture. Same as 048:129.

045:135 The Social Construction of Whiteness
Whiteness as a socially constructed racial category with material effects in everyday life; race as a category with salience in determining public policy, forming identities, and shaping people’s actions; interdisciplinary approach using social history, philosophy, science, law, literature, autobiography, film, and the expressive arts.

045:139 Race, Gender, Class, and the American Frontier
How race, gender, and class shape cross-cultural encounter and imperial expansion on regional frontiers; how frontiers are represented in literature, art, and film.

045:140 American Subcultures
Theories and practices of youth subcultures, mainly 1970s-1990s American (e.g., punks, skinheads, rappers); how youth subcultures, as popular generational forms of identification, intersect with other compelling markers of collective identity, especially race, class, gender, and sexuality; relevant texts from varied media and genres, including fiction, sociology, film, music, popular fashion, others.

045:145 Immigration and American Culture
Immigrants and immigrant communities.

045:147 American Disasters
Fault lines of American society and culture as exposed during catastrophe; history of American disaster investigated through methods from cultural history, visual theory, sociology, and media studies; varied disasters 1800 to present, including those involving cities (Chicago fire, San Francisco earthquake, Chicago heat wave), transportation (Titanic, Challenger, Columbia), and environment (Union Carbide and Bhopal, Exxon Valdez); causes of catastrophes; how Americans react and are drawn to catastrophe (e.g., disaster films, jokes); related topics, including technology, urbanism, race, class, apocalyptic religion, journalism, popular culture.

045:150 Topics in American Cultural Studies
Special topics in American history, literature, culture.

045:151 American Business Cultures
Historical and contemporary records of business and corporate experiences as part of American life and thought, including representations of business in American novels, movies, history, autobiography; emphasis on questions of relationships between gender, ethnicity, class, and sexuality and corporate identities.

045:152 Fairs and Amusement Parks
Nineteenth- and twentieth-century international expositions, amusement parks, and theme parks as cultural events of U.S. self-definition.

045:153 The Civil Rights Movement
History of the American civil rights movement. Same as 129:153.

045:159 Representations of Revolution
Cultural politics of the revolutionary tradition in American culture from 1776 to 1976.
045:160 American Cityscapes 3 s.h.
Changing conventions in representation of American cities between the 1830s and 1930s; fiction and nonfiction, visual and audiovisual culture.

045:163 American Ruins 3 s.h.
Emergence and development of American fascination with ruins, from indigenous to urban-industrial remains; actual ruins and depiction of imagined ruins in art, literature, cinema.

045:165 The Culture of Nature 3 s.h.
How ideas of “the natural” and “the cultural” underpin beliefs, laws, and social practices; relationship between these two concepts; construction of notions of a natural world; idea of landscape and nature as a resource to be used, appreciated, articulated, or enjoyed; focus on analysis of relationships to animals.

045:167 Reading and Writing the History of the Environment 3 s.h.
Culture and society bind human communities to the natural world that supports them; local landforms and waterways in Iowa have shapen, and been shaped by, human uses and meanings; the past inheres in present-day struggles over land and water use, see local landscapes historically; deploy skills of environmental history to understand the historical and cultural roots of present-day conflicts over land use and appreciate how beliefs, rituals, recreational practices, and technologies attach human beings to places in which they live.

045:170 American Regional Identities 3 s.h.
Regional identity across regions of the United States; literary, visual, and popular representations of regional identity.

045:173 U.S. Women’s History as the History of Human Rights 3-4 s.h.
History of human rights in the United States traced through the perspective of women; aspects of women’s experience (social, political, intellectual) related to fundamental human rights—right to a nationality, right to life, liberty and personal security, right to freedom of movement, right to take part in the government of their country, right to own property; these and other rights specified by the United Nations in the Universal Declaration of Human Rights, 1948; different history of men and women enjoying these rights; how human rights have been constructed and experienced in the United States from the era of colonial settlement to present. Same as 131:173, 16A:173, 216:173.

045:174 The American Vacation 3 s.h.
Social history of vacations; cultural significance of contemporary patterns; focus on how experiences and meanings are shaped by race, class, gender. Same as 028:179.

045:178 American Sport to 1900 3 s.h.
Growth and institutionalization of sport from colonial times to 1900. Same as 028:178.

045:185 America in the World 3 s.h.
How U.S. activity influences lives worldwide.

045:188 American Sport Since 1900 3 s.h.
Historic development of sport in the United States since 1900; economic forces, professional football and baseball. Same as 028:188.

045:193 American Photography 3 s.h.
Popular and art photographs as expressions of American life, thought.

045:195 American Cultures and American Photography 3 s.h.
Introduction to visual, cultural, and historical frameworks to view and interpret photographs as material artifacts.

American Studies, Primarily for Graduate Students

045:200 Theory and Practice of American Studies I 3 s.h.
Theories, methods, cases in culture studies; emphasis on social science approaches. Requirements: American studies graduate standing.

Sport Studies for Undergraduate and Graduate Students

028:029 First-Year Seminar 1-2 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.

028:074 Inequality in American Sport 3 s.h.
Sport experiences, barriers to participation based on sexism, racism, classism, ageism, heterosexuality. Same as 045:074, 131:074.

028:078 Women, Sport, and Culture 3 s.h.
Feminist analysis of girls’ and women’s sport experiences; reproduction of gender through sport, recent changes in women’s intercollegiate athletics, media representations of women in sport, feminist critiques, alternatives to sport. Same as 131:078.

028:079 Race and Ethnicity in Sport 3 s.h.
Structural and ideological barriers to racial and ethnic equality in sport, with focus on African American sport experiences; historical and contemporary issues, media representations. Same as 129:079.

028:084 Sport and Film 3 s.h.
Exploration of sport films as a distinct genre using narrative and formal analysis; focus on U.S. films. Same as 045:084.

028:171 Baseball in America 3 s.h.
Forces that influenced political, economic, and social development of professional baseball in the United States; rise of major league baseball, its relationship to the minor leagues, and development of organized baseball industry.

028:175 Sport and the Media 3 s.h.
Representations of sport in television, the press, fiction, films, biographies, adolescent fiction.

028:176 Sport and Nationalism 3 s.h.
Role of sport in the phenomenon of nationalism; selected theories; case studies on Ireland, Australia, British West Indies, Cold War U.S., fascist Europe.

028:177 Sport in the Western World 3 s.h.
Development of Western sport; relation to social, political, economic, intellectual factors.

028:178 American Sport to 1900 3 s.h.
Growth and institutionalization of sport from colonial times to 1900. Same as 045:178.

028:179 The American Vacation 3 s.h.
Social history of vacations; cultural significance of contemporary patterns; focus on how experiences and meanings are shaped by race, class, gender. Same as 045:174.

028:180 Theory and Ethics of Coaching 3 s.h.
Philosophical bases, ethical issues; theoretical, practical applications.

028:188 American Sport Since 1900 3 s.h.
Historic development of sport in the United States since 1900; economic forces, professional football and baseball. Same as 045:188.

028:191 Sport Studies Internship 3 s.h.
Application and synthesis of classroom concepts in the professional practice setting; setting arranged by student in an agency under close supervision of professionals in student’s area of study (i.e., agency supervisor evaluates internship from practice perspective, UI supervisor evaluates internship from academic perspective); active learning course, includes academic assignments and projects. Recommendations: 85 s.h. and g.p.a. of 2.50 or above.

028:193 Independent Study arr.
Problem in a specific area.
028:194 Honors Project 1-3 s.h.

028:198 Topics in Sport Studies 1-3 s.h.
Sport studies or health promotion topics.

028:202 Critical Theories for Sport 3 s.h.
Application of critical theories to cultural meanings and issues of sport, health, physical activity. Same as 045:202.

028:257 Nonprofit Organizational Effectiveness I 3 s.h.

028:258 Nonprofit Organizational Effectiveness II 3 s.h.

028:276 Sport in U.S. Culture 3 s.h.
Sport as a significant cultural form in the United States; focus on institutional relationships between sport and politics, economy, education, and media; role of sport in cultural reproduction. Same as 045:276.

028:278 Seminar: Women in Sport 3 s.h.
Women’s sport involvement from ancient times to present; focus on social class, attitudes, religion, race, ethnicity, medical opinion, economic considerations, political events, educational philosophies that have influenced women’s sport participation. Same as 045:278, 131:254.

028:290 Graduate Internship 1-4 s.h.

028:295 Sport Studies Workshop 1 s.h.
Development of individual research projects for group discussion. Same as 045:296.

028:298 Seminar: Topics in Sport Studies 1-3 s.h.
Sport studies or psychology of sport and physical activity topics. Same as 045:298.

028:299 Independent Study arr.
Repeatable.

028:374 Seminar in Sport History 3 s.h.
Topics in sport history; theoretical and methodological issues. Repeatable. Requirements: health and sport studies graduate standing.

028:378 Seminar in Cultural Studies of Sport 3 s.h.
Current theoretical debates in sociology of sport; applications of cultural studies to critical analysis of sport.

028:398 Thesis: M.A. 1-6 s.h.
Repeatable.

Repeatable.
Anthropology

Chair
James Enloe

Professors
Michael Chibnik, Russell Ciochon (Anthropology/Pediatric Dentistry), James Enloe, Ellen Lewin (Gender, Women’s, and Sexuality Studies/Anthropology), Sonia Ryang, Toni Tripp Reimer (Nursing/Anthropology)

Professors emeriti
Melanie Dreher (Nursing/Anthropology/Community and Behavioral Health), Mac Marshall, Margery Wolf

Adjunct professor
Frank Salomon

Associate professors
Robert Franciscus, Laura Graham, Meena R. Khandelwal (Anthropology/Gender, Women’s, and Sexuality Studies), Katina Lillios, Erica Prussing (Anthropology/Community and Behavioral Health), Scott Schnell, Christian Simon (Internal Medicine/Anthropology), Glenn Storey (Classics/Anthropology)

Associate professors emeriti
Marshall B. McKusick, Douglas Midgett

Adjunct associate professor
Kevin Kelly

Assistant professors
Margaret Beck, Adi M. Hastings, Matthew E. Hill, Emily Wentzell

Adjunct assistant professors
John Doershuk, Nathan Holton, Stephen C. Lensink, Dongwang Liu, Melody K. Pope, William Whittaker

Adjunct instructors
Joe A. Artz, Shirley J. Schermer

Undergraduate degrees: B.A., B.S. in Anthropology
Undergraduate nondegree program: Minor in Anthropology
Graduate degrees: M.A., Ph.D. in Anthropology
Web site: http://www.uiowa.edu/~anthro

Anthropology is the comparative study of peoples and cultures past and present. The discipline’s four major subfields—cultural anthropology, biological anthropology, linguistic anthropology, and archaeology—have important connections to other social sciences, physical and biological sciences, and to the arts and humanities.

Anthropology provides a framework for understanding the relation of human beings to their natural environment and to the social and cultural worlds they create and inhabit. The field provides insight into biological and sociocultural evolution and includes a focus on economic, social, and political organizations, symbolic systems, and social systems. Comparative studies of these and other aspects of past and present cultures yield information on regularities and differences.

In addition to offering undergraduate and graduate degree programs, the Department of Anthropology administers the University’s Museum Studies (p. 578) Program, which offers an undergraduate certificate.

Undergraduate Programs

• Major in anthropology (Bachelor of Arts, Bachelor of Science)
• Minor in anthropology

The major in anthropology prepares individuals for advanced training or careers in anthropology, allied fields, and professional programs. Students who complete an anthropology major gain special understanding of human relations and expertise for jobs involving international or cross-cultural work, cultural resource management, and social and ethnic diversity in the United States.

Upon graduation, anthropology majors embark on careers in government work, international affairs, public health, gerontology, urban and regional planning, conservation, social work, marketing, museum work, and education. Others pursue graduate study in law, business, and health care as well as anthropology and related social science disciplines. Some are employed in cultural resource management.

Bachelor of Arts, Bachelor of Science

The Bachelor of Arts with a major in anthropology requires a minimum of 120 s.h., including 33 s.h. of work for the major. The B.A. is designed to offer a comprehensive overview of anthropology’s four main subfields and the broadest possible cross-cultural background.

The Bachelor of Science with a major in anthropology requires a minimum of 120 s.h., including 42 s.h. of work for the major. The B.S. is appropriate for students with interests in any of anthropology’s subfields; it offers enhanced opportunities to gain experience and develop skills in research methods and scientific reasoning.
B.A. and B.S. students in anthropology may elect to complete one of three optional emphases; see "Undergraduate Emphasis Areas" below.

All undergraduates majoring in anthropology, including transfer students, must earn a minimum of 15 s.h. for the major at The University of Iowa. Students may apply credit earned at approved field schools offered by other institutions toward the major, with Department of Anthropology approval.

Students must complete the College of Liberal Arts and Sciences General Education Program (p. 381).

Students who declare anthropology as their major when they are admitted to the College of Liberal Arts and Sciences are advised at the Academic Advising Center until they have earned 24 s.h. Students who have earned more than 24 s.h. are advised in the department. Students are assigned an advisor based on faculty advisor loads and student interests.

Common Requirements

All anthropology majors (B.A. or B.S.) must complete the following requirements.

One of these (students may count only one toward the major):

113:003 Introduction to the Study of Culture and Society 3 s.h.
113:010 Anthropology and Contemporary World Problems 3 s.h.

All of these:

113:012 Introduction to Prehistory 3 s.h.
113:013 Human Origins 3 s.h.
113:014 Language, Culture, and Communication 3 s.h.
113:050 Issues in Anthropology 3 s.h.
One 100-level course in archaeology (area or topical) or biological anthropology
One 100-level course in sociocultural or linguistic anthropology
One 100-level course in area studies
Three 100-level electives

Anthropology electives offer many choices, including courses dealing with environment and culture, expressive culture (art, verbal arts, literature, music, and dance), gender, human evolution, human evolutionary anatomy, human osteology, human prehistory, identity, language and culture, medical anthropology, molecular genetics, primatology, psychological anthropology, religion and ritual, and urban anthropology. Department faculty members offer area studies courses on Latin America, Europe, Japan, South Asia, and Native North America.

Additional Bachelor of Arts Requirements

Bachelor of Arts students are strongly encouraged to participate in archaeological field and laboratory research, biological anthropology laboratory research, independent studies in sociocultural anthropology, or linguistic anthropology research.

Additional Bachelor of Science Requirements

Bachelor of Science students must fulfill additional requirements in the following three areas.

Quantitative, mathematical, or formal reasoning tool
Directed laboratory or field research
Allied topical course work

QUANTITATIVE, MATHEMATICAL, OR FORMAL REASONING TOOL

Students must complete a minimum of 6 s.h. beyond the courses used to fulfill the General Education Program (p. 381) quantitative or formal reasoning requirement. Students select specific courses or course sequences in consultation with their advisors.

DIRECTED LABORATORY OR FIELD RESEARCH

Students complete an approved directed research requirement (minimum of 3 s.h.) consisting of one of the following.

Laboratory research: a laboratory practicum in anthropology research labs or independent, faculty-guided, laboratory research, including use of the collections of the Office of the State Archaeologist.

Field research project: faculty-advised projects involving the collection of primary archaeological, biological, ethnographic, and/or linguistic data in a fieldwork setting.

A University of Iowa field archaeological school program or approved equivalent.

An approved internship; internships typically involve work in cultural resource management firms, museums, and public health research or education projects; to receive research credit for an internship, students must make a final report to their faculty advisor, summarizing the work accomplished or
presenting materials that document the nature of the work.

ALLIED TOPICAL COURSE WORK

Students complete a topical specialization in one of the following allied fields: biology, chemistry, computer science, economics, geography, geoscience, global health studies, health and human physiology, health promotion, linguistics, mathematics, psychology, science education, sport studies, or statistics and actuarial science. Minors (or at least five courses) in other fields, chosen in consultation with the student’s advisor, also may be applied toward this requirement.

Undergraduate Emphasis Areas

The department offers three optional undergraduate emphasis areas: gender and culture, cultural resource and heritage management, and environmental anthropology. Students majoring in anthropology may use an emphasis area to provide a particular focus in their study plan.

Each emphasis area reflects broad issues bridging subfields in and outside of anthropology. Completion of an emphasis area indicates the achievement of considerable expertise and is noted on the student’s transcript.

Each emphasis requires five courses (15 s.h.). With careful course selection, students majoring in anthropology can complete an emphasis area without adding to the semester hours required for graduation.

GENDER AND CULTURE EMPHASIS

Anthropological research regarding gender and sexuality has grown dramatically in recent years, enhancing and drawing from other theoretical and methodological approaches within the discipline. Such studies contribute a cross-cultural perspective to the discussion surrounding these fundamental aspects of human experience, both in academia and in public life.

The gender and culture emphasis requires five courses (15 s.h.) chosen from the following list. Each course provides an integrated overview of essential theoretical and topical issues in the field.

113:101 Disability and the Ethics of Care 3 s.h.
113:102 Ethnography and Auto/Biography 3 s.h.
113:105 Mothers and Motherhood 3 s.h.
113:107 Gendering India 4 s.h.
113:108 Anthropology of Marriage and Family 3 s.h.
113:127 South Asian Sexual Cultures 3 s.h.
113:133 The Anthropology of Women’s Health 3 s.h.
113:134 Gender and Indian Diaspora 3 s.h.
113:137 The Anthropology of Love 3 s.h.
113:140 Politics of Reproduction 3 s.h.
113:141 History of Feminist Anthropology 3 s.h.
113:154 Anthropology of Sexual Minorities 3 s.h.
113:180 Women Writing Culture 3 s.h.
113:182 Women, Health, and Healing 3 s.h.

CULTURAL RESOURCE AND HERITAGE MANAGEMENT EMPHASIS

In North America and throughout much of the rest of the world, modern land use continually threatens evidence of past land use. Most archaeological excavations are conducted as cultural resource management (CRM), so it is essential that all researchers who work with archaeological data and individuals committed to site preservation have a basic understanding of CRM. Students who choose this emphasis learn about the field and about how to address related ethical issues as well as technical and theoretical challenges.

The cultural resource and heritage management emphasis requires five courses (15 s.h.): a fundamental overview course, two area electives, a technical/practical elective, and a field school course. Students may use some of these courses to satisfy requirements for the major, such as the 100-level course in archaeology and the 100-level electives.

Fundamental overview course:

113:170 Cultural Resources Management
Archaeology: Practice and Practicalities 3 s.h.

Area elective courses—two of these (or one of these and one other Department of Anthropology area course):

113:110 Native Peoples of North America 3 s.h.
113:159 Southwestern Archaeology 3 s.h.
113:167 North American Archaeology 3 s.h.
113:179 Pleistocene Peopling of the Americas 3 s.h.
113:181 Archaeology of the Great Plains 3 s.h.

Technical/practical elective course—one of these:

113:124 Politics of the Archaeological Past 3 s.h.
113:153 Raw Materials in Archaeology 3 s.h.
113:158 Animal Bones in Archaeology 3 s.h.
113:160 Introduction to Archaeological Ceramics 3 s.h.
113:162 Practicum in Archaeology arr.
113:168 Archaeological Methods 3 s.h.
113:173 Household Archaeology and Anthropology 3 s.h.
113:189 Approaches to Geoarchaeology 3 s.h.
113:190 Beyond the Map: Introduction to Geographic Information Systems (GIS) in Anthropology 3 s.h.
213:190 Human Osteology 3 s.h.

Field school course—one of these:

113:199 Field Research in Archaeology arr.
An equivalent course from another university

ENVIRONMENTAL ANTHROPOLOGY EMPHASIS

The interaction between humans and the environments they inhabit has long been a central issue in anthropology, and environmental degradation is a worldwide concern today. Pollution, loss of biodiversity, and global warming recognize no political boundaries, but attitudes and behaviors involving the natural environment vary widely from culture to culture. Understanding and incorporation of these varied perspectives will be vital to the development and successful use of workable solutions.

The environmental anthropology emphasis requires five courses (15 s.h.): two theory courses, which deal primarily with human-environmental interactions; and three area or topical electives, which deal in part with environment, ecology, and subsistence technologies. The following are sample courses in each area.

Theory courses:

113:113 Human Impacts on the Environment 3 s.h.
113:114 Environmentalisms 3 s.h.
113:139 Religion and Environmental Ethics 3 s.h.
113:143 Environment and Culture 3 s.h.
213:152 Primate Conservation Biology 3 s.h.
113:215 Seminar: Ecological Anthropology 3 s.h.

Area or topical electives:

113:125 Japanese Society and Culture 3 s.h.
113:126 Animals, Culture, and Food 3 s.h.
113:130 Archaeology of the Iberian Peninsula 3 s.h.
113:131 Latin American Economy and Society 3 s.h.
113:150 Tribes and Chiefdoms of Ancient Europe 3 s.h.
113:157 Foodways and Cuisine in the Past 3 s.h.
113:158 Animal Bones in Archaeology 3 s.h.
113:161 Prehistoric People of the Ice Age 3 s.h.
113:164 Comparative Prehistory 3 s.h.
113:178 Hunter-Gatherer Ethnoarchaeology 3 s.h.
113:181 Archaeology of the Great Plains 3 s.h.
113:187 Cultures in Collision 3 s.h.
113:189 Approaches to Geoarchaeology 3 s.h.
113:196 The Archaeology of Ancient Egypt 3 s.h.

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan.

Bachelor of Arts

Before the third semester begins: at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: at least two courses in the major and one-half of the semester hours required for graduation

Before the seventh semester begins: at least seven courses in the major and at least three-quarters of the hours required for graduation

Before the eighth semester begins: at least eight courses in the major

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Bachelor of Science

Before the third semester begins: at least one anthropology course or other course in the major, and one-quarter of the semester hours required for graduation

Before the fifth semester begins: at least four anthropology courses or other courses in the major, one course in the minor area, one course for the quantitative or formal reasoning tool requirement, and one-half of the semester hours required for graduation

Before the seventh semester begins: at least seven courses in the major, three courses in the minor area, the second quantitative or formal reasoning tool course, and at least three-quarters of the hours required for graduation

Before the eighth semester begins: at least nine courses in the major, including the directed research requirement and four courses in the minor area
During the eighth semester: enrollment in all remaining course work in the major and in the minor area, all remaining General Education courses, and a sufficient number of semester hours to graduate.

Honors

Outstanding students majoring in anthropology may work toward graduation with honors in the major. In addition to fulfilling the regular requirements for the anthropology major, honors students conduct an independent research project that culminates in a 30-50 page thesis. The project includes completion of 6 s.h. divided between 113:186 Honors Research Seminar (offered only in fall semesters) and 113:176 Honors Research, typically taken the next semester. Honors students also must take one of their anthropology courses at the graduate level. In order to graduate with honors, students also must have a g.p.a. of at least 3.50 in anthropology and be members of the University of Iowa Honors Program, which requires students to maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University of Iowa Honors Program for more information).

Students working toward a B.S. may count their directed research project or laboratory practicum toward the required credit for graduation with honors, but fulfilling the research requirement for the B.S. does not by itself fulfill the honors requirement. Students must work with their honors thesis advisor to structure their research so that it meets the added requirements of honors work.

To learn more about honors in anthropology, contact the department’s director of undergraduate studies.

Minor

The minor in anthropology requires a minimum of 15 s.h. in anthropology courses, including 12 s.h. in University of Iowa Department of Anthropology courses numbered 113:100 and above and 213:100 and above. Students must maintain a g.p.a. of at least 2.00 in the minor. Courses for the minor may not be taken pass/nonpass.

Students may create a focus for the minor by completing an emphasis; see “Undergraduate Emphasis Areas” above.

Certificate in Museum Studies

The Department of Anthropology administers the University’s Museum Studies Program, which offers an undergraduate certificate; see Museum Studies (p. 578) in the Catalog.

Graduate Programs

- Master of Arts in anthropology
- Doctor of Philosophy in anthropology

Graduate study in anthropology is open to individuals with varied undergraduate majors and training backgrounds. Students normally are admitted directly to the Ph.D. program; once they complete requirements for the M.A., their committees recommend whether or not they should continue to work toward the Ph.D.

Graduate students become competent in the discipline’s four major subfields: sociocultural anthropology, linguistic anthropology, archaeology, and biological anthropology. Ph.D. students develop professional specialization for independent research and teaching in one of the subfields and may elect to pursue a concentration in feminist anthropology or paleoanthropology. Students also may choose to earn a terminal M.A. with a focus on cultural resource management—archaeology (CRM), which prepares them for a professional career in that field.

Master of Arts

The Master of Arts program in anthropology requires 30-36 s.h. of graduate credit, depending on the student’s previous anthropological training. Students may count a maximum of 9 s.h. earned in courses outside anthropology toward the M.A. in anthropology. The degree normally is awarded to students after two years in the graduate program.

Master’s degree students who choose to focus on cultural resource management—archaeology (CRM) normally do not go on to earn a Ph.D. in anthropology.

During the first semester of the M.A. program, students are advised by the director of graduate studies. By the end of the second semester, they must select an advisor and begin forming an M.A. committee. In consultation with the committee, the student develops a research project and writes an M.A. paper. The committee must approve the M.A. paper by the end of the fourth semester of study. The student also presents the paper publicly. As an alternative to the M.A. paper, students may choose to write a formal M.A. thesis, which must follow the Graduate College thesis guidelines. Students must submit a final copy of their M.A. thesis or paper to the department.

Master’s degree students who intend to earn a doctorate should consider taking 113:210 Anthropological Data Analysis or another statistics course during their M.A. study.
**GENERAL COURSE WORK**

M.A. students must complete core seminars in at least three of four subfields, for a total of 9 s.h. Core seminars are chosen from the following.

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>113:240</td>
<td>Seminar Sociocultural Anthropology</td>
<td>3 s.h.</td>

<tr>
<td>113:268</td>
<td>Seminar: Archaeological Theory and Method</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>113:271</td>
<td>Seminar: Linguistic Anthropology</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>213:285</td>
<td>Seminar: Biological Anthropology</td>
<td>3 s.h.</td>
</tr>
</tbody>
</table>

**ELECTIVES**

In consultation with their advisor and committee members, students select additional course work to complete the remaining semester hours required for the M.A. Elective hours may include courses in other disciplines, directed study, or up to 6 s.h. of M.A. thesis credit for students who choose the thesis option.

**Doctor of Philosophy**

The Doctor of Philosophy program in anthropology requires a minimum of 72 s.h. of graduate credit. The Ph.D. represents a balance between general anthropological competence obtained at the M.A. level and professional specialization and competence for independent research and teaching in one of four subfields: sociocultural anthropology, linguistic anthropology, archaeology, and biological anthropology.

Ph.D. students also may elect to pursue a concentration in feminist anthropology or paleoanthropology; see "Graduate Concentrations" below.

To ensure focus on the student’s research interests, the department has an integrated process of simultaneous preparation of reading lists, research proposals for submission to granting agencies, dissertation proposal, and position papers. In order to complete the degree, all doctoral candidates are required to complete appropriate course work and the Ph.D. comprehensive process, carry out original anthropological research, and write and defend a dissertation. Students work closely with their advisor and committee at all stages.

In the first semester after completing the M.A. (or the first semester in the program for students who enter with an M.A. in anthropology from another institution), the student selects an advisor. By the end of the second semester, the student selects a committee to oversee his or her completion of the comprehensive process.

Students immediately begin consulting with their advisor, and eventually their committees, to start compiling an annotated bibliography of works relevant to future research. The annotated bibliography is a working document for the student's use in the Ph.D. program; it is not a formal requirement and does not require formal review.

In the third and fourth semesters of the program, the student completes the comprehensive process. Then he or she may select a dissertation committee.

All doctoral students must demonstrate reading and/or speaking knowledge of one language other than English. They must meet this requirement before beginning dissertation research.

**REQUIRED COURSE WORK**

Students should take all lecture courses and seminars that are relevant to the areas they intend to cover in their position papers. A maximum of 18 s.h. earned in non-anthropology courses may be counted toward the 72 s.h. required for the Ph.D., including the maximum of 9 s.h. that can be counted toward the master's degree. Students may count a maximum of 9 s.h. of independent study courses, beyond the M.A., toward the Ph.D.

All doctoral students are required to take 113:210 Anthropological Data Analysis or another statistics course within the first three years of graduate study, preferably during the M.A. program (first two years of graduate study).

Students must take at least one theory course beyond the course they took to fulfill the master's requirements in their specialization subfield. This course should be chosen from one of the following lists.

**Sociocultural Anthropology**

<table>
<thead>
<tr>
<th>Course Code</th>

Biological Anthropology
213:150 Primate Comparative Morphology 3 s.h.
213:151 Human Evolutionary Genetics 3 s.h.
213:152 Primate Conservation Biology 3 s.h.
213:165 Human Variation 3 s.h.
213:169 Human Evolutionary Anatomy 3 s.h.
213:170 Primate Evolutionary Biology 3 s.h.
213:187 Human Evolution 3 s.h.
213:188 Primate Behavior and Ecology 3 s.h.
213:285 Seminar: Biological Anthropology 3 s.h.
213:288 Seminar: Paleoanthropology 3 s.h.

THE PH.D. COMPREHENSIVE PROCESS

The comprehensive process consists of preparing a research proposal and prospectus defense and writing comprehensive essays. According to individual needs and in consultation with his or her committee, a student selects the order of completing these two tasks. Successful completion of both tasks advances the student to Ph.D. candidacy.

To remain in good academic standing, students must complete the comprehensive process by the end of the fourth semester in the Ph.D. program. Students who do not adhere to this timeline are placed on departmental probation.

Working closely with his or her committee, each student drafts a research proposal for the program of dissertation research and defends a research prospectus before the Ph.D. committee. The defense is open to students and faculty. A copy of the student’s dissertation prospectus must be made available in the department office one week before the defense.

Each student must write two comprehensive essays, which must be of publishable quality. One essay must concern the student’s geographical area of specialization; the other must deal with his or her primary topical area. In some fields (e.g., biological anthropology), a geographical area may not be relevant. The essays are responses to questions the committee prepares in consultation with the student.

Comprehensive essays should demonstrate analysis, evaluation, synthesis, and control of a body of information (knowledge and comprehension). They should critique a major problem or debate (application and analysis), and they should develop a position on an issue and provide an explanation or theoretical justification for the position (evaluation and synthesis).

Doctoral students who have completed the comprehensive examination process are encouraged to enroll in 113:382 Dissertation Writing Seminar to enhance timely progress on their dissertations.

DISSERTATION

All Ph.D. candidates are required to carry out original anthropological research. Students typically conduct dissertation research after defending their research prospectus and writing comprehensive essays. Dissertations usually are based on fieldwork. Some are based on data from archival collections, laboratory projects, collections, or other source materials.

Graduate Concentrations

In addition to their required course work in the four Ph.D. subfields, students may complete a concentration in feminist anthropology or paleoanthropology. Each concentration reflects broad issues bridging subfields in and outside of anthropology.

Completion of a concentration indicates substantial expertise. It is recognized as a department credential and may be added to a student’s curriculum vitae.

FEMINIST ANTHROPOLOGY CONCENTRATION

The feminist anthropology concentration offers broad training in a growing specialization area that enhances and draws from other theoretical approaches in anthropology. Graduate students in anthropology and other disciplines may explore particular aspects of the field by taking feminist anthropology courses.

Course work in the concentration emphasizes feminist perspectives, theories, methods, and analytic techniques in anthropology. It improves students’ academic job prospects in anthropology and other fields, especially women’s studies and gender studies. It also helps students prepare for careers in applied or public anthropology.

Feminist anthropology students take 15 s.h. of course work in the concentration in addition
PALEOANTHROPOLOGY CONCENTRATION

The paleoanthropology concentration offers broad training that combines archaeology and biological anthropology, two traditional subfields of anthropology important in understanding the biocultural factors that have been critical in human evolution. The concentration combines course work in both biological and archaeological anthropology, complementing the specialized training that students from either subfield receive in their own specialization. Paleoanthropology courses emphasize integration of biological and cultural factors in the evolution of hominid species up to and including modern humans. They encompass primate and human evolutionary anatomy, technology and subsistence in Paleolithic archaeology, and modern human hunter-gatherers.

Paleoanthropology students take 15 s.h. of course work in the concentration in addition to their regular core requirements. The 15 s.h. should be divided between graduate seminars and elective courses as noted below.

Students may choose core seminars to fulfill requirements for both the M.A. general course work and the paleoanthropology concentration.

The following list of approved courses is subject to change; contact the Department of Anthropology for updates. Students may petition to count other courses in anthropology or other disciplines toward the concentration, if the courses or the students’ work in them includes significant relevant content. Petitions are reviewed by the paleoanthropology faculty.

**Graduate Seminars**

All of these (9 s.h.):

Admission

Applicants for admission to the graduate program in anthropology are considered regardless of their undergraduate major or previous field of training. Students without previous training in anthropology may be expected to perform additional work necessary to achieve competence expected for their degree objective.

Students normally are admitted directly to the Ph.D. program. For students without an M.A. in anthropology, the first two years of the Ph.D. program are devoted to fulfilling the requirements of the M.A. After those requirements are completed, the student’s committee recommends to the faculty whether the student should continue to work toward the Ph.D.

Students with an M.A. in anthropology from another institution may proceed directly into a Ph.D. program organized around their special research interests.

Applicants for admission to the graduate program must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

Applicants are required to submit the following:
- a completed University application form;
- transcripts of all previous undergraduate and graduate work;
- three letters of recommendation from individuals competent to judge the applicant’s potential for graduate training;
- Graduate Record Examination (GRE) scores;
- at least one written example of previous work (for example, a term paper).

Applicants whose first or official language is not English and whose previous academic degrees were not earned at an English-language institution must submit scores on the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS).

Financial Support

Financial assistance, usually in the form of teaching and research assistantships, may be offered to doctoral and potential doctoral students in good standing for up to five years. Students making satisfactory and timely progress through the graduate program are in good standing. Eligibility for financial aid is reduced after two years in the M.A. program, after two years in the Ph.D. program, or after one year of postdoctoral fieldwork or research enrollment. The amount and types of aid depend on departmental needs. The department usually awards financial aid to most entering graduate students every year.

Students are notified in writing of a provisional financial award before the semester or summer session for which the award has been granted. Although awards are made before the end of the previous semester, each award is contingent upon satisfactory completion of that semester’s work by the awardee.

Archaeological Field Research

Under the direction of University archaeologists, students acquire skills in data recovery and interpretive techniques. Opportunities are available for students to participate in archaeological field research in France, the Netherlands, Portugal, Sicily, the U.S. Southwest, or at various sites in the U.S. Midwest. Occasional fieldwork in East and Southeast Asia is available to graduate students in the paleoanthropology research program.

Resources, Facilities

The department has access to the Iowa Archaeological Collections through the Office of the State Archaeologist and maintains its own archaeological collections (midwestern prehistoric and historical and comparative faunal material). The department maintains a documented human osteology teaching collection amassed by the University of Iowa Carver College of Medicine and the Department of Anatomy and Cell Biology, and it holds a substantial documented human osteology research collection originally from Stanford University’s medical school that is maintained jointly with the Office of the State Archaeologist.

Individual faculty members maintain field laboratories and conduct research outside the United States, maintaining ties with research institutions in foreign countries, including the Laboratoire d’Ethnologie Préhistorique at Pincevent; the Centre de Recherches Archéologiques at Verberie, in France; the National
The Museum of Ethnology in Japan; the Institute of Technology Bandung (ITB), in Indonesia; the Gemeente Nijmegen, Bureau Archeologie, Nijmegen, the Netherlands, and the Deutsches Archäologisches Institut of Madrid in Spain.

The department also has well-equipped laboratories for the study of archaeology, biological anthropology, and a state-of-the-art multimedia linguistic anthropology laboratory.

The University is a charter member of the Human Relations Area Files (HRAF), an extensively annotated set of source materials on the peoples of the world—their environments, behavioral patterns, social lives, and cultures. Through HRAF and other library resources, anthropology students have access to source materials on more than 400 different cultures.

The University’s exchange programs for Iowa students provide opportunities and some scholarships for study abroad.

Faculty

Members of the anthropology faculty have studied and lived in Africa, Asia, the Caribbean, Europe, Mexico and Central America, Pacific Islands, South America, and the United States. Recent field research has been conducted in Belgium, Brazil, Cameroon, China, Czech Republic, Ecuador, Fiji, France, Greece, Honduras, India, Indonesia, Italy, Japan, Mexico, Myanmar (formerly Burma), the Netherlands, Peru, Philippines, Portugal, Russia, Tanzania, the Gambia, the United States, and Vietnam.

Current faculty interests include patterns of political and economic development of emerging nations; the trade in Mexican folk art, material culture, human rights; indigenous movements; visual culture and indigenous media; gender and the cultural politics surrounding sobriety in native North America; lesbian and gay families in the United States; the cultural production of scientific knowledge about racial/ethnic infant mortality disparities in U.S. public health; power, memory, and social inequality in ancient Iberia; language and gender; expressive culture and performance in the Brazilian Amazon; language and social justice; Sanskrit, colonial linguistics, cultural politics of language, religion, and ethnicity; spiritual tourism in India; community and conflict, ritualization, localized religion, and environmentalism in Japan; ethnic minorities in Japan; diasporas, love, and romantic relations, culture, and totalitarianism in North Korea; paleoanthropological investigations of Pleistocene karst caves in China and northern Vietnam; geological and paleoanthropological field surveys of the Plio-Pleistocene Sangiran Dome, in Java; Neanderthal craniofacial form, function, and evolutionary history; anatomical modernity and the origins of modern humans; historical archaeology of Iowa; molecular anthropology, primate molecular ecology, primate conservation biology, primate evolutionary history; faunal and spatial analyses from Paleolithic sites in France; regional interaction and migration in late-prehistoric North America; peopling of the Americas; human impacts on the environment in North America.

Courses

For Undergraduates

113:003 Introduction to the Study of Culture and Society 3 s.h.
Comparative study of culture, social organization. GE: Social Sciences; Values, Society, and Diversity.

113:010 Anthropology and Contemporary World Problems 3 s.h.
Selected world problems from an anthropological perspective; current dilemmas and those faced by diverse human groups in recent times and distant past. GE: International and Global Issues; Social Sciences.

113:012 Introduction to Prehistory 3 s.h.
Data, theories of evolution of human cultures from end of Pleistocene to emergence of complex societies; emphasis on prehistoric cultural information from world areas from which relatively complete sequences are available. GE: Historical Perspectives.

113:013 Human Origins 3 s.h.
Processes, products of human evolution from perspectives of heredity and genetics, evolutionary theory, human biological characteristics, fossil record, artifactual evidence, biocultural behaviors. GE: Natural Sciences without Lab.
113:014 Language, Culture, and Communication
Human language in context of animal communication; development, acquisition of language; biological base; language as a linguistic system in cultural social context. GE: Social Sciences.

113:029 First-Year Seminar
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g. films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.

113:045 Language Rights
Language minorities and linguistic human rights in the United States and worldwide; language and identity, culture, power; case studies of language rights deprivation. GE: International and Global Issues. Same as 103:045.

113:050 Issues in Anthropology
In-depth exploration of methodological and theoretical issues in contemporary anthropology; emphasis on critical reading of primary texts.

113:051 Diversity in Action in American Society
Consequences of American racial and cultural diversity as related to contemporary social issues and professional careers; assumptions that define diversity as a problem for educators.

113:056 Forensic Anthropology and CSI
Role and range of techniques used in forensic anthropology; how analysis of skeletal and nonskeletal remains is used in crime scene investigation; case studies.

113:061 Anthropology of Tattoos and Body Modification
Cross-cultural perspective on corporal modification; how people communicate and inscribe cultural and personal significance on the body; tools used, from ink to scalpel.

113:062 Anthropology of Violence
Sources and manifestations of violence; violence in varied contexts--war, genocide, colonialism, state violence, terrorism, domestic violence; anthropological perspective considering structural, economic, and symbolic violence.

113:063 Fifth Great Ape: Our Primate Heritage
Human behavior and ecology viewed through the gap between nonhuman and human primates; adaptations, interactions of free-ranging species, cognition of higher primates in behavioral study.

113:064 The Evolution of Human Sex
How evolution has shaped our sexual behavior; patterns of mate choice, parental behavior, social organization, cooperation, and conflict as responses to selection pressure; sexual selection, reproductive strategies, mate choice, sex roles and practices.

113:065 Anthropology, Science Fiction, and Fantasy
Connections between anthropology and science fiction and fantasy; science fiction and fantasy films and literature surveyed and examined in light of scholarly essays on anthropological concepts such as human evolution, race, gender, the anthropological other.

113:066 The Anthropology of Virtual Worlds
How virtual reality intertwines with social existence; anthropological exploration of virtual worlds, from checking e-mail to setting up bar crawls on Facebook; forms of virtual identity, how virtual life affects language.

113:067 Anthropology of Immigration
Anthropological study of movements of people, goods, ideas around the world, drawing upon recent theory and ethnographic examples; topics include citizenship, family/parenting, gender, labor, economy, religion.
113:075 Individual Study  1-3 s.h.
Readings in area or subdivision of anthropology in which student has had basic course work.

113:081 Human Genetics in the Twenty-First Century  3 s.h.
Heredity in human families, populations; genetic basis of normal, abnormal traits; chromosome behavior; molecular basis of genetics; sex determination. GE: Natural Sciences without Lab. Same as 002:081.

Advanced Courses

General Anthropology

113:103 Introduction to Museology  3 s.h.
Overview of museum history, function, philosophy, collection and curatorial practices, governance and funding issues, exhibition evaluation, audience studies; American cultural institutions. GE: Values, Society, and Diversity. Same as 024:102, 075:112, 097:115.

113:148 Special Topics in Anthropology  2-3 s.h.
Problems, concepts involved in comparing and contrasting behavior and ideas of different cultures.

113:149 Special Topics in Anthropology  2-3 s.h.
Problems, concepts involved in comparing and contrasting behavior and ideas of different cultures.

113:190 Beyond the Map: Introduction to Geographic Information Systems (GIS) in Anthropology  3 s.h.
Software environment for managing, visualizing, and analyzing spatial relationships in anthropology; map making tool; spatial organization of material culture.

113:209 Research Design and Proposal Writing  3 s.h.
Anthropological research design; preparation of proposals for fieldwork or laboratory analysis.

113:210 Anthropological Data Analysis  3 s.h.
Quantitative procedures for analyzing field data, library materials; elementary statistics, introduction to computers.

113:215 Seminar: Ecological Anthropology  3 s.h.
Individual and group responses to ecological problems; causes and consequences of resource shortages, population growth, environmental destruction; conflicts over access to natural resources.

113:235 Graduate Teaching Pro-Seminar  1 s.h.
Graduate student teaching skills: developing course guidelines, leading discussion, grading, review sessions, dealing with problem students and complaints; development of syllabi and teaching portfolios; mentoring of less-experienced teaching assistants. Repeatable.

113:382 Dissertation Writing Seminar  2 s.h.
Designed for students who are beginning, or are about to begin, the dissertation writing process; work with seminar group, consultation with advisor; organize the dissertation, set and meet deadlines, write a chapter of the dissertation; workshop drafts of other seminar participants; complete and revise at least one dissertation chapter. Requirements: open to anthropology graduate students who have passed their Comprehensive Exams (prospectus and essays).

Area Studies

The following archaeology courses may be used to fulfill the area studies requirement: 113:130 Archaeology of the Iberian Peninsula, 113:150 Tribes and Chiefdoms of Ancient Europe, 113:159 Southwestern Archaeology, 113:163 Archaeology of Mesoamerica, 113:167 North American Archaeology, 113:177 Celtic Archaeology, 113:181 Archaeology of the Great Plains, 113:188 Archaeology of the Middle East--Prehistory and Early History, 113:192 Greek Archaeology and Ethnohistory, 113:194 Roman Archaeology, and 113:196 The Archaeology of Ancient Egypt.
single course may be used to fulfill both area studies and archaeology requirements.

**113:107 Gendering India**  
4 s.h.  
Aspects of Indian culture, including nation, family, sexuality, work, and religion, through the lens of gender; Hindu India, differences in region, caste, and class. Same as 131:107.

**113:110 Native Peoples of North America**  
3 s.h.  

**113:118 North Korea and Totalitarianism**  
3 s.h.  
North Korea viewed as a human society, rather than a global security threat, through examination of the nation’s culture and politics.

**113:119 Health in Mexico**  
3 s.h.  
Use of anthropological perspectives to examine disease, healing systems, and ideas about health and the body in Mexico and its diaspora; relationships between structural conditions and historical and political transformations; ideas about gender and race; chronic and acute disease in Mexico; conquest and disease; racialized bodies; sexual health; biomedicine; shamanism; immigration and health; pollution and narcoviolence; readings in English. Same as 152:119.

**113:120 Popular Culture in South Asia**  
3 s.h.  
Popular cultural forms (films, calendar art, music, comics, advertising) and their role in formation and expression of collective identities based on gender, ethnicity, caste, religion, and so forth in South Asia. Same as 039:119.

**113:125 Japanese Society and Culture**  
3 s.h.  
Cultural anthropology of Japan, including historical tradition, religious ethos, social organization, human ecology, educational and political institutions; emphasis on how these aspects relate to and influence one another. GE: Values, Society, and Diversity. Same as 39J:125.

**113:127 South Asian Sexual Cultures**  
3 s.h.  
How sexuality is embedded in kinship, economics, nation, and religion in South Asia, with focus on India; chastity, celibacy, romance, arranged marriage, nonnormative sexualities associated with courtesans and hijras. Prerequisites: 113:003 or 113:010 or 131:010. Same as 131:127.

**113:129 Language/Politics of Culture in South Asia**  
3 s.h.  
Key moments in the sociolinguistic history of premodern, colonial, and postcolonial linguistic communities in South Asia; roles of language in mediation of cultural and political processes. Same as 039:122.

**113:131 Latin American Economy and Society**  
3 s.h.  
Development, present structure of Latin American economy and society; emphasis on rural regions in context of national development; focus on area as a whole. GE: International and Global Issues.

**113:132 Latin American Studies Seminar**  
3 s.h.  

**113:134 Gender and Indian Diaspora**  
3 s.h.  
General theories of diaspora, which have expanded from the Jewish experience to explain African and Asian diasporas; theories in context of Indian diaspora populations and their relationship to the homeland. Same as 131:134.

**113:152 Japan and Other Cultural Constructs**  
3 s.h.  
Key texts in postwar Anglo-American anthropological studies of Japan; wartime enemy studies, national character studies, culture and personality school as represented by Ruth Benedict, and more. Prerequisites: 113:003 or 113:010.
Sociocultural Anthropology

113:101 Disability and the Ethics of Care  
Recent debate on disability, with emphasis on moral and ethical foundations of our society; care of the disabled as part of the broader social good. Prerequisites: 113:003 or 113:010.

113:102 Ethnography and Auto/Biography  
Ethnographic writing compared with biographical and autobiographical writings. Prerequisites: 113:003 or 113:010.

113:104 Cultural Politics  
Cultural politics involved in cultural representation; varied forms of cultural performance and display; social and power relationships between producers, consumers, represented subjects. Requirements: two courses chosen from 113:003, 113:010, 113:012, 113:013, and 113:014.

113:105 Mothers and Motherhood  
Treatment of motherhood; role of motherhood and devaluation of social status. Same as 131:142.

113:106 The Anthropology of War and Peace  
Fundamentals of human social conflict that lead to national wars, and how peace is made; perspectives from anthropological works. Prerequisites: 113:003 or 113:010.

113:108 Anthropology of Marriage and Family  
Classic anthropological theories of kinship and marriage, including topics such as cousin marriage and incest; recent work on new reproductive technologies and transnational marriage. Same as 131:108.

113:109 Literature and Anthropology  
Topics vary. Same as 008:151, 048:151.

113:112 Anthropology of Sexuality  
Practice, definition, and regulation of sex in different cultures and times; use of anthropological tools, including cross-cultural comparison and social constructionist analysis; how social and historical forces shape sex; how a range of topics relate to sexuality, including science, love, work, globalization, ethnicity, health, aging, pornography, and deviance; focus on ways that dynamics (i.e., class, race, gender norms) shape people’s culturally- and historically-specific ways of having and thinking about sex. Same as 131:112.

113:114 Environmentalisms  
Alternative ways of conceptualizing the environment drawn from the ethnographic record worldwide; culturally constructed images of nature and their expression through daily activity and communicative media; inspiration for environmental activism; why such movements emerge, techniques they employ, factors that contribute to their success or failure. Prerequisites: 113:003 or 113:010.

113:115 Transnational Feminism  
Evolution and impact of women’s movements in different regions of the Third World. Same as 131:149.

113:116 Urban Anthropology  
Cross-cultural approach to urban anthropology; urbanizing processes, migration and adaptation, aspects of class and ethnicity in urban settings, urban economic relations. GE: International and Global Issues; Social Sciences.

113:121 Health of Indigenous Peoples  
Health problems and services for indigenous populations worldwide, from perspective of Fourth World postcolonial politics. Prerequisites: 113:003 or 113:010. Same as 149:121, 152:121.

113:128 Faces of Culture  
Human subsistence and adaptation to environment in cultures from all continents; cross-cultural comparisons and general themes.
113:133 The Anthropology of Women’s Health 3 s.h.
How female gender intersects with culture, environment, and political economy to shape health and illness; reproductive health, violence, drug use, cancer; readings in anthropology, public health. Prerequisites: 113:003 or 113:010 or 131:010. Same as 131:133, 172:133.

113:135 Psychological Anthropology 3 s.h.
Cultural diversity in constructions of self, mind, and emotion; religious experience, altered states of consciousness, behavioral disorders. Prerequisites: 113:003 or 113:010.

113:136 Using Ethnographic Methods 3 s.h.
Ethnography, holistic, qualitative research in cultural context for anthropological and related research and careers involving interpersonal interaction; multiple ethnographic methods and their rationales. Recommendations: desire to interact with others, and prior course work in fields that employ ethnographic or qualitative research (social sciences, social work, nursing, public health).

113:137 The Anthropology of Love 3 s.h.
The culturally diverse concept and practice of love as seen through cross-cultural and interdisciplinary texts on romantic and other forms of love.

113:139 Religion and Environmental Ethics 3 s.h.
How humans conceptualize the biophysical environment through religious beliefs and practices; how images of the environment influence people’s activities, how they are used by grassroots environmental movements. Requirements: junior or senior standing. Same as 032:130.

113:140 Politics of Reproduction 3 s.h.
Debates over women’s reproductive experience, including its medicalization. Same as 131:144.

113:141 History of Feminist Anthropology 3 s.h.
Development and evolution of feminist critiques in cultural anthropology; readings from early studies by women ethnographers, classic writings that sought to give women cross-cultural visibility, recent experimental texts. Prerequisites: 113:003 or 131:010. Same as 131:141.

113:142 Anthropology of Religion 2-3 s.h.
Approaches; religious roles; shamanism, witchcraft, curing; mythology; place of religion in social and cultural change. Same as 032:165.

113:143 Environment and Culture 3 s.h.
Individual and group responses to scarcities of natural resources such as land, water, food. Requirements: 113:003 or 113:010 or graduate standing.

113:145 Religion and Healing 3 s.h.

113:146 Anthropology of Death 3 s.h.
How anthropologists and archaeologists study death, dying, mortuary rituals, and notions of the afterlife in contemporary North America and in different places and times. Requirements: 113:003 or 113:012 or graduate standing.

113:154 Anthropology of Sexual Minorities 3 s.h.
Ethnographic studies of sexual minorities and anthropological approaches to lesbian, gay, bisexual, and transgendered persons and communities; behavior, identity, performativity, kinship, globalization, the HIV/AIDS pandemic. Requirements: junior, senior, or graduate standing. Same as 131:154.
113:156 Fictionalized Ethnography in Literature and Film
Evaluation of fictional narratives as sources of ethnographic information, instructive and revealing depictions of other societies and cultures; culturally specific themes through storylines, creative works as cultural artifacts in presentations of differing perspectives and concerns from the authors' personal experiences.

113:175 Human and Animal Sacrifice
Human and animal sacrifice as a religious practice and expression of violence in human societies; patterns and variations illustrated by examples from past and present societies; American capital punishment.

113:180 Women Writing Culture
Feminist ethnography and other kinds of feminist narratives that "write culture" while pushing the boundaries of how anthropologists define ethnography. Prerequisites: 113:003 or 113:010. Same as 131:165.

113:182 Women, Health, and Healing
Women's experience as recipients and providers of health care; intersection of race, class, cultural variation, and women's health; reproductive and nonreproductive health concerns. Same as 131:143.

113:184 Anthropology and International Health
Anthropological contributions to and critiques of the international health enterprise; case studies illustrating anthropology and international health's intersection, and their differences. Offered spring semesters. Same as 152:184, 172:131.

113:185 Medical Anthropology
Major theoretical, methodological approaches; international health and development; biomedicine as a cultural system; ethnomedicine; anthropology and AIDS, human reproduction, epidemiology, ethnopsychiatry. Prerequisites: 113:003 or 113:010. Same as 152:185, 172:173.

113:191 Anthropology of Play
Fundamental logic and variation of what is considered human play in diverse cultures. Prerequisites: 113:003 or 113:010.

113:202 Ethnographic Field Methods

113:208 Foundations of Ethnomusicology
Ethnomusicology in relation to domains of musical, humanistic, social science scholarship on expressive culture and artistic processes. Requirements: senior standing. Same as 025:319.

113:220 Seminar: Feminist Anthropology
Theory, methods, research, epistemology from a feminist perspective. Same as 131:220.

113:221 Seminar: Feminist Ethnography
Feminist critiques of traditional ethnographies, informed by contemporary feminisms. Prerequisites: 113:220 or 131:220. Same as 131:245.

113:222 Reading Transnational Feminist Theory
Issues in transnational feminist scholarship, including colonialism, globalization, the nation-state, religion, cultural traditions, and human rights, in global and U.S. domestic contexts; interdisciplinary readings with focus on anthropology, other social sciences. Same as 131:222.

113:223 Feminist Medical Anthropology
Directions feminists have taken in medical anthropological scholarship; focus on ethnographies that have become classics of the genre and on influential theoretical and applied work. Same as 131:223.
113:240 Seminar Sociocultural Anthropology  3 s.h.
Social institutions in the world’s societies; problems in theory, method, interpretation. Requirements: anthropology graduate standing.

113:247 Crossing Borders Seminar  2-3 s.h.

113:248 Crossing Borders Proseminar  arr.

113:250 Seminar: Ritual and Performance  3 s.h.
Approaches to comparative study of ritual in religious and secular contexts.

113:251 Seminar: Resistance in Theory and Practice  3 s.h.
Various forms of political resistance, some bold and dramatic (peasant rebellions), others more subtle and mundane (dissimulation, false compliance, pilfering); some resistance is symbolic (millenarian movements, rituals of conflict, status reversal); learning to recognize and attend to more subtle forms.

113:274 Medical Anthropology and Social Theory  3 s.h.
How medical anthropology has responded and contributed to key theoretical developments in recent decades (i.e., discourse/narrative analysis, practice theory, feminist theory, postcolonial theory, science and technology studies).

Archeology

The following archaeology courses may be used to fulfill the area studies requirement: 113:130 Archaeology of the Iberian Peninsula, 113:150 Tribes and Chiefdoms of Ancient Europe, 113:159 Southwestern Archaeology, 113:163 Archaeology of Mesoamerica, 113:167 North American Archaeology, 113:177 Celtic Archaeology, 113:181 Archaeology of the Great Plains, 113:188 Archaeology of the Middle East--Prehistory and Early History, 113:192 Greek Archaeology and Ethnohistory, 113:194 Roman Archaeology, and 113:196 The Archaeology of Ancient Egypt. No single course may be used to fulfill both area studies and archaeology requirements.

Intricate connections between dogs and our social, economic, political, and spiritual lives; human relationships with dogs that extend back at least 16,000 years; process of dog domestication; roles dogs play in human ideology and past economies; modern interactions with dogs.

113:113 Human Impacts on the Environment  3 s.h.
Long-term patterns of human-environment interactions surveyed through archaeological case studies; varied scales of human impacts, including animal extinction, habitat destruction, agricultural practices, urban growth, state-level societies. GE: International and Global Issues; Social Sciences.

113:124 Politics of the Archaeological Past  3 s.h.
How control over management of material remains of the ancient past, and representations of that past, intersect with the identity of diverse groups, including archaeologists, indigenous peoples, national governments, collectors, ethnic minorities and majorities, museum curators; struggles for control of the archaeological past at different scales (artifacts, skeletal remains, sites, imagery, narratives) and in different regions of the world. Same as 024:124.

113:126 Animals, Culture, and Food  3 s.h.
The varied roles animals have played in human society through time; impact of humans on animal populations, ethical aspects of animals’ roles in modern societies.

113:130 Archaeology of the Iberian Peninsula  3 s.h.
Introduction to archaeology of the Iberian Peninsula, from earliest human occupation through period of Romanization.
113:138 Archaeological Approaches to Social Change 3 s.h.
How archaeologists identify, explain, and interpret social change in the material record of the ancient past; archaeological evidence and explanations--drawn from case studies worldwide and theoretical perspectives--for population growth, migration, colonization, centralization, stratification, conflict, regionalism, devolution, specialization, and standardization. Prerequisites: 113:012.

113:150 Tribes and Chiefdoms of Ancient Europe 3 s.h.
Archaeology of European societies between the Mesolithic and Iron Age; how ideas about Europe’s prehistoric past have been used for political purposes. Requirements: 113:012 or graduate standing.

113:153 Raw Materials in Archaeology 3 s.h.
Raw materials used in traditional technologies such as ceramics, chipped stone tools, metallurgy; field trips, laboratory analyses, comparisons to prehistoric artifacts. Prerequisites: 113:012.

113:157 Foodways and Cuisine in the Past 3 s.h.
Anthropological and archaeological perspective on cuisine; present-day links between food and culture; past cuisines viewed through written documents and archaeological data; histories of different foods.

113:158 Animal Bones in Archaeology 3 s.h.
Use of faunal material in interpretation of archaeological remains, including skeletal anatomy, identification, taphonomy, determination of age and sex, seasonality, quantification, sampling, breakage and cutmarks, interpretations; laboratory sessions. Prerequisites: 113:012.

113:159 Southwestern Archaeology 3 s.h.
Anthropological overview of prehistoric cultures of the American Southwest; emphasis on understanding archaeological arguments concerning major processes in the past. Same as 149:159.

113:160 Introduction to Archaeological Ceramics 3 s.h.
Basic analytical techniques for archaeological ceramics, applied primarily to ceramics from midwestern and western North America; raw materials, manufacture, decoration and style, craft specialization, use, and discard. Prerequisites: 113:012.

113:161 Prehistoric People of the Ice Age 3 s.h.
Hominid occupation of Old World during Pleistocene; hominid fossils, artifacts, settlement patterns, climatic reconstruction, evolutionary processes; survey and evaluation. Prerequisites: 113:012 and 113:168.

113:162 Practicum in Archaeology arr.
Intensive, hands-on examination of a wide range of materials recently recovered from archaeological sites; pottery, lithics (stone tools and related items), plant remains, animal bones; for students with strong archaeological interests or archaeological field experience.

113:163 Archaeology of Mesoamerica 3 s.h.
Archaeological data related to the evolution of civilization in Mesoamerica; sequence from hunter-gatherers to A.D. 1519; emphasis on Central Mexico, Maya area, Oaxaca. Requirements: 113:012 or anthropology graduate standing.

113:164 Comparative Prehistory 3 s.h.
Cultural evolution in Old World, New World; emphasis on developments from pre-agricultural societies to appearance of urban civilizations; focus on Mesoamerica, Central Andes, Near East, Egypt, Indus Valley, China. Requirements: 113:012 or anthropology graduate standing.
113:167 North American Archaeology
Prehistoric cultural development north of Mexico from initial occupation to European contact and conquest; emphasis on dynamics of culture change. Same as 149:167.

113:168 Archaeological Methods
Current theoretical approaches, methods used to investigate the past; site formation processes, taphonomy, sampling and research design, typology and seriation, subsistence-settlement reconstruction, cultural evolution. Prerequisites: 113:012.

113:169 Lithic Analysis in Archaeology
Archaeological issues examined and addressed with lithic data; use of lithic data to study the past, specific techniques applied. Requirements: 113:012 or graduate standing.

113:170 Cultural Resources Management Archaeology: Practice and Practicalities
Cultural Resources Management (CRM) archaeology as the largest sector of archaeological research in the United States in terms of employment, funding, and field- and lab-related activity; investigate the past, navigate the complexities of compliance requirements from federal, state, and local regulations concerning historic preservation; introduction to the legal, procedural, and practical foundations of CRM archaeology; prepare students for employment by acquisition of skills from project planning through dissemination of results. Prerequisites: 113:012. Recommendations: completion of other anthropology, geography, history, or Native American studies courses.

113:173 Household Archaeology and Anthropology
Structure and activities of households today and in the past; what households tell us about the larger culture; how intangible aspects of households are studied through material remains. Prerequisites: 113:003 or 113:010 or 113:012 or 113:013 or 113:014.

113:174 Seminar: Taphonomy
Taphonomy (study of fossil record in paleontology and archaeology); processes for accumulation, modification, and deposition of remains in prehistory; instruction by archaeologist and paleontologist. Requirements: graduate standing. Same as 012:174.

113:177 Celtic Archaeology
Archaeology and ethnohistory of Celtic societies of Iron Age Europe; patterns and variation in economies, sociopolitical organization, religion; relationships between Iron Age Celts and modern descendants.

113:178 Hunter-Gatherer Ethnoarchaeology
Variability in adaptations of hunter-gatherers on a global scale; emphasis on subsistence, mobility, social organization; archaeological record of prehistoric hunter-gatherers interpreted through study of modern societies. Requirements: graduate standing.

113:179 Pleistocene Peopling of the Americas
Major themes in earliest human settlement of the Americas, including human mobility, subsistence, technology, human impacts on the environment.

113:181 Archaeology of the Great Plains
Contrasting lifeways, diets, and technologies that humans used to survive on North America’s Great Plains, from Ice Age hunter-gatherers to Euroamerican homesteaders.

113:187 Cultures in Collision
Survey of archaeological evidence for differences in human interactions between two or more cultural groups; issues such as ethnicity, war, economy, repression, multiethnic communities.
113:188 Archaeology of the Middle East--Prehistory and Early History
Overview of prehistoric and early historic archaeology of the Middle East; questions that underpin archaeological narrative for the region from its initial peopling through city-states and imperial formations. Recommendations: introduction to archaeology.

113:189 Approaches to Geoarchaeology
Geoarchaeology as multidisciplinary contextual framework for human paleoecology; natural processes that create the archaeological record, approaches to reconstructing landscapes of the past as a context for archaeological deposits; weekend field trip. Prerequisites: 012:136 or 012:172 or 113:161 or 113:164. Same as 012:185.

113:192 Greek Archaeology and Ethnohistory
Archaeology and ethnology of the Greek world, from end of Bronze Age to late Roman Empire; sociocultural processes that influence development and persistence of Greek civilization. Prerequisites: 113:012 or 113:013. Same as 20E:118.

113:193 Special Topics in Archaeology

113:194 Roman Archaeology
Archaeology and ethnology of Roman civilization from Iron Age eighth-century occupation of the Palatine Hill to the end of the Roman empire in the West, A.D. 476. Prerequisites: 113:012 or 113:013. Same as 20E:119.

113:196 The Archaeology of Ancient Egypt
Introduction to the archaeology of ancient Egypt from predynastic times to Roman Egypt, including monumental architecture; patterns of everyday life; social, economic, and demographic considerations; history of archaeology in Egypt. Prerequisites: 113:012. Same as 20E:196.

113:199 Field Research in Archaeology
Beginning skills in site surveying and excavation, lab work, record keeping at nearby prehistoric sites.

113:258 Seminar: Zooarchaeology
Interpretation of faunal material in archaeology; intensive survey of classic and recent literature on taphonomy, skeletal anatomy, population parameters, seasonality, quantification and sampling, butchering patterns, ethnoarchaeology, social and economic inferences. Prerequisites: 113:158.

113:268 Seminar: Archaeological Theory and Method

Biological Anthropology

213:115 The Neanderthal Enigma
Survey of Neanderthals as the most widely known, yet enigmatic, fossil human lineage; history of discoveries; current interpretations of Neanderthal's origins, anatomy and behavior, relationship to today's people, extinction. Prerequisites: 113:013.

213:116 Modern Human Origins
Current data and theories regarding the emergence of Homo sapiens; how human anatomical modernity is defined and recognized in the fossil record; competing models for modern humans' emergence--multiregional evolution, out of Africa, the assimilation model; interpretation of recent developments and discoveries in the human fossil record; contemporary contributions from genetics, developmental biology, evolutionary ecology, paleodemography.

213:150 Primate Comparative Morphology
Survey of anatomical differences between primate groups; focus on function, adaptation, evolution. Prerequisites: 113:013.
### 213:151 Human Evolutionary Genetics
3 s.h.
Application of molecular methods and theory to biological anthropology; how recent advances in genetics have provided insight into the evolution of human and nonhuman primates. Prerequisites: 113:013.

### 213:152 Primate Conservation Biology
3 s.h.
Issues faced by conservation biologists attempting to protect nonhuman primate wildlife and biodiversity; how biogeography, ecology, and behavior relate to conservation; human interaction with the environment. Prerequisites: 113:013.

### 213:165 Human Variation
3 s.h.
Range and patterning of biological diversity in contemporary human populations; past and present attempts to organize and explain human genetic, morphological variation in light of recent data, theory.

### 213:169 Human Evolutionary Anatomy
3 s.h.
Interpretation of skeletal remains as the basis for reconstructing forms, adaptations, lifestyles of prehistoric humans; body size, musculature, stance, activity patterns, brain size, and sexual dimorphism. Prerequisites: 213:190.

### 213:170 Primate Evolutionary Biology
3 s.h.
Origin and diversification of the primate order through fossil evidence, morphology, systematics, and biomolecular studies emphasizing phylogenetic interpretations, paleobiological and paleoecological reconstructions. Prerequisites: 113:013 or 002:131.

### 213:187 Human Evolution
3 s.h.
From earliest fossil record of apes to origin and diversification of hominid family and appearance of modern Homo sapiens; evidence from paleontology, comparative anatomy, biomolecular studies, archaeology considered from evolutionary perspective. Prerequisites: 002:131 or 012:121 or 113:013.

### 213:188 Primate Behavior and Ecology
3 s.h.
Systematics, anatomy, behavior, and ecology of the living species of primates; emphasis on adaptations and interactions of free-ranging primates. Requirements: background in high school biology.

### 213:190 Human Osteology
3 s.h.
The human skeletal system; normal and pathologic variation; skeletal measurement and analysis with application to paleoanthropology, forensic, and archaeological investigations. Prerequisites: 113:013.

### 213:195 Laboratory Methods in Biological Anthropology
arr.
Specimen preparation, cataloging, moulding and casting, photography, computer analyses, library research.

### 213:285 Seminar: Biological Anthropology
3 s.h.
Physical anthropology, including heredity and genetics, evolutionary theory, human biological characteristics, primate and human fossil record, primate behavior and ecology, human adaptations. Requirements: graduate standing in anthropology or biology or related department.

### 213:288 Seminar: Paleoanthropology
3 s.h.
Current understandings of biocultural processes and events underlying Pleistocene human evolution; cross-disciplinary approach combining human paleontology and Paleolithic archaeology. Requirements: graduate standing or undergraduate honors standing or advanced undergraduate standing.

### 113:290 Feminist Perspectives on Biology and Culture
3 s.h.
Explores feminist analyses of the cultural and historical situatedness of scientific knowledge; topics range from human evolution and primatology to developmental biology and genetics to nuclear physics. Same as 131:290.
**Linguistic Anthropology**

**113:122 Bad Language** 3 s.h.
Normative roles of language in society viewed in context of speech forms labeled marginal or deviant; nonstandard speech, joking registers, jargons, and obscene/indecent language from varied speech communities.

**113:123 Language and Nationalism** 3 s.h.
Varied cases of linguistic nationalism; how language has become a powerful symbol for expression of national identity across many contexts and circumstances.

**113:171 Multi-Media Ethnography** 3 s.h.
Skills and tools for using multimedia technologies in ethnographic research and presentations; students conduct research projects using audio and video recording equipment and develop media-based presentations; ethnographic emphasis on contextually situated social interaction. Prerequisites: 113:003 or 113:010 or 113:014.

**113:244 Seminar: Semiotics** 3 s.h.
Piercian semiotic and Saussurean semiological conceptual frameworks; focus on anthropological, linguistic issues.

**113:271 Seminar: Linguistic Anthropology** 3 s.h.
Fundamental concepts and methods employed in the anthropological study of language; principal areas of current research.

**113:273 Seminar: Language, Gender, and Sexuality** 3 s.h.
Role of language and discourse in cultural constructions of gender identities and relations, including domination and subordination; theoretical perspectives, methodological approaches that have shaped thought on the language/gender nexus. Prerequisites: 113:220 or 131:220. Same as 103:221, 131:273.

**Individual Reading and Research**

**113:176 Honors Research** 2-4 s.h.
Project chosen in consultation with honors advisor.

**113:183 Independent Study** arr.

**113:186 Honors Research Seminar** 2-4 s.h.
Preparation for writing honors thesis, including project conception and research, proposal writing, oral and written presentations of student research. Corequisites: 113:176, if not taken as a prerequisite. Requirements: honors standing in anthropology.

**113:383 Independent Study: Anthropology** arr.
Repeatable.

**113:384 Research: Anthropology** arr.
Repeatable.

**113:385 Thesis** arr.
Repeatable.
Art and Art History

Director
John Beldon Scott

Professors
Craig E. Adcock, Chunghi Choo, John Dilg, Robert Glasgow, Ab Gratama, Sue E. Hettmansperger, Dorothy Johnson, Joni L. Kinsey, Steve McGuire, Virginia Myers, Christopher Roy, John Beldon Scott, James Snitzer, Margaret Stratton, Wallace J. Tomasini, Kee-ho Yuen

Professors emeriti

Associate professors
Isabel Barbuzza, Robert Bork, Ronald M. Cohen, Monica Correia, David O. Dunlap, Laurel Farrin, Julie Hochstrasser, Anita Jung, Barbara Mooney, Robert Rorex, Susan Chrysler White, Rachel Williams, Jon Winet

Assistant professors
Bradley Dicharry, John Freyer, Sarah Kanouse, Brenda Longfellow, Mathew Rude

Lecturers
Thomas Christison, Julia Leonard, Vinicius Rebello Lima, Heidi Van Wieren, Laura Young

Undergraduate degrees: B.A., B.F.A. in Art, B.A. in Art History
Undergraduate nondegree programs: Minor in Art, Art History
Graduate degrees: M.A., M.F.A. in Art; M.A., Ph.D. in Art History
Web site: http://www.art.uiowa.edu/

The School of Art and Art History provides a creative, multidisciplinary environment for students of the studio arts, the history of art, and art education. Established in 1936, the school is firmly grounded in the College of Liberal Arts and Sciences. It encourages interaction among its diverse faculty as well as collaboration with related disciplines across campus.

Iowa’s art and art history graduates enjoy success as practicing professional artists, professors of art history, teachers, museum directors and curators, theater designers, commercial designers, and art administrators.

The University of Iowa is restoring and rebuilding School of Art and Art History facilities that were damaged or destroyed by Iowa River flooding during summer 2008. Courses are being held in other buildings on campus, and the school’s main office is temporarily located in Seashore Hall, close to the Pentacrest. Visit the School of Art and Art History web site and ISIS for information about studio, office, and classroom sites.

Studio Art

The studio art program is based on the idea that the philosophical issues of society that are questioned and interpreted by artists are the basis for an artist’s work. The diversity of concept and style among School of Art and Art History faculty members encourages students to seek and work toward a keen understanding of themselves as individuals capable of making their own personal statements as part of the philosophical continuum in art’s history.

Studying the broad contexts in which art is made, understood, and used by society prepares studio art students to continue work in an academic setting as well as in museums, galleries, and a multiplicity of other venues. Graduate students are especially encouraged to examine the contexts of visual and verbal issues central to their own work and that of their contemporaries.

Undergraduate and graduate students select their major and minor studio art programs from ceramics, graphic design, three-dimensional (3-D) design, drawing, intermedia, jewelry and metal arts, painting, photography, printmaking, and sculpture.

Art History

Art history, a broad intellectual discipline, is central to the humanities. Diverse approaches characterize the school’s art history faculty, who have interdisciplinary ties within and beyond the University. Their primary mission is to help students develop skills for exploring issues and problems central to the history of art as a whole as well as to its specialized areas. Because the major in art history stresses the development of critical visual thinking and analytical writing, it prepares students for graduate work in the art history and for other professional fields as well.

Art Education

The Teacher Education Program in art prepares undergraduate and graduate students for licensure to teach art in grades K-12. Because teaching, like making art, is informed by experience, the art education area has established one of the nation’s most extensive preservice teaching programs. Students conduct case studies of individuals making and responding to art, observe art classrooms, teach in a Saturday children’s workshop, and participate in artist-in-residence programs in secondary schools. M.A. and Ph.D. students in art education draw
on resources in American studies, anthropology, and sociology to prepare for positions as teachers in museums, colleges, or universities, or as art administrators.

**Undergraduate Programs**

- Major in art (Bachelor of Arts, Bachelor of Fine Arts)
- Major in art history (Bachelor of Arts)
- Minor in art
- Minor in art history

Students interested in teaching art in elementary and/or secondary schools may apply to the Art Education Program; see "B.A. and B.F.A. with Teacher Licensure" below.

Students majoring in art begin their study as Bachelor of Arts students and may request admission to the B.F.A. program in a process called "clearance," usually during their third year; see "Bachelor of Arts: Art" and "Bachelor of Fine Arts: Art" below.

**Bachelor of Arts: Art**

The Bachelor of Arts with a major in art requires a minimum of 120 s.h., including at least 39 s.h. of work for the major. The program provides a foundation in art history as well as an understanding of the formal traditions and contemporary practices in studio art. Students take courses in the school's studio art programs, including ceramics, graphic design, three-dimensional (3-D) design, drawing, intermedia, jewelry and metal arts, painting, photography, printmaking, and sculpture.

Bachelor of Arts students majoring in art may count a maximum of 50 s.h. earned in art and art history courses toward the degree; they must earn at least 70 s.h. of credit in courses outside the School of Art and Art History in order to graduate.

B.A. students with a double major in the school (e.g., a major in art and a major in art history) or a major and a minor in the school (e.g., a major in art and a minor in art history) may count a maximum of 64 s.h. of credit in art and art history courses toward the degree; they must earn at least 56 s.h. of credit in courses outside the School of Art and Art History in order to graduate.

All students must complete the College of Liberal Arts and Sciences General Education Program (p. 381).

Students majoring in art begin their study in the Bachelor of Arts program. Those interested in pursuing concentrated work in a specific studio art program may apply for admission to the Bachelor of Fine Arts program through a process called "clearance," in which the faculty evaluates the student's readiness for B.F.A. study. Clearance usually takes place during the third year, but it may be conducted earlier or later, depending on the student's readiness.

The major in art for the Bachelor of Arts requires the following coursework. Not all courses are offered every semester, including required courses. When planning their course work, students should consult their advisors and ISIS to determine when specific courses will be offered.

**Art History**

Two of these:

- 01H:002 Arts of Africa 3 s.h.
- 01H:005 Western Art and Culture Before 1400 3 s.h.
- 01H:006 Western Art and Culture After 1400 3 s.h.
- 01H:016 Asian Art and Culture 3 s.h.

Additional courses:

- Two art history courses not in the list above, excluding 01H:007 and 01H:029 6 s.h.

**Foundational Studio Art**

Both of these, taken before the 3-D and 2-D courses listed below these:

- 01A:003 Basic Drawing 3 s.h.
- 01A:004 Design Fundamentals (prerequisite for all studio courses) 4 s.h.

**Studio Art 3-D Courses**

Two of these:

- 01C:060 Exploring Forms in Clay I 3 s.h.
- 01G:084 Introduction to Jewelry and Metal Arts 3 s.h.
- 01J:090 Intermedia I 3 s.h.
- 01N:015 Undergraduate Sculpture I 3 s.h.
- 01T:021 Problems in 3-D Design I: Form and Structure 3 s.h.

**Studio Art 2-D Courses**

Two of these (may include a maximum of one photography course):

- 01D:090 Graphic Design I 3 s.h.
- 01F:007 Life Drawing I 3 s.h.
01K:009 Painting I 3 s.h.
01M:011 Introduction to Printmaking 3 s.h.

01L:034 Beginning Photography 3 s.h.
or
01L:036 Beginning Digital Photography 3 s.h.

Required Electives
Art and art history electives must bring the total credit in art history, studio art, and art education to a minimum of 39 s.h.

Electives chosen from School of Art and Art History courses 8 s.h.

Transfer Students
Transfer students should contact the undergraduate academic advisors for information regarding transfer portfolio review and specific course work that will satisfy the requirements of the art major for the Bachelor of Arts.

Study Abroad
Students who wish to study abroad must meet with the undergraduate advisor before they depart in order to confirm approval of the courses they plan to take.

Students who take studio art courses abroad must bring their artwork back to campus and present it in a portfolio review, which determines whether the work will satisfy a requirement for their major; the requirement is waived if the study abroad course was taught by a School of Art and Art History faculty member who gave the student a grade for the course.

Students who plan to take art history courses abroad must present the course syllabus to their advisors well in advance of their departure. The head of the art history program determines whether the study abroad course is equivalent to a course required for the major; if it is, the student is credited with fulfilling the requirement once he or she completes the course with a passing grade.

Bachelor of Fine Arts: Art
The Bachelor of Fine Arts with a major in art requires a minimum of 120 s.h., including 62 s.h. of work for the major. The program provides a foundation in art history as well as an understanding of the formal traditions and contemporary practices in studio art. It also includes a concentration in studio art. B.F.A. students select a studio art program from ceramics, graphic design, three-dimensional (3-D) design, drawing, intermedia, jewelry and metal arts, painting, photography, printmaking, and sculpture. They may not select papermaking, calligraphy, or bookbinding as their studio art program.

Bachelor of Fine Arts students majoring in art may count a maximum of 62 s.h. earned in art and art history courses toward the degree; they must earn at least 58 s.h. of credit in courses outside the School of Art and Art History in order to graduate.

All students must complete the College of Liberal Arts and Sciences General Education Program (p. 381).

Students majoring in art begin their study in the Bachelor of Arts program. They may apply to the Bachelor of Fine Arts program after consulting with the heads of the studio programs of their choice. Students are admitted to the B.F.A. program through a process called “clearance,” which is conducted once each semester. Students who wish to enter the B.F.A. program should consult the faculty in their major studio art area for information about the required portfolio review.

B.F.A. students complete all requirements for the B.A. major in art plus additional studio work. They also must present a show of their work before they graduate.

The art major for the Bachelor of Fine Arts requires the following work.

Required Courses for the Bachelor of Arts
All course work required for the B.A. with a major in art; see “Bachelor of Arts: Art” above 39 s.h.

Additional Studio Art for B.F.A. Students
All of these:

Three courses, beyond introductory or beginning courses, in the student’s B.F.A. studio art program

One introductory course and one advanced course in a studio program outside the student’s B.F.A. studio art program

One introductory course and one advanced course in another studio program outside the student’s B.F.A. studio art program

Drawing and painting students must take this seminar (does not count toward studio art requirements above):
01F:106 Undergraduate Seminar in Drawing and Painting 3-4 s.h.

Painting students also must complete this sequence:

01K:009 Painting I 3 s.h.
01K:010 Painting II 4 s.h.
01K:049 Advanced Painting 4 s.h.

Students may enroll in additional painting classes.

Exhibit
B.F.A. students must present a show of their work before they graduate.

Transfer Students
Transfer students should contact the undergraduate academic advisors for information regarding transfer portfolio review and specific course work that will satisfy the requirements of the art major for the Bachelor of Arts.

Study Abroad
Students who wish to study abroad must meet with the undergraduate advisor before they depart in order to confirm approval of the courses they plan to take.

Students who take studio art courses abroad must bring their artwork back to campus and present it in a portfolio review, which determines whether the work will satisfy a requirement for their major; the requirement is waived if the study abroad course was taught by a School of Art and Art History faculty member who gave the student a grade for the course.

Students who plan to take art history courses abroad must present the course syllabus to their advisors well in advance of their departure. The head of the art history program determines whether the study abroad course is equivalent to a course required for the major; if it is, the student is credited with fulfilling the requirement once he or she completes the course with a passing grade.

Bachelor of Arts: Art History

The Bachelor of Arts with a major in art history requires a minimum of 120 s.h., including 57 s.h. of work for the major (45 s.h. in art and art history and 12 s.h. in humanities disciplines).

Art history engages in problems of historical analysis and in interpretation of culture. The program provides students with a strong liberal arts background and prepares them for competitive placement in graduate schools across the country. As students progress through the major, they become familiar with historical relationships between art objects and society, learn techniques of formal analysis, study patterns of patronage, and absorb methods for interpreting the meaning of paintings, sculptures, and architecture. In the course of their studies, art history majors develop their research abilities and writing skills.

Bachelor of Arts students majoring in art history may count a maximum of 50 s.h. earned in art and art history courses toward the degree; they must earn at least 70 s.h. of credit in courses outside the School of Art and Art History in order to graduate.

B.A. students with a double major in the school (e.g., a major in art history and a major in art) or a major and a minor in the school (e.g., a major in art history and a minor in art) may count a maximum of 64 s.h. of credit in art and art history courses toward the degree; they must earn at least 56 s.h. of credit in courses outside the School of Art and Art History in order to graduate.

All students also must complete the College of Liberal Arts and Sciences General Education Program.

The major in art history requires the following course work.

Art History

All of these, taken before enrollment in courses numbered 099 and above:

01H:005 Western Art and Culture Before 1400 3 s.h.
01H:006 Western Art and Culture After 1400 3 s.h.
01H:007 Writing About the Visual Arts 3 s.h.

One of these:

01H:002 Arts of Africa 3 s.h.
01H:016 Asian Art and Culture 3 s.h.

All of these:

01H:099 Undergraduate Seminar in the History of Art (taken fall of junior or senior year) 3 s.h.

Three courses chosen from those numbered 01H:020 through 01H:098, excluding 01H:029 9 s.h.

Five upper-level courses chosen from those numbered 01H:100 through 01H:199 15 s.h.

Studio Art

All students must take this course:
01A:003 Basic Drawing 3 s.h.

One of these:

01C:060 Exploring Forms in Clay I 3 s.h.
01F:007 Life Drawing I 3 s.h.
01G:084 Introduction to Jewelry and Metal Arts 3 s.h.
01K:009 Painting I 3 s.h.
01M:011 Introduction to Printmaking 3 s.h.
01N:015 Undergraduate Sculpture I 3 s.h.

Courses in Other Disciplines

Four or more courses chosen from at least three disciplines outside art and art history (e.g., anthropology, classics, history, literature, philosophy, political science, religious studies, sociology) 12 s.h.

Course selections must be approved by an undergraduate advisor.

Transfer Students

Transfer students planning to major in art history should meet with the undergraduate advisor to discuss the requirements they may fulfill with transfer courses. Art history transfer courses must be reviewed by the art history division head to determine the student's placement in or exemption from required art history courses.

Study Abroad

Students who wish to study abroad must meet with the undergraduate advisor before they depart in order to confirm approval of the courses they plan to take.

Students who plan to take art history courses abroad must present the course syllabus to their advisors well in advance of their departure. The head of the art history program determines whether the study abroad course is equivalent to a course required for the major; if it is, the student is credited with fulfilling the requirement once he or she completes the course with a passing grade.

Students who take studio art courses abroad must bring their artwork back to campus and present it in a portfolio review, which determines whether the work will satisfy a requirement for their major; the requirement is waived if the study abroad course was taught by a School of Art and Art History faculty member who gave the student a grade for the course.

B.A. and B.F.A. with Teacher Licensure

Students majoring in art or art history who are interested in teaching in elementary or secondary schools may earn a B.A. or B.F.A. with K-12 teacher licensure through the Art Education Program. Art education requires a broad foundation in formation traditions of studio art, substantive knowledge in art history, and art teacher certification course work. Students must complete the College of Education's Teacher Education Program, which includes student teaching.

Contact the College of Education's Office of Education Services for more information and to apply. Application deadlines for the Art Education Program are June 15 for fall admission, October 15 for spring admission, and March 15 for summer admission.

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

Bachelor of Arts: Art

Before the third semester begins: at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: at least four courses in the major and at least one-half of the semester hours required for graduation

Before the seventh semester begins: at least eight courses in the major and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: at least 11 courses in the major

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Bachelor of Fine Arts: Art

Admission to the program leading to the B.F.A. in art is limited and depends on the department’s evaluation of the student’s work. In order to participate in the Four-Year Graduation Plan, students must be admitted to the degree program on schedule as determined by the art advisor.
Before the third semester begins: at least four courses in the major and at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: at least eight courses in the major, and at least one-half of the semester hours required for graduation

Before the seventh semester begins: at least 14 courses in the major and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: at least 18 courses in the major

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Bachelor of Arts: Art History

Before the third semester begins: at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: at least four courses in the major and at least one-half of the semester hours required for graduation

Before the seventh semester begins: at least eight courses in the major and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: at least 11 courses in the major

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Honors

Honors students in the School of Art and Art History may graduate with honors in their major by fulfilling the honors requirements described under "Honors in Art" and "Honors in Art History" below. They must apply for graduation with honors during the semester before they will graduate.

University of Iowa honors students must maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University of Iowa Honors Program for more information). They also must maintain a g.p.a. of at least 3.50 in the major. In order to graduate with honors in art, students register in 01P:190 Honors in Studio Art, in which they must complete an honors project supervised by a faculty member. They must prepare a statement of the sources of their work and hold an exhibition of the project. The statement may address the history of art, the history of ideas, or a personal philosophy and should be written under the supervision of the faculty member who supervises the honors project.

Honors students majoring in art should consult with their academic advisors about honors requirements in detail during early registration for the semester in which they plan to graduate.

Honors in Art History

Honors students in art history must be members of the University of Iowa Honors Program, which requires students to maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University of Iowa Honors Program for more information). They also must maintain a g.p.a. of at least 3.50 in the major. Students have two options for graduating with honors in the art history major.

Option 1: Students take two upper-division courses with honors designation and complete an extra project, such as an annotated bibliography, a supplemental paper or presentation, or a comparable project endorsed by the instructor. Then they enroll in a third upper-division course appropriate to their honors thesis topic and write the thesis (5,000 to 7,000 words) as part of the course, for an additional 1 s.h. Students register for 01H:190 Honors Research in Art History.

Option 2: Students research and write an honors thesis of 10,000 to 15,000 words under the direction of an art history faculty member, earning 3 s.h. They register for 01H:190 Honors Research in Art History.

Students work with an art history faculty member as their honors thesis advisor. They must have the thesis advisor’s approval before beginning work on their thesis project. The thesis should conform to the Graduate College format for theses; see the Manual of Rules and Regulations of the Graduate College in the Graduate College section of the Catalog. The title page must follow the University of Iowa Honors Program format; consult the Honors Program.
**Minor in Art**

The minor in art requires a minimum of 15-16 s.h. in art courses, including at least 12 s.h. in courses taken at The University of Iowa. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass. Courses in art education, bookbinding, calligraphy, graphic design, and papermaking and courses with prefixes 01B and 01P do not count toward the minor in art.

The minor must include 01A:003 Basic Drawing (or an equivalent) and 12 s.h. of studio art course work (one introductory course and one advanced course in each of two studio art programs). Students may substitute one art history course for one of the advanced studio courses. Before registering for a course, students must satisfy all prerequisites for the course.

Course work applied toward the minor in art may not be used to satisfy requirements for the major in art history.

Contact an undergraduate advisor in the School of Art and Art History for more information about how to meet the requirements for the minor.

**Minor in Art History**

The minor in art history requires a minimum of 15 s.h. in art history courses, including 12 s.h. in advanced courses taken at The University of Iowa. For the minor, courses numbered 01H:020 Introduction to African Architecture and above are considered advanced. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass.

The minor must include one survey-level course chosen from 01H:002 Arts of Africa, 01H:005 Western Art and Culture Before 1400, 01H:006 Western Art and Culture After 1400, and 01H:016 Asian Art and Culture. Before registering for a course, students must satisfy all prerequisites for the course.

Course work applied toward the minor in art history may not be used to satisfy requirements for the major in art. Students earning a major in art and a minor in art history must consult with their advisors.

Contact an undergraduate advisor in the School of Art and Art History for more information about how to meet the requirements for the minor.

**Graduate Programs**

- Master of Arts in art (art education option available)
- Master of Fine Arts in art
- Master of Arts in art history
- Doctor of Philosophy in art history

The School of Art and Art History collaborates with the College of Education to offer an art education subtrack in the Doctor of Philosophy program in teaching and learning.

**Master of Arts: Art**

The Master of Arts program in art requires a minimum of 38 s.h. of graduate credit. The degree is offered with majors in ceramics, design, drawing, intermedia and video art, metalsmithing and jewelry, painting, photography, printmaking, and sculpture.

The required 38 s.h. includes at least 16 s.h. in a major studio area; 8 s.h. in a minor studio area from one of the M.A. majors that offer at least 24 s.h. in studio courses; 3 s.h. in the history and theory of art, excluding readings and directed studies; and 3 s.h. in theory, history, criticism, or philosophy, earned in courses inside or outside of the school.

M.A. students must hold a B.A. or B.F.A. in art equivalent to that offered by The University of Iowa. Undergraduate deficiencies, if any, may be made up concurrently with graduate study but do not count toward the graduate degree requirements.

M.A. students undergo a division-wide review for M.A. candidacy by the faculty during the third semester in residence. All except painting and drawing students must submit a written artist’s statement.

M.A. students choose the written thesis or nonthesis option in consultation with their area advisor. They may earn 1 s.h. for writing a technical or substantial thesis by registering for 01A:302 M.A. Written Thesis, with approval of the thesis supervisor. Thesis credit earned in an M.A. program is not applicable toward M.F.A. requirements.

**M.A. with Art Education**

The Master of Arts program in art with art education requires 38 s.h. of graduate credit. Students must earn 18 s.h. of studio art and art history in a ratio of two to one (either 12 s.h. of graduate credit in studio art and 6 s.h. in art history, or 6 s.h. in studio art and 12 s.h. in art history); 8 s.h. in graduate seminars in art education; and 12 s.h. to be specified after the student begins the program. The degree also
requires a written thesis based on research in art education, creative scholarship, or art history.

M.A. students must hold a B.A. or B.F.A. in art equivalent to that offered by The University of Iowa. They also must hold teaching licensure/certification in art. See "Admission" later in this Catalog section.

Art education majors may elect to take art history courses on a satisfactory-unsatisfactory basis.

Master of Fine Arts: Art

The Master of Fine Arts program in art requires a minimum of 60 s.h. of graduate credit. The degree is offered with thesis and with majors in ceramics, design, drawing, intermedia and video art, jewelry and metal arts, painting, photography, printmaking, or sculpture. Following completion of the M.A., students may be invited into the M.F.A. Program.

The required 60 s.h. includes at least 24 s.h. in a major studio subject; at least 12 s.h. in a minor studio field selected from the fields listed above; 3 s.h. in art history and theory of art; and 3 s.h. in theory, history, criticism, or philosophy (if not already taken).

M.F.A. students must hold an M.A. in art equivalent to that offered by The University of Iowa. Transfer credit is decided by faculty review.

All students must undergo an M.F.A. committee review. They also must complete a written theses and possibly a studio thesis.

M.F.A. students may earn 1 s.h. for writing a technical or substantial thesis by registering for , with approval of the thesis supervisor. Thesis credit earned in an M.A. program is not applicable toward M.F.A. requirements.

Master of Arts: Art History

The Master of Arts program in art history requires a minimum of 30 s.h. of graduate credit and is offered with thesis. M.A. students are expected to acquire a broad knowledge of art history and to become familiar with major periods and monuments of world art. They also become proficient scholars, receiving training in research methods and theory necessary for subsequent scholarship at the Ph.D. level.

M.A. students must maintain a g.p.a. of at least 3.50. Only one semester of academic probation is allowed. All M.A. candidates, including transfer students, must take at least 24 s.h. in residence at The University of Iowa.

M.A. students in art history must earn a grade of B or higher in semester-long courses (100-level or above) in five of the following 10 distribution fields: African (including Oceanic), architecture, Asian, ancient (3000 B.C.E. to 300 C.E.), medieval, Renaissance, Baroque, 18th- and 19th-century European, American (including pre-Columbian, Native American, and African American), and modern/contemporary. These courses must be taken after the B.A. is granted.

M.A. students must complete a substantial thesis that demonstrates their ability to conduct scholarly research and convey ideas in writing appropriately for the discipline and for the student’s specialization field.

REQUIRED COURSES

M.A. students in art history must satisfactorily complete during their first fall semester of enrollment and must register for an art history seminar in their first, second, and third semesters of enrollment. They also must satisfactorily complete every semester that they are enrolled for 9 s.h. or more; students who register for less than 9 s.h. are strongly encouraged to attend the colloquium, as well.

Courses outside the curriculum of the School of Art and Art History’s art history division do not carry art history credit. Cross-referenced courses not taught by art history faculty members also do not carry art history credit.

DIRECTED STUDIES

Directed Studies (01H:300) is designed for graduate students who already have taken one or more advanced courses in a specific art history field. It provides students with an opportunity to work one-to-one with a professor to continue specific research interests developed in lecture courses or seminars, or on topics that eventually may be the subject of a thesis or dissertation. Directed Studies cannot be substituted for a lecture course already offered in the program. Students must discuss their decision to take Directed Studies with the professor involved and have the professor’s approval. The Directed Studies topic must be within the professor’s range of expertise.

Students meet with their Directed Studies professor once a week. The hours of work and written assignments required for Directed Studies must be equal to a comparable regularly scheduled course. Directed Studies is not available through Guided Correspondence Study.

LANGUAGE REQUIREMENT

M.A. students must demonstrate proficiency in French or German by the end of their third semester. Proficiency is determined by a translation exam administered under the direction
of the art history division. Credit earned in language courses does not count toward the degree.

**M.A. COMMITTEE**

The M.A. committee consists of the student’s M.A. thesis advisor and two additional tenured or tenure-track faculty members in art history.

**M.A. THESIS**

M.A. students must complete a written thesis on a topic chosen from one of the 10 distribution fields (see “Master of Arts: Art History” above). Students register for and may count 3 s.h. of thesis credit toward graduation. Students choose an M.A. thesis advisor who specializes in their concentration field. Students who wish to concentrate in more than one field must work closely with faculty members in both fields.

**FINAL EXAMINATION**

The final examination constitutes an oral defense of the written M.A. thesis. The final examination meeting with the M.A. committee normally takes place toward the end of the student’s last semester of course work.

**Doctor of Philosophy: Art History**

The Doctor of Philosophy program in art history requires a minimum of 72 s.h. of graduate credit. Ph.D. students are expected to acquire great breadth and depth of knowledge in the discipline of art history, achieve a high level of expertise in a specialized field, and demonstrate professional speaking and writing skills. The program provides them with scholarly challenges, research skills, and mentoring necessary for professional development and successful careers.

Ph.D. students must maintain a g.p.a. of at least 3.50. They may count a maximum of 38 s.h. of work completed for the M.A. toward the Ph.D. Students are allowed only one semester of academic probation.

To establish academic residency, doctoral students must be enrolled full-time (at least 9 s.h.) at The University of Iowa for two semesters beyond their first 24 s.h. of graduate study; or they must enroll for at least 6 s.h. in each of three semesters during which they hold an assistantship of one-quarter-time or more. Resident tuition is assessed for assistantship semesters and adjacent summer sessions.

Ph.D. students major in one of the following 10 distribution fields: African (including Oceanic), architecture, Asian, ancient (3000 B.C.E. to 300 C.E.), medieval, Renaissance, Baroque, 18th- and 19th-century European, American (including pre-Columbian, Native American, and African American), and modern/contemporary. Students also minor in two fields. The first minor must be in an art history distribution field that is not contiguous with the major field; the second may be in any art history distribution field or in a relevant discipline outside of art history, subject to the faculty’s approval.

Ph.D. students must complete a publishable dissertation that makes an original contribution to the art history discipline and demonstrates evidence of superior understanding of critical issues in the student’s chosen specialization field.

For more detailed information, consult the Art and Art History Graduate Bulletin.

**REQUIRED COURSES**

Ph.D. students must satisfactorily complete, even if they have completed a similar course at another institution (students who have completed the course for a master’s degree or other previous work at Iowa are exempt). They must register for an art history seminar in their first three semesters of Ph.D. course work (or in their fifth, sixth, and seventh semesters of graduate study), before the Ph.D. readings course and comprehensive exam. They also must satisfactorily complete every semester that they are enrolled for 9 s.h. or more; students who register for less than 9 s.h. are strongly encouraged to attend the colloquium, as well.

Up to 6 s.h. of credit for dissertation research may be applied toward the 72 s.h. required for the degree. Courses outside the curriculum of the School of Art and Art History’s art history division do not carry art history credit.

**DIRECTED STUDIES**

Normally, a maximum of 6 s.h. earned in may be applied toward the semester-hour requirement for the Ph.D., although doctoral students may petition the art history faculty for permission to apply up to 9 s.h.

**LANGUAGE REQUIREMENT**

Students must demonstrate proficiency in French or German for admission to the Ph.D. program. They also must demonstrate proficiency in a second non-English language relevant to their research area by the end of their third semester of Ph.D. work or before their dissertation topic
is approved. Proficiency is determined by a translation exam administered under the direction of the art history division. Credit earned in language courses does not count toward the degree.

**PH.D. COMMITTEE**

The Ph.D. committee consists of the student’s faculty mentor, who is responsible for the major field, two members responsible for the two minor fields, and at least two additional members. Of these five, four must be tenured or tenure-track faculty members from the art history division. One must be from outside the division and must be a member of the Graduate College faculty. When appropriate, committees may include additional members.

**COMPREHENSIVE EXAMINATION**

Upon completion of course requirements, the Ph.D. candidate takes three written comprehensive examinations. The major exam consists of six questions and lasts six hours; the two minor exams each consist of three questions and last three hours. The exams normally are taken on two consecutive days.

The scope of the comprehensive exams is determined in consultation with the candidate’s degree committee supervisor and the committee members responsible for the two minor fields.

**ORAL COMPREHENSIVE EXAMINATION**

Within approximately one month of completing the three written exams, the candidate meets with his or her degree committee for the oral comprehensive examination, which concentrates on questions that arise from the written comprehensive exams.

**DISSERTATION PROPOSAL**

As soon as possible after completing the comprehensive examinations, the candidate submits a dissertation proposal to his or her degree committee supervisor and subsequently to the degree committee. The committee meets as a group with the candidate to discuss the dissertation proposal and to offer comments and suggestions. (The proposal must be submitted to the committee at least two weeks before the approval meeting.) The proposal includes a 1-2 page abstract, a 10-15 page précis (including a review of the state of the field), and a bibliography.

After the proposal has been approved by the committee, the candidate circulates an abstract to the entire art history faculty. He or she must give a public presentation on the dissertation topic no later than the end of the semester following the degree committee’s approval. The presentation is scheduled with the head of art history.

**FINAL EXAMINATION**

Upon completing a dissertation, which constitutes an original scholarly contribution to the field, the candidate meets with the Ph.D. committee for an oral defense of the dissertation. The oral defense constitutes the final examination for the Ph.D. The successful completion of this examination normally marks the last stage in the candidate’s fulfillment of requirements for the degree.

**Ph.D. with Art Education**

The Doctor of Philosophy program in teaching and learning (College of Education) with art education requires a minimum of 60 s.h. of graduate credit beyond the master’s degree. The program gives college teachers and researchers in art education and art supervisors in state departments of education and school systems an opportunity to continue their inquiry and creative work in art history and in studio art.

The program is administered by the College of Education, in cooperation with the School of Art and Art History. Students must apply for admission to the College of Education. Graduates are granted a Doctor of Philosophy in teaching and learning with art education subtrack.

The curriculum must be planned with the advisor and must include at least 15 s.h. in the School of Art and Art History, 15 s.h. in art education graduate seminars, 15 s.h. in a related area (e.g., aesthetics, anthropology, higher education, psychology, sociology), and 15 s.h. in thesis and tool courses.

Students must take both oral and written comprehensive examinations. The written examination consists of an in-depth research problem to be completed within 14 days, after which an oral examination on the project is held. The research problem is assigned by the examining committee, and the written portion of the examination is not intended to relate directly to the student’s dissertation proposal.

Students also must complete a written dissertation for at least 12 s.h. of credit and are expected to prepare a dissertation proposal and defend it before the dissertation committee. An oral examination on the dissertation is the Ph.D. final examination.
Admission

Prospective graduate students must meet the School of Art and Art History’s admission requirements for the specific degree programs they plan to enter. Prospective students must submit application materials to the University’s Office of Graduate Admissions and to the specific program they wish to enter. Program-specific application requirements and deadline dates are listed in the appropriate sections below.

All applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

Applicants to all art and art history graduate programs must submit the following to the University’s Office of Graduate Admissions: a completed graduate application form (one area of interest must be specified on the form); an official copy of all transcripts of undergraduate and/or graduate work completed by the application date; TOEFL scores (if applicable); and the required application fee. Art history applicants also must submit Graduate Record Examination (GRE) scores.

Applicants whose first or official language is not English and whose previous academic degrees were not earned at an English-language institution must score as follows on the Test of English as a Foreign Language (TOEFL): for studio art applicants, at least 550 (paper-based), 213 (computer-based), or 81 (Internet-based); for art history applicants, at least 600 (paper-based), 250 (computer-based), or 100 (Internet-based).

Deadline dates for submission of materials to the Office of Graduate Admissions are December 15 for art history programs, and February 1 for studio art programs and art education programs; all are for fall admission.

The Office of Graduate Admissions notifies all applicants by mail of admission decisions. Acceptance notification cannot be given over the phone by either the admissions office or the School of Art and Art History.

M.A. and M.F.A.: Art

Applications to the M.A. and M.F.A. programs in studio art, with all supporting materials and requests for financial aid, must be received at the School of Art and Art History (graduate secretary) and the Office of Graduate Admissions by February 1 for fall admission.

In addition to materials submitted to the Office of Graduate Admissions (see “Admission” above), applicants must submit the following materials to the graduate secretary at the School of Art and Art History: a one-page statement of purpose, official transcripts for all undergraduate and graduate work completed by the application date, three letters of recommendation assessing potential as a graduate student, application for graduate awards (if desired), and application for graduate scholarships and fellowships (if desired). They also must submit one of the following portfolios (portfolios are returned by mail only to applicants who supply return postage).

Images in the portfolios should be JPEG files in RGB format submitted on CDs (or DVDs for intermedia). They should be no larger than 72 dpi and 1240 by 1240 pixels. File size must not exceed 1 MB. Image files must be numbered according to the order in which they are to be presented to the Admissions Committee, beginning with 01. Each CD or DVD must be accompanied by a list that includes each image’s name, title, medium, size, and the approximate date of work.

Ceramics, design, drawing, intermedia and video art, jewelry and metal arts, and painting: a CD containing eight images in the major studio art area and two in a second studio area; intermedia works may be submitted on DVDs.

Photography: a CD containing 20 images in the major field of work and two or three images in a second field.

Printmaking: a CD containing 10-20 images, including a selection of four to six original printed works, sent in a returnable portfolio.

Sculpture: a CD containing 20 images in major area, including details, and two or three images in a second area.

Extreme care is taken in handling all portfolios, but the school cannot be responsible for reimbursement in the event of loss or damage.

Applications and all supporting materials are reviewed by a committee of art and art history faculty members from the appropriate area.

M.A.: Art History

Applications to the M.A. program in art history, with all supporting materials and requests for financial aid, must be received at the School of Art and Art History and the University’s Office of Graduate Admissions by January 1 for fall admission in the following year.

Applicants must hold a bachelor’s degree, preferably in art history or a related field.
Although exceptions may be made when other components of the application are strong, applicants should have a combined verbal and quantitative score of at least 1200 and an analytical writing score of at least 5 on the Graduate Record Exam (GRE) General Test; and an undergraduate g.p.a. of at least 3.25 on a 4.00 scale.

In addition to materials submitted to the Office of Graduate Admissions (see "Admission" above), the following materials must be submitted to the graduate secretary at the School of Art and Art History: transcripts from all colleges and universities the applicant has attended; three letters of recommendation assessing the applicant’s potential for graduate study in art history (sent by the person making the recommendation); and a research paper (preferably from an art history course) or undergraduate thesis that demonstrates the applicant’s potential to undertake research in art history.

Applicants also must submit a 1,000-word personal statement describing their intellectual development, academic interests, and career goals; the statement must name the University of Iowa faculty member under whose guidance the applicant hopes to work and tell how that faculty member’s area of expertise, or the art history program, is especially suited to the applicant’s interests and goals.

Applicants to graduate programs in art history should consult the Art and Art History Graduate Bulletin on the School of Art and Art History web site.

Ph.D.: Art History

Applications to the Ph.D. program in art history, with all supporting materials and requests for financial aid, must be received at the School of Art and Art History and the Office of Graduate Admissions by December 15 for fall admission in the following year. Applicants must hold an M.A. in art history or a related graduate degree and must be able to demonstrate proficiency in French or German. Proficiency in a second non-English language relevant to the student’s research area is required by the end of the third semester of Ph.D. work; see "Language Requirement" under "Doctor of Philosophy in Art History" above.

Although exceptions may be made when other components of the application are strong, applicants should have a combined verbal and quantitative score of at least 1200 and an analytic writing score of at least 5 on the Graduate Record Exam (GRE) General Test; and a graduate g.p.a. of at least 3.50 on a 4.00 scale.

Students who completed an M.A. at The University of Iowa and who wish to apply for entrance into the Ph.D. program must make a formal application to the program. Applications are evaluated in the context of the entire applicant pool.

In addition to materials submitted to the Office of Graduate Admissions (see "Admission" above), the following materials must be submitted to the graduate secretary at the School of Art and Art History: transcripts from all colleges and universities the applicant has attended; three letters of recommendation, including one from the applicant’s M.A. thesis supervisor, assessing the applicant’s potential for doctoral study in art history (sent by the person making the recommendation); and a copy of an M.A. thesis or other substantial M.A. research paper.

Applicants also must submit a 1,000-word personal statement describing their purpose in pursuing graduate studies and their intellectual development, academic interests, and career goals; the statement must name the University of Iowa faculty member under whose guidance the applicant hopes to work and how that faculty member’s area of expertise, or the art history program, is especially suited to the applicant’s interests and goals.

Applicants to graduate programs in art history should consult the Art and Art History Graduate Bulletin on the School of Art and Art History web site.

M.A.: Art Education

Applications to the M.A. program in art education, with all supporting materials and requests for financial aid, must be received at the School of Art and Art History and the Office of Graduate Admissions by February 1 for fall admission.

Applicants to the M.A. program must hold a B.A. or B.F.A. in art equivalent to that offered by The University of Iowa. They also must hold teaching licensure/certification in art.

Applicants with course work deficiencies are required to remedy the deficiencies by taking appropriate courses.

In addition to materials submitted to the Office of Graduate Admissions (see "Admission" above), M.A. applicants must submit the following materials to the graduate secretary at the School of Art and Art History: a term paper or other example of ability to write in the field; a selection of slides or photographs of their creative work in two studio areas; three letters of recommendation assessing their potential for graduate study; and
a one-page personal statement describing their purpose for pursuing graduate study.

**Ph.D.: Art Education**

Applications to the Ph.D. program in art education, with all supporting materials and requests for financial aid, must be received at the College of Education and the Office of Graduate Admissions by February 1 for fall admission.

Applicants to the Ph.D. program must hold an M.A. or M.F.A. in art education from The University of Iowa or an equivalent degree from an accredited college or university. They also must have completed one year of successful teaching experience in an elementary or secondary school.

Applicants with course work deficiencies are required to remedy the deficiencies by taking appropriate courses.

In addition to materials submitted to the Office of Graduate Admissions (see "Admission" above), Ph.D. applicants must submit the following materials to the Art Education Office: a portfolio consisting of 12 colored slide reproductions of their art work and two examples of their written work, which may be new or previous work.

**Financial Support**

Fellowships, teaching assistantships, research assistantships, and tuition scholarships are awarded to graduate students on the basis of artistic and/or scholarly record.

In the studio programs, financial aid to new students is possible, but most assistantships and scholarships are awarded to graduate students who have been in residence for at least a year. This gives faculty members an opportunity to observe their performance and potential.

**Presidential Graduate Fellowships**

The Graduate College awards Presidential Graduate Fellowships on the basis of a University-wide competition among incoming Ph.D. students. For information about the fellowships, including nomination and selection criteria and stipends, see Presidential Graduate Fellowship on the Graduate College web site.

**Dean’s Graduate Fellowships**

The Graduate College awards Dean’s Graduate Fellowships on the basis of a University-wide competition among graduate students. Criteria for the fellowships are similar to those for the Presidential Graduate Fellowship but are designed to support incoming students who are underrepresented in graduate education. For more information, see Dean’s Graduate Fellowship on the Graduate College web site.

**Teaching and Research Assistantships**

Assistantships are awarded to graduate students on the basis of academic record, promise as scholars or artists, and demonstrated ability to do the job. Quality of performance in one’s graduate program at Iowa is generally the major criterion for awarding teaching assistantships. The number of hours of work required depends on the amount of the award.

**Scholarships and Fellowships**

The School of Art and Art History offers a variety of scholarships and fellowships made possible by contributions from alumni who wish to support promising artists and scholars. These awards are made on the same basis as teaching and research assistantships.

Information and application materials for graduate scholarships and fellowships are included in the admissions package. They also are available from the School of Art and Art History main office in Seashore Hall.

Renewal or reappointment for fellowships and assistantships depends on adequate progress toward the degree (graduate students must accumulate at least 18 s.h. of graduate credit each calendar year and maintain a grade-point average above the required minimum) and satisfactory performance of assistantship duties.

Decisions on assistantships and financial aid generally are made during the latter part of the spring semester for the following academic year. Applications and all relevant materials should be on file by February 1. Applicants should verify the submission date; consult the school’s main office.

**Student Organizations**

The undergraduate Art History Society and the graduate Art History Society sponsor activities for students. The Faculty/Graduate Student Art History Colloquium meets five times each semester to focus on professional development and issues of broad interest in art.

**Resources and Facilities**

**Reference Collections**

The art library contains 100,000 volumes, an outstanding periodical collection, and an extensive microfilm and microfiche archive.
The school’s Office of Visual Materials contains a rapidly growing collection of 325,000 slides, 30,000 digital images, 350,000 35mm slides, 30,000 mounted photographs, and a video collection.

**Museum of Art**

The University of Iowa Museum of Art has a significant permanent collection that includes major holdings of 20th-century and contemporary art, African and pre-Columbian art, English and American silver, European and American prints, drawings and photographs, and Etruscan, Iranian, and contemporary American ceramics. As well as serving as a resource for research in a wide variety of art history areas, the museum offers a program of exhibitions, lectures, and recitals.

Due to the Iowa River flooding of summer 2008, the museum’s collections are being displayed and its events are being held in a variety of other facilities. Learn about current exhibitions and events, and their locations, by visiting the Museum of Art web site.

**Interdisciplinary Resources**

Colloquia, visiting artists and lecturer programs, and graduate workshops bring visitors to the school and provide open forums for discussion of issues in art and scholarship.

Among the school’s major assets is the Project for the Advanced Study of Art and Life in Africa (PASALA), an interdisciplinary program that brings together faculty with international reputations in art history, anthropology, films, history, and literature to offer courses and independent study of art in West, Central, East, and South Africa. The result is a program of unusual breadth and depth of expertise. PASALA is among the most active of such programs in the country, organizing international symposia that discuss significant topical issues and publishing the proceedings in regular issues of *Iowa Studies in African Art*. PASALA offers scholarships and support for research in Africa and dissertation preparation to outstanding students. A major resource for PASALA is the Stanley Collection of African Art in The University of Iowa Museum of Art.

Art history participates in the University’s Crossing Borders program, which offers major financial support to designated graduate student fellows whose dissertation topics involve multiple foreign language areas. Fellows take team-taught seminars in a range of disciplines, with focus on interactions across cultural, regional, or national divides. They help plan an annual convocation, at which they and invited lecturers present their research.

The school also maintains an affiliation with the University’s Department of American Studies, providing students with opportunities to study not only the history of American art but a variety of interdisciplinary programs in American history, literature, and politics.

**Art Buildings**

The School of Art and Art History’s permanent buildings are closed while The University of Iowa renovates and rebuilds arts campus facilities that were damaged or destroyed by Iowa River flooding during summer 2008. The school’s main office currently is located in Seashore Hall on the University’s central campus. Studio classrooms are housed in the Studio Arts Building, on Iowa City’s south side. Visit the School of Art and Art History web site and ISIS for information about studio, office, and classroom sites.

The school’s administrative center, Art Building West, is undergoing renovation and is scheduled to reopen in spring 2012. The building contains art history classrooms, the visual resources office, a gallery, a café, the Art Library, an auditorium, a media theater, a computer laboratory, and studios for graphic design, painting, and digital photography. Designed by architect Steven Holl, Art Building West has won numerous awards for its innovative design, including the 2007 American Institute of Architects Honor Award for Architecture.

Plans are under way for construction of a new building to replace the original Art Building, which was destroyed by the 2008 flooding.

**Courses**

**Art History, Primarily for Undergraduates**

**01H:001 Art and Visual Culture**

Developments in Western art history from prehistoric times (ca. 25000 BCE) to the present; key monuments in architecture, painting, and sculpture in their wider cultural contexts; 19th- and 20th-century new media, such as photography. GE: Historical Perspectives; Literary, Visual, and Performing Arts.

**01H:002 Arts of Africa**

Arts, artists, and cultures of Africa; sculpture, paintings, pottery, textiles, architecture, human adornment. GE: International and Global Issues; Literary, Visual, and Performing Arts.
01H:003 Art of Pre-Columbian America, Native America, and Oceania 3 s.h.

01H:004 Masterpieces: Art and Cultural Paradigms 3 s.h.
Masterpieces of Western art--how to look at, think about, and understand some of the worlds' most exciting works of architecture, painting, and sculpture; their construction, hidden meanings, historical content, and their meanings today. GE: Literary, Visual, and Performing Arts.

01H:005 Western Art and Culture Before 1400 3 s.h.
Survey to foster development of critical skills in thinking and writing about visual culture, and to familiarize students with broad outlines of artistic development in the Western tradition, from prehistory through later Middle Ages; aesthetic qualities of artworks, relationship between style, function, and meaning. GE: Historical Perspectives; Literary, Visual, and Performing Arts.

01H:006 Western Art and Culture After 1400 3 s.h.
Survey of the Western world's visual arts from Renaissance (ca. 1400) to the present; major movements and principal masters of Western Europe and the United States in their social and historical contexts; focus on stimulation of visual literacy and familiarity with outstanding cultural monuments. GE: Historical Perspectives; Literary, Visual, and Performing Arts.

01H:007 Writing About the Visual Arts 3 s.h.
Opportunity to develop understanding of and skill in using visual-arts writing conventions and linguistic competencies that are necessary for academic and professional success; formats such as exhibition reviews, art criticism, research writing, artist’s statements; experience through exercises, formal essays, revision, workshops. Requirements: fulfillment of General Education rhetoric requirement.

01H:008 Themes in Global Art 3 s.h.
Key themes in art from a global perspective; propaganda and power, social functions of art, word and image, ritual and body decoration, artistic exchange, religion. GE: Literary, Visual, and Performing Arts; Values, Society, and Diversity.

01H:009 The Garden as Paradise 3 s.h.
Fundamental and universal question: What is the relationship between humanity and nature? How the ornamental garden has functioned as a metaphor for paradise across time and among diverse cultures; basic tools to analyze landscape design; how the artful manipulation of nature has served to express various political, religious, and social ideals across the globe; comprehensive and chronological survey of the development of garden design. GE: Historical Perspectives.

01H:016 Asian Art and Culture 3 s.h.
Art from India, China, and Japan in many media and forms, in their cultural and historical contexts; cultural distinctions of these Asian civilizations as seen through the visual arts; chronology used to highlight historical processes and provide perspectives on continuity and change. GE: Historical Perspectives; Literary, Visual, and Performing Arts. Same as 039:016.

01H:018 Introduction to African Architecture 3 s.h.
Survey of African architecture, including structures throughout the continent ranging from rock-cut churches of Ethiopia to elaborately painted Ndebele homes of South Africa; four areas of African architecture (ancient, traditional, Islamic, contemporary); function, materials, and aesthetic choices of architecture and how they reflect social, religious, political, and economic situations of the people who constructed it.

01H:021 Introduction to the Art of West Africa 3 s.h.
Introduction to the visual arts of West Africa, including Burkina Faso, Mali, Nigeria, Ivory Coast, Liberia, Guinea, Ghana, and Sierra Leone; arts in cultural contexts--what objects meant to the people who created them, how they mirrored social, educational, political, and economic systems.
01H:023 Introduction to Art and Life in Africa
3 s.h.
Masks and sculpture; techniques used to create art (pottery, weaving, carving, brass casting, iron smelting and forging, architecture); videos of art used in performance and African artists creating art; readings of African novels, including Things Fall Apart by Nigerian novelist Chinua Achebe; daily life in Africa (farming, building houses, cooking, education, child rearing, funerals, religion) and other aspects of life that give context to art created by African artists.

01H:026 Introduction to Ancient Art
3 s.h.
Art and architecture of the Mediterranean world ca. 3500 B.C.E. to death of Constantine (337 C.E.); Egyptian, Cycladic, Minoan, Mycenaean, Greek, Etruscan, and Roman cultures; artistic responses to life and death; impact of breakthroughs in technology and engineering on visual culture; role of art in empire building; interrelationships of art, politics, religion. Same as 20E:026.

01H:029 First-Year Seminar
1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.

01H:031 Introduction to the Art of China
3 s.h.
Visual arts of China and their history; emphasis on understanding in context of Chinese civilization, history. Same as 039:028.

01H:033 Introduction to the Art of Japan
3 s.h.
Chronological survey of Japan’s visual arts in their historical and cultural contexts from Neolithic age to present; extensive use of slides, films, other visual materials. Same as 39J:033.

01H:040 Introduction to Medieval Art
3 s.h.
How Medieval art has been known, collected, and appreciated in America; neomedieval buildings, exceptional museum holdings in New York; periodization, terminology, genres, styles, sources, original context, later history, and cultural impact of selected Medieval works of art in America.

01H:047 Introduction to Italian Renaissance Art
3 s.h.
Italian art, architecture from early Renaissance to 1600.

01H:053 Introduction to Baroque Visual Culture
3 s.h.
Art, architecture in Europe from 1600 to 1700.

01H:062 Introduction to Nineteenth-Century Art
3 s.h.
Major European artists, works, movements, aesthetic theories from late 18th century to 1900; works in their aesthetic, cultural, intellectual, political contexts; boundaries, definitions of movements such as Neo-Classicism, Romanticism, Realism, Impressionism, Post-Impressionism, Symbolism.

01H:063 Introduction to Northern Renaissance Art
3 s.h.
Northern European art between 1350 and 1600; the transition between the late Middle Ages and the Renaissance; artistic output of this period; development of critical thinking skills by exploring ways in which the Northern Renaissance has been defined with respect to Italian Renaissance and northern medieval traditions. Prerequisites: 01H:005 or 01H:006 or 01H:040 or 01H:047.
01H:066 Introduction to American Art 3 s.h.
Survey of painting, sculpture, architecture, and photography in the United States from colonial era to mid-20th century; how the new country grappled with creating a visual culture unique to its own character and development; portraits, landscape paintings, sculpture, and architecture in an array of styles and media; circumstances of their creation, aspirations and preconceptions of their makers, perspectives of their audiences. Recommendations: 01H:006. GE: Historical Perspectives; Literary, Visual, and Performing Arts.

01H:073 Introduction to Modern/Contemporary Art 3 s.h.
Modern European and American painting, sculpture, and architecture from 1880 to present; major art movements of modern art history. Prerequisites: 01H:005.

01H:084 Introduction to Western Architecture 3 s.h.
Overview of monuments, Neolithic period to present; aesthetic and structural principles, major styles, architects.

01H:090 Introduction to Art and Religion 3 s.h.
How religious and cult practices have influenced the shape of objects and monuments now considered superb examples of art and architecture; late antiquity to Renaissance; case studies; focus on initiation rituals.

01H:098 Undergraduate Topics in Art History 3 s.h.
Varied topics in art history. Requirements: art history major and undergraduate standing.

01H:099 Undergraduate Seminar in the History of Art 3 s.h.
Characteristic problems, methodological issues, critical thinking and writing. Offered fall semesters. Requirements: art history major.

Art History for Undergraduate and Graduate Students

An introductory course in the appropriate art history area or consent of instructor is prerequisite for some courses numbered above 100. Courses designated "Themes in Art History" consider topics of current interest in the field, organized thematically rather than chronologically.

01H:104 American Indian Art 3 s.h.
Sculpture, painting, architecture, crafts, arts of personal adornment of native peoples of North America. GE: Literary, Visual, and Performing Arts; Values, Society, and Diversity.

01H:105 Art of Pre-Columbian America 3 s.h.
Art, architecture of Mexico, Peru before Cortéz.

01H:106 African Kings 3 s.h.
African art created to reflect the political and military power of African rulers; in-depth study.

01H:107 Art of West Africa 3 s.h.
How art is used to solve problems and mark important passages in life.

01H:108 Themes in African Art 3 s.h.
Survey of African architecture includes structures throughout the continent ranging from the rock-cut churches of Ethiopia to the elaborately painted Ndebele homes of South Africa; four areas of African architecture: ancient, traditional, Islamic, contemporary; function, materials, and aesthetic choices of the architecture and how these reflect the social, religious, political, and economic situations of the people who constructed it.

01H:109 Themes in Ancient Art 3 s.h.
Themes and topics in ancient art.

01H:110 Egyptian Art 3 s.h.
Sculpture, painting, architecture, and luxury arts from Pyramid Age to Death of Cleopatra. Same as 032:104.
01H:116 Introduction to the Art of Central Africa
Artistic production and media in Central Africa categorized by geographies but examined from perspectives of innovation, power, gender, performance, ancestry, religious beliefs, technology, death, and the body; breadth of Central Africa’s artistic production, art history, and terminology; 20th-century debates around African art.

01H:119 Chinese Art and Culture
Archaeological discoveries, sculpture, painting, architecture, calligraphy, other arts of Greater China area in historical and cultural contexts of past 5,000 years. Prerequisites: 01H:006 or 01H:031. Same as 039:159.

01H:120 Chinese Painting I
Early Chinese painting from fourth century B.C.E. through 14th century C.E.; figural style, religious art, emergence of landscape, other nonreligious subjects, interconnectedness of painting and calligraphy as fine arts. Prerequisites: 01H:016 or 01H:031. Same as 039:120.

01H:122 Japanese Art and Culture
Art of Japan in historical, religious, cultural contexts; what is specifically Japanese about Japanese arts and culture; non-Japanese influences, contributions. Prerequisites: 01H:006 or 01H:033. Same as 39J:156.

01H:123 Japanese Painting
Japanese painting in its historical, cultural contexts; focus on developments of successive eras--religious art; narrative, other literary connections; Zen; decorative traditions; popular arts; Japan and the modern world. Same as 39J:123.

01H:124 Themes in Asian Art History
Prerequisites: 01H:016 or 039:016. Same as 039:131.

01H:127 Classical Greek Art
Art, sacred architecture from early Classical through late fourth century B.C.E.; Athens in the Golden Age. Same as 20E:124.

01H:128 Greek Vase Painting
Greek ceramics as documents of religious beliefs, mythology, and daily life 1000-300 B.C.E. Prerequisites: 01H:005 or 01H:026.

01H:132 Art of Early Rome: Patrons and Politics
Examination of architecture, sculpture, and painting in central Italy from c. 800 B.C. to the end of the Roman Republic in 27 B.C.; art in the service of social ideology and political propaganda; funerary art and its relationship to the living; artistic interactions between Etruria, Greece, and Rome. Same as 20E:128.

01H:133 Art of the Ancient Roman Empire
Major developments in architecture, sculpture, and painting from the ascension of Augustus to sole ruler in 31 B.C. to the death of Constantine in A.D. 337; influence of individual emperors on the development of artistic forms; relationship between public and private art; interdependency of Rome and the provinces. Same as 20E:130.

01H:134 Art and Culture in Ancient Pompeii
Art and architecture, as documents of ancient society and religion in towns destroyed by Mount Vesuvius in C.E. 79. Same as 20E:129.

01H:135 City of Rome: Image and Ideology
The myth of the city of Rome as seen in paintings, sculpture, architecture, urbanism, and cinema from early Renaissance to Mussolini; focus on urban topography and mythic origins; the divinely-ordained destiny of Rome in God’s providential plan for humanity; raw imperialism of Italian fascism as manifested in the visual legacy of the city; ideological underpinnings of the city’s major institutions--the papacy, municipal government, Italian monarchy, and the fascist state as supported through the appropriation of the myth of Rome.
01H:136 Early Medieval Art 3 s.h.
Complex artistic traditions that developed roughly between 300 and 1000 in the territories once governed by the Roman Empire and in the areas of northern Europe directly influenced by Western Christian tradition; the period not simply a "Dark Age," but a pivotal chapter in the history of Western art and culture; group discussion, individual research topics.

01H:137 Themes in Medieval Art 3 s.h.
Themes and topics in medieval art.

01H:138 Gothic Architecture 3 s.h.
Gothic architecture and its history, from varied perspectives (e.g., formal structural, symbolic, geometric, socioeconomic). Prerequisites: 01H:005 or 01H:040.

01H:140 The World of Giotto and Dante 3 s.h.
Painting, sculpture, and architecture 1250-1400. Prerequisites: 01H:005 or 01H:006.

01H:141 Masaccio to Leonardo da Vinci 3 s.h.
Painting, sculpture, and architecture 1400-1525.

01H:142 Leonardo, Raphael, and Their Contemporaries 3 s.h.
The arts in Italy 1485-1550. Prerequisites: 01H:005 or 01H:006.

01H:143 Italian Baroque Visual Culture 3 s.h.
Visual culture of 17th-century Italy contextualized; major media (painting, sculpture, architecture) by leading artists (Bernini, Borromini, Caravaggio, Cortona); full range of material culture, including minor and decorative arts; use of imagery by individual and institutional patrons for the persuasive purpose of political and social advancement; ideological utility of art as a recurring theme, underscoring the Baroque antecedents of media manipulation of our own time.

01H:144 Classical Architecture: Theory/Practice 3 s.h.
Architectural design in the Italian Renaissance, Brunelleschi to Borromini. Prerequisites: 01H:005 or 01H:006.

01H:145 Themes in Baroque-Era Art 3 s.h.
Topics and themes in baroque-era art.

01H:146 Themes in Renaissance Art 3 s.h.
Themes and topics in Renaissance art.

01H:147 The Artist in the Studio: Allegory and Reality from Renaissance to Modern 3 s.h.
Changing needs of a growing modern secular leisure class, demonstrated in works of art that depict artists at work in their own environment and the popularity of artist's self-portraits; significance of subject category in understanding changes in perception of social, economic, and political roles of visual artists and visual arts traced from Leonardo, Michelangelo, and Raphael to Velasquez, Rubens, Rembrandt, Vermeer, Picasso, Matisse and others; literary, musical, and theatrical arts.

01H:150 Seventeenth-Century Dutch and Flemish Painting 3 s.h.
Painting in the age of Rubens, Rembrandt, Vermeer; rise of landscape, still life, genre. Prerequisites: 01H:006.

01H:152 David to Delacroix: Art in the Age of Revolutions 3 s.h.
Developments in French art and culture in a period of artistic, cultural, and political upheavals from the French Revolution through the Napoleonic Empire to the founding of the Second Empire in the mid-19th century; intersections of art with aesthetics, culture, and politics; role of psychology, biology, and natural sciences in art; use of myth; rise of modernism; changes in patronage; new role of museums and galleries; innovations in printmaking, book illustration, and caricature; artists include David, Girodet, Gros, ingres, Gericault, and Delacroix, among others.
01H:155 The Romantic Revolution 3 s.h.
Transformations in European art and culture 1750-1850, an age of artistic, political, cultural, intellectual crisis and revolutions; major artists, including David, Ingres, Gericault, Delacroix, Goya, Freidrich, Constable, Turner.

01H:156 Themes in 18th- and 19th-Century European Art 3 s.h.
Themes and topics in 18th- and 19th-century European art.

01H:157 Paris and the Art of Urban Life 3 s.h.
City of Paris examined in varied historical, artistic, cultural contexts; interdisciplinary. Same as 009:130.

01H:158 Realism, Impressionism, Post-Impressionism 3 s.h.
Naturalism, Realism, the Impressionist landscape, painting of modern life, new trends in subjectivity and exoticism mid- to late-19th-century European art and culture; Courbet, Manet, Degas, Monet, Renoir, Seurat, Cezanne, Van Gogh, Gauguin, Ensor, Munch.

01H:159 Manet to Matisse 3 s.h.
Development of modernism and the avant-garde in late 19th- and early 20th-century Paris; intersection of innovation and tradition, literature and art; role of theory and criticism in works of Manet, Degas, Seurat, Cezanne, Gauguin, Rodin, Matisse, and Picasso.

01H:160 Building a Nation: American Architecture to 1865 3 s.h.
How ethnic groups shaped America's cultural landscapes and architecture from colonial period to Civil War.

01H:162 National Images: American Art to 1865 3 s.h.
Painting, sculpture, and architecture from colonial times to Civil War. Prerequisites: 01H:006 or 01H:066.

01H:163 American Renaissance and the Gilded Age 3 s.h.
Architecture, painting, sculpture 1865-1913. Prerequisites: 01H:006 or 01H:066 or 01H:162.

01H:164 Nazi and Stalinist Art: Aesthetics of Power 3 s.h.
Manipulative power of art, architecture, urbanism, and film in 20th-century totalitarian regimes—Italy, Germany, and Stalinist Soviet Union as well as Madrid, Warsaw, Beijing, Pyongyang, Baghdad; the dark side of art and its transnational character, particularly in architecture and urban planning; nature of propaganda and state-sponsored art, responses to modernism and industrialization, allure of militarism and empire, uses of historicism, role of public ritual and mass spectacle in totalitarianism; common currency of totalitarian art across national groups, cultures, ideologies; how aesthetics function as tools of modern autocracies, with lessons for ailing 21st-century democracies. Requirements: an introductory course in an appropriate area for art majors.

01H:165 American Western Art 3 s.h.
Painting and sculpture of the western United States, primarily from Euro-American perspective. Prerequisites: 01H:006 or 01H:066.

01H:166 American Landscape Art 3 s.h.
Landscape from 1750 to present, emphasis in 19th century; land and its use fundamental to the history and culture of the United States as American art subjects, American art in the period of territorial expansion in the 19th century; major movements of landscape aesthetics, artistic treatments, historiography. Requirements: at least one art history course.

01H:167 African American Art and Architecture 3 s.h.
Visual and material culture of African Americans, including painting, sculpture, decorative arts, and film, examined from aesthetic and ideological perspectives.
01H:168 American Print Culture 3 s.h.
Exploration of a wide range of imagery printed and published in the United States during the nineteenth century (1776-1900); fine art original prints, popular imagery in periodicals and illustrated books; scholarly literature, history of evolving technologies, variety of printed work, shifting reputation of printed art and its makers.

01H:170 Modernism and Early Twentieth-Century American Art 3 s.h.
American responses to European Modernism in painting, sculpture, architecture, and photography. Prerequisites: 01H:006 or 01H:066.

01H:171 Modern Art 3 s.h.
European and American art 1900-1940. Prerequisites: 01H:006 or 01H:073.

01H:172 Late Modern Art 3 s.h.
American and European art 1940-1970. Prerequisites: 01H:006 or 01H:073.

01H:173 Contemporary Art 3 s.h.
European and American art 1970 to present. Prerequisites: 01H:006 or 01H:073.

01H:174 Themes in Modern and Contemporary Art 3 s.h.
Topics and themes in modern and contemporary art.

01H:176 Theory and Practice in Contemporary Art 3 s.h.
Influence of art theory on recent art practice; critics and philosophers whose ideas have been particularly important to the process of putting art and its histories into greater social and political context--Theodor Adorno, Walter Benjamin, Roland Barthes, Jacques Derrida, Michel Foucault, Jean-Francois Lyotard, Jurgen Habermas, Jean Baudrillard, Terry Eagleton, Michael Fried, T.J. Clark, Rosalind Krauss, and Homi Bhabha; general influence of feminism, poststructuralism, postcolonialism, and postmodernism.

01H:178 Pop Art 3 s.h.
Survey of pop art in America, Britain, Europe; focus on developments in painting and sculpture 1950s to early 1960s; continuing influence of Pop Art. Prerequisites: 01H:006 or 01H:073.

01H:179 Minimalism 3 s.h.
Survey of Minimalism; focus on developments in painting and sculpture during 1960s; continuing influence. Prerequisites: 01H:006 or 01H:073.

01H:180 Marketing, Promoting, Politicking Contemporary Public Art 3 s.h.
How public art projects are conceived, created, and paid for; projects sponsored and funded by federal, state, and local governments and private businesses 1960 to present; projects' operational structures, how artists are selected; Vietnam Veterans Memorial, Serra's Tilted Arc, recent projects. Requirements: an introductory course in an appropriate area for art majors. Same as 024:181.

01H:181 The Art Museum: Theory and Practice 3 s.h.
Introduction to different aspects of art museums; emphasis on roles of art historians, especially curatorial practice; current and historical theories and practices of art exhibitions; varying debates of the politics of display; art museum professions; the many facets of art exhibition preparation; the University of Iowa Museum of Art collections. Same as 024:162.

01H:182 Art, Law, and Ethics 3 s.h.
How law and ethics apply to individuals and institutions concerned with the visual arts. Same as 024:161, 091:192.

01H:183 History of Prints 3 s.h.
Printmaking as important art form, influential carrier of styles and iconography from area to area; focus on Europe; history of prints from prehistoric times to present.

01H:184 History of Photography 3 s.h.
Survey of photography 1839 to present. Prerequisites: 01H:006 or 01H:073.
01H:185 Modern Architecture  3 s.h.
Impact of new technology, artistic theory, and social practices on modern European and American architecture, 1890 to 1977. Prerequisites: 01H:006 and 01H:085.

01H:186 Contemporary Architecture  3 s.h.
Quality of contemporary-built environments in America, Western Europe, Asia, and Middle East from 1970 to present; stylistic evolution of postmodern design, new urbanism, sustainable architecture; impact of literary and cultural theory on contemporary practitioners such as Daniel Libeskind, Steven Holl.

01H:187 Sustainable Architecture: Past, Present, and Future  3 s.h.
Sustainable building practices of the past, traditional and indigenous cultures; current sustainable architectural practices, leading practitioners, institutional standards in the U.S. and Europe; competing demands of sustainability against the ideals of historic preservation; how architectural aesthetics can support sustainable technology. Requirements: junior, senior, or graduate standing.

01H:188 Big-Shouldered City: Chicago Architecture  3 s.h.
Architectural and urban development of Chicago; how changing visions of this most-American of cities has been influenced by aesthetic, social, political, and economic factors; early settlement patterns, the impact of the Great Fire of 1871, skyscraper technology, Daniel Burnham’s 1909 Plan, the Bungalow Belt, and the park system; the larger history of the American city in terms of it’s architectural, urban, and landscape development.

01H:189 Themes in Architectural History  3 s.h.
Topics and themes in architectural history.

01H:190 Honors Research in Art History  arr.

01H:194 Independent Study in Art History  arr.
Advanced work in art history.

01H:199 Topics in Art History  3 s.h.
Varied topics.

Art History, Primarily for Graduate Students

01H:200 History and Methods  3 s.h.
Critical thinking and research; readings in historical development of the discipline, from Renaissance to present; methodological paradigms and trends.

01H:210 Art History Colloquium  1 s.h.
Current topics and research in art history. Repeatable. Requirements: art history graduate standing.

01H:247 Crossing Borders Seminar  2-3 s.h.

01H:300 Directed Studies  arr.

01H:302 M.A. Written Thesis  arr.

01H:310 Seminar: Problems in African Art  2-3 s.h.
Repeatable.

01H:316 Seminar: Problems in Asian Art  3 s.h.
Dialogue between arts and cultures of Asia and those of other major areas; varied research topics, such as Islamic arts in relation to those of Middle Ages and/or Renaissance in Europe; China and/or Japan in relation to Europe and/or the Americas, influences of Western arts and culture on Japan or China since World War II; students determine topics and research strategies in consultation with instructor; project. Repeatable. Requirements: art history experience.
Studio Art for Undergraduate and Graduate Students

Courses numbered through 099 are primarily for undergraduates and are not repeatable for credit except where indicated. Some courses numbered 100-199 are repeatable. Courses 01A:003 Basic Drawing and 01A:004 Design Fundamentals are prerequisites for all studio courses for art majors.

Fundamentals

01A:003 Basic Drawing 3 s.h.
Two-dimensional visual language, media; space, form; color. Requirements: art major or minor.

01A:004 Design Fundamentals 4 s.h.
Two- and three-dimensional concepts and their relations; working with basic drawing instruments; problems in visual arts; artists’ philosophies and techniques. Requirements: art major.

01A:009 Art Student Ambassador Seminar 1 s.h.
Ambassadors provide information about the School of Art and Art History to incoming and visiting students, the University community, and the broader community; conduct tours; meet with students and parents; review curriculum; provide information on opportunities; coordinate events; and develop materials for incoming students. Requirements: art major.

01A:010 Internship Experience: Undergraduate 1-3 s.h.

01A:302 M.A. Written Thesis 1 s.h.

01A:304 M.F.A. Written Thesis 1 s.h.

Elements

01B:001 Elements of Art 3 s.h.
01B:035 Elements of 3-D Design 3 s.h.
Introduction to 3-D design using drafting, modeling, and virtual reality software; basic concepts of drafting, planning, and color theory; basic Auto CAD, 3ds Max Studio, Vizard, InDesign software; students design an object to be printed 2-D and 3-D and a conceptual space to be printed 2-D and experienced virtually; student journal and portfolio. Requirements: non-art major.

01B:040 Elements of Jewelry and Metal Arts 3 s.h.
Fundamental 3-D design principles and appreciation of contemporary jewelry and metal art works; techniques and materials in jewelry and metal arts; experimentation with diverse media. Requirements: non-art major. GE: Literary, Visual, and Performing Arts.

01B:050 Elements of Intermedia 3 s.h.
Introduction to intermedia for non-art majors; conceptual, interdisciplinary approach to new and emerging art forms, including time-based media, video, collaborative, and community-based projects; research in online networks, web projects. Requirements: non-art major.

01B:051 Elements of Foil Imaging 3 s.h.
Printmaking experience using the Iowa Foil Printer; aesthetic and technical research, documentation in Foil Imaging ... A New Art Form; hands-on opportunity to explore new dimensions of visual expression. Requirements: non-art major.

01B:075 Elements of Digital Photography 3 s.h.
Introduction for non-art majors to history, aesthetics, and practice of photography as a fine art; includes demonstrations, workshops, critiques, final portfolio; photography time outside of class; digital camera required; $100-$150 for materials. Requirements: non-art major.

01B:080 Elements of Printmaking 3 s.h.
Requirements: non-art major. GE: Literary, Visual, and Performing Arts.

01B:090 Elements of Sculpture 3 s.h.

01B:184 Vertical Integration of Business and Studio Art 3 s.h.
Integrated hands-on experience in business and advanced technology/equipment practice for metal arts/mixed media; cutting-edge technology and equipment (e.g., CNC wax carving mill, rapid prototyping machine, laser welder, advanced stone setting); commercial aspects of making and selling art, including budgeting, pricing, marketing, display, and working with clients.

Ceramics

Courses 01A:003 Basic Drawing and 01A:004 Design Fundamentals are prerequisites for all ceramics courses for art majors; 01A:003 Basic Drawing is prerequisite for nonmajors.

01C:060 Exploring Forms in Clay I 3 s.h.

01C:061 Exploring Thrown Forms in Clay II 3 s.h.
Basic wheel-throwing techniques; clay, glaze formulation and preparation in kiln firing. Prerequisites: 01C:060.

01C:170 Advanced Clay Forming III 4 s.h.
Advanced throwing techniques; larger scale, more professional goals; projects may be more sculptural or one of a kind. Offered fall semesters. Prerequisites: 01C:060 and 01C:061.

01C:171 Advanced Clay Forming IV 4 s.h.
Advanced individual projects. Offered spring semesters. Prerequisites: 01C:170.
01C:172 Ceramic Materials and Effects
4 s.h.
Empirical, practical methods of glaze and body formulation; effects of various types of kilns and firing atmospheres on glaze materials, clay bodies; digital imaging used for testing and documenting results. Offered fall semesters of even years. Prerequisites: 01C:170.

01C:173 Undergraduate Ceramics Workshop
3-4 s.h.
Advanced undergraduate studio; critiques of student work and electronic portfolio development, visiting artist participation; may include field trips. Prerequisites: 01C:171.

01C:174 Kiln Building
4 s.h.
Kiln theory, design, construction methods; may include participation in kiln construction. Offered fall semesters of odd years. Prerequisites: 01C:170.

01C:176 Concepts: Materials and Installation
4 s.h.
Exposure to contemporary methods of working in clay, develop critical thinking skills that move clay into the realm of conceptual work, develop a personal direction in the medium; conceptual development and material exploration; set clay side by side with other materials and mediums; demonstrate dedication to the work and to the development of mature ideas and forms of expression. Prerequisites: 01C:170.

01C:190 Undergraduate Individual Instruction
1-3 s.h.
Individual instruction in ceramics for advanced students.

01C:270 Graduate Individual Instruction in Ceramics
arr.
Repeatable. Requirements: knowledge of clay and glaze computation, and ability to fire kilns.

01C:275 Ceramics Workshop
3-4 s.h.
Advanced graduate studio; critique of student work; visiting artists, field trips. Repeatable. Prerequisites: 01C:171.

Design
Courses 01A:003 Basic Drawing and 01A:004 Design Fundamentals are prerequisites for all design courses for art majors; 01A:003 Basic Drawing is prerequisite for nonmajors.

01D:082 Introductory Computer Graphic Design
3 s.h.
Macintosh computer as creative tool for graphic design; composition, manipulation, organization of type and image; projects, demonstrations, discussions. Prerequisites: 01A:004 and 01D:028.

01D:090 Graphic Design I
3 s.h.
Basic principles, techniques, and applications of graphic design, typography, composition, visual perception; creative, problem-solving aspects of graphic design. Requirements: 01A:003 and 01A:004 for majors; 01A:003 for nonmajors.

01D:100 Typography
4 s.h.
Introduction to letterform and typographic fundamentals; designing with type—attention to composition, hierarchy, historical practice. Corequisites: 01D:090, if not taken as a prerequisite. Same as 108:101.

01D:110 Web Site Design I
3 s.h.
Designing for the World Wide Web; composition, manipulation, organization of type and images; projects, demonstrations, discussions. Prerequisites: 01D:090 and 01D:100.

01D:120 Graphic Design II
4 s.h.
In-depth study and exploration of graphic design as creative and problem-solving tool of visual communication; translation of ideas and concepts into comprehensible visual language. Prerequisites: 01D:090 and 01D:100.

01D:128 Computer Graphic Design
3 s.h.
Advanced composition, manipulation of image and type; organization and pre-press file management using Macintosh platform. Prerequisites: 01D:028 and 01D:082.
01D:140 Web Site Design II 4 s.h.
Continuation of 01D:110; in-depth exploration and study of graphic design principles and their application in online and interactive media; further development of HTML, CSS, other related technologies. Prerequisites: 01D:110 and 01D:120. Corequisites: 01D:150 or 01D:160, if not taken as prerequisites.

01D:150 Graphic Design III 4 s.h.
Continuation of 01D:120; graphic design knowledge and skills applied to complex design problems such as visual identity, packaging, information design. Prerequisites: 01D:110 and 01D:120.

01D:160 Problems in Graphic Design 4 s.h.
Design topics; content varies. Prerequisites: 01D:090, 01D:100, and 01D:120.

01D:175 Advanced Typography 3 s.h.
In-depth exploration of typographic principles and experimentation. Prerequisites: 01D:125.

01D:190 Undergraduate Individual Instruction 1-3 s.h.
Individual instruction in design for advanced students.

01D:200 Graduate Graphic Design Workshop 4 s.h.
Complex problems in graphic design; planning, development, organization of integrated design programs. Repeatable.

01D:240 Individual Instruction in Design arr.
Repeatable.

Three-Dimensional Design

01T:021 Problems in 3-D Design I: Form and Structure 3 s.h.
Materials, their formal and structural possibilities. Offered fall semesters. Requirements: 01A:003 and 01A:004 for majors; 01A:003 for nonmajors.

01T:022 Problems in 3-D Design II: Form and Function 4 s.h.
How objects are designed and structured; modeling, graphic skills necessary for basic project development. Offered spring semesters. Prerequisites: 01T:021.

01T:023 Basic Drafting 3 s.h.
How to prepare drawings for interior design projects; skills and techniques for translating 3-D design concepts to paper; drafting tools; conventions of notation and line weights and drafting in different scales; basic lettering; orthographic projections (e.g., floor plans, ceiling plans, elevations). Prerequisites: 01A:003 and 01A:004.

01T:025 Introduction to Portfolio Design 3 s.h.
Preparation of presentation boards and portfolio production for print and job application; for students in 3-D design and related areas. Requirements: 01A:003 and 01A:004 for majors; 01A:003 for nonmajors.

01T:028 Digital Forming 4 s.h.
Introduction to process of design; work with 3-D virtual digital tools to create objects and forms printed with rapid prototyping technology; use of Leonar3Do software, 3-D glasses, and a bird device that functions as a mouse to create forms in space; virtual modeling techniques that allow creation and manipulation of shapes in the air; design development on Leonar3Do, improved with 3ds Max, and saved for 3-D printing. Prerequisites: 01A:003 and 01A:004.

01T:064 Introduction to Computer-Aided Design for 3-D Design 3 s.h.
Basic principles of 2-D and 3-D computer-aided drafting; use of AutoCAD software to draw plans, elevations, and sections for objects and interior spaces. Prerequisites: 01A:003 and 01A:004.
01T:070 Introduction to Computer Modeling and 3-D Design
Basic knowledge and practical technical skills using 3ds Max studio software; experience creating and manipulating basic forms and working with texture, background, light, and camera viewpoints; basic animation. Requirements: 01A:003 and 01A:004 for majors; 01B:035 for nonmajors.

01T:075 Introduction to Virtual Reality for 3-D Design
Introduction to Vizard software; design of virtual 3-D space; translation of environments created in 3ds Max software into Vizard software. Corequisites: 01T:070.

01T:102 3-D Computer-Aided Design
Three-dimensional computer-aided drafting; use of AutoCAD software. Prerequisites: 01A:003 and 01A:004.

01T:137 Environmental Design I
Human interaction with the interior and exterior environment. Offered fall semesters of odd years. Prerequisites: 01T:021. Same as 049:158.

01T:141 Interior Design I
Relationship of interior space to its architecture, environment, human element; color, materials, furnishings, lighting; projects. Offered spring semesters. Prerequisites: 01T:021.

01T:142 Color for Interior Design
Use of color for interior spaces; principles of color theory reviewed and applied to 3-D environments; color as a compositional element and psychological tool. Prerequisites: 01T:021.

01T:143 Digital Animation and Visual Art
Assimilation of digital animation into realm of traditional fine art mediums; exploration of fundamental skills (storyboarding, rotoscoping, stop motion, motion graphics, 3-D animation); Adobe Photoshop, After Effects, and 3ds Max techniques and software that are industry standards in the careers of animators, storyboard artists, roto artists, digital compositors, and motion graphic artists; production of a show reel of student work for group showing and final critique. Prerequisites: 01A:003 and 01A:004.

01T:144 Interior Design II
Continuation of 01T:141. Offered fall semesters of even years. Prerequisites: 01T:064 and 01T:141.

01T:147 3-D Computer Graphic Art
Three-dimensional modeling; emphasis on movement in form and function; advanced modeling techniques in polygonal and NURBS modeling to generate fundamentally sound models used for rapid prototyping, visualization, and animation; Box modeling, NURBS modeling, rigging, materials, bump maps, normal maps, and rendering; fundamental skills of computer graphic artists working in the fields of animation, architectural visualization, video game modeling, industrial design, and engineering design. Prerequisites: 01T:070.

01T:176 Problems in 3-D Design: Locative Art Practice
How our relationship to Earth has changed with new forms of locating place in it; new forms of representation used to express the exploration of that relationship; designing a locative research project; exploration of four major course concepts (geo-annotation, locative inscription, GPS drawing, alternative cartography) using portable, networked, and location-aware computing for mapping relationships. Prerequisites: 01A:003 and 01A:004.

01T:190 Undergraduate Individual Instruction
Individual instruction in 3-D design for advanced students.
**01T:192 Fabrication and Design: Hand Built Bicycle**  
4 s.h.

Students build a bicycle frame by hand; project involves use of CAD modeling and development of fabrication skills to create a modern-day work of art. Prerequisites: 01T:064.

**01T:238 Environmental Design II**  
3 s.h.

Continuation of 01T:137; design of virtual environments. Repeatable.

**01T:240 Individual Instruction in 3-D Design**  
arr.

Individual instruction in 3-D design for advanced students.

**01T:249 Advanced Problems in Design**  
4 s.h.

Special issues and topics in design.

---

**Drawing**

Courses 01A:003 Basic Drawing and 01A:004 Design Fundamentals are prerequisites for all drawing courses for art majors; 01A:003 Basic Drawing is prerequisite for nonmajors.

All B.F.A. students in drawing and painting must take 01F:106 Undergraduate Seminar in Drawing and Painting. Offered fall semesters.

**01F:007 Life Drawing I**  
3 s.h.

Observational drawing of form in its spatial contexts; drawing in varied media; figural as well as nonfigural content. Requirements: 01A:003 and 01A:004 for majors; 01A:003 for nonmajors.

**01F:105 Concepts in Drawing**  
3-4 s.h.

Drawing from topics at the intermediate level; observation, theory, media, form, content; emphasizes personal direction. Prerequisites: 01F:007. Same as 049:157.

**01F:109 Advanced Concepts in Drawing**  
3-4 s.h.

Drawing from topics at the advanced level. Prerequisites: 01F:105.

**01F:190 Undergraduate Individual Instruction**  
1-3 s.h.

Individual instruction in drawing for advanced students.

**01F:199 Special Topics in Drawing and Painting**  
3-4 s.h.

Advanced issues in drawing and painting. Prerequisites: 01F:105.

**01F:201 Graduate Drawing**  
3-4 s.h.

Compositional and conceptual drawing as related to the student’s major interest; varied media. Repeatable. Requirements: 6 s.h. of 01F:105.

**01F:205 Individual Instruction in Drawing**  
arr.

Repeatable.

---

**Jewelry and Metal Arts**

Courses 01A:003 Basic Drawing and 01A:004 Design Fundamentals are prerequisites for all metalsmithing and jewelry courses for art majors; 01A:003 Basic Drawing is prerequisite for nonmajors.

**01G:084 Introduction to Jewelry and Metal Arts**  
3 s.h.

Fabrication, hammer forming, hydraulic die forming, soldering, riveting, etching, texturing, anodization of aluminum and titanium, stone setting, and patination techniques; creation of jewelry, flatware, and other functional and nonfunctional sculptural objects using varied metals and other materials; emphasis on creativity, learning, and basic metalworking techniques. Requirements: 01A:003 and 01A:004 for majors; 01A:003 for nonmajors.

**01G:184 Mold Making**  
4 s.h.

All aspects of mold making, including plaster, rubber, and silicone.
01G:185 Intermediate Jewelry and Metal Arts
4 s.h.
Applications with casting (gold, silver, bronze), enameling, and stone setting, processes may be combined; photo etching and 3-D computer modeling; trends in craft; emphasis on development of student's personal aesthetics, learning, and refining technical skills in metalworking and jewelry techniques. Prerequisites: 01G:084.

01G:186 Advanced Jewelry and Metal Arts
4 s.h.
Electroforming; production of hollow copper structures through prolonged electroplating on a nonmetallic form (typically wax) with a conductive coating; metal-forming techniques (e.g., raising and fold forming); emphasis on development of personal aesthetics, learning, and refining technical skills in metalworking and jewelry techniques. Prerequisites: 01G:084.

01G:187 Mixed Media Workshop
3-4 s.h.
Free exploration of all media and materials, including found objects; creation of conceptual and/or functional mixed media objects, jewelry, sculptures, installation pieces; pioneering use of new materials, development of new techniques, creation of diverse innovative art works. Prerequisites: 01G:084. Recommendations: 01G:185 and 01G:186.

01G:188 Graduate Workshop
4 s.h.
Independent studio work; personal aesthetics, conceptual and technical skills developed and refined; creation of work without boundaries of media; portfolios, exhibitions, professional goals. Prerequisites: 01G:185, 01G:186, and 01G:187.

01G:190 Undergraduate Individual Instruction
1-3 s.h.
Individual instruction in metalsmithing and jewelry for advanced students.

01G:192 Form and Fabrication: The Hand-Built Bicycle Frame II
4 s.h.
Building on 01T:192 (TDSN:4150); advanced concepts of bicycle frame design and fabrication; concept development, fabrication geometry and design, metal properties and selection, tool selection, brazing and welding, including titanium-milling and how to build a frame jig; emphasis on applying fabrication skills while situating frame building project within context of a design problem. Prerequisites: 01T:192.

01G:240 Individual Instruction in Metalsmithing and Jewelry
arr.

Intermedia

Courses 01A:003 Basic Drawing and 01A:004 Design Fundamentals are prerequisites for all intermedia courses for art majors; 01A:003 Basic Drawing is prerequisite for nonmajors.

01J:090 Intermedia I
3 s.h.
Interdisciplinary focus; emphasis on conceptual, installation, video, time-based media, performance art. Requirements: 01A:003 and 01A:004 for art majors; 01A:003 for nonmajors.

01J:091 Intermedia II
3 s.h.
Interdisciplinary investigation of materials and concepts in relation to time-based media, performance, video, installation; individual and collaborative projects. Prerequisites: 01J:090.

01J:100 Intermedia Topics
3-4 s.h.
Areas of intermedia practice, including installation, video, Internet-based production, sound design, image and text, new media.

01J:104 Media Art Lab
4 s.h.
Study and production in the media arts--digital video, sound, installation/performance, Internet, new media art; conceptual development through readings, screenings; hands-on workshops using a range of media production equipment and platforms; in-class, short-term projects. Prerequisites: 01J:090. Recommendations: experience with media technologies.
01J:105 Time-Based Media/Video I 3-4 s.h.
Studio experimentation, individual projects.
Prerequisites: 01J:090.

01J:106 Time-Based Media/Video II 3-4 s.h.
Continuation of 01J:105. Prerequisites: 01J:105.

01J:108 Art and Ecology 4 s.h.
Collaborative, creative research group; artistic responses to environmental sustainability and related social issues; critical approaches rooted in humanities, other disciplines. Requirements: 01J:090 for majors, or senior or graduate standing.

01J:110 Intermedia Workshop 3-4 s.h.
Visual practice/visual theory; projects, critiques, visiting artists and scholars. Requirements: 01J:091 or graduate standing in intermedia.

01J:115 What is Storytelling For? 4 s.h.

01J:140 Artists in the Community--Intermedia 3-4 s.h.
Student participation in internships at Iowa City and Johnson county nonprofit organizations; interdisciplinary seminar.

01J:190 Undergraduate Individual Instruction 1-3 s.h.
Individual instruction in intermedia for advanced students.

01J:200 Art, Engagement, and Activism 4 s.h.
Role of artists in our communities: how to build a rewarding studio practice and influence social, political, and cultural decisions within the community; work of artists, designers, creative scholars, performers, and writers whose work is socially engaged, collaborative, labeled as radical or activist in nature; students produce a small body of written, visual, and performed work influenced by events and needs within their communities; examination and discussion of various theories of art, activism, performance, and engagement.

01J:201 Individual Instruction in Intermedia and Video Art arr.
Repeatable.

01J:208 Intermedia Graduate Special Topics 3-4 s.h.
Areas of intermedia practice, including installation, video, Internet-based production, sound design, image and text, new media. Repeatable.

Painting

Courses 01A:003 Basic Drawing and 01A:004 Design Fundamentals are prerequisites for all painting courses for art majors; 01A:003 Basic Drawing is prerequisite for nonmajors.

01K:009 Painting I 3 s.h.
Emphasis on observational painting, theory and development of pictorial ideas and skills. Requirements: 01A:003 and 01A:004 for majors; 01A:003 for nonmajors.

01K:010 Painting II 4 s.h.
Materials, techniques, beginning of a personal painting language through observation and imagination. Prerequisites: 01K:009.

01K:046 Painting III 4 s.h.
Painting, with contemporary issues overlying study in materials and techniques; language and direction of personal painting. Prerequisites: 01K:010.

01K:049 Advanced Painting 4 s.h.
Individual projects as they aid the realization of a personal vision. Prerequisites: 01K:046.

01K:190 Undergraduate Individual Instruction 1-3 s.h.
Individual instruction in painting for advanced students.

01K:199 Special Topics in Painting and Drawing 3-4 s.h.
Advanced issues in painting, drawing. Prerequisites: 01K:010.
01K:206 Graduate Painting: Topics 3-4 s.h.
Individual painting projects in desired medium; topics vary. Corequisites: 01K:208.

01K:207 Graduate Drawing and Painting Workshop 3-4 s.h.

01K:208 Graduate Drawing and Painting Forum 1 s.h.
Problems and issues of contemporary artists.

01K:215 Individual Instruction in Painting arr.
Repeatable.

Photography

Courses 01A:003 Basic Drawing and 01A:004 Design Fundamentals are prerequisites for all photography courses for art majors; 01A:003 Basic Drawing is prerequisite for nonmajors.

01L:034 Beginning Photography 3 s.h.
Camera, light meter, darkroom; history, theory of photography. Requirements: 01A:003 and 01A:004 for majors; 01B:001 for nonmajors.

01L:036 Beginning Digital Photography 3 s.h.
How to use digital technology to make high-quality color and black-and-white photographs from scanned film and digital files; basic photography skills, including exposure, bracketing, composition; how to use raw files to make large digital prints; color profiles for fine digital printing. Requirements: 001A:003 and 01A:004 for majors; 01A:003 for nonmajors.

01L:040 Digital Imaging I 3 s.h.
Working knowledge of digital image-making techniques, including image capture, image building/editing, printing/output options, work with Photoshop on Macintosh computers.

01L:101 Intermediate Darkroom 3-4 s.h.
Darkroom techniques, including film developing and printing; theory and practice of photography as fine art and cultural phenomenon; development of visual literacy, students’ critical awareness of their work. Requirements: 01L:034 or 01L:036 for majors; 01L:036 or 01L:040 for nonmajors.

01L:102 Intermediate Photography Digital 3-4 s.h.
Digital photography including landscape, portrait, collage, still life, manipulated images; black-and-white and color printing; computer technology; history of photography in political and social issues. Prerequisites: 01L:034 or 01L:036.

01L:105 Advanced Photography 3-4 s.h.
Individual projects; development of personal vision. Prerequisites: 01L:101.

01L:129 Materials and Techniques 4 s.h.
Concepts and techniques, from reading contemporary topics to understanding and applying nontraditional photographic processes and digital imaging. Prerequisites: 01L:101.

01L:140 Advanced Digital Imaging 4 s.h.
Varied image editing programs, with focus on Photoshop and the web. Prerequisites: 01L:101 or 01L:102.

01L:165 Introduction to 4x5 and Studio Lighting 4 s.h.
Use of a 4x5 camera to correct perspective, depth of field; large format printing, negative processes. Prerequisites: 01L:101.

01L:190 Undergraduate Individual Instruction 1-3 s.h.
Individual instruction in photography for advanced students.

01L:231 Individual Instruction in Photography arr.
Repeatable.
01L:236 Graduate Photography Workshop 4 s.h.
Projects; group critiques; readings.

Printmaking

Courses 01A:003 Basic Drawing and 01A:004 Design Fundamentals are prerequisites for all printmaking courses for art majors; 01A:003 Basic Drawing is prerequisite for nonmajors.

01M:011 Introduction to Printmaking 3 s.h.
Introduction to methods, materials, and concepts of printmaking. Prerequisites: 01A:003 and 01A:004. Requirements: art major.

01M:021 Undergraduate Intaglio 3-4 s.h.
Concepts, techniques; Renaissance and contemporary ideas, methods; emphasis on metal plate printing, including etching, drypoint, engraving, softground, aquatint. Requirements: 01A:003 and 01A:004 for majors; 01B:001 for nonmajors.

01M:024 Undergraduate Relief 3-4 s.h.
Relief printmaking techniques. Requirements: 01A:003 and 01A:004 for majors, 01B:001 for nonmajors.

01M:031 Undergraduate Lithography 3-4 s.h.
Fundamental techniques, characteristics of lithography; basic direct drawing, processing, printing of stone and plate images in black and white. Prerequisites: 01F:007.

01M:042 Undergraduate Monoprint 3-4 s.h.
Concepts and techniques in using traditional and alternative printmaking media to produce unique, matrix generated prints. Prerequisites: 01M:021.

01M:111 New Media for Printmaking 4 s.h.

01M:121 Intaglio 4 s.h.
Concepts, techniques; traditional through contemporary ideas, methods; emphasis on metal plate printing, including etching, drypoint, engraving, softground, aquatint. Requirements: 01M:011 or BFA candidacy in any area or graduate standing.

01M:122 Advanced Intaglio and Relief 3-4 s.h.
Concepts and techniques of intaglio/relief; etching, engraving, drypoint, softground, aquatint, woodcut, linocut, color printing; emphasis on advanced methods, personal vision. Prerequisites: 01M:021, and 01M:024 or 01M:031.

01M:124 Relief 3-4 s.h.
Concepts and techniques of relief printmaking, including woodcut, linocut, relief etching, black-and-white and color printing methods; traditional and contemporary approaches; for graduate students with no printmaking experience. Requirements: 01A:003, 01A:004, and 01M:011 for majors; 01A:003 for nonmajors; or BFA candidacy in any area; or graduate standing.

01M:131 Lithography 4 s.h.
Technical, aesthetic characteristics; basic direct drawing, processing, printing of stone and plate images in black and white. Requirements: 01A:003, 01A:004, and 01M:011 for art majors; 01A:003 for nonmajors; or BFA candidacy in any area; or graduate standing.

01M:132 Advanced Lithography 3-4 s.h.
Technical, aesthetic aspects; emphasis on color printing, indirect image-forming and photomechanical processes. Prerequisites: 01M:011 and 01M:131.

01M:134 Silkscreen 4 s.h.
Photographic, nonphotographic stencil techniques for silkscreen printing. Requirements: 01A:003, 01A:004, and 01M:011 for art majors; 01B:001 and 01B:080 for nonmajors; or BFA candidacy in any area; or graduate standing.
01M:135 Advanced Printmaking  4 s.h.
Print media (i.e., intaglio, lithography, relief, screenprint); emphasis on individual technical and conceptual growth and development of independent studio practices. Requirements: two courses chosen from 01M:121, 01M:124, 01M:131, and 01M:134.

01M:142 Monoprint  3-4 s.h.
Concepts, techniques in use of traditional and alternative printmaking media to produce unique, matrix-generated prints. Offered spring semesters. Prerequisites: 01M:021, and 01M:024 or 01M:031.

01M:151 Foil Imaging I  4 s.h.
Participation in development of a new art form involving creation of original prints and other works of art using hot stamped foil and Iowa Foil Printer. Requirements: 01A:003, 01A:004, and 01M:011 for art majors; 01A:003 for nonmajors; or BFA candidacy in any area; or graduate standing.

01M:152 Foil Imaging II  4 s.h.
Advanced aesthetic and technical research for creation of original prints and other printmaking techniques; individual instruction. Prerequisites: 01M:151.

01M:160 Special Workshop in Printmaking  2-3 s.h.
Issues, themes, or studio practice.

01M:170 Foil Workshop in Printmaking  2 s.h.
Hands-on experience creating foil prints; workshop format. One or two weeks. Offered summer session.

01M:190 Undergraduate Individual Instruction  1-3 s.h.
Individual instruction in printmaking for advanced students.

01M:250 Individual Instruction in Printmaking  arr.
Repeatable.

01M:260 Graduate Print Workshop  3-4 s.h.
Contemporary issues in printmaking; emphasis on development of personal work and independent studio practice through group critiques, special research projects, work in all print media. Repeatable.

Sculpture

Courses 01A:003 Basic Drawing and 01A:004 Design Fundamentals are prerequisites for all sculpture courses for art majors; 01A:003 Basic Drawing is prerequisite for nonmajors.

01N:015 Undergraduate Sculpture I  3 s.h.
Basic sculptural concepts, processes, investigation of materials such as plaster, clay, wood; emphasis on developing formal language, acquiring basic skills; spatial, conceptual, technical issues. Requirements: 01A:003 and 01A:004 for majors; 01A:003 for nonmajors. GE: Literary, Visual, and Performing Arts.

01N:016 Undergraduate Sculpture II  3-4 s.h.
Continuation of 01N:015; form, materials, processes, woodcarving, welding, concrete carving and direct application; expanding concept development; contemporary sculptural formats, collaborative process. Prerequisites: 01N:015.

01N:017 Welding and Fabrication  1 s.h.
Metal welding, cutting, forging, and fabrication. Requirements: 01A:003 and 01A:004 for majors; 01B:001 or 01B:090 for nonmajors.

01N:019 Sculpture Workshop  3-4 s.h.
Critiques with focus on concept and form development; new processes. Prerequisites: 01N:015.

01N:140 Topics in Sculpture  4 s.h.
Projects, reading; specialized conceptual forms and issues in contemporary sculpture, such as public art, installation. Prerequisites: 01N:015.
**01N:150 Figure Modeling** 3-4 s.h.
Exploration of the human form with live model; clay on a wire armature, portrait modeling, relief. Prerequisites: 01N:015.

**01N:155 Advanced Figure Modeling** 4 s.h.
Exploration of human form in clay on wire armature, from live model; portrait modeling and relief human anatomy; human form in full scale on welded armature. Prerequisites: 01F:007 and 01N:150.

**01N:165 Casting in Hot Metal** 3-4 s.h.
Foundry work, wax working, mold making, and processes. Prerequisites: 01N:016 and 01N:160.

**01N:190 Undergraduate Individual Instruction** 1-3 s.h.
Individual instruction in sculpture for advanced students.

**01N:260 Individual Instruction in Sculpture** arr.
Repeateable.

**01N:264 Graduate Sculpture Workshop** 3-4 s.h.
Critique seminar with readings for graduate sculptors and nonsculpture graduate students. Repeatable.

**01P:090 Issues in Contemporary Art** 3 s.h.

**01P:130 Cycling the American Discovery Trail: Iowa Route** 3 s.h.
Bicycle touring on the American Discovery Trail, Iowa Route; gravel route (or paved, depending on weather), 60 miles per day for eight days carrying camping and other gear which students must supply; focus on poetics of adventure, landscape, teamwork; assigned readings, digital portfolio, presentation of stories on UITV; expenses in addition to tuition. Requirements: good physical condition and bicycling experience.

**01P:134 Scene Design I** 3 s.h.
Development of theatre scenery; how to research, conceptualize, and express ideas in three-dimensional models, simple sketches, and drafting. Same as 049:134.

**01P:150 Comics, Graphic Novels: Introduction to Sequential Art** 3 s.h.
Overview of contemporary American comic artists, history of comics and graphic novels in the United States; genres and structures in sequential art; students create works that combine design, images, texts, story. Requirements: satisfaction of rhetoric requirement.

**01P:160 Letterpress I** 3 s.h.
Mechanics of letterpress printing, typography, and design as applied to hand set metal type and edition printing; printing on a Vandercook proof press; introduction to photopolymer plates and methods of illustration related to edition printing, historical aspects of printing technology, typecasting, type classification; role of letterpress in modern private press and contemporary artist books. Same as 108:160.

**01P:161 Handprinted Book: Design and Production** 3 s.h.
Exploration of problems in hand-printing books--choice of manuscript, editing, design, typesetting, proofreading, printing and binding; histories of printing and of the book, emphasis on 20th- and 21st-century book design and literature. Same as 108:161.
01P:162 Book and Publication Design 3 s.h.
Students plan, design, and produce a book using Adobe Creative Suite; page layout software, typography, page layout and design, book formatting, handling of image files, preparation of materials for print and other contemporary book media; history of book design, book design in contemporary publishing; visit to University of Iowa Libraries Special Collections. Prerequisites: 01D:100 or 108:160. Same as 108:162.

01P:163 Digital to Letterpress Book Design 3 s.h.
Digital typesetting and book design; chapbook production using photopolymer plates and Vandercook presses; text and content, book typography, practical and aesthetic considerations. Same as 108:163.

01P:164 Digital Design for Artists' Books 3 s.h.
Introduction to concepts, techniques, and technologies used to design and produce artists' books with personal computers and graphic design software. Same as 108:164.

01P:165 Innovative Letterpress 3 s.h.
Creation of the visual book using letterpress printing; narrative, serialization, type as graphic, physical structure of the book; traditional letterpress printing, monoprinting, nontraditional letterpress techniques using technology ranging from metal to digital. Same as 108:165.

01P:167 Imagemaking on the Proof Press
Printmaking possibilities of the Vandercook Proof Press; print type, printing of relief blocks, line drawings, non-traditional print processes; completion of small projects to acquaint students with techniques and equipment, a print series, and an artist's book; discussion focuses on creating a visual narrative, sequence and series, structures for artist's books, use of type as a graphic element. Prerequisites: 108:160, 108:163, or 108:165. Same as 108:167.

01P:170 Issues in Contemporary Art 3 s.h.
Current trends and developments in art and related culture; interdisciplinary approach. Requirements: art major and one introductory art course.

01P:180 Digital Portfolios in the Arts 1-3 s.h.
Students create a World Wide Web-based digital portfolio featuring their studio work and creative scholarship.

01P:185 Grant Writing in the Arts 3 s.h.

01P:190 Honors in Studio Art 0-3 s.h.
Research, preparation, and exhibition of an honors project in studio art. Requirements: studio art major, UI g.p.a. of at least 3.33, and art g.p.a. of at least 3.50.

01P:199 Topics in Studio Arts 3 s.h.

01P:299 Graduate Independent Study
Individual instruction by a faculty member.

Papermaking

01X:110 Papermaking 3 s.h.
History, fundamental techniques of Western and Eastern hand papermaking; projects in traditional sheet forming, basic paper chemistry, paper coloring. Offered spring semesters. Same as 108:110.

01X:120 Islamic/Asian Papermaking History and Technique 3 s.h.
History, technique, and aesthetics of traditional Islamic and Asian hand papermaking. Same as 108:132.
**01X:130 Paperworks** 3 s.h.
Conceptual and methodological approaches to 2-D and 3-D paper works; students create a body of works that couple the unique properties of paper-pulp medium with personal visual ideas and clarity of intent; contemporary issues in paper pulp and the medium's relationship to larger art and craft contexts. Same as 108:130.

**01X:210 Individual Instruction in Papermaking/Paperworks**
arr.
Repeatable. Prerequisites: 01X:120.

**Bookbinding**

**01Y:015 Artists’ Books** 3 s.h.
Exploration of the book as a form for artistic expression; emphasis on conceptual development; relationship between content, form, and structure; how a book's structure and design can enhance and integrate part of the work’s meaning. Prerequisites: 01Y:150 or 108:150. Same as 108:154.

**01Y:150 Bookbinding I: Materials and Techniques** 3 s.h.
Hands-on introduction to materials and techniques commonly used in bookbinding. Same as 108:150.

**01Y:151 Bookbinding II** 3 s.h.
Build on skills acquired in 108:150; projects to complete six bindings based on historical and contemporary models; sewing styles, board attachments, endband types; nonadhesive and case-bound structures, varied materials and binding styles, their effects on structure, aesthetic considerations, further development of solid binding skills; historical development of particular binding practices. Prerequisites: 108:150. Same as 108:151.

**01Y:152 Bookbinding III** 3 s.h.
Bookbinding structures based on historical and contemporary models; differences in various binding practices, how these differences affect function, why the styles developed; experience choosing appropriate structures for particular uses; emphasis on fine tuning skills and techniques required for advanced binding practices; sewn endbands, rounding and backing, sewing on varied supports, board attachments, and covering methods. Requirements: (for 108:152) 108:150 and 108:151; (for 01Y:152) 01Y:150 or 01Y:151 or 108:150 or 108:151. Same as 108:152.

**01Y:153 Studies in Bookbinding** 3 s.h.
Topics related to hand bookbinding. Same as 108:153.

**01Y:156 Boxes and Enclosures** 3 s.h.
Hands-on techniques for a variety of book enclosures; appropriateness, aesthetic issues concerning box design; Japanese wraparound case, drop-spine box, hinged and lidded boxes, slipcase; technical skill development. Prerequisites: 108:150. Same as 108:156.

**01Y:157 Moveable/Sculptural Books** 3 s.h.
Varied formats for moveable and/or sculptural books; history; readings, hands-on model making. Same as 108:157.

**01Y:158 Pop-Up Book Structures** 3 s.h.
Hands-on exploration of varied aspects of paper engineering for bookmaking; historical and modern models studied and executed. Prerequisites: 108:150. Same as 108:158.
Calligraphy

01Z:133 Western Papermaking History and Technique 3 s.h.
History and technique of traditional European hand papermaking and related aesthetics; students gain confidence in pursuing independent production of handmade papers or undertaking related research in their own particular areas of interest; fiber preparation, sheet forming, and drying/finishing methods; concurrent readings and discussions of related history and aesthetics; special projects selected by student with instructor approval. Same as 108:133.

01Z:142 History of Western Letterforms 3 s.h.
History of Western letterforms, with focus on tools, materials, techniques; the major hands, their place in history, their influence on modern times; creation of letterforms using appropriate tools; hands-on approach with emphasis on understanding rather than mastery. Same as 108:142.

01Z:143 Calligraphy: Foundational Hands 3 s.h.
Fundamental calligraphic skills using Roman majuscule, Humanistic minuscule, Italic; basic layout and color theory incorporated into letter practice. Same as 108:143.

01Z:144 Calligraphy: Italic and Script Hands 3 s.h.
Hands-on instruction in italic and pressure pen scripts; historical relationships, effects on modern letterforms. Same as 108:144.

01Z:146 Studies in Letter Arts 3 s.h.
Special topics and advanced projects in calligraphy and letter arts. Prerequisites: 108:140 or 108:141 or 108:142 or 108:143. Same as 108:146.

Art Education for Undergraduate and Graduate Students

01E:143 Methods of Art Education in Elementary Schools 3-4 s.h.
Application of studio methods to teaching children in Saturday Children’s Art Class Program. Same as 07E:143.

01E:190 Undergraduate Individual Instruction 1-3 s.h.
Individual instruction in art education. Prerequisites: 01A:003 and 01A:004.

01E:196 Designing and Teaching Art Workshops 4 s.h.
Overview; child, adolescent art; relationships with art, education; survey of literature; community art teaching experiences.

01E:215 Visual Art Practice as Research: Portfolio 4 s.h.
Storytelling with interactive media; strategies for conveying story performance, case studies, and visual conceptualization; portfolio, case study, or story inquiry project. Repeatable.

01E:290 Individual Instruction in Art Education arr.

01E:367 Seminar: Current Issues in Art Education 3-4 s.h.
Analysis of literature in art education and related disciplines. Repeatable. Same as 07S:367.

01E:406 Research in the Arts and Humanities 3 s.h.
Individual research under supervision; applicable to thesis preparation, doctoral prospectus development. Repeatable. Same as 07S:406.
Asian and Slavic Languages and Literatures

Chair
Russell Ganim

Professors
W. South Coblin, Chuanren Ke, Philip Lutgendorf, Margaret H. Mills, Frederick Smith (Religious Studies/Asian and Slavic Languages and Literatures), Russell Valentino

Professors emeriti
Vadim Kreyd, Ray J. Parrott Jr., Helene A. Scriabine

Associate professors
Robert W. Leutner, Maureen Robertson (Asian and Slavic Languages and Literatures/Cinema and Comparative Literature), Helen Shen

Associate professor emeritus
Christopher A. Wertz

Assistant professors
Jennifer Feeley, Rebecca Gould

Assistant professor emerita
Miriam J. Gelfand

Lecturers
Yasuho Akiyama, Kiyomi Kawakami, Irina Kostina, Kuriko Mizuno, Jitka Sonkova, Xiaoyuan Zhao

Undergraduate degrees: B.A. in Asian Languages and Literature, Russian
Undergraduate nondegree programs: Minor in Asian Languages, Russian
Graduate degree: M.A. in Asian Civilizations
Web site: http://clas.uiowa.edu/dwllc/asll

The Department of Asian and Slavic Languages and Literatures offers instruction in languages of Asia and eastern Europe as well as in the literatures, civilizations, and cultures of the regions. In addition to offering degree programs, the department welcomes undergraduate and graduate students from across the University to enroll in courses that complement their degree programs or satisfy their personal interests.

The department offers language study in Chinese, Croatian, Czech, Hindi, Japanese, Korean, Russian, Sanskrit, and Uzbek.

Undergraduate students in all majors may satisfy the World Languages requirement of the General Education Program (p. 381) with courses in Chinese, Hindi, Japanese, Korean, Russian, or Sanskrit; see "Language for General Education" below. They also may get acquainted with Asia and Eastern Europe by taking any of the department’s General Education Program courses on Asian humanities and on Russian and Slavic literature and culture, all taught in English. Entering students may take the department’s First-Year Seminars, one on Asian culture and civilization, the other on Slavic culture and civilization.

The Department of Asian and Slavic Languages and Literatures is one of five academic units in the Division of World Languages, Literatures, and Cultures (p. 289).

Undergraduate Programs

• Major in Asian languages and literature (Bachelor of Arts)
• Major in Russian (Bachelor of Arts)
• Minor in Asian languages
• Minor in Russian

The major in Asian languages and literature gives students the opportunity to develop advanced skills in an Asian language while they study the people, literatures, and cultures of Asia. Students choose one of four tracks: Chinese, Hindi, Japanese, or Sanskrit.

Students interested in Asian studies may add a second major in international studies with an emphasis in Asian studies; see International Studies (p. 498) in the Catalog. Many other disciplines work well as second majors for Asian languages and literature students, such as history, art history, political science, religion, sociology, journalism, business, and anthropology.

Graduates have found careers in education, government, communications, business, and other fields in the United States and abroad. The program also provides excellent background for advanced study in a variety of fields in the humanities and social sciences and for professional schools, such as law and business.

The Russian major trains students in both written and spoken Russian and in Russian literature, culture, and civilization. The department encourages students to pursue a second major (e.g., global health, history, linguistics, political science) and to develop their interests in related or complementary fields. Students interested in focusing on a broader interdisciplinary understanding of the region may earn a second major in International Studies (p. 498).

Training in Russian is often an important asset to careers in the natural and physical sciences, engineering, medicine, business, journalism, library and information science, and the social and military sciences. It also may be appropriate preparation for study of law or international relations as well as Slavic languages and
literatures, comparative literature, and other humanistic disciplines.

Some governmental agencies are interested in job candidates who have advanced training in Russian; these agencies give preference to applicants who combine strong language proficiency with a well-rounded background in area studies. Students who develop an exceptional facility with the Russian language may pursue careers in literary and technical translation and interpretation.

**Bachelor of Arts: Asian Languages and Literature**

The Bachelor of Arts with a major in Asian languages and literature requires a minimum of 120 s.h., including 30-34 s.h. of work for the major. Students choose one of four tracks: Chinese, Hindi, Japanese, or Sanskrit. Credit required for the major depends on choice of track; requirements for each track are listed below. Transfer credit is accepted to satisfy some requirements of the major, but at least half of the semester hours of advanced work required for the major must be earned at The University of Iowa. Students must complete the College of Liberal Arts and Sciences General Education Program (p. 381).

**Chinese Track**

The Chinese track requires a minimum of 30 s.h. of work for the major. Students must complete the following courses.

**Chinese Language**

Students must successfully complete 039:105 Second-Year Chinese: First Semester and 039:106 Second-Year Chinese: Second Semester (total of 10 s.h.) at The University of Iowa with a grade of C or higher, or the equivalent, before they may enroll in the following required courses.

- 039:108 Classical Chinese: First Semester 3 s.h.

**Advanced Chinese Language**

One of these:

- 039:165 Fifth-Year Chinese: First Semester 3 s.h.
- 039:166 Fifth-Year Chinese: Second Semester 3 s.h.
- 039:171 Readings in Chinese Literature 3 s.h.

**Chinese Literature and Cinema**

One of these:

- 039:141 Chinese Literature: Poetry 3 s.h.
- 039:142 Chinese Literature: Prose 3 s.h.

One of these:

- 039:173 Transnational Chinese Cinemas 3 s.h.
- 039:180 Modern Chinese Writers 3 s.h.

**Chinese Literature and Culture**

The following courses support the study of literature and culture. Courses that pertain to Chinese culture (the arts, history, literature, politics, religion, and translation) and to the methodology of literary or cultural students, and are cross-listed with the Department of Asian and Slavic Languages and Literatures or are offered by other departments, may be counted toward this requirement. Course content may vary by semester or instructor; students should consult their advisors for approval.

Two of these:

- 039:032 Chinese Popular Culture 3 s.h.
- 039:140 The Literature of Daoism 3 s.h.
- 039:158 East-West Literary Relations 3 s.h.
- 039:198 Topics in Asian Studies arr.
- 039:213 Advanced Classical Chinese 3 s.h.
- 039:240 Seminar in Chinese Fiction 3 s.h.

**Hindi Track**

The Hindi track requires a minimum of 30 s.h. of work for the major. Students must complete the following courses.

- 039:126-039:127 Second-Year Hindi: First Semester - Second-Year Hindi: Second Semester 8 s.h.
- 039:184-039:185 Third-Year Hindi: First Semester - Third-Year Hindi: Second Semester (students may substitute 6 s.h. of 100-level courses in South Asian studies, with the approval of their major advisors) 6 s.h.
- 039:136 Indian Literature 3 s.h.

**Additional advanced courses (100-level) in South Asian studies, including 1-3 s.h. of independent study**

A list of advanced courses is available from the department.
Hindi track students are urged to fulfill the General Education Program (p. 381) Historical Perspectives requirement (3 s.h.) by completing 016:007 Civilizations of Asia: South Asia.

Japanese Track

The Japanese track requires a minimum of 34 s.h. of work for the major. Students must complete the following courses.

- Advanced courses in Japanese literature taught by faculty members in the department (e.g. 39J:141, 39J:142, 39J:143) (6 s.h.)
- Additional advanced courses taught by faculty members in the department (6 s.h.)

Lists of advanced courses are available from the department.

Sanskrit Track

The Sanskrit track requires a minimum of 30 s.h. for the major. Students must complete the following courses.

- 039:112-039:113 Second-Year Sanskrit: First Semester - Second-Year Sanskrit: Second Semester (6 s.h.)
- 039:186-039:187 Third-Year Sanskrit: First Semester - Third-Year Sanskrit: Second Semester (6 s.h.)
- 039:136 Indian Literature (3 s.h.)
- 039:163 Indian Religious Texts (3 s.h.)
- Additional advanced courses (100-level) in South Asian studies, including 1-3 s.h. of independent study (12 s.h.)

A list of advanced courses is available from the department.

Sanskrit track students are urged to fulfill the General Education Program (p. 381) Historical Perspectives requirement (3 s.h.) by completing 016:007 Civilizations of Asia: South Asia.

Bachelor of Arts: Russian

The Bachelor of Arts with a major in Russian requires a minimum of 120 s.h., including 31 s.h. of work for the major earned in advanced Russian courses. Students must complete the College of Liberal Arts and Sciences General Education Program (p. 381).

The major in Russian requires the following courses.

One of these:

- 041:109 Beginning Composition and Conversation I (4 s.h.)
- 041:110 Beginning Composition and Conversation II (4 s.h.)

Both of these sequences:

- 041:111-041:112 Third-Year Russian I-II (8 s.h.)
- 041:113-041:114 Fourth-Year Russian I-II (8 s.h.)

Four of these (Russian/East European culture):

- 041:058 Diversities of Eastern Europe: Culture, Art, and Politics (3 s.h.)
- 041:093 Slavic Folklore (3 s.h.)
- 041:094 Religion and Culture of Slavs (3 s.h.)
- 041:096 Islamic Women in Russia (3 s.h.)
- 041:097 Istria (3 s.h.)
- 041:098 Introduction to Russian Culture (3 s.h.)
- 041:099 Russia Today (3 s.h.)
- 041:102 Russian Literature in Translation 1860-1917 (3 s.h.)
- 041:104 Health Care and Health Reforms in Russia (3 s.h.)
- 041:155 Tolstoy and Dostoevsky (3 s.h.)
- 041:156 Invitation to Nabokov (3 s.h.)
- 041:160 Women in Russian Society (3 s.h.)
- 041:164 Topics in Russian, East European, and Eurasian Studies (arr.)
- 041:165 West and East: Women in the Slavic World (3 s.h.)
- 041:168 Twentieth-Century Czech Authors (3 s.h.)

Students may substitute one of the following Slavic language two-course sequences for one of the four required Russian/East European culture courses (see list above). Availability of Croatian and Polish language courses varies.

- 041:141-041:142 First-Year Czech I-II (8 s.h.)
- 041:143-041:144 Second-Year Czech I-II (8 s.h.)
- 041:181-041:182 First-Year Croatian I-II (8 s.h.)
- 041:183-041:184 Second-Year Croatian I-II (8 s.h.)
Students majoring in Russian are urged to choose elective courses in economics, geography, history, political science, global health, and international studies. Nearly every avenue of professional training and employment requires a solid background in Russian area studies. For example, criteria for U.S. government employment include substantive knowledge in history, economics, political science, sociological disciplines, scientific specialties, demography, military-related skills, and in some cases, cultural and religious background. In-depth knowledge of literature or linguistics without other substantive background may be of limited practical use in finding employment.

B.A. with Teacher Licensure

Teacher Licensure in Chinese and Japanese

Chinese and Japanese majors interested in licensure to teach in elementary and/or secondary schools must successfully complete the requirements for a major, or the equivalent, plus designated pedagogy and linguistics courses in the Department of Asian and Slavic Languages and Literatures. In addition, students must complete the College of Education’s Teacher Education Program (TEP). Several courses in the College of Education and a semester of student teaching are required. Contact the College of Education’s Office of Education Services for more information.

Students who plan to use a Chinese or Japanese minor to teach at the elementary and/or secondary level should contact the Office of Teacher Education and Student Services about requirements.

Teacher Licensure in Russian

Russian majors interested in licensure to teach in elementary and/or secondary schools must successfully complete the requirements for a major in Russian and must complete the College of Education’s Teacher Education Program (TEP). Several courses in the College of Education and a semester of student teaching are required. Contact the College of Education’s Office of Education Services for more information.

Students who plan to use a Russian minor to teach at the elementary and/or secondary level should contact the Office of Teacher Education and Student Services about requirements.

Four-Year Graduation Plan

Bachelor of Arts: Asian Languages and Literature

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

Before the third semester begins: for students in Chinese and Japanese tracks, language work begun (students in the Hindi and Sanskrit tracks may begin language work in their sophomore year) and at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: at least first-year language competency and at least one-half of the semester hours required for graduation

Before the seventh semester begins: at least second-year language competency and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: at least third-year, first-semester language competency and one additional course in the major (two additional courses in the Japanese track)

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Bachelor of Arts: Russian

Before the third semester begins: competence in first-year Russian and at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: competence in second-year Russian and at least one-half of the semester hours required for graduation

Before the seventh semester begins: competence in third-year Russian, an additional course in the major, and at least three-quarters of the semester hours required for graduation

Before the eighth semester: competence in fourth-year Russian and two more courses in the major

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate
Honors

Honors in Asian Languages and Literature

Students who maintain a cumulative University of Iowa g.p.a. of at least 3.33 are encouraged to enroll in the University of Iowa Honors Program. With consent of the department chair and a faculty sponsor (an Asian specialist from any department), students register for 39:191 Honors Tutorial and 39:195 Senior Honors Thesis. To graduate with honors in Asian languages and literature, students must complete an acceptable thesis based on original research.

Honors in Russian

Russian majors with junior or senior standing, a g.p.a. of at least 3.33 in Russian, and a cumulative University of Iowa g.p.a. of at least 3.33 may enroll in the honors program in Russian. An extensive reading program with discussions, regular reports, and a semester paper constitute each 3 s.h. honors work unit. Students may take up to 9 s.h. of honors work in Russian. Contact the department for information about how to graduate with honors in the Russian major. Contact the University of Iowa Honors Program for more information about honors study at Iowa.

Related Programs

Certificate in International Business

The College of Liberal Arts and Sciences and the Tippie College of Business offer the Certificate in International Business. The program entails study of international business and economics; international relations and institutions; a language; and the art, literature, culture, and/or politics of a geographic area. Students of Chinese, Japanese, Hindi, or Russian are likely to satisfy the certificate’s language requirement while completing the requirements for their major. For information about the certificate, see International Business (p. 492) in the Catalog.

Minor in Asian Languages

The minor in Asian languages requires a minimum of 15 s.h. (or 14 s.h. for the Hindi emphasis), including 12 s.h. in advanced courses taken at The University of Iowa. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass. Students may earn the minor with an emphasis in Chinese, Hindi, Japanese, or Sanskrit. Course work for each emphasis is as follows.

Students with a Hindi emphasis may complete the advanced course requirement with 11 s.h., and the minor with a total of 14 s.h. The courses 39:123 First-Year Hindi: First Semester and 39:124 First-Year Hindi: Second Semester do not count as advanced courses for the minor.

Students with a Japanese emphasis must choose one of the advanced courses from literature, culture, or linguistics courses. A list of courses approved for the minor is available from the department.

Minor in Russian

The minor in Russian requires a minimum of 15 s.h. in Russian, including 12 s.h. in advanced courses taken at The University of Iowa. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass. Students may count a maximum of 3 s.h. taught in English toward the minor. The department recommends that students choose 100-level courses for the minor, such as the sequences 41:109 Beginning Composition and Conversation I and 41:110 Beginning Composition and Conversation II, 41:111 Third-Year Russian I and 41:112 Third-Year Russian II, and 41:113 Fourth-Year Russian I and 41:114 Fourth-Year Russian II.

Language for General Education

Undergraduate students in all majors may satisfy the World Languages requirement of the College of Liberal Arts and Sciences General Education Program (p. 381) with course sequences in Chinese, Hindi, Japanese, Korean, Russian, and Sanskrit.

Students who have had experience with Japanese or Russian should take the online World Languages Placement Test, which helps determine the level
at which a student should begin Japanese or Russian language study at The University of Iowa. Students with backgrounds in Chinese, Hindi, Korean, or Sanskrit may receive individual evaluations from the department.

**Chinese**

The following sequence fulfills the General Education Program’s World Languages requirement and is most appropriate for students who have no background in Chinese.

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>039:008</td>
<td>First-Year Chinese: First Semester</td>
<td>5 s.h.</td>
</tr>
<tr>
<td>039:009</td>
<td>First-Year Chinese: Second Semester</td>
<td>5 s.h.</td>
</tr>
<tr>
<td>039:105</td>
<td>Second-Year Chinese: First Semester</td>
<td>5 s.h.</td>
</tr>
<tr>
<td>039:106</td>
<td>Second-Year Chinese: Second Semester</td>
<td>5 s.h.</td>
</tr>
</tbody>
</table>

Students who have participated in 165:814 Iowa in Tianjin after completing 039:008 and 039:009, and students from Chinese-speaking families who perform exceptionally well in 039:008 and 039:009, may fulfill the World Languages requirement with the following sequence.

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>039:008</td>
<td>First-Year Chinese: First Semester</td>
<td>5 s.h.</td>
</tr>
<tr>
<td>039:009</td>
<td>First-Year Chinese: Second Semester</td>
<td>5 s.h.</td>
</tr>
<tr>
<td>039:107</td>
<td>Accelerated Second-Year Chinese: First Semester</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>039:114</td>
<td>Accelerated Second-Year Chinese: Second Semester</td>
<td>3 s.h.</td>
</tr>
</tbody>
</table>

Students who have taken 039:107 and/or 039:114 should not enroll in 039:105 and/or 039:106.

Additional course work is available, including advanced Chinese, classical Chinese, and business Chinese.

**Hindi**

The following sequence fulfills the General Education Program’s World Languages requirement. Additional courses are available.

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>039:123</td>
<td>First-Year Hindi: First Semester</td>
<td>5 s.h.</td>

<td>4 s.h.</td>
</tr>
<tr>
<td>039:127</td>
<td>Second-Year Hindi: Second Semester</td>
<td>4 s.h.</td>
</tr>
</tbody>
</table>

**Japanese**

The following sequence fulfills the General Education Program’s World Languages requirement and is appropriate for students who have not studied Japanese.

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>39J:010</td>
<td>First-Year Japanese: First Semester</td>
<td>5 s.h.</td>
</tr>
<tr>
<td>39J:012</td>
<td>First-Year Japanese: Second Semester</td>
<td>5 s.h.</td>
</tr>
<tr>
<td>39J:101</td>
<td>Second-Year Japanese: First Semester</td>
<td>4-5 s.h.</td>
</tr>
<tr>
<td>39J:102</td>
<td>Second-Year Japanese: Second Semester</td>
<td>4-5 s.h.</td>
</tr>
</tbody>
</table>

Students with some prior study of Japanese should substitute 39J:011 Elementary Japanese: Review for 39J:010 in the sequence above in order to fulfill the World Languages requirement. Additional course work is available, including classical Japanese.

**Korean**

The following sequence fulfills the General Education Program’s World Languages requirement and leads to elementary/intermediate proficiency in Korean. Students interested in Korean language study beyond the General Education requirement may take Third-Year Korean (039:150 and 039:151).

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>

Graduate Programs

- Master of Arts in Asian civilizations

The master's degree program in Asian civilizations prepares students for doctoral study in a variety of disciplines. It also may be good choice for students planning nonacademic careers in which advanced knowledge of Asian civilizations could be useful. For example, students working toward professional degrees, such as an M.D. or J.D., may decide to earn the M.A. in Asian civilizations while completing the professional degree.

Master of Arts

The Master of Arts program in Asian Civilizations requires a minimum of 30 s.h. of graduate credit, including 24 s.h. earned in residence at The University of Iowa. All students must maintain a g.p.a. of 3.00 or higher. Detailed information on degree requirements is sent to all applicants.

M.A. students choose from several tracks: Hindi language and literature, Sanskrit language and literature, South Asian studies, Chinese literature and culture, Chinese linguistics, teaching Chinese as a foreign language, interdisciplinary Chinese studies, teaching Japanese as a foreign language, Japanese studies, and interdisciplinary Japanese studies.

By the end of the first semester in residence, students propose a study plan developed in consultation with their advisor and in accordance with guidelines for specializations within the program.

By the end of the final semester in residence, students are expected to demonstrate, either by departmental examination or the successful completion of courses at the appropriate level, advanced competence in Chinese, Japanese, Hindi, or Sanskrit. Advanced competence is defined generally as fourth-year level course work in Chinese or Japanese and third-year level in Hindi and Sanskrit.

Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate (p. 1117) College section of the Catalog. The Department of Asian and Slavic Languages and Literatures requires a g.p.a. of at least 3.00 for regular admission and a g.p.a. of at least 2.75 for conditional admission.

Applicants must submit a statement of purpose, a research paper written in English, three letters of recommendation, and scores on the Graduate Record Exam (GRE) General Test. Applicants whose first language is not English must score at least 590 (paper-based), 243 (computer-based), or 97 (Internet-based) on the Test of English as a foreign language (TOEFL).

Both international and U.S. graduate applications requesting financial support for the following academic year are due February 1. All other applications are accepted until April 15 for fall admission and October 1 for spring admission.

Application materials are available from the department.

Study Abroad

The department strongly urges its students to seek opportunities for summer language study and study abroad to accelerate the language acquisition process. The University’s memberships in the American Institute of Indian Studies and the China Cooperative Language and Study Programs consortium help facilitate students’ access to quality international programs in India and China. The government of the People’s Republic of China offers scholarships for two students to live and study in Mainland China each year.

The UI-Nanzan Exchange allows Iowa students to pay Iowa tuition, room, and board while attending the Center for Japanese Studies at Nanzan University in Nagoya, Japan. There also is a cooperative agreement with the Landour Language School in the Himalayan foothills of India. The South Asian Studies Program has launched a new study abroad program in Mysore and Bangalore, India, where students have the opportunity to study a variety of aspects of traditional and modern Indian civilization.

Iowa students participate in summer, semester, or academic year programs in Russia under the auspices of the American Council of Teachers of Russian (ACTR), the association that directs academic language training programs in the cities of Moscow, St. Petersburg, and Vladimir.

Many students participate in summer, semester-long, and year-long study abroad programs in India, China, and Japan offered through other U.S. universities. In many cases credit is transferable, and it is possible for a student to study abroad and still complete the Four-Year Graduation Plan. There are many resources available for funding research and study abroad. It also may be possible for students to apply University of Iowa financial aid to their study abroad programs.

Contact the Department of Asian and Slavic Languages and Literatures or the Office for Study Abroad for more information.
Summer Study, Internships

The department offers an intensive course of language study (second year) each summer in which students complete the equivalent of one academic year of study (equivalent of one course for each of two semesters, totaling 8 s.h.). Scholarships are available for summer intensive Russian.

Students are encouraged to enrich their programs of study through internships designed to combine work experience in Asia or the United States with study or research projects. The University’s Pomerantz Career Center keeps a list of internships.

Activities

Student Associations

Students have many opportunities to enrich their studies in Asian languages and literature while living in Iowa City. The University sponsors student associations for students from many Asian countries, including mainland China, Japan, Korea, India, Pakistan, and Taiwan. All University of Iowa students are welcome to join. Various international community groups sponsor cultural events and holiday celebrations throughout the year.

Residence in Living-Learning Community

The Global Village Living-Learning Community welcomes both American and international undergraduate students who wish to broaden their knowledge of international issues, languages, and cultures. Global Village members live in Mayflower Residence Hall and enjoy a variety of programs, such as celebrations of international holidays, theatrical performances and film screenings, conversations with the University’s international visitors, field trips, presentations on studying and working in other countries, and opportunities for service projects. They also take a course together. Students must apply to live in the Global Village Living-Learning Community; see the Living-Learning Communities web page.

Facilities

Language Media Center

The University’s Language Media Center provides facilities for language learning, teaching, and research. Equipment in the center includes state-of-the-art computer, audio, and video facilities as well as standard and short-wave radios, tape and cassette recorders, record players, and soundproof recording rooms. An electronic classroom, a soundproof workroom, and a library of tape, disc, and cassette recordings also are available.

University of Iowa Libraries

Since 1960 University of Iowa Libraries has routinely acquired most American titles in Asian studies and selected overseas scholarly publications in English and other Western languages. The Main Library’s Asian collection includes approximately 80,000 volumes in Asian languages and about 140,000 Western-language volumes on Asian subjects. The University has been a member of the Library of Congress Foreign Currency Exchange Program for Indian books and periodicals since 1975. The library’s nonprint media collection includes a growing number of Asian feature films. A Chinese-Japanese-Korean computer terminal gives students and faculty access to the growing Research Libraries Information Network database in Asian languages.

Financial Support

Undergraduate and graduate students have access to the following financial aid and scholarship resources. Contact the Department of Asian and Slavic Languages and Literatures for application information.

Cheng/Liu Scholarship: Undergraduate and graduate students currently majoring in Chinese in the Department of Asian and Slavic Languages and Literatures at The University of Iowa may apply for the Cheng/Liu Scholarship. The award can be used for summer Chinese language study.

Fairall Scholarship: Undergraduate or graduate majors who have attended and/or graduated from Iowa elementary or secondary schools may be nominated by the department to receive a Fairall Scholarship. Preference is given to Japanese studies students. Applications are available late spring, with scholarships to be awarded the following fall semester.

Foreign language and area studies fellowships: Only U.S. citizens are eligible. Graduate students combining work in Asian languages at an advanced level with interdisciplinary or professional programs may apply. The award is offered by International Programs for academic year and summer language study.

Graduate assistantships: The department offers teaching assistantships for graduate students in the program. All applicants to graduate study in the program receive information on applying for an assistantship. Assistantships are awarded each spring for the following academic year.
Graduate international research: Opportunities for funding research abroad include Stanley Fellowships for Graduate Student Research Abroad, CIREH Research Scholarships in International Health, Fulbright Grants, and Foreign Language Area Scholarships.

Summer language scholarships: Currently enrolled undergraduate and graduate students may compete for a Stanley-University of Iowa Foundation Support Organization Summer Language Scholarship, to be used for intensive summer language study in Chinese, Hindi, Japanese, or Sanskrit. Eight to ten awards of $2,000-$2,500 are made each summer. Applications are due March 1.

Support for undergraduate study abroad: Opportunities for undergraduates to study abroad include the Presidential Scholarships for Study Abroad and the Stanley Scholarships for International Research and Study.

Courses

Language for Undergraduate and Graduate Students

Chinese

High school students and University of Iowa students who would like to learn Chinese but do not plan to use Chinese to satisfy the World Languages requirement of the College of Liberal Arts and Sciences General Education Program may wish to take the beginning Chinese courses 039:003, 039:004, 039:010, and 039:011 in sequence and may follow them with the second-year courses 039:105 and 039:106. See the course descriptions below.

039:001 Conversational Chinese I 1 s.h.
Introduction to modern Chinese, with focus on communication "survival" skills for discussing oneself, family, daily activities, interests, personal preferences, food, shopping, travel, lodging; situational activities and performance.

039:002 Conversational Chinese II 1 s.h.
Continuation of 039:001, with focus on speaking and listening.

039:003 Beginning Chinese I 3 s.h.
Beginning Chinese; offered through UI Confucius Institute; first of a four-course sequence.

039:004 Beginning Chinese II 3 s.h.
Continuation of 039:003; offered through UI Confucius Institute; second of a four-course sequence. Prerequisites: 039:003.

039:008 First-Year Chinese: First Semester 5 s.h.
Sound system of Mandarin Chinese, basic sentence patterns; aural understanding, speaking, reading, writing. Offered fall semesters. Requirements: undergraduate standing. GE: World Languages First Level Proficiency.

039:009 First-Year Chinese: Second Semester 5 s.h.
Continuation of 039:008. Offered spring semesters. Prerequisites: 039:008. Requirements: undergraduate standing. GE: World Languages Second Level Proficiency.

039:010 Beginning Chinese III 3 s.h.
Continuation of 039:004; offered through UI Confucius Institute; third of a four-course sequence. Prerequisites: 039:004.

039:011 Beginning Chinese IV 3 s.h.
Continuation of 039:010; offered through UI Confucius Institute; last of a four-course sequence. Prerequisites: 039:010.

039:105 Second-Year Chinese: First Semester 5 s.h.

039:106 Second-Year Chinese: Second Semester 5 s.h.
Continuation of 039:105. Offered spring semesters. Prerequisites: 039:105. Requirements: undergraduate standing. GE: World Languages Fourth Level Proficiency.
039:107 Accelerated Second-Year Chinese: First Semester

039:108 Classical Chinese: First Semester
Late Zhou period; readings from Zhanguoce, Mengzi, Zhuangzi; focus on grammatical analysis, exact translation. Offered fall semesters. Prerequisites: 039:106.

039:109 Classical Chinese: Second Semester
Continuation of 039:108. Offered spring semesters. Prerequisites: 039:108.

039:114 Accelerated Second-Year Chinese: Second Semester

039:115 Third-Year Chinese: First Semester
Reading of advanced modern Chinese texts; speaking, writing. Offered fall semesters. Prerequisites: 039:106.

039:116 Third-Year Chinese: Second Semester
Continuation of 039:115. Offered spring semesters. Prerequisites: 039:115.

039:117 Business Chinese I
Skill development in communicating with Chinese counterparts on a number of domains in business translations; first of a two-course sequence. Prerequisites: 039:106.

039:118 Business Chinese II
Skill development in communicating with Chinese counterparts on a number of domains in business translations; second of a two-course sequence. Prerequisites: 039:117.

039:128 Fourth-Year Chinese: First Semester
Proficiency through oral and written discussions of modern texts. Offered fall semesters. Prerequisites: 039:116.

039:129 Fourth-Year Chinese: Second Semester
Offered spring semesters. Prerequisites: 039:128.

039:165 Fifth-Year Chinese: First Semester
Improvement of language skills in modern Chinese: listening, speaking, reading, writing; skill development in reading authentic texts related to topics of student interest. Prerequisites: 039:129.

039:166 Fifth-Year Chinese: Second Semester
Continuation of 039:165. Prerequisites: 039:165.

039:171 Readings in Chinese Literature
Readings for advanced modern Chinese learners to elevate reading and writing abilities; essays, fiction, poetry by contemporary Chinese writers. Taught in Chinese.

039:213 Advanced Classical Chinese
Readings from Zuozhuan, Guoyu, other texts of early classical period. Prerequisites: 039:109.

039:220 Literary Chinese I
Readings from literary and historical texts of Han and Wei-Jin periods. Prerequisites: 039:109.

Croatian

041:181 First-Year Croatian I
Basic language skills--listening, reading, speaking, and writing Croatian; fundamentals of grammar; emphasis on student participation; first of a two-semester sequence.

041:182 First-Year Croatian II
Continuation of 041:181. Prerequisites: 041:181.
041:183 Second-Year Croatian I  
Continuation of 041:182; proficiency in vocabulary and grammatical foundations of understanding, speaking, reading, and writing Croatian (Bosnian, Serbian). Prerequisites: 041:182.

041:184 Second-Year Croatian II  
Continuation of 041:183; basic grammatical forms; practice listening, speaking, and writing Croatian (Bosnian, Serbian). Prerequisites: 041:183.

Czech

041:141 First-Year Czech I  
Basic language skills—listening, reading, speaking, and writing Czech; fundamentals of grammar; emphasis on student participation; first of a four-semester sequence.

041:142 First-Year Czech II  
Continuation of 041:141; second of a four-semester sequence. Prerequisites: 041:141.

041:143 Second-Year Czech I  
Proficiency building in vocabulary and grammatical foundations of elementary Czech; use and recognition of oral, aural, written, and reading language skills; third of a four-semester sequence. Prerequisite: 041:142.

041:144 Second-Year Czech II  
Continuation of 041:143; last of a four-semester sequence. Prerequisites: 041:143.

041:145 Third-Year Czech I  
Advance knowledge of Czech grammar, as well as reading, comprehension, conversation, and writing skills; varied techniques and activities for proficiency in Czech; conversation in small groups, present oral reports, written compositions, group projects; read and discuss articles from the press and contemporary Czech short stories; videotapes and DVDs of contemporary Czech cultural scene. Prerequisites: 041:144.

041:146 Third-Year Czech II

Hindi

039:123 First-Year Hindi: First Semester  
Reading, writing, speaking. Offered fall semesters of odd years. GE: World Languages First Level Proficiency.

039:124 First-Year Hindi: Second Semester  
Continuation of 039:123. Offered spring semesters of even years. Prerequisites: 039:123. Requirements: undergraduate standing. GE: World Languages Second Level Proficiency.

039:126 Second-Year Hindi: First Semester  
Conversation, reading of folktales and modern short stories. Offered fall semesters of even years. Prerequisites: 039:124. Requirements: undergraduate standing. GE: World Languages Second Level Proficiency.

039:127 Second-Year Hindi: Second Semester  
Continuation of 039:126. Offered spring semesters of odd years. Prerequisites: 039:126. Requirements: undergraduate standing. GE: World Languages Fourth Level Proficiency.

039:184 Third-Year Hindi: First Semester  
Advanced level Hindi texts; speaking, writing. Offered fall semesters. Prerequisites: 039:127.

039:185 Third-Year Hindi: Second Semester  
Continuation of 039:184. Offered spring semesters. Prerequisite: 039:185.

Japanese

39j:010 First-Year Japanese: First Semester  
Modern Japanese. Offered fall semesters. Prerequisite: undergraduate standing. GE: World Languages First Level Proficiency.
39J:011 Elementary Japanese: Review

39J:012 First-Year Japanese: Second Semester

39J:101 Second-Year Japanese: First Semester

39J:102 Second-Year Japanese: Second Semester

39J:105 Third-Year Japanese I
Modern Japanese; focus on speaking, listening, reading, writing; materials related to everyday life and civilization in Japan. Offered fall semesters. Prerequisites: 39J:102.

39J:106 Third-Year Japanese II

39J:107 Fourth-Year Japanese I
Modern Japanese; focus on reading, writing, speaking, listening. Offered fall semesters. Prerequisites: 39J:102.

39J:108 Fourth-Year Japanese II

39J:119 Classical Japanese: First Semester
Grammar, readings in classical Japanese. Offered fall semesters. Prerequisites: 39J:106.

39J:121 Fifth-Year Japanese I
Modern Japanese; emphasis on communication skills. Offered fall semesters. Prerequisites: 39J:107 and 39J:108.

39J:122 Fifth-Year Japanese II
Continuation of 39J:121. Offered spring semesters. Prerequisites: 39J:121.

39J:131 Sixth-Year Japanese I
Improvement of Japanese for academic and professional purposes. Offered fall semesters. Prerequisites: 39J:122.

39J:132 Sixth-Year Japanese II

Korean

039:040 First-Year Korean: First Semester
Modern Korean; speaking, listening, reading, writing. Offered fall semesters. GE: World Languages First Level Proficiency.

039:041 First-Year Korean: Second Semester
Continuation of 039:040. Offered spring semesters. Prerequisites: 039:040. GE: World Languages Second Level Proficiency.

039:042 Second-Year Korean: First Semester
Continuation of 039:041; conversation and readings in intermediate Korean language; Korean culture. Prerequisites: 039:041. GE: World Languages Second Level Proficiency.
039:043 Second-Year Korean: Second Semester
Continuation of 039:042. Prerequisites: 039:042.
GE: World Languages Fourth Level Proficiency.

039:150 Third-Year Korean: First Semester
Continuation of 039:043; advanced intermediate Korean—conversation and grammar skills beyond basic intermediate level; vocabulary expansion with increasingly complex, abstract concepts; how to advance one’s opinion and discuss thoughts, ideas. Prerequisites: 039:043.

039:151 Third-Year Korean: Second Semester
Continuation of 039:150; conversation and grammar skills beyond basic intermediate level; writing skills for formal occasions; advanced discussion skills—how to advance one’s opinion and share thoughts and ideas; traditional and modern Korean culture. Prerequisites: 039:150.

Russian

041:001 First-Year Russian I
Basic language skills of listening, speaking, reading, and writing Russian; fundamentals of Russian grammar. GE: World Languages First Level Proficiency.

041:002 First-Year Russian II
Continuation of 041:001. Prerequisites: 041:001. GE: World Languages Second Level Proficiency.

041:003 Second-Year Russian I

041:004 Second-Year Russian II
Continuation of 041:003. Prerequisites: 041:003. GE: World Languages Fourth Level Proficiency.

041:005 Conversational Russian I
Basic elements of Russian for travel and business; for adult learners.

041:006 Conversational Russian II
Continuation of 041:005; basic elements of Russian for travel or business; for adult learners.

041:109 Beginning Composition and Conversation I
Russian oral and aural skills developed through idiomatic usage, stylistics, phonetics, intonation, grammar review; supplemented by short stories, newspaper texts. Taught in Russian. Prerequisites: 041:004.

041:110 Beginning Composition and Conversation II
Russian oral and aural skills developed through idiomatic usage, stylistics, phonetics, intonation, grammar review; supplemented by short stories, conversation handbooks, current periodicals. Taught in Russian. Prerequisites: 041:004.

041:111 Third-Year Russian I
Advanced Russian grammar, reading, conversation, and written skills through oral reports, compositions, conversation. Prerequisites: 041:004.

041:112 Third-Year Russian II
Advanced Russian grammar, reading, conversation, and written skills through oral reports, compositions, conversation. Prerequisites: 041:111.

041:113 Fourth-Year Russian I
Perfecting spoken Russian and aural comprehension of native speech. Taught in Russian. Requirements: 041:112 or three years of college-level Russian.

041:114 Fourth-Year Russian II
Perfecting spoken Russian and aural comprehension of native speech. Taught in Russian. Requirements: 041:113 or three years of college-level Russian.
041:119 Russian for Heritage Learners
3 s.h.
Linguistic problems (grammar and vocabulary), communicative problems (understanding of written and oral advanced Russian speech), cultural problems (similarities and differences between cultures); for Russian heritage speakers.

041:120 Russian for Heritage Learners II
3 s.h.
Continuation of 041:119.

Sanskrit

039:110 First-Year Sanskrit: First Semester
4 s.h.
Grammar, basic vocabulary; elementary readings. Offered fall semesters of even years. Requirements: undergraduate standing. GE: World Languages First Level Proficiency. Same as 20E:110.

039:111 First-Year Sanskrit: Second Semester
4 s.h.

039:112 Second-Year Sanskrit: First Semester
3 s.h.
Readings in epic and puranic texts. Offered fall semesters of odd years. Prerequisites: 039:111. Requirements: undergraduate standing. GE: World Languages Second Level Proficiency. Same as 20E:121.

039:113 Second-Year Sanskrit: Second Semester
3 s.h.
The Bhagavadgita and related religious/philosophical texts. Offered spring semesters of even years. Prerequisites: 039:112. Requirements: undergraduate standing. GE: World Languages Fourth Level Proficiency. Same as 20E:122.

039:116 Third-Year Sanskrit: First Semester
3 s.h.
Readings in philosophical and literary Sanskrit. Offered fall semesters. Prerequisites: 039:113.

039:117 Third-Year Sanskrit: Second Semester
3 s.h.
Continuation of 039:116. Offered spring semesters. Prerequisites: 039:116.

Uzbek

041:171 First-Year Uzbek I
3-4 s.h.
Reading, listening, speaking, and writing Uzbek.

041:172 First-Year Uzbek II
3-4 s.h.
Continuation of 041:171. Prerequisites: 041:171.

041:173 Second-Year Uzbek I
4 s.h.
Continuation of 041:172. Prerequisites: 041:172.

041:174 Second-Year Uzbek II
4 s.h.
Continuation of 041:173. Prerequisites: 041:173.

For Undergraduates

Asian Culture and Civilization

039:006 Introduction to Buddhism
3 s.h.
Basic tenets, religious paradigms, historical phases important in the development of Buddhism; from the Buddha’s life to evolution of Mahāyāna Buddhism; readings from India, Tibet, China, Japan, Korea, Southeast Asia. GE: Values, Society, and Diversity. Same as 032:006.

039:007 Chinese Religions
3 s.h.
Survey of Chinese religions; Chinese traditional religious beliefs and practices among the elite and the general population; recent developments in mainland China, Taiwan, and the West; religious ideas of Confucianism, Daoism, aspects of Buddhism, ancestor worship, cults of deities, practices such as spirit possession, faith healing, ghost marriages. Same as 032:010.

3 s.h.
Key aspects of traditional and modern Chinese culture as insights into the Chinese experience and worldview; development of the Chinese language and writing system, calligraphy and brush painting, cultural geography, urban life, martial arts, mainstream popular culture, music, cuisine.

039:016 Asian Art and Culture
3 s.h.
Art from India, China, and Japan in many media and forms, in their cultural and historical contexts; cultural distinctions of these Asian civilizations as seen through the visual arts; chronology used to highlight historical processes and provide perspectives on continuity and change. GE: Historical Perspectives; Literary, Visual, and Performing Arts. Same as 01H:016.

039:017 Asian Humanities: Middle East
3 s.h.
How the self has been constructed in literary texts from premodern and modern Islamic world.

039:018 Asian Humanities: India
3 s.h.
Introduction to four thousand years of South Asian civilization, through popular stories. GE: Values, Society, and Diversity.

039:019 Asian Humanities: China
3 s.h.
Literary and philosophical texts of China in English translation. GE: Values, Society, and Diversity.

039:020 Asian Humanities: Japan
3 s.h.
Introduction to premodern, modern, and contemporary Japanese images, myths, and literature in English translation. GE: Values, Society, and Diversity.

039:028 Introduction to the Art of China
3 s.h.
Visual arts of China and their history; emphasis on understanding in context of Chinese civilization, history. Same as 01H:031.

039:029 First-Year Seminar
1-2 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.

039:032 Chinese Popular Culture
3 s.h.
Introduction to popular culture from the People’s Republic of China, Taiwan, Hong Kong, and the Chinese diaspora; shifting relationships among cultural production, media and technology, and political thought; influences of Japan, Korea, and the West; materials drawn from film, television shows, music, new media, popular literature, comics, magazines, advertising, fashion, art, and material culture; no previous knowledge of Chinese is required.

039:034 The Languages of Asia in Cultural and Historical Perspective
3 s.h.
Chinese, Japanese, Korean, Sanskrit and Hindi; cultural and ethnic factors which have affected and are affected by each language; nontechnical introduction to the structure of the language, discussion of the script in which the language is written, and the history of the language, including a brief outline of the political and cultural history of each pertinent linguistic area and the ways linguistic history has been affected by these factors.

039:036 Understanding Korean Culture Wave
3 s.h.
Introduction to the Korean culture wave and characteristics of contemporary Korean popular culture; lectures with discussions of readings, various audio-visual references (i.e., films, television dramas, music videos, cartoon, Internet contents, etc.).

039:044 Envision India
3 s.h.
Introduction to world view and civilization of the South Asian subcontinent, not as a timeless and isolated culture, but as a dynamic and interactive part of evolving global cultural exchanges.

039:055 Civilizations of Asia: China
3 s.h.
039:056 Civilizations of Asia: Japan
3-4 s.h.

039:057 Civilizations of Asia: South Asia
3-4 s.h.

039:064 Living Religions of the East
3 s.h.
Religious beliefs, practices in India, China, Japan. GE: Values, Society, and Diversity. Same as 032:004.

039:191 Honors Tutorial
arr.

039:195 Senior Honors Thesis
arr.

Japanese Culture and Civilization

39J:017 Japanese Religions
3 s.h.
Religions of Japan from ancient times to the present day; elite and popular Japanese interpretations of Chinese Buddhist and Daoist traditions; the parallel development of an indigenous kami tradition; contemporary new religious movements; focus on the codification of a variety of religious (and sometimes quasi-religious) paths, including the way of tea, the way of the brush, and the way of the samurai. Same as 032:017.

39J:033 Introduction to the Art of Japan
3 s.h.
Chronological survey of Japan’s visual arts in their historical and cultural contexts from Neolithic age to present; extensive use of slides, films, other visual materials. Same as 01H:033.

Slavic Culture and Civilization

041:029 First-Year Seminar
1 s.h.
Cultural, literary, architectural, and historical beauty of Prague, the capital of the Czech Republic. Requirements: first- or second-semester standing.

041:058 Diversities of Eastern Europe: Culture, Art, and Politics
3 s.h.
Exploration of major cultural and social changes in Central Europe since the 1950s; very similar, yet different experiences of four nations with a communist takeover, including crushed attempts to reform and humanize socialism and their final reach for freedom and democracy in 1989; current cultural and social situations of each country as they took advantage of newly available opportunities.

041:082 Youth Subcultures After Socialism
3 s.h.
Examination of youth subculture (i.e., distinct style and identity, beliefs, value system, fashion and favorite music) on the territory of post-communist Europe and its relations with the mainstream culture; how young people of Russia express their individuality after years of dullness and monotony.

041:086 Russian Media Today
3 s.h.
Contemporary conditions of the Russian mass media; tensions of the effective work of mass media under the pressure of state control and tendencies in the progress of independent media outlets; developments in Russian media since 1991, including the printed press, radio, television and new media (i.e., Internet and the like); the impact of the Putin presidency on the media and their role in securing his election victories in 2000 and 2004.

041:093 Slavic Folklore
3 s.h.
Introduction to culture, history, and art of eastern European peoples; pagan, dualistic, and animistic beliefs and their coexistence with Christian faith in eastern Europe. GE: Historical Perspectives; Values, Society, and Diversity.

041:094 Religion and Culture of Slavs
3 s.h.
Early and medieval Slavic history, with focus on Russian and Czech art, literature, and religion from 10th through 17th century. GE: Historical Perspectives; Values, Society, and Diversity.
041:095 Istria in Istria, Past and Present 3 s.h.
The Istrian laboratory as a locale for students of European history and development to reflect on the Europeanization of regional and border territories.

041:096 Islamic Women in Russia 3 s.h.
Lives of Islamic women in Dagestan, Russia, throughout late Soviet period and during post-1991 Islamic revolution; dramatic transitions and reversals of women’s roles.

041:097 Istria 3 s.h.
Istria; focus on its historically mixed ethnic, linguistic, cultural, and political status.

041:098 Introduction to Russian Culture 3 s.h.
Development of cultural history in Russia from middle ages to present; painting, music architecture, literature viewed against their political, historical, and social settings. Taught in English. GE: Values, Society, and Diversity.

041:099 Russia Today 3 s.h.
Contemporary Russia, with focus on prevailing social, political, economic, ethnic, environmental conditions; attention to historical evolution of problems, current factors; what these factors might portend for the future. Taught in English. GE: International and Global Issues; Values, Society, and Diversity.

039:120 Chinese Painting I 3 s.h.
Early Chinese painting from fourth century B.C.E. through 14th century C.E.; figural style, religious art, emergence of landscape, other nonreligious subjects, interconnectedness of painting and calligraphy as fine arts. Prerequisites: 01H:016 or 01H:031. Same as 01H:120.

039:122 Language/Politics of Culture in South Asia 3 s.h.
Key moments in the sociolinguistic history of premodern, colonial, and postcolonial linguistic communities in South Asia; roles of language in mediation of cultural and political processes. Same as 113:129.

039:125 Islam, Secularity, Modernity 3 s.h.
How religiosity and secularity are experienced in the Muslim world today.

039:130 Business Chinese 1 s.h.
Intermediate language and culture. Recommendations: for business major or student with two years Chinese learning experience who is interested in doing business in China.

039:131 Themes in Asian Art History 3 s.h.
Prerequisites: 01H:016 or 039:016. Same as 01H:124.

039:136 Indian Literature 3 s.h.
Readings from medieval and modern periods in English translation. Same as 032:177.

039:139 Chinese Historical Phonology 3 s.h.
Phonology of Mandarin, other major Chinese dialect groups; reconstruction of the sound system of Middle and Old Chinese. Same as 103:139.

039:140 The Literature of Daoism 3 s.h.
Texts of philosophical, religious Daoism; Daoism in traditional Chinese political theory, literature, the arts, alchemy and medicine, sexual custom, combat. Taught in English. Same as 032:186.
039:141 Chinese Literature: Poetry
Readings in classical and modern Chinese poetry in English translation. Same as 048:141.

039:142 Chinese Literature: Prose
Readings in Chinese prose, primarily fiction, from third century B.C. to 1900 A.D., in English translation.

039:144 Introduction to Chinese Linguistics
Aspects of modern Chinese linguistics, such as Chinese phonology, syntax, pedagogical grammar, history of the language. Taught in English. Same as 103:144, 164:181.

039:145 Topics in Asian Cinema
Issues or topics in East or South Asian cinemas. Same as 048:106.

039:156 The Karma of Words
Key issues in the relationship between Buddhism and the literary arts. Same as 032:156.

039:158 East-West Literary Relations

039:159 Chinese Art and Culture
Archaeological discoveries, sculpture, painting, architecture, calligraphy, other arts of Greater China area in historical and cultural contexts of past 5,000 years. Prerequisites: 01H:006 or 01H:031. Same as 01H:119.

039:161 Insurgency and Globalization of Discontent
Political theories of revolutionary African American and Japanese intellectuals, artists, and activists; how the theories have influenced social justice movements. Same as 129:161.

039:162 Turning East
The global nature of pilgrimage, primarily religious travel in or to Asia; journeys to single sacred sites, travel circuits to multiple destinations, internal or metaphorical pilgrimages. Same as 032:163.

039:163 Indian Religious Texts

039:164 Topics in Global Cinema
Identification of new models and methods to investigate cinema's relationship to current global issues beyond traditional scholarly focus in Western Europe and the United States; exploration of an emerging field, moving away from the paradigm of national cinema and bringing together shared theoretical frameworks while acknowledging different historical and cultural contexts. Same as 048:182, 218:160, 39J:162.

039:168 Topics in Asian Religions

039:170 Zen Buddhism
Prerequisites: 032:004 or 032:006 or 032:010. Same as 032:188.

039:172 Comparative Ritual
Practice and theory; rituals from religions, including Hinduism, Buddhism, Christianity, Indian religions; theories of interpretation. Same as 032:172.

039:173 Transnational Chinese Cinemas
Films from Mainland China, Hong Kong, Taiwan, and Chinese diasporic communities, silent era to present; relationship of film to nation-state, cultural interflows, media technologies, ideologies. English subtitles. Same as 048:174.

039:175 Topics in Asian History
039:177 Second Language Classroom Learning
3 s.h.
Synthesis of empirical findings on children’s and adults’ learning of a second or foreign language; emphasis on theoretical underpinnings of approaches, methods, techniques in language teaching. Same as 07S:183, 164:171.

039:178 Government and Politics of the Far East
3 s.h.
Functions, institutions of government in countries of Far East; focus on social, economic, historical environments. GE: International and Global Issues; Social Sciences. Same as 030:143.

039:180 Modern Chinese Writers
3 s.h.
Readings in modern and contemporary Chinese fiction; in English translation. Same as 048:183.

039:183 Enlightenment: Cross-Cultural Experiments in Religious Realization
3 s.h.
Enlightenment as one of the most important ideas that feeds contemporary religious and spiritual imagination; exploration of this concept in contemporary religious and spiritual discourse. Same as 032:182.

039:188 East Meets West: The Western Reception of Eastern Religion
3 s.h.
Introduction of religious ideas and forms from India, China, and Japan into Europe and America to late 20th century, from Greeks to New Age. Same as 032:178.

039:192 East Meets West: A Cross-Cultural Course
3 s.h.
Perceptions in the modern period based on analyses of films, literary and philosophical texts from East and West. Same as 048:192.

039:196 China Since 1927
3 s.h.
Communist revolution from 1920s to founding of People’s Republic of China in 1949; Mao Zedong’s radical policies, Cultural Revolution; Deng Xiaoping’s economic reforms; China today. GE: International and Global Issues. Same as 16W:198.

039:197 Chinese History from 1600 to 1927
3 s.h.
Chinese history from the 17th to early 20th century, history of the Qing dynasty (1644-1911); Qing’s role in shaping aspects of today’s politics in China and the mentality of Chinese people; foundation of Manchu state in early 17th century, Ming-Qing transition in 1644, politics and society during the high Qing era, decline of the empire under foreign invasion and inner rebellions in the 19th century, collapse of the dynasty in 1911. Same as 16W:197.

039:198 Topics in Asian Studies
arr.
Topics vary.

039:199 Asian Studies
arr.

Japanese Culture and Civilization

39J:103 Language in Japanese Society
3 s.h.
Aspects of the Japanese language that reflect culture, social structures of Japan; communication styles and strategies, cross-cultural communication, language in media, metaphors.

39J:109 Japanese Religion and Thought
3 s.h.

39J:123 Japanese Painting
3 s.h.
Japanese painting in its historical, cultural contexts; focus on developments of successive eras—religious art; narrative, other literary connections; Zen; decorative traditions; popular arts; Japan and the modern world. Same as 01H:123.

39J:125 Japanese Society and Culture
3 s.h.
Cultural anthropology of Japan, including historical tradition, religious ethos, social organization, human ecology, educational and political institutions; emphasis on how these aspects relate to and influence one another. GE: Values, Society, and Diversity. Same as 113:125.
39J:129 Japan: Culture and Communication 3 s.h.

39J:130 Workshop in Japanese Literary Translation 3 s.h.
Workshop in translation from Japanese to English, with emphasis on literary translation; issues in theory and practice of translation; special features of Japanese as a source language for translation. Prerequisites: 39J:012.

39J:135 Postmodern Aesthetics and Japanese Culture 3 s.h.
Japanese postmodern trends (from Zen Buddhism to the habits of contemporary otaku consumers); examination of aesthetics including works of literature, film, visual art, and electronic media.

39J:141 Traditional Japanese Literature in Translation 3 s.h.
From seventh century to early modern times. Same as 048:143.

39J:142 Modern Japanese Fiction in Translation 3 s.h.
Nineteenth century to present. Same as 048:142.

39J:143 Topics in Japanese Literature in Translation 3 s.h.
Topics vary.

39J:144 Major Authors in Modern Japanese Literature 3 s.h.
Modern Japanese literary works in English translation.

39J:145 The Tale of Genji 3 s.h.
Close reading in English of Murasaki Shikibu's *Tale of Genji*: tale's literary and social contexts, and later reception. Same as 048:144.

39J:146 Warriors Dreams 3 s.h.
Images of the warrior in traditional Japanese literature, from poetry of the eighth century to romances of the 19th century; readings in English. Same as 048:147.

39J:155 Contemporary Japanese Culture 3 s.h.
Cultural texts and practices in contemporary Japan: literature, film, television, manga.

39J:156 Japanese Art and Culture 3 s.h.
Art of Japan in historical, religious, cultural contexts; what is specifically Japanese about Japanese arts and culture; non-Japanese influences, contributions. Prerequisites: 01H:006 or 01H:033. Same as 01H:122.

39J:162 Topics in Global Cinema 3 s.h.
Identification of new models and methods to investigate cinema's relationship to current global issues beyond traditional scholarly focus in Western Europe and the United States; exploration of an emerging field, moving away from the paradigm of national cinema and bringing together shared theoretical frameworks while acknowledging different historical and cultural contexts. Same as 039:164, 048:182, 218:160.

39J:172 Japan--Age of the Samurai 3 s.h.
Society, culture, and politics of feudal Japan; social class, gender, norms, and political and economic developments explored through cinema and literature. Same as 16W:172.

39J:173 Modern Japan 3 s.h.
Political, social, and cultural developments of Japanese feudalism; feature films, fiction. Same as 16W:173.

39J:175 Japan--U.S. Relations 3 s.h.
Political, social, economic, and cultural developments in Japan mid-19th to late-20th century. Same as 16W:175.

Slavic Culture and Civilization

041:102 Russian Literature in Translation 1860-1917 3 s.h.
Survey of major works, figures, and trends of 19th- and 20th-century Russian literature; age of the Russian novel; development of short fiction, drama, poetry of the Silver Age. Same as 048:107.

Societal changes and their continuing effect on the Russian health care system since 1991; guest lectures from public health, nursing, medicine, cultural anthropology. Same as 152:170.

041:108 Special Readings  arr.
Russian-language materials determined by student and instructor. Requirements: 16 s.h. of Russian language instruction.

041:126 Cult Films of the Last Soviet Generation  3 s.h.

041:134 Forbidden Masterpieces: Russian and Czech Authors Who Changed History  3 s.h.
Examination of 20th-century literature written by authors fighting for the freedom of their nations, often suppressed, banned, imprisoned, or even stripped of their citizenship by the totalitarian communist governments; film screenings; works and films that made serious political statements, often at great risk to the artists involved, that influenced political changes. Taught in English.

041:155 Tolstoy and Dostoevsky  3-4 s.h.
Tolstoy’s War and Peace, Anna Karenina; Dostoevsky’s Crime and Punishment, The Brothers Karamazov, and short stories. Taught in English. Same as 008:155, 048:149.

041:156 Invitation to Nabokov  3 s.h.
Nabokov’s works and his writings on Russian literature. Same as 008:156, 048:156.

041:160 Women in Russian Society  3 s.h.
Historical developments that have shaped women’s roles in contemporary Russian society; readings in cultural history, political science, autobiographical and fictional literature, contemporary film. Taught in English.

041:164 Topics in Russian, East European, and Eurasian Studies  arr.

041:165 West and East: Women in the Slavic World  3 s.h.
Roles of women in two Slavic countries--Islamic Republic of Dagestan in Russia, and the Czech Republic--using approaches from the social sciences and humanities; Christian/Catholic traditions in the western Slavic country (i.e., Czechoslovakia/Czech Republic) and Islamic influences in eastern parts of Russia; analysis of women’s egalitarian roles in socialist societies of 1980s, the impact of the major political, economic, and social transitions on women’s lives in 1990s.

041:168 Twentieth-Century Czech Authors  3 s.h.
Twentieth-century prose literature of Czechoslovakia; philosophical works of Capek, Hrabal, Kundera, Klima, Havel. Taught in English. Same as 048:154.

041:180 Literature and Translation  3 s.h.
Translation in the broadest sense; originality, authority, authorship, accuracy, ownership, audience; issues problematizing differences between medium and message. Same as 048:180, 160:180.

041:189 Russian Thinkers  3 s.h.

041:190 Readings in Russian Literature  3 s.h.
Readings of poetry and prose by Russian authors. Requirements: third-year Russian.

041:195 Russian Translation Workshop  3 s.h.
Current training for professional work in translation and interpretation; concurrent activities, such as localization (adaptation of products or services to cultural, legal, linguistic, and technical requirements of specific locales), proofreading, editing, comparative analysis of English and Russian, rewriting, and so forth; consecutive, sight, simultaneous modes of interpretation; written proficiency in translation; contrastive grammar. Requirements: third-year standing in Russian language.
041:196 Russian Translation Workshop II
Single presentation of source language material. Prerequisites: 041:195.

Primarily for Graduate Students
Asian Culture, Linguistics, Pedagogy, Individual Study

039:200 Second Language Acquisition Research and Theory I
Theories regarding success and failure in acquisition of second or subsequent languages; research, issues. Same as 009:237, 035:201, 164:201, 39j:201.

039:201 Second Language Acquisition Research and Theory II

039:202 Teaching Chinese as a Foreign Language I: Theories/ Research
Research, theory on acquisition of Chinese as a non-native language. Same as 164:281.

039:203 Teaching Chinese as a Foreign Language II
Multiple levels of major Chinese textbooks, curricular organizational schemes, language programs, communicative language instruction; development of supplementary materials for a University of Iowa Chinese course. Same as 164:282.

039:204 Teaching Chinese as a Foreign Language III
Development, application of technological teaching/learning materials; emphasis on designing computer-based materials that increase learner interaction in contextualized cultural environments.

039:205 Analysis of L1 and L2 Data
Issues in qualitative and quantitative analysis of first- and second-language data; data collection, analytical frameworks and approaches. Prerequisites: 164:201. Same as 164:205.

039:207 Sociolinguistics
Topics such as discourse and conversation analyses, linguistic pragmatics, linguistic variations, issues of language and gender. Prerequisites: 103:100. Same as 164:207.

039:208 Teaching Chinese as a Foreign Language IV
Overview of goals, concepts, principles, research, and issues in assessment and testing of Chinese as a foreign language. Same as 164:274.

039:209 Teaching Chinese as a Foreign Language V
Seminar on research design; for M.A. students planning to write a thesis or project, or graduate students seeking knowledge in designing qualitative or quantitative studies. Prerequisites: 07P:143 and 039:202. Same as 164:275.

039:210 Teaching Chinese as a Foreign Language VI: Pedagogical/Research Project
Participation in Chinese as a Foreign Language material development projects under instructor’s guidance.

039:214 Individual Korean for Advanced Students
Korea’s modern/traditional culture, history, and current social issues; reading, translating authentic articles. Prerequisites: 039:151.

039:215 Individual Chinese for Advanced Students
Research, translation projects. Repeatable. Prerequisites: 039:129.

Bachelor of Liberal Studies

Coordinator
Dian Gottlob

Undergraduate degree: B.L.S.
Web site: http://www.continuetolearn.uiowa.edu/ccp/blsbas/bls_introduction.htm

Undergraduate Program

- Bachelor of Liberal Studies

The Bachelor of Liberal Studies (B.L.S.) is designed for students who wish to complete a bachelor’s degree by distance education. The B.L.S. is a general undergraduate degree without a traditional academic major. Students work with their academic advisors to structure programs that meet their individual objectives.

B.L.S. students may plan programs designed to help them advance in their chosen careers, begin new careers, or prepare for graduate or professional study. Students who have specific career goals or advanced degree programs in mind should learn what educational background they will need in order to achieve their goals, and they should include appropriate course work in their B.L.S. programs.

Students may earn credit toward the degree through several types of courses, including Saturday & Evening Classes, web-based Guided Independent Study courses, semester-based web courses, extension courses at sites throughout Iowa, and regular session courses. Courses from any of the three Board of Regents, State of Iowa, universities may be applied toward the degree, as may appropriate courses from other accredited institutions.

B.L.S. students may not earn minors.

For application information, see "Admission" below.

The B.L.S. is awarded by the College of Liberal Arts and Sciences and is administered by the Division of Continuing Education.

Bachelor of Liberal Studies

The Bachelor of Liberal Studies requires a minimum of 120 s.h. and is intended to be completed entirely by distance education. Students must earn at least 30 s.h. of credit toward the degree in University of Iowa courses after admission to the B.L.S. program. They must earn at least 60 s.h. of the minimum 120 s.h. at four-year colleges, including 45 s.h. in course work defined as upper level.

The University is in the process of revising its course numbering system. Under the current system, University of Iowa courses are considered upper level if they are numbered 100 and above. Some courses numbered below 100 may be considered upper level for the B.L.S.; for a list of these courses, contact Distance Education. Under the new system, University of Iowa courses numbered 3000–4999 will be considered upper-level for the B.L.S.

B.L.S. students are required to complete the College of Liberal Arts and Sciences General Education Program (p. 381).

Students complete at least 12 s.h. of credit in three of the following five distribution areas (total of at least 36 s.h.). In each distribution area, 6 of the required 12 s.h. must be earned in upper-level courses.

- Humanities (e.g., literature, history, philosophy, religion)
- Communication and arts (e.g., journalism, speech, drama, art, music, writing)
- Natural sciences and mathematics (e.g., geology, biology, statistics, computer science)
- Social sciences (e.g., geography, psychology, economics, political science, anthropology)
- Professional fields (e.g., business, education, nursing, social work, library science)

Students must maintain a cumulative g.p.a. of 2.00 or higher in all course work applied toward the degree, all course work completed after admission to the program, and all upper-level course work.

All College of Liberal Arts and Sciences policies regarding pass/nonpass and satisfactory/fail grading, academic standards, and so forth apply to B.L.S. students. See the CLAS undergraduate Academic Policies Handbook.

Admission

Individuals who wish to earn a B.L.S. must apply formally for admission to the program. Prospective students should contact the Distance Education office before applying.

The B.L.S. is designed for students who need to earn a bachelor’s degree by distance education. Individuals who have access to the full range of the University’s on-campus daytime classes should seek admission to the College of Liberal
Arts and Sciences in order to earn a degree with a major.

B.L.S. application requirements vary depending on educational background.

New applicants to The University of Iowa must have 60 s.h. of approved transfer credit and a cumulative g.p.a. of at least 2.50. They also must have satisfied the following high school course requirements: four years of English/language arts, two years of a single foreign language, three years of science, three years of social studies, two years of algebra, and one year of geometry.

Former University of Iowa students applying for reentry must have a total of 60 s.h. of University of Iowa and approved transfer credit and a g.p.a. of at least 2.00 on all University of Iowa course work or all college course work completed.

Applicants who hold an Associate of Arts (A.A.) degree from an Iowa community college or from Waldorf College must have a g.p.a. of at least 2.00 and are considered to have satisfied all General Education Program requirements except foreign language.

Applicants who hold an A.A. from Black Hawk College (Illinois) must have a g.p.a. of at least 2.25 and are considered to have satisfied all General Education Program requirements except foreign language.

Applicants who hold an A.A. from another institution must have 60 s.h. of approved transfer credit and a cumulative g.p.a. of at least 2.50. They also must have satisfied the following high school course requirements: four years of English/language arts, two years of a single foreign language, three years of science, three years of social studies, two years of algebra, and one year of geometry. Transfer credit is evaluated course by course.

Applicants who have a total of 24-60 s.h. of University of Iowa and approved transfer credit and a cumulative g.p.a. of at least 2.50 are admitted to the University on liberal-studies-interest status. When they complete 60 s.h. and have a g.p.a. of at least 2.00 on all college course work completed, they become eligible for admission to the B.L.S. program.

Contact Distance Education for more information about the Bachelor of Liberal Studies.
Biochemistry

Head
Charles M. Brenner

Professors
Charles M. Brenner, Pamela Geyer, George Giudice, David H. Price, Peter Rubenstein, Madeline A. Shea, Lori L. Wallrath, Daniel L. Weeks, Ronald Weigel, Marc S. Wold

Professors emeriti
Arthur Arnone, Thomas W. Conway, John Donelson, Alice B. Fulton, Rex Montgomery, Bryce Plapp, Arthur A. Spector, Earle Stellwagen, Charles A. Swenson

Adjunct professors
Theresa Gioannini, Nancy C. Stellwagen, Ramaswamy Subramanian, Joseph Walder, Liping Yu

Associate professors
John Dagle, Adrian Elcock, M. Todd Washington

Assistant professors
Sheila A. Baker, Heather L. Bartlett, Kris DeMali, Ernesto Fuentes, Shahram Khademi, Miles Pufall

Lecturer
Elisabeth Swain

Undergraduate degrees: B.A., B.S. in Biochemistry
Graduate degrees: M.S., Ph.D. in Biochemistry
Web site: http://www.biochem.uiowa.edu/

Biochemistry is the study of basic chemical processes that occur in and govern all living systems. Nearly all areas of the life sciences engage in biochemical research.

Biochemistry graduates with bachelor’s degrees often work as research assistants in industry, government, education, or health services; teach in secondary schools; or go on to advanced study in medicine, dentistry, or other areas. Those with advanced degrees pursue careers as teachers, researchers, or administrators in universities and medical schools, government, research agencies, and varied industries.

The Department of Biochemistry offers degree programs for undergraduates and for graduate students and administers the academic curriculum at both levels. The College of Liberal Arts and Sciences grants undergraduate degrees in biochemistry and oversees undergraduate academic policy relating to the student record. The Graduate College grants graduate degrees in biochemistry.

Undergraduate Programs

• Major in biochemistry (Bachelor of Science, Bachelor of Arts)

Bachelor of Science

The Bachelor of Science with a major in biochemistry requires a total of 120 s.h., including 71 s.h. of work for the major. In order to count transfer credit in biochemistry toward the major, students must have the approval of an undergraduate advisor in the department.

The biochemistry major for the B.S. prepares students to work in positions that require a mastery of general biochemistry. It is also excellent preparation for graduate study in biochemistry and related sciences or for study toward a professional degree in the health sciences.

Students are encouraged to take courses from other disciplines, such as business, pre-law, psychology, or journalism. This prepares them for a variety of career paths.

All students must complete the College of Liberal Arts and Sciences General Education Program (p. 381).

The biochemistry major for the Bachelor of Science requires the following course work.

All of these:

002:010-002:011 Principles of Biology I-II 8 s.h.
004:011-004:012 Principles of Chemistry I-II 8 s.h.
22M:025-22M:026 Calculus I-II 8 s.h.
029:081-029:082 Introductory Physics I-II 8 s.h.
099:101 Technical Communication in Biochemistry 1 s.h.
099:120 Biochemistry and Molecular Biology I 3 s.h.
099:130 Biochemistry and Molecular Biology II 3 s.h.
099:140 Experimental Biochemistry 2 s.h.
Advanced science electives, chosen in consultation with advisor 9 s.h.

One of these:

099:155 Research, Independent Study 6 s.h.
Lab-intensive advanced science electives, chosen in consultation with the advisor 6 s.h.

One of these sequences:
Students are encouraged to begin research by taking 099:115 Undergraduate Independent Study (may be taken for a total of 6 s.h.), which has no prerequisites. The course involves experience in an active biochemistry research lab, which must be arranged ahead of time with a supervising faculty member. Students may make arrangements directly with the faculty member or they may request assistance from an undergraduate advisor. Credit earned in 099:115 does not count toward the major, but it does count toward the minimum 120 s.h. required to graduate.

In order to register for 099:155 Research, Independent Study, students must have completed 099:120, 099:130, and 099:140 with a grade average of B or higher in the three courses, and they must not have earned a grade below B-minus in any one of them; or they must have their advisor’s consent and the instructor’s consent to enroll in 099:155.

**Bachelor of Arts**

The Bachelor of Arts in biochemistry requires a total of 120 s.h., including 55 s.h. of work for the major. In order to count transfer credit in biochemistry toward the major, students must have the approval of an undergraduate advisor in the department.

Students are encouraged to take courses from other disciplines, such as business, pre-law, psychology, or journalism. This prepares them for a variety of career paths.

All students must complete the College of Liberal Arts and Sciences General Education Program (p. 381).

The biochemistry major for the Bachelor of Arts requires the following course work.

All of these:

<table>

Bachelor of Arts students who intend to go on to advanced degrees in the biological or health sciences are advised to earn at least 4 s.h. in 099:115 Undergraduate Independent Study or 099:155 Research, Independent Study. There are no prerequisites for 099:115. The course involves experience in an active biochemistry research lab, which must be arranged ahead of time with a supervising faculty member. Students may make arrangements directly with the faculty member or they may request assistance from an undergraduate advisor. Credit earned in 099:115 does not count toward the major, but it does count toward the minimum 120 s.h. required to graduate.

In order to register for 099:155 Research, Independent Study, students must have completed 099:120, 099:130, and 099:140 with a grade average of B or higher in the three courses, and they must not have earned a grade below B-minus in any one of them; or they must have their
advisor’s consent and the instructor’s consent to enroll in 099:155.

**B.A. or B.S. with Teacher Licensure**

Students interested in teaching at the elementary and/or secondary level must complete the College of Education’s Teacher Education Program (TEP). Several courses in the College of Education and student teaching are required. Contact the Office of Education Services for details.

**Four-Year Graduation Plan**

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

**Bachelor of Science**

**Before the third semester begins:** 004:011 Principles of Chemistry I and 004:012 Principles of Chemistry II, 22M:025 Calculus I and 22M:026 Calculus II, and at least one-quarter of the semester hours required for graduation

**Before the fifth semester begins:** the courses listed above, plus 002:010 Principles of Biology I and 002:011 Principles of Biology II; 004:121 Organic Chemistry I and 004:122 Organic Chemistry II, and at least one-half of the semester hours required for graduation

**Before the seventh semester begins:** the courses listed above, plus 029:081 Introductory Physics I and 029:082 Introductory Physics II, 099:120 Biochemistry and Molecular Biology I, 099:130 Biochemistry and Molecular Biology II, and 099:140 Experimental Biochemistry, two science electives, and at least three-quarters of the semester hours required for graduation

**Before the eighth semester begins:** the courses listed above, plus 004:131 Physical Chemistry I or 004:132 Physical Chemistry II or 099:241 Biophysical Chemistry I or 099:242 Biophysical Chemistry II, a science elective, and at least 3 s.h. of 099:155 Research, Independent Study

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

**Honors**

Qualified students may work toward graduation with honors in biochemistry. They must be members of the University of Iowa Honors Program, which requires that students maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University of Iowa Honors Program for more information). To graduate with honors in the major, students must earn 6 s.h. in 099:155 Research, Independent Study. They must present their research results in a report written in the form of a journal article and in an oral report given at a special open departmental seminar.

**Graduate Programs**

- Master of Science in biochemistry
- Doctor of Philosophy in biochemistry

Students admitted to graduate study in biochemistry usually pursue the Doctor of Philosophy. Qualified students interested in earning the Doctor of Medicine along with the Ph.D. may apply to the Medical Scientist Training (p. 1323) Program, which offers a joint M.D./Ph.D. program.
Master of Science

The Master of Science program in biochemistry requires a minimum of 30 s.h. of graduate credit, thesis research, and a thesis. See "Doctor of Philosophy" for information about the graduate curriculum.

Doctor of Philosophy

The Doctor of Philosophy program in biochemistry requires a minimum of 72 s.h. of graduate credit. The focus of the graduate program is on the individual student.

The 72 s.h. required for the degree includes 34 s.h. of course work and 38 s.h. of research credit. Students may take courses that enhance their educational goals. All Ph.D. students take the following 19 s.h. of course work; they choose an additional 13 s.h. from courses offered by the Department of Biochemistry and other University of Iowa departments.

- 099:261 Research Techniques (first-year laboratory rotation) 1-5 s.h.
- 650:270 Principles of Scholarly Integrity 0-1 s.h.
- Biophysical chemistry (students typically earn 6 s.h.) 3 s.h.
- Molecular or cellular biology (students typically earn 6-8 s.h.) 4 s.h.
- Graduate seminar 3 s.h.

The following is a typical first-year curriculum.

First semester:

- 099:243 Biophysical Chemistry Module 1: Protein Structure, Stability, and Dynamics 1 s.h.
- 099:245 Biophysical Chemistry Module 2: Protein-Nucleic Acid Interactions 1 s.h.
- 099:247 Biophysical Chemistry Module 3: Spectroscopy and Other Biophysical Methods 1 s.h.
- 099:261 Research Techniques 1-5 s.h.
- 156:201 Fundamentals of Gene Expression 1 s.h.
- 156:202 Fundamentals of Protein Regulation 1 s.h.
- 156:203 Fundamentals of Dynamic Cell Processes 1 s.h.
- 156:204 Biostatistics for Biomedical Research 1 s.h.
- 156:265 Biosciences Critical Thinking and Communication 2 s.h.
- 650:270 Principles of Scholarly Integrity 0-1 s.h.

Second semester:

- 099:226 Enzyme Kinetics and Bioorganic Mechanisms 1-2 s.h.
- 099:244 Biophysical Chemistry Module 4: Ligand Binding and Enzyme Catalysis 1 s.h.
- 099:246 Biophysical Chemistry Module 5: X-Ray Diffraction and Scattering Techniques 1 s.h.
- 099:248 Biophysical Chemistry Module 6: Nuclear Magnetic Resonance Spectroscopy 1 s.h.
- 099:261 Research Techniques 1-5 s.h.
- 142:215 Transcription and Multifunctional Regulation by RNA 1 s.h.
- 142:216 Chromatin Structure and Disease 1 s.h.
- 142:217 Cancer, Epigenetics, and Genetic Manipulations in Mice 1 s.h.
- 156:205 Practical Bioinformatics 1 s.h.
- 156:265 Biosciences Critical Thinking and Communication 2 s.h.

- 099:282 Seminar 0-1 s.h.

or

- 156:265 Biosciences Critical Thinking and Communication 2 s.h.

Once students are promoted to the second year of study, they choose research laboratories for Ph.D. thesis research and begin their thesis projects. They take courses that supplement their interests and preparation, including the following.

- 099:282 Seminar 1 s.h.
- Graduate-level science electives 6 s.h.

Students take the comprehensive examination before the end of June in their second year, after which they are admitted formally to degree candidacy and begin to concentrate on thesis research. The program culminates in successful defense of completed thesis work before an examining committee.

In addition to meeting these requirements and those of the Graduate College, students are expected, as part of their training, to assist in teaching biochemistry for one semester.

Throughout the program, students are associated with faculty-directed research groups. They receive close personal attention from the biochemistry faculty members who serve as research advisors.
Admission

The graduate program in biochemistry is flexible enough to accommodate students with bachelor’s degrees in any of the biological, biochemical, or physical sciences. Appropriate preparation includes one-year, college-level courses in organic and physical chemistry, biology, physics, and mathematics through calculus. Students are expected to have had one or more introductory courses in biochemistry.

Applicants must have an undergraduate g.p.a. of at least 3.00 and must submit acceptable verbal, quantitative, and analytical scores on the Graduate Record Examination (GRE) General Test. Applicants are encouraged to submit their scores on the GRE Subject Test in Chemistry; Biology; or Biochemistry, Cell, and Molecular Biology.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

Financial Support

Students admitted to the Ph.D. program in biochemistry routinely receive a stipend and tuition support.

Faculty and Research

The department’s faculty members supervise research in biochemistry; molecular, cellular, developmental, computational, and structural biology; and model system genetics. Their work is supported by grants from the National Institutes of Health, the National Science Foundation, the American Heart Association, the American Cancer Society, the Muscular Dystrophy Association, and other sources. To learn more about the department’s faculty members and areas of research, visit the Department of Biochemistry web site.

Facilities

The Department of Biochemistry occupies 36,700 square feet on the fourth floor of the Bowen Science Building and 7,500 square feet on the third floor of the Medical Education Research Facility on the University’s health sciences campus. It has a number of well-equipped research laboratories; other departmental facilities include the Biochemistry Stores, the Mattill Biochemistry Reading Room, and the Heath Conference Room.

The department makes available a number of shared instruments; among them are an Applied PhotoPhysics stopped flow spectrometer SX20 (2009); a Jasco spectropolarimeter, model J815 (2010); a Horiba fluorlog-3 spectrofluorometer (2010); and a Beckman Coulter ultra XLI analytical centrifuge (1996).

Faculty, staff, and students in the department have access to a variety of shared Carver College of Medicine resources, including X-ray crystallography, the DNA Facility, the NMR Facility, the Proteomics Facility, the Flow Cytometry Facility, the Gene Transfer Vector Core Facility, the Small Animal Imaging Core, and the Transgenic Animal Facility. The University also supports resources such as the Central Microscopy Research Facilities and the Center for Biocatalysis and Bioprocessing.

Courses

099:101 Technical Communication in Biochemistry 1 s.h.
Practical aspects of writing formal scientific papers and giving oral presentations on technical topics. Prerequisites: 099:120 or 099:130 or 099:140. Requirements: junior or senior biochemistry major pursuing a B.S. degree.

099:110 Biochemistry 3 s.h.
Basic concepts in modern biochemistry and molecular biology; understanding of life processes in molecular terms. Requirements: one year each of college-level biology and chemistry. Recommendations: one semester of organic chemistry.

099:115 Undergraduate Independent Study arr.
Experience in an active biochemistry research lab, learning and performing experiments relevant to the current projects in that lab; exploration of scientific literature on topic of interest; arranged in advance by student and faculty member. Requirements: first-year, sophomore, or junior standing.
099:120 Biochemistry and Molecular Biology I  3 s.h.
Physical and chemical foundations of biochemistry, structure of biological molecules, catalysis, transport, and oxidative reactions in biology; first course of two-semester sequence that concludes with 099:130. Requirements: two semesters of general chemistry and one of organic chemistry. Recommendations: 002:010, 002:011, and an additional organic chemistry course.

099:130 Biochemistry and Molecular Biology II  3 s.h.
Carbohydrate biosynthesis, lipid metabolism, hormone regulation and integration of metabolism, signal transduction, genes and chromosomes, DNA replication and repair, transcription, RNA processing, protein translation and regulation of gene expression. Prerequisites: 099:120.

099:140 Experimental Biochemistry  2 s.h.
Use of modern instruments and techniques to fractionate, identify, and characterize constituents of biochemical systems. Prerequisites: 099:120. Requirements: grade of C or higher in 099:120, two semesters of general chemistry, and one semester of organic chemistry.

099:155 Research, Independent Study  2-6 s.h.
Independent study and research in areas of interest to the student; arranged in advance by student and biochemistry honors advisor. Requirements: grades of B- or higher in 099:120, 099:130, and 099:140; and an average grade of B or higher in all three courses.

099:161 Biochemistry for Dental Students  4 s.h.

099:162 Biochemistry for Pharmacy Students  4 s.h.

099:163 Medical Biochemistry  4 s.h.
Biochemical concepts and application to clinical problems. Requirements: M.D. enrollment.

099:164 Biochemistry for Physician Assistant Students  3 s.h.
Aspects of general biochemistry necessary for understanding the biochemical basis of human disease; analysis of appropriate clinical cases. Prerequisites: 099:110.

099:215 Directed Readings for Graduate Students  arr.
Directed readings with course content arranged with professor.

099:226 Enzyme Kinetics and Bioorganic Mechanisms  1-2 s.h.
Principles and applications of steady-state and transient enzyme kinetics; mechanisms of catalysis of biochemical reactions. Prerequisites: 099:120.

099:238 Topics in Biophysical Chemistry  1-2 s.h.
Current topics in structure and function of membranes or proteins; DNA-protein interactions; computational biochemistry; applications of NMR, X-ray diffraction, calorimetry, or spectroscopy. Repeatable. Prerequisites: 099:241 or 099:242.

099:241 Biophysical Chemistry I  3 s.h.
Principles and experimental approaches used to study structure and function of biological macromolecules; protein structure, stability, and dynamics; structures of protein-nucleic acid complexes; common biophysical methods (spectroscopy, mass spectrometry, chromatography). Requirements: one year of biochemistry. Recommendations: physical chemistry course and one semester of calculus.
099:242 Biophysical Chemistry II 3 s.h.
Principles and experimental approaches used to study structure and function of biological macromolecules; ligand binding and enzyme catalysis; X-ray crystallography and other diffraction and scattering techniques; NMR spectroscopy. Requirements: one year of biochemistry. Recommendations: physical chemistry course and one semester of calculus.

099:243 Biophysical Chemistry Module 1: Protein Structure, Stability, and Dynamics 1 s.h.
Overview principles of protein structure, stability, folding, and dynamics; brief treatment of structural biology approaches to help students become critical users of models derived from X-ray crystallography and NMR; taken alone or as part of 099:241. Requirements: introductory course in biochemistry.

099:244 Biophysical Chemistry Module 4: Ligand Binding and Enzyme Catalysis 1 s.h.
In-depth examination of principles of ligand binding; experimental approaches to study interactions with small molecules, proteins, and nucleic acids; analysis of binding data; principles of steady-state kinetics; mechanisms of catalysis of biochemical reactions; taken alone or as part of 099:242. Requirements: introductory course in biochemistry.

099:245 Biophysical Chemistry Module 2: Protein-Nucleic Acid Interactions 1 s.h.
In-depth examination of protein-nucleic acid interactions; emphasis on recent information derived from structures of protein-DNA complexes; taken alone or as part of 099:241. Requirements: introductory course in biochemistry.

099:246 Biophysical Chemistry Module 5: X-Ray Diffraction and Scattering Techniques 1 s.h.
In-depth examination of X-ray crystallography to determine structures of biological macromolecules; overview of other diffraction and scattering techniques; intended for advanced undergraduates and graduate students with an interest in applications of X-ray crystallography to problems of structural biology; taken alone or as part of 099:242. Requirements: introductory course in biochemistry.

099:247 Biophysical Chemistry Module 3: Spectroscopy and Other Biophysical Methods 1 s.h.
Basic principles underlying common biochemical techniques (i.e., spectroscopy); UV/Vis absorbance, circular dichroism, and fluorescence spectroscopy; mass spectrometry; ultracentrifugation; chromatography; taken alone or as part of 099:241. Requirements: introductory course in biochemistry.

099:248 Biophysical Chemistry Module 6: Nuclear Magnetic Resonance Spectroscopy 1 s.h.
Basic principles of NMR and applications important for understanding structure and function of biological macromolecules; emphasis on methodology and experimental design, interpretation of data, and critical reading of literature; intended for advanced undergraduates and graduate students with an interest in applications of nuclear magnetic resonance (NMR) to problems of structural biology; taken alone or as part of 099:242. Requirements: one year of biochemistry. Recommendations: basic knowledge of spectroscopy and some previous exposure to NMR from basic chemistry courses.

099:253 Metabolism I 1 s.h.
Basics of carbohydrate metabolism (glycolysis, gluconeogenesis, the pentose phosphate pathway), hormonal regulation of carbohydrate metabolism, the citric acid cycle, amino acid catabolism, oxidative phosphorylation; assignment of an advanced topic related to material, typically a recent research paper, extending inquiry beyond that presented in class and presented orally at end of five-week module. Requirements: undergraduate biochemistry course or background in enzyme function.
099:254 Metabolism II 1 s.h.
Central carbon metabolism, carbohydrate biosynthesis in plants and bacteria, lipid structure/function, fatty acid catabolism, lipid biosynthesis, and biological membranes/transport; assignment of an advanced topic related to material, typically a recent research paper, extending inquiry beyond that presented in class and presented orally at end of five-week module. Prerequisites: 099:253.

099:256 Molecular Biology 1 s.h.
DNA, RNA, and protein metabolism, regulation of gene expression, and DNA-based information technologies.

099:261 Research Techniques 1-5 s.h.
Laboratory rotation for first-year graduate students in biochemistry.

099:275 Perspectives in Biocatalysis 1-3 s.h.
Applied enzymology, protein design, structure-activity relationships, biosensor technology, microbial transformations, biodegradation of environmental pollutants. Repeatable. Requirements: graduate standing in a participating department supported by the Predoctoral Training Program in Biotechnology. Same as 004:275, 046:275, 052:275, 053:275, 061:275.

099:282 Seminar 0-1 s.h.
How to evaluate reports of scientific investigations critically; techniques for presenting scientific information.

099:283 Thesis Seminar 1 s.h.
Preparation and oral presentation of thesis proposal. Requirements: second-year graduate standing in biochemistry.

099:292 Research Biochemistry arr.
Thesis research.
Biology

Chair
Bernd Fritzsch (Iowa Entrepreneurial Endowed Professor of Biology)

Professors
Mark Blumberg (Psychology/Biology), Jeffrey L. Denburg, Daniel Eberl, Jan Fassler, Joseph Frankel, Bernd Fritzsch (Iowa Entrepreneurial Endowed Professor of Biology), Steven Green (Biology/Otolaryngology--Head and Neck Surgery), Stephen D. Hendrix, Alan Kay, Jim Jung-Ching Lin, Robert E. Malone, Sally Mason, Linda Maxson, John R. Menninger, Jeffrey C. Murray (Pediatrics/Biology), Diane C. Slusarski, David R. Soll (Carver/Emil Witschi Professor of the Biological Sciences), Chun-Fang Wu

Professors emeriti

Associate professors
Chi-Lien Cheng, Josep Comeron, Michael E. Dailey, Douglas Houston, Erin Irish, John Logsdon, Bryant F. McAllister, Christopher Stipp (Biology/Molecular Physiology and Biophysics), Joshua Weiner

Associate professors emeriti
Robert W. Embree, Diana G. Horton, Thomas E. Melchert

Assistant professors
Andrew Forbes, Bridget Lear, Ana Llopart, John Manak, Maurine Neiman, Bryan T. Phillips, Sarit Smolikove

Undergraduate degrees: B.A., B.S. in Biology
Undergraduate nondegree program: Minor in Biology
Graduate degrees: M.S., Ph.D. in Biology
Web site: http://www.biology.uiowa.edu

Undergraduate Programs

- Major in biology (Bachelor of Arts, Bachelor of Science)
- Minor in biology

Study in the Department of Biology prepares students for work in a wide variety of fields in educational institutions, government agencies, foundations, health care organizations, and businesses. Undergraduate programs prepare students for entry into research or service careers associated with private industry or government programs, and for primary and secondary teaching. They also prepare students for entry into advanced degree programs leading to careers in higher education and to independent research in a variety of biological programs, or for practice in health professions such as medicine, dentistry, pharmacy, nursing, veterinary medicine, medical technology, and physical therapy.

Bachelor of Science students majoring in biology choose one of six tracks. Five of the tracks emphasize distinct areas—cell and developmental biology, evolutionary biology, genetics and biotechnology, neurobiology, and plant biology. The sixth track—comprehensive biology—provides highly diverse content. The major for the Bachelor of Arts also provides diverse content.

The major (both B.A. and B.S.) includes a core curriculum consisting of the two-semester sequence 002:010 Principles of Biology I and 002:011 Principles of Biology II, 002:128 Fundamental Genetics, and 002:131 Evolution. Students complete a total of 18-19 courses (63-70 s.h.) in biology, chemistry, physics, and mathematics. All course work prepares students for advanced graduate and professional training in biology and related subjects.

The department offers 002:196 Honors Investigations and 002:199 Introduction to Research to acquaint undergraduate students with the nature of practicing scientists’ work. Students associate with one of the department’s research groups in experiments, discussion of current research, study of specialized topics, and attendance at research seminars. Admission to the University of Iowa Honors Program is required for 002:196 Honors Investigations. All students who are accepted by a Department of Biology faculty sponsor may take 002:199 Introduction to Research.

Students interested in field biology, zoology, or botany may take varied courses in these subjects offered during the summer at Iowa Lakeside Laboratory (p. 1529), in northwestern Iowa.

Students who wish to count course work done at another institution toward requirements for a biology degree at Iowa should consult with their biology advisor.

Bachelor of Science

The Bachelor of Science with a major in biology requires a minimum of 120 s.h., including at least 63-70 s.h. (18 courses) of work for the major. The major is divided into six tracks that emphasize the most dynamic and active areas in the biological sciences: cell and developmental biology, genetics and biotechnology, evolutionary biology,
neurobiology, plant biology, and comprehensive biology. Students working toward a B.S. must complete requirements in the chemistry/physics/mathematics foundation, the biology core, and one of the six tracks. All students must complete the College of Liberal Arts and Sciences General Education Program (p. 381).

CHEMISTRY/PHYSICS/MATHEMATICS FOUNDATION

All of these:

- 004:011-004:012 Principles of Chemistry I-II 8 s.h.
- 004:121 Organic Chemistry I 3 s.h.

One of these sequences:

- 029:011-029:012 College Physics I-II 8 s.h.
- 029:081-029:082 Introductory Physics I-II 8 s.h.

One of these:

- 22M:016 Calculus for the Biological Sciences 4 s.h.
- 22M:025 Calculus I 4 s.h.

BIOLOGY CORE

- 002:104 Introduction to Developmental Biology 3 s.h.
- 002:114 Cell Biology 3 s.h.
- 002:117 Plant Developmental Biology 3 s.h.

Group 1 (Cell/Developmental Biology Core)

All of these:

- 002:196 Honors Investigations to fulfill a track requirement must complete a minimum of 6 s.h. in that course. Honors Investigations may be used to fulfill a requirement only in a single category in each track; if it is used to fulfill the investigative laboratory requirement, it cannot also be used to fulfill the elective requirement, and vice versa.

CELL AND DEVELOPMENTAL BIOLOGY TRACK

The cell and developmental biology track provides education in the structure and function of cells and in the principles of development as they apply to animals and plants. This track is appropriate for students who wish to pursue graduate study in cellular and developmental biology, to prepare for professional study in medicine and other health-related fields, or to take positions in laboratories and companies engaged in cancer research and related fields.

Group 1 (Cell/Developmental Biology Core)

All of these:

- 002:104 Introduction to Developmental Biology 3 s.h.
- 002:114 Cell Biology 3 s.h.
- 002:117 Plant Developmental Biology 3 s.h.

Group 2 (Biochemistry)

One of these:

- 002:123 Biochemistry: Unity and Diversity 3 s.h.
- 099:110 Biochemistry 3 s.h.
- 099:120-099:130 Biochemistry and Molecular Biology I-II 6 s.h.

Group 3 (Investigative Laboratory)

One of these:

- 002:133 Cell Biology Laboratory 3 s.h.
- 002:135 Developmental Biology Lab 3 s.h.
- 002:196 Honors Investigations (in cell/developmental biology) 6 s.h.

Group 4 (Electives)

At least two courses, which may include any combination of courses not taken for group 3 and/or courses from the following list:

- 002:138 Genetics and Biotechnology Lab 3 s.h.
- 002:145 Introduction to Neurobiology 3 s.h.
- 002:150 Endocrinology 3 s.h.
- 002:168 Genes and Development 3 s.h.
- 002:171 Molecular Genetics 4 s.h.
- 002:180 Fundamental Neurobiology 4 s.h.
- 002:184 Developmental Neurobiology 3 s.h.
- 061:147 Survey of Immunology 3 s.h.
- 061:157 General Microbiology 5 s.h.

EVOLUTIONARY BIOLOGY TRACK

The evolutionary biology track provides education in the principles of evolution as they apply to understanding diversity within and among species, from genomic, ecological, and historical perspectives. This track is appropriate for students
who wish to pursue graduate study in evolutionary biology and related fields or to take positions in laboratories utilizing population genetics or phylogenetic approaches such as forensics, fisheries, and human disease mapping.

**GENETICS AND BIOTECHNOLOGY TRACK**

The genetics and biotechnology track provides education in the key principles of transmission, maintenance, regulation, and manipulation of genes. This track is appropriate for students who wish to pursue graduate study in fields related to genetics or to enter the modern biotechnology industry. It also provides excellent preparation for professional study in medicine and other health-related fields.

**Group 4 (Electives)**

Students complete two electives to fulfill the group 4 requirement. They may select courses they did not take for groups 1 and 3, as well as courses from the following list. Students who took 099:120 Biochemistry and Molecular Biology I and 099:130 Biochemistry and Molecular Biology II to satisfy the group 2 requirement may count 099:130 as one of their two elective courses.

002:168 Genes and Development 3 s.h.
061:147 Survey of Immunology 3 s.h.

NEUROBIOLOGY TRACK

The neurobiology track provides education in nervous system function at all levels, from molecular to systems biology. This track is appropriate for students who wish to pursue graduate study in neurobiology and related areas, including psychology and the social sciences; to enter laboratories that study the therapeutic basis of neurological disorders; or to work in pharmaceutical companies. It also provides good preparation for professional study in medicine and other health-related fields.

Group 1 (Neurobiology Core)
All of these:

002:143 Animal Behavior 4 s.h.
002:145 Introduction to Neurobiology 3 s.h.
002:180 Fundamental Neurobiology 4 s.h.

Group 2 (Biochemistry)
One of these:

099:110 Biochemistry 3 s.h.
099:120-099:130 Biochemistry and Molecular Biology I-II 6 s.h.

Group 3 (Investigative Laboratory)
One of these:

002:138 Genetics and Biotechnology Lab 3 s.h.
002:196 Honors Investigations (in neurobiology) 6 s.h.

Group 4 (Electives)
At least two courses, which may include any combination of a course not taken for group 3 and/or courses from the following list:

002:104 Introduction to Developmental Biology 3 s.h.
002:114 Cell Biology 3 s.h.
002:124 Animal Physiology 3 s.h.
002:150 Endocrinology 3 s.h.
002:181 Neurophysiology 3-4 s.h.
002:184 Developmental Neurobiology 3 s.h.

PLANT BIOLOGY TRACK

The plant biology track provides education in how plants grow, how they have evolved, and how they interact with other organisms. This track is appropriate for students who wish to pursue graduate study in biology specializing in plants. It also is good preparation for positions in plant biotechnology companies that work in biofuels development, crop improvement, or CO₂ sequestration, or in agencies dedicated to the conservation of natural lands.

Group 1 (Plant Biology Core)

002:117 Plant Developmental Biology 3 s.h.

One of these:

002:103 Biogeography 3 s.h.
012:171 Evolution of Plants 3 s.h.

One of these:

002:134 Ecology 4 s.h.
012:170 Evolution of Ecosystems 3 s.h.

Group 2 (Biochemistry)
One of these:

002:123 Biochemistry: Unity and Diversity 3 s.h.
002:125 Endocrinology 3 s.h.
002:126 Developmental Biology Lab 3 s.h.
002:135 Developmental Biology Lab 3 s.h.
002:139 Mammalian Endocrinology 3 s.h.
002:146 Introduction to Neurobiology 3 s.h.
002:180 Fundamental Neurobiology 4 s.h.
002:181 Neurophysiology 3-4 s.h.
002:184 Developmental Neurobiology 3 s.h.

Group 3 (Investigative Laboratory)
One of these:

002:138 Genetics and Biotechnology Lab 3 s.h.
002:196 Honors Investigations (in plant biology) 6 s.h.

Group 4 (Electives)

Students complete two electives to fulfill the group 4 requirement. They may select courses from the following list and/or approved plant biology courses offered at Iowa Lakeside Laboratory (p. 1529) (students should consult their advisors). Students who took 099:120 Biochemistry and Molecular Biology I and 099:130 Biochemistry and Molecular Biology II to satisfy the group 2
requirement may count 099:130 as one of their two elective courses.

**COMPREHENSIVE BIOLOGY TRACK**

The comprehensive biology track is designed for students who wish a diverse, well-balanced introduction to the major fields of biology. This track provides suitable educational background for graduate study in the biological sciences and science education and for work in laboratories that engage in research and applications in many fields of biology. It also provides broadly based preparation for professional study in medicine and other health-related fields.

**Group 1 (Biochemistry)**

One of these:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Name</th>

**Bachelor of Arts**

The Bachelor of Arts with a major in biology requires a minimum of 120 s.h., including at least 66-70 s.h. (19 courses) of work for the major. The B.A. program is broadly based. It introduces students to key concepts in important areas of biology and, compared to the B.S. program, gives them more flexibility in choosing elective courses.

Students working toward a Bachelor of Arts must complete a chemistry/physics/math foundation; a biology core identical to that required for the B.S. program; one course in each of three breadth
menus; one course with a laboratory; and three elective courses, which may include one course in the history or philosophy of science. All students must complete the College of Liberal Arts and Sciences General Education Program (p. 381).

The major for the Bachelor of Arts prepares students for graduate study in the biological sciences and is especially appropriate for those interested in careers in biological science education at all levels. It also provides suitable preparation for professional positions in laboratory or field research or for professional study in medicine and other health-related fields.

**CHEMISTRY/PHYSICS/MATHEMATICS FOUNDATION**

All of these:

004:011-004:012 Principles of Chemistry I-II 8 s.h.
004:121 Organic Chemistry I 3 s.h.

One of these:

002:123 Biochemistry: Unity and Diversity 3 s.h.
004:122 Organic Chemistry II 3 s.h.
099:110 Biochemistry 3 s.h.

One of these sequences:

029:011-029:012 College Physics I-II 8 s.h.
029:081-029:082 Introductory Physics I-II 8 s.h.

One of these:

22M:016 Calculus for the Biological Sciences 4 s.h.
22M:025 Calculus I 4 s.h.
22M:031 Engineering Mathematics I: Single Variable Calculus 4 s.h.

One of these:

22S:030 Statistical Methods and Computing 3 s.h.
22S:101 Biostatistics 3 s.h.

**BIOLOGY CORE**

002:010-002:011 Principles of Biology I-II 8 s.h.
002:128 Fundamental Genetics 4 s.h.
002:131 Evolution 4 s.h.

**BREADTH MENUS**

At least one course from each of the following three breadth menus:

**Molecular and Cellular Biology**

002:114 Cell Biology 3 s.h.
002:171 Molecular Genetics 4 s.h.

**Developmental Biology and Physiology**

002:104 Introduction to Developmental Biology 3 s.h.
002:117 Plant Developmental Biology 3 s.h.
002:124 Animal Physiology 3 s.h.
002:145 Introduction to Neurobiology 3 s.h.
002:150 Endocrinology 3 s.h.

**Ecology and Evolutionary Biology**

002:103 Biogeography 3 s.h.
002:134 Ecology 3 s.h.

**COURSE WITH A LABORATORY**

One of these (must not have been used as a breadth menu course):

002:108 Vertebrate Zoology 4 s.h.
002:132 Evolution Lab 3 s.h.
002:133 Cell Biology Laboratory 3 s.h.
002:135 Developmental Biology Lab 3 s.h.
002:138 Genetics and Biotechnology Lab 3 s.h.
002:186 Neurobiology Laboratory 3 s.h.
002:196 Honors Investigations 6 s.h.
012:121 Principles of Paleontology 3 s.h.
061:157 General Microbiology 5 s.h.
099:140 Experimental Biochemistry 2 s.h.
Iowa Lakeside Laboratory courses (students consult their advisors) 4-5 s.h.

**ELECTIVES**

Students complete at least three elective courses, which may include any course chosen from a breadth menu or from the list of courses with a laboratory that has not been used to satisfy those requirements, any other 2-4 s.h. course numbered 100 or above offered by the Department of Biology, any approved advanced biology course taught at Iowa Lakeside Laboratory (p. 1529) (students should consult their advisors), and/or any course(s) chosen from the following list:

012:107 Marine Ecosystems and Conservation 3 s.h.
012:122 Evolution of the Vertebrates 3 s.h.
012:170 Evolution of Ecosystems 3 s.h.
027:155 Skeletal Muscle Biology 3 s.h.
061:147 Survey of Immunology 3 s.h.
153:160 Biology of Aging 3 s.h.
213:116 Modern Human Origins 3 s.h.
213:151 Human Evolutionary Genetics 3 s.h.
213:152 Primate Conservation Biology 3 s.h.
213:170 Primate Evolutionary Biology 3 s.h.
213:188 Primate Behavior and Ecology 3 s.h.

One of the electives may be chosen from these:

16E:139 Ancient and Medieval Science 3 s.h.
16W:137/152:137 History of Public Health 3 s.h.
16W:138/152:138 History of Global Health 3 s.h.
026:104 Introduction to Philosophy of Science 3 s.h.
044:131/152:131 Geography of Health 3 s.h.

Students may count 002:199 Introduction to Research (3 s.h.) only once toward the B.A. elective requirement.

Suggested First-Year Schedule

The following first-year schedule of science courses is recommended for students majoring in biology (B.A. or B.S.).

First-Semester Science Courses

004:011 Principles of Chemistry I 4 s.h.
Calculus or mathematics leading to calculus 3-4 s.h.

Second-Semester Science Courses

004:012 Principles of Chemistry II 4 s.h.
002:010 Principles of Biology I 4 s.h.
Calculus (if not taken during the first semester) 4 s.h.

B.A. or B.S. with Teacher Licensure

The major in biology, for either Bachelor of Arts or Bachelor of Science, provides a foundation for students who are interested in teaching secondary school science. The major in science education (Bachelor of Science) also provides a foundation for teaching, allowing students to choose an emphasis in biology, chemistry, earth science, or physics; see Science Education (p. 688) in the Catalog.

Students who wish to teach must earn a bachelor’s degree and must complete the Teacher Education Program (TEP). See Teaching and Learning (p. 967) (College of Education) in the Catalog for more information about the TEP. Interested students must apply to the College of Education for admission to the TEP.

Joint B.A./M.A.T. in Science Education

Students interested in pursuing a graduate degree in teaching may apply to the joint Bachelor of Arts/Master of Arts in Teaching program offered by the College of Liberal Arts and Sciences and the College of Education. Designed for undergraduates majoring in biology, chemistry, or physics, the joint program enables students to earn a B.A. and an M.A.T. in five years by beginning to earn graduate credit during their fourth year of undergraduate study and by counting up to 18 s.h. of qualifying credit toward both degrees. For more information, see “B.A. in Science/M.A.T. in Science Education” in the Teaching and Learning (College of Education) section of the Catalog. Interested students should consult an advisor.

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

Bachelor of Science

Before the third semester begins: math through calculus I, 004:011 Principles of Chemistry I, 004:012 Principles of Chemistry II, 002:010 Principles of Biology I, and at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: the courses listed above, plus 002:011 Principles of Biology II, 004:121 Organic Chemistry I, 22S:030 Statistical Methods and Computing or 22S:101 Biostatistics, two other courses in the major, and at least one-half of the semester hours required for graduation

Before the seventh semester begins: the courses listed above, 029:011 College Physics I and 029:012 College Physics II or equivalents, plus five or six more courses in the major, and at least
three-quarters of the semester hours required for graduation

**Before the eighth semester begins:** the courses listed above, plus two or three more courses in the major

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

**Bachelor of Arts**

**Before the third semester begins:** math through calculus I, 004:011 Principles of Chemistry I, 004:012 Principles of Chemistry II, 002:010 Principles of Biology I, and at least one-quarter of the semester hours required for graduation

**Before the fifth semester begins:** the courses listed above, 002:011 Principles of Biology II, 004:121 Organic Chemistry I, 22S:030 Statistical Methods and Computing or 22S:101 Biostatistics, three other courses in the major, and at least one-half of the semester hours required for graduation

**Before the seventh semester begins:** the courses listed above, 029:011 College Physics I and 029:012 College Physics II or equivalents, plus five or six more courses in the major, and at least three-quarters of the semester hours required for graduation

**Before the eighth semester begins:** the courses listed above, plus two or three more courses in the major

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

**Honors**

Qualifying undergraduates majoring in biology may enroll in the Honors Program in Biology—a small, active group of students with common interests. Honors students gain an introduction to the pursuits of practicing scientists by associating with one of the department’s research groups and participating in an independent research project guided by a faculty member (the research supervisor).

Honors students write a thesis based on an interesting biological problem, which is usually identified by the research supervisor. The thesis should clearly document that the student has acquired the necessary experimental skills to address specific questions and test specific hypotheses related to the research problem. Honors Seminar in Biology (002:198), or an equivalent seminar, provides students with an ideal opportunity to improve their skills in seminar presentation and in writing scientific English. Throughout undergraduate residence, biology honors students may also take advantage of enrollment in honors sections of courses within the department and the college.

In order to enroll in the Honors Program in Biology, students must be members of the University of Iowa Honors Program, which requires that they maintain a cumulative University of Iowa g.p.a. of at least 3.33.

To graduate with honors in biology, students must fulfill the following requirements:

- complete the requirements for a major in biology (either B.S. or B.A.) with a g.p.a. of at least 3.33 in all course work in the major taken at The University of Iowa (including all biology courses and cognates in chemistry, physics, biochemistry, mathematics, and statistics);
- complete 2 s.h. in either 002:198 Honors Seminar in Biology or an advanced-level biology seminar course;
- complete a minimum of 6 s.h. (taken over two or more semesters) of 002:196 Honors Investigations;
- write a brief research proposal summarizing the background and goals of their proposed honors research;
- upon completion of their research, submit an acceptable honors thesis; and
- give a brief oral presentation of their research findings to other biology honors students.

Students pursuing a B.S. in biology may apply 6 s.h. of 002:196 Honors Investigations toward the investigative laboratory requirement in an appropriate track. Students pursuing a B.A. in biology may apply 6 s.h. of 002:196 Honors Investigations toward the elective laboratory course requirement and count the 2 s.h. earned in 002:198 Honors Seminar in Biology toward the elective requirement.

Biology majors interested in graduating with honors in the major should contact the biology honors advisor as early as possible, preferably in their sophomore or junior year, so that they may be matched with an appropriate lab.

**Minor**

The minor in biology requires a minimum of 15 s.h. in biology courses, including 12 s.h. in 100-level courses offered by the Department of Biology at The University of Iowa or in approved Iowa
Lakeside Laboratory (p. 1529) courses. Students must maintain a g.p.a. of at least 2.00 in the minor and in the 100-level courses. Course work in the minor may not be taken pass/nonpass. Students may not use transfer courses to satisfy the 100-level course requirement.

**Graduate Programs**

- Master of Science in biology, with or without thesis
- Doctor of Philosophy in biology

Department of Biology graduate programs emphasize original research and the skills essential for publishing and communicating research findings to the biology community. They prepare students for careers in the academic research community, education, industry, and government.

The department emphasizes the Ph.D. program. The M.S. without thesis is an exit degree; entering graduate students are not admitted to the nonthesis program.

Research programs in the department cover most areas of the biological sciences: cell biology, developmental biology, ecology, evolution, genetics, neurobiology, and plant biology. Doctoral students who wish to specialize in one of four subtracks choose from cell and developmental biology, evolution, genetics, or neurobiology. For each track’s requirements, see Graduate Programs on the Department of Biology web site.

When a new graduate student is admitted, he or she is assigned a temporary advisor. The student and advisor meet before registration to discuss the student’s educational background and to formulate a study plan for the first year. Students may be advised to take specific course work to enhance their background in certain areas.

During the first year, students whose preparation in chemistry, genetics, mathematics, and physics does not meet the department’s graduate entry requirements must remedy deficiencies by taking appropriate course work.

Minimum entry requirements are:

- two semesters of organic chemistry or one semester of organic chemistry and one semester of biochemistry;
- one semester of calculus;
- two semesters of college physics; and
- 20 s.h. of course work in biology.

A student with a bachelor’s degree outside the biological sciences may request modification of certain area requirements; the Graduate Affairs Committee decides whether portions of the requirements may be waived. Students also take 002:128 Fundamental Genetics during the first year, unless they are excused from this requirement by the Graduate Affairs Committee. After the first year, students are advised by their research sponsor and dissertation committee.

**Master of Science**

The Master of Science degree in biology requires 30 s.h. of graduate credit with thesis, and 34 s.h. of graduate credit without thesis. All M.S. students take a seminar (2 s.h.) with a substantial writing and oral presentation requirement and two advanced lecture-based courses in biology. Students receive academic credit for courses required for an M.S. or Ph.D. but not for courses taken to remedy undergraduate deficiencies.

Thesis students may count a maximum of 9 s.h. of research credit toward the degree. Remaining course work is tailored to the student’s background and career goals and is selected in consultation with the student’s advisory committee. The thesis is based on original research. After the thesis is accepted by the student’s supervisor and advisory committee, the student must pass an oral examination based on the thesis research and on related subjects.

Nonthesis students must write a library research report for a maximum of 4 s.h. of credit. They may apply up to 8 s.h. of research credit toward the degree. The nonthesis program may include credit earned in biology or cognate sciences; course work is tailored to the student’s background and career goals and is selected in consultation with the student’s advisory committee.

On completion of the 34 s.h. and acceptance of the research report by the faculty sponsor, the student must pass a written examination covering the graduate program in biology, including the area of the research report.

**Doctor of Philosophy**

The Doctor of Philosophy degree in biology requires a minimum of 72 s.h. of graduate credit.

The department expects new Ph.D. students to do research in three laboratories on a rotating basis during their first academic year (August-May). Students consult with their temporary advisors and with prospective faculty research sponsors before identifying their preferences for research rotations. They choose a permanent laboratory affiliation based on their rotations.

During the first academic year, students are required to enroll in the department’s colloquium,
which is based on a weekly Friday seminar series. In the second semester, the colloquium includes a discussion component based on the weekly seminar series. During the first two years, students must enroll in at least two advanced lecture courses, one seminar course (2 s.h.) that has a significant writing component, and a course on scientific writing designed for graduate students.

Additional formal course work and proficiency requirements for each Ph.D. student are determined by the dissertation committee on the basis of the student’s background and current and prospective research interests. The dissertation committee also determines what portion of the formal course or proficiency requirements the student must complete before taking the comprehensive examination. In this examination, students must demonstrate knowledge of biology fundamentals and the analytic and synthetic skills necessary to become creative, independent scientists. Once they complete the course work and proficiency requirements and pass the comprehensive examination, students may be admitted to full candidacy for the Ph.D.

Students also must demonstrate teaching skills by assisting in instruction as teaching assistants for at least two semesters.

The program culminates in students’ preparation of a dissertation based on original, independent research. Students must pass a final examination that covers the thesis and its specialized field before the Ph.D. is awarded.

**Admission**

Application materials for the graduate program must be sent both to the University’s Office of Admissions and to the Department of Biology graduate admissions committee. Complete instructions are listed on the application form; contact the Department of Biology or visit its web site. Applicants should have official transcripts from each undergraduate and graduate institution they have attended sent to both offices. A valid B.A. or B.S. from an accredited institution is required.

Applicants whose first language is not English must score at least 600 (paper-based), 250 (computer-based), or 100 (Internet-based) on the Test of English as a Foreign Language (TOEFL), and have their score sent to the Office of Admissions. International applicants who received their degrees (either bachelor’s or master’s) from a U.S. institution are exempt from this requirement. All international students whose first language is not English are required to take an English proficiency exam when they first enroll for classes.

Successful applicants for graduate admission usually have a g.p.a. of at least 3.00 and score above 1200 on the Graduate Record Examination (GRE) General Test (combined verbal and quantitative). These criteria are general guidelines for the admissions committee, which also considers letters of recommendation, research experience, and other appropriate criteria.

The department recommends that applicants also take the Graduate Record Examination advanced biology test and submit their scores. Although most applicants have completed undergraduate programs in biology, the department also considers applicants with backgrounds in biophysics, botany, biochemistry, molecular biology, microbiology, and other related areas.

Applications should be submitted by January 15 and must include the GRE test scores. In order to meet the deadline, applicants must take the GRE in October or earlier. Late applications are considered as placement and funding permit.

Students applying for admission to the M.S. with thesis program in biology should have a bachelor’s degree in one of the biological sciences. Students with bachelor’s degrees in other areas may need to register as nondegree students (A9 or G9) and make up the equivalent of the department’s bachelor’s degree program prior to consideration for admission. Nondegree students must complete chemistry, physics, and calculus requirements in addition to the biology courses listed in the undergraduate program. Nondegree students should consult the department’s graduate program administrator before applying for admission.

The Master of Science without thesis is an exit degree; entering graduate students are not admitted to the nonthesis program.

For more information, visit the Department of Biology web site.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate (p. 1117) College section of the Catalog.

**Financial Support**

All graduate students making satisfactory progress toward the Ph.D. receive stipend and full tuition support from non-University of Iowa fellowships, teaching assistantships, or research assistantships available through individual research grants administered by faculty members or by the University. First-year Ph.D. students are supported
by department fellowships during the research rotation period.

Facilities

The department is housed in two contiguous buildings, with modern facilities and equipment for state-of-the-art research.

Facilities include the Keck Dynamic Image Analysis Facility, which couples sophisticated state-of-the-art microscopy and computerized motion analysis to permit three-dimensional real-time analysis of cell movement in vitro and in situ. The Roy J. Carver Center for Genomics houses the department’s DNA sequencing, oligo synthesis, quantitative PCR, functional genomics/microarray facilities, and informatics facilities. The Carver Center for Imaging is a well-staffed microscopy and imaging facility; its newly established confocal microscope is available for teaching and research.

Two large greenhouses are used in plant research and education.

The department also houses animal-care facilities suitable for mice, rats, rabbits, *Xenopus laevis*, and zebra fish. These facilities are managed by the University’s animal care unit, which is accredited by the Association for Assessment and Accreditation of Laboratory Animal Care. A central University facility provides assistance in the preparation of transgenic mice.

The department is also the home of the Developmental Studies Hybridoma Bank, which is affiliated with the National Institutes of Health. The hybridoma bank collects and distributes monoclonal antibodies that originate in laboratories all over the world. Its collection now contains more than 1100 monoclonal antibodies that are distributed to users internationally for a modest fee.

In addition to department facilities, the University offers a genomic sequencing service, a DNA oligonucleotide synthesis and enzyme lab, oligopeptide synthesis and sequencing equipment, and mass- and NMR spectroscopy facilities. The Center for Biocatalysis and Bioprocessing is available for growing large amounts of microorganisms (e.g., 100 liters) for use in protein isolation.

Iowa Lakeside Laboratory

The Iowa Lakeside Laboratory is a field station run cooperatively by The University of Iowa, Iowa State University, and the University of Northern Iowa. Located on West Lake Okoboji, in northwestern Iowa, the laboratory affords excellent conditions for summer study in field biology, limnology, phycology, aquatic ecology, pollination biology, and plant taxonomy. It offers a wide variety of summer courses at the undergraduate and graduate levels. Students should check with their advisors to determine whether specific courses may be counted toward requirements for graduation. See Iowa Lakeside Laboratory (p. 1529) (University College) in the Catalog or visit the Lakeside Laboratory web site.

Courses

Many courses include field and/or laboratory components.

Primarily for Undergraduates

002:001 Introduction to Botany 4 s.h.

Biology of plant life; emphasis on structure, function, reproduction, inheritance, diversity, evolution. Requirements: one year of high school chemistry. GE: Natural Sciences with Lab.

002:002 Introductory Animal Biology 4 s.h.

Fundamental principles: cells and macromolecules, energy metabolism, organismic physiology, genetics, development, ecology, and evolution. Requirements: one year of high school chemistry. Recommendations: 004:007. GE: Natural Sciences with Lab.

002:010 Principles of Biology I 4 s.h.

Structure and function of cells; structure, function, reproduction of flowering plants and vertebrate animals; first of two-semester course sequence. Prerequisites: 004:011. GE: Natural Sciences with Lab.

002:011 Principles of Biology II 4 s.h.

Continuation of 002:010; genetics, development, immunology, ecology, evolution. Prerequisites: 002:010 and 004:011. GE: Natural Sciences with Lab.

002:031 Foundations of Biology 4 s.h.

Unifying concepts of living systems; emphasis on common properties and processes; chemical and cellular basis of life, genetics, and evolution. Prerequisites: 004:011. GE: Natural Sciences with Lab.
### 002:032 Diversity of Form and Function

4 s.h.

Underlying unifying concepts of life; emphasis on diversity of living systems; the tree of life, cellular evolution, prokaryotic and eukaryotic diversity, plant and animal form and function; interactions among diverse forms of life and their environment. Prerequisites: 002:010 or 002:031.

Requirements: grade of C- or higher in 002:031.

GE: Natural Sciences with Lab.

### Elementary Topics of General Interest

These courses are not open to graduate students and do not provide credit toward a biology major.

*GE* stands for General Education.
002:108 Vertebrate Zoology 4 s.h.
Vertebrate diversity, success in relation to evolutionary history, and adaptive radiation of fish, amphibians, reptiles, birds, mammals; physiological, morphological, behavioral, life history adaptations; vertebrate zoogeography, systematics, patterns of reproduction, social systems. Prerequisites: 002:010 and 002:011.

002:114 Cell Biology 3 s.h.
Structures of cells and organelles in relation to their functions at molecular, cellular levels; emphasis on higher eukaryotic cells. Prerequisites: 002:010, 002:011, and 004:012.

002:117 Plant Developmental Biology 3 s.h.
Developmental processes throughout life cycle of vascular plants; current knowledge of mechanisms, control; emphasis on molecular and genetic approaches to studying development. Prerequisites: 002:128.

002:123 Biochemistry: Unity and Diversity 3 s.h.
Fundamental concepts in biochemistry; compartmentalization, energy flow, and metabolism; emphasis on comparative biochemistry of living organisms, including unique capabilities of plants (photosynthesis); what life would be like on our planet without plants, why some plants are poisonous, if plants have an immune system, and how plants can be used to meet the needs of humankind in the 21st century. Prerequisites: 002:010, 002:011, and 004:121.

002:124 Animal Physiology 3 s.h.

002:128 Fundamental Genetics 3-4 s.h.

002:131 Evolution 4 s.h.

002:132 Evolution Lab 3 s.h.
Methods of sampling and describing variation in natural populations; application of molecular genetic, bioinformatic, and computational techniques to describe genetic variation through sequence analysis; use of controlled laboratory experiments and computer simulations to illustrate evolutionary principles. Prerequisites: 002:128. Corequisites: 002:131.

002:133 Cell Biology Laboratory 3 s.h.
Conceptual understanding and technical skills in fluorescence microscopy and digital imaging, mammalian cell culture, tissue fractionation, centrifugation, electrophoresis, and expression of recombinant proteins. Prerequisites: 002:010, 002:011, and 002:114.

002:134 Ecology 3-4 s.h.
Adaptations of organisms to their physical and biological environments; organism-environment interactions; population biology; interactions between species; ecology of communities, ecosystems; human impact on ecosystems. Prerequisites: 002:010, 002:011, and 22M:016 or 22M:025 or 22M:031. Recommendations: a basic statistics course. Same as 159:134.

002:135 Developmental Biology Lab 3 s.h.
Experimental manipulation of embryos to examine mechanisms of early development, including gametogenesis and fertilization, cleavage, gastrulation, pattern formation and organogenesis; in vivo imaging of development, methods to visualize gene expression and independent research; model organisms including sea urchin, fish, frog, chick, mouse. Prerequisites: 002:104 and 002:128.
002:138 Genetics and Biotechnology Lab 3 s.h.

002:143 Animal Behavior 4 s.h.
Genetics, sensory physiology, migration, development of behavior, circadian rhythms, foraging strategies, aggression, sexual and parental behavior, group selection, social behavior. Prerequisites: 002:010 and 002:011.

002:145 Introduction to Neurobiology 3 s.h.
Techniques of molecular biology, genomics, neuropharmacology, and functional brain imaging applied to understanding how the brain works. Prerequisites: 002:010 and 002:011.

002:150 Endocrinology 3 s.h.
Production and effect of hormonal chemical messengers of secretory glands; emphasis on cell signaling in vertebrate systems; actions of hormones in regulating growth, physiology, and reproduction; organ to molecular levels. Prerequisites: 002:010 and 002:011. Recommendations: 004:121.

002:160 Molecular Phylogenetics 3 s.h.
Theory underlying phylogenetic analysis with application of these methods to molecular data sets; analysis of multigene data, organellar, and nuclear genome sequences to reconstruct the history of cells. Requirements: grade of C- or higher in 002:131 or graduate standing.

002:162 Population Genetics and Molecular Evolution 3 s.h.
Nucleotide sequences, genes, and mutation; rates and patterns of nucleotide substitution; selection at the molecular level and the neutral theory; population genetics theory; genome evolution. Requirements: grade of C- or higher in 002:131 or graduate standing.

002:168 Genes and Development 3 s.h.
Mechanisms by which genes control development of multicellular animals; methodology of scientific research applied to developmental genetics. Requirements: grade of B or higher in 002:128. Recommendations: 002:104.

002:169 Introduction to Bioinformatics 4 s.h.
Basics of genetics and molecular biology; overview of bioinformatics and genome science, including genome projects, functional genomics, phylogenetics, proteomics, microarrays, DNA polymorphisms, data-mining algorithms; experimental methods, analytical approaches. Requirements: 002:128 or 099:120 or graduate standing. Same as 051:121, 055:121.

002:170 Bioinformatics 3 s.h.
Overview of bioinformatics and genomics; requires working knowledge of basic concepts in genetics and molecular biology. Requirements: (for 002:170) grade of B+ or higher in 002:128; (for 127:170) grade of B+ or higher in 002:128 and working knowledge of basic genetics and molecular biology concepts. Same as 127:170.

002:171 Molecular Genetics 4 s.h.
Mechanism, regulation of RNA, DNA, protein biosynthesis, with emphasis on methods of genetic analysis; application of modern recombinant DNA techniques to basic problems. Requirements: 002:128 or 099:120 or first-year graduate standing.

002:174 Computational Genomics 3 s.h.
Introduction to computational methods used in genome analysis and functional genomics; biological sequence analysis, sequence database search, microarray data analysis, biological network analysis; in-depth coverage of principal genome science challenges and recent solutions. Same as 051:122, 055:122, 127:173.

002:176 Microarray Data Analysis 3 s.h.
Basic statistical principles and techniques used in bioinformatics, including analyzing microarray gene expression data. Offered spring semesters. Prerequisites: 22S:030 or 22S:101 or 171:161. Same as 127:176, 171:185.
002:178 Genomics 3 s.h.
Major areas of genomics, including DNA and protein sequence analysis, structural diversity of whole genomes, microarray applications, proteomics; computer workshop experience in applying bioinformatics tools. Prerequisites: 002:128 or 099:120.

002:180 Fundamental Neurobiology 4 s.h.
Cellular neurobiology (cytoskeleton and transport, membrane physiology, synaptic transmission and plasticity, sensory transduction); systems neurobiology (peripheral and central sensory processing, autonomic and somatic motor systems); cognitive neurobiology (emotion, biological rhythms and sleep, memory, attention, language); developmental neurobiology. Prerequisites: 002:145. Recommendations: 002:114 and 099:110. Same as 132:180.

002:181 Neurophysiology 3-4 s.h.
Physiological properties of nerve cells, nervous systems; axonal conduction, synaptic transmission, sensory transduction, integrative processes, higher functions. Prerequisites: 002:180, 22M:025, and 029:012 or 029:082. Same as 132:181.

002:184 Developmental Neurobiology 3 s.h.
Neural induction and nervous system patterning; neurogenesis, axon and dendrite outgrowth and targeting; synapse formation, specificity, refinement; mechanisms of neuronal cell death; myelination; neural stem cells; introduction to cellular, molecular, and genetic techniques in studies of neural development. Requirements: grade of B- or higher in 002:180 or graduate standing. Same as 072:184, 132:184.

002:186 Neurobiology Laboratory 3 s.h.
Principles and practice of neurobiology research, including microscopy and imaging, cellular and molecular neurobiology, and electrophysiology. Prerequisites: 002:180.

002:189 Entering Research 1 s.h.
Independent, investigative research experience; research process—establishing goals and expectations with a mentor, defining a research hypothesis, presentation of results in written and oral form; supportive learning environment to share research experiences and develop identities as scientists, explore relationships between medicine and research, and learn skills to become effective independent researchers. Corequisites: 002:196 or 002:199.

002:190 Topics in Evolution and Ecology 1-2 s.h.
Requirements: grades of B- or higher in 002:128 and 002:131, or graduate standing.

002:191 Topics in Molecular Genetics 1-2 s.h.
Requirements: grade of C+ or higher in 002:128 or graduate standing.

002:192 Basic Biology of Human Disease 2 s.h.
Basic problems of infectious disease; selected viral, bacterial, and fungal pathogens, with emphasis on fungal pathogenesis; DNA fingerprinting; epidemiological study of disease dynamics. Prerequisites: 002:128.

002:194 Topics in Cell and Development 1-2 s.h.
Topics vary. Prerequisites: 002:180.

002:195 Topics in Neurobiology 1-2 s.h.
Topics vary. Prerequisites: 002:180.

002:196 Honors Investigations arr.
Conduct independent scientific research related to the field of biology. Requirements: honors standing in biology, UI g.p.a. of at least 3.33, and biology g.p.a. of at least 3.33.

002:198 Honors Seminar in Biology 2 s.h.
Requirements: honors standing.

002:199 Introduction to Research 3 s.h.
Conduct independent scientific research related to the field of biology.
Primarily for Graduate Students

002:200 Biology Colloquium 0,2 s.h.
Repeatable. Requirements: first-year biology graduate standing.

002:207 Research Method and Theory 2 s.h.
Materials and methods of scientific investigation; lab techniques; library resources usage, NCBI data base training; lab safety; research ethics; reading, writing, presenting scientific papers. Requirements: new graduate standing in biology.

002:220 Advanced Microscopy for Biomedical Research arr.
Technically advanced microscopy methods for research; individualized laboratory experience with opportunity to explore application of microscopy methods. Requirements: (for 060:220) an introductory microscopy course; (for 002:220) 002:218 or 060:218 or 061:218 or 012:156 or 052:156 or 060:156; (for 061:220) an introductory EM course. Same as 060:220, 061:220.

002:227 Fundamental Genetics--Graduate Lecture 3 s.h.

002:228 Fundamental Genetics--Graduate Discussion 1 s.h.
Critical evaluation of classic genetics papers. Requirements: biology graduate standing.

002:234 Seminar: Writing in Natural Sciences 2 s.h.
Writing and critiquing skills in the natural sciences.

002:265 Neuroscience Seminar 0-1 s.h.
Chemistry

Chair
Mark A. Arnold (Edwin B. Green Chair in Laser Chemistry)

Professors

Professors emeriti
Donald J. Burton, E. David Cater, Robert E. Coffman, Leodis Davis, John R. Doyle, H. Bruce Friedrich, Harold M. Goff, Donald J. Pietrzyk, Dwight C. Tardy

Associate professors
Ned Bowden, Christopher M. Cheatum, Renee S. Cole, Gregory K. Friestad, Edward G. Gillan, Johna Leddy, Claudio Margulis, Louis Messerle (Chemistry/Radiology), F. Christopher Pigge, Mark A. Young

Associate professor emeritus
Darrell P. Eyman

Assistant professors
Mishtu Dey, Tori Z. Forbes, Amanda J. Haes, Sarah E. Mason, Hien M. Nguyen, Jan-Uwe Rohde, Elizabeth A. Stone, Alexei V. Tivanski

Lecturers
Russell G. Larson, Mona A. Maalouf, Amy E. Strathman

Undergraduate degrees: B.A., B.S. in Chemistry
Undergraduate nondegree program: Minor in Chemistry
Graduate degrees: M.S., Ph.D. in Chemistry
Web site: http://www.chem.uiowa.edu/

Undergraduate Programs

- Major in chemistry (Bachelor of Arts, Bachelor of Science)
- Minor in chemistry

The undergraduate major in chemistry provides a strong foundation for success in graduate and professional study and for positions in academic or industrial chemistry.

Bachelor of Science

The Bachelor of Science with a major in chemistry requires a minimum of 120 s.h., including 68 s.h. of work for the major, with 46 s.h. in chemistry courses. Students earn 17 s.h. in five foundation chemistry courses and 29 s.h. in advanced chemistry courses. They must earn at least 20 s.h. in advanced chemistry courses at The University of Iowa.

The five foundation courses are principles of chemistry I-II, organic chemistry I-II, and organic chemistry lab. All subsequent chemistry courses are built on the foundation courses.

Other requirements include integral calculus, introductory physics, and science electives, which may include research. Students also must complete the College of Liberal Arts and Sciences General Education Program (p. 381).

The chemistry major for the Bachelor of Science is certified by the American Chemical Society. Current and projected demand for Bachelor of Science graduates in chemistry is excellent in research and in control and process-development work. The program also provides all the prerequisites for graduate work in chemistry or biochemistry and in other biomedical areas with a molecular focus.

Courses in the chemistry major have prerequisites, so they must be taken in the correct order. Most advanced courses are taught only once a year. Students should consult their academic advisors and plan their course schedules carefully. They should take 004:021 Basic Measurement during the first semester of the second year.

The chemistry major for the Bachelor of Science requires the following course work.

CHEMISTRY: FOUNDATION COURSES

One of these sequences:

004:011-004:012 Principles of Chemistry I-II 8 s.h.
004:018-004:019-004:020 Chemical Science I-II - Chemical Science Laboratory 8 s.h.

One of these sequences:

004:121-004:122 Organic Chemistry I-II 6 s.h.
004:123-004:124 Organic Chemistry I for Majors - Organic Chemistry II for Majors (preferred) 6 s.h.

One of these:
Bachelor of Arts

The Bachelor of Arts with a major in chemistry requires a minimum of 120 s.h., including 53 s.h. of work for the major, with 37 s.h. in chemistry courses. Students earn 17 s.h. in five foundation chemistry courses and 20 s.h. in advanced chemistry courses. They must earn at least 11 s.h. in advanced chemistry courses at The University of Iowa.

The five foundation courses are principles of chemistry I-II, organic chemistry I-II, and organic chemistry lab. All subsequent chemistry courses are built on the foundation courses.

Other requirements include integral calculus and introductory physics. Students also must complete the College of Liberal Arts and Sciences General Education Program (p. 381).

The chemistry major for the Bachelor of Arts provides a more general education than the B.S. program offers, with a concentration in fundamental chemistry and a wider choice of electives. Advanced courses in chemistry, biology, mathematics, physics, or other scientific areas are recommended.

Chemistry students who graduate with a Bachelor of Arts may qualify to be high school teachers, provided they meet teacher licensure requirements. By choosing appropriate electives, students can meet entrance requirements for chemistry, biochemistry, medicine, dentistry, or other graduate or professional programs while satisfying the requirements for the major in chemistry. Graduates also may pursue careers and education in business, law, and other areas.

Courses in the chemistry major have prerequisites, so they must be taken in the correct order. Most advanced courses are taught only once a year. Students should consult their academic advisors and plan their course schedules carefully. Students should take 004:021 Basic Measurement during the first semester of the second year.

The chemistry major for the Bachelor of Arts requires the following course work.

</tbody>
</table>

One of these sequences:
004:121-004:122 Organic Chemistry I-II 6 s.h.
004:123-004:124 Organic Chemistry I for Majors - Organic Chemistry II for Majors (preferred) 6 s.h.

One of these:
004:141 Organic Chemistry Laboratory 3 s.h.
004:142 Organic Chemistry Laboratory for Majors (preferred) 3 s.h.

CHEMISTRY: ADVANCED COURSES

One of these:
004:143 Analytical Measurements 3 s.h.
004:144 Physical Measurements 3 s.h.
004:153 Inorganic Chemistry Laboratory 3 s.h.

All of these:
004:021 Basic Measurement (first semester of second year) 3 s.h.
004:111-004:112 Analytical Chemistry I-II 6 s.h.
004:125 Inorganic Chemistry 2 s.h.
004:131-004:132 Physical Chemistry I-II 6 s.h.

INTEGRAL CALCULUS

One of these sequences:
22M:025-22M:026 Calculus I-II (preferred) 8 s.h.

INTRODUCTORY PHYSICS

One of these sequences:
029:011-029:012 College Physics I-II 8 s.h.
029:081-029:082 Introductory Physics I-II (preferred) 8 s.h.

B.A. or B.S. with Teacher Licensure

Chemistry courses required for the major with either a B.S. or B.A. satisfy the main requirements for teaching in secondary schools. A minor in chemistry satisfies the requirements for a teaching emphasis in chemistry (see Science Education (p. 688) in the Catalog).

Students who wish to teach must complete the Teacher Education Program (TEP). See Teaching and Learning (p. 967) (College of Education) in the Catalog for more information about the TEP. Interested students must apply to the College of Education for admission to the TEP.

Joint B.A./M.A.T. in Science Education

B.A. students majoring in chemistry who are interested in pursuing a graduate degree in teaching may apply to the joint Bachelor of Arts/Master of Arts in Teaching program offered by the College of Liberal Arts and Sciences and the College of Education. Designed for undergraduates majoring in biology, chemistry, and physics, the joint program enables students to earn a B.A. and an M.A.T. in five years by beginning to earn graduate credit during their fourth year of undergraduate study and by counting up to 18 s.h. of qualifying credit toward both degrees. For more information, see "B.A./M.A.T. in Science Education" in the Teaching and Learning (p. 967) (College of Education) section of the Catalog. Interested students should consult an advisor.

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

Note: Courses in the chemistry major have prerequisites, so they must be taken in the correct order. Most advanced courses are taught only once a year. Students should consult their academic advisors and plan their course schedules carefully. They should take 004:021 Basic Measurement during the first semester of the second year. A typical chemistry course schedule and a regression list are available from the department.

Bachelor of Arts

Before the third semester begins: math through calculus I, 004:011 Principles of Chemistry I and 004:012 Principles of Chemistry II or 004:018 Chemical Science I, 004:019 Chemical Science II, and 004:020 Chemical Science Laboratory or equivalent course work, and at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: the courses listed above; calculus II; organic chemistry I, II, and lab; physics I and II; and at least one-half of the semester hours required for graduation
Before the seventh semester begins: the courses listed above, four more courses in the major, and at least three-quarters of the semester hours required for graduation.

Before the eighth semester begins: the courses listed above, and one or two more courses in the major.

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate.

Bachelor of Science

Before the third semester begins: math through calculus I, 004:011 Principles of Chemistry I and 004:012 Principles of Chemistry II or 004:018 Chemical Science I, 004:019 Chemical Science II, and 004:020 Chemical Science Laboratory or equivalent course work, and at least one-quarter of the semester hours required for graduation.

Before the fifth semester begins: the courses listed above; calculus II; physics I and II; organic chemistry I, II, and lab; three other courses in the major; and at least one-half of the semester hours required for graduation.

Before the seventh semester begins: the courses listed above, six more courses in the major, and at least three-quarters of the semester hours required for graduation.

Before the eighth semester begins: the courses listed above, and three more courses in the major.

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate.

Honors

To graduate with honors in chemistry, a student must be a member of the University Honors Program, which requires students to maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University of Iowa Honors Program for more information). Honors students in chemistry must take 004:162 Undergraduate Research, complete a research project acceptable to their research advisors, and write an honors thesis based on that research. Students are encouraged, but not required, to present their research at local and regional meetings and to publish their results in professional journals. Students who complete 6 s.h. of 004:162 Undergraduate Research may earn additional honors research credit through an honors practicum.

Minor

The minor in chemistry requires a minimum of 15 s.h. in courses offered by the Department of Chemistry at The University of Iowa, including 12 s.h. in advanced courses. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass. Advanced courses are numbered above 100 and below 280, except 004:162 Undergraduate Research and 004:191 Graduate Chemistry Orientation. Students normally complete the minor by taking the introductory sequence 004:011 Principles of Chemistry I and 004:012 Principles of Chemistry II (or 004:018 Chemical Science I, 004:019 Chemical Science II, and 004:020 Chemical Science Laboratory) followed by the 12 s.h. of advanced course work, which most commonly consists of the organic chemistry sequence 004:121 Organic Chemistry I, 004:122 Organic Chemistry II, and 004:141 Organic Chemistry Laboratory (or 004:123 Organic Chemistry I for Majors, 004:124 Organic Chemistry II for Majors, and 004:142 Organic Chemistry Laboratory for Majors) plus one more 3 s.h. chemistry course, such as 004:111 Analytical Chemistry I, 004:131 Physical Chemistry I, 004:132 Physical Chemistry II, or 004:172 Advanced Organic Chemistry.

Resources, Activities

The department offers undergraduate students majoring in chemistry and other students interested in chemistry a number of opportunities to enrich their classroom studies.

Undergraduate Chemistry Center

The Chemistry Center serves all students who take chemistry courses as well as the department’s professors and teaching assistants. The center maintains waiting lists and offers other assistance with registration; returns examinations and homework assignments and maintains a file of lecture hand-outs; provides a lending library of chemistry textbooks that can be checked out; and provides other information about all lower-level chemistry courses. Information about student organizations and departmental scholarships and awards also is available at the Chemistry Center.

Student Organizations

Students may join the Undergraduate Chemical Society, a student affiliate of the American Chemical Society (ACS). Chapter activities include dinner meetings with guest speakers; a chemistry tutoring service for other students; participation in local and national meetings of the ACS; and participation in chemistry outreach programs.
Students in UCS develop leadership, organization, and speaking skills valuable throughout their college experience and in their subsequent careers.

The department has a chapter of Alpha Chi Sigma, a co-ed chemistry fraternity. The Alpha Theta Chapter is open to students in chemistry, biochemistry, chemical engineering, and related fields. Alpha Chi Sigma sponsors many social and professional events throughout the year.

The department also supports the activities of Women in Science and Engineering (WISE), whose aim is to increase women’s participation and advancement as students, faculty members, and professional staff; promote a supportive study and work environment for women; integrate women’s ideas, strengths, and approaches into research, teaching, and service; and inform the public of educational and career opportunities for women in scientific and technical fields. WISE sponsors a living-learning community in Stanley Hall (a University residence hall) for first-year female students majoring in science or engineering, the Student-to-Student Support in Science mentoring program, a service learning program, and the WISE Discourse and Dining series.

Scholarships and Awards

A number of awards and scholarships are available to chemistry majors, including the American Institute of Chemists Award, the Undergraduate Award in Analytical Chemistry, the Chemistry Alumni Awards (one each for a sophomore, a junior, and a senior), the Merck Index Award, and the Viksnins, Harris & Padys PLLP Award.

Chemistry majors also may apply for the Donald J. and Margaret Burton Scholarship, Ken Sando Scholarship, Shoemaker-Strickler Scholarship, and Russell K. Simms Scholarship.

Graduate Programs

- Master of Science in chemistry, with or without thesis
- Doctor of Philosophy in chemistry

Master of Science

The Master of Science in chemistry requires a minimum of 30 s.h. of graduate credit. The degree is offered with or without thesis, in analytical, inorganic, organic, and physical chemistry. M.S. students must demonstrate minimal proficiency in analytical, inorganic, organic, and physical chemistry by passing specific examinations or by enrolling in suitable core courses. This requirement must be completed by the end of the second year of enrollment. A g.p.a. of at least 3.00 is required for admission to the master’s examination.

Doctor of Philosophy

The Doctor of Philosophy in chemistry requires a minimum of 72 s.h. of graduate credit. Ph.D. study in analytical, inorganic, organic, and physical chemistry includes minimal proficiency examinations, core courses as necessary, a minimum of 11 s.h. of advanced course work, and research.

Students who meet the course requirements with a cumulative g.p.a. of 3.00 or higher are admitted to the oral comprehensive examination upon presentation and preliminary approval of their written research proposal and research progress report; they must take the oral comprehensive examination no later than the end of their second year of enrollment.

Upon completing Ph.D. research, candidates prepare the dissertation. The final examination consists of an oral defense of the thesis, at which time the candidate presents at least one manuscript of the publishable portion of his or her thesis.

Admission

Applicants for graduate admission should have a bachelor’s degree with a major in chemistry, preferably with a g.p.a. of 3.00 or higher. Most admitted graduate students receive financial support. For application information, contact the Department of Chemistry or visit its web site.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate (p. 1117) College section of the Catalog.

Facilities

The Department of Chemistry office, support facilities, and faculty offices are located in the Chemistry Building, as is laboratory and classroom space dedicated to teaching and research activities. Several faculty members have offices and laboratories in the Iowa Advanced Technology Laboratories, across the street from the Chemistry Building. See the Department of Chemistry web site for information about facilities and advanced instrumentation available for instruction and research.
Courses

Primarily for Undergraduates

Students planning to take more than one year of chemistry should take 004:011 Principles of Chemistry I and 004:012 Principles of Chemistry II. Students who require only one year of chemistry with no laboratory component may take 004:007 General Chemistry I and 004:008 General Chemistry II. Students who have not had high school chemistry or do not have strong math and/or chemistry preparation should consider taking 004:007 General Chemistry I before 004:011 Principles of Chemistry I; academic advisors and the Chemistry Diagnostic Test can help students determine whether to take 004:007 General Chemistry I before 004:011 Principles of Chemistry I.

004:005 Technology and Society 3 s.h.
Nonmathematical exploration of selected areas of technology; basic science background, current technological applications, implications for society; for nonscience majors. Requirements: closed to students who have taken college chemistry courses. GE: Natural Sciences without Lab.

004:006 Technology and Society Laboratory 1 s.h.
Laboratory for 004:005; demonstrations, student experiments. Corequisites: 004:005, if not taken as a prerequisite. Requirements: closed to students who have earned more than 3 s.h. in chemistry courses. GE: Natural Sciences Lab Only.

004:007 General Chemistry I 3 s.h.
Atomic structure, chemical bonds, mole relations, stoichiometry, states of matter, acids and bases, reaction rates, electrochemistry, nuclear chemistry. Requirements: elementary algebra. GE: Natural Sciences without Lab.

004:008 General Chemistry II 3 s.h.
Organic chemistry and biochemistry. Requirements: 004:007 or high school chemistry. GE: Natural Sciences without Lab.

004:009 Supplemental Chemistry Lab 1 s.h.
Lab techniques, elementary synthesis, measurement, analysis, case-study lectures and experiments; safety glasses, appropriate dress, compliance with laboratory safety protocols required. Requirements: grade of C or higher in 004:018 or 004:019.

004:011 Principles of Chemistry I 4 s.h.
Chemical bonding and chemical reactions; atomic and molecular structure, chemical equations, stoichiometry, gases, liquids, thermodynamics of phase changes, solutions, equilibrium, acids, bases, pH, elementary organic chemistry; the solid state, including modern materials; lecture, discussion, laboratory. Requirements: 22M:008, or ACT math subscore of 24 and MPT II score of 20, or ACT math subscore of 24 and MPT III score of 10. Recommendations: Chemistry Diagnostic Test score of 15. GE: Natural Sciences with Lab.

004:012 Principles of Chemistry II 4 s.h.
Continuation of 004:011; colligative properties of solutions, chemical thermodynamics, electrochemistry, chemical kinetics, chemical bonding, aspects of industrial chemistry, nuclear chemistry; lecture, discussion, laboratory. Prerequisites: 004:011. GE: Natural Sciences with Lab.

004:016 Principles of Chemistry Laboratory 2 s.h.
Laboratory techniques. Requirements: grades of C or higher in 004:018 and 004:019. GE: Natural Sciences Lab Only.

004:018 Chemical Science I 3 s.h.

004:019 Chemical Science II 3 s.h.

004:020 Chemical Science Laboratory 2 s.h.
004:021 Basic Measurement 3 s.h.
Continuation of 004:012; techniques of data collection and processing, including titrimetric and instrumental techniques for data collection and computer techniques for data processing. Prerequisites: 004:012 or 004:020. Requirements: chemistry major.

004:029 First-Year Seminar 1-2 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.

004:111 Analytical Chemistry I 3 s.h.
Modern theory and practice; emphasis on chemical equilibria (acid-base chemistry, solubility, complexation) and electroanalytical chemistry (potentiometry, voltammetry, coulometry). Corequisites: 004:131 or 004:132, if not taken as a prerequisite.

004:112 Analytical Chemistry II 3 s.h.
Continuation of 004:111; emphasis on instrumental methods, including atomic and molecular spectroscopy, mass spectrometry, chemical separations. Prerequisites: 004:111.

004:121 Organic Chemistry I 3 s.h.
Carbon-containing compounds; structure, stereochemistry, physical properties, reactivity, reaction mechanisms, synthesis; emphasis on alkanes, alkenes, alkynes, alcohols, alkyl halides, aromatics. Prerequisites: 004:012 or 004:019.

004:122 Organic Chemistry II 3 s.h.
Continuation of 004:121; use of spectroscopic techniques to determine chemical structures; chemistry of carbonyl compounds, amines, ethers, amino acids, carbohydrates, nucleosides. Prerequisites: 004:121.

004:123 Organic Chemistry I for Majors 3 s.h.
Carbon-containing compounds; structure, stereochemistry, physical properties, reactivity, reaction mechanisms, synthesis; emphasis on alkanes, alkenes, alkynes, alcohols, alkyl halides, aromatics. Prerequisites: 004:012 or 004:019. Requirements: chemistry, biochemistry, or chemical engineering major.

004:124 Organic Chemistry II for Majors 3 s.h.
Continuation of 004:123; use of spectroscopic techniques to determine chemical structures; chemistry of carbonyl compounds, amines, ethers, amino acids, carbohydrates, and nucleosides. Prerequisites: 004:121 or 004:123. Requirements: chemistry, biochemistry, or chemical engineering major.

004:125 Inorganic Chemistry 2-3 s.h.
Modern principles; emphasis on descriptive chemistry of the main group and transition elements, ionic and covalent chemical bonding theories, symmetry, inorganic stereochemistry. Prerequisites: 004:012 or 004:019. Corequisites: 004:122 or 004:124.

004:131 Physical Chemistry I 3 s.h.
Chemical thermodynamics and its application to chemical equilibria, phase changes and chemical equilibria; ideal and real gases; kinetic theory; surface absorption and electrochemistry; thermodynamics. Prerequisites: 004:012 or 004:019, 029:012 or 029:082, and 22M:026 or 22M:032.

004:132 Physical Chemistry II 3 s.h.
Quantum mechanics and its application to atomic and molecular structure; determination of structure and bonding by various spectroscopic methods; chemical kinetics. Prerequisites: 004:012 or 004:019, 029:012 or 029:082, and 22M:026 or 22M:032.

</tbody>
</table>
004:180 Introduction to Molecular Modeling
3 s.h.
Theory and application of ab initio quantum mechanics, semiempirical molecular orbital theory, and molecular mechanics force fields to chemical research problems; underlying theory of these methods (with emphasis on ab initio theory) and their practical application to chemical problems; computational chemistry projects using modeling software. Prerequisites: 004:131. Corequisites: 004:132, if not taken as a prerequisite.

004:191 Graduate Chemistry Orientation
2 s.h.
Pedagogy, safety and research issues relevant to advanced chemistry careers. Requirements: senior standing.

Primarily for Graduate Students

004:192 Ethics in Chemical Sciences
1 s.h.
Scholarly integrity for being a responsible chemist on graduate-level research; introduction to infrastructure of scientific scholarship with emphasis on interacting with peers, funding agencies, industrial entities; responsible conduct in research in the context of creation of knowledge, dissemination of scientific findings, intellectual property, and conflict of interest; workshops to study cases in chemical research to illustrate the principles of scholarly integrity.

004:201 Special Topics in Inorganic Chemistry
1-3 s.h.
Repeatable. Prerequisites: 004:170.

004:202 Coordination Chemistry and Spectroscopy
1,3 s.h.
Structure and bonding of d-block metal complexes, theory and application of relevant spectroscopic methods, inorganic reaction mechanisms, transition metals in catalysis. Prerequisites: 004:170.

004:203 Organometallic Chemistry
2-3 s.h.
Emphasis on organometallic compounds of transition metal elements. Prerequisites: 004:170.

004:204 Physical Methods in Inorganic Chemistry
3 s.h.
Application of physical methods to problems; recent developments; emphasis on magnetic resonance spectroscopy. Prerequisites: 004:170.

004:205 Bioinorganic Chemistry
2-3 s.h.
The role of metal ions in biology from an inorganic chemical perspective; emphasis on structure and mechanism for transition metal-containing metallo-enzymes.

004:206 Solid-State and Materials Chemistry
3 s.h.
Introduction to the chemical concepts of solid-state chemistry; focus on synthesis and characterization of various inorganic materials; structure/property relationships, real-world examples. Prerequisites: 004:170.

004:207 Electrochemistry
2-3 s.h.
Fundamental aspects, including mass transport and electron transfer, electrochemical methodology (e.g., voltammetry and potentiometry), determination of homogeneous and heterogeneous reaction mechanisms. Prerequisites: 004:111, 004:112, and 004:171.

004:208 Spectroscopy
3 s.h.
Principles of atomic and molecular absorption and emission spectroscopy in ultraviolet, visible, and infrared regions of the spectrum, including fluorescence, phosphorescence, Raman spectroscopy; applications to analytical problems, with emphasis on modern instrumentation and methodology. Prerequisites: 004:111, 004:112, and 004:171.

004:209 Separations
3 s.h.
Separation science; emphasis on gas and liquid chromatography, including mobile and stationary phases, instrumentation, detection, applications and sheet method, supercritical fluid chromatography, capillary electrophoresis, solid phase extraction techniques. Prerequisites: 004:111, 004:112, and 004:171.
004:210 Chemical Sensors 2 s.h.
Theory, practical limitations, analytical utility based on immobilized reagents with electrochemical, thermal, optical transduction mechanisms. Prerequisites: 004:111 and 004:112, or 004:171.

004:213 Special Topics in Analytical Chemistry arr.
Content varies. Repeatable.

004:214 Chemical Systems Modeling 2 s.h.
Basic processes and techniques; these methods applied to systems relevant to students' own research. Prerequisites: 004:111 or 004:112 or 004:171.

004:215 Biophotonics 3 s.h.
Structure, dynamics of biomolecules and their optical spectroscopy; ultrasensitive fluorescence spectroscopy, vibrational spectroscopy, optical activity and circular dichroism, time-resolved spectroscopy. Prerequisites: 004:111, 004:112, and 004:171.

004:218 Nanomaterials 3 s.h.
Basic principles associated with nanoscience and nanotechnology; fabrication and synthesis, size dependent properties, characterization, applications of materials at nanometer length scales, recent technological breakthroughs in the field. Requirements: graduate standing or advanced undergraduate standing in engineering and science. Recommendations: knowledge of basic chemistry.

004:220 Electrochemistry of Polymer Films 1 s.h.
Use of electrochemical methods to characterize polymer and thin films; transport through polymer films and composites, electrochemistry of polymer films. Requirements: physical chemistry course.

004:221 Spectroscopic Methods in Organic Chemistry 3-4 s.h.
Methods and techniques of structure determination for organic compounds. Prerequisites: 004:172.

004:225 Organic Chemistry Special Topics 1,3 s.h.
Prerequisites: 004:172.

004:226 Organic Reactions 3 s.h.
Survey of organic reactions used in contemporary organic synthesis; emphasis on C-C bond forming reactions, functional group interconversions, oxidations and reductions; mechanistic details of reaction types; innovations in catalytic and asymmetric organic reactions. Prerequisites: 004:172.

004:228 Mechanisms of Organic Reactions 3 s.h.
Application of basic mechanistic concepts.

004:229 Advanced Organic Synthesis 3 s.h.
Preparation of complex organic compounds. Prerequisites: 004:172.

004:231 Statistical Thermodynamics I 3 s.h.
Fundamentals of classical thermodynamics and equilibria; ensembles; noninteracting systems; theory of phase transitions; Monte-Carlo methods; classical fluids; nonequilibrium systems. Prerequisites: 004:131.

004:233 Quantum and Computational Chemistry 3 s.h.
Fundamental principles of quantum chemistry; angular momentum; approximation methods; theory of atomic and molecular electronic structure; applications of computational quantum mechanics to chemical systems. Corequisites: 004:132, if not taken as a prerequisite. Recommendations: 004:180.

004:234 Molecular Spectroscopy 3 s.h.
Quantum mechanical theory of molecular spectroscopy; time-dependent perturbation theory, selection rules, lineshapes; selected applications in microwave, vibrational (infrared and Raman), electronic, optical, and magnetic resonance spectroscopy. Prerequisites: 004:233.
004:235 Chemical Kinetics  3 s.h.
Potential energy surfaces, transition state theory, diffusion limited rates, linear free energy relationships, isotope effects, solvent effects, RRKM theory; connection between experiment and various theories in the gas and solution phases; emphasis on assignment of experimental error to derived quantities. Prerequisites: 004:132.

004:238 Surface Chemistry and Heterogeneous Processes  3 s.h.
Fundamental and applied aspects of surface chemical processes; theories of molecular adsorption/desorption and surface complexation; kinetics; surface analysis and instrumentation; applications of surface chemistry in heterogeneous catalysis, heterogeneous environmental/atmospheric processes, and materials chemistry. Repeatable. Prerequisites: 004:131.

004:242 Physical Chemistry Topics  1-3 s.h.
Advanced topics relevant to modern physical chemistry. Repeatable. Prerequisites: 004:132 and 22M:026.

004:250 Chemometrics  3 s.h.
Mathematical, statistical, and signal processing methods for analytical chemistry; hypothesis testing, experimental design, model building, optimization, digital filtering. Prerequisites: 004:171.

004:275 Perspectives in Biocatalysis  1-3 s.h.
Applied enzymology, protein design, structure-activity relationships, biosensor technology, microbial transformations, biodegradation of environmental pollutants. Repeatable. Requirements: graduate standing in a participating department supported by the Predoctoral Training Program in Biotechnology. Same as 046:275, 052:275, 053:275, 061:275, 099:275.

004:283 Seminar: Inorganic Chemistry  0-1 s.h.
Repeatable.

004:285 Seminar: Organic Chemistry  0-1 s.h.
Repeatable.

004:286 Seminar: Physical and Environmental Chemistry  0-1 s.h.
Repeatable.

004:287 Research Frontiers in Chemistry  1 s.h.
Repeatable.

004:290 Research in Chemistry  arr.
Thesis work for advanced degrees. Repeatable.

004:291 Research Seminar  0-1 s.h.
Presentation and discussion of thesis research for advanced degrees. Repeatable.
Cinema and Comparative Literature

Interim chair
Russell Ganim

Professors
Rick Altman, Cinzia Blum (French and Italian/Cinema and Comparative Literature), Cheryl Herr (English/Cinema and Comparative Literature), Robert Ketterer (Classics/Cinema and Comparative Literature), Christopher Merrill (English/Cinema and Comparative Literature), Lauren Rabinovitz (American Studies/Cinema and Comparative Literature), Steven Ungar (French and Italian/Cinema and Comparative Literature), Russell Valentino (Asian and Slavic Languages and Literatures/Cinema and Comparative Literature)

Professors emeriti
Rudolf Kuenzli (English/Cinema and Comparative Literature), Franklin Miller, Leighton Pierce

Associate professors
Paula Amad, Corey Creekmur (English/Cinema and Comparative Literature), Brian Gollnick (Spanish and Portuguese/Cinema and Comparative Literature), Sabine Götz, Kathleen Newman (Spanish and Portuguese/Cinema and Comparative Literature), Astrid Oesmann (German/Cinema and Comparative Literature), Maureen Robertson (Asian and Slavic Languages and Literatures/Cinema and Comparative Literature), Rosemarie Scullion (French and Italian/Women’s Studies/Cinema and Comparative Literature), Sasha Waters Freyer (Gender, Women’s, and Sexuality Studies/Cinema and Comparative Literature), David Wittenberg (English/Cinema and Comparative Literature)

Assistant professors
Steve Choe, Andrew Hulse

Adjunct assistant professors
Anna Barker, Natasa Durovicova, Kathleen Edwards, John Merchant

Adjunct assistant professor emerita
Sandra Barkan

Undergraduate degrees: B.A. in Cinema, B.A. in Comparative Literature
Undergraduate nondegree programs: Minor in Cinema, Minor in Comparative Literature
Graduate degrees: M.A., Ph.D. in Comparative Literature; M.F.A. in Translation; M.F.A. in Film and Video Production; M.A., Ph.D. in Film Studies
Web site: http://ccl.clas.uiowa.edu

The Department of Cinema and Comparative Literature presents film, literature, translation, and relations with the other arts as subjects of international and interdisciplinary study. It provides a basis for intensive work in literature, literary theory, critical methods, film studies, and the production of literary translations and film, video, and digital arts.

The department encourages study in comparative arts, with particular emphasis on cinema, where the program’s resources are especially strong. Students and faculty members have easy access to the resources of the International Writing Program and the Institute for Cinema and Culture.

The cinema and comparative literature faculty offers expertise in the languages and cultural study of the Americas, China, Croatia, England, France, Germany, India, Ireland, Italy, Japan, Russia, Spain, and Sub-Saharan Africa. Specific expertise and direction are available in translation and in film and audiovisual history, production, and theory.

In addition to its own faculty, the department calls on faculty members in other disciplines, including American studies, Asian and Slavic languages and literatures, classics, communication studies, English, French and Italian, German, history, Spanish and Portuguese, theatre arts, and women’s studies.

Undergraduate Programs

• Major in cinema (Bachelor of Arts)
• Major in comparative literature (Bachelor of Arts)
• Minor in cinema
• Minor in comparative literature

The majors in cinema and in comparative literature provide individualized programs in the interdisciplinary study of literature and the study and production of film and audiovisual arts. The program is designed to promote cultural awareness, to increase speaking and writing skills, and to develop capacities for systematic reasoning.

Bachelor of Arts: Cinema

The Bachelor of Arts with a major in cinema requires a minimum of 120 s.h., including 34 s.h. of work for the major. Students must complete 21 s.h. in University of Iowa course work and may count a maximum of 6 s.h. of course work from another major, minor, or certificate toward the major in cinema. Students with a double major in cinema and in comparative literature may count a maximum of 12 s.h. toward both majors. All students must complete the College of Liberal
Arts and Sciences General Education Program (p. 381).

The major in cinema is an individualized, interdisciplinary study of film and the production of creative work in film, video, and interactive multimedia. It is designed to promote cultural and artistic awareness, to increase speaking and writing skills, and to develop capacities for systematic reasoning and effective production in cinema arts.

All students are expected to gain a perspective on both the study and the production of film, video, or digital media while becoming acquainted with the historical, critical, and theoretical issues of the area. In conjunction with an appropriate overall curriculum, the major in cinema can offer effective preparation for continuing study or creative work in the humanities, arts, and cinema; provide a solid foundation for careers in film, video, television, and digital production; and lead to careers in arts administration, advertising, and business.

The major in cinema requires the following course work.

All of these:

- 048:001 Introduction to Film Analysis 4 s.h.
- 048:025 Introduction to Critical Reading and Viewing 3 s.h.
- 048:034 Modes of Film and Video Production 4 s.h.
- 048:095 Undergraduate Seminar 3 s.h.

One of these:

- 048:030 Introduction to Film Theory 3 s.h.
- 048:100 Introduction to Criticism and Theory 3 s.h.
- 048:120 Issues in Film Theory 3 s.h.

All of these:

- At least one film studies or film production course at the 100 level 3 s.h.
- Additional cinema and comparative literature course work, including at least 9 s.h. of advanced film studies or film and video production courses numbered 048:051 or above 14 s.h.

Bachelor of Arts: Comparative Literature

The Bachelor of Arts with a major in comparative literature requires a minimum of 120 s.h., including 33 s.h. of work for the major. Students must complete 21 s.h. in University of Iowa course work and may count a maximum of 6 s.h. of course work from another major, minor, or certificate toward the major in comparative literature. Students with a double major in cinema and in comparative literature may count a maximum of 12 s.h. toward both majors. All students must complete the College of Liberal Arts and Sciences General Education Program (p. 381).

The major offers two tracks: language and literature, and literature and arts. Students work with faculty advisors close to their track to develop coherent, individualized programs of study that reflect their interests and developing skills.

Students share a common set of basic courses in the literatures of widely divergent cultures and historical periods, in translation, and in interaction among the arts. All students are expected to gain an international perspective on literature and the arts and to become acquainted with interdisciplinary approaches to cultural study.

The successful pursuit of comparative literature requires study of at least one foreign cultural tradition, with appropriate emphasis on language, literature, and the arts in historical context. Familiarity with the literatures and cultures of other nations goes hand-in-hand with theoretical inquiry and reflection on basic issues, such as the nature and value of storytelling in literature and other arts—for instance, film, song, and painting. Translation between languages and among different arts represents another basic center of theory and practice. Individual courses of study may extend into other disciplines, including history, philosophy, linguistics, anthropology, law, and psychology.

In conjunction with an appropriate overall curriculum, the major in comparative literature can offer effective preparation for professional studies in fields such as law and business, or for employment in fields that value critical thinking and international understanding. It also offers excellent preparation for graduate work in the humanities.

The major in comparative literature requires the following course work.

COMMON COURSES

All students take these, for a total of 18 s.h.

- 048:025 Introduction to Critical Reading and Viewing 3 s.h.
- 048:040-048:041 Literary Classics and Film Adaptation - World Literature and World Film 6 s.h.
- 048:095 Undergraduate Seminar 3 s.h.
**048:100 Introduction to Criticism and Theory**  
3 s.h.

Comparative literature elective(s) numbered above 048:050  
3 s.h.

**Tracks**

Students take a total of 15 s.h. of work in one track.

**LITERATURE AND ARTS TRACK**

To complete this track, students take 12 s.h. of advanced work (100-level or above) in a single fine arts area. They may count one course in advanced performance, practice, or production toward the major, with consent of the director of undergraduate studies.

One additional 3 s.h. course must focus explicitly on arts and literature in comparative perspective.

**WORLD LANGUAGES AND LITERATURE TRACK**

To complete this track, students take 9 s.h. of courses in one foreign literature, read in the original language. One course in composition and conversation may count toward the major. (Language courses taken to complete the General Education Program do not count toward the major.)

Students take an additional 6 s.h. of course work in cinema and comparative literature or a related area (e.g., English and American literature, film, linguistics, anthropology, philosophy, history) or in a second foreign literature.

**Four-Year Graduation Plan**

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

**Bachelor of Arts: Cinema**

Note: The major in cinema requires only one course in film, video, and digital production: 048:034 Modes of Film and Video Production. This is the only production course included in the assurances of the Four-Year Graduation Plan. More advanced courses in production may be used to complete the major, but admission to these courses is limited and depends on student achievement in prerequisite production courses.

**Before the third semester begins:** at least one-quarter of the semester hours required for graduation

**Before the fifth semester begins:** at least two courses in the major (including 048:001 Introduction to Film Analysis, and 048:025 Introduction to Critical Reading and Viewing or 048:034 Modes of Film and Video Production) and at least half of the semester hours required for graduation

**Before the seventh semester begins:** at least six courses in the major (including 048:001 Introduction to Film Analysis, 048:025 Introduction to Critical Reading and Viewing, and 048:034 Modes of Film and Video Production), and at least three-quarters of the semester hours required for graduation

**Before the eighth semester begins:** at least nine courses in the major

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

**Bachelor of Arts: Comparative Literature**

Note: Because the major in comparative literature may require competency in a language in which the student will take advanced work, the student may need to acquire this language competency through course work early in the plan. Such course work is not reflected in these checkpoints.

**Before the third semester begins:** at least one-quarter of the semester hours required for graduation

**Before the fifth semester begins:** at least two courses in the major and at least one-half of the semester hours required for graduation

**Before the seventh semester begins:** at least six courses in the major and at least three-quarters of the semester hours required for graduation

**Before the eighth semester begins:** at least nine courses in the major

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

**Honors**

To graduate with honors in cinema or comparative literature, students must complete an honors thesis. They also must be members of the University of Iowa Honors Program, which requires that students maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University of Iowa Honors Program for more information).
Once an honors student has completed 75 s.h., he or she submits a written proposal for the honors thesis. The proposal must be approved by the supervising faculty member who heads the student’s honors thesis committee, which must be composed of at least two faculty members from the Department of Cinema and Comparative Literature. The student must complete the honors thesis over the next two consecutive semesters. For specific honors thesis requirements in film and video production, film studies, or comparative literature, contact the Department of Cinema and Comparative Literature.

**Minor in Cinema**

The minor in cinema requires 15 s.h. of University of Iowa cinema courses, including at least 12 s.h. in courses numbered 048:051 and above. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass. Students must choose courses with a primary emphasis in cinema. Contact the Department of Cinema and Comparative Literature for a list of approved courses.

**Minor in Comparative Literature**

The minor in comparative literature requires 15 s.h. of University of Iowa comparative literature courses, including at least 12 s.h. in courses numbered 048:040 and above. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass. Students must choose courses with a primary emphasis in comparative literature. Contact the Department of Cinema and Comparative Literature for a list of approved courses.

**Graduate Programs**

- Master of Arts and Doctor of Philosophy in film studies
- Master of Arts and Doctor of Philosophy in comparative literature
- Master of Fine Arts in film and video production
- Master of Fine Arts in translation

Admission to the Master of Arts degree in comparative literature is suspended; for degree requirements, see the 2010-11 General Catalog.

**Master of Arts: Film Studies**

The Master of Arts degree in film studies requires 36 s.h. of graduate credit. The focus is on film in an international context, with required distributions of course work in U.S. cinema, European cinema, world cinemas, and film production, documentary film, animation, or experimental film.

Students meet formal degree requirements with course work and a written examination on two areas, which the student selects from one list focusing on film theory and another list focusing on film history. Exams are offered annually in January.

**Master of Arts: Comparative Literature**

Admission to the Master of Arts degree in comparative literature is suspended; for degree requirements, see the 2010-11 General Catalog.

**Master of Fine Arts: Film and Video Production**

The Master of Fine Arts degree in film and video production requires 54 s.h. of graduate credit earned in creative and scholarly course work aimed at producing a body of artistic work in film and/or video. A comprehensive exam on an aspect of film and/or video theory in January of the second year, an oral portfolio review, a thesis paper, and a creative thesis project complete the formal degree requirements.

**Master of Fine Arts: Translation**

The Master of Fine Arts degree in translation requires 48 s.h. of graduate credit, which must include 24 s.h. earned at The University of Iowa. The program promotes a specialized form of writing, the study of languages and cultures, and the dissemination of international literatures through a curriculum that combines the creative, linguistic, and critical aspects of translation.

Students develop their skills, knowledge, and critical ability with courses in original-language literary texts, critical theory, and creative writing. Required participation in the Iowa Translation Workshop provides hands-on practice in translation every semester. Students also have opportunities to work closely on translation projects with visiting writers in the International Writing Program.

Course work includes study of foreign literature(s), creative writing, translation studies, and criticism. M.F.A. students may expect to take courses offered by foreign language departments and the creative writing programs as well as comparative literature courses.

M.F.A. students must complete a thesis—usually a book-length collection of poems, literary essays, or stories, or a short novel—translated from the
original language into English and accompanied by a critical introduction.

Admission to the program is granted on the basis of a submitted portfolio, including translations into English and original writing in English, or a paper on a literary topic, as well as supporting evidence of competence.

Doctor of Philosophy: Film Studies

The Doctor of Philosophy degree in film studies requires a minimum of 72 s.h. of graduate credit earned in course work concentrated in film history and film theory. With the consultation and guidance of a faculty committee, students prepare for a qualifying examination in the first or second year, formulate and pursue a plan of study proposing areas to be mastered before the dissertation, present a predissertation exam on these areas, and write a dissertation in the area of advanced research.

Doctor of Philosophy: Comparative Literature

The Doctor of Philosophy degree in comparative literature requires a minimum of 72 s.h. of graduate credit. Students study at least three literatures, one in historical depth and two others in limited areas of specialization, and are encouraged to include an interdisciplinary area of concentration. All students devote a portion of their programs to comparative study, bringing the several areas into focus. Specific areas and interrelations of areas are determined by the student in consultation with appropriate faculty members.

The Ph.D. dissertation should demonstrate the candidate’s ability to write a substantial piece of scholarship or criticism. Translation of a work of sufficient significance and linguistic complexity, preceded by a critical introduction, may serve as an acceptable dissertation. The final oral exam centers on the dissertation and its background.

Admission

The study of literature across linguistic and geographical borders calls for training in languages. A thorough knowledge of at least one foreign language is required for admission to the M.A. program; knowledge of at least two foreign languages is a prerequisite for Ph.D. study.

For more information, see the procedural guide for graduate students in comparative literature, available from the department.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate (p. 1117) College section of the Catalog.

Resources

Institute for Cinema and Culture

The Institute for Cinema and Culture promotes international film culture on the University of Iowa campus by supplementing the curriculum of the Department of Cinema and Comparative Literature with regular film screenings and public events, often in collaboration with other departments and programs. The institute helps departments, faculty members, and student groups present films and relevant speakers to an interdisciplinary audience. It is especially dedicated to providing Iowa students and faculty members the opportunity to view and study important films from nations and cultures otherwise underrepresented in course offerings and at local theaters.

Each semester the institute offers 048:112 Proseminar in Cinema and Culture, a course with public screenings devoted to a single national cinema or a focused topic in world film. It also regularly sponsors a range of campus film festivals and hosts the Cinematheque series, which showcases rare and unusual films each semester.

Iowa Translation Workshop

The Iowa Translation Workshop (048:260) is offered every semester as a required course for M.F.A. students in translation. The workshop is closely coordinated with the International Writing Program, which brings 30 or more writers from other countries to Iowa City each fall semester for 10 weeks of activities on the University of Iowa campus. Students in the fall Iowa Translation Workshop may work closely with one or more writers in translating their works into English. Translators from outside the M.F.A. in translation program also may join the workshop, with the instructor’s consent.

Courses

048:001 Introduction to Film Analysis 4 s.h.

Formal analysis of film; narrative cinema and approaches to narrative structure; authorship and genre issues, other major topics.
048:002 Survey of Film  3 s.h.
Film history, theory, criticism; issues of form, technologies, and cultural functions of cinema; screenings of narrative, documentary, experimental films from varied periods and nations. GE: Literary, Visual, and Performing Arts.

048:005 Introduction to World Literature  3 s.h.
Ways of reading world literature; varied emphases (i.e., thematic, geographical; may include poetry, short fiction, drama, novels, and critical works on importance of translation. Requirements: completion of rhetoric General Education requirement.

048:010 Contemporary Cinema  3 s.h.
Current cinema; key genres, movements, filmmakers, technological changes; recent cultural contexts, industrial and economic factors, changes in the film viewing experience. GE: Literary, Visual, and Performing Arts.

048:011 Films and Screenplays  3 s.h.
Films and their origins in original screenplays or adaptations; the screenplay as a distinct form of creative writing.

048:017 Workshop in Literary Magazine Publishing  1 s.h.
Hands-on introduction to literary magazine publishing; major differences between print and digital publishing, the processes of design, layout, soliciting work, editing copy, proofing, promotion, and distribution; University of Iowa and Iowa City community resources; editors and writers share their expertise through a series of informal question-and-answer sessions and task-based assignments.

048:018 Workshop in Literary Review Writing  1 s.h.
Hands-on introduction to literary review; process of selecting books (poetry, fiction, creative nonfiction) for review; writing, revising, and submission of work; University of Iowa and Iowa City community resources; editors and writers share their expertise through a series of informal question-and-answer sessions and task-based assignments.

048:019 Media Matters  3 s.h.
Development of basic creative and critical skills in the arts and humanities by examining transformations across literature, poetry, photography, and video; media of expression; telling a story in words or images; the difference between looking at a painting, watching a movie, or reading a book; how the soundtrack of a film affects the story; how looking at a musical score differs from performing it; key to producing exciting creative work; full engagement with any given medium.

048:020 U.S. Film  3 s.h.
American film industry; social and artistic perspectives.

048:021 Introduction to European Film  3 s.h.
Major works, movements, and recent developments in European cinema; German Expressionism, Soviet montage, Italian Neorealism, French New Wave; social, cultural, political contexts. GE: Literary, Visual, and Performing Arts.

048:022 World Film  3 s.h.
Filmmaking and film culture outside the United States; key works from Asia, Africa, the Middle East, Latin America; social, cultural, political contexts.

048:023 Documentary Film  3 s.h.
Key works and movements in international nonfiction film, from early cinema to present; formal, historical, philosophical issues in documentary practices.

048:024 Introduction to Latin American Film  3 s.h.
Introduction to filmmaking and films in Latin America through an overview, emphasis on one or more Latin American countries, or a specific theme in Latin American cinema.
048:025 Introduction to Critical Reading and Viewing 3 s.h.
Critical approaches to literature and audiovisual media (film, video, interactive multimedia); selected texts, scholarly and critical responses to them. Requirements: completion of rhetoric requirement.

048:026 Introduction to Asian Film 3 s.h.
Introduction to filmmaking and films in Asia through an overview, emphasis on one or more Asian countries, or a specific theme in Asian cinema.

048:029 First-Year Seminar 1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities, field trips). Requirements: first- or second-semester standing.

048:030 Introduction to Film Theory 3 s.h.
Classical film theory--formalist and realist theories, authorship, genre; contemporary film theory--semiotics, feminism, psychoanalysis, ideological criticism, postmodernism, queer theory.

048:034 Modes of Film and Video Production 4 s.h.
Introduction to nonfiction, fiction, and experimental modes of film and video production; video exercises and nonlinear editing.

048:040 Literary Classics and Film Adaptation 3 s.h.
Reading, analysis of major literary texts from writing’s origins to 1600 in the Mediterranean, Asia, Africa; interrelationship of literature and history. GE: Literary, Visual, and Performing Arts.

048:041 World Literature and World Film 3 s.h.
Reading and analysis of major literary texts from the 17th century to the present, in chronological sequence; emphasis on interrelationship of literature and history. Requirements: completion of rhetoric requirement. GE: Literary, Visual, and Performing Arts.

048:050 Introduction: East European and Central Asian Cultures 3 s.h.
Introduction to study of major East European, Russian, and Eurasian cultures. Same as 187:050.

048:051 Film Criticism 3 s.h.
Evaluation and analysis of film, from journalistic reviews to academic scholarship; principles and theoretical positions.

048:052 Gender and Film 3 s.h.
Representations of femininity, masculinity, sexual identity, how they relate to society, culture; examples from feminist, psychoanalytic, queer theory.

048:053 Introduction to Film Sound 3 s.h.
Sound as an acoustic, technological, aesthetic, and historical issue; functions of voice, music, sound effects.

048:062 Disney in America 3 s.h.
How Walt Disney Corporation has influenced American cultural values, ideals, and experiences through its evolution from an animation company in the 1920s, to a theme park company and television producer in the 1950s, to a media conglomerate today; the corporation’s national importance, Hollywood’s contributions to the Depression and World War II, postwar urban and community planning, America’s changing leisure behavior, advertising and childhood, modern business history, and exportation of American culture. Same as 045:065.
048:063 Film/Video Production: Microcinemas and DIY Distribution
Nature and practice of film festivals; microcinemas and small-scale distribution in historical context of cinema culture and as audience-building and outreach for independently produced films, video, and new media; management and orchestration of the annual Iowa City International Documentary Festival. Prerequisites: 048:034. Requirements: grade of C or higher in 048:034.

048:064 Film/Video Production: Alternative Forms
Hands-on workshops in alternative or innovative video/film practices and technologies; varied topics. Prerequisites: 048:034. Requirements: grade of C or higher in 048:034.

048:065 Film Production: Material of 16mm Film
Basic 16mm motion picture camera, editing, and sound techniques; individual and group exercises. Prerequisites: 048:034. Requirements: grade of C or higher in 048:034.

048:066 Video Production: Nonfiction
Single-camera shooting on location, with emphasis on editing; group exercises oriented to nonfiction forms. Prerequisites: 048:034. Requirements: grade of C or higher in 048:034.

048:067 Screenwriting: Long Form
Visualization, sequencing, dialog; preparation of treatment, screenplay for fiction film; script problems. Prerequisites: 048:034.

048:068 Video Production: Fiction
Development of fiction video making technique through group projects in the studio and on location, and nonlinear editing. Prerequisites: 048:034. Requirements: grade of C or higher in 048:034.

048:070 Styles and Genres
Major film types (musicals, science fiction, westerns, film noir) and their cultural significance.

048:071 Film Authors
A major director or comparison of directors; director's role in industrial and collaborative contexts, relations between biography and criticism, function of individual styles.

048:078 Undergraduate Translation Seminar
Translation studies for undergraduates; topics related to practice of literary translation.

048:079 Undergraduate Translation Workshop
Translation exercises, discussion of translation works in progress; alternative strategies for translation projects. Requirements: working knowledge of a language other than English. Same as 08W:079.

048:081 Film and Literature
Relationships among films, novels, plays, adaptations; shared and distinct formal elements of cinematic and literary texts, their cultural functions.

048:091 Internship
Opportunity to apply skills; faculty supervision, on or off campus. Requirements: cinema and comparative literature major.

048:095 Undergraduate Seminar
Focus on a significant text or critical problem. Requirements: junior or senior standing and cinema and comparative literature major.

048:098 Honors Tutorial

048:099 Individual Study

048:100 Introduction to Criticism and Theory
Critical approaches to the phenomenon of literature. Requirements: junior standing.

</table>
048:121 Film and Video Production: Selected Topics
Student productions focusing on a particular genre, issue, or process: 16mm, video, or audio, such as experimental film or video, collaborative projects, nonfiction, narrative, and so forth. Prerequisites: 048:064 or 048:065 or 048:066 or 048:068. Requirements: grade of C or higher in 048:064 or 048:065 or 048:066 or 048:068.

048:123 Film and Video Production: Image Design
Strategies, techniques, and technologies used in moving image production; emphasis on generic lighting practices, composition; short projects using film, videotape. Prerequisites: 048:064 or 048:065 or 048:066 or 048:068. Requirements: grade of C or higher in 048:064 or 048:065 or 048:066 or 048:068.

048:124 Film Production: Advanced 16mm Film
Processes and approaches to the short film; students produce a seven-minute, sync-sound project, including film shooting and digital editing. Prerequisites: 048:065 or 048:121 or 048:123 or 048:134.

048:125 Screenwriting: Short Form
Exercises and projects in writing, developing, and workshopping screenplays for short film or video; budgeting, location scouting, other preproduction activities. Prerequisites: 048:065 or 048:066 or 048:067 or 048:068. Requirements: grade of C or higher in 048:065 or 048:066 or 048:067 or 048:068.

048:126 Cult Films of the Last Soviet Generation

048:127 Advanced Screenwriting
Write a feature screenplay (105-115 pages) within the industry standard contract guidelines for independent and studio projects; completion of outline, beat sheet, treatment, first draft, one rewrite. Prerequisites: 048:127.

048:128 Racial Narrative and American Performance

048:129 African American Cinema and Culture
African American contribution to U.S. cinema in context of African American and American culture. Same as 045:129.

048:130 Digital Production: Animation
Intermediate 3-D modeling, motion graphics; student projects culminating in CDR or video presentation. Prerequisites: 048:034.

048:131 Film/Video/Audio Production: Sound Design
Concepts and techniques in sound design for film and video; exercises, projects in sound/image relationships using location recording equipment and digital audio workstation for editing, mixing. Prerequisites: 048:063 or 048:064 or 048:065 or 048:066 or 048:068. Requirements: grade of C or higher in 048:063 or 048:064 or 048:065 or 048:066 or 048:068.

048:132 Video Production: Advanced Video
Exploration of boundaries between documentary and fictional forms, including 'mockumentary' and hybrid films; independent and small group video projects. Prerequisites: 048:064 or 048:066 or 048:068 or 048:121 or 048:123.

048:133 Film and Video Production: Editing
Editing digital video for impact, mood, and story; hands-on exercises, screenings, readings, and workshops using Avid editing software. Prerequisites: 048:065 or 048:066 or 048:068.

048:134 Theory and Practice of Film/Video Production
Focus on a type of film (documentary, animation, experimental) or an issue in film theory (sound, narrative structure, point of view); application of theoretical issues; individual productions.
048:135 Issues in Film and Video Production 3 s.h.
Proposal and grant writing, conceptualization, budgeting, and research on varied distribution models for independent films. Prerequisites: 048:063 or 048:064 or 048:065 or 048:066 or 048:067 or 048:068. Requirements: grade of C or higher in 048:063 or 048:064 or 048:065 or 048:066 or 048:067 or 048:068.

048:140 Chinese Literature: Poetry 3 s.h.
Readings in classical and modern Chinese poetry in English translation. Same as 039:141.

048:142 Modern Japanese Fiction in Translation 3 s.h.
Nineteenth century to present. Same as 39J:142.

048:143 Traditional Japanese Literature in Translation 3 s.h.
From seventh century to early modern times. Same as 39J:141.

048:144 The Tale of Genji 3 s.h.
Close reading in English of Murasaki Shikibu's Tale of Genji; tale's literary and social contexts, and later reception. Same as 39J:145.

048:147 Warriors Dreams 3 s.h.
Images of the warrior in traditional Japanese literature, from poetry of the eighth century to romances of the 19th century; readings in English. Same as 39J:146.

048:148 The Third Reich and Literature 3 s.h.
Nazi literature, literature of the Holocaust and the Opposition, exile literature, in English translation. Taught in English. GE: Values, Society, and Diversity. Same as 13E:118.

048:149 Tolstoy and Dostoevsky 3-4 s.h.
Tolstoy's War and Peace, Anna Karenina; Dostoevsky's Crime and Punishment, The Brothers Karamazov, and short stories. Taught in English. Same as 008:155, 041:155.

048:150 Media Production Workshop 1-4 s.h.
Individual film, video, interactive, or screenwriting project; common problems, screenings of work in progress, criticism. Requirements: grade of C or higher in two advanced production courses and acceptance by written proposal.

048:151 Literature and Anthropology 3 s.h.
Topics vary. Same as 008:151, 113:109.

048:152 America in Other Words 1-3 s.h.
Current idea of America in its imaginary form: post-1989 world fiction, poetry, and film in original language, in translation, and via online translation resources. Same as 181:152.

048:153 Latin American Studies Seminar 3 s.h.

048:154 Twentieth-Century Czech Authors 3 s.h.
Twentieth-century prose literature of Czechoslovakia; philosophical works of Capek, Hrabal, Kundera, Klima, Havel. Taught in English. Same as 041:168.

048:156 Invitation to Nabokov 3 s.h.
Nabokov's works and his writings on Russian literature. Same as 008:156, 041:156.
**048:157 Twentieth-Century Europe in Literature and Film**  
3 s.h.
Introduction to 20th-century Europe through representative literature and film that reflect and critically engage the period’s defining moments in social, cultural, and political history; modernity and emergence of modernist aesthetics, World War I, the Great Depression, the Spanish Civil War, struggles between fascism and communism, World War II, existentialism, the Holocaust, rise of postwar consumer society and technocracy, wars of decolonization, political dissonance in Cold War Eastern Europe, student revolts of the 1960s, fall of the Berlin Wall, collapse of the Soviet Union, postcolonial condition that binds Europe to its colonial history. Taught in English. Same as 009:157.

**048:158 East-West Literary Relations**  
3 s.h.

**048:159 African Literature Today**  
3 s.h.
Contemporary written and oral African literary texts, literary theories relevant to study of African literatures. Same as 008:159, 187:159.

**048:160 Issues in Rhetoric and Culture**  
3 s.h.
Rhetorical theory and criticism as culturally embedded practices; rhetorical production of selves and social difference; relationships between rhetoric and literature, philosophy, popular texts. Communication studies majors may apply this course to the following area requirement. AREA: Context. Requirements: (for 036:146) g.p.a. of at least 2.50, completion of Foundations of Communication requirement, and 6 s.h. of intermediate-level course work. Same as 036:146, 160:160.

**048:161 Transnational and Postcolonial Writing by Women**  
3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: Transnational Literature and Postcolonial Studies. PERIOD: 20th- and/or 21st-Century Literature. Same as 008:161.

**048:162 Pan-Caribbean Literary Currents**  
3 s.h.
Twentieth-century fiction, film, and cultural practices in the Hispanic, Francophone, and Anglophone Caribbean; cultural essays to complement literary readings; pan-Caribbean cultural practices--music and carnival celebrations. Taught in English. Requirements: (for 048:162) junior or senior standing; (for 035:171) two literature courses. Same as 035:171.

**048:163 Studies in 20th-Century European Literature**  
arr.
Evolving practices explored through genre, period, movement, or topic, in conjunction with relevant models of analysis; readings in English. Requirements: rhetoric.

**048:164 Topics in Russian, East European, and Eurasian Studies**  
arr.

**048:165 Topics in Polish Literature, Film, and Culture**  
3 s.h.
Major developments in Polish literature and culture; questions of Polish history, politics, and identity, and their expression in literature, the arts, and cinema; Poland’s place in Europe, in national and comparative contexts.

**048:166 Topics in Literature and Theory**  
3 s.h.

**048:167 Gender and Sexuality in French Cinema**  
3 s.h.
Cultural, historical, semiotic approach to studying construction of gender identity and sexual codes in French cinema from 1920s to present. Taught in English. Prerequisites: 009:111 or 048:001 or 048:002 or 131:010. Same as 009:148, 131:167.

**048:168 Post-Colonial Literature in France**  
3 s.h.
Literatures and cultures of Arabo-French (Beur) and Afro-French immigrations. Prerequisites: 009:111 and 009:112. Same as 009:168.

**048:169 Issues in Gender and Sexuality**  
3 s.h.
Significance of gender and/or sexuality to cinema, in general or in a period, genre, film type, or national cinema; theoretical approaches, including feminist and queer theory.
048:170 Topics in Cinema and Culture
One or more national cinemas in relation to social, historical, and cultural contexts. Prerequisites: 048:001.

048:171 Film Authors
A major director or comparison of directors; theoretical approaches to study of film authorship.

048:172 Narrative and the Cinema
English majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: 20th- and/or 21st-Century Literature. Same as 008:172.

048:173 Styles and Genres
Film types, their cultural significance.

048:174 Transnational Chinese Cinemas
Films from Mainland China, Hong Kong, Taiwan, and Chinese diasporic communities, silent era to present; relationship of film to nation-state, cultural interflows, media technologies, ideologies. English subtitles. Same as 039:173.

048:175 Topics in Film and Literature
English majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: 20th- and/or 21st-Century Literature. Same as 008:175.

048:177 Literature and Art
English majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: 18th- and/or 19th-Century Literature, or 20th- and/or 21st-Century Literature. Same as 008:177.

048:178 Topics in Latin American Cinema
Taught in English. Requirements: one Spanish literature or culture course numbered above 035:130 or one film studies course. Same as 035:191.

048:179 Literature and Society
English majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: 20th- and/or 21st-Century Literature. Same as 008:179.

048:180 Literature and Translation
Translation in the broadest sense; originality, authority, authorship, accuracy, ownership, audience; issues problematizing differences between medium and message. Same as 041:180, 160:180.

048:181 Introduction to Computer-Assisted Translation
Translation memory, terminology management, multimodal translation, and project management to increase proficiency in a range of technological skills; evolving translation technologies emphasize learning skills required to employ tools of today and effectively learn to use those of tomorrow; use of translation technology in freelance and agency settings from document receipt through delivery. Requirements: completion of General Education Program rhetoric and interpretation of literature requirements.

048:182 Topics in Global Cinema
Identification of new models and methods to investigate cinema’s relationship to current global issues beyond traditional scholarly focus in Western Europe and the United States; exploration of an emerging field, moving away from the paradigm of national cinema and bringing together shared theoretical frameworks while acknowledging different historical and cultural contexts. Same as 039:164, 218:160, 39J:162.

048:183 Modern Chinese Writers
Readings in modern and contemporary Chinese fiction; in English translation. Same as 039:180.
048:184 Topics in REEES  3 s.h.
Varied topics; interdisciplinary focus on Russian, East European, and Eurasian studies. Same as 187:185.

048:185 Global Women’s Cinema  3 s.h.
Introduction to contemporary women’s cinema and feminist filmmaking from around the world; emphasis on the post-1968 period and on cinema produced outside the United States. Prerequisites: 048:001 or 048:002 or 131:010. Same as 131:185.

048:186 Special Topics in Literature and History  3 s.h.
Topics at the intersection of literature, society, history, and ethics; readings vary.

048:187 Women and Nonfiction  3 s.h.
Issues of representation and self-representation by and about women through the study of documentary film and personal essay; focus on paired texts in literature and cinema for analysis and critical reflection; development along historical and transnational lines of inquiry to explore literary and cinematic depictions of racial and cultural identity; motherhood, friendship, and the family; women during wartime, violence against women, domestic and industrial women’s work. Requirements: junior or senior standing. Same as 131:186.

048:189 Russian Thinkers  3 s.h.

048:190 Chicano Cinema  3 s.h.
History of Chicano independent and industry film and television production since the Chicano political and cultural movement began in the 1960s. Taught in English. Requirements: one Spanish literature or culture course numbered 035:130 or above, or one film studies course numbered above 048:050. Same as 035:190.

048:191 Early Modern Culture  3 s.h.

048:192 East Meets West: A Cross-Cultural Course  3 s.h.
Perceptions in the modern period based on analyses of films, literary and philosophical texts from East and West. Same as 039:192.

048:195 Selected Authors  3 s.h.
Writings by one or more authors; close readings, literary theory.

048:196 Cuban American Literature and Culture  3 s.h.
Experiences of Cuban exiles in the United States; emergence of a literature and culture based on sense of dispossession, marginality, and memory of island past. Taught in English. Prerequisites: 08G:001. GE: Values, Society, and Diversity. Same as 035:143.

048:197 Techniques of Translation  3 s.h.
Prerequisites: 009:112. Same as 009:197.

048:198 Individual Study  arr.
Requirements: advanced B.A. enrollment with international and comparative literary projects, or M.A. enrollment in comparative literature.

048:200 Advanced Film/Video Production Workshop  1-4 s.h.
Individual film, video, interactive, or screenwriting project; common problems, screenings of work in progress, criticism. Prerequisites: 048:124 or 048:132.

048:205 International Translation Workshop  1-3 s.h.
International writers pair with University of Iowa translators to write new works of poetry and fiction in English; second-language fluency not required for international writers. Same as 181:205.

048:211 Comparative Stylistics  3 s.h.
Translation from English to French, including literary texts. Same as 009:210.

Undergraduate degrees: B.A. in Ancient Civilization, Classical Languages
Undergraduate nondegree programs: Minors in Ancient Civilization, Classical Languages, Greek, Latin; Postbaccalaureate Certificate in Classics
Graduate degrees: M.A. in Classics, Greek, Latin; Ph.D. in Classics
Web site: http://www.uiowa.edu/~classics

Classics is the study of ancient languages, literatures, and cultures of the Mediterranean basin from approximately 2000 B.C.E. to 600 C.E. It embraces three civilizations—the Minoan-Mycenaean, Greek, and Roman; two languages—Greek and Latin; and a geographical area including Europe, North Africa, Egypt, and the Near East. The Department of Classics provides a basis for understanding and interpreting the contribution of the ancient world to life in the present and the future.

Undergraduates in all majors may satisfy the World Languages requirement of the General Education Program (p. 381) with courses in Greek or Latin; see "Language for General Education" below. The department offers a substantial selection of courses taught in English at the undergraduate and graduate levels; several are approved for General Education. The department’s First-Year Seminar introduces entering undergraduates to classics.

The Department of Classics administers the University’s Medieval Studies Program, which offers an undergraduate certificate; see Medieval Studies (p. 567) in the Catalog.

Undergraduate Programs

• Major in ancient civilization (Bachelor of Arts)
• Major in classical languages (Bachelor of Arts)
• Minor in ancient civilization
• Minor in classical languages
• Minor in Greek
• Minor in Latin

The department’s undergraduate majors provide a solid foundation for graduate study in classics, European literature, law, history, art, philosophy, and religion. The major in classical languages offers concentrations in Greek and/or Latin. Bachelor of Arts graduates have become secondary school and university teachers, lawyers, doctors, librarians, museum curators, and bankers.

Bachelor of Arts: Ancient Civilization

The Bachelor of Arts with a major in ancient civilization requires a minimum of 120 s.h., including at least 30 s.h. of work for the major. The program is sponsored by the Departments of Classics, History, and Religious Studies and the School of Art and Art History. It concentrates on the ancient civilization of the Mediterranean world, draws on courses offered by various University departments, and allows students to create individual programs.

Although the major is not preparation for graduate study in classics, it provides a sound basis for preparing teachers at the secondary school and junior college levels. It also provides a sound liberal arts and sciences basis for preprofessional training in law, medicine, and other professions.

The major in ancient civilization requires the following course work. At least 15 of the required 30 s.h. must be earned in advanced work (20E courses at the 100 level, and Latin and Greek language courses numbered 20G:011 and 20G:012, or 20L:011 and 20L:012, or above). Transfer credit is evaluated on an individual basis. Students must complete the College of Liberal Arts and Sciences General Education Program (p. 381).

To comply with the Board of Regents, State of Iowa, policy on student outcomes assessment, the Department of Classics has established a method to assess the achievement level of B.A. students completing one of the department’s majors. Every student maintains a portfolio that details his or her progress in attaining the objectives of the major. The student submits the portfolio to the undergraduate advisor by midterm of the semester in which the student intends to graduate. Formal approval of the portfolio is required for graduation. Consult the undergraduate advisor for details.

Bachelor of Arts: Classical Languages

The Bachelor of Arts with a major in classical languages requires a minimum of 120 s.h., including at least 36 s.h. of work for the major. The program trains students to read the ancient Greek and/or Latin languages and acquaints them with the major works of Greek and/or Roman literature.

Students learn about the history of ancient Greece of the eighth through the fourth centuries B.C.E., where most of the modern Western notions of political, artistic, and social life are rooted. They also develop an understanding of the Roman Republic and Empire, when Rome established its hegemony over the Mediterranean basin, laid the foundation of law for the Western World, and spread Greece’s culture to the West.

The major in classical languages requires the following course work. Transfer credit is evaluated on an individual basis. Students must complete the College of Liberal Arts and Sciences General Education Program (p. 381).

Intermediate or advanced Greek and/or Latin courses (20G:011 through 20G:199, 20L:011 through 20L:199) 18 s.h.

Greek or Latin prose composition (20G:176 or 20L:171) 3 s.h.

Additional Department of Classics courses at any level, with no more than 9 s.h. in 20E courses 15 s.h.

The advanced undergraduate Greek courses 20G:120 Archaic and Classical Periods I and 20G:121 Archaic and Classical Periods II, and 20G:122 Classical and Hellenistic Periods I and 20G:123 Classical and Hellenistic Periods II are offered every other year and may be repeated or taken in any sequence. They cover a range of prose and poetry in historical context.

The advanced undergraduate Latin courses 20L:120 Latin Literature of the Republic I and 20L:121 Latin Literature of the Republic II, and 20L:122 Latin Literature of the Empire I and 20L:123 Latin Literature of the Empire II are offered every other year and may be repeated or taken in any sequence. They cover a range of Latin prose and poetry in historical context from the mid-Republic to the third century C.E.

To comply with the Board of Regents, State of Iowa, policy on student outcomes assessment, the Department of Classics has established a method to assess the achievement level of B.A. students completing one of the department’s majors. Every student maintains a portfolio that details his or her progress in attaining the objectives of the major. The student submits the portfolio to the undergraduate advisor by midterm of the semester in which the student intends to graduate. Formal approval of the portfolio is required for graduation. Consult the undergraduate advisor for details.

B.A. with Teacher Licensure

Students interested in teaching languages at the elementary and/or secondary level must complete the College of Education’s Teacher Education Program (TEP). Several courses in the College of Education and student teaching are required. Contact the Office of Education Services for details.

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

Bachelor of Arts: Ancient Civilization

Before the third semester begins: at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: at least two courses in the major and at least one-half of the semester hours required for graduation

Before the seventh semester begins: at least six courses in the major and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: at least eight courses in the major

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate
Bachelor of Arts: Classical Languages—Greek and Latin

Before the third semester begins: 20L:001 Elementary Latin I and 20L:002 Elementary Latin II, or 20G:001 Classical and New Testament Greek I and 20G:002 Classical and New Testament Greek II; and at least one-quarter of the semester hours required for graduation.

Before the seventh semester begins: sixth semester of Latin and fourth semester of Greek, or sixth semester of Greek and fourth semester of Latin, two more courses in the major, and at least three-quarters of the semester hours required for graduation.

Before the eighth semester begins: enrollment in at least two or three additional courses in the major.

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate.

Bachelor of Arts: Classical Languages—Latin Only

Before the third semester begins: 20L:001 Elementary Latin I, 20L:002 Elementary Latin II, and at least one-quarter of the semester hours required for graduation.

Before the fifth semester begins: 20L:011 World of Cicero, 20L:012 Golden Age of Roman Poetry, and at least one-half of the semester hours required for graduation.

Before the seventh semester begins: three or four more courses in the major and at least three-quarters of the semester hours required for graduation.

Before the eighth semester begins: two or three more courses in the major.

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate.

Honors

Honors students in classics must be members of the University of Iowa Honors Program, which requires that students maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University of Iowa Honors Program for more information). To graduate with honors in classics, students must maintain a g.p.a. of at least 3.50 in their first three years of classics courses. During their senior year, they must complete two courses in honors reading, one each semester of the year, earning 3 s.h. of credit for each course. The readings and discussions must be on an ancient author or a field in ancient history or literature chosen by students and the instructor. At the end of the second semester, students present a long paper, which is read and judged for honors by two members of the department. Students who write an honors thesis in classical languages must be enrolled at the same time in the appropriate advanced language courses.

Minor in Ancient Civilization

The minor in ancient civilization requires a minimum of 15 s.h., including at least 12 s.h. in advanced courses taken at The University of Iowa. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass. A maximum of 6 s.h. of work for another University of Iowa major, minor, or certificate and up to 3 s.h. of lower-level transfer credit may be counted toward the minor.

Department of Classics courses in Greek numbered 20G:011 Second-Year Greek I or above...
and in Latin numbered 20L:011 World of Cicero or above are considered advanced for the minor in ancient civilization. Appropriate courses in art, religion, history, and philosophy may be counted toward the minor in ancient civilization, if approved by the undergraduate advisor. Students who have taken high school Greek or Latin should consult the advisor.

**Minor in Classical Languages**

The minor in classical languages requires a minimum of 18 s.h., including 12 s.h. in advanced courses taken at The University of Iowa. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass. Students may count one relevant classics department course taught in English (prefix 20E) toward the minor. A maximum of 6 s.h. of work for another University of Iowa major, minor, or certificate and up to 3 s.h. of lower-level transfer credit may be counted toward the minor.

The sequences 20G:011 Second-Year Greek I and 20G:012 Second-Year Greek II, 20L:011 World of Cicero and 20L:012 Golden Age of Roman Poetry, and Department of Classics courses numbered 100 and above are considered advanced for the minor in classical languages. Students may satisfy the requirements for the minor by completing 20G:011 Second-Year Greek I and 20G:012 Second-Year Greek II, 20L:011 World of Cicero and 20L:012 Golden Age of Roman Poetry, plus two 100-level courses, one of which may be a relevant 20E course in Greek or Roman history, culture, or literature. For a list of relevant courses, contact the undergraduate advisor. Students who have taken high school Greek or Latin should consult the advisor.

**Minor in Greek**

The minor in Greek requires a minimum of 15 s.h., including at least 12 s.h. in advanced courses taken at The University of Iowa. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass. Students may count one relevant classics department course taught in English (prefix 20E) toward the minor. A maximum of 6 s.h. of work for another University of Iowa major, minor, or certificate and up to 3 s.h. of lower-level transfer credit may be counted toward the minor.

The sequence 20G:011 Second-Year Greek I and 20G:012 Second-Year Greek II, and Department of Classics courses numbered 100 and above are considered advanced for the minor in Greek. Students may satisfy the advanced courses requirement for the minor by completing 20G:011 Second-Year Greek I and 20G:012 Second-Year Greek II plus two 100-level courses, one of which may be a relevant 20E course in Greek history, culture, or literature. For a list of relevant courses, contact the undergraduate advisor. Students who have taken high school Greek should consult the advisor.

**Minor in Latin**

The minor in Latin requires a minimum of 15 s.h., including at least 12 s.h. in advanced courses taken at The University of Iowa. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass. Students may count one relevant classics department course taught in English (prefix 20E) toward the minor. A maximum of 6 s.h. of work for another University of Iowa major, minor, or certificate and up to 3 s.h. of lower-level transfer credit may be counted toward the minor.

The sequence 20L:011 World of Cicero and 20L:012 Golden Age of Roman Poetry, and Department of Classics courses numbered 100 and above are considered advanced for the minor in Latin. Students may satisfy the advanced courses requirement for the minor by completing 20L:011 World of Cicero and 20L:012 Golden Age of Roman Poetry plus two 100-level courses, one of which may be a relevant 20E course in Roman history, culture, or literature. For a list of relevant courses, contact the undergraduate advisor. Students who have taken high school Latin should consult the advisor.

**Language for General Education**

The Department of Classics offers course sequences in Greek and Latin that students in all majors may use to fulfill the World Languages requirement of the College of Liberal Arts and Sciences General Education Program (p. 381).

Students who have had previous course work or other experience with Greek or Latin should take the appropriate language placement test, which helps determine the level at which a student should begin Greek or Latin language study at The University of Iowa. The tests are offered during summer orientation programs and monthly by Evaluation and Examination Service.

**GREEK**

Students who wish to fulfill the General Education Program’s World Languages requirement with Greek should complete the following sequence:

- **20G:001 Classical and New Testament Greek I** 3-5 s.h.
- **20G:002 Classical and New Testament Greek II** 3-5 s.h.
20G:011 Second-Year Greek I 3 s.h.
20G:012 Second-Year Greek II 3 s.h.

LATIN

Students who wish to fulfill the General Education Program’s World Languages requirement with Latin should complete the following sequence.

20L:001 Elementary Latin I 3-5 s.h.
20L:002 Elementary Latin II 3-5 s.h.
20L:011 World of Cicero 3 s.h.
20L:012 Golden Age of Roman Poetry 3 s.h.

Some students may be able to substitute 20L:005 Accelerated Latin for 20L:001 and 20L:002 in the sequence above. Students who have taken 20L:001 and 20L:002 should not enroll in 20L:005.

Certificate in Medieval Studies

The Department of Classics administers the University’s Medieval Studies Program, which offers an undergraduate certificate; see Medieval Studies (p. 567) in the Catalog.

Postbaccalaureate Program

• Certificate in Classics

Certificate

The Postbaccalaureate Certificate in Classics requires 18 s.h. in Department of Classics courses numbered 100 and above (upper-level and graduate courses). The program is designed for students who have a bachelor's degree and would like further study in Greek and Latin in order to be competitive for admission to a graduate program in classics. Entry to most graduate programs requires study of both Latin and Greek, normally a minimum of three years in one language and two years in the other.

The certificate is designed to be completed in two semesters by students who enter with two years of Latin and one to two years of Greek, or vice versa. It requires 18 s.h. in Department of Classics courses numbered 100 or above (upper-level and graduate courses). At least 12 s.h. of the required credit must be earned in Greek and Latin language courses; the remaining 6 s.h. may be earned in approved advanced courses taught in English (prefix 20E). Transfer credit is not accepted toward the certificate. Students must maintain a g.p.a. of at least 3.00 to remain in good standing and complete the program.

A suggested plan of study for a student who enters the program with two years of Latin and one year of Greek is as follows.

Fall semester:

20E:198 Postbaccalaureate Seminar 0 s.h.
20G:011 Second-Year Greek I 3 s.h.
20L:120 Latin Literature of the Republic I 3 s.h.
20L:171 Elementary Latin Composition 3 s.h.

Spring semester:

20G:012 Second-Year Greek II 3 s.h.
20L:121 Latin Literature of the Republic II 3 s.h.
One elective with prefix 20E, 20G, or 20L numbered 100 or above 3 s.h.

A suggested plan of study for a student who enters the program with two years of Latin and two years of Greek is as follows.

Fall semester:

20E:198 Postbaccalaureate Seminar 0 s.h.
20G:120 Archaic and Classical Periods I 3 s.h.
20L:120 Latin Literature of the Republic I 3 s.h.
20L:171 Elementary Latin Composition 3 s.h.

Spring semester:

20G:121 Archaic and Classical Periods II 3 s.h.
20L:121 Latin Literature of the Republic II 3 s.h.
One elective with prefix 20E, 20G, or 20L numbered 100 or above 3 s.h.

Students who complete the program successfully receive a certificate from the College of Liberal Arts and Sciences and a letter from the Department of Classics.

Admission

Applicants must have a baccalaureate degree from an accredited college or university and a minimum of two years of language study (two years of Latin or two years of Greek, or one year of each). In unusual circumstances, students with less language preparation may be admitted.

Applicants who are not enrolled in a graduate or professional program may apply to The University of Iowa as undergraduate transfer students; they must state on their application that they are applying to the College of Liberal Arts and Sciences for admission to the classics postbaccalaureate certificate program. They
must submit transcripts confirming preparation for certificate language study, a statement of purpose, scores on the Graduate Record Examination (GRE) General Test, a writing sample, and three letters of recommendation from faculty members at their baccalaureate institution.

Graduate Programs

- Master of Arts and Doctor of Philosophy in classics
- Master of Arts in Greek
- Master of Arts in Latin

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate (p. 1117) College section of the Catalog.

Master of Arts

The Master of Arts program in classics, Greek, or Latin requires a minimum of 30 s.h. in courses numbered 101 and above. Students may count a maximum of 12 s.h. earned in courses numbered 101-199 toward the degree. Courses taken to complete the Postbaccalaureate Certificate in Classics do not count toward the degree.

Students must pass a sight examination in the language(s) studied and an examination on literature and history.

Doctor of Philosophy

The Doctor of Philosophy program in classics requires a minimum of 72 s.h. of graduate credit, including the courses listed below (27 s.h.). Students may count no more than 12 s.h. earned in courses numbered 101-199 toward the degree. Courses taken to complete the Postbaccalaureate Certificate in Classics may not be counted toward the degree.

Students also must take precomprehensive and comprehensive examinations and write a dissertation.

Two graduate-level courses in cognate subjects such as anthropology, art history, linguistics, philosophy, or rhetoric

Other interdisciplinary courses (with approval of the graduate advisor)

The remaining course work is made up of Department of Classics and other courses.

PH.D. EXAMINATIONS

Ph.D. students must take precomprehensive exams in Latin sight reading and Greek sight reading and must attempt one sight reading exam by the end of their first year of graduate study. Competence in reading both German and French must be demonstrated by the end of the second year of study.

Students must take the second-year exam at the end of their second year. The remaining exams may be taken in any sequence. Students must file a request for the fourth-year comprehensive exam at least three weeks before the date of the exam.

Sight-Reading Exam

Latin: four hours, written
Greek: four hours, written

Second-Year Exam

Literature and history: four hours, written

Fourth-Year Comprehensive Exam

Greek and Roman history/material culture based on reading list: three hours, written
Latin literature, based on reading list: three hours, written
Greek literature, based on reading list: three hours, written

If a student performs unsatisfactorily on either or both of the Latin and Greek reading list exams, the director of graduate studies sets up an oral exam in order to review questions on which the student did not exhibit sufficient knowledge.

Special field or author (Greek): four hours, written
Special field or author (Latin): four hours, written

Facilities

University of Iowa Libraries’ Main Library and the Art Library house extensive collections of classical texts and uninterrupted runs of classical periodicals from 1850 that facilitate research in the major areas of Greek and Roman civilization. The Department of Classics has a varied collection of slides on classical subjects and a small library of reference works, texts, and issues of classical and archaeological journals. The department’s classical museum contains a small collection of coins,
vases, and facsimiles in bronze from Mycenae, Pompeii, and Herculaneum.

The University is a supporting institution of the American School of Classical Studies at Athens, the American Academy in Rome, and the Intercollegiate Center for Classical Studies in Rome. Consult the director of undergraduate studies for more information.

The department offers students the opportunity to participate in an archaeological dig during the summer. Contact the Department of Classics in mid-February for details.

Courses

Classics in English for Undergraduates

All readings for these courses are in English except Sanskrit courses 20E:110 First-Year Sanskrit: First Semester, 20E:111 First-Year Sanskrit: Second Semester, 20E:121 Second-Year Sanskrit: First Semester, and 20E:122 Second-Year Sanskrit: Second Semester; no previous knowledge of Greek or Latin is necessary.

20E:005 Legends and Heroes of Ancient Rome
1 s.h.
Introduction to narratives of Roman heroes from Livy, Ovid, and Plutarch; background information for further study in classics.

20E:009 Classics and Cinema
3 s.h.
Cinematic depictions of the classical world compared with scholarly views; selected films and primary ancient sources of the same period.

20E:014 Hero, God, Mortal: Literature of Greece
3 s.h.
Ancient Greek literature and culture as it responded to Homer; may include genre (e.g., epic to tragedy), religion, changing concept of hero, interaction with Mediterranean cultures, myth versus history. GE: Literary, Visual, and Performing Arts.

20E:015 Love and Glory: Literature of Rome
3 s.h.
Main themes and works of ancient Roman literature; works reflecting conflict of personal desire and public self in Rome. GE: Literary, Visual, and Performing Arts.

20E:017 The First Caesars: Julius Caesar to Nero
3 s.h.
Introduction to history, politics, and personalities of the first Caesars, the Julio-Claudians (Julius Caesar, Augustus, Tiberius, Caligula, Claudius, and Nero); conditions of the Roman social and political system that led to the Caesars; character of each emperor; changes each brought about in that system; primary and secondary sources.

20E:020 Greek and The New Testament
3 s.h.
Cultural history and intellectual tradition of the Greek-speaking eastern Mediterranean to explore why early Christians chose to preserve New Testament writings in Greek.

20E:026 Introduction to Ancient Art
3 s.h.
Art and architecture of the Mediterranean world ca. 3500 B.C.E. to death of Constantine (337 C.E.); Egyptian, Cycladic, Minoan, Mycenaean, Greek, Etruscan, and Roman cultures; artistic responses to life and death; impact of breakthroughs in technology and engineering on visual culture; role of art in empire building; interrelationships of art, politics, religion. Same as 01H:026.

20E:029 First-Year Seminar
1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.

20E:030 Greek Civilization
3 s.h.
History, literature, art, architecture, religion, social life ca. 3000 B.C.E. to second century B.C.E. GE: Historical Perspectives.

20E:031 Roman Civilization
3 s.h.
History, literature, politics, religion, social structure from eighth century B.C.E. to second century C.E. GE: Historical Perspectives.
**20E:040 Writing Strategies: Word Origins and Word Choice**  
3 s.h.  
Study of words, their meanings, and their origins combined with writing; words and word histories; role of English language in the world.

**20E:071 Middle East and Mediterranean: Alexander to Suleiman**  
3 s.h.

**20E:075 Ancient Sports and Leisure**  
3 s.h.  
Sports, games, and hobbies in the ancient world, primarily Greece and Rome, 1500 B.C.E. to 500 C.E.; ancient Olympic games, Roman festival games; anthropology of sport. GE: Values, Society, and Diversity.

**20E:081 Ancient Medicine**  
3 s.h.  
Thematic examination of theories and practices of Greco-Roman physicians, which in turn became the medical tradition of medieval Islamic world and European medicine until mid-19th century; historical medical terms, theories, and practices.

**20E:082 Ancient Mediterranean Religions**  
3 s.h.  
Introduction to major religious traditions of ancient Mediterranean world; Mesopotamia, the Levant (Hebrew Bible), Egypt, Greece, and Rome; central aspects of mythology, ritual, and archaeology, individually and in comparative perspective; ancient Judaism and Christianity considered in their various cultural contexts; basic concepts for understanding cultural exchange; fundamental theories in the study of religion. GE: Values, Society, and Diversity. Same as 032:082.

**20E:083 War**  
3 s.h.  
Emotions soldiers have as they fight, what makes them continue voluntarily to face death, and how modern society memorializes these experiences; how literature and art transform the experience of war; human responses to war in Homer’s Iliad and select Greek tragedies. Same as 143:083.

**20E:089 Jerusalem from the Bronze to the Digital Age**  
3 s.h.  
Religious, political, and cultural history of Jerusalem over three millennia as a symbolic focus of three faiths—Judaism, Christianity, and Islam; integration of several digital learning technologies, including digital reconstructions and Google Earth tours of Jerusalem. Same as 032:089.

**Classics in English for Undergraduate and Graduate Students**

All of these, except the Sanskrit courses, are taught in English.

**20E:100 The Roman Empire**  
3 s.h.  
History of Roman empire from assassination of Julius Caesar through 5th century A.D.; political, economic, cultural, and social developments from the transition to imperial power to the shift of power from west to east. Same as 16E:100.

**20E:101 Ancient Egypt and the Ancient Near East**  
3 s.h.

**20E:103 Medical and Technical Terminology**  
2 s.h.  
Memorization of word stems and basic medical terms, practice on computer terminal; no formal classes.

**20E:104 The Development of the Afterlife in Judaism and Christianity**  
3 s.h.  
Development of afterlife ideology in Jewish and Christian traditions and ideas that influenced this development, particularly as it relates to the problem of suffering. Same as 032:109.

**20E:106 Warfare in Ancient Mediterranean Society**  
3 s.h.
20E:107 In Search of the Good Life
3 s.h.
Works from Greco-Roman, Jewish, and Christian cultures to analyze various beliefs on how humans can live the good life and examine how these solutions are intimately connected to the specific conceptions of the divine world. Same as 032:107.

20E:108 Greek Drama in Translation
3 s.h.
Ancient Greek plays in relation to their original social and theatrical context; how Greek tragedy has been presented in modern film and theater.

20E:109 Women in Antiquity
3 s.h.
Attitudes toward women and the role of women in ancient Greek and Roman society; ancient authors, male and female, and modern critics. Same as 131:109.

20E:110 First-Year Sanskrit: First Semester
4 s.h.
Grammar, basic vocabulary; elementary readings. Offered fall semesters of even years. Requirements: undergraduate standing. GE: World Languages First Level Proficiency. Same as 039:110.

20E:111 First-Year Sanskrit: Second Semester
4 s.h.
Readings in epic and story literature. Offered spring semesters of odd years. Prerequisites: 039:110. Requirements: undergraduate standing. GE: World Languages Second Level Proficiency. Same as 039:111.

20E:112 Classical Mythology
3 s.h.
Ancient Greek and Roman myths, their interpretation by Western civilization; emphasis on flexibility of myth and its importance for art, literature, anthropological, psychological studies. GE: Literary, Visual, and Performing Arts; Values, Society, and Diversity.

20E:113 Middle Egyptian I
3 s.h.
Introduction to the language (Middle Egyptian dialect, c. 2200-1350 B.C.E.), and script (hieroglyphic) of ancient Egypt; in-class readings from passages in the chrestomathie; Pennsylvania State University video conference.

20E:114 Middle Egyptian II
3 s.h.
Continuation of 20E:113; introduction to the language (c. 2200-1350 B.C.E.) and script (hieroglyphics) of ancient Egypt. Prerequisites: 20E:113.

20E:115 Greek Religion and Society
3 s.h.
From Bronze Age to the Hellenistic period, in context of Mediterranean culture; evidence such as choral hymn, inscribed prayers, magical curses inscribed on lead, architecture, sculpted offerings to the gods. GE: Values, Society, and Diversity. Same as 032:164.

20E:117 Concepts of the City: Rome
3 s.h.
Physical and cultural development of the city of Rome from early republic to emperor Constantine and rise of Christianity in fourth century C.E.

20E:118 Greek Archaeology and Ethnohistory
3 s.h.
Archaeology and ethnology of the Greek world, from end of Bronze Age to late Roman Empire; sociocultural processes that influence development and persistence of Greek civilization. Prerequisites: 113:012 or 113:013. Same as 113:192.

20E:119 Roman Archaeology
3 s.h.
Archaeology and ethnology of Roman civilization from Iron Age eighth-century occupation of the Palatine Hill to the end of the Roman empire in the West, A.D. 476. Prerequisites: 113:012 or 113:013. Same as 113:194.

20E:120 Concepts of the City: Athens
3 s.h.
Athens from Bronze Age to present; city’s role in development of political democracy and religion.
20E:121 Second-Year Sanskrit: First Semester
3 s.h.
Readings in epic and puranic texts. Offered fall semesters of odd years. Prerequisites: 039:111. Requirements: undergraduate standing. GE: World Languages Second Level Proficiency. Same as 039:112.

20E:122 Second-Year Sanskrit: Second Semester
3 s.h.
The *Bhagavadgita* and related religious/philosophical texts. Offered spring semesters of even years. Prerequisites: 039:112. Requirements: undergraduate standing. GE: World Languages Fourth Level Proficiency. Same as 039:113.

20E:124 Classical Greek Art
3 s.h.
Art, sacred architecture from early Classical through late fourth century B.C.E.; Athens in the Golden Age. Same as 01H:127.

20E:128 Art of Early Rome: Patrons and Politics
3 s.h.
Examination of architecture, sculpture, and painting in central Italy from c. 800 B.C. to the end of the Roman Republic in 27 B.C.; art in the service of social ideology and political propaganda; funerary art and its relationship to the living; artistic interactions between Etruria, Greece, and Rome. Same as 01H:132.

20E:129 Art and Culture in Ancient Pompeii
3 s.h.
Art and architecture, as documents of ancient society and religion in towns destroyed by Mount Vesuvius in C.E. 79. Same as 01H:134.

20E:130 Art of the Ancient Roman Empire
3 s.h.
Major developments in architecture, sculpture, and painting from the ascension of Augustus to sole ruler in 31 B.C. to the death of Constantine in A.D. 337; influence of individual emperors on the development of artistic forms; relationship between public and private art; interdependency of Rome and the provinces. Same as 01H:133.

20E:133 Advanced Topics in Mythology
3 s.h.
In-depth exploration of issues in mythology raised in 20E:112; theories of myth, comparative mythology, reception of myth; experience applying methodologies and approaches to specific myths or clusters of myths in Greco-Roman and world traditions. Prerequisites: 20E:112.

20E:136 Food in Ancient Mediterranean Society
3 s.h.
Practices and values influenced by consumption and production of food in ancient Mediterranean societies; varied topics, including methods of food production and distribution, hierarchies of status as associated with food, food and ethnic identity, food and health, food and religion; focus on classical Greek and Roman society, Egypt, the ancient Near East, and Persia. Recommendations: familiarity with Greek and Roman civilization and history. Same as 16E:102.

20E:138 Philosophy of Ancient Greece and Rome
3 s.h.
Ancient Greek and Roman philosophy from its inception in Ionia in sixth century B.C.E. through the Neoplatonic philosophy of Plotinus in third century C.E., encompassing philosophies of Plato, Aristotle, the Stoics and Epicureans, and later Platonists. Same as 026:110.

20E:140 Magic in the Ancient World
3 s.h.
Ancient Greek and Roman writings on magic, including ancient spells and charms. Requirements: completion of rhetoric requirement. GE: Values, Society, and Diversity.

20E:141 Studies in Latin Literature
3 s.h.
In-depth look at specific authors or genres, as indicated in the subtitle, focusing on Latin literary texts from second century B.C.E. to fifth century C.E. and the post-antique reception of those texts. Taught in English.
20E:142 Word Power: Building English Vocabulary 3 s.h.
Analysis of unfamiliar English words through knowledge of the history and meaning of word parts.

20E:143 Word Power II: Building English Vocabulary--Advanced 3 s.h.
Continuation of 20E:142; vocabulary building through additional Latin and Greek bases; vocabulary recognition through analysis of Greek and Latin elements of English words; how words change over time. Prerequisites: 20E:142.

20E:144 Engineering and Technology in the Ancient Mediterranean 3 s.h.
Technologies developed and used in the ancient Mediterranean--primarily in Greece and Rome, also in Egypt and the Ancient Near East; agriculture and food preparation; construction and architecture; technologies related to warfare. Same as 16E:105.

20E:145 Mythology of Otherworldly Journeys 3 s.h.
Examination of mythology of otherworldly journeys from earliest religions to Hellenistic period; historical context; comparison for common themes in their evolution over time; directed readings of mythological texts dealing with otherworldly journeys; ways in which past cultures confronted larger mysteries of life and death. Same as 032:145.

20E:146 Early Christianity: From Jesus to the Rise of Islam 3 s.h.
Introduction to the history of early Christianity, from the time of Jesus to the rise of Islam; focus on major movements, intellectuals, and institutions in this period; growth of Christianity in different geographical areas, including the Middle East, Greece, Western Europe, and Africa; Christian relations with Jews, pagans, and Muslims; conversion; orthodoxy, heresy, and the making of the biblical canon; martyrdom; women and gender roles; asceticism, monasticism, and sexuality; church and state; theological controversy and schisms; the cult of saints; the Holy Land and pilgrimage. Same as 032:143.

20E:150 Gender and Sexuality in the Ancient World 3 s.h.
Survey of gender and sexuality issues in the social, political, and religious life of ancient Greece and Rome; evidence from literature, the visual arts, archaeology. Requirements: completion of rhetoric requirement and sophomore standing. GE: Values, Society, and Diversity. Same as 131:152.

20E:180 Teaching in the Classics 3 s.h.
Instructional approaches and issues in teaching ancient language and civilization at secondary and college levels. Prerequisites: 20G:002 or 20L:002.

20E:190 Honors Readings arr.
Discussion, readings, research for a paper on ancient civilization. Requirements: ancient civilization major.

20E:196 The Archaeology of Ancient Egypt 3 s.h.
Introduction to the archaeology of ancient Egypt from predynastic times to Roman Egypt, including monumental architecture; patterns of everyday life; social, economic, and demographic considerations; history of archaeology in Egypt. Prerequisites: 113:012. Same as 113:196.

20E:198 Postbaccalaureate Seminar 0 s.h.
Current work of postbaccalaureate students; preparation of writing sample and portfolio. Requirements: postbaccalaureate certificate enrollment.

20E:199 Private Assignments arr.
Readings in classical literature in translation.
Classics in English for Graduate Students

20E:201 Topics in Comparative Romance Linguistics 3 s.h.
Comparative study of phonology, morphology, or syntax of the main Romance languages as informed by linguistic theory; diachronic or synchronic perspective. Repeatable. Prerequisites: 035:204. Recommendations: additional graduate course work in linguistics. Same as 035:207, 103:262, 164:262.

20E:210 Graduate Pedagogy 1 s.h.
Pedagogical theories on teaching classics in translation, practical application of those theories; classroom management, grading, syllabus development; university, college, and department regulations. Requirements: graduate standing, and teaching assistant or instructor in classics courses taught in English.

20E:220 Proseminar in Classics 1 s.h.
Texts, techniques, and trends in classical scholarship; areas and subtopics of classical scholarship.

20E:230 Classical Rhetoric 3 s.h.
Discourse in the ancient world. Same as 036:310.

20E:326 Seminar: Problems in Ancient Art 3 s.h.
Key themes and issues in ancient art. Same as 01H:320.

Greek for Undergraduates

20G:001 Classical and New Testament Greek I 3,5 s.h.
Introduction to ancient Greek; Greek readings from all periods, from Homer and classical Greek poetry and prose to Christian writings and beyond; focus on classical and New Testament works, Greek culture and thought; comprehension, vocabulary, structure of Greek words and sentences; first of two-semester sequence. GE: World Languages First Level Proficiency.

20G:002 Classical and New Testament Greek II 3,5 s.h.
Continuation of 20G:001; focus on classical and New Testament works, Greek culture and thought, comprehension, vocabulary, structure of Greek words and sentences; increased emphasis on original texts. Prerequisites: 20G:001. GE: World Languages Second Level Proficiency.

20G:011 Second-Year Greek I 3 s.h.
Focus on reading Greek prose authors, such as Xenophon and Plato. Prerequisites: 20G:002. GE: World Languages Second Level Proficiency.

20G:012 Second-Year Greek II 3 s.h.
Continuation of 20G:011; focus on reading and interpretation of Greek poetry. Prerequisites: 20G:011. GE: World Languages Fourth Level Proficiency.

Greek for Undergraduate and Graduate Students

20G:120 Archaic and Classical Periods I 3 s.h.
Readings in major Greek authors of the Archaic and Classical periods. Prerequisites: 20G:012.

20G:121 Archaic and Classical Periods II 3 s.h.
Continuation of 20G:120. Prerequisites: 20G:012.

20G:122 Classical and Hellenistic Periods I 3 s.h.
Readings in Greek literature of the Classical and Hellenistic periods. Prerequisites: 20G:012. Same as 032:122.

20G:123 Classical and Hellenistic Periods II 3 s.h.
Continuation of 20G:122. Prerequisites: 20G:012.

20G:176 Greek Composition 3 s.h.
Review of Greek morphology, syntax, sentence structure; composition of sentences, short passages in Greek.
20G:190 Honors Readings  
Discussion, readings, research for a paper on Greek literature, history, or civilization. Requirements: classical languages major.

20G:199 Private Assignments  
1-3 s.h. 
Directed reading and study with faculty member.

**Greek for Graduate Students**

Courses numbered 20G:222 Archaic Greece and 20G:223 Hellenistic Greece cover topics from the major genres and periods of Greek literature. They are offered on a four-year cycle.

Courses numbered 20G:222 Archaic Greece, 20G:223 Hellenistic Greece, and 20G:228 Classical Greece cover authors, genres, and topics of the major periods of Greek history. Specific topics are determined by the instructor’s expertise and research interests. Ph.D. students are exposed to topics in all major periods at least once in four years of course work.

20G:202 Advanced Reading  
arr. 
Requirements: classics graduate standing.

20G:204 Archaic Greek Literature  
3 s.h. 
Introductory survey of Greek literature and language from Homer to the end of the fifth century.

20G:205 Classical and Hellenistic Literature  
3 s.h. 
Introductory survey of Greek literature and language in and after the fourth century B.C.E.

20G:210 Graduate Pedagogy  
1 s.h. 
Pedagogical theories on teaching classical languages, practical application of those theories; classroom management, grading, syllabus development; university, college, and department regulations. Requirements: graduate standing, and teaching assistant or instructor in Greek.

20G:222 Archaic Greece  
arr. 
Topics chosen from Homer, Hesiod, Homeric hymns or lyric poetry. Repeatable.

20G:223 Hellenistic Greece  
arr. 
Authors, genres, and topics from the death of Alexander to the accession of Augustus. Repeatable.

20G:228 Classical Greece  
arr. 
Authors, genres, and topics from the fourth and fifth centuries B.C.E. Repeatable.

20G:229 Roman Greece  
arr. 
Greek authors of the Second Sophistic, including Plutarch, Lucian, and Philostratus; seminar.

20G:291 Greek Thesis  
arr. 

**Latin for Undergraduates**

20L:001 Elementary Latin I  
3,5 s.h. 
Focus on reading Latin and on Roman culture. GE: World Languages First Level Proficiency.

20L:002 Elementary Latin II  
3,5 s.h. 
Continuation of 20L:001. Prerequisites: 20L:001. GE: World Languages Second Level Proficiency.

20L:005 Accelerated Latin  
3,5 s.h. 

20L:011 World of Cicero  
3 s.h. 
Focus on reading Latin prose authors, such as Caesar and Cicero. Prerequisites: 20L:002. GE: World Languages Second Level Proficiency.

20L:012 Golden Age of Roman Poetry  
3 s.h. 
Focus on reading and interpretation of Roman poets, such as Vergil and Catullus. Prerequisites: 20L:011. GE: World Languages Second Level Proficiency.
Latin for Undergraduate and Graduate Students

20L:120 Latin Literature of the Republic I
3 s.h.
Prose or poetry by major authors of the republic. Prerequisites: 20L:012.

20L:121 Latin Literature of the Republic II
3 s.h.
Continuation of 20L:120. Prerequisites: 20L:012.

20L:122 Latin Literature of the Empire I
3 s.h.
Prose or poetry by major authors of the empire. Prerequisites: 20L:012.

20L:123 Latin Literature of the Empire II
3 s.h.
Continuation of 20L:122. Prerequisites: 20L:012.

20L:171 Elementary Latin Composition
3 s.h.
Review of Latin morphology, syntax, sentence structure; composition of sentences, short passages in Latin. Prerequisites: 20L:012.

20L:190 Honors Readings
3 s.h.
Discussions, readings, research for a paper on Roman literature, history, or civilization. Requirements: classical languages major.

20L:199 Private Assignments
1-3 s.h.
Directed reading and study with faculty member for advanced students.

Latin for Graduate Students

Courses numbered 20L:222 Augustan Rome through 20L:225 cover topics from the major genres and periods of Latin literature. They are offered on a four-year cycle.

Courses numbered 20L:220 Republican Rome, 20L:228 Later Empire, and 20L:229 Tiberius to Trajan cover authors, genres, and topics of the major periods of Roman history. Specific topics are determined by the instructor’s expertise and research interests. Ph.D. students are exposed to topics in all major periods at least once in four years of course work.

20L:202 Advanced Reading
arr.
Repeatable. Requirements: classics graduate standing.

20L:204 Republican Literature
3 s.h.
Introductory survey of Latin literature and language from the early Republic to the end of the first century B.C.E.

20L:205 Imperial Literature
3 s.h.
Introductory survey of Latin literature and language from the Augustan age through the second century C.E.

20L:210 Graduate Pedagogy
1 s.h.
Pedagogical theories on teaching classical languages, practical application of those theories; classroom management, grading, syllabus development; university, college, and department regulations. Requirements: graduate standing, and teaching assistant or instructor in Latin.

20L:217 Accelerated Elementary Latin/Graduate
4 s.h.
One year of Latin in one semester. Offered summer session.

20L:220 Republican Rome
arr.
Authors and topics from the beginnings of Roman literature to the death of Julius Caesar. Repeatable.

20L:222 Augustan Rome
arr.
Authors and topics from the death of Caesar to the accession of Tiberius. Repeatable.

20L:228 Later Empire
arr.
Authors and topics from the third through fifth centuries C.E. Repeatable.

20L:229 Tiberius to Trajan
arr.
Authors and topics from the first and second centuries C.E. Repeatable. Same as 032:229.
20L:272 Advanced Latin Composition
arr.
Writing of extended prose passages in Latin.

20L:291 Latin Thesis
arr.
For Ph.D. students writing a dissertation.
Repeatable. Requirements: Ph.D. candidacy.
Communication Sciences and Disorders

Chair
Ruth A. Bentler

Professors
Paul J. Abbas (Communication Sciences and Disorders/Otolaryngology--Head and Neck Surgery), Ruth A. Bentler, Carolyn Jane Brown (Communication Sciences and Disorders/Otolaryngology--Head and Neck Surgery), Kate E. Gfeller (Music/Communication Sciences and Disorders/Otolaryngology--Head and Neck Surgery), Richard R. Hurtig (Starch Faculty Fellow), Karen Kirk, Karla K. McGregor, Jerald B. Moon, Ingo R. Titze (Communication Sciences and Disorders/Music, UI Foundation Distinguished Professor), J. Bruce Tomblin (Communication Sciences and Disorders/Otolaryngology--Head and Neck Surgery, Spriestersbach Professor), Chris W. Turner (Communication Sciences and Disorders/Otolaryngology--Head and Neck Surgery), Richard S. Tyler (Otolaryngology--Head and Neck Surgery/Communication Sciences and Disorders), Patricia M. Zebrowski

Professors emeriti
Erich S. Luschei, Kenneth L. Moll, Hughlett L. Morris, Arnold M. Small, Duane R. Van Demark

Professor (clinical)
Lenore Holte

Adjunct professors
Fariborz Alipour-Haghighi, Lorraine Ramig

Associate professors
Douglas Baynton (History/Communication Sciences and Disorders), Eileen Finnegan (Communication Sciences and Disorders/Otolaryngology--Head and Neck Surgery), Jean K. Gordon, Michael P. Karnell (Otolaryngology--Head and Neck Surgery/Communication Sciences and Disorders)

Associate professors emeriti
Charles V. Anderson, Penelope, K. Hall

Associate professors (clinical)
Toni D. Cilek, Ann M. Fennell, Danielle Kelsay, Linda Louko, Diane P. Niebuhr, Anne K. Wallace

Adjunct associate professors
Carolyn Jean Brown, Charles A. Miller, Ronald C. Scherer, Katherine Verdolini, Gerald N. Zimmermann

Assistant professors
Sandie Bass-Ringdahl, Melissa Duff, Shawn J. Goodman, Amanda Van Horne

Assistant professors (clinical)
Karen Bryant, Stephanie Fleckenstein

Adjunct assistant professors
Sarah Klemuk, Alice Smith, Brad Story, Gail Takahashi

Adjunct instructors in practicum instruction
Barbara Anderson, Emily Andrews, Julie Bridges, Paige Burden, Margaret Christiansen, Debra Downey, Suzanne Dunn, Jessica Egge, Kelly Macaulay Frost, Barbara A. Gienapp, Daniel Hansen, Diana Hanson, Emily Hart, Rebecca Hubbard, Maura Kenworthy, Judith Knabe, Marsha Barth Leick, Maggie Lenkowski, Mary Lowder, Mary F. Lukas, Beth MacPherson, Joan D. Marttila, Elizabeth Merrifield, Rebecca R. Miller, Kelly Nepl, Aaron Packer, Ann Perreau, Debra K. Robin, Janette Rogers, Katherine Emerich Seerveld, Sandra D. Show, Christine Troxell, Michael Tysklind, Tanya Van Voorst, Gina Wiley

Undergraduate degree: B.A. in Speech and Hearing Science

Undergraduate nondegree program: Minor in Communication Sciences and Disorders

Graduate degrees: M.A. in Speech Pathology and Audiology, Ph.D. in Speech and Hearing Science, Au.D.

Web site: http://www.uiowa.edu/~comsci/

The courses and degree programs of the Department of Communication Sciences and Disorders are planned to meet the needs of students preparing for careers in clinical service, college and university teaching, and research concerned with speech, language, or hearing processes and disorders. The department also offers courses for students with vocational and professional goals in other fields—for example, engineering, psychology, education, speech, theatre arts, dentistry, and medicine—whose preparation may be enriched by the study of speech and hearing processes and their disorders.

Advanced degree holders in communication sciences and disorders provide clinical services for people with speech, hearing, or language problems in hospitals, community clinics, rehabilitation facilities, elementary and secondary schools, and private practice. They teach in colleges and universities and conduct research in laboratories concerned with communication processes and disorders.

The department's professional programs leading to the M.A. or Au.D. are accredited by the Council on Academic Accreditation of the American Speech-Language-Hearing Association (ASHA).
Undergraduate Program

- Major in speech and hearing science (Bachelor of Arts)
- Minor in communication sciences and disorders

Students who intend to pursue professional careers in communication sciences and disorders must complete a graduate program comparable to the department’s Master of Arts in speech pathology and audiology or its Doctor of Audiology (Au.D.). The undergraduate major in speech and hearing science emphasizes the normal processes of speech, hearing, and language and does not qualify an individual to work professionally in the field. Instead, it is designed primarily to prepare students for graduate work. It also may be an appropriate major for students earning College of Liberal Arts and Sciences degrees who are not planning careers in speech pathology and audiology.

Bachelor of Arts

The Bachelor of Arts with a major in speech and hearing science requires a minimum of 120 s.h., including 55-56 s.h. of work for the major. Requirements include nine core courses offered by the department and eight cognate courses offered by other departments. Transfer students must complete a minimum of 15 s.h. toward the major at The University of Iowa. Students must complete the College of Liberal Arts and Sciences General Education Program (p. 381).

The major in speech and hearing science requires the following course work.

First-year calculus is encouraged, particularly for those who are interested in pursuing a graduate degree in audiology.
CLINICAL OBSERVATION

Students have the opportunity and are encouraged to obtain 25 hours of supervised clinical observation, a prerequisite for participation in clinical practicums at the graduate level. This requirement is satisfied by completion of independent observations or required observations made for elective departmental courses.

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

Note: The major requires specific mathematics and science competencies that may be satisfied with courses approved for the General Education Program.

Before the third semester begins: at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: three courses in the major and at least one-half of the semester hours required for graduation

Before the seventh semester begins: nine courses in the major and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: 12 courses in the major

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Honors

Students majoring in speech and hearing science who have a g.p.a. of at least 3.50 may enter the department’s honors program upon recommendation of the departmental honors advisor. If they intend to graduate with honors in the major, they also must be members of the University of Iowa Honors Program, which requires that students maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University of Iowa Honors Program for more information).

To graduate with honors in the major, students must have completed at least 10 s.h. of course work for the major by the beginning of their junior year and maintain a cumulative University of Iowa g.p.a. of at least 3.50. They must complete both 003:097 Honors Seminar and 003:098 Honors Thesis. Students register for 003:097 Honors Seminar in the spring of their junior year and for 003:098 Honors Thesis in both fall and spring of their senior year.

Minor

The minor in communication sciences and disorders requires a minimum of 15 s.h. in Department of Communication Sciences and Disorders courses, including 12 s.h. in advanced courses. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass.

Students must begin the minor with 003:015 Introduction to Speech and Hearing Processes and Disorders. It provides a broad overview of all aspects of the normal communication process and of various disorders. Students complete the minor by choosing four of the courses listed below, according to their individual interests.

Graduate Programs

- Master of Arts in speech pathology and audiology
- Doctor of Audiology
- Doctor of Philosophy in speech and hearing science

The Master of Arts program in speech pathology and audiology is offered with two emphases: research (general), and professional (speech-language pathology).

The M.A. with research emphasis and the Ph.D. are designed to train scholar-researchers; they do not provide preparation for professional work as speech-language pathologists or audiologists.

The M.A. with professional emphasis and the Au.D. provide training for individuals who wish to do clinical work in speech-language pathology or audiology. Graduates of the M.A. professional emphasis program meet all academic and practicum requirements for clinical certification by the American Speech-Language-Hearing...
Association (ASHA) and for licensure by the State of Iowa. The Au.D. is required for ASHA national certification in audiology. Students preparing for clinical positions in public schools must meet school licensure or certification requirements of the states in which they plan to work. See "M.A. with Professional Licensure" later in this section.

### Master of Arts: Research Emphasis

The Master of Arts program in speech pathology and audiology with research emphasis (general emphasis) requires a minimum of 38 s.h. of graduate credit. The program is designed for students who intend to pursue a Ph.D. or who seek additional education but do not intend to work professionally in the United States as speech-language pathologists or audiologists. It typically includes a substantial portion of the courses in the M.A. with professional emphasis and Au.D. curricula.

Students in the M.A. research emphasis program are required to complete a thesis and defend their research successfully at a final oral examination.

The program typically requires two years to complete. Specific course work required depends on the student’s background and interests.

### Master of Arts: Professional Emphasis

The Master of Arts program in speech pathology and audiology with professional emphasis in speech-language pathology requires a minimum of 38 s.h. of graduate credit, although students typically earn 60-65 s.h. of credit by the time they complete the degree. The program prepares clinicians in speech-language pathology to be able to function independently in a variety of clinical settings. Graduates of the program meet all academic and practicum requirements for clinical certification by the American Speech-Language-Hearing Association and for licensure by the State of Iowa. The program is designed to ensure that upon graduation, the student will meet requirements for immediate professional employment.

M.A. students usually have a background of undergraduate courses in speech and hearing science, psychology of language, and human behavior that is equivalent to an undergraduate major in speech and hearing science at The University of Iowa.

Before registering in the program, entering M.A. students receive descriptive materials about basic science core courses considered to be required preparation for the M.A. program, and required M.A. clinical core courses for which the department may accept comparable courses taken at the undergraduate level. Decisions about incorporating background course work in these areas are made by the faculty advisor in consultation with the student and the instructors of the basic science or clinical core courses. Entering students must have completed the following courses or their equivalents.

<td></td>
</tr>
</tbody>
</table>

Students pursuing the M.A. with professional emphasis must complete at least 4 s.h. of work related to research. This may be accomplished by any combination of enrollment in seminars (2 s.h. each) and/or research hours. Completion of the research hours may consist of work toward a thesis or preparation of a paper involving one or a combination of the following: literature review, prospectus development, and presentation of data. A paper is required at the end of each semester’s enrollment. An exception to this requirement can be made in the case of research hours leading to a thesis.

Candidates for an M.A. with professional emphasis in speech-language pathology are not required to complete a thesis, although all students demonstrating research aptitude and interest are encouraged to do so. Students who do not elect the thesis option are required to take final written comprehensive examinations.

A typical M.A. professional emphasis program usually takes two calendar years to complete.
but may take longer, depending on the student’s background and personal interests.

**CORE REQUIREMENTS**

All students seeking an M.A. with professional emphasis in speech-language pathology must take the following.

- 003:135 Foundations of Clinical Practice I 1-3 s.h.
- 003:136 Foundations of Clinical Practice II 1 s.h.
- 003:137 Foundations of Clinical Practice III 1 s.h.

In addition, they must take the following courses unless they completed equivalent courses as undergraduates.

- 003:114 Introduction to Voice Disorders 2 s.h.
- 003:115 Structural Disorders 2 s.h.
- 003:116 Basic Neuroscience for Speech and Hearing 3 s.h.
- 003:140 Manual Communication 1 s.h.
- 003:145 Developmental Speech and Language Disorders 3 s.h.
- 003:146 Neurogenic Disorders of Language 3 s.h.
- 003:147 Neurogenic Disorders of Speech 2 s.h.
- 003:185 Hearing Loss and Audiology 3 s.h.
- 003:244 Rehabilitative Audiology 3 s.h.

Students must take 003:510 Seminar: Introduction to Research in Speech and Hearing (1 s.h.) during the fall semester of their first year.

They must take 003:515 Proseminar (0 s.h.) during the fall and spring semesters of their first year.

Also required are additional semester hours of practicum registration sufficient to meet supervised, direct clinical experience requirements for the Certificate of Clinical Competence of the American Speech-Language-Hearing Association and the Iowa license, and to provide broad, supervised practicum experience.

In addition to the core requirements listed above, all students preparing to be speech-language pathologists must earn a minimum of 12 s.h. from the following.

- 003:201 Principles of Voice Production 3 s.h.
- 003:206 Language Disorders in Children 0-18 Years 3 s.h.
- 003:213 Voice Habilitation 2 s.h.
- 003:222 Speech and Hearing Anatomy (dissection) 2 s.h.
- 003:233 Aphasia 2 s.h.
- 003:236 Swallowing Disorders 2 s.h.
- 003:237 Cleft Palate and Related Disorders 2 s.h.
- 003:260 Designing Assistive Devices 1-3 s.h.
- 003:282 Phonological Development and Disorders 2 s.h.
- 003:283 Stuttering 2 s.h.
- 003:350 Preceptorship in Augmentative Communication 1 s.h.
- 07E:104 Remedial Methods in Speech and Hearing 2 s.h.

Students also must earn a total of 4 s.h. in 003:590 Research or 4 s.h. in a combination of research and seminar courses.

**M.A. with Professional Licensure**

**M.A. with Licensure to Work Outside Public Schools**

A number of states, including Iowa, require a state license in speech-language pathology or audiology for persons who work in settings outside the public schools. Students who meet the requirements listed below for the M.A. in speech pathology and audiology with professional emphasis also meet the academic requirements for the license in Iowa as well as in most other states. In 2007 the requirements to earn American Speech-Language-Hearing Association national certification in audiology changed. Certification now requires a clinical doctoral degree (Doctor of Audiology) or the equivalent. Students preparing for careers in audiology should consult their advisors.

**M.A. with Public School Licensure**

Students preparing for clinical positions in public schools typically must meet school licensure or certification requirements of the states in which they plan to work. The following criteria meet the requirements for endorsement as speech-language pathologists or audiologists in Iowa and most other states.

- A master’s degree with professional emphasis in speech-language pathology or audiology or the equivalent
- Completion of an approved human relations component
- Completion of courses that cover the education of the disabled and the gifted and talented (e.g., exceptional persons, education of the gifted)
- Completion of the requirements in speech-language pathology or audiology and the 20 s.h. professional education sequence, including
07E:104 Remedial Methods in Speech and Hearing and 07E:192 Special Area Student Teaching as a speech-language pathologist or audiologist; course work in the following areas must be completed to meet the professional education sequence:

**Curriculum** (e.g., reading, methods, curriculum development)

**Foundations** (e.g., philosophy of education, foundations of education)

**Educational measurement** (e.g., tests and measurements, measures and evaluations of instruction)

**Educational psychology** (e.g., educational psychology, counseling theories and techniques)

**Special education** (e.g., introduction to special education, exceptional persons, learning disabilities)

**Child development** (e.g., human growth and development, principles and theories of child development, history and theories of early childhood education)

Note: General Education Program courses (e.g., introduction to psychology, sociology, history, literature, and humanities) do not meet the requirements of the professional education sequence.

**Doctor of Audiology**

The Doctor of Audiology (Au.D.) requires 95 s.h. of graduate credit. Individuals who wish to work as audiologists in the United States must hold a clinical doctoral degree or the equivalent.

The four-year Au.D. program is designed for students with an undergraduate degree in speech and hearing science. Au.D. students must complete the following courses. They may be excused from taking courses whose equivalents they completed successfully during undergraduate study.

- 22M:016 Calculus for the Biological Sciences (or one semester of calculus) 4 s.h.
- 003:135 Foundations of Clinical Practice I 1-3 s.h.
- 003:145 Developmental Speech and Language Disorders 3 s.h.
- 003:219 Fundamentals of Laboratory Instrumentation 3 s.h.
- 003:224 System and Signal Theory for Speech and Hearing Science 3 s.h.
- 003:230 Advanced Hearing Science and Speech Perception 3 s.h.
- 003:238 Capstone Requirement 1 s.h.
- 003:240 Hearing Aids I 3 s.h.
- 003:242 Hearing Aids II 1 s.h.
- 003:244 Rehabilitative Audiology 3 s.h.
- 003:245 Pediatric Audiology 3 s.h.
- 003:246 Advanced Audiology 3 s.h.
- 003:247 Medical Audiology 2 s.h.
- 003:249 Cochlear Implants 1-3 s.h.
- 003:255 Educational Audiology 1 s.h.
- 003:256 Anatomy and Physiology of Hearing 3-4 s.h.
- 003:290 Auditory Evoked Potentials 3 s.h.
- 003:291 Vestibular Assessment and Rehabilitation 3 s.h.
- 003:292 Advanced Rehabilitative Audiology 3 s.h.
- 003:311 Clinical Practice in Audiology 2-3 s.h.
- 003:317 Audiology Business Practice Management 1 s.h.
- 003:318 Hearing Loss Prevention 2 s.h.
- 003:519 Seminar: Evidence-Based Practice 2 s.h.
- 07P:243 Intermediate Statistical Methods 4 s.h.
- or
- 171:162 Design and Analysis of Biomedical Studies 3 s.h.

Students may select any of the following electives. With their advisors’ consent, they may substitute other University of Iowa course work.

- 003:222 Speech and Hearing Anatomy 2 s.h.
- 003:526 Seminar: Rehabilitative Audiology 2 s.h.
- 003:538 Seminar: Hearing Science 2 s.h.
- 07E:104 Remedial Methods in Speech and Hearing 2 s.h.
- 068:199 Basic Otolaryngologic Science 2 s.h.
- 132:180 Fundamental Neurobiology 4 s.h.
- 158:101 Topics in Deaf Studies 3 s.h.
- 158:110 Teaching Deaf and Hard of Hearing Students 3 s.h.

**Doctor of Philosophy**

The Doctor of Philosophy program in speech and hearing science requires a minimum of 72 s.h. of graduate credit. The program provides flexible, comprehensive training for scholar-researchers interested in communication processes and their disorders. Students with diverse backgrounds in the natural and behavioral sciences are
encouraged to apply and develop their skills in an atmosphere of interdisciplinary research.

The Ph.D. program reflects the broad interests of its multidisciplinary faculty, whose members have diverse backgrounds in speech, language, hearing, engineering, physiology, physics, psychology, linguistics, and bioengineering. Faculty members are committed to an interdisciplinary approach to questions at every level of the speech and language production/perception system.

The purpose of the doctoral program is to provide the integrated knowledge necessary for a productive career in speech-language pathology and audiology, communication science, and related areas.

The department encourages candidates with special interests, goals, or backgrounds to develop individualized programs of study. There is no standard curriculum for the Ph.D.; rather, a program of study is developed by each student in consultation with a faculty committee. The course of study is developed from courses offered by the department, courses in other areas (e.g., physics, engineering, psychology, mathematics, statistics, physiology, neurology, anatomy, and others), and special reading and research experiences.

The following courses are offered by the department of Communication Sciences and Disorders primarily for Ph.D. students. (Students interested in specific areas of research and selected publication citations of the faculty are encouraged to write to the department.)

</table>

In addition, seminars offered by the department cover a broad range of topics relevant to doctoral study.

Students in the Ph.D. program usually are expected to register for research credit (003:590 Research) during each semester of residence and to register for and participate in 003:515 Proseminar.

Knowledge in each of the areas of hearing, speech, language, mathematics, statistics, computer science, and instrumentation is required of all students. Decisions regarding the extent of this knowledge and how it is obtained (e.g., coursework or independent study) are made jointly by the student and the student's faculty committee.

Doctoral students who have not written a master's thesis must complete the equivalent of a master's thesis project as well as the comprehensive examination. They also must successfully complete and submit a dissertation based on original research.

**Admission**

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate (p. 1117) College section of the Catalog.

Each of the department’s graduate programs requires that applicants take the Graduate Record Examination (GRE) General Test before they apply for admission.

Admission to the M.A. and Au.D. programs is competitive; applicants’ credentials are considered in relation to those of others in the applicant pool, and a limited number of individuals are admitted to each program. Applicants whose undergraduate g.p.a. is below 3.00 or whose GRE General Test scores are lower than 450 in any area (verbal, quantitative, and analytic) rarely are admitted to either program. Admission is for fall; the application deadline is January 1. All applications to the M.A. and Au.D. programs must be submitted through CSDCAS (Central Application Service for Communication Science and Disorders).

Admission to the Ph.D. program is based on each individual's aptitudes and interests in research areas rather than on admitting a certain number of students. Applicants should be enrolled in a master's degree program or should have completed a master's degree or equivalent graduate work. They should have a g.p.a. of at least 3.00 and should have GRE General Test scores no lower than 500 in any area (verbal, quantitative, and analytic). For best consideration, applications should be received by January 1. All applications to the Ph.D. program must be submitted through the University of Iowa Biosciences Centralized Application System.

For detailed information regarding evaluation of applicants, applications materials and requirements, and other matters, see Admissions on the department’s web site.
Financial Support

The following information applies to all financial appointments administered by the department. For more detailed information, contact the Department of Communication Sciences and Disorders director of graduate studies.

Graduate appointments usually begin only in fall semester. Students beginning study spring semester or summer session are considered for appointments for the following fall semester.

Appointment applications must be received by January 15 to ensure consideration for an appointment beginning the following fall semester. Initial appointment offers generally are made between April 1 and June 1; however, the department continues to make offers after this time.

Scores on the Graduate Record Examination (GRE) General Test are required for consideration for financial assistance.

Facilities

Clinical Facilities

The clinical training program benefits greatly from Iowa City’s standing as the most comprehensive health sciences center in Iowa and from the ready availability of health service facilities for clinical training of students in speech-language pathology and audiology.

The University of Iowa Affiliated Speech and Hearing Services include the Wendell Johnson Speech and Hearing Clinic; the division of speech and hearing in the University of Iowa Hospitals and Clinics (UIHC) Department of Otolaryngology—Head and Neck Surgery; UIHC Consolidated Speech and Swallowing Services, which provides services to the Departments of Neurology, Child Psychiatry, and Otolaryngology—Head and Neck Surgery; speech and hearing services in the Center for Disabilities and Development; Pediatrics Regional Child Health Specialty Clinics; and the audiology and speech pathology service in the Iowa City Veterans Affairs Medical Center. Directors of these programs form the Council on Speech Pathology and Audiology at The University of Iowa.

The Wendell Johnson Speech and Hearing Clinic serves the University and the general public. Included in its services are outpatient evaluation and rehabilitation programs for speech, hearing, and language problems; one-week intensive summer programs in stuttering, language development, reading, and aural rehabilitation; and a six-week summer preschool program for hearing-impaired children. These clinical programs give students supervised clinical experience with a wide variety of speech, hearing, and language disorders.

In addition to the clinical training in the Wendell Johnson Speech and Hearing Clinic, training also may be acquired in supervised clinical practice with elementary school children through various state area education agencies; and in supervised clinical practice in speech, language, and hearing services provided by the University of Iowa Hospitals and Clinics Consolidated Speech and Swallowing Services, the Regional Child Health Specialty Clinics, Center for Disabilities and Development, and the Veterans Affairs Iowa City Health Care System.

Public and private departments and programs in addition to those mentioned above often contribute to the cooperative professional training, research, and service programs.

Research Facilities

Facilities in the Wendell Johnson Speech and Hearing Center include audiometric testing suites, diagnostic and remediation suites, equipment for diagnosis and therapy, a closed-circuit television system, and laboratories and equipment for acoustic, physiologic, and perceptual studies of speech, and for audiologic, psychoacoustic, and neurophysiologic studies of hearing. Mechanical and electronic shops and trained technical personnel are available for assistance in research instrumentation.

Cooperation with varied departments in the Carver College of Medicine and the College of Dentistry makes additional laboratory facilities available for research on problems in speech and hearing. The participation and cooperation of specialists from various fields, including psychology, child development, education, engineering, statistics, and medicine, further broaden the scope of research activities in speech and hearing.

Courses

For Undergraduates

003:015 Introduction to Speech and Hearing Processes and Disorders 3 s.h.

Speech, language, auditory behavior as fields of scientific study; major types of speech, hearing, language disorders. Offered fall and spring semesters.
003:029 First-Year Seminar 1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.

003:096 Research Practicum arr.
Individual or small group participation in faculty research projects.

003:097 Honors Seminar 2 s.h.
Research topics and procedures in speech and hearing sciences; ongoing faculty research, research opportunities, possible research projects. Requirements: honors standing with intent to complete an honors thesis.

003:098 Honors Thesis 2 s.h.
Close work with a faculty mentor. Prerequisites: 003:097.

For Undergraduate and Graduate Students

003:101 Mechanisms and Management of Hearing Loss 3 s.h.
Basics of hearing intervention (e.g., hearing aids, cochlear implants, assistive devices) particularly important to classroom teachers at a level appropriate for that group; meets requirements for endorsement for teaching hearing impaired.

003:110 Phonetics: Theory and Applications 3 s.h.
Basic concepts: articulatory and acoustic description of speech sound production, dialect variations, language differences; development of phonetic transcription skills with emphasis on English phonetics, clinical applications to developing and disordered speech. Offered fall semesters.

003:111 Basic Acoustics for Speech and Hearing 3 s.h.
Principles of sound, simple harmonic motion, sound pressure and intensity, decibels, complex waves, Fourier analysis, resonance and filters, distortion, transmission of sound. Offered spring semesters. Requirements: completion of department math requirement.

003:112 Anatomy and Physiology of Speech Production 4 s.h.
Normal anatomy, physiology of structures used to produce speech; principles, methods for instrumental study of speech production. Offered spring semesters. Prerequisites: 003:110. Corequisites: 003:111, if not taken as a prerequisite.

003:113 Introduction to Hearing Science 4 s.h.
Normal auditory process; anatomy and physiology of auditory system; subjective correlates of auditory stimuli. Offered fall semesters. Prerequisites: 003:111.

003:114 Introduction to Voice Disorders 2 s.h.
Basic foundations for management of voice disorders. Offered spring semesters. Prerequisites: 003:112.

003:115 Structural Disorders 2 s.h.
Therapy approaches used to treat speech production and swallowing disorders associated with disorders that affect structure and physiology of the speech and swallowing mechanism; basic knowledge necessary for clinical practice by clinicians who do not specialize in management of patients with head and neck cancer, cleft palate, or neurological disorders. Offered fall semesters. Prerequisites: 003:110 and 003:112.

003:116 Basic Neuroscience for Speech and Hearing 3 s.h.
Basic anatomy, physiology of central nervous system; emphasis on neural systems involved in normal and disordered communication. Offered fall semesters. Requirements: biology, zoology, or physiology course. Same as 103:177.
**003:117 Psychology of Language**  3 s.h.
Theoretical, empirical investigations of linguistic behavior; behaviorist, rationalist models in context of formal linguistic structure and context of models of speech perception and production. Offered spring semesters. Prerequisites: 103:100. GE: Social Sciences. Same as 103:172.

**003:118 Language Acquisition**  1-3 s.h.
Models of children’s language acquisition; child language/communication development from infancy through school age, in context of current developmental research. Offered spring semesters. Requirements: (for 003:118) 031:001 and 103:100; (for 103:176) 103:100 or 103:172. GE: Social Sciences. Same as 103:176.

**003:120 Clinical Observations in Communication Disorders**  2 s.h.
Diagnosis and treatment of a wide range of speech, language, or hearing disorders in a variety of settings; basic understanding of the evaluation process, goal setting, behavior management, pacing of therapy, shaping of behavior, tracking performance/learning, and professional and ethical behavior through observation of clinical interactions; completion of 25 hours of observation as required by the American Speech-Language-Hearing Association for obtaining national certification. Recommendations: senior or graduate standing in communication sciences and disorders.

**003:122 Speech Production: Anatomy and Physiology**  4 s.h.
Anatomy and physiology of the respiratory, phonatory, and articulatory systems and the systems’ roles during speech production; approaches to instrumental assessment of speech physiologic events.

**003:126 Neuroscience for Communication Science**  3 s.h.
Basic anatomy, physiology of central nervous system, emphasis on neural systems involved in normal and disordered communication.

**003:127 Introduction to Psycholinguistics**  3 s.h.
Theoretical and empirical investigations of linguistic behavior in the context of formal linguistic structure, models of speech perception and production; readings of text and research papers; audio-visual demonstrations of classical speech perception and production phenomena.

**003:140 Manual Communication**  1 s.h.
Training in use of sign systems in manual communication.

**003:145 Developmental Speech and Language Disorders**  3 s.h.
The nature of developmental disorders--basic concepts, including behavioral characteristics, developmental patterns, etiology theories; assessment and intervention principles in phonology, semantics, morphology, syntax. Offered fall semesters. Prerequisites: 003:015, 003:110 or 103:110, 003:112, and 003:118.

**003:146 Neurogenic Disorders of Language**  3 s.h.
Overview of communication disorders secondary to acquired brain damage in adults; focus on aphasia, communication disorders arising from dementia, right-hemisphere stroke, traumatic brain injuries; general principles of diagnosis and intervention. Offered fall semesters. Prerequisites: 003:015, 003:110 or 103:110, 003:112, and 003:116.

**003:147 Neurogenic Disorders of Speech**  2 s.h.
Speech disorders secondary to acquired brain damage in adults; clinical intervention issues. Offered spring semesters. Prerequisites: 003:116.
003:165 Communication Disorders and Aging 2 s.h.
Introduction to speech, language, and hearing processes and disorders among older adults; survey of characteristics of communication and communication breakdown, remediation, and strategies for improving communication with older adults with communication disorders; primarily for nonmajors and service providers other than speech-language pathologists and audiologists. Offered spring semesters of even years. Same as 153:165.

003:183 Introduction to Stuttering 2 s.h.
Theoretical perspectives on the nature of stuttering, including onset and development, basic phenomena, beginning treatment principles. Offered spring semesters. Prerequisites: 003:112.

003:185 Hearing Loss and Audiometry 3 s.h.
Introduction to profession of audiology; overview of hearing disorders, evaluation, treatment; basic pure-tone and speech audiometry. Offered fall semesters. Corequisites: 003:113, if not taken as a prerequisite.

003:186 Problems: Speech/Hearing Processes and Disorders arr.

003:187 Early Literacy Instruction for Young Children 2 s.h.
Service-learning involving lecture, class discussion, and student participation in an early literacy program for preschoolers; concepts and skills necessary to conduct story time groups with young children that target development of print knowledge; application of learning by reading to small groups of preschool children. Prerequisites: 003:118. Corequisites: 031:014 or 07P:106.

For Graduate Students

003:135 Foundations of Clinical Practice I 1-3 s.h.
Basic concepts of clinical practice, including models of diagnosis, fundamentals of clinical data collection and measurement, treatment planning, professional writing. Offered fall semesters. Prerequisites: 003:015, 003:110 or 103:110, 003:112, 003:118, and 07P:025. Corequisites: 003:145. Requirements: graduate standing.

003:136 Foundations of Clinical Practice II 1 s.h.
Advanced concepts of clinical practice, including principles of human behavior change, clinical decision making, generalization, transfer and maintenance, models of service delivery, ethical practice, advanced professional writing. Offered spring semesters. Prerequisites: 003:135. Requirements: graduate standing.

003:137 Foundations of Clinical Practice III 1 s.h.
Advanced principles of clinical practice, including risk management, public policy and models of third-party reimbursement, professional issues. Offered fall semesters. Prerequisites: 003:136. Requirements: graduate standing.

003:201 Principles of Voice Production 3 s.h.
Basic physical, physiological, pedagogical principles in understanding professional, nonprofessional, impaired voice production; vocal anatomy, voice classification; control of loudness, pitch, register, quality; efficient, inefficient use of voice; instrumentation for voice analysis, synthesis. Offered fall semesters of odd years. Same as 025:201.

003:202 Methods of Teaching Voice 3 s.h.
Attitude, musicianship, foreign language aptitude, physical and emotional characteristics; mental images used to modify respiratory, phonatory, articulatory behavior; vocal hygiene; performance anxiety; student-teacher relationships; administration in vocal schools, professional organizations. Offered spring semesters. Same as 025:202.
003:204 Voice for Performers  2 s.h.
Comparison of kinesthetic techniques for singing and acting voice; relaxation, posture, breathing, tone quality, diction, interpretation. Same as 025:216, 049:201.

003:206 Language Disorders in Children 0-18 Years  3 s.h.
Disorders resulting from phonological, semantic, pragmatic, and morphosyntactic deficits; receptive, expressive problems; special assessment and intervention procedures. Offered fall semesters of even years. Prerequisites: 003:145.

003:212 Voice Habilitation 2-3 s.h.
Application of methods of intervention in development, training, rehabilitation of vocal behavior; motor learning, efficacy of treatment strategies, factors affecting compliance with recommended therapy. Offered fall semesters. Prerequisites: 003:114 or 003:201. Requirements: enrollment in Summer Vocology Institute, Salt Lake City, Utah. Same as 025:356.

003:222 Speech and Hearing Anatomy  2 s.h.
Laboratory course in anatomy of speech and hearing mechanisms; instruction in dissection techniques. Offered summer sessions. Prerequisites: 003:112.

003:224 System and Signal Theory for Speech and Hearing Science  3 s.h.
Principles of linear-systems theory applied to speech and auditory research, including system functions, filter properties, convolution, Fourier Series, Fourier transform. Offered fall semesters. Requirements: introductory calculus.

003:230 Advanced Hearing Science and Speech Perception  3 s.h.
Perception of speech and other sounds by human listeners, how these perceptual abilities relate to the physiology of the auditory system; perception of speech by hearing-impaired listeners through hearing aids or cochlear implants. Offered spring semesters. Requirements: (for 003:230) 003:113; (for 103:230) background in phonetics, speech science, and hearing science. Same as 103:230.

003:233 Aphasia  2 s.h.
Assessment, diagnosis, and treatment of aphasia and other acquired language and cognition-based communication disorders. Offered spring semesters. Prerequisites: 003:117 and 003:146. Corequisites: 003:136.

003:234 Acquired Cognitive-Communication Disorders arr.
Cognitive, neuropsychological, and social aspects of communication and the management of acquired cognitive-communication disorders associated with traumatic brain injury, right hemisphere damage, and neurodegenerative diseases. Prerequisites: 003:116 and 003:146.

003:236 Swallowing Disorders  2 s.h.
003:237 Cleft Palate and Related Disorders 2 s.h.

003:238 Capstone Requirement 1 s.h.
Individual work with a faculty member on audiology topics; final Au.D. project. Offered spring semesters.

003:240 Hearing Aids I 3 s.h.
Hearing aids, diagnostic procedures; laboratory emphasis on measurement procedures. Offered spring semesters. Prerequisites: 003:185.

003:242 Hearing Aids II 1 s.h.
Evaluation, verification procedures; emphasis on advanced technologies, strategies. Offered fall semesters. Prerequisites: 003:240.

003:244 Rehabilitative Audiology 3 s.h.
Theory, procedures for assessment, rehabilitation of speech, hearing, language deficits of people with hearing impairment. Offered spring semesters. Prerequisites: 003:145 and 003:185.

003:245 Pediatric Audiology 3 s.h.
Theory, procedures for assessment, rehabilitation of pediatric populations; laboratory emphasis on test administration. Offered fall semesters. Prerequisites: 003:185.

003:246 Advanced Audiology 3 s.h.
Theory, procedures for assessment of hearing loss in adult and pediatric populations; experience in test administration through supervised laboratory sessions. Offered fall semesters. Prerequisites: 003:185.

003:247 Medical Audiology 2 s.h.
Genetic, acquired, traumatic pathologies that affect auditory systems; nature, etiology, principles of assessment, treatment. Offered spring semesters of odd years. Prerequisites: 003:185.

003:249 Cochlear Implants 1-3 s.h.
Introduction to cochlear implantation; history of cochlear implantation, introduction to cochlear technology, basics of device programming and troubleshooting, candidacy issues, outcomes in children and adults, auditory rehabilitation specific to cochlear recipients, the auditory brainstem implant, future trends in cochlear implantation. Offered fall semesters. Prerequisites: 003:185 and 003:244.

003:251 Biophysics of Speech and Hearing 4 s.h.
Cellular, molecular, and macromechanical description of tissues in the ear and the larynx involved in sound reception and production; basic elements of molecular and cell biology, continuum mechanics, and nonlinear dynamics in the transduction of acoustic waves to tissue vibration to cell response. Offered fall semesters of even years.

003:255 Educational Audiology 1 s.h.
Training in skills necessary for working with the school-age population; case management and aural rehabilitation, amplification and classroom hearing technology, identification and assessment practices, federal legislation that affects services. Offered fall semesters. Prerequisites: 003:185 and 003:244. Requirements: 003:240 for Au.D. students.

003:256 Anatomy and Physiology of Hearing 3-4 s.h.
Anatomy of auditory system, cochlear mechanics, electrophysiology of peripheral and central auditory nervous system; laboratory emphasis on physiological techniques for study of ear. Offered spring semesters. Prerequisites: 003:113 and 003:224.

003:260 Designing Assistive Devices 1-3 s.h.
System design (hardware and software) useful in building augmentative and alternative communication devices for the profoundly impaired; opportunity to build systems for theoretical and/or applied purpose; interdisciplinary, clinical perspectives. Offered summer sessions.
003:282 Phonological Development and Disorders 2 s.h.
Advanced topics in phonological development and disorders; current theoretical approaches to phonological analysis and typical phonological acquisition applied to assessment and intervention with children who have phonological disorders. Offered spring semesters.
Prerequisites: 003:110 or 103:110, 003:118, 003:135, and 003:145.

003:283 Stuttering 2 s.h.

003:290 Auditory Evoked Potentials 3 s.h.
Introduction to evoked potentials for assessing audiologic function. Offered spring semesters. Prerequisites: 003:219.

003:291 Vestibular Assessment and Rehabilitation 1-3 s.h.
Introduction to otoacoustic emissions, vestibular theory, and testing techniques. Offered fall semesters.

003:292 Advanced Rehabilitative Audiology 3 s.h.
Current and developing procedures for assessment, habilitation of adults and children with hearing losses. Offered spring semesters.

003:301 Practicum: Speech-Language Pathology arr.

003:303 Evidence-Based and Emerging Practices in Communication and Social Interaction for Individuals with Autism 1 s.h.
Evidence-based practices and emerging practices for promoting communication and social interaction skills in individuals with autism spectrum disorders; emphasis on intervention strategies specific to receptive and expressive language development, functional communication, social interaction, emotional regulation, play, structured learning environments, and opportunities.

003:304 Speech Pathology Student Teaching arr.
Supervised teaching and observation in an area of speech pathology in the elementary schools.

003:310 Scientific Writing 3 s.h.
Principles of writing for scientific posters, journal articles, grant proposals; effective communication of concepts and data.

003:311 Clinical Practice in Audiology arr.
Varied topics relevant to professional issues in audiology clinical practice; presentations by clinical faculty members and guest speakers. Requirements: M.A. professional emphasis or Au.D. enrollment.

Evaluation of individuals for hearing impairment and its impact; clinical practice. Repeatable. Requirements: M.A. professional emphasis.

003:314 Audiology Student Teaching arr.
Supervised teaching and observation in an area of audiology in the elementary schools.

003:315 Clinical Rotations in Audiology arr.
003:316 Advanced Externship in Audiology

003:317 Audiology Business Practice Management
Introduction to the development and management of an audiology practice; topics include short and long range business planning, general accounting, budgeting, establishing fees for service, coding and third party reimbursement, marketing, professional liability, certification and licensure; business and professional ethics. Requirements: Au.D. second-year or higher enrollment and 3.00 cumulative g.p.a.

003:318 Hearing Loss Prevention
Incidence and prevalence of hearing loss; risk factors and assessment; noise exposure guidelines; hearing protection devices; education and motivation. Prerequisites: 003:219.

003:350 Preceptorship in Augmentative Communication
Approaches to development of alternate modes of communication for individuals with limited oral communication. Offered fall semesters.

003:510 Seminar: Introduction to Research in Speech and Hearing
Philosophy of science; basic principles of research; issues in conducting research; review of research opportunities in the department. Offered fall semesters.

003:511 Introduction to Doctoral Research
Topics related to development and execution of research; doctoral program, use of library, human and animal subject issues, philosophy of science, use of common research tools, reading and writing research papers, research grant preparation. Offered fall and spring semesters.

003:515 Proseminar
Presentation of research ideas, results by faculty, students. Repeatable.

003:519 Seminar: Evidence-Based Practice
Introduction to design and conduct of research and evidence-based clinical practice, observation and measurement, population sampling, group and single-subject research designs, treatment research, data organization and analysis, and presenting research results in graphic and written form; issues concerning research ethics and the protection of human subjects in research. Recommendations: clinical graduate student in audiology or speech-language pathology. Recommendations: clinical graduate standing in audiology or speech-language pathology.

003:520 Seminar: M.A. Language
Research literature related to language. Offered spring semesters of odd years. Repeatable.

003:522 Clinical Speech Physiology
Current approaches to the study of speech physiology and application in clinical practice; focus on providing hands-on experiences with common instrumental approaches to studying speech physiology, developing an appreciation of the factors and limitations that must be considered in applying and interpreting the findings of these approaches clinically, and developing abilities to critically evaluate the literature in this area.

003:526 Seminar: Rehabilitative Audiology
Theoretical issues, research literature. Offered fall semesters. Repeatable.

003:528 Seminar: Ph.D. Language
Theoretical issues related to language. Offered spring semesters. Repeatable.

003:538 Seminar: Hearing Science
Selected topics. Offered fall semesters of even years. Repeatable.

003:590 Research
Arr. Repeatable.
Communication Studies

Interim chair
Marc P. Armstrong

Professors
Leslie Baxter, Steve Duck (Daniel and Amy Starch Distinguished Research Chair, Communication Studies/Psychology), Kristine L. Muñoz, John Durham Peters (A. Craig Baird Professor)

Professors emeriti
Samuel L. Becker, David Depew, Bruce E. Gronbeck, Hanno Hardt, Robert Kemp, George Klingler, Donovan J. Ochs

Associate professors
Shelly Campo (Communication Studies/Community and Behavioral Health), Timothy Havens (Communication Studies/African American Studies), Joy Hayes, David Hingstman, Kembrew McLeod

Assistant professors
Jeff Bennett, Jiyeon Kang, Rachel McLaren, Keli Steuber, Isaac West, Rita Zajacz

Undergraduate degree: B.A. in Communication Studies
Undergraduate nondegree program: Minor in Communication Studies

The Department of Communication Studies focuses on the study of human communication as a social practice. Scholarship and teaching in the department center on the role that human communication processes play in the construction, maintenance, reinforcement, and reformation of various aspects of social, professional, and institutional life.

The department provides a liberal-arts-based undergraduate education that prepares students to meet the complex communication challenges of the 21st century. It provides top-ranked doctoral education and is a national and international leader in research and knowledge dissemination.

The department has three areas of specialization. The rhetoric and discourse specialization focuses on how citizens use public argumentation and other rhetorical processes to bring about cultural, social, and political changes. The media studies specialization focuses on modern media in their cultural, economic, historical, political, and social contexts to understand how society and social relations shape and are shaped by media practices. The interpersonal communication and relationships specialization focuses on how the communicative practices of relating in everyday life construct, shape, sustain, and change who people are as individuals, as well as the quality of their lives.

The Department of Communication Studies encourages exploration of the practical, political, social, and aesthetic dimensions of symbolic exchange and awareness of the relationships among these dimensions. The department has produced many influential scholars and artists and has been a hub for the intersection of programs and projects of the University and other institutions.

Undergraduate Programs

- Major in communication studies (Bachelor of Arts)
- Minor in communication studies

First-year students interested in completing a major in communication studies are advised at the Academic Advising Center. Students who have earned 24 s.h. or more and have declared the communication studies major are advised in the department by the communication studies academic counselor.

Bachelor of Arts

The Bachelor of Arts with a major in communication studies requires a minimum of 120 s.h., including 36 s.h. of work for the major. Students must complete the College of Liberal Arts and Sciences General Education Program (p. 381).

The curriculum is designed to encourage learning that progresses from foundation courses that teach the basics of communication to intermediate and advanced (capstone) courses. Students may choose to build creative combinations of course work that suit their individual learning and career goals.

Students may count up to 50 s.h. of communication studies course work toward credit required for the Bachelor of Arts degree. Guided Independent Study and transfer courses may be accepted as long as the student meets University of Iowa and College of Liberal Arts and Sciences residency requirements and the department approves the courses; a maximum of 15 s.h. of transfer credit may be counted toward the degree.

Students must have a cumulative g.p.a. of at least 2.50 in order to enroll in most communication studies courses.

Students work with the department academic counselor to develop study plans that meet the requirements of the communication studies major.
They may check their progress toward the degree by logging on to ISIS (Iowa Student Information Services).

Students are encouraged to discuss their career goals and interests with faculty members.

The 36 s.h. required for the communications studies major consists of foundation courses (15 s.h.), intermediate courses (12 s.h.), a capstone course (3 s.h.), and an additional 6 s.h., which may be earned in courses listed under "Intermediate Courses," "Capstone Experience," and/or "Additional Courses" below. Students may not use one course to satisfy more than one requirement for the major.

**FOUNDATIONS OF COMMUNICATION**

Foundation courses cover introductory concepts in the field of communication. Students must complete five foundation courses (15 s.h.) and should take them early in their studies.

The following foundation courses are appropriate for first-year students. They do not have a minimum grade-point average required for enrollment, and none has prerequisites except 036:017, which requires fulfillment of the General Education rhetoric requirement for enrollment. Students complete three of these, as follows.

One of these:

- 036:012 Interpersonal Communication 3 s.h.
- 036:070 Communication Theory in Everyday Life 3 s.h.

One of these:

- 036:017 Theory and Practice of Argument 4 s.h.
- 036:030 The Art of Persuading Others 3 s.h.

And one of these:

- 036:068 Media, Music, and Culture 3 s.h.
- 036:074 Media and Society 3 s.h.

The fourth and fifth foundation courses are appropriate for second-year students. Enrollment in these courses requires completion of 30 s.h. and a g.p.a. of at least 2.50 for University of Iowa and transfer course work. Students complete both of these:

- 036:001 Core Concepts in Communication Studies 3 s.h.
- 036:005 Studying Communication: Methods and Critiques 3 s.h.

**INTERMEDIATE COURSES**

Intermediate courses cover detailed aspects of the study of communication. Students must complete four intermediate courses (12 s.h.), usually during their third and fourth years of study. They must have completed the five foundation courses listed above and must have a cumulative g.p.a. of at least 2.50 in order to enroll in intermediate courses.

At least four of these (12 s.h.):

- 036:011 Group Communication 3 s.h.
- 036:016 Business and Professional Communication 3 s.h.
- 036:040 Communication and Conflict 3 s.h.
- 036:041 Gender Roles and Communication 3 s.h.
- 036:042 Intercultural Communication 3 s.h.
- 036:043 Rhetoric, Science, and Technology 3 s.h.
- 036:044 Political Communication 3 s.h.
- 036:048 Transforming Media: From Telegraph to Internet 3 s.h.
- 036:051 Politics of Popular Culture 3 s.h.
- 036:053 Secrets, Confidences, and Lies: Privacy Management in Interpersonal Relationships 3 s.h.
- 036:054 Movements, Protest, Resistance 3 s.h.
- 036:061 Persuasion in Society 3 s.h.
- 036:062 Feminist Critical Practice 3 s.h.
- 036:064 Media, Advertising, and Society 3 s.h.
- 036:065 Television Criticism 3 s.h.
- 036:071 Communication and Critical/Cultural Studies 3 s.h.
- 036:075 Gender, Sexuality, and Media 3 s.h.
- 036:076 Race, Ethnicity, and Media 3 s.h.
- 036:083 Networking America: The Cultural History of Broadcasting 3 s.h.
- 036:085 Media Industries and Organizations 3 s.h.
- 036:086 Global Media Studies 3 s.h.
- 036:087 Culture and Intellectual Property Law 3 s.h.
- 036:088 Media and Democracy 3 s.h.
- 036:089 Nonverbal Communication 3 s.h.
- 036:090 Topics in Communication Studies 3 s.h.
- 036:091 Organizational Communication 3 s.h.
- 036:095 Queer Rhetorics 3 s.h.

**CAPSTONE EXPERIENCE**

Students must complete one capstone course (3 s.h.), a faculty-led experience in which they participate directly in producing knowledge, research, or creative work about communication.
The capstone experience gives students a chance to synthesize what they have learned about the study of communication.

In order to enroll in a capstone course, students must have completed at least two of the required intermediate courses and must have a cumulative g.p.a. of at least 2.50. Most students take the capstone course during their senior year.

One of these (3 s.h.):

- 036:140 Communication and Relationships 3 s.h.
- 036:142 Advanced Intercultural Communication 3 s.h.
- 036:143 Classical Rhetoric and Greek Culture 3 s.h.
- 036:145 Argument and Law 3 s.h.
- 036:146 Issues in Rhetoric and Culture 3 s.h.
- 036:147 Family Communication 3 s.h.
- 036:150 Cultural History of Advertising 3 s.h.
- 036:151 Cultural History of Television 3 s.h.
- 036:152 Latin American Media 3 s.h.
- 036:153 Communication Technologies in History 3 s.h.
- 036:155 Visual Rhetoric 3 s.h.
- 036:156 Feminist Visual Rhetoric 3 s.h.
- 036:157 Advanced Topics in Communication Studies 3 s.h.
- 036:158 Rhetoric and Past Public Controversy 3 s.h.
- 036:160 The Talk of Everyday Life 3 s.h.
- 036:163 The Dark Side of Interpersonal Communication 3 s.h.
- 036:165 Criticism and Public Culture 3 s.h.
- 036:166 Life-Span Communication 3 s.h.
- 036:167 Communication, Cognition, and Emotion 3 s.h.
- 036:168 Rhetoric of the Body 3 s.h.
- 036:170 Theories of Persuasion 3 s.h.
- 036:172 Television and African American Culture 3 s.h.
- 036:173 Social Media, Culture, and Politics 3 s.h.
- 036:174 Communication, Technology, and National Security 3 s.h.
- 036:176 Advanced Relational Theory 3 s.h.
- 036:181 Legal Communication and Culture 3 s.h.

**ADDITIONAL COURSES**

Students earn an additional 6 s.h. to complete the 36 s.h. in communication studies courses required for the major. They may choose from the courses listed below and/or from the lists of intermediate and capstone courses above. However, students may not use one course to fulfill more than one requirement for the major, so in selecting the additional 6 s.h. of course work, they may not choose a course they already used to fulfill the intermediate or capstone course requirement.

The following courses are open to all students; they do not have prerequisites or require a minimum grade-point average requirement for enrollment.

- 036:013 Practicum in Debate 1 s.h.
- 036:014 Elements of Debate 3 s.h.
- 036:018 Leadership and Organizational Procedures 2 s.h.
- 036:019 Organizational Leadership 2-3 s.h.

The following courses have prerequisites, a minimum grade-point average, or other requirements for enrollment.

- 036:002 Workshop in Debate and Forensics 3 s.h.
- 036:028 Communication Studies Internship arr.
- 036:100 Independent Study arr.
- 036:101 Honors Workshop 1 s.h.
- 036:102 Honors Thesis 3 s.h.
- 036:105 Workshop in Teaching Communication and Forensics arr.

**Internships**

Internships enable students to supplement their course work with professional experiences relevant to careers in communication-related fields. The department’s internship program is open only to communication studies majors.

To earn academic credit for internships, students must obtain approval for their internship experience and site before they register for 036:028 Communication Studies Internship (arr.). Internship academic credit is awarded for an analytical paper and daily log submitted at the end of the internship and for the number of hours worked. Internships can be completed during fall semester, spring semester, or summer session.

Visit the department’s web site for information on communication studies internships.

**Four-Year Graduation Plan**

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan. Students who have
signed the four-year graduation agreement should consult the department for details.

**Before the third semester begins**: at least one-quarter of the semester hours required for graduation

**Before the fifth semester begins**: at least two courses in the major and at least one-half of the semester hours required for graduation

**Before the seventh semester begins**: at least six courses in the major and at least three-quarters of the semester hours required for graduation

**Before the eighth semester begins**: at least eight courses in the major

**During the eighth semester**: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

### Honors

The department encourages outstanding undergraduates to take part in the honors program. To graduate with honors in communication studies, students must maintain a cumulative University of Iowa g.p.a. of at least 3.33, be a member of The University of Iowa Honors Program, and complete the following courses.

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Semester Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>036:101</td>
<td>Honors Workshop (seminar offered fall semesters only)</td>
<td>1 s.h.</td>
</tr>
<tr>
<td>036:102</td>
<td>Honors Thesis (usually taken final semester before graduation)</td>
<td>3 s.h.</td>
</tr>
</tbody>
</table>

In special cases, independent study course work may be substituted for the Honors Workshop, with the honors advisor’s permission. Additional course work may be required by the student’s honors advisor.

To begin work toward a degree with honors in communication studies, students choose a faculty member to supervise their honors project and act as their honors advisor.

Students the honors program are eligible to take courses offered through the University of Iowa Honors Program and to add an honors designation to any other departmental course by completing an agreement with the course instructor for special work in that course.

For detailed information, see Honors Program in Communication Studies on the department’s web site.

### Minor

The minor in communication studies requires a minimum of 18 s.h. in communication studies courses, including 12 s.h. in courses taken at The University of Iowa. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass. The minor must include the five courses (15 s.h.) listed under "Foundations of Communication" above and one (3 s.h.) listed under "Intermediate Courses" above. Although students must maintain a g.p.a. of at least 2.00 in courses taken for the minor, they must have a cumulative g.p.a. of at least 2.50 in order to enroll in some of the courses required for the minor.

### Forensics/Debate

Students in the forensics/debate program have the opportunity to participate in on-campus debates, in developmental programs designed to improve speech activities in the state, and as members of competitive intercollegiate debate teams. Forensics scholarships are available. Students interested in debate should enroll in 036:013 Practicum in Debate or 036:014 Elements of Debate.

### Graduate Programs

- Master of Arts in communication studies
- Doctor of Philosophy in communication studies

The Doctor of Philosophy program in communication studies includes specializations in interpersonal communication and relationships, media studies, and rhetoric and discourse.

Graduate education in communication studies focuses on the Ph.D., but doctoral students may choose to earn a Master of Arts on their way toward the Ph.D. A terminal master’s degree may be an option for some students already admitted to the doctoral program.

### Master of Arts

The Master of Arts degree in communication studies requires a minimum of 30 s.h. of graduate credit. It may be granted to students working toward the Ph.D.; it also may be granted as a terminal degree for doctoral students who decide not to complete the Ph.D. All master’s students take 036:200 Introduction to Research and Teaching (3 s.h.) and at least two courses numbered 200 or above. They also prepare a graduate seminar paper that involves significant original research. For a detailed description of M.A. requirements, see the Communication Studies Graduate Student Handbook.
Doctor of Philosophy

The Doctor of Philosophy degree in communication studies requires a minimum of 82 s.h. of graduate credit, including dissertation credit. All students take 036:200 Introduction to Research and Teaching and earn at least 10 s.h. of dissertation credit in 036:399 Ph.D. Dissertation.

Ph.D. students must take a 3 s.h. course in each of the program’s three areas of specialization; successfully complete a qualifying examination during their second or third semester and a comprehensive (predissertation) examination in their major research area during their fifth or sixth semester; and write a substantial scholarly dissertation. Students must maintain a cumulative g.p.a. of at least 3.00 throughout the graduate program.

Admission usually is for fall semester entry. Applicants whose materials are received at the department by January 1 receive preference for admission and financial support. Admission decisions are based on undergraduate achievement, letters of reference, Graduate Record Examination (GRE) General Test scores, the statement of purpose, and samples of scholarly work.

Interpersonal Communication and Relationships

The communication and relationships program is centered on theory complemented by strength in quantitative and qualitative research methods. It focuses on scholarly issues that arise from face-to-face, everyday communication practices. It emphasizes personal relationship and family processes, identity construction, persuasion, and culture.

The goal of the program is to produce scholars who possess sophisticated knowledge of theory and methodology, who are aware consumers of theories and methods, and who can develop their own approaches to communication phenomena. The program emphasizes systematic analysis of the forms, functions, and meanings of messages within various contexts. Its broad social-scientific orientation springs from the belief that many methodological approaches are appropriate to studying and building theoretical explanations of communication.

Graduate students typically enter the program to earn a Ph.D. Advisors and committee members work closely with individual students to select courses from communication studies and other University departments and plan teaching and research experiences that will prepare students well for the employment they seek after graduation.

Media Studies

The graduate program in media studies focuses on the interplay of institutions, texts, and audiences in mediated communication systems. Its central aim is to examine modern media—radio, television, advertising, music, new media, and a wide range of other popular cultural expressions—within their historical, social, political, economic, and cultural contexts. It also uses the mass media as sites for asking basic questions about culture, society, politics, and modernity.

Like the department’s other graduate programs, media studies has a strong interdisciplinary flavor. Students draw not only on allied areas in the Department of Communication Studies but on fields across the University.

Rhetoric and Discourse

The program in rhetoric and discourse is built on foundation courses in classical and 20th-century rhetorical theory and in an overview of 20th-century rhetorical criticism. Courses from a rhetorical perspective include rhetorical theory, rhetorical criticism, visual rhetoric and politics, public address and public culture, studies in argumentation and freedom of speech, work in science and technology as well as academic inquiry, and historical methods. Cognate work of interest to rhetoricians also can be found in interpersonal communication and relationship studies as well as media studies.

The Ph.D. in rhetoric and discourse is designed to give students a mature grasp of the specialties and perspectives embraced by the field and to develop research competence essential to a life of productive scholarship.

Work in related disciplines—political science, history, sociology, English, cinema and comparative literature, anthropology, American studies, and journalism—complements rhetorical studies course offerings. Faculty from the Departments of Rhetoric, Political Science, and American Studies cross-reference their courses on rhetorical topics in this program.

The Project on Rhetorics of Inquiry (p. 1187) (POROI) offers a certificate program, allowing doctoral students to specialize in the study of how academic fields use argumentative and linguistic strategies to generate and control knowledge. Many doctoral students also do extensive work in media studies or interpersonal communication to improve their range of teaching opportunities and their research skills.
Admission

Applicants to graduate programs in communication studies must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate (p. 1117) College section of the Catalog.

Facilities

The Samuel L. Becker Communication Studies Building is designed to meet the department’s research and technological needs.

Courses

Courses numbered below 200 are intended primarily for undergraduates; those numbered 200 and above are for graduate students. Graduate students may take 100-level courses for credit, with their committee’s approval.

Not all courses are offered each semester.

For Undergraduates

To register for most undergraduate communication studies courses, students must have earned 30 s.h. and have a cumulative g.p.a. of at least 2.50. However, registration for the following General Education courses is open to all undergraduates, regardless of their grade-point average: 036:017 Theory and Practice of Argument, 036:070 Communication Theory in Everyday Life, and 036:074 Media and Society. Registration in 036:029 First-Year Seminar is open to first- and second-semester students regardless of grade-point average.

036:001 Core Concepts in Communication Studies 3 s.h.
Introduction to communication topics; face-to-face interaction, public speaking, globally-distributed film, music, and television; ways of thinking, vocabulary, and overview of concepts used in other communication studies courses. Requirements: g.p.a. of at least 2.50 and 30 s.h. of credit.

036:002 Workshop in Debate and Forensics 3 s.h.
Public argument on questions of value and policy; opportunities for demonstration and practice in discussion and debate. Requirements: concurrent enrollment in the National Summer Institute in Forensics.

036:005 Studying Communication: Methods and Critiques 3 s.h.
Social scientific methods used to generate knowledge about communication processes; basic tools necessary to conduct and evaluate communication research; epistemological perspectives, research procedures, and data analysis; readings and hands-on activities. Communication studies majors may apply to this course to the following area requirement. AREA: Research and Criticism. Requirements: g.p.a. of at least 2.50 and 30 s.h. of credit.

036:011 Group Communication 3 s.h.
Study of relevant theory, research, and application to increase understanding of communication in small groups; critical thinking and communication skills; individual roles in groups, creativity, leadership, decision making, problem solving, and conflict resolution. Communication studies majors may apply this course to the following area requirement. AREA: Practice. Prerequisites: 036:001, 036:005, 036:012 or 036:070, 036:017 or 036:030, and 036:074. Requirements: completion of Foundations of Communication requirement.

036:012 Interpersonal Communication 3 s.h.
Introduction to face-to-face communication in social and personal relationships; maximizing communicative effectiveness in relationships with knowledge about how communication functions; analysis of one’s own and others’ communication practices and experiences. Communication studies majors may apply this course to the following area requirement. AREA: Practice.

036:013 Practicum in Debate 1 s.h.
Practice of skills in research, reasoning, argument development, and argumentative performance in debate undertaken by members of the A. Craig Baird Debate Forum in preparation for and participation in intercollegiate debate competition. Communication studies majors may apply this course to the following area requirement. AREA: Practice. Requirements: participation in A. Craig Baird Debate Forum.
036:014 Elements of Debate 3 s.h.
Debates that occur everyday in a wide variety of situations and settings; how to recognize when a debate is occurring and the different procedures by which people conduct debates; emphasis on development of personal advocacy skills and how one goes about teaching those same skills to others by example and practice; examination of the role of debate in achieving collective economic and political purposes in contemporary societies. Communication studies majors may apply this course to the following area requirement. AREA: Practice. Requirements: g.p.a. of at least 2.60 and 30 s.h. of credit.

036:016 Business and Professional Communication 3 s.h.
Introduction to business and professional communication at individual and corporate levels; individual-level topics cover organizational communication, business vocabulary, speaking and writing, professionalism and interviewing; corporate-level topics focus on marketing, advertising, public relations, corporate communications, crisis communication management, business and communication plans, proposals; guest speakers from for-profit and not-for-profit organizations. Communication studies majors may apply this course to the following area requirement. AREA: Practice. Prerequisites: 036:001, 036:005, 036:012 or 036:070, 036:017 or 036:030, and 036:074. Requirements: completion of Foundations of Communication requirement.

036:017 Theory and Practice of Argument 4 s.h.
Public arguments as practiced in law, politics, science, and other public arenas; improvement of skills in researching, constructing, organizing, and presenting arguments on disputed subjects; analyzing and refuting arguments of others; developing a better understanding of how scholars apply the tools of formal and informal logic in a variety of disciplines to improve the quality of academic argument. Communication studies majors may apply this course to the following area requirement. AREA: Practice. Requirements: completion of General Education Program rhetoric component. GE: Quantitative or Formal Reasoning.

036:018 Leadership and Organizational Procedures 2 s.h.
Use of organizational procedures to facilitate discussion, from by-laws to full parliamentary procedure; knowledge of effective organizational procedures enhances ability to participate in meetings and organizational business runs more smoothly; benefits instructors of speech communication with inclusion of parliamentary procedure/debate units. Offered only through Guided Independent Study. Communication studies majors may apply this course to the following area requirement. AREA: Practice.

036:019 Organizational Leadership 2-3 s.h.
Introduction to the nature of leadership, styles of leadership that are most effective, and ways in which obstacles may be overcome in groups or organizations; different approaches to qualities of leadership, role of visions and motivation, interpersonal and decision-making skills, meeting preparation and evaluation, and related communication skills. Offered only through Guided Independent Study. Communication studies majors may apply this course to the following area requirement. AREA: Practice.

036:021 Oral Interpretation 3 s.h.
Communication studies majors may apply this course to the following area requirement. AREA: Practice. Requirements: (for 036:021) g.p.a. of at least 2.60 and 30 s.h. of credit. Same as 07E:021.

036:028 Communication Studies Internship arr.
Communication skills, knowledge in work assignments related to students’ academic and career interests; full- or part-time, on or off campus. Communication studies majors may apply this course to the following area requirement. AREA: Practice. Requirements: g.p.a. of at least 2.50, communication studies major, and completion of Foundations of Communication requirement.

036:029 First-Year Seminar 1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.
036:030 The Art of Persuading Others 3 s.h.
Basic theoretical concepts of effective public communication; employ knowledge of concepts in analyzing texts; definition and influence of the rhetorical situation, different elements of persuasion (message logic, appeal to feelings, character of the speaker), ability of speakers to invent arguments; issues of judgment, public discourse, identity, and agency. Communication studies majors may apply this course to the following area requirement. AREA: Practice.

036:040 Communication and Conflict 3 s.h.
Conflict and its management as critical issues that pervade people’s personal and professional lives; complexities of conflict; forces that make conflict challenging; skills for thinking about and managing conflict more effectively; central features that define conflict; behaviors, attributions, and emotions that are manifest during conflict; formal models of conflict management and their corresponding recommendations for handling conflict. Communication studies majors may apply this course to the following area requirement. AREA: Context. Prerequisites: 036:001, 036:005, 036:012 or 036:070, 036:017 or 036:030, and 036:074. Requirements: g.p.a. of at least 2.50 and completion of Foundations of Communication requirement. Same as 042:042, 187:042.

036:041 Gender Roles and Communication 3 s.h.
Interactive relationships between gender and communication in contemporary U.S. society; multiple ways families, schools, and media perpetuate, negotiate, and contest gender roles; how we are part of those processes by looking at how we enact socially-created gender differences in public and private settings. Communication studies majors may apply this course to the following area requirement. AREA: Practice. Prerequisites: 036:001, 036:005, 036:012 or 036:070, 036:017 or 036:030, and 036:074. Requirements: g.p.a. of at least 2.50 and completion of Foundations of Communication requirement. Same as 131:041.

036:042 Intercultural Communication 3 s.h.
Culture defined as a system of taken-for-granted assumptions about the world that influence how people think and act; cultural differences that produce challenges and opportunities for understanding and communication; those differences from several theoretical perspectives; opportunities to examine culture and cultural differences in practical, experience-driven ways. Communication studies majors may apply this course to the following area requirement. AREA: Context. Prerequisites: 036:001, 036:005, 036:012 or 036:070, 036:017 or 036:030, and 036:074. Requirements: g.p.a. of at least 2.50 and completion of Foundations of Communication requirement.

036:043 Rhetoric, Science, and Technology 3 s.h.
How science and technology shape culture; media representations of technology; role of rhetoric in science and technology, especially in the physical and biological sciences; cultural implications of the information revolution. Communication studies majors may apply this course to the following area requirement. AREA: Context. Prerequisites: 036:001, 036:005, 036:012 or 036:070, 036:017 or 036:030, and 036:074. Requirements: g.p.a. of at least 2.50 and completion of Foundations of Communication requirement.

036:044 Political Communication 3 s.h.
Relationship between media, cultural politics, and the American political system; focus on advertising, campaigns, and new media outlets; ways politicians, the press, and intermediaries create and disseminate messages into mainstream culture; how people generate their own discourses of political identity and dissent, creating a robust democratic practice that is both empowering and central to the contemporary political landscape. Communication studies majors may apply this course to the following area requirement. AREA: Context. Prerequisites: 036:001, 036:005, 036:012 or 036:070, 036:017 or 036:030, and 036:074. Requirements: g.p.a. of at least 2.50 and completion of Foundations of Communication requirement.
**036:048 Transforming Media: From Telegraph to Internet**  
3 s.h.
Communication media as global phenomena in which U.S. corporate and government interests play a major part; from electronic telegraph to broadcasting and cable, an investigation of historical contexts in which these media emerged and tracing the ways in which they have been shaped by political, economic, and social relations of power. Communication studies majors may apply this course to the following area requirement. AREA: Context. Prerequisites: 036:001, 036:005, 036:012 or 036:070, 036:017 or 036:030, and 036:074. Requirements: g.p.a. of at least 2.50 and completion of Foundations of Communication requirement.

**036:051 Politics of Popular Culture**  
3 s.h.
How culture is political and how politics is cultural; overview of theories of culture and critical-cultural approaches to the study of popular culture, past and present; specific topics of analysis vary, may include television, celebrity culture, music, film, games, sports, and more. Communication studies majors may apply this course to the following area requirement. AREA: Context. Prerequisites: 036:001, 036:005, 036:012 or 036:070, 036:017 or 036:030, and 036:074. Requirements: g.p.a. of at least 2.50 and completion of Foundations of Communication requirement.

**036:053 Secrets, Confidences, and Lies: Privacy Management in Interpersonal Relationships**  
3 s.h.
How individuals manage private information with regard to their interpersonal relationships; multiple theories of privacy management; how aspects of the information, the individual, and the target of disclosure all contribute to decisions to reveal or conceal private information to friends and family. Communication studies majors may apply this course to the following area requirement. AREA: Context. Prerequisites: 036:001, 036:005, 036:012 or 036:070, 036:017 or 036:030, and 036:074.

**036:054 Movements, Protest, Resistance**  
3 s.h.
Historical and contemporary study of social movements from a symbolic perspective (e.g., speeches, protests, propaganda, media events); social movements as interpersonal and group communication; relationships between media and social change; the efficacy of individual and larger-scale forms of resistance. Communication studies majors may apply this course to the following area requirement. AREA: Context. Prerequisites: 036:001, 036:005, 036:012 or 036:070, 036:017 or 036:030, and 036:074. Requirements: g.p.a. of at least 2.50 and completion of Foundations of Communication requirement.

**036:061 Persuasion in Society**  
3 s.h.
Introduction to concepts, theories, and methods designed to build critical understanding of mass persuasion processes; persuasion theory and research; theories that account for the processes of social acculturation, maintenance, and change; specific mass persuasion processes (i.e., advertising, corporate advocacy or public relations, film and television programming, sociopolitical rituals, and social protest and change). Communication studies majors may apply this course to the following area requirement. AREA: Research and Criticism. Prerequisites: 036:001, 036:005, 036:012 or 036:070, 036:017 or 036:030, and 036:074. Requirements: g.p.a. of at least 2.50 and completion of Foundations of Communication requirement.

**036:062 Feminist Critical Practice**  
3 s.h.
Feminist approaches to communicative practices. Communication studies majors may apply this course to the following area requirement. AREA: Research and Criticism. Prerequisites: 036:001, 036:005, 036:012 or 036:070, 036:017 or 036:030, and 036:074. Requirements: g.p.a. of at least 2.50 and completion of Foundations of Communication requirement.
036:064 Media, Advertising, and Society 3 s.h.
Introduction to the critical study of advertising in the United States; advertising contextualized as an industry and as a key part of media and culture; advertising as an institution and as a series of symbols, ideas, and fantasies; how advertising works—the role and function of advertising in culture and society. Communication studies majors may apply this course to the following area requirement. AREA: Research and Criticism. Prerequisites: 036:001, 036:005, 036:012 or 036:070, 036:017 or 036:030, and 036:074. Requirements: g.p.a. of at least 2.50 and completion of Foundations of Communication requirement.

036:065 Television Criticism 3 s.h.
Introduction to scholarly study of television as a social institution; nature of television form and content; role of the industry itself in the creation, selection, and presentation of television programs; production conventions and textual conventions in defining the medium; application of genre and narrative theory, semiotics, political economy of media industries, and audience reception study. Communication studies majors may apply this course to the following area requirement. AREA: Research and Criticism. Prerequisites: 036:001, 036:005, 036:012 or 036:070, 036:017 or 036:030, and 036:074. Requirements: g.p.a. of at least 2.50 and completion of Foundations of Communication requirement.

036:068 Media, Music, and Culture 3 s.h.
What makes popular music important for people; music's power to change culture; production, distribution, reception of popular music in cultural and historical contexts. Communication studies majors may apply this course to the following area requirement. AREA: Research and Criticism.

036:070 Communication Theory in Everyday Life 3 s.h.
General overview of everyday life communication and the theories and research techniques used to understand it; sheer depth and complexity of processes in communication that occur in everyday lives and which appear to be trivial; how to observe conversations and identify what is really happening in them; ways in which scholars explain everyday communication and how it works; applications of theoretical thinking to explain processes of everyday communication. Communication studies majors may apply this course to the following area requirement. AREA: Theory. GE: Social Sciences.

036:071 Communication and Critical/Cultural Studies 3 s.h.
Engagement of cutting-edge rhetorical and social theories; ways in which rhetorical and social theories play out in daily life, especially in decision-making activities; weekly readings, class discussions. Communication studies majors may apply this course to the following area requirement. AREA: Research and Criticism. Prerequisites: 036:001, 036:005, 036:012 or 036:070, 036:017 or 036:030, and 036:074. Requirements: g.p.a. of at least 2.50 and completion of Foundations of Communication requirement.

036:074 Media and Society 3 s.h.
Processes and effects of mass communication; how mass media operate in the United States; how mass communication scholars develop knowledge. Communication studies majors may apply this course to the following area requirement. AREA: Theory. GE: Social Sciences; Values, Society, and Diversity.
036:075 Gender, Sexuality, and Media
Mediated representations of gender and sexuality (television, film, and internet) to understand how these complex and complicated codes influence the meaning of sex, sexuality, and gender; contemporary and historical examples used to engage texts that illuminate cultural conceptions of femininity, masculinity, heterosexuality, and homosexuality; cases that confuse and trouble the stability of these categories. Communication studies majors may apply this course to the following area requirement. AREA: Theory. Prerequisites: 036:001, 036:005, 036:012 or 036:070, 036:017 or 036:030, and 036:074. Requirements: g.p.a. of at least 2.50 and completion of Foundations of Communication requirement. Same as 131:065.

036:076 Race, Ethnicity, and Media
Introduction to debates about media portrayals of race and ethnicity; focus primarily on entertainment media; use of general analytic perspectives--stereotype analysis, aesthetic analysis, history--applied to real-world examples; address one or more racial/ethnic groups in the United States. Communication studies majors may apply this course to the following area requirement. AREA: Theory. Prerequisites: 036:001, 036:005, 036:012 or 036:070, 036:017 or 036:030, and 036:074. Requirements: g.p.a. of at least 2.50 and completion of Foundations of Communication requirement. Same as 129:076.

036:083 Networking America: The Cultural History of Broadcasting
Exposure to different interpretations of the cultural impact and legacy of U.S. broadcasting in the 20th century; institutional practices, program genres, and audience formations of the radio and television network eras of the 1920s-1970s; how historical contexts shape, and are shaped by, production and reception of broadcasting texts. Communication studies majors may apply this course to the following area requirement. AREA: Context. Prerequisites: 036:001, 036:005, 036:012 or 036:070, 036:017 or 036:030, and 036:074. Requirements: g.p.a. of at least 2.50 and completion of Foundations of Communication requirement.

036:085 Media Industries and Organizations
Trends in media industries as reflected in changes of ownership, different work conditions, media convergence, and globalization generally; focus on local, network, and cable television; examination of industry structures, business practices, economic fundamentals, and theoretical explanations of media industries in society. Communication studies majors may apply this course to the following area requirement. AREA: Practice. Prerequisites: 036:001, 036:005, 036:012 or 036:070, 036:017 or 036:030, and 036:074. Requirements: g.p.a. of at least 2.50 and completion of Foundations of Communication requirement.

036:086 Global Media Studies
Key developments in contemporary international communication; impact of deregulation and privatization on the ownership and control of the global communication infrastructure; spread of American television abroad in terms of production, texts, and reception; cultural concerns surrounding the phenomenon. Communication studies majors may apply this course to the following area requirement. AREA: Context. Prerequisites: 036:001, 036:005, 036:012 or 036:070, 036:017 or 036:030, and 036:074. Requirements: g.p.a. of at least 2.50 and completion of Foundations of Communication requirement.

036:087 Culture and Intellectual Property Law
How digital technologies have dramatically changed media and popular culture landscapes; the advent of relatively cheap editing programs that allow anyone to collage media on their home computers and enable people to become cultural producers; technologies that allow more people to break the law in the eyes of copyright industries; historical look at collage practices, from pre-digital era to present; ethical and legal questions surrounding the use and re-use of copyrighted materials; the notion of free speech in a media age. Communication studies majors may apply this course to the following area requirement. AREA: Context. Prerequisites: 036:001, 036:005, 036:012 or 036:070, 036:017 or 036:030, and 036:074. Requirements: g.p.a. of at least 2.50 and completion of Foundations of Communication requirement.
036:088 Media and Democracy  3 s.h.
Exploration of the relationship between democracy and mass communication; why controversies regarding mass communication are also controversies about democracy; the logical relationship between democracy and mass media; roots and history of ideas of democracy, contemporary obstacles to the realization of these ideas, and varied issues of the present; latest developments in the world of politics and media. Communication studies majors may apply this course to the following area requirement. AREA: Theory. Prerequisites: 036:001, 036:005, 036:012 or 036:070, 036:017 or 036:030, and 036:074. Requirements: g.p.a. of at least 2.50 and completion of Foundations of Communication requirement.

036:089 Nonverbal Communication  3 s.h.
Introduction to theoretical study of nonverbal communication; focus on the major principles and research trends in the area; examination of the role of nonverbal communication in communication as a whole; perception and interpretation of nonverbal communication (i.e., posture, eye movements, tone of voice); nonverbal behaviors (i.e., facial expression, eye movement) as used to persuade, impress, or deceive someone. Communication studies majors may apply this course to the following area requirement. AREA: Theory. Prerequisites: 036:001, 036:005, 036:012 or 036:070, 036:017 or 036:030, and 036:074. Requirements: g.p.a. of at least 2.50 and completion of Foundations of Communication requirement.

036:090 Topics in Communication Studies  3 s.h.
Topics vary. Communication studies majors may apply this course to the following area requirement. AREA: Context. Prerequisites: 036:001, 036:005, 036:012 or 036:070, 036:017 or 036:030, and 036:074. Requirements: g.p.a. of at least 2.50 and completion of Foundations of Communication requirement.

036:091 Organizational Communication  3 s.h.
Theories and concepts of organizational communication; focus on issues of good communication at a number of levels: people within the organization must be able to work with one another and communicate in effective ways; people, and especially leaders, need to be able to persuade one another effectively; organizations must be able to persuade outsiders, whether persuading them to buy the organization's products, or, in more complex circumstances, persuade the outside world to accept apologies or statements of regret when the company does something wrong. Prerequisites: 036:001, 036:005, 036:012 or 036:070, 036:017 or 036:030, and 036:074. Requirements: g.p.a. of at least 2.50 and completion of Foundations of Communication requirement.

036:095 Queer Rhetorics  3 s.h.
Overview of queer theory and its application to different communicative situations including television, film, and everyday life; development of critical thinking skills in relation to cultural constructions of gender, sexuality, race, and other identity categories. Communication studies majors may apply this course to the following area requirement. AREA: Context. Prerequisites: 036:001, 036:005, 036:012 or 036:070, 036:017 or 036:030, and 036:074. Requirements: g.p.a. of at least 2.50 and completion of Foundations of Communication requirement. Same as 131:095.

036:100 Independent Study  arr.
Creative or research project under faculty supervision. Communication studies majors may apply this course to the following area requirement. AREA: Context. Prerequisites: 036:001, 036:005, 036:012 or 036:070, 036:017 or 036:030, and 036:074. Requirements: g.p.a. of at least 2.50, completion of Foundations of Communication requirement, and 6 s.h. of intermediate-level course work.
036:101 Honors Workshop 1 s.h.
Preparation for honors thesis prospectus; coordination of student’s individual thesis work, introduction to issues in research design, methods. Communication studies majors may apply this course to the following area requirement. AREA: Context. Prerequisites: 036:001, 036:005, 036:012 or 036:070, 036:017 or 036:030, and 036:074. Requirements: g.p.a. of at least 3.33, honors standing, completion of Foundations of Communication requirement, and 6 s.h. of intermediate-level course work.

036:102 Honors Thesis 3 s.h.
Individual research, writing, or creative production under faculty supervision. Communication studies majors may apply this course to the following area requirement. AREA: Context. Prerequisites: 036:001, 036:005, 036:012 or 036:070, 036:017 or 036:030, 036:074, and 036:101. Requirements: g.p.a. of at least 3.33, honors standing, completion of Foundations of Communication requirement, and 6 s.h. of intermediate-level course work.

036:105 Workshop in Teaching Communication and Forensics arr.
Methods, materials, progression, evaluation in teaching and supervising students in courses and class activities; opportunities for observation, demonstration, practice in teaching theater, discussion and debate, individual speech, dramatic and forensic events. Prerequisites: 036:001, 036:005, 036:012 or 036:070, 036:017 or 036:030, 036:074, and 036:101. Requirements: g.p.a. of at least 2.50, completion of Foundations of Communication requirement, and 6 s.h. of intermediate-level course work. Same as 07S:178.

036:140 Communication and Relationships 3 s.h.
Communication process in personal relationships; how communication functions to initiate, sustain, and dissolve a variety of relationships including friendships, romantic couples, marital pairs, and family relationships. Communication studies majors may apply this course to the following area requirement. AREA: Context. Prerequisites: 036:001, 036:005, 036:012 or 036:070, 036:017 or 036:030, and 036:074. Requirements: g.p.a. of at least 2.50, completion of Foundations of Communication requirement, and 6 s.h. of intermediate-level course work.

036:142 Advanced Intercultural Communication 3 s.h.
Defining culture as a historically-transmitted, socially-constructed system of meaning enacted in face-to-face interaction and mass media; focus on a specific topic within intercultural communication research and theory (i.e., cultural nature of personal relationships, built environment as culture, intersection of private with public cultural meaning); in-depth follow-up of the general approach to intercultural communication covered in lower-level courses. Communication studies majors may apply this course to the following area requirement. AREA: Context. Prerequisites: 036:001, 036:005, 036:012 or 036:070, 036:017 or 036:030, and 036:074. Requirements: g.p.a. of at least 2.50, completion of Foundations of Communication requirement, and 6 s.h. of intermediate-level course work.

036:143 Classical Rhetoric and Greek Culture 3 s.h.
Origins, development of the art of rhetoric from Sophists to Aristotle; significance to Greek culture from fifth to fourth century B.C. Communication studies majors may apply this course to the following area requirement. AREA: Context. Requirements: g.p.a. of at least 2.50, completion of Foundations of Communication requirement, and 6 s.h. of intermediate-level course work.

036:145 Argument and Law 3 s.h.
Practices of argumentation that have special legal significance; court practices in legal argumentation (constructing legal arguments and briefs, trial and appellate oral advocacy); structure of argumentation that creates the categories and limits of freedom of expression. Communication studies majors may apply this course to the following area requirement. AREA: Context. Prerequisites: 036:001, 036:005, 036:012 or 036:070, 036:017 or 036:030, and 036:074. Requirements: g.p.a. of at least 2.50, completion of Foundations of Communication requirement, and 6 s.h. of intermediate-level course work.
036:146 Issues in Rhetoric and Culture 3 s.h.
Rhetorical theory and criticism as culturally embedded practices; rhetorical production of selves and social difference; relationships between rhetoric and literature, philosophy, popular texts. Communication studies majors may apply this course to the following area requirement. AREA: Context. Requirements: (for 036:146) g.p.a. of at least 2.50, completion of Foundations of Communication requirement, and 6 s.h. of intermediate-level course work. Same as 048:160, 160:160.

036:147 Family Communication 3 s.h.
Family relationships and the various ways they develop and change, how they affect those who participate in them; theory and research on communication in the family; family conceived as a group of persons who share their lives over an extended period of time bound by ties of marriage, blood, or commitment. Communication studies majors may apply this course to the following area requirement. AREA: Context. Prerequisites: 036:001, 036:005, 036:012 or 036:070, 036:017 or 036:030, and 036:074. Requirements: g.p.a. of at least 2.50, completion of Foundations of Communication requirement, and 6 s.h. of intermediate-level course work.

036:150 Cultural History of Advertising 3 s.h.
Cultural, historical, and critical approach to creating, maintaining, repairing, and transforming a consumption culture in the United States; material and ideological character of life in the United States as it evolved from a culture of production in the Gilded Age (late 19th century) to a culture of consumption through the first half of the 20th century, culminating in the collective fantasy of the American Dream as articulated and celebrated in the 1950s; emergence of corporate capitalism and its crucial ideological voice, national brand advertising. Communication studies majors may apply this course to the following area requirement. AREA: Context. Prerequisites: 036:001, 036:005, 036:012 or 036:070, 036:017 or 036:030, and 036:074. Requirements: g.p.a. of at least 2.50, completion of Foundations of Communication requirement, and 6 s.h. of intermediate-level course work.

036:151 Cultural History of Television 3 s.h.
Cultural history of television in the United States; focus on the rise of network television, relationship between networks and advertisers, imagery surrounding the introduction of television into the home, and larger historical context; postwar era (the 1950s) and the rise of genres that are still with us, especially the sitcom (situation comedy); questions about desire, gender, family, nation, and the body. AREA: Context. Prerequisites: 036:001, 036:005, 036:012 or 036:070, 036:017 or 036:030, and 036:074. Requirements: g.p.a. of at least 2.50, completion of Foundations of Communication requirement, and 6 s.h. of intermediate-level course work.

036:152 Latin American Media 3 s.h.
Development of media institutions, texts, and audiences across a number of Latin American countries; focus on broadcast media (radio and television) and situates them within the larger historical context of 20th- and 21st-century Latin America; readings, discussions, and assignments pay particular attention to the influence of U.S. corporate and state interests on Latin American media, and engage debates over cultural dependency, globalization, and hybridity in the region. Communication studies majors may apply this course to the following area requirement. AREA: Context. Prerequisites: 036:001, 036:005, 036:012 or 036:070, 036:017 or 036:030, and 036:074. Requirements: g.p.a. of at least 2.50, completion of Foundations of Communication requirement, and 6 s.h. of intermediate-level course work.
036:153 Communication Technologies in History
3 s.h.
How media has altered culture, society, and human consciousness throughout history with focus on the last two centuries (or modernity); how communication has been shaped by a variety of media (i.e., gesture, language, writing, printing, calendars, clocks, photography, telegraph, telephone, phonograph, film, radio, television, computers, etc.); 21st-century questions concerning technology, and how few communicate today without the aid of some kind of machine or technique. Communication studies majors may apply this course to the following area requirement. AREA: Context. Prerequisites: 036:001, 036:005, 036:012 or 036:070, 036:017 or 036:030, and 036:074. Requirements: g.p.a. of at least 2.50, completion of Foundations of Communication requirement, and 6 s.h. of intermediate-level course work.

036:155 Visual Rhetoric
3 s.h.
Introduction to the politics of images as they relate to the field of communication; ideas and research ranging from the visual rhetoric of images and films to that of architecture and fashion; ways in which visual communicative messages impact individuals on a daily basis; developing a critical eye for deconstructing visual messages. Communication studies majors may apply this course to the following area requirement. AREA: Context. Prerequisites: 036:001, 036:005, 036:012 or 036:070, 036:017 or 036:030, and 036:074. Requirements: g.p.a. of at least 2.50, completion of Foundations of Communication requirement, and 6 s.h. of intermediate-level course work.

036:156 Feminist Visual Rhetoric
3 s.h.
Exploration of connections among feminist rhetoric, visual rhetoric, and visual culture; critical analysis of the scholarship on visual rhetoric; feminist theoretical and conceptual frameworks about the body; fields of visual culture and visual rhetoric; critiques of several feminist body artists’ artworks as a means to concretize theories. Communication studies majors may apply this course to the following area requirement. AREA: Theory. Prerequisites: 036:001, 036:005, 036:012 or 036:070, 036:017 or 036:030, and 036:074. Requirements: g.p.a. of at least 2.50, completion of Foundations of Communication requirement, and 6 s.h. of intermediate-level course work.

036:157 Advanced Topics in Communication Studies
3 s.h.
Issues or problems in particular communication contexts. Communication studies majors may apply this course to the following area requirement. AREA: Context. Prerequisites: 036:001, 036:005, 036:012 or 036:070, 036:017 or 036:030, and 036:074. Requirements: g.p.a. of at least 2.50, completion of Foundations of Communication requirement, and 6 s.h. of intermediate-level course work.

036:158 Rhetoric and Past Public Controversy
3 s.h.
Role of rhetoric in public controversy in particular historical time periods; focus on various perspectives, diverse voices, and multiple arguments informing particular movements/issues. Communication studies majors may apply this course to the following area requirement. AREA: Context. Requirements: g.p.a. of at least 2.50, completion of Foundations of Communication requirement, and 6 s.h. of intermediate-level course work.

036:160 The Talk of Everyday Life
3 s.h.
In-depth study of various genres of talk that organize everyday communicative life; mundane interaction rituals (i.e., small talk, gossip, face-saving talk, compliance-gaining, asking for and giving advice and support, and telling stories); formalized interaction rituals (i.e., rites of passage); functions of talk in constructing identities, building relationships, and sustaining the social order more generally across all genres. Communication studies majors may apply this course to the following area requirement. AREA: Theory. Prerequisites: 036:001, 036:005, 036:012 or 036:070, 036:017 or 036:030, and 036:074. Requirements: g.p.a. of at least 2.50, completion of Foundations of Communication requirement, and 6 s.h. of intermediate-level course work.
036:163 The Dark Side of Interpersonal Communication 3 s.h.
Review of advanced communication theories and research with focus on the dark side of interpersonal communication and close relationships; negative or difficult elements of developing and maintaining relationships; expression of difficult emotions; mundane communication that can function in destructive or negative ways. Communication studies majors may apply this course to the following area requirement. AREA: Theory. Prerequisites: 036:001, 036:005, 036:012 or 036:070, 036:017 or 036:030, and 036:074. Requirements: g.p.a. of at least 2.50, completion of Foundations of Communication requirement, and 6 s.h. of intermediate-level course work.

036:165 Criticism and Public Culture 3 s.h.
How people formulate attitudes, beliefs, and values about an array of arenas in public culture; critical perspectives (i.e., feminism, Marxism, psychoanalysis, queer theory); sporting rituals, television programs, political speeches, museums, sacred cultural documents; practice of critical reading to engage various cultural texts such as films, national memorials, and social movement rhetoric. Communication studies majors may apply this course to the following area requirement. AREA: Research and Criticism. Prerequisites: 036:001, 036:005, 036:012 or 036:070, 036:017 or 036:030, and 036:074. Requirements: g.p.a. of at least 2.50, completion of Foundations of Communication requirement, and 6 s.h. of intermediate-level course work.

036:166 Life-Span Communication 3 s.h.
How communication processes (social support, language skills, interpersonal relationship management) change across the course of one's existence; normative and unexpected demographic and health events mapped out across a life span; how our communication processes influence and are influenced by social experiences; underlying premise of the life-span perspective that our potential for human growth extends throughout our life course. Communication studies majors may apply this course to the following area requirement. AREA: Theory. Prerequisites: 036:001, 036:005, 036:012 or 036:070, 036:017 or 036:030, and 036:074. Requirements: g.p.a. of at least 2.50, completion of Foundations of Communication requirement, and 6 s.h. of intermediate-level course work.

036:167 Communication, Cognition, and Emotion 3 s.h.
Understanding how communication, cognition, and emotion are tied together; different theories of emotion and types of emotions (i.e., love, anger, jealousy, happiness, embarrassment, and hurt). Communication studies majors may apply this course to the following area requirement. AREA: Theory. Prerequisites: 036:001, 036:005, 036:012 or 036:070, 036:017 or 036:030, and 036:074. Requirements: g.p.a. of at least 2.50, completion of Foundations of Communication requirement, and 6 s.h. of intermediate-level course work.

036:168 Rhetoric of the Body 3 s.h.
Survey of a range of theories about the body and application to specific case studies; implications of how bodies are endowed with and convey meaning; theories of pollution, pain, ability, and normativity; diverse case studies are seemingly disparate, but all preoccupy themselves with public conceptions of bodily meaning (i.e., beauty pageants, freak shows, plastic surgery, the wannabe movement, tattoos, the FDR Presidential Memorial, Deaf culture, fat bodies, illness, and torture). Communication studies majors may apply this course to the following area requirement. AREA: Theory. Prerequisites: 036:001, 036:005, 036:012 or 036:070, 036:017 or 036:030, and 036:074. Requirements: g.p.a. of at least 2.50, completion of Foundations of Communication requirement, and 6 s.h. of intermediate-level course work.

036:170 Theories of Persuasion 3 s.h.
Theoretical examination of four perspectives on persuasion--historical, psychological, social, and cultural; analysis of persuasive attempts; questions of cultural persuadables and current problems in U.S. American culture (i.e., obesity, drunk driving, date rape). Communication studies majors may apply this course to the following area requirement. AREA: Theory. Prerequisites: 036:001, 036:005, 036:012 or 036:070, 036:017 or 036:030, and 036:074. Requirements: g.p.a. of at least 2.50, completion of Foundations of Communication requirement, and 6 s.h. of intermediate-level course work.
036:172 Television and African American Culture
3 s.h.
Role of television in African American culture; examination of debates; topics include stereotyping, authenticity, effects of programming, aesthetics, and television’s relationship to other forms of cultural expression. Communication studies majors may apply this course to the following area requirement. AREA: Theory. Prerequisites: 036:001, 036:005, 036:012 or 036:070, 036:017 or 036:030, and 036:074. Requirements: g.p.a. of at least 2.50, completion of Foundations of Communication requirement, and 6 s.h. of intermediate-level course work. Same as 129:195.

036:173 Social Media, Culture, and Politics
3 s.h.
Introduction to theoretical issues raised by social media for communication, with particular emphasis on cultural and political implications; how social media is understood, forms of digital communication, individual and collective identity formations via social media, online communities, and the intersection of social media and existing culture and politics. AREA: Theory. Prerequisites: 036:001, 036:005, 036:012 or 036:070, 036:017 or 036:030, and 036:074. Requirements: g.p.a. of at least 2.50, completion of Foundations of Communication requirement, and 6 s.h. of intermediate-level course work.

036:174 Communication, Technology, and National Security
3 s.h.
Relationship between communication technologies and national security via three main themes: the use of the communications infrastructure in previous and future wars for the purpose of securing and maintaining U.S. leadership in the world-system, the uses of propaganda for both domestic and foreign consumption, and the representation of national security issues in popular media; historical and contemporary components. Communication studies majors may apply this course to the following area requirement. AREA: Context. Prerequisites: 036:001, 036:005, 036:012 or 036:070, 036:017 or 036:030, and 036:074. Requirements: g.p.a. of at least 2.50, completion of Foundations of Communication requirement, and 6 s.h. of intermediate-level course work.

036:176 Advanced Relational Theory
3 s.h.
Relationships and how they significantly shape our experiences of the world, our sense of identity, our outlook on life, and the way in which we think about experiences and life in general; the premise that relationships are more than emotional attachments or bonds; relationships as happy, emotionally satisfying elements of life; demonstrations of a variety of communicative situations that establish, reconstitute, and demonstrate the importance of membership of communities and relationships. Communication studies majors may apply this course to the following area requirement. AREA: Theory. Prerequisites: 036:001, 036:005, 036:012 or 036:070, 036:017 or 036:030, and 036:074. Requirements: g.p.a. of at least 2.50, completion of Foundations of Communication requirement, and 6 s.h. of intermediate-level course work.

036:181 Legal Communication and Culture
3 s.h.
Law and the legal system as communicative networks of meaning-making; in contrast with legal courses concerned with learning blackletter law, the law viewed as a symbolic system from courtroom arguments to judicial opinions to legal reporting to the circulation of law in everyday life; law from a rhetorical perspective that allows us to think in new and different ways about the cultural implications of legal argument. Communication studies majors may apply this course to the following area requirement. AREA: Theory. Prerequisites: 036:001, 036:005, 036:012 or 036:070, 036:017 or 036:030, and 036:074. Requirements: g.p.a. of at least 2.50, completion of Foundations of Communication requirement, and 6 s.h. of intermediate-level course work.

For Graduate Students
Graduate students also may take 100-level courses for credit, with approval of their committee.

036:200 Introduction to Research and Teaching
3 s.h.
Introduction to communication studies as a field of scholarship; selection of research problems, major lines of research represented in the department, bibliographical tools for scholarship in the field; issues, practical tasks, and concerns relevant to effective college or university classroom teaching.
### 036:210 Introduction to Rhetorics of Inquiry
2-4 s.h.
How connections between discourses that don’t seem connected suggest innovative arguments and ways of crossing boundaries between disciplines. Same as 160:200.

### 036:220 Rhetorical Criticism
3 s.h.
Approaches to rhetorical analysis of communicative artifacts, acts, events; rhetorical-critical essay writing. Same as 010:230.

### 036:222 Feminist Cultural Studies
3 s.h.

### 036:223 Deliberation, Advocacy, and Civic Engagement
3 s.h.
Practices of public deliberation in governance and civil society; counterpublic sphere discourses. Same as 160:223.

### 036:224 Movements and Media
3 s.h.

### 036:225 Seminar: Social Movements
3 s.h.

### 036:241 Theories of Mass Communication
3 s.h.
Major concepts, theories, schools of thought in media studies, mass communication.

### 036:250 Introduction to Rhetoric of Science
3 s.h.
How science is related to social and political practices, examined by placing philosophical and pedagogical controversies about scientific method into their historical and rhetorical contexts. Same as 160:250.

### 036:270 Health Communication
3 s.h.
Theories, concepts, research associated with health communication; interpersonal and mass communication approaches. Offered summer sessions. Same as 172:240.

### 036:299 Graduate Independent Study
arr.

### 036:310 Classical Rhetoric
3 s.h.
Discourse in the ancient world. Same as 20E:230.

### 036:311 Modern Rhetoric
2-4 s.h.
History of modernist rhetorical theory in the 20th century; relationships with philosophy, social and physical sciences, cultural change. Same as 160:311.

### 036:312 Rhetoric and Philosophy
2-4 s.h.
Contemporary philosophical approaches to the study of rhetoric.

### 036:313 Rhetoric and Argument Theory
2-4 s.h.
Approaches to study of argumentation, key issues at dispute in contemporary conceptualizations of argument.

### 036:317 Current Issues in Rhetoric
3 s.h.
Ethical, social, or cultural issues; rhetoric’s role in their contemporary significance; traditional aspects of rhetoric, their pertinence to present concerns. Same as 010:340, 160:340.

### 036:319 Practical Criticism
3 s.h.
Basics of rhetorical criticism; rhetoric as practice or technique; how to read rhetorically; fundamentals (i.e., figuration and tropes, form and genre, voice, style, topoi) and art of rhetorical critique.

### 036:330 Reading Group
1-2 s.h.
Analysis and discussion of important texts.

### 036:335 Proseminar: Contemporary Rhetorical Studies
2-4 s.h.
Problems in contemporary rhetorical studies; may include works of Kenneth Burke, Wayne Booth, deconstructionists, feminist theorists and critics, critics of communication technologies. Same as 160:335.

</tbody>
</table>
036:374 Relational Communication Theory and Research
Communication in initiation, development, maintenance, breakdown, and repair of social and personal relationships.

036:375 Ethnography of Communication
Research and theory on face-to-face communication, from ethnography of communication perspective.

036:376 Family Communication
Theory and research on communication among and between family members (parents, children, marital partners, siblings); quantitative and qualitative research.

036:377 The Dark Side of Interpersonal Communication
Communication in dysfunctional, dissatisfying, and otherwise unpleasant aspects of familial, personal, and social relationships; jealousy, deception, infidelity, nagging and complaining, verbal and physical abuse; relational communication's dark side, in which behavior viewed as dysfunctional may actually be functional, and behavior viewed as functional may be dysfunctional.

036:378 Critical Ethnography
How power relations constitute the work of ethnographic research; ethnography as a rhetorical form—how ethnographic inscription renders self, other, culture, and the world intelligible in ways that reinscribe and/or challenge dominant social relations; axes of power such as race, class, gender, sexuality, and nation within postcolonial, feminist, and antiracist approaches to ethnographic/autoethnographic theory and praxis; negotiating researcher privilege and epistemic violence; crisis of representation. Same as 010:332, 131:332, 160:332.

036:379 Health Communication Campaigns
Design and analysis of health campaigns; theory, practice, methods; mass media, community, organization, and interpersonal approaches. Offered spring semesters. Same as 172:246.

036:380 Seminar: Dialogic Communication
Dialogic approaches to communication, including Bakhtin and Buber.

036:381 Seminar: Topics in Communication Research

036:383 Seminar: Constructs, Communication, and Identity
Concepts of identity and sociality in George Kelly’s Personal Construct Theory; their connection to theories of rhetoric, especially Burke, and social community, especially Mead.

036:387 Communication, Cognition, and Emotion
Theoretical and empirical work that integrates communication, cognition, emotion; role of social cognition in communication, theories of emotion, types of emotional experiences; approaches to understanding emotion from perspectives in psychology, social cognition, communication; emotion-related issues such as influence of gender, effects of mood.

036:395 Research Practicum
Individual projects.

036:399 Ph.D. Dissertation

Chair
Alberto Segre

Professors
Kurt Anstreicher (Management Sciences/Computer Science), James Cremer, Sukumar Ghosh, Ted Herman, Joseph Kearney, Suely Oliveira, Teodor Rus, Alberto Segre, Padmini Srinivasan, Hantao Zhang

Professors emeriti
Donald Alton, Kendall Atkinson, Robert Baron, Steve Bruell, Donald Epley, Arthur Fleck, Gregg Oden (Psychology/Computer Science)

Associate professors
David Eichmann (Library and Information Science/Computer Science), Douglas Jones, Sriram Pemmaraju, W. Nick Street (Management Sciences/Computer Science), Aaron Stump, Cesare Tinelli, Kasturi Varadarajan, Christopher Wyman

Adjunct associate professor
Jun Ni

Assistant professors
Octav Chipara, Juan Pablo Hourcade

Adjunct assistant professor
Donald McClain

Lecturer
Ines Curto

Adjunct instructors
Raman Aravamudhan, Hugh Brown

Adjunct lecturer
Kenneth Slonneger

Undergraduate degrees: B.A., B.S. in Computer Science, Informatics
Undergraduate nondegree programs: Minor in Computer Science, Informatics
Graduate degrees: M.C.S., M.S., Ph.D. in Computer Science
Web site: http://www.cs.uiowa.edu

Undergraduate Programs

- Major in computer science (Bachelor of Arts, Bachelor of Science)
- Major in informatics (Bachelor of Arts, Bachelor of Science)
- Minor in computer science
- Minor in informatics

The majors in computer science and informatics provide students with the necessary training for employment in careers such as software development and information management. The minor in each discipline helps students acquire fundamental knowledge of the use and applications of computers. The department encourages students majoring in computer science or informatics to consider earning a second major, certificate, or minor.

Undergraduates majoring in computer science develop competence in programming principles and methodologies, problem-solving techniques, mathematics, and computer systems. Computer science training is critical for many careers in science, engineering, and business.

Informatics brings the computational sciences together with the arts, the humanities, and the biological, health, information, natural, and social sciences in an interdisciplinary effort to solve problems. It uses algorithmic techniques and the power of computing to acquire and manipulate data, extract new knowledge, and ultimately examine existing and new problems from broad perspectives.

The informatics major combines fundamental and practical computing knowledge with a choice of cognate areas from the liberal arts and sciences, providing students with the necessary background and specialized skills to work at the interface of computing and another discipline. The major also provides good preparation for graduate study in a variety of disciplines.

Students may declare a major in computer science or in informatics when they are admitted to the University or afterward. All students begin the majors as Bachelor of Arts students but may switch to the Bachelor of Science programs at any time.

Informatics students may begin the major without a chosen cognate area; they may declare a cognate at any time. Some cognates are available only with the Bachelor of Arts; others are available only with the Bachelor of Science.

Students must maintain a g.p.a. of 2.00 or higher in all course work in order to graduate; informatics students must maintain a g.p.a. of at least 2.00 in the informatics core, the elective(s), and the statistics course.

All students are advised at the Academic Advising Center until they have completed 22C:019 Discrete Structures (computer science students) or 22C:080 Programming for Informatics (informatics students). Computer science students being advised at the center also may consult with computer science faculty members; informatics students being advised at the center also should consult with an informatics advisor in the department.
Transfer students who have taken a course approved as equivalent to a required computer science or informatics course are exempt from that course. Transfer course grades are included in the computer science or informatics grade-point average.

Students should consult the Department of Computer Science web site or visit the department’s office for information about general policies, elective areas, internships, scholarships, and student groups, such as the University’s chapter of the Association for Computing Machinery (ACM) and Women in Informatics and Computer Science (WICS).

**Advanced Placement**

The Computer Science Advanced Placement Program test can be used to gain credit for elective semester hours. See Advanced Placement Credit Policy under Prospective Students on the Department of Computer Science web site.

**Joint Bachelor’s/Master’s Degree Programs**

Qualified undergraduate students who plan to earn the Master of Computer Science degree may apply for the joint Bachelor of Arts/Master of Computer Science program or the joint Bachelor of Science/Master of Computer Science program. The joint programs allow students to earn both degrees in five years. See “Joint B.A./M.C.S. and B.S./M.C.S.” later in this section.

**Early Admission to the Graduate College**

Undergraduate computer science or informatics students who have 6 s.h. or less to earn toward graduation may apply for early admission to the Graduate College. Early admission allows students in their final undergraduate semester to take courses for graduate credit in addition to the courses they need to complete their bachelor’s degrees.

**Bachelor of Arts: Computer Science**

The Bachelor of Arts with a major in computer science requires a minimum of 120 s.h., including at least 41 s.h. of work for the major. The computer science major for the Bachelor of Arts is designed for students who wish to gain considerable knowledge in computer science and have flexibility in selecting electives. Students preparing for careers in the computing field are encouraged to supplement the base requirements with additional computer science courses.

The program’s flexibility makes it suitable for combination with other majors.

All students must complete the College of Liberal Arts and Sciences General Education Program (p. 381). Students who are enrolled in the B.A. program but who might switch to the B.S. program should choose their General Education Natural Sciences courses carefully; see "Natural Science Sequences" under "Bachelor of Science" below.

Students must maintain a g.p.a. of 2.00 or higher in all course work in order to graduate. Work for the major may not be taken pass/nonpass.

The computer science major for the Bachelor of Arts requires the following course work.

**COMPUTER SCIENCE CORE**

All of these:

- 22C:016 Computer Science I: Fundamentals 4 s.h.
- 22C:019 Discrete Structures 3 s.h.
- 22C:021 Computer Science II: Data Structures 4 s.h.
- 22C:022 Object-Oriented Software Development 4 s.h.
- 22C:031 Algorithms 3 s.h.
- 22C:111 Programming Language Concepts 3 s.h.

One of these:

- 22C:060 Computer Organization 3 s.h.
- 055:035 Computer Architecture and Organization 3 s.h.

One of these:

- 22C:112 Operating Systems 3 s.h.
- 22C:113 Introduction to Systems Software 3 s.h.
- 22C:118 Introduction to Networks and Their Applications 3 s.h.
- 22C:169 Computer Security 3 s.h.

**MATHEMATICS CORE**

Calculus I--one of these:

- 22M:025 Calculus I 4 s.h.

Calculus II--one of these:

- 22M:026 Calculus II 4 s.h.
- 22M:032 Engineering Mathematics II: Multivariable Calculus 4 s.h.
Linear algebra/probability and statistics—one of these:

- 22M:027 Introduction to Linear Algebra 4 s.h.
- 22S:039 Probability and Statistics for the Engineering and Physical Sciences 3 s.h.
- 22S:120 Probability and Statistics 4 s.h.

**ADVANCED COMPUTER SCIENCE ELECTIVES**

Bachelor of Arts students must earn at least 3 s.h. in advanced computer science electives chosen from these:

- 22C:096 Topics in Computer Science I (with department approval) 3 s.h.
- or
- 22C:196 Topics in Computer Science II (with department approval) 3 s.h.
- 22C:072/22M:072 Elementary Numerical Analysis 3 s.h.
- 22C:099 Honors in Computer Science or Informatics (no more than 3 s.h.) arr.
- Any computer science course (prefix 22C) numbered 112 through 190 3 s.h.
- Most computer science courses (prefix 22C) numbered 200 or above, with department approval 3 s.h.

**Bachelor of Science: Computer Science**

The Bachelor of Science with a major in computer science requires a minimum of 120 s.h., including at least 64 s.h. of work for the major. The computer science major for the Bachelor of Science is more rigorous than the B.A. major and is designed to provide in-depth training for students who would like to acquire strength in math and science in order to enhance their skills and job prospects. It also is appropriate for those who plan to pursue graduate work in computer science, although it is not required for graduate study at most universities.

Bachelor of Science students complete all requirements for the B.A. major in computer science. They also complete an additional mathematics course, a course on computation theory, an additional advanced computer science elective, two technical electives, and the natural science requirement.

All students must complete the College of Liberal Arts and Sciences General Education Program (p. 381). Students who choose their General Education Natural Sciences courses carefully may be able to use the same courses to satisfy the Department of Computer Science natural science requirement (see "Natural Science Sequences" below).

Students must maintain a g.p.a. of 2.00 or higher in all course work in order to graduate. Work for the major may not be taken pass/nonpass.

The computer science major for the Bachelor of Science requires the following course work.

**COMPUTER SCIENCE CORE**

All of these:

- 22C:016 Computer Science I: Fundamentals 4 s.h.
- 22C:019 Discrete Structures 3 s.h.
- 22C:021 Computer Science II: Data Structures 4 s.h.
- 22C:022 Object-Oriented Software Development 4 s.h.
- 22C:031 Algorithms 3 s.h.
- 22C:111 Programming Language Concepts 3 s.h.

One of these:

- 22C:060 Computer Organization 3 s.h.
- 055:035 Computer Architecture and Organization 3 s.h.

One of these:

- 22C:112 Operating Systems 3 s.h.
- 22C:113 Introduction to Systems Software 3 s.h.
- 22C:118 Introduction to Networks and Their Applications 3 s.h.
- 22C:169 Computer Security 3 s.h.

**MATHEMATICS CORE**

Calculus I—one of these:

- 22M:025 Calculus I 4 s.h.

Calculus II—one of these:

- 22M:026 Calculus II 4 s.h.
- 22M:032 Engineering Mathematics II: Multivariable Calculus 4 s.h.

Linear algebra:

- 22M:027 Introduction to Linear Algebra 4 s.h.

Probability and statistics—one of these:
Other probability and statistics courses (prefix 22S) with a calculus prerequisite may be approved by a computer science advisor.

**ADVANCED COMPUTER SCIENCE ELECTIVES**

Bachelor of Science students must earn at least 6 s.h. in advanced computer science electives chosen from these.

- 22C:096 Topics in Computer Science I (with department approval)  3 s.h.
- or 22C:196 Topics in Computer Science II (with department approval)  3 s.h.
- 22C:072/22M:072 Elementary Numerical Analysis  3 s.h.
- 22C:099 Honors in Computer Science or Informatics (no more than 3 s.h.)  arr.
- Any computer science course (prefix 22C) numbered 112 through 190  3 s.h.
- Most computer science courses (prefix 22C) numbered 200 or above, with department approval  3 s.h.

**COMPUTATION THEORY**

One of these:

- 22C:131 Limits of Computation  3 s.h.
- 22C:135 Theory of Computation  3 s.h.
- 22C:188 Logic in Computer Science  3 s.h.

**TECHNICAL ELECTIVES**

Bachelor of Science students must earn 6 s.h. in technical electives. Advanced elective courses in computer science or in any other department, approved by an advisor, can be counted as technical electives. For a list of approved technical electives, see Technical Electives for the B.S. under Courses on the Department of Computer Science web site.

**NATURAL SCIENCE SEQUENCES**

Bachelor of Science students take two or more courses in a sequence (totaling at least 7 s.h.) in a cognate area of natural science. The natural science sequence is intended to enhance the student’s perspective by providing a deeper understanding of the scientific method. Typically, it consists of a sequence of courses taken in the same science department. Students often choose courses that also fulfill the General Education Program (p. 381) Natural Sciences requirement. Some possible choices are listed below; the department chair may approve others.

CLEP/APP credit may be used to satisfy part or all of the natural science requirement only if the appropriate science department at The University of Iowa accepts the credit as equivalent to one or more of the specific courses listed below.

**Astronomy**

- 029:061 General Astronomy I  4 s.h.
- 029:062 General Astronomy II  4 s.h.

**Biology/Chemistry**

- 002:010 Principles of Biology I  4 s.h.
- 002:011 Principles of Biology II  4 s.h.
- 004:011 Principles of Chemistry I  4 s.h.

**Chemistry**

- 004:011 Principles of Chemistry I  4 s.h.
- 004:012 Principles of Chemistry II  4 s.h.

**Geography**

- 044:003 The Global Environment  4 s.h.
- 044:005 Foundations of GIS  3 s.h.

**Geoscience**

- 012:008 Introduction to Environmental Science  3-4 s.h.

One of these:

- 012:003 Introduction to Earth Science  4 s.h.
- 012:005 Introduction to Geology  4 s.h.

**Physics**

One of these sequences:

- 029:027-029:028 Physics I-II  8 s.h.
- 029:081-029:082 Introductory Physics I-II (recommended)  8 s.h.

**Bachelor of Arts, Bachelor of Science: Informatics**

The Bachelor of Arts with a major in informatics requires a minimum of 120 s.h., including at least 43-50 s.h. of work for the major. The Bachelor of Science with a major in informatics requires a minimum of 120 s.h., including at least 53-55 s.h. of work for the major. Both majors combine
informatics course work that provides a strong foundation in computing with course work in a cognate discipline. Required credit for the major depends on the choice of cognate area.

The Bachelor of Arts major in informatics offers the cognate areas of art, economics, geoinformatics, health informatics, human-computer interaction, linguistics, music, social informatics, and individualized cognates.

The Bachelor of Science major in informatics offers the cognate areas of bioinformatics and individualized cognates.

All informatics students complete the informatics core, one (B.A.) or two (B.S.) electives, a statistics course, and a set of courses in their chosen cognate area. Students must maintain a g.p.a. of 2.00 or higher in all course work in order to graduate; they also must maintain a g.p.a. of at least 2.00 in the informatics core, the elective(s), and the statistics course. Work for the major may not be taken pass/nonpass.

Students also must complete the College of Liberal Arts and Sciences General Education Program (p. 381).

Students are expected to possess an appropriate high school background in mathematics.

The informatics major requires the following course work.

**INFORMATICS CORE**

The informatics core consists of six required computing courses (at least 18 s.h.) that emphasize data manipulation, databases, and networking. It provides more applications-oriented content than the traditional computer science curriculum yet is designed to offer students a sound basis in underlying computer sciences themes and techniques.

One of these:

- 22C:080 Programming for Informatics 4 s.h.
- 22C:104 Introduction to Informatics 3 s.h.

One of these:

- 22C:084 Databases for Informatics 3 s.h.
- 06K:182 Applications Database Management Systems 3 s.h.

All of these:

- 22C:005 Introduction to Computer Science 3 s.h.
- 22C:082 Human-Computer Interaction 3 s.h.
- 22C:086 Networking and Security for Informatics 3 s.h.
- 22C:094 Informatics Project 3 s.h.

**INFORMATICS ELECTIVES**

B.A. students must complete at least one course (3 s.h.) and B.S. students must complete at least two (6 s.h.) from a list of approved computing informatics electives. Course selection must be approved by an advisor or by the informatics program director. In addition to the courses listed below, students may have additional choices from the Department of Electrical and Computer Engineering and the Department of Management Sciences; consult an informatics faculty advisor for additional choices.

- 22C:096 Topics in Computer Science I (with department approval) 3 s.h.
- or
- 22C:196 Topics in Computer Science II (with department approval) 3 s.h.
- 22C:109 Programming Languages and Tools 3 s.h.
- 06K:186 Database Management II 3 s.h.
- Any computer science course (prefix 22C) numbered 111 through 190 3 s.h.

**STATISTICS COURSE**

B.A. and B.S. students must complete one introductory statistics course. Students should consult with their advisors to choose statistics courses appropriate for their cognate areas.

One of these:

- 22S:008 Statistics for Business 4 s.h.
- 22S:025 Elementary Statistics and Inference 3 s.h.
- 22S:030 Statistical Methods and Computing 3 s.h.
- 22S:039 Probability and Statistics for the Engineering and Physical Sciences 3 s.h.
- 22S:101 Biostatistics 3 s.h.
- 22S:102 Introduction to Statistical Methods 3 s.h.
- 22S:120 Probability and Statistics 4 s.h.
- 034:010 Quantitative Data Analysis 3 s.h.

**Bachelor of Arts Cognates**

Students must complete all requirements listed under one of the cognate areas below (art, economics, geoinformatics, health informatics, human-computer interaction, linguistics, music, social informatics, or an individualized cognate).
ART

The informatics major with an art cognate requires a minimum of 46 s.h. of work for the major, including 22 s.h. in cognate courses. Students learn about the design and maintenance of web services, applications of modern computerized artistic tools, and benefits and limitations of computers as a digital medium. They also gain insight into computerized tool design that is guided by knowledge of an artist’s requirements. The art cognate may lead to careers in web development, technology coordination for artistic productions, development of digital artistic tools, and artistic or technical development for entertainment companies. Cognate courses are primarily in art history, design, elements of art, and photography.

Note: Some courses listed below are open only to students majoring in art, so they are appropriate choices only for students with a double major in art and informatics. Non-art majors should work with an informatics faculty advisor to develop an individual set of art cognate courses.

All of these:

- 01A:003 Basic Drawing 3 s.h.
- 01D:090 Graphic Design I 3 s.h.
- 01D:100 Typography 4 s.h.

Two of these:

- 01H:001 Art and Visual Culture 3 s.h.
- 01H:002 Arts of Africa 3 s.h.
- 01H:003 Art of Pre-Columbian America, Native America, and Oceania 3 s.h.
- 01H:004 Masterpieces: Art and Cultural Paradigms 3 s.h.
- 01H:005 Western Art and Culture Before 1400 3 s.h.
- 01H:006 Western Art and Culture After 1400 3 s.h.
- 01H:007 Writing About the Visual Arts 3 s.h.
- 01H:008 Themes in Global Art 3 s.h.
- 01H:016 Asian Art and Culture 3 s.h.
- 01H:021 Introduction to the Art of West Africa 3 s.h.
- 01H:026 Introduction to Ancient Art 3 s.h.
- 01H:031 Introduction to the Art of China 3 s.h.
- 01H:033 Introduction to the Art of Japan 3 s.h.
- 01H:040 Introduction to Medieval Art 3 s.h.
- 01H:047 Introduction to Italian Renaissance Art 3 s.h.
- 01H:053 Introduction to Baroque Visual Culture 3 s.h.
- 01H:062 Introduction to Nineteenth-Century Art 3 s.h.
- 01H:066 Introduction to American Art 3 s.h.
- 01H:073 Introduction to Modern/Contemporary Art 3 s.h.
- 01H:084 Introduction to Western Architecture 3 s.h.
- 01H:090 Introduction to Art and Religion 3 s.h.
- 01H:098 Undergraduate Topics in Art History 3 s.h.
- 01H:099 Undergraduate Seminar in the History of Art 3 s.h.
- 01H:116 Introduction to the Art of Central Africa 3 s.h.

At least 6 s.h. from these; 3 s.h. must be 100-level:

- 01D:110 Web Site Design I 3 s.h.
- 01D:120 Graphic Design II 4 s.h.
- 01D:128 Computer Graphic Design 3 s.h.
- 01D:140 Web Site Design II 4 s.h.
- 01L:040 Digital Imaging I 3 s.h.
- 01L:140 Advanced Digital Imaging 4 s.h.
- 01T:064 Introduction to Computer-Aided Design for 3-D Design 3 s.h.

ECONOMICS

The informatics major with an economics cognate requires a minimum of 48 s.h. of work for the major, including 24 s.h. in cognate courses, which are primarily from economics. The economics cognate is intended for students interested in working with economic, financial, or demographic data. It may lead to careers in administration, business, or government or to graduate study in management or policy areas.

All of these:

- 22M:017 Calculus and Matrix Algebra for Business 4 s.h.
- 06E:001 Principles of Microeconomics 4 s.h.
- 06E:002 Principles of Macroeconomics 4 s.h.
- 06E:104 Microeconomic Theory 3 s.h.
- 06E:105 Macroeconomics 3 s.h.

Two of these:

- 06E:111 Personnel Economics 3 s.h.
- 06E:113 Health Economics 3 s.h.
- 06E:117 Money, Banking, and Financial Markets 3 s.h.
- 06E:119 Policy Analysis 3 s.h.
- 06E:125 Global Economics and Business 3 s.h.
- 06E:129 Economic Growth and Development 3 s.h.
- 06E:133 Environmental and Natural Resource Economics 3 s.h.
The geoinformatics cognate requires a minimum of 46 s.h. of work for the major, including 21 s.h. in cognate courses, which are primarily from geography. The geoinformatics cognate is intended for students interested in geographic information systems (GIS) and spatial aspects of data. It may lead to careers in business, government, or public health or to graduate study in geography, public health, or policy areas.

All of these:

- 044:001 Introduction to Human Geography 3 s.h.
- 044:003 The Global Environment 4 s.h.
- 044:005 Foundations of GIS 3 s.h.

One of these:

- 044:010 Globalization and Geographic Diversity 3 s.h.
- 044:011 Population Geography 3 s.h.
- 044:015 Introduction to Political Geography 3 s.h.
- 044:019 Contemporary Environmental Issues 3 s.h.
- 044:030 The Global Economy 3 s.h.
- 044:035 World Cities 3 s.h.

One of these:

- 044:110 GIS for Environmental Studies: Introduction 3 s.h.
- 044:112 Mapping American Cities and Regions 3 s.h.
- 044:180 Field Methods in Physical Geography 2-4 s.h.
- 044:181 Field Methods: Mapping and Mobile Computing 3 s.h.

Two of these:

- 044:105 Introduction to Environmental Remote Sensing 3 s.h.
- 044:110 GIS for Environmental Studies: Introduction 3 s.h.
- 044:112 Mapping American Cities and Regions 3 s.h.
- 044:113 Principles of Geographical Information Systems 3 s.h.
- 044:125 Environmental Impact Analysis 4 s.h.
- 044:128 GIS for Environmental Studies: Applications 3 s.h.
- 044:136 Planning Livable Cities 3 s.h.
- 044:137 Health and Environment: GIS Applications 3 s.h.
- 044:139 Spatial Analysis and Location Models 3 s.h.
- 044:145 Applications in Environmental Remote Sensing 4 s.h.

The health informatics cognate requires a minimum of 45 s.h. of work for the major, including 21 s.h. in cognate courses. The health informatics cognate is intended for students interested in applications of computing to health care, especially public health and the clinical sciences. It may lead to careers in medical research and hospital settings and to graduate and professional degree programs in public health, health informatics, and medical informatics. Cognate courses are selected primarily from public health, geography, and global health studies.

Once students have completed the number of courses specified for each of following four lists, they select additional courses from the lists to reach the required 21 s.h. of credit in cognate courses.

One of these:

- 152:160 Global Health Seminar 3 s.h.
- 170:099 Fundamentals of Public Health 3 s.h.

At least two of these:
044:005 Foundations of GIS 3 s.h.
044:110 GIS for Environmental Studies: Introduction 3 s.h.
044:131 Geography of Health 1-3 s.h.
044:137 Health and Environment: GIS Applications 3 s.h.
044:174 Health, Work, and the Environment 3 s.h.

At least two of these:
152:120 Global Health and Human Rights 2-3 s.h.
152:135 Global Health and Global Food 3 s.h.
152:137 History of Public Health 3 s.h.
152:138 History of Global Health 3 s.h.
152:158 Promoting Health Globally 3 s.h.

At least one of these:
010:161 Rhetorical Issues in Health Care 3 s.h.
031:001 Elementary Psychology 3 s.h.
031:010 Research Methods in Psychology 4 s.h.
031:016 Introduction to Cognitive Psychology 3 s.h.
22C:148 Research Methods in Human-Computer Interaction 3 s.h.

HUMAN-COMPUTER INTERACTION

The informatics major with a cognate in human-computer interaction requires a minimum of 43 s.h. of work for the major, including at least 19 s.h. in cognate courses. The human-computer interaction cognate is intended for students interested in designing useful and usable technologies. It can lead to careers in interaction design, web design, implementation of user interfaces, and evaluation of human-computer interactions as well as provide valuable skills for graduate study in human-computer interaction.

The cognate’s courses are drawn largely from psychology, sociology, and industrial engineering. Four required courses include foundational aspects of psychology or sociology, an examination of basic human abilities and performance relevant to information technology use, and an introduction to research topics in human-computer interaction.

Students must complete either the psychology area or the sociology area.

Psychology Area

Students who choose the psychology area must satisfy the statistics requirement for the informatics core by taking 22S:008 Statistics for Business, 22S:025 Elementary Statistics and Inference, 22S:101 Biostatistics, or 22S:102 Introduction to Statistical Methods. The psychology area requires the following courses.

All of these:
031:001 Elementary Psychology 3 s.h.
031:100 Research Methods in Psychology 4 s.h.
031:016 Introduction to Cognitive Psychology 3 s.h.
22C:148 Research Methods in Human-Computer Interaction 3 s.h.

Two of these:
031:002 Biological Psychology 4 s.h.
031:014 Introduction to Developmental Science 3 s.h.
031:015 Introduction to Social Psychology 3 s.h.
031:123 Psychology of Learning 3 s.h.
031:133 Sensation and Perception 3 s.h.

Students who take 031:123 Psychology of Learning or 031:133 Sensation and Perception must first complete the prerequisite 031:002 Biological Psychology.

Sociology Area

The sociology area requires the following courses.

All of these:
034:001 Introduction to Sociology Principles 3-4 s.h.
034:009 Sociological Theory 3 s.h.
034:011 Research Methods 3 s.h.
22C:148 Research Methods in Human-Computer Interaction 3 s.h.

Three of these:
034:020 Principles of Social Psychology 3-4 s.h.
034:125 Small Group Analysis 3 s.h.
056:144 Human Factors 3 s.h.
056:147 Ergonomics 3 s.h.

LINGUISTICS

The informatics major with a linguistics cognate requires a minimum of 45 s.h. of work for the major, including at least 21 s.h. in cognate courses. Linguistics, the scientific study of human languages, is directly related to psychology, anthropology, and computer science as well as to more applied fields such as second language acquisition or speech and hearing science. The cognate focuses on computational representations of syntax and semantics for processing natural
language. Cognate courses are drawn primarily from linguistics.

All of these:

- 103:100 Introduction to Linguistics 3 s.h.
- 103:110 Articulatory and Acoustic Phonetics 3 s.h.
- 103:111 Syntactic Analysis 3 s.h.
- 103:112 Phonological Analysis 3 s.h.
- 103:140 Introduction to Computational Linguistics 3 s.h.

One of these:

- 103:131 History of the English Language 3 s.h.
- 103:139/039:139 Chinese Historical Phonology 3 s.h.

One of these:

- 008:140 Elementary Old English 3 s.h.
- 008:141 Old English Beowulf 3 s.h.
- 20E:110/039:110 First-Year Sanskrit: First Semester 4 s.h.
- 20E:111/039:111 First-Year Sanskrit: Second Semester 4 s.h.
- 20E:121/039:112 Second-Year Sanskrit: First Semester 3 s.h.
- 20E:122/039:113 Second-Year Sanskrit: Second Semester 3 s.h.
- 20G:001 Classical and New Testament Greek I 5 s.h.
- 20G:002 Classical and New Testament Greek II 5 s.h.
- 20G:011 Second-Year Greek I 3 s.h.
- 20G:012 Second-Year Greek II 3 s.h.
- 20L:001 Elementary Latin I 5 s.h.
- 20L:005 Accelerated Latin 3-5 s.h.
- 20L:002 Elementary Latin II 5 s.h.
- 20L:011 World of Cicero 3 s.h.
- 20L:012 Golden Age of Roman Poetry 3 s.h.

**MUSIC**

The informatics major with a music cognate requires a minimum of 47 s.h. of work for the major, including 23 s.h. in cognate courses. The music cognate is intended for students interested in audio recording, manipulation of sound, and digital media. It may help students prepare for careers in the entertainment industry. Cognate courses are primarily from music, with some from cinema and comparative literature and from theatre arts. Entering students must possess basic musicianship skills; an audition may be required for admission.

All of these:

- 025:001 Fundamentals of Music for Majors 3 s.h.
- 025:002 Musicianship and Theory I 4 s.h.
- 025:003 Musicianship and Theory II 4 s.h.
- 025:071 Group Instruction in Piano I 1 s.h.
- 025:072 Group Instruction in Piano II 1 s.h.
- 025:149 Audio Recording I 3 s.h.
- 025:152 Audio Recording II 3 s.h.

Students who plan to take 025:002 Musicianship and Theory I or 025:003 Musicianship and Theory II must take the music theory diagnostic examination, which is administered on the Sunday before fall semester classes begin. See Music Theory Diagnostic Exam on the School of Music web site for more information.

One of these:

- 025:103 World Music 3 s.h.
- 025:104 Music of Latin America and the Caribbean 3 s.h.
- 025:141 History of Jazz 3 s.h.
- 025:144 History of Music I 3 s.h.
- 025:146 History of Music II 3 s.h.
- 025:178 Music, Culture, and Identity 3 s.h.

At least one of these to complete 23 s.h. for the cognate:

- 025:007 Garage Band: The Basics 2 s.h.
- 025:064 Recital Attendance for Non-Majors 1 s.h.
- 048:053 Introduction to Film Sound 3 s.h.
- 048:119 Topics in Film Sound 3 s.h.
- 048:131 Film/Video/Audio Production: Sound Design 3 s.h.
- 049:140 Sound Design for the Theatre 3 s.h.

**SOCIAL INFORMATICS**

The social informatics major with a sociology cognate requires a minimum of 44 s.h. of work for the major, including 20 s.h. in cognate courses, which are drawn from sociology.

All of these:
034:001 Introduction to Sociology Principles 3-4 s.h.
034:009 Sociological Theory 3 s.h.
034:011 Research Methods 3 s.h.

At least 11 s.h. from these:

034:002 Social Problems 3-4 s.h.
034:018 Gender and Society 3-4 s.h.
034:020 Principles of Social Psychology 3-4 s.h.
034:022 Introduction to Social Work 3-4 s.h.
034:040 Criminology 3 s.h.
034:061 The American Family 3 s.h.
034:066 Social Inequality 3 s.h.
034:100 Honors Seminar 2 s.h.
034:125 Small Group Analysis 3 s.h.
034:126 Social Movements in the U.S. 3 s.h.
034:128 Sociology of Mental Illness 3 s.h.
034:135 Sociology of Sexuality 3 s.h.
034:141 Juvenile Delinquency 3 s.h.
034:146 Deviance and Control 3 s.h.
034:148 Internship in Criminal Justice and Corrections 1-5 s.h.
034:149 Sociology of Criminal Punishment 3 s.h.
034:150 Political Sociology 3 s.h.
034:153 Public Opinion 3 s.h.
034:155 Comparative Studies in Race and Ethnicity 3 s.h.
034:156 Gender Inequality 3 s.h.
034:158 Economy and Society 3 s.h.
034:159 Families in Comparative Perspective 3 s.h.
034:162 Work and Family Institutions 3 s.h.
034:164 Organizations and Modern Society 3 s.h.
034:165 Sociology of Work and Occupations 3 s.h.
034:175 Community and Urban Sociology 3 s.h.
034:179 Sociology of Education 3 s.h.
034:182 Sociology of Law 3 s.h.
034:186 Criminal Legal System 3 s.h.
034:190 Selected Topics in Sociology 3 s.h.
034:195 Capstone Course in Sociology 3 s.h.
034:196 Field Experience arr.
034:199 Honors Research arr.

**INDIVIDUALIZED COGNATES**

Students interested in developing individualized cognates may work with an informatics faculty advisor. Individualized cognates may be drawn primarily from one department or an appropriate mix of departments. In the Bachelor of Arts, individualized cognates require an approved set of cognate courses totaling 18-25 s.h.

**Bachelor of Science Cognates**

Students must complete all requirements listed under one of the cognate areas below (bioinformatics or an individualized cognate).

**BIOINFORMATICS**

The bioinformatics cognate requires a minimum of 51 s.h. of work for the major, including at least 27 s.h. in cognate courses. The bioinformatics cognate is intended for students interested in applications of computing to the biological sciences. It may lead to careers in laboratory research, data management, and other related areas. It also prepares students for graduate programs in bioinformatics or genetics. The cognate offers a choice of several areas: genome bioinformatics, phylogenics and evolution, proteomics, and systems biology. Cognate courses are drawn primarily from biology and chemistry.

All students in the bioinformatics cognate must complete the following five courses.

002:010-002:011 Principles of Biology I-II 8 s.h.
004:011-004:012 Principles of Chemistry I-II 8 s.h.
004:121 Organic Chemistry I 3 s.h.

Students also must complete one of the following four areas.

**Genome Bioinformatics Area**

Both of these:

002:128 Fundamental Genetics 3-4 s.h.
002:131 Evolution 4 s.h.

One of these:

002:169 Introduction to Bioinformatics 4 s.h.
002:174 Computational Genomics 3 s.h.
002:176 Microarray Data Analysis 3 s.h.
002:178 Genomics 3 s.h.

**Phylogenetics and Evolution Area**

Both of these:

002:128 Fundamental Genetics 3-4 s.h.
002:131 Evolution 4 s.h.

One of these:
002:134 Ecology 4 s.h.
002:160 Molecular Phylogenetics 3 s.h.
002:162 Population Genetics and Molecular Evolution 3 s.h.

Proteomics Area
All of these:

002:133 Cell Biology Laboratory 3 s.h.
099:120 Biochemistry and Molecular Biology I 3 s.h.
099:241 Biophysical Chemistry I 3 s.h.

Systems Biology Area
061:157 General Microbiology 5 s.h.

One of these:

002:124 Animal Physiology 3 s.h.
061:147 Survey of Immunology 3 s.h.
061:160 Microbial Physiology 3 s.h.
061:170 Microbial Genetics 3 s.h.

INDIVIDUALIZED COGNATES

Individualized cognates may be drawn primarily from one department or an appropriate mix of departments. In the Bachelor of Science, individualized cognates require an approved set of cognate courses totaling 27-31 s.h. Students interested in developing individualized cognates should contact the Department of Computer Science for the name of an informatics faculty advisor.

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

Bachelor of Arts: Computer Science

Before the third semester begins: math through calculus I, three courses in the major (e.g., 22C:016 Computer Science I: Fundamentals, 22C:019 Discrete Structures, and 22C:021 Computer Science II: Data Structures), and at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: at least two more courses in the major and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: at least one more course in the major

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Bachelor of Science: Computer Science

These checkpoints do not include the required natural science sequence, which students usually complete as part of the General Education Program’s Natural Sciences requirement.

Before the third semester begins: math through calculus I, three courses in the major (e.g., 22C:016 Computer Science I: Fundamentals, 22C:019 Discrete Structures, and 22C:021 Computer Science II: Data Structures), and at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: at least two more courses in the major (e.g., 22C:022 Object-Oriented Software Development and 22C:060 Computer Organization), and at least one-half of the semester hours required for graduation

Before the seventh semester begins: at least three more courses in the major and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: at least two more courses in the major

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Bachelor of Arts, Bachelor of Science: Informatics

Note: Much of the work in informatics and in the cognate area needs to be taken in sequence, so students must begin fulfilling requirements for the major as early as possible.

Before the third semester begins: 22C:005 Introduction to Computer Science, 22C:080 Programming for Informatics, one or two courses in the cognate area, the statistics course, and at
least one-quarter of the semester hours required to graduate

Before the fifth semester begins: the three mid-level informatics courses (22C:082 Human-Computer Interaction, 22C:084 Databases for Informatics, and 22C:086 Networking and Security for Informatics), the statistics course (if not already completed), two or three more courses in the cognate area, and at least one-half of the semester hours required to graduate

Before the seventh semester begins: 22C:094 Informatics Project, an informatics elective course, two or three courses in the cognate area, and at least three-quarters of the semester hours required to graduate

Before the eighth semester begins: a second informatics elective course (for BS students) and courses in the cognate area

During the eighth semester: enrollment in all remaining course work in the major; all remaining General Education courses, and a sufficient number of semester hours to graduate

Honors

Honors students in the Department of Computer Science must be members of the University of Iowa Honors Program, which requires students to maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University of Iowa Honors Program for more information).

To graduate with honors in computer science or informatics, students must complete 4-6 s.h. of 22C:099 Honors in Computer Science or Informatics and submit an acceptable honors thesis. Students are responsible for finding a faculty member willing to supervise their honors project. The faculty member must approve the proposed project and a timetable for the work. Students register for 22C:099 Honors in Computer Science or Informatics under the thesis supervisor's instructor number. See Honors on the department’s web site for details. Students may count 3 s.h. of 22C:099 Honors in Computer Science or Informatics toward an advanced or technical elective for the B.S. in computer science. Students in the joint bachelor's/master's degree program may register for 4-6 s.h. of 22C:199 Individualized Research or Programming Project instead of 22C:099. This will allow them to receive graduate credit for the course while satisfying the course requirements to graduate with honors.

Minor in Computer Science

The minor in computer science requires a minimum of 17 s.h. in computer science, including 12 s.h. in courses taken at The University of Iowa.

Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass. Students excused from courses required for the minor may substitute other computer science electives. The minor requires the following courses.

All of these:

- 22C:016 Computer Science I: Fundamentals 4 s.h.
- 22C:019 Discrete Structures 3 s.h.
- 22C:021 Computer Science II: Data Structures 4 s.h.

At least one of these:

- 22C:022 Object-Oriented Software Development 4 s.h.
- 22C:031 Algorithms 3 s.h.
- 22C:060 Computer Organization 3 s.h.

Students choose one additional computer science course (prefix 22C) to complete the 17 s.h. required for the minor.

The following courses do not count toward the minor.

- 22C:001 Principles of Computing 3 s.h.
- 22C:002 First-Year Seminar 1 s.h.
- 22C:005 Introduction to Computer Science 3 s.h.
- 22C:080 Programming for Informatics 4 s.h.
- 22C:084 Databases for Informatics 3 s.h.
- 22C:094 Informatics Project 3 s.h.
- 22C:104 Introduction to Informatics 3 s.h.

Students who have completed 055:033 Introduction to Software Design, 057:017 Computers in Engineering, and 059:006 Engineering Problem Solving II are considered to have satisfied the minor’s requirement for 22C:016 Computer Science I: Fundamentals and 22C:022 Object-Oriented Software Development towards the computer science minor.

Students may declare the computer science minor on ISIS; application triggers an audit for the minor that is available on ISIS the next day of the academic session.

Minor in Informatics

The minor in informatics requires a minimum of 15 s.h., including at least 12 s.h. in courses taken at The University of Iowa. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass.

Students earning a major in computer science or in management information systems (Tippie
College of Business) may not earn the minor in informatics.

The informatics minor requires the following course work.

22C:005 Introduction to Computer Science 3 s.h.

One of these:
22C:080 Programming for Informatics 4 s.h.
22C:104 Introduction to Informatics 3 s.h.

One of these:
22C:084 Databases for Informatics 3 s.h.
06K:182 Applications Database Management Systems 3 s.h.

One of these:
22C:082 Human-Computer Interaction 3 s.h.
22C:086 Networking and Security for Informatics 3 s.h.

One of these:
22S:008 Statistics for Business 4 s.h.
22S:025 Elementary Statistics and Inference 3 s.h.
22S:030 Statistical Methods and Computing 3 s.h.
22S:039 Probability and Statistics for the Engineering and Physical Sciences 3 s.h.
22S:101 Biostatistics 3 s.h.
22S:102 Introduction to Statistical Methods 3 s.h.
22S:120 Probability and Statistics 4 s.h.

Students may declare the informatics minor on ISIS; application triggers an audit for the minor that is available on ISIS the next day of the academic session.

Joint B.A./M.C.S. and B.S./M.C.S.

The joint Bachelor of Arts/Master of Computer Science and Bachelor of Science/Master of Computer Science programs allow qualified students to obtain an undergraduate and a graduate degree in computer science in five years. The B.A./M.C.S. and B.S./M.C.S. each require a total of 140 s.h., which is 12 s.h. less than the sum of the requirements for both degrees earned separately.

Students in the joint programs must complete all requirements for each degree. They may count a maximum of 12 s.h. (four courses) toward both degrees. The four courses must be taken during the fourth year of undergraduate study, after admission to the joint program, and must satisfy degree requirements of both the B.A. or B.S., and the M.C.S.

When a student withdraws from the joint program before completing his or her bachelor’s degree, credit earned in the four courses is counted only toward the undergraduate degree.

Students are granted the B.A. or B.S. when they complete all requirements for the undergraduate degree.

Students apply for admission to the joint program during their third year as undergraduates and enter the program at the beginning of their fourth year. They usually complete the joint program comfortably in one year after finishing their B.A. or B.S. requirements.

Applicants to the joint program must be enrolled as B.A. or B.S. students majoring in computer science at The University of Iowa; must have completed a minimum of 80 s.h. at the time of admission to the joint program, with at least 30 s.h. earned at The University of Iowa; and must have a cumulative University of Iowa g.p.a. of at least 3.25, and a g.p.a. of at least 3.25 in the computer science major (computed on math prerequisites and core computer science course work taken at The University of Iowa).

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate (p. 1117) College section of the Catalog.

Applicants must submit an application for admission to the program, a statement of purpose, three letters of recommendation, and transcripts from all colleges attended; they also must apply to the Graduate College. Graduate Record Examination scores are not required. Applicants whose first language is not English must submit scores on the Test of English as a Foreign Language (TOEFL) or the International English Testing System (IELTS).

For more detailed information, see Prospective Students on the Department of Computer Science web site.

Graduate Programs

- Master of Computer Science
- Master of Science in computer science
- Doctor of Philosophy in computer science

The Master of Computer Science (M.C.S.) is a nonresearch, course-based program for students who wish to enhance their careers with advanced knowledge of computer science. The Doctor of
Philosophy program emphasizes preparation for research, teaching, and scholarly work in academic settings or private, industrial, or government laboratories. The Master of Science is granted only to students working toward the Ph.D.

Admission decisions are based on prior academic performance, letters of reference, the applicant's statement about background and purpose, and for Ph.D. applicants, scores on the Graduate Record Examination (GRE) General Test. Students need not have a master's degree to begin the Ph.D. program or to be granted the doctoral degree. A student admitted without a master's degree may choose to be granted an M.S. or the M.C.S. while working toward the doctorate.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

Current and prospective graduate students should consult the Computer Science Graduate Student Handbook, available from the department's office or on its web site. The handbook provides detailed information about specific degree requirements, such as required courses, examinations, and dissertation requirements. For general information about the department, faculty, and research activities, contact the Department of Computer Science or visit its web site.

**Master of Computer Science**

The Master of Computer Science (M.C.S.) requires a minimum of 32 s.h. of graduate credit, including at least 24 s.h. earned at The University of Iowa.

Basic M.C.S. requirements are as follows. Consult the Computer Science Graduate Student Handbook for detailed information about M.C.S. requirements and graduate study policies.

**FOUNDATIONS**

One of these:

- 22C:131 Limits of Computation 3 s.h.
- 22C:135 Theory of Computation 3 s.h.
- 22C:231 Design and Analysis of Algorithms 3 s.h.

**SYSTEMS**

One of these:

- 22C:160 High Performance Computer Architecture 3 s.h.
- 22C:166 Distributed Systems and Algorithms 3 s.h.
- 22C:181 Formal Methods in Software Engineering 3 s.h.
- 22C:185 Programming Language Foundations 3 s.h.

**COLLOQUIUM**

M.C.S. students must earn at least 2 s.h. in 22C:399 Research Seminar: Colloquium Series.

**ELECTIVES**

M.C.S. students fill their remaining 24 s.h. with a combination of computer science graduate courses, reading and project courses, and non-computer science graduate courses approved by their advisor.

Students must take at least six computer science graduate courses (18 s.h.), numbered above 120, excluding 22C:199 Individualized Research or Programming Project, 22C:290 Readings for Research, 22C:299 Research for Dissertation, and 22C:399 Research Seminar: Colloquium Series. They may count a maximum of 6 s.h. of technical or quantitative graduate courses outside of computer science, approved by their advisor, toward the elective requirement. Up to 3 s.h. of independent study courses (22C:199 Individualized Research or Programming Project or 22C:290 Readings for Research) may be counted toward the requirement.

**Master of Science**

The Master of Science in computer science is offered only to students working toward a Ph.D. in computer science. Students who are interested primarily in a master's degree and do not intend to pursue a more advanced degree should apply to the M.C.S. program.

**Doctor of Philosophy**

The Doctor of Philosophy program in computer science requires a minimum of 72 s.h. of graduate credit, three examinations (qualifying, comprehensive, and final), and a written dissertation.

Basic Ph.D. requirements are as follows. Consult the Computer Science Graduate Student Handbook for detailed information about Ph.D. requirements and graduate study policies.

**CORE REQUIREMENT**

Both of these:

- 22C:135 Theory of Computation 3 s.h.
- 22C:231 Design and Analysis of Algorithms 3 s.h.
BREADTH

Ph.D. students must complete at least three of the following courses, with at least one course selected from each area (9 s.h.).

Systems and software:

- 22C:160 High Performance Computer Architecture 3 s.h.
- 22C:169 Computer Security 3 s.h.
- 22C:196 Topics in Computer Science II (section approved by advisor) 3 s.h.

Networks and distributed systems:

- 22C:166 Distributed Systems and Algorithms 3 s.h.
- 22C:196 Topics in Computer Science II (section approved by advisor) 3 s.h.

Programming languages and compilers:

- 22C:181 Formal Methods in Software Engineering 3 s.h.
- 22C:185 Programming Language Foundations 3 s.h.
- 22C:196 Topics in Computer Science II (section approved by advisor) 3 s.h.

PRACTICE

Ph.D. students must complete at least one course (3 s.h.) with significant practical or implementation-oriented content. Each semester the department designates courses that satisfy this requirement. The following are typical selections.

- 22C:144 Database Systems 3 s.h.
- 22C:145 Artificial Intelligence 3 s.h.
- 22C:151 Computer Graphics 3 s.h.
- 22C:174 Optimization Techniques 3 s.h.
- 22C:177 High Performance and Parallel Computing 3 s.h.
- 22C:180 Fundamentals of Software Engineering 3 s.h.
- 22C:199 Individualized Research or Programming Project 3 s.h.
- 22C:251 Advanced Computer Graphics 3 s.h.
- 06K:278 Web Mining 3 s.h.

COGNATE AREA

Ph.D. students are required to select, in consultation with their advisor, a total of 9 s.h. in courses that constitute coherent coverage of an external cognate area. Choices include, but are not limited to, mathematics, statistics, genetics, biology, and engineering disciplines.

COLLOQUIUM

Ph.D. students must earn at least 4 s.h. in 22C:399 Research Seminar: Colloquium Series.

ELECTIVES

Ph.D. students fill their remaining semester hours with a selection of computer science graduate courses numbered above 120 and graduate courses outside of computer science, approved by their advisor.

QUALIFYING EXAM

Ph.D. students are required to pass a qualifying examination by the end of their second year of graduate study. Once students select a topic in consultation with their advisor, they are assigned a three-member faculty examination panel by the department. Then they prepare a written prospectus for review by the committee, followed by an oral presentation.

COMPREHENSIVE EXAM

The comprehensive examination is an evaluation of the student’s mastery of a research area near completion of formal course work, and before preparation of the dissertation. The exam may be written, oral, or both, at the department’s discretion, and is administered by a faculty committee. The comprehensive exam typically should be completed by the end of the student’s third year and no later than the end of the fourth year in the Ph.D. program.

DISSERTATION

Each Ph.D. student must write a dissertation, a significant, original contribution to the field of computer science. Once students obtain some preliminary results and can identify and describe the boundaries of their dissertation, they prepare a written proposal for their committee’s review. The dissertation must be prepared in accordance with the format specified in the Graduate College Thesis Manual.

FINAL ORAL EXAMINATION

Once the dissertation is complete and has been reviewed by the student’s committee, a final oral examination is administered on campus. This examination must take place no sooner than the semester following successful completion of the comprehensive examination and no later than five years after completion of the comprehensive exam.
Computer Science Courses

For Undergraduates

22C:001 Principles of Computing 3 s.h.
Introduction to computing; broad overview of discipline; necessary skills and concepts for effective application of computing resources in student’s chosen profession. Recommendations: no credit for students who have completed a higher-numbered 22C course or 06K:070 or 06K:170. GE: Quantitative or Formal Reasoning.

22C:002 First-Year Seminar 1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.

22C:005 Introduction to Computer Science 3 s.h.
Introduction to computer science and the study of algorithms; foundational ideas, computer organization, software concepts (e.g., networking, databases, security); programming concepts using Python. Recommendations: closed to students who have completed 22C:021 or a higher-numbered computer science course. GE: Quantitative or Formal Reasoning.

22C:016 Computer Science I: Fundamentals 4 s.h.
Introduction to programming using Python; programming constructs, data types, problem-solving strategies, data structures, object-oriented programming. Requirements: 22M:009 or 22M:013 or 22M:015 or math placement to a calculus course. GE: Quantitative or Formal Reasoning.

22C:019 Discrete Structures 3 s.h.
Mathematical methods used in computer science, including logic, proof techniques (with induction), functions, relations, algorithm analysis, recurrence relations, counting methods, combinatorics, graphs, trees. Prerequisites: 22C:016. Recommendations: calculus I.

22C:021 Computer Science II: Data Structures 4 s.h.
Design, implementation and analysis of data structures and algorithms, including linked lists, stacks, queues, hash tables, trees, graphs; complexity analysis; recursion; dynamic data structures. Corequisites: 22C:019, if not taken as a prerequisite. Requirements: grade of C- or higher in 22C:016.

22C:022 Object-Oriented Software Development 4 s.h.
Object-oriented design and software development methodology; team programming projects; GUIs, event handling, network programming, concurrency, data representation, IO programming. Prerequisites: 22C:016. Corequisites: 22C:019, if not taken as a prerequisite.

22C:031 Algorithms 3 s.h.
Algorithm design techniques (divide and conquer, dynamic programming, greedy) and analysis techniques (big O notation, recurrence); sorting (merge sort, heapsort, and quicksort), searching (B-trees, AVL trees or red black trees, hashing); basic graph algorithms (depth-first and breadth-first search, minimum spanning trees, shortest paths); NP-completeness. Prerequisites: 22C:021, and 22M:025 or 22M:031.

22C:060 Computer Organization 3 s.h.
Computer building blocks: representing data, computer arithmetic, instruction sets, assembly language, digital logic, control units, ALU design, register operations, memory organization, IO. Prerequisites: 22C:021.

22C:072 Elementary Numerical Analysis 3 s.h.
Computer arithmetic, root finding, polynomial approximation, numerical integration, systems of linear equations, ordinary differential equations; use of higher-level computer language such as Matlab, Maple, Mathematica. Requirements: grade of C- or higher in 22M:026 or 22M:032. Same as 22M:072.
22C:080 Programming for Informatics
4 s.h.
Computing fundamentals for informatics students, including practical programming skills (e.g., in Perl, other scripting languages) and introduction to algorithms, data structures, databases. Prerequisites: 22C:005. Corequisites: 22M:005 or 22M:009 or 22M:010 or 22M:013 or 22M:015, if not taken as a prerequisite.

22C:082 Human-Computer Interaction
3 s.h.
Basic theories, principles, and guidelines for design and evaluation of human-computer interactions; design methodologies (e.g., participatory design, low- and high-fidelity prototyping), user interface technologies (e.g., input and output devices, interaction styles), quantitative and qualitative evaluation of user interfaces (e.g., expert reviews, usability testing). Corequisites: 22C:080, if not taken as a prerequisite. Requirements: an approved statistics course.

22C:084 Databases for Informatics
3 s.h.
Design and implementation of relational database systems: introduction to the relational model, database design, database normalization, use of database query and manipulation languages such as SQL. Prerequisites: 22C:080.

22C:086 Networking and Security for Informatics
3 s.h.
Introduction to computer networking, overview of network organization and management; basic understanding of encryption and network security; practical experience in network programming. Prerequisites: 22C:080.

22C:094 Informatics Project
3 s.h.
Experience designing, implementing, documenting, and testing a system using appropriate software tools (e.g., a project working with an information management tool consisting of a database system with a Web-based front end); typically done in small groups; capstone project for informatics majors. Prerequisites: 22C:082, 22C:084, and 22C:086.

22C:096 Topics in Computer Science I
3 s.h.
Complement to material in other courses. Prerequisites: 22C:021 or 22C:022 or 22C:080 or 22C:104.

22C:099 Honors in Computer Science or Informatics
arr.
Individual projects. Requirements: computer science or informatics major, and honors standing.

For Undergraduate and Graduate Students

22C:109 Programming Languages and Tools
3 s.h.
Varied programming languages and tools. Prerequisites: 22C:016 or 22C:080 or 22C:104.

22C:111 Programming Language Concepts
3 s.h.
Imperative, functional, and logical programming languages, and differences between them; syntax specification, types, control structures, recursion, data abstraction. Prerequisites: 22C:021 and 22C:022, or 22C:060.

22C:112 Operating Systems
3 s.h.
Introduction to modern operating systems, including device control, memory management and addressing, process scheduling, interprocess communication, interrupts, synchronization, security. Prerequisites: 22C:060.

22C:113 Introduction to Systems Software
3 s.h.
Design and implementation of system software, including operating systems and programming support software (assemblers, compilers, linkers, loaders): process, memory, message management. Prerequisites: 22C:060.

22C:118 Introduction to Networks and Their Applications
3 s.h.
Introduction to networks and the development of network applications; basic concepts of network communication common to applications such as simulation and web services. Prerequisites: 22C:060.
22C:131 Limits of Computation 3 s.h.
Turing machines, undecidability and complexity: reductions, Cook’s theorem and NP-completeness, approximation algorithms and randomized algorithms. Prerequisites: 22C:031.

22C:135 Theory of Computation 3 s.h.
Finite automata; regular sets and expressions; context-free and context-sensitive grammars, their properties; push-down automata; standard, universal, and linear-bound Turing machines; relationships between formal languages and automata; undecidability and its consequences. Prerequisites: 22C:031.

22C:141 Knowledge Discovery 3 s.h.
Knowledge discovery process, including data reduction, cleansing, transformation; advanced modeling techniques from classification, prediction, clustering, association; evaluation and integration. Same as 06K:275.

22C:144 Database Systems 3 s.h.
Introduction to database systems including querying using SQL, design using ER diagrams, developing relational databases, programming web applications using PHP or JDBC. Prerequisites: 22C:021 and 22C:031.

22C:145 Artificial Intelligence 3 s.h.
Introduction to artificial intelligence covering problem-solving methods, heuristic search, knowledge representation, automated reasoning, planning, game playing, machine learning, and neural networks. Prerequisites: 22C:031.

22C:146 Introduction to Computational Linguistics 3 s.h.
Introduction to computational linguistics; focus on theory and practice of natural language processing and syntactic and semantic analysis. Same as 103:140.

22C:148 Research Methods in Human-Computer Interaction 3 s.h.
Survey of recent research in the field of human-computer interaction; research methods and current readings. Requirements: 22C:082 or graduate standing in computer science.

22C:149 Web Mining 3 s.h.
Core methods underlying development of applications on the Web; examples of relevant applications, including those pertaining to information retrieval, summarization of Web documents, and identifying social networks. Prerequisites: 22C:021 and 22C:022. Recommendations: 22C:144 strongly recommended.

22C:151 Computer Graphics 3 s.h.
Introduction to computer graphics algorithms and techniques, with emphasis on interactive 3-D graphics; coordinate systems and frames, modeling and viewing transformations, rendering, shading, lighting, texture, bump, environment mapping, animation, ray tracing, radiosity. Prerequisites: 22C:031 and 22M:027.

22C:160 High Performance Computer Architecture 3 s.h.
Problems involved in designing and analyzing current machine architectures using hardware description language (HDL) simulation and analysis, hierarchical memory design, pipeline processing, vector machines, numerical applications, multiprocessor architectures and parallel algorithm design techniques; evaluation methods to determine relationship between computer design and design goals. Prerequisites: 22C:112 or 22C:113 or 055:035. Same as 055:132.

22C:166 Distributed Systems and Algorithms 3 s.h.
Models of distributed systems, program correctness--safety and liveness properties, causality, logical and vector clocks, mutual exclusion, distributed snapshot, leader election, distributed algorithms for graph-theoretic problems, fault-tolerance--masking versus nonmasking types, checkpointing, stabilization, consensus--byzantine generals problem, fault-tolerant broadcast and multicast, management of replicated data. Prerequisites: 22C:031, 22C:112 or 22C:113. Requirements: some interest in networking.
22C:169 Computer Security 3 s.h.
Mechanism versus policy; authentication, access control, security domains; perimeter security, defense in depth; cryptographic protocols; key management and distribution; security assessment. Prerequisites: 22C:060.

22C:170 Numerical Analysis: Nonlinear Equations and Approximation Theory 3 s.h.
Root finding for nonlinear equations; polynomial interpolation; polynomial approximation of functions; numerical integration. Prerequisites: 22M:027 and 22M:028, or 22M:037 or 22M:056. Requirements: knowledge of computer programming. Same as 22M:170.

22C:171 Numerical Analysis: Differential Equations and Linear Algebra 3 s.h.
Numerical methods for initial value problems for ordinary differential equations; direct and iterative methods for linear systems of equations; eigenvalue problems for matrices. Prerequisites: 22M:027 and 22M:028, or 22M:037 or 22M:056; and 22M:100. Requirements: knowledge of computer programming. Same as 22M:171.

22C:174 Optimization Techniques 3 s.h.

22C:177 High Performance and Parallel Computing 3 s.h.
Parallel scientific computing methods such as parallel algorithms for dense and sparse matrices; implementation using libraries such as MPI; current topics such as grid computing. Requirements: linear algebra or numerical analysis course, and a programming language. Same as 22M:178.

22C:180 Fundamentals of Software Engineering 3 s.h.
Problem analysis, requirements definition, specification, design, implementation, testing/maintenance, integration, project management; human factors; management, technical communication; design methodologies; software validation, verification; group project experience. Prerequisites: 22C:022 or 055:033. Same as 055:180.

22C:181 Formal Methods in Software Engineering 3 s.h.
Models, methods, and their application in all phases of software engineering process; specification methods; verification of consistency, completeness of specifications; verification using tools. Prerequisites: 22C:022 or 055:033. Recommendations: 22C:188. Same as 055:181.

22C:182 Software Engineering Languages and Tools 3 s.h.
Object-oriented programming concepts (objects, classes, single and multiple inheritance, polymorphism and dynamic binding); object-oriented languages and environments such as JAVA and Eiffel; introduction to design patterns and software architectures such as Model-View-Controller and application frameworks; component-based software development; use of standard component frameworks such as CORBA and COM/DCOM. Prerequisites: 22C:180 or 055:180. Requirements: experience with an object-oriented programming language. Same as 055:182.

22C:183 Software Engineering Project 3 s.h.
Team software development project using concepts and methodologies learned in earlier software engineering classes; practical aspects of large-scale software development. Prerequisites: 22C:180 and 22C:182. Same as 055:183.

22C:185 Programming Language Foundations 3 s.h.
Introduction to formal foundations of programming languages using a variety of models, including attribute grammars, operational, axiomatic, denotational, and algebraic techniques; proofs of program equivalence, correctness, termination. Prerequisites: 22C:031 and 22C:111.
22C:188 Logic in Computer Science
3 s.h.
Applications of symbolic logic in computer science; symbolic logic as a powerful tool for modeling computation and computational devices and reasoning formally about them; introduction to several logics (i.e., propositional, predicate, temporal, modal) differing in their expressive power and focus, their uses in computer science; how to represent knowledge in these logics, what represents a valid argument, and how to prove or disprove, possibly automatically, the validity of a logical statement. Prerequisites: 22C:019. Recommendations: computer science, math, or engineering major.

22C:196 Topics in Computer Science II
3 s.h.
Complements material in other courses. Prerequisites: 22C:021 or 22C:022.

22C:199 Individualized Research or Programming Project
arr.
Individualized research and/or programming projects in computer science, guided by a faculty member.

For Graduate Students

Competence and exposure to computer science are not only useful, they often are prerequisite to advanced study and research in many disciplines. For most graduate students from other disciplines, an appropriate first course is 22C:104 Introduction to Informatics.

22C:104 Introduction to Informatics
3 s.h.
Fundamentals of computer science: algorithms, complexity, relational databases, systems concepts, programming in Perl. Requirements: 22C:005 or graduate standing.

22C:231 Design and Analysis of Algorithms
3 s.h.
Review of design and analysis techniques; advanced data structures (binomial and Fibonacci heaps, disjoint sets); graph algorithms (network flows, matching, min-cut); NP-completeness, randomization and approximation algorithms; special topics (string matching, computational geometry, number theoretic algorithms). Prerequisites: 22C:031 or 22C:131.

22C:242 Data Mining and Machine Learning
3 s.h.
Topics in machine learning theory and support vector machines (SVM); state-of-the-art data mining and machine learning explored through student projects and discussion of research papers. Prerequisites: 06K:275 or 22C:141 or 22C:142.

22C:251 Advanced Computer Graphics
3 s.h.
Topics such as global illumination and rendering; volume rendering; animation; curves and surfaces, advanced modeling and mapping techniques; graphics hardware; real-time graphics for virtual environments. Prerequisites: 22C:151.

22C:290 Readings for Research
arr.
Requirements: Ph.D. standing in computer science.

22C:296 Topics in Computer Science III
arr.
Complements material in other courses.

22C:299 Research for Dissertation
arr.
Requirements: Ph.D. candidacy (postcomprehensive exam) in computer science.

22C:399 Research Seminar: Colloquium Series
1 s.h.
Graduate colloquium. Repeatable. Requirements: graduate standing in computer science.
Creative Writing (Iowa Writers' Workshop)

**Director**
Lan Samantha Chang

**Professors**
Ethan Canin (Creative Writing/English), Lan Samantha Chang (Creative Writing/English), James Galvin (Creative Writing/English), James Alan McPherson (Creative Writing/English), Marilynne Robinson (Creative Writing/English), Cole Swensen (Creative Writing/English/Cinema and Comparative Literature)

**Associate professor**
Mark Levine (Creative Writing/English)

**Graduate degree:** M.F.A. in English
**Web site:** [http://www.uiowa.edu/~iww/](http://www.uiowa.edu/~iww/)

The Creative Writing Program (Iowa Writers’ Workshop) is a world-renowned graduate program for fiction writers and poets. It was the first creative writing program in the United States to offer a degree, and it became a model for many contemporary writing programs. In addition to its Master of Fine Arts program, it also offers writing courses for undergraduates.

Creative writing classes at The University of Iowa began in the 1890s, and in 1922 the University became the nation’s first institution of higher education to accept creative work as theses for advanced degrees. The Iowa Writers’ Workshop began in 1936, drawing distinguished fiction writers and poets who would lecture and stay to discuss students’ work; some came for a full year of teaching.

Today the program’s faculty and alumni include nationally and internationally prominent poets, novelists, and short story writers; many have won Pulitzer Prizes, National Book Awards, and other major literary honors. In 2003 the Iowa Writers’ Workshop received a National Humanities Medal from the National Endowment for the Humanities—the first awarded to a university and only the second given to an institution rather than an individual.

To learn more about the Creative Writing Program’s history and faculty, visit the Iowa Writers’ Workshop web site.

**Graduate Program**

- **Master of Fine Arts in English**

Unusually well-qualified students in the Department of English Ph.D. program may obtain permission to submit a creative dissertation for that degree; the Program in Creative Writing assumes responsibility for granting permission for the option of the creative dissertation and for approving the dissertation once it is completed. Contact the director of graduate study in the Department of English for more information.

**Master of Fine Arts**

The Master of Fine Arts degree in English (creative writing) requires 48 s.h. of graduate credit taken over four semesters in residence at The University of Iowa. Students specialize in fiction or poetry. Work toward the degree culminates in a creative thesis.

The program is flexible and individualized. Approximately half of the credit required for the degree is earned in writing courses; the rest may be earned in other graduate courses. Up to 18 s.h. of graduate transfer credit may be counted toward the degree, but transfer credit does not change the residency requirement.

Students must enroll in 08C:251 Fiction Workshop or 08C:252 Poetry Workshop during each semester of residence in the program. In each course, groups of 10-15 students read and critique each others’ work.

The program’s seminars provide students with a thorough knowledge of their chosen literary form and related aspects of craft. Seminars include 08C:270 Form of Fiction, 08C:275 Form of Poetry, 08C:490 Seminar: Problems in Modern Fiction, and 08C:495 Seminar: Problems in Modern Poetry. Each focuses on a single aspect of modern poetry or fiction, such as a single writer’s work or a body of work with a common theme or purpose.

In addition to taking Creative Writing Program courses, many M.F.A. students choose courses offered by other University of Iowa departments and programs, such as the interdisciplinary Center for the Book (p. 1149) (Graduate College), the Department of Theatre Arts (p. 758), the Department of Cinema and Comparative Literature (p. 183), and the Department of English (p. 304).

During the last semester of the program, each student must take the M.F.A. examination, an essay exam that may be written outside of the classroom. Students also submit their graduate thesis during the last semester (08C:590 M.F.A. Thesis); the thesis is a fiction or poetry manuscript of substantial length.

**Admission**

Applicants to the Creative Writing Program (Iowa Writers’ Workshop) must meet the program’s
admission requirements as well as those of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate (p. 1117) College section of the Catalog.

A creative writing manuscript is the most important element of the application for admission to the workshop. Submissions for poetry should include 10-12 poems. Submissions for fiction should include two or three short stories or a section of a novel, or both, usually 30-38 double-spaced pages (may not exceed 100 double-spaced pages).

Other application materials include a personal statement, official transcripts from all universities and colleges attended, the graduate application form, three letters of recommendation, an application for graduate awards, and an application to the Graduate College. Graduate Record Exam (GRE) General Test scores are optional, but they may make applicants more competitive for a wider range of financial assistance.

For detailed information on application materials and procedures, see Graduate Admissions/Admission to the Workshop on the Iowa Writers’ Workshop web site.

Financial Support

Financial assistance is available to Creative Writing Program students in the form of teaching assistantships, research assistants, and fellowships. See Applying for Financial Aid on the Iowa Writer’s Workshop web site.

Courses

The Creative Writing Program offers courses for undergraduates as well as graduate students. Enrollment in some graduate-level courses requires admission to the M.F.A. program.

For Undergraduates

See "Courses" in the Department of English (p. 304) section of the Catalog for course descriptions and prerequisites to enrollment.

Critical Cultural Competence

Coordinator
Motier Haskins

Undergraduate nondegree program:
Certificate in Critical Cultural Competence
Web site: http://www.uiowa.edu/~socialwk/certificateinccc/

The Certificate in Critical Cultural Competence is administered by the School of Social Work (p. 692).

Undergraduate Program

• Certificate in Critical Cultural Competence

The certificate program helps students develop an appreciation for their own cultural identities. It also helps them become critically self-reflective in their orientation to differences in other people’s cultural identities as defined by matters such as race, ethnicity, gender, class, and sexual orientation.

Certificate

The Certificate in Critical Cultural Competence requires 18 s.h. of course work. Ideally, students begin the certificate during their second year of undergraduate study. The program is open to undergraduate students from across the University. Completion of the certificate is noted on the student’s transcript.

Certificate students build the knowledge, skills, and attitudes they will need in order to increase their effectiveness in relating to others across cultural differences and in domestic and international environments that are increasingly diverse.

Students who complete the certificate program develop:

• greater appreciation of cultural differences;
• increased ability to interact with individuals of diverse backgrounds;
• a philosophy of treating people fairly, equitably, and thoughtfully;
• critical self-reflection and awareness of their own culture;
• ability to assess and understand culture-related privilege and disprivilege; and
• concern with issues of power and privilege, and social justice.

The Certificate in Critical Cultural Competence requires the following course work.

<tr>
<td>208:190</td>
<td>Integrative Seminar in Critical Cultural Competence</td>
<td>3 s.h.</td>
</tr>
</tbody>
</table>

Students begin the certificate with 208:120 Foundations of Critical Cultural Competence, which is offered spring semesters and is prerequisite to the course work that follows. They complete a minimum of three elective courses (9 s.h.) that cover at least two diversity categories; a maximum of two electives may be taken from the same department, and two of the three electives must be numbered 100 or above. An additional experiential elective (3 s.h.) with an immersion-learning or service-learning component is required. Students complete the certificate’s requirements with the capstone course, 208:190 Integrative Seminar in Critical Cultural Competence, which is offered spring semesters.

In collaboration with the certificate program’s coordinator, students establish study plans while completing the foundation course. The coordinator works with the academic advisor in the student’s major to ensure that the study plan complements the student’s academic program and career interests. The program coordinator approves the final study plan, recommends the sequence in which course work should be taken, schedules required courses, and keeps a record of each student’s approved program and progress.

For more information, contact the School of Social Work.
Courses

**208:120 Foundations of Critical Cultural Competence**

3 s.h.

Experiential and theoretical foundation; cultural competence as a concept and practice; conceptual frameworks and models for understanding cultural differences and similarities within, among, and between groups of people with whom others interact in their professional, personal, public, and private lives; appreciating differences while learning to be self-reflective; adjustment of perceptions, behaviors, styles for effective interaction with people from different ethnic, racial, sexual, gender, class groups. Prerequisites: 010:003.

---

**208:190 Integrative Seminar in Critical Cultural Competence**

3 s.h.

Capstone course; application of knowledge to one’s areas of study; community settings where cultural competence is required; challenges and benefits of behaving in culturally competent ways in varied contexts; review and critique of educational experiences in the certificate program; development of skills in community education related to cultural competence; group project to benefit the University and/or community; development of a plan to integrate critical cultural competence into careers. Requirements: completion of other required certificate courses.

Undergraduate degrees: B.A., B.F.A. in Dance
Undergraduate nondegree program: Minor in Dance
Graduate degree: M.F.A. in Dance
Web site: http://dance.uiowa.edu

The Department of Dance offers degree programs for undergraduates and graduate students. The undergraduate major in dance provides a liberal arts and sciences education and thorough preparation for careers in professional dance, choreography, and education as well as preparation for graduate studies.

The department offers as many as 14 concerts every year, providing dance students with numerous opportunities for performance and choreography. Each year the University of Iowa Dance Company performs Dance Gala on campus, and since 1986, the department’s touring company, Dancers in Company, has given students an opportunity to perform in Iowa and surrounding states.

Dance faculty members regularly present their choreography in national and international venues, giving University student performers the opportunity to further develop their performance skills. Periodic master classes with noted guest teachers, choreographers, and touring companies add diversity to the dance experience.

The department is one of three academic units in the Division of Performing Arts (p. 288). It participates in offering the division’s Certificate in Performing Arts Entrepreneurship (p. 613).

Undergraduate Programs

• Major in dance (Bachelor of Arts, Bachelor of Fine Arts)
• Minor in dance

Students must audition on campus in order to be admitted to a degree program or the minor in dance, as well as for placement in advanced dance classes.

Bachelor of Arts

The Bachelor of Arts with a major in dance requires a minimum of 120 s.h., including 53 s.h. of work for the major (50 s.h. in dance and 3 s.h. in a required anatomy course). The program is designed for students who want to acquire a strong liberal arts and sciences background while pursuing a comprehensive undergraduate dance education. The dance major for the Bachelor of Arts stresses performance and choreography as well as dance theory courses, including dance history, dance kinesiology, and dance production.

Students must audition on campus, during the semester before they enter the University, in order to be admitted to a degree program in dance. They must audition for placement in dance classes before they register for classes. Nonmajors and students earning a minor in dance may register only for beginning and continuing levels of ballet and modern dance, but they may register for all levels of jazz and Afro-Cuban dance. Contact the Department of Dance, its undergraduate program coordinator, or the University’s Office of Admissions for additional information.

Students must complete the College of Liberal Arts and Sciences General Education Program (p. 381).

All B.A. students must complete 027:053 Human Anatomy (3 s.h.). The required 50 s.h. in Department of Dance courses must include two semesters of 137:113 Major Ballet II or 137:114 Major Modern Dance II with a grade of B-minus or higher. Two semesters of 137:124 Major Modern Dance III, 137:123 Major Ballet III, or 137:130 Major Modern Dance IV also satisfy this requirement. At least half of all semester hours in the major must be earned at The University of Iowa. No more than 50 s.h. in Department of Dance courses may be counted toward the 120 s.h. required for the B.A.

Students who select cross-referenced, non-dance department courses to satisfy the core course requirements must take additional dance electives.
to complete the required 50 s.h. in Department of Dance courses.

Credit earned in Department of Dance courses (prefix 137) that is not used to satisfy core, studio, or dance technique degree requirements is counted toward the dance elective requirement. Dance electives complete the 50 s.h. of dance courses required for the Bachelor of Arts.

The required number of semester hours in dance electives varies depending on whether the student completes the core with dance courses or with cross-referenced courses from another department, or has a core requirement waived.

**Bachelor of Fine Arts**

The Bachelor of Fine Arts with a major in dance requires a minimum of 120 s.h., including 78 s.h. of work for the major (75 s.h. in dance and 3 s.h. in a required anatomy course). In contrast to the B.A. program, the dance major for the Bachelor of Fine Arts emphasizes choreography and performance through an additional 25 s.h. of choreography, performance, and technique. Students may be admitted to the B.F.A. program after they have completed a minimum of 30 s.h. at The University of Iowa. Students who have achieved the equivalent of major II technique and who show academic and professional promise are selected by department faculty for admission to the program.

Students must complete the College of Liberal Arts and Sciences General Education Program (p. 381).

All B.F.A. students must complete 027:053 Human Anatomy (3 s.h.). The required 75 s.h. in Department of Dance courses must include three semesters of 137:123 Major Ballet III or 137:130 Major Modern Dance IV with a grade of B-minus or higher. B.F.A. students are required to maintain a cumulative g.p.a. of at least 3.50 in dance department courses. They also must earn at least half of the semester hours in the major at The University of Iowa. No more than 75 s.h. in Department of Dance courses may be counted toward the 120 s.h. required for the B.F.A.

The department encourages B.F.A. students to register for cross-referenced core courses under the Department of Dance course number (prefix 137). Cross-referenced courses are those with more than one course number (e.g., 137:080/188:080 Dance and Society).

**CORE COURSES**

B.F.A. students should register for cross-listed courses under the Department of Dance course number (prefix 137).

1-3 s.h.  
1-2 s.h.  
1 s.h.  
2-3 s.h.  
1 s.h.  

DANCE ELECTIVES

B.F.A. students choose advanced-level elective course work by selecting one of the following three options.

Option 1 (pedagogy)—one of these:

137:143 Elementary Ballet Pedagogy  
137:144 Teaching of Modern Dance  
3 s.h.  
3 s.h.  

Option 2 (advanced history or theory)—one of these:

137:202 Theories of Dance and the Body  
137:182 The Contemporary Dance Scene  
3 s.h.  
3 s.h.  

Option 3 (choreography)—both of these:

137:171 Choreography IV  
137:172 Independent Choreography  
2 s.h.  
1 s.h.  

Credit earned in Department of Dance courses (prefix 137) that is not used to satisfy core, studio, or dance technique degree requirements is counted toward the dance elective requirement. Dance electives complete the 75 s.h. of dance courses required for the Bachelor of Fine Arts.

The required number of semester hours in dance electives varies depending on whether the student completes the core with dance courses or with cross-referenced courses from another department, or has a core requirement waived.

SENIOR PROJECT

B.F.A. students culminate their experience with senior projects in choreography or performance. The senior project also may be taken for honors credit.

137:141 B.F.A. Senior Project in Dance  
arr.

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

Department of Dance course work beyond 50 s.h. for B.A. students and 75 s.h. for B.F.A. students does not apply toward semester hours required for graduation.

Bachelor of Arts

Before the third semester begins: 12 s.h. of courses in the major and at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: 24-32 s.h. of courses in the major and at least one-half of the semester hours required for graduation

Before the seventh semester begins: 36-48 s.h. of courses in the major and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: 42-50 s.h. of courses in the major

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate
Bachelor of Fine Arts

Before the third semester begins: 16 s.h. of courses in the major and at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: 25-40 s.h. of courses in the major and at least one-half of the semester hours required for graduation

Before the seventh semester begins: 45-60 s.h. of courses in the major and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: 57-75 s.h. of courses in the major

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Honors

In order to pursue honors studies in the Department of Dance, a student must be a member of the University of Iowa Honors Program, which requires students to maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University of Iowa Honors Program for more information). Honors students in dance must maintain a g.p.a. of at least 3.50 in UI dance department courses.

The honors program in dance is designed to serve and recognize outstanding students in the areas of choreography, performance, and special projects. It requires 8-10 s.h. To complete the honors program in dance, students must take two courses for honors credit and complete an honors project. All honors projects must be approved by the dance department faculty.

Minor

The minor in dance requires a minimum of 15 s.h. in University of Iowa Department of Dance courses, including 12 s.h. in 100-level courses. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass.

The minor must include the following course work.

137:080 Dance and Society: U.S. Forms in Transnational and Critical Contexts 3 s.h.

One of these:

137:134 Improvisation I 2 s.h.
137:147 Dance Kinesiology 3 s.h.
137:160 Introduction to Laban Movement Studies 2-3 s.h.
137:174 Introduction to Afro-Cuban Dance 1 s.h.
137:181 Dance History 3 s.h.

Students must complete one of these six courses in order to be admitted to any 100-level dance technique class.

Students must audition on campus in order to be admitted to the minor and for placement in dance classes. Auditions are offered four times per year. For audition information, contact the department or visit the Department of Dance web site.

Graduate Program

• Master of Fine Arts in dance

The Master of Fine Arts is offered with a choice of choreography track or performance track. Students must audition on campus in order to be admitted to the M.F.A. program.

Master of Fine Arts

The Master of Fine Arts program in dance requires a minimum of 60 s.h. of graduate credit. The program is designed to be completed in four to six semesters in residence. Students who demonstrate accomplishment in dance performance and/or choreography may apply for admission to the M.F.A. program. Applicants select the choreography or the performance track before they are admitted.

Admission is based on a review of videotaped choreographic and performance work; letters of recommendation; application materials; and an on-campus audition, in which applicants perform a solo dance, teach one or more classes, and take advanced classes in ballet and modern technique to determine class placement level.

Advanced technique (ballet and/or modern) and demonstrated accomplishment in performance or choreography are prerequisites for admission to the M.F.A. program.

The M.F.A. requires the following course work.

DANCE CORE

A total of 19 s.h. of core course work is required for both the performance and the choreography track.
137:143 Elementary Ballet Pedagogy 3 s.h.
137:144 Teaching of Modern Dance 3 s.h.

137:200 Graduate Seminar in Dance 2 s.h.
137:201 Graduate Production Practicum 1 s.h.
137:202 Theories of Dance and the Body 3 s.h.

137:234 Graduate Improvisation I 1-2 s.h.
137:235 Graduate Improvisation II 2 s.h.

137:277 Thesis (8 s.h. required) arr.

**DANCE TECHNIQUE**

The performance track requires 18 s.h. from the following, and the choreography track requires 12 s.h. All courses may be repeated.

**ELECTIVES**

M.F.A. candidates in performance must earn a total of 9 s.h. in elective courses numbered 100 or above. A minimum of 6 s.h. must be earned in non-dance department courses. The remaining 3 s.h. must be earned in 137:147 Dance Kinesiology, 137:181 Dance History, or 137:182 The Contemporary Dance Scene.

M.F.A. candidates in choreography must earn a total of 15 s.h. in elective courses numbered 100 or above. A minimum of 6 s.h. must be earned in non-dance department courses; 6 s.h. must be earned in a course or courses that provide research material for the thesis. The remaining 3 s.h. must be earned in 137:147 Dance Kinesiology, 137:181 Dance History, or 137:182 The Contemporary Dance Scene.

**Facilities**

The Department of Dance houses six technique studios, a movement training lab, a media classroom and library, a media laboratory, an audio recording laboratory, and its own theater for dance concerts.
Courses

**Primarily for Undergraduates**

**137:001 Beginning Tap** 1-2 s.h.
Elementary techniques, steps, and performance skills for rhythm and show tap styles; enhancement of rhythmic ability through exercises, improvisation, creative activities; may include history of tap. Tap shoes required. GE: Literary, Visual, and Performing Arts.

**137:002 Beginning Jazz** 1-2 s.h.
Basic movement fundamentals, terminology, performance skills of jazz dance; enhancement of flexibility, strength, body alignment, coordination, balance, kinesthetic awareness, personal range of motion, and musicality; warm-up, locomotion, center combinations; may include history of jazz dance. GE: Literary, Visual, and Performing Arts.

**137:003 Beginning Ballet** 1-2 s.h.
Basic movement fundamentals, terminology, performance skills of ballet; enhancement of flexibility, strength, body alignment, coordination, balance, kinesthetic awareness, personal range of motion, and musicality; barre and center combinations; terminology; may include history of ballet. GE: Literary, Visual, and Performing Arts.

**137:004 Beginning Modern Dance** 1-2 s.h.
Basic movement fundamentals, terminology, performance skills of modern dance; enhancement of flexibility, strength, body alignment, coordination, balance, kinesthetic awareness, personal range of motion, and musicality; warm-up, locomotion, center combinations; may include history of modern dance. GE: Literary, Visual, and Performing Arts.

**137:011 Continuing Tap** 1-2 s.h.
Continuation of 137:001. GE: Literary, Visual, and Performing Arts.

**137:012 Continuing Jazz** 1-2 s.h.
Continuation of 137:002; skills for technique and performance of jazz dance; enhancement of flexibility, strength, body alignment, coordination, balance, kinesthetic awareness, personal range of motion, and musicality; warm-up, locomotion, center combinations; may include history of jazz dance. GE: Literary, Visual, and Performing Arts.

**137:013 Continuing Ballet** 1-2 s.h.
Continuation of 137:003; skills necessary for technique and performance of ballet; enhancement of flexibility, strength, body alignment, coordination, balance, kinesthetic awareness, personal range of motion, and musicality; barre and center combinations; terminology; may include history of ballet. GE: Literary, Visual, and Performing Arts.

**137:014 Continuing Modern Dance** 1-2 s.h.
Continuation of 137:004; skills necessary for the technique and performance of modern dance; enhancement of flexibility, strength, body alignment, coordination, balance, kinesthetic awareness, personal range of motion, and musicality; warm-up, locomotion, center combinations; may include history of modern dance. GE: Literary, Visual, and Performing Arts.

**137:022 Intermediate Jazz** 1-2 s.h.
Low intermediate technique and performance training in jazz dance; flexibility, strength, body alignment, and coordination as foundation for more advanced dance artistry, including mobility, musicality, style; warm-up, locomotion, center combinations; may include history of jazz dance. GE: Literary, Visual, and Performing Arts.

**137:023 Intermediate Ballet** 1-2 s.h.
Low intermediate technique and performance training in ballet; flexibility, strength, body alignment, and coordination as foundation for more advanced dance artistry, including more difficult steps, musicality, mobility, balance; basic ballet terminology, including steps, head, body, arm positions; variations in timing, changes of facing. GE: Literary, Visual, and Performing Arts.
137:024 Intermediate Modern 1-2 s.h.
Low intermediate technique and performance training in modern dance; flexibility, strength, body alignment, and breath as foundation for more advanced dance artistry, including musicality, mobility, balance, improvisation; variations in timing, changes of facing. GE: Literary, Visual, and Performing Arts.

137:029 First-Year Seminar 1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.

137:030 Ballet Pointe I 1 s.h.
Basic techniques and training for ballet pointe; repetition and analysis of steps and combinations, assimilation of new material; barre and center exercises, pirouettes and turns commonly performed en pointe, learning and performing variations drawn from repertory. Requirements: previous ballet training and experience.

137:034 Beginning/Contact Improvisation 1-2 s.h.
Concepts of dance improvisation and contact improvisation; cultivation of creative freedom through the use and invention of movement; range of expression broadened through personal movement capacity, spontaneity and imagination, ability to make and commit to movement choices; new approaches to moving and movement elements such as time, space, motion, qualities, dynamics; shared weight, support, counter-balancing, elementary partnering; studio course.

137:040 Introduction to Dance Studies 1 s.h.
Introduction to dance studies in the liberal arts; breadth and diversity of contemporary scholarship on dance; dance history, criticism, ethnography, theory, conditioning and injury prevention, improvisation, choreography, technology.

137:047 Topics in Body Conditioning 2 s.h.
Somatic training techniques that address conditioning needs of dancers--yoga for dancers, pilates, release techniques; other somatic studies related to injury prevention, concentration, flexibility, efficient movement, strength training.

137:050 Dance Production 3 s.h.
Scenic design, costuming, lighting, audio/video, publicity; visits by professional guest lecturers, field trips to creative shops; projects.

137:051 Production Run Crew 1-2 s.h.
Hands-on experience in production work for live dance performance. Prerequisites: 137:050.

137:057 Brazilian Culture and Carnival 3 s.h.
Dance, music, historical, and social contents of Brazilian Carnival production, critical theories of performance, religious backgrounds, and theatre making in carnival parades. GE: Values, Society, and Diversity.

137:060 Music Essentials for Dance 2 s.h.
Evolution of music and dance from prehistoric times to the present; rhythmic analysis and fundamental music theory for dance students.

137:070 Choreography I 2 s.h.
Introduction to theories and practices of creating choreography; locating varied sources for movement; elementary considerations of choreographic form; development of ideas, impulses, and initial inspirations into short works; fundamentals of giving and receiving critical feedback; articulation of thoughts and experience as composers and watchers of choreography; exposure to choreographic concerns supported by video and reading.
137:071 Choreography II 2 s.h.
Continuation of 137:070; development of intermediate choreographic skills; emphasis on cultivation of individual choreographic voice through expansion of vocabulary, discovery of complex ways to form and arrange, and use of widening range of methods and types of resources.

137:080 Dance and Society: U.S. Forms in Transnational and Critical Contexts 3 s.h.
Dance and other physical endeavors as embodied forms of knowledge and culture; U.S. dance practices; European and African dance cultures; aesthetic and political issues raised by concert dance (i.e., performance, choreography, spectatorship, criticism); ethnographic methods to examine the function of dance in cultural formation (i.e., spiritual, celebratory, social, political contexts); lecture, discussion, viewing, movement workshops, formal and informal writing, field research, and BLOG construction. GE: Literary, Visual, and Performing Arts. Same as 188:080.

137:103 Major Ballet I 1-3 s.h.
Builds on 137:023; intermediate technical and performance training in ballet; flexibility, strength, body alignment, and coordination as foundation for introduction of more advanced aspects of dance artistry, including steps, musicality, mobility, balance; terminology related to barre and center vocabulary, including steps, head, body, and arm positions; practice of steps and combinations, variations in timing, changes of facing.

137:104 Major Modern Dance I 1-3 s.h.
Builds on 137:024; intermediate technical and performance training in modern dance; physical and mental skills for transition to more advanced dance--physical stamina, strength, flexibility, articulation, coordination, musicality, phrasing; basic physical concepts underlying clear and efficient movement; assimilation of new movement material; center of gravity and its role in body mobilization and control; personal movement choices, and expressive range.

137:106 Dance Performance 0-1 s.h.
Credit for rehearsal hours and performance of dance works in produced dance concerts. Requirements: audition and/or concert adjudication. GE: Literary, Visual, and Performing Arts.

137:107 Repertory Dance Company 0-4 s.h.
Advanced repertory studies; learning and performing multiple works by professional guest artists, faculty, and invited graduate students; collaborative creation and performing in community outreach lecture-demonstration throughout Iowa and the region. Requirements: audition.

137:113 Major Ballet II 1-3 s.h.
High intermediate training in ballet technique and performance; physical and mental skills necessary for more advanced work--physical stamina, strength, flexibility, articulation, coordination, musicality, phrasing, basic physical concepts underlying clear and efficient movement, capacity to assimilate new movement material, awareness of the center of gravity and its role in mobilization and control of the body.

137:114 Major Modern Dance II 1-3 s.h.
High intermediate technical and performance training in modern dance; physical and mental skills necessary for more advanced work--physical stamina, strength, flexibility, articulation, coordination, musicality, phrasing, basic physical concepts underlying clear and efficient movement, capacity to assimilate new movement material, awareness of the center of gravity and its role in mobilization and control of the body, consciousness of personal movement choices and expressive range.

137:120 Floor Barre 2 s.h.
Introduction to Beamish-based floor barre technique. Prerequisites: 137:023.
137:123 Major Ballet III 1-3 s.h.
Advanced training in ballet technique and performance; physical and mental skills necessary for professional work—physical stamina, strength, flexibility, articulation, coordination, musicality, phrasing, basic physical concepts underlying clear and efficient movement, capacity to assimilate new movement material, awareness of the center of gravity and its role in mobilization and control of the body.

137:124 Major Modern Dance III 1-3 s.h.
Advanced technical and performance training in modern dance; physical and mental skills necessary for professional work—physical stamina, strength, flexibility, articulation, coordination, musicality, phrasing, basic physical concepts underlying clear and efficient movement, capacity to assimilate new movement material, awareness of the center of gravity and its role in mobilization and control of the body, consciousness of personal movement choices and expressive range; may include partnering exercises for investigation of weight exchange, timing, expressivity.

137:130 Major Modern Dance IV 1-2 s.h.
Professional technique and performance training in modern dance.

137:133 Ballet Pointe II 1-2 s.h.
Intermediate/advanced techniques and training for ballet pointe work; repetition and analysis of steps and combinations, assimilation of new material; barre and center exercises, pirouettes and turns commonly performed en pointe, learning and performing variations drawn from repertory.

137:134 Improvisation I 2 s.h.
Introduction to movement as research; experimental process as vehicle for invention, creative freedom, aesthetic range; development of kinesthetic imagination, awareness, creative problem solving; introduction to issues of artistic originality and authenticity; practical integration of improvisation and composition through spontaneous manipulation of time, space, and energy; knowledge of creative process supported by reading and individual research.

137:135 Improvisation II 2 s.h.
Advanced concepts in compositional improvisation; in-depth individual exploration, spontaneous ensemble composition; increasing authenticity, depth, and range; integrity in relating to the whole ensemble; connecting creative process to other bodies of knowledge; making contact with emerging premise; reading and discussion as integration of conceptual and experiential; speaking and writing as improvisational process. Prerequisites: 137:134.

137:137 Partnering Class 1 s.h.
The art of partnering in dance, from salsa to Swan Lake; power sharing on the dance floor, including supported poses, balance, musical and physical timing, unity of movement, eloquence of gesture; for advanced dancers with strong coordination skills.

137:139 Acting for Dancers 3 s.h.
Beginning acting for dancers; spontaneity and expression, sources of action and reaction through theater games; emotional journey in effective drama and comedy; drama, comic structure, and tension through character and script analysis.

137:140 Honors Project in Dance arr.
Research, choreographic, reconstruction, or performance project under guidance of a faculty advisor. Requirements: senior standing.

137:141 B.F.A. Senior Project in Dance arr.
Senior year choreographic/performance capstone to complete B.F.A. in dance under supervision of faculty adviser; culminates in public showing or produced concert. Requirements: admitted to B.F.A. program in dance and senior standing.

137:143 Elementary Ballet Pedagogy 3 s.h.
Methods, materials, concepts for teaching ballet techniques.
137:144 Teaching of Modern Dance
3 s.h.
Practices of teaching modern dance; information and experience for developing an individualized approach to teaching; educational methodology for defining essential elements of a modern class, approaches for planning and structuring classes.

137:147 Dance Kinesiology
3 s.h.
Body science related to demands of dance; structural and muscular analysis for efficient, effective dance training and prevention of injuries; investigation of skeletal and ligamentous structure for working knowledge of how the body produces movement; joint actions and restrictions, common injuries to those sites; attachments of the voluntary muscles, pathways and potential actions; neuromuscular analysis of an action; functional skeletal alignment; how individual differences may affect movement performance. Prerequisites: 027:053. Same as 049:108.

137:149 Honors Studies in Dance
arr.
Choreography, performance, production, Labanotation, dance history, or pedagogy. Requirements: g.p.a. of 3.33 or higher.

137:160 Introduction to Laban Movement Studies
2-3 s.h.
Introduction to Bartenieff Fundamentals (BF) and Laban Movement Analysis (LMA) as methods of organizing and integrating movement to support artistic goals and expanding expressive range; BF teaches body awareness, breath support, developmental patterns, ergonomically-efficient alignment, balancing of muscular strength and stretch, and coordination; LMA teaches vocabulary of expressive movement and nonverbal communication, including effort (use of energy/dynamics for expression, stamina, stress relief) and shape (how posture and gesture communicate); quality of movement that supports individual goals in artistic expression, sound production, and wellness. Same as 025:167, 049:105, 188:167.

137:161 The Arts in Performance
3 s.h.

137:165 Acting for Singers and for Dancers
2 s.h.
Fundamentals of acting technique, with attention to demands on performers in opera, musical theater, and dance. Same as 025:175, 049:102.

137:170 Choreography III
2 s.h.
Continuation of 137:071; increased emphasis on invention, clarity, sophistication, and development of complete works; creation of sharply defined mature movement worlds; increasingly thorough consideration of sources and methods, responsibility for applying course work to self-defined artistic concerns and emerging individual aesthetic; advanced theories and methods through video, reading, choreographic research.

137:171 Choreography IV
2 s.h.
Continuation of 137:170; advanced theories and practices of choreography; complex concepts, methods, applications; analytical and creative connections with bodies of knowledge across the liberal arts and sciences; complete development of multiple works; advanced practice in critical feedback and articulation of ideas about process and product; development through reading, video, extensive creative research.

137:172 Independent Choreography
arr.
Credit for creation of independent choreographic project, developed under guidance of faculty advisor, that results in production of a dance work.

137:173 Introduction to the Alexander Technique
3 s.h.
The Alexander Technique and "self-use"--how our movement choices affect the results we achieve; improving physical skills and presence; principles from the Alexander Technique in support of performing arts (e.g., speaking, singing, playing an instrument, dancing, acting) and applied to skills in daily life, addressing the underpinnings of movement; physical participation, including laying, rolling, sitting, standing, and locomotion. Same as 025:176, 049:170, 188:168.
137:174 Introduction to Afro-Cuban Dance 1 s.h.
Introduction to the dance, drumming, and songs of the Afro-Cuban folkloric traditions; emphasis on dance. May participate in UI Afro-Cuban Drum and Dance ensemble. Same as 188:174.

137:175 Afro-Cuban Drum and Dance Performance 1 s.h.
Dance repertory for the UI Afro-Cuban Drum and Dance Ensemble. Performance pieces based on dance, drumming, songs of the Afro-Cuban folkloric traditions. May participate in UI Afro-Cuban Drum and Dance Ensemble. Same as 188:175.

137:181 Dance History 3 s.h.
Dance history in the 19th and 20th centuries; changes in dance training and technique, theory, composition, performance practices in context of broader social, political, and cultural trends; how dance and choreographic practices have changed over time, relationships between social ideas about embodiment and production of dance forms, precedents for contemporary dance practices in past forms.

137:182 The Contemporary Dance Scene 3 s.h.
Historical, theoretical, and practical elements of contemporary dance; the term "postmodern" and its associations with dance, performing arts, contemporary culture; relationships between process and product, identity and subjectivity, artistic intent and authorship, meaning and intertextuality; possibility of art as a form of dissent; theory and practice placed in a dialectic; analysis and synthesis of previous research. Same as 188:182.

137:190 Independent Study arr.
Credit for an individual student-designed project coordinated with a faculty advisor. Requirements: sophomore or higher standing.

Primarily for Graduate Students

137:200 Graduate Seminar in Dance 2 s.h.
Research, careers, administrative, educational, professional, artistic topics.

137:201 Graduate Production Practicum 1 s.h.
Scenery and costume design, lighting, audio/video, publicity.

137:202 Theories of Dance and the Body 3 s.h.
Theoretical trends in studies of dance and physical bodies; performative and choreographic aspects of being. Same as 188:202.

137:206 Graduate Dance Performance 0-1 s.h.
Credit for rehearsal hours and performance of dance works in produced dance concerts. Repeatable. Requirements: audition and/or concert adjudication.

137:213 Graduate Majors Ballet II 1-3 s.h.
High intermediate technique and performance training; physical and mental skills necessary for more advanced work--physical stamina, strength, flexibility, articulation, coordination, musicality, phrasing, basic physical concepts underlying clear and efficient movement, capacity to assimilate new movement material, awareness of the center of gravity and its role in mobilization and control of the body. Repeatable.

137:214 Graduate Majors Modern II 1-3 s.h.
High intermediate technical and performance training in modern dance; physical and mental skills necessary for more advanced work--physical stamina, strength, flexibility, articulation, coordination, musicality, phrasing, basic physical concepts underlying clear and efficient movement, capacity to assimilate new movement material, awareness of the center of gravity and its role in mobilization and control of the body, consciousness of personal movement choices and expressive range. Repeatable.
137:222 Graduate Ballet Technique Practicum
Advanced, in-depth understanding of teaching dance technique at the college level; emphasis on studio practice of technique through active participation in technique class; individualized research on technical and pedagogical approaches to dance; class taken with a faculty member during student’s teaching rotation to gain understanding of the teacher’s pedagogical approach across three levels of the majors-level technique curriculum. Requirements: completion of one semester of MFA program and good standing.

137:223 Graduate Majors Ballet III 1-3 s.h.
Advanced ballet technique and performance training for proficient dancers; physical and mental skills necessary for professional work--physical stamina, strength, flexibility, articulation, coordination, musicality, phrasing, understanding of basic physical concepts underlying clear and efficient movement, capacity to assimilate new movement material, awareness of the center of gravity and its role in mobilization and control of the body. Repeatable.

137:224 Graduate Majors Modern III 1-3 s.h.
Advanced technical and performance training in modern dance; physical and mental skills necessary for professional work--physical stamina, strength, flexibility, articulation, coordination, musicality, phrasing, understanding of basic physical concepts underlying clear and efficient movement, capacity to assimilate new movement material, awareness of the center of gravity and its role in mobilization and control of the body, consciousness of personal movement choices and expressive range. Repeatable.

137:230 Graduate Major Modern IV 1-2 s.h.
Professional technique and performance training in modern dance.

137:231 Graduate Modern Dance Technique Practicum
Advanced, in-depth understanding of teaching dance technique at the college level; emphasis on studio practice of technique through active participation in technique class; individualized research on technical and pedagogical approaches to dance; class taken with a faculty member during student’s teaching rotation to gain understanding of the teacher’s pedagogical approach across three levels of the majors-level technique curriculum. Requirements: completion of one semester of MFA program and good standing.

137:234 Graduate Improvisation I 1-2 s.h.
Dance improvisation.

137:235 Graduate Improvisation II 2 s.h.
Advanced improvisation.

137:269 Graduate Independent Performance Project
Credit for creative participation as a performer in a choreography project, developed under guidance of a faculty advisor, that results in the performance of a dance work.

137:272 Graduate Choreography III 2 s.h.
Continuation of 137:271; advanced choreographic concepts, methods, and applications with focus on the creative mind and choreographic process; concepts and experiences that support development of advanced choreographic skills and innovative dances.

137:273 Graduate Choreography IV 2 s.h.
Advanced choreography concepts, methods, applications.

137:274 Graduate Independent Choreography
Credit for creation of an independent choreographic project, developed under guidance of faculty advisor, that results in production of a dance work.
137:275 Collaborative Performance

Collaborative experience with advanced artists from varied disciplines that culminates in a final performance; emphasis on sharing and investigating ideas, artistic intent, personal vision, and creating collaborative projects. Same as 049:275, 188:275.

137:277 Thesis

arr.

137:290 Graduate Independent Study

arr.

Credit for individually designed project coordinated with a faculty advisor.
Disability Studies

Coordinators
Mary Adamek, William Therrien

Undergraduate nondegree program: Certificate in Disability Studies

Disability studies examines disability as a social, cultural, historical, and political phenomenon rather than focusing on its clinical, medical, or therapeutic aspects. It is an interdisciplinary and multidisciplinary field that draws on scholarship from diverse disciplines, including anthropology, architecture, the arts, communication and media studies, cultural studies, economics, gender studies, geography, global studies, history, law, literature, medicine, nursing, philosophy, policy studies, political science, religious studies, social work, and sociology.

Its multidisciplinary nature makes disability studies a good complement to a broad range of undergraduate majors.

The certificate program in disability studies is administered by the music therapy program in the School of Music (p. 582).

Undergraduate Program

• Certificate in Disability Studies

The certificate program helps students expand their knowledge and awareness of disability issues and prepare for careers in public life.

Certificate

The Certificate in Disability Studies requires a minimum of 19 s.h. of credit. Students earn 7-9 s.h. in core courses, at least 9 s.h. in focused electives, and 3 s.h. in the capstone seminar. They must maintain a g.p.a. of at least 2.00 in work for the certificate.

The certificate is open to current University of Iowa undergraduate students. It also is open to individuals who hold a bachelor’s degree from the University and are not enrolled in a graduate or professional program. Completion of the certificate is noted on the student’s transcript.

Students who complete the certificate develop:

• a personal philosophy of treating people fairly, equitably, and thoughtfully; and
• greater understanding of and concern with public policy issues and active citizenship.

The Certificate in Disability Studies requires the following course work.

Core Courses

Students earn 7-9 s.h. in the following core courses.

16A:106 Disability in American History 3 s.h.
07U:140 Characteristics of Disabilities 3 s.h.
07E:193 Independent Study (when taken for participation in REACH; experiential learning opportunity; requires senior standing) 1-3 s.h.

Focused Electives

Students earn a minimum of 9 s.h. in focused electives, which they select from courses in at least two of the following lists (maximum of 6 s.h. from any one list). They may count a maximum of 3 s.h. earned in courses numbered below 100 toward this requirement.

Aging Studies

153:135 Global Aging 3 s.h.
153:150 Psychology of Aging 3 s.h.
153:165 Communication Disorders and Aging 2 s.h.

American Sign Language

158:100 History of the American Deaf Community 3-4 s.h.
158:101 Topics in Deaf Studies 3 s.h.
158:103 American Sign Language Literature 3 s.h.
158:104 Issues in ASL and Deaf Studies 3 s.h.
158:110 Teaching Deaf and Hard of Hearing Students 3-4 s.h.

American Studies

045:025 Diversity and American Identities 3 s.h.

Anthropology

113:051 Diversity in Action in American Society 1-3 s.h.
113:101 Disability and the Ethics of Care 3 s.h.
113:122 Bad Language 3 s.h.
113:185 Medical Anthropology 3 s.h.

Division of Performing Arts

**Director**
Alan MacVey

**Undergraduate nondegree program:**
Certificate in Performing Arts Entrepreneurship
Web site: [http://performingarts.uiowa.edu](http://performingarts.uiowa.edu)

The Division of Performing Arts includes the Department of Dance (p. 273), the School of Music (p. 582), and the Department of Theatre Arts (p. 758). The division fosters interdisciplinary collaboration among these units, coordinates artistic and academic activities, and sponsors a full array of performances and symposia. Performances are supported by professional staff in the division’s Performing Arts Production Unit.

Each of the division’s individual academic units offers undergraduate and graduate courses and degree programs in creative, performance, scholarly, and theoretical areas. Together they present an extensive schedule of dance productions, faculty and student recitals, ensemble concerts, and mainstage and gallery theater productions.

The division offers the undergraduate Certificate in Performing Arts Entrepreneurship in partnership with the Tippie College of Business’s John Pappajohn Entrepreneurial Center. The certificate program combines courses in accounting, marketing, and financial management with those focused on arts management and leadership practices in commercial as well as nonprofit arts organizations. See Performing Arts Entrepreneurship (p. 613) in the Catalog.

The division also is home to an arts outreach program, Arts Share.

For information about the division and its programs and events, visit the Division of Performing Arts web site.
Division of World Languages, Literatures, and Cultures

Director
Russell Ganim

Web site: http://clas.uiowa.edu/dwllc

The Division of World Languages, Literatures, and Cultures includes several academic units: the American Sign Language Program and the Departments of Asian and Slavic Languages and Literatures, French and Italian, German, and Spanish and Portuguese. In addition to providing administrative leadership for all of its units, the division fosters interdisciplinary scholarship in languages, literatures, and cultures. It encourages synergy and collaboration among its faculty members and enhances opportunities for cross-cultural course development and research.

Undergraduate and graduate programs in the division speak to students with varied interests and career aspirations, educating them to become global citizens who understand and are understood by diverse populations. Students are trained to be critical thinkers and problem solvers, capable scholars, lucid writers, and proficient speakers.

The division's units offer instruction in a wide array of languages and in the cultures associated with them.

American Sign Language (p. 46) Program:
American Sign Language and deaf studies

Department of Asian and Slavic Languages and Literatures (p. 122) : Chinese, Croatian, Czech, Hindi, Japanese, Korean, Russian, Sanskrit

Department of French and Italian (p. 354) : Arabic, French, Italian, Swahili

Department of German (p. 423) : German

Department of Spanish and Portuguese (p. 722) : Portuguese, Spanish

In addition to providing language instruction, the division focuses on theoretical and applied linguistics; non-Anglophone literatures and cultures, including those of bilingual, deaf, postcolonial, and heritage communities; and aesthetics, cultural theory, and creative writing in languages other than English.

The division also administers the Language Media Center, which provides facilities for traditional language laboratory work as well as for language video and computer-based activities. The center sponsors a multimedia development studio, where faculty members and graduate students produce and test media-based materials for language instruction.

Courses

218:160 Topics in Global Cinema 3 s.h.
Identification of new models and methods to investigate cinema's relationship to current global issues beyond traditional scholarly focus in Western Europe and the United States; exploration of an emerging field, moving away from the paradigm of national cinema and bringing together shared theoretical frameworks while acknowledging different historical and cultural contexts. Same as 039:164, 048:182, 39J:162.
Economics

Chair
John L. Solow

Professors
Gary C. Fethke (Leonard A. Hadley Professor of Leadership), John W. Fuller, Marlynne Beth Ingram (Henry B. Tippie Professor of Economics), Daniel J. Kovenock (J. Edward Lundy Professor), Forrest D. Nelson (Henry B. Tippie Research Fellow), George R. Neumann (George Daly Professor of Economics), Raymond G. Riezman (C. Woody Thompson Professor), Charles H. Whiteman (Leonard A. Hadley Chair in Leadership), Nicholas Vannellis (Henry B. Tippie Research Fellow)

Professors emeriti

Associate professors
Martin Gervais (Leonard A. Hadley Fellow), John L. Solow (Michael Sandler Research Fellow)

Assistant professors
Antonio Galvao Jr., Ayca Kaya, Kyungmin (Teddy) Kim, Elena Pastorino

Lecturers
Stacey L. Brook, Jennifer L. Fuhrman, Blake Whitten

Undergraduate degrees: B.A., B.S., B.B.A. in Economics
Undergraduate nondegree program: Minor in Economics
Graduate degrees: M.A., Ph.D. in Economics
Web site: http://www.tippie.uiowa.edu/economics

Economics is the study of how societies allocate limited resources to achieve competing ends. Using both empirical and deductive methods, economics analyzes incentives, constraints, organizational forms, and market forces to understand patterns of production, exchange, and consumption of goods and services. It treats diverse issues such as wealth and poverty, government expenditures and taxation, prosperity and depression, inflation and unemployment, relations between management and labor, economic growth, environmental protection, health care delivery, the war on drug abuse, free trade versus protectionism, U.S. competitiveness in international markets, and the quality of American education.

The Department of Economics offers degree programs for undergraduates and graduate students. It also partners with the Departments of Philosophy and Sociology to offer the undergraduate major in ethics and public policy, an interdisciplinary program administered by the Department of Philosophy (College of Liberal Arts and Sciences); see Ethics and Public Policy (p. 351) in the Catalog.

Undergraduate Programs

- Major in economics (Bachelor of Arts, Bachelor of Science, Bachelor of Business Administration)
- Minor in economics

The Tippie College of Business and the College of Liberal Arts and Sciences offer the major in economics. Students may complete the major with their choice of three degrees. The Bachelor of Arts and Bachelor of Science are awarded by the College of Liberal Arts and Sciences; the Bachelor of Business Administration is awarded by the Tippie College of Business.

The B.A. in economics is designed to achieve a balance of economic theory, mathematical tools, and field applications. The B.S. maintains a similar balance but emphasizes development of analytical tools; it prepares students for graduate work in economics or related business and technical fields. The B.B.A. emphasizes economic foundations of business fields: accounting, finance, marketing, business law, and management.

Each program provides an excellent educational background for a variety of positions in business and government. Graduates find employment in banking, financial institutions, industrial firms, and trade organizations and in federal, state, and local government agencies dealing with economic policy, regulation, and analysis. Economics also provides excellent preparation for the study of law and for graduate study in fields such as business management, public administration, hospital and health administration, urban and regional planning, transportation, journalism, political science, and statistics.

All students majoring in economics choose one of three tracks: business economics, policy economics, or analytical economics. The business economics track is designed for students who intend to work in the private sector. The policy economics track is for students interested in earning a degree in law or a graduate degree in a discipline that is not highly quantitative, or in seeking a decision-making position in the public or private sector. The analytical economics track is for students planning to earn a graduate degree in a discipline that is highly quantitative or who plan to pursue technical and/or analytical work in the public or private sector.
The major for each degree (B.A., B.S., and B.B.A.) has three sets of requirements: mathematics and statistics courses that provide the skills needed for understanding economic theory and data; economic theory courses that provide the tools needed for analyzing economic issues; and field courses that apply economic tools to business, social, or specialized analytical issues. The applied field course requirement varies, depending on the student's choice of track.

**Bachelor of Arts**

The Bachelor of Arts with a major in economics requires a minimum of 120 s.h., including 32 s.h. of work for the major. The program provides a balance of economic theory, mathematical tools, and field applications. It offers good educational background for a variety of positions in business and government as well as for the study of law and for graduate study.

The major requires a set of courses in mathematics and statistics (11 s.h.), a set in economic theory (6 s.h.), and a set of applied field courses (15 s.h.). Students must choose one of three tracks: business economics, policy economics, or analytical economics. The applied field courses vary depending on the student’s choice of track.

The business economics track is designed for students who intend to work in the private sector. The policy economics track is for students interested in earning a degree in law or a graduate degree in a discipline that is not highly quantitative, or in seeking a decision-making position in the public or private sector. The analytical economics track is for students planning to earn a graduate degree in a discipline that is highly quantitative or who plan to pursue technical and/or analytical work in the public or private sector.

All B.A. students majoring in economics must complete the College of Liberal Arts and Sciences General Education Program (p. 381).

The economic theory courses (06E:104 Microeconomic Theory or 06E:106 Advanced Microeconomics, and 06E:105 Macroeconomics) and three of the five applied field courses in each track must be taken at The University of Iowa.

Students should pay close attention to the order in which they take courses, since some courses are prerequisites for others; see “Prerequisites” below. For help in developing a study plan, visit the Department of Economics web site.

The economics major for the Bachelor of Arts requires the following course work.

### MATHEMATICS AND STATISTICS COURSES

- 06E:071 Statistics for Strategy Problems 3 s.h.
- 22M:017 Calculus and Matrix Algebra for Business 4 s.h.
- 22S:008 Statistics for Business 4 s.h.

### ECONOMIC THEORY COURSES

- 06E:104 Microeconomic Theory 3 s.h.
  or
- 06E:106 Advanced Microeconomics 3 s.h.
- 06E:105 Macroeconomics 3 s.h.

### APPLIED FIELD COURSES

Five courses are required; course selection is determined by the student’s choice of track.

#### Business Economics Track

Five of these:

- 06A:002 Managerial Accounting 3 s.h.
- 06E:111 Personnel Economics 3 s.h.
- 06E:117 Money, Banking, and Financial Markets 3 s.h.
- 06E:125 Global Economics and Business 3 s.h.
- 06E:141 Industry Analysis 3 s.h.
- 06E:160 Household Finance 3 s.h.
- 06J:048 Introduction to Management 3 s.h.

#### Policy Economics Track

Four of these:

- 06E:113 Health Economics 3 s.h.
- 06E:119 Policy Analysis 3 s.h.
- 06E:125 Global Economics and Business 3 s.h.
- 06E:129 Economic Growth and Development 3 s.h.
- 06E:133 Environmental and Natural Resource Economics 3 s.h.
- 06E:135 Regional and Urban Economics 3 s.h.
- 06E:145 Transportation Economics 3 s.h.
- 06E:165 Sports Economics 3 s.h.
- 06E:169 Topics in Policy Economics arr.
- 06E:171 Antitrust Economics 3 s.h.
- 06E:172 Law and Economics 3 s.h.

One additional economics course numbered 06E:111 - 06E:189
Analytical Economics Track
Four of these:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>06E:173</td>
<td>International Economics</td>

</tbody>
</table>

One additional economics course numbered 06E:111 - 06E:189

Prerequisites
Prerequisites for most 100-level courses in economics: 06E:001 Principles of Microeconomics and 06E:002 Principles of Macroeconomics

Prerequisites for 06E:104 Microeconomic Theory: 06E:001 Principles of Microeconomics and 22M:017 Calculus and Matrix Algebra for Business

Prerequisites for 06E:105 Macroeconomics: 06E:002 Principles of Macroeconomics and 22M:017 Calculus and Matrix Algebra for Business

Prerequisite for 06E:071 Statistics for Strategy Problems: 22S:008 Statistics for Business

Prerequisites for courses numbered 06E:171 and above: 06E:104 Microeconomic Theory or 06E:105 Macroeconomics, or both, depending on the course

Bachelor of Science
The Bachelor of Science with a major in economics requires a minimum of 120 s.h., including 33-35 s.h. of work for the major. The program addresses economic theory, mathematical tools, and field applications, with an emphasis on developing skill using analytic tools. It offers good educational background for a variety of positions in business and government as well as for the study of law and for graduate study.

The major requires a set of courses in mathematics and statistics (15-17 s.h.), a set in economic theory (6 s.h.), and a set of applied field courses (12 s.h.). Students must choose one of three tracks: business economics, policy economics, or analytical economics. The applied field courses vary depending on the student’s choice of track.

The business economics track is designed for students who intend to work in the private sector. The policy economics track is for students interested in earning a degree in law or a graduate degree in a discipline that is not highly quantitative, or in seeking a decision-making position in the public or private sector. The analytical economics track is for students planning to earn a graduate degree in a discipline that is highly quantitative or who plan to pursue technical and/or analytical work in the public or private sector.

All B.S. students majoring in economics must complete the College of Liberal Arts and Sciences General Education Program (p. 381).

The economic theory courses (06E:104 Microeconomic Theory or 06E:106 Advanced Microeconomics, and 06E:105 Macroeconomics) and three of the four applied field courses in each track must be taken at The University of Iowa.

Students should pay close attention to the order in which they take courses, since some courses are prerequisites for others; see "Prerequisites" below. For help in developing a study plan, visit the Department of Economics web site.

The economics major for the Bachelor of Science requires the following course work.

MATHEMATICS AND STATISTICS COURSES

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>06E:184</td>
<td>Introduction to Econometrics</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>22M:025</td>
<td>Calculus I</td>
<td>4 s.h.</td>
</tr>
<tr>
<td>22M:026</td>
<td>Calculus II</td>
<td>4 s.h.</td>
</tr>
<tr>
<td>22S:120</td>
<td>Probability and Statistics</td>

<td>arr.</td>
</tr>
</tbody>
</table>

One additional economics course numbered
06E:111 - 06E:189

**Prerequisites**

Prerequisites for most 100-level courses in economics: 06E:001 Principles of Microeconomics and 06E:002 Principles of Macroeconomics

Prerequisites for 06E:104 Microeconomic Theory: 06E:001 Principles of Microeconomics and 22M:017 Calculus and Matrix Algebra for Business

Prerequisites for 06E:105 Macroeconomics: 06E:002 Principles of Macroeconomics and 22M:017 Calculus and Matrix Algebra for Business

Prerequisites for courses numbered 06E:171 and above: 06E:104 Microeconomic Theory or 06E:105 Macroeconomics, or both, depending on the course

Prerequisite for 06E:184 Introduction to Econometrics: 22S:120 Probability and Statistics or 22S:131 Introduction to Mathematical Statistics II

**Bachelor of Business Administration**

The Bachelor of Business Administration with a major in economics requires a minimum of 120 s.h., including 18 s.h. of work for the major. The program emphasizes economic foundations of business fields: accounting, finance, marketing, business law, and management. It provides good educational background for a variety of positions in business and government as well as for the study of law and for graduate study.

All students must complete the B.B.A. common requirements: the General Education courses, the prerequisites to the business core, and the business core; see "Common Requirements" in the Bachelor of Business Administration (p. 790) section of the Catalog.

The major requires a set of courses in mathematics and statistics, which students take as part of the B.B.A. common requirements; a set in economic theory (6 s.h.); and a set of applied field courses (12 s.h.). Students majoring in economics choose one of three tracks: business economics, policy economics, or analytical economics. The applied field courses vary depending on the student’s choice of track.

The business economics track is designed for students who intend to work in the private
sector. The policy economics track is for students interested in earning a degree in law or a graduate degree in a discipline that is not highly quantitative, or in seeking a decision-making position in the public or private sector. The analytical economics track is for students planning to earn a graduate degree in a discipline that is highly quantitative or who plan to pursue technical and/or analytical work in the public or private sector.

Students may request permission to apply a limited amount of transfer credit or correspondence credit toward requirements for the major, but they should take the economic theory courses (06E:104 Microeconomic Theory or 06E:106 Advanced Microeconomics, and 06E:105 Macroeconomics) at The University of Iowa.

Students should pay close attention to the order in which they take courses, since some courses are prerequisites for others; see "Prerequisites" below. For help in developing a study plan, visit the Department of Economics web site.

The economics major for the Bachelor of Business Administration requires the following course work.

**MATHEMATICS AND STATISTICS COURSES**

Students take these courses as part of the B.B.A. common requirements.

One additional economics course numbered 06E:111 - 06E:189

**Prerequisites**

Prerequisites for most 100-level courses in economics: 06E:001 Principles of Microeconomics and 06E:002 Principles of Macroeconomics

Prerequisites for 06E:104 Microeconomic Theory: 06E:001 Principles of Microeconomics and 22M:017 Calculus and Matrix Algebra for Business
Prerequisites for 06E:105 Macroeconomics:
06E:002 Principles of Macroeconomics and
22M:017 Calculus and Matrix Algebra for Business
Prerequisite for 06E:071 Statistics for Strategy Problems: 22S:008 Statistics for Business
Prerequisites for courses numbered 06E:171 and above: 06E:104 Microeconomic Theory or
06E:105 Macroeconomics, or both, depending on the course

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

Bachelor of Arts, Bachelor of Science

Before the third semester begins: at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: at least one-half of the semester hours required for graduation, 06E:001 Principles of Microeconomics and 06E:002 Principles of Macroeconomics, and the math component of quantitative courses required for major

Before the seventh semester begins: three-quarters of the semester hours required for graduation, 06E:104 Microeconomic Theory and 06E:105 Macroeconomics, and one 100-level economics course

Before the eighth semester begins: three 100-level economics courses and the statistics component of the quantitative course requirement

During the eighth semester: enrollment in all remaining course work in the major, and a sufficient number of semester hours to graduate

Bachelor of Business Administration

The following checkpoints are designed for students who enter the University as first-year pre-business students. In order to stay on the plan, students must maintain the grade-point average required for guaranteed admission to the Tippie College of Business and must apply for admission to the college by the established deadline.

Students must take 06B:100 Business Communication and Protocol during their first year after admission to the Tippie College of Business.

Before the third semester begins: 06E:001 Principles of Microeconomics or 06E:002 Principles of Macroeconomics, 22M:017 Calculus and Matrix Algebra for Business, and 22S:008 Statistics for Business, or equivalents; and at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: 06A:001 Introduction to Financial Accounting, 06A:002 Managerial Accounting, and 06E:001 Principles of Microeconomics or 06E:002 Principles of Macroeconomics (whichever has not already been taken), or equivalents; all General Education requirements; and at least half of the semester hours required for graduation

Before the seventh semester begins: business core requirements, approximately half of the course work in the major (varies by major), and three-quarters of the semester hours required for graduation

Before the eighth semester begins: approximately three-quarters of course work in the major

During the eighth semester: all remaining course work in the major, and a sufficient number of semester hours to graduate

Honors

Bachelor of Arts, Bachelor of Science

College of Liberal Arts and Sciences students majoring in economics are encouraged to take part in the economics honors program, which provides opportunities for high-achieving students to pursue special research interests. To enter the economics honors program, students must be members of the University of Iowa Honors Program, which requires students to maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University of Iowa Honors Program for more information). They also must complete 06E:104 Microeconomic Theory and 06E:105 Macroeconomics before the senior year. Interested students should consult the department’s honors advisor by the second semester of their junior year.

Honors students typically register for 06E:194 Honors Seminar in the fall of the senior year. To graduate with honors in the major, they define and complete a research project under the guidance of a supervising faculty member, earning up to 6 s.h. in 06E:195 Honors Thesis in Economics. They present the thesis orally to a committee of three faculty members, typically the undergraduate honors advisor, the student’s research supervisor, and a third faculty member agreed upon by the student and the honors advisor.
Bachelor of Business Administration

The Tippie College of Business offers qualified B.B.A. students the opportunity to pursue honors study. For more information, contact the Undergraduate Program Office or see “B.B.A. with Honors” in the Bachelor of Business Administration (p. 790) section of the Catalog.

Minor

The minor in economics requires a minimum of 15 s.h. in economics courses, including 12 s.h. taken at The University of Iowa in courses numbered above 06E:100. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass.

Courses for Nonmajors

Students in the College of Liberal Arts and Sciences may wish to use economics courses as part of other majors or the General Education Program (p. 381). The introductory courses 06E:001 Principles of Microeconomics and 06E:002 Principles of Macroeconomics are approved for the Social Sciences area of General Education; they introduce the field of economics and the specialized topics of upper-division courses. The intermediate theory courses 06E:104 Microeconomic Theory and 06E:105 Macroeconomics provide a deeper foundation in the core theories and methods of the discipline. They serve as preparation for upper-division field courses or as terminal courses in an economics study plan.

Course work in economics can be related to majors in many other fields. For example, political science majors could elect 06E:119 Policy Analysis and 06E:125 Global Economics and Business; global studies majors, 06E:133 Environmental and Natural Resource Economics; pre-law students, 06E:171 Antitrust Economics and 06E:172 Law and Economics; mathematics and engineering majors, 06E:104 Microeconomic Theory and 06E:187 Mathematical Economics; and statistics majors, 06E:184 Introduction to Econometrics.

Undergraduate Economics Forum

Students are invited to join the undergraduate Economics Forum. The group sponsors programs to help students plan for careers or graduate study and holds social events, special lectures, and round-table discussions. It provides opportunities for students to meet other economics majors and department faculty members.

Graduate Programs

- Master of Arts in economics
- Doctor of Philosophy in economics

The department partners with the College of Law to offer a joint degree program; see “Joint Ph.D./J.D.” later in this section. It also participates in the M.B.A. program, which is offered by the Tippie School of Management; see Master of Business Administration Program (p. 852) in the Catalog.

Master of Arts

The Master of Arts is offered only to students working toward a Ph.D. in economics.

Doctor of Philosophy

The Doctor of Philosophy program in economics requires a minimum of 72 s.h. of graduate credit. The program provides rigorous training in economic theory, econometrics, and applied economics. It has six components: a coordinated sequence of core courses, a qualifying examination, a research paper, a set of major field courses, a dissertation proposal and comprehensive examination, and a dissertation. Requirements are as follows.

**CORE SEQUENCE**

**First semester:**

<table>
<thead>
<tr>
<th>Course Code</th>

**QUALIFYING EXAMINATION**

The qualifying examination is normally taken the summer after the first year.
RESEARCH PAPER
The research paper is normally completed the summer after the second year.

MAJOR FIELD COURSES
Each student chooses a major study area in addition to the core courses. The requirement for the major area is a minimum of 24 s.h. of intensive study in a field and in courses that enable students to understand the relationship between their specialty and related fields.

DISSERTATION PROPOSAL AND COMPREHENSIVE EXAMINATION
Students must defend a dissertation proposal in a comprehensive examination within one year of completing the research paper requirement.

DISSERTATION
Submission of the completed dissertation and an oral defense of the dissertation research completes the Ph.D. program.

Admission
Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate (p. 1117) College section of the Catalog. Application deadline for admission and financial support is January 15 for fall semester entry.

Applicants must take the Graduate Record Examination (GRE) General Test and have their scores sent to the University. Those whose first language is not English and who do not hold a baccalaureate or advanced degree from an accredited college or university in the United States must take the Test of English as a Foreign Language (TOEFL) and have their scores sent to the University.

Applicants must submit a completed Application for Graduate Admission, official transcripts from all institutions they have attended, and all official test scores to the University of Iowa Office of Admissions. They may upload unofficial transcripts, statements of purpose, résumés, and reference information to the Tippie College of Business Ph.D. applicant portal.

Joint Ph.D./J.D.
The Department of Economics and the College of Law offer a joint Doctor of Philosophy/Juris Doctor program; for information about the J.D. degree, see “Juris Doctor” in the College of Law (p. 1215) section of the Catalog. Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the joint degree program.

Special Seminar
Each year the department offers a seminar program that brings eminent economists from other universities and from government agencies to The University of Iowa campus. Presentations by Department of Economics faculty members and students also are featured.

Courses

Primarily for Undergraduates
Students may take 06E:001 Principles of Microeconomics and 06E:002 Principles of Macroeconomics in either order or simultaneously. They are approved for the Social Sciences area of the College of Liberal Arts and Sciences General Education Program.

06E:001 Principles of Microeconomics 4 s.h.
Organization, workings of modern economic systems; role of markets, prices, competition in efficient allocation of resources and promotion of economic welfare; alternative systems; international trade. Requirements: B.B.A. students cannot use this course for General Education social sciences. GE: Social Sciences.

06E:002 Principles of Macroeconomics 4 s.h.
National income and output, employment and inflation; money, credit; government finance; monetary, fiscal policy; economic growth, development; international finance. Requirements: B.B.A. students cannot use this course for General Education social sciences. GE: Social Sciences.

06E:029 First-Year Seminar 1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities).
06E:071 Statistics for Strategy
Problems
Continuation of 22S:008; working knowledge of statistical techniques, scientific data-based approach to problem formulation and solution, statistical techniques in the context of real data analysis, assessment of defects in statistical analyses, using data for making business decisions, choosing appropriate statistical procedures, developing skill in communicating statistical results to audiences without knowledge of statistics. Prerequisites: 22M:017 and 22S:008.

06E:104 Microeconomic Theory
3 s.h.
Economic theory of the behavior of consumers, producers, and other economic agents; role of markets in coordinating economic activity, conditions that markets require for efficient allocation of resources; market imperfections; strategic behavior of economic actors. Prerequisites: 06E:001 and 22M:017.

06E:105 Macroeconomics
3 s.h.
Measurement of macroeconomic indicators; economic growth and business cycles; use of macroeconomic models to study the role of government fiscal and monetary policies. Prerequisites: 06E:002 and 22M:017.

06E:106 Advanced Microeconomics
3 s.h.
Mathematical treatment of the economic theory of the behavior of consumers, producers, and other economic agents; the role of markets in coordinating economic activity and the conditions required by those markets for an efficient allocation of resources; market imperfections; and the strategic behavior of economic actors. Prerequisites: 06E:001, and 22M:017 or 22M:025. Recommendations: 22M:025.

06E:111 Personnel Economics
3 s.h.
Microeconomic analysis of labor markets, related institutions; labor supply decisions made by workers, labor demand decisions made by firms, market equilibrium; economic analysis of unions; returns to education; family decisions. Prerequisites: 06E:001 and 06E:002.

06E:113 Health Economics
3 s.h.
Structure of America’s health care industry, economic analysis applied to its problems of production, pricing, distribution; cost-effectiveness, financing of medical costs, role of government. Prerequisites: 06E:001 and 06E:002.

06E:117 Money, Banking, and Financial Markets
3 s.h.
Role of money, institutions in determination of income, employment, prices in domestic and world economy. Prerequisites: 06E:001 and 06E:002.

06E:119 Policy Analysis
3 s.h.
Economic functions of government in modern economies; economic decision making; budgetary processes; effects of government expenditures, taxation on allocation of resources, distribution of income, economic growth, stability. Prerequisites: 06E:001 and 06E:002.

06E:125 Global Economics and Business
3 s.h.
Modern theories of international trade and investment; role of tariffs and other restrictions of international trade; foreign exchange markets, international monetary arrangements, international economic policy. Prerequisites: 06E:001 and 06E:002.

06E:129 Economic Growth and Development
3 s.h.
Determinants of rising living standards; accumulation of physical and human capital; predictions of economic growth models compared to observed changes in living standards. Prerequisites: 06E:001 and 06E:002.

06E:133 Environmental and Natural Resource Economics
3 s.h.
Environmental and resource use problems; efficient mechanisms and other policies for environmental protection, management of common property resources. Prerequisites: 06E:001 and 06E:002. Same as 102:135.
06E:135 Regional and Urban Economics
3 s.h.
Theory of location and regional development; central place theory; why cities exist and trade with one another; models of land use patterns, rents; empirical tests of models; policy applications. Prerequisites: 06E:001 and 06E:002. Same as 102:134.

06E:141 Industry Analysis
3 s.h.
Structural evolution; imperfect competition, resource allocation; development of public policy on monopoly; selected industries. Prerequisites: 06E:001 and 06E:002.

06E:145 Transportation Economics
3 s.h.
Overview of transportation markets--intercity, rural, urban; transportation modes--rail, highway, air, water, pipeline, transit; issues in finance, policy, planning, management, physical distribution, and environmental, economic, and safety regulation. Prerequisites: 06E:001 and 06E:002. Same as 044:133, 102:133.

06E:158 American Economic History
3 s.h.
Emphasis on role of population and technology. Requirements: 06E:001 and 06E:002 for economics majors; 06E:001 and 16A:061 for non-economics majors. Same as 16A:144.

06E:160 Household Finance
3 s.h.
Micro- and macroeconomic theory applied to economic decisions of families, households; practical and theoretical issues in income generation, spending and saving decisions, risk management and asset allocation, investments, and intergenerational wealth transfers. Prerequisites: 06E:001 and 06E:002.

06E:165 Sports Economics
3 s.h.
Theory and literature of economic issues in professional sports; issues such as relative advantages of large-and small-market teams, city subsidies for baseball and football stadiums, star players' true value to their teams; ideas from introductory economics (such as demand and cost curves) combined with additional economic theory, statistical evidence, and information about particular sports. Prerequisites: 06E:001 and 06E:002.

06E:169 Topics in Policy Economics
arr.
Topics vary. Prerequisites: 06E:001 and 06E:002.

06E:171 Antitrust Economics
3 s.h.
Topics in federal antitrust policy; merger policy, monopolization, predatory pricing, collusion, vertical restrictions, resale price maintenance, enforcement; case law, economics literature. Prerequisites: 06E:104 or 091:208.

06E:172 Law and Economics
3 s.h.
Law examined through analytic tools of microeconomics; impact of legal rules on resource allocation, risk bearing, distribution of economic well-being. Prerequisites: 06E:001.

06E:173 International Economics
3 s.h.
Neoclassical model of international trade, imperfect competition and international trade and investment, role of trade barriers; regional trade agreements and the World Trade Organization. Requirements: 06E:104 and 06E:105, or graduate standing.

06E:174 Monetary Economics
3 s.h.
Demand for and supply of money; money's role in economy; empirical studies of money’s impact; problems with monetary control. Prerequisites: 06E:104 and 06E:105.

06E:175 Labor Economics
3 s.h.
Labor supply and demand; investments in human capital, compensating wage differentials, discrimination, long-term contracts, occupational choice, family decisions, unions, immigration. Prerequisites: 06E:104.

06E:176 Public Sector Economics
3 s.h.
Economic functions of government; budgetary processes; effects of government expenditures, taxation on resource allocation, income distribution, economic growth and stability. Prerequisites: 06E:104 and 06E:105.
06E:177 Industrial Organization 3 s.h.
Market structure; effects of business practices, informational problems on market structure; appraisal of antitrust policies, government regulation of business. Prerequisites: 06E:104.

06E:179 History of Economic Thought 3 s.h.
Evolution of economics as a social science; ideas of Smith, Ricardo, Malthus, Marx, Marshall, Keynes, and their major critics. Prerequisites: 06E:104 and 06E:105.

06E:183 Natural Resource Economics 3 s.h.
Economics of natural resources; interaction between economic theory, empirical evidence, and public policy; land, water, fish, trees, minerals; externalities. Prerequisites: 06E:104.

06E:184 Introduction to Econometrics 3 s.h.
Single equation linear statistical models, estimation and hypothesis testing; serial correlation, heteroscedasticity, generalized least squares estimation; specification analysis; errors in variables; emphasis on interpretation, application of econometric models, methods, use of computers. Prerequisites: 22S:120.

06E:187 Mathematical Economics 3 s.h.
Mathematical structure of economic principles, problems, systems; may include constrained optimization, choice under uncertainty, general equilibrium and welfare economics, dynamical systems and control theory, game theory. Prerequisites: 06E:104 and 06E:105.

06E:189 Topics in Analytical Economics arr.
Topics vary. Prerequisites: 06E:104 and 06E:105.

06E:190 Federal Reserve Challenge 3 s.h.
Experience doing what Federal Reserve economists do every day: study the real U.S. economy, make forecasts and policy recommendations, defend their views to academic and professional economists; development of analytical skills, teamwork, how to build presentations. Prerequisites: 06E:104 and 06E:105.

For Advanced Undergraduates

06E:194 Honors Seminar 1-3 s.h.
Research topics and methods in business. Requirements: honors standing. Same as 06B:194.

06E:195 Honors Thesis in Economics 3 s.h.
Independent student project directed by faculty or staff advisor; culminates in thesis that conforms to University Honors Program guidelines; may include empirical research, library research, applied projects. Prerequisites: 06B:194 or 06E:194, and admission to the Tippie College of Business honors program.

06E:196 Readings and Independent Study in Economics arr.

06E:199 Academic Internship arr.
Participation in approved internship program (e.g., Washington Center Internships).

Primarily for Graduate Students

06E:200 Economic Analysis I 3 s.h.
Basic metric topology, convex analysis, function spaces, measure theory and integration.

06E:201 Economic Analysis II 3 s.h.
Behavior under uncertainty, macroeconomic models; dynamic programming, asset pricing, saving, consumption.
06E:203 Microeconomics I 3 s.h.
Consumer choice theory, producer theory, choice under uncertainty, basic game theory. Offered fall semesters.

06E:204 Macroeconomics I 3 s.h.
Economic growth, business cycles, money and inflation. Offered fall semesters. Prerequisites: 06E:201.

06E:205 Microeconomics II 3 s.h.
General equilibrium and welfare analysis, adverse selection, the principal-agent problem, social choice, mechanism design. Offered spring semesters. Prerequisites: 06E:203.

06E:206 Macroeconomics II 3 s.h.
Dynamic macroeconomic models; stochastic macroeconomics; time consistency equilibrium business cycle theory. Offered spring semesters. Prerequisites: 06E:204.

06E:211 Mathematical Economics I 3 s.h.
Convex analysis in economic theory; ordinal and cardinal preference relations; quasiconcave, concave numerical representations; separation principle for convex sets–linear programming, concave programming; Brouwer fixed point theorem; existence of competitive equilibrium. Prerequisites: 06E:205.

06E:221 Econometrics 3 s.h.
Statistical inference in single and multiple equation stochastic models, models with nonindependent or nonidentically distributed error structure, dynamic models; OLS, GLS, IV, ML estimation; asymptotic distribution theory; exact, asymptotic hypothesis tests. Prerequisites: 22S:154.

06E:222 Applied Econometrics 3 s.h.
Empirical problems; multiple linear regression, nonlinear regression, maximum likelihood, hazard functions, univariate and multivariate time series, flexible functional forms. Prerequisites: 06E:221.

06E:223 Econometric Theory I 3 s.h.
Inference from data and theory in economic models; emphasis on decision making and simulation methods. Prerequisites: 06E:222.

06E:234 International Business-M.B.A. 3 s.h.
Problems in international business; how to export, how to deal with import competition, international joint ventures; country studies.

06E:235 International Trade Theory 3 s.h.
The theory of international trade, including basic models of international trade; capital and labor mobility and trade; protection of international trade; the political economy of international trade; empirical applications of international trade.

06E:241 Macroeconomics III 3 s.h.
Current research in macroeconomics; development of research topics with emphasis on theoretical and empirical analysis. Prerequisites: 06E:205 and 06E:221.

06E:245 Monetary Theory 3 s.h.
Research at the frontier of monetary theory and policy; overlapping generations models, search models of money, representative agent monetary models, intermediation and banking theory, and financial contracts.

06E:250 Labor Economics 3 s.h.
Problems and models, including intertemporal models of labor markets; uncertainty and labor market activity; retirement decisions, economic theories of fertility; economics of discrimination; job search models; economic models of unions; bargaining and strikes, public sector labor markets; determinants of income distribution; emphasis on empirical verification of theory. Prerequisites: 06E:205, and 06E:184 or 06E:221.

06E:271 Industrial Organization 3 s.h.
The firm, monopolistic competition, oligopoly and workable competition; industrial organization, nature of equilibrium under uncertainty. Prerequisites: 06E:205 and 06E:211.
06E:299 Contemporary Topics in Economics
3 s.h.
Topics not offered in other courses. Repeatable.

06E:300 Readings in Economics
arr.

06E:301 Thesis in Economics
arr.

Advanced Graduate Seminars

06E:310 Seminar in Economic Theory
arr.

06E:311 Seminar in Economic Theory II
arr.

06E:321 Workshop in Microeconomics
1 s.h.

06E:322 Workshop in Macro and Monetary Economics
1 s.h.
Elementary Education

**Web site:** [http://www.education.uiowa.edu/teach](http://www.education.uiowa.edu/teach)

**Undergraduate Programs**

- Major in elementary education (Bachelor of Arts, Bachelor of Science)

The College of Education offers the major in elementary education. The major is available with a Bachelor of Arts or a Bachelor of Science; both degrees are awarded by the College of Liberal Arts and Sciences. The College of Education also offers endorsement for instruction of middle school students (secondary education).

Students interested in pursuing a degree in elementary education must first be admitted to the College of Liberal Arts and Sciences and then must apply to the College of Education. Admission to the College of Education’s elementary education program is not guaranteed. In order to be considered for admission to the elementary education program, undergraduates must complete a minimum of 33 s.h. of course work and must have a University of Iowa and a cumulative g.p.a. of at least 2.70. All students must submit PRAXIS I test scores with their application to the Teacher Education Program (TEP). Students should visit with an advisor or speak with Teacher Education Program staff about complete admission requirements.

The elementary education major prepares students to teach kindergarten through sixth grade. Students complete course work in education foundations and methods and in one of the following areas of specialization: art, English language arts, English as a Second Language (ESL), hearing impaired, mathematics, middle school, music, physical education, reading, science, social sciences (history, social studies), special education (Instructional Strategist I: Mild/Moderate), and speech communication/theater. Students must complete the College of Liberal Arts and Sciences General Education Program (p. 381) and must satisfy all other requirements for graduation with a bachelor's degree from the College of Liberal Arts and Sciences.

For information about elementary and secondary education curriculum requirements, student teaching, and teacher licensure, see “TEP: Elementary Education (Undergraduate)” and “TEP: Secondary Education (Undergraduate and Graduate)” in the Teaching and Learning (p. 967) (College of Education) section of the Catalog and contact the Office of Education Services.
English

Chair
Claire Sponsler

Professors
Florence Boos, Ethan Canin, Lan Samantha Chang, Barbara Eckstein, Mary Lou Emery, Ed Folsom (Roy J. Carver Professor), Patricia Foster, James Galvin, Miriam Gilbert, David Hamilton, Robin Hemley, Cheryl T. Herr (English/Cinema and Comparative Literature), Kevin Kopelson, Brooks Landon, James Alan McPherson (F. Wendell Miller Professor), Christopher Merrill (English/Cinema and Comparative Literature), Adalaide Morris, Peter Nazareth, Judith Pascoe, Horace Porter (F. Wendell Miller Professor of English and American Studies), Marilynne Robinson (Skorton-Miller Professor), Phillip Round, Claire Sponsler, Garrett Stewart (James O. Freedman Chair in Letters), Bonnie Sunstein (Teaching and Learning/English), Cole Swensen, Jonathan Wilcox (John C. Gerber Professor of English)

Professors emeriti

Associate professors
Bluford Adams (English/American Studies), Linda Bolton, Lori Branch, Matthew Brown (English/Center for the Book), Corey Creekmur (English/Cinema and Comparative Literature), John D’Agata, Kathleen Diffley, Claire Fox, Eric Gidal, Loren Glass, Marie Kruger, Priya Kumar, Kathryn Lavezzo, Mark Levine, Teresa Mangum, Jeff Porter, Laura Rigal (English/American Studies), Robyn Schiff, Thomas Simmons, Alvin Snider, Harilaos Stecopoulos (English/American Studies), Miriam Thaggert (English/African American Studies), Doris S. Witt, David Wittenberg

Associate professors emeriti
Paul Diehl, Robert F. Woerner, Fredrick Woodard

Assistant professors
Blaine Greteman, Naomi Greyser (Rhetoric/English), Lina Hill (English/African American Studies), Michael Hill (English/African American Studies), Adam Hooks, Lara Trubowitz, Stephen Voyce

Assistant professor emeritus
John B. Harper

Lecturers
David Dowling, Mary Ann Rasmussen, Anne Stapleton

Undergraduate degree: B.A. in English
Undergraduate nondegree program: Minor in English
Graduate degrees: M.A., M.F.A., Ph.D. in English
Web site: http://english.uiowa.edu/

The Department of English offers courses in literature, cultural studies, language, and writing. In these courses, students read poetry, fiction, essays, criticism, and theory to acquire methods for understanding literature and culture. In addition to providing these essential elements of a liberal arts and sciences education, the department’s courses can augment students’ specialized interests in other fields.

Many undergraduate and graduate students enroll in the department’s degree programs. Most Ph.D. students in English are preparing for careers as teachers and scholars, and many M.F.A. students in the creative writing program and the nonfiction writing program are preparing for lives as storytellers, essayists, and poets. The B.A. and M.A. programs provide valuable training for careers in a variety of fields. Students who have earned English degrees from The University of Iowa write for advertising firms, newspapers, and book publishers; teach in primary and secondary schools; practice law and medicine; work in business and industry; and participate in state and federal government. As far as possible, a student’s course of study is arranged to meet his or her individual needs and objectives.

The Department of English participates in several of the University’s interdisciplinary units: the Departments of American Studies, Cinema and Comparative Literature, and Gender, Women’s, and Sexuality Studies; the African American Studies Program; the American Indian and Native Studies Program; the Center for the Book; and the Project on Rhetorics of Inquiry (POROI). The department also is the administrative home of the undergraduate Certificate in Disability Studies (p. 286).

Writing Programs

For the past 70 years, The University of Iowa has been a national leader in virtually all areas of teaching writing. It offers graduate degrees in both creative and nonfiction writing, gives undergraduate English majors the opportunity to pursue a track in creative writing
or a concentration in nonfiction writing, and makes writing courses available to qualified undergraduates in other majors.

The University's M.F.A. program in nonfiction writing is one of the few programs in the nation that offers a full range of graduate course work in the area.

The M.F.A. program in creative writing is conducted at the Iowa Writers' Workshop. Founded in 1936, the workshop counts scores of distinguished poets and novelists among its alumni. Writers compete for admission to the program, where they work with the outstanding teacher-authors that make up the workshop's faculty. The workshop also brings numerous prominent authors to campus each year for lectures and readings.

Although it is a graduate program, the workshop offers several courses for undergraduates, including students in majors other than English; see Creative Writing (Iowa Writers' Workshop) (p. 269) in the Catalog.

Graduate and undergraduate courses in creative writing (prefix 08C) and nonfiction writing (prefix 08N) are listed under "Courses" at the end of this Catalog section. There also are a few undergraduate writing courses intended only for non-English majors (prefix 08A).

To learn more about the department's undergraduate and graduate writing programs, see "Bachelor of Arts," "Master of Fine Arts: Creative Writing," and "Master of Fine Arts: Nonfiction Writing" below.

Undergraduate Programs

- Major in English (Bachelor of Arts)
- Minor in English

The Department of English offers undergraduate courses in literature, film, critical theory, cultural studies, language, and writing. In these courses, students study poetry, fiction, essays, criticism, film, and theory to acquire methods for understanding the history and significance of texts in the cultures from which they emerge.

The program also challenges students to strive for excellence as writers, offering a creative writing track, which has selective admission, as well as the opportunity to build individual concentrations in creative or nonfiction writing.

Students who plan to teach English in secondary schools should consult with an advisor in the College of Education as early as possible; contact the Office of Education Services. The education endorsement requires that students choose particular courses in the English major in order to meet state requirements. See "B.A. with Teacher Licensure" below.

Students interested in an English major should consult advisors in the English undergraduate advising office. Visit the Department of English web site for details about the program, faculty, courses, and upcoming events.

Bachelor of Arts

The Bachelor of Arts with a major in English requires a minimum of 120 s.h., including at least 33 s.h. (11 courses) of work for the major. Students must earn at least 18 s.h. of credit for the major at The University of Iowa. Transfer students may count a maximum of 15 s.h. of approved transfer credit toward the major.

Students may apply to enter the major's creative writing track; admission is selective (see "Creative Writing Track" below). Or they may work with an advisor to plan a concentration in creative writing, taking courses with the 08C prefix. Students who enroll in 08C:163 Undergraduate Writers' Workshop: Fiction or 08C:166 Undergraduate Writers' Workshop: Poetry must have the instructor's consent and must submit samples of their writing before they may register.

Students interested in nonfiction writing may work with an advisor to build a concentration, taking courses with the 08N prefix; selections include courses in forms of nonfiction writing and literary nonfiction. Enrollment in some nonfiction writing courses, such as 08N:150 Undergraduate Essay Workshop, requires the instructor's consent.

Courses 08C:001 Creative Writing Studio Workshop and 08N:020 Introduction to Creative Nonfiction do not count toward the English major, nor do courses with 08A and 08G prefixes.

All students must complete the College of Liberal Arts and Sciences General Education Program (p. 381). English majors should not use 08G:001 The Interpretation of Literature to fulfill General Education's Interpretation of Literature requirement; they may substitute a course from the Literary, Visual, and Performing Arts area of General Education, excluding 025:059, 137:001–137:024, and 137:106.

All English majors must complete 008:005 Introduction to the English Major: Theory and Practice.

Other course work for the major is divided into six areas and three historical periods. Students must complete a total of eight area courses (see "Areas" below) and six historical period courses (see "Historical Periods" below). Most courses (except those in the creative writing and nonfiction writing
list) satisfy both an area and a historical period requirement, so many students complete the historical period requirements as they complete the area requirements. This allows them to choose additional elective course work to complete the major.

Each course’s area and historical period are included in its course description, which is provided in the comprehensive list of Department of English courses; see "Courses" at the end of the Catalog section. Information about individual courses also is available on ISIS, on the Department of English web site, and from advisors.

The major in English requires the following course work.

**Introductory Course**

All English majors must complete this course and are encouraged to enroll in it as soon as they declare the major.

008:005 Introduction to the English Major: Theory and Practice  3 s.h.

**Areas**

Students must complete at least one course (3 s.h.) from each of the following six areas. Each student also must choose one of the six areas as a concentration area and take an additional two courses in that area, for a total of three courses (9 s.h.) in one area, and eight area courses in all.

**Literary Theory and Interdisciplinary Studies**

008:001 Modern Fiction  3 s.h.
008:002 Postmodern Fiction  3 s.h.
008:030 Introduction to Cultural Studies  3 s.h.
008:031 Introduction to Postcolonial Studies  3 s.h.
008:032 Introduction to the English Language  3 s.h.
008:033 Introduction to Criticism and Theory  3 s.h.
008:034 Introduction to the Novel  3 s.h.
008:035 Introduction to Poetry  3 s.h.
008:036 Introduction to the Short Story  3 s.h.
008:037 Introduction to Drama  3 s.h.
008:038 Introduction to the Essay  3 s.h.
008:052 Literature, Culture, and Women  3 s.h.
008:053 Lyric Structures  3 s.h.
008:070 Disability in Literature and Cultural Theory  3 s.h.
008:128 London Performance Study  3 s.h.
008:129 Topics in Criticism and Theory  3 s.h.
008:130 Literature and the Book  3 s.h.
008:134 Introduction to Book Studies  3 s.h.
008:136 Topics in Popular Culture  3 s.h.
008:168 Topics in Poetry and Poetics  3 s.h.
008:170 Literary Genres and Modes  3 s.h.
008:171 Digital Media and Poetics  3 s.h.
008:172 Narrative and the Cinema  3 s.h.
008:173 Topics in Digital Media  3 s.h.
008:174 Topics in Law and Culture  3 s.h.
008:175 Topics in Film and Literature  3 s.h.
008:176 Literature and Philosophic Thought  3 s.h.
008:177 Literature and Art  3 s.h.
008:179 Literature and Society  3 s.h.
008:182 Science Fiction  3 s.h.
008:188 Prose by Women Writers  3 s.h.
008:189 Digital Cultures and Literacies  3 s.h.
008:190 Topics in Book History  3 s.h.
008:192 Interdisciplinary Studies  3 s.h.
008:194 Introduction to Feminist Criticism  3 s.h.
08P:182 Language and Learning  2-3 s.h.
08P:198 Reading and Teaching Adolescent Literature  3 s.h.

**Medieval and Early Modern Literature and Culture**

008:008 Classical and Biblical Literature  3 s.h.
008:060 Selected Works of the Middle Ages  3 s.h.
008:076 Selected Early Authors  3 s.h.

</table>
The historical period of each of the following courses is designated as early literatures through the 17th century, or as 18th and/or 19th-century literature, or as 20th and/or 21st-century literature.

008:098 Seminar 3 s.h.
008:130 Literature and the Book 3 s.h.
008:134 Introduction to Book Studies 3 s.h.
008:190 Topics in Book History 3 s.h.

Creative Writing Track

Students majoring in English may be eligible to enter the creative writing track. The track places the same emphasis on training creative and intelligent readers as does the English major.

The creative writing track requires a minimum of 13 s.h. In addition to fulfilling requirements for the track, students must complete the two prerequisite courses required for admission to the track and satisfy all other admission requirements (see "Selective Admission" below). They must fulfill all requirements for the English major as stated under "Bachelor of Arts" above, including 008:005 Introduction to the English Major: Theory and Practice. They also must complete the College of Liberal Arts and Sciences General Education Program (p. 381).

Selective Admission

Admission to the creative writing track is selective; students must apply and be admitted to the track. To apply, students must:

- have junior or senior standing;
- have a cumulative g.p.a. of at least 3.33 in English (based on all English courses taken, including creative writing courses); and
- have completed at least 9 s.h. in University of Iowa English courses, excluding those with prefixes 08N and 08C.

Applicants also must have completed two prerequisites for admission to the creative writing track (6 s.h.), chosen from the following list of University of Iowa introductory-level writing courses. They may include 08C:023 Creative Writing 3 s.h.
08C:097 Fiction Writing 3 s.h.
08C:098 Poetry Writing 3 s.h.
08C:108 Creative Writing for New Media 3 s.h.
08C:110 Creative Writing for the Ecologically Aware: Stories in the Land 3 s.h.
08C:167 Undergraduate Writers’ Seminar 3 s.h.
08N:080 Nonfiction Writing 3 s.h.
08N:090 Intermediate Nonfiction Writing 3 s.h.
048:078 Undergraduate Translation Seminar (section 1) 3 s.h.
048:079 Undergraduate Translation Workshop 3 s.h.
049:062 Playwriting I 3 s.h.
049:063 Playwriting II 3 s.h.

Exceptions may be made for students who have not taken an introductory course but who have taken 08C:166 Undergraduate Writers’ Workshop: Poetry or 08C:163 Undergraduate Writers’ Workshop: Fiction.

Students may apply to the creative writing track before preregistration each semester. For information and application forms, visit the Creative Writing Track web page.

Registration in creative writing track courses requires admission to the track.

Creative Writing Track Colloquium

8WS:120 Creative Writing Track Colloquium 3 s.h.

The Creative Writing Track Colloquium draws on Iowa’s creative writing tradition. It provides a common experience of readings, talks, performances, master classes, and class discussions, preparing students for participation at events led by visiting writers. Its curriculum also includes works by or about the visiting writers, literature that helps contextualize the readings, and exercises designed to heighten students’ involvement at events.

Genre-Based Seminars

Two of these (4 s.h.):
8WS:121 Writers’ Seminar: Fiction 2 s.h.
8WS:122 Writers’ Seminar: Poetry 2 s.h.
8WS:123 Writers’ Seminar: Nonfiction 2 s.h.
8WS:124 Writers’ Seminar: Literary Translation 2 s.h.
8WS:125 Writers’ Seminar: Playwriting 2 s.h.

**Advanced Courses**

A minimum of 6 s.h. chosen from these:

- 008:198 Undergraduate Honors Project 1-3 s.h.
- 08C:163 Undergraduate Writers’ Workshop: Fiction 3 s.h.
- 08C:166 Undergraduate Writers’ Workshop: Poetry 3 s.h.
- 08N:104 Personal Writing 3 s.h.
- 08N:120 Advanced Nonfiction Writing 3 s.h.
- 08N:130 Special Readings in Nonfiction 1 s.h.
- 08N:145 Multimedia Writing 3 s.h.
- 08N:150 Undergraduate Essay Workshop 3 s.h.
- 08N:192 Dublin Writing Workshop 3 s.h.
- 8WS:170 Creative Writing Track: Advanced Topics 3 s.h.
- 049:165 Advanced Playwriting 3 s.h.
- 049:169 Undergraduate Playwriting Workshop 1-3 s.h.

In order to take 008:198 Undergraduate Honors Project (an honors thesis in creative writing), students must be members of the University of Iowa Honors Program, which requires students to maintain a cumulative University of Iowa g.p.a. of at least 3.33. They also must have completed all required writers’ seminars, must be on course to complete all requirements for the English major, and must have departmental approval.

**B.A. with Teacher Licensure**

Students planning to teach English in secondary schools must complete the requirements for the major in English and the College of Education’s Teacher Education Program (TEP). Contact the College of Education’s Office of Education Services for application forms and information.

By the end of the program, students must have completed the following courses.

**ENGLISH COURSES**

Students complete these courses as part of the English major.

- A Shakespeare course
- Three American literature courses
- A British literature course

**EDUCATION COURSES**

These College of Education courses are required for teacher education.

- 07B:180 Human Relations for the Classroom Teacher 3 s.h.
- 07E:100 Foundations of Education 3 s.h.
- 07E:102 Technology in the Classroom 2 s.h.
- 07P:075 Educational Psychology and Measurement 3 s.h.
- 07S:114 Introduction and Practicum: Secondary English 3 s.h.
- 07S:115 Methods: Secondary English 3 s.h.
- 07S:187 Seminar: Curriculum and Student Teaching 1-3 s.h.
- 07S:190 Orientation to Secondary Education 0-1 s.h.
- 07S:191 Observation and Laboratory Practice in the Secondary School 6 s.h.
- 07S:192 Observation and Laboratory Practice in the Secondary School 6 s.h.
- 07S:194 Methods: Secondary Reading 2-3 s.h.
- 07U:100 Foundations of Special Education 3 s.h.

One college-level mathematics or statistics course

**Admission**

Applicants to the Teacher Education Program in English must have completed a minimum of 40 s.h., including 008:005 Introduction to the English Major: Theory and Practice and an additional 12 s.h. in English courses, before they may be admitted to the program. The following courses do not count toward the additional 12 s.h.: all 08G courses, 08N:141 Approaches to Teaching Writing, 08P:182 Language and Learning, and 08P:198 Reading and Teaching Adolescent Literature. Applicants also must have a University of Iowa g.p.a. and a cumulative g.p.a. of at least 2.70 as well as an English major g.p.a. of at least 3.00. Applicants must submit an application to the College of Education, including PRAXIS I scores, an Iowa criminal history check, letters of recommendation, and proof of a 10-hour preadmission volunteer field experience.
Minor Licensure in English

Students who seek licensure for secondary teaching in fields other than English may seek minor licensure in English. First-year courses in rhetoric, speech, or writing do not count toward this requirement.

The English minor licensure program includes the following course work.

<table>
<thead>
<tr>
<th>Course</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>An American literature course</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>A British literature course</td>
<td></td>
</tr>
<tr>
<td>A course in creative or nonfiction writing</td>
<td></td>
</tr>
<tr>
<td>An additional English course</td>
<td></td>
</tr>
<tr>
<td>07S:115 Methods: Secondary English</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>07S:194 Methods: Secondary Reading</td>
<td>2-3 s.h.</td>
</tr>
<tr>
<td>08N:141/07S:155 Approaches to Teaching Writing</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>08P:182/07S:182 Language and Learning</td>
<td>2-3 s.h.</td>
</tr>
<tr>
<td>08P:198/07S:193 Reading and Teaching Adolescent Literature</td>
<td>3 s.h.</td>
</tr>
</tbody>
</table>

While this program meets minimum requirements for licensure, the department recommends that students who want to teach English have considerably more training in the field.

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan.

Before the third semester begins: at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: at least two courses in the major and at least one-half of the semester hours required for graduation

Before the seventh semester begins: at least six courses in the major and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: at least eight courses in the major

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Honors

The English major with honors gives talented students the opportunity to enhance their course of study through honors proseminars and thesis writing. Each year the department offers four honors proseminars covering a wide range of subject areas and historical periods. Honors proseminars are limited to 18 students, carry 3 s.h. credit, and meet three hours each week. These courses require substantial reading and research and culminate in a 15-20 page essay. Students register for 008:098 Seminar.

To register for a proseminar, students must have a University of Iowa g.p.a. of at least 3.33 and must have completed three English courses (not including introductory courses in nonfiction or creative writing) with a g.p.a. of at least 3.33 in English. The department also recommends that students complete 008:005 Introduction to the English Major: Theory and Practice before taking an honors proseminar.

All students interested in taking honors course work are encouraged to join the English Honors Program as soon as they qualify. Students may join online; visit English Honors Program.

Students who wish to graduate with honors in English must take two honors proseminars, complete a two-semester thesis project, and maintain a University of Iowa g.p.a. of at least 3.33 and a g.p.a. of at least 3.50 in English.

The two-semester thesis project includes 008:120 Honors Thesis Workshop (fall) and 008:198 Undergraduate Honors Project (independent study) for a total of 6 s.h. To enroll in 008:120 Honors Thesis Workshop, students must have completed one honors proseminar with a grade of A- or better and must have a University of Iowa g.p.a. of at least 3.33 and a g.p.a. of at least 3.50 in English.

The English Honors Program has established careful guidelines for each of the six types of honors theses accepted by the department: literary and cultural studies; nonfiction writing; electronic writing and multimedia production; English education; creative writing; and the interdisciplinary thesis for double honors, which allows a student to earn honors in two departments with one longer project. Information on thesis guidelines is available on the English Honors Program web site and in the handout A Guide to the English Honors Program, available in the Department of English office.

Students who qualify for honors in English also qualify for membership in the University of Iowa Honors Program, which requires a cumulative University of Iowa g.p.a. of at least 3.33. Contact the University of Iowa Honors Program for more information about honors study at Iowa.
Minor

The minor in English requires a minimum of 15 s.h. in English courses, including 12 s.h. in courses taken at The University of Iowa. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass. Students may count a maximum of 3 s.h. of approved transfer credit toward the minor. Before taking courses for the minor, students must complete the General Education Program requirement 08G:001 The Interpretation of Literature.

The minor must include at least 6 s.h. in literature (prefix 008); the remaining 9 s.h. may be selected from additional courses in literature and from most courses in writing (prefixes 08C and 08N). The following courses do not count toward the minor: 08A and 08G courses; 08C:001 Creative Writing Studio Workshop; and 08N:020 Introduction to Creative Nonfiction.

Students may declare the English minor on ISIS. In order for the minor to be recorded, students must indicate completion of the minor on their Application for Degree.

Students who would like help declaring the minor or in planning how to meet its requirements may stop by the advising office or schedule an appointment with an advisor by contacting the undergraduate English secretary.

Graduate Programs

- Master of Arts in English
- Master of Fine Arts in English (creative writing or nonfiction writing)
- Doctor of Philosophy in English

The Master of Arts program in English introduces students to the professional study of literature; the Doctor of Philosophy program prepares them to serve as faculty members at colleges and universities.

The Master of Fine Arts program in creative writing features advanced courses in writing fiction and poetry. Students in creative writing study at the Iowa Writers' Workshop, renowned as a pioneer in teaching writers since its founding in 1936. The Master of Fine Arts program in nonfiction writing is one of the few programs in the nation that offers a full range of graduate courses in literary nonfiction.

The M.A. is appropriate for students who would like graduate training in English and who may have an undergraduate major in a different field or who may intend to earn a Ph.D. at another institution. Students interested in careers in any area of book studies (professional writing, editing, web design, or publishing) may wish to earn the M.A. as a terminal degree, as may teachers seeking to enhance their credentials or students pursuing intellectual growth unrelated to a specific career.

M.A. and Ph.D. students in English mix freely in graduate courses, share the same access to faculty, and meet the same standards of quality in their work.

Exam for the Master of Arts in Teaching

The department administers the English component of the exam for the Master of Arts in Teaching (M.A.T.) in coordination with the College of Education. M.A.T. students should contact the Department of Teaching and Learning for information.

Master of Arts

The Master of Arts program in English requires a minimum of 30 s.h. of graduate credit. The program’s focus is literary studies. The required 30 s.h. includes 24 s.h. earned in residence at The University of Iowa with a g.p.a. of at least 3.25. Students who wish to transfer to Iowa’s Ph.D. program must complete two semesters or 15 s.h. of course work in literature (whichever they complete first) before applying for admission to the doctoral program.

COURSE WORK

Each student must take the following five courses at the 200 level or above. Applicable transfer courses must be approved by the director of graduate study in English.

One course in criticism and theory

Four courses chosen from the following five areas:

| British or American literature and culture before 1500 |
| British or American literature and culture 1500-1660 |
| British or American literature and culture 1660-1800 |
| British or American literature and culture 1800-1900 |
| British or American literature and culture of the 20th Century |

Elective courses constitute half of the total credit for the degree and may be chosen from graduate courses both in and outside the English
department. Students may wish to explore opportunities for interdisciplinary study, language study, experience in theory and practice of writing, or specialization in a field of literary scholarship.

Department of English graduate courses are repeatable with the written approval of the department’s director of graduate studies.

Completion of the M.A. requires either a thesis or a portfolio. Students submit a written description of their choice to the director of the program before the semester in which they plan to graduate.

**M.A. THESIS**

Students who choose to write an M.A. thesis must submit a brief prospectus approved by a thesis director before they register for thesis credit and at least one semester before they submit the thesis. The thesis committee consists of the thesis director, the director of the M.A. program, and one other faculty member. The thesis is evaluated by the committee as either satisfactory or unsatisfactory.

A copy of the thesis must be presented to the Graduate College for approval. For detailed information about Graduate College deadlines and policies, see the Manual of Rules and Regulations of the Graduate College.

**PORTFOLIO**

Near the end of their course work, students who do not choose the thesis option must submit a portfolio of work to the M.A. examination committee, which consists of the director of the M.A. program and two other English faculty members. All three read the full portfolio. To pass, the candidate must win a majority vote of the committee members.

Students take the first step toward preparing to submit a portfolio by meeting with the director of the M.A. program to discuss the portfolio, early during the semester in which they plan to graduate. After fulfilling all distribution and eligibility requirements and clearing all incomplete grades, students present the director with a draft of the portfolio’s introductory statement. Students planning to graduate at the end of fall semester should present the statement by the first week of October; those who plan to graduate at the end of spring semester should present the statement by the first week of March. Once the director approves the statement, the student must submit three copies of the full portfolio; the submission deadline is November 1 for students planning to graduate at the end of fall semester and April 1 for those who will graduate at the end of spring semester.

The work in the portfolio should demonstrate the student’s knowledge of literature as a broad historical and theoretical inquiry. Students submit approximately 50 pages (12,500 words) of their best work, along with a self-reflective introductory statement of five to seven pages. The body of the portfolio should contain papers originally produced for classes, revised for a broader audience unfamiliar with the original classes. The introduction should detail the student’s trajectory in the program and the literary-critical or methodological skills he or she has gained. It also should explain the contents of the portfolio; contextualize each paper; and give a brief overview of the writing. Students are expected to describe the research methods used in assembling their portfolios and the critical practices that ground their work.

**Master of Fine Arts: Creative Writing**

The Master of Fine Arts program in creative writing requires a minimum of 48 s.h. of graduate credit. The degree is offered through the Creative Writing Program (Iowa Writers’ Workshop), a two-year residency program that culminates in a creative thesis, such as a novel, a collection of stories, or a book of poetry.

Throughout the program, workshop students craft their manuscripts and engage in an exchange of ideas about writing and reading with each other and with the renowned teacher-authors who make up the workshop’s faculty.

Admission to the program is competitive.

For details about the M.F.A. in creative writing and about the Iowa Writers’ Workshop, see Creative Writing (Iowa Writers’ Workshop) (p. 269) in the Catalog.

**Master of Fine Arts: Nonfiction Writing**

The Master of Fine Arts program in nonfiction writing requires 48 s.h. of graduate credit. It is designed for accomplished students of literary nonfiction, most of whom complete it in three years. The program culminates in a thesis of at least 75 pages, either a sustained essay or a collection of shorter pieces.

M.F.A. students must complete at least 30 s.h. in residence at The University of Iowa and 30 s.h. of work in courses specified by the program. They may choose electives widely, from courses offered by the English department and by all other University of Iowa departments.
Department of English graduate courses are repeatable with the written approval of the department’s director of graduate studies.

In addition to completing course work, students are required to enroll for at least 2 s.h. and no more than 8 s.h. of thesis credit. The thesis may be a single extended piece of nonfiction, a collection of shorter nonfiction pieces, or a collection of essays. Whatever the project, the thesis is expected to be of publishable quality.

For more information, consult the director of the Nonfiction Writing Program.

**Doctor of Philosophy**

The Doctor of Philosophy program in English requires a minimum of 72 s.h. of graduate credit. The program is designed as preparation for the teaching, publishing, and administrative service required of college and university faculty members.

Concentrations are offered in areas such as literary history and critical theory, as well as interdisciplinary areas such as cultural studies and transnational studies.

Of the required 72 s.h., at least 30 s.h. must be earned in residence at The University of Iowa with a g.p.a. of at least 3.50.

Ph.D. requirements include the following.

- Formal admission to candidacy by a vote of the Graduate Steering Committee, usually during the third semester of doctoral study
- Course work in any four of the following historical periods, as expressed in texts of the English-speaking and -writing world (usually but not always British or American):
  - Literature and culture before 1500
  - Literature and culture 1500-1660
  - Literature and culture 1660-1800
  - Literature and culture 1800-1900
  - Literature and culture of the 20th century
- Three English department seminars taken at The University of Iowa
- Fulfillment of the language requirement, usually by completion of an advanced undergraduate course (100-level or above) in a language other than English
- A comprehensive examination that consists of the following: a portfolio of five scholarly questions based on a period of literary history (usually British or American); a review essay and annotated bibliography in a special area of interest; two course syllabi; an article to be submitted for publication; and an introduction to the portfolio that synthesizes its parts in preparation for a two-hour oral exam
- A dissertation, beginning with a formal presentation of the prospectus to a faculty committee
- A final examination in defense of the dissertation

All doctoral candidates are required to gain some teaching experience, preferably in the College of Liberal Arts and Sciences Department of Rhetoric and in General Education Program (p. 381) literature courses.

For application forms and a complete description of the Ph.D. program, contact the department’s graduate program associate.

**Admission**

For information about admission requirements, see Admissions Guidelines for Graduate Students in English on the department’s web site. Applications for admission must be postmarked by the following deadlines:

- M.A. and Ph.D.: postmark by January 3;
- M.F.A. (creative writing): postmark by January 3;

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate (p. 1117) College section of the Catalog.

**Financial Support**

Graduate scholarships, fellowships, and teaching and research assistantships are awarded on a competitive basis. The department strives to provide six years of support for all doctoral students who are in good standing, which requires a University of Iowa g.p.a. of at least 3.50 and full-time student standing.

Financial aid applications are considered only from students who have applied or been admitted to a degree program in the Graduate College. Applications and all necessary supporting material must be submitted by the end of January for the following academic year. Forms are available from the Department of English and the University’s Office of Admissions.

**Facilities and Resources**

The University of Iowa Libraries collection is strong in all areas of English and American literature.
Partly because of the influence of the Iowa Writers' Workshop, University Libraries has particular strengths in 20th-century fiction and poetry, including manuscript collections of 20th-century authors.

Several periodicals are published under the department's aegis. The Iowa Review, Walt Whitman Quarterly Review, and Philological Quarterly offer opportunities for especially qualified graduate students to work as research assistants or editorial associates. The Iowa Journal of Cultural Studies, edited by English department graduate students, features creative and scholarly work by students in English and related areas.

The Department of English and the Iowa Writers' Workshop sponsor a rich and extensive series of readings and lectures by poets, fiction writers, and scholars, all open to students in the department.

The Association of Graduate Students in English sponsors social and intellectual events during the year and provides a forum for student opinion. All graduate students in the department are members.

Courses

Courses for Non-English Majors

08A:059 American Short Story for Non-English Majors 3 s.h.
08A:080 Nonfiction Writing for Non-English Majors 3 s.h.
08A:104 Personal Writing for Non-English Majors 3 s.h.
08A:106 Literature and Culture of 20th-Century America for Non-English Majors 3 s.h.
08A:113 Writing for Business and Industry for Non-English Majors 3 s.h.

08A:133 British Novel: Scott to Conrad for Non-English Majors 3 s.h.
08A:135 Forms of the Essay for Non-English Majors 3 s.h.
08A:142 Popular Literature for Non-English Majors 3 s.h.
08A:188 Prose by Women Writers for Non-English Majors 3 s.h.

General Education

Note: 08C:001 Creative Writing Studio Workshop and 08N:020 Introduction to Creative Nonfiction do not count toward the English major or minor.

08C:001 Creative Writing Studio Workshop 3 s.h.
Experience reading and writing fiction, poetry, and personal narrative in a workshop setting; study of published work and critical discussion from a writer's standpoint; critique of class members' work. GE: Literary, Visual, and Performing Arts.

08N:020 Introduction to Creative Nonfiction 3 s.h.
Creative nonfiction genres explored through readings, discussion, and writing exercises; introduction to the workshop environment; for English nonmajors. GE: Literary, Visual, and Performing Arts.

Literature, General Education

All students earning a degree from the College of Liberal Arts and Sciences, except English majors, must take 08G:001 The Interpretation of Literature as part of the General Education Program (p. 381). English majors should substitute a course from the Literary, Visual, and Performing Arts area of General Education, excluding 025:059, 137:001–137:024, and 137:106.

Course 08G:001 (or its equivalent by examination or transfer) is a prerequisite for courses 08G:002 Biblical and Classical Literature through 08G:015 Women and Literature. The pass/nonpass option is available only for students in the Colleges of
Nursing and Engineering with consent of the student’s advisor and the instructor.

08G:001 The Interpretation of Literature 3 s.h.
Ways of reading; focus on reader, text, contexts; poetry, short fiction, drama, novels. Requirements: successful completion of the rhetoric requirement. GE: Interpretation of Literature.

08G:002 Biblical and Classical Literature 3 s.h.
Literatures of ancient cultures--Jewish and Christian, Greek and Roman--that have deeply affected later civilizations. Prerequisites: 010:002 or 010:003, and 08G:001. Requirements: successful completion of the rhetoric requirement and then 08G:001. GE: Literary, Visual, and Performing Arts.

08G:003 Medieval and Renaissance Literature 3 s.h.
English and European poetry, prose, drama circa 400-1700 in dialogue with contemporary concerns. Prerequisites: 010:002 or 010:003, and 08G:001. Requirements: successful completion of the rhetoric requirement and then 08G:001. GE: Literary, Visual, and Performing Arts.

08G:004 Heroes and Villains 3 s.h.
Heroes, heroines, and villains as products of the imagination; literary representations of heroes, heroines, and villains in varied social and historical situations; how their representation shapes our understanding of heroism and villainy. Prerequisites: 010:002 or 010:003, and 08G:001. Requirements: successful completion of the rhetoric requirement and then 08G:001. Recommendations: closed to students who have taken 08G:012. GE: Literary, Visual, and Performing Arts.

08G:005 Literatures of Native American Peoples 3 s.h.
Genres of Native American literature, including oral literature; focus on written literature (fiction, essays, poetry, drama). Prerequisites: 010:002 or 010:003, and 08G:001. Requirements: successful completion of the rhetoric requirement and then 08G:001. GE: Literary, Visual, and Performing Arts; Values, Society, and Diversity. Same as 149:005.

08G:006 Fictions 3 s.h.
Selected masterpieces and recent developments in the art of storytelling in poetry and prose. Prerequisites: 010:002 or 010:003, and 08G:001. Requirements: successful completion of the rhetoric requirement and then 08G:001. GE: Literary, Visual, and Performing Arts.

08G:007 Poetry 3 s.h.
Poetry from major periods of development as well as contemporary verse; emphasis on distinctive language, major formal patterns of poetry. Prerequisites: 010:002 or 010:003, and 08G:001. Requirements: successful completion of the rhetoric requirement and then 08G:001. GE: Literary, Visual, and Performing Arts.

08G:009 American Lives 3 s.h.
Major works of American literature. Prerequisites: 010:002 or 010:003, and 08G:001. Requirements: successful completion of the rhetoric requirement and then 08G:001. GE: Literary, Visual, and Performing Arts.

08G:011 Literature and Sexualities 3 s.h.
Works from various genres, time periods, cultures that reflect and construct a wide range of sexual identities. Prerequisites: 010:002 or 010:003, and 08G:001. Requirements: successful completion of the rhetoric requirement and then 08G:001. GE: Literary, Visual, and Performing Arts.

08G:012 Comic and Tragic Literature 3 s.h.
Interrelations of comic and tragic literature, including film and other popular media, and their connection with human experience; comic and tragic forms and their uses in different social and historical situations. Prerequisites: 010:002 or 010:003, and 08G:001. Requirements: successful completion of the rhetoric requirement and then 08G:001. Recommendations: closed to students who have taken 08G:004. GE: Literary, Visual, and Performing Arts.
**08G:014 Literatures of the African Peoples**  
3 s.h.
Works in English by authors of African descent from America, continental Africa, the Caribbean. Prerequisites: 010:002 or 010:003, and 08G:001. Requirements: successful completion of the rhetoric requirement and then 08G:001. GE: Literary, Visual, and Performing Arts; Values, Society, and Diversity. Same as 129:008.

**08G:015 Women and Literature**  
3 s.h.
Works from various genres and time periods focusing on a wide range of women’s experiences. Prerequisites: 010:002 or 010:003, and 08G:001. Requirements: successful completion of the rhetoric requirement and then 08G:001. GE: Literary, Visual, and Performing Arts.

**Literature, Primarily for Undergraduates**

English department courses are open to all undergraduates who have satisfied the rhetoric requirement. Undergraduates are encouraged to complete the required course 008:005 Introduction to the English Major: Theory and Practice as soon as they declare the English major. Students also are encouraged to take one or more introductory departmental courses (008:030 Introduction to Cultural Studies through 008:038 Introduction to the Essay) before attempting 100-level courses.

Courses 008:098 Seminar, 008:198 Undergraduate Honors Project, and 008:199 Special Project for Undergraduates may be repeated. Most courses with the 008 prefix may not be repeated. Occasionally, with written consent from the department’s Undergraduate Advising Office, a student may repeat a course if the course’s subject matter is different from that of a course the student already has taken.

**008:001 Modern Fiction**  
3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: 20th- and/or 21st-Century Literature.

**008:002 Postmodern Fiction**  
3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: 20th- and/or 21st-Century Literature.

**008:004 Literary Readings Attendance**  
1 s.h.
Attendance at diverse literary readings and scholarly presentations on The University of Iowa campus and in Iowa City, featuring visiting, local, and University of Iowa writers and scholars.

**008:030 Introduction to Cultural Studies**  
3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: 20th- and/or 21st-Century Literature.

**008:031 Introduction to Postcolonial Studies**  
3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: 20th- and/or 21st-Century Literature.

**008:032 Introduction to the English Language**  
3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: 20th- and/or 21st-Century Literature.
008:033 Introduction to Criticism and Theory 3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: 20th- and/or 21st-Century Literature.

008:034 Introduction to the Novel 3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: 18th- and/or 19th-Century Literature, or 20th- and/or 21st-Century Literature.

008:035 Introduction to Poetry 3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: 18th- and/or 19th-Century Literature, or 20th- and/or 21st-Century Literature.

008:036 Introduction to the Short Story 3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: 20th- and/or 21st-Century Literature.

008:037 Introduction to Drama 3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: 20th- and/or 21st-Century Literature.

008:038 Introduction to the Essay 3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: 20th- and/or 21st-Century Literature.

008:052 Literature, Culture, and Women 3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: 18th- and/or 19th-Century Literature, or 20th- and/or 21st-Century Literature. Same as 131:052.

008:053 Lyric Structures 3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: 20th- and/or 21st-Century Literature.

008:055 American Poetry 3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: American Literature and Culture. PERIOD: 18th- and/or 19th-Century Literature, or 20th- and/or 21st-Century Literature.

008:056 American Literary Classics 3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: American Literature and Culture. PERIOD: 18th- and/or 19th-Century Literature, or 20th- and/or 21st-Century Literature.

008:057 American Novel Before 1900 3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: American Literature and Culture. PERIOD: 18th- and/or 19th-Century Literature.

008:058 American Novel After 1900 3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: American Literature and Culture. PERIOD: 20th and/or 21st-Century Literature.

008:059 American Short Story 3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: American Literature and Culture. PERIOD: 18th- and/or 19th-Century Literature, or 20th- and/or 21st-Century Literature.

008:060 Selected Works of the Middle Ages 3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: Medieval and Early Modern Literature and Culture. PERIOD: Early Literatures Through 17th Century.
008:062 Eighteenth-Century British Literature
3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: Modern British literature and Culture. PERIOD: 18th- and/or 19th-Century Literature.

008:063 British Romanticism
3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: Modern British Literature and Culture. PERIOD: 18th- and/or 19th-Century Literature.

008:064 Victorian Literature
3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: Modern British Literature and Culture. PERIOD: 18th- and/or 19th-Century Literature.

008:065 Twentieth-Century British Literature
3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: Modern British Literature and Culture. PERIOD: 20th- and/or 21st-Century Literature.

008:066 Twenty-first-Century British Literature
3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: Modern British Literature and Culture. PERIOD: 20th- and/or 21st-Century Literature.

008:067 Selected Transnational Authors
3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: Transnational Literature and Postcolonial Studies. PERIOD: 20th- and/or 21st-Century Literature.

008:068 Selected Early Authors
3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: Medieval and Early Modern Literature and Culture. PERIOD: Early Literatures Through 17th Century.

008:069 Selected Early Authors Before 1900
3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: Modern British Literature and Culture. PERIOD: 18th- and/or 19th-Century Literature.

008:070 Selected Early Authors After 1900
3 s.h.
English majors may apply the following course to the area and/or period requirement. AREA: Modern British Literature and Culture. PERIOD: 20th- and/or 21st-Century Literature.

008:071 Selected Early Authors 20th-Century
3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: Modern British Literature and Culture. PERIOD: 20th- and/or 21st-Century Literature.

008:072 Selected Early Authors 21st-Century
3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: Modern British Literature and Culture. PERIOD: 20th- and/or 21st-Century Literature.

008:073 Selected Early Authors 19th-Century
3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: Modern British Literature and Culture. PERIOD: 18th- and/or 19th-Century Literature.

008:074 Selected Early Authors 18th-Century
3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: Modern British Literature and Culture. PERIOD: 18th- and/or 19th-Century Literature.

008:075 Selected Transnational Authors
3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: Transnational Literature and Postcolonial Studies. PERIOD: 20th- and/or 21st-Century Literature.

008:076 Selected Early Authors
3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: Medieval and Early Modern Literature and Culture. PERIOD: Early Literatures Through 17th Century.

008:077 Selected Early Authors
3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: Medieval and Early Modern Literature and Culture. PERIOD: Early Literatures Through 17th Century.

008:078 Selected British Authors Before 1900
3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: Modern British Literature and Culture. PERIOD: 18th- and/or 19th-Century Literature.

008:079 Selected British Authors After 1900
3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: Modern British Literature and Culture. PERIOD: 20th- and/or 21st-Century Literature.

008:080 Latina/o Studies
3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: American Literature and Culture. PERIOD: 20th- and/or 21st-Century Literature.

008:081 Topics in African American Literature
3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: American Literature and Culture. PERIOD: 20th- and/or 21st-Century Literature.

008:082 Latina/o Studies
3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: American Literature and Culture. PERIOD: 20th- and/or 21st-Century Literature.

008:083 Topics in African American Literature
3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: American Literature and Culture. PERIOD: 20th- and/or 21st-Century Literature.

008:084 Topics in Culture and Identity
3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: Transnational Literature and Postcolonial Studies. PERIOD: 18th- and/or 19th-Century Literature, or 20th- and/or 21st-Century Literature.

3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: 20th- and/or 21st-Century Literature. Same as 048:172.

008:173 Topics in Digital Media
3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: 20th- and/or 21st-Century Literature. Same as 049:173.

008:174 Topics in Law and Culture
3 s.h.
Cultural studies methodologies adapted to examining the relationship between law and culture; area focus and topics vary. English majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: 20th- and/or 21st-Century Literature. Same as 048:174.

008:175 Topics in Film and Literature
3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: 20th- and/or 21st-Century Literature. Same as 048:175.

008:176 Literature and Philosphic Thought
3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: 20th- and/or 21st-Century Literature.

008:177 Literature and Art
3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: 18th- and/or 19th-Century Literature, or 20th- and/or 21st-Century Literature. Same as 048:177.

008:178 Modern British Drama
3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: Modern British Literature and Culture. PERIOD: 18th- and/or 19th-Century Literature, or 20th- and/or 21st-Century Literature.

008:179 Literature and Society
3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: 20th- and/or 21st-Century Literature. Same as 048:179.

008:180 American Drama Before 1900
3 s.h.
American playwrights and plays before 1900. English majors may apply this course to the following area and/or period requirement. AREA: American Literature and Culture. PERIOD: 18th- and/or 19th-Century Literature.

008:182 Science Fiction
3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: 20th- and/or 21st-Century Literature.

008:183 Modern Drama
3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: Transnational Literature and Postcolonial Studies. PERIOD: 20th- and/or 21st-Century Literature.
008:186 African American Drama 3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: American Literature and Culture. PERIOD: 18th- and/or 19th-Century Literature, or 20th- and/or 21st-Century Literature. Same as 049:186, 129:186.

008:188 Prose by Women Writers 3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: 18th- and/or 19th-Century Literature, or 20th- and/or 21st-Century Literature. Same as 131:188.

008:189 Digital Cultures and Literacies 3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: 20th- and/or 21st-Century Literature.

008:190 Topics in Book History 3 s.h.
Authorship, publishing, and so forth within specific historical and cultural contexts. English majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: Early Literatures Through 17th Century, 18th- and/or 19th-Century Literature, or 20th- and/or 21st-Century Literature. Same as 108:186.

008:191 International Literature Today 1,3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: Transnational Literature and Culture. PERIOD: 20th- and/or 21st-Century Literature. Same as 181:191.

008:192 Interdisciplinary Studies 3 s.h.
Exploration of how readings of theory can be evaluated through discussions and readings in literature. English majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: 20th- and/or 21st-Century Literature.

008:193 Transcultural Modernism 3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: Transnational Literature and Postcolonial Studies. PERIOD: 20th- and/or 21st-Century Literature.

008:194 Introduction to Feminist Criticism 3 s.h.
Introduction to feminist interpretation of literature, feminist literature, feminist theories, and uses of literature in forming feminist politics. English majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: 20th- and/or 21st-Century Literature. Same as 131:194.

008:195 Modernist Women Writers 3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: Transnational Literature and Postcolonial Studies. PERIOD: 20th- and/or 21st-Century Literature.

008:196 American Novel Since 1945 3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: American Literature and Culture. PERIOD: 20th- and/or 21st-Century Literature.

008:197 American Drama Since 1900 3 s.h.
American playwrights and plays after 1900. English majors may apply this course to the following area and/or period requirement. AREA: American Literature and Culture. PERIOD: 20th- and/or 21st-Century Literature. Same as 049:117.

Nonfiction and Creative Writing
The following courses may be repeated; others may be repeated with consent of the instructor.

08C:023 Creative Writing
08C:097 Fiction Writing
08C:098 Poetry Writing
08C:101 Creative Writing for Business
08C:108 Creative Writing for New Media
08C:163 Undergraduate Writers’ Workshop: Fiction
08C:166 Undergraduate Writers’ Workshop: Poetry
08C:167 Undergraduate Writers’ Seminar
08C:195 Undergraduate Project in Creative Writing
08C:197 Novel Writing
Courses 08N:090 Intermediate Nonfiction Writing, 08N:120 Advanced Nonfiction Writing, and 08N:130 Special Readings in Nonfiction have prerequisites. Course 08N:150 Undergraduate Essay Workshop requires consent of instructor (see course description on ISIS).

Courses 08C:001 Creative Writing Studio Workshop and 08N:020 Introduction to Creative Nonfiction do not count toward the English major or minor.

08C:101 Creative Writing for Business
3 s.h.
Opportunity to broaden understanding of literature, improve writing, and enhance ability to approach business problems in a creative and inspired manner; close reading and creative writing exercises used to develop appreciation of the written word, improve ability to express thoughts and ideas, and become more conscious of the quality of students’ own written work. Requirements: rhetoric. Same as 145:101.

08C:107 Creative Writing for the Health Professions
3 s.h.

08C:108 Creative Writing for New Media
3 s.h.
Prepares creative writers for evolving marketplace of electronic text, media; experience writing in varied media such as the Internet, e-books, video games, mobile devices, emergent social narratives. Same as 145:108.

08C:110 Creative Writing for the Ecologically Aware: Stories in the Land
3 s.h.
How humans tether to their environment through stories; students write stories and through writing explore if there is a new tie to sustainable history. Same as 145:110.

08C:115 Creative Writing and Popular Culture
3 s.h.
Creative writing through the lens of popular culture; topics include television, film writing, adaptations, commercials, advertising, magazines, newspapers, comic books, song lyrics, billboards, and backs of cereal boxes. Same as 145:115.

08C:145 The Sentence: Strategies for Writing
3 s.h.
Writing dynamic, cogent, and grammatically correct sentences; effectively communicating ideas; writing with clarity and confidence; review of grammar and various types of sentences; building complexity by adding adverbial, subordinate, and connective clauses to simple sentences; how rhythm, syntax, and word order expand the meaning of a sentence; application and appreciation.
**08C:147 Creative Writing for the Socially Aware**  
3 s.h.

Reading short stories, essays, poems, and plays to examine seven subject areas (education; gender and sex roles; relationship and family dynamics; criminal behavior; race, ethnicity, and identity; terrorism and war; death and dying); varied writing assignments, including message boards posts, reading responses, critiques, arguments, research papers, creative writing, and public relations material; analyzing the effectiveness of an argument; supporting claims made in persuasive writing.

**08C:150 Writing as an Ethical Act**  
3 s.h.

Exploration of writing as an ethical act; examination of texts that aim to right ethical wrongs and cover ethical subjects (e.g., environment, social inequality, racism, war); best practices for literary advocacy and social/ethical persuasion/instruction; improving dexterity with written persuasion; argumentation, grant writing, nonprofit development, program proposals, and personal statements; application of study to the broader world.

**08C:151 Creative Writing for the Musician**  
3 s.h.

Better writing by focused appreciation of classical and popular music; musical forms and storytelling; music as a source of inspiration, performance of free-form writing exercises set to different soundtracks; what music can teach about language; scansion; methods for applying musical techniques in word form; how punctuation and grammar create rhythm; tone and diction used to create and modify dynamics of prose; multimedia project incorporating written, visual, and audio storytelling techniques.

**08C:160 The Art of Revision: Rewriting Prose for Clarity and Impact**  
3 s.h.

Writing and rewriting of short stories and essays; specific choices to help writing reach its full potential; examination of first drafts and making strategic or radical decisions on what needs to happen in subsequent drafts in order for writing to better match original intentions; students gain insight from peers on where first drafts are succeeding or falling short, and write second and third drafts of short stories and personal narratives; structural and aesthetic choices.

**08C:163 Undergraduate Writers’ Workshop: Fiction**  
arr.

English majors may apply this course to the following area and/or period requirement. AREA: Nonfiction and Creative Writing.

**08C:166 Undergraduate Writers’ Workshop: Poetry**  
arr.

English majors may apply this course to the following area and/or period requirement. AREA: Nonfiction and Creative Writing.

**08C:167 Undergraduate Writers’ Seminar**  
3 s.h.

Exploration of literature to develop substance and craft; class sessions designed around topic chosen by instructor; modeled after Writers’ Workshop graduate reading seminars. Requirements: completion of rhetoric requirement.

**08C:195 Undergraduate Project in Creative Writing**  
arr.

English majors may apply this course to the following area and/or period requirement. AREA: Nonfiction and Creative Writing.

**08C:197 Novel Writing**  
3 s.h.

Introduction to the process of writing a novel through focused lessons on character, perspective, plot, scene, and dialogue; organizing a longer work; creating notes and sections of a novel with progression towards completing a draft. Requirements: creative writing or fiction writing course.

**08C:198 Advanced Poetry Writing**  
3 s.h.

Writing poems, reading poetry by class members and established poets; workshop context. English majors may apply this course to the following area and/or period requirement. AREA: Nonfiction and Creative Writing. Prerequisites: 08C:098.

**08N:080 Nonfiction Writing**  
3 s.h.

Forms of nonfiction explored in workshop environment; experience in all stages of the writing process; portfolio. English majors may apply this course to the following area and/or period requirement. AREA: Nonfiction and Creative Writing.

<td>3 s.h.</td>
<td>The photo essay and the graphic memoir, two modes of nonfiction that have steadily increased in prominence and popularity; key texts in both genres (i.e., Dorothea Lange’s <em>American Exodus</em>, Marjane Satrapi’s <em>Persepolis</em>, or Art Spiegelman’s <em>Maus</em>); writing and producing photo essays and short graphic memoirs.</td>
</tr>
<tr>
<td>08N:148</td>
<td>Radio and Writing</td>
<td>3 s.h.</td>
<td>Writing with sound; introduction to radio essays and documentaries with focus on digital audio; analyze key radio works and essayists; produce voiceovers, record interviews, mix music, edit sound and spoken texts in making radio art.</td>
</tr>
</tbody>
</table>
08N:150 Undergraduate Essay Workshop 3 s.h.
Experience working on new nonfiction projects, drafting and preparing one piece throughout a semester; individualized work to promote understanding of and creation in genres of nonfiction writing. Requirements: undergraduate standing, successful completion of two 08N courses, and submission of manuscript.

08N:192 Dublin Writing Workshop 3 s.h.
Intensive writing workshops for aspiring creative writers; study abroad in Dublin, Ireland. English majors may apply this course to the following area and/or period requirement. AREA: Nonfiction and Creative Writing.

08N:199 Undergraduate Project in Nonfiction Writing arr.

Writers’ Seminars

8WS:120 Creative Writing Track Colloquium 3 s.h.
In-depth focus on works by and about visiting writers and literature that contextualizes their work; multiple genres; seminar. Requirements: English major and admission to Undergraduate Creative Writing track.

8WS:121 Writers’ Seminar: Fiction 2 s.h.
In-depth exploration and analysis of creative works in fiction. Requirements: English major and admission to Undergraduate Creative Writing track.

8WS:122 Writers’ Seminar: Poetry 2 s.h.
In-depth exploration and analysis of creative works in poetry. Requirements: English major and admission to Undergraduate Creative Writing track.

8WS:123 Writers’ Seminar: Nonfiction 2 s.h.
Rigorous exploration and analysis of a range of nonfiction creative works. Requirements: English major and admission to Undergraduate Creative Writing track.

8WS:124 Writers’ Seminar: Literary Translation 2 s.h.
Rigorous exploration and analysis of a range of creative works in literary translation. Requirements: English major and admission to Undergraduate Creative Writing track.

8WS:125 Writers’ Seminar: Playwriting 2 s.h.
Rigorous exploration and analysis of a range of creative works in drama. Corequisites: 8WS:120. Requirements: admission to Undergraduate Creative Writing track.

8WS:170 Creative Writing Track: Advanced Topics 3 s.h.
Advanced writing and reading for undergraduate creative writing track; topics vary. Requirements: admission to Undergraduate Creative Writing track.

Special Topics

These courses do not fulfill area or period requirements for the English major. They may be used to earn elective credit in the major.

008:029 First-Year Seminar 1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.

008:159 African Literature Today 3 s.h.
Contemporary written and oral African literary texts, literary theories relevant to study of African literatures. Same as 048:159, 187:159.

008:199 Special Project for Undergraduates arr.

Honors

008:098 Seminar 3 s.h.
English majors may apply this course to varied area and/or period requirements. Requirements: English major g.p.a. of 3.33.
### Colleges and Other Academic Units

#### 008:120 Honors Thesis Workshop
3 s.h.
Prerequisites: 008:098. Requirements: English major g.p.a. of 3.33.

#### 008:198 Undergraduate Honors Project
1-3 s.h.
Requirements: admission to English honors program.

---

### Literature for Graduate Students

Department of English graduate courses are repeatable with the written approval of the department's director of graduate studies.

Professional Training
The following courses offer theoretical and practical training for those who plan to teach.

08P:182 Language and Learning 2-3 s.h.
How language reflects and constructs learners’ identities and cultures; readings related to oral and written language, native and second language development, linguistic diversity; discussion of the relationship of language theory to schools of language instruction. English majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. Same as 07S:182.
08P:190 Methods: Secondary English
Organizational techniques, methods, materials for teaching high school English; experience in simulated teaching situations during laboratory sessions, integrated with lectures and discussions. Prerequisites: 07S:114. Same as 07S:115.

08P:198 Reading and Teaching Adolescent Literature
Reading and evaluation of literature suitable for junior and senior high school students. English majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. Same as 07S:193.

08P:204 Literature for Children II
Current theory, research, and practice in reading and responding to children’s literature; genre and topic vary. Same as 07E:204.

08P:300 Introduction to Qualitative Methods in Literacy Research
Conceptual and practical exploration of qualitative research design methods, including data collection, analysis, and reporting; understanding proposal writing. Same as 07S:370.

08P:405 M.A. Seminar: English Education
Significant developments in English education; primary and collateral readings. Same as 07S:315.

08P:425 Ph.D. Seminar in Language, Literacy, and Culture
Historical, recent research and theory in literacy education; topics vary. Same as 07S:415.

Nonfiction Writing
Courses 08N:250 Forms of Nonfiction, 08N:255 Forms of the Essay, 08N:262 Readings in Nonfiction, 08N:350 Essay Writing Workshop, and 08N:355 Nonfiction Writing Workshop may be repeated. Others may be repeated with consent of the instructor and the director of graduate studies.

Practice in Writing
These courses give intensive attention to composition and exposition and to formal and thematic problems, both in the meditative essay and in extended works of nonfiction.

08N:250 Forms of Nonfiction

08N:255 Forms of the Essay

08N:340 Writing for Learned Journals
Help for graduate students in bringing written work to publishable form; analysis of target journals’ audiences and interests; submission, response to criticism. Same as 160:300, 650:300.

08N:350 Essay Writing Workshop

08N:355 Nonfiction Writing Workshop

Theory and Practice of Writing
These courses combine theory and analysis of nonfiction writing with practical experimentation in writing. They are intended for people who want to practice, criticize, and/or teach nonfiction writing.

08N:202 Teaching Nonfiction
Theories and practices of teaching nonfiction writing; writing workshop approaches, strategies to encourage response and revision, connections between reading and writing, diversity of form, language, and assessment.

08N:262 Readings in Nonfiction

08N:270 Twenty-first-Century Nonfiction

08N:365 Overseas Writing Workshop

08N:375 Teaching in a Writing Center
Seminar/practicum to prepare graduate students to teach in the University of Iowa Writing Center or similar settings; seminar component on writing and reading processes, tutoring strategies, English-as-a-second-language issues; practicum experience tutoring in the Writing Center. Same as 010:375.

Independent Study
08N:550 Special Project in Nonfiction Writing
arr.

arr.

Creative Writing
All may be repeated.

Workshops and Seminars
Open only to Iowa Writers’ Workshop students or to others with consent of instructor.

08C:251 Fiction Workshop
arr.

08C:252 Poetry Workshop
arr.

08C:270 Form of Fiction
3 s.h.

08C:275 Form of Poetry
3 s.h.

08C:297 Fiction Writing
3 s.h.
Reading and discussion of published stories and those written by class members, with the aim of improving writing through careful reading and reflection, spirited discussion, and written comments. Repeatable.

08C:298 Poetry Writing
3 s.h.
Careful writing and reading of poems by students as well as by established poets; thorough discussion in a supportive context. Repeatable.

08C:490 Seminar: Problems in Modern Fiction
arr.

08C:495 Seminar: Problems in Modern Poetry
arr.

Independent Study
08C:555 Graduate Project in Creative Writing
arr.

08C:590 M.F.A. Thesis
arr.

Translation Studies
The undergraduate courses below do not fulfill area or period requirements for the English major but may be used to earn elective credit for the major.

08W:079 Undergraduate Translation Workshop
3 s.h.
Translation exercises, discussion of translation works in progress; alternative strategies for translation projects. Requirements: working knowledge of a language other than English. Same as 048:079.

08W:260 Translation Workshop
3 s.h.
Requirements: at least one foreign language. Same as 048:260, 181:260.
English as a Second Language

Director
Maureen Burke

Lecturers
Craig Dresser, Jennifer Gerbyshak, Susan Isham, Katherine Kasten, Melissa Meisterheim

Web site: http://www.uiowa.edu/~iiepesl/ESL/eslindex.html

The University of Iowa offers English as a Second Language (ESL) instruction in three distinct, but related, programs: ESL credit classes, the Iowa Intensive English Program (IIEP), and the Teaching Assistant Preparation in English program (TAPE).

These programs meet the needs of students whose first language is not English. ESL credit classes help students raise their English proficiency so they can complete a degree successfully. IIEP provides intensive instruction for students who must raise their English proficiency to gain admission to a university or college. TAPE helps students improve their oral competence in English so they may assume classroom teaching responsibilities.

ESL Credit Classes

English as a Second Language credit classes bridge the gap between full-time language instruction and full-time academic work, serving students who score a minimum of 530-599 (paper-based) or 80-100 (Internet-based) on the Test of English as a Foreign Language (TOEFL). ESL courses are offered to help students increase their proficiency in four skill areas: reading, writing, speaking, and listening. Courses also are offered in grammar and pronunciation. Each course offers 3 s.h. of credit, which undergraduates may count as elective credit toward graduation. Courses are taught by teaching assistants pursuing advanced degrees in linguistics.

Acceptable scores on the TOEFL can change from semester to semester. Check with the Office of Admissions for more information.

Courses taken to meet the College of Liberal Arts and Sciences English proficiency requirement must be completed with a grade of C or higher. If a student earns a grade of C- or lower in an ESL course, the course must be retaken in order for the student to fulfill the ESL course requirement. An ESL course must be taken for a letter grade and may not be taken P/N or S/U. Once enrolled in an ESL course, a student is not allowed to drop the course. A student held for ESL courses may not enroll in a rhetoric course until the ESL requirement is completed.

Visit the ESL Credit Classes web site for more information.

Iowa Intensive English Program (IIEP)

The Iowa Intensive English Program (IIEP) primarily serves students on conditional admission and persons who have not yet been admitted to the University and who score below 530 (paper-based) or 71 (Internet-based) on the Test of English as a Foreign Language (TOEFL). The program welcomes international students preparing to enter universities and colleges as well as other adults who want to improve their English skills.

IIEP offers intensive English instruction and a cultural, social, and academic orientation to the United States. Instruction emphasizes proficiency in spoken and written English, which is crucial to college and university work. Grammar and the basic language skills of writing, reading, listening comprehension, and speaking are taught each day at all levels, from beginning through advanced. Instruction is by full-time professional ESL instructors.

Each IIEP student receives 20 hours of classroom instruction each week plus individual work in the language laboratory. IIEP students have full access to all University facilities. Field trips and cultural and social experiences are integral parts of the program.

International students admitted to the IIEP receive a certificate of eligibility (Form I-20), which enables them to apply for a student visa at the nearest U.S. consulate or embassy. Application materials are available from the ESL Programs Office and on the Iowa Intensive English Program web site.

Teaching Assistant Preparation in English (TAPE)

The Teaching Assistant Preparation in English program (TAPE) is designed for graduate students whose first language is not English, who need additional work on English communication, and who will hold teaching assistantships while enrolled at The University of Iowa. Only students who need the program and who have sufficient competence in English to profit from it are eligible. TAPE courses are open to graduate students who have been evaluated for TA certification and to others if space is available. Students are taught by full-time professional ESL instructors.
Courses

ESL Credit Classes

The following courses are for students whose first language is not English. Courses taken to meet the College of Liberal Arts and Sciences English proficiency requirement may not be taken P/N. English as a Second Language (ESL) courses may not be taken S/U. In order to enroll in ESL courses, undergraduates must score 530 (paper-based) or 80 (Internet-based) or higher on the Test of English as a Foreign Language (TOEFL), or the equivalent; graduate students must score 550 (paper-based) or 81 (Internet-based) or higher on TOEFL, or the equivalent. Consent of ESL director is required for all courses.

Iowa Intensive English Program (IIEP)

These courses are for students whose first language is not English. The Iowa Intensive English Program primarily serves students on conditional admission, those who have not yet been admitted to the University, and those who score below 530 (paper-based), 197 (computer-based), or 71
212:002 Iowa Intensive English: Communication Skills for Professionals
Listening and speaking skills for international professionals; conversational fluency, language for professional interactions (e.g., discussions and presentations).

212:010 TOEFL Prep 0 s.h.
Development of students’ test-taking skills for the TOEFL examination; emphasis on listening comprehension, grammar, and reading comprehension; test taking skills developed through exercises and practice TOEFL tests. Requirements: IIEP high-intermediate or advanced-level standing.

212:011 Iowa Intensive English Communication Skills: Beginning 0 s.h.
Focus on aural comprehension, spoken English, and American attitudes, values, and customs; practice giving and receiving information; learn language more quickly in a comfortable, familiar environment; understand and accept cultural differences; gain positive feelings toward American culture; provides link between classroom and community; interview Americans, class discussions.

212:012 Iowa Intensive English Communication Skills: Low Intermediate 0 s.h.
Focus on aural comprehension, spoken English, and American attitudes, values, and customs; practice giving and receiving information; learn language more quickly in a comfortable, familiar environment; understand and accept cultural differences; gain positive feelings toward American culture; provides link between classroom and community; interview Americans, class discussions.

212:013 Iowa Intensive English Communication Skills: Intermediate 0 s.h.
Focus on aural comprehension, spoken English, and American attitudes, values, and customs; practice giving and receiving information; learn language more quickly in a comfortable, familiar environment; understand and accept cultural differences; gain positive feelings toward American culture; provides link between classroom and community; interview Americans, class discussions.

212:014 Iowa Intensive English Communication Skills: High Intermediate 0 s.h.
Focus on aural comprehension, spoken English, and American attitudes, values, and customs; practice giving and receiving information; learn language more quickly in a comfortable, familiar environment; understand and accept cultural differences; gain positive feelings toward American culture; provides link between classroom and community; interview Americans, class discussions.

212:015 Iowa Intensive English Communication Skills: Advanced 0 s.h.
Focus on aural comprehension, spoken English, and American attitudes, values, and customs; practice giving and receiving information; learn language more quickly in a comfortable, familiar environment; understand and accept cultural differences; gain positive feelings toward American culture; provides link between classroom and community; interview Americans, class discussions.

212:031 Iowa Intensive English Reading: Beginning 0 s.h.
Comprehensive reading curriculum designed to help students become effective readers; variety of skills and opportunities to practice many strategies while reading different kinds of written material (i.e., newspapers, magazines, schedules, documents, textbooks, correspondence, literature); emphasis on learning by doing; eclectic teaching approach.
212:032 Iowa Intensive English
Reading: Low Intermediate
0 s.h.
Comprehensive reading curriculum designed to help students become effective readers; variety of skills and opportunities to practice many strategies while reading different kinds of written material (i.e., newspapers, magazines, schedules, documents, textbooks, correspondence, literature); emphasis on learning by doing; eclectic teaching approach.

212:033 Iowa Intensive English
Reading: Intermediate
0 s.h.
Comprehensive reading curriculum designed to help students become effective readers; variety of skills and opportunities to practice many strategies while reading different kinds of written material (i.e., newspapers, magazines, schedules, documents, textbooks, correspondence, literature); emphasis on learning by doing; eclectic teaching approach.

212:034 Iowa Intensive English
Reading: High Intermediate
0 s.h.
Comprehensive reading curriculum designed to help students become effective readers; variety of skills and opportunities to practice many strategies while reading different kinds of written material (i.e., newspapers, magazines, schedules, documents, textbooks, correspondence, literature); emphasis on learning by doing; eclectic teaching approach.

212:035 Iowa Intensive English
Reading: Advanced
0 s.h.
Comprehensive reading curriculum designed to help students become effective readers; variety of skills and opportunities to practice many strategies while reading different kinds of written material (i.e., newspapers, magazines, schedules, documents, textbooks, correspondence, literature); emphasis on learning by doing; eclectic teaching approach.

212:041 Iowa Intensive English
Grammar: Beginning
0 s.h.
Correct use of the grammatical structures of English; learning grammar in a systematic and logical way; extensive practice to meet the goal of communicative competence in English.

212:042 Iowa Intensive English
Grammar: Low Intermediate
0 s.h.
Correct use of the grammatical structures of English; learning grammar in a systematic and logical way; extensive practice to meet the goal of communicative competence in English.

212:043 Iowa Intensive English
Grammar: Intermediate
0 s.h.
Correct use of the grammatical structures of English; learning grammar in a systematic and logical way; extensive practice to meet the goal of communicative competence in English.

212:044 Iowa Intensive English
Grammar: High Intermediate
0 s.h.
Correct use of the grammatical structures of English; learning grammar in a systematic and logical way; extensive practice to meet the goal of communicative competence in English.

212:045 Iowa Intensive English
Grammar: Advanced
0 s.h.
Correct use of the grammatical structures of English; learning grammar in a systematic and logical way; extensive practice to meet the goal of communicative competence in English.

212:051 Iowa Intensive English
Writing: Beginning
0 s.h.
Personal and formal writing; experiment with varied forms of writing, from journal entries and letters to critiques, essay examinations, and short papers that involve use of the library; students read and respond to each other’s writing, and in the process become more aware of their own strengths and weaknesses as writers.

212:052 Iowa Intensive English
Writing: Low Intermediate
0 s.h.
Personal and formal writing; experiment with varied forms of writing, from journal entries and letters to critiques, essay examinations, and short papers that involve use of the library; students read and respond to each other’s writing, and in the process become more aware of their own strengths and weaknesses as writers.
212:053 Iowa Intensive English Writing: Intermediate 0 s.h.
Personal and formal writing; experiment with varied forms of writing, from journal entries and letters to critiques, essay examinations, and short papers that involve use of the library; students read and respond to each other’s writing, and in the process become more aware of their own strengths and weaknesses as writers.

212:054 Iowa Intensive English Writing: High Intermediate 0 s.h.
Personal and formal writing; varied forms of writing, from journal entries and letters to critiques, essay examinations, and short papers that involve use of the library; students read and respond to each other’s writing, and in the process become more aware of their own strengths and weaknesses as writers.

212:055 Iowa Intensive English Writing: Advanced 0 s.h.
Personal and formal writing; experiment with varied forms of writing, from journal entries and letters to critiques, essay examinations, and short papers that involve use of the library; students read and respond to each other’s writing, and in the process become more aware of their own strengths and weaknesses as writers.

212:008 TA Preparation in English: Presentation Skills 0 s.h.
Intelligibility of speech and clarity of expression in presenting and responding; practice in videotaped lectures.

212:009 TA Preparation in English: Orientation 0 s.h.
Student expectations, typical teacher/student relationships, basic classroom management at the University.

212:006 TA Preparation in English: Fluency Building 0 s.h.
Pronunciation, fluency building, knowledge of the University of Iowa classroom.

212:007 TA Preparation in English: Pronunciation 0 s.h.
Intensive work toward maximum intelligibility; emphasis on stress, timing, intonation.

Teaching Assistant Preparation in English (TAPE)
The TAPE program is designed for prospective teaching assistants whose first language is not English and who need additional work on English communication skills. Entry to the program is determined by a test.

212:006 TA Preparation in English: Fluency Building 0 s.h.
Pronunciation, fluency building, knowledge of the University of Iowa classroom.

Advisory committee
E. Arthur Bettis III, Christopher A. Brochu, Jeffrey A. Dorale, Vicki H. Grassian, Stephen D. Hendrix, George P. Malanson, William C. McClelland, Michelle M. Scherer

Affiliated faculty
Jonathan M. Adrain (Geoscience), Marc P. Armstrong (Geography), David A. Bennett (Geoscience), E. Arthur Bettis III (Geoscience), Christopher A. Brochu (Geoscience), Ann F. Budd (Geoscience), Gregory R. Carmichael (Chemical and Biochemical Engineering), Josep Comeron (Biology), Jeffrey Dorale (Geoscience), Tori M. Forbes (Chemistry), C. Thomas Foster Jr. (Geoscience), Jane A. Gilotti (Geoscience), Vicki H. Grassian (Chemistry), Philip H. Heckel (Geoscience), Stephen D. Hendrix (Biology), Sarah C. Larsen (Chemistry), Johnna Leddy (Chemistry), Marc A. Linderman (Geography), John Logsdon (Biology), Bryant F. MacAllister (Biology), Leonard R. MacGillivray (Chemistry), George P. Malanson (Geography), William C. McClelland (Geoscience), Maurine Neiman (Biological), David W. Peate (Geoscience), R. Rajagopal (Geography), Mark K. Reagan (Geoscience), Michelle M. Scherer (Civil and Environmental Engineering), Jerald L. Schnoor (Civil and Environmental Engineering), Holmes A. Semken (Geoscience), Hallie J. Sims (Geoscience), Nelson Ting (Anthropology), Ingrid Ukstins Peate (Geoscience), Larry J. Weber (Civil and Environmental Engineering), Frank Weirich (Geoscience), You-kuan Zhang (Geoscience)

Undergraduate degrees: B.S., BA in Environmental Sciences
Undergraduate nondegree program: Minor in Environmental Sciences
Web site: http://www.uiowa.edu/~envsci

Hands-on field experience is a crucial component of the program. Students are strongly encouraged to engage in research and study abroad.

The Department of Geoscience is the administrative home for the Environmental Sciences Program.

Undergraduate Programs

- Major in environmental sciences (Bachelor of Arts, Bachelor of Science)
- Minor in environmental sciences

Bachelor of Science

The Bachelor of Science with a major in environmental sciences requires a minimum of 120 s.h., including 80-85 s.h. of work for the major. Students must complete the College of Liberal Arts and Sciences General Education Program (p. 381); courses required for the major in environmental sciences also may be used to satisfy General Education Program requirements.

Bachelor of Science students majoring in environmental sciences must complete requirements in three areas: the science and mathematics foundation, the environmental sciences foundation, and one of four environmental sciences tracks. Each student is assigned an advisor who specializes in his or her track.

The science and mathematics foundation develops fundamental skills and comprehension in biology, chemistry, mathematics, and statistics. The environmental sciences foundation includes an introductory course in environmental science and additional courses that focus on remote sensing techniques, design and use of geographic information technologies, the geomorphic and environmental processes that shape the earth's surface, and ecological factors that influence the distribution and abundance of organisms.

Each of the program's four tracks focuses on areas of specialization within environmental sciences:

- biosciences (green) track--biological systems and ecological approaches;
- chemical sciences (yellow) track--environmental systems and chemistry;
- geosciences (brown) track--earth materials and surficial geologic processes; and
- hydrosciences (blue) track--hydrogeology and hydrogeologic systems, and water chemistry.

The tracks aim to prepare scientists who can tackle problems that require particular areas of
expertise, and to help students develop the skills needed for future employment or graduate study.

The environmental sciences major for the Bachelor of Science requires the following course work.

**SCIENCE AND MATHEMATICS FOUNDATION**

Students must complete at least 31 s.h. of course work for the science and mathematics foundation, as follows.

All of these:

- 002:010-002:011 Principles of Biology I-II 8 s.h.
- 004:011-004:012 Principles of Chemistry I-II 8 s.h.
- 012:005 Introduction to Geology 4 s.h.
- 22M:025-22M:026 Calculus I-II 8 s.h.

One of these:

- 22S:039 Probability and Statistics for the Engineering and Physical Sciences 3 s.h.
- 22S:101 Biostatistics 3 s.h.
- 22S:105 Statistical Methods and Computing 3 s.h.

**ENVIRONMENTAL SCIENCES FOUNDATION**

Students must complete at least 19 s.h. of course work for the environmental sciences foundation, as follows.

All of these:

- 159:008 Introduction to Environmental Science 4 s.h.
- 159:100 Environmental Sciences Seminar (taken twice; section 1 for 0 s.h. and section 2 for 1 s.h.) 1 s.h.
- 159:102 Earth Surface Processes 3 s.h.
- 159:110 Introduction to Applied Remote Sensing 4 s.h.
- 159:134 Ecology 4 s.h.
- 044:005 Foundations of GIS 3 s.h.

**Tracks for the Bachelor of Science**

Bachelor of Science students majoring in environmental sciences must choose one of the following four tracks. Each track includes required general sciences courses, track foundation courses, field study courses, and elective courses.

**BIOSCIENCES (GREEN) TRACK**

The environmental biosciences track provides the essential skills for entry-level positions that require a good knowledge of biotic systems and the ability to inventory biologic resources. The track’s aim is to produce scientists who are capable of tackling environmental problems in which links and interactions with life sciences are crucial and in which a substantial knowledge of biological/ecological sciences is required. The track also provides a strong foundation for graduate or professional training in disciplines such as ecology, wildlife management, and natural resource management.

Students must complete at least 32 s.h. of environmental biosciences track course work, including one 4 s.h. field course at Iowa Lakeside Laboratory.

**General Sciences**

- 004:121 Organic Chemistry I 3 s.h.

Students are encouraged to take at least one semester of physics.

**Environmental Biosciences Foundation**

Both of these:

- 002:128 Fundamental Genetics 4 s.h.
- 002:131 Evolution 4 s.h.

At least 7 s.h. from these:

- 002:108 Vertebrate Zoology 4 s.h.
- 012:107 Marine Ecosystems and Conservation 3 s.h.
- 012:122 Evolution of the Vertebrates 3 s.h.
- 012:170 Evolution of Ecosystems 3 s.h.
- 012:171 Evolution of Plants 3 s.h.
- 044:103 Biogeography 3 s.h.
- 00L:105 Plant Taxonomy 4 s.h.
- 00L:115 Field Mycology 4 s.h.
- 00L:117 Ecology and Systematics of Diatoms 4 s.h.
- 00L:128 Fish Ecology 4 s.h.
- 00L:129 Vertebrate Ecology and Evolution 4 s.h.

**Environmental Biosciences Field Study**

At least 4 s.h. from these Iowa Lakeside Laboratory courses:

- 00L:103 Aquatic Ecology 4 s.h.
- 00L:105 Plant Taxonomy 4 s.h.
- 00L:109 Freshwater Algae 4 s.h.
- 00L:115 Field Mycology 4 s.h.
- 00L:117 Ecology and Systematics of Diatoms 4 s.h.
- 00L:121 Plant Ecology 4 s.h.
- 00L:122 Prairie Ecology 4 s.h.
- 00L:126 Ornithology 4 s.h.
- 00L:128 Fish Ecology 4 s.h.
Environmental Biosciences Electives

Students must complete at least 10 s.h. of elective course work, with at least 6 s.h. from the following list. An additional field study course (see "Environmental Biosciences Field Study" above) may be used for 4 s.h. of the 10 s.h. of elective course work. A maximum of one policy course may be included in the 10 s.h. of electives (06E:133 Environmental and Natural Resource Economics, 044:019 Contemporary Environmental Issues, 044:122 Environmental Conservation in the United States, and 044:125 Environmental Impact Analysis).

002:124 Animal Physiology 3 s.h.
002:143 Animal Behavior 4 s.h.
002:162 Population Genetics and Molecular Evolution 3 s.h.
002:196 Honors Investigations arr.
002:199 Introduction to Research 3 s.h.
004:111 Analytical Chemistry I 3 s.h.
004:112 Analytical Chemistry II 3 s.h.
06E:133 Environmental and Natural Resource Economics 3 s.h.
012:108 Introduction to Oceanography 2 s.h.
012:121 Principles of Paleontology 3 s.h.
225:148 Intermediate Statistical Methods 4 s.h.
044:019 Contemporary Environmental Issues 3 s.h.
044:101 Climatology 3 s.h.
044:122 Environmental Conservation in the United States 3 s.h.
044:123 Landscape Ecology 3 s.h.
044:125 Environmental Impact Analysis 4 s.h.
044:126 Wetlands: Function, Geography, and Management 3 s.h.
213:152 Primate Conservation Biology 3 s.h.

CHEMICAL SCIENCES (YELLOW) TRACK

The environmental chemical sciences track provides the essential skills for entry-level positions that require a basic understanding of chemical principles and a working knowledge of basic chemical concepts as applied in the environment. The track’s aim is to produce scientists who are capable of tackling environmental problems in which chemical and molecular processes play an important role. The track also provides a strong foundation for graduate or professional training in environmental chemistry.

Students must complete at least 35 s.h. of environmental chemical sciences track course work.

General Sciences

One of these sequences:

029:011-029:012 College Physics I-II 8 s.h.
029:081-029:082 Introductory Physics I-II 8 s.h.

Environmental Chemical Sciences Foundation

004:111-004:112 Analytical Chemistry I-II 6 s.h.

One of these sequences:

004:121-004:122 Organic Chemistry I-II 6 s.h.
004:123-004:124 Organic Chemistry I for Majors - Organic Chemistry II for Majors

One of these:

004:131 Physical Chemistry I 3 s.h.
004:132 Physical Chemistry II 3 s.h.

Chemical Sciences Lab and Field Study

Both of these:

004:141 Organic Chemistry Laboratory 3 s.h.
004:143 Analytical Measurements 3 s.h.

Environmental Chemical Sciences Electives

Students must complete at least 6 s.h. of elective courses, chosen from the following list. (Students may petition the chemistry department’s environmental sciences advisor to use appropriate 100- and 200-level courses taught in the chemistry department as electives.) A maximum of one policy course may be included in the 6 s.h. of electives (06E:133 Environmental and Natural Resource Economics, 044:019 Contemporary Environmental Issues, 044:122 Environmental Conservation in the United States, and 044:125 Environmental Impact Analysis).

004:125 Inorganic Chemistry 2 s.h.
004:162 Undergraduate Research 1-3 s.h.
004:173 Atmospheric and Environmental Chemistry 3 s.h.
06E:133 Environmental and Natural Resource Economics 3 s.h.
GEOSCIENCES (BROWN) TRACK

The environmental geosciences track provides the essential skills for entry-level positions that require a basic understanding of geologic principles and a working knowledge of basic geologic concepts applied in the environmental industry. The track’s aim is to produce scientists who are capable of tackling environmental problems in which earth materials and surficial geologic processes are of primary importance. The track also lays a strong foundation for graduate study in environmental geology, engineering geology, and natural hazards assessment.

Students must complete at least 30 s.h. of environmental geosciences track course work.

General Sciences

029:008 Basic Physics 4 s.h.

Students are strongly encouraged to take additional course work in physics.

Environmental Geosciences Foundation

All of these:

012:041 Mineralogy 4 s.h.
012:130 Sedimentary Geology 3 s.h.
012:132 Structural Geology 4 s.h.
012:136 Soil Genesis and Geomorphology 3 s.h.
012:179 Engineering Geology 3 s.h.

Environmental Geosciences Field Study

One of these:

012:149 Elements of Geochemistry 3 s.h.
012:152 Isotope Geochemistry 3 s.h.
044:019 Contemporary Environmental Issues 3 s.h.
044:101 Climatology 3 s.h.
044:122 Environmental Conservation in the United States 3 s.h.
044:125 Environmental Impact Analysis 4 s.h.
053:152 Environmental Chemistry I 3 s.h.
053:153 Environmental Chemistry Laboratory 3 s.h.
099:110 Biochemistry 3 s.h.

004:131 Physical Chemistry I (if not taken as a foundation course) 3 s.h.

or

004:132 Physical Chemistry II (if not taken as a foundation course) 3 s.h.

Environmental Geosciences Electives

Students must complete at least 6 s.h. of elective courses, chosen from the following list. A maximum of one policy course may be included in the 6 s.h. of electives (06E:133 Environmental and Natural Resource Economics, 044:019 Contemporary Environmental Issues, 044:122 Environmental Conservation in the United States, and 044:125 Environmental Impact Analysis).

06E:133 Environmental and Natural Resource Economics 3 s.h.
012:108 Introduction to Oceanography 2 s.h.
012:114 Energy and the Environment 3 s.h.
012:119 Directed Study arr.
012:130 Sedimentary Geology 3 s.h.
012:138 Fluvial Geomorphology 3 s.h.
012:139 Integrated Watershed Analysis 3 s.h.
012:140 Natural Disasters 3 s.h.
012:149 Elements of Geochemistry 3 s.h.
012:150 Igneous and Metamorphic Petrology 4 s.h.
012:152 Isotope Geochemistry 3 s.h.
012:166 Hydrogeology 3 s.h.
012:172 Glacial and Pleistocene Geology 3 s.h.
012:178 Applied Geostatistics 3 s.h.
012:180 Survey of Geophysical Methods 3 s.h.
012:191 Geotectonics 3 s.h.
044:019 Contemporary Environmental Issues 3 s.h.
044:101 Climatology 3 s.h.
044:122 Environmental Conservation in the United States 3 s.h.
044:125 Environmental Impact Analysis 4 s.h.
053:050 Natural Environmental Systems 3 s.h.
053:158 Solid and Hazardous Wastes 3 s.h.

HYDROSCIENCES (BLUE) TRACK

The environmental hydrosciences track provides the essential skills for entry-level positions that require a basic understanding of geologic principles and a working knowledge of hydrogeology and hydrogeochemistry. The track’s aim is to produce scientists who are capable of tackling environmental problems that emphasize hydrogeologic systems and for which substantial knowledge of hydrogeology and water chemistry are essential. The track also
lays a strong foundation for graduate education in hydrogeology, hydrology, geochemistry, and aqueous chemistry.

Students must complete at least 34 s.h. of environmental hydrosciences track course work.

**General Sciences**

029:011-029:012 College Physics I-II 8 s.h.

**Environmental Hydrosciences Foundation**

Both of these:

- 012:166 Hydrogeology 3 s.h.
- 012:179 Engineering Geology 3 s.h.

One of these:

- 012:138 Fluvial Geomorphology 3 s.h.
- 012:139 Integrated Watershed Analysis 3 s.h.

One of these:

- 012:149 Elements of Geochemistry 3 s.h.
- 053:152 Environmental Chemistry I 3 s.h.

**Environmental Hydrosciences Field Study**

One of these:

- 044:180 Field Methods in Physical Geography 3 s.h.
- 00L:142 Watershed Hydrology and Surficial Processes 4 s.h.

**Environmental Hydrosciences Electives**

Students must complete at least 11 s.h. of elective courses, chosen from the following list. A maximum of one policy course may be included in the 11 s.h. of electives (06E:133 Environmental and Natural Resource Economics, 044:019 Contemporary Environmental Issues, 044:122 Environmental Conservation in the United States and 044:125 Environmental Impact Analysis).

- 06E:133 Environmental and Natural Resource Economics 3 s.h.
- 012:108 Introduction to Oceanography 2 s.h.
- 012:119 Directed Study arr.
- 012:130 Sedimentary Geology 3 s.h.
- 012:178 Applied Geostatistics 3 s.h.
- 012:180 Survey of Geophysical Methods 3 s.h.
- 012:184 Groundwater Modeling 3 s.h.
- 044:019 Contemporary Environmental Issues 3 s.h.
- 044:101 Climatology 3 s.h.
- 044:122 Environmental Conservation in the United States 3 s.h.
- 044:125 Environmental Impact Analysis 4 s.h.
- 044:126 Wetlands: Function, Geography, and Management 3 s.h.
- 053:050 Natural Environmental Systems 3 s.h.
- 053:071 Principles of Hydraulics and Hydrology 3 s.h.
- 053:152 Environmental Chemistry I 3 s.h.
- 053:153 Environmental Chemistry Laboratory 3 s.h.
- 053:154 Environmental Microbiology 3 s.h.

**Bachelor of Arts**

The Bachelor of Arts with a major in environmental sciences requires a minimum of 120 s.h., including 61-67 s.h. of work for the major. Students must complete the College of Liberal Arts and Sciences General Education Program (p. 381); courses required for the major in environmental sciences also may be used to satisfy General Education Program requirements.

Bachelor of Arts students majoring in environmental sciences complete requirements in four areas: the science and mathematics foundation, the environmental sciences foundation, environmental sciences field study, and environmental sciences track courses.

The science and mathematics foundation develops fundamental skills and comprehension in biology, chemistry, geology, mathematics, and statistics. The environmental sciences foundation includes an introductory course in environmental science and additional courses that focus on the geomorphic and environmental processes that shape the Earth’s surface, the ecological factors that influence the distribution and abundance of organisms, and a choice of one course that deals with remote sensing techniques or with the use of geographic information technologies. The environmental sciences field study gives students hands-on experience with methods of analysis and interpretation of natural systems/organisms.

Each of the program’s four tracks focuses on areas of specialization within environmental sciences:

- biosciences (green) track—biological systems and ecological approaches;
- chemical sciences (yellow) track—environmental systems and chemistry;
- geosciences (brown) track—earth materials and surficial geologic processes; and
- hydrosciences (blue) track—hydrogeology and hydrogeologic systems, and water chemistry.
Students select one course from each of three of the four tracks in order to develop breadth of understanding and skill in these areas.

The environmental sciences major for the Bachelor of Arts requires the following course work.

**SCIENCE AND MATHEMATICS FOUNDATION**

Students must complete at least 31 s.h. of course work for the sciences and mathematics foundation, as follows.

All of these:

- 002:010 Principles of Biology I 4 s.h.
- 002:011 Principles of Biology II 4 s.h.
- 004:011 Principles of Chemistry I 4 s.h.
- 004:012 Principles of Chemistry II 4 s.h.
- 012:005 Introduction to Geology 4 s.h.

First semester math and calculus—one of these:

- 22M:015 Mathematics for the Biological Sciences 4 s.h.
- 22M:025 Calculus I 4 s.h.

Second semester math and calculus—one of these:

- 22M:016 Calculus for the Biological Sciences 4 s.h.
- 22M:026 Calculus II 4 s.h.

One semester of statistics—one of these:

- 22S:039 Probability and Statistics for the Engineering and Physical Sciences 3 s.h.
- 22S:101 Biostatistics 3 s.h.
- 22S:105 Statistical Methods and Computing 3 s.h.

**ENVIRONMENTAL SCIENCES FOUNDATION**

Students must complete at least 18-20 s.h. of course work for the environmental sciences foundation, as follows.

All of these:

- 159:008 Introduction to Environmental Science 4 s.h.
- 159:100 Environmental Sciences Seminar (taken twice; section 1 for 0 s.h. and section 2 for 1 s.h.) 1 s.h.
- 159:102 Earth Surface Processes 3 s.h.
- 159:134 Ecology 3-4 s.h.

One of these:

- 044:005 Foundations of GIS 3 s.h.
- 044:105 Introduction to Environmental Remote Sensing 3 s.h.
- 159:110 Introduction to Applied Remote Sensing 4 s.h.

One of these:

- 06E:133 Environmental and Natural Resource Economics 3 s.h.
- 044:019 Contemporary Environmental Issues 3 s.h.
- 044:030 The Global Economy 3 s.h.
- 044:125 Environmental Impact Analysis 4 s.h.
- 044:127 Environmental Quality: Science, Technology, and Policy 3 s.h.
- 044:177 Environmental Justice 3 s.h.
- 044:194 Geographic Perspectives on Development 3 s.h.
- 113:139 Religion and Environmental Ethics 3 s.h.

**ENVIRONMENTAL SCIENCES FIELD STUDY**

Students must complete at least one field study course (at least 3 s.h.) chosen from the following.

- 012:112 Geologic Field Methods 3 s.h.
- 044:180 Field Methods in Physical Geography 2-4 s.h.
- 053:103 Water Quality 3 s.h.
- 00L:103 Aquatic Ecology 4 s.h.
- 00L:105 Plant Taxonomy 4 s.h.
- 00L:117 Ecology and Systematics of Diatoms 4 s.h.
- 00L:126 Ornithology 4 s.h.
- 00L:142 Watershed Hydrology and Surficial Processes 4 s.h.
- 00L:163 Conservation Biology 4 s.h.

**ENVIRONMENTAL SCIENCES TRACK COURSES**

Students must complete 9-12 s.h. (three courses), choosing one course from each of three of the following four lists of environmental sciences track courses.

**Biosciences (Green) Track**

- 002:108 Vertebrate Zoology 4 s.h.
- 012:107 Marine Ecosystems and Conservation 3 s.h.
- 012:122 Evolution of the Vertebrates 3 s.h.
- 012:170 Evolution of Ecosystems 3 s.h.
- 012:171 Evolution of Plants 3 s.h.
- 044:103 Biogeography 3 s.h.
00L:105 Plant Taxonomy 4 s.h.
00L:117 Ecology and Systematics of Diatoms 4 s.h.

**Chemical Sciences (Yellow) Track**

**Four-Year Graduation Plan**

The Four-Year Graduation Plan is not available for the environmental sciences major. Students work with their advisors on individual graduation plans.

**Honors**

Qualified students are encouraged to work toward graduation with honors in the environmental sciences major. Honors study offers students an opportunity to engage in independent research under the guidance of a faculty sponsor chosen from affiliated faculty of the Environmental Sciences Program; the program draws faculty members from the Departments of Anthropology, Biology, Chemistry, Civil and Environmental Engineering, Geography, and Geoscience. Students also learn how to write the results of their research in the format of a scientific paper, and they have the experience of formally presenting their research as either a short seminar or a poster.

Environmental sciences students who wish to graduate with honors must be members of the University of Iowa Honors Program, which requires students to maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University of Iowa Honors Program for more information).

To graduate with honors in environmental sciences, students must fulfill the following requirements:

- complete a B.S. or B.A. with a major in environmental sciences with a g.p.a. of at least 3.33 in all work for the major;
- submit a research proposal to the honors director within two months of the beginning of the semester in which the research is initiated;
- complete a minimum of 6 s.h. of honors research taken over two semesters (002:196 Honors Investigations, 004:162 Undergraduate Research, 012:119 Directed Study, or 044:195 Undergraduate Research, depending on the departmental affiliation of the faculty sponsor);
- prepare a thesis presenting the research in the format of a scientific paper with abstract, introduction, methods, results, discussion, and conclusions; the thesis must include a title page and an abstract formatted according to the specifications of the Honors Program and must be submitted to the honors director at least one week before the Honors Program deadline for submission; and
- present either a short seminar or a poster about the research at a professional meeting and/or at The University of Iowa.

Beginning in their sophomore or junior year, students should identify potential faculty sponsors by conducting a web-based survey of the research interests of the program’s affiliated faculty. The student should contact potential sponsors to determine who would be willing to sponsor an honors student and what research projects the student might undertake. Students who choose a sponsor whose faculty appointment is not in the College of Liberal Arts and Sciences must choose a
cosponsor who does have a faculty appointment in CLAS.

After the student has identified a sponsor and the two have agreed on a project, the sponsor guides the student in the preparation of a research proposal that identifies the background, goals, methods, and significance of the research project. The proposal serves as the foundation of the honors thesis, which the student prepares under the sponsor’s supervision upon completion of the research. Once the thesis is nearing completion or is completed, the student presents a short seminar or a poster detailing the purpose of the research.

For examples of honors projects in environmental sciences, see Honors Program/Current Projects on the Environmental Sciences Program web site.

**Minor**

The minor in Environmental Sciences requires a minimum of 16 s.h. in University of Iowa environmental sciences courses. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass. The following courses are required.

159:008/012:008 Introduction to Environmental Science (with lab) 4 s.h.

One environmental sciences foundation course, chosen from these:

- 044:005 Foundations of GIS 3 s.h.
- 159:102/012:102 Earth Surface Processes 3 s.h.
- 159:134/002:134 Ecology 3-4 s.h.

Students also choose 8 s.h. of course work in one of the four environmental sciences tracks (environmental biosciences, environmental chemical sciences, environmental geosciences, and environmental hydrosciences; see “Tracks” under "Bachelor of Science" earlier in this Catalog section). The courses must include one track foundation course (3-4 s.h.) and one track field study course (2-4 s.h.).

**Facilities**

Depending on their choice of track and/or courses, students majoring in environmental sciences may have the opportunity to take courses at Iowa Lakeside Laboratory, a field station located on West Lake Okoboji, in northwestern Iowa. Run cooperatively by The University of Iowa, Iowa State University, and the University of Northern Iowa, the laboratory offers courses at the undergraduate and graduate levels and provides excellent conditions for summer study in several disciplines. See Iowa Lakeside Laboratory (p. 1529) (University College) in the Catalog or visit the Lakeside Laboratory web site.

**Courses**

**159:008 Introduction to Environmental Science** 3-4 s.h.

Biological and physical character of the Earth; interaction of humans with the environment, including impacts on ecosystems, climate, natural processes, resources; alternative options, including sustainability, waste management, energy, land reform. GE: Natural Sciences without Lab; Natural Sciences with Lab. Same as 012:008.

**159:009 Introduction to Environmental Sciences Laboratory** 1 s.h.

Laboratory component of 012:008. Requirements: environmental sciences or geoscience major; and 012:008 or 159:008 for 3 s.h. GE: Natural Sciences Lab Only. Same as 012:009.

**159:100 Environmental Sciences Seminar** 0-1 s.h.

Role of sciences in environmental issues and problems; progression from observation to evaluation to design of better questions and experiments. Requirements: environmental sciences major.

**159:102 Earth Surface Processes** 3 s.h.

Basic geomorphic and environmental processes that shape the earth’s surface; emphasis on erosion, transport, deposition by land mass movement (creep, landslides, earth flow), fluid agents (wind, water, ice); methods used to study these processes. Prerequisites: 012:005 or 012:008 or 044:003 or 159:008. Same as 012:102.
159:110 Introduction to Applied Remote Sensing  
Remote sensing of the earth’s surface from aircraft, satellites; aerial photograph interpretation; remote sensing systems, methods, data analysis using electromagnetic spectrum and digital processing techniques, including visible, infrared, microwave radiation; remote sensing applied to geologic and environmental problems. Requirements: college physics or physical geology. Same as 012:110.

159:134 Ecology  
3-4 s.h.
Adaptations of organisms to their physical and biological environments; organism-environment interactions; population biology; interactions between species; ecology of communities, ecosystems; human impact on ecosystems. Prerequisites: 002:010, 002:011, and 22M:016 or 22M:025 or 22M:031. Recommendations: a basic statistics course. Same as 002:134.

159:170 Evolution of Ecosystems  
3 s.h.
Evolutionary history of terrestrial and marine ecosystems; ecological processes from population to ecosystem levels; community assembly, trophic levels, networks, biodiversity dynamics; practical aspects of paleoecological data collection, statistical analysis, modeling. Requirements: two courses in geoscience, biology, environmental sciences, anthropology, or geography. Same as 012:170.
Ethics and Public Policy

Codirectors
Diane Jeske, Richard Fumerton

Affiliated faculty
Celesta Albonetti (Sociology), Richard Fumerton (Philosophy), Diane Jeske (Philosophy), John Solow (Economics)

Undergraduate degree: B.A. in Ethics and Public Policy
Web site: http://www.uiowa.edu/~ethics/

Ethics and public policy is an interdisciplinary major that presents perspectives on intersecting issues that connect the study of philosophy, economics, law, and sociology. All of these disciplines involve a focus on practical questions concerning how individuals ought to behave and how they ought to regulate the behavior of others.

For example, law exists in order to regulate human behavior, enforce human ideals, and resolve human conflict; most people agree that what society should do depends in part on the actual or potential consequences of its actions; and some of the most important consequences of actions and policies are economic. So it is folly to try to reason clearly about how to rectify injustice without thinking long and hard about the economic impact of one’s plans. But law and social policy affect more than economics; they have a role in constructing the very fabric of society and the nature of the political state in which we want to live.

The major in ethics and public policy provides an ideal background for law school. The study of reasoning, an important component of the major, is useful in preparing for the LSAT, GMAT, and MCAT. The major also prepares students to bring a sophisticated, cross-disciplinary perspective to diverse fields such as government, urban and regional planning, social work, and business.

Students choose two fields of specialization for the major and may find it easy to pursue a second major in one of their specialization fields, thus broadening their prospects for choosing graduate schools or beginning professional careers.

The Departments of Economics, Philosophy, and Sociology collaborate to present the major in ethics and public policy; the major is administered by the Department of Philosophy.

Undergraduate Program

- Major in ethics and public policy (Bachelor of Arts)

Bachelor of Arts

The Bachelor of Arts in ethics and public policy requires a minimum of 120 s.h., including at least 37 s.h. of work for the major. Students must complete the College of Liberal Arts and Sciences General Education Program.

Work for the major includes six foundation courses and three courses from each of two fields of specialization.

FOUNDATION COURSES

Foundation courses introduce students to each of the disciplines that participate in the major—philosophy, economics, and sociology; provide them with the basic reasoning skills they will need for advanced study; and help them make an informed selection of two specialization fields.

All students are required to take 026:036 Principles of Reasoning: Argument and Debate or 026:103 Introduction to Symbolic Logic in order to gain facility with abstract, formal reasoning.

Some courses may be listed in more than one foundation area and/or specialization field; students may use a course to fulfill only one requirement for the major.

Philosophy Foundation

Reasoning—one of these:

026:036 Principles of Reasoning: Argument and Debate 3 s.h.
026:103 Introduction to Symbolic Logic 3 s.h.

Value theory—one of these:

026:001 Matters of Life and Death 3 s.h.
026:034 Philosophy and the Just Society 3 s.h.
026:102 Introduction to Ethics 3 s.h.
026:132 Introduction to Political Philosophy 3 s.h.
026:135 Philosophy of Law 3 s.h.
026:136 The Nature of Evil 3 s.h.

Economics Foundation

06E:001 Principles of Microeconomics 4 s.h.

One of these:

06E:119 Policy Analysis 3 s.h.
06E:172 Law and Economics 3 s.h.
Sociology Foundation
Theory—one of these:

- 034:001 Introduction to Sociology Principles 3-4 s.h.
- 034:002 Social Problems 3-4 s.h.

Law and sociology—one of these:

- 034:146 Deviance and Control 3 s.h.
- 034:149 Sociology of Criminal Punishment 3 s.h.
- 034:182 Sociology of Law 3 s.h.
- 034:186 Criminal Legal System 3 s.h.

FIELDS OF SPECIALIZATION

Students select two of the following four fields of specialization and must complete three courses in each of their two chosen fields.

Some courses may be listed in more than one foundation area and/or specialization field; students may use a course to fulfill only one requirement for the major.

Philosophy

- 026:102 Introduction to Ethics 3 s.h.
- 026:104 Introduction to Philosophy of Science 3 s.h.
- 026:132 Introduction to Political Philosophy 3 s.h.
- 026:133 Philosophy of History 3 s.h.
- 026:135 Philosophy of Law 3 s.h.
- 026:136 The Nature of Evil 3 s.h.
- 026:180 Analytic Ethics 3 s.h.
- 026:182 History of Ethics 3 s.h.
- 026:185 Political Philosophy 3 s.h.
- 026:196 Philosophy of the Human Sciences 3 s.h.

Economics

- 06E:104 Microeconomic Theory 3 s.h.
- 06E:113 Health Economics 3 s.h.
- 06E:119 Policy Analysis 3 s.h.
- 06E:125 Global Economics and Business 3 s.h.
- 06E:135 Regional and Urban Economics 3 s.h.
- 06E:171 Antitrust Economics 3 s.h.
- 06E:172 Law and Economics 3 s.h.
- 06E:176 Public Sector Economics 3 s.h.
- 06E:179 History of Economic Thought 3 s.h.

Sociology

- 034:141 Juvenile Delinquency 3 s.h.
- 034:146 Deviance and Control 3 s.h.
- 034:148 Internship in Criminal Justice and Corrections 3 s.h.
- 034:149 Sociology of Criminal Punishment 3 s.h.
- 034:150 Political Sociology 3 s.h.
- 034:156 Gender Inequality 3 s.h.
- 034:158 Economy and Society 3 s.h.
- 034:175 Community and Urban Sociology 3 s.h.
- 034:182 Sociology of Law 3 s.h.
- 034:186 Criminal Legal System 3 s.h.

Student-Designed Field

Students may design their own custom specialization field, in consultation with their advisors and with the approval of the ethics and public policy steering committee. The custom field must consist of three courses that are selected from across the curriculum and that bear on issues relevant to the major in an interconnected, coherent way. A custom specialization field may not include a course that the student has used to fulfill another requirement for the major.

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan. (Courses in the major are those required to complete the major.)

Before the third semester begins: at least one course in the major and one-quarter of the semester hours required for graduation

Before the fifth semester begins: at least three courses in the major and at least one-half of the semester hours required for graduation

Before the seventh semester begins: at least seven courses in the major and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: at least nine courses in the major

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Honors

Qualified students may earn a bachelor’s degree with honors in ethics and public policy. In order to be admitted to honors in the major, students must be members of the University of Iowa Honors
Program, which requires that they maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University of Iowa Honors Program for more information). They also must have completed at least three courses in the major. In order to graduate with honors in ethics and public policy, students must complete all requirements for the major, must maintain a g.p.a. of at least 3.40 in work for the major, and must write an acceptable honors thesis on a significant topic related to the major. Students writing their honors thesis in philosophy should consider preparing for the thesis by taking 026:148 Readings in Philosophy; those in the economics area should consider taking 06E:194 Honors Seminar; and students in the sociology area should consider taking 034:100 Honors Seminar. Contact the Ethics and Public Policy Program coordinator for more information.
French and Italian

Chair
Roland Racevskis

General education language coordinators
Deborah Contrada (Italian), Geoffrey R. Hope (French)

Professors
Cinzia Blum, Wendelin Guentner, Geoffrey R. Hope, Michel Laronde, Roland Racevskis, Steven Ungar (French and Italian/Cinema and Comparative Literature)

Professors emeriti
Jacques A. Bourgeacq, Florindo Cerreta, Simone Delaty, John T. Nothnagle

Associate professors
Deborah L. Contrada, Anny Dominique Curtius, Rosemarie Scullion (French and Italian/Gender, Women’s, and Sexuality Studies)

Assistant professors
Roxanna Curto, Denes Gazsi

Lecturers
Blandina Giblin, Jack Johnson, Katja Liimatta, John Njue, Arne Seim

Undergraduate degrees: B.A. in French, Italian

Undergraduate nondegree programs: Minor in Arabic, French, Italian

Graduate degrees: M.A., Ph.D. in French

Web site: http://clas.uiowa.edu/dwllc/french-italian

The Department of French and Italian introduces students to the cultures of France, the Francophone world, Italy, and parts of the Middle East, providing an understanding of those countries' historical and contemporary importance. It also facilitates development of proficiency in the French, Italian, Arabic, and Swahili languages and fosters critical appreciation of French, Francophone, Italian, and Arabic literature and culture.

Undergraduate students in all majors may satisfy the World Languages requirement of the General Education Program (p. 381) with courses in Arabic, French, Italian, or Swahili; see "Language for General Education" below. The department offers other General Education courses, and entering students may take the department’s First-Year Seminars, one on France, the other on Italy.

The Department of French and Italian is one of five academic units in the Division of World Languages, Literatures, and Cultures (p. 289).

Undergraduate Programs

- Major in French (Bachelor of Arts)
- Major in Italian (Bachelor of Arts)
- Minor in Arabic
- Minor in French
- Minor in Italian

Students majoring in French or Italian may combine their studies with courses in education to prepare for jobs in high school teaching. They may go on to graduate study in areas such as French, Italian, comparative literature, and other interdisciplinary areas as preparation for college-level teaching. Or they may combine other skills and studies with their major in French or Italian to prepare for challenging career opportunities in international government, business, finance, travel, communications, and other fields where the knowledge of more than one language is essential.

Bachelor of Arts: French

The Bachelor of Arts with a major in French requires a minimum of 120 s.h., including 31-35 s.h. of work for the major. Students complete a set of four foundation courses (10 s.h.) plus the requirements for one of four tracks (21-25 s.h.): the French and Arabic track; the language track; the literature and culture track; or the teaching track. Students also must complete the College of Liberal Arts and Sciences General Education Program (p. 381).

Students must maintain a g.p.a. of at least 2.00 in all course work for the major, including all University of Iowa course work. Majors must maintain portfolios documenting their progress toward attaining the objectives of the French major.

Transfer credit may be accepted, and students are encouraged to participate in study abroad, but the last two courses in the major ordinarily must be completed at The University of Iowa. Transfer credit is evaluated on an individual basis by the faculty in charge of study abroad.

Students choose an emphasis in one of the following four tracks when they declare the major (or later, but before their fourth year).
French and Arabic Track

The French and Arabic track is designed for students interested in combining study of the French and Arabic languages with history, politics, and religions of Middle Eastern cultures and with a major in another area, such as comparative studies, political science, geography, or history.

Requirements for the French and Arabic track include the following seven or eight courses (25 s.h.) in addition to the 10 s.h. of foundation course work in French.

- Three courses in French language, or literature and culture, taught in French, with at least one numbered above 009:150 9 s.h.
- Two or three courses in Arabic language beyond first year 10 s.h.
- Two courses on Middle East cultures (prefix 009), taught in French or English, or approved courses from other departments 6 s.h.

Language Track

The language track is designed for students with an interest in language and translation, as well as literature and culture. Students work in specific areas such as international business, comparative stylistics, and translation.

Requirements for the language track include the following seven courses (21 s.h.) in addition to the 10 s.h. of foundation course work in French.

- 009:115 Business French 3 s.h.
- 009:197 Techniques of Translation 3 s.h.
- Five courses in French language, or literature and culture

All language track students take 009:115 Business French and 009:197 Techniques of Translation. Of the remaining five courses, only one may be taught in English under the French department prefix (009). This restriction does not apply to courses taught in English with an additional semester hour in French. Students must complete at least two courses numbered above 009:150, including the required course 009:197 Techniques of Translation.

Courses in French stylistics and textual analysis, another language, economics, political science, and/or business administration are recommended as adjunct electives.

Literature and Culture Track

The literature and culture track is designed for students who are interested in combining study of French and Francophone literatures and cultures with a major in another area, such as cinema, communication studies, comparative literature, history, international studies, political science, or journalism.

Requirements for the literature and culture track include the following seven courses (21 s.h.) in addition to the 10 s.h. of foundation course work in French.

- Five courses in literature and culture

Only one of these courses may be taught in English under the French department prefix (009). This restriction does not apply to courses taught in English with an additional semester hour in French. At least two courses must be numbered above 009:150.

Teaching Track

French majors interested in obtaining licensure to teach in elementary and/or secondary schools must successfully complete the requirements for a major in French in the teaching track and must complete the College of Education’s Teacher Education Program (TEP). Several courses in the College of Education and one semester of student teaching are required. Contact the College of Education’s Office of Education Services for details.

Requirements for the French major’s teaching track include the following seven courses (21 s.h.) in addition to the 10 s.h. of foundation course work in French.

- Four courses in literature and culture

Only one of these courses may be taught in English under the French department prefix (009). This restriction does not apply to courses taught in English with an additional semester hour in French. At least two courses must be numbered above 009:150.

Bachelor of Arts: Italian

The Bachelor of Arts with a major in Italian requires a minimum of 120 s.h., including 31 s.h. of work for the major. Students must complete the College of Liberal Arts and Sciences General Education Program (p. 381). Requirements for the major are as follows.
B.A. with Teacher Licensure

French majors seeking licensure to teach in elementary and/or secondary schools should choose the French teaching track. See "Teaching Track" under "Bachelor of Arts: French" above.

Italian majors interested in licensure to teach in elementary and/or secondary schools must successfully complete the requirements for a major in Italian, including an additional 2 s.h. in either 018:013 Everyday Italian I or 018:014 Everyday Italian II. They also must complete the College of Education’s Teacher Education Program (TEP). Several courses in the College of Education and one semester of student teaching are required. Contact the Office of Education Services for details.

Students who plan to use a minor in either French or Italian to teach at the elementary and/or secondary level must contact the Office of Teacher Education and Student Services about requirements.

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan.

Bachelor of Arts: French

Before the third semester begins: competence in first-year French and at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: second-year Intermediate Italian II (018:012) and at least one-half of the semester hours required for graduation

Before the seventh semester begins: two semesters of third-year Italian (018:111 Advanced Italian and 018:112 Advanced Italian II) and at least three-quarters of the semester hours required for graduation

Bachelor of Arts: Italian

Before the third semester begins: competence in first-year Italian and at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: competence in second-year Intermediate Italian II (018:012) and at least one-half of the semester hours required for graduation.

Before the seventh semester begins: four courses in the major numbered above 018:103 and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: a total of at least five courses in the major numbered above 018:103

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Honors

The department participates in the University of Iowa Honors Program. To gain admission to honors in French or Italian, a student must have a University of Iowa g.p.a. of at least 3.33 and a department g.p.a. of at least 3.50 and must be a member of the University of Iowa Honors Program. To graduate with honors in French or Italian, students must register for 009:198 Honors Research and Thesis (French majors) or 018:198 Honors Research and Thesis (Italian majors) and one honors-designated course numbered above 009:160 (French) or 018:103 (Italian). They must complete an honors thesis or equivalent (for example, translation, comparative stylistics, cultural studies, or research paper) in French or Italian and must present their work to a faculty committee.

Minor in Arabic

The minor in Arabic requires a minimum of 15 s.h. in intermediate or more advanced Arabic language courses in the major, and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: 009:106 Oral Expression in French II and three more courses in the major; for students in the French language track, 009:115 Business French and 009:197 Techniques of Translation

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate
courses, including 12 s.h. taken at The University of Iowa. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass. Credit from the University of Iowa Regents Summer Program in Fez, Morocco, earned in courses with prefix 195 counts as University of Iowa credit. All courses for the minor must be taught in Arabic.

**Minor in French**

The minor in French requires a minimum of 15 s.h., including 12 s.h. in advanced courses; 9 s.h. of the 12 s.h. in advanced courses must be taken at The University of Iowa. For the minor, courses numbered 009:105 and above are considered advanced. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass. Credit from the University Studies Abroad Consortium (USAC) program in Pau, France, and the Study in Montpellier program, in France, counts as University of Iowa credit; 6 s.h. earned in other study abroad programs may be counted toward the minor. All courses for the minor must be taught in French.

**Minor in Italian**

The minor in Italian requires a minimum of 15 s.h., including 12 s.h. in courses numbered 018:105 and above taken at The University of Iowa. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass. Students who wish to count 018:132 Images of Modern Italy toward the minor must enroll in the 4 s.h. section, which includes discussion in Italian. All courses for the minor must be taught in Italian.

**Language for General Education**

The Department of French and Italian provides course sequences in four languages—Arabic, French, Italian, and Swahili—that students in all majors may use to fulfill the World Languages requirement of the College of Liberal Arts and Sciences General Education Program (p. 381). It also offers a variety of language courses that nonmajors may take to satisfy their own educational goals and interests.

**ARABIC**

The department is the administrative home for Arabic language and literature courses. It offers elementary and intermediate Arabic as well as conversational Arabic, for which intermediate Arabic is prerequisite. See "Courses" toward the end of this Catalog section. Students without background in Arabic should begin with 195:101 Elementary Modern Standard Arabic I.

Students who wish to fulfill the General Education Program’s World Languages requirement with Arabic should complete the following course sequence.

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>195:101 Elementary Modern Standard Arabic I</td>
<td>5 s.h.</td>
</tr>
<tr>

</tbody>
</table>

**FRENCH**

Students who have a background in French should take the online World Languages Placement Test, which helps determine the level at which a student should begin French language study at The University of Iowa. Students without background in French should begin with 009:001 Elementary French I.

Students who wish to fulfill the General Education Program’s World Languages requirement with French should complete the following sequence.

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>009:001 Elementary French I</td>

</table>

**ITALIAN**

Students who have a background in Italian should consult with the department before classes begin to determine the level at which they should begin Italian language study at The University of Iowa. Students without background in Italian should begin with 018:001 Elementary Italian.

Students who wish to fulfill the General Education Program’s World Languages requirement with Italian should complete the following course sequence.

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>

</tbody>
</table>
Those with strong language-learning abilities or background in another Romance language may fulfill the World Languages requirement with this sequence.

018:103 Intensive Elementary Italian 4, 6 s.h.
018:011 Intermediate Italian 4 s.h.
018:012 Intermediate Italian II 4 s.h.

**SWAHILI**

The department is the administrative home for Swahili courses. Students may fulfill the General Education Program's World Languages requirement by taking the following four-semester sequence.

211:125 Elementary Swahili I 3-4 s.h.
211:126 Elementary Swahili II 3-4 s.h.
211:127 Intermediate Swahili I 3-4 s.h.
211:128 Intermediate Swahili II 3-4 s.h.

**Study Abroad**

The department participates in the Committee on Institutional Cooperation (CIC) Summer French Program in Quebec at the Université de Laval. The CIC is a nonprofit organization whose purpose is to foster cooperative educational opportunities among the Big Ten universities and the University of Chicago. Affiliated with the Cours d'été pour non-francophones of the Université de Laval, the program is designed to offer qualified students the opportunity to increase their command of French in a French-speaking environment and to introduce them to the heritage and cultural traditions of a unique and vital segment of North American culture. To participate in the program, students must have taken at least two semesters of French. For information about other programs abroad, contact the Office for Study Abroad.

**Graduate Programs**

- Master of Arts in French and Francophone world studies (with or without thesis)
- Doctor of Philosophy in French and Francophone world studies

The Master of Arts is offered with an optional French education emphasis.

Faculty expertise enables the department to offer courses in the traditionally recognized historical periods of French literature, various literary genres, and critical theories as well as the Francophone literatures of Canada, North and Sub-Saharan Africa, and the Caribbean. The department has particular strengths in interdisciplinary studies, notably in the areas of comparative arts, film studies, history, and second language acquisition.

For more detailed information on graduate degrees in French and Francophone world studies, contact the Department of French and Italian or visit its web site. The department also publishes the Guide for Graduate Students and Assistants.

**Master of Arts**

The Master of Arts program in French and Francophone world studies requires a minimum of 30 s.h. of graduate credit and is offered with or without thesis.

Thesis students may earn up to 6 s.h. of the required 30 s.h. for thesis work. They must take a written and oral examination on their areas of study and must defend their thesis at the time of the comprehensive examination. The thesis prospectus must be accepted one year before the student defends the thesis.

Nonthesis students must pass a written and oral examination. With permission of the director of graduate studies and the department chair, nonthesis students may take up to 6 s.h. of the required 30 s.h. outside the department or transfer up to 6 s.h. of course work taken at another institution.

All M.A. students must complete the following course work.

009:208 Introduction to Graduate Study in French 1 s.h.
009:210 Comparative Stylistics 3 s.h.
009:234 Principles of Teaching and Learning Foreign Languages 3 s.h.
At least four graduate-level literature or culture courses numbered 200 and above

**M.A. with French Education Emphasis**

The Master of Arts program with French education emphasis requires a minimum of 38 s.h. of graduate credit in French. The program is intended primarily for prospective secondary school and junior college teachers. Candidates must pass a final written and oral examination.

All French education emphasis students must complete the following course work.
009:208 Introduction to Graduate Study in French  1 s.h.
009:210 Comparative Stylistics  3 s.h.
009:234 Principles of Teaching and Learning Foreign Languages
Courses in French literature numbered 200 and above (minimum requirement)  9 s.h.

**Doctor of Philosophy**

The Doctor of Philosophy program in French and Francophone world studies requires a minimum of 72 s.h. of graduate credit, including credit earned for the M.A. The program is designed to prepare students for research, teaching, and professional service normally required of college and university faculty members.

The Ph.D. takes at least three years of graduate study, including at least one year spent in residence at The University of Iowa. Students must pass a comprehensive examination and make a successful oral defense of their dissertation.

Requirements include the following.

- 009:208 Introduction to Graduate Study in French  1 s.h.
- 009:260 Critical Theory and Practice  3 s.h.
- 009:277 Thesis (6 s.h. minimum)  6 s.h.
- Three graduate courses in a related field, such as another literature, history, or philosophy (8 s.h. minimum)

Ph.D. students must possess fifth-semester or equivalent proficiency in a foreign language other than French.

Students working toward the Ph.D. are required to spend at least one year teaching as graduate assistants in the department.

**Admission**

Applicants to the M.A. program in French and Francophone world studies must have completed the equivalent of the University of Iowa undergraduate major in French. An M.A. in French is prerequisite to admission to the Ph.D. program in French and Francophone world studies. However, successful completion of an M.A. in French does not necessarily qualify a student for doctoral study.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate (p. 1117) College section of the Catalog.

Applicants for fall semester whose application materials are received in the department by January 15 have the best chance to be admitted and receive financial aid. They must submit academic transcripts, letters of recommendation from three persons familiar with their past academic work, Graduate Record Examination (GRE) General Test results, a statement of purpose in taking graduate work, and one or more samples of original writing, one of which should be in French, that show their ability to pursue graduate work in French (an honors thesis, term paper, seminar paper, or other course papers).

**Financial Support**

Teaching assistantships are offered through the department, and University fellowships and scholarships are available through the Graduate College. Contact the Department of French and Italian for details.

Teaching assistants in the department must take 009:234 Principles of Teaching and Learning Foreign Languages.

Exchange assistantship agreements with the University of Pau and the University of Poitiers provide one year of residence at these Universities in France for graduate students.

**Courses**

The department offers courses in French, Italian, Arabic, and Swahili. For a detailed description of courses offered each semester, contact the Department of French and Italian. French courses are conducted in French and Italian courses are conducted in Italian, unless otherwise indicated. Students may not receive credit for a course that is prerequisite to, or whose equivalent is prerequisite to, a higher-level course they have already completed.

French courses numbered 150-199 are intended primarily for advanced undergraduates; graduate students should consult with their advisors before registering for these courses.

Undergraduates may count only one course taught in English toward requirements for the major in French. This restriction does not apply to courses taught in English with an additional semester hour in French. Students should consult with their advisors before registering.

Students who have had significant experience with French through living or studying abroad should consult with the department before enrolling in any French course.
French, Primarily for Undergraduates

009:001 Elementary French I 5 s.h.
For students who have no knowledge of French. Offered fall semesters. GE: World Languages First Level Proficiency.

009:002 Elementary French II 5 s.h.
Offered spring semesters. Prerequisites: 009:001. GE: World Languages Second Level Proficiency.

009:005 Texts and Contexts: French-Speaking World 3 s.h.
Development of skills in reading, understanding, and critically engaging with literary texts, and of research skills for informed inquiry; sense of oneself as a situated reader; range of texts reflecting diversity of French and Francophone writers. GE: Interpretation of Literature.

009:007 Nature/Ecology French Philosophy and Fiction 3 s.h.
Representations of the natural world in literary works from the 16th to the 20th centuries and in film; readings in English translation. GE: Interpretation of Literature.

009:010 First-Year French Review 5 s.h.
A year in one semester. GE: World Languages Second Level Proficiency.

009:011 Intermediate French I 4 s.h.
Prerequisites: 009:002 or 009:010. GE: World Languages Second Level Proficiency.

009:012 Intermediate French II 4 s.h.

009:026 Oral Expression in French I 2 s.h.
Prerequisites: 009:002 or 009:010.

009:029 First-Year Seminar 1-2 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Taught in English. Requirements: first- or second-semester standing.

009:030 Cultural Misunderstandings: France and U.S.A. 3 s.h.
Key moments in the history of relations between the United States and France, from similarities underlying democratic principles to recent divergent worldviews. Taught in English. GE: International and Global Issues.

009:040 French for Travelers 2 s.h.
Basic language skills for tourists; for students with no previous French.

009:055 Revolutions in 19th-Century France 3 s.h.

009:060 Fashioning France: The Land and Its People 3 s.h.
The beauty of France; distinctive regional differences, richness, diversity; why France appeals to travelers worldwide.

009:105 Third-Year French 3 s.h.
Development of reading skills in French; composition and review of basic grammar structures. Prerequisites: 009:012.

009:106 Oral Expression in French II 2 s.h.
Second in a three-course sequence. Corequisite: 009:012, if not taken as a prerequisite.

009:111 Introduction to Reading and Writing in Literature 3 s.h.
Development of analytical, organizational skills for interpretation of literature; readings in prose, poetry, drama, criticism; emphasis on essay writing. Prerequisites: 009:012.
009:112 French Grammar 3 s.h.
Study of word forms, sentence patterns for more accurate use of French. Prerequisites: 009:012.

009:113 French Civilization 3 s.h.
Institutions and events from the beginning of French civilization to the Renaissance. Prerequisite: 009:111. GE: Historical Perspectives.

009:114 French Civilization 3 s.h.
From Renaissance to Revolution. Prerequisites: 009:111. GE: Historical Perspectives.

009:115 Business French 3 s.h.
Language of economics and business; practice in business correspondence and communication, active use of business vocabulary. Offered fall semesters. Prerequisites: 009:112.

009:117 Studies in Medieval and Early Modern France 3 s.h.
Introduction to the study of Medieval and Early Modern France (Middle Ages to the Revolution of 1789); focus on aspects of history, literature, politics, and culture of the period; emphasis on interdisciplinary investigation of diverse cultural forms. Prerequisites: 009:111.

009:118 Topics in French Studies I 3 s.h.
Prerequisites: 009:111.

009:119 Studies in Modern France 3 s.h.
Introduction to the study of Modern France (1815-present); history, literature, politics, and culture of the period; emphasis on interdisciplinary investigation of diverse cultural forms. Prerequisites: 009:111.

009:120 French-Speaking Cultures 3 s.h.
Features of cultures in which French is spoken; North Africa, Subsaharan Africa, the Indian Ocean, Indochina, the West Indies, Canada, Europe; cinema, music, literature, the arts, the media. Prerequisites: 009:111.

009:124 Study Abroad: Language 3 s.h.
Written and spoken French; listening, speaking, reading, writing in cultural contexts. Prerequisites: 009:012.

009:127 Study Abroad: Culture 3 s.h.
Geography, history, architecture, painting, music of France; readings, slides, video and audio cassettes, visits to sites of cultural significance. Prerequisites: 009:012.

009:130 Paris and the Art of Urban Life 3 s.h.
City of Paris examined in varied historical, artistic, cultural contexts; interdisciplinary. Same as 01H:157.

009:136 Oral Expression in French III 2 s.h.
Last in a three-course sequence. Prerequisites: 009:106.

French, for Undergraduate and Graduate Students

009:146 Francophone Cinema 3 s.h.
Introduction to the cinema of French-speaking countries outside of France; history, production, distribution; issues of colonialism, postcolonial identities, gender, social realism, diasporas, popular culture. Taught in English. Prerequisites: 009:012.

009:147 French Cinema 3-4 s.h.
Taught in English. GE: Literary, Visual, and Performing Arts. Same as 048:105.

009:148 Gender and Sexuality in French Cinema 3 s.h.
Cultural, historical, semiotic approach to studying construction of gender identity and sexual codes in French cinema from 1920s to present. Taught in English. Prerequisites: 009:111 or 048:001 or 048:002 or 131:010. Same as 048:167, 131:167.
009:157 Twentieth-Century Europe in Literature and Film
Introduction to 20th-century Europe through representative literature and film that reflect and critically engage the period’s defining moments in social, cultural, and political history: modernity and emergence of modernist aesthetics, World War I, the Great Depression, the Spanish Civil War, struggles between fascism and communism, World War II, existentialism, the Holocaust, rise of postwar consumer society and technocracy, wars of decolonization, political dissidence in Cold War Eastern Europe, student revolts of the 1960s, fall of the Berlin Wall, collapse of the Soviet Union, postcolonial condition that binds Europe to its colonial history. Taught in English. Same as 048:157.

009:163 Francophone Literature of the African Diaspora
Literatures and cultures of Africa, the Caribbean, and the Indian Ocean analyzed through fiction, essays, films, documentaries. Prerequisites: 009:111 and 009:112.

009:164 Quebecois Literature
Prerequisites: 009:111 and 009:112.

009:168 Post-Colonial Literature in France
Literatures and cultures of Arabo-French (Beur) and Afro-French immigrations. Prerequisites: 009:111 and 009:112. Same as 048:168.

009:170 Early Modern French Literature and Culture
Literary representations of social trends in early modern France. Prerequisites: 009:111 and 009:112.

009:175 Atelier d’Ecriture en Francais/Creative Writing in French
Development of intellectual and affective techniques necessary for writing creatively; exploration of cognitive and psychological barriers to producing literature in a language other than their own; brief portraits, journals, dialogues.

009:178 Topics in French Studies II
French and/or Francophone literature or culture. Prerequisites: 009:111 and 009:112.

009:180 French Women Writers
Survey of 20th-century French women writers, with emphasis on Simone de Beauvoir; broad range of literary works by writers including de Beauvoir, Colette, Marguerite Yourcenar, Nathalie Sarraute, Marguerite Duras, Sarah Kofman, Annie Ernaux, Christiane Rachefort; French feminist theorists who followed in de Beauvoir’s footsteps, including Helene Cixous, Julia Kristeva, Luce Irigaray. Prerequisites: 009:111 or 131:010. Same as 131:168.

009:187 Aspects of Poetry
Prerequisites: 009:111 and 009:112.

009:191 Early Modern Culture

009:192 French Classical Literature
Prerequisites: 009:111 and 009:112.

009:193 French Literature of the Enlightenment
Principal literary genres and key issues from the Enlightenment; aristocratic libertinism of the early 18th century to radical tendencies of the Revolutionary period. Prerequisites: 009:111 and 009:112.

009:196 Independent Study
Prerequisites: 009:111 and 009:112.

009:197 Techniques of Translation
Prerequisites: 009:112. Same as 048:197.

009:198 Honors Research and Thesis
Prerequisites: 009:111 and 009:112.
French, Primarily for Graduate Students

009:205 French for Reading/Research  2 s.h.

009:206 French for Reading/Research  2 s.h.

009:208 Introduction to Graduate Study in French  1 s.h.
Expectations, resources, and opportunities of graduate study in French; introduction to course work, development of preprofessional competencies.

009:210 Comparative Stylistics  3 s.h.
Translation from English to French, including literary texts. Same as 048:211.

009:212 Realism and Naturalism  3 s.h.
Representative novels of Realist and Naturalist movements, in historical, literary, and theoretical context.

009:215 The Renaissance in France  3 s.h.

009:220 Topics in French Studies  3 s.h.
Repeatable.

009:222 New Historicisms in France  3 s.h.
Theory and practice of historical interpretation developed by the "Annales" historians and in the philosophical discourses of Michel Foucault, Michel de Certeau, other prominent postmodern critics.

009:223 French History in/and Cinema  3 s.h.
French cinema’s role in constructing 20th-century discourse on national and cultural identity and in shaping modern France’s historical imagination.

009:224 Modern French Novel  3 s.h.

009:225 Literature of Immigration in France  3 s.h.
Contemporary literature written by non-European immigrants in France; issues of identity, institutional power, exclusion, displacement; rhetorical strategies used in these decentered texts to open a discursive/subversive space in canonical literary discourse.

009:227 Studies in the Seventeenth Century  3 s.h.

009:234 Principles of Teaching and Learning Foreign Languages  3 s.h.

009:236 Topics in Second Language Acquisition: Speaking  3 s.h.
Theory, pedagogy, research, and assessment in second language speaking. Same as 035:228, 164:221.

009:237 Second Language Acquisition Research and Theory I  3 s.h.
Theories regarding success and failure in acquisition of second or subsequent languages; research, issues. Same as 035:201, 039:200, 164:201, 39J:201.

009:238 Multimedia and Second Language Acquisition  3 s.h.
Foreign language multimedia in the context of current second language acquisition theories and research; readings on interactivity, interface design, feedback, learner control, and acquisition of vocabulary, grammar, and culture; multimedia development project. Requirements: foreign language teaching methodology course. Same as 013:253, 035:212, 164:211.

009:240 Studies in Francophone Literatures  3 s.h.
Historical, anthropological, comparative approach to Francophone literatures and cultures; Afro/Indo-Caribbean religions in literatures, theoretical and critical discourses, women’s literature and cinema.
009:260 Critical Theory and Practice  3 s.h.

009:279 Independent Study  arr.

009:350 Seminar: Comparative Topics  arr.
Comparative topics in literature, theory, media, cultural studies. Same as 048:355.

009:355 Seminar  3 s.h.
Repeatable.

Italian, Primarily for Undergraduates

018:001 Elementary Italian  5 s.h.
For students who have no knowledge of Italian. Offered fall semesters. GE: World Languages First Level Proficiency.

018:002 Elementary Italian II  5 s.h.
Offered spring semesters. Prerequisites: 018:001. GE: World Languages Second Level Proficiency.

018:011 Intermediate Italian  4 s.h.
Offered fall semesters. Prerequisites: 018:002. GE: World Languages Second Level Proficiency.

018:012 Intermediate Italian II  4 s.h.
Offered spring semesters. Prerequisites: 018:011. GE: World Languages Fourth Level Proficiency.

018:013 Everyday Italian I  2 s.h.
Offered fall semesters. Prerequisites: 018:002 or 018:103.

018:014 Everyday Italian II  2 s.h.
Offered spring semesters. Prerequisites: 018:002 or 018:103.

018:029 First-Year Seminar  1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Taught in English. Requirements: first- or second-semester standing.

018:030 Italian for Travelers  2 s.h.
Basic language skills for tourists; for students with no previous Italian.

018:040 Topics in Italian  2 s.h.
Topics in Italian language, culture, and literature; may include Italian cinema, studies of specific Italian cities, thematic approaches to Italian studies.

018:053 Independent Study  arr.

Italian for Undergraduate and Graduate Students

018:103 Intensive Elementary Italian  4,6 s.h.
Offered spring semesters. Prerequisite: two years of another foreign language. GE: World Languages Second Level Proficiency.

018:105 Modern Italian Fiction  3 s.h.
Prerequisites: 018:012.

018:106 Modern Italian Poetry and Drama  3 s.h.
Continuation of 018:105, but may be taken as independent unit. Prerequisites: 018:012.

018:111 Advanced Italian  3-4 s.h.
Offered fall semesters. Prerequisites: 018:012.

018:112 Advanced Italian II  3-4 s.h.
Offered spring semesters. Prerequisites: 018:111.

195:153 Independent Study  
arr.  
Material not covered in regularly offered courses; independent study guided by an instructor.

Swahili, for Undergraduate and Graduate Students

211:125 Elementary Swahili I  3-4 s.h.

211:126 Elementary Swahili II  3-4 s.h.

211:127 Intermediate Swahili I  3-4 s.h.

211:128 Intermediate Swahili II  3-4 s.h.

211:129 Advanced Swahili  3-4 s.h.
Advanced speaking, listening, reading, and writing skills.

211:130 Conversational Swahili  3 s.h.
Extensive practice in production and comprehension of spoken Swahili. Prerequisites: 211:126 or 211:128.
Fundraising and Philanthropy Communication

**Director**
David D. Perlmutter

**Program coordinator**
Ann Haugland

**Undergraduate nondegree program:**
Certificate in Fundraising and Philanthropy Communication

The Certificate in Fundraising and Philanthropy Communication is administered by the School of Journalism and Mass Communication (p. 514).

**Undergraduate Program**

- Certificate in Fundraising and Philanthropy Communication

The certificate program prepares students for careers in the growing field of development, institutional advancement, fundraising, donor relations, and public relations for nonprofit organizations.

**Certificate**

The Certificate in Fundraising and Philanthropy Communication requires a minimum of 18 s.h. of credit, including a core (9 s.h.) and electives (9 s.h.), which may include an optional internship. Students must maintain a g.p.a. of at least 2.00 in work for the certificate.

The certificate program is open to current undergraduates in all majors and to individuals who hold University of Iowa bachelor's degrees and are not enrolled in graduate or professional degree programs. Completion of the certificate is noted on the student's transcript.

All students complete the certificate's core courses, which provide an overview of communication, writing, and management in nonprofit organizations. Students then choose from a range of courses that match their particular interests, selecting from social service, politics, the arts, environmental issues, business and communication, and skills useful in fundraising. An optional internship offers practical experience working with development professionals in a nonprofit organization.

Certificate students majoring in journalism and mass communication may count 019:096 Communication and Public Relations and 019:169 Introductory Topics in Mass Communication (6 s.h.) toward requirements for the major. They also may combine certificate course work with other courses to meet the journalism major's requirement of a second major or concentration area. Students in other majors should consult with their advisors to learn whether they may count certificate course work toward their majors.

The Certificate in Fundraising and Philanthropy Communication requires the following course work.

### Core courses

Students complete 9 s.h. from these:

- 019:096 Communication and Public Relations 3 s.h.
- 217:169 Philanthropy Studies Practicum 3 s.h.
- 06J:147 Nonprofit Organizational Effectiveness I 3 s.h.
- or
- 06J:148 Nonprofit Organizational Effectiveness II 3 s.h.

### Electives and Optional internship

Students complete a minimum of 9 s.h. in approved elective courses chosen from those listed below; credit earned for the optional internship counts as elective credit. The certificate program coordinator may consider other courses for approval if they fit the program's guidelines and purpose.

Some of these courses have prerequisites, which students must complete before registering in the course. Some require special permission. Students should speak with the certificate program coordinator when selecting electives.

#### Advocacy

- 030:070 Introduction to Political Communication 3 s.h.
- 030:125 Interest Groups 3 s.h.
- 030:126 American Public Policy 3 s.h.
- 030:128 Direct Legislation 3 s.h.
- 030:129 Policy Matters: Perspective on Contemporary Problems 3 s.h.
- 030:131 Global Justice 3 s.h.
- 030:171 Public Opinion 3 s.h.

#### Arts and Culture

- 01H:007 Writing About the Visual Arts 3 s.h.
- 024:102 Introduction to Museology 3 s.h.
- 024:161 Art, Law, and Ethics 3 s.h.

Prerequisites: 019:096.
Gender, Women's, and Sexuality Studies

Chair
Jennifer Glass

Professors
Susan Birrell (Gender, Women’s, and Sexuality Studies/American Studies), Jennifer Glass (Sociology/Gender, Women’s, and Sexuality Studies), Karen Heimer (Sociology/Gender, Women’s, and Sexuality Studies), Ellen Lewin (Gender, Women’s, and Sexuality Studies/Anthropology), Leslie Schwalm (History/Gender, Women’s, and Sexuality Studies)

Associate professors
Aimee Carrillo Rowe (Rhetoric/Gender, Women’s, and Sexuality Studies), Meenakshi G. Durham (Journalism and Mass Communication), Elizabeth Heineman (History/Gender, Women’s, and Sexuality Studies), Meena Khandelwal (Anthropology/Gender, Women’s, and Sexuality Studies), Anthony Paik (Sociology), Rosemarie Scullion (French and Italian/Gender, Women’s, and Sexuality Studies), Sasha Waters Freyer (Cinema and Comparative Literature/Gender, Women’s, and Sexuality Studies), Rachel Williams (Art and Art History)

Associate professors emeritae
Sue Lafky, Margery Wolf

Lecturer
Mary Ann Rasmussen (English)

Undergraduate degree: B.A. in Gender, Women’s, and Sexuality Studies
Undergraduate nondegree program: Minor in Gender, Women’s, and Sexuality Studies
Graduate nondegree program: Certificate in Gender, Women’s, and Sexuality Studies
Web site: http://clas.uiowa.edu/gwss

The Department of Gender, Women’s, and Sexuality Studies (GWSS) is multidisciplinary. It focuses on the ways in which women and men construct themselves as gendered and sexual beings, analyzes how gender and sexuality shape virtually every aspect of our daily lives, and probes the relationship between biological sex differences and the social and cultural roles of women and men.

The department’s major goal is to bring to the University community new research on gender and sexuality—research frequently overlooked by traditional disciplines. By offering core courses as well as those cross-referenced with other departments, GWSS acquaints its students with gender and sexuality scholarship and methodologies in the humanities and the social sciences.

Faculty from across the University participate in the Department of Gender, Women’s, and Sexuality Studies as affiliated faculty members; for a complete list, see the department’s web site. Other University of Iowa faculty members occasionally offer courses and participate in the department’s research, study, and interdisciplinary activities.

Undergraduate Programs

- Major in gender, women’s, and sexuality studies (Bachelor of Arts)
- Minor in gender, women’s, and sexuality studies

Bachelor of Arts

The Bachelor of Arts with a major in gender, women’s, and sexuality studies requires a minimum of 120 s.h., including 35 s.h. of work for the major. It emphasizes breadth, depth, and interdisciplinary study. Through the GWSS major, students acquire knowledge of the field’s history, facility with major theoretical debates, knowledge of gender and sexuality issues outside the United States and Western Europe, knowledge of one major related area of scholarly concern, and familiarity with debates in other areas. Students apply this knowledge to an individual research project during their senior year.

Students may declare the major in gender, women’s, and sexuality studies at any time. They are advised by the Academic Advising Center until they have earned 24 s.h. of credit. Transfer credit is evaluated case-by-case; a maximum of 12 s.h. of transfer credit may be counted toward the degree. Students earning more than one major may count toward the GWSS major a maximum of three courses they complete for the other major.

Work for the major consists of the undergraduate core (17 s.h.), which includes a practicum and culminates in a research seminar, and 18 s.h. of electives, which include a focus area. Students also must complete the College of Liberal Arts and Sciences General Education Program (p. 381).

The major in gender, women’s, and sexuality studies requires the following course work.

UNDERGRADUATE CORE

The undergraduate core consists of six courses (17-18 s.h.). Two introductory courses (131:010 Introduction to Gender, Women’s, and Sexuality Studies and 131:055 Gender, Race, and Class in the U.S.) are prerequisites for all other courses in the major; they orient students to the major conceptual areas that constitute GWSS as an
interdisciplinary field. Gender, Race, and Class in the U.S. (131:055) introduces basic issues of race, class, and gender systems in the United States and provides a foundation for the major. The practicum (131:105 Women’s Studies Practicum) reflects the importance of community needs and current social issues in framing questions of gender and sexuality studies scholarship and in assessing the usefulness of relevant research. Students take 131:199 Senior Research Seminar during their last semester.

The undergraduate core includes the following course work.

All of these:

131:010 Introduction to Gender, Women’s, and Sexuality Studies 3 s.h.
131:055 Gender, Race, and Class in the U.S. 3 s.h.
131:105 Women’s Studies Practicum 2-3 s.h.
One GWSS theory course, such as 131:151 or 131:095 3 s.h.
One GWSS course with a transnational focus on gender, women, and sexuality 3 s.h.

One of these:

131:198 Honors Senior Thesis (only for honors students) arr.
131:199 Senior Research Seminar 3 s.h.

ELECTIVES

Students choose elective courses from the lists below, in consultation with their advisors. They must complete at least six electives (total of 18 s.h.), earning at least 12 s.h. in upper-level courses. At least one elective course must focus on the experience of minority or ethnic populations in the United States.

In choosing electives, students are encouraged to pursue a course of study that emphasizes both breadth and depth. Students should choose at least three or four courses in a focus area in which they would like to gain deeper knowledge. The area may be within a specific discipline, such as literature, anthropology, or history. This is especially useful for students pursuing double majors, since they may count toward the GWSS major a maximum of three courses they complete for the other major.

The focus area need not be limited to a traditional discipline. Students may seek more specialized education in fields such as sexuality studies or international issues. Breadth also is important; advisors direct students who have taken several courses in one focus area to take additional electives in another focus area.

Students may request permission to use upper-level courses not listed below. At least half of the course’s content and requirements must focus on gender and/or sexuality. For information on requesting permission to use a course not listed here, contact the GWSS undergraduate advisor.

Minority or ethnic population electives—at least one of these:

16A:184/129:184/131:184 Black Global Metropolis: Sexual History 3 s.h.
131:159/032:158/149:158 Native American Women and Religious Change 3 s.h.
131:164/149:164 American Indian/First Nations Women 3 s.h.

Remaining electives are chosen from these:

16A:184/129:184/131:184 Black Global Metropolis: Sexual History 3 s.h.
032:071/131:071 Sexual Ethics 3 s.h.
032:111 Religion and Women 3 s.h.
034:135/131:136 Sociology of Sexuality 3 s.h.
049:188/131:187 Sex and Gender in Performance 3 s.h.
131:018/034:018 Gender and Society 3-4 s.h.
131:025 Gender, Race, and Criminal Justice 3 s.h.
131:029 First-Year Seminar 1 s.h.
131:041/036:041 Gender Roles and Communication 3 s.h.
131:052/008:052 Literature, Culture, and Women 3 s.h.
131:060/032:052 Women in Islam and the Middle East 3 s.h.
131:061/045:060 Sex and Popular Culture in the Postwar U.S. 3 s.h.
131:078/028:078 Women, Sport, and Culture 3 s.h.
131:109/20E:109 Women in Antiquity 3 s.h.
131:112 Anthropology of Sexuality 3 s.h.
131:127/113:127 South Asian Sexual Cultures 3 s.h.
131:133/113:133/172:133 The Anthropology of Women’s Health 3 s.h.
131:134/113:134 Gender and Indian Diaspora 3 s.h.
131:142/113:105 Mothers and Motherhood 3 s.h.
131:143/113:182 Women, Health, and Healing 3 s.h.
131:144/113:140 Politics of Reproduction 3 s.h.
131:149/113:115 Transnational Feminism 3 s.h.
131:150 Topics in Women’s Studies 1, 3 s.h.
131:152/20E:150 Gender and Sexuality in the Ancient World 3 s.h.
131:153 Feminist Cultural Studies 3 s.h.
131:158/16A:154 Sexuality in the United States 3 s.h.
131:159/032:158/149:158 Native American Women and Religious Change 3 s.h.
131:160/034:162 Work and Family Institutions 3 s.h.
131:162/035:144 Latin American Women Writers 3 s.h.
131:164/149:164 American Indian/First Nations Women 3 s.h.
131:165/113:180 Women Writing Culture 3 s.h.
131:171/16A:171 Women and Power in the American Past 3 s.h.
131:185/048:185 Global Women’s Cinema 3 s.h.
131:186 Women and Nonfiction 3 s.h.
131:188/008:188 Prose by Women Writers 3 s.h.
131:189 Contemporary American Women Writers 3 s.h.
131:194/008:194 Introduction to Feminist Criticism 3 s.h.

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan.

Before the third semester begins: 131:010 Introduction to Gender, Women’s, and Sexuality Studies and at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: 131:055 Gender, Race, and Class in the U.S., two required GWSS electives, and at least half of the semester hours required for graduation

Before the seventh semester begins: at least two required GWSS electives, one GWSS theory course or one GWSS course with a transnational focus, and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: 131:105 Women’s Studies Practicum, one GWSS theory course or one GWSS course with a transnational focus, and at least one additional required GWSS elective

During the eighth semester: enrollment in all remaining course work in the major, including one additional required GWSS elective, 131:199 Senior Research Seminar or 131:198 Honors Senior Thesis (for honors students), all remaining General Education courses, and a sufficient number of semester hours required for graduation

Honors

Qualified students may work toward graduation with honors in gender, women’s, and sexuality studies. Honors students must maintain a g.p.a. of at least 3.50 in GWSS course work and a cumulative University of Iowa g.p.a. of at least 3.33. An honors thesis is required.

Soon after beginning work toward the major, a departmental honors student must select an upper-level course in which he or she will do preliminary research for the honors thesis; the course must count toward requirements for the GWSS major and may be a classroom experience or the practicum. The student must inform the course’s instructor of his or her intent to develop an honors project in the course so that the instructor may provide guidance to the student and, at the instructor’s discretion, may adjust the student’s course assignments in order to help the student prepare for the honors thesis.

After completing the preliminary research, students enroll in 131:198 Honors Senior Thesis. The course guides them through the process of formulating a topic and a research plan, conducting research for the thesis, writing the results, and responding to peer and instructor critique.

For information about honors study at Iowa, contact the University of Iowa Honors Program.

Minor

The minor in gender, women’s, and sexuality studies requires a minimum of 15 s.h. in course work associated with the department, including 12 s.h. in advanced courses taken at The University of Iowa. For the minor, 100-level courses are considered advanced. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass. Students may count a maximum of 3 s.h. of work for their major toward the GWSS minor.

The minor must include 131:010 Introduction to Gender, Women’s, and Sexuality Studies. The 12 s.h. of advanced work may include all 100-level courses, or it may include 131:055 Gender, Race, and Class in the U.S. plus 9 s.h. of 100-level courses. The department strongly advises students to include an approved theory course in the minor.

Graduate Programs

- Doctor of Philosophy in women’s studies
- Certificate in Gender, Women’s, and Sexuality Studies
The certificate program is open to University of Iowa graduate students working toward a degree; interested students should contact the GWSS director of graduate studies.

Admission to the Doctor of Philosophy program in women's studies is suspended. For degree requirements, see the 2010-11 General Catalog.

Certificate

The Certificate in Gender, Women’s, and Sexuality Studies requires 16 s.h., including a two-course core, several elective courses, and a capstone course (1 s.h.), for which students attend a GWSS conference and present their own research there. Students receive certificate advising from the GWSS director of graduate studies.

The certificate requires the following course work. Students may not use one course to satisfy more than one certificate requirement.

One approved course on theory of gender, women, or sexuality (3 s.h.).

### ELECTIVES

Cross-referenced GWSS elective courses (9 s.h.).

One of the electives must have a transnational or international focus and one must focus on diversity in the United States. At least one of the electives must be at the 200 level or above. Students may count up to 6 s.h. of elective credit earned in GWSS courses that are cross-referenced with their major department. They may count up to 6 s.h. of elective credit earned in course work taken by distance learning or in the Traveling Scholars Program.

Courses

**Core Courses**

131:010 Introduction to Gender, Women’s, and Sexuality Studies  
Introduction to feminist interdisciplinary study of women’s lives, with emphasis on race, class, sexual orientation; work, family, culture, political and social change. GE: Values, Society, and Diversity.

131:029 First-Year Seminar  
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities, field trips). Requirements: first- or second-semester standing.

131:049 Topics in Gender, Women’s, and Sexuality Studies  

131:055 Gender, Race, and Class in the U.S.  
How the intersection of gender, race, class affects individual experience, national ideology, social institutions; interdisciplinary perspective. GE: Values, Society, and Diversity.

131:105 Women’s Studies Practicum  
Experience in volunteer work for organizations that provide services for women. Prerequisites: 131:010.

131:110 Frameworks for the Study of Sexuality  
Theoretical perspectives on human sexualities drawn from medicine, law, social sciences, the humanities; cultural meanings of heterosexual, lesbian, gay, bisexual, transgender identities.

131:120 Lesbian, Gay, Bisexual, and Transgender Identities  
Historical and contemporary experiences of sexual minorities; identity, community, culture, art, politics, representation, diversity, assimilation.
131:150 Topics in Women's Studies
1,3 s.h.
Representative topics: American Indian/First Nations Women; population and the environment; feminism and the family; women, health, and healing; women of color.

131:151 Feminist Theory
3 s.h.
Historical and contemporary feminist analyses of women's position in culture and society; variety of theoretical approaches, political perspectives; contemporary issues, controversies. Prerequisites: 131:010.

131:153 Feminist Cultural Studies
3 s.h.
Intellectual/political project of feminist cultural studies; everyday practices and popular discourses critical for the formation of gender and sexuality in the United States. Requirements: 131:010 or graduate standing.

131:179 Independent Readings and Research in Women's Studies
arr.
Topic not covered in regular curriculum. Prerequisites: 131:010.

131:180 Women's Lives in Alternative Texts
3 s.h.
Work of contemporary comics creators; how they craft memoir-based texts that explore intersections of aging, sexuality, race, gender, and relationships. Same as 01J:180.

131:189 Contemporary American Women Writers
3 s.h.
Interdisciplinary study of contemporary American women writers whose works depict the shaping force of race, class, gender, and sexuality on individuals, families, and communities.

131:198 Honors Senior Thesis
arr.
Supervised research, writing. Requirements: honors standing and completion of course work for minor in women's studies.

131:199 Senior Research Seminar
3 s.h.
Design and development of individual creative or scholarly projects in the field of gender, women's and sexuality studies; emphasis on strengthening students' research and writing skills; synthesizing and extending work already completed in the major. Prerequisites: 131:010. Requirements: two women's studies courses numbered above 131:010.

131:200 Foundations for Feminist Inquiry I
3 s.h.
Theory, critique, methodology, practice.

131:205 Graduate Practicum
1 s.h.
Practicum experiences in a theoretical context. Repeatable.

131:250 Topics in Gender, Women's, and Sexuality Studies
3 s.h.
Special topics in women's studies.

131:279 Independent Study
arr.
Repeatable.

131:425 Ph.D. Thesis
arr.
Repeatable.

Cross-Referenced Courses

131:018 Gender and Society
3-4 s.h.
Role and status of women in society; sex differences, sex role socialization, theories about origin and maintenance of sexual inequalities, changes in social life cycle of women, implications for social institutions and processes; focus on contemporary United States. GE: Values, Society, and Diversity. Same as 034:018.
131:025 Gender, Race, and Criminal Justice
Ways that gender and race/ethnicity affect experiences with the criminal justice system in the United States; focus on role of social class and poverty; inequalities in police-citizen interactions, criminal justice processing, imprisonment, and other criminal justice supervision. Recommendations: some background in social science. Same as 034:025.

131:041 Gender Roles and Communication
Interactive relationships between gender and communication in contemporary U.S. society; multiple ways families, schools, and media perpetuate, negotiate, and contest gender roles; how we are part of those processes by looking at how we enact socially-created gender differences in public and private settings. Communication studies majors may apply this course to the following area requirement. AREA: Practice. Prerequisites: 036:001, 036:005, 036:012 or 036:070, 036:017 or 036:030, and 036:074. Requirements: g.p.a. of at least 2.50 and completion of Foundations of Communication requirement. Same as 036:041.

131:052 Literature, Culture, and Women
English majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: 18th- and/or 19th-Century Literature, or 20th- and/or 21st-Century Literature. Same as 008:052.

131:060 Women in Islam and the Middle East
Women in the Islamic community and in non-Muslim Middle Eastern cultures; early rise of Islam to modern times; references to women in the Qur’an and Sunnah, stories from Islamic history; women and gender issues. GE: International and Global Issues; Values, Society, and Diversity. Same as 032:052.

131:061 Sex and Popular Culture in the Postwar U.S.
Critical and historical introduction to representation of human sexuality in American popular culture from World War II to the present. GE: Values, Society, and Diversity. Same as 045:060.

131:065 Gender, Sexuality, and Media
Mediated representations of gender and sexuality (television, film, and internet) to understand how these complex and complicated codes influence the meaning of sex, sexuality, and gender; contemporary and historical examples used to engage texts that illuminate cultural conceptions of femininity, masculinity, heterosexuality, and homosexuality; cases that confuse and trouble the stability of these categories. Communication studies majors may apply this course to the following area requirement. AREA: Theory. Prerequisites: 036:001, 036:005, 036:012 or 036:070, 036:017 or 036:030, and 036:074. Requirements: g.p.a. of at least 2.50 and completion of Foundations of Communication requirement. Same as 036:075.

131:071 Sexual Ethics
Introduction to religion and ethics; examination of a range of secular, Jewish, and Christian perspectives on sexuality and sexual activity; perspectives of homosexuality and abortion that remain controversial in many cultures. Same as 032:071.

131:074 Inequality in American Sport
Sport experiences, barriers to participation based on sexism, racism, classism, ageism, heterosexism. Same as 028:074, 045:074.

131:075 Fertility and Reproduction
Exploration of when, why, how, and with whom Americans bear children, comparison to other developed and developing countries in the world; infertility and its treatments; ethics of surrogacy; voluntary childlessness; rapid rise of nonmarital childbearing in the U.S. and other countries; politics of childbirth; declining populations; rapid aging of rich where women have basically stopped having children. Same as 034:075.
131:078 Women, Sport, and Culture
Feminist analysis of girls’ and women’s sport experiences; reproduction of gender through sport, recent changes in women’s intercollegiate athletics, media representations of women in sport, feminist critiques, alternatives to sport. Same as 028:078.

131:095 Queer Rhetorics
Overview of queer theory and its application to different communicative situations including television, film, and everyday life; development of critical thinking skills in relation to cultural constructions of gender, sexuality, race, and other identity categories. Communication studies majors may apply this course to the following area requirement. AREA: Context. Prerequisites: 036:001, 036:005, 036:012 or 036:070, 036:017 or 036:030, and 036:074. Requirements: g.p.a. of at least 2.50 and completion of Foundations of Communication requirement. Same as 036:095.

131:107 Gendering India
Aspects of Indian culture, including nation, family, sexuality, work, and religion, through the lens of gender; Hindu India, differences in region, caste, and class. Same as 113:107.

131:108 Anthropology of Marriage and Family
Classic anthropological theories of kinship and marriage, including topics such as cousin marriage and incest; recent work on new reproductive technologies and transnational marriage. Same as 113:108.

131:109 Women in Antiquity
Attitudes toward women and the role of women in ancient Greek and Roman society; ancient authors, male and female, and modern critics. Same as 20E:109.

131:112 Anthropology of Sexuality
Practice, definition, and regulation of sex in different cultures and times; use of anthropological tools, including cross-cultural comparison and social constructionist analysis; how social and historical forces shape sex; how a range of topics relate to sexuality, including science, love, work, globalization, ethnicity, health, aging, pornography, and deviance; focus on ways that dynamics (i.e., class, race, gender norms) shape people’s culturally- and historically-specific ways of having and thinking about sex. Same as 113:112.

131:114 Performing Autobiography
Write and perform original pieces stemming from personal experiences and interests; readings and videos; genre of contemporary autobiographical performance as established artists have developed it; improvisational performance and writing exercises to foster deeper reflection on personal experiences; final staging of students’ original work. Same as 049:114.

131:125 Women and Gender in African History
Importance of female agency in African history; African women’s history in historiographical framework of women’s history, challenges historians face in exploring African women’s past; varied sources (e.g., novels, films, court records) from sub-Saharan Africa, urban and rural settings; current literature on African women, African women’s experiences in a comparative context. Same as 16W:125.

131:127 South Asian Sexual Cultures
How sexuality is embedded in kinship, economics, nation, and religion in South Asia, with focus on India; chastity, celibacy, romance, arranged marriage, nonnormative sexualities associated with courtesans and hijras. Prerequisites: 113:003 or 113:010 or 131:010. Same as 113:127.

131:131 Gender and Sexuality in East Asia
Conceptions of sex, gender, and sexuality in the religions of China, Korea, and Japan; asceticism and celibacy; sexual alchemy; the difference between male and female bodies and souls; intersexed persons; female saints and immortals; transgressive sexuality; gender and sexuality in colonial Asia; East Asian religions and postcolonial feminism. Same as 032:131.
131:133 The Anthropology of Women's Health 3 s.h.
How female gender intersects with culture, environment, and political economy to shape health and illness; reproductive health, violence, drug use, cancer; readings in anthropology, public health. Prerequisites: 113:003 or 113:010 or 131:010. Same as 113:133, 172:133.

131:134 Gender and Indian Diaspora 3 s.h.
General theories of diaspora, which have expanded from the Jewish experience to explain African and Asian diasporas; theories in context of Indian diaspora populations and their relationship to the homeland. Same as 113:134.

131:136 Sociology of Sexuality 3 s.h.
Sociological perspectives on sexuality, including theoretical and conceptual developments, empirical regularities, and social implications; sexual expression in the United States. Prerequisites: 034:001 or 034:002. Same as 034:135.

131:137 African American Women Writers 3 s.h.
Introduction to major African American women authors of the 19th, 20th, and 21st centuries; major debates of black feminist literary scholarship; analyze African American literary representations by reading novels, poetry, short stories, plays, relevant historical and critical texts. GE: Values, Society, and Diversity. Same as 129:150.

131:141 History of Feminist Anthropology 3 s.h.
Development and evolution of feminist critiques in cultural anthropology; readings from early studies by women ethnographers, classic writings that sought to give women cross-cultural visibility, recent experimental texts. Prerequisites: 113:003 or 131:010. Same as 113:141.

131:142 Mothers and Motherhood 3 s.h.
Treatment of motherhood; role of motherhood and devaluation of social status. Same as 113:105.

131:143 Women, Health, and Healing 3 s.h.
Women's experience as recipients and providers of health care; intersection of race, class, cultural variation, and women's health; reproductive and nonreproductive health concerns. Same as 113:182.

131:144 Politics of Reproduction 3 s.h.
Debates over women's reproductive experience, including its medicalization. Same as 113:140.

131:149 Transnational Feminism 3 s.h.
Evolution and impact of women's movements in different regions of the Third World. Same as 113:115.

131:152 Gender and Sexuality in the Ancient World 3 s.h.
Survey of gender and sexuality issues in the social, political, and religious life of ancient Greece and Rome; evidence from literature, the visual arts, archaeology. Requirements: completion of rhetoric requirement and sophomore standing. GE: Values, Society, and Diversity. Same as 20E:150.

131:154 Anthropology of Sexual Minorities 3 s.h.
Ethnographic studies of sexual minorities and anthropological approaches to lesbian, gay, bisexual, and transgendered persons and communities; behavior, identity, performativity, kinship, globalization, the HIV/AIDS pandemic. Requirements: junior, senior, or graduate standing. Same as 113:154.

131:157 Gender, Sexuality, and Human Rights 3 s.h.
History of gender and sexuality as components in international human rights activism and law; current debates, representative topics. Same as 016:157.

131:158 Sexuality in the United States 3 s.h.
131:159 Native American Women and Religious Change 3 s.h.
Native women’s diverse experiences and their roles in native societies, examined through contact experiences between native and nonnative peoples; changes in women’s roles in context of interactions between native people, missionaries, European colonists, and Americans; approaches to re-imaging women’s early contact roles presented in cultural narratives, archaeology, history, ethnography, and missionary records. Same as 032:158, 149:158.

131:160 Work and Family Institutions 3 s.h.
Contemporary problems in the integration of work and family life; origins of work-family conflict in process of industrialization; effects of job-family conflicts on mothers, fathers, children; cross-cultural differences in dealing with work-family conflict. Prerequisites: 034:001 or 034:002. Same as 034:162.

131:161 Gender and Violence 3 s.h.
Extent and nature of gendered violence, interpretation of patterns using feminist theory and perspectives on masculinities and heterosexism; examination of interpersonal violence, including criminal violence committed by women and men, violence against women and men (victimization), spousal/intimate partner abuse, youth gangs, bullying in schools, sexual violence, femicide, and genocide. Same as 034:143.

131:162 Latin American Women Writers 3 s.h.
Focus on 20th century; how Latin American women subjects view themselves through literature; textual practice specific to women; psychoanalytic approaches, contemporary feminist criticism. Requirements: at least one course taught in Spanish at the 100 level or above. Same as 035:144.

131:164 American Indian/First Nations Women 3 s.h.

131:165 Women Writing Culture 3 s.h.
Feminist ethnography and other kinds of feminist narratives that "write culture" while pushing the boundaries of how anthropologists define ethnography. Prerequisites: 113:003 or 131:010. Same as 113:180.

131:167 Gender and Sexuality in French Cinema 3 s.h.
Cultural, historical, semiotic approach to studying construction of gender identity and sexual codes in French cinema from 1920s to present. Taught in English. Prerequisites: 009:111 or 048:001 or 048:002 or 131:010. Same as 009:148, 048:167.

131:168 French Women Writers 3-4 s.h.
Survey of 20th-century French women writers, with emphasis on Simone de Beauvoir; broad range of literary works by writers including de Beauvoir, Colette, Marguerite Yourcenar, Nathalie Sarraute, Marguerite Duras, Sarah Kofman, Annie Ernaux, Christiane Rachefort; French feminist theorists who followed in de Beauvoir’s footsteps, including Helene Cixous, Julia Kristeva, Luce Irigaray. Prerequisites: 009:111 or 131:010. Same as 009:180.

131:170 Philosophy of the Body 3 s.h.
Philosophical treatment of the body; perspectives from classical, modern, and contemporary texts from Western philosophy, and texts from feminist theory, critical race theory, cultural studies, and disability studies. Prerequisites: 131:010. Same as 160:170.

131:171 Women and Power in the American Past 3 s.h.
American history through women’s eyes; interaction of biology, economics, politics, ideology; how traditional historical generalizations change when women’s experience is considered; legal history, women’s education. Same as 16A:171.
131:173 U.S. Women's History as the History of Human Rights
3-4 s.h.
History of human rights in the United States traced through the perspective of women; aspects of women's experience (social, political, intellectual) related to fundamental human rights—right to a nationality, right to life, liberty and personal security, right to freedom of movement, right to take part in the government of their country, right to own property; these and other rights specified by the United Nations in the Universal Declaration of Human Rights, 1948; different history of men and women enjoying these rights; how human rights have been constructed and experienced in the United States from the era of colonial settlement to present. Same as 045:173, 16A:173, 216:173.

131:181 Society and Gender in Europe 1200-1789
3 s.h.
Social and gender ideologies as inscribed in patterns of authority (household, church, state); ranges of human endeavor (intellectual, psychological, biological); community organization (social, economic, legal, sexual); their influence on concept of community. GE: Historical Perspectives. Same as 16E:125.

131:184 Black Global Metropolis: Sexual History
3 s.h.
Dispersion of people of African descent into the global metropolis, from expansion of port cities in the slave trade to industrialization of European and American cities, decolonization of the Third World, and proliferation of spatial cultures in contemporary geography; readings cover prostitution in colonial New York, sexual danger in Victorian London, jazz age Chicago, sexual psyches in Algiers, black gay expatriates in Paris, social science in Harlem and Puerto Rico ghettos, black/white sex in Johannesburg, transsexuals in Rio de Janeiro, Black Panther sexual politics in urban America, global hip-hop sexualities. Same as 129:184, 16A:184.

131:185 Global Women's Cinema
3 s.h.
Introduction to contemporary women's cinema and feminist filmmaking from around the world; emphasis on the post-1968 period and on cinema produced outside the United States. Prerequisites: 048:001 or 048:002 or 131:010. Same as 048:185.

131:186 Women and Nonfiction
3 s.h.
Issues of representation and self-representation by and about women through the study of documentary film and personal essay; focus on paired texts in literature and cinema for analysis and critical reflection; development along historical and transnational lines of inquiry to explore literary and cinematic depictions of racial and cultural identity; motherhood, friendship, and the family; women during wartime, violence against women, domestic and industrial women's work. Requirements: junior or senior standing. Same as 048:187.

131:187 Sex and Gender in Performance
3 s.h.
Relationship between sex and gender in the performing body across a range of public venues, including stage, film, athletic events, and social spaces; articles, texts, plays, films, television, and videos; attendance at live performances of theatre, sports, and other events scheduled in the University and local community; discussion format. Same as 049:188.

131:188 Prose by Women Writers
3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: 18th- and/or 19th-Century Literature, or 20th- and/or 21st-Century Literature. Same as 008:188.

131:192 Culturally Diverse Theatre
3 s.h.

131:194 Introduction to Feminist Criticism
3 s.h.
Introduction to feminist interpretation of literature, feminist literature, feminist theories, and uses of literature in forming feminist politics. English majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: 20th- and/or 21st-Century Literature. Same as 008:194.
**131:204 Feminist Research Seminar**
Feminist research methodologies; how to conduct original research, write a research proposal and research paper, read and criticize others’ work. Repeatable. Same as 016:277.

**131:206 Gender and Race in Nineteenth-Century U.S.**
arr.

**131:207 French Theory and the Politics of Gender**
3 s.h.
Introduction to structuralist, poststructuralist, and deconstructionist theory; influence of post-WWII French thought on the development of French and gender theory.

**131:220 Seminar: Feminist Anthropology**
3 s.h.
Theory, methods, research, epistemology from a feminist perspective. Same as 113:220.

**131:222 Reading Transnational Feminist Theory**
3 s.h.
Issues in transnational feminist scholarship, including colonialism, globalization, the nation-state, religion, cultural traditions, and human rights, in global and U.S. domestic contexts; interdisciplinary readings with focus on anthropology, other social sciences. Same as 113:222.

**131:223 Feminist Medical Anthropology**
3 s.h.
Directions feminists have taken in medical anthropological scholarship; focus on ethnographies that have become classics of the genre and on influential theoretical and applied work. Same as 113:223.

**131:225 Readings: History of Sexuality**
arr.
History of sexuality within the family, its move into the marketplace; social customs and taboos, methods of birth control and abortion, religion, medical and psychological writings, state policies. Same as 016:225.

**131:233 Readings: Women, Men, and Gender in Modern Europe**
arr.

**131:243 Feminist Cultural Studies**
3 s.h.

**131:245 Seminar: Feminist Ethnography**
3 s.h.
Feminist critiques of traditional ethnographies, informed by contemporary feminisms. Prerequisites: 113:220 or 131:220. Same as 113:221.

**131:254 Seminar: Women in Sport**
3 s.h.
Women’s sport involvement from ancient times to present; focus on social class, attitudes, religion, race, ethnicity, medical opinion, economic considerations, political events, educational philosophies that have influenced women’s sport participation. Same as 028:278, 045:278.

**131:256 Gender Stratification Seminar**
3 s.h.
Occupational gender segregation; gender gap in pay; role of family caregiving in women’s lower pay; devaluation of caregiving work; comparable worth. Same as 034:256.

**131:258 Feminist Critical Theory**
3 s.h.
Questions of difference, the body, agency, identity politics, gender performativity, power as both productive and oppressive; perspectives from texts in poststructuralist and feminist philosophy. Same as 160:258.

**131:264 Postcolonial Feminist Theory**
3 s.h.
Role of colonial histories and postcolonial legacies on past and contemporary relations of power in varied geographical contexts, through interdisciplinary feminist perspective; processes of gender and racialization relative to uneven global flows of media, capital, people. Requirements: 131:151 or cultural studies course. Same as 010:264, 160:280.
131:266 Gender Inequalities 3 s.h.
Current sociological research on public policies that affect family life and well-being: divorce and child custody policies, teen pregnancy and abortion, family poverty, child care and work-family policies. Same as 034:266.

131:270 Readings in the History of Women and Gender in the U.S.A. arr.

131:273 Seminar: Language, Gender, and Sexuality 3 s.h.
Role of language and discourse in cultural constructions of gender identities and relations, including domination and subordination; theoretical perspectives, methodological approaches that have shaped thought on the language/gender nexus. Prerequisites: 113:220 or 131:220. Same as 103:221, 113:273.

131:290 Feminist Perspectives on Biology and Culture 3 s.h.
Explores feminist analyses of the cultural and historical situatedness of scientific knowledge; topics range from human evolution and primatology to developmental biology and genetics to nuclear physics. Same as 113:290.

131:332 Critical Ethnography 3 s.h.
How power relations constitute the work of ethnographic research; ethnography as a rhetorical form—how ethnographic inscription renders self, other, culture, and the world intelligible in ways that reinscribe and/or challenge dominant social relations; axes of power such as race, class, gender, sexuality, and nation within postcolonial, feminist, and antiracist approaches to ethnographic/autoethnographic theory and praxis; negotiating researcher privilege and epistemic violence; crisis of representation. Same as 010:332, 036:378, 160:332.
General Education Program

Web site: http://clas.uiowa.edu/students/general-education-program-requirements

The College of Liberal Arts and Sciences designed the General Education Program to provide students with a solid foundation on which to build their educations, careers, and ultimately, their lives as educated people. General Education courses develop fundamental skills. They provide a foundation in critical thinking, reading, and writing. Advanced General Education courses allow students to pursue a wide range of interests in or outside of their majors.

All students in the College of Liberal Arts and Sciences who wish to earn an undergraduate degree—Bachelor of Arts (B.A.), Bachelor of Science (B.S.), Bachelor of Fine Arts (B.F.A.), Bachelor of Liberal Studies (B.L.S.), or Bachelor of Music (B.M.)—must complete the requirements of the CLAS General Education Program.

General Education Areas and Requirements

The General Education Program has 10 required areas, grouped into three categories. Students must fulfill the requirements in each General Education area.

Communication and literacy:
- Rhetoric: a minimum of 4 s.h.
- World Languages: required credit varies by language; see "World Languages" below.
- Interpretation of Literature: a minimum of 3 s.h.

Natural, quantitative, and social sciences:
- Natural Sciences: a minimum of 7 s.h.; must include one lab.
- Quantitative or Formal Reasoning: a minimum of 3 s.h.
- Social Sciences: a minimum of 3 s.h.

Culture, society, and the arts:
- Historical Perspectives: a minimum of 3 s.h.
- International and Global Issues: a minimum of 3 s.h.
- Literary, Visual, and Performing Arts: a minimum of 3 s.h.
- Values, Society, and Diversity: a minimum of 3 s.h.

Entering students fulfill the Rhetoric requirement stated on their degree audit. Most students choose one of three foundation courses to fulfill the Interpretation of Literature requirement. All students fulfill the remaining eight General Education area requirements by choosing from each area’s list of approved courses.

Students may count transfer credit and/or credit by exam toward some General Education Program requirements. See General Education Policies for details regarding use of transfer credit, credit by exam, and other policies for how General Education requirements may be fulfilled.

Communication and Literacy

Rhetoric

Rhetoric courses develop speaking, writing, listening, and critical reading skills and build competence in research, analysis, and argumentation.

All entering first-year students are required to complete 010:003 Rhetoric (4 s.h.). Because rhetorical skills lay the foundation for further study at the University, most students register for 010:003 during their first year at Iowa. Students in some majors, such as English or journalism and mass communication, enroll in 010:003 during their first semester.

Students who must enroll in English as a Second Language (ESL) courses as determined by their English proficiency evaluation must complete all ESL courses before they may register for 010:003 Rhetoric.

Students who have transfer credit in composition, speech, and argumentation but have not been granted an A.A. degree must complete the equivalent of 010:003 Rhetoric and often must take 010:004 Writing and Reading or 010:006 Speaking and Reading in addition to their transfer courses in composition and/or speech.

Each entering student’s degree audit shows the course(s) he or she must complete in order to fulfill the Rhetoric requirement.

The following courses are approved for the Rhetoric area.

<table>

</tr>
<tr>
<td>010:006 Speaking and Reading</td>
<td>3 s.h.</td>
</tr>
</tbody>
</table>

Interpretation of Literature

Courses in the Interpretation of Literature area expand skills learned in Rhetoric. They focus on the major genres of literature (short and long fiction, poetry, drama, essay) and improve
students’ abilities to read and analyze a variety of texts.

All students must complete at least 3 s.h. of course work in the Interpretation of Literature area. The following courses are approved for the area.

- **08G:001 The Interpretation of Literature** 3 s.h.
- **009:005 Texts and Contexts: French-Speaking World** 3 s.h.
- **009:007 Nature/Ecology French Philosophy and Fiction** 3 s.h.

**World Languages**

Courses in the World Languages area provide students with speaking, listening, reading, and writing skills in a second language as well as knowledge of the culture(s) in which the language is spoken. To fulfill the World Languages requirement, students must:

- complete the fourth year of a world language in high school; or
- complete the last course in the designated course sequence of an approved world language at The University of Iowa or the equivalent course at another college or university; or
- pass an achievement test or evaluation that measures proficiency in a foreign language equivalent to that usually attained through four semesters of college-level language study.

For information about proficiency examinations and guidelines for taking them, see the World Languages web page. The page also provides information about how students whose first language is not English may fulfill the World Languages requirement.

Once students have completed the World Languages requirement, they may earn up to 8 s.h. of additional credit in language study; see the Furthering Language Incentive Program (FLIP) web page.

Students may use the following language course sequences to fulfill the World Languages requirement. To avoid duplication or regression, consult the appropriate language department before registering for courses.

**American Sign Language**

Courses in American Sign Language (ASL) are offered by the American Sign Language (p. 46) Program. The following sequence fulfills the General Education World Languages requirement.

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>158:011 American Sign Language I</td>
<td>4 s.h.</td>
</tr>
<tr>
<td>158:012 American Sign Language II</td>
<td>4 s.h.</td>
</tr>
<tr>
<td>158:013 American Sign Language III</td>
<td>4 s.h.</td>
</tr>
<tr>
<td>158:014 American Sign Language IV</td>
<td>4 s.h.</td>
</tr>
</tbody>
</table>

Students with previous knowledge of American Sign Language should consult the ASL program for placement.

**Arabic**

Courses in Arabic are offered by the Department of French and Italian (p. 354). The following sequence fulfills the General Education World Languages requirement.

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>195:101 Elementary Modern Standard Arabic I</td>
<td>5 s.h.</td>
</tr>
<tr>
<td>195:102 Elementary Modern Standard Arabic II</td>
<td>5 s.h.</td>
</tr>
<tr>
<td>195:111 Intermediate Modern Standard Arabic I</td>
<td>5 s.h.</td>
</tr>
<tr>
<td>195:112 Intermediate Modern Standard Arabic II</td>
<td>5 s.h.</td>
</tr>
</tbody>
</table>

**Chinese**

Courses in Chinese are offered by the Department of Asian and Slavic Languages and Literatures (p. 122). Students may use varied combinations of Chinese language courses approved for General Education to fulfill the World Languages requirement. For students without previous knowledge of Chinese, the department recommends the following sequence.

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>039:008 First-Year Chinese: First Semester</td>
<td>5 s.h.</td>
</tr>
<tr>
<td>039:009 First-Year Chinese: Second Semester</td>
<td>5 s.h.</td>
</tr>
<tr>
<td>039:105 Second-Year Chinese: First Semester</td>
<td>5 s.h.</td>
</tr>
<tr>
<td>039:106 Second-Year Chinese: Second Semester</td>
<td>5 s.h.</td>
</tr>
</tbody>
</table>

Heritage learners and students who have studied Chinese abroad may be able to complete the sequence with 039:107 Accelerated Second-Year Chinese: First Semester and Loading...Loading.... Consult the department for more information.

**French**

Courses in French are offered by the Department of French and Italian (p. 354). Students may use varied combinations of French language courses approved for General Education to fulfill the World Languages requirement. For students without previous knowledge of French, the department recommends the following sequence.
Students with previous knowledge of French may be able to fulfill the requirement by substituting 009:010 First-Year French Review for 009:001 and 009:002 in the sequence above. Some students may be evaluated as ready for 009:011 or 009:012. Consult the department for appropriate placement.

**German**

Courses in German are offered by the Department of German (p. 423). Students may use varied combinations of German language courses approved for General Education to fulfill the World Languages requirement. For students without previous knowledge of German, the department suggests the following sequence.

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Name</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>013:011</td>
<td>Elementary German I</td>
<td>4 s.h.</td>
</tr>
<tr>
<td>013:012</td>
<td>Elementary German II</td>
<td>4 s.h.</td>
</tr>
<tr>
<td>013:021</td>
<td>Intermediate German I</td>
<td>4 s.h.</td>
</tr>
<tr>
<td>013:022</td>
<td>Intermediate German II</td>
<td>4 s.h.</td>
</tr>
</tbody>
</table>

Students with previous knowledge of German may be able to fulfill the requirement by substituting 013:014 First-Year German Review for 013:011 and 013:012 in the sequence above. Some students may be evaluated as ready for 013:021 or 013:022. Consult the department for appropriate placement.

The department also offers accelerated intensive courses, 013:013 Intensive Elementary German and 013:025 Intensive Intermediate German, which may be appropriate for students with strong language learning abilities or experience. The intensive courses may be combined with nonintensive courses to create other sequences that may be used to fulfill the General Education World Languages requirement. Consult the department to identify an appropriate course sequence.

**Greek**

Courses in Greek are offered by the Department of Classics (p. 199). Students without previous knowledge of Greek should consult the department for appropriate placement.

**Hindi**

Courses in Hindi are offered by the Department of Asian and Slavic Languages and Literatures (p. 122). Students without previous knowledge of Hindi should fulfill the General Education World Languages requirement with the following sequence. Each of these courses is open to entering first-year students.

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Name</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>039:123</td>
<td>First-Year Hindi: First Semester</td>
<td>5 s.h.</td>
</tr>
<tr>
<td>039:124</td>
<td>First-Year Hindi: Second Semester</td>
<td>5 s.h.</td>
</tr>
<tr>
<td>039:126</td>
<td>Second-Year Hindi: First Semester</td>
<td>4 s.h.</td>
</tr>
<tr>
<td>039:127</td>
<td>Second-Year Hindi: Second Semester</td>
<td>4 s.h.</td>
</tr>
</tbody>
</table>

Students with previous knowledge of Hindi should consult the department for appropriate placement.

**Italian**

Courses in Italian are offered by the Department of French and Italian (p. 354). Students without previous knowledge of Italian should fulfill the General Education World Languages requirement with the following sequence.

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Name</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>018:001</td>
<td>Elementary Italian</td>
<td>5 s.h.</td>
</tr>
<tr>
<td>018:002</td>
<td>Elementary Italian II</td>
<td>5 s.h.</td>
</tr>
<tr>
<td>018:011</td>
<td>Intermediate Italian</td>
<td>4 s.h.</td>
</tr>
<tr>
<td>018:012</td>
<td>Intermediate Italian II</td>
<td>4 s.h.</td>
</tr>
</tbody>
</table>

Students with strong language learning abilities or a background in another Romance language may be able to complete the requirement by substituting 018:103 Intensive Elementary Italian for 018:001 and 018:002 in the sequence above. Consult the department for appropriate placement.

**Japanese**

Courses in Japanese are offered by the Department of Asian and Slavic Languages and Literatures (p. 122). Students may use varied combinations of Japanese language courses approved for General Education to fulfill the World Languages requirement. For students without previous knowledge of Japanese, the department recommends the following sequence.

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Name</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>39J:010</td>
<td>First-Year Japanese: First Semester</td>
<td>5 s.h.</td>
</tr>
<tr>
<td>39J:012</td>
<td>First-Year Japanese: Second Semester</td>
<td>5 s.h.</td>
</tr>
</tbody>
</table>
Colleges and Other Academic Units

39J:101 Second-Year Japanese: First Semester 4-5 s.h.
39J:102 Second-Year Japanese: Second Semester 4-5 s.h.

Students with previous knowledge of Japanese may be able to complete the requirement by substituting 39J:011 Elementary Japanese: Review for 39J:010 in the sequence above. Consult the department for more information.

Korean

Courses in Korean are offered by the Department of Asian and Slavic Languages and Literatures (p. 122). For students without previous knowledge of Korean, the department recommends the following sequence.

039:040 First-Year Korean: First Semester 4 s.h.
039:041 First-Year Korean: Second Semester 4 s.h.
039:042 Second-Year Korean: First Semester 4 s.h.
039:043 Second-Year Korean: Second Semester 4 s.h.

Students with previous knowledge of Korean should consult the department for appropriate placement.

Latin

Courses in Latin are offered by the Department of Classics (p. 199). Students without previous knowledge of Latin should fulfill the General Education World Languages requirement with the following sequence.

20L:001 Elementary Latin I 3-5 s.h.
20L:002 Elementary Latin II 3-5 s.h.
20L:011 World of Cicero 3 s.h.
20L:012 Golden Age of Roman Poetry 3 s.h.

Some students may be able to fulfill the requirement by substituting 20L:005 Accelerated Latin for 20L:001 and 20L:002 in the sequence above. Students who have taken 20L:001 and 20L:002 should not enroll in 20L:005. Consult the department for appropriate placement.

Portuguese

Courses in Portuguese are offered by the Department of Spanish and Portuguese (p. 722). Only one sequence in Portuguese is approved to fulfill the General Education World Languages requirement. Both courses in the sequence are open to entering first-year students.

038:100 Accelerated Elementary Portuguese 6 s.h.
038:101 Accelerated Intermediate Portuguese 6 s.h.

041:001 First-Year Russian I 5 s.h.
041:002 First-Year Russian II 5 s.h.
041:003 Second-Year Russian I 4 s.h.
041:004 Second-Year Russian II 4 s.h.

Students with previous knowledge of Russian should consult the department for appropriate placement.

Sanskrit

Courses in Sanskrit are offered by the Department of Asian and Slavic Languages and Literatures (p. 122). Students without previous knowledge of Sanskrit should fulfill the General Education World Languages requirement with the following sequence. Each of these courses is open to entering first-year students.

039:110 First-Year Sanskrit: First Semester 4 s.h.
039:111 First-Year Sanskrit: Second Semester 4 s.h.
039:112 Second-Year Sanskrit: First Semester 3 s.h.
039:113 Second-Year Sanskrit: Second Semester 3 s.h.

Students with previous knowledge of Sanskrit should consult the department for appropriate placement.

Spanish

Courses in Spanish are offered by the Department of Spanish and Portuguese (p. 722). Students may use varied combinations of Spanish language courses approved for General Education to fulfill the General Education World Languages requirement. For students without previous knowledge of Spanish, the department recommends the following sequence.

035:001 Elementary Spanish I 5 s.h.
035:002 Elementary Spanish II 5 s.h.
035:011 Intermediate Spanish I 5 s.h.
035:012 Intermediate Spanish II 5 s.h.

Students with previous knowledge of Spanish may be able to fulfill the requirement by substituting 035:005 Elementary Spanish Review for 035:001 and 035:002 in the sequence above.
The accelerated course 035:013 Accelerated Intermediate Spanish, which combines 035:011 and 035:012, may be appropriate for some students.

Students with previous knowledge of Spanish should take the Spanish Foreign Language Placement Test to help determine proper placement.

**Swahili**

Courses in Swahili are offered by the Department of French and Italian (p. 354). The following sequence fulfills the General Education World Languages requirement. Each of these courses is open to entering first-year students.

- 211:125 Elementary Swahili I 3-4 s.h.
- 211:126 Elementary Swahili II 3-4 s.h.
- 211:127 Intermediate Swahili I 3-4 s.h.
- 211:128 Intermediate Swahili II 3-4 s.h.

Students with previous knowledge of Swahili should consult the department for placement.

**OTHER COURSE SEQUENCES**

A student who successfully completes a four-semester world language sequence that has not been approved for General Education may have the sequence substituted for a proficiency test to fulfill the General Education requirement.

Students who complete a world language sequence this way should notify the department that offers the sequence; the department will contact Graduation Analysis, which will update the student’s degree audit to show fulfillment of the World Languages requirement.

**Natural, Quantitative, and Social Sciences**

**Natural Sciences**

Courses in the Natural Sciences area explore the scope and major concepts of a scientific discipline. Students learn the attitudes and practices of scientific investigators: logic, precision, experimentation, tentativeness, and objectivity. In courses with a laboratory component, students gain experience in the methods of scientific inquiry.

All students must complete at least 7 s.h. of course work in the Natural Sciences area, including at least one natural science lab component. The following courses are approved for the area; courses with a lab component are noted “(lab).”

<table>
<thead>
<tr>
<th>Course</th>

</tbody>
</table>
Quantitative or Formal Reasoning

Courses in the Quantitative or Formal Reasoning area help develop analytical skills through the practice of quantitative or formal symbolic reasoning. Courses focus on presentation and evaluation of evidence and argument; understanding the use and misuse of data; and organization of information in quantitative or other formal symbolic systems, including those used in computer science, linguistics, mathematics, philosophy, and statistics.

All students must complete at least 3 s.h. of course work in the Quantitative or Formal Reasoning area. Students may fulfill this requirement of the General Education Program by completing a course that lists an approved course as a prerequisite. The following courses are approved for the area.

Social Sciences

Courses in the Social Sciences area focus on human behavior and the institutions and social systems that shape and are shaped by that behavior. Courses provide an overview of one or more social science disciplines, their theories, and methods.

All students must complete at least 3 s.h. of course work in the Social Sciences area. The following courses are approved for the area.

032:001 Judaism, Christianity, and Islam 3 s.h.

Culture, Society, and the Arts

Historical Perspectives

Courses in the Historical Perspectives area help students comprehend the historical processes of change and continuity; develop the ability to generalize, explain, and interpret historical change; and understand the past in its own terms.

All students must complete at least 3 s.h. of course work in the Historical Perspectives area. The following courses are approved for the area.

01H:001 Art and Visual Culture 3 s.h.
01H:005 Western Art and Culture Before 1400 3 s.h.
032:025/016:035 Medieval Religion and Culture 3 s.h.
032:026/016:036 Modern Religion and Culture 3 s.h.
041:093 Slavic Folklore 3 s.h.
041:094 Religion and Culture of Slavs 3 s.h.
049:002 Theatre and Society: Ancients and Moderns 3 s.h.
049:003 Theatre and Society: Romantics and Rebels 3 s.h.
049:112 History of Theatre and Drama I 3 s.h.
049:113 History of Theatre and Drama II 3 s.h.
113:012 Introduction to Prehistory 3 s.h.
143:051 Honors Seminar in Historical Perspectives 3 s.h.

International and Global Issues

Courses in the International and Global Issues area focus predominantly on countries or issues outside the United States, encouraging students to understand contemporary issues from an international perspective. Students develop knowledge of one or more contemporary global or international issues, gain a greater awareness of varied international perspectives, and improve their skills of analysis and critical inquiry.

All students must complete at least 3 s.h. of course work in the International and Global Issues area. The following courses are approved for the area.

01H:002 Arts of Africa 3 s.h.
01H:004 Masterpieces: Art and Cultural Paradigms 3 s.h.

011:002 Arts of Africa 3 s.h.
009:030 Cultural Misunderstandings: France and U.S.A. 3 s.h.
013:115 Contemporary German Civilization 3 s.h.
13E:120 Germany in the World 3 s.h.
016:003 Western Civilization III 3-4 s.h.
016:005/039:055 Civilizations of Asia: China 3 s.h.
016:006/039:056 Civilizations of Asia: Japan 3 s.h.
016:007/039:057 Civilizations of Asia: South Asia 3-4 s.h.
016:011 Issues in Human History: The Vietnam War in Historical Perspective 3 s.h.
016:028 The World Since 1945 3 s.h.
16E:156/13E:126 Germany Since 1914: Weimar, Hitler, and After 4 s.h.
16E:179 Soviet Union 1945-1991 3 s.h.
16W:121/129:164 African History Since 1880 3 s.h.
16W:198/039:196 China Since 1927 3 s.h.
030:041 Introduction to the Politics of Russia and Eurasia 3 s.h.
030:043 Introduction to Politics in the Muslim World 3 s.h.
030:045 Introduction to Comparative Politics 3 s.h.
030:060 Introduction to International Relations 3 s.h.
030:061 Introduction to American Foreign Policy 3 s.h.
030:140 Government and Politics of Europe 3 s.h.
030:141 Russian Politics 3 s.h.
030:143 Government and Politics of the Far East 3 s.h.
030:144 Latin American Politics 3 s.h.
032:030 Introduction to Islamic Civilization 3 s.h.
032:052/131:060 Women in Islam and the Middle East 3 s.h.
032:155 Human Rights and Islam 3 s.h.
041:099 Russia Today 3 s.h.
044:010 Globalization and Geographic Diversity 3 s.h.
044:019 Contemporary Environmental Issues 3 s.h.
044:030 The Global Economy 3 s.h.
044:161 African Development 3 s.h.
103:045/113:045 Language Rights 3 s.h.
113:010 Anthropology and Contemporary World Problems 3 s.h.
113:113 Human Impacts on the Environment 3 s.h.
113:116 Urban Anthropology 3 s.h.
113:131 Latin American Economy and Society 3 s.h.
143:052 Honors Seminar in International and Global Issues 3 s.h.

Literary, Visual, and Performing Arts

Courses in the Literary, Visual, and Performing Arts area provide students with opportunities to appreciate the arts and to analyze them within their historical and theoretical contexts. They also help students develop the analytic, expressive, and imaginative abilities necessary for understanding, appreciating, and creating art.

All students must complete at least 3 s.h. of course work in the Literary, Visual, and Performing Arts area. The following courses are approved for the area.

018:001 Elements of Art 3 s.h.
018:040 Elements of Jewelry and Metal Arts 3 s.h.
018:080 Elements of Printmaking 3 s.h.
018:090 Elements of Sculpture 3 s.h.
01C:060 Exploring Forms in Clay I 3 s.h.
01H:001 Art and Visual Culture 3 s.h.
01H:002 Arts of Africa 3 s.h.
01H:004 Masterpieces: Art and Cultural Paradigms 3 s.h.

**Values, Society, and Diversity**

Courses in the Values, Society, and Diversity area explore fundamental questions about the human experience from a variety of perspectives. Students consider topics in relation to their own values and actions and gain a deeper appreciation of how cultural differences arise and of the importance of diversity.

All students must complete at least 3 s.h. of course work in the Values, Society, and Diversity area.
area. The following courses are approved for the area.

Geography

Chair
Marc P. Armstrong

Professors
Marc P. Armstrong, David A. Bennett, George P. Malanson, R. Rajagopal, Gerard Rushton

Professors emeriti
James B. Lindberg, Michael L. McNulty, David R. Reynolds

Associate professors
Marc Linderman, Kathleen Stewart

Associate professor emerita
Rebecca S. Roberts

Assistant professors
Margaret Carrel, Heather Sander, Eric Tate

Adjunct assistant professors
Naresh Kumar, Marian Muste, Mary P. Skopec, Peter J. Weyer

Lecturer
Claire E. Pavlik

Undergraduate degrees: B.A., B.S. in Geography
Undergraduate nondegree program: Minor in Geography
Graduate degrees: M.A., Ph.D. in Geography
Web site: http://www.uiowa.edu/~geog

Geography is concerned with place and environment and the ongoing processes of change within and between social and physical systems. Geography’s importance to scholarly inquiry is rooted in the complexity of social and environmental problems. Three concepts at the core of the discipline—space, place, and scale—provide theoretical constructs and methodological tools for a science that investigates the complex character of social and environmental phenomena.

Geographers examine issues such as distribution and consumption of natural resources, air and water quality, climate change, and ecosystem dynamics, growth and development of urban areas, population dynamics, politics and practice of international development, and social justice. They view society and the environment as a physical/social/cultural system. They apply uniquely geographical perspectives and tools, as well as knowledge from other social and scientific disciplines, to analyze the emergent properties of these systems.

Department of Geography graduates find employment opportunities in government, nongovernmental organizations, and business. For example, many geographers are employed in resource management, urban and regional development, site selection, and market area analysis. They analyze problems in the distribution and interactions among physical, ecological, social, and political systems.

Geography students acquire skills in computer-based cartography and geographic information systems (GIS) software used to investigate and solve many environmental and social problems. Opportunities for graduates with GIS training are growing rapidly in both private and governmental organizations.

The geography faculty has developed an undergraduate instructional program that serves students majoring or minoring in geography as well as students in other disciplines. Courses in geography are commonly required for students preparing to teach at the elementary and secondary school levels and for those who want to pursue careers in urban and regional planning. They also provide a background for many related professions, including law, health care, environmental or transportation engineering, and international business.

Geography students use the University’s Geographic Information System Instructional Lab (GISIL) for GIS instruction and research. The lab is located in the Department of Geography; see "Facilities and Resources" later in this Catalog section.

The Department of Geography participates in a number of University of Iowa interdisciplinary programs that have international, area studies, urban, or environmental components. It also participates in the University’s internship program for students; see "Internships" later in this Catalog section.

Undergraduate Programs

• Major in geography (Bachelor of Arts, Bachelor of Science)
• Minor in geography

Bachelor of Arts, Bachelor of Science

The Bachelor of Arts with a major in geography requires a total of 120 s.h., including at least 35-39 s.h. of work for the major. The Bachelor of Science with a major in geography requires a minimum of 120 s.h., including at least 43-47 s.h. of work for the major. Students choose one of four tracks; credit required for the major depends on the student’s choice of track.
The major in geography (either B.A. or B.S.) is appropriate preparation for advanced training or careers in geography. Students with strong interest in quantitative analysis and model building should pursue the Bachelor of Science and are encouraged to master an appropriate computer programming language.

All students majoring in geography complete a common set of foundation courses in addition to the requirements for their choice of track: geography and social change, environmental studies, geographic information science, or sustainability. Bachelor of Science students take additional mathematics course work.

All students must complete the College of Liberal Arts and Sciences General Education Program (p. 381).

Transfer students majoring in geography must earn a minimum of 15 s.h. for the major in residence at The University of Iowa. Consistent with the CLAS maximum hours rule, students may count no more than 50 s.h. earned in their major department toward graduation.

### Common Requirements (B.A. and B.S.)

All geography majors must complete the following courses.

All of these:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>044:001</td>
<td>Introduction to Human Geography</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>044:003</td>
<td>The Global Environment</td>
<td>3-4 s.h.</td>
</tr>
<tr>
<td>044:005</td>
<td>Foundations of GIS</td>
<td>3 s.h.</td>
</tr>
</tbody>
</table>

One of these, in addition to any course required to fulfill a track requirement:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>044:010</td>
<td>Globalization and Geographic Diversity</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>044:011</td>
<td>Population Geography</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>044:015</td>
<td>Introduction to Political Geography</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>044:019</td>
<td>Contemporary Environmental Issues</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>044:030</td>
<td>The Global Economy</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>044:035</td>
<td>World Cities</td>
<td>3 s.h.</td>
</tr>
</tbody>
</table>

One of these:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>044:109</td>
<td>Introduction to Geographic Visualization</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>044:110</td>
<td>GIS for Environmental Studies: Introduction</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>044:112</td>
<td>Mapping American Cities and Regions</td>
<td>3 s.h.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>044:180</td>
<td>Field Methods in Physical Geography</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>044:181</td>
<td>Field Methods: Mapping and Mobile Computing</td>
<td>3 s.h.</td>
</tr>
</tbody>
</table>

One of these:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>044:150</td>
<td>Senior Project Seminar</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>044:151</td>
<td>Senior Thesis</td>
<td>3 s.h.</td>
</tr>
</tbody>
</table>

### STATISTICS FOR BACHELOR OF ARTS STUDENTS

Bachelor of Arts students must complete a minimum of 3 s.h. in statistics by taking one of the following courses or a statistics course equivalent to or numbered above one of these.

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>07P:143/22S:102</td>
<td>Introduction to Statistical Methods</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>22S:008</td>
<td>Statistics for Business</td>
<td>4 s.h.</td>
</tr>
<tr>
<td>22S:025/07P:025</td>
<td>Elementary Statistics and Inference</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>22S:039</td>
<td>Probability and Statistics for the Engineering and Physical Sciences</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>22S:101</td>
<td>Biostatistics</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>22S:130</td>
<td>Introduction to Mathematical Statistics I</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>22S:131</td>
<td>Introduction to Mathematical Statistics II</td>
<td>3 s.h.</td>
</tr>
</tbody>
</table>

### STATISTICS FOR BACHELOR OF SCIENCE STUDENTS

Bachelor of Science students must complete a minimum of 3 s.h. in statistics by taking one of the following courses or a statistics course equivalent to or numbered above one of these.

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>07P:143/22S:102</td>
<td>Introduction to Statistical Methods</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>22S:130</td>
<td>Introduction to Mathematical Statistics I</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>22S:131</td>
<td>Introduction to Mathematical Statistics II</td>
<td>3 s.h.</td>
</tr>
</tbody>
</table>

### ADDITIONAL BACHELOR OF SCIENCE REQUIREMENT

Bachelor of Science students complete one of the following mathematics sequences.

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>22M:015-22M:016</td>
<td>Mathematics for the Biological Sciences - Calculus for the Biological Sciences</td>
<td>8 s.h.</td>
</tr>
<tr>
<td>22M:025-22M:026</td>
<td>Calculus I-II</td>
<td>8 s.h.</td>
</tr>
</tbody>
</table>
Tracks (B.A. and B.S.)

All geography majors must complete one of the four tracks described below: geography and social change, environmental studies, geographic information science, or sustainability. Students should pay close attention to prerequisites for the upper-level courses in each track so that they can develop a study plan that allows them to complete their major in a timely way. Students in the environmental studies or geography and social change tracks who wish to gain additional experience in theory and application of geographic information systems (GIS) should take 044:113 Principles of Geographical Information Systems and at least an additional 6 s.h. in GIS-based courses offered by the Department of Geography.

Geography and Social Change Track

The geography and social change track requires a minimum of 14 s.h. It is designed for students preparing for positions in government, nongovernment organizations, international development agencies, and business. It also provides preparation for graduate study in geography or planning, or for professional programs such as law, business, or policy analysis. The track provides an understanding of increasing globalization, including processes of urban and regional development or underdevelopment; the roles of elites, classes, institutions, and social movements; the role of the natural environment in effecting social change in different parts of the world; and the processes through which policy decisions are reached. Course work in the track covers social and economic theories of location and regional formation, methods of spatial analysis and geographic modeling, global and regional political economy, and theories of community conflict and social change.

Students develop requisite skills in quantitative analysis and the development, management, and application of geographic information systems and computer methods. They have opportunities to work on applied problems, such as assessing sites for their growth potential, identifying the best locations for service facilities, evaluating the impact of major projects, and forecasting the populations of small areas. The geography and social change track also provides opportunities for students interested in international development to examine competing theories intended to explain international and regional inequalities, and to investigate and evaluate the patterns and practice of development worldwide.

In addition to satisfying the common requirements for all geography majors, students in the geography and social change track must complete the following.

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>044:010</td>
<td>Globalization and Geographic Diversity</td>
<td>3 s.h.</td>
</tr>
<tr>
<td><strong>Upper-level geography courses</strong></td>
<td></td>
<td>11 s.h.</td>
</tr>
</tbody>
</table>

Students choose the upper-level courses (11 s.h.) in consultation with their advisors. They may not count 044:150 Senior Project Seminar or the independent study courses 044:151 Senior Thesis, 044:195 Undergraduate Research, and 044:199 Honors Thesis toward this requirement. Students in the geography and social change track who wish to gain additional experience in theory and application of geographic information systems (GIS) should take 044:113 Principles of Geographical Information Systems and at least an additional 6 s.h. in GIS-based geography courses.

The following upper-level courses are recommended.

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>044:104</td>
<td>Environment and Development</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>044:131</td>
<td>Geography of Health</td>
<td>2-3 s.h.</td>
</tr>
<tr>
<td>044:133</td>
<td>Transportation Economics</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>044:135</td>
<td>Urban Geography</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>044:137</td>
<td>Health and Environment: GIS Applications</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>044:139</td>
<td>Spatial Analysis and Location Models</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>044:164</td>
<td>The Middle East</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>044:170</td>
<td>Geography of Justice</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>044:177</td>
<td>Environmental Justice</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>044:181</td>
<td>Field Methods: Mapping and Mobile Computing (a course chosen to fulfill one requirement cannot be used to fulfill a second)</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>044:194</td>
<td>Geographic Perspectives on Development</td>
<td>3 s.h.</td>
</tr>
</tbody>
</table>

Environmental Studies Track

The environmental studies track requires a minimum of 15 s.h. It is designed for students interested in the interrelationships among social and natural processes that affect the environment. The track prepares students for careers or pursuit of personal interests in resource management, physical geography, climatology, environmental policy or law, global environmental change, sustainable development, or other complex environmental issues. Graduates may find employment in an environmental profession such as landscape ecology or climatology; environmental planning and regulation; or environmental law, policy, and politics.

The environmental studies track offers training in field observation, remote sensing, geographical information systems, quantitative analysis/computing, and cartographic representation. It also provides a sound foundation for graduate or
professional-level studies in the natural or social aspects of the environment.

In addition to satisfying the common requirements for all geography majors, students in environmental studies track must complete the following.

044:019 Contemporary Environmental Issues 3 s.h.

Upper-level geography courses 12 s.h.

Students choose the upper-level courses (12 s.h.) in consultation with their advisors. They may not count 044:150 Senior Project Seminar or the independent study courses 044:151 Senior Thesis, 044:195 Undergraduate Research, and 044:199 Honors Thesis toward this requirement.

GEOGRAPHIC INFORMATION SCIENCE TRACK

The geographic information science track requires a minimum of 14 s.h. It is designed for students preparing for positions in government agencies, nongovernment organizations, international development agencies, and business. It also provides preparation for graduate study in geography, planning, and other disciplines. The track focuses on the design, implementation, and use of geographic information systems. Courses address how geographic data are acquired, stored, accessed, displayed, managed, and analyzed.

Students in the geographic information science track learn to address problems involved in modeling environmental systems, identifying the best locations for service facilities, assessing environmental impacts, and forecasting the populations of small areas. They use the department’s Geographic Information Systems Instructional Lab (GISIL) extensively to develop expertise in using GIS software.

Course work in the track covers methods of spatial analysis and geographical modeling and involves database management and computer programming.

In addition to the common requirements for all geography majors, students in the geographic information science track must complete the following.

22C:005 Introduction to Computer Science 3 s.h.

or

22C:016 Computer Science I: Fundamentals 4 s.h.

Upper-level geography courses 11 s.h.

Students choose the upper-level courses (11 s.h.) in consultation with their advisors. They may not count 044:150 Senior Project Seminar or the independent study courses 044:151 Senior Thesis, 044:195 Undergraduate Research, and 044:199 Honors Thesis toward this requirement. Students in the GIScience track are encouraged to add breadth to their degree by taking additional upper-level courses in the department. Students interested in the application of GIS to environmental issues should select courses from the department’s environmental studies area; those interested in socioeconomic issues should select courses from the department’s geography and social change area.

The following upper-level courses are recommended.

044:101 Climatology 3 s.h.
044:103 Biogeography 3 s.h.
044:104 Environment and Development 3 s.h.
044:105 Introduction to Environmental Remote Sensing 3 s.h.
044:123 Landscape Ecology 3 s.h.
044:125 Environmental Impact Analysis 4 s.h.
044:126 Wetlands: Function, Geography, and Management 3 s.h.
044:127 Environmental Quality: Science, Technology, and Policy 3 s.h.
044:128 GIS for Environmental Studies: Applications 3 s.h.
044:131 Geography of Health 2-3 s.h.
044:137 Health and Environment: GIS Applications 3 s.h.
044:141 Introduction to Geographic Databases 3 s.h.
044:145 Applications in Environmental Remote Sensing 4 s.h.
044:170 Geography of Justice 3 s.h.
044:180 Field Methods in Physical Geography (a course chosen to fulfill one requirement cannot be used to fulfill a second) 2-4 s.h.
<table>
<thead>

**SUSTAINABILITY TRACK**

The sustainability track requires a minimum of 18 s.h. It is designed for students interested in finding ways for people to live that do not threaten the survival of future generations. It includes training in scientific and social scientific methods and requires students to look at the world on scales ranging from local to global. The sustainability track prepares students to be effective leaders and agents of change for sustainability in varied professions, such as academic researcher and teacher, technology specialist, grassroots advocate, government official, or corporate officer.

In addition to satisfying the common requirements for all geography majors, students in the sustainability track must complete the following courses. They must enroll in 057:013 Introduction to Sustainability for a minimum of 3 s.h.

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>044:019</td>

**Four-Year Graduation Plan**

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

**Bachelor of Arts**

The major for the Bachelor of Arts requires 38 s.h.

**Before the third semester begins:** one of the introductory courses in the major and at least one-quarter of the semester hours required for graduation
Before the fifth semester begins: five courses in the major and at least one-half of the semester hours required for graduation

Before the seventh semester begins: 11 courses in the major and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: 14 courses in the major

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Bachelor of Science

The major for the Bachelor of Science requires 46 s.h.

Before the third semester begins: two of the introductory courses in the major and at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: six courses in the major and at least one-half of the semester hours required for graduation

Before the seventh semester begins: 12 courses in the major and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: 15 courses in the major

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Honors

Honors in geography is for students of superior ability who want to pursue studies beyond the typical undergraduate level. To graduate with honors, students must become a member of the University of Iowa Honors Program, which requires that students maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University of Iowa Honors Program for more information). They must be admitted to the honors program in geography by the first semester of the senior year and must maintain a g.p.a. of at least 3.33 in geography. They also must prepare and present an honors thesis, which consists of original research under the direction of a faculty member. The thesis is reviewed by a three-member faculty committee.

Students complete their thesis by taking 044:199 Honors Thesis. The senior course 044:150 Senior Project Seminar may be substituted for 044:199 Honors Thesis, as long as the student continues work on the thesis under the direction of a faculty member.

Minor

The minor in geography requires a minimum of 15 s.h. in geography courses, including 12 s.h. in 100-level courses taken at The University of Iowa. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass. Students are encouraged to concentrate their course work in tracks--geography and social change, environmental studies, geographic information science, or sustainability (see "Tracks" above). Those who wish assistance in selecting courses may contact the department secretary to request assignment of a minor advisor.

Courses for Nonmajors

Students in other majors may include geography courses in their study programs to satisfy requirements of the General Education Program (p. 381). Three General Education areas include geography courses, as follows.

International and Global Issues:

044:010 Globalization and Geographic Diversity 3 s.h.
044:019 Contemporary Environmental Issues 3 s.h.
044:030 The Global Economy 3 s.h.
044:161 African Development 3 s.h.

Natural Sciences:

044:003 The Global Environment 3-4 s.h.

Social Sciences:

044:001 Introduction to Human Geography 3 s.h.
044:010 Globalization and Geographic Diversity 3 s.h.
044:011 Population Geography 3 s.h.
044:019 Contemporary Environmental Issues 3 s.h.
044:030 The Global Economy 3 s.h.
044:161 African Development 3 s.h.

Nonmajors also may choose geography courses as electives, for example, 044:015 Introduction to Political Geography and 044:035 World Cities.

Graduate Programs

• Master of Arts in geography
• Doctor of Philosophy in geography
In addition to offering graduate degree programs, the department administers the geoinformatics subtrack of the graduate Certificate in Informatics; see Informatics (p. 1163) in the Catalog (Graduate (p. 1117) College).

Department of Geography graduate programs focus on investigating the environmental consequences of human decisions on local, regional, and global scales. Central to the department’s studies are geographical information science and the theories and models of environmental and social sciences. Within this broad domain, the department is developing strengths in environmental justice, environmental modeling, GIScience and GIS, land use and its environmental consequences, and health geography.

The Master of Arts and Doctor of Philosophy programs prepare students to carry on creative and productive research in selected areas of geography. University of Iowa graduates hold positions on college and university faculties, in private research organizations, and in business and government.

The department provides opportunities for graduate students to gain practical teaching experience through service as departmental teaching assistants or graduate instructors.

Graduate students present research papers at conferences and have regularly won awards. Students are involved in faculty research that leads to coauthored publications; they also publish their own. Graduate students compete successfully for intramural and extramural funding for graduate education and research.

**Master of Arts**

The Master of Arts program in geography requires a minimum of 30 s.h. of graduate credit and is designed to be completed in four semesters. However, students earn more than the required credit in completing the degree, using the additional work to increase their breadth of knowledge in geography and to tailor their study programs to their individual interests. A maximum of 6 s.h. of thesis credit may be applied toward the degree. Students may complete an M.A. specialization in geographic information science by taking specific course work.

Graduate students demonstrate competence by completing appropriate course work; and completing an M.A. exam, or completing and defending an M.A. thesis, or completing the Ph.D. comprehensive exams.

For detailed information about M.A. requirements, see the Manual for Graduate Degree Requirements, Department of Geography; contact the Department of Geography.

**Doctor of Philosophy**

The Doctor of Philosophy program in geography requires 72 s.h. of graduate credit and is designed to be completed in four or five years. The degree prepares students for college and university teaching and for advanced research. It provides study programs that lead to broad knowledge of a field of geography and its literature and to special expertise in a subfield.

Students can enter the Ph.D. program upon completing an undergraduate degree or with advanced standing corresponding to previous graduate education.

All Ph.D. students take the following courses. They take 044:350 Geography Colloquium (1 s.h.) each semester they are in residence.

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>044:210 Fundamentals of Geography</td>

<tr>
<td>Two research seminars chosen from 044:315 through 044:319 (3 s.h. each)</td>
<td>6 s.h.</td>
</tr>
</tbody>
</table>

Before students can be admitted to candidacy for the Ph.D., they must submit an original research paper to a faculty committee for approval. Students who complete an M.A. or M.S. thesis can submit it to fulfill this requirement. Before taking the comprehensive examination, which consists of both written and oral components, each student must submit an area review paper to his or her Ph.D. committee. This paper, which must be approved by the student’s Ph.D. advisor, consists of a critical review of research in the student’s concentration area.

The comprehensive examination covers the student’s concentration area and his or her general field in the discipline. After obtaining the dissertation supervisor’s approval, the student submits a dissertation proposal to the dissertation committee for critical comments and approval. The student then must complete and defend the dissertation.

For detailed information about Ph.D. requirements, see the Manual for Graduate Degree Requirements, Department of Geography; contact the Department of Geography.
Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate (p. 1117) College section of the Catalog.

A bachelor’s degree with a major in geography is not required for admission to graduate study in geography, but applicants must have an undergraduate background relevant to the field. Strength in social or environmental science and interest in exploring the regional and spatial perspectives that characterize modern geography are important in admission decisions. Depending on their prior training, graduate students may be required to take courses that are prerequisites for course work in their chosen area of graduate study; credit earned in prerequisites does not count toward the graduate degree.

Application materials include an undergraduate transcript with grade-point average, scores on the Graduate Record Examination (GRE) General Test, three letters of recommendation, and an essay in which the applicant states his or her reasons for wanting to study geography at The University of Iowa.

Applicants whose first language is not English must take the Test of English as a Foreign Language (TOEFL). Their scores must be sent to the University’s Office of Admissions.

New graduate students whose first language is not English are required to take the Speaking Proficiency English Assessment Kit (SPEAK) test when they arrive at the University; eventually they take the English Language Performance Test (ELPT). Students must be fully certified by the ELPT before they begin their fourth semester in order to be considered for funding in succeeding semesters. Students who do not pass the SPEAK test and ELPT are required to take Teaching Assistant Preparation in English (TAPE) courses until they have achieved proficiency in spoken English.

Financial Support

A number of graduate teaching and research assistantships are available. In addition, outstanding applicants and underrepresented minorities are eligible for several fellowships. Awards are based on merit. In making awards, the department pays particular attention to grade-point average, especially for the junior and senior years; score on the Graduate Record Examination (GRE) General Test; letters of recommendation; and fit of the student’s objectives with department specializations. Applications for graduate appointments must be received by February 1. Applications for fellowships are due by January 15.

Internships

The Department of Geography is a participant in the University’s internship program, which provides opportunities for both undergraduate and graduate students to participate in paid and unpaid activities related to their academic programs. The Pomerantz Career Center works with students to develop appropriate internships.

Facilities and Resources

The department houses three geographic information computational laboratories, which support a variety of GIS software packages, including the latest software from ESRI (ArcGIS) and Erdas (Imagine) as well as open-source software.

The University’s Geographic Information Systems Instructional Lab (GISIL) is located in the Department of Geography. The lab is a center for teaching GIS as well as a place where students conduct geographic and GIS-related research. It is equipped with 25 networked student workstations, instructional support technology (e.g., CRT projection), and a suite of peripherals.

Environmental modeling and GIS research laboratories contain state-of-the-art machines. The department provides Windows and Linux platforms, digitizers, scanners, plotters, and printers. Projects requiring massive storage have access to the advanced GIS and modeling facility in the Center for Global and Regional Environmental Research. The University of Iowa is a charter member of Internet2, with a high-performance network link to the Department of Geography. The University also is a member of the University Consortium on Geographic Information Science.

To aid studies of water resources and physical geography, the department has a laboratory for analysis of vegetation, sediment, soil, water quality, and tree rings, and a variety of field equipment, including portable meteorological stations and data loggers.

Faculty and graduate students participate in multidisciplinary working groups through the University’s Program in Applied Mathematical and Computational Sciences (p. 1142), Center for Global and Regional Environmental Research, Center for Health Effects of Environmental Contamination, International Programs, Institute for Rural and Environmental Health, Iowa Quaternary Studies Group, and Public Policy Center.
The University’s Main Library has a collection of more than 115,500 maps, 3,600 atlases and reference works, and around 100,000 aerial photographs, primarily of Iowa.

Courses

Primarily for Undergraduates

044:001 Introduction to Human Geography
Application of geographic principles to contemporary social, economic, and political problems; urban growth; problems of the ghetto; diffusion of innovations; territoriality and perception. GE: Social Sciences.

044:002 World Regional Geography
Cultural, economic, political, and environmental context of major world regions within the structure of globalization--East Asia, Southeast Asia, South Asia, the Middle East and North Africa, Sub-Saharan Africa, Eastern Europe and North Asia, Western Europe, Latin America, Anglo America, and Oceania; major trends within and between these culture realms; social, economic, and political processes within the regions; operating globally.

044:003 The Global Environment
Elementary principles of physical geography: physics of weather and climate, hydrological systems, geomorphological and geological forces, pedological processes, and ecological processes and patterns; geographic explanation of physical environment, with principles applied to the human use system; environmental pollution and natural hazards. GE: Natural Sciences without Lab; Natural Sciences with Lab.

044:005 Foundations of GIS
Cartography, map analysis, and geographic information systems; map projections and scale; data collection, remote sensing, and GPS; data structures and organization; cartometry; symbolization and visualization.

044:010 Globalization and Geographic Diversity
3 s.h.
Problems of the global system and ways to address them; global economy and environment, state and security, social justice and human rights. GE: International and Global Issues; Social Sciences.

044:011 Population Geography
3 s.h.
Spatial considerations of population growth and distribution; minorities within a population; poverty; housing; social organization and disorganization; social systems, including education, religion, recreation, medical and social services; diffusion of ideas and traits over space. GE: Social Sciences.

044:015 Introduction to Political Geography
3 s.h.
Emphasis on application of geographical and economic theory in understanding historical development and restructuring of political economies at global, national, and local levels; development of nation states, nationalism, imperialism, geopolitics, economic restructuring, electoral geography.

044:019 Contemporary Environmental Issues
3 s.h.
Political, economic, cultural, technologic, ecological, and ethical issues associated with natural resource and environmental problems, including population, global climate change, food production, tropical deforestation, soil erosion, waste management. GE: International and Global Issues; Social Sciences.

044:020 Discovery in Geography
3 s.h.

044:029 First-Year Seminar
1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.
044:030 The Global Economy 3 s.h.
Location and spatial organization of the world’s major types of economies; agriculture, energy and minerals, manufacturing, transportation; trade and service centers. GE: International and Global Issues; Social Sciences.

044:035 World Cities 3 s.h.
Urbanization as a process; specific concepts and theories of urbanization through global patterns, regional urban systems, individual metropolitan areas.

044:060 Geography of Asia: From Japan to Pakistan 3 s.h.
Varied cultures and environments of Asia; exploration of physical and cultural landscapes of region; processes of development in context of globalization and regionalism; population growth; rise of megalopolis and urban agglomerations; ethnic, religious and political diversity and tensions; colonial legacies and emerging economies; food and water scarcity; climate change and biodiversity; natural hazards; migration and double burden of disease.

044:100 Readings for Undergraduates arr.
Supervised readings in geography.

044:101 Climatology 3 s.h.
Boundary layer processes that drive atmospheric dynamics; exchanges of energy and water at simple and complex surfaces; global climate change records, theories, models; impacts of climate on society. Prerequisites: 044:003. Same as 012:104.

044:103 Biogeography 3 s.h.

044:104 Environment and Development 3 s.h.
Environmental impacts of industrial and rural development explored through Third World case studies (Latin America, Africa, South and East Asia); environmental degradation from perspectives of political economy and ecology; class, gender, and indigenous peoples’ issues; industry-agriculture linkages.

044:105 Introduction to Environmental Remote Sensing 3 s.h.
Basic concepts and principles of remote sensing; sources of data; georegistration; digital processing and classification of remotely sensed images for extraction of environmental information; linkage of remote sensing techniques with GIS analysis.

044:106 Foundations of GIS 3 s.h.
Cartography, map analysis, and geographic information systems; map projections and scale; data collection, remote sensing, GPS; data structures and organization; cartometry; symbolization and visualization.

044:107 Hungry Planet: Global Geographies of Food 3 s.h.
Societal and environmental implications of past, current, and future global food supply examined from a geographical perspective; focus on questions of who eats what, where, and why; transformative history of agriculture, modern agribusiness and alternative food supplies, geopolitical implications of food production, food scarcity and rising food costs, urban versus rural agriculture, the obesity epidemic versus malnutrition, and the future of food.

044:109 Introduction to Geographic Visualization 3 s.h.
Basic concepts and techniques that underlie cartographic representation and the broader field of geographic visualization; digital cartographic practices; how scientific visualization, information visualization, and user interface design contribute to geographic visualization; map symbolization, scale and generalization, animation and dynamic map design, multimedia, virtual and mixed environments, interfaces for GIS; experience applying cartographic and visualization techniques. Prerequisites: 044:005.
044:110 GIS for Environmental Studies: Introduction 3 s.h.
Methods of managing and processing geographic information for environmental analysis; basic concepts, structures, theories of geographic information system (GIS), basic analytical techniques, and hands-on experience in GIS operations. Prerequisites: 044:005.

044:111 Water Resources 3 s.h.
Introduction to science and policy issues affecting water resources management in the U.S; how the intersection of people, climate, technology, and geography affects the quality, availability, and demand for freshwater resources; understand basic hydrological processes; water needs of people and ecosystems; influence of regulations and management on water quality, availability, hazards; historical and contemporary developments in the management of water.

044:112 Mapping American Cities and Regions 3 s.h.
Foundation concepts for GIS-based analysis of urban, social, and economic data for the United States; geo-referenced sources of U.S. national and state data; application to contemporary social issues. Prerequisites: 044:005.

044:113 Principles of Geographical Information Systems 3 s.h.
Issues in establishment of geographic information systems: spatial data encoding, raster-vector options, spatial and attribute resolution, cartographic data models, linkages to spatial analysis procedures, display techniques for decision support, institutional setting. Prerequisites: 044:005.

044:122 Environmental Conservation in the United States 3 s.h.
Varied natural environments of the United States; problems arising from conflicting land uses; consideration of public land use policy, environmental impacts of different land uses, problems of habitat preservation and endangered species. Prerequisites: 044:003 or 044:019.

044:123 Landscape Ecology 3 s.h.
Effects of spatial pattern on spatial processes in ecology; characteristics of matrix, patch, corridor; fragmentation, deforestation, habitat loss; spatial flows of energy, matter, genetic information; relationship to human impact, global climate change. Requirements: 044:103 or a 100-level course in ecology.

044:125 Environmental Impact Analysis 4 s.h.
Environmental impact assessment methodologies; emphasis on cost-benefit-risk, cost-effectiveness and incremental analysis, and overlay and graphic techniques; optimal resource use, system simulation; field trips to local environmental control facilities. Prerequisites: 044:019. Same as 102:125.

044:126 Wetlands: Function, Geography, and Management 3 s.h.
Biotic aspects of water resources production; geographical basis of biophysical processes in drainage basins; spatial aspects of stream ecology; regional characterization of wetland structure and process. Prerequisites: 044:101 or 044:103. Same as 012:126.

044:127 Environmental Quality: Science, Technology, and Policy 3 s.h.
Geographical perspectives in the study and interpretation of chemicals in the environment; environmental standards under existing laws; local, regional, national, international case studies in environment and health; socioeconomic and institutional considerations in designing environmental protection strategies. Prerequisites: 22S:025.

044:128 GIS for Environmental Studies: Applications 3 s.h.
Applications of geographic information system (GIS) techniques in environmental change analysis (especially land use/cover change), environmental assessment, hazard/risk analysis, environmental decision making. Prerequisites: 044:110.

044:131 Geography of Health 1-3 s.h.
Provision of health care in selected countries, with particular reference to the Third World; focus on problems of geographical, economic, cultural accessibility to health services; disease ecology, prospective payment systems, privatization, medical pluralism. Same as 152:131.
044:133 Transportation Economics 3 s.h.
Overview of transportation markets--intercity, rural, urban; transportation modes--rail, highway, air, water, pipeline, transit; issues in finance, policy, planning, management, physical distribution, and environmental, economic, and safety regulation. Prerequisites: 06E:001 and 06E:002. Same as 06E:145, 102:133.

044:135 Urban Geography 3 s.h.
Central ideas of modern urban geography, their links to social theory; focus on interrelation between social change, urban environment; evolution of urban systems, emergence of the capitalist city, urban social and residential differentiation, local politics of uneven development.

044:136 Planning Livable Cities 3 s.h.
Development of livable cities in the United States; economic, physical, environmental, and political forces that shape their growth; impact of planning, how it shapes the future of cities. Same as 102:101.

044:137 Health and Environment: GIS Applications 3 s.h.
Applications of GIS and spatial analysis for studying health outcomes and exposure to environmental contaminants at different geographical scales. Prerequisites: 044:131 or 044:134.

044:139 Spatial Analysis and Location Models 3 s.h.
Application of location models within GIS environments to support decision making; small area demographic forecasting, location-allocation models, regionalization problems, shortest path models, other spatial analysis methods used to support spatial decisions. Prerequisites: 044:005.

044:141 Introduction to Geographic Databases 3 s.h.
Fundamentals of database design and use for geographic or environmental domains; major database models and how they support geographic data; introduction to SQL for formulating database queries; experience using software for applying key database concepts. Prerequisites: 044:005.

044:142 Simulation in Environmental Geography 3 s.h.
How computer simulations are used in environmental studies, with focus on landscape ecology (spatial patterns of organisms and ecosystems); basics of performing simulations; principles and applications of simulation through readings and performing simulations; frontiers of simulation use in the field; hands-on experience writing computer simulations that capture environmental processes (e.g., changing climate, predator-prey relations, nutrient flux), and analyzing the outcomes. Requirements: advanced courses in environmental geography or environmental science and senior standing.

044:145 Applications in Environmental Remote Sensing 4 s.h.
Theory and practice of remote sensing and digital image processing; practical applications to human-environment interactions. Prerequisites: 044:105.

044:150 Senior Project Seminar 3 s.h.
Development of a research project and preparation of a research report. Offered spring semesters.

044:151 Senior Thesis 3 s.h.
Original research. Requirements: senior standing.

044:161 African Development 3 s.h.
Problems of economic, political, spatial integration in Africa; patterns and processes of economic development and nation building. GE: International and Global Issues; Social Sciences.

044:164 The Middle East 3 s.h.
Middle East cultures, political economy, conflict; significance of the Middle East in world affairs, vice versa.

044:170 Geography of Justice 3 s.h.
Geographical analysis of social and environmental justice; justice from various cultural perspectives; cultural struggles over human rights.
044:174 Health, Work, and the Environment 3 s.h.
Current topics in occupational and environmental health; how the United States protects workers, protects people from environmental agents, and reduces environmental harm. Same as 175:101.

044:175 Hazards and Vulnerability 3 s.h.
Societal responses to natural and technological hazards; risk perception and communication, disaster management, social vulnerability, risk assessment, hazard mitigation, resilience; introduction of social science perspectives on hazards and their management; assessment of different responses to hazards by individuals and society; identification of current directions in hazards research, policy, and practice.

044:177 Environmental Justice 3 s.h.
Review of theoretical positions for examining environmental justice, application of those theories to environmental controversies around the globe.

044:179 Ecosystem Services: Human Dependence on Natural Systems 3 s.h.
Ecosystem services from an interdisciplinary perspective centering on geographic techniques used to measure, map, and model ecosystem services; methods used to incorporate ecosystem services into decision and policy making; reliance on ecosystem services, valuable goods, and services produced by ecosystems such as flood control, food production, and water purification for well being; how activities alter ecosystems and thus alter these services, reducing quality-of-life or, in some cases, the ability to survive. Prerequisites: 044:005, and 002:011 or 002:022 or 002:134 or 012:008 or 044:003 or 044:019 or 044:103 or 044:123 or 159:008 or 159:134.

044:180 Field Methods in Physical Geography 2-4 s.h.
Methods of measuring climate, vegetation, soil, landforms, water; projects in areas including field meteorology, tree-ring sampling, topographic surveying, vegetation sampling, water quality sampling, use of global positioning systems; introduction to research design.

044:181 Field Methods: Mapping and Mobile Computing 3 s.h.
Development and application of mobile geographic information technologies; key issues associated with global positioning systems (GPS), wireless technologies, field-based data collection and analysis, ubiquitous computing, and location-based services; experience using GPS, advanced mobile computing technologies, mobile GIS software to construct geographic datasets, and data sampling techniques.

044:186 Soil Genesis and Geomorphology 3 s.h.
Introduction to soil genesis, soil geomorphology, and classification including the basics of soil profile description and soil-landscape, soil-vegetation, and soil-climate relationships; emphasis on study of soils as the interface between living and non-living Earth systems and the role of soils in sustaining ecosystems and human societies; short field excursions and a weekend field trip. Requirements: college earth science and chemistry. Same as 012:136.

044:188 Applied Geostatistics 3 s.h.
Applications of geostatistical methods to geology, geography, hydrology, environmental sciences, and engineering; variogram, Kriging, analysis of spatial-varied data with varied computer software in participants’ specialties. Same as 012:178.

044:194 Geographic Perspectives on Development 3 s.h.
Theoretical and empirical studies of the regional development process, with emphasis on developing countries; alternative regional development theories and changes in development theories in the literature of geography, related disciplines.

044:195 Undergraduate Research arr.
Supervised research in geography.

044:197 Special Topics arr.
Contemporary fields of inquiry, such as political economy, regional/African development, biophysical systems, GIS, locational analysis, water resources, economic geography, demographic analysis, environment, urbanization, transportation.
044:199 Honors Thesis  
Original research. Requirements: honors standing.

For Graduate Students

044:200 Readings  
Supervised readings by graduate students in topics of their choice.

044:210 Fundamentals of Geography  
3 s.h. 
Geography as an academic discipline; history, advances, epistemology, common themes.

044:211 Research and Writing in Geography  
3 s.h. 
Identification of research areas; research questions and hypotheses; methodological decisions; research proposal and paper writing.

044:241 Integrating Time into GIS  
3 s.h. 
Fundamental concepts for integrating temporal elements into geographic information systems (GIS); conceptual and formal models of time, models of change, event-based modeling, modeling of moving entities; topics related to fundamentals of spatiotemporal databases and query languages. Prerequisites: 044:005.

044:242 Simulations in Landscape Ecology  
3 s.h. 
Dynamics of land use and land cover change explored through advanced use of computer simulations in landscape ecology; how simulation is used in the field; simulations based on landscape ecology questions, with analysis of results using typical landscape ecology metrics. Prerequisites: 044:142.

044:243 Modeling Space and Time  
3 s.h. 
How to generate time-space-resolved estimates of sociophysical environmental contexts with the aid of modern geo-spatial technologies; how to model social, behavioral, and health outcomes with reference to multilevel time-space-resolved sociophysical environmental contexts; environmental contexts from air pollution and pesticide concentration to neighborhood diversity; statistical modeling of varied social, behavioral, and health outcomes such as dropping out of college, smoking, excessive weight, asthma, mental and physical disability. Requirements: a course in statistics and good understanding of correlation and regression.

044:265 Planning Sustainable Transportation  
3 s.h. 
Theories and methods of exerting public control over passenger and freight transportation; social and environmental regulation; effects of changing finance, regulation, and pricing policies, including privatization, tolls, impact fees. Same as 102:265.

044:286 Crossing Borders Seminar  
2-3 s.h. 

044:287 Crossing Borders Proseminar  
arr.

044:296 Topics in Geographic Information Science  
3 s.h. 
Current theoretical research issues in geographic information science; intensive readings. Repeatable.

044:297 Special Topics  
arr. 
Contemporary fields of inquiry, such as political economy, regional/African development, biophysical systems, GIS, locational analysis, water resources, economic geography, demographic analysis, environment, urbanization, transportation.
044:315 Seminar in Spatial Analysis and Modeling 3 s.h.
Research themes in spatial analysis, GIScience, simulation, remote sensing.

044:316 Seminar in Rural Land Use 3 s.h.
Research on land use, water resources, conservation.

044:318 Seminar in Health and Environment 3 s.h.
Research on health and environment.

044:319 Seminar in International Development 3 s.h.
Research on GIScience and development.

044:350 Geography Colloquium arr.

044:415 Research in Spatial Analysis and Modeling 3 s.h.
Directed research in spatial analysis, GIScience, simulation.

044:416 Research in Rural Land Use 3 s.h.
Directed research in land use, water resources, conservation.

044:417 Research in Environmental Policy 3 s.h.
Directed research in environmental justice and policy.

044:418 Research in Health and Environment 3 s.h.
Directed research in health and environment.

044:419 Research in International Development 3 s.h.
Directed research in GIScience and development.

044:450 Thesis arr.
Geoscience

Chair
Mark K. Reagan

Professors
Jonathan M. Adrain, Ann F. Budd, C. Thomas Foster Jr., William C. McClelland, Mark K. Reagan, You-Kuan Zhang

Professors emeriti

Adjunct professor
David L. Campbell

Associate professors
E. Arthur Bettis III, Christopher A. Brochu, Jeffrey A. Dorale, Jane A. Gilotti, David W. Peate, Frank H. Weirich

Adjunct associate professor
Brian J. Witzke

Assistant professors
Ingrid Ukstins Peate, Hallie J. Sims, Adam S. Ward

Adjunct assistant professors
Ray Anderson, Rhawn F. Denniston, Keith Schilling, Douglas Schnoebelen, Emily Walsh

Adjunct instructor
Tiffany S. Adrain

Undergraduate degrees: B.A., B.S. in Geoscience

Undergraduate nondegree program: Minor in Geoscience

Graduate degrees: M.S., Ph.D. in Geoscience

Web site: http://geoscience.clas.uiowa.edu

Geoscience faculty and students study the many physical, chemical, and biological systems that compose Earth. Using modern observational, analytical, and computational methods, they examine how the planet’s interior, surface, hydrosphere, and atmosphere have evolved since Earth was born in the solar system 4.6 billion years ago. Topics commonly studied in the department include how plate movements cause earthquakes, volcanoes, and mountain building; global climate change and how climate change and catastrophic events cause changes in biodiversity; how and where economic resources are generated on Earth; and how these resources are located and used in modern society.

The geoscience curriculum provides students with hands-on experience analyzing rocks, minerals, fossils, soils, and waters, generally in a small classroom setting. Much of this experience is obtained in laboratory and field courses. Field courses include travel to other states or countries to view Earth’s materials and fossils in the context of their natural surroundings.

The master’s degree is regarded by most hiring agencies as the working degree. The doctoral degree is required for college and university teaching positions. However, an undergraduate degree is fully satisfactory in certain teaching, government, and industrial situations.

Many of The University of Iowa’s geoscience graduates find employment with resource companies, environmental corporations, and educational institutions. Others continue in graduate school or take jobs with government or conservation agencies. Some intend to enter law, business, or fields such as urban planning, environmental studies, engineering, archaeology, science education, or oceanography as advanced areas. Geoscience provides skills useful for all of these fields.

The department offers a variety of courses appropriate for nonmajors, including several approved for the Natural Sciences requirement of the General Education Program (p. 381). See “Courses for Nonmajors” below.

Many of the department’s faculty members are involved in the interdisciplinary Environmental Sciences (p. 342) Program, and a number of the department’s courses satisfy requirements of the Certificate in Sustainability (p. 1565).

Undergraduate Programs

- Major in geoscience (Bachelor of Arts, Bachelor of Science)
- Minor in geoscience

Students majoring in geoscience take at least an academic year’s work in three allied scientific areas—physics, chemistry, and mathematics—and a semester of biology in addition to a course in each major area of geology.

Geoscience students may elect to pursue an additional major or a minor in a related discipline, usually chemistry, physics, biology, engineering, environmental sciences, or anthropology. See Majors, Minors & Certificates under For Students on the College of Liberal Arts and Sciences web site.

Bachelor of Science

The Bachelor of Science with a major in geoscience requires a minimum of 120 s.h., including at least 69 s.h. (19 courses) of work for the major (38 s.h. in geoscience courses and
at least 31 s.h. in supporting disciplines). The program is designed to prepare students for immediate employment after graduation or to enter a graduate program in geology.

Students must complete the College of Liberal Arts and Sciences General Education Program (p. 381). The department recommends that they fulfill the World Languages requirement with French, German, Russian, or Spanish and the Social Sciences requirement with an approved course in economics, geography, or anthropology.

Transfer students must complete a minimum of 15 s.h. of course work in the Department of Geoscience.

The geoscience major for the Bachelor of Science requires the following course work.

One of these:

- 012:003 Introduction to Earth Science 4 s.h.
- 012:005 Introduction to Geology (preferred) 4 s.h.

All of these:

- 012:004 Evolution and the History of Life 4 s.h.
- 012:041 Mineralogy 4 s.h.
- 012:112 Geologic Field Methods (previously 012:093) 3 s.h.
- 012:113 Geologic Field Analysis 3 s.h.
- 012:130 Sedimentary Geology 3 s.h.
- 012:132 Structural Geology (previously 012:092) 4 s.h.
- 012:150 Igneous and Metamorphic Petrology (previously 012:052) 4 s.h.
- 012:166 Hydrogeology 3 s.h.
- 012:172 Glacial and Pleistocene Geology 3 s.h.
- 012:178 Applied Geostatistics 3 s.h.

At least two geoscience electives 6-7 s.h.

One of these:

- 012:121 Principles of Paleontology 3 s.h.
- 012:149 Elements of Geochemistry 3 s.h.
- 012:166 Hydrogeology 3 s.h.
- 012:179 Engineering Geology 3 s.h.
- 012:180 Survey of Geophysical Methods 3 s.h.

At least 8 s.h. of calculus, including one of these:

- 22M:026 Calculus II 4 s.h.
- 22M:032 Engineering Mathematics II: Multivariable Calculus 4 s.h.

Bachelor of Science students complete an additional course in mathematics (numbered 22M:027 Introduction to Linear Algebra and above) or computer science (numbered 22C:005 Introduction to Computer Science and above) or statistics (numbered 22S:030 Statistical Methods and Computing and above).

They also complete the following course work in chemistry, physics, and biology (these are minimum requirements).

At least 8 s.h. of college-level chemistry is required, including the following or equivalent courses or more advanced courses. Chemistry courses numbered below 004:011 Principles of Chemistry I do not count toward the chemistry requirement of the B.S. program in geoscience.

- 004:011-004:012 Principles of Chemistry I-II 8 s.h.

At least 8 s.h. of college-level physics is required, as follows. Physics courses numbered below 029:011 do not count toward the physics requirement of the B.S. program in geoscience.

One of these sequences:

- 029:011-029:012 College Physics I-II 8 s.h.
- 029:081-029:082 Introductory Physics I-II 8 s.h.

At least one biological science course that includes a laboratory (4 s.h.) is required. Students with an interest in paleontology are encouraged to take 002:010 Principles of Biology I and 002:011 Principles of Biology II.

RECOMMENDED OPTIONS

All B.S. students should take elective courses from the following groups in order to broaden their undergraduate experience and prepare themselves for graduate study or professional employment. Students who have clear career goals are advised to take three or more elective courses from the group that fits their needs most closely. Students also may seek a broad education in geoscience by choosing elective courses from a number of groups.

Quaternary Geology

- 012:102 Earth Surface Processes 3 s.h.
- 012:110 Introduction to Applied Remote Sensing 4 s.h.
- 012:136 Soil Genesis and Geomorphology 3 s.h.
- 012:138 Fluvial Geomorphology 3 s.h.
- 012:149 Elements of Geochemistry 3 s.h.
- 012:152 Isotope Geochemistry 3 s.h.
- 012:166 Hydrogeology 3 s.h.
- 012:172 Glacial and Pleistocene Geology 3 s.h.
- 012:178 Applied Geostatistics 3 s.h.

**INDEPENDENT RESEARCH OPTION FOR GEOSCIENCE MAJORS**

A junior or senior who is ready to pursue independent research for credit in geoscience may assist a faculty member or graduate student with a current research project (012:019 Directed Study) or may initiate a small-scale project involving a combination of field, laboratory, and library investigation (012:119 Directed Study). Independent study is encouraged and may result in an honors thesis (012:010 Honors Thesis in Geoscience) or a senior thesis (012:011 Senior Thesis in Geoscience) that may be published subsequently.

**Bachelor of Arts**

The Bachelor of Arts with a major in geoscience requires a minimum of 120 s.h., including at least 51 s.h. of work for the major (at least 35 s.h. in geoscience courses and at least 16 s.h. in supporting disciplines). The program is designed to provide students with a varied background in geology and a broader choice of electives than is practical in the Bachelor of Science program. The major for the Bachelor of Arts is intended for students who are interested in the fundamentals of geology or earth science teaching (see Teaching and Learning (p. 967), College of Education, in the Catalog). Completing the minimum requirements for this degree may not adequately prepare a student for an entry-level professional job in geology.

Students must complete the College of Liberal Arts and Sciences General Education Program (p. 381). The department recommends that they fulfill the World Languages requirement with French, German, Russian, or Spanish and the
Social Sciences requirement with an approved course in economics, geography, or anthropology.

Transfer students must complete a minimum of 15 s.h. of course work in the Department of Geoscience.

The geoscience major for the Bachelor of Arts requires the following course work.

012:041 Mineralogy 4 s.h.

One of these:

012:003 Introduction to Earth Science 4 s.h.
012:005 Introduction to Geology 4 s.h.

One or both of these:

012:004 Evolution and the History of Life 4 s.h.
012:121 Principles of Paleontology 3 s.h.

At least three of these:

012:130 Sedimentary Geology 3 s.h.
012:132 Structural Geology (previously 012:092) 4 s.h.
012:136 Soil Genesis and Geomorphology 3 s.h.
012:138 Fluvial Geomorphology 3 s.h.
012:150 Igneous and Metamorphic Petrology 4 s.h.
012:166 Hydrogeology 3 s.h.

Geoscience electives 12 s.h.

Bachelor of Arts students must complete the following course work in mathematics and chemistry (these are minimum requirements).

College-level mathematics (may include computer science and statistics) 10 s.h.

At least two college-level chemistry courses (either Option 1 or Option 2) are required. Chemistry courses numbered below 004:007 General Chemistry I do not count toward the chemistry requirement of the B.A. program in geoscience.

Option 1:

004:007-004:008 General Chemistry I-II 6 s.h.

Option 2:

004:011-004:012 Principles of Chemistry I-II 8 s.h.

FIELD REQUIREMENT

To complete the major, students must have field experience. They may take two semesters of 012:018 Geology Field Trip: Selected National Parks or 012:116 Field Trip or one semester of each of the two courses (total of 4 s.h.). Or they may take one semester of 012:112 Geologic Field Methods or the Iowa Lakeside Laboratory (p. 1529) session.

012:018 Geology Field Trip: Selected National Parks 2 s.h.
012:116 Field Trip 2 s.h.
012:112 Geologic Field Methods (previously 012:093) 3 s.h.

One natural science session at Iowa Lakeside Laboratory for a minimum of 3 s.h.

INDEPENDENT RESEARCH OPTION FOR GEOSCIENCE MAJORS

A junior or senior who is ready to pursue independent research for credit in geoscience may assist a faculty member or graduate student with a current research project (012:019 Directed Study) or may initiate a small-scale project involving a combination of field, laboratory, and library investigation (012:119 Directed Study). Independent study is encouraged and may result in an honors thesis (012:010 Honors Thesis in Geoscience) or a senior thesis (012:011 Senior Thesis in Geoscience) that may be published subsequently.

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

Note: These checkpoints show the range of required course work; the major for the Bachelor of Arts requires a minimum of 17 courses; the major for the Bachelor of Science requires 19.

The geoscience major requires field trip experiences, many of which take place during breaks in or between semesters or during the summer session. These checkpoints do not include the field trip requirements.

Before the third semester begins: competence in math through trigonometry, first required chemistry course, and at least one-quarter of the semester hours required for graduation
Before the fifth semester begins: three to five courses in the major (including the remainder of the chemistry requirement and continuation of the mathematics requirement) and at least one-half of the semester hours required for graduation.

Before the seventh semester begins: 7-11 courses in the major and at least three-quarters of the semester hours required for graduation.

Before the eighth semester begins: 10-14 courses in the major.

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate.

Honors

Qualified students may earn a degree with honors in geoscience. Honors program students must complete a senior thesis (012:010 Honors Thesis in Geoscience) and maintain a cumulative University of Iowa g.p.a. of at least 3.33 in order to graduate with honors (contact the University of Iowa Honors Program for more information about honors study at Iowa). They also must obtain approval of their honors thesis contract from their advisor and the department’s undergraduate committee; have a cumulative g.p.a. of at least 3.33 in geoscience courses; and earn a grade of B or higher in 012:010 Honors Thesis in Geoscience.

Minor

The minor in geoscience requires a minimum of 15 s.h. in geoscience courses, including 12 s.h. in advanced-level courses offered by the Department of Geoscience at The University of Iowa: 012:041 Mineralogy and all geoscience courses numbered 100 and above are considered advanced for the minor. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass.

College-level courses in mathematics, physics, chemistry, and biology usually are required as collateral work for geology students. Those seeking a minor in geoscience should be sufficiently prepared in the areas of supporting sciences before they take advanced courses in geoscience.

Recommended advanced courses in geoscience that deal with important areas of earth materials and earth processes are as follows.

Courses for Nonmajors

Each year more than 1,800 students enroll in 012:003 Introduction to Earth Science, 012:004 Evolution and the History of Life, 012:005 Introduction to Geology, 012:007 Age of Dinosaurs, 012:008 Introduction to Environmental Science, 012:114 Energy and the Environment, and 012:140 Natural Disasters. All of these courses are approved by the College of Liberal Arts and Sciences for the Natural Sciences requirement of the General Education Program (p. 381).

National Honor Society

The department sponsors a chapter of Sigma Gamma Epsilon National Honor Society for the Earth Sciences. Students with an overall g.p.a. of at least 2.80 and at least 3.20 in geoscience courses are considered for membership after they have completed a minimum of 16 s.h. of course work in geoscience. Consult the departmental honors advisor for more information.
Graduate Programs

• Master of Science in geoscience
• Doctor of Philosophy in geoscience

The Master of Science program in geoscience prepares students for employment in industry or for doctoral study. The Doctor of Philosophy program is designed to prepare students for future employment in higher education or research and to bring them to the forefront of a specialized area of geoscience.

All geoscience graduate students must meet the admission and degree requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College (particularly sections IX, X, and XII) or the Graduate (p. 1117) College section of the Catalog. They also should acquaint themselves with the University calendar (for deadline dates and so forth).

All entering graduate students are required to enroll in 012:207 Geologic Orientation during the fall semester of their first year in the graduate program.

The department provides detailed information about current graduate degree requirements and timelines for making satisfactory progress toward a degree in the document "The University of Iowa Guidelines for Graduate Study in Geoscience"; see Graduate Student Guidelines under Academics/Geoscience Graduate Program/Information on the Department of Geoscience web site.

Throughout their graduate study, all M.S. and Ph.D. students must maintain a g.p.a. of at least 3.00 on all course work required for their degree and on all graduate-level geoscience course work. Students whose grade-point average drops below 3.00 are placed on academic probation.

Geoscience graduate students are encouraged to present their research at local, regional, national, or international meetings. The department provides partial funding for travel to such meetings.

Master of Science

The Master of Science degree in geoscience requires a minimum of 30 s.h. of graduate credit. The program is designed primarily to prepare students for employment in industry or for Ph.D. study. M.S. students may count up to 8 s.h. of research credit toward the 30 s.h. required for the degree. They must earn at least 24 s.h. toward the degree in University of Iowa courses taken after they enroll in the program. M.S. students also must complete 012:201 Geoscience Seminar Series each semester until they defend their thesis.

M.S. thesis students are responsible for obtaining their advisory committee’s approval of a suitable program of course work and for satisfactory development of research plans as outlined in a thesis proposal, which should be completed and approved by the department chair before the end of the second semester of full-time study. The thesis typically has depth and breadth similar to those of one published research paper. Thesis students must deliver a half-hour public presentation of their thesis, followed by an oral defense. They also are required to present their research at a local, regional, national, or international meeting approved by the department chair before they may graduate.

Individuals interested in pursuing the M.S. without thesis must obtain the department chair’s permission. The program is designed for students with extensive geological background and experience. Requirements for the nonthesis option are similar to those for the M.S. with thesis, except that in place of the thesis, nonthesis students submit a manuscript that their thesis committee deems acceptable for submission for publication. The student may choose to submit a previously published manuscript. Nonthesis students also must take a final examination that covers course work and the work done in place of the thesis.

Doctor of Philosophy

The Doctor of Philosophy degree in geoscience requires a minimum of 72 s.h. of graduate credit. The program is designed to prepare students for future employment in higher education or research and to bring them to the forefront of a specialized area of geoscience.

The Ph.D. requires a dissertation, which has the approximate research content of three published papers.

Ph.D. students usually enter the program with established fields of interest and a research advisor already selected. Under exceptional circumstances, a student may be admitted to the Ph.D. program without an established field of interest.

Entering Ph.D. students must consult with a research advisor or the department’s director of graduate study before they enroll in courses. By the first month of their second semester of doctoral study, all Ph.D. students must select an adviser. Each student also must select a thesis topic and forward it to the department chair for
approval by the end of the first month of the second semester of doctoral study.

Within broad limits, Ph.D. students should select courses that reflect their individual needs, interests, and talents; their advisor and advisory committee must approve their course selections.

During the second semester of doctoral study, each Ph.D. student should propose an advisory committee of at least five faculty members. Before the end of the second semester of doctoral study, each student must obtain his or her committee’s approval of a suitable plan of study, which is then submitted to the department chair for approval. In consultation with the advisor and other faculty members, each doctoral candidate prepares a formal dissertation proposal, which must be submitted to the department chair by the end of the candidate’s third semester of doctoral study.

Students are required to include in their plan of study at least 18 s.h. of regular course work taught by tenured or tenure-track faculty members of the Department of Geoscience. Students must earn the 18 s.h. after being admitted to and enrolling in the Ph.D. program. Directed study and research credit do not count toward the required 18 s.h.

Ph.D. students must enroll in 012:201 Geoscience Seminar Series each semester they are registered until they successfully defend their dissertations, or for two consecutive semesters after the semester in which they pass their comprehensive examination, whichever comes first.

After earning their first 24 s.h. of graduate credit, Ph.D. students must either be enrolled at least two consecutive semesters in full-time study (at least 9 s.h. per semester) at The University of Iowa, or be enrolled three consecutive semesters for at least 6 s.h. per semester at the University, during which time they hold at least a one-quarter-time assistantship that is certified by the department as contributing to their doctoral program.

Students should complete most of their course work before taking the comprehensive examination, which consists of both written and oral portions and which must be passed before the end of the fourth semester of doctoral study.

Once Ph.D. candidates have passed the comprehensive examination, they are required to register each semester until they receive the degree. Candidates who have completed their plan of study may register for 000:002 Doctoral Continuous Registration or 000:003 Doctoral Final Registration.

Students must submit their written dissertation to the committee at least two weeks before the final examination. All Ph.D. candidates must deliver a one-hour public presentation associated with the dissertation defense. They also are required to submit a manuscript presenting the results of their graduate research to a refereed journal or other publication approved by the department chair before they may defend their dissertation.

Facilities

Resources and equipment available for research in the Department of Geoscience include the following.

**Computer facilities:** five teaching classrooms with 10-12 networked PC workstations; a computing classroom with 20 PCs and 10 Macs with GIS, GMS, remote sensing, image analysis, and specialized computational software packages; a student computer room with 6 PCs and 2 Macs; and a number of multiprocessor workstations in research laboratories.

**Environmental and Hydrogeology Laboratory:** permeameters and tensionometers; pumping and slug/bail test units with transducers and data-loggers; water-quality analysis facility; advanced groundwater modeling and geostatistics software; advanced data logging systems for field research; 3-D sensor arrays (wind and water systems); and facilities for field instrumentation design and construction.

**Environmental Instrumentation Laboratories:** storage, testing, and teaching facility focusing on field instrumentation; assembly, housing, and testing of climatic, meteorological, fluvial, water quality and associated environmental instrumentation data recording systems and sampling systems.

**Geomorphic Computing Laboratory:** high-end visualization, digitizing, remote sensing and GIS systems; and high-end multiprocessor workstations.

**Morphometric laboratories:** reflex microscope and microscribe for capturing 3-D data; high-resolution digital cameras and microscopes for 2-D image analysis; and laboratories for micro- and macro-fossil preparation.

**Paleontological Repository:** more than a million specimens, including some 25,000 type and referred specimens, with 6,000-7,000 primary types; invertebrate, vertebrate, and plant fossils of all geologic ages, and more than 90 percent Paleozoic invertebrates; the fifth-largest university collection in North America (CONARIP 1977).
Petrology and geochemistry laboratories: laser-ablation inductively coupled plasma mass spectrometer (LA-ICPMS); clean laboratory for preparation of samples for elemental and isotopic analysis; alpha- and gamma-spectrometry laboratories; image analysis; heating freezing stage; petrographic microscopes; photo microscopy; wet-chemistry facilities; rock preparation and mineral separation; UNIX, Windows, and Mac workstations for data analysis and modeling; and one atm gas-mixing furnace for melt inclusion homogenization.

Quaternary Materials Laboratory: pipette grain-size analysis apparatus; chittick apparatus; Sedigraph 5100 X-ray particle-size analyzer; Horiba Camsizer L digital image particle analyzer; wet-chemistry facilities; C-H-N element analyzer; a Flotech flotation system; and a Giddings drill rig.

Scanning Electron Microscope: Hitachi S-3400N, a variable-pressure scanning electron microscope (SEM) equipped with a motorized stage, large chamber, and digital image capture; capable of imaging specimens with no metal coating, or specimens that are slightly hydrated or porous, as well as conventionally processed specimens; equipped with a Bruker AXS Quantax 400 X-ray microanalysis system; XFlash silicon drift detector with excellent energy resolution and light element detection, providing ultra-fast acquisition of line scans and elemental maps.

Sedimentary geology laboratories: water ion chromatograph; image analysis; Sedigraph X-ray particle-size analyzer; Horiba Camsizer L digital image particle analyzer; and a soil/sediment characterization laboratory.

Thin-section and rock preparation laboratory: diamond saws and specialized grinding equipment used to prepare ultrathin slices (30 microns thick) of rocks and fossils for microscopic and electron microprobe analysis.

Cooperative Activities

The department does collaborative work with the Iowa Geological & Water Survey and the Office of the State Archaeologist of Iowa. Geoscience students sometimes work on projects for the survey.

The Departments of Anthropology, Biology, Chemistry, Civil and Environmental Engineering, Geography, and Geoscience share services, expertise, joint instruction, and equipment. The geoscience department is an important participant in the Iowa Quaternary Studies group, an interdisciplinary program that promotes projects combining work in anthropology, biology, geography, geology, and statistics. Course work, degree programs, and facilities are shared among departments. The geoscience department and its faculty also support and actively participate in the interdisciplinary Environmental Sciences (p. 342) Program, which offers an undergraduate major (Bachelor of Science), and a number of the department’s courses satisfy requirements of the Certificate in Sustainability (p. 1565).

Field Trips

Field trips are integral parts of several courses in geoscience, with frequent weekend general-interest events. The geology of the Iowa City region is characterized by Quaternary glacial sediments on a largely Paleozoic sedimentary section a few hundred meters thick, overlying a Precambrian crystalline basement. Marine and terrestrial fossil assemblages, extensive reefs, and unique geode sites are located within a few hours’ drive. Numerous Pleistocene glaciations are represented in Iowa, and field studies of landforms, exposures, and cores continue to yield information on sedimentology, stratigraphy, soil formation, paleopedology, and fossil biotas from both glacial and interglacial deposits.

Spring break provides time for longer trips, which are open to all geoscience students. In recent years, students have traveled to the southern Appalachians, Arizona, China, Death Valley, Dominican Republic, the Florida Keys, Hawaii, New Mexico, the Ozarks, Puerto Rico, and Texas. Advanced classes have visited California, Colorado, Kansas, Oklahoma, Wisconsin, and Ontario, Canada.

Courses

Not all courses are offered every year.

Primarily for Undergraduates

012:003 Introduction to Earth Science 3-4 s.h.

Relationships between plate tectonics, geologic time, and the rock cycle with volcanoes and igneous, sedimentary, metamorphic rocks; fossils; radioactive isotopes; landscape evolution; mountain building; natural resources; their impacts on civilization. GE: Natural Sciences without Lab; Natural Sciences with Lab. Same as 053:003.
**012:004 Evolution and the History of Life** 3-4 s.h.
Fossils over the past 3.5 billion years, origin and evolution of life, evolutionary radiations and mass extinctions, the invasion of land, dinosaurs, the age of mammals, relationship between biological systems and environmental change in earth history. Offered spring semesters. GE: Natural Sciences without Lab; Natural Sciences with Lab.

**012:005 Introduction to Geology** 4 s.h.
Minerals, rocks, and rock-forming processes (including volcanoes and sedimentary environments); surface processes (rivers, groundwater, glaciers, deserts, ocean shorelines), major earth processes (continental drift, plate tectonics, earthquakes, mountain building); impact on civilization. Offered fall semesters. GE: Natural Sciences with Lab.

**012:007 Age of Dinosaurs** 4 s.h.
Origin and evolutionary history of dinosaurs; diversity of dinosaurian groups, their geographic distributions and paleoecology; origins of flight among dinosaurs; environmental context, including other animals and plants that lived alongside dinosaurs; the so-called extinction of dinosaurs and radiation of modern forms; the role dinosaurs play in the interaction between science and the popular media. Offered fall semesters. GE: Natural Sciences with Lab.

**012:008 Introduction to Environmental Science** 3-4 s.h.
Biological and physical character of the Earth; interaction of humans with the environment, including impacts on ecosystems, climate, natural processes, resources; alternative options, including sustainability, waste management, energy, land reform. GE: Natural Sciences without Lab; Natural Sciences with Lab. Same as 159:008.

**012:009 Introduction to Environmental Sciences Laboratory** 1 s.h.
Laboratory component of 012:008. Requirements: environmental sciences or geoscience major; and 012:008 or 159:008 for 3 s.h. GE: Natural Sciences Lab Only. Same as 159:009.

**012:010 Honors Thesis in Geoscience** arr.
Independent research resulting in an honors thesis. Requirements: honors standing.

**012:011 Senior Thesis in Geoscience** arr.
Independent research resulting in a senior thesis. Requirements: senior standing.

**012:017 Geology of the U.S. National Parks** 2 s.h.
Geologic features, geologic history, important biological and archaeological characteristics, with emphasis on features that caused certain areas to be included in national park system. Offered spring semesters.

**012:018 Geology Field Trip: Selected National Parks** 2 s.h.
Observation, interpretation of prominent geologic, geomorphic, biological features; semester-break or semester-end visits to different parks or groups of parks each year. Offered spring semesters.

**012:019 Directed Study** arr.
Special topics, independent research.

**012:020 Loess Hills Service Learning Trip** 1 s.h.
Special topics, directed research.

**012:029 First-Year Seminar** 1-2 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.
012:041 Mineralogy 4 s.h.
Physical, chemical, and optical properties of minerals; phase relations; structures; associations; diagnostic features for identification. Offered fall semesters. Prerequisites: 012:003 or 012:005. Requirements: a math course through 22M:005 and introductory chemistry.

For Undergraduate and Graduate Students

012:100 Geologic Training Assignment 1-3 s.h.
Practical experience. Requirements: grade of C or higher in 012:052 and geology g.p.a. of at least 3.00.

012:102 Earth Surface Processes 3 s.h.
Basic geomorphic and environmental processes that shape the earth’s surface; emphasis on erosion, transport, deposition by land mass movement (creep, landslides, earth flow), fluid agents (wind, water, ice); methods used to study these processes. Prerequisites: 012:005 or 012:008 or 044:003 or 159:008. Same as 159:102.

012:104 Climatology 3 s.h.
Boundary layer processes that drive atmospheric dynamics; exchanges of energy and water at simple and complex surfaces; global climate change records, theories, models; impacts of climate on society. Prerequisites: 044:003. Same as 044:101.

012:107 Marine Ecosystems and Conservation 3 s.h.
Introduction to ocean ecosystems, including coral reefs, mangroves, estuaries and salt marshes, sandy and rocky shores, seagrass and kelp beds, the deep sea, plankton; biodiversity of each ecosystem; interrelationship of biota and physical/chemical environment; interactions among organisms, including food webs and symbiosis; local and global threats such as overfishing, pollution, ocean acidification, global warming, sea level change; ongoing biodiversity crisis, solutions for conservation problems.

012:108 Introduction to Oceanography 2 s.h.
Descriptive, chemical, physical, biological, geological aspects of oceans; impact on weather, climate, shorelines, food supply, other aspects of civilization. Offered spring semesters. Recommendations: knowledge of basic chemistry, biology, physics, earth science.

012:110 Introduction to Applied Remote Sensing 4 s.h.
Remote sensing of the earth’s surface from aircraft, satellites; aerial photograph interpretation; remote sensing systems, methods, data analysis using electromagnetic spectrum and digital processing techniques, including visible, infrared, microwave radiation; remote sensing applied to geologic and environmental problems. Requirements: college physics or physical geology. Same as 159:110.

012:112 Geologic Field Methods 3 s.h.
Introduction to basic methods of geologic field work in southwest Montana using topographic maps and GPS to locate oneself, identifying geologic map units (including superficial deposits), recognizing geologic contacts, constructing stratigraphic sections, measuring planar structures, and making geological maps complete with a legend and cross-section. Offered during three-week summer session. Prerequisites: 012:003 or 012:005.

012:113 Geologic Field Analysis 3 s.h.
Structural, stratigraphic, and regional analysis of geology in the Rocky Mountains of Montana; emphasis on making reasonable geologic interpretations from field relationships; first two weeks involve mapping projects in the vicinity of Dillon, Montana that build on experience gained in 012:112; third week involves a capstone experience dedicated to synthesizing the geology of a fold-and-thrust belt near Glacier National Park. Offered three-week summer session. Prerequisites: 012:092 and 012:112.
012:114 Energy and the Environment
3 s.h.
Scientific concepts related to potentially significant energy sources of the 21st century; environmental impacts, positive and negative, of each energy source as well as geologic and geographical distributions and applications. GE: Natural Sciences without Lab.

012:116 Field Trip
2 s.h.
Field trip to an area of geologic interest, such as carbonate area of Florida, Grand Canyon (Arizona), Rio Grande Rift (New Mexico), Death Valley (California, Nevada), Appalachian Mountains (Virginia); preceded by weekly discussions of destination's geology. Offered spring semester.

012:119 Directed Study
arr.
Special topics, independent research.

012:120 Collection Care and Management
3 s.h.
How a museum’s management policy relates to its administrative, legal, and ethical obligations to its collections; acquisitions, deaccessions, collection use, data standards, storage environment, health, safety, documentation. Same as 024:120.

012:121 Principles of Paleontology
3 s.h.
Patterns of evolution in fossil record; species and analysis of their evolutionary relationships; paleoecology, paleocommunity evolution; evolutionary radiation and mass extinctions; large-scale relationships between biodiversity and climatic change. Offered fall semesters.

012:122 Evolution of the Vertebrates
3 s.h.
Evolutionary history of vertebrates revealed by fossils and information from living animals; biogeographic, stratigraphic, paleoecological aspects of selected groups, especially mammals and dinosaurs; transitions from aquatic to terrestrial life, origins of flight, major events in vertebrate history (including mass extinctions and explosive radiations). Requirements: introductory course in geoscience or bioscience.

012:126 Wetlands: Function, Geography, and Management
3 s.h.
Biotic aspects of water resources production; geographical basis of biophysical processes in drainage basins; spatial aspects of stream ecology; regional characterization of wetland structure and process. Prerequisites: 044:101 or 044:103. Same as 044:126.

012:130 Sedimentary Geology
3 s.h.
Basic concepts of sedimentology, stratigraphy, depositional environments, sedimentary petrology; hands-on analyses of sediments and sedimentary rocks, including thin-section petrography; lecture/laboratory. Offered fall semesters. Prerequisites: 012:003 or 012:005.

012:132 Structural Geology
4 s.h.
Rock deformation; description, classification of geologic structures such as faults and folds; processes that generate geologic structures; solution of structural problems; interpretation of geologic maps. Prerequisites: 012:003 or 012:005.

012:136 Soil Genesis and Geomorphology
3 s.h.
Introduction to soil genesis, soil geomorphology, and classification including the basics of soil profile description and soil-landscape, soil-vegetation, and soil-climate relationships; emphasis on study of soils as the interface between living and non-living Earth systems and the role of soils in sustaining ecosystems and human societies; short field excursions and a weekend field trip. Requirements: college earth science and chemistry. Same as 044:186.

012:138 Fluvial Geomorphology
3 s.h.
Hydrologic principles, stream channel processes, and fluvial geomorphology within drainage basin systems; spatial and temporal variations in water distribution, analysis of hydrological data, flow mechanisms, sediment transport, forecasting procedures, hydrograph construction, modeling. Requirements: 012:102 or another 100-level geology or hydraulics course. Same as 053:128.
012:139 Integrated Watershed Analysis 3 s.h.
Integration of existing knowledge of physical, hydrological, and environmental processes with management issues and challenges in water resources and environmental management; aspects of water quantity and quality, water use and treatment; basin management issues related to forestry, agriculture, urbanization, floods, droughts.

012:140 Natural Disasters 3 s.h.
How earth-atmosphere-hydrosphere-space systems produce events catastrophic to humans on the scale of individual lives to civilizations; root causes of earthquakes, landslides, volcanic eruptions, floods, hurricanes, tsunami, tornadoes, and asteroid impact, and their local, national, and global impact; spatial and temporal occurrences of these hazards; methods and processes for hazard preparedness, response, and recovery; social, economic, and policy aspects that affect and compound the magnitude of disasters associated with natural phenomena; case studies drawn from contemporary and ancient societies. GE: Natural Sciences without Lab.

012:141 Analytical Methods 2 s.h.
Theory and practice of analyzing the chemical, isotopic, and mineralogical compositions of rocks, organic materials, and waters; use of modern analytical instruments. Offered spring semesters. Prerequisites: 004:007, 012:052, and 029:012 or 029:082.

012:142 Vertebrate Osteology and Phylogeny 3 s.h.
Anatomy of the vertebrate skeleton from developmental, functional, and phylogenetic perspectives; relationship between skeletal, muscular, and nervous systems; history of the skeleton through modern forms; lecture and laboratory. Prerequisite: 012:122 or 213:190.

012:144 Phylogenetics and Biodiversity 3 s.h.
Methods available for reconstructing evolutionary history and measuring biodiversity, including distance, parsimony, likelihood, and taxic approaches; applications to molecular and morphological systematics, historical biogeography, study of diversity through time. Prerequisites: 012:004 or 012:121, or 002:010 and 002:011.

012:145 Morphometrics 1-3 s.h.
Quantitative methods for collection and analysis of morphologic data, including 2-D and 3-D geometric morphometrics and use of multivariate statistical methods to study size and shape; applications of morphometric techniques to study development and its evolution, variation within and among species, morphologic disparity, related topics in paleontology and evolutionary biology. Prerequisites: 012:004 or 012:121.

012:146 Techniques in Paleontology 3 s.h.
Paleontological data acquisition and analysis, including Fossil collection, preparation, imaging, description; computerized data compilation, manipulation, analysis. Prerequisites: 002:010, and 002:011 or 012:004 or 012:121.

012:149 Elements of Geochemistry 3 s.h.
Introduction to application of chemical principles to solution of geologic problems concerning earth and environmental processes; origin of elements, chemical differentiation of Earth and the solar system, geochronology, application of radiogenic and stable isotopes, chemical equilibrium, elementary thermodynamics and kinetics, carbonate and silicate stability relationships, chemical weathering, adsorption, trace element behavior, oxidation-reduction reactions, characterization of surface and ground waters, and ocean chemistry. Prerequisites: 004:008 and 012:005.

012:150 Igneous and Metamorphic Petrology 4 s.h.
Nature, origin, and petrography of igneous, sedimentary, and metamorphic rocks in hand specimen and thin-section. Offered spring semesters. Prerequisites: 012:041.
012:152 Isotope Geochemistry  3 s.h.
Radiogenic and stable isotope systematics, applications to geological, cosmological, and environmental problems.

012:156 Scanning Electron Microscopy and X-Ray Microanalysis  
Microscopy methods for research; all aspects of research, from sample preparation to imaging to data analysis; when to use a particular microscopy procedure; theory, operation, and application of scanning electron microscopy, scanning probe microscopy, laser scanning microscopy, X-ray microanalysis. Requirements: a physical science course. Same as 052:156, 060:156.

012:159 Topics in Museum Studies  1 s.h.
Systematic and analytic methods used for research in physical collections; tutorials in collection building, curation, and preservation; designed by members of the University of Iowa Collections Coalition. Same as 024:190.

012:160 Advanced Collection Care and Management  3 s.h.
Builds on 024:120; types of museum objects and materials, their care and management; care, storage, and use of paper, books, photographs, works of art, electronic information media, textiles, furniture, archaeological artifacts, natural history specimens, archives; digitization projects, integrated pest management, risk assessment, museum security, museum construction and renovation, grant writing; for students planning museum careers or for professions that require care of collections. Prerequisites: 012:120 or 024:120. Same as 024:140.

012:161 Stratigraphy  3 s.h.
Genesis of sedimentary rocks, geologic time, stratigraphic nomenclature, biostratigraphic and physical correlation methods, mass extinctions, seismic and sequence stratigraphy, basin analysis and modeling, stratigraphic field methods. Offered fall semesters. Prerequisites: 012:052.

012:166 Hydrogeology  3 s.h.
Role of groundwater in water cycle, subsurface water profile, aquifers and aquitards, basic principles and laws of physical and chemical processes of groundwater flow and contaminant transport in geological formations for sustainable development and protection of groundwater resources; groundwater geology and hydrology, regional aquifer systems, well hydraulics, slug/bail and pumping test and their analyses, groundwater contamination and remediation, management and sustainability of groundwater resources.

012:170 Evolution of Ecosystems  3 s.h.
Evolutionary history of terrestrial and marine ecosystems; ecological processes from population to ecosystem levels; community assembly, trophic levels, networks, biodiversity dynamics; practical aspects of paleoecological data collection, statistical analysis, modeling. Requirements: two courses in geoscience, biology, environmental sciences, anthropology, or geography. Same as 159:170.

012:171 Evolution of Plants  3 s.h.
Evolutionary history of plants over geologic time: relationships, morphology, and fossil record of major plant lineages; patterns and processes in evolution of plant morphology and diversity; ecological innovations and evolution of terrestrial ecosystems; relationships between biotic and environmental change; paleobotanical tools in stratigraphy, paleoclimatology, sedimentology; practical aspects of paleobotanical data collection, statistical analysis, modeling; field trip. Requirements: two courses in geoscience, anthropology, biology, environmental science, or geography.

012:172 Glacial and Pleistocene Geology  3 s.h.
Introduction to glaciers and glacial and interglacial Earth systems; linkages among glacial, oceanic, and atmospheric systems and their effects on landscapes and biota over the past two million years; how oceans, atmosphere, and glaciers interact and landscape effects of past glacial and interglacial cycles. Requirements: physical geology or physical geography or anthropology.
012:174 Seminar: Taphonomy 3 s.h.
Taphonomy (study of fossil record in paleontology and archaeology); processes for accumulation, modification, and deposition of remains in prehistory; instruction by archaeologist and paleontologist. Requirements: graduate standing. Same as 113:174.

012:175 Mineral and Petroleum Exploration Geology 3 s.h.
Fundamentals of resource exploration philosophy and methods, with project-based presentation of techniques and strategies for mineral exploration and petroleum exploration; integration and evaluation of geological, geochemical, and geophysical techniques for mineral exploration; hydrocarbon systems and seismic interpretation for petroleum exploration. Corequisites: 012:052 and 012:092.

012:178 Applied Geostatistics 3 s.h.
Applications of geostatistical methods to geology, geography, hydrology, environmental sciences, and engineering; variogram, Kriging, analysis of spatial-varied data with varied computer software in participants’ specialties. Same as 044:188.

012:179 Engineering Geology 3 s.h.
Application of geology, water, and earth processes to civil and environmental engineering practice; physical properties of rock and soil, geologic mapping and surveying, groundwater supplies and wells, stream engineering, watershed management, site investigations for environmental assessment, and geologic hazards. Prerequisites: 012:003 or 012:005 or 012:008.

012:180 Survey of Geophysical Methods 3 s.h.
Geophysical methods used to address geological and engineering problems (e.g., finding petroleum and mineral deposits, studying groundwater resources, tracing contaminant plumes, evaluating archaeological sites); methods including gravity, magnetics, radiometrics, refraction and reflection seismography, geophysical well logging, and geoelectrical methods (direct current, frequency- and time-domain electromagnetics, induced polarization, magnetic resonance surveying, ground-penetrating radar); capabilities, drawbacks, costs; planning and budgeting surveys, processing the resulting digital data. Requirements: introductory geology or physics.

012:184 Groundwater Modeling 3 s.h.
Groundwater flow and contaminant transport modeling; numerical methods, applications of groundwater modeling to water supply, groundwater resources evaluation, remediation design using software; GMS (MODFLOW, MODPATH, and MT3D). Prerequisites: 012:166 or 053:103, and 22M:026. Same as 053:104.

012:185 Approaches to Geoarchaeology 3 s.h.
Geoarchaeology as multidisciplinary contextual framework for human paleoecology; natural processes that create the archaeological record, approaches to reconstructing landscapes of the past as a context for archaeological deposits; weekend field trip. Prerequisites: 012:136 or 012:172 or 113:161 or 113:164. Same as 113:189.

012:188 Environmental Seminar 1 s.h.
Lectures on the environment by faculty members from the University, other colleges and universities, researchers and professionals from state and federal agencies.

012:189 Global Change Seminar 1-2 s.h.
Current global change issues, including climate change, ecosystem changes and conservation, energy; seminar format with student presentations.
012:190 Undergraduate Geoscience Colloquium 1-2 s.h.
Presentation and discussion of current research by undergraduates.

012:191 Geotectonics 3 s.h.
Dynamic processes responsible for crustal genesis, plate movements, mountain building; plate boundary zones; sedimentologic, structural, petrologic, geophysical characteristics of major tectonic settings; multidisciplinary approach; week-long field trip. Prerequisites: 012:092.

012:193 Sustainability Project arr.
Individual or group sustainability project supervised by a faculty member; regular meetings, data collection and interpretation, final project report.

Primarily for Graduate Students

012:201 Geoscience Seminar Series 1 s.h.
Scholarly work and research in geoscience. Repeatable.

012:207 Geologic Orientation 1 s.h.
Department degree requirements, programs; field survey of local geology; tips for TAs; introduction to specialized facilities; for new graduate students.

012:210 Hydrogeology Seminar 3 s.h.
Innovative experimental and modeling studies in hydrogeology; experimental need, design, mathematical formulation, assumptions, data collection techniques; data analysis and its importance to groundwater modeling. Prerequisites: 012:166. Same as 053:215.

012:225 Paleontology Seminar 1-3 s.h.

012:233 Carbonate Petrology 2 s.h.
Identification of constituents and interpretation of genesis, structures, environments of formation, and patterns and processes of diagenesis in limestones; laboratory-based. Requirements: familiarity with optical microscope and sedimentation principles.

012:235 Depositional Environments 3-4 s.h.
Modern patterns of sedimentation; emphasis on interpreting depositional environments of ancient sedimentary rocks and deciphering resulting stratigraphic patterns. Requirements: knowledge of basic sedimentary geology and paleontology.

012:238 Process Geomorphology 1-3 s.h.
Topics in process geomorphology ranging from fluvial dynamics to mass movement to sediment transport and related environmental processes. Repeatable.

012:239 Advanced Watershed Analysis Seminar 1-3 s.h.
Integration of existing knowledge of physical, hydrological, and environmental processes with management issues and challenges in water resources and environmental management; aspects of water quantity and quality, water use and treatment, and basin management issues related to forestry, agriculture, urbanization, floods, droughts. Repeatable.

012:253 Geochronology 3 s.h.
How to evaluate published ages, and assumptions/errors involved; how to select and sample suitable materials for dating, and choose a suitable dating method and analytical technique; opportunity to develop skills for research and professional careers. Prerequisites: 012:149 or 012:152.

012:257 Tectonics and Petrology Seminar 1-2 s.h.
Topics in tectonics, structural geology, petrology. Repeatable.
012:293 Advanced Structural Geology 3 s.h.
Kinematic and dynamic analysis of deformed rocks; microstructural analysis; strain analysis, field investigations of highly deformed rocks. Repeatable. Prerequisites: 012:132.

012:310 Research: Geoscience  arr.
Independent research related to theses or dissertations in geoscience. Repeatable.
German

Chair
Roland Racevskis

Coordinator
Sarah M.B. Fagan

Professors
Sarah M.B. Fagan, Waltraud Maierhofer

Professors emeriti
Judith P. Aikin, Wolfgang Ertl, James P. Sandrock, Ingeborg H. Solbrig

Associate professors
Glenn Ehrstine, Astrid Oesmann

Associate professors emeriti
Ford B. Parkes, Richard M. Runge

Lecturer
Bruce Spencer

Undergraduate degree: B.A. in German
Undergraduate nondegree program: Minor in German
Graduate degrees: M.A., Ph.D. in German
Web site: http://clas.uiowa.edu/dwllc/german

The Department of German provides education in the language, literature, and culture traditionally designated as German, as expressed in the language and cultural heritage of Germany, Austria, and Switzerland. Its faculty members focus their research and teaching on German language, literature, and culture, applying disciplinary and interdisciplinary perspectives.

Graduate programs in German build on the department’s strengths and those of other departments to provide strong, individualized graduate training. The department is committed to helping students identify and pursue their own historical and theoretical interests in the study of German language and literature.

Undergraduate students in all majors may satisfy the World Languages requirement of the General Education Program (p. 381) with courses in German; see “Language for General Education” below. They also may choose a variety of other courses on German arts and culture that are approved for General Education and taught in English; see "German in Translation" under "Courses" below.

University graduates with degrees in German frequently enter the teaching profession. They also find positions in government, foreign service, and commercial enterprise.

Undergraduate Programs

• Major in German (Bachelor of Arts)
• Minor in German

Bachelor of Arts

The Bachelor of Arts with a major in German requires a minimum of 120 s.h., including at least 30 s.h. of work for the major. Students who plan to complete the undergraduate teaching major in German in conjunction with the College of Education should see “B.A. with Teacher Licensure” below.

Students must complete the College of Liberal Arts and Sciences General Education Program (p. 381).

Students who begin a German major with no previous German language experience must complete the following course sequences or their equivalents.

<table>

</tr>
</tbody>
</table>

This requirement also may be satisfied by various combinations of 013:013 Intensive Elementary German, 013:014 First-Year German Review, and 013:025 Intensive Intermediate German.

The required 30 s.h. for the major must include at least five upper-level German courses taken at The University of Iowa. Students may count a maximum of two Department of German courses taught in English (prefix 13E) toward requirements for the major if they enroll in a section that includes a German language component. Note: 013:101 Introduction to German Literature is prerequisite to all other German literature courses.

Culture—one of these:

- 013:105 German Cultural History 3 s.h.
- 013:115 Contemporary German Civilization 3 s.h.

Electives:

Four 100-level electives offered by the Department of German 12 s.h.

German majors, both graduate and undergraduate, are urged to supplement their degree programs with relevant courses in areas such as German history, philosophy, and business.

**B.A. with Teacher Licensure**

German majors interested in licensure to teach in elementary and/or secondary schools must successfully complete the requirements for a major in German and the College of Education's Teacher Education Program (TEP). Several courses in the College of Education and one semester of student teaching are required. Contact the Office of Education Services for details.

Students who plan to use a German minor to teach at the elementary and/or secondary level also must contact the Office of Teacher Education and Student Services about requirements.

**Four-Year Graduation Plan**

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan.

**Before the third semester begins:** language competency equal to first-year German and at least one-quarter of the semester hours required for graduation

**Before the fifth semester begins:** language competency equal to second-year German and at least one-half of the semester hours required for graduation

**Before the seventh semester begins:** four courses in the major and at least three-quarters of the semester hours required for graduation

**Before the eighth semester:** two to three additional courses in the major

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

**Honors**

Honors study in German is open to exceptional students who are members of the University of Iowa Honors Program, which requires students to maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University of Iowa Honors Program for more information). To participate in honors in German, students must have completed three years of college-level German, or the equivalent, with a g.p.a. of at least 3.50 in upper-division German courses.

Students working toward graduation with honors in the major must register for 013:190 Honors Program in German and must meet with their faculty director of studies on a regular basis. They are expected to engage in readings and discussions in German literature and culture and to write essays in German and English. They also must complete honors research and write an honors thesis, registering for 013:191 Honors Research and Thesis. They complete their honors requirements by presenting their honors thesis to a faculty committee of at least three members.

**Minor**

The minor in German requires a minimum of 15 s.h. in college-level German courses, including 12 s.h. in 100-level courses taken at The University of Iowa; however, students may count up to 6 s.h. earned in study abroad at a university in a German-speaking country toward the minor. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass.

All Department of German courses taught in German and numbered 013:100 and above count toward the minor. Students may count one German course taught in English (prefix 13E) toward the minor if they enroll in a section that includes a German language component.

**Language for General Education**

The department offers several sequences of German language courses that students in all majors may use to satisfy the World Languages requirement of the College of Liberal Arts and Sciences General Education Program (p. 381).

Students who have had experience with German should take the online World Languages Placement Test, which helps determine the level at which a student should begin German language study at The University of Iowa. Students with no background in German should begin their study with 013:011 Elementary German I.

Students using German to satisfy the World Languages requirement should talk with
departmental advisors to determine which of these sequences is best for them.

**Joint B.A./M.A.**

The joint Bachelor of Arts/Master of Arts program in German permits students to count 12 s.h. of approved course work toward both degrees and to enter graduate-level German courses while they are still undergraduates. Students may complete both degrees in five years. They receive the B.A. when they have satisfied all requirements for the bachelor’s degree, and they receive the M.A. when they have completed all master’s degree requirements.

The joint B.A./M.A. is appropriate for students who enter the University from high school with advanced German language preparation. It is attractive to highly motivated students who plan to study abroad and who plan to pursue a Ph.D. in German or second language acquisition. It may serve as preparation for other programs, such as those related to international studies, library science, business with an international focus, or international relations. Students seeking careers in teaching or other fields may pursue the joint degree as a credential.

Joint program students must fulfill all requirements for the B.A. They ordinarily spend two semesters in their junior year enrolled in the study abroad program at the University of Freiburg, in Germany (see “Study Abroad” below), unless they have satisfied this requirement another way (e.g., a year abroad during high school or another study abroad program with similar content).

During the last two semesters of their senior year, they may take up to 12 s.h. of graduate-level courses that count toward both degrees (for the B.A., 6 s.h. count as required courses and 6 s.h. count as electives). Once they complete all B.A. requirements, they complete the remaining M.A. requirements.

Students must maintain an undergraduate German g.p.a. of at least 3.50; if they fail to meet this standard for more than one semester, they may be required to leave the program. They must have an overall undergraduate g.p.a. of at least 3.00 when they achieve graduate standing.

Applicants must be admitted to the joint program before the beginning of their seventh semester (senior year). They must be University of Iowa undergraduate students; must have completed 80 s.h. or be in the process of completing 90 s.h. of undergraduate work; and must have completed or be in the process of completing at least 21 s.h. of 100-level course work in the German major. They must have completed or be in the process of completing a study abroad program in a German-speaking country, or have satisfied this requirement another way. They also must have a g.p.a. of at least 3.50 in German when they apply to the program or a letter from a Department of German faculty member recommending an exception.

Students pay undergraduate tuition and fees during their first semester in the joint program (normally their seventh semester); beginning with their second semester in the program (normally their eighth semester), they begin paying graduate tuition and fees. Students may hold a graduate appointment beginning with their second semester in the joint program.

**Study Abroad**

The Department of German participates in an academic year abroad program for undergraduates at the Albert-Ludwigs Universität in Freiburg, Germany. The Freiburg program is offered by a consortium made up of Michigan State University, The University of Iowa, The University of Michigan, and The University of Wisconsin-Madison.

Students arrive during the first week of September and participate in a four-week intensive language
program. Then they take a blend of special program classes and regular German university courses. Organized field trips are designed to give students a broader perspective of German culture. Vacation periods permit extensive travel throughout Europe, and students are encouraged to use weekends for shorter trips in the region.

To apply, students must have reached at least sophomore standing by the beginning of the program, must have completed at least the first four semesters of college German or the equivalent with a g.p.a. of at least 3.00 in German, and must be in good academic standing at a U.S. college or university.

Students earn resident credit in all courses successfully completed in the program. They may count up to 21 s.h. earned at Freiburg toward the major in German. Credit also counts toward the minor in German. Students in other majors should consult with their advisor or their department’s undergraduate director.

Contact the Department of German or the Office for Study Abroad for more information.

Graduate Programs

• Master of Arts in German (with or without thesis)
• Doctor of Philosophy in German

The department is accepting applications to the Master of Arts program for fall 2012. Admission to the Doctor of Philosophy program is suspended; for Ph.D. requirements, see the 2010-11 General Catalog.

Advanced undergraduate students majoring in German may begin working toward a master’s degree in German while still in the bachelor’s degree program; see ”Joint B.A./M.A.” above.

Master of Arts

The Master of Arts program in German requires a minimum of 33 s.h. of graduate credit. It is offered with and without thesis.

M.A. students choose one of two concentrations: German literature or Germanic linguistics. The German literature concentration requires seven literature courses (21 s.h.) and four linguistics courses (12 s.h.). The Germanic linguistics concentration requires seven linguistics courses (21 s.h.) and four literature courses (12 s.h.).

M.A. students are expected to complete at least 24 s.h. in the Department of German. All M.A. course work taken outside the department requires the graduate advisor’s approval.

Before taking the M.A. exam, students must demonstrate reading knowledge of a foreign language other than German, at a level equivalent to two years of college study or four years of high school study. Students may demonstrate competence by submitting proof that they have taken the required course work with a g.p.a. of at least 3.00 or by passing an exam at the fourth-semester college level, as determined by the appropriate language department.

Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate (p. 1117) College section of the Catalog.

Financial Support

Teaching assistantships, research assistantships, and partial tuition scholarships are available for qualified graduate students. The department awards the Wilson and the Funke prizes to students of distinction.

Facilities and Resources

Students have the opportunity to improve their comprehension and command of German by working with recorded materials in the Language Media Center. They also may benefit from the multimedia courseware and digital video recordings from German television.

An extensive collection of works and periodicals at University of Iowa Libraries facilitates research in all major areas of German literature and Germanic linguistics and at all levels of study.

The Global Village Living-Learning Community is an on-campus housing option for undergraduate students.

Courses

Primarily for Undergraduates

013:011 Elementary German I 4 s.h.
Understanding and speaking “everyday German”; reading and writing skills; acquaintance with the German-speaking world through discussion, readings, videos. GE: World Languages First Level Proficiency.
013:012 Elementary German II  4 s.h.

013:013 Intensive Elementary German  4,6 s.h.
Elementary German I and II combined in one intensive course. GE: World Languages Second Level Proficiency.

013:014 First-Year German Review  5 s.h.
Accelerated course in preparation for third-semester German. Requirements: at least two years of high-school German. GE: World Languages Second Level Proficiency.

013:021 Intermediate German I  4 s.h.
Proficiency in spoken and written German; German-speaking cultures of central Europe, their historical background; emphasis on refinement of reading skills. Prerequisites: 013:012 or 013:014. GE: World Languages Second Level Proficiency.

013:022 Intermediate German II  4 s.h.

013:025 Intensive Intermediate German  4-6 s.h.
Intermediate German I and II combined in one intensive course. Prerequisites: 013:012 or 013:013 or 013:014. GE: World Languages Fourth Level Proficiency.

013:100 Individual German  arr.
Requirements: German major or minor.

013:101 Introduction to German Literature  3 s.h.
Literary works from various genres. Taught in German. Prerequisites: 013:022.

013:103 Composition and Conversation I  3 s.h.
Active command of German in reading, speaking, writing. Taught in German. Prerequisites: 013:022.

013:104 Composition and Conversation II  3 s.h.
Taught in German. Prerequisites: 013:022.

013:105 German Cultural History  3 s.h.
Emphasis on development of arts, philosophy, literature. Taught in German. Prerequisites: 013:101 or 013:103 or 013:104. GE: Literary, Visual, and Performing Arts; Values, Society, and Diversity.

013:107 Introduction to German Linguistics  3 s.h.
Phonology, morphology, syntax, semantics, historical development. Taught in German. Offered spring semesters of even years. Prerequisite: 013:101 or 013:103 or 013:104.

013:108 The German Media  3 s.h.
Reading and listening skills; German culture as portrayed by print media, the web, television. Taught in German. Offered fall semesters of odd years. Prerequisites: 013:101 or 013:103 or 013:104.

013:114 Business German  3 s.h.
World of German business, role of German-speaking countries in world trade; emphasis on German business protocol, correspondence. Taught in German. Offered fall semesters of even years. Prerequisites: 013:022 or 013:025.

013:115 Contemporary German Civilization  3 s.h.
Government and political structure, economy, mass media, education, social and cultural life of Germany, Austria, Switzerland from the end of World War II to present. Taught in German. Offered spring semesters of odd years. Prerequisites: 013:101 or 013:103 or 013:104. GE: International and Global Issues.
013:116 Advanced Composition and Conversation 3 s.h.
Speaking and writing. Taught in German. 
Prerequisites: 013:103 and 013:104. 
Requirements: German undergraduate standing.

013:140 Literature in Film 3 s.h.
Representative texts of German literature with film adaptations as specific readings. Taught in German. Corequisites: 013:101, if not taken as a prerequisite.

013:142 Twentieth-Century Children's Literature 3 s.h.
Introduction to literary epochs and genres in 20th-century German literature, through texts written primarily for children. Prerequisites: 013:101.

013:143 Witch Trials: Fact and Fiction 3 s.h.
Historical construction and fictional representation of women and men persecuted as witches and witchmasters in German-speaking countries. Prerequisites: 013:101.

013:144 Self and Other in German Short Fiction 3 s.h.
Survey of past 200 years of German short stories and novellas; definition of self against "other"; how narrative reinforces identity of self and delineates difference through conflict, terms in which narrative define self (e.g., moral, psychological, sexual, historical, cultural, political), how it stimulates process of reader identification; how narrative complicates or undermine categories of self and other, sameness and difference; Ludwig Tieck, E.T.A. Hoffmann, Heinrich von Kleist, Gottfried Keller, Thomas Mann, Arthur Schnitzler, Franz Kafka, Ingeborg Bachmann. Taught in German. Corequisites: 013:101.

013:148 Violence and Culture 3 s.h.
Violence viewed with a mixture of fear and fascination in modern German society, source of creation and destruction; how this is treated in literary, cinematic, and critical works from the 19th and 20th centuries; how violence is interpreted and evaluated in these works in social, political, psychological, and philosophical terms. Prerequisites: 013:101.

013:150 Beautiful Souls and Scandalous Writing 3 s.h.
Varied works of and about the 18th century; fairy tales, plays, short novels, poems, and other texts by authors such as Lichtenberg, Goethe, Naubert, Schiller, Schlegel, Sueskind; gender roles ascribed to women and men. Prerequisites: 013:101.

013:151 New Literature and Film from Switzerland 3 s.h.
New directions in Swiss literature and film of late 20th and early 21st centuries; genres, authors, and works including youth fiction and biographical fiction by Eveline Hasler, Gabrielle Alioth, or Corinne Hofmann, a novel by Zoe Jenny, detective fiction by Hansjörg Schneider, popular fiction by Milena Moser; Swiss identity, social and economic issues, migration and immigration, literary works on film, travels to faraway places and times, cross-cultural love stories, mystery. Taught in German. Prerequisites: 013:101.

013:152 German Culture Before the Third Reich 3 s.h.
Introduction to self-consciously, avant-garde literature (drama, poetry, prose) and other art forms (film, music, visual arts) produced in Germany between 1910-1930; examination of various styles, including expressionism, Dadaism, new objectivity, surrealism; artistic innovation and cultural resonance. Prerequisites: 013:101.
013:153 Tyrants and Terror  
3 s.h.
Introduction to literature and adaptations in film from 1750 to the present; artists’ and writers’ views of appalling events and historical figures; application of creative role playing to better understand structural and psychological components and describing and generating emotions; readings range from Schiller’s classical dramatization of the Wilhelm Tell myth to recent Nobel-prize winner Herta Mueller writing about communist Romania. Prerequisites: 013:022 and 013:101. Requirements: two years of German language.

013:155 Image of America in German Literature and Film  
3 s.h.
Examination of real and imagined cultural stereotypes; representations of the United States in German literature, film, and media.

013:165 History of the German Language  
3 s.h.
History of the German language; its Indo-European roots, important characteristics of the language’s major periods. Prerequisites: 013:101 or 013:103 or 013:104.

Intermediate German; see "For Undergraduate and Graduate Students," above.

013:128 German Reading for Graduate Students  
4 s.h.
Grammar review, vocabulary building, extensive reading of sophisticated texts. Offered spring semesters. Prerequisites: 013:012 or 013:013 or 013:014. Requirements: non-German graduate standing.

For Graduate Students

013:200 Advanced Studies  
arr.
Special problems in German literature and linguistics. Repeatable. Requirements: German graduate standing.

013:220 The German Novel  
3 s.h.
Representative works of German fiction from 17th century to present; historical development of the genre, importance of each work for its period. Repeatable.

013:221 Principles of Teaching and Learning Foreign Languages  
3 s.h.

013:224 The German Drama  
3 s.h.
Repeatable.

013:241 History of the German Language  
3 s.h.

013:243 Early German Theater  
3 s.h.
Development of German drama from the 10th to 18th century, beginning with Hrotsvitha of Gandersheim and ending with Johann Christoph Gottsched; the place of theater in contemporary society; the function of religious (passion) and secular (carnival) plays for the late medieval urban community; the role of Protestant plays in spreading religious reform; the purpose of court performance during the Baroque.

German for Graduate Nonmajors

Graduate students not pursuing a degree in German also may take 013:013 Intensive Elementary German and 013:025 Intensive
013:253 Multimedia and Second Language Acquisition
Foreign language multimedia in the context of current second language acquisition theories and research; readings on interactivity, interface design, feedback, learner control, and acquisition of vocabulary, grammar, and culture; multimedia development project. Requirements: foreign language teaching methodology course. Same as 009:238, 035:212, 164:211.

013:255 Semantics
Meaning in natural language, with focus on German; lexical semantics (sense relations, semantic fields, componential analysis), modality, temporal and spatial deixis, aspect. Same as 164:298.

013:256 Modern German Syntax
Analysis of syntax within a generative framework.

013:257 Morphology
Word structure and formation in Modern German; inflection, derivation, compounding.

013:258 Modern German Phonetics and Phonology
The sounds and sound system of Modern Standard German.

013:259 Grammar in Second Language Teaching/Learning
Grammar, second language acquisition, and teaching. Taught in English, projects in varied languages. Same as 164:225.

013:260 Crossing Borders Proseminar

013:262 Crossing Borders Seminar

013:283 The Age of Goethe
Storm and Stress (Goethe, Schiller, Klinger, Lenz) and the Weimar classicism (1794-1805) of Goethe and Schiller; interdependence of movements and their theoretical basis (Herder, Winckelmann) vis-à-vis representative works.

013:298 Special Topics in German Literature
Repeatable. Requirements: German graduate standing. Same as 048:298.

013:299 Special Topics in German Linguistics
Repeatable. Same as 103:232, 164:299.

013:300 Master's Thesis

013:350 Pre-Comprehensive Registration

013:371 Seminar in Early German Literature
Repeatable.

013:400 Ph.D. Dissertation
Repeatable.

German in Translation

13E:029 First-Year Seminar
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities, field trips); introduction to the intellectual life of German or related cultures. Readings in English. Prerequisite: first- or second-semester standing.
13E:066 Pact with the Devil  
3 s.h.
Pact with the devil—a metaphor for humankind’s desire to surpass the limits of knowledge and power—in German literature and culture from early modern time to early 20th century; Goethe’s Faust, Klaus Mann’s Mephisto, Thomas Mann’s Doctor Faustus, Weber opera; fascination with the forbidden in regard to women, such as in Meinhold’s Amber Witch; the pact in other cultures and in contemporary American literature and culture. Taught in English. Prerequisites: 010:001. GE: Literary, Visual, and Performing Arts.

13E:070 Mardi Gras and More: Cultures of Carnival  
3 s.h.
Literature and customs associated with carnival from antiquity through present day; readings on theories of the carnivalesque (Mikhail Bakhtin, Peter Burke, and others); materials from three distinct carnival cultures: Renaissance Europe (François Rabelais, German carnival plays), 19th-century New Orleans, present day Rio de Janeiro. GE: Values, Society, and Diversity.

13E:075 Scandinavian Crime Fiction  
3 s.h.
Contemporary Scandinavian crime novel in its literary, historical, geographic, cultural, and social context. Taught in English. GE: Literary, Visual, and Performing Arts.

13E:080 King Arthur Through the Ages  
3 s.h.
Representation and function of King Arthur in European literature and film, from Geoffrey of Monmouth’s History of the Kings of Britain (ca. 1136) to the present. Taught in English. GE: Literary, Visual, and Performing Arts; Values, Society, and Diversity.

13E:085 From the Brothers Grimm to Kafka: The Fantastic and Supernatural in German Literature  
3 s.h.
Themes of the fantastic and supernatural in German literature; works by well-known authors from 18th century to present (Goethe to Kafka, the Romantics, Magic Flute to Neverending Story) in historical context; writers’ struggle to define and maintain themselves through tumultuous social and personal changes. GE: Literary, Visual, and Performing Arts.

13E:090 Music and the German Imagination  
3 s.h.
Role of music in German culture, with focus on German opera; social content of musical experience in a range of genres—literature, criticism, philosophy, opera; music viewed as a public phenomenon or a private experience, interplay between these contrary attitudes from 18th to mid-20th century, their place in concept of Germans as “people of music”; texts by Rousseau, Goethe, E.T.A. Hoffmann, Kleist, Grillparzer, Hegel, A.B. Marx, Mörke, Schopenhauer, Nietzsche, Thomas Mann, Kafka, Hesse, Adorno; operas by Mozart, Wagner, Berg, Brecht, Weill. Taught in English. GE: Literary, Visual, and Performing Arts.

13E:118 The Third Reich and Literature  
3 s.h.

13E:119 German Film  
3 s.h.
Overview 1925-1987; examples of avant-garde films of the Weimar Republic, propagandist filmmaking from the Third Reich, filmmaking traditions of the GDR and FRG. Taught in English. GE: Literary, Visual, and Performing Arts.

13E:120 Germany in the World  
3 s.h.

13E:126 Germany Since 1914: Weimar, Hitler, and After  
3-4 s.h.
Continuity, change in 20th-century German politics, society, culture; creation, collapse of Weimar Republic; Nazism and Third Reich; East and West Germany since 1945; unification and its contents. GE: International and Global Issues. Same as 16E:156.
13E:151 New Literature and Film
from Switzerland: Beyond Heidi
and Lucerne

New directions in current Swiss literature and film; recent developments in Swiss society, both in Europe and globally; Swiss-German literature as unique, and as part of German literature.
Global Health Studies

Director
Christopher Squier

Undergraduate nondegree programs: Minor, Certificate in Global Health Studies
Graduate nondegree program: Certificate in Global Health Studies
Web site: http://international.uiowa.edu/centers/global-health/default.asp

The Global Health Studies Program examines health issues and health care in developing and developed countries, including the United States, in light of themes, processes, and institutions that influence health and disease. Among these are climate, culture, economy, history, legal structure, politics, religion, and technology.

The Global Health Studies Program emphasizes career and vocational aspects of global health and prepares students for occupations that increasingly demand critical interdisciplinary and international thinking skills and perspectives. It provides an understanding of phenomena such as infectious and chronic diseases, fitness and longevity, climate change and natural disasters, environmental hazards, use of legal and illegal drugs, interventions against violence, war and injuries, new biomedical technologies, reproductive health and family planning, human rights, access to health care, and non-Western health cultures and alternative therapies.

It also promotes an institutional focus that enables students and faculty members from different departments, colleges, and disciplines University-wide to meet on the common ground of their shared interests in global health issues.

The program attracts undergraduate, graduate, and professional students from a wide range of disciplines, including public health, health and pre-health sciences, health economics, nursing, social sciences, environmental engineering, anthropology, history, law, business, journalism, social work, and education.

Undergraduate and Graduate Programs

• Certificate in Global Health Studies (undergraduate and graduate)
• Minor in global health studies (undergraduate)

Undergraduate students may earn either the certificate or the minor, but not both. Graduate students may earn only the certificate. The certificate is noted on students’ transcripts.

Global health studies programs are administered by International Programs; the certificate and minor are awarded by the College of Liberal Arts and Sciences.

Certificate

The Certificate in Global Health Studies requires 25 s.h. Students complete core courses, electives, and health-related research in an international setting. Courses may be chosen from those offered by the Global Health Studies Program (see "Courses" below) and by other departments and programs (see "Approved Electives" below). Students may be granted credit toward the certificate for course work they completed within two years before beginning the program.

Students must maintain a g.p.a. of at least 3.00 in work for the certificate.

Admission to the Global Health Studies certificate program is competitive. Applicants must be enrolled in an undergraduate degree program at The University of Iowa or must hold an undergraduate degree from an accredited institution. They must be in good academic standing and must be able to demonstrate an interest in and an understanding of the field of global health.

Application forms (see the Guide to Global Health Studies) must be submitted to the Global Health Studies Program by September 30 for spring semester admission and by February 28 for fall semester admission.

The Certificate in Global Health Studies requires the following work.

CORE COURSES

ELECTIVES

Students complete 17 s.h. of approved electives, including at least 9 s.h. in residence at The University of Iowa. Students may petition to take courses not on the approved list (see "Courses" and "Approved Electives"), providing they can show that the courses include substantial material related to global health. Contact the Global Health Studies Program for details.
INTERNATIONAL STUDY OR RESEARCH

Students must complete a study or research project of six to eight weeks’ duration in an international setting. They may develop and conduct a research project, participate in a health-related study abroad program, assist a faculty member with research, or complete an internship on a global/environmental health issue.

Projects require approval by the Global Health Studies Program steering committee and must be supervised by a faculty member. Students may apply up to 8 s.h. of academic credit for research or internship experiences to the elective requirement.

Certificate students may apply for an international travel scholarship ($1,000). Other financial support may be available for some projects. Visit the Global Health Studies Program web site for more information.

Language Study

Students should complete four semesters of modern language study or course work that fulfills or is equivalent to the College of Liberal Arts and Sciences General Education Program (p. 381) World Languages requirement. Language study must be tied to the required international study or research experience in order to count toward the certificate. Students whose first language is not English may waive the certificate’s language requirement.

The Global Health Studies Program steering committee may require students to take additional language study in preparation for a research or internship program. Students interested in learning an infrequently taught language to facilitate their participation in an international experience should investigate International Programs’ Autonomous Language Learning Network (ALLNET).

Public Presentation

During the semester following the international experience, students present their international research project results to a special session of 152:150 Research Design in Global Health or to an equivalent public forum, such as a departmental seminar. Students also must submit a two- to three-page project report summarizing their research, study abroad, or internship experiences.

Approved Electives

In addition to courses offered by the Global Health Studies Program (see “Courses”), students may use the following courses to complete requirements for the certificate or minor.

<table>

</table>
period of study abroad focused on global health issues is highly recommended.

Each student’s plan of study for the minor is developed according to the student’s interests and in consultation with a program advisor.

Activities and Resources

The Global Health Studies Program organizes both on-campus and international activities and research opportunities for students and faculty members, enabling them to become acquainted with major global health issues. Several scholarships, academic fellowships, international fellowships, and research and study abroad programs supplement the global health studies certificate program. These are sponsored by the University and a variety of agencies. Contact the Global Health Studies Program for details.

Courses

152:111 International Health 3 s.h.
Urgent health problems in the developing world and among disadvantaged populations in developed countries; biological, social, cultural, political aspects of international health problems; applications of research methods from epidemiology, environmental health, social sciences. Same as 173:111, 175:111.

152:112 Global Environmental Health Policy 3 s.h.

152:119 Health in Mexico 3 s.h.
Use of anthropological perspectives to examine disease, healing systems, and ideas about health and the body in Mexico and its diaspora; relationships between structural conditions and historical and political transformations; ideas about gender and race; chronic and acute disease in Mexico; conquest and disease; racialized bodies; sexual health; biomedicine; shamanism; immigration and health; pollution and narcoviolence; readings in English. Same as 113:119.

152:120 Global Health and Human Rights 2-3 s.h.
Requirements: junior or senior standing.

152:121 Health of Indigenous Peoples 3 s.h.
Health problems and services for indigenous populations worldwide, from perspective of Fourth World postcolonial politics. Prerequisites: 113:003 or 113:010. Same as 113:121, 149:121.

152:125 Topics in Global Health 1-3 s.h.

152:126 International Perspectives: Xicotepec 2 s.h.
Introduction to providing service to a community in a less developed country; student projects intended to improve community life in Xicotepec. Corequisites: 165:126. Requirements: P3 standing. Same as 046:126, 053:126.

152:131 Geography of Health 1-3 s.h.
Provision of health care in selected countries, with particular reference to the Third World; focus on problems of geographical, economic, cultural accessibility to health services; disease ecology, prospective payment systems, privatization, medical pluralism. Same as 044:131.

152:135 Global Health and Global Food 3 s.h.
Practices, patterns, and policies that contribute to the epidemics of obesity, diabetes, and heart disease in wealthy populations; environmental degradation, hunger, and malnutrition among impoverished populations; strategies to meet food and agricultural needs for the world; local/global aspects or perspectives on food/health concerns for Iowa and the international community. Same as 027:135.

152:137 History of Public Health 3 s.h.
State-endorsed measures to avert or control disease in society. Same as 16W:137.

152:138 History of Global Health 3 s.h.
Foremost problems of health and disease in colonial and postcolonial societies; topical approach. Same as 16W:138.
152:150 Research Design in Global Health
Preparation for an international research project. Offered fall and spring semesters.

152:151 Proseminar in Global Health
Important health problems and issues of a global and interrelated nature that affect the developed and developing world.

152:152 Global Health Conference
Annual research conference on major global health issues. Requirements: conference registration.

152:153 Global Aging
Demographic factors that contribute to the world wide phenomena of population aging in context of WHO Active Aging and the United Nation’s Principles for Older Persons frameworks. Same as 042:135, 153:135.

152:154 Studies in Complementary and Alternative Medicine
Studies in complementary and alternative medicine (CAM), a group of medical and health care systems, practices, and products that are not considered to be part of conventional medicine; treatments used instead of standard ones (alternative treatments); nonstandard treatments used together with standard ones (complementary medicine); examples of CAM therapies (acupuncture, chiropractic, and herbal medicines); approaches widely used in other parts of the world and may represent an important component of health care in a country (e.g., ayurvedic medicine in India).

152:158 Promoting Health Globally
Major global health threats (e.g., infectious disease, violence, tobacco, and nutrition); the impact of culture, history, and economics on health disparities and remedies. Requirements: junior or senior standing, or certificate student. Same as 027:176.

152:159 Local and global dimensions of health and disease.
152:160 Principles of Environmental Engineering
Water supply and treatment processes; wastewater treatment processes; processes for air pollution control, groundwater remediation; solid and hazardous waste management. Prerequisites: 053:050. Same as 053:055.

152:162 Principles of Environmental Engineering
4 s.h.

152:170 Health Care and Health Reforms in Russia
Societal changes and their continuing effect on the Russian health care system since 1991; guest lectures from public health, nursing, medicine, cultural anthropology. Same as 041:104.

152:182 Health Experience of Immigrants, Migrants, and Refugees
Unique health challenges and health care experiences of recent immigrants, refugees, migrants.

152:184 Anthropology and International Health
Anthropological contributions to and critiques of the international health enterprise; case studies illustrating anthropology and international health’s intersection, and their differences. Offered spring semesters. Same as 113:184, 172:131.

152:185 Medical Anthropology
Major theoretical, methodological approaches; international health and development; biomedicine as a cultural system; ethnomedicine; anthropology and AIDS, human reproduction, epidemiology, ethnopsychiatry. Prerequisites: 113:003 or 113:010. Same as 113:185, 172:173.

152:199 Special Projects in Global Health
152:217 Health Insurance and Managed Care
3 s.h.
History and theory of insurance, comparative health systems, health systems and networks, HMOs, public health insurance, care for uninsured; emphasis on public policy. Prerequisites: 046:263 or 174:212, and 174:200. Same as 174:217.

152:252 Environmental Health Policy
3 s.h.
Major concerns in environment and human health, legislation enacted to deal with these concerns; emphasis on contemporary issues. Offered fall semesters of odd years. Requirements: (for 175:252) 175:197; (for 053:204) 053:050. Same as 053:204, 175:252.

152:257 Epidemiology of Infectious Diseases
3 s.h.
Underlying epidemiological concepts of infection disease, including causation and surveillance; prevention and control; case studies. Offered fall semesters. Prerequisites: 173:140. Same as 173:255.
Health and Human Physiology

Chair
Kevin C. Kregel

Professors
John P. Albright (Orthopaedics and Rehabilitation/Health and Human Physiology), Annunziato Amendola (Orthopaedics and Rehabilitation/Health and Human Physiology), Joseph A. Buckwalter (Orthopaedics and Rehabilitation/Health and Human Physiology), Warren G. Darling (Health and Human Physiology/Physical Therapy and Rehabilitation Science), Kathleen F. Janz, Alan K. Johnson (Psychology/Health and Human Physiology), Kevin C. Kregel

Professor emeritus
Gina C. Schatteman

Associate professors
Kelly J. Cole (Health and Human Physiology/Physical Therapy and Rehabilitation Science), Don D. Sheriff, Harald M. Stauss

Assistant professor
Gary L. Pierce

Adjunct assistant professor
Michael C. Lyons

Adjunct instructors

Lecturers
Ray F. Fagenbaum, Shawn W. Flanagan, Amy Fletcher, Danny T. Foster, Christina R. Johnson, Katherine R. Mellen, Clayton R. Peterson, Marc A. Pizzimenti, Marylen C. Rimando

Undergraduate degrees: B.A. in Health and Human Physiology; B.S. in Human Physiology; B.S. in Athletic Training

Undergraduate nondegree programs: Minor in Health Promotion, Human Physiology

Graduate degrees: M.A. in Health and Sport Studies, M.S. in Exercise Science, Ph.D. in Integrative Physiology

Web site: http://clas.uiowa.edu/hhp

The Department of Health and Human Physiology offers undergraduate majors and minors and graduate degree programs in health and human physiology and related areas. In addition, the department is home to the Health and Physical Activity Skills Program, which offers courses that provide instruction and practice in lifetime sports, fitness training, and wellness activities aimed at enhancing physical health and well-being. Undergraduates in all majors may use several health and human physiology courses and most of the health and physical activity skills courses to fulfill requirements of the College of Liberal Arts and Sciences General Education Program (p. 381).

The department also is the administrative home of the Leisure Studies Program, which offers undergraduate and graduate programs; see Leisure Studies (p. 531) in the Catalog.

Undergraduate Programs

- Major in health and human physiology (Bachelor of Arts)
- Major in human physiology (Bachelor of Science)
- Major in athletic training (Bachelor of Science)
- Minor in health promotion
- Minor in human physiology

The department is the administrative home of the Leisure Studies Program, which offers an undergraduate major and minor; see Leisure Studies (p. 531) in the Catalog.

Bachelor of Arts: Health and Human Physiology

The Bachelor of Arts with a major in health and human physiology requires a minimum of 120 s.h., including work for the major, which varies by track. The health promotion track requires a total of 50-52 s.h. of work for the major; the health studies track requires 40-42 s.h. of work for the major. The health promotion track is intended for students seeking careers that promote wellness in the community and the workplace. The health studies track is designed for students who want a more flexible health science curriculum.

Admission to the health promotion track is selective; students must apply and be admitted. Applicants must have completed the three courses listed under “Science and Math Foundation” below (chemistry, biology, and mathematics or statistics) and must have a University of Iowa and a cumulative g.p.a. of at least 2.70. Students may apply during the semester in which they will complete the three science and math foundation courses required for application to the track. Application deadlines are October 1 for the following spring semester, March 1 for the following fall semester.

Admission to the health studies track is open; students may enter the track without applying to it.
Students in both tracks are required to complete a set of common requirements as well as several courses required specifically for their track. Students also must complete the College of Liberal Arts and Sciences General Education Program (p. 381).

The major in health and human physiology requires the following course work.

Common Requirements

Both tracks require the following science and math foundation (at least 10-12 s.h.) and the departmental core (12 s.h.).

**SCIENCE AND MATH FOUNDATION**

All students complete three foundation courses (10-12 s.h.): one each in chemistry, biology, and mathematics or statistics.

Chemistry—one of these:

- 004:008 General Chemistry II 3 s.h.
- 004:012 Principles of Chemistry II 4 s.h.

Biology—one of these:

- 002:002 Introductory Animal Biology 4 s.h.
- 002:010 Principles of Biology I 4 s.h.
- 002:021 Human Biology 4 s.h.

Mathematics or statistics—one of these:

- 07P:143/22S:102 Introduction to Statistical Methods 3 s.h.
- 22M:009 Elementary Functions 4 s.h.
- 22M:015 Mathematics for the Biological Sciences 4 s.h.
- 22M:016 Calculus for the Biological Sciences 4 s.h.
- 22M:017 Calculus and Matrix Algebra for Business 4 s.h.
- 22M:025 Calculus I 4 s.h.
- 22S:008 Statistics for Business 4 s.h.
- 22S:025 Elementary Statistics and Inference 3 s.h.
- 22S:101 Biostatistics 3 s.h.
- 171:161 Introduction to Biostatistics 3 s.h.

**DEPARTMENTAL CORE**

All students must complete the four-course departmental core (12 s.h.).

All of these:

- 027:039 Physical Activity and Health 3 s.h.
- 027:040 Nutrition and Health 3 s.h.
- 027:053 Human Anatomy 3 s.h.

One of these:

- 027:050 Fundamentals of Human Physiology 3 s.h.
- 027:130 Human Physiology 3 s.h.

**Health Promotion Track Requirements**

Health promotion track students complete the following health promotion core courses (16 s.h.) and guided electives (12 s.h.) in addition to the courses listed under “Common Requirements” above (math and science foundation and departmental core).

**HEALTH PROMOTION CORE**

All of these:

- 027:134 Nutrition Interventions 3 s.h.
- 027:136 Health Behavior and Health Promotion 3 s.h.
- 027:138 Exercise Testing and Prescription I: Metabolic Health 4 s.h.
- 027:139 Exercise Testing and Prescription II: Musculoskeletal Health 3 s.h.
- 027:156 Planning and Evaluating Health Interventions 3 s.h.

**HEALTH PROMOTION GUIDED ELECTIVES**

Students must complete at least 12 s.h. selected from the courses below; they must earn at least 6 s.h. in courses numbered 100 or above.

**Entrepreneurship and Leadership**

- 06A:001 Introduction to Financial Accounting 3 s.h.
- 06T:050 Foundations in Entrepreneurship 2 s.h.
- 06T:120 Entrepreneurship and Innovation 3 s.h.
- 06T:144 Nonprofit Organizational Effectiveness I 3 s.h.
- 027:120 Equity Issues in the Health Sciences 3 s.h.

**Global Health and Health Disparities**

- 027:135 Global Health and Global Food 3 s.h.
- 027:176 Promoting Health Globally 3 s.h.
- 152:131 Geography of Health 3 s.h.
- 152:152 Global Health Conference 1 s.h.
- 152:160 Global Health Seminar 3 s.h.
- 172:135 Health Disparities and Cultural Competence 2-4 s.h.

Bachelor of Science: Human Physiology

The Bachelor of Science with a major in human physiology requires a minimum of 120 s.h., including 61 s.h. of work for the major (27 s.h. in health and human physiology and 34 s.h. in required cognate courses).

The major in human physiology is designed primarily for individuals who intend to continue their education beyond the B.S. in the health professions, including medicine, dentistry, optometry, physician assistant, physical therapy, and podiatry, and for those who intend to pursue graduate degrees in basic life sciences. The program includes study in anatomy, biomechanics, physiology, neural control of movement, and the cognate areas of biology, chemistry, mathematics, physics, and statistics.

Admission to the major is selective; students must apply and be admitted. Current University of Iowa students and transfer students may declare an interest in the human physiology major at any time and may apply to the major after taking a college course in calculus. They also must complete 004:011 Principles of Chemistry I (one of the major’s required cognate courses) before they may be admitted to the major. The course is a required cognate (see "Courses for the Major: Cognates" below).

004:011 Principles of Chemistry I 4 s.h.

COURSES FOR THE MAJOR: HUMAN PHYSIOLOGY

All of these:

027:053 Human Anatomy 3 s.h.
027:054 Human Anatomy Laboratory 1 s.h.
027:130 Human Physiology 3 s.h.
027:132 Human Physiology Laboratory 2 s.h.

At least 18 s.h. from these:

027:053 Human Growth and Motor Development 3 s.h.
027:141 Exercise Physiology 3 s.h.
027:143 Physiology of Nutrition 3 s.h.
027:145 Cardiovascular Physiology 3 s.h.
027:146 Molecules to Malady 3 s.h.
027:148 Physiology of Aging 3 s.h.
027:154 Advanced Anatomy Laboratory 3 s.h.
027:155 Skeletal Muscle Biology 3 s.h.
027:160 Neural Control of Posture and Movement 3 s.h.
027:165 Introduction to Human Pharmacology 3 s.h.
027:177 Immunology in Health and Disease 3 s.h.
027:195 Undergraduate Independent Study arr.
027:197 Biomechanics of Human Motion 3 s.h.
COURSES FOR THE MAJOR: COGNATES

Students must complete a total of 34 s.h. in the following cognate courses—subjects outside of human physiology. The required cognates include 004:011 Principles of Chemistry I (see "Chemistry" below), which some students completed for admission to the major.

**Biology**

002:010-002:011 Principles of Biology I-II 8 s.h.

At least 3 s.h. from these:

- 002:108 Vertebrate Zoology 4 s.h.
- 002:114 Cell Biology 3 s.h.
- 002:124 Animal Physiology 3 s.h.
- 002:128 Fundamental Genetics 3-4 s.h.
- 002:143 Animal Behavior 4 s.h.
- 002:145 Introduction to Neurobiology 3 s.h.
- 002:150 Endocrinology 3 s.h.
- 002:180 Fundamental Neurobiology 4 s.h.
- 002:181 Neurophysiology 3-4 s.h.
- 061:112 Pharmacy Microbiology 4 s.h.
- 061:147 Survey of Immunology 3 s.h.
- 061:157 General Microbiology 5 s.h.
- 061:164 Nursing Microbiology 4 s.h.
- 099:110 Biochemistry 3 s.h.
- 099:120 Biochemistry and Molecular Biology I 3 s.h.

**Chemistry**

Students must complete 004:011 before they may register for 004:012.

004:011 Principles of Chemistry I (unless already taken for admission to the major) 4 s.h.
004:012 Principles of Chemistry II 4 s.h.

These additional chemistry courses are highly recommended.

- 004:121 Organic Chemistry I 3 s.h.
- 004:122 Organic Chemistry II 3 s.h.
- 004:141 Organic Chemistry Laboratory 3 s.h.

**Mathematics**

One of these:

- 22M:016 Calculus for the Biological Sciences 4 s.h.
- 22M:025 Calculus I (or a mathematics course numbered above 025) 4 s.h.

**Physics**

One of these sequences:

- 029:011-029:012 College Physics I-II 8 s.h.
- 029:081-029:082 Introductory Physics I-II 8 s.h.

**Statistics**

At least 3 s.h. from these:

- 07P:143 Introduction to Statistical Methods 3 s.h.
- 22S:030 Statistical Methods and Computing 3 s.h.
- 22S:101 Biostatistics 3 s.h.
- 22S:102 Introduction to Statistical Methods 3 s.h.
- 171:161 Introduction to Biostatistics 3 s.h.

**RECOMMENDED ELECTIVES**

The department recommends that students choose from the following electives in order to complete the minimum of 120 s.h. required for a Bachelor of Science. Additional recommended courses in biology and chemistry are listed under "Courses for the Major: Cognates" above.

**Anthropology**

- 213:190 Human Osteology 3 s.h.

**Biochemistry**

- 099:110 Biochemistry 3 s.h.
- 099:120 Biochemistry and Molecular Biology I 3 s.h.
- 099:130 Biochemistry and Molecular Biology II 3 s.h.
- 099:140 Experimental Biochemistry 2 s.h.

**Biology**

- 002:108 Vertebrate Zoology 4 s.h.
- 002:114 Cell Biology 3 s.h.
- 002:124 Animal Physiology 3 s.h.
- 002:128 Fundamental Genetics 4 s.h.
- 002:143 Animal Behavior 4 s.h.
- 002:145 Introduction to Neurobiology 3 s.h.
- 002:150 Endocrinology 3 s.h.
- 002:180 Fundamental Neurobiology 4 s.h.
- 002:181 Neurophysiology 3 s.h.
### Chemistry
- 004:111 Analytical Chemistry I 3 s.h.
- 004:112 Analytical Chemistry II 3 s.h.
- 004:121 Organic Chemistry I 3 s.h.
- 004:122 Organic Chemistry II 3 s.h.
- 004:131 Physical Chemistry I 3 s.h.
- 004:141 Organic Chemistry Laboratory 3 s.h.

### Classics
- 20E:103 Medical and Technical Terminology 2 s.h.

### Communication Sciences and Disorders
- 003:116 Basic Neuroscience for Speech and Hearing 3 s.h.
- 003:140 Manual Communication 1 s.h.

### Computer Science
- 06K:070 Computer Analysis 3 s.h.
- 22C:001 Principles of Computing 3 s.h.
- 22C:005 Introduction to Computer Science 3 s.h.
- 22C:016 Computer Science I: Fundamentals 4 s.h.
- 057:017 Computers in Engineering 3 s.h.

### Education
- 07C:185 Introduction to Substance Abuse 3 s.h.

### Engineering
- 057:010 Dynamics 3 s.h.
- 057:019 Mechanics of Deformable Bodies 3 s.h.

### English
- 08N:080 Nonfiction Writing 3 s.h.

### Health Promotion
- 027:138 Exercise Testing and Prescription I: Metabolic Health 4 s.h.
- 027:139 Exercise Testing and Prescription II: Musculoskeletal Health 3 s.h.

### Microbiology
- 061:112 Pharmacy Microbiology 4 s.h.
- 061:147 Survey of Immunology 3-4 s.h.
- 061:157 General Microbiology 5 s.h.
- 061:164 Nursing Microbiology 4 s.h.

### Pharmacology
- 071:120 Drugs: Their Nature, Action, and Use 2 s.h.
- 071:130 Drug Mechanisms and Actions 3 s.h.

### Psychology
- 031:063 Abnormal Psychology: Health Professions 3 s.h.
- 031:126 Behavioral Neuroscience 3 s.h.
- 031:128 Psychopharmacology 3 s.h.
- 031:129 Neuroscience of Learning and Memory 3 s.h.
- 031:152 Health Psychology 3 s.h.
- 031:163 Abnormal Psychology 3 s.h.

### Radiation Biology
- 077:103 Radiation Biology 4 s.h.

### Bachelor of Science: Athletic Training

The Bachelor of Science with a major in athletic training requires a minimum of 120 s.h., including 57-58 s.h. of work for the major plus one prerequisite (1 s.h.) to application to the major and several prerequisites (34-36 s.h.) to course work for the major. Students also must complete the College of Liberal Arts and Sciences General Education Program (p. 381)

The major provides concentrated studies and clinical experiences that lead to national certification in athletic training. The Department of Health and Human Physiology collaborates with the Department of Orthopaedics and Rehabilitation (Carver College of Medicine) to offer the major.

Athletic trainers work with active patients, including athletes, to help prevent injuries, offer advice about appropriate equipment, recognize and evaluate injuries, administer emergency treatment, and determine need for specialized medical care. Athletic trainers also work as members of health care teams involved in postinjury rehabilitation.

Employment opportunities for graduates include work as health care professionals for sports medicine clinics and hospitals; these individuals often work with secondary school athletic teams. Additional education usually is required for employment with professional, college, and university athletic teams. Teacher certification is recommended but not required.

Admission to the major in athletic training is competitive; students must apply. They may be admitted and begin clinical experience as sophomores. Applicants must have at least 11
s.h. of graded college credit (pass/fail credit does not count), including 027:096 Exploring Athletic Training with a grade of C or higher; and they must have a g.p.a. of at least 2.50 on all undergraduate course work. Preference is given to applicants with high scholastic standing, strong writing skills, and varied athletic training and health care experience. A personal interview may be required; the athletic training program contacts applicants about interviews.

Fulfillment of admission requirements does not ensure admission to the athletic training major. The program selects candidates who appear to be best qualified for the study and practice of athletic training. Students denied admission to the major may reapply in a subsequent fall semester.

All students admitted to the major in athletic training are required to comply with entrance and periodic health screening history and immunization, which is coordinated through the program’s medical director.

Students who have not formally contacted the athletic training program director before enrolling at The University of Iowa should talk to an athletic training advisor or their academic advisor upon entering the University. Early advising for course selection is vital to ensure that students take prerequisites and sequenced skill development courses in the right order. Students should begin taking prerequisites for required major courses during their first year and should complete their final prerequisites after admission to the athletic training major.

For current information on rules, procedures, and curriculum, contact the athletic training program director.

The major in athletic training requires the following course work.

**PREREQUISITE TO APPLICATION TO THE MAJOR**

Students must complete this course before they apply for admission to the athletic training major.

027:096 Exploring Athletic Training 1 s.h.

**PREREQUISITES TO COURSE WORK FOR THE MAJOR**

Students must complete the following courses (34-36 s.h.) as they begin course work for the major.

One of these:

- 002:002 Introductory Animal Biology 4 s.h.
- 002:010 Principles of Biology I 4 s.h.

**One of these sequences:**

- 004:007-004:008 General Chemistry I-II 6 s.h.
- 004:011-004:012 Principles of Chemistry I-II 8 s.h.

**One of these:**

- 029:008 Basic Physics 4 s.h.
- 029:011 College Physics I 4 s.h.

**All of these:**

- 07P:075 Educational Psychology and Measurement 3 s.h.
- 22S:025/07P:025 Elementary Statistics and Inference 3 s.h.
- 027:053 Human Anatomy 3 s.h.
- 027:056 First Aid and CPR 2 s.h.
- 027:057 Basic Athletic Training 3 s.h.
- 031:001 Elementary Psychology 3 s.h.
- 169:045 Health for Living 3 s.h.

**COURSES FOR THE MAJOR**

Students must complete the following course work for the major (55-56 s.h.).

One of these:

- 027:140 Exercise Physiology for Practitioners 3 s.h.
- 027:141 Exercise Physiology 3 s.h.

One of these:

- 027:050 Fundamentals of Human Physiology 3 s.h.
- 027:130 Human Physiology 3 s.h.

One of these:

- 027:165 Introduction to Human Pharmacology 3 s.h.
- 071:120 Drugs: Their Nature, Action, and Use 2 s.h.
- 071:130 Drug Mechanisms and Actions 3 s.h.

**All of these:**

- 07C:199 Counseling for Related Professions (or equivalent) 3 s.h.
- 027:036-027:037 Practicum in Athletic Training I-II 4 s.h.

### Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

Note: Students must be admitted to the health and human physiology or athletic training majors on schedule in order to complete a four-year graduation plan.

**Bachelor of Arts: Health and Human Physiology**

**Before the third semester begins:** one foundation course, one other course in the major, and at least one-quarter of the semester hours required for graduation

**Before the fifth semester begins:** at least five more courses in the major and at least one-half of the semester hours required for graduation

**Before the seventh semester begins:** at least six more courses in the major and at least three-quarters of the semester hours required for graduation

**Before the eighth semester begins:** at least two more courses in the major

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

**Bachelor of Science: Human Physiology**

**Before the third semester begins:** calculus, one other course in the major, and at least one-quarter of the semester hours required for graduation

**Before the fifth semester begins:** at least five more courses in the major and at least one-half of the semester hours required for graduation

**Before the seventh semester begins:** at least six more courses in the major and at least three-quarters of the semester hours required for graduation

**Before the eighth semester begins:** at least two more courses in the major

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

**Bachelor of Science: Athletic Training**

**Before the third semester begins:** three courses in the major and at least one-quarter of the semester hours required for graduation

**Before the fifth semester begins:** six courses in the major and at least one-half of the semester hours required for graduation

**Before the seventh semester begins:** nine courses in the major and at least three-quarters of the semester hours required for graduation

**Before the eighth semester:** 12 courses in the major

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

**Honors**

Outstanding students majoring in health and human physiology, human physiology, or athletic training may work toward graduation with honors. Departmental honors students must be members of the University of Iowa Honors Program, which requires students to maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University of Iowa Honors Program for more information). They also must maintain a g.p.a. of at least 3.33 in work for their major.

In order to graduate with honors in the health and human physiology major, students must successfully complete a health and human physiology honors designation course, research practicum, teaching practicum, or service learning course. They must successfully complete 027:187 Honors Readings and 027:188 Honors Problems and must write an honors thesis, usually based on original research or creative work. They also
must make an oral or poster presentation of the honors thesis in an approved venue, such as a department research seminar or a professional conference.

In order to graduate with honors in the human physiology major, students must complete the honors research course sequence 027:198 Honors Research I and 027:199 Honors Research II; write an honors thesis that is deposited with the University of Iowa Honors Program and is judged to be of honors quality; and make an oral presentation of their research and thesis that is judged to be of honors quality.

In order to graduate with honors in the athletic training major, students must complete the practicum course sequence 027:186 Practicum in Athletic Training III and 076:187 Practicum in Athletic Training IV. They also must write an honors thesis that is deposited with the University of Iowa Honors Program and is judged to be of honors quality.

**Minor in Health Promotion**

The minor in health promotion requires a minimum of 15 s.h. in Department of Health and Human Physiology courses, including at least 9 s.h. in 100-level courses. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass. Transfer credit does not count toward the minor.

Students majoring in health and human physiology may not earn the minor in health promotion, but they may earn the minor in human physiology.

Courses for the minor must be chosen from the list below, according to students’ interests and the recommendation of the undergraduate coordinator. Some of these courses have prerequisites, which students must complete before enrolling in the course.

- 027:030 Principles of Exercise Leadership 3 s.h.
- 027:039 Physical Activity and Health 3 s.h.
- 027:040 Nutrition and Health 3 s.h.
- 027:076 Psychological Aspects of Sport and Physical Activity 3 s.h.
- 027:110 Health Literacy 3 s.h.
- 027:131 Coaching for Health and Wellness 3 s.h.
- 027:133 Sport and Exercise Nutrition 3 s.h.
- 027:135 Global Health and Global Food 3 s.h.
- 027:136 Health Behavior and Health Promotion 3 s.h.
- 027:137 Community and Worksite Health Promotion 3 s.h.
- 027:144 College Health Education 3 s.h.
- 027:147 Physical Activity and Healthy Communities 3 s.h.
- 027:174 Applied Sport and Exercise Psychology 3 s.h.
- 027:176 Promoting Health Globally 3 s.h.

**Minor in Human Physiology**

The minor in human physiology requires a minimum of 15 s.h. in Department of Health and Human Physiology courses, including 12 s.h. in 100-level courses. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass. Transfer credit does not count toward the minor.

Students majoring in human physiology or athletic training may not earn the minor in human physiology, but they may earn the minor in health promotion.

Students choose courses for the minor from the following list. Enrollment in 027:132 Human Physiology Laboratory and 027:197 Biomechanics of Human Motion requires special permission. Some of these courses have prerequisites; students must complete all prerequisites for the courses they select for the minor.

- 027:053 Human Anatomy 3 s.h.
- 027:054 Human Anatomy Laboratory 1 s.h.
- 027:117 Human Growth and Motor Development 3 s.h.
- 027:130 Human Physiology 3 s.h.
- 027:132 Human Physiology Laboratory 2 s.h.
- 027:140 Exercise Physiology for Practitioners 3 s.h.
- 027:141 Exercise Physiology 3 s.h.
- 027:143 Physiology of Nutrition 3 s.h.
- 027:145 Cardiovascular Physiology 3 s.h.
- 027:146 Molecules to Malady 3 s.h.
- 027:148 Physiology of Aging 3 s.h.
- 027:154 Advanced Anatomy Laboratory 3 s.h.
- 027:155 Skeletal Muscle Biology 3 s.h.
- 027:160 Neural Control of Posture and Movement 3 s.h.
- 027:165 Introduction to Human Pharmacology 3 s.h.
- 027:177 Immunology in Health and Disease 3 s.h.
- 027:197 Biomechanics of Human Motion 3 s.h.

**Graduate Programs**

- Master of Arts in health and sport studies (with or without thesis)
- Master of Science in exercise science (with or without thesis)
- Doctor of Philosophy in integrative physiology
The department is the administrative home for the Leisure Studies Program, which offers a Master of Science program; see Leisure Studies (p. 531) in the Catalog.

**Master of Arts**

The Master of Arts program in health and sport studies requires 30-34 s.h. of graduate credit. It is offered with three specializations: the athletic training specialization (without thesis), the health promotion specialization (with or without thesis), and the integrative physiology specialization (with or without thesis). Students who plan to enter doctoral programs usually choose the thesis option. Those who intend to earn the M.A. as a terminal degree in preparation for professional careers or for advanced study in other areas usually choose the nonthesis option.

Course selection in each specialization is highly individual. Specific courses in mathematics, chemistry, physics, biology, physiology, sociology, or psychology may be required and must be approved by the program advisor in the specialization area.

**Athletic Training Specialization**

The M.A. with athletic training specialization is intended to be a terminal degree for athletic trainers; it is offered without thesis. The specialization provides an advanced clinical education and research area of study for certified athletic trainers. It focuses on a health care team approach to sports medicine, medical care management, wellness, pediatric/adolescent health, and special health populations. Emphasis is placed on the application of established research findings to the wide variety of problems encountered in everyday practice.

In order to be admitted to the specialization, athletic trainers must have completed the following prerequisite course work and must hold the following certifications:
- anatomy (3-4 s.h.);
- human physiology (3 s.h.);
- athletic training core—prevention (3 s.h.), evaluation and recognition (3 s.h.), modalities (3 s.h.), rehabilitation (3 s.h.), administration (2 s.h.);
- exercise science core—exercise physiology (3 s.h.), biomechanics (3 s.h.);
- current emergency certification; and
- Board of Certification (BOC) certification and state license.

The athletic training specialization requires the following course work.

**Required Courses**

**Statistics courses**—one of these:
- 225:102 Introduction to Statistical Methods 3 s.h.
- 171:161 Introduction to Biostatistics 3 s.h.

**Exercise science core**—three of these:
- 027:133 Sport and Exercise Nutrition 3 s.h.
- 027:141 Exercise Physiology 3 s.h.
- 027:145 Cardiovascular Physiology 3 s.h.
- 027:146 Molecules to Malady 3 s.h.
- 027:148 Physiology of Aging 3 s.h.
- 027:154 Advanced Anatomy Laboratory 3 s.h.
- 027:155 Skeletal Muscle Biology 3 s.h.
- 027:160 Neural Control of Posture and Movement 3 s.h.
- 027:165 Introduction to Human Pharmacology 3 s.h.
- 027:197 Biomechanics of Human Motion 3 s.h.
- 027:249 Epidemiology of Physical Activity 3 s.h.

**Clinical research tools**: One approved clinical tool course in computer science, counseling, epidemiology, health promotion, leisure studies, or pathology 2-4 s.h.

**Athletic training core (four courses)**—all of these:
- 027:200 Problems arr.
- 027:202 Practicum in College Teaching arr.
- 027:301 Non-Thesis Seminar 2 s.h.

And one of these:
- 173:140 Epidemiology I: Principles 3 s.h.
- 07P:205 Design of Instruction 3 s.h.
- 069:133 Introduction to Human Pathology for Graduate Students 4 s.h.

**Recommended Electives**

Elective courses should be used to enhance the student’s concentration in medical care management, wellness, pediatric/adolescent
health, or special health populations. Course selection must be approved by the advisor.

**Health Promotion Specialization**

The health promotion specialization is offered with or without thesis. It focuses on physiological and psychological processes as they interact with social and cultural forces to impact health. Scholarship in the specialization advances understanding of physical activity behaviors and health outcomes associated with them by evaluating theories that predict behavior, modeling physical activity patterns associated with health outcomes, and testing interventions that promote physical activity and improve quality of life. Students in the health promotion specialization may focus on developing the analytical and research skills necessary for doctoral study, or they may focus on acquiring a specific skill set and certification for employment by health promotion programs in government, nonprofit organizations, and business.

The health promotion specialization requires the following course work.

**Required Courses**

**Statistics core**—one of these:

- 22S:102 Introduction to Statistical Methods 3 s.h.
- 171:161 Introduction to Biostatistics 3 s.h.
- An advanced statistics course if one of the courses above was completed during undergraduate study 3 s.h.

**All of these:**

- 027:133 Sport and Exercise Nutrition 3 s.h.
- 027:138 Exercise Testing and Prescription I: Metabolic Health 4 s.h.
- 027:249 Epidemiology of Physical Activity 3 s.h.
- 173:235 Nutritional Epidemiology 2 s.h.

**One of these:**

- 169:205 Research Methods and Leisure Behavior 3 s.h.
- 07P:220 Quantitative Educational Research Methodologies 3 s.h.
- 07X:150 Introduction to Educational Research 3 s.h.
- 07P:331 Seminar: Educational Psychology I--Current Topics arr.

**All of these:**

- Health and human physiology electives selected in consultation with the advisor 6 s.h.
- Interdepartmental electives selected in consultation with the advisor 6 s.h.

**Thesis**

Students who choose the thesis option register for this course.

- 027:404 Thesis: M.S. 4 s.h.

**Independent Research**

Nonthesis students earn 4 s.h. of credit in independent research. Students who choose not to do independent research must earn an additional 4 s.h. in guided electives; internships and practicum experiences may count toward this requirement.

**Integrative Physiology Specialization**

The integrative physiology specialization is offered with or without thesis. It provides students with in-depth knowledge of general principles of physiology and specific knowledge in areas such as biomechanics, exercise physiology, and sensorimotor physiology. Admission to the specialization requires undergraduate courses in physiology and anatomy with laboratory components.

The integrative physiology specialization requires the following work.

**Required Courses**

The program advisor determines required courses based on the student’s interests and research project topic.

**Statistics core**—one of these:

- 22S:102 Introduction to Statistical Methods 3 s.h.
- 171:161 Introduction to Biostatistics 3 s.h.

**Required courses typically include graduate seminars such as these:**

- 027:241 Integrative Physiology Seminar 1 s.h.
- 027:314 Seminar in Motor Control 1 s.h.

**General Course Requirements**

General course requirements provide students with broad knowledge in different areas of the health-related sciences. In consultation with the program adviser, students select two courses outside of the specialization area. Some of these
courses have prerequisites, which students must complete before they may register for the course.

027:117 Human Growth and Motor Development 3 s.h.
027:132 Human Physiology Laboratory 2 s.h.
027:133 Sport and Exercise Nutrition 3 s.h.
027:136 Health Behavior and Health Promotion 3 s.h.
027:141 Exercise Physiology 3 s.h.
027:143 Physiology of Nutrition 3 s.h.
027:145 Cardiovascular Physiology 3 s.h.
027:146 Molecules to Malady 3 s.h.
027:148 Physiology of Aging 3 s.h.
027:154 Advanced Anatomy Laboratory 3 s.h.
027:155 Skeletal Muscle Biology 3 s.h.
027:160 Neural Control of Posture and Movement 3 s.h.
027:165 Introduction to Human Pharmacology 3 s.h.
027:197 Biomechanics of Human Motion 3 s.h.
027:249 Epidemiology of Physical Activity 3 s.h.

**Recommended Electives**

Students use elective courses to enhance their specialization and to broaden their knowledge in the general area of physiology. The following courses are recommended as electives.

002:150 Endocrinology 3 s.h.
027:117 Human Growth and Motor Development 3 s.h.
027:132 Human Physiology Laboratory 2 s.h.
027:133 Sport and Exercise Nutrition 3 s.h.
027:136 Health Behavior and Health Promotion 3 s.h.
027:141 Exercise Physiology 3 s.h.
027:143 Physiology of Nutrition 3 s.h.
027:145 Cardiovascular Physiology 3 s.h.
027:146 Molecules to Malady 3 s.h.
027:148 Physiology of Aging 3 s.h.
027:154 Advanced Anatomy Laboratory 3 s.h.
027:155 Skeletal Muscle Biology 3 s.h.
027:160 Neural Control of Posture and Movement 3 s.h.
027:165 Introduction to Human Pharmacology 3 s.h.
027:197 Biomechanics of Human Motion 3 s.h.
027:249 Epidemiology of Physical Activity 3 s.h.

101:212 Biomedical Instrumentation and Measurement 3 s.h.
101:275 Analysis of Sensori-Motor Systems in Health and Disease 3 s.h.

**Thesis**

Students who choose the thesis option register for this course.

027:404 Thesis: M.S. 0-1, 2, 3, 4 s.h.

**Master of Science**

The Master of Science program in exercise science requires a minimum of 30 s.h. of graduate credit and is offered with or without thesis. The program is not accepting new students in 2011-12. For a program description and listing of requirements, see the 2010-11 General Catalog.

**Doctor of Philosophy**

The Doctor of Philosophy program in integrative physiology requires a minimum of 72 s.h. of graduate credit. It is offered with two specialization areas: health promotion and integrative physiology.

Doctoral students should have a strong background in the natural sciences and a working knowledge of statistics and research methodology. Students may acquire additional knowledge of statistics and research methodology after entering the program.

All Ph.D. students complete a common core of courses, scientific area courses, courses in their specialization, and 10 s.h. of independent research in addition to the dissertation requirement. They must complete a dissertation in their specialization area and must submit an appropriate manuscript of the dissertation to a refereed professional journal for publication.

Some courses in the program are offered by other departments. Faculty members from those departments frequently serve on comprehensive examination committees and on dissertation committees for the initial presentation of a candidate’s prospectus. They also participate in the final examination.

The Doctor of Philosophy requires the following course work.

**COMMON CORE**

All of these:
Two approved statistics courses 6 s.h.
027:201 Research 10 s.h.
027:202 Practicum in College Teaching 2 s.h.
027:405 Thesis: Ph.D. 12 s.h.

SCIENTIFIC AREA COURSES

Students obtain a breadth of knowledge over the key scientific areas that constitute the basis of the major by completing at least three courses outside of their specialization area.

Specialization Courses

Students are expected to obtain broad-based knowledge in their specialization area. This normally entails approximately 30 s.h. of coursework. The following courses are recommended choices for each specialization area.

INTEGRATIVE PHYSIOLOGY

Dissertation

Students working on a dissertation register for the following course.

Admission

Admission to the department’s graduate programs is based on grade-point average and score on the Graduate Record Examination (GRE) General Test. Applicants to the M.A. and M.S. programs must have an undergraduate g.p.a. of at least 3.00. Applicants to the Ph.D. program must have a g.p.a. of at least 3.00 on undergraduate work and previous graduate work.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate (p. 1117) College section of the Catalog.

Application deadlines are October 15, March 15, and May 15; notification is made approximately two months after the respective application deadline.

Facilities

Classroom and research laboratories are located in the Field House and in other buildings on campus. They provide excellent facilities for instruction and research at both the undergraduate and graduate levels.

Cooperative efforts with other units facilitate specialization by allowing health and human physiology students to use additional special facilities and research equipment in other departments on campus (e.g., biology, biochemistry, molecular physiology and
biophysics, orthopaedic surgery, internal medicine, pharmacology, and the College of Engineering).

**Courses**

**Primarily for Undergraduates**

**027:029 First-Year Seminar** 1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.

**027:030 Principles of Exercise Leadership** 3 s.h.
Exercise standards, guidelines for aerobic/exercise instructors; aerobic workout components, contraindicated exercises, injury prevention and treatment. Prerequisites: 027:039.

**027:035 Stress Management** 3 s.h.
Recent theoretical concepts and scientific evidence regarding stress and its effects on body and mind; intervention methods, strategies for managing stress; opportunity for students to use intervention techniques to manage stress. GE: Values, Society, and Diversity.

**027:036 Practicum in Athletic Training I** 2 s.h.
Basic clinical skill instruction, evaluation, and integration for athletic trainers. Requirements: athletic training major.

**027:037 Practicum in Athletic Training II** 2 s.h.
Integration of basic physical skills and orientation to traditional settings; clinical experience for first-year students arranged through the athletic training program. Requirements: grade of C or higher in 027:036.

**027:039 Physical Activity and Health** 3 s.h.
Physical activity determinants in society; school, workplace, community-based health promotion interventions to improve activity levels. GE: Values, Society, and Diversity.

**027:040 Nutrition and Health** 3 s.h.
Physiology, biochemistry of human nutrition; appropriate food sources; qualitative and quantitative evaluation of diets using standard references. GE: Natural Sciences without Lab.

**027:044 Human Development Through the Life Span** 3 s.h.
Overview of human developmental theories across the life-span; aspects of cognitive, physical, and personality development from birth to death; the role of culture, environment, health, and economic factors over the developmental process and life continuum.

**027:050 Fundamentals of Human Physiology** 3 s.h.
Introduction to function and regulation of the human body. Recommendations: high school chemistry and basic biology.

**027:051 Fundamentals of Human Physiology Laboratory** 1 s.h.
Introductory laboratory course illustrating principles of human physiology through fundamental experimental measurements and computer simulation. Recommendations: one semester of biology.

**027:053 Human Anatomy** 3 s.h.
General human anatomy covering most systems of the body. GE: Natural Sciences without Lab.

**027:054 Human Anatomy Laboratory** 1 s.h.
All major systems of the human body, understood through computer-generated images, models, histological slides, anatomical specimens. GE: Natural Sciences Lab Only.

**027:056 First Aid and CPR** 2 s.h.
American Red Cross certification: basic first aid, CPR procedures.

**027:057 Basic Athletic Training** 3 s.h.
Basic pathology, epidemiology, materials biology for prevention and immediate care of athletic injuries.
027:075 Health in Everyday Life 3 s.h.
Personal health strategies; focus on disease prevention, wellness.

027:076 Psychological Aspects of Sport and Physical Activity 3 s.h.
Psychological theory and research related to sport and physical activity; motivation, aggression, attribution, socialization, competitive anxiety, leadership.

027:096 Exploring Athletic Training arr.
Exploration of professional preparation for athletic trainers; application, career opportunities, professional organizations, awareness of basic athletic training principles.

027:109 Scientific Reasoning 3 s.h.
Patterns of reasoning useful for understanding and evaluating scientific evidence, theory, controversy; historical and contemporary examples from the physical, biological, behavioral, biomedical sciences. GE: Quantitative or Formal Reasoning.

027:110 Health Literacy 3 s.h.
Community and clinical issues related to health literacy; focus on understanding individual and systemic factors that influence health literacy, including education, context, culture, and health care systems. Prerequisites: 027:039 and 027:040.

027:117 Human Growth and Motor Development 3 s.h.
Human growth and biological maturation; focus on motor development from birth through puberty. Offered fall semesters. Recommendations: anatomy, human physiology, or animal biology course.

027:120 Equity Issues in the Health Sciences 3 s.h.
Examination of equity issues in the health sciences, including a review of the historical challenges that led to Human Subjects Review Boards, FDA oversight of drug development and clinical trials, inclusion of women in research; effect of situational ethics in the workplace; potential danger of making assumptions about clients/patients; importance of developing an inclusive communication style; assessing the effectiveness of family-friendly employment policies in providing equitable opportunities for career advancement for both women and men. Same as 145:120.

027:125 Contemporary Nutrition 3 s.h.
Introduction to nutrition; importance of understanding food choices and diet to fit individual needs. Same as 145:125.

027:127 Nutrition in Health and Performance 3 s.h.
Effects of exercise and nutrition on health- and sports-related fitness; for professionals in health and physical education. Same as 145:127.

027:131 Coaching for Health and Wellness 3 s.h.
Opportunities to expand knowledge and develop skills to help individuals change behavior and meet health-related goals; general health and wellness principles; principles and techniques for change; experience providing health-coaching services to clients. Same as 145:130.

027:133 Sport and Exercise Nutrition 3 s.h.
Relationship between nutrition, fitness and sport performance; basic nutrition, physiology, chemistry, psychology, food preparation. Prerequisites: 027:039 and 027:040.

027:134 Nutrition Interventions 3 s.h.
Strategies for meeting unique nutritional needs of individuals with limitations imposed by genetics, trauma, aging, medications, and so forth. Prerequisites: 027:039 and 027:040. Requirements: admission to health promotion track.
027:135 Global Health and Global Food
Practices, patterns, and policies that contribute to the epidemics of obesity, diabetes, and heart disease in wealthy populations; environmental degradation, hunger, and malnutrition among impoverished populations; strategies to meet food and agricultural needs for the world; local/global aspects or perspectives on food/health concerns for Iowa and the international community. Same as 152:135.

027:136 Health Behavior and Health Promotion
Principles of epidemiology and health behavior theories applied to multilevel frameworks for health promotion. Prerequisites: 027:039 and 027:040.

027:137 Community and Worksite Health Promotion
Management and organizational theories; assessment, planning, implementation, and evaluation of clinical and work-setting (targeted) health promotion programs. Prerequisites: 027:136.

027:138 Exercise Testing and Prescription I: Metabolic Health
Basic techniques in physical fitness assessment, prescription of exercise for healthy and unhealthy adults, promotion of physical activity within communities; provides knowledge and skill competencies required for certification as American College of Sports Medicine health fitness instructor. Prerequisites: 027:039 and 027:050, or 027:130. Requirements: admission to health promotion program.

027:139 Exercise Testing and Prescription II: Musculoskeletal Health
Educational and practical experience for designing resistance training and flexibility programs; competencies for certification with National Strength and Conditioning Association. Prerequisites: 027:039 and 027:130, or 027:050. Requirements: admission to health promotion program.

027:144 College Health Education
Experience acting as a peer educator, assisting students in their residential areas, presenting educational outreach programs on health topics, making referrals to campus and area agencies. Prerequisites: 027:039 and 027:040.

027:147 Physical Activity and Healthy Communities
Development, implementation, evaluation of effective health communication interventions; identification of health education resources for targeted groups. Prerequisites: 027:039 and 027:040.

027:149 Seminar: Health in a Changing Society
Diverse health issues explored from individual and cultural perspectives; uncharted health issues addressed through contemporary health-related readings; racial and ethnic differences in personal health. Same as 145:145.

027:152 Practicum in Health Promotion
Experience in planning, implementing clinical and community health promotion strategies including nutrition, physical fitness, cardiac rehabilitation, respiratory rehabilitation. Prerequisites: 027:136 and 027:138.

027:156 Planning and Evaluating Health Interventions
Assessment, planning, implementation, and evaluation of health promotion programs. Prerequisites: 027:136. Requirements: admission to Health and Human Physiology health promotion program.

027:174 Applied Sport and Exercise Psychology
Concepts that underlie peak performance; hands-on experience through lecture/discussion, overnight assignments, activities; understanding of how to achieve peak performance in sport and physical activity, other areas of life. Prerequisites: 027:039 and 027:076.
027:176 Promoting Health Globally
3 s.h.
Major global health threats (e.g., infectious disease, violence, tobacco, and nutrition); the impact of culture, history, and economics on health disparities and remedies. Requirements: junior or senior standing, or certificate student. Same as 152:158.

027:187 Honors Readings
1-2 s.h.
First step to complete an honors thesis; work with health and human physiology faculty member; comprehensive readings in a specific area (e.g., obesity in children, disabilities and sport); readings include primarily research reviews, popular press, and editorials; production of an annotated bibliography summarizing readings and presentation to faculty member at end of semester; brief research proposal summarizing background, research questions, and methods of selected area.

027:188 Honors Problems
3-4 s.h.
Continuation of 027:187; original research or creative project supervised by a faculty member.

027:190 Preinternship Seminar
1 s.h.
Preparation for internship experience.

027:191 Internship
arr.
Directed practical field experience; program planning, implementation, evaluation, administrative procedures. Prerequisites: 027:190.

027:198 Honors Research I
2 s.h.
Research for honors thesis; selection of faculty mentor, preparation of research proposal, written and oral presentations of research proposal, literature review, participation in experiments designed to develop laboratory skills for research; first of a two-semester sequence. Requirements: honors standing.

027:199 Honors Research II
3 s.h.
Completion of honors research begun in 027:198, analysis of data, writing and oral presentation of honors thesis; second of a two-semester sequence. Requirements: honors standing and grade of B or higher in 027:198.

For Undergraduate and Graduate Students

027:130 Human Physiology
3 s.h.
Organ system approach to physiology, with focus on normal function of the human body; information on all levels of integration, from submolecular to whole organism, with emphasis on how the intact organism functions. GE: Natural Sciences without Lab.

027:132 Human Physiology Laboratory
2 s.h.
Fundamental laboratory measurements; major physiological systems, experimental design, presentation of experimental data. Corequisites: 027:130, if not taken as a prerequisite.

027:140 Exercise Physiology for Practitioners
3 s.h.
Effects of acute and chronic exercise on different physiological systems (energy, respiratory, circulatory, endocrine); fitness evaluation, weight-control strategies, training programs; preparation for ACSM Fitness Instructor Certification. Recommendations: human physiology course.

027:141 Exercise Physiology
3 s.h.
Mechanisms responsible for the acute and chronic effects of exercise on the different organ systems of the body. Offered fall semesters. Prerequisites: 027:130.

027:142 Exercise Physiology Laboratory
2 s.h.
Supplements 027:141; principles of scientific investigation used to demonstrate acute and chronic effects of exercise.

027:143 Physiology of Nutrition
3 s.h.
Metabolic and biological aspects of human energy production, relationship to energy consumption; systems or integrative approach.
027:145 Cardiovascular Physiology

027:146 Molecules to Malady
Changes in single molecules that lead to systemic physiological alterations in mammals; relationship of these changes to development, aging, exercise, and specific diseases; current methodologies for studying mammalian genetics and physiology. Prerequisites: 027:130.

027:148 Physiology of Aging
Aging’s effects on cells, tissues, and organs; how aging influences function of major body organ systems and the whole organism; physiological mechanisms that underlie age-related changes in body function and performance; integrative approach with focus on human aging. Prerequisites: 027:053 and 027:130.

027:154 Advanced Anatomy Laboratory
Detailed gross anatomy of all major systems of the body; structure of the human body at organ, tissue, and cellular levels; examination of various human and other mammalian specimens. Prerequisites: 027:053 and 027:054.

027:155 Skeletal Muscle Biology
Skeletal muscle structure, contractile mechanisms, production of movement, biomechanical properties; adaptation to increased use, disuse, injury. Offered spring semesters.

027:156 Introduction to Human Pharmacology
General pharmacology (e.g., administration, distribution, and elimination of drugs, dose response curves, adverse effects, placebos, homeopathy); pharmacotherapy of selected human diseases, pathophysiologic aspects of the disease, how different classes of drugs modify pathophysiologic effects to restore health or reduce disease’s impact; focus on mechanisms of drug actions in humans; adverse effects, pharmacokinetic considerations, drug interactions; how to write prescriptions. Prerequisites: 027:130.

027:171 Administration of Athletic Training Programs
Health care supervision, professional athletic training responsibilities, philosophies in athletic health care. Offered fall semesters. Prerequisites: 027:057.

027:172 Clinical Sciences I
Theoretical knowledge base in therapeutic modalities. Offered spring semesters. Requirements: grade of C or higher in 027:036.

027:173 Clinical Sciences II
Orientation for musculoskeletal evaluation and equipment fit techniques. Offered summer sessions. Prerequisites: 027:172. Requirements: athletic training major.

027:175 Emotional and Psychological Aspects of Health
Interfaces among emotional, psychological, and physical aspects of health; examination of how individuals with healthy psychological profiles engage in health behaviors; health-related implications of negative emotional and psychological states; strategies for promoting healthy psychological patterns; designed for health promotion, health studies students, and others interested in health-related careers.
027:177 Immunology in Health and Disease 3 s.h.
Overview of immunology, beginning at the molecular level and ending with the role of the immune system in disease; fundamental concepts of the immune system; innate and adaptive immunity, focusing on cell-mediated and humoral immune responses, in addition to effector mechanisms in both of these responses; concepts of immunologic tolerance; autoimmune disease; immunodeficiency syndromes; the inflammatory process in disease. Prerequisites: 027:130.

027:180 Advanced Emergency Care for Athletic Trainers 1-2 s.h.
Coordinated initial professional emergency response certifications for athletic trainers; recertification for those holding valid certifications. Requirements: Red Cross First Aid and CPR certifications.

027:182 Clinical Sciences III 3 s.h.
Theoretical and practical skill development in the areas of musculoskeletal evaluation for ankle, knee, shoulder, and upper extremity. Offered fall semesters. Prerequisites: 027:172. Requirements: athletic training major.

027:183 Clinical Sciences IV 3 s.h.
Continuation of musculoskeletal evaluation, completion of EENT, chest, abdomen, and dermatologic evaluation; integration of rehabilitation programs. Offered spring semesters. Requirements: grade of C or higher in 027:182.

027:184 Seminar in Athletic Training 1-4 s.h.
Educational issues faced by approved clinical instructors in athletic training education programs. Offered fall semesters. Requirements: graduate standing.

027:185 Clinical Sciences V: Rehabilitation 2 s.h.

027:186 Practicum in Athletic Training III 3 s.h.
Advanced clinical skill instruction, evaluation, and integration for athletic trainers. Requirements: grade of C or higher in 027:037.

027:187 Biomechanics of Human Motion 3 s.h.
Application of the principles of mechanics to investigation of human motion in two dimensions; system modeling, force system and equilibrium analysis, particle and rigid body kinematics, Newton’s and Euler’s equations of motion, work-energy and impulse-momentum integral principles. Offered spring semesters.

Primarily for Graduate Students

027:200 Problems arr.
Repeatable.

027:201 Research arr.
Repeatable.

027:202 Practicum in College Teaching arr.

027:241 Integrative Physiology Seminar 1 s.h.
Current topics in cardiovascular physiology, vascular biology, free radical biology. Repeatable.

027:244 Seminar in Health and Physical Activity Behavior 3 s.h.
Health behavior theories and their relevance to individual, interpersonal, and community-wide health promotion interventions.
027:249 Epidemiology of Physical Activity
3 s.h.
Physical activity/disease relationships examined through application of epidemiologic methods, including research design, interpretation of studies, selection of measures to fit research questions. Same as 173:245.

027:253 Advanced Human Anatomy
6 s.h.
Offered summer sessions.

027:270 Social Psychology of Sport and Physical Activity
3 s.h.
Theoretical and applied bases of social psychology of sport and exercise; motivation, arousal, group processes related to sport, physical activity.

027:294 Practicum: Athletics Administration
arr.

027:301 Non-Thesis Seminar
2 s.h.
For candidates for the M.S. without thesis. Offered spring semesters.

027:314 Seminar in Motor Control
1 s.h.
Current topics in neural control of movement, biomechanics, and rehabilitation sciences. Repeatable.

027:404 Thesis: M.S.
0-4 s.h.
Repeatable.

027:405 Thesis: Ph.D.
arr.
Repeatable.

Health and Physical Activity Skills
Most courses in the Health and Physical Activity Skills Program are approved for the Values, Society, and Diversity area of the General Education Program (p. 381).

28S:006 Core Strengthening
1 s.h.

28S:007 Aerobics: Low Impact
1 s.h.

28S:009 Aquatic Exercise
1 s.h.

28S:011 Badminton I
1 s.h.

28S:020 Fitness Walking
1 s.h.

28S:021 Flexibility
1 s.h.

28S:025 Hatha Yoga
1 s.h.

28S:029 Jogging I: Beginners
1 s.h.

28S:030 Jogging II
1 s.h.

28S:031 Karate I
1 s.h.

28S:033 Kick Boxing I
1 s.h.

28S:037 Lap Swimming I
1 s.h.
Prerequisites: 28S:064. GE: Values, Society, and Diversity.

28S:038 Lap Swimming II
1 s.h.
Prerequisites: 28S:037. GE: Values, Society, and Diversity.

28S:042 Personal Fitness
1 s.h.

28S:043 Pilates
1 s.h.

28S:045 Racquetball I
1 s.h.

28S:047 Relaxation Techniques
1 s.h.
28S:049 Sand Volleyball 1 s.h.

28S:052 Self Defense 1 s.h.

28S:053 Slow-Pitch Softball I 1 s.h.

28S:055 Soccer I: Outdoor 1 s.h.
Prerequisites: 28S:055. GE: Values, Society, and Diversity.

28S:056 Soccer II: Outdoor 1 s.h.
Prerequisites: 28S:055. GE: Values, Society, and Diversity.

28S:057 Soccer: Indoor 1 s.h.

28S:058 Speed Walking 1 s.h.

28S:059 Spinning 1 s.h.

28S:061 Resistance Training 1 s.h.

28S:066 Table Tennis 1 s.h.

28S:071 Tennis I 1 s.h.

28S:075 Ultimate Frisbee 1 s.h.

28S:077 Volleyball I 1 s.h.

28S:078 Volleyball II 1 s.h.
Prerequisites: 28S:077. GE: Values, Society, and Diversity.

28S:081 Weight Training I 1 s.h.

28S:082 Weight Training II 1 s.h.
Prerequisites: 28S:081. GE: Values, Society, and Diversity.

28S:085 Alcohol and Your College Experience 1 s.h.
Patterns of alcohol, drug use focused on college years; strategies for monitoring use, behavioral change plans for implementing lower-risk drinking practices; for drinkers and non-drinkers. GE: Values, Society, and Diversity.

28S:086 Tobacco and Your College Experience 1 s.h.
Current behavior change theories related to tobacco use, cessation; nicotine replacement therapies (NRT), non-NRT methods; triggers, relapse prevention, cognitive behavioral skills, support systems; for smokers and non-smokers. GE: Values, Society, and Diversity.

28S:087 Resiliency and Your College Experience 1 s.h.
Resiliency and psychological hardiness theories relevant to college life; resiliency and ability to cope with challenges; components of psychological fitness; skills for personal growth and emotional well-being. GE: Values, Society, and Diversity.

28S:088 Food and Your College Experience 1 s.h.
Sociocultural perspective on the forces that facilitate "junk" diets, particularly during young adulthood; basic components of nutrition; opportunity to develop skills in diet planning and healthy eating.
Health and Sport Studies

**Graduate degree:** Ph.D. in Health and Sport Studies

The Department of Health and Sport Studies is closing. No new enrollments are being accepted.

Undergraduate programs in health promotion and sport studies are available in other departments. For information about the health promotion program, see Health and Human Physiology (p. 438) in the Catalog. For information about sport studies, see American Studies (p. 50) . A Master of Arts program in health and sport studies is offered by the Department of Health and Human Physiology (p. 438) .

**Graduate Program**

- Doctor of Philosophy in health and sport studies

Admission to the Doctor of Philosophy program in health and sport studies is suspended; for degree requirements, see the 2010-11 General Catalog.
History

Chair
Stephen Vlastos

Professors
Constance A. Berman, Jeffrey L. Cox, James L. Giblin, Colin Gordon, Paul Greenough, Linda K. Kerber (May Brodbeck Professor in the Liberal Arts and Sciences), Kevin Mumford (History/African American Studies), Leslie A. Schwalm (History/Gender, Women’s, and Sexuality Studies), H. Shelton Stromquist, Katherine Tachau, Stephen Vlastos

Professors emeriti
R. David Arkush, T. Dwight Bozeman, Sarah Hanley, Ellis W. Hawley, Henry G. Horwitz, Jaroslaw Pelenski, Malcolm J. Rohrbough, David Schoenbaum, Alan B. Spitzer

Associate professors
Douglas Baynton (History/Communication Sciences and Disorders), Michel Gobat, Laura Gotkowitz, Elizabeth Heineman, Michaela Hoenicke-Moore, Paula Michaels, Michael E. Moore, H. Glenn Penny, Marshall Poe, Jacki Rand, Jennifer E. Sessions

Associate professor emeritus
Allen Steinberg

Assistant professors
Mériam Belli, Shuang Chen, Catherine Komisaruk, Tom Arne Midtrød, Alyssa Park, Elke Stockreiter, Omar Valerio-Jiménez

Lecturers
Kathleen Kamerick, Rosemary Moore (Classics/History)

Undergraduate degree: B.A. in History
Undergraduate nondegree program: Minor in History
Graduate degrees: M.A., Ph.D. in History
Web site: http://clas.uiowa.edu/history

The Department of History’s purpose is to increase knowledge of human experience and provide students with opportunities to gain information about and learn methods for understanding their world in light of its past. In addition to offering these essential elements of a liberal education, the department trains professional historians and teachers of history and serves those who require knowledge of a period or aspect of history as background for their own specialized interests in other fields.

Faculty and students in the department participate in many of the University’s interdisciplinary departments and programs, including American studies, African American studies, ancient civilizations, Asian studies, international studies, Latin American studies, and gender, women’s, and sexuality studies.

Undergraduate Programs

- Major in history (Bachelor of Arts)
- Minor in history

Students who major in history work in a variety of positions in business, education, public service, advertising, and journalism after graduation. Many go on to graduate study in history, law, religion, library, and information science, or social work.

History majors are encouraged to take courses in other fields that illuminate and expand the meaning of history courses and that introduce information and a variety of approaches to understanding how societies and cultures work.

For example, students majoring in history are encouraged to complete the College of Liberal Arts and Sciences General Education Program (p. 381) foreign language component by choosing a language that fits their interests in history. The history faculty particularly encourages study abroad programs that complement students’ foreign area interests. Majors also are encouraged to improve their writing and speaking skills.

Bachelor of Arts

The Bachelor of Arts with a major in history requires a minimum of 120 s.h., including 36 s.h. of work for the major. The program is designed for students with a general interest in history. Course requirements include a colloquium, which usually is taken during the sophomore year or the semester after the student elects a major in history. The required portfolio, which should consist of at least three graded papers the student has written while enrolled in history classes, is submitted on the University of Iowa iFolio system to the student’s advisor during the semester before graduation.

College Level Equivalency Program (CLEP) and Advanced Placement Program (APP) credit does not count toward the history major. Transfer work that is equivalent to University of Iowa course work may be accepted toward the major, but at least 18 s.h. of work for the major, including the colloquium, must be taken at The University of Iowa.

Students must complete the College of Liberal Arts and Sciences General Education Program (p. 381).

Undergraduate courses are divided into four areas: American history (prefix 16A), European history
(16E), non-Western world history (16W), and courses that have no area designation (016).

The major in history requires the following coursework. Students may count a maximum of 18 s.h. earned in American history courses (prefix 16A) toward the major.

**HISTORY COLLOQUIUM**

One of these:

- 16A:051 Colloquium for History Majors (American) 3 s.h.
- 16E:051 Colloquium for History Majors (European) 3 s.h.
- 16W:051 Colloquium for History Majors (World) 3 s.h.

Students take the colloquium as soon as possible after declaring the major. Every colloquium includes assigned papers; students must include at least one of their colloquium papers in their history portfolio.

**GEOGRAPHICAL AREA AND ERA**

All of these (semester hours are minimum requirements):

- Two American history courses, including at least one numbered 16A:100 or above 6 s.h.
- Two European history courses, including at least one numbered 16E:100 or above 6 s.h.
- Two non-Western world history courses, including at least one numbered 16W:100 or above 6 s.h.
- One pre-1700 history course (see "Pre-1700 Courses" below) 3 s.h.

A course taken to fill the pre-1700 history requirement also may be counted toward the requirement in American, European, or non-western world history.

**HISTORY ELECTIVES**

Elective courses in history (may include the history colloquium) 15 s.h.

History electives may include a maximum of two of the following: 016:001 Western Civilization I, 016:002 Western Civilization II, 016:003 Western Civilization III, 016:005 Civilizations of Asia: China, 016:006 Civilizations of Asia: Japan, and 016:007 Civilizations of Asia: South Asia. Electives also may include all other courses offered by the department numbered above 016:040, 16A:040, 16E:040, and 16W:040.

**PRE-1700 COURSES**

The following courses fulfill the 3 s.h. requirement for pre-1700 history.

- 016:001 Western Civilization I 3-4 s.h.
- 016:002 Western Civilization II 3-4 s.h.
- 016:005 Civilizations of Asia: China 3 s.h.
- 016:006 Civilizations of Asia: Japan 3-4 s.h.
- 016:007 Civilizations of Asia: South Asia 3-4 s.h.
- 016:045 Middle East and Mediterranean: Alexander to Suleiman 3 s.h.
- 16A:115 Native North America I: Precontact-1789 3 s.h.
- 16A:131 The Frontier in American History to 1840 3 s.h.
- 16A:161 Colonial North America, ca. 1600-1775 3 s.h.
- 16E:100 The Roman Empire 3 s.h.
- 16E:101 Ancient Egypt and the Ancient Near East 3 s.h.
- 16E:104 The World of Ancient Greece 3 s.h.
- 16E:105 Engineering and Technology in the Ancient Mediterranean 3 s.h.
- 16E:106 Warfare in Ancient Mediterranean Society 3 s.h.
- 16E:107 The Hellenistic World and Rome 3 s.h.
- 16E:110 Medieval Civilization II 3 s.h.
- 16E:111 Medieval Intellectual History 300-1150 3 s.h.
- 16E:112 Medieval Intellectual History 1150-1500 3 s.h.
- 16E:113 Economic and Social History of Medieval Europe 3 s.h.
- 16E:116 Ireland in the Early Middle Ages 3 s.h.
- 16E:117 History of the Medieval Church 3 s.h.
- 16E:118 The Transition from Manuscript to Print 3 s.h.
- 16E:119 Women, Power, and Society in Medieval Europe 3 s.h.
- 16E:120 The Book in the Middle Ages 3 s.h.
- 16E:125 Society and Gender in Europe 1200-1789 3 s.h.
- 16E:126 The French Revolutions and Human Rights 3 s.h.
- 16E:131 Early Modern England 3 s.h.
- 16E:139 Ancient and Medieval Science 3 s.h.
- 16W:111 Colonial Latin America 3 s.h.
- 16W:120 Pre-Colonial African History 3 s.h.
- 16W:160 The Atlantic World c. 1450-1850 3 s.h.
- 16W:172 Japan--Age of the Samurai 3 s.h.

**B.A. with Teacher Licensure**

Students who wish to qualify for licensure to teach social studies in secondary schools must complete the major in history and must earn at
least 15 s.h. in U.S. history (16A), at least 15 s.h. in non-U.S. history (16E and 16W), and 15 s.h. in a related area chosen from economics, geography, anthropology, psychology, sociology, or American government. Courses taken as part of the history major, including Colloquium for History Majors (numbered 16A:051, 16E:051, or 16W:051), may be counted as part of the 15 s.h. in U.S. history and the 15 s.h. in non-U.S. history required for certification.

Students also must complete the College of Education’s Teacher Education Program (TEP), which includes professional education courses required for teaching licensure. Not all political science courses count toward certification to teach American government. Course content must center around the American political system or American political issues.

For information about the TEP or the secondary social studies education program, consult the College of Education’s Office of Education Services.

**Four-Year Graduation Plan**

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan.

**Before the third semester begins:** at least one-quarter of the semester hours required for graduation

**Before the fifth semester begins:** three courses in the major (including Colloquium for History Majors) and at least one-half of the semester hours required for graduation

**Before the seventh semester begins:** four more courses in the major and at least three-quarters of the semester hours required for graduation

**Before the eighth semester begins:** three more courses in the major and submission of the portfolio of written work to the student’s advisor

**During the eighth semester:** enrollment in all remaining course work in the major (two courses), all remaining General Education courses, and a sufficient number of semester hours to graduate

**Honors**

Students who wish to enter the history department’s honors program must maintain a cumulative University of Iowa g.p.a. of at least 3.33, the same grade-point average required for membership in the University of Iowa Honors Program. Through its honors program, the department provides outstanding students with opportunities to enhance their history major in several ways.

The most significant part of the honors program in history is the honors thesis. The thesis is an extended research paper (30-50 pages), usually completed during the spring semester of the junior year or fall semester of the senior year. Research for the thesis is done under the supervision of a faculty member who specializes in the field in which the student undertakes his or her research. Students register for 3 s.h. of 016:091 Honors Seminar and 016:092 Honors Thesis in each of two semesters. The 6 s.h. of credit counts toward the credit required for the history major.

**Minor**

The minor in history requires a minimum of 15 s.h. in history courses, including 12 s.h. in advanced courses taken at The University of Iowa. For the minor, all courses numbered above 016:080, 16A:080, 16E:080, and 16W:080 are considered advanced. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass.

**Graduate Programs**

- Master of Arts in history
- Doctor of Philosophy in history

Graduate study in history prepares students for occupations such as high school or college teaching, publishing, commercial research, foundations and nongovernmental organizations, and government or other public service. With additional specialized training, students may become qualified for careers in archival work, library work, museum work, or historical site preparation and display. Some choose to pursue the joint Master of Arts/Juris Doctor program, which leads to degrees in both law and history (see the College of Law (p. 1215) section of the Catalog for information about the J.D. degree).

Students interested in graduate work should obtain a copy of the current Guide to Graduate Study at The University of Iowa from the Department of History office. The guide is revised every summer to include the latest faculty listing, research interests of faculty members, detailed regulations on study toward advanced degrees, and other information for students.

**Master of Arts**

The Master of Arts program in history requires a minimum of 30 s.h. of graduate credit and is offered with two options: one for students who plan to work toward the Ph.D., the other for students who do not. The two plans differ mainly
in their concentration in fields: the Ph.D. track emphasizes development of research capabilities culminating in the essay; the non-Ph.D. track stresses breadth of learning.

The M.A. with Ph.D. track requires completion of a research essay. Students must earn at least 24 s.h. of the required 30 s.h. in Department of History courses, including at least two seminars, or one seminar and one readings course. One seminar or readings course must be taken in each of the first two semesters of residence. Students must earn 12 s.h. in the area of their essay topic and at least 6 s.h. in a second division, including either a seminar or a readings course.

The essay in the major division must be based on original research and should be approximately 10,000 to 15,000 words long. It usually begins as a term paper for the seminar in the major division and is completed the following semester under the supervisor’s guidance. The finished product should emulate the character of articles in learned journals, just as the Ph.D. dissertation takes the form of a full-length scholarly monograph.

Requirements for the M.A. with non-Ph.D. track are similar to those for the Ph.D. track program. Students earn 24 of the required 30 s.h. in history. They earn 12 s.h. in one major division of history and must include at least one readings or seminar course. They earn an additional 12 s.h. in history by taking 6 s.h. in each of two other divisions of history, or 6 s.h. in one other division of history and 6 s.h. in a related department. The additional 12 s.h. in history must include at least one readings or seminar course.

After completing these requirements, or during the semester in which they will complete them, M.A. students must take an oral and written comprehensive examination in their major division.

**Doctor of Philosophy**

The Doctor of Philosophy program in history requires at least 72 s.h. of graduate credit, including credit for work done for the master’s degree.

Students who earn the M.A. with research essay at Iowa are admitted to the Ph.D. program on the favorable recommendation of the examining committee. Students who earn an M.A. at another university must meet the admission requirements of the Graduate College and the Department of History (see "Admission" below). They must submit a writing sample, such as a seminar paper or an M.A. thesis. They also must take a research seminar during their first two semesters in residence at Iowa.

Ph.D. students must complete at least eight 200-level courses of 4 s.h. each, taken in research seminars (not fewer than three) or graduate readings courses. At least five of the eight courses must be completed before the student takes the comprehensive examination. Courses taken at the M.A. level may be counted toward this requirement. The student also must take a graduate course in the philosophy of history, historiography, or methods of historical research.

The department has no general language requirement for the Ph.D., but the supervising faculty member may require the student to demonstrate a reading knowledge of one or more foreign languages and proficiency in the use of other study tools. Students may not complete the comprehensive examination until these requirements have been met.

The comprehensive written and oral examination covers three distinct fields, two of which must be in a major division that is chosen from the following divisions.

- Africa
- China
- Europe, early modern
- Europe, modern
- India
- Japan
- Latin America
- Medieval Europe
- Russia and the former Soviet Union
- The ancient world
- The Middle East
- The United States

Students may construct another field, subject to approval by the comprehensive exam committee.

The third field must be a division outside the student’s major division or a field from a related department outside history. The committee may define and delimit the individual fields for examination. It also may set, separately for each field, the character of the written portion of the comprehensive examination, which may take the form of a syllabus, a critical bibliography, a topical paper, or any other form or combination of forms that the committee deems suitable. The oral portion of the comprehensive examination focuses on issues and problems arising from the examination papers.

The candidate must submit to the dissertation committee a written prospectus for the dissertation no later than the semester following completion of the comprehensive exams. The committee consists of at least five members, including at least one member from outside the department. It considers the prospectus and may approve it, reject it, or require its revision. When
the dissertation is completed in final form, the
committee administers the final examination
for the doctorate, a formal oral defense of the
dissertation that usually lasts two hours.

Admission

Applicants must meet the admission requirements
of the Graduate College; see the Manual of Rules
and Regulations of the Graduate College or the
Graduate (p. 1117) College section of the Catalog.

Applicants must submit academic transcripts
and Graduate Record Examination (GRE) General Test scores. They also must submit examples of
original writing to the history department, such
as a term paper, a seminar paper, an honors
thesis, or a master’s essay (applicants to the Ph.D.
program); letters of recommendation from three
persons familiar with the student’s past academic
work; and a one- or two-page personal statement
of the applicant’s purpose for doing graduate
work. All application materials are due by January
15 for entry the following August.

Facilities

University of Iowa Libraries has unusual strength
in all aspects of U.S. history. The Main Library
houses the Henry A. Wallace papers and related
collections, the Iowa Women’s Archives, and other
unique materials. In European history, special
strengths include the fine collections of French
and English materials. The State Historical Society
of Iowa in Iowa City and the Herbert Hoover
Presidential Library and Museum in West Branch
also hold valuable research materials.

Courses

Courses numbered 016:001 Western Civilization
I through 016:040 Perspectives: Diversity in
American History are approved for the College
of Liberal Arts and Sciences General Education
Program (p. 381), except for 016:008 Civilizations
of Africa and 016:009 India Now! A Survey from
Bollywood Films to Global Terror. History courses
approved for General Education may not be
taken pass/nonpass, even when they are taken as
electives.

Majors should take 16A:051 Colloquium for History
Majors (American), 16E:051 Colloquium for History
Majors (European), or 16W:051 Colloquium for
History Majors (World) in the sophomore year or
in the first semester after declaring the major.
Other courses numbered below 200 are open to
first-year students who already have fulfilled the
General Education Program Historical Perspectives
requirement. Courses numbered 200 and above
are offered as occasion demands.

For Undergraduates

016:001 Western Civilization I     3-4 s.h.
Ancient and medieval. GE: Historical Perspectives.

016:002 Western Civilization II    3-4 s.h.
Early modern world. GE: Historical Perspectives.

016:003 Western Civilization III   3-4 s.h.
The modern world. GE: Historical Perspectives;
International and Global Issues.

016:005 Civilizations of Asia:      3 s.h.
China

016:006 Civilizations of Asia:      3-4 s.h.
Japan

016:007 Civilizations of Asia:      3-4 s.h.
South Asia

016:008 Civilizations of Africa     3 s.h.
Introduction to the study of Africa; brief survey
of African history; aspects of modern African life,
including political and social issues, economic
and health problems (including HIV-AIDS);
classroom discussion of selected African films
shown in class and selected African novels
included in course reading.

016:009 India Now! A Survey from    3-4 s.h.
Bollywood Films to Global Terror
Experience of change on adaptations made by
India to global conditions in the last 50 years, and
on contemporary Indian contributions to global
conditions and culture; India environmentalism,
Bollywood films and world music, celebrity
culture and Nobel prizes, Gandhian activism,
economic performance, the explosion of cricket,
the place of English language, social movements
among women and Untouchables, the Indian
diaspora abroad, internal dissent, and the Indian
war on terror. GE: Values, Society, and Diversity.

</table>
16W:167 Patterns in World History 3 s.h.
Patterns in world history from the evolution of humankind to the present; basic texts in evolution, migration, social evolution.

16W:168 Cooperation in World History 3 s.h.
Origins and role of human cooperation in world history, from human evolution to present; basic evolutionary theory, origins of humans, character of human nature, emergence of human cooperation, human cooperation in comparative zoological perspective; evolution of cooperative institutions such as family, tribe, market, state, mass religion, science, Internet.

16W:172 Japan--Age of the Samurai 3 s.h.
Society, culture, and politics of feudal Japan; social class, gender, norms, and political and economic developments explored through cinema and literature. Same as 39J:172.

16W:173 Modern Japan 3 s.h.
Political, social, and cultural developments of Japanese feudalism; feature films, fiction. Same as 39J:173.

16W:174 History, Memory, and Pacific War 3 s.h.
Contemporary meanings of the Pacific War in the collective memory of Americans and Japanese; readings and travel to war/peace memorials in Hawaii and Japan.

16W:175 Japan--U.S. Relations 3 s.h.
Political, social, economic, and cultural developments in Japan mid-19th to late-20th century. Same as 39J:175.

16W:178 Topics in Asian History 3 s.h.

016:185 The Internet in Historical Context 3 s.h.
History of media technologies (e.g., speech, writing, print, A/V devices, the Internet) from the evolution of speech to the present; ways in which technologies molded social groups and guided beliefs; impact of the Internet on contemporary society and culture.

16W:185 Modern Korean History 3 s.h.
Transformation of Choson Korea to North and South Koreas; local, regional, and global transformations in Korea from the late 19th century to present, including the severing of its historic ties with China; encounters with the West and Japan; new ideas of civilization and political community; the erasure of Choson as a country in 1910; the colonial experience; civil war; industrialization; creation of North Korea; democratic movement in South Korea and spread of diasporic communities abroad; Korean peninsula as a laboratory for analyzing compressed communist and capitalist modernities of the 20th century.

016:186 The History of Warfare 3 s.h.
World military history from evolution of human kind to present; development of weapons, tactics, and strategies.

016:190 Teaching History: Approaches in Lesson Design 3 s.h.

016:192 Traditions of Religious Reform 3 s.h.

16W:194 Imperialism and Modern India 3 s.h.
Introduction to the political, economic, social, and cultural history of India from 1700 to present; historically India included the territories of present-day Pakistan and Bangladesh; at present India extends through diasporic Indian communities to East Africa, North America, Europe, and the Caribbean.

016:180 Readings: International Security 3-4 s.h.

16W:183 Vietnam War on Film 3-4 s.h.
16W:197 Chinese History from 1600 to 1927  3 s.h.
Chinese history from the 17th to early 20th century, history of the Qing dynasty (1644-1911); Qing’s role in shaping aspects of today’s politics in China and the mentality of Chinese people; foundation of Manchu state in early 17th century, Ming-Qing transition in 1644, politics and society during the high Qing era, decline of the empire under foreign invasion and inner rebellions in the 19th century, collapse of the dynasty in 1911. Same as 039:197.

16W:198 China Since 1927  3 s.h.
Communist revolution from 1920s to founding of People’s Republic of China in 1949; Mao Zedong’s radical policies, Cultural Revolution; Deng Xiaoping’s economic reforms; China today. GE: International and Global Issues. Same as 039:196.

American History

16A:061 American History  3 s.h.
Discovery through Civil War, Reconstruction; emphasis on social history of colonial era and social, economic, political developments of Revolutionary, antebellum periods.

16A:062 American History 1877-Present  3 s.h.
Emphasis on social, political developments of Gilded Age, Progressive Era, Great Depression; the United States as a world power.

16A:065 Introduction to African American History  3 s.h.

16A:066 Civil War and Reconstruction  3 s.h.

16A:069 Introduction to Mexican American History  3 s.h.
Introduction to major themes in Mexican American history from the 18th century to the present; settlement of Mexico’s Far North by Spanish Mexican residents, their incorporation into the United States after a war of conquest, and the growth of Mexican Americans into the nation’s largest Latino group. GE: Values, Society, and Diversity.

16A:104 History of the American Deaf Community  3-4 s.h.
Creation of a distinct language and culture of deaf people in America during the 19th and 20th centuries. Taught in American Sign Language. Prerequisites: 158:014. Same as 158:100.

16A:106 Disability in American History  3 s.h.

16A:107 American Cultural History 1820-1920  3 s.h.
Culture as contested terrain; creation of cultural hierarchy (high and popular culture); struggles over the cultural construction of meaning; competing stories of America; advent and significance of mass culture.

16A:110 Introduction to American Indian History and Policy  3 s.h.

16A:112 Mexican American History  3 s.h.
Survey of Chicana/o (Mexican American) history from 18th century to present; Mexican American society’s diverse nature, explored through class, ethnic, gender, and regional divisions. Approved for GE: Values, Society, and Diversity.
16A:113 Latina/o Immigration 3 s.h.
Immigration experiences of people arriving in the United States from other regions of the Americas (e.g., Mexico, Central America, the Caribbean, South America); what has fueled immigration--social, political, and economic developments in the United States and other nations; territorial conquest, colonialism, real and imagined borders, chain migration, formation of immigrant communities, acculturation, circular migration, social networks; how migration restructures gender relations; immigrant communities and pan-Latino identity in the United States.

16A:115 Native North America I: Precontact-1789 3 s.h.

16A:116 Native North America II: 1789-Present 3 s.h.

16A:117 U.S. Indian Policy in the American Indian Family 3 s.h.

16A:119 Indian Wars: History and Poetics of Violence in the United States 3 s.h.
Cultural role of frontier violence, real and imagined, in settler society formations; use of historical accounts, art, literature, museum exhibitions, film, captivity tales, and discursive modes; historical and contemporary portrayals of Indian and settler violence, how these representations functioned, and how imagined violence compared to actual incidents of violence; exploration of violence involving other subalterns that speak to perceptions of the U.S. as a violent nation, often portrayed as a nation of laws; whether these competing legacies can be reconciled.

16A:122 Varieties of American Religion 3 s.h.
World views of religious groups (e.g., Mormon, Scientologist, Jehovah’s Witness, Black Muslim, Unification Church of Sun Myung Moon). Same as 032:141.

16A:132 The Frontier in American History 1840-Present 3 s.h.

16A:133 American West in Film 4 s.h.

16A:135 American West in the Twentieth Century 3-4 s.h.
Focus on growth, redistribution of political power, exploitation of and competition for natural resources, intermingling of diverse cultural groups.

16A:137 History of Iowa 3 s.h.

16A:139 The Social History of American Baseball 3 s.h.
History of baseball in the United States from its beginnings as a working-class recreation through the present; history of the game and the people who have played it, how the history of American society is viewed through the lens of baseball, how the game has contributed to social change; social class, race, urbanization, crime and political corruption, public health, big business and professionalism, spectatorship, entertainment and mass culture, national mythology, the exercise of legitimate authority (umpires!).

16A:141 Work and Society in Industrializing America 3 s.h.
Industrialization, formation of an American working class; changing patterns of labor organization, strike activity, politics; impact of ethnic, racial, gender divisions on working class communities, culture.

16A:142 American Labor in the Twentieth Century 3-4 s.h.
Competing philosophies and organizational strategies of workers in a maturing industrial economy; impact of world wars and Great Depression on American workers and their unions; rise of service sector, deindustrialization.
16A:144 American Economic History
3 s.h.
Emphasis on role of population and technology. Requirements: 06E:001 and 06E:002 for economics majors; 06E:001 and 16A:061 for non-economics majors. Same as 06E:158.

16A:146 Immigrant America 1845-1925
3 s.h.
Era of mass immigration in world context; formation, organization of immigrant communities; diverse processes of adaptation, assimilation; rural, urban contrasts; coercive Americanization, immigration restriction.

16A:147 History of Slavery in the U.S.A.
3-4 s.h.
Origins, development; focus on labor, family, gender, community, culture, resistance; South’s defense of slavery; wartime collapse, destruction of slavery. Same as 129:137.

16A:148 Race, Gender, U.S. International History
3 s.h.
Interplay between the United States’ 20th-century rise to world power and its racial and gender politics, in context of the dynamic interaction of U.S. domestic society and international relations; U.S. colonialism in the Caribbean and Pacific, struggles over migration, world wars as crucibles of social and political change, cultural politics of the Cold War, racial and gendered dimensions of the war on terror.

16A:149 Transnational America 1880-1939
arr.
The United States as a society increasingly embedded in global history during the late 19th- and early 20th-centuries; approaches for thinking about history in transnational ways; intensification of European, Asian, and Latin American immigration; cross-national dimensions of American reform; emergence of diasporic social movements; international scale of the corporate state; politics of colonialism and world war.

16A:150 The United States as Empire
3 s.h.
The U.S. rise to world power; continental empire-building in the 19th century; industrial, military and colonial power in the early 20th century; global hegemony from the mid-20th century to the present; white settler colonialism; overseas rule of Philippines and Puerto Rico; cultural Americanization; Cold War interventionism; post-9/11 unilateralism; meanings of American exceptionalism, intersections of U.S. nationalism with race and gender, remaking of domestic U.S. society within a changing global and imperial context.

16A:151 United States in World Affairs to 1900
3 s.h.
Origins of modern diplomatic practices; security, territorial and commercial expansion; legal, constitutional problems.

16A:152 United States in World Affairs
3-4 s.h.
America’s emergence as leader in world affairs; imperialism, international collaboration, participation in world wars, the Cold War.

16A:153 U.S.A. in a World at War 1931-1945
3 s.h.
Significance of World War II to the United States.

16A:154 Sexuality in the United States
3 s.h.

16A:155 Political Culture of U.S. Foreign Policy
3 s.h.
Political culture of U.S. foreign policy in historical perspective; connections and interactions between the domestic scene and international realities, from time of manifest destiny to national security state; domestic foundations of American power and its projection abroad, including constitutional framework, economic developments, rise of the state, role of media, public opinion, civilian-military relations; concepts of race, ethnic identifications, and religious and political beliefs have shaped understandings of patriotism, national interest, international responsibility; great debates in which American national identity and purpose are renegotiated.

</table>
16A:176 U.S. Legal History  3 s.h.
History of the law in the United States, as it developed from era of the Revolution to present; interaction of courts and legislatures with social movements; readings on court decisions, social histories, fiction (film and prose).

16A:180 The Sixties in America  3 s.h.
The 1960s as a moment in American politics and culture, pivotal and romanticized; major events and conflicts, including the election and assassination of President Kennedy, LBJ and the Great Society, civil rights movement and Black Power, counterculture and the urban crisis, sexual revolution and second wave feminism, anti-war protest and silent majority; changing conceptions of the sixties and development of a fresh interpretation.

16A:184 Black Global Metropolis: Sexual History  3 s.h.
Dispersion of people of African descent into the global metropolis, from expansion of port cities in the slave trade to industrialization of European and American cities, decolonization of the Third World, and proliferation of spatial cultures in contemporary geography; readings cover prostitution in colonial New York, sexual danger in Victorian London, jazz age Chicago, sexual psyches in Algiers, black gay expatriates in Paris, social science in Harlem and Puerto Rico ghettos, black/white sex in Johannesburg, transsexuals in Rio de Janeiro, Black Panther sexual politics in urban America, global hip-hop sexualities. Same as 129:184, 131:184.

16A:185 Themes in African American History  3 s.h.

16A:187 African American History  3 s.h.
1619-1865
Race and African American history, from the rise of racial slavery to the Civil War; advanced course. Same as 129:170.

16A:188 African American History  3 s.h.
1865-Present
African American history since Reconstruction; survey of African American politics and society from Reconstruction to present. Same as 129:187.

European History

16E:065 Europe Since 1945  3 s.h.
Europe since World War II: recovery, cold war, social and economic change, global perspectives.

16E:100 The Roman Empire  3 s.h.
History of Roman empire from assassination of Julius Caesar through 5th century A.D.: political, economic, cultural, and social developments from the transition to imperial power to the shift of power from west to east. Same as 20E:100.

16E:101 Ancient Egypt and the Ancient Near East  3 s.h.

16E:102 Food in Ancient Mediterranean Society  3 s.h.
Practices and values influenced by consumption and production of food in ancient Mediterranean societies; varied topics, including methods of food production and distribution, hierarchies of status as associated with food, food and ethnic identity, food and health, food and religion; focus on classical Greek and Roman society, Egypt, the ancient Near East, and Persia. Recommendations: familiarity with Greek and Roman civilization and history. Same as 20E:136.

16E:103 Alexander the Great  3 s.h.
History of Alexander the Great and the generals who succeeded him in ruling the lands he conquered; military, political, and social history.

16E:104 The World of Ancient Greece  3 s.h.

16E:105 Engineering and Technology in the Ancient Mediterranean  3 s.h.
Technologies developed and used in the ancient Mediterranean--primarily in Greece and Rome, also in Egypt and the Ancient Near East; agriculture and food preparation; construction and architecture; technologies related to warfare. Same as 20E:144.

16E:106 Warfare in Ancient Mediterranean Society  3 s.h.
16E:107 The Hellenistic World and Rome 3 s.h.
Social, economic, political, intellectual history of Graeco-Roman world, from fourth century B.C.E. to Justinian’s reign. GE: Historical Perspectives.

16E:108 The Twelfth-Century Renaissance 3 s.h.
Social, economic, intellectual, and cultural rebirth of Europe in the 12th century; Latin learning and education; developments in vernacular literature, art, architecture, new religious orders and institutions, pilgrimage and Crusade. Same as 162:108.

16E:109 Medieval Civilization I 3 s.h.
Europe from the decline of Roman empire to the eleventh century; cultural, political, economic, artistic and architectural foundations of Western civilization. Same as 162:109.

16E:110 Medieval Civilization II 3 s.h.
Europe from the eleventh century to the Italian Renaissance; cultural, political, economic, artistic, and architectural foundations of Western civilization. GE: Historical Perspectives. Same as 162:110.

16E:111 Medieval Intellectual History 300-1150 3 s.h.
Philosophy, art, literature, religious culture of Europe from waning of classical intellectual modes of culture in late antiquity, to their recovery in 12th century. Same as 162:111.

16E:112 Medieval Intellectual History 1150-1500 3 s.h.
European philosophy, religion, literature, art from 12th-century rise of scholasticism; their transformation in period of Copernicus, Luther. Same as 162:112.

16E:113 Economic and Social History of Medieval Europe 3 s.h.
Changes in western Europe from 300 to 1500 A.D.; feudalism, manorialism, revival of towns, heresy, women, monasticism, agricultural and commercial revolutions, Black Death. GE: Historical Perspectives. Same as 162:113.

16E:114 Medieval Philosophy 3 s.h.
Main trends and major figures, such as Augustine and Aquinas. Requirements: sophomore or higher standing. Same as 026:112.

16E:116 Ireland in the Early Middle Ages 3 s.h.
Ireland and the northern British islands 400-1000 CE, a region of small kingdoms and thin population, lacking natural resources, far from Rome and ancient centers of Mediterranean culture; development of civilization, including monastic, legal, theological, and scholarly traditions that had a major impact on continental Europe; early medieval Irish history; introduction to the world of historical scholarship. Same as 162:116.

16E:117 History of the Medieval Church 3 s.h.
Development of Christianity to end of great schism; rise of Roman primacy, development of monasticism, orthodox and heterodox groups. GE: Historical Perspectives. Same as 162:117.

16E:118 The Transition from Manuscript to Print 3 s.h.
Western manuscripts and books 1200-1600; changes in production and distribution methods and in how texts were used, in cultural context. Same as 021:258, 108:183.

16E:119 Women, Power, and Society in Medieval Europe 3 s.h.

16E:120 The Book in the Middle Ages 3 s.h.
Relation of text, decoration, function, creators, and audience in different genres of medieval manuscript books 400-1500 A.D. Same as 108:182.

16E:121 The Middle Ages in Film 3 s.h.
How films that represent medieval events and literature may be analyzed to reveal the culture and times in which the films were made; Middle Ages and European nationalistic mythmaking as represented in film. Same as 162:121.
16E:123 Religious Conflict/Early-Modern Period 3 s.h.
Reformation of 16th century—Lutheran, Calvinist, Radical, English; readings from major representatives of each. Same as 032:154.

16E:125 Society and Gender in Europe 1200-1789 3 s.h.
Social and gender ideologies as inscribed in patterns of authority (household, church, state); ranges of human endeavor (intellectual, psychological, biological); community organization (social, economic, legal, sexual); their influence on concept of community. GE: Historical Perspectives. Same as 131:181.

16E:126 The French Revolutions and Human Rights 3 s.h.
Worldwide issues of human rights posed by the French Revolution, Napoleonic regime; state governance, class status, religious freedoms, marital inequities, plantation economy, slave trade, citizenship. GE: Historical Perspectives.

16E:130 Modern European Imperialism 3 s.h.
Introduction to the history of European imperialism since the 18th century; major shifts in the nature of European empire examined through the Haitian Revolution, India, Australia, Congo, Algeria.

16E:131 Early Modern England 3 s.h.
History of England from the Wars of the Roses in the 15th century to the beginning of the 18th century; religious changes of the 16th and 17th centuries, evolution of the monarchy and other political institutions during the Tudor and Stuart dynasties and the English civil war, and the transformation of England into one of the wealthiest and most powerful nations in the world.

16E:132 War and Society in Modern Europe 3 s.h.
Impact of war on European societies since the French Revolution.

16E:134 Nineteenth-Century Europe 3 s.h.
Political, social, economic, and cultural factors.

16E:135 Twentieth-Century Europe: The Nazi Era 3 s.h.

16E:136 Twentieth-Century Europe: The Cold War and After 3 s.h.

16E:139 Ancient and Medieval Science 3 s.h.
Greeks’ initiation of scientific inquiry; developments in astronomy, cosmology, optics, mathematics, physics, medicine, psychology in ancient and medieval societies of Middle East, Europe. Same as 162:139.

16E:141 Special Topics in European History arr.
European history topics of current interest (i.e., food, environment, climate, water use); for advanced history majors and beginning graduate students.

16E:143 Modern France 1789-1871 3 s.h.

16E:144 Modern France 1870-Present 3 s.h.

16E:145 France and Algeria from Pirates to Terrorism 3 s.h.
Long, complex history of the relationship between France and Algeria since the 18th century; early modern conflicts over Barbary piracy, French invasion and colonization of Algeria in the 19th century, the brutal Algerian War of Independence, postcolonial migration, and ongoing war of memory over shared Franco-Algerian history of colonization and decolonization.

16E:146 France from 1815-Present 3 s.h.
16E:150 Modern Britain: The Eighteenth Century
3 s.h.
Great Britain from Glorious Revolution of 1688 to end of the Napoleonic Wars in 1815; post-revolution political settlement, political conflict, growth of British empire, religious dissent, evangelical revival, Industrial Revolution, American Revolution, British response to the French Revolution.

16E:151 Modern Britain: The Nineteenth Century
3-4 s.h.
Great Britain 1780-1914; evangelical revival, Industrial Revolution, growth of modern political parties, progress of political reform, scientific developments, influence of Darwin and Mill, growth of secularism, British Empire, Boer War, advent of World War I.

16E:152 Modern Britain: The Twentieth Century
3 s.h.
Great Britain from Boer War to Tony Blair’s political triumph; liberal revival, World War I, rise of the Labour Party, the Depression, appeasement, World War II, Labour’s triumph after the war, rise of consensus politics, 1960s cultural changes, Margaret Thatcher’s political ascendancy, transformation of the Labour Party under Blair.

16E:153 Notions of Progress in Modern European History
3 s.h.
The idea of progress used to understand the relationships between society, government, economics, and power; what constitutes progress; how notions of progress have shaped modern Europe and the United States; how the idea of progress has helped to legitimate political, social, and cultural projects; how it continues to inform local, national, and international politics and individuals’ personal lives.

16E:155 German History 1648-1914
3 s.h.
History of German speaking lands 1648-1918.

16E:156 Germany Since 1914: Weimar, Hitler, and After
3-4 s.h.
Continuity, change in 20th-century German politics, society, culture; creation, collapse of Weimar Republic; Nazism and Third Reich; East and West Germany since 1945; unification and its discontents. GE: International and Global Issues. Same as 13E:126.

16E:157 Holocaust in History and Memory
3 s.h.
Origins and implementation of the Holocaust; perpetrators, victims, and bystanders; impact of the Holocaust on the post-World War II world.

16E:171 History of the Russian Empire, 900-1917
3 s.h.
Introduction to history of polities and peoples of western Eurasia from 10th century to Russian Revolution; formation and vicissitudes of the Russian Empire; ethnogenesis in western Eurasia; origins of the Rus’, Kievan Rus’ and its competitors, the Mongol invasion of Rus’, rise of Muscovy, Muscovite political system, birth of the Russian empire, Russian empire during republicanism and nationalism.

16E:178 Soviet Union 1917-1945
3-4 s.h.
Revolution, foundation of Soviet Union; Leninism; major political, social, ideological developments during Stalinist period--collectivization, industrialization, terror; nationalities, foreign policy; World War II; Cold War; socialist state system. GE: Historical Perspectives.

3-4 s.h.

16E:185 First World War
3-4 s.h.
Social, economic, political, technological, military aspects of causes, conduct, consequences of war of 1914-18; fiction, contemporary documents, historical works, films.
For Graduate Students

016:201 First-Year Graduate Colloquium
3 s.h.
Introduction to history graduate program.

016:202 Introduction to New Media in the Humanities and Social Sciences
Use of New Media software in research, presentation, and instruction; includes HTML editors (Dreamweaver), wikis (Confluence), blogs (WordPress), collaborative mark-up programs (CommentPress), graphics editors (Illustrator), map editors (MapPoint, ArcView), photographic editors (Photoshop), audio editors (Garage Band, Soundbooth, Audio Hijack Pro), video editors (iMovie, Premiere Pro, Photo-To-Movie), and animation editors (Flash); projects.

016:205 Gender and Race in Nineteenth-Century U.S.
arr.

016:207 The American Civil War in History and Memory
arr.

016:209 Seminar: Medieval Social and Economic History
arr.

016:210 Readings: Medieval Women
arr.

016:211 Seminar: Medieval Intellectual History
arr.

016:212 Readings: Medieval Intellectual History
arr.

016:213 Seminar: History of Science
arr.

016:214 Readings: Medieval and Early Modern Universities
arr.

016:215 Graduate Readings: Monastic History
History of Christian monasticism in the medieval west; the developing monastic and religious orders, nuns of those groups; tertiaries, beguines, other orthodox penitent movements from the development of Christianity to the Reformation.

016:217 Source Criticism for Medieval Studies
arr.

016:218 Medieval Latin Paleography
arr.

016:220 Research Seminar
Research for students in all areas of history.

016:223 Seminar: Reformation Culture and Theology
Culture and theology of 16th-century Europe. Same as 032:223.

016:224 Seminar: History of Disability
arr.

016:225 Readings: History of Sexuality
History of sexuality within the family, its move into the marketplace; social customs and taboos, methods of birth control and abortion, religion, medical and psychological writings, state policies. Same as 131:225.

016:230 Readings in Middle East History
arr.

016:231 Seminar: African History
Themes in African precolonial and modern history.

016:232 Readings in African History
arr.

016:233 Readings: Women, Men, and Gender in Modern Europe
016:234 Readings: Colonialism and Empire in European History 3-4 s.h.
Engagement of Europeans in an immense outward expansion of people, goods, and ideas, as well as more than a few germs since 1492; exploration of some of the implications of this expansion by focusing on a selection of different colonial encounters and some legacies of European empires.

016:235 Seminar: Modern Europe arr.

016:236 Readings: Modern European History arr.

016:238 Readings in the History of Modern France arr.

016:239 Readings: War and Society in Modern Europe arr.
Preparation, conduct, and aftermath of war; social-historical examination; conflicts on European territory, colonial wars, and wars of decolonization, from French Revolution through late 20th century.

016:240 Readings in Modern German History arr.
Major problems in modern German history; historiographic debates organized thematically and proceeds chronologically from the French Revolution to the present; oral presentations and comparative essays.

016:244 Crossing Borders Proseminar arr.

016:246 United States in the World arr.
Historiographies that situate modern U.S. history in a global context; how historians study the American past beyond traditional, nation-centered frames; transnational histories of migration, nativism and exclusion; social movements; colonial empire-building; commercial and cultural Americanization; transfer of policy ideas; military occupations; decolonization; Cold War’s impact on social reform; post-9/11 moment.

016:247 Crossing Borders Seminar 2-3 s.h.

016:248 Seminar: Research in Race and Ethnicity arr.

016:249 Teaching Seminar: Graduate Instructors 2-3 s.h.
Issues and methods for effective history teaching at the college level.

016:254 Teaching Proseminar 2-4 s.h.
Preparation for leading undergraduate discussion sections for 016:001 - 016:003 Western Civilization I-III; specific subject matter preparation similar to that offered in graduate readings courses; for first-time graduate teaching assistants.

016:256 Theories of World History arr.
Macrohistorical theories of world history; can a prominent theory or combination of theories explain the social evolution of humankind over hundreds of thousands of years; how to periodize world history; does history have a direction, and if so, what direction; the future of humankind.

Interpretations and methods applied by historians in various world regions to different forms of oral history, from old oral traditions to contemporary autobiographical testimony. Same as 129:259.

016:260 Readings: Comparative Labor History arr.

016:262 Readings: American Colonial History

016:263 The Art and Craft of Historical Writing
Focus on improving students’ skills in historical writing; readings from exemplary texts, ancient to contemporary; all aspects of historical writing, from sentence composition and paragraph structure to evidence and narrative voice.

016:264 Seminar: Social History of the American Working Class

016:265 Seminar: American Social History

016:266 Readings: The Gilded Age and the Progressive Era

016:267 Seminar: Contemporary United States

016:269 Readings in Transnational U.S. History
Emerging historiographies that problematize national frameworks of history writing and reexamine U.S. history from transnational and global perspectives; methodological works on transnational, imperial, and global history; literatures on transnational migration, global production and trade, social movements, intercultural borrowing and exchange, and empire-building.

016:270 Readings in the History of Women and Gender in the U.S.A.

016:271 Seminar: American Frontier

016:272 Readings: The American Frontier

016:273 Readings in American Social History

016:277 Feminist Research Seminar
Feminist research methodologies; how to conduct original research, write a research proposal and research paper, read and criticize others’ work. Repeatable. Same as 131:204.

016:278 Research in Transnational U.S. History
Experience framing, organizing, and carrying out an original investigation on a theme in U.S. transnational history, followed by review and discussion of drafts; opportunity to explore transnational methodologies while developing professional skills of literature review, source interpretation, and collegial critique.

016:280 Readings in Latina/o History
Introduction to major works and recent scholarship in Latina/Latino history.

016:281 Readings in Borderlands History
Comparative borderlands; articles on diverse topics from borderland regions worldwide (main focus on U.S.-Mexico borderlands, with inclusion of European, Asian, African, and Latin American borderlands); analysis of each article for its thesis, research questions, methodology, primary sources, and weaknesses; seminar.

016:284 Seminar: History of Women and Gender
Opportunity to pursue research for a single paper, M.A. thesis, or doctoral dissertation in the history of women and gender in the United States; interdisciplinary and internationally comparative projects; meetings and evaluations with attention to the craft of writing.

016:285 Readings: Gender in Latin American History
016:287 Readings: African American Women's History

016:288 Readings: Latin American History

016:289 Archives Master Course 1 s.h.

016:292 Readings in Chinese History

016:294 Readings: Japanese History

016:295 Readings in Modern India

016:296 Individual Study: Graduate

016:297 Thesis

016:298 Predissertation Seminar
Preparing for dissertation work for students in all areas of history; thesis topic, relevant literature in the topic field, potential sources, primary research strategy, sources of research funding, research proposal; preparation for submitting applications for dissertation research fellowships and beginning of completing the thesis prospectus.

016:299 History Workshop: Theory and Interpretation
Interdepartmental Studies

Coordinator
Andrew Tinkham

Undergraduate degree: B.A. in Interdepartmental Studies
Web site: http://www.uiowa.edu/~indepart

The Interdepartmental Studies Program (ISP) provides an alternative to traditional undergraduate majors. It gives students the opportunity to design an individualized plan of study or to choose a preapproved plan in business studies or health science. Each track includes course work from a variety of departments.

Since the major in interdepartmental studies affords opportunities outside the traditional degree pattern, students must create or choose study programs that meet their individual educational and career objectives. Those who plan to seek employment immediately after graduation should familiarize themselves with the educational background and qualifications required by employers and should include appropriate courses in their study programs.

Students preparing for advanced study should become familiar with the admissions requirements of graduate or professional schools that interest them. The earlier students decide to pursue graduate or professional study, the easier it is to complete necessary prerequisites.

Undergraduate Program

• Major in interdepartmental studies (Bachelor of Arts)

Interdepartmental studies students who choose to earn a second major (Bachelor of Arts or Bachelor of Science) may count a maximum of two courses toward both majors. They also may earn certificates and minors in other departments or programs; courses used to meet requirements for a minor may not be counted toward requirements for the major in interdepartmental studies. See Majors, Minors & Certificates under For Students on the College of Liberal Arts and Sciences web site.

Bachelor of Arts

The Bachelor of Arts with a major in interdepartmental studies requires a minimum of 120 s.h., including 36-40 s.h. of work for the major. Required credit depends on choice of track: individualized plan of study track, business studies track, or health science track.

Students who choose the individualized plan of study track design their own major. Those who choose the business studies track or the health science track follow a preapproved study plan. The business studies track offers three emphasis areas: workplace practices and perspectives, values and ethics, and arts management. The health science track offers five emphasis areas: multidisciplinary science, entrepreneurship, aging, sexuality studies, and global health.

All students must complete the College of Liberal Arts and Sciences General Education Program (p. 381).

Individualized Plan of Study Track

The individualized plan of study track requires a minimum of 36 s.h. of work for the major, all taken at The University of Iowa. Students who choose this track build their own study plan, creating a unique major that speaks to interests across departments and that integrates varied approaches to a particular topic (e.g., aging studies, international business, children’s studies, environmental issues, health issues).

Students must submit their study plan for approval. The plan must include an essay that provides a clear statement of the area of intellectual focus; the reasons for preferring the ISP to any departmental program; a concrete discussion of how the advanced courses relate to each other, to personal interests, and to the central focus of the study plan; a description of academic goals for the bachelor’s degree; a list of advanced-level course work already completed; and a list of advanced-level course work planned for all remaining semesters.

Each study plan is approved by a faculty advisory committee. Reviews are held once a semester. Deadlines are posted on the Interdepartmental Studies Program web site.

If the advisory committee does not grant approval, the study plan may be returned to the student for revisions and resubmission at the next committee meeting. In some cases, the student may be referred to an appropriate departmental major.

Once the study plan is approved, the student is required to follow the plan, taking the courses approved for it. A limited number of substitutions may be allowed, but only if they are clearly consistent with the area of intellectual focus in the approved study plan, and only if they are approved in advance by the ISP advisor. Unauthorized substitutions may be designated as elective course work.

Significant changes in the focus of a student’s study plan require the submission and approval of a revised study plan. The student’s academic
advisor determines whether changes warrant a revised plan.

See the Interdepartmental Studies Program web site for up-to-date information on the individualized plan of study track and rules for submission of study plans.

Students who choose the individualized plan of study track are advised by the Interdepartmental Studies Program coordinator and work closely with the Interdepartmental Studies Program office while designing the study plan. Students who intend to submit a study plan should contact the Interdepartmental Studies Program coordinator as early as possible.

Business Studies Track

The business studies track requires 35-40 s.h. of work for the major. It provides a preapproved plan of study that combines a generalized business background with a choice of three emphasis areas: workplace practices and perspectives, values and ethics, and arts management. Students who choose this track also have the option of proposing their own business-related emphasis area to the faculty advisory committee.

Business studies track students must complete foundation course work (16-19 s.h.), business electives (4-6 s.h.), and one emphasis area (15 s.h.). A minimum of 15 s.h. of work for the major must be completed at The University of Iowa. The Academic Advising Center advises business studies track students; contact the center for more information about requirements.

FOUNDATION COURSES

Foundational math--all of these:

- 22M:017 Calculus and Matrix Algebra for Business 4 s.h.
- 22S:008 Statistics for Business 4 s.h.
  or
- 22S:025/07P:025 Elementary Statistics and Inference 3 s.h.

Foundational economics--both of these:

- 06E:001 Principles of Microeconomics 4 s.h.
- 06E:002 Principles of Macroeconomics 4 s.h.

Foundational accounting--one of these:

- 06A:001 Introduction to Financial Accounting 3 s.h.
- 06T:050 Foundations in Entrepreneurship (if not used as business elective) 2 s.h.
- 06T:113 Basics of Small Business Accounting 1 s.h.

BUSINESS ELECTIVES

Two of these:

- 06A:002 Managerial Accounting 3 s.h.
- 06E:071 Statistics for Strategy Problems 3 s.h.
- 06F:100 Introductory Financial Management 3 s.h.
- 06J:047 Introduction to Law 3 s.h.
- 06J:048 Introduction to Management 3 s.h.
- 06K:100 Operations Management 3 s.h.
- 06K:070 Computer Analysis 3 s.h.
  or
- 22C:001 Principles of Computing 3 s.h.
- 06M:100 Introduction to Marketing Strategy 3 s.h.
  or
- 06T:050 Foundations in Entrepreneurship (if not used in foundational accounting requirement) 2 s.h.
  or
- 06T:116 Basics of Small Business Marketing 1 s.h.

WORKPLACE PRACTICES AND PERSPECTIVES EMPHASIS

Students must earn 15 s.h. in their chosen emphasis area. Students who choose the workplace practices and perspectives emphasis must complete at least one course from each of four components (speaking and writing, foundations and practices, cultural diversity, and entrepreneurship). The required 15 s.h. must include 9 s.h. earned in advanced courses (100 level or above). Advanced courses for each component are listed below.

Speaking and Writing Component

At least one chosen from these or from the advanced-level courses:

- 08C:001 Creative Writing Studio Workshop 3 s.h.
- 08N:020 Introduction to Creative Nonfiction 3 s.h.
- 036:012 Interpersonal Communication 3 s.h.
- 036:017 Theory and Practice of Argument 4 s.h.
- 036:021/07E:021 Oral Interpretation 3 s.h.
- 036:030/ The Art of Persuading Others 3 s.h.
Advanced-level courses:

01J:115 What is Storytelling For? 4 s.h.
06B:140 Business Writing 3 s.h.
08A:104 Personal Writing for Non-English Majors 3 s.h.
08A:113 Writing for Business and Industry for Non-English Majors 3 s.h.
08C:023 Creative Writing 3 s.h.
08C:097 Fiction Writing 3 s.h.
08C:108/145:108 Creative Writing for New Media 3 s.h.
08C:110/145:110 Creative Writing for the Ecologically Aware: Stories in the Land 3 s.h.
08C:115/145:115 Creative Writing and Popular Culture 3 s.h.
08N:080 Nonfiction Writing 3 s.h.
08N:104 Personal Writing 3 s.h.
08N:113 Writing for Business and Industry 3 s.h.
08N:120 Advanced Nonfiction Writing 3 s.h.
08N:133 Team Writing for Business 3 s.h.
20E:142 Word Power: Building English Vocabulary 3 s.h.
103:100 Introduction to Linguistics 3 s.h.
145:101/08C:101 Creative Writing for Business 3 s.h.

Foundations and Practices Component

At least one chosen from these or from the advanced-level courses:

019:090 Media Uses and Effects 3 s.h.
019:091 Media History and Culture 3 s.h.
019:095 Media and Consumers 3 s.h.
036:001 Core Concepts in Communication Studies 3 s.h.
036:018 Leadership and Organizational Procedures 2 s.h.
036:019 Organizational Leadership 2-3 s.h.
113:014 Language, Culture, and Communication 3 s.h.

Advanced-level courses:

034:162/131:160 Work and Family Institutions 3 s.h.
036:070 Communication Theory in Everyday Life 3 s.h.
036:074 Media and Society 3 s.h.
01H:003 Art of Pre-Columbian America, Native America, and Oceania 3 s.h.
08G:005/149:005 Literatures of Native American Peoples 3 s.h.
08G:011 Literature and Sexualities 3 s.h.
016:040 Perspectives: Diversity in American History 3 s.h.
16A:065/129:065 Introduction to African American History 3 s.h.
025:080 Jazz Cultures in America and Abroad 3 s.h.
032:016 Religion and Liberation 3 s.h.
032:060/149:060 Sacred World of Native Americans 3 s.h.
034:018/131:018 Gender and Society 3-4 s.h.
034:066 Social Inequality 3 s.h.
035:070/187:070/130:070/038:070 Introduction to Latin American Studies 3 s.h.
113:051 Diversity in Action in American Society 1-3 s.h.
129:050/032:034 Introduction to African American Religions 3 s.h.
129:060 Introduction to African American Society 3 s.h.
129:061/045:040 Introduction to African American Culture 3 s.h.
131:010 Introduction to Gender, Women’s, and Sexuality Studies 3 s.h.
131:055 Gender, Race, and Class in the U.S. 3 s.h.
149:049/045:049 Introduction to American Indian and Native Studies 3 s.h.

Cultural Diversity Component

At least one chosen from these or from the advanced-level courses:

07B:154 Education, Race, and Ethnicity 2-3 s.h.
07U:133 The Culturally Different in Diverse Settings 3 s.h.
008:118 Jewish American Literature 3 s.h.
16A:104/158:100 History of the American Deaf Community 3-4 s.h.
16A:106 Disability in American History 3 s.h.
16A:112 Mexican American History 3 s.h.
019:165/129:122 African Americans and the Media 3 s.h.
025:141 History of Jazz 3 s.h.
042:112/096:112 Human Sexuality, Diversity, and Society 1-3 s.h.
103:150 Language and Gender 3 s.h.
113:110/149:110/045:105 Native Peoples of North America 3 s.h.
Entrepreneurship Component
At least one of these (all are advanced-level courses):

**Health Science Track**

The health science track requires 37 s.h. of work for the major. It provides a preapproved plan of study that combines a generalized health background with a varied choice of emphasis areas: multidisciplinary science, entrepreneurship, aging, sexuality studies, and global health. Students who choose this track also have the option of proposing their own health science-related emphasis area to the faculty advisory committee.

Health science track students must complete foundation course work (22 s.h.) and one emphasis area (15 s.h.). A minimum of 15 s.h. for the major must be completed at The University of Iowa. The Academic Advising Center advises...
health science track students; contact the center for more information about requirements.

**FOUNDATION COURSES**

Foundational chemistry--two of these:

- 004:007 General Chemistry I 3 s.h.
- 004:011 Principles of Chemistry I 4 s.h.
- 004:008 General Chemistry II 3 s.h.
- 004:012 Principles of Chemistry II 4 s.h.

Foundational biology--one of these:

- 002:002 Introductory Animal Biology 4 s.h.
- 002:010 Principles of Biology I 4 s.h.
- 002:021 Human Biology 4 s.h.

Foundational math and statistics--one of these:

- 22S:008 Statistics for Business 4 s.h.
- 22M:009 Elementary Functions 4 s.h.
- 22S:025/07P:025 Elementary Statistics and Inference 3 s.h.
- 22M:015 Mathematics for the Biological Sciences 4 s.h.
- 22M:016 Calculus for the Biological Sciences 4 s.h.
- 22M:017 Calculus and Matrix Algebra for Business 4 s.h.
- 22M:025 Calculus I 4 s.h.
- 22S:101 Biostatistics 3 s.h.
- 22S:102/07P:143 Introduction to Statistical Methods 3 s.h.
- 171:161 Introduction to Biostatistics 3 s.h.

Foundational social science--one of these:

- 031:001 Elementary Psychology 3 s.h.
- 034:001 Introduction to Sociology Principles 3-4 s.h.
- 034:002 Social Problems 3-4 s.h.
- 113:003 Introduction to the Study of Culture and Society 3 s.h.
- 113:010 Anthropology and Contemporary World Problems 3 s.h.

Foundational science elective--one of these:

- 002:011 Principles of Biology II 4 s.h.
- 027:053 Human Anatomy 3 s.h.
- 060:110 Principles of Human Anatomy 3 s.h.

**MULTIDISCIPLINARY SCIENCE EMPHASIS**

Students must earn 15 s.h. in their chosen emphasis area. Students who choose the multidisciplinary science emphasis must complete 15 s.h. chosen from these.

- 002:114 Cell Biology 3 s.h.
- 002:128 Fundamental Genetics 3-4 s.h.
- 002:145 Introduction to Neurobiology 3 s.h.
- 002:150 Endocrinology 3 s.h.
- 08C:107/145:107 Creative Writing for the Health Professions 3 s.h.
- 027:040 Nutrition and Health (if not used to fulfill foundation requirement) 3 s.h.
- 061:157 General Microbiology 5 s.h.
- 099:110 Biochemistry 3 s.h.
- 099:120 Biochemistry and Molecular Biology I 3 s.h.
- 099:130 Biochemistry and Molecular Biology II 3 s.h.
- 004:121 Organic Chemistry I 3 s.h.
- 004:123 Organic Chemistry I for Majors 3 s.h.
004:122 Organic Chemistry II 3 s.h.
  or
004:124 Organic Chemistry II for Majors 3 s.h.
004:141 Organic Chemistry Laboratory 3 s.h.
  or
004:142 Organic Chemistry Laboratory for Majors 3 s.h.
061:112 Pharmacy Microbiology 4 s.h.
  or
061:164 Nursing Microbiology 4 s.h.
027:125/145:125 Contemporary Nutrition (if not used to fulfill foundation requirement) 3 s.h.
  or
027:143 Physiology of Nutrition (if not used to fulfill foundation requirement) 3 s.h.
029:011 College Physics I 4 s.h.
  or
029:081 Introductory Physics I 4 s.h.
029:012 College Physics II 4 s.h.
  or
029:082 Introductory Physics II 3-4 s.h.

**ENTREPRENEURSHIP EMPHASIS**

Students must earn 15 s.h. in their chosen emphasis area. Students who choose the entrepreneurship emphasis must complete 15 s.h. chosen from these.

06A:001 Introduction to Financial Accounting 3 s.h.
06B:140 Business Writing 3 s.h.
06E:113 Health Economics 3 s.h.
06E:119 Policy Analysis 3 s.h.
06J:048 Introduction to Management 3 s.h.
06J:147/024:147/032:127/042:157/096:168/06T:144 Nonprofit Organizational Effectiveness I 3 s.h.
06M:100 Introduction to Marketing Strategy 3 s.h.
06T:050 Foundations in Entrepreneurship 2 s.h.
06T:120 Entrepreneurship and Innovation 3 s.h.
06T:133 Entrepreneurial Finance 3 s.h.
06T:134 Entrepreneurial Marketing 3 s.h.
06T:145 Legal Aspects of Entrepreneurship 3 s.h.
06T:146 Strategic Management of Technology and Innovation 3 s.h.
06T:147 Social Entrepreneurship 3 s.h.
06T:148 E-Commerce Strategies for Entrepreneurs 3 s.h.
06T:150 Managing the Growth Business 3 s.h.
06T:190 Seminar in Entrepreneurship 2-3 s.h.
06T:192 Entrepreneurship: Business Consulting 3 s.h.
06T:194 Entrepreneurship: Advanced Business Planning 3 s.h.
08N:113 Writing for Business and Industry 3 s.h.
145:101 Creative Writing for Business 3 s.h.
145:198 Independent Study arr.
145:199 Interdepartmental Studies Practicum arr.

**AGING EMPHASIS**

Students must earn 15 s.h. in their chosen emphasis area. Students who choose the aging emphasis must complete 15 s.h. chosen from these.

08C:107/145:107 Creative Writing for the Health Professions 3 s.h.
145:198 Independent Study arr.
145:199 Interdepartmental Studies Practicum arr.
153:146/096:146/169:146 Health Promotion for Older Adults 3 s.h.
153:150/031:050 Psychology of Aging 3 s.h.
153:153/042:153 Programs and Services for Aging Adults 3 s.h.
153:160 Biology of Aging 3 s.h.
153:168/169:168 Aging and Leisure 3 s.h.
153:186/042:186 Death/Dying: Issues Across the Life Span 3 s.h.
153:195/042:195 Introduction to Nursing Homes 3 s.h.

**SEXUALITY STUDIES EMPHASIS**

Students must earn 15 s.h. in their chosen emphasis area. Students who choose the sexuality studies emphasis must complete 15 s.h. chosen from these.

07C:130 Human Sexuality 3 s.h.
08C:107/145:107 Creative Writing for the Health Professions 3 s.h.
034:135/131:136 Sociology of Sexuality  
042:112/096:112 Human Sexuality, Diversity, and Society  
045:060/131:061 Sex and Popular Culture in the Postwar U.S.  
131:078/028:078 Women, Sport, and Culture  
131:110 Frameworks for the Study of Sexuality  
145:198 Independent Study  
145:199 Interdepartmental Studies Practicum  

GLOBAL HEALTH EMPHASIS

Students must earn 15 s.h. in their chosen emphasis area. Students who choose the global health emphasis must complete 15 s.h. chosen from these.

145:198 Independent Study (only 3 s.h. may count toward major)  
145:199 Interdepartmental Studies Practicum (only 3 s.h. may count toward major)  
152:120 Global Health and Human Rights  
152:121/113:121/149:121 Health of Indigenous Peoples  
152:125 Topics in Global Health  
152:131/044:131 Geography of Health  
152:135/027:135 Global Health and Global Food  
152:137/16W:137 History of Public Health  
152:138/16W:138 History of Global Health  
152:150 Research Design in Global Health (only one enrollment may count toward major)  
152:152 Global Health Conference (only one enrollment may count toward major)  
152:158/027:176 Promoting Health Globally  
152:160 Global Health Seminar (only one enrollment may count toward major)  
152:170/041:104 Health Care and Health Reforms in Russia  
152:182 Health Experience of Immigrants, Migrants, and Refugees  
152:184/113:184/172:131 Anthropology and International Health  
152:185/113:185/172:173 Medical Anthropology  
152:199 Special Projects in Global Health (only one enrollment may count toward major)

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain

semesters in order to stay on the University’s Four-Year Graduation Plan. (Courses in the major are those required to complete the major.)

Note: The Four-Year Graduation Plan is available only to ISP students in the individualized plan of study track.

Before the third semester begins: at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: at least one-half of the semester hours required for graduation

Before the seventh semester begins: an approved plan of study, at least six courses in the plan of study, and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: a total of at least nine courses in the plan of study

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Honors

Students majoring in interdepartmental studies who wish to graduate with honors must be members of the University of Iowa Honors Program, which requires that students maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University of Iowa Honors Program for more information). Graduating with honors usually includes the successful completion of the honors requirements in a particular department or program.

Students should initiate inquiries about graduating with honors by contacting the ISP coordinator. Students are encouraged to inquire early in their junior year to allow time for foundation course work. The director of the University of Iowa Honors Program can offer suggestions for contacting a supervising faculty member or committee from one or several appropriate departments. ISP students must submit an honors project approval form to the ISP coordinator and the honors program director.
Courses

145:101 Creative Writing for Business 3 s.h.
Opportunity to broaden understanding of literature, improve writing, and enhance ability to approach business problems in a creative and inspired manner; close reading and creative writing exercises used to develop appreciation of the written word, improve ability to express thoughts and ideas, and become more conscious of the quality of students' own written work. Requirements: rhetoric. Same as 08C:101.

145:107 Creative Writing for the Health Professions 3 s.h.

145:108 Creative Writing for New Media 3 s.h.
Prepares creative writers for evolving marketplace of electronic text, media; experience writing in varied media such as the Internet, e-books, video games, mobile devices, emergent social narratives. Same as 08C:108.

145:109 Introduction to Arts Management 3 s.h.
Nonprofit performing arts management and administrative principles; practical applications, trends in the field; focus on arts organizations and their key administrative positions. Same as 049:109, 188:109.

145:110 Creative Writing for the Ecologically Aware: Stories in the Land 3 s.h.
How humans tether to their environment through stories; students write stories and through writing explore if there is a new tie to sustainable history. Same as 08C:110.

145:111 New Ventures in the Arts 3 s.h.
Arts administration principles and trends as applied to creation of an arts-related enterprise; case studies; students create business plan for a new arts organization. Duplicates 06J:125 and 06T:120. Corequisites: 06T:050, or 06A:001 and 06M:100. Same as 049:111, 06T:125, 188:111.

145:115 Creative Writing and Popular Culture 3 s.h.
Creative writing through the lens of popular culture; topics include television, film writing, adaptations, commercials, advertising, magazines, newspapers, comic books, song lyrics, billboards, and backs of cereal boxes. Same as 08C:115.

145:120 Equity Issues in the Health Sciences 3 s.h.
Examination of equity issues in the health sciences, including a review of the historical challenges that led to Human Subjects Review Boards, FDA oversight of drug development and clinical trials, inclusion of women in research; effect of situational ethics in the workplace; potential danger of making assumptions about clients/patients; importance of developing an inclusive communication style; assessing the effectiveness of family-friendly employment policies in providing equitable opportunities for career advancement for both women and men. Same as 027:120.

145:125 Contemporary Nutrition 3 s.h.
Introduction to nutrition; importance of understanding food choices and diet to fit individual needs. Same as 027:125.

145:127 Nutrition in Health and Performance 3 s.h.
Effects of exercise and nutrition on health- and sports-related fitness; for professionals in health and physical education. Same as 027:127.

145:130 Coaching for Health and Wellness 3 s.h.
Opportunities to expand knowledge and develop skills to help individuals change behavior and meet health-related goals; general health and wellness principles; principles and techniques for change; experience providing health-coaching services to clients. Same as 027:131.
145:145 Seminar: Health in a Changing Society
3 s.h.
Diverse health issues explored from individual and cultural perspectives; uncharted health issues addressed through contemporary health-related readings; racial and ethnic differences in personal health. Same as 027:149.

145:195 Arts Leadership Seminar
3 s.h.

145:198 Independent Study
arr.
Individual study of issues or topics related to a specific interdepartmental focus chosen by the student.

145:199 Interdepartmental Studies Practicum
arr.
Opportunity to relate a student’s chosen area of study to practical application. Requirements: interdepartmental studies student.
International Business

Coordinators
Patricia Mason-Browne (Liberal Arts and Sciences),
Matthew C. Edwards (Tippie College of Business)

Undergraduate nondegree program:
Certificate in International Business
Web site: http://tippie.uiowa.edu/undergraduate/programs/IBC.cfm

Undergraduate Program

• Certificate in International Business

The Tippie College of Business and the College of Liberal Arts and Sciences offer the undergraduate Certificate in International Business. The program is designed for students who intend to pursue careers in international business as well as those interested in gaining a better understanding of the global economy and a broader awareness of the political, historical, and social environment in which international business operates.

Certificate

The Certificate in International Business requires 29 s.h. and satisfaction of the certificate’s language requirement (total credit depends on which language the student decides to study). The program includes study of international business and economics, international relations and institutions, a language, and the contemporary art, literature, culture, and/or politics of the geographical region in which the language is spoken. The range of courses permits students to tailor areas of specialization suited to their individual interests and to complement majors in business and in liberal arts and sciences.

The certificate is open to current University of Iowa undergraduate students. It also is open to individuals who hold a bachelor’s degree from The University of Iowa or another institution and are not enrolled in a graduate or professional program; individuals with bachelor’s degrees from other institutions should contact the University’s Office of Admissions.

Completion of the certificate is noted on students’ transcripts.

Students should declare their intention to earn the certificate as early as possible and talk with an advisor about certificate requirements. They also must submit an individual plan of study. Tippie College of Business students should talk with the advising staff at the college’s Undergraduate Program Office; College of Liberal Arts and Sciences students should talk with a Certificate

in International Business advisor at the Academic Advising Center.

Students must maintain a g.p.a. of at least 2.00 on all certificate course work. Certificate courses may not be taken pass/nonpass. A course may not be used to satisfy more than one certificate requirement.

A minimum of 20 s.h. of certificate course work (other than language courses) must be completed at The University of Iowa or in approved study abroad programs. Students who plan to count study abroad credit toward the certificate should consult a Certificate in International Business advisor before leaving campus. University of Iowa Guided Independent Study (correspondence study) also is accepted toward the certificate.

The Certificate in International Business requires the following course work.

INTERNATIONAL BUSINESS

These courses provide students with an essential understanding of economics, which is central to all business operation. They also help students develop knowledge of the functional areas of international business.

Both of these:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>06E:001 Principles of Microeconomics</td>
<td>4 s.h.</td>
</tr>
<tr>
<td>06E:002 Principles of Macroeconomics</td>
<td>4 s.h.</td>
</tr>
</tbody>
</table>

Three of these (total of 9 s.h.):

<table>
<thead>
<tr>

</table>

INTERNATIONAL RELATIONS AND INSTITUTIONS

These courses familiarize students with comparative politics, social geography, foreign policy, and issues related to world population and the environment—topics relevant to decision making in the international business world.

Two of these (total of 6 s.h.):
016:101 History of Human Rights 3 s.h.
16A:148 Race, Gender, U.S. International History 3 s.h.
16A:152 United States in World Affairs 3 s.h.
16W:138/152:138 History of Global Health 3 s.h.
16W:155 Europe and the U.S. in the Twentieth Century 3 s.h.
019:156 Comparative Communication Systems 3 s.h.
030:041 Introduction to the Politics of Russia and Eurasia 3 s.h.
030:043 Introduction to Politics in the Muslim World 3 s.h.
030:060 Introduction to International Relations 3 s.h.
030:061 Introduction to American Foreign Policy 3 s.h.
030:130 Consequences of War 3 s.h.
030:131 Global Justice 3 s.h.
030:137 Introduction to Political Economy 3 s.h.
030:142 European Integration 3 s.h.
030:149 Problems in Comparative Politics 3 s.h.
030:150 Public Policy Around the World 3 s.h.
030:151 Political Leadership 3 s.h.
030:155 International Courts: The Intersection of Law and Politics 3 s.h.
030:156 Ethnic and Religious Conflict in the Muslim World 3 s.h.
030:160 Women and Politics in Global Perspective 3 s.h.
030:161 International Organization and World Order 3 s.h.
030:162 American Foreign Policies 3 s.h.
030:163 Chinese Foreign Policy 3 s.h.
030:165 International Conflict 3 s.h.
030:166 Global Communication and Politics 3 s.h.
030:167 Politics and the Multinational Enterprise 3 s.h.
030:168 Politics of Terrorism 3 s.h.
030:169 Problems of International Politics 3 s.h.
030:170 The Politics of International Economics 3 s.h.
030:173 State Failure in the Developing World 3 s.h.
030:177 Globalization 3 s.h.
030:178 Causes, Consequences, and Management of Civil War 3 s.h.
030:195 International Law 3 s.h.
030:197 Politics of International Human Rights Law 3 s.h.
034:159 Families in Comparative Perspective 3 s.h.
036:042/042:042/187:042 Intercultural Communication 3 s.h.
044:010 Globalization and Geographic Diversity 3 s.h.
044:011 Population Geography 3 s.h.
044:015 Introduction to Political Geography 3 s.h.
044:030 The Global Economy 3 s.h.
044:035 World Cities 3 s.h.
044:194 Geographic Perspectives on Development 3 s.h.
091:193 Human Rights in the World Community 3 s.h.
091:195 Introduction to Public International Law 3 s.h.
113:010 Anthropology and Contemporary World Problems 3 s.h.
113:104 Cultural Politics 3 s.h.
113:106 The Anthropology of War and Peace 3 s.h.
113:114 Environmentalisms 3 s.h.
113:116 Urban Anthropology 3 s.h.
113:143 Environment and Culture 3 s.h.

World LANGUAGEs
Certificate students develop intermediate-level competence in a language that is spoken in one of six geographic regions. Through world language study, they gain insight into the culture of another region of the world and develop a deeper understanding of their own language and culture.

Students must complete one of the approved language sequences below. For questions about languages not listed or about study abroad course work, see a Certificate in International Business advisor.

**Arabic**

All of these:

195:101 Elementary Modern Standard Arabic I 5 s.h.
195:102 Elementary Modern Standard Arabic II 5 s.h.
195:111 Intermediate Modern Standard Arabic I 5 s.h.
195:112 Intermediate Modern Standard Arabic II 5 s.h.

**Chinese**

All of these:

039:008-039:009 First-Year Chinese: First Semester - First-Year Chinese: Second Semester 10 s.h.

**French**

One of these sequences:

009:001-009:002 Elementary French I-II 10 s.h.
009:010 First-Year French Review 5 s.h.
All of these:

009:011-009:012 Intermediate French I-II 8 s.h.
One course for which 009:012 is prerequisite
(may include Iowa Regents Program credit)

German
One of these:

013:011-013:012 Elementary German I-II (both courses) 8 s.h.
013:014 First-Year German Review 5 s.h.

All of these:

013:021 Intermediate German I 4 s.h.
013:022 Intermediate German II 4 s.h.
One course for which 013:022 is prerequisite

Hindi

039:123 First-Year Hindi: First Semester 5 s.h.
039:124 First-Year Hindi: Second Semester 5 s.h.
039:126 Second-Year Hindi: First Semester 4 s.h.
039:127 Second-Year Hindi: Second Semester 4 s.h.

Italian
One of these:

018:001-018:002 Elementary Italian-II (both courses) 10 s.h.
018:103 Intensive Elementary Italian 6 s.h.

All of these:

018:011-018:012 Intermediate Italian-II 8 s.h.
One course for which 018:012 is prerequisite

Spanish

035:001-035:002 Elementary Spanish I-II (both courses) 10 s.h.
One of these:

035:011-035:012 Intermediate Spanish I-II (both courses) 10 s.h.
035:013 Accelerated Intermediate Spanish 6 s.h.
One course for which 035:012 is prerequisite

Swahili
All of these:

211:125-211:126 Elementary Swahili I-II 6-8 s.h.
211:127-211:128 Intermediate Swahili I-II 6-8 s.h.

AREA STUDIES

These courses help students learn about the culture, contemporary history, art, literature, and politics of the geographic region in which their choice of world languages is spoken. Area studies topics are critical to students’ understanding of how society and culture influence the people with whom they share the world and may conduct business.

Students complete 6 s.h. from one geographic area. They should select an area that is appropriate for the world language they chose to satisfy the certificate’s language requirement.
Asia

Appropriate for these languages: Chinese, Hindi, or Japanese

01H:016/039:016 Asian Art and Culture 3 s.h.
01H:031/039:028 Introduction to the Art of China 3 s.h.
01H:033/39J:033 Introduction to the Art of Japan 3 s.h.
01H:119/039:159 Chinese Art and Culture 3 s.h.
01H:120/039:120 Chinese Painting I 3 s.h.
01H:123/39J:123 Japanese Painting 3 s.h.
008:132 Literature of the Indian Subcontinent 3 s.h.
016:005/039:055 Civilizations of Asia: China 3 s.h.
016:006/039:056 Civilizations of Asia: Japan 3 s.h.
16W:140 Disease, Politics, and Health in South Asia 3 s.h.
16W:153 Topics in the Modern Middle East 3 s.h.
16W:172/39J:172 Japan--Age of the Samurai 3 s.h.
16W:175/39J:175 Japan--U.S. Relations 3 s.h.
16W:183 Vietnam War on Film 3-4 s.h.
16W:194 Imperialism and Modern India 3 s.h.
16W:198/039:196 China Since 1927 3 s.h.
026:145/39J:145 Buddhist Philosophy 3 s.h.
030:143/039:178 Government and Politics of the Far East 3 s.h.
030:148 Government and Politics of China 3 s.h.
030:163 Chinese Foreign Policy 3 s.h.
032:004/039:064 Living Religions of the East 3 s.h.
032:006/039:006 Introduction to Buddhism 3 s.h.
032:010/039:007 Chinese Religions 3 s.h.
032:014 Introduction to Indian Religions 3 s.h.
032:017/39J:017 Japanese Religions 3 s.h.
032:081 Hindu Religion and Art 3 s.h.
032:163/039:162 Turning East 3 s.h.
032:171/039:163 Indian Religious Texts 3 s.h.
032:188/039:170 Zen Buddhism 3 s.h.
039:015 Introduction to Chinese Culture 3 s.h.
039:018 Asian Humanities: India 3 s.h.
039:019 Asian Humanities: China 3 s.h.
039:020 Asian Humanities: Japan 3 s.h.
039:032 Chinese Popular Culture 3 s.h.
039:034 The Languages of Asia in Cultural and Historical Perspective 3 s.h.
039:036 Understanding Korean Culture Wave 3 s.h.
039:057/016:007 Civilizations of Asia: South Asia 3 s.h.
039:122/113:129 Language/Politics of Culture in South Asia 3 s.h.
039:136/032:177 Indian Literature 3 s.h.
039:140/032:186 The Literature of Daoism 3 s.h.
039:141 Chinese Literature: Poetry 3 s.h.
039:142 Chinese Literature: Prose 3 s.h.
039:158/048:158 East-West Literary Relations 3 s.h.
039:180 Modern Chinese Writers 3 s.h.
039:192/048:192 East Meets West: A Cross-Cultural Course 3 s.h.
039:199 Asian Studies arr. s.h.
39J:103 Language in Japanese Society 3 s.h.
39J:141/048:143 Traditional Japanese Literature in Translation 3 s.h.
39J:142/048:142 Modern Japanese Fiction in Translation 3 s.h.
39J:144 Major Authors in Modern Japanese Literature 3 s.h.
39J:155 Contemporary Japanese Culture 3 s.h.
048:106/039:145 Topics in Asian Cinema 3 s.h.
113:107/131:107 Gendering India 4 s.h.
113:120 Popular Culture in South Asia 3 s.h.

Europe

Appropriate for these languages: French, German, Italian, Portuguese, or Spanish

01H:157/009:130 Paris and the Art of Urban Life 3 s.h.
008:065 Twentieth-Century British Literature 3 s.h.
008:066 Twenty-first-Century British Literature 3 s.h.
008:110 Literature and Culture of 20th- and 21st-Century Britain 3 s.h.
009:030 Cultural Misunderstandings: France and U.S.A. 3 s.h.
009:114 French Civilization 3 s.h.
009:120 French-Speaking Cultures 3 s.h.
009:147/048:105 French Cinema 3 s.h.
009:148 Gender and Sexuality in French Cinema 3 s.h.
009:157 Twentieth-Century Europe in Literature and Film 3 s.h.
009:168/048:168 Post-Colonial Literature in France 3 s.h.
013:101 Introduction to German Literature 3 s.h.
013:105 German Cultural History 3 s.h.
013:108 The German Media 3 s.h.
013:115 Contemporary German Civilization 3 s.h.
13E:075 Scandinavian Crime Fiction 3 s.h.

International Studies

Director
Helena Dettmer (Classics)

Degree: B.A. in International Studies
Undergraduate nondegree program: Minor in International Studies
Web site: http://international.uiowa.edu/international-studies/students/ba/default.asp

International studies is not simply the study of diplomacy and relations among states. The International Studies Program requires all students to integrate theoretical knowledge about broad global processes, and the methods used to study them, with in-depth examination of a particular region of the world or a major theme in international studies. It affords students the opportunity to integrate the study of history, politics, economics, expressive arts, culture, beliefs, and social systems.

Undergraduate Programs

- Major in international studies (Bachelor of Arts)
- Minor in international studies

The international studies major is interdisciplinary. It is designed to help students learn to appreciate world cultures, focus on themes of global significance, and master varied disciplinary approaches used to study international issues. The program complements a wide range of academic degree programs, so it is an appropriate choice for many students who plan to pursue a double major.

The major prepares students for careers in business, government, international development agencies, nongovernmental organizations, philanthropic agencies, and the arts. It also is excellent preparation for graduate training in the social sciences, the arts, law, business, journalism, international affairs, and area studies.

Bachelor of Arts

The Bachelor of Arts with a major in international studies requires a minimum of 120 s.h., including 39 s.h. of work for the major. The program is flexible, drawing on courses across the humanities and social sciences. Students work closely with an academic advisor to plan their program of study, and they work with a faculty mentor on their required senior research project.

Students must complete the College of Liberal Arts and Sciences General Education Program (p. 381).

Students majoring in international studies must earn at least 12 s.h. of the required 39 s.h. in upper-level course work (courses numbered 100 and above). An orientation course (1 s.h.) prepares students to fully engage in their interdisciplinary program of study, and a foundation course (3 s.h.) and two core courses (6 s.h.) introduce them to the major issues in international studies and the varied methods used to examine them.

Proficiency in world languages is vital for individuals who participate in diverse societies and cultures, so students majoring in international studies are required to complete language study beyond the General Education Program (p. 381) World Languages requirement.

Students select a geographic or thematic emphasis area (12 s.h.) or develop one in consultation with their academic advisor. Each student must complete a senior research project (3 s.h.) related to his or her emphasis area, preparing for the project during the previous semester with a required research course (2 s.h.).

International studies electives (6 s.h.) outside the student’s emphasis area provide comparative perspectives.

Transfer course work equivalent to University of Iowa course work may be accepted toward the major, but at least 15 s.h. of course work for the major must be earned at The University of Iowa.

The program encourages study abroad. See “Study Abroad” below.

The international studies major requires the following work.

DISTRIBUTION REQUIREMENTS

International studies students must undertake course work in at least four different departments and/or programs. They must complete at least 12 s.h. of upper-level course work: 6 s.h. in the emphasis area, 3 s.h. in the elective area, and 3 s.h. in the emphasis, elective, world language, foundation, or core area.

Students may apply up to 12 s.h. of course work from each additional major, minor, or certificate program with a limit of 12 s.h. from any one department to the international studies major.

Students completing a certificate in Global Health Studies, Human Rights, International Business, Latin American Studies, or a minor in global health studies or Latin American studies may not choose the corresponding area of emphasis for the international studies major.

ORIENTATION COURSE

Within the first year after declaring a major in international studies, students must complete an orientation course, which introduces them to the
interdisciplinary major and familiarizes them with international opportunities in their course of study.

187:010 Orientation to International Studies 1 s.h.

**FOUNDATION COURSE**

Each student chooses at least 3 s.h. from the following course list, ordinarily early in the major. Foundation courses provide an overview of global issues and introduce a disciplinary approach to global topics, laying the groundwork for continuing study.

**GEOGRAPHIC OR THEMATIC EMPHASIS AREA**

Each student chooses one of the geographic emphasis or thematic emphasis areas listed below. The emphasis area is noted on the student’s transcript. Students must complete at least four courses in the emphasis area, for a total of 12 s.h.; at least 6 of the 12 s.h. must be earned in upper-level course work (numbered 100 and above).

Courses approved in each emphasis area are listed below. Students may petition the international studies program for permission to include a course not on a list of approved emphasis area courses; they must petition the program by the semester’s specified deadline date.

Geographic emphasis areas include Caribbean studies; African studies; East Asian studies; European studies; Latin American studies; Russian, East European, and Eurasian studies; Middle East and Muslim world studies; and South Asian studies.

Thematic emphasis areas include development; global artistic tradition and change; global resources and the environment; global health; human rights; international business; international communication and information; international politics and international relations; postcolonial and diasporic studies; and war, peace, and security.

Other thematic emphasis areas for which sufficient courses exist may be developed by a student with the approval of the International Studies Program.

**INTERNATIONAL STUDIES ELECTIVES**

Students must complete 6 s.h. of international studies elective course work. Electives must
be chosen from courses approved for the international studies major, excluding any courses approved in the student's chosen emphasis area. At least 3 s.h. must be earned in upper-level course work (numbered 100 and above).

**LANGUAGE REQUIREMENT**

All students must complete a minimum of two semesters of advanced language study beyond the minimum for satisfaction of the General Education Program (p. 381) World Languages requirement. This advanced language requirement may be met either by completing two semesters of upper-level study in the same world language used to complete the General Education Program or by completing two semesters, or the equivalent, of a second world language at any level.

In fulfilling the language requirement, most students are eligible to receive an additional 4 s.h. of ungraded credit under the Foreign Language Incentive Program (FLIP). This credit may be applied to the minimum 120 s.h. required for graduation, but it does not count toward requirements for the international studies major.

**RESEARCH AND PROJECT PREPARATION**

All students prepare for the required senior project by completing 187:095 Research and Final Project Preparation (2 s.h.), in which they learn research methodologies and prepare a detailed project proposal.

**INTERNATIONAL STUDIES SENIOR PROJECT**

All students enroll in 187:199 International Studies Senior Project during their last year of study. They engage in a semester-long research project that culminates in a substantial written or creative work focusing on a topic in their geographic or thematic emphasis area. The course is completed under the supervision of a faculty mentor.

**Study Abroad**

Students are strongly encouraged to incorporate an approved study abroad experience into their international studies major. Credit earned while studying abroad may be applied toward the requirements for the major, as appropriate. International studies majors who study abroad in an approved program may apply for financial aid and scholarships; for scholarship requirements, deadlines, and application materials, see Study Abroad Guidelines and Scholarships on the International Studies web site.

It is important to plan ahead for study abroad. Once students choose their geographic or thematic emphasis, they should visit the Office for Study Abroad for help in selecting an appropriate study abroad program.

**Four-Year Graduation Plan**

The following checkpoints list the minimum requirements students must complete in order to stay on the University's Four-Year Graduation Plan.

Note: Students who intend to study abroad in their junior year should schedule an appointment during their fourth semester to meet with an advisor from the Office for Study Abroad. Those who intend to study abroad in their senior year should schedule an appointment during their sixth semester to meet with an advisor from the Office for Study Abroad.

**Before the third semester begins**: at least one-quarter of the semester hours required for graduation

**Before the fifth semester begins**: at least three courses in the major (7 s.h., a foundation course, one core course, and the orientation course) and at least one-half of the semester hours required for graduation

**Before the seventh semester begins**: at least seven courses in the major and at least three-quarters of the semester hours required for graduation

**Before the eighth semester begins**: at least 11 courses in the major, including the required research preparation course

**During the eighth semester**: enrollment in all remaining course work in the major (three courses), all remaining General Education courses, and a sufficient number of semester hours to graduate

**Honors**

Outstanding students may work toward graduation with honors in international studies. Honors students must maintain a cumulative University of Iowa g.p.a. of at least 3.33 and a g.p.a. of at least 3.33 in all course work for the major and all course work that may be applied to the major. To graduate with honors, students are required to complete a minimum of 42 s.h. for the major, including three courses (9 s.h.) in a second emphasis area (this takes the place of the 6 s.h. international studies elective requirement). Honors students complete 187:198 Honors Thesis in International Studies and present their research in a poster session instead of enrolling in 187:199 International Studies Senior Project.

Honors students must complete at least 15 s.h. in upper-level course work (numbered 100 and above). At least 6 s.h. of the 42 s.h. required
for the honors major must be earned in courses designated as honors courses. Students may enroll in honors courses offered by individual departments, and they may designate any course approved for their international studies major as an honors course, with the course instructor's approval.

Contact the University of Iowa Honors Program for more information about honors study at Iowa.

**Minor**

The minor in international studies requires a minimum of 15 s.h. in courses approved for the international studies major, including 12 s.h. in upper-level courses (courses numbered 100 and above) and 3 s.h. chosen from courses approved for the international studies core or foundation requirements; of the 15 s.h. required for the minor, 12 s.h. must be taken at The University of Iowa. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass. To preserve the interdisciplinary nature of the international studies minor, students may count a maximum of 6 s.h. from a single department or program or from another major, minor, or certificate toward the minor.

**Courses**

**187:003 Issues in International Studies**  
1 s.h.  
Modules focusing on varied topics, taught by international studies faculty members.

**187:004 Issues in International Studies**  
1 s.h.  
Modules focusing on varied topics, taught by international studies faculty members.

**187:005 Making of the Modern Global System**  
3 s.h.  
Formation of the modern global system; capitalism, science and technology, representative government and nationalism, colonialism and decolonization; rise of these institutions in the West, response and adaptation by a nonwestern society.

**187:006 Developed and Developing Places**  
3 s.h.  
Geography and the world distribution of key cultural factors--population, religion, and per capita income; economic and demographic differences between developed and developing countries.

**187:007 The European Union**  
3 s.h.  
Brief history and rationale for the European Union; environmental, economic, social, and political aspects of this potential superpower.

**187:010 Orientation to International Studies**  
1 s.h.  
Introduction to concept of international competency; academic options in the international studies major, use of required e-folio, intentional planning model for approach to interdisciplinary study. Requirements: international studies major.

**187:012 Germany and the Amanas**  
1 s.h.  
Contemporary issues of Germany, patterns of immigration to Amana, Iowa.

**187:013 Poland and the Czech Republic**  
1 s.h.  
Contemporary issues of Poland, the Czech Republic, and Slovakia; immigration paths to the United States, and Iowa settlements.

**187:014 The Netherlands and Pella**  
1 s.h.  
History and culture of the Netherlands; immigration pattern of the Dutch who came to Pella, Iowa.

**187:020 Introduction to International Studies**  
3 s.h.  
Introduction to the interdisciplinary field of international studies.
187:042 Intercultural Communication 3 s.h.
Culture defined as a system of taken-for-granted assumptions about the world that influence how people think and act; cultural differences that produce challenges and opportunities for understanding and communication; those differences from several theoretical perspectives; opportunities to examine culture and cultural differences in practical, experience-driven ways. Communication studies majors may apply this course to the following area requirement. AREA: Context. Prerequisites: 036:001, 036:005, 036:012 or 036:070, 036:017 or 036:030, and 036:074. Requirements: g.p.a. of at least 2.50 and completion of Foundations of Communication requirement. Same as 036:042, 042:042.

187:050 Introduction: East European and Central Asian Cultures 3 s.h.
Introduction to study of major East European, Russian, and Eurasian cultures. Same as 048:050.

187:070 Introduction to Latin American Studies 3 s.h.
Cultures of Latin American countries with emphasis on cultural history and cultural production; interdisciplinary survey. Same as 035:070, 038:070, 130:070.

187:080 Introduction to Human Rights 3 s.h.
Analysis and evaluation of the international human rights program; relationship between human rights and international law. Same as 216:080.

187:095 Research and Final Project Preparation 2 s.h.
Preparation for senior project, development of course proposal. Requirements: junior or higher standing.

187:096 Focused Academic Research for International Studies Majors 1 s.h.

Research on a topic of international significance.

187:130 Elementary Turkish I 4 s.h.
Turkish language for those with no prior study of the language; emphasis on functional communication skills (listening, speaking, reading, writing). Same as 164:130.

187:131 Elementary Turkish II 4 s.h.
Continuation of 164:130; emphasis on functional communication skills (listening, speaking, reading, writing). Prerequisites: 164:130. Same as 164:131.

187:135 Conversational Turkish 1 s.h.
Open conversation in Turkish language; active participation. Prerequisites: 164:130 and 164:131. Same as 164:135.

187:140 International Studies Internship 1-3 s.h.
Professional work experience in internationally-focused positions; faculty supervised. Requirements: junior or senior standing in international studies.

187:155 Introduction to Africa for Health Sciences 3 s.h.
Cultural, historical, and political framework for the delivery of health care services in African nations. Recommendations: junior or higher standing.

187:159 African Literature Today 3 s.h.
Contemporary written and oral African literary texts, literary theories relevant to study of African literatures. Same as 008:159, 048:159.

187:165 Cities of the Global South 3 s.h.
Twenty-first-century cities of the global south; interdisciplinary approach.
187:175 Child Labor and International Human Rights
Complexity of child labor in global, regional, national, and local contexts; international human rights system, current programs and strategies for reducing or eliminating abusive child labor. Same as 216:175.

187:176 Topics in Human Rights
Examination of emerging human rights issues from an interdisciplinary and international perspective. Same as 216:176.

187:180 Human Rights Advocacy
Theoretical foundations and critical issues for international human rights advocacy and international humanitarian movements; honors proseminar. Requirements: junior or higher standing. Same as 216:180.

187:185 Topics in REEES
Varied topics; interdisciplinary focus on Russian, East European, and Eurasian studies. Same as 048:184.

187:198 Honors Thesis in International Studies
Prerequisites: 187:095.

187:199 International Studies Senior Project
Prerequisites: 187:095.
Journalism and Mass Communication

Director

Undergraduate degrees: B.A., B.S. in Journalism and Mass Communication
Undergraduate nondegree program: Minor in Mass Communication
Graduate degrees: M.A. in Journalism; Ph.D. in Mass Communications
Web site: http://www.uiowa.edu/jmc

Undergraduate Programs

- Major in journalism and mass communication (Bachelor of Arts, Bachelor of Science)
- Minor in mass communication

Media writing and visual storytelling form the core of the undergraduate major in journalism and mass communication. Students are required to take both professional and conceptual courses offered by the school; they develop professional skills while studying the historical, legal, cultural, and institutional roles of media in society. They also complete extensive academic work outside the school, consistent with the University’s commitment to the liberal arts and sciences.

The major prepares students for careers in the field. Graduates find employment in a variety of areas, such as public relations, advertising, marketing, political communication, health communication, philanthropy and fundraising communication, newspapers, magazines, radio, television, online communications and social media, publication design, photojournalism, and media research.

The school is accredited by the Accrediting Council on Education in Journalism and Mass Communications.

Selective Admission

To preserve the quality of its undergraduate program, the School of Journalism and Mass Communication (JMC) has a selective admission policy. Undergraduate students with a declared interest in journalism and mass communication are admitted to the major in one of two ways.

First-year students who enter the University with honors standing in the College of Liberal Arts and Sciences or as Presidential Scholars, Old Gold Scholars, or Daily Iowan Scholars are guaranteed admission to the major as long as they have satisfied the necessary prerequisites.

Students who do not enter the University as honors students, Presidential Scholars, Old Gold Scholars, or Daily Iowan Scholars are classified as having a "journalism and mass communication interest" and must apply for admission to the major. They typically apply during the semester in which they will complete 019:090 Media Uses and Effects and 019:091 Media History and Culture; the General Education Program’s Rhetoric requirement; and a total of at least 45 s.h. of course work (or 30 s.h. for students who are admitted to the University of Iowa Honors Program after they enter the University).

The primary criterion for admission to the major is overall academic performance. A statement of interest, demonstrated writing ability, prior journalistic experience, participation in journalism student organizations, and performance in JMC courses also are considered for applicants with a demonstrated focus on journalism as a career. The number of students accepted each semester depends on the number of students already in the program and available resources. The school reviews applications with the goal of admitting the most qualified students.

For applications and deadline information, contact the School of Journalism and Mass Communication.

Transfer Students

Transfer students who wish to major in journalism are classified as having a “journalism and mass communication interest.” They may apply to the major during the semester in which they will complete at least 45 s.h. of course work at The University of Iowa and other institutions, including the General Education Program’s Rhetoric requirement and the foundation courses
019:090 Media Uses and Effects and 019:091 Media History and Culture. Courses taken at other institutions may not be substituted for 019:090 or 019:091.

The school may accept up to 7 s.h. of transfer credit in journalism toward the major in journalism and mass communication, or up to 3 s.h. toward the minor in mass communication; transfer courses must have been completed at a school accredited by the Association for Education in Journalism and Mass Communication. Course work taken at another school sometimes may be used to satisfy the second major or concentration area requirements. Transfer credit intended to meet School of Journalism and Mass Communication requirements must be approved by the head of undergraduate studies.

Bachelor of Arts, Bachelor of Science

The Bachelor of Arts and the Bachelor of Science with a major in journalism and mass communication require a minimum of 120 s.h., including 34-40 s.h. in journalism and mass communication courses, plus a second major or 24 s.h. in a second concentration area. Students must maintain a g.p.a. of at least 2.00 in the major.

Each student works with an assigned faculty advisor or an educational advisor to develop a study plan that meets the requirements of the major. Students must earn 65 s.h. of credit in College of Liberal Arts and Sciences courses outside the School of Journalism and Mass Communication. A maximum of 40 s.h. earned in JMC courses (prefix 019) may be counted toward a Bachelor of Arts or Bachelor of Science degree.

All students must complete the College of Liberal Arts and Sciences General Education Program (p. 381).

Students are encouraged, but not required, to use the University’sfolio system to collect and edit their preprofessional work. They will find the portfolio useful as they interact with faculty members in preparation for entering the job market and for presentation in job interviews.

The journalism major (Bachelor of Arts or Bachelor of Science) requires the following course work.

Pre-Major Foundation

Both of these:

019:090 Media Uses and Effects 3 s.h.
019:091 Media History and Culture 3 s.h.

JOURNALISM PROFESSIONAL SKILLS COURSES

Both of these:

019:088 Introduction to Multimedia Storytelling 3 s.h.
019:098 Journalistic Reporting and Writing 3 s.h.

Intermediate/advanced reporting and writing—two of these:

019:120 Specialized Reporting and Writing 4 s.h.
019:121 Depth Reporting and Writing 4 s.h.
019:122 Magazine Reporting and Writing 4 s.h.
019:123 Radio and Television Storytelling 4 s.h.
019:124 Strategic Communication Writing 4 s.h.
019:125 Freelance Reporting and Writing 4 s.h.
019:126 Arts and Culture Reporting and Writing 4 s.h.
019:127 Narrative Journalism 4 s.h.
019:128 Writing Across Cultures 4 s.h.
019:129 Feature Reporting and Writing 4 s.h.
019:171 Advanced Reporting and Writing 4 s.h.

Workshop—one of these:

019:130 Topics in Media Production 4 s.h.
019:131 Graphic Design 4 s.h.
019:132 Photo Storytelling: Making Powerful Images 4 s.h.
019:134 TV News Production 4 s.h.
019:135 Strategic Communication Campaigns 4 s.h.
019:136 Editing the News 4 s.h.
019:137 Planning and Evaluation of Strategic Campaigns 4 s.h.
019:138 Applied Digital and Social Media 4 s.h.
019:172 Advanced Photo Storytelling 4 s.h.
019:173 Advanced Media Workshop 4 s.h.
019:174 Advanced Television News 4 s.h.
019:175 Advanced Public Relations Writing 4 s.h.
019:176 Visual Storytelling 4 s.h.
019:177 Convergence Journalism 4 s.h.
019:178 Iowa Journalist 4 s.h.

And:

A third reporting and writing course or a second workshop chosen from courses not taken in the lists above 4 s.h.
Conceptual Courses

Students complete two conceptual courses.

019:140 Media Law and Communication 3 s.h.

One of these:

019:141 Classic and Contemporary Sports Writing 3 s.h.
019:150 Visual Communication 3 s.h.
019:151 Solving Communication Problems 3 s.h.
019:152 History of Mass Communication in the U.S. 3 s.h.
019:156 Comparative Communication Systems 3 s.h.
019:158 News-Editorial Problems 3 s.h.
019:159 On the Campaign Trail: Elections and the Media 3 s.h.
019:160 Media and Health 3 s.h.
019:161 Law, Media, and Current Issues 3 s.h.
019:164 Images and Society 3 s.h.
019:165 African Americans and the Media 3 s.h.
019:166 Communication Technology and Society 3 s.h.
019:167 Gender and Mass Media 3 s.h.
019:168 Journalism Ethics 3 s.h.
019:169 Introductory Topics in Mass Communication 3 s.h.

Optional Journalism Electives

Students may earn up to 6 s.h. in additional journalism and mass communication course work (prefix 019), but they may not count more than 40 s.h. of credit in the discipline toward graduation.

Second Major or Concentration Area

Every student majoring in journalism and mass communication must complete a second major or a concentration area outside the School of Journalism and Mass Communication. Study in the second major or concentration area enables students to acquire a substantial body of knowledge or expertise in a relevant area, learn how another discipline views the world, and/or develop a companion set of skills to those in journalism and mass communication.

Students who satisfy the requirement by completing a concentration area must choose 24 s.h. of related course work in one or more departments; at least 15 of the 24 s.h. must be earned in advanced courses (in most departments, advanced courses are numbered 100 or above). Course work in the concentration area must be arranged in consultation with the student’s advisor; each student must have the advisor’s written endorsement of the second major or concentration area before graduation.

Second Major or Concentration Area for the B.A.

Bachelor of Arts students must complete the requirements for the journalism and mass communication major (34-40 s.h.) and must satisfy the school’s second major or concentration area requirement in one of two ways.

Option 1: complete a B.A. major in another department.

Option 2: complete a 24 s.h. concentration of related courses in one or more departments that offer B.A. degrees; at least 15 s.h. of the required 24 s.h. must be earned in advanced courses.

Second Major or Concentration Area for the B.S.

Bachelor of Science students must complete the requirements for the journalism and mass communication major (34-40 s.h.) and must satisfy the school’s second major or concentration area requirement in one of two ways.

Option 1: complete a B.S. major in a natural, mathematical, or social science.

Option 2: complete a 24 s.h. concentration of related courses in the social sciences (economics, geography, political science, psychology, or sociology) and/or the natural and mathematical sciences, earning at least 15 s.h. of the required 24 s.h. in advanced courses; and complete all the special math, research methods, statistics, computer science, and/or cognate science requirements required for the B.S. in the department in which the majority of concentration area courses are taken.

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan.

Note: Students must be admitted to the journalism and mass communication major by the first semester of their sophomore year in order to be eligible for the Four-Year Graduation Plan. The checkpoints below include the required work in journalism and mass communication plus a second concentration area, but they do not include the requirements of a second major, since the Four-Year Graduation Plan does not apply to second majors.

Before the third semester begins: either 019:090 Media Uses and Effects or 019:091 Media History and Culture or both, and at least
one-quarter of the semester hours required for graduation

**Before the fifth semester begins:** 019:098 Journalistic Reporting and Writing and 019:088 Introduction to Multimedia Storytelling, an additional course in the major, at least one second-area course, and at least one-half of the semester hours required for graduation

**Before the seventh semester begins:** two required professional skills courses; one advanced, conceptual, or elective course in the major; three additional second-area courses; and at least three-quarters of the semester hours required for graduation

**Before the eighth semester begins:** two additional required professional skills courses; one advanced, conceptual, or elective course in the major; and two more second-area courses

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General Education courses, all remaining courses in the second area, and a sufficient number of semester hours to graduate

**Honors**

Outstanding students in journalism and mass communication may work toward graduation with honors in the major. They must be members of the University of Iowa Honors Program, which requires that students maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University of Iowa Honors Program for more information). They also must have a g.p.a. of at least 3.50 in work for the major.

To graduate with honors, students work under the guidance of faculty members as they complete 019:191 Honors Project, earning 3 s.h. of credit. The project may be a thesis or a professional project and typically is completed during the last semester of the senior year. Students are encouraged but not required to take 019:190 Honors Readings (1-3 s.h.) to prepare for the project.

All majors with an overall g.p.a. of at least 3.33 are encouraged to take any journalism and mass communication course for honors credit and to make use of other honors opportunities in the school. Visit the Journalism Honors Program on the school’s web site or contact the school’s honors advisor for details.

**Minor**

The minor in mass communication requires a minimum of 15 s.h. in mass communication courses, including 12 s.h. in advanced courses.

Students must maintain a g.p.a. of at least 2.00 in the minor. Courses for the minor may not be taken pass/nonpass. Conceptual courses numbered 019:140 Media Law and Communication through 019:169 Introductory Topics in Mass Communication are considered advanced for the minor. Students are encouraged to take one of the following: 019:090 Media Uses and Effects (3 s.h.), 019:091 Media History and Culture (3 s.h.), or 019:095 Media and Consumers (3 s.h.).

The minor introduces students to the field of mass communication; it does not prepare them for careers in media.

**National Honor Society**

The school’s chapter of Kappa Tau Alpha, the national society honoring scholarship in journalism and mass communication, was founded in 1936 and is named for former director Leslie G. Moeller. Students are considered for membership if their grade-point average places them in the top 10 percent of their class and they have completed at least five semesters of University work, including a minimum of 9 s.h. in journalism and mass communication skills courses. Contact the school’s Kappa Tau Alpha advisor for details.

**Certificate in Fundraising and Philanthropy Communication**

The School of Journalism and Mass Communication administers the undergraduate certificate program in fundraising and philanthropy communication; see Fundraising and Philanthropy Communication (p. 367) in the Catalog.

**Graduate Programs**

- Master of Arts in journalism
- Doctor of Philosophy in mass communications

The Master of Arts program is offered with two emphases: professional journalism and mass communication.

**Master of Arts**

The Master of Arts program in journalism with professional journalism emphasis requires 33-36 s.h. of graduate credit, including successful completion of a master’s project. The Master of Arts program in journalism with mass communication emphasis requires 32 s.h. of graduate credit, including completion of a thesis. Each emphasis is described below. For more detailed descriptions, see the Graduate Studies
The M.A. program admits students for fall entry.

**M.A. with Professional Journalism Emphasis**

The Master of Arts with professional journalism emphasis is designed for students who have an academic or professional background in media communication and who wish to enhance their careers through specialized study in a specific area. It is a terminal degree, not preparation for doctoral study. Exceptional applicants without the required background may be accepted if they complete one noncredit preparatory course.

In consultation with an academic advisor, each student creates an individual program of courses chosen from inside and outside the school. Examples of areas inside the school are narrative writing, investigative reporting, publication design, and broadcast news. Some areas outside the school are the arts, law, political science, business, medicine, science, the environment, book arts, and race, gender, and sexuality studies.

Students who have a journalism background might develop a focus in an outside area for some of their electives. Those new to journalism and media communication may wish to focus their study on areas inside the school.

Building on conceptual and advanced skills courses, students complete the program with a master’s project in a professional area, such as an in-depth reporting series; a design, multimedia, video, or documentary photography project; or applied research in mass communication.

All courses are chosen in consultation with the student’s academic advisor.

The Master of Arts with professional journalism emphasis requires the following course work.

- **019:225 Contemporary Problems in Journalism** 3 s.h.
- **019:226 Master’s Advanced Reporting and Writing** 3 s.h.
- One conceptual course chosen from 019:140 through 019:169, 019:250, or above 12 s.h.
- Three advanced writing or workshop courses from the 019:120, 019:130, 019:170, or 019:220 series 9-12 s.h.
- **019:299 Masters Research (professional project)** 3 s.h.

Students who have not taken a recent U.S. media law class must enroll in 019:140 Media Law and Communication or an alternative media law course, with the instructor’s consent and the advisor’s approval.

**M.A. with Media Communication Emphasis**

The Master of Arts with media communication emphasis offers specialization in mass communication phenomena and emphasizes communication research, theory, and methodology. It prepares students for doctoral studies.

Students in the media communication emphasis take foundation courses in common with beginning Ph.D. students. Because of the program’s interdisciplinary nature, students are expected to take courses outside the school, as determined in consultation with their advisors. The course work should provide students with sufficient theoretical and methodological preparation to complete the thesis.

The Master of Arts with media communication emphasis requires the following course work.

- **019:220 Masters Seminar (taken twice)** 2 s.h.
- **019:231 Media Communication Theory I** 3 s.h.
- **019:232 Media Communication Theory II** 3 s.h.
- **019:235 Media Communication Research Methods I** 3 s.h.
- **019:236 Media Communication Research Methods II** 3 s.h.
- Advanced methods courses 3 s.h.
- Electives (at least 6 s.h. in journalism and mass communication courses) 12 s.h.
- **019:299 Masters Research** 3 s.h.

**Doctor of Philosophy**

The Doctor of Philosophy program in mass communications requires 80 s.h. of graduate credit. It is designed for students who have completed an M.A. thesis.

The program emphasizes interdisciplinary inquiry into media communication phenomena from cultural, historical, and social perspectives. It is defined by the scholarly interests of its faculty, which include historical, legal, critical, cultural, social, feminist, and international aspects of media communication, both verbal and visual; comparative communication; convergence; new media; health communication; popular culture; and globalization. Faculty members use qualitative or quantitative methods in their research and teaching.

The program is highly individualized. In consultation with his or her advisor, each student draws on courses offered by the School of Journalism and Mass Communication as well as
other academic units to develop a course of study that reflects his or her academic background, experience, professional goals, and intellectual interests.

Students may count up to 30 s.h. of master’s degree credit toward the 80 s.h. required for the Ph.D., with the graduate committee’s approval, as long as the credit was earned in courses relevant to the Ph.D. study plan. The Graduate College does not accept transfer credit for professional skills courses. Students who have earned professional master’s degrees must take additional Ph.D. course work.

The Ph.D. program admits students for fall entry.

The Doctor of Philosophy in mass communications requires the following course work.

For a more detailed description of the Ph.D. program, see the Graduate Studies Handbook or contact the School of Journalism and Mass Communication.

**Joint J.D./M.A. and J.D./Ph.D.**

The School of Journalism and Mass Communication and the College of Law offer a joint Juris Doctor/Master of Arts and a joint Juris Doctor/Doctor of Philosophy. The joint degree programs allow students to count a limited amount of credit toward both degrees. Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the joint degree program. Admission for journalism and mass communication graduate programs is for fall entry.

For information about the J.D., see the College of Law (p. 1215) section of the Catalog.

**Admission**

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

**Facilities and Resources**

**Adler Journalism and Mass Communication Building**

The School of Journalism and Mass Communication moved into the Philip D. Adler Journalism and Mass Communication Building in January 2005. The 65,000-square-foot building has computer laboratories for audio, video, design, writing and web publishing, and a resource center. A photography laboratory is located nearby. The building also is home to offices of the Iowa High School Press Association; the Quill and Scroll Society, an international honor society for high school journalists; the University’s award-winning student newspaper, The Daily Iowan; and Daily Iowan TV, a student-run newscast.

**Iowa Center for Communication Study**

The Iowa Center for Communication Study encourages and facilitates student and faculty research in communication. It also sponsors publications and provides editorial oversight for the Journal of Communication Inquiry.

**Financial Support**

More than $130,000 in scholarships and awards is disbursed to journalism and mass communication students each year. Scholarship information and applications are available each fall. Visit Journalism & Mass Communication Scholarships or contact the School of Journalism and Mass Communication.

The school offers research and teaching assistantships for graduate students; preference is given to Ph.D. students. Journalism and mass communication students have been successful in winning competitive fellowships open to all graduate students; applicants must be nominated by the graduate committee.

The school has a program of modest financial support for undergraduate and graduate student research projects.
Professional Enrichment

Internships

The school encourages undergraduate majors and Master of Science professional journalism emphasis students to complete at least one internship. The school's internship and assessment coordinator helps students find appropriate positions.

Undergraduate students may earn up to 3 s.h. of internship credit, registering with appropriate faculty sponsorship for 019:099 Journalism Internship (1-3 s.h.). Internships do not fulfill requirements for the major, but internship credit counts toward the maximum 40 s.h. of journalism and mass communication credit that may be applied toward the bachelor's degree. Students may take internships for no credit through 409:019 Internship in Journalism.

Students also are encouraged to pursue opportunities for journalism experience on campus through student-operated media, including The Daily Iowan, Daily Iowan TV, and KRUI-FM radio.

Job Placement

The school's internship and assessment coordinator helps students seeking career guidance and employment opportunities. The school compiles and publicizes notices of professional jobs open to JMC students and graduates. It also cooperates with the University’s Pomerantz Career Center in providing career guidance and placement services as well as workshops and programs on seeking jobs.

Activities

The school engages in a variety of activities for the enrichment of students, faculty, and the entire campus. Speakers visit campus each year under lectureships funded by the John F. Murray and Leslie G. Moeller Fund. In addition, guest speakers are funded through the Hearst Visiting Professionals Program and the Hageboeck Daily Iowan Visiting Professionals Program. Campus organizations for students include Kappa Tau Alpha (KTA, a national society honoring scholarship in journalism), the National Association of Black Journalists (NABJ), the Public Relations Student Society of America (PRSSA), the Society of Professional Journalists (SPJ), the Radio and Television News Directors’ Association (RTNDA), and Ed on Campus (EOC).

Courses

Primarily for Undergraduates

019:029 First-Year Seminar

1-2 s.h.

Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.

019:050 Social Media Today

3 s.h.

Prehistory of social media and identification of ideas, events, and elements in ancient and historical times; earliest days of online posting and interacting; first instances of social engagement on the Web; how social media (journalism, politics, health care, romance and lifestyle, entertainment, war and terrorism, professions and jobs) affects individual areas of life, culture, and society; what's next and how social media changes lives in the future and affects the fate of humanity.

019:088 Introduction to Multimedia Storytelling

3 s.h.

019:090 Media Uses and Effects

3 s.h.

Introduction to mass communication theory as it relates to practical applications in the media industry and American society. GE: Social Sciences.

019:091 Media History and Culture

3 s.h.

Historical development of journalism in the United States; cultural, historical content. GE: Historical Perspectives.

019:095 Media and Consumers

3 s.h.

Communications media in historical, political, economic contexts and their relationships with audiences; criteria for evaluating media content in relation to nature and consequences of news, entertainment, advertising. GE: Social Sciences.
019:096 Communication and Public Relations  
Theory and practice of public relations; cultural, social, organizational roles of public relations, opportunities, problems, and solutions. Requirements: journalism major.

019:098 Journalistic Reporting and Writing  

019:099 Journalism Internship  
Faculty-supervised professional work experience in journalism and mass communication. Prerequisites: 019:098. Requirements: journalism major.

019:101 Methods: Secondary School Journalism  
Methods and materials for teaching high school journalism; publication policies, staff organization, production schedules, technology, the Internet, and techniques for advising student publications; experience in simulated teaching situations. Offered fall semesters. Same as 07S:113.

019:102 Workshop for Secondary School Journalism/Communication Teachers  
Workshops on journalism/mass media curriculum, audio/video production, photojournalism, publication design, journalistic writing techniques, advising student publications. Same as 07S:130.

019:120 Specialized Reporting and Writing  
Topics may include public affairs, law, science, business, medicine, intercultural affairs, education, computer-assisted reporting. Prerequisites: 019:098. Requirements: journalism major.

019:121 Depth Reporting and Writing  
Enterprise reporting; emphasis on reporter as researcher, organizer, writer of complex stories in a variety of contexts. Prerequisites: 019:098. Requirements: journalism major.

019:122 Magazine Reporting and Writing  
Finding ideas, researching, interviewing; problems of organization and style; identification of audiences and markets; development of writing skills. Prerequisites: 019:098. Requirements: journalism major.

019:123 Radio and Television Storytelling  
Principles; gathering, writing, editing, reporting the news; techniques and concepts as a foundation for understanding, successfully writing, and delivering broadcast news. Prerequisites: 019:098. Corequisites: 019:134. Requirements: journalism major.

019:124 Strategic Communication Writing  
Principles and practices of persuasive writing; focus on public relations; may include editorials, op-ed pieces, magazine essays, reviews. Prerequisites: 019:096 and 019:098. Requirements: journalism major.

019:125 Freelance Reporting and Writing  
Approaches to writing and marketing articles to magazines, newspapers, other publications; developing ideas, researching periodical markets, writing queries, writing and rewriting articles for publication. Prerequisites: 019:098. Requirements: journalism major. Same as 08N:125.

019:126 Arts and Culture Reporting and Writing  
Writing about arts and culture in a range of formats (e.g., news, profiles, features, criticism, essays); emphasis on original reporting that draws on resources, issues, people, and events on campus and in the community, especially in visual and performing arts. Prerequisites: 019:098. Requirements: journalism major.

</tbody>
</table>
019:150 Visual Communication 3 s.h.
History of modern visual communication from a cultural perspective; visual form, composition, spatial representation, color and other topics; in-depth study of selected artists, designers, photographers.

019:151 Solving Communication Problems 3 s.h.
Fundamentals of scientific inquiry in the study of communication and mass communication behavior; language, concepts, procedures, application of behavioral research methods; field and experimental approaches.

019:152 History of Mass Communication in the U.S. 3 s.h.
Historical analysis of professional practices.
Prerequisites: 019:091.

019:156 Comparative Communication Systems 3 s.h.
Culture and communication as central to examining media in different social and political settings; emphasis on contemporary problems.

019:158 News-Editorial Problems 3 s.h.
Current issues in journalism, editing strategies; emphasis on press performance and practical problems journalists confront in their work.

019:159 On the Campaign Trail: Elections and the Media 3 s.h.
Relationship between political campaigns and mass media; critical evaluation of nature, role, function of media political coverage.

019:160 Media and Health 3 s.h.
Potential and limits of mass media’s ability to educate the public about health; research and theory on the influence of information and entertainment media; theories, models, assumptions of mass communication in relation to public health issues. Same as 172:140.

019:161 Law, Media, and Current Issues 3 s.h.
Current topics in communication law.
Prerequisites: 019:140.

019:164 Images and Society 3 s.h.
Development and uses of photography, film, and television as technologies of reproduction in contemporary culture.

019:165 African Americans and the Media 3 s.h.

019:166 Communication Technology and Society 3 s.h.
Implications and effects of computer-based forms of communication, especially the Internet, for journalists, the media audience, and society at large.

019:167 Gender and Mass Media 3 s.h.
Media images and representations of the body in terms of gender; impact on people, society; media and body image, sexuality, gender roles, gender and power, race, ethnicity, class, age; critical analysis of mediated images.

019:168 Journalism Ethics 3 s.h.
Application of ethical principles in journalistic decision making; consideration of potentially conflicting values, loyalties, and goals that force professional journalists to make difficult choices.

019:169 Introductory Topics in Mass Communication 3 s.h.
Focus on particular area, issue, approach, or body of knowledge; may include international media, media criticism, new technologies, history of documentary photography, literary journalism, media management. Repeatable.
019:171 Advanced Reporting and Writing
Project journalism; extended magazine pieces, explanatory/investigative journalism, series for newspapers, or task-force projects by entire class on a major issue, with goal of publication. Repeatable. Prerequisites: 019:098. Requirements: journalism major and one course from 019:120 - 019:129.

019:172 Advanced Photo Storytelling
Photojournalism skills; may include documentary photography, advanced photojournalism methods and techniques. Repeatable. Prerequisites: 019:132.

019:173 Advanced Media Workshop
Journalism and mass communication skills; may include editing, broadcasting, design, multimedia. Repeatable. Prerequisites: 019:098. Requirements: journalism major and one course from 019:120 - 019:138.

019:174 Advanced Television News
Advanced training and experience in producing, writing, and reporting television news packages and newscasts; emphasis on meeting professional standards. Repeatable. Prerequisites: 019:098, 019:123, and 019:134. Requirements: journalism major.

019:175 Advanced Public Relations Writing
Case-based study of corporate public relations practice; globalization issues, branding and integrated communication, crisis management. Prerequisites: 019:096, 019:098, and 019:124. Requirements: journalism major.

019:176 Visual Storytelling
Experience with journalistic storytelling techniques, generating story ideas, researching, writing, producing, editing, and critiquing documentary features and other visual narratives; use of digital video and archival material to produce visual narrative pieces for broadcast and other media platforms. Prerequisites: 019:098, 019:123, and 019:134. Requirements: journalism major.

019:177 Convergence Journalism
Use of multiple technologies for journalistic storytelling across media platforms, such as print, television, and Internet. Prerequisites: 019:098 and 019:138. Requirements: journalism major.

019:178 Iowa Journalist
Experience in photojournalism and desktop publishing software consistent with real-world media and public relations objectives; students write, edit, design, and produce Iowa Journalist magazine. Prerequisites: 019:098. Requirements: journalism major and one course from 019:120 - 019:139.

019:180 Special Projects in Mass Communication
Research and readings to fit needs, interests of students.

019:181 Readings in Communication and Mass Communication
Focus on a problem or issue.

019:182 Topics in Mass Communication

019:190 Honors Readings
Topic in journalism or mass communication, chosen by student. Repeatable. Requirements: honors standing.

019:191 Honors Project
Independent research or project for honors students. Requirements: honors standing.
019:192 Advanced Topics in Mass Communication 3 s.h.
An area, issue, approach, or body of knowledge (globalization and news, critical issues in mass media, literary journalism, and so forth).

Primarily for Graduate Students

019:220 Masters Seminar 1 s.h.
Theoretical or methodological problems in mass communication. Repeatable.

019:225 Contemporary Problems in Journalism 3 s.h.
Current issues in journalism and mass communication in the United States and the world.

019:226 Master's Advanced Reporting and Writing 3 s.h.
Writing workshop for new M.A. professional journalism emphasis students.

019:229 Master's Media Project 3 s.h.
Group project on topic chosen by students and instructor; research, investigation, and dissemination of findings in several media formats; advanced writing, visual, broadcast, or multimedia interest area.

019:231 Media Communication Theory I 3 s.h.
Introduction to theory used by communication scholars.

019:232 Media Communication Theory II 3 s.h.
Continuation of 019:231; social scientific theories. Same as 160:233.

019:235 Media Communication Research Methods I 3 s.h.
Interpretive media studies research methods that involve field observation, interviews, textual analysis; use of contemporary, historical, legal resources.

019:236 Media Communication Research Methods II 3 s.h.
Journalism and media communication research methods that involve collection of quantifiable data, including surveys, content analyses, experiments.

019:240 Social Media and Web Communication 3 s.h.
Exploration of information industry growth; creative processes involved in developing a blog and utilizing multimedia tools to enhance strategic messages; focus on characteristics and spread of new communication technologies and their social, economic, and political effects.

019:252 Social Meanings of News 3 s.h.
How concept of news and news work has been studied in occupational, organizational, social, cultural contexts.

019:254 Communication and Change 3 s.h.
Diverse perspectives on changing communication forms and their implications for media and society; theoretical and methodological approaches to research involving innovation.

019:255 Problems in International Communication 3 s.h.
Representative topics: communication systems in national development and globalization; international and cross-cultural communication structure and theory; human rights; images, values; mass persuasion; laws, agreements; information channels, content, flow, effects; censorship, language, literacy.

019:256 Gender and Mass Communication 3 s.h.
Approaches to the study of gender and communication; topics vary.

019:259 Theory of Popular Culture 3 s.h.
Major theoretical notions about popular culture and its intersection with the mass media.
019:265 Approaches to Teaching 3 s.h.
Institutional and disciplinary issues that influence the journalism/mass communication classroom, philosophies of teaching, and use of teaching strategies, techniques, and classroom technologies; for students planning to work in academia.

019:279 Mass Communication Seminar 3 s.h.
Readings, research.

019:280 Masters Tutorial arr.
Topics in communication and mass communication inquiry.

019:281 Masters Practicum arr.
Research, readings, projects to fit needs, interests of students.

019:299 Masters Research arr.
Independent research for projects, theses. Repeatable.

019:310 The Internet, Human Rights, and Freedom of Expression 3 s.h.
Origins of international human rights regime from a comparative and collective memory perspective; major human rights and freedom of expression controversies from a comparative and international perspective.

019:320 Ph.D. Seminar 1 s.h.
Forum on theoretical or methodological problems in mass communication. Repeatable.

019:330 Reading Group 1-3 s.h.
Analysis and discussion of important texts.

019:332 Advanced Research Methods 3 s.h.

019:333 Seminar in Media Communication 3 s.h.
Topics vary. Repeatable.

Communication and mass communication inquiry.

019:381 Ph.D. Research Practicum arr.
Conceptualization and execution of research projects.

019:399 Dissertation arr.
Repeatable.
Latin American Studies

Directors
Maria Jose Barbosa (Spanish and Portuguese), Joy Hayes (Communication Studies)

Undergraduate nondegree programs:
Certificate, Minor in Latin American Studies

Web site: http://international.uiowa.edu/centers/lasp/

The Latin American Studies Program (LASP) is interdisciplinary, focusing on the history, politics, social organization, economy, geography, music, religion, art, and literature of Central and South America, Mexico, and the Caribbean. Faculty members from across the College of Liberal Arts and Sciences participate in the Latin American Studies Program as affiliated faculty members. Other University of Iowa faculty members occasionally offer courses and participate in the program’s research, study, and interdisciplinary activities.

The Latin American Studies Program prepares students for graduate study or for Latin America-related careers in business, communications, government, bilingual/bicultural education, secondary teaching, community organizing, and international work.

In addition to its instructional activity, LASP sponsors a wide variety of activities, brings scholars of Latin America to campus, and fosters institutional linkages.

The Latin American Studies Program is administered by International Programs.

Undergraduate Programs

• Certificate in Latin American Studies
• Minor in Latin American studies

Certificate

The Certificate in Latin American Studies requires a minimum of 24 s.h. earned in LASP-approved courses. At least 12 s.h. of credit for the certificate must be earned in University of Iowa courses. Students must maintain a g.p.a. of at least 2.00 in the certificate.

The certificate is open to current undergraduate students, except those who are earning a major in international studies (p. 498) with an emphasis in Latin American studies. It also is open to individuals who hold University of Iowa bachelor’s degrees and are not enrolled in graduate or professional programs. Completion of the certificate is noted on the student’s transcript.

A student may earn the certificate or the minor in Latin American studies, but not both.

All students develop an individual certificate plan of study in close cooperation with Latin American studies advisors. They may count a maximum of 12 s.h. of credit earned for their major, a minor, or another certificate toward the Certificate in Latin American Studies. In some cases, they may be able to count certificate courses toward certain General Education Program (p. 381) requirements.

The Certificate in Latin American Studies requires the following course work.

<table>
<thead>
<tr>
<th>Course</th>
<th>Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>130:070 Introduction to Latin American Studies</td>
<td>3 s.h.</td>

<td>3 s.h.</td>
</tr>
<tr>
<td>Spanish and Portuguese courses</td>
<td>6 s.h.</td>
</tr>
<tr>
<td>Additional courses</td>
<td>12 s.h.</td>
</tr>
</tbody>
</table>

The required Spanish and Portuguese courses (6 s.h.) must be chosen from the list under "Courses Approved for LASP" below.

The required additional courses (12 s.h.) must be chosen from the list under "Courses Approved for LASP" below. They must include courses from at least two different departments, and they may include a maximum of one (3 s.h.) additional course in Spanish or Portuguese.

STUDY ABROAD

The program highly recommends study abroad in Latin America. Students must have prior approval to apply credit from a study abroad program toward the certificate requirements; contact the Latin American Studies Program.

Minor

The minor in Latin American studies requires a minimum of 15 s.h. in LASP-approved courses (see "Courses Approved for LASP" below), including 12 s.h. in advanced courses taken at The University of Iowa. For the minor, 100-level courses are considered advanced. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass.

A student may earn the certificate or the minor in Latin American studies, but not both.

The Latin American studies minor is interdisciplinary, so students may count a maximum of 6 s.h. of credit earned for their major, a minor, or certificate. Students are strongly
encouraged to take either or both of the following for the minor.

048:112 Proseminar in Cinema and Culture 1-2 s.h.
113:109 Literature and Anthropology 3 s.h.

Study Abroad

The Latin American Studies Program highly recommends, but does not require, that students have an in-depth Latin American cultural experience, usually through study abroad, before completing their undergraduate requirements.

In cooperation with the Office for Study Abroad, LASP faculty members facilitate student participation in programs in many different Latin American countries. Programs range from intensive language study to group programs with a special focus. University of Iowa-sponsored study abroad programs include summer programs with Universidad de Guanajuato in Mexico, Universidad de los Andes in Venezuela, and a health and nutrition program at Pontificia Universidad Católica Madre y Maestra in the Dominican Republic.

University of Iowa students may enroll in programs in Argentina, Brazil, Chile, Colombia, Costa Rica, Cuba, the Dominican Republic, Honduras, Mexico, and Uruguay. The University of Iowa cosponsors these programs through various consortiums.

Study abroad courses may be counted toward requirements for the certificate and the minor with prior approval by the LASP director.

Financial Support

Students are encouraged to apply for a Stanley Undergraduate Scholarship for International Research/Fieldwork through University of Iowa International Programs. The scholarships are awarded to outstanding University of Iowa undergraduates who, in close consultation with a faculty member, propose well-conceived, small-scale research or fieldwork projects that require travel abroad. Students may conduct projects while participating in a study abroad program and may combine the scholarship with other awards and financial assistance. For information regarding other scholarships, contact LASP advisors, International Programs staff, and the LASP director.

Activities

In addition to its instructional activity, LASP organizes a range of public programming activities each semester, including film series, photography and art exhibits, conferences, roundtable discussions, and lectures. Recent events have included an international conference on contemporary Cuba and speakers on cinema, indigenous movements, human rights, and art.
Courses

130:070 Introduction to Latin American Studies  3 s.h.
Cultures of Latin American countries with emphasis on cultural history and cultural production; interdisciplinary survey. Same as 035:070, 038:070, 187:070.

Kenneth E. Mobily

Professors
Benjamin K. Hunnicutt (Leisure Studies), Richard D. MacNeil (Leisure Studies/Aging Studies), Kenneth E. Mobily (Leisure Studies/Health and Human Physiology), Jon Ringen, Michael L. Teague (Leisure Studies/Community and Behavioral Health)

Professor emeritus
John A. Nesbitt

Associate professor
Michael E. Lomax (Leisure Studies/African American Studies)

Adjunct instructors

Lecturers
John E. Farland, Daniel R. Matheson, Emily N.R. Mozena, Kathy B. Walter

Undergraduate degree: B.S. in Leisure Studies
Undergraduate nondegree program: Minor in Leisure Studies
Graduate degree: M.A. in Leisure Studies
Web site: http://clas.uiowa.edu/hhp/tracks/leisure-studies

The Leisure Studies Program provides students with opportunities to study the phenomenon of leisure and the important role it plays in people's lives. Its courses help students learn how to use leisure to enhance the quality of life—for themselves as well as others.

Leisure studies offers undergraduate and graduate degree programs that prepare students for professional careers in the expanding fields of child life, recreation and sport business, and therapeutic recreation. These programs prepare professionals to work in community, commercial, campus, and health care environments. The populations served by recreation professionals include the general public; students, colleges, and universities; children; and persons with disabilities or chronic conditions.

The program also offers courses that undergraduate students in all majors may use to fulfill requirements of the College of Liberal Arts and Sciences General Education Program (p. 381).

The Leisure Studies Program is administered by the Department of Health and Human Physiology (p. 438).

Undergraduate Programs

- Major in leisure studies (Bachelor of Science)
- Minor in leisure studies

Bachelor of Science

The Bachelor of Science with a major in leisure studies requires a minimum of 120 s.h., including work for the major, which varies by track.

Students choose one of three tracks: the child life track, the recreation and sport business track, or the therapeutic recreation track. Admission to the child life and therapeutic recreation tracks is selective; students must apply and be admitted. Admission to the recreation and sport business track is open; students may enter the track without applying to it.

The child life track requires 60-61 s.h. of work for the major (15-16 s.h. in admission prerequisites plus a total of 45 s.h. in additional leisure studies courses, supporting course work from other departments, and the required internship). Students must complete the admission prerequisites before they may enter the child life track.

The recreation and sport business track requires 45-46 s.h. of work for the major, including leisure studies courses and supporting course work from other departments. Students may complete an optional internship in the major for an additional 10 s.h. of credit.

The therapeutic recreation track requires 67-69 s.h. of work for the major (12-14 s.h. in admission prerequisites plus a total of 55 s.h. in additional leisure studies courses, supporting course work from other departments, and the required internship). Students must complete the admission prerequisites before they may enter the therapeutic recreation track.

All students must complete the College of Liberal Arts and Sciences General Education Program (p. 381).

Child Life Track

Child life specialists are professionals with expertise in child development who advance effective coping through play activities, preparation for medical procedures and operations, patient and family education, and self-expressive activities. Child life specialists provide services to support families and to promote children's mastery of varied experiences,
Colleges and Other Academic Units

particularly children's health care events. They may provide care to children's families by assisting in accurate information processing and helping family members and other caregivers. Child life specialists also help educate other medical staff and community members regarding issues and needs of children involved in health care events or other stressful experiences. For more information about the profession, visit Child Life Council.

Students must apply for admission to the child life track. Before they may be admitted, they must complete 24 s.h. at The University of Iowa (or 12 s.h. for transfer students), including the courses listed under “Child Life: Admission Prerequisites” below. Applicants must have a g.p.a. of at least 2.50 for all University of Iowa course work and a cumulative g.p.a. of at least 2.50; students with a University of Iowa or cumulative g.p.a. lower than 2.50 may apply for exceptional admission.

Application forms for admission to the child life track are available on the Department of Health and Human Physiology web site. Completed applications must be submitted by March 15 for admission the following fall semester (students may enter the child life track only in fall).

The major in leisure studies with the child life track requires the following course work.

**CHILD LIFE: ADMISSION PREREQUISITES**

Students must complete the following prerequisite course work (15-16 s.h.) before they may enter the child life track.

One of these:

- 027:053 Human Anatomy 3 s.h.
- 060:110 Principles of Human Anatomy 3 s.h.

Both of these:

- 031:001 Elementary Psychology 3 s.h.
- 169:070 Perspectives on Leisure and Play 3 s.h.

One of these:

- 027:044 Human Development Through the Life Span 3 s.h.
- 031:014 Introduction to Developmental Science 3 s.h.
- 096:030 Human Development and Behavior 3 s.h.

One of these:

- 034:001 Introduction to Sociology Principles 3-4 s.h.
- 034:020 Principles of Social Psychology 3-4 s.h.
- 031:015 Introduction to Social Psychology 3 s.h.

**CHILD LIFE: FOUNDATION**

Students complete all of the following foundation courses (21 s.h.).

- 169:061 Recreation Leadership and Programming 3 s.h.
- 169:077 Introduction to Child Life 3 s.h.
- 169:160 Introduction to Therapeutic Recreation 3 s.h.
- 169:162 Therapeutic Recreation: Clientele 3 s.h.
- 169:165 Child Life: Methods and Materials 3 s.h.
- 169:166 Child Life: Seminar 3 s.h.
- 169:167 Child Life Practicum (taken twice, once for 1 s.h. and once for 2 s.h.)

**CHILD LIFE: SUPPORTING COURSE WORK**

Students must complete 12 s.h. in supporting course work chosen from the following. Other supporting courses may be added with consent of the student's advisor.

- 07C:145 Marriage and Family Interaction 3 s.h.
- 07C:176 Child Abuse: Assessment, Intervention, and Advocacy 3 s.h.
- 07C:199 Counseling for Related Professions 3 s.h.
- 07E:114 Parent-Child Relationships 3 s.h.
- 07U:140 Characteristics of Disabilities 3 s.h.
- 07U:190 Interdisciplinary Issues in Disabilities 1-3 s.h.
- 20E:103 Medical and Technical Terminology 2 s.h.
- 027:035 Stress Management 3 s.h.
- 031:013 Introduction to Clinical Psychology 3 s.h.
- 031:014 Introduction to Developmental Science 3 s.h.
- 031:063 Abnormal Psychology: Health Professions 3 s.h.
- 034:022 Introduction to Social Work 4 s.h.
- 034:061 The American Family 3 s.h.
- 042:186 Death/Dying: Issues Across the Life Span 3 s.h.
- 042:238 Introduction to Play Therapy 2 s.h.
- 169:150 Recreation Administration 3 s.h.

**CHILD LIFE: INTERNSHIP**

Child life students must complete an internship; they register for the following course.

- 169:192 Child Life Internship 12 s.h.
Recreation and Sport Business Track

The recreation and sport business track is designed to prepare students for leadership in meeting the challenges of sport. It offers a comprehensive curriculum with an integrative business approach and provides a collaborative environment for learning how to analyze and resolve challenges in the business and culture of sport locally, nationally, and internationally.

The track is appropriate for students who want to work with sport and club teams, intercollegiate and high school athletic programs, international sport organizations, national and international amateur sport organizations, and firms specializing in sport marketing, sport sponsorship, and commercial fitness businesses.

Students interested in recreation management learn skills for organizing, planning, and budgeting in a variety of settings. They prepare for work in positions such as activities director, community recreation specialist, campus recreation professional, and program coordinator in park or recreation departments.

The track also provides a foundation for graduate study in sport or recreation management and related graduate degree programs.

The major in leisure studies with the recreation and sport business track requires the following course work.

RECREATION AND SPORT BUSINESS: CORE

All of these:

- 07P:025 Elementary Statistics and Inference 3 s.h.
- 031:001 Elementary Psychology 3 s.h.
- 034:001 Introduction to Sociology Principles 3-4 s.h.
- 169:060 Leisure in Contemporary Society 3 s.h.

RECREATION AND SPORT BUSINESS: FOUNDATION

All of these:

- 169:150 Liability in Recreation and Sport 3 s.h.
- 169:157 Managerial Operations in Sport 3 s.h.

RECREATION AND SPORT BUSINESS: CONCENTRATION AREAS

Students choose one of the following concentration areas and complete 15 s.h. in courses listed for their area.

Entrepreneurship

Students who choose 06T:050 Foundations in Entrepreneurship must register for 06T:120 Entrepreneurship and Innovation during the same semester if they have not taken 06A:001 Introduction to Financial Accounting and 06M:100 Introduction to Marketing Strategy.

At least 15 s.h. from these:

- 06E:165 Sports Economics 3 s.h.
- 06T:050 Foundations in Entrepreneurship 2 s.h.
- 06T:120 Entrepreneurship and Innovation 3 s.h.
- 06T:133 Entrepreneurial Finance 3 s.h.
- 06T:134 Entrepreneurial Marketing 3 s.h.
- 06T:144 Nonprofit Organizational Effectiveness I 3 s.h.
- 06T:145 Legal Aspects of Entrepreneurship 3 s.h.
- 06T:146 Strategic Management of Technology and Innovation 3 s.h.
- 06T:147 Social Entrepreneurship 3 s.h.
- 06T:148 E-Commerce Strategies for Entrepreneurs 3 s.h.
- 06T:150 Managing the Growth Business 3 s.h.
- 06T:151 Professional Sports Management 3 s.h.

Business Studies

At least 15 s.h. from these:

- 06A:001 Introduction to Financial Accounting 3 s.h.
- 06A:002 Managerial Accounting 3 s.h.
- 06E:002 Principles of Macroeconomics 4 s.h.
- 06E:165 Sports Economics 3 s.h.
- 06F:100 Introductory Financial Management 3 s.h.
- 06J:047 Introduction to Law 3 s.h.
- 06J:048 Introduction to Management 3 s.h.
- 06K:070 Computer Analysis 3 s.h.
- 08N:113 Writing for Business and Industry 3 s.h.
- 22M:017 Calculus and Matrix Algebra for Business (or 22M:016 or 22M:025 or 22M:031) 4 s.h.
- 22S:008 Statistics for Business 4 s.h.
Coaching and Sport Instruction
At least 15 s.h. from these:

- 07E:114 Parent-Child Relationships 3 s.h.
- 07E:131 Movement Education 2 s.h.
- 027:039 Physical Activity and Health 3 s.h.
- 027:044 Human Development Through the Life Span 3 s.h.
- 027:053 Human Anatomy 3 s.h.
- 027:056 First Aid and CPR 2 s.h.
- 027:057 Basic Athletic Training 3 s.h.
- 027:117 Human Growth and Motor Development 3 s.h.
- 027:140 Exercise Physiology for Practitioners 3 s.h.
- 028:180 Theory and Ethics of Coaching 3 s.h.
- 034:162 Work and Family Institutions 3 s.h.

Fitness Management
At least 15 s.h. from these:

- 027:035 Stress Management 3 s.h.
- 027:053 Human Anatomy 3 s.h.
- 027:131 Coaching for Health and Wellness 3 s.h.
- 027:133 Sport and Exercise Nutrition 3 s.h.
- 027:140 Exercise Physiology for Practitioners 3 s.h.
- 027:174 Applied Sport and Exercise Psychology 3 s.h.
- 169:148 Introduction to Personal Training 3 s.h.

May include one of these:

- 027:040 Nutrition and Health 3 s.h.
- 027:143 Physiology of Nutrition 3 s.h.

May include one of these:

- 027:050 Fundamentals of Human Physiology 3 s.h.
- 027:130 Human Physiology 3 s.h.

Sport and Diversity
At least 15 s.h. from these:

- 016:040 Perspectives: Diversity in American History 3 s.h.
- 019:091 Media History and Culture 3 s.h.
- 019:095 Media and Consumers 3 s.h.
- 20E:075 Ancient Sports and Leisure 3 s.h.
- 027:039 Physical Activity and Health 3 s.h.
- 027:076 Psychological Aspects of Sport and Physical Activity 3 s.h.
- 032:060 Sacred World of Native Americans 3 s.h.

034:162 Work and Family Institutions 3 s.h.
035:070 Introduction to Latin American Studies 3 s.h.
036:074 Media and Society 3 s.h.
113:014 Language, Culture, and Communication 3 s.h.
113:051 Diversity in Action in American Society 1-3 s.h.
129:060 Introduction to African American Society 3 s.h.
129:097 Race, Sport, and Globalization 3 s.h.
129:122 African Americans and the Media 3 s.h.
169:040 The Good Society 3 s.h.
169:070 Perspectives on Leisure and Play 3 s.h.
169:072 Leisure and the Liberal Arts 3 s.h.

Self-Defined Concentration Area
Students may plan self-defined concentration areas in consultation with their academic advisors. They must submit a two-page proposal to the undergraduate recreation and sport business committee; the proposal must provide a rationale for the concentration area and a description of the courses the student plans to include.

RECREATION AND SPORT BUSINESS: OPTIONAL INTERNSHIP

Recreation and sport business track students who decide to complete the optional internship register for both of these.

169:190 Preinternship Seminar 1 s.h.
169:196 Recreation Sport Business Internship 9 s.h.

Therapeutic Recreation Track

Therapeutic recreation is a health-oriented field that involves providing recreation programs designed to improve or maintain the physical, emotional, mental, and social functioning of patients and consumers. Therapeutic recreation services involve a continuum of care that includes treatment using recreation activities to improve functional abilities; leisure education that helps individuals acquire skills, knowledge, and attitudes that facilitate an independent lifestyle; and recreation that uses activities to enhance health, growth, development, and independence through intrinsically rewarding leisure behavior.

Therapeutic recreation professionals are commonly employed in settings such as skilled nursing facilities, community recreation departments, state and community mental health institutions, general hospitals, physical rehabilitation centers, special recreation districts, correctional facilities, senior centers, facilities for persons with mental retardation or mental illness, and substance-abuse programs.
Students must apply for admission to the therapeutic recreation track. Before they may be admitted, they must complete 24 s.h. at The University of Iowa (or 12 s.h. for transfer students), including the courses listed under "Therapeutic Recreation: Admission Prerequisites" below. Applicants must have a g.p.a. of at least 2.50 for all University of Iowa course work and a cumulative g.p.a. of at least 2.50; students with a University of Iowa or cumulative g.p.a. lower than 2.50 may apply for exceptional admission.

Application forms for admission to the therapeutic recreation track are available on the Department of Health and Human Physiology web site. Completed applications must be submitted by October 15 for admission the following spring semester or by March 15 for admission the following fall semester.

The major in leisure studies with the therapeutic recreation track requires the following course work.

**THERAPEUTIC RECREATION: ADMISSION PREREQUISITES**

Students must complete the following prerequisite course work (12-14 s.h.) before they may enter the therapeutic recreation track.

<td>12 s.h.</td>
</tr>
</tbody>
</table>

**Four-Year Graduation Plan**

The Four-Year Graduation Plan is available only for the recreation and sport business track without the optional internship. Students in the child life and therapeutic recreation tracks and those who choose the internship option in the recreation and sport business track should work with their advisors to develop individual graduation plans.
The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

**Before the third semester begins:** 9 s.h. in core courses and at least one-quarter of the semester hours required for graduation

**Before the fifth semester begins:** the remaining 3-4 s.h. in core courses, at least 3 s.h. in foundation courses, at least 3 s.h. in the concentration area, and at least one-half of the semester hours required for graduation

**Before the seventh semester begins:** an additional 6 s.h. in foundation courses, an additional 6 s.h. in the concentration area, and at least three-quarters of the semester hours required for graduation

**Before the eighth semester begins:** an additional 6 s.h. in foundation courses and the remaining 6 s.h. in the concentration area

**During the eighth semester:** enrollment in the remaining 3 s.h. of foundation courses, all remaining General Education courses, and a sufficient number of semester hours to graduate

**Honors**

Outstanding students in leisure studies may work toward graduation with honors. They must be members of the University of Iowa Honors Program, which requires students to maintain a cumulative g.p.a. of at least 3.33 (contact the University of Iowa Honors Program for more information).

Honors study provides students with research experience and a perspective on some aspects of graduate study. To graduate with honors in leisure studies, students must successfully complete 169:194 Honors Readings and 169:195 Honors Problems, in which they do a reading or research project under the supervision of a leisure studies faculty member and write a paper summarizing the project’s results. They also must continue to maintain a cumulative University of Iowa g.p.a. of at least 3.33 until they graduate.

For more information about honors study, contact the Leisure Studies Program.

**Minor**

The minor in leisure studies requires a minimum of 15 s.h. in leisure studies courses, including 12 s.h. in 100-level courses taken at The University of Iowa. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass. Students choose courses according to their interests and the recommendations of the leisure studies coordinator.

**Graduate Program**

- **Master of Arts in leisure studies (with or without thesis)**

The graduate program in leisure studies is open to students from diverse academic backgrounds. Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate (p. 1117) College section of the Catalog.

**Master of Arts**

The Master of Arts program in leisure studies requires a minimum of 33 s.h. of graduate credit with thesis or 36 s.h. of graduate credit without thesis. Students choose one of two specialization areas—therapeutic recreation or recreational sport management—and must satisfy the prerequisites required for their areas. All M.A. students complete a common group of core courses in addition to the work required for their specialization areas.

**CORE REQUIREMENTS**

All M.A. students must take these courses.

</tr>
</tbody>
</table>

**Therapeutic Recreation Specialization**

The therapeutic recreation specialization prepares students to meet the challenges of outpatient- and community-based health care service delivery. The program stresses research and business skills that will enable graduates to find the best jobs in the field.

Therapeutic recreation specialists are increasingly called upon to deliver preventive outpatient services, such as programs designed to prevent secondary impairments in persons with disabilities (e.g., arthritis exercise to manage pain, fall prevention for older adults); education for individuals with negative lifestyle habits (e.g., smoking, substance abuse); programs designed to restore meaning and purpose to life following traumatic events (e.g., following a spinal cord injury).
injury); and initiatives to help communities and businesses make services accessible to persons with disabilities.

Iowa’s therapeutic recreation program emphasizes business skills and innovation in delivery of services. Course 169:252 Economics and Financing and courses in entrepreneurship and new business formation prepare students to enter the workforce ready to build therapeutic recreation businesses that are self-supporting or profitable.

Students also acquire research skills that they may apply directly to therapeutic recreation practice, for example, to assess the effectiveness of specific interventions or the demand for varied services in a community.

In addition to the M.A. core (See "Core Requirements" above), therapeutic recreation specialization students must complete the following course work.

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>169:163 Concepts and Issues in Therapeutic Recreation: Advancement of the Profession</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>169:252 Economics and Financing</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>169:262 Procedures in Therapeutic Recreation</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>Cognate area courses</td>
<td>9 s.h.</td>
</tr>
</tbody>
</table>

Nonthesis students take an additional 6 s.h. of electives. Thesis students complete 6 s.h. of 169:398 M.A. Thesis.

Therapeutic recreation students must complete a practicum (169:289 Graduate Practicum in Therapeutic Recreation) in order to sit for the national certification examination.

Recreational Sport Management Specialization

The recreational sport management specialization prepares students for positions in public and private recreation and sport management. Students typically find employment in community or municipal recreation programs, campus recreation programs, or commercial recreation and sport operations.

In addition to the M.A. core (see "Core Requirements" above), recreational sport management students must complete the following course work.

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>169:251 Risk Management</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>169:252 Economics and Financing</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>169:253 Sport Administration</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>169:254 Marketing and Sport Promotion</td>
<td>3 s.h.</td>
</tr>
</tbody>
</table>
| Cognate area courses (sport and athletic administration, business, communications, or cultural studies) | 6-9 s.h.

Nonthesis students take an additional 6 s.h. of electives. Thesis students complete 6 s.h. of 169:398 M.A. Thesis.

Internships

Internships, available in several areas, are recommended for graduate students who did not complete comparable internships as undergraduates.

Assistantships

The program offers a limited number of teaching assistantships; applications should be made directly to the leisure studies academic coordinator. Teaching assistants support General Education Program courses offered by the Leisure Studies Program.

Courses

169:151 Liability in Recreation and Sport
3 s.h.
Unintentional torts (negligence), civil liability, and criminal liability in recreation and sport settings; focus on community/commercial recreation and campus recreation settings.

169:152 Park and Recreation Facility Management
3 s.h.
Facilities management, personnel assignment and evaluation, fee structures, maintenance, programming, compliance with regulations and standards.

169:153 Sport Business Practices
3 s.h.
Basic management skills for profit-based recreation and sport businesses; operations, business plans, organizational behavior, risk management, inventory, purchasing, marketing.

169:155 Camp Administration
3 s.h.
Basics of camp administration; risk management, programming, general standards set by the American Camping Association.

169:156 Design of Recreation Facilities
3 s.h.
Horticulture, floriculture, landscape design, agronomy, turf management; their relation to planning and design of recreation and park areas and facilities.

169:157 Managerial Operations in Sport
3 s.h.
Introduction to the operation of a private or nonprofit sport-related business.

169:158 Recreation and Sport Promotion
3 s.h.
Foundations and principles of recreation sport promotion and sales operation; application of foundations and principles to sport and recreation industries; historical aspects; current and future trends of sport and recreation management as it relates to sales and promotions; sales management, marketing, financial/economic, legal, and ethical principles related to sport management.

169:159 Fundraising and Grant Writing in Recreation and Sport
3 s.h.
Principles, practices, and utilization associated with fund-raising, grantsmanship, and volunteerism; differences between public, private, and nonprofit organizations; fund-raising techniques and processes, grant writing applications, volunteer opportunities.

169:160 Introduction to Therapeutic Recreation
3 s.h.
Lifestyles and barriers faced by persons with disabilities; basic aspects of the therapeutic recreation profession; skills used to establish therapeutic relationship; techniques used with patients; theoretical and conceptual bases for practice.

169:161 Assessment and Evaluation in Therapeutic Recreation
3 s.h.
Basic assessment psychometrics (e.g., reliability), standardized instrumentation and data collection (e.g., observation, self-report), construction of instruments, data reduction. Prerequisites: 169:160.

169:162 Therapeutic Recreation: Clientele
3 s.h.
Developmental patterns of special populations; examination of specific interventions and research applied to specific cognitive, emotional, and physical impairments. Prerequisites: 169:160.

169:163 Concepts and Issues in Therapeutic Recreation: Advancement of the Profession
3 s.h.
Ethical, professional, and theoretical issues in delivery of therapeutic recreation services; impact of legislation, standards of practice, health care reform; application of research to practice and marketing services. Prerequisites: 169:160.

169:164 Therapeutic Recreation: Rehabilitation
3 s.h.
In-depth review of therapeutic recreation techniques used in clinical and community rehabilitation; opportunities to use techniques with patients. Prerequisites: 169:160.
169:165 Child Life: Methods and Materials 3 s.h.
Interventions unique to child life practice (e.g., pain management, coping, preoperative play, terminal illness). Prerequisites: 169:077.

169:166 Child Life: Seminar 3 s.h.
Current issues and research in child life, expanding scope of service in child life. Prerequisites: 169:077.

169:167 Child Life Practicum 1-2 s.h.
Experience observing and assisting child life staff members providing services to hospitalized children, under Certified Child Life Specialist supervision.

169:168 Aging and Leisure 3 s.h.
Status of the well elderly in relation to retirement issues, use of free time, and factors that support leisure activity; leisure services in long-term care. Same as 153:168.

169:169 Spring Break Child Life Experience 1 s.h.
Practical experience with ill children, including a trip to the "Give Kids the World" village in Florida; documentation and engagement of course materials, experience working with ill children; students are assigned a specific diagnosis and present the diagnosis (appropriate statistics, effects of hospitalization, treatment, etc.) on child and family; coping strategies, appropriate methods of talking to and interacting with children and families, overview of Child Life in hospitals.

169:170 Children and Health Care 3 s.h.
Broad overview of issues and systemic approaches to working with children in a health care setting; practical and clinically-based experiences for pediatric population; provision of health care services to patients and issues that affect them; models of intervention, ethical issues, case studies, and impact of cultural diversity on health care; for undergraduates who are interested in working with children in a health care setting.

169:171 Child Life Practical Application 3 s.h.
Overview of medical conditions and treatments commonly encountered by children and adolescents in health care settings; common pediatric sedation medications; sequence of medical procedures to understand how to provide procedural preparation and support; facilitate medical play with pediatric population.

169:190 Preinternship Seminar 1 s.h.
Orientation to the internship process.

169:191 Therapeutic Recreation Internship arr.
Practical field experience; direct leadership, program planning, administrative procedures. Prerequisites: 169:190.

169:192 Child Life Internship 12 s.h.

169:193 Independent Study arr.
Problem in a specific area.

169:194 Honors Readings arr.

169:195 Honors Problems arr.

169:196 Recreation Sport Business Internship 9 s.h.
Capstone course for the recreation sport business track; 360 contact hours of practical experience with a private or nonprofit recreation or sport-related enterprise; supervision by an agency mentor and a university representative. Requirements: completion of all recreation sport business core courses, foundation courses, and elective concentration courses.
169:200 Historical and Philosophical Perspectives on Leisure 3 s.h.
Historical and philosophical origins of leisure studies; historical issues related to leisure ideas, such as shorter hours, share-the-work, utopian vision of a better society.

169:205 Research Methods and Leisure Behavior 3 s.h.
The scientific process: research designs for experiments and surveys, questionnaire construction, sampling theory, basic data analysis.

169:250 Seminar in Recreation Management 3 s.h.
The sport/leisure industry and product characteristics of nonprofit, private/commercial, and public organizations; participant and spectator consumer behavior; fundamentals of market research in sport/leisure organizations.

169:251 Risk Management 3 s.h.
Legal knowledge necessary for effective management of sport, recreation, and physical activity programs, avoidance of legal problems; strategies for addressing issues such as right to participate, liability for injuries, risk management; legal statutes that govern sport, health, recreation organizations.

169:252 Economics and Financing 3 s.h.
Economic issues for sport/leisure services in nonprofit, private/commercial, and public sectors; strategic financial analysis for the nonfinancial manager; principles, issues in financing sport/leisure organizations.

169:253 Sport Administration 3 s.h.
Overview of various segments that constitutes the role and function of a sport administrator (i.e., planning, organizing, leading, controlling); focus on ways in which sport administrators and their subsequent organizations influence and are influenced by the link between sport and globalization; sport administration encompassing services provided within an organizational context; administration viewed as the coordination of production and distribution of those services.

169:254 Marketing and Sport Promotion 3 s.h.
Overview of varied segments that constitutes sports business practice, including marketing, data-based marketing, sales, promotion, sponsorship; varied segments that make up the sport industry, including the mass media, infrastructure, stadium building, consumer behavior; readings and discussions consider the development and structure of each segment, interactions between segments, planning, policy implications; focus on the United States, professional team sports, comparisons to other sports.

169:262 Procedures in Therapeutic Recreation 3 s.h.
Current issues in the field; application of business and research principles to therapeutic recreation practice and program administration.

169:273 Work and Leisure in American Culture 3 s.h.
Methods and insights of American studies and leisure studies applied to work/leisure relationship in American life; patterns and perceptions of work and leisure, leisure’s share and potential; changing American values.

169:289 Graduate Practicum in Therapeutic Recreation 3 s.h.

169:290 Graduate Internship 3-9 s.h.
Requirements: recreational sports management emphasis.

169:291 Problems arr.

169:299 Graduate Research Problems arr.

169:398 M.A. Thesis 1-6 s.h.
Repeatable.
Linguistics

Chair

Rosemary K. Plapp

Undergraduate degree: B.A. in Linguistics
Undergraduate nondegree program: Minor in Linguistics
Graduate degrees: M.A., Ph.D. in Linguistics
Web site: http://www.uiowa.edu/~linguist/

Linguistics is the scientific study of human languages, which are highly complex systems. Areas of study include word structure (morphology), speech sounds (phonetics) and their patterns of combination and contrast (phonology), sentence structure (syntax), and meaning relations (semantics).

Linguists study well-known and familiar languages, such as English, Spanish, Russian, and Chinese. They also study less well-known languages and even those languages about which little has been discovered. While human languages are different from one another in many ways, there are broad similarities among them, supporting the idea that the capacity for language is part of human cognitive functions.

The description of formal patterns of human language has a number of applications. Linguistics is connected to psychology and to speech and hearing, in studying how children learn language, how speakers process and interpret language, and how injuries and disorders affect both production and perception of speech. It is linked with anthropology and other social sciences in studying how language use relates to culture, region, class, and gender. Linguists and computer scientists collaborate to construct computational representations of syntax and semantics for processing natural languages.

Linguistics has important ties with instruction in foreign languages and in English as a second language (ESL). Studies of how languages are learned are based in part on analysis of the languages in question. They also are grounded strongly in theories of second language acquisition, which in turn are related to theories of how linguistic knowledge is represented in the mind.

People with linguistic training teach ESL and help clinicians retrain people with linguistic disabilities. Some help design school programs for minority groups or intelligence and achievement tests. Linguists also work in occupations related to law, the computer industry, and foreign languages.

High scores on verbal, analytic, and quantitative aptitude tests are indicators of success in linguistics. Although few aspects of the field deal with numbers, students must be able to reason logically and explicitly and deal with formulas and abstract symbols.

Undergraduate Programs

• Major in linguistics (Bachelor of Arts)
• Minor in linguistics

Depending on their vocational goals, students planning to major in linguistics should consider pursuing their studies either through the M.A. in linguistics with a professional focus or through the Ph.D., or they should complete a second major. Appropriate companion fields include anthropology, computer science, English, another language, mathematics, philosophy, psychology, sociology, speech pathology, and elementary and secondary education.

Bachelor of Arts

The Bachelor of Arts with a major in linguistics requires a minimum of 120 s.h., including 30 s.h. of work for the major. The program prepares students to do basic language analysis in syntax-semantics (sentence patterns and their relation to meanings) and phonology (sound patterns). Elective courses in a variety of subspecialties enable students to tailor the program to their own interests.

The major requires the following course work.

103:100 Introduction to Linguistics 3 s.h.
103:110 Articulatory and Acoustic Phonetics 3 s.h.
103:111 Syntactic Analysis 3 s.h.
103:112 Phonological Analysis 3 s.h.
A course in language history (e.g., 103:131 or 103:139)

or

A course in an old language (classical Greek, Latin, Old English, Sanskrit)

Electives chosen in consultation with a faculty advisor, bringing the total hours earned in the major to 30 s.h.

Students must complete no fewer than 15 s.h. of requirements for the major at The University of Iowa, including 103:110 Articulatory and Acoustic Phonetics, 103:111 Syntactic Analysis, and 103:112 Phonological Analysis.

English Grammar (103:028) does not count toward the linguistics major.

Students must complete the College of Liberal Arts and Sciences General Education Program (p. 381).

**TESL Emphasis**

As part of the major in linguistics, students may complete an emphasis in Teaching English as a Second Language (TESL). The TESL emphasis can prepare students to teach English to nonnative speakers abroad. It also is excellent preparation for graduate work in second language acquisition. TESL emphasis students complete the requirements for the linguistics major listed above, using the following course work to partially satisfy the electives requirement.

- **Both of these:**
  - 103:141 The Structure of English 3 s.h.
  - 103:145 Methods of Teaching English as a Second Language 3 s.h.

- **One of these:**
  - 103:156 Child Language-Linguistic Perspectives 3 s.h.
  - 103:157 Linguistic Theory and Second Language Acquisition 3 s.h.
  - 103:161 Practical Phonetics 3 s.h.

**Four-Year Graduation Plan**

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

**Before the third semester begins:** at least one-quarter of the semester hours required for graduation

**Before the fifth semester begins:** Introduction to Linguistics (103:100), one additional linguistics course, and at least one-half of the semester hours required for graduation

**Before the seventh semester begins:** three more courses in the major and at least three-quarters of the semester hours required for graduation

**Before the eighth semester begins:** two more courses in the major

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

**Honors**

Members of the University of Iowa Honors Program may graduate with honors in linguistics by completing the major course work plus an honors thesis, which must be prepared in consultation with the student’s academic advisor. Membership in the Honors Program requires that students maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University of Iowa Honors Program for more information).

**Minor**

The minor in linguistics requires a minimum of 15 s.h. in linguistics courses, including at least 12 s.h. in University of Iowa courses numbered 103:100 Introduction to Linguistics and above. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass. Courses for the minor must include 103:100 Introduction to Linguistics, 103:110 Articulatory and Acoustic Phonetics, 103:111 Syntactic Analysis, and 103:112 Phonological Analysis.

**Joint B.A./M.A. with TESL Focus**

Undergraduate linguistics majors who plan to earn a master’s degree in linguistics with a Teaching English as a Second Language (TESL) focus have the opportunity to earn a joint Bachelor of Arts/Master of Arts. Students in the joint program take selected graduate-level courses while still undergraduates and may count 12 s.h. of advanced course work toward both degrees. Once students complete the requirements for the
bachelor's degree, they are granted the B.A., and they usually complete the M.A. one year later.

As part of the undergraduate major with TESL focus, B.A./M.A. students take 103:141 The Structure of English, a course in language history, 103:100 Introduction to Linguistics, and 103:110 Articulatory and Acoustic Phonetics.

They substitute some graduate-level course work for normal undergraduate requirements. Instead of taking 103:111 Syntactic Analysis to fulfill the B.A. syntax requirement, they take 103:201 Introduction to Syntax, the first course in the mandatory two-course syntax sequence for M.A. students. Instead of taking 103:112 Phonological Analysis to fulfill the B.A. phonology requirement, they take 103:203 Introduction to Phonology, the first in the graduate two-course phonology sequence.

In addition, 103:145 Methods of Teaching English as a Second Language and 103:202 Syntactic Theory count toward both degrees and typically are taken during the senior year.

To be admitted to the program, students must be working toward an undergraduate major in linguistics, must have completed at least 80 s.h. of undergraduate course work (typically by the end of their fifth semester), and must have a g.p.a. of at least 3.50.

Graduate Programs

- Master of Arts in linguistics (with or without thesis)
- Doctor of Philosophy in linguistics

Department of Linguistics graduate programs emphasize theory and research. Students interested in non-university careers also may take courses in applied linguistics and other fields, either in connection with doctoral work or as an option in the M.A. program.

Iowa's linguistics department has particular strengths in second language acquisition (SLA), phonology, and syntax.

The curriculum in second language acquisition includes courses that provide an overview and analysis of current SLA research conducted within the generative framework, with emphasis on explaining the linguistic competence of second language learners in terms of universal grammar (UG), the innate language acquisition device. Work focuses on experimental research investigating the influence of the first language, theories of UG access, and related topics.

The phonology curriculum emphasizes current theoretical perspectives, including optimality theory, and the collection, description, and interpretation of novel phonological and phonetic data. Courses feature extensive work in data analysis and problem solving, focusing on construction and evaluation of phonological theories, particularly in light of new empirical data.

The syntax curriculum includes the dual emphases of empirical and theoretical perspectives. It offers a variety of foundational courses that build analytic and argumentation skills, as well as specialized course work on current issues in syntactic theory. The courses consist of intensive work in problem solving. They combine discovery and description of new linguistic data with exploration of the implications of such facts in testing and constructing syntactic theories.

Master of Arts

The Master of Arts in linguistics requires a minimum of 31 s.h. of graduate credit with thesis, or 37 s.h. without thesis.

All students take a required set of core courses in phonology, syntax, and language acquisition. Thesis students also complete at least 9 s.h. of electives and earn up to 6 s.h. for the thesis. Nonthesis students also complete 15 s.h. of Department of Linguistics course work, which may include a 9 s.h. focus (e.g., teaching English as a second language). A student's advisor must approve all courses that count toward the degree.

A student with a linguistics background may waive up to 6 s.h. of course work if the department determines that he or she completed comparable work before enrolling in the program.

Comprehensive examinations cover phonology, syntax, and applied linguistics (for students who choose this option).

The required core courses are as follows.

- 103:110 Articulatory and Acoustic Phonetics 3 s.h.
- 103:200 Proseminar: Morphosyntax 1 s.h.
- 103:201 Introduction to Syntax 3 s.h.
- 103:202 Syntactic Theory 3 s.h.
- 103:203 Introduction to Phonology 3 s.h.
- 103:204 Phonological Theory 3 s.h.
- 103:211 Generative Second Language Acquisition 3 s.h.

One of these:
103:113 Linguistic Field Methods 3 s.h.
103:210 Linguistic Structures 3 s.h.
103:217 Language Universals Linguistic Typology 3 s.h.

Doctor of Philosophy

The Doctor of Philosophy in linguistics requires a minimum of 72 s.h. of graduate credit, or 73 s.h. for graduates of the M.A. nonthesis program. The highly selective program provides students with a strong foundation in theoretical linguistics and helps them develop the skills they will need to explore the close relationship between linguistics and related disciplines.

The Ph.D. core includes the following course work (total of 18 s.h.).

Two upper-level syntax courses numbered 103:212 Advanced Syntactic Theory or above
Two upper-level phonology courses numbered 103:214 Advanced Phonological Theory or above
At least two seminars

An approved specialty area of 18 s.h. also is required, and students must achieve proficiency in a foreign language, as specified by department regulations.

To pass the comprehensive examination for the Ph.D., a student must gain approval for two papers of publishable quality. One must be in phonology or syntax. The other should be in an area of the student’s choosing and must be distinct from the area of the first paper.

An oral defense of the dissertation and three years in residence at The University of Iowa are required. In addition, all candidates are required to gain supervised experience in teaching and research.

Admission

Applicants to the graduate program in linguistics must complete an application form, submit GRE General Test scores, and have three letters of recommendation sent to the Department of Linguistics. Students whose first language is not English must submit Test of English as a Foreign Language (TOEFL) scores. Applications for admission should be submitted as early as possible for the following academic year.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate (p. 1117) College section of the Catalog.

Financial Support

Fellowships, teaching assistantships, and research assistantships are available to qualified graduate students. Applications are due no later than March 1 for the following academic year; earlier submission is strongly encouraged.

Exceptionally well-qualified applicants may be eligible for a Presidential Graduate Fellowship. Individuals interested in being nominated for a presidential fellowship should submit all application materials by January 15 for the following academic year.

Applications for all awards are considered only for students whose application for admission is complete.

 Facilities

The Department of Linguistics has two laboratories. One is equipped with 14 computer workstations for small group instruction, individual work, and student research in speech analysis, second language acquisition, computational linguistics, and other areas. The other has a soundproof booth connected to a computer with software for speech analysis. Remote terminals and personal computers are also available to students.

The departmental reading room, which contains a modest library, provides a common meeting place for faculty and students. Students have considerable influence on departmental affairs and enjoy a high degree of individual instruction.

Courses

Primarily for Undergraduates

103:011 Language and Society 3 s.h.
Correlations between social and linguistic behavior; methods for discovering and describing socially significant language behavior; educational and political implications of findings. GE: Social Sciences.

103:013 Language and Formal Reasoning 3 s.h.
Semantics and sentence structure of English; word meanings, meaning connected to truth conditions, reasoning based on logical connectives and quantifiers, evaluation of valid and invalid arguments. GE: Quantitative or Formal Reasoning.
**103:020 Introduction to the Study of Language**
3 s.h.
Nontechnical introduction: classification of languages, writing systems, language and the brain, acquisition of first and second languages, bilingualism, animal communication, language and computing.

**103:028 English Grammar**
3 s.h.
Recognizing nouns, verbs, adverbs, adjectives, and other parts of speech; sentence analysis; subjects, objects; types of sentences; passives, relative clauses; for students with little or no background in English grammar study. Does not count toward the linguistics major.

**103:029 First-Year Seminar**
1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.

**103:035 English Words**
3 s.h.
English word formation, basic units of English vocabulary; vocabulary skill expansion; word structure.

**103:045 Language Rights**
3 s.h.
Language minorities and linguistic human rights in the United States and worldwide; language and identity, culture, power; case studies of language rights deprivation. GE: International and Global Issues. Same as 113:045.

**103:055 Languages of the World**
3 s.h.
Overview of structural similarities and differences in human language; survey of the world’s major language families; emphasis on sentence and word structure, sound systems, and modes of classification. GE: Social Sciences.

**103:095 Research Practicum**
arr.
Individual participation in faculty research projects.

**103:099 Special Project**
arr.
Varied topics in linguistics; for undergraduates.

---

**For Undergraduate and Graduate Students**

**103:100 Introduction to Linguistics**
3 s.h.
Introduction to the study of human language: sounds and their contrasts and variation, words and meaningful subunits, sentence structure, historical change.

**103:107 Practicum in Teaching English as a Second Language**
3 s.h.
Practical experience in TESL, observation and participation in intensive English classes; design and teaching of ESL classes under supervision. Prerequisites: 103:145. Offered summer sessions.

**103:110 Articulatory and Acoustic Phonetics**
3 s.h.
Production and transcription of sounds in human languages; physics of sound, computer analysis of speech sounds. Offered fall semesters. Same as 164:160.

**103:111 Syntactic Analysis**
3 s.h.
Introduction to sentence structures and basic abstract relations that characterize them, including word category, word order, hierarchical organization; problem sets from English and other languages as basis for discussion, analysis. Offered spring semesters. Prerequisites: 103:100.

**103:112 Phonological Analysis**
3 s.h.
Introduction to analysis of sound systems; generative phonological theory; practice in phonological analysis using data from a variety of languages. Offered spring semesters. Prerequisites: 103:100 and 103:110.

**103:113 Linguistic Field Methods**
3 s.h.
Collection and analysis of primary linguistic data from unfamiliar language; methods of elicitation, theory, practical problems; extensive practice in eliciting data from a consultant. Prerequisites: 103:110. Requirements: a course in syntax and a course in phonology.

**103:115 Topics in Linguistics**
3 s.h.
Varied topics in linguistics; for undergraduates.

<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>103:131</td>
<td>History of the English Language</td>
<td>3 s.h.</td>
<td>Development of phonological and grammatical structure of English, from Old to Modern English; dialectal differentiation in English. Prerequisites: 103:100.</td>
</tr>
<tr>
<td>103:137</td>
<td>Language Processes</td>
<td>3 s.h.</td>
<td>Psychological processes involved in using languages, including speech perception and production, the meaning of words, understanding and producing sentences, and basics of discourse and pragmatics; developmental and neural bases of language processes. Prerequisites: 031:002. Requirements: grade of C- or higher in 031:010, grade of C- or higher in 031:016, and psychology major; or nonmajor and 103:100 or 003:015. Same as 031:137.</td>
</tr>
<tr>
<td>103:139</td>
<td>Chinese Historical Phonology</td>
<td>3 s.h.</td>
<td>Phonology of Mandarin, other major Chinese dialect groups; reconstruction of the sound system of Middle and Old Chinese. Same as 039:139.</td>
</tr>
<tr>
<td>103:140</td>
<td>Introduction to Computational Linguistics</td>
<td>3 s.h.</td>
<td>Introduction to computational linguistics; focus on theory and practice of natural language processing and syntactic and semantic analysis. Same as 22C:146.</td>
</tr>
<tr>
<td>103:141</td>
<td>The Structure of English</td>
<td>3 s.h.</td>
<td>Descriptive analysis of English, including word and sentence structure; focus on relevance to teaching English as a second language. Offered fall semesters. Prerequisites: 103:100.</td>
</tr>
<tr>
<td>103:144</td>
<td>Introduction to Chinese Linguistics</td>
<td>3 s.h.</td>
<td>Aspects of modern Chinese linguistics, such as Chinese phonology, syntax, pedagogical grammar, history of the language. Taught in English. Same as 039:144, 164:181.</td>
</tr>
<tr>
<td>103:145</td>
<td>Methods of Teaching English as a Second Language</td>
<td>3 s.h.</td>
<td>Observations of ESL and intensive English classes at the University; design and presentation of short lessons, text evaluation, demonstrations of innovative approaches of the last decade; materials. Offered spring semesters. Prerequisites: 103:110 and 103:141. Same as 164:163.</td>
</tr>
<tr>
<td>103:150</td>
<td>Language and Gender</td>
<td>3 s.h.</td>
<td>Gender-related language variation; current research on gender-specific linguistic forms and usage in the United States and other language communities; introduction to relevant principles of linguistic theory and analysis. GE: Values, Society, and Diversity.</td>
</tr>
<tr>
<td>103:155</td>
<td>Morphology</td>
<td>3 s.h.</td>
<td>Lexicon and principles of word formation; principal processes of inflection, derivation, and compounding found in the world’s languages; relation to phonology, syntax; practice in morphological analysis from a variety of languages. Prerequisites: 103:100.</td>
</tr>
<tr>
<td>103:156</td>
<td>Child Language-Linguistic Perspectives</td>
<td>3 s.h.</td>
<td>Linguistic theory as applied to first-language learning, including acquisition of sounds, syntax and word meaning, acquisition strategies, properties of input, theories of first-language acquisition. Prerequisites: 103:100.</td>
</tr>
<tr>
<td>103:157</td>
<td>Linguistic Theory and Second Language Acquisition</td>
<td>3 s.h.</td>
<td>Introduction of research results obtained by generative second language acquisition framework and their implications for classroom teaching methods; current views of language architecture; focus on inflectional morphology and linguistic interfaces, which have been proposed to be severe bottlenecks for acquisition; research findings on acquisition of syntax, phonology, semantics, linguistic pragmatics; pedagogical implications of these findings. Prerequisites: 103:111 and 103:112. Same as 164:157.</td>
</tr>
</tbody>
</table>
### 103:161 Practical Phonetics 3 s.h.
Contemporary articulatory and acoustic research, including second-language acquisition, elicitation and computer analysis of primary linguistic data. Prerequisites: 103:110.

### 103:163 Philosophy of Language 3 s.h.
Contemporary topics. Same as 026:189.

### 103:172 Psychology of Language 3 s.h.
Theoretical, empirical investigations of linguistic behavior; behaviorist, rationalist models in context of formal linguistic structure and context of models of speech perception and production. Offered spring semesters. Prerequisites: 103:100. GE: Social Sciences. Same as 003:117.

### 103:175 Introduction to Semantics 3 s.h.
Overview of meaning in natural language mapped onto lexical and syntactic structures; formal logical and set theory description; discussion of truth conditions, compositionality, presupposition, definiteness, quantification in natural language. Requirements: course in syntax.

### 103:176 Language Acquisition 1-3 s.h.
Models of children's language acquisition; child language/communication development from infancy through school age, in context of current developmental research. Offered spring semesters. Requirements: (for 003:118) 031:001 and 103:100; (for 103:176) 103:100 or 103:172. GE: Social Sciences. Same as 003:118.

### 103:177 Basic Neuroscience for Speech and Hearing 3 s.h.
Basic anatomy, physiology of central nervous system; emphasis on neural systems involved in normal and disordered communication. Offered fall semesters. Requirements: biology, zoology, or physiology course. Same as 003:116.

### 103:199 Special Projects arr.
Theoretical and applied topics.

### Primarily for Graduate Students

### 103:200 Proseminar: Morphosyntax 1 s.h.
Basic morphological analysis of languages other than English; morphological markers of syntactic relations (morphosyntax), such as case/agreement, possession, switch reference and other inflectional marking. Corequisites: 103:201.

### 103:201 Introduction to Syntax 3 s.h.

### 103:202 Syntactic Theory 3 s.h.
Current syntactic theory examined through analysis of data sets, readings in recent research; emphasis on argument construction, statement of formal principles. Offered spring semesters. Prerequisites: 103:201. Same as 164:242.

### 103:203 Introduction to Phonology 3 s.h.
Analysis of sound systems, focus on early generative phonological theory; extensive practice in analysis using data from a variety of languages; linguistic argumentation. Prerequisites: 103:110. Same as 164:203.

### 103:204 Phonological Theory 3 s.h.
Post-SPE phonological theory, including autosegmental phonology, feature geometry, the syllable, optimality theory. Prerequisites: 103:203. Same as 164:244.

### 103:205 Topics in Linguistic Theory 2-3 s.h.
Varied topics in linguistic theory; for graduate students.

### 103:206 First Language Acquisition 3 s.h.
Child language from a crosslinguistic perspective. Prerequisites: 103:110, and 103:141 or 103:201. Same as 164:245.
103:210 Linguistic Structures 3 s.h.
Grammatical and/or phonological structure of a selected language or language family. Repeatable with different language.

103:211 Generative Second Language Acquisition 3 s.h.
Overview of current second-language acquisition research in the generative linguistic framework; focus on characterizing second language learners’ linguistic competence and how it is constrained by principles of universal grammar. Offered fall semesters. Prerequisites: 103:111 or 103:201, and 103:112 or 103:203. Same as 164:246.

103:212 Advanced Syntactic Theory 2-3 s.h.
Recent developments in syntax; comparison of theories, argumentation, and uses of data. Same as 164:247.

103:214 Advanced Phonological Theory 2-3 s.h.
Current issues. Prerequisites: 103:204. Same as 164:248.

103:216 Topics in Second Language Acquisition 3 s.h.
Recent developments of selected issues in second language acquisition. Repeatable. Prerequisites: 103:211. Same as 164:249.

103:217 Language Universals Linguistic Typology 3 s.h.
Proposed universal principles of linguistic structure; approaches to classification of languages on the basis of grammatical and phonological structure. Prerequisites: 103:201.

103:218 Psycholinguistics 3 s.h.
Theoretical, empirical issues in psycholinguistics; models demonstrating relation of formal language structure to psychological operations used in speech perception and production; laboratory emphasis on paradigmatic research in psycholinguistics. Offered fall semesters. Prerequisites: 103:100. Same as 003:218.

103:221 Seminar: Language, Gender, and Sexuality 3 s.h.
Role of language and discourse in cultural constructions of gender identities and relations, including domination and subordination; theoretical perspectives, methodological approaches that have shaped thought on the language/gender nexus. Prerequisites: 113:220 or 131:220. Same as 113:273, 131:273.

103:230 Advanced Hearing Science and Speech Perception 3 s.h.
Perception of speech and other sounds by human listeners, how these perceptual abilities relate to the physiology of the auditory system; perception of speech by hearing-impaired listeners through hearing aids or cochlear implants. Offered spring semesters. Requirements: (for 003:230) 003:113; (for 103:230) background in phonetics, speech science, and hearing science. Same as 003:230.

103:231 History of the German Language 3 s.h.

103:232 Special Topics in German Linguistics 3 s.h.
Repeatable. Same as 013:299, 164:299.

103:262 Topics in Comparative Romance Linguistics 3 s.h.
Comparative study of phonology, morphology, or syntax of the main Romance languages as informed by linguistic theory; diachronic or synchronic perspective. Repeatable. Prerequisites: 035:204. Recommendations: additional graduate course work in linguistics. Same as 035:207, 164:262, 20E:201.

103:300 Seminar: Spanish Linguistics 3 s.h.
Repeatable with different topics. Same as 035:300.

103:312 Seminar: Problems in Linguistics 2-3 s.h.
Intensive study of theoretical and practical problems. Same as 164:342.
103:390 Special Projects        arr.

103:400 Master’s Thesis        arr.

Professors emeriti

Associate professors
Bruce Ayati, Richard Baker, Isabel Darcy, Oguz Durumeric, Hao Fang, Walter Seaman

Associate professors emeriti
Michael A. Geraghty, John P. Lediaev

Assistant professors
Jianfeng Cai, Rodica Curtu, Keiko Kawamuro, Muthukrishnan Krishnamurthy, Dong Li, Colleen Mitchell, Madlena Tomova, Julianna Tymoczko, Xianoyi Zhang

Undergraduate degrees: B.A., B.S. in Mathematics
Undergraduate nondegree program: Minor in Mathematics
Graduate degrees: M.S., Ph.D. in Mathematics
Web site: http://www.math.uiowa.edu

Mathematics is a basic tool for understanding modern society as well as a crucial requirement for many careers in science, engineering, business, and the professions. Research in this living, dynamic subject is at the highest level in history.

An undergraduate degree in mathematics prepares students for a variety of careers in government and business, for secondary teaching, for graduate study, and with proper planning, for a variety of professional programs. Graduate study is advisable for some business and governmental positions and for college and university teaching and research.

Undergraduate Programs

• Major in mathematics (Bachelor of Arts, Bachelor of Science)
• Minor in mathematics

Students majoring in mathematics (either B.A. or B.S.) enroll in one of three programs: Program A is for students who plan to work in business or government or pursue graduate study in mathematics; program B is for students who seek secondary school teaching licensure; and program C is for those seeking specialization in a math-related area, such as actuarial science, biomathematics, business, computer science, economics, physics, statistics, and so forth. Program C may be especially appropriate for students who plan to seek a math-related job after earning a bachelor’s degree, rather than going on to graduate study.

B.A. or B.S. with Double Major

Students majoring in mathematics may choose to earn a second major in computer science, statistics, actuarial science, or other disciplines. They must satisfy all requirements of program A, program B, or program C in mathematics as well as all requirements for the additional major. For more information, consult an advisor and see Declaring or changing a major, minor, or certificate under For Students/Majors, Minors & Certificates on the College of Liberal Arts and Sciences web site.

Transfer from Engineering to Mathematics

Bachelor of Arts, Bachelor of Science

The Bachelor of Arts with a major in mathematics requires a minimum of 120 s.h., including at least 37-39 s.h. (11 courses) of work for the major. The Bachelor of Science with a major in mathematics requires a minimum of 120 s.h., including at least 43-45 s.h. (13 courses) of work for the major. The semester hour requirement varies for each
degree, depending on the student's choice of program A, B, or C.

Students majoring in mathematics (Bachelor of Arts or Bachelor of Science) must earn at least 15 s.h. in post-calculus mathematics courses offered by The University of Iowa; students may not count transfer courses or credit by exam toward this requirement. At least 12 of the 15 s.h. in the required post-calculus courses must be earned in Department of Mathematics courses or in courses cross-listed with the department. Post-calculus courses in the Department of Mathematics are numbered 22M:027 and above, excluding 22M:031, 22M:032, 22M:081, 22M:104, 22M:109, and 22M:195 through 22M:199. Some courses have prerequisites, which students must satisfy before they may register for the course.

Students must maintain a g.p.a. of at least 2.00 in all course work for the major.

All students must complete the College of Liberal Arts and Sciences General Education Program (p. 381).

For policies concerning transfer credit, correspondence credit, credit by examination, cumulative grade-point average, rules relating to regression and duplication, and so forth, see For Students on the College of Liberal Arts and Sciences web site. For information about duplication, regression, and use of the second-grade-only option for mathematics courses, contact the Department of Mathematics.

The Handbook for Undergraduate Majors is available from the Department of Mathematics and on its web site. The handbook provides details about schedule planning and career options. For more information on admission, financial support, employment opportunities, the faculty, facilities, and other topics, visit The University of Iowa and Department of Mathematics web sites.

Program A

Program A is primarily for students who plan to work in business or government or to pursue graduate study in mathematics.

Students must complete seven core courses. In addition, B.A. students must complete at least four electives, and B.S. students must complete at least six.

CORE COURSES

A two-semester sequence of calculus I-II (8 s.h.) is required. Advanced placement credit, CLEP credit, and credit obtained through the Mathematics Incentive Program is accepted for all or part of the calculus requirement.

All of these:

- 22M:025-22M:026 Calculus I-II 8 s.h.
- 22M:027 Introduction to Linear Algebra 4 s.h.
- 22M:050 Introduction to Abstract Algebra I 3 s.h.
- 22M:055-22M:056 Fundamental Properties of Spaces and Functions I-II 7 s.h.
- 22M:100 Introduction to Ordinary Differential Equations 3 s.h.

More advanced courses may be substituted for the core courses, with Department of Mathematics approval.

ELECTIVES

B.A. students complete four electives (each 3-4 s.h.) chosen from the following list, including at least one upper-level mathematics course.

B.S. students complete six electives chosen from the following list, including at least three upper-level mathematics courses.

Mathematics

Computer Science

22C:016 Computer Science I: Fundamentals 4 s.h.

Any course numbered above 22C:020 that counts toward an undergraduate major in computer science, except 22C:197 and 22C:198

Statistics and Actuarial Science

Students may count only one of these: 22S:039 Probability and Statistics for the Engineering and Physical Sciences, 22S:120 Probability and Statistics, or 22S:130 Introduction to Mathematical Statistics I. None of them may be counted if taken after 22S:153 Mathematical Statistics I.

22S:039 Probability and Statistics for the Engineering and Physical Sciences 3 s.h.

22S:120 Probability and Statistics 4 s.h.
Program B

Program B is intended for students seeking secondary school teaching licensure. In addition to earning a Bachelor of Arts or Bachelor of Science with a major in mathematics, students must complete the Teacher Education Program (TEP). For more information about licensure requirements and the TEP, contact the Office of Education Services in the College of Education.

**CORE COURSES**

A two-semester sequence of calculus I-II (8 s.h.) is required. Advanced placement credit, CLEP credit, and credit earned through the Mathematics Incentive Program is accepted for part or all of the calculus requirement.

All of these:

- 22C:016 Computer Science I: Fundamentals 4 s.h.
- 22M:025-22M:026 Calculus I-II 8 s.h.
- 22M:027 Introduction to Linear Algebra 4 s.h.
- 22M:028 Calculus III 4 s.h.
- 22M:050 Introduction to Abstract Algebra I 3 s.h.
- 22M:055 Fundamental Properties of Spaces and Functions I 3 s.h.
- 22M:070 Foundations of Geometry 3 s.h.
- 22S:120 Probability and Statistics 4 s.h.

One of these:

- 22M:150 Introduction to Discrete Mathematics 3 s.h.
- 22M:151 Discrete Mathematical Models 3 s.h.

More advanced courses may be substituted for the core courses, with Department of Mathematics approval.

**ELECTIVES**

B.A. students in Program B must take at least one additional course (3-4 s.h.) beyond calculus. B.S. students in Program B must take at least three additional courses (9-16 s.h.) beyond calculus, of which two must be numbered 22M:107 or above. With their advisor's approval, capable students are encouraged to substitute more advanced courses in the same subject area for any of the electives. The Handbook for Undergraduate Majors offers advice on course selection.

Program C

Program C provides a degree with specialization in a math-related subtrack such as the mathematics of making optimal business decisions, risk management and insurance, economics, finance, physics, chemistry, biostatistics, biomathematics, computer science, or statistics and actuarial science. In consultation with the faculty advisor, each student prepares a program of studies tailor-made to his or her interests and academic or career goals. Building on a core of mathematics courses, students have considerable freedom to design their curriculum. The proposed program of studies must be approved by the mathematics department undergraduate committee. Students should submit their study plans on a Program C Plan of Study form, available at the mathematics department office. The Handbook for Undergraduate Majors has plans for choosing electives in several areas; students may use these or propose other plans.

Program C requires a total of 11 core and elective courses for the B.A. and a total of 13 core and elective courses for the B.S., as follows.

**CORE COURSES**

A two-semester sequence of calculus I-II (8 s.h.) is required. Advanced placement credit, CLEP credit, and credit earned through the Mathematics Incentive Program is accepted for part or all of the calculus requirement.
### Core Courses

- **22M:025-22M:026 Calculus I-II**
  - 8 s.h.
- **22M:027 Introduction to Linear Algebra**
  - 4 s.h.

One of these:

- **22M:028 Calculus III**
  - 4 s.h.
- **22M:056 Fundamental Properties of Spaces and Functions II**
  - 4 s.h.

One additional proof course (e.g., 22M:050 or 22M:055)

- 3-4 s.h.

### Electives

B.A. students choose six electives and B.S. students choose eight. At least three electives must be mathematical sciences courses (prefixes 22C, 22M, and 22S).

Students choose electives according to their subtrack. Some subtracks require additional core courses (see "Core Courses" above); the additional core courses count as required electives.

For a list of suggested subtracks and restrictions on electives in each subtrack, consult the Handbook for Undergraduate Majors.

### B.A. or B.S. with Teacher Licensure

Mathematics majors seeking licensure to teach in elementary and/or secondary schools should choose program B (Bachelor of Arts or Bachelor of Science); see "Program B" above. For information about teacher licensure and the Teacher Education Program, see Teaching and Learning (p. 967) (College of Education) in the Catalog.

### Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

Note: Many mathematics courses must be taken in sequence, so students must begin major requirements as early as possible, and individual plans of study must be constructed carefully. The mathematics major typically requires 11 courses for Bachelor of Arts students and 13 courses for Bachelor of Science students. Students must choose program A, B, or C by the end of the third semester and must remain in their chosen program until they graduate in order to stay on track for the four-year graduation plan.

**Before the third semester begins:** course work through second-semester calculus and at least one-quarter of the semester hours required for graduation

**Before the fifth semester begins:** two or three more courses in the major and at least one-half of the semester hours required for graduation

**Before the seventh semester begins:** three or four more major courses and at least three-quarters of the semester hours required for graduation

**Before the eighth semester begins:** two or three more major courses

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

### Honors

In order to graduate with honors in mathematics, a student must be a member of the University of Iowa Honors Program, which requires students to maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University of Iowa Honors Program for more information). Honors students in mathematics must complete the regular requirements for an undergraduate major in mathematics with a g.p.a. of at least 3.40; they also must complete either an honors project or the courses 22M:115 Introduction to Analysis I and 22M:116 Introduction to Analysis II, and 22M:120 Abstract Algebra I and 22M:121 Abstract Algebra II with a g.p.a. of 3.00 or higher. Other sequences, such as 22M:170 Numerical Analysis: Nonlinear Equations and Approximation Theory and 22M:171 Numerical Analysis: Differential Equations and Linear Algebra, or 22M:132 General Topology and 22M:133 Introduction to Smooth Manifolds, may be substituted with the approval of the honors advisor.

Students planning an honors project are responsible for finding a faculty member willing to supervise the project. For help finding a project supervisor, contact the department. Students typically register for 22M:197 Individual Study and Honors in Mathematics for at least 3 s.h. For more
information, contact the mathematics department honors advisor.

**Minor**

The minor in mathematics requires a minimum of 15 s.h. in mathematics courses, including 12 s.h. in advanced courses taken in the Department of Mathematics at The University of Iowa. Transfer credit and credit by examination do not count toward the 12 s.h. of advanced work. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass.

The following courses are considered advanced for the minor.

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>22M:027</td>
<td>Introduction to Linear Algebra</td>
<td>4 s.h.</td>
</tr>
<tr>
<td>22M:028</td>
<td>Calculus III</td>
<td>4 s.h.</td>
</tr>
<tr>
<td>22M:033</td>
<td>Engineering Mathematics III: Matrix Algebra</td>
<td>2 s.h.</td>
</tr>
<tr>
<td>22M:034</td>
<td>Engineering Mathematics IV: Differential Equations</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>22M:037</td>
<td>Engineering Mathematics V: Vector Calculus</td>
<td>3 s.h.</td>
</tr>
</tbody>
</table>

Students who have taken 22M:032, 22M:033, 22M:034, and 22M:037 at The University of Iowa may satisfy the minor’s advanced course requirement by taking one additional course numbered 22M:050 or above, except 22M:056, 22M:100, 22M:104, 22M:109, and 22M:195 through 22M:199. See the department’s Handbook for Undergraduate Majors.

Students earning a minor in mathematics must maintain a g.p.a. of at least 2.00 in all work attempted in the department.

**Graduate Programs**

- Master of Science in mathematics
- Doctor of Philosophy in mathematics

**Master of Science**

The Master of Science in mathematics requires a minimum of 30 s.h. of graduate credit. Students earn the degree through courses and comprehensive examinations. There is no M.S. thesis. Requirements (courses and comprehensive examination areas) may be modified with the department’s consent.

Four different programs (I, II, III, and IV) lead to the M.S. in mathematics. Program II is designed for secondary school teachers.

**Program I**

Program I prepares students for further study of pure and applied mathematics and for employment in government and business. M.S. students in program I take several courses and pass two comprehensive examinations. Students must earn a grade of B-minus or higher in six of the courses and maintain a g.p.a. of at least 2.75 in all mathematics courses taken for the degree.

The following courses are required.

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>22M:115-22M:116</td>
<td>Introduction to Analysis I-II</td>
<td>6 s.h.</td>

<td>3 s.h.</td>
</tr>
<tr>
<td>22M:142</td>
<td>Nonlinear Dynamics with Numerical Methods</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>22M:144</td>
<td>Partial Differential Equations with Numerical Methods</td>
<td>3 s.h.</td>
</tr>
</tbody>
</table>

Each student must pass two M.S.-level comprehensive exams, chosen from algebra, analysis, differential equations with numerical methods, and topology.

**Program II**

Program II is designed for secondary school teachers. Program II requirements are the same as those for programs I and III, except that two mathematics education courses are required. All mathematics courses numbered 22M:100 or above may be used to satisfy the required 24 s.h. of course work. Students are encouraged to consult with the mathematics education faculty when planning their course of study.

**Program III**

Program III focuses on applied mathematics. Students in program III take several courses and pass two comprehensive examinations. Students must earn a grade of B-minus or higher in six of the courses and maintain a g.p.a. of at least 2.75 in all mathematics courses taken for the M.S.

The following courses are required.

All of these.

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>22M:115-22M:116</td>
<td>Introduction to Analysis I-II</td>
<td>6 s.h.</td>
</tr>

<td>22M:142</td>
<td>Nonlinear Dynamics with Numerical Methods</td>
<td>3 s.h.</td>
</tr>
</tbody>
</table>
22M:144 Partial Differential Equations with Numerical Methods 3 s.h.
22M:170 Numerical Analysis: Nonlinear Equations and Approximation Theory 3 s.h.
22M:171 Numerical Analysis: Differential Equations and Linear Algebra 3 s.h.

Both courses in group A, or both courses in group B:

Group A

22M:132 General Topology 3 s.h.
22M:133 Introduction to Smooth Manifolds 3 s.h.

Group B

22M:140 Continuous Mathematical Models 3 s.h.
22M:151 Discrete Mathematical Models 3 s.h.

Each student must pass two M.S.-level comprehensive exams, chosen from analysis, differential equations with numerical methods, numerical analysis, and topology.

Program IV

Program IV is designed for nondepartmental students working toward the Ph.D. in areas that require mathematical knowledge. The program has no specific required courses. Course distribution requirements are the same as those for program I.

Students in program IV are considered to have passed the comprehensive examination for the master's degree in mathematics if they have maintained a g.p.a. of at least 3.00 in all mathematics courses taken for the M.S. in mathematics and have successfully completed the Ph.D. comprehensive examination in their chosen area.

Students in program IV are assigned a mathematics advisor, who works with them and their major advisor to plan an appropriate curriculum for the M.S. in mathematics. A suitable program of study should be approved by a mathematics advisor before the student takes the Ph.D. comprehensive examination, and a member of the mathematics faculty should serve on the Ph.D. comprehensive examination committee.

Doctor of Philosophy

The Doctor of Philosophy in mathematics requires a minimum of 72 s.h. of graduate credit. The program places strong emphasis on preparation for research and teaching. The department maintains no division between pure and applied mathematics. It cooperates in interdisciplinary doctoral programs with the College of Education (see Teaching and Learning (p. 967) in the Catalog) and the Program in Applied Mathematical and Computational Sciences (p. 1142).

Ph.D. students in mathematics must satisfy the following requirements for course work (credits and breadth), examinations, foreign language, and the Ph.D. thesis.

Students must spend at least three years in residence at a graduate college, including at least one year at The University of Iowa. They also should enroll in specific courses designated as preparatory for the Ph.D. examinations (consult the Department of Mathematics graduate studies director).

To further encourage mathematical breadth, students must earn at least 33 s.h. of graduate credit in regular courses equivalent to or more advanced than Ph.D. comprehensive examination preparatory courses. For a list of accepted 200-level and 300-level courses, and rules to ensure proper distribution, contact the department.

The Ph.D. examinations consist of a qualifying exam and a comprehensive exam. Students choose three areas from the department's list of qualifying examination areas: algebra, analysis, differential equations with numerical methods, and topology. For each qualifying area, there is a two-semester, 100-level course sequence designated as preparatory, although exams may differ from course content. The three parts of the qualifying exam are taken over a two-week period. One grade (pass, fail, conditional pass) is given on the entire three-part qualifying examination by a committee of six faculty members, two from each exam area. If the grade is fail, the committee has the option to consider each part of the exam separately, offering the student the option of pass in one or two of the areas and fail in the other(s).

The Ph.D. comprehensive exam tests students on research-related topics.

Candidates also take an oral final examination on their dissertation material.

Ph.D. students are required to demonstrate reading proficiency in French, German, or Russian by passing a reading test administered by the appropriate language department, earning a grade of B or higher in the second semester of a sequence offered by the appropriate language department, or passing a special examination approved by the Department of Mathematics graduate committee. Courses that do not carry graduate credit may be used to satisfy this requirement, but they do not count toward the required 72 s.h. of graduate credit. Students must
demonstrate language competence after enrolling in graduate school.

The most distinctive aspect of a Ph.D. is the thesis. The department expects the thesis to be an original mathematical work comparable in content and writing quality to that found in standard published research journals. The thesis is written under the supervision of a mathematics department faculty member and is approved by a committee.

**Admission**

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog. Preference for admission and funding is given to individuals applying to the Ph.D. program.

**Master of Science**

Admission to M.S. programs I, II, and III is based on a combination of undergraduate course work and grades, letters of recommendation, and test scores. Numerical standards change every year or so; exceptions may be made to the following guidelines.

Applicants must have completed work in an undergraduate program equivalent to the bachelor's degree offered by the mathematics department, with an undergraduate g.p.a. of at least 3.20. Relevance and difficulty of courses are considered when evaluating grades; grades of C or lower in mathematics courses must be balanced by grades of A. Those whose preparation does not meet this requirement may be admitted conditionally and are asked to take specific courses that cover any deficiencies.

They also must score at least 700 on the quantitative section of the GRE General Test. Applicants whose first language is not English are required to demonstrate their competence in English, normally by scoring at least 620 (paper-based), 260 (computer-based), or 105 (Internet-based) on the Test of English as a Foreign Language (TOEFL).

Applicants must submit three letters of recommendation.

**Doctor of Philosophy**

Admission to the Ph.D. program is based on a combination of undergraduate or graduate course work and grades, letters of recommendation, and test scores. Admission requirements are similar to those for the Master of Science, but the department generally seeks stronger grades and scores for doctoral admission: undergraduate or graduate g.p.a. of at least 3.40; GRE General Test quantitative score of at least 700; and for applicants whose first language is not English, scores of at least 620 (paper-based), 260 (computer-based), or 105 (Internet-based) on the Test of English as a Foreign Language (TOEFL).

**Courses**

**For Lower-Division Undergraduates**

These courses are not open to graduate students except by special arrangement with the department chair.

Credit earned in 22M:001 Basic Algebra I, 22M:008 Intermediate Algebra, and 22M:003 Basic Geometry does not count toward the major in mathematics.

The sequences 22M:025 Calculus I and 22M:026 Calculus II, and 22M:031 Engineering Mathematics I: Single Variable Calculus and 22M:032 Engineering Mathematics II: Multivariable Calculus are similar, but they cover the material in a different order and with different emphases. Students must consult with their advisor before taking the second semester of one sequence after taking the first semester of another. Students who consider taking 22M:026 Calculus II after 22M:016 Calculus for the Biological Sciences or 22M:017 Calculus and Matrix Algebra for Business must consult with their advisor.

**22M:001 Basic Algebra I**

3 s.h.

Percents, ratio and proportion, algebraic expressions and operations, simple products, linear and quadratic equations, simultaneous equations, exponents and radicals; emphasis on verbal problems.

**22M:003 Basic Geometry**

3 s.h.

Angles, triangles, polygons, areas, Pythagorean theorem, similar triangles, circles, loci, related topics. Offered spring semesters. Requirements: 22M:001 or satisfactory score on math placement exam or one year of high school algebra.

<tr>
<td>22M:005</td>
<td>Trigonometry</td>
<td>3 s.h.</td>
<td>Trigonometric functions, solutions of right and oblique triangles, complex numbers. Requirements: 22M:008, or satisfactory score on math placement exam, or two years of high school algebra and one year of high school geometry.</td>
</tr>
<tr>
<td>22M:006</td>
<td>Logic of Arithmetic</td>
<td>3 s.h.</td>
<td>Mathematical and conceptual foundations of the natural numbers used in elementary school arithmetic teaching; multiple algorithmic approaches to arithmetic and its mathematical and contextual relationships, extensions to integers, rational and irrational numbers, multiple representations. Requirements: 22M:001 or satisfactory score on math placement exam. GE: Quantitative or Formal Reasoning.</td>
</tr>
<tr>
<td>22M:008</td>
<td>Intermediate Algebra</td>
<td>4 s.h.</td>
<td>Algebraic techniques, equations and inequalities, functions and graphs, exponential and logarithmic functions, systems of equations and inequalities. Requirements: satisfactory score on math placement exam.</td>
</tr>
<tr>
<td>22M:009</td>
<td>Elementary Functions</td>
<td>4 s.h.</td>
<td>Functions, relations, coordinate systems; properties and graphs of algebraic, trigonometric, logarithmic, exponential functions; inverse trigonometric functions; properties of lines, conic sections. Requirements: 22M:008, or satisfactory score on math placement exam, or two years of high school algebra and one year of high school geometry. GE: Quantitative or Formal Reasoning.</td>
</tr>
<tr>
<td>22M:010</td>
<td>Finite Mathematics</td>
<td>4 s.h.</td>
<td>Introduction to logic, set theory, linear equations and inequalities, linear programming, matrix algebra, combinatorial probability. Requirements: 22M:008 or satisfactory score on math placement exam or two-and-a-half years of high school mathematics. GE: Quantitative or Formal Reasoning.</td>
</tr>
<tr>
<td>22M:012</td>
<td>Theory of Arithmetic</td>
<td>3 s.h.</td>
<td>Sets, cardinalities, reasoning in proofs, counterexamples, arithmetic with integers, rationals, irrationals, number theory, functions, algebraic expressions. Requirements: 22M:009 or a more advanced course or satisfactory score on math placement exam. GE: Quantitative or Formal Reasoning.</td>
</tr>
<tr>
<td>22M:013</td>
<td>Mathematics for Business</td>
<td>4 s.h.</td>
<td>Algebraic techniques, functions and functional models, exponential and logarithmic functions and models, linear programming, informal introduction to calculus; examples and applications from management, economic sciences, related areas. Requirements: 22M:008, or satisfactory score on math placement exam, or two years of high school algebra and one year of high school geometry. GE: Quantitative or Formal Reasoning.</td>
</tr>
<tr>
<td>22M:014</td>
<td>First-Year Seminar</td>
<td>1 s.h.</td>
<td>Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.</td>
</tr>
<tr>
<td>22M:015</td>
<td>Mathematics for the Biological Sciences</td>
<td>4 s.h.</td>
<td>Relations, functions, coordinate systems, graphing, polynomials, trigonometric functions, logarithmic and exponential functions; discrete mathematics, probability; examples and applications from biological sciences. Requirements: 22M:008 or satisfactory score on math placement exam or three years of high school mathematics. GE: Quantitative or Formal Reasoning.</td>
</tr>
<tr>
<td>22M:016</td>
<td>Calculus for the Biological Sciences</td>
<td>4 s.h.</td>
<td>Differential, integral calculus; differential equations, multivariable calculus; applications to life sciences. Requirements: 22M:015, or satisfactory score on math placement exam, or three and one-half years of high school mathematics including trigonometry. GE: Quantitative or Formal Reasoning.</td>

22M:017 Calculus and Matrix Algebra for Business
Quantitative methods for treating problems arising in management, economic sciences, related areas; introduction to differential and integral calculus, systems of linear equations and matrix operations. Requirements: 22M:008 or 22M:013 or satisfactory score on math placement exam. GE: Quantitative or Formal Reasoning.

22M:025 Calculus I
Fundamental concepts, methods, techniques of single-variable differential and integral calculus; differentiation, techniques of integration, series, applications. Requirements: 22M:009, or 22M:005 and 22M:008, or three and one-half years of high school mathematics including analytic geometry and trigonometry. GE: Quantitative or Formal Reasoning.

22M:026 Calculus II
Continuation of 22M:025. Prerequisites: 22M:025.

22M:027 Introduction to Linear Algebra
Vector algebra and geometry of three-dimensional Euclidean space and extensions to n-space and vector spaces; lines and planes, matrices, linear transformations, systems of linear equations, reduction to row echelon form, dimension, rank, determinants, eigenvalues and eigenvectors. Prerequisites: 22M:025 or 22M:031.

22M:028 Calculus III
Multivariable calculus; vector functions, line integrals, total differentials, gradient, implicit functions, coordinate systems, Taylor's expansion, extrema, multiple integrals, vector fields, surface integrals, Stokes' theorem. Prerequisites: 22M:026.

22M:031 Engineering Mathematics I: Single Variable Calculus
Limits, derivatives, max/min, other applications, mean-value theorem, approximating functions, concavity, curve sketching, exponential models; Riemann sums, fundamental theorem; integration techniques, improper integrals, approximations. Requirements: 22M:005 or 22M:009 or three and one-half years of high school mathematics including introduction to analytic geometry and trigonometry. GE: Quantitative or Formal Reasoning.

22M:032 Engineering Mathematics II: Multivariable Calculus
Vector geometry; functions of several variables; polar coordinates; partial derivatives, gradients, directional derivatives; tangent lines and planes; max/min/parametric curves, curvilinear motion; multiple integrals; vector fields, flows; integration on curves, work; divergence, flux, Green's theorem. Requirements: 22M:031, or score of 4 or higher on AP Calc (AB) exam, or score of 3 or higher on AP Calc (BC) exam.

22M:033 Engineering Mathematics III: Matrix Algebra
Applications, computers for matrix calculations; matrix, vector arithmetic; linear independence, basis, subspace (in R2, R3); systems of equations, matrix reduction; rank, dimension; determinants, applications; eigenvalues, eigenvectors; diagonalization, principal axis theorem. Prerequisites: 22M:031. Requirements: engineering major.

22M:034 Engineering Mathematics IV: Differential Equations
Ordinary differential equations and applications, with integrated use of computing, student projects; first-order equations; higher order linear equations; systems of linear equations, Laplace transforms; introduction to nonlinear equations and systems, phase plane, stability. Prerequisites: 22M:032 and 22M:033. Requirements: engineering major.
**22M:037 Engineering Mathematics V: Vector Calculus**  
3 s.h.  
Partial derivatives, max-min problems, integrals along curves, surfaces and solids, vector fields and conservation of energy; curl, divergence, Stokes' theorem and the divergence theorem; the classical partial differential equations and qualitative behavior of their solutions. Prerequisites: 22M:034. Requirements: engineering major.

### Elementary Topics of General Interest

These courses are not open to graduate students except by special arrangement with the department chair.

**22M:050 Introduction to Abstract Algebra I**  
3 s.h.  
Basic logic, proof methods, sets, functions, relations, mathematical induction; gradual transition from familiar number systems to abstract structures—division algorithm, unique factorization theorems; groups, subgroups, quotient groups, homomorphisms. Prerequisites: 22M:027. Requirements: concurrent enrollment in second-semester calculus.

**22M:055 Fundamental Properties of Spaces and Functions I**  
3 s.h.  
Elementary topological and analytic properties of real numbers; emphasis on ability to handle definitions, theorems, proofs. Corequisites: 22M:027. Requirements: second-semester calculus.

**22M:056 Fundamental Properties of Spaces and Functions II**  
4 s.h.  
Multivariable analysis; Bolzano-Weierstrass theorem in three-dimensional Euclidean space, differential calculus, inverse and implicit function theorems, multiple integrals, surface and line integrals, differential forms and Stokes' theorem in n-dimensional Euclidean space. Prerequisites: 22M:055. Recommendations: closed to students who have taken 22M:028.

**22M:070 Foundations of Geometry**  
3 s.h.  
Axiomatic development of common foundation for Euclidean, non-Euclidean geometry; constructions of non-Euclidean models, independence of parallel postulate. Prerequisites: 22M:026.

**22M:072 Elementary Numerical Analysis**  
3 s.h.  
Computer arithmetic, root finding, polynomial approximation, numerical integration, systems of linear equations, ordinary differential equations; use of higher-level computer language such as Matlab, Maple, Mathematica. Requirements: grade of C- or higher in 22M:026 or 22M:032. Same as 22C:072.

**22M:081 Geometry for Elementary Teachers**  
3 s.h.  
Points, lines, planes; measurement, two- and three-dimensional coordinate geometry, transformational geometry and vectors; applications of geometry to solve real-world problems. Offered spring semesters. Prerequisites: 22M:001. Requirements: elementary teacher certificate candidacy or certification.

**22M:095 Introduction to Research Opportunities**  
1 s.h.  
Modern mathematics research areas and activities; seminar. Prerequisites: 22M:027.

**22M:096 Introduction to Mathematics Research**  
3 s.h.  
Research experience; students study an elementary topic of active research, then work in groups under faculty supervision. Prerequisites: 22M:026 and 22M:027.

### For Upper-Division Undergraduates

Graduate students in mathematics may not receive credit for 22M:100 Introduction to Ordinary Differential Equations, 22M:104 Introduction

**22M:100 Introduction to Ordinary Differential Equations**  
2-3 s.h.
First-order ordinary differential equations; second-order linear differential equations; series solutions; higher-order linear and matrix differential equations; existence and uniqueness theorems. Prerequisites: 22M:027 and 22M:028, or 22M:056.

**22M:104 Introduction to Matrix Theory**  
3 s.h.
Vector algebra and geometry of three-dimensional Euclidean space and extensions to n-space and vector spaces; lines and planes, matrices, linear transformations, systems of linear equations, reduction to row-echelon form, dimension, rank, determinants, eigenvalues, eigenvectors. Requirements: graduate standing.

**22M:105 Basic Analysis**  
3 s.h.
Elementary topological and analytical properties of real numbers; emphasis on ability to handle definitions, theorems, proofs; same material as 22M:055 for non-mathematics graduate students. Requirements: graduate standing, one year of calculus, and one semester of linear algebra.

**22M:107 History of Mathematics**  
3 s.h.
May include numerical systems; Babylonian, Egyptian, and Greek mathematics; mathematics of other cultures; calculus; 19th- and 20th-century mathematics. Requirements: two semesters of calculus and one semester of linear algebra.

**22M:109 Classical Analysis**  
3 s.h.
Multivariable calculus, vector functions, line integral, total differentials, gradient, implicit functions, coordinate systems, Taylor’s expansion, extrema, multiple integrals, vector fields, surface integrals, Stokes’s theorem. Requirements: graduate standing and one year of calculus.

**22M:115 Introduction to Analysis I**  
3 s.h.
Real numbers, fundamentals of limits and continuity in the context of metric spaces; Lebesgue theory of functions of one real variable. Requirements: 22M:055 or graduate standing.

**22M:116 Introduction to Analysis II**  
3 s.h.
Local theory of analytic functions of one complex variable, power series, classical transcendental functions; spaces of functions. Prerequisites: 22M:115.

**22M:118 Complex Variables**  
3 s.h.
Geometry of complex plane, analytic functions; Cauchy-Goursat theorem, applications; Laurent series, residues, elementary conformal mapping. Prerequisites: 22M:028 or 22M:056 or 22M:109.

**22M:120 Abstract Algebra I**  
3 s.h.
Groups and homomorphisms, Sylow Theorems, rings, finitely generated modules over a PID, Galois theory, vector spaces, linear transformations and matrices, canonical forms. Prerequisites: 22M:050.

**22M:121 Abstract Algebra II**  
3 s.h.
Continuation of 22M:120. Prerequisites: 22M:120.

**22M:123 Foundations of Set Theory**  
3 s.h.
Set theory as used in abstract mathematics; equivalent forms of axiom of choice, cardinal numbers and their arithmetic, ordinal numbers and transfinite induction. Requirements: 22M:050 or 22M:055 or graduate standing.

**22M:124 Foundations of Logic**  
3 s.h.
Propositional calculus, Boolean algebras, introduction to axiomatic theories. Requirements: 22M:050 or 22M:055 or graduate standing.

**22M:125 Qualifying Exam Preparation Seminars**  
0 s.h.
Exam preparation in pure and applied mathematics.

**22M:126 Elementary Theory of Numbers**  
2-3 s.h.
Factorization, congruence, Diophantine equations, law of quadratic reciprocity. Prerequisites: 22M:050.

**22M:127 Matrix Theory**  
3 s.h.  
Vector spaces, linear transformations, matrices, equivalence of matrices, eigenvalues and eigenvectors, canonical forms, similarity, orthogonal transformations, bilinear and quadratic forms. Prerequisites: 22M:027 or 22M:104.

**22M:132 General Topology**  
3 s.h.  
Basic concepts of general topological spaces and continuous functions: countability of sets, topological space, comparing topologies; subspace, order, and product topologies; closed sets and limit points, continuous functions, metric topology, quotient topology (including projective spaces and gluing cells), connectedness in the real line and in general spaces, components and local connectedness, compactness in Euclidean and general spaces, limit point compactness, local compactness, countability axioms, separation axioms, normal spaces and Urysohn’s Lemma, complete metric spaces, convergence in function spaces. Prerequisites: 22M:055.

**22M:133 Introduction to Smooth Manifolds**  
3 s.h.  

**22M:140 Continuous Mathematical Models**  
3 s.h.  
Building and analyzing mathematical models involving differential equations for specific problems from engineering and the sciences; modeling project. Prerequisites: 22M:100.

**22M:142 Nonlinear Dynamics with Numerical Methods**  
3 s.h.  
Nonlinear differential equations, one- and two-dimensional flows, stability, phase plane analysis, limit cycles, bifurcations, chaos, fractals; Euler’s, multistep, and Runge-Kutta numerical methods. Prerequisites: 22M:055 and 22M:100.

**22M:144 Partial Differential Equations with Numerical Methods**  
3 s.h.  

**22M:150 Introduction to Discrete Mathematics**  
3 s.h.  
Basic methods of enumerative combinatorics, inclusion-exclusion and generating functions, applications of group theory (Pólya-Burnside theorem). Offered fall semesters. Prerequisites: 22M:050.

**22M:151 Discrete Mathematical Models**  
3 s.h.  
Case history approach to discrete models from various fields (e.g., genetics, psychology, health care, scheduling); construction, interpretation, analysis, simulation, testing of models; development of discrete mathematics. Prerequisites: 22M:027.

**22M:160 Introduction to Differential Geometry I**  
3 s.h.  
Space curves, Frenet frames, intrinsic and extrinsic geometry of surfaces, first and second fundamental forms, isometries, Gauss map, Gaussian curvature, Theorema Egregium, geodesics, covariant differentiation; may include global theory of curves and Gauss-Bonnet theorem. Prerequisites: 22M:028 and 22M:055, or 22M:056 or 22M:100.

**22M:161 Introduction to Differential Geometry II**  
3 s.h.  
Continuation of 22M:160; geometry of surfaces in Euclidean space, Gauss-Bonnet theorem and its applications, minimal surfaces, abstract surfaces; may include Riemannian manifolds, connections, elementary Lie groups, applications of differential geometry to other disciplines (physics, engineering). Prerequisites: 22M:160.
22M:170 Numerical Analysis: Nonlinear Equations and Approximation Theory
3 s.h.
Root finding for nonlinear equations; polynomial interpolation; polynomial approximation of functions; numerical integration. Prerequisites: 22M:027 and 22M:028, or 22M:037 or 22M:056. Requirements: knowledge of computer programming. Same as 22C:170.

22M:171 Numerical Analysis: Differential Equations and Linear Algebra
3 s.h.
Numerical methods for initial value problems for ordinary differential equations; direct and iterative methods for linear systems of equations; eigenvalue problems for matrices. Prerequisites: 22M:027 and 22M:028, or 22M:037 or 22M:056; and 22M:100. Requirements: knowledge of computer programming. Same as 22C:171.

22M:174 Optimization Techniques
3 s.h.

22M:178 High Performance and Parallel Computing
3 s.h.
Parallel scientific computing methods such as parallel algorithms for dense and sparse matrices; implementation using libraries such as MPI; current topics such as grid computing. Requirements: linear algebra or numerical analysis course, and a programming language. Same as 22C:177.

22M:191 Topics in Technology Uses in Mathematics
2 s.h.

22M:195 Current Issues in Mathematics Education
1-3 s.h.
Recent curriculum developments, experimental programs, research relevant to classroom instruction, trends in education that may have a significant impact on mathematics programs. Same as 07S:235.

22M:196 Topics in Mathematics
arr.

22M:197 Individual Study and Honors in Mathematics
arr.

22M:199 Readings in Mathematics
arr.

Core Graduate Courses

22M:200 Introduction to Differential Topology
3 s.h.
Manifolds, functions: tangent bundle, Morse-Sard theorem, transversality, submanifolds, tubular neighborhoods, normal bundles, vector fields, degree and intersection theory, fixed-point theory, Morse theory. Prerequisites: 22M:133.

22M:201 Introduction to Algebraic Topology
3 s.h.
Homotopy, fundamental group and covering spaces, CW and simplicial complexes, simplicial homology, Euler characteristic. Prerequisites: 22M:132.

22M:203 Topology of Manifolds
3 s.h.
Embedding, knotting, immersions; isotopy, homotopy, regular neighborhoods, engulfing, surgery, cobordism; three-, four-, and higher dimensional manifolds. Prerequisites: 22M:200 and 22M:201.

22M:205 Introduction to Algebra I
3 s.h.
Abstract algebra: semigroups, groups, rings, integral domains, polynomial rings, division rings, fields, vector spaces, matrices, modules over rings, lattices, categories. Prerequisites: 22M:120.

22M:206 Introduction to Algebra II
3 s.h.
Continuation of 22M:205. Prerequisites: 22M:205.

22M:210 Analysis I
3 s.h.
**22M:211 Analysis II** 3 s.h.

**22M:213 Ordinary Differential Equations I** 3 s.h.
Existence, uniqueness, continuous dependence of solutions to initial value problems, autonomous systems; Poincare-Bendixon theory, linear systems and linearizations, perturbation, stability, periodic solutions, bifurcation, comparison and oscillation theorems, boundary value problems. Prerequisites: 22M:116.

**22M:214 Ordinary Differential Equations II** 3 s.h.
Continuation of 22M:213. Prerequisites: 22M:213.

**22M:216 Partial Differential Equations I** 3 s.h.
Elliptic equations; potential theory, maximum principle, a priori estimate, Dirichlet problem; initial value problem for parabolic equations; hyperbolic equations; Duhamel’s principle, Cauchy problem; nonlinear equations, characteristics, canonical form, first-order systems. Prerequisites: 22M:116.

**22M:217 Partial Differential Equations II** 3 s.h.
Continuation of 22M:216. Prerequisites: 22M:216.

**22M:224 First-Year Graduate Seminar** 1 s.h.
Introduction to mathematics graduate program. Requirements: first-year graduate standing in mathematics.

**Primarily for Graduate Students**

**22M:210 Differential Geometry II** 3 s.h.
Continuation of 22M:210; varied topics, may include study of existence and uniqueness of solutions to differential equations and systems related to geometry, indefinite metrics, Lie groups, attributes of manifolds with particular curvature properties, global Riemannian geometry, Kahler geometry, applications of differential geometry to other disciplines. Prerequisites: 22M:210.

**22M:260 Differential Geometry I** 3 s.h.
Differentiable manifolds, forms, tensors, Riemannian metrics, isometries, connections, geodesics, curvature, related topics.

**22M:261 Differential Geometry II** 3 s.h.
Continuation of 22M:260; varied topics, may include study of existence and uniqueness of solutions to differential equations and systems related to geometry, indefinite metrics,Lie groups, attributes of manifolds with particular curvature properties, global Riemannian geometry, Kahler geometry, applications of differential geometry to other disciplines. Prerequisites: 22M:260.

**22M:270 Theoretical Numerical Analysis I** 3 s.h.

**22M:271 Theoretical Numerical Analysis II** 3 s.h.
Continuation of 22M:270. Prerequisites: 22M:270.

**22M:280 Introduction to Financial Mathematics** 2-3 s.h.
Financial mathematics; option pricing and portfolio optimization, stochastic integration, methods due to Ito and Feynman-Kac, Monte-Carlo simulation. Prerequisites: 22M:210.

**22M:303 Topics in Analysis** 2-3 s.h.
Measure theory, integration, general topology. Repeatable.

**22M:305 Topics in Topology** 2-3 s.h.
May include homotopy theory, topology of 3-manifolds, 4-manifolds, or higher-dimensional manifolds, knotting and embedding problems, fiber bundles and characteristic classes, K-theory, PL manifolds, infinite-dimensional manifolds. Repeatable.

Medieval Studies

Chair
Carin M. Green

Coordinator
Robert Bork

Undergraduate nondegree program:
Certificate in Medieval Studies
Web site: http://www.uiowa.edu/~medieval/

The Medieval Studies Program offers an undergraduate program and a selection of courses open to students in all majors. The Medieval Studies Program is administered by the Department of Classics.

Undergraduate Program

• Certificate in Medieval Studies

Certificate

The Certificate in Medieval Studies requires a minimum of 21 s.h. in medieval studies course work. The program enables students to combine study in three or more disciplines into an organized investigation of the Middle Ages, a rich historical period that continues to influence today’s culture. Students may earn the Certificate in Medieval Studies as a distinct interest or combine it with focused study in areas such as art history, classics, comparative literature, languages (e.g., French, German, Italian, Portuguese, Spanish), music, philosophy, religion, theatre, or gender, women’s, and sexuality studies.

The certificate program is open to current undergraduate students and to individuals who hold University of Iowa bachelor’s degrees and are not enrolled in graduate or professional degree programs. Completion of the certificate is noted on the student’s transcript.

Students must include courses from at least three different departments in their work for the certificate; they may count a maximum of 10 s.h. from a single department or program. Courses used to fulfill General Education Program (p. 381) requirements or the requirements of a major or minor may be counted toward the certificate in most cases. Up to 6 s.h. of transfer credit may be counted toward certificate requirements, with the Certificate in Medieval Studies coordinating committee’s approval; contact the certificate program’s coordinator.

Students must maintain a g.p.a. of at least 2.00 in work for the certificate.

All certificate students must complete one of the following two courses and should do so early in their study program.

<table>
<thead>
<tr>
<th>Course</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>162:109 Medieval Civilization I</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>162:110 Medieval Civilization II</td>
<td>3 s.h.</td>
</tr>
</tbody>
</table>

Remaining courses may be chosen from those listed under "Associated Courses" below and from those listed under "Medieval Studies Courses" at the end of this section. Students should consult regularly with a medieval studies advisor while planning and completing their study programs.

The Medieval Studies Program strongly encourages students to complete course work in a language relevant to the medieval period. Latin is recommended for anyone intending to pursue graduate study in the field. Many language courses have prerequisites, and some are offered irregularly, so students should complete their language course work as early as possible. The following language courses are approved for the medieval studies certificate.

<table>
<thead>
<tr>

<td>3 s.h.</td>
</tr>
</tbody>
</table>

Sample plan for a student with a general interest in medieval studies:
008:140 Elementary Old English 3 s.h.
008:146 Chaucer 3 s.h.
16E:117 History of the Medieval Church 3 s.h.
16E:119 Women, Power, and Society in Medieval Europe 3 s.h.
025:144 History of Music I 3 s.h.
035:160 The Cid in History and Legend 3 s.h.
162:109 Medieval Civilization I 3 s.h.

Associated Courses

The following courses are approved for the medieval studies certificate. Other courses may be approved for satisfaction of certificate requirements; students who wish to have a course approved should make a request to the Certificate in Medieval Studies coordinating committee. The coordinating committee revises the list of approved courses as necessary.

ARABIC LANGUAGE AND LITERATURE

195:111 Intermediate Modern Standard Arabic I 5 s.h.
195:112 Intermediate Modern Standard Arabic II 5 s.h.

ART AND ART HISTORY

01H:040 Introduction to Medieval Art 3 s.h.
01H:199 Topics in Art History (when topic is medieval) 3 s.h.

CENTER FOR THE BOOK

108:182/16E:120 The Book in the Middle Ages 3 s.h.
108:183/16E:118/021:258 The Transition from Manuscript to Print 3 s.h.

CLASSES

20L:011 World of Cicero 3 s.h.
20L:012 Golden Age of Roman Poetry 3 s.h.

ENGLISH

008:060 Selected Works of the Middle Ages 3 s.h.
008:101 Literature and Culture of the Middle Ages 3 s.h.
008:140 Elementary Old English 3 s.h.
008:141 Old English Beowulf 3 s.h.
008:142 Medieval Celtic Literature 3 s.h.
008:144/049:181 Medieval Drama 3 s.h.
008:146 Chaucer 3 s.h.

FRENCH

009:113 French Civilization 3 s.h.

GERMAN

13E:080 King Arthur Through the Ages 3 s.h.

HISTORY

16E:051 Colloquium for History Majors (European) (when topic is medieval) 3 s.h.
16E:108 The Twelfth-Century Renaissance 3 s.h.
16E:109 Medieval Civilization I 3 s.h.
16E:110 Medieval Civilization II 3 s.h.
16E:111 Medieval Intellectual History 300-1150 3 s.h.
16E:112 Medieval Intellectual History 1150-1500 3 s.h.
16E:113 Economic and Social History of Medieval Europe 3 s.h.
16E:116 Ireland in the Early Middle Ages 3 s.h.
16E:117 History of the Medieval Church 3 s.h.
16E:118/108:183/021:258 The Transition from Manuscript to Print 3 s.h.
16E:119 Women, Power, and Society in Medieval Europe 3 s.h.
16E:120/108:182 The Book in the Middle Ages 3 s.h.
16E:121 The Middle Ages in Film 3 s.h.
16E:139 Ancient and Medieval Science 3 s.h.
16W:051 Colloquium for History Majors (World) (when topic is medieval) 3 s.h.

ITALIAN

018:119 Medieval Italian Literature 3 s.h.
018:120 Medieval and Renaissance Italian Literature 3 s.h.

MUSIC

025:144 History of Music I 3 s.h.
025:145 Counterpoint Before 1600 3 s.h.

PHILOSOPHY

026:112 Medieval Philosophy 3 s.h.

RELIGIOUS STUDIES

032:025 Medieval Religion and Culture 3 s.h.
032:100 Biblical Hebrew I 4 s.h.
032:101 Biblical Hebrew II 4 s.h.
032:132 Medieval and Reformation Religious Thought 3 s.h.
SPANISH AND PORTUGUESE

035:160 The Cid in History and Legend 3 s.h.
035:181 Topics in Spanish Literature (when topic is medieval) 3 s.h.

THEATRE ARTS

049:181/008:144 Medieval Drama 3 s.h.

Courses

162:101 Literature and Culture of the Middle Ages 3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: Medieval and Early Modern Literature and Culture. PERIOD: Early Literatures Through 17th Century. Same as 008:101.

162:108 The Twelfth-Century Renaissance 3 s.h.
Social, economic, intellectual, and cultural rebirth of Europe in the 12th century; Latin learning and education; developments in vernacular literature, art, architecture, new religious orders and institutions, pilgrimage and Crusade. Same as 16E:108.

162:109 Medieval Civilization I 3 s.h.
Europe from the decline of Roman empire to the eleventh century; cultural, political, economic, artistic and architectural foundations of Western civilization. Same as 16E:109.

162:110 Medieval Civilization II 3 s.h.
Europe from the eleventh century to the Italian Renaissance: cultural, political, economic, artistic, and architectural foundations of Western civilization. GE: Historical Perspectives. Same as 16E:110.

162:111 Medieval Intellectual History 300-1150 3 s.h.
Philosophy, art, literature, religious culture of Europe from waning of classical intellectual modes of culture in late antiquity, to their recovery in 12th century. Same as 16E:111.

162:112 Medieval Intellectual History 1150-1500 3 s.h.
European philosophy, religion, literature, art from 12th-century rise of scholasticism; their transformation in period of Copernicus, Luther. Same as 16E:112.

162:113 Economic and Social History of Medieval Europe 3 s.h.
Changes in western Europe from 300 to 1500 A.D.; feudalism, manorialism, revival of towns, heresy, women, monasticism, agricultural and commercial revolutions, Black Death. GE: Historical Perspectives. Same as 16E:113.

162:116 Ireland in the Early Middle Ages 3 s.h.
Ireland and the northern British islands 400-1000 CE, a region of small kingdoms and thin population, lacking natural resources, far from Rome and ancient centers of Mediterranean culture; development of civilization, including monastic, legal, theological, and scholarly traditions that had a major impact on continental Europe; early medieval Irish history; introduction to the world of historical scholarship. Same as 16E:116.

162:117 History of the Medieval Church 3 s.h.
Development of Christianity to end of great schism; rise of Roman primacy, development of monasticism, orthodox and heterodox groups. GE: Historical Perspectives. Same as 16E:117.

162:119 Women, Power, and Society in Medieval Europe 3 s.h.

162:121 The Middle Ages in Film 3 s.h.
How films that represent medieval events and literature may be analyzed to reveal the culture and times in which the films were made; Middle Ages and European nationalistic mythmaking as represented in film. Same as 16E:121.
162:139 Ancient and Medieval Science  3 s.h.
Greeks' initiation of scientific inquiry; developments in astronomy, cosmology, optics, mathematics, physics, medicine, psychology in ancient and medieval societies of Middle East, Europe. Same as 16E:139.
Microbiology

Head
Patrick M. Schlievert

Professors
Lee-Ann Allen (Internal Medicine), Michael A. Apicella (Internal Medicine), Gail A. Bishop (Internal Medicine), John E. Butler, Steven Clegg, John T. Harty (Pathology), Bradley D. Jones, David M. Lubaroff (Urology), Linda L. McCarter, Paul B. McCray (Pediatrics), William Nauseef (Internal Medicine), Stanley Perlman (Pediatrics), Richard J. Roller, Paul Rothman (Internal Medicine), Patrick M. Schlievert, Jack T. Stapleton (Internal Medicine), George V. Stauffer, Mark F. Stinski, Jerrold P. Weiss (Internal Medicine), Mary E. Wilson (Internal Medicine)

Professors emeriti
Robert F. Ashman (Internal Medicine), John Cazin Jr., Charles D. Cox, Michael G. Feiss, David T. Gibson, Louis G. Hoffmann, William Johnson, Erich W. Six, Donald P. Stahlcy, C. Martin Stoltzfus

Associate professors
Alex Horswill, Jon Houtman, John R. Kirby, Al J. Klingelhutz (Radiation Oncology), Kevin Legge (Pathology), Wendy J. Maury, Steven M. Varga (Pathology), David S. Weiss, Timothy L. Yahr

Associate professor emeritus
Jose E. Rodriguez

Assistant professors
Craig D. Ellermeier, Chioma M. Okeoma, Howard Xue

Lecturers
Jennifer D. Boddicker, Marcia L. Cordts, Linda M. Knudtson

Undergraduate degree: B.S. in Microbiology
Undergraduate nondegree program: Minor in Microbiology
Graduate degrees: M.S., Ph.D. in Microbiology
Web site: http://www.uiowa.edu/microbiology

Study in the Department of Microbiology is dedicated to the branch of biological sciences that deals with the smallest living things: bacteria, archaea, fungi, algae, protozoa, and viruses. It is coupled with immunology, the study of the response of higher organisms to foreign substances.

Microbiology and immunology are at the forefront of the modern biological revolution. Microbes are often the experimental subjects of choice for examining basic genetic and biological phenomena because of their small size, rapid growth rate, and relative simplicity. A significant portion of contemporary biochemical research employs microbiological and immunological methods.

Current research is making theoretical and practical advances concerning microbial species and viruses that infect animals, including man, plants, and other microbes; the use of comparative genomics, gene expression profiling, and recombinant DNA methods to analyze basic biological processes and generate valuable products; the nature and occurrence of microbial life in extreme or unusual environments; microbial synthesis and modification of antibiotics and other natural products; the role of microbes in stabilization of the biosphere by recycling and detoxifying waste products; the genetics and regulation of metabolic processes; and the genetics and regulation of the immune response, including characterization of mechanisms used by bacteria to signal one another and characterization of interactions between different types of immune cells and their targets.

The Department of Microbiology offers degree programs for undergraduates and for graduate students and administers the academic curriculum at both levels. The College of Liberal Arts and Sciences grants undergraduate degrees in microbiology and oversees undergraduate academic policy relating to the student record. The Graduate College grants graduate degrees in microbiology.

Undergraduate Program
- Major in microbiology (Bachelor of Science)
- Minor in microbiology

Microbiology is an excellent major for undergraduate students who want a good general education with emphasis on an important and interesting branch of biological sciences. Graduates find employment opportunities in government, hospitals, public health laboratories, research laboratories, and industrial laboratories (food, dairy, chemical, pharmaceutical, and genetic engineering companies). Those who pursue advanced degrees have more advanced career opportunities in these same areas as well as in college and university teaching.

Bachelor of Science

The Bachelor of Science with a major in microbiology requires a minimum of 120 s.h., including 63-64 s.h. of work for the major (21 s.h. in microbiology and 42-43 s.h. in supporting course work). Students must complete at least 12 s.h. of the required 21 s.h. in microbiology courses at The University of Iowa. Students also must
complete the College of Liberal Arts and Sciences General Education Program (p. 381).

The major requires the following course work.

**Microbiology Courses**

Students earn 21 s.h. in microbiology courses, as follows.

- 061:157 General Microbiology (with a grade of C or higher) 5 s.h.
- 061:163 Seminar: Microbiology (taken during last two semesters before graduation) 2 s.h.
- Additional microbiology courses, with at least 12 s.h. in courses numbered 061:147 and above, excluding 061:164 and 061:220 14 s.h.

Students must earn a grade of C or higher in 061:157 in order to take more advanced microbiology courses.

Students must take 061:163 once for credit during their last two semesters before graduation. They may apply a maximum of 2 s.h. earned in the course toward the major, but they are encouraged to take it for 0 s.h. during other semesters after they have completed 061:157.

A maximum of 4 s.h. earned in 061:161 Undergraduate Research in Microbiology may be counted toward the major. However, honors students must complete 23 s.h. of microbiology courses for the major and may count 6 s.h. earned in 061:171 Honors Undergraduate Research in Microbiology; see "Honors" below.

**Supporting Course Work**

In addition to the required 21 s.h. of microbiology, the major requires supporting course work. These courses may not be taken pass/nonpass.

- 002:010-002:011 Principles of Biology I-II 8 s.h.
- 004:011-004:012 Principles of Chemistry I-II 8 s.h.
- 004:121-004:122 Organic Chemistry I-II 6 s.h.
- 004:141 Organic Chemistry Laboratory 3 s.h.
- 099:120 Biochemistry and Molecular Biology I 3 s.h.
- 099:130 Biochemistry and Molecular Biology II 3 s.h.

One of these sequences:

- 029:011-029:012 College Physics I-II 8 s.h.
- 029:081-029:082 Introductory Physics I-II 8 s.h.

In addition, the following course may be recommended for some students.

- 08N:080 Nonfiction Writing 3 s.h.

**Four-Year Graduation Plan**

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

Before the third semester begins: 002:010 Principles of Biology I; 004:011 Principles of Chemistry I, and 004:012 Principles of Chemistry II; an approved calculus or biostatistics class; and at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: 002:011 Principles of Biology II; 004:121 Organic Chemistry I, 004:122 Organic Chemistry II, and 004:141 Organic Chemistry Laboratory; 061:157 General Microbiology; and at least one-half of the semester hours required for graduation

Before the seventh semester begins: five more courses in the major and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: another 10-12 s.h. of course work

During the eighth semester: enrollment in all remaining course work in the major, all remaining required General Education courses, and a sufficient number of semester hours to graduate

**Honors**

Microbiology majors who are members of the University of Iowa Honors Program may enroll in the honors program in microbiology. Membership in the University Honors Program requires that students maintain a cumulative University of Iowa g.p.a. of at least 3.33. Microbiology honors students also must maintain a g.p.a. of at least 3.33 in microbiology courses. To graduate with
honors in the major, students must complete 23 s.h. of course work in microbiology, including 6 s.h. in 061:171 Honors Undergraduate Research in Microbiology, which introduces them to experimental research. At the end of the research, they must successfully present written and oral reports.

**Minor**

The minor in microbiology requires a minimum of 15 s.h. in microbiology courses, including 12 s.h. in advanced courses taken at The University of Iowa. For the minor, courses numbered 061:147 Survey of Immunology and above, except 061:164 Nursing Microbiology, are considered advanced. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass. Students may count a maximum of 2 s.h. earned in 061:161 Undergraduate Research in Microbiology or 061:171 Honors Undergraduate Research in Microbiology, and 2 s.h. earned in 061:163 Seminar: Microbiology, toward the minor. They also may count 061:218 Microscopy for Biomedical Research, but not 061:220 Advanced Microscopy for Biomedical Research.

**Graduate Programs**

- Master of Science in microbiology
- Doctor of Philosophy in microbiology

Graduate study in microbiology is designed to help students become highly qualified in microbiology research and teaching. Admitted graduate students usually pursue the Ph.D.

Graduate study is offered in six subdisciplines: pathogenic bacteriology, microbial genetics, immunology, microbial physiology, animal virology, and bioinformatics. Several areas involve interdisciplinary training both within and outside the department, so students gain broad experience during their course of study. Students also may pursue interdisciplinary Ph.D. programs in genetics (p. 1155), immunology (p. 1161), and molecular and cellular biology (p. 1180).

During their first year, students rotate in three laboratories of their choice and are advised by the Graduate Student Advisory Committee. At the end of March of the first year, they choose a research supervisor who chairs their advisory committee. The committee provides intellectual and research guidance for the student’s training.

The Department of Microbiology cooperates with other University of Iowa departments to give students ample access to diverse course offerings, seminars, and research programs. For example, microbiology students may participate in courses and seminars in immunology, genetics, molecular and cellular biology, biocatalysis/biotechnology, and electron microscopy.

All students admitted to advanced degree programs are expected to assist in departmental teaching.

**Master of Science**

The Master of Science program in microbiology requires a minimum of 30 s.h. of graduate credit. M.S. students are required to earn a minimum of 12 s.h. in microbiology courses chosen from three of the department’s six subdisciplines. They may substitute a course they have already taken (at The University of Iowa or elsewhere) for a course requirement, with the M.S. advisory committee’s approval. Additional course requirements depend on students’ interests and the advice of the examining committee.

Students must write a thesis based on their own research and defend it satisfactorily in an oral examination. No more than 9 s.h. of credit for thesis research may be counted toward the 30 s.h. required for the Master of Science.

**Doctor of Philosophy**

The Doctor of Philosophy program in microbiology requires a minimum of 72 s.h. of graduate credit. Ph.D. students are required to earn approximately 10 s.h. of credit in graduate-level microbiology courses. They may substitute a course they have already taken (at The University of Iowa or elsewhere) for a course requirement, with the Ph.D. advisory committee’s approval.

Students must pass a comprehensive examination before their fourth semester in the program and write a thesis based on their own research. The thesis must be defended satisfactorily in an oral examination.

**Admission**

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate (p. 1117) College section of the Catalog. They should have a cumulative g.p.a. of at least 3.00 and must have completed courses in biology, chemistry (inorganic and organic), mathematics including calculus, and physics. Those admitted with deficiencies must complete the relevant course work during their first year of graduate study. Admission is determined through a review and formal vote by the faculty. Preference is given to students applying for the Ph.D. program.
Facilities

The Department of Microbiology is situated on the University of Iowa health sciences campus, where it shares the Bowen Science Building with the Departments of Anatomy and Cell Biology, Biochemistry, Molecular Physiology and Biophysics, and Pharmacology. Laboratory space and modern equipment are available for teaching and research.

Courses

061:005 Microbes and Our World  
2 s.h.
Bacteria, viruses, and parasites and their role in shaping human health, industry, current affairs, history.

061:015 Web-Based Microbes and Our World  
2 s.h.
Bacteria, viruses, and other microorganisms; ways in which microbes affect our health, economy, and environment; how humans have harnessed microbial growth; how microbes have shaped human experience and continue to play key roles in modern life.

061:103 Principles of Infectious Diseases  
5 s.h.
Principles and methods essential to study of microorganisms, their isolation and identification; microorganisms in infectious diseases; current immunology concepts. Requirements: M.D. enrollment.

061:104 Principles Infectious Diseases--Physician Assistant  
5 s.h.
Principles and methods essential to study of microorganisms, their isolation and identification; microorganisms in infectious diseases; current immunology concepts. Requirements: Physician Assistant Program enrollment.

061:112 Pharmacy Microbiology  
4 s.h.
Medical microbiology: bacteriology, immunology, pathogenic bacteriology, virology, mycology, parasitology. Requirements: pre-pharmacy standing.

061:113 Dental Microbiology  
3 s.h.

061:147 Survey of Immunology  
3 s.h.
Major features of the evolutionary, ontogenic, and comparative development of innate and adaptive immune systems and their functions at the cellular and molecular levels. Prerequisites: 002:010 and 002:011.

061:157 General Microbiology  
5 s.h.
Principles of microbial diversity, microbial genetics, physiology and metabolism, pathogenic microbiology, virology, immunology, industrial and environmental microbiology; laboratory emphasis on basic techniques. Prerequisites: 002:010.

061:159 Pathogenic Bacteriology  
5 s.h.
Pathogenic bacteria, with emphasis on mechanisms of pathogenicity, laboratory methods for isolation, identification; laboratory emphasis on advanced methods for study of pathogenic bacteria. Requirements: grade of C or higher in 061:157.

061:160 Microbial Physiology  
3 s.h.
Bacterial genomes, cell structure, growth, energy metabolism, biosynthesis, mechanisms of signal transduction and regulation. Requirements: grade of C or higher in 061:157.

061:161 Undergraduate Research in Microbiology  
arr.
Experimental research under faculty supervision. Prerequisites: 002:010.

061:163 Seminar: Microbiology  
2 s.h.
Current topics in microbiology, immunology. Requirements: grade of C or higher in 061:157 and senior standing.
061:164 Nursing Microbiology  4 s.h.
Overview of bacteria, viruses, and eukaryotic microorganisms that cause human disease; microbial structure, growth control and reproduction; immunology in the context of host defense mechanisms. Requirements: pre-nursing student standing. Corequisites: 002:002 or 002:010 or 002:021, if not taken as a prerequisite.

061:168 Introduction to Animal Viruses  3 s.h.
Basic physical, chemical, and biological properties of animal viruses; association with human disease. Requirements: grade of C or higher in 061:157.

061:170 Microbial Genetics  3 s.h.
Genetics of bacteria, bacteriophages. Requirements: grade of C or higher in 002:128 or 061:157.

061:171 Honors Undergraduate Research in Microbiology  arr.
Experimental research under faculty supervision. Prerequisites: 002:010. Requirements: microbiology major, junior or senior standing, 3.33 overall g.p.a, and 3.33 g.p.a. in microbiology courses.

061:175 Microbial Genetics Laboratory  3 s.h.
Basic principles of genetic analysis of bacteria and bacteriophage. Prerequisites: 061:170.

061:178 Animal Viruses Laboratory  2 s.h.
Basic techniques and approaches in animal virology, including virus detection, virus growth measurement, and virus genetics. Prerequisites: 061:157. Corequisites: 061:168.

061:179 Bacterial Diversity  3.5 s.h.
Analysis of bacteria from varied habitats; emphasis on the physiological basis and molecular characteristics of diversity. Prerequisites: 061:157.

061:190 Web-Based Nursing Microbiology  4 s.h.
Nursing microbiology, principles of immunology; web-based instruction. Requirements: pre-nursing standing. Corequisites: 002:002 or 002:010 or 002:021, if not taken as a prerequisite.

061:201 Graduate Immunology  3 s.h.
Ontogeny, activation, and function of T lymphocytes and B lymphocytes; innate immune effector mechanisms; major histocompatibility complex; antigen presentation; thymocyte positive and negative selection; signaling of T lymphocytes, B lymphocytes; emphasis on experimental methods for analysis of these processes. Requirements: (for 148:201) college biology, general chemistry, and introductory immunology courses; (for 061:201) courses in college biology, genetics, general chemistry, and introductory immunology. Recommendations: (for 148:201) courses in biochemistry and genetics; (for 061:201) biochemistry course. Same as 148:201.

061:207 Advanced Topics in Immunology  3 s.h.

061:217 Integrated Topics in Infectious Diseases  1 s.h.
Clinical cases used to raise questions in host-parasite interactions; case/scientific exposés followed by related journal club discussions at next class session. Same as 148:217.

061:218 Microscopy for Biomedical Research  arr.
Preparation, analysis of biomedical projects by light and electron microscopy. Prerequisites: 002:114. Same as 060:218.
061:220 Advanced Microscopy for Biomedical Research
Technically advanced microscopy methods for research; individualized laboratory experience with opportunity to explore application of microscopy methods. Requirements: (for 060:220) an introductory microscopy course; (for 002:220) 002:218 or 060:218 or 061:218 or 012:156 or 052:156 or 060:156; (for 061:220) an introductory EM course. Same as 002:220, 060:220.

061:221 Advanced Topics in Prokaryotic Biology Module 1
Cell division and sporulation; development of critical thinking, experimental approach and design, writing, and oral presentation skills through primary literature and course specific assignments (proposal writing, writing manuscript reviews, oral presentations, small group discussions). Requirements: graduate standing in microbiology.

061:222 Advanced Topics in Prokaryotic Biology Module 2
Subversion of innate immune response by Gram-positive and Gram-negative bacteria; development of critical thinking, experimental approach and design, writing, and oral presentation skills through exposure to primary literature and assignments (proposal writing, writing manuscript reviews, oral presentations, small group discussions). Requirements: graduate standing in microbiology.

061:223 Advanced Topics in Prokaryotic Biology Module 3
Development of critical thinking, experimental approach and design, writing, and oral presentation skills through exposure to selected topics in microbiology and assignments (proposal, writing manuscript reviews, oral presentations, small group discussions). Requirements: graduate standing in microbiology.

061:224 Advanced Topics in Prokaryotic Biology Module 4
Development of critical thinking, experimental approach and design, writing, and oral presentation skills through exposure to selected topics in microbiology and assignments (proposal, writing manuscript reviews, oral presentations, small group discussions). Requirements: graduate standing in microbiology.

061:225 Advanced Topics in Prokaryotic Biology Module 5
Development of critical thinking, experimental approach and design, writing, and oral presentation skills through exposure to selected topics in microbiology and assignments (proposal, writing manuscript reviews, oral presentations, small group discussions). Requirements: graduate standing in microbiology.

061:226 Advanced Topics in Prokaryotic Biology Module 6
Development of critical thinking, experimental approach and design, writing, and oral presentation skills through exposure to selected topics in microbiology and assignments (proposal, writing manuscript reviews, oral presentations, small group discussions). Requirements: graduate standing in microbiology.

061:227 Advanced Topics in Microbiology
Presentations by graduate students on selected research topics in microbiology; different topics each semester. Offered fall and spring semesters. Requirements: graduate standing in microbiology.

061:247 Graduate Survey of Immunology
Major features of evolutionary, ontogenetic, and comparative development of innate and adaptive immune systems; their functions at cellular and molecular levels. Offered fall semesters. Same as 148:247.

061:259 Graduate Pathogenic Bacteriology
Pathogenic bacteria, with emphasis on mechanisms of pathogenicity, laboratory methods for isolation, identification.
061:260 Graduate Microbial Physiology
Bacterial genomes, cell structure, growth, energy metabolism, biosynthesis, mechanisms of signal transduction and regulation.

061:261 Graduate Research in Microbiology
Requirements: microbiology graduate standing.

061:263 Graduate Student Research Seminar
Presentation of thesis work in progress.
Requirements: microbiology graduate standing.

061:264 Directed Study in Microbiology

061:265 Topics in Virology Literature
Papers of current interest in primary virology literature.

061:267 Graduate Introduction to Animal Viruses
Basic physical, chemical, biological properties of animal viruses, their association with human diseases; discussion topics in the primary literature.

061:268 Biology and Pathogenesis of Viruses
Molecular biology of animal DNA and RNA viruses, interaction of these viruses with eucaryotic cells; mechanisms of viral latency, persistence, cellular transformation, oncogenesis; virology literature. Prerequisites: 061:168 or 061:267.

061:270 Graduate Microbial Genetics
Genetics of bacteria, bacteriophages.

061:271 Graduate Microbial Genetics Laboratory
Basic principles of genetic analysis in bacteria. Prerequisites: 061:270.

061:275 Perspectives in Biocatalysis
Applied enzymology, protein design, structure-activity relationships, biosensor technology, microbial transformations, biodegradation of environmental pollutants. Repeatable. Requirements: graduate standing in a participating department supported by the Predoctoral Training Program in Biotechnology. Same as 004:275, 046:275, 052:275, 053:275, 099:275.

061:279 Graduate Bacterial Diversity
Analysis of bacteria from varied habitats; emphasis on the physiological basis and molecular characteristics of diversity.

061:299 Mechanisms of Parasitism Journal Club
Reviews of recent publications in molecular parasitology research and thesis research by training grant or journal club students. Same as 142:299.
Museum Studies

Chair
James Enloe

Director
Russell Ciochon

Adjunct assistant professors
Tiffany Adrain, Shalla Ashworth, Dale Fisher, David McCartney, William Thomson, Sean Ulmer

Undergraduate nondegree program:
Certificate in Museum Studies
Web site: http://www.uiowa.edu/~mstudies/

Museum studies have a long history at The University of Iowa, with courses offered continuously since 1910. Iowa’s museum studies students have become directors, curators, educators, and exhibit specialists in museums throughout the country.

Museums embrace every aspect of human experience. Iowa’s Museum Studies Program reflects this multiplicity, offering courses related to many fields, including American studies, anthropology and archaeology, art, biology, business, communication studies, elementary and secondary education, English, world languages, geoscience, history, library and information science, and leisure studies.

Because the Museum Studies Program is interdisciplinary, instructors for its courses include faculty members from anthropology, art and art history, business, history, law, library and information science, and other related fields.

Museum Studies Program courses are open to all University of Iowa undergraduates who have a general interest in the arts, humanities, or social sciences as well as those who would like to learn about museum organization and administration.

The Museum Studies Program is administered by the Department of Anthropology (p. 63).

Undergraduate Program

- Certificate in Museum Studies

Certificate

The Certificate in Museum Studies requires 18 s.h. The program provides a broad foundation of knowledge increasingly valued in the museum field.

The certificate is open to current undergraduate students and to individuals who hold University of Iowa bachelor’s degrees and are not enrolled in graduate or professional degree programs. Completion of the certificate is noted on students’ transcripts.

Museum studies courses introduce students to the spectrum of museum endeavors, from organization and mission planning to institutional histories and current developments in the field. Most courses developed by the program offer hands-on experience in exhibition planning and design, collection management, educational programming, community development, and administration.

A major in one of the natural sciences (e.g., biology, geoscience), anthropology, science education, art history, American studies, or history is recommended for students preparing for museum careers; see the appropriate College of Liberal Arts and Sciences (p. 26) department sections of the Catalog for information about those majors. CLAS students also may use the individualized plan of study track in the interdepartmental studies major to create a museum studies concentration relevant to their academic and professional interests.

Students may count a maximum of 6 s.h. completed for their major, a minor, or another certificate offered by the College of Liberal Arts and Sciences toward the Certificate in Museum Studies. Students must request permission from the director of the museum studies certificate to use courses that are not included in the program, and the proposed course content and requirements must fit into one of the program’s defined areas.

Students must maintain a g.p.a. of at least 2.00 in work for the certificate.

The Certificate in Museum Studies requires the following course work.

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Semester Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>024:102</td>
<td>Introduction to Museology</td>
<td>3 s.h.</td>
</tr>
<tr>
<td></td>
<td>Four additional museum studies foundation courses</td>
<td>12 s.h.</td>
</tr>
<tr>
<td>024:180</td>
<td>Museum Internship</td>
<td>3 s.h.</td>
</tr>
</tbody>
</table>

Students should begin the certificate with the foundation course 024:102 Introduction to Museology, which is a prerequisite for some of the program’s more advanced courses. It provides a historical overview of museum development and function while introducing students to issues such as museum governance and financing, ethics and law, collection management, exhibition and educational programming, interpretation, and audience research.

Students complete four additional foundation courses. They generally select one course from
each of three of the following four categories (9 s.h.), and they select a fourth course (3 s.h.) from any of the four categories.

Collection management and care
Exhibition development and public education
History, theory, and culture
Museum administration and management

After completing the required 15 s.h. of foundation course work, students complete an internship (minimum of 3 s.h.). The Certificate in Museum Studies coordinator works closely with students and affiliated faculty members to ensure that internships provide students with the instruction and experience they need.

Students interested in learning more about the museum studies certificate are encouraged to contact the Department of Anthropology.

Facilities and Resources

Museum studies students have access to a wide variety of museums and related resources, including the following University of Iowa museums: the Museum of Natural History, the Museum of Art, the Old Capitol Museum, the Medical Museum, and the Athletics Hall of Fame.

The Museum Studies Program maintains close connections with a number of local, community-based museums and organizations, including the State Historical Society of Iowa, the Herbert Hoover Presidential Library and Museum, the African American Museum of Iowa, the Iowa Children’s Museum, and the Johnson County Historical Society.

The University of Iowa Collections Coalition, consisting of 16 collections and collection-support organizations, provides an essential resource for the Museum Studies Program. It provides museum studies internships, directed study projects, opportunities for site visits, and volunteers experiences for students as well as guest speakers.

Courses

**024:100 Historic House Management and Preservation** 3 s.h.
Management, preservation, interpretation, and basic operations of historic structures and the museums they serve. Prerequisites: 024:102.

**024:102 Introduction to Museology** 3 s.h.
Overview of museum history, function, philosophy, collection and curatorial practices, governance and funding issues, exhibition evaluation, audience studies; American cultural institutions. GE: Values, Society, and Diversity. Same as 07S:112, 097:115, 113:103.

**024:104 Exhibition Planning** 3 s.h.
Preliminary work for and process of developing museum exhibitions; history of exhibit design, evaluation, budgets, teams and team member roles, working with community and special interest groups, methods of production and display; students research a topic, choose artifacts and images, and create a narrative and exhibit script. Prerequisites: 024:102.

**024:110 Learning in Museums** 3 s.h.
Introduction to theory and practice of learning in museums; identification of institutional objectives; goals that facilitate learning in museum setting; development of educational materials and programs. Prerequisites: 024:102. Recommendations: good writing skills.

**024:115 Museum Literacy and Historical Memory** 3 s.h.
Concepts and methods for understanding the role of museums in shaping knowledge and collective memory of history; institutionally based exhibits and collections, historical markers and public monuments, public holidays and events, media and artistic works that interpret the past; how events, people, and civic ambitions are memorialized and how memories of them are shaped; appearance of museums and related practices in the non-Western world after 1850. Same as 016:120.

**024:120 Collection Care and Management** 3 s.h.
How a museum’s management policy relates to its administrative, legal, and ethical obligations to its collections; acquisitions, deaccessions, collection use, data standards, storage environment, health, safety, documentation. Same as 012:120.
024:121 Power of Placement  3 s.h.
How placement of artworks in a setting and their relationship to each other affect the way in which viewers understand the works; influence of curator's choice of placement, sequence, height, wall color, and so forth; varied settings, with focus on display issues in art museums; includes gallery and museum experiences. Prerequisites: 024:102.

024:124 Politics of the Archaeological Past  3 s.h.
How control over management of material remains of the ancient past, and representations of that past, intersect with the identity of diverse groups, including archaeologists, indigenous peoples, national governments, collectors, ethnic minorities and majorities, museum curators; struggles for control of the archaeological past at different scales (artifacts, skeletal remains, sites, imagery, narratives) and in different regions of the world. Same as 113:124.

024:140 Advanced Collection Care and Management  3 s.h.
Builds on 024:120; types of museum objects and materials, their care and management; care, storage, and use of paper, books, photographs, works of art, electronic information media, textiles, furniture, archaeological artifacts, natural history specimens, archives; digitization projects, integrated pest management, risk assessment, museum security, museum construction and renovation, grant writing; for students planning museum careers or for professions that require care of collections. Prerequisites: 012:120 or 024:120. Same as 012:160.

024:147 Nonprofit Organizational Effectiveness I  3 s.h.
Operational and financing aspects of nonprofit management; mission and governance of organization; strategic planning for effective management, including finance, budget, income generation, fund-raising. Same as 032:127, 042:157, 06J:147, 06T:144, 096:168.

024:148 Nonprofit Organizational Effectiveness II  3 s.h.
Qualities for leadership of nonprofit organizations, including relationships with staff and volunteers; relationship of nonprofit and outside world; marketing, public relations, advocacy strategies for nonprofits. Same as 032:128, 042:158, 06J:148, 096:169.

024:150 Directed Studies and Projects arr.
Advanced readings in historical development, educational philosophy, programs, operations of museums; individual projects coordinated with programs, exhibits, or collections of campus and area museums. Prerequisites: 024:102 or 024:104 or 024:120.

024:155 Preservation and Conservation of Collection Materials  3 s.h.
Overview of responsible stewardship of library and archival collections; principles and practice of book conservation with focus on prototypes for conservation rebinding; appropriate care of books, papers, photographs (traditional and digital), film, and other non-print items; fundamental instruction in methods of page repair, investigation of eight historical prototypes, construction of related conservation binding models; lecture, discussion, student presentation, and hands-on activities. Prerequisites: 021:101. Same as 021:150.

024:157 Introduction to Archives  1 s.h.
Purpose and function of archival repositories (as compared with libraries); professional responsibilities of archivists; theoretical basis of currently accepted practices; collection solicitation and development; appraisal of records and manuscripts; processing, or arrangement and description, of collections; archival preservation and conservation, including digital preservation; reference services; outreach efforts; current issues, including electronic records, privacy and copyright.

024:161 Art, Law, and Ethics  3 s.h.
How law and ethics apply to individuals and institutions concerned with the visual arts. Same as 01H:182, 091:192.
024:162 The Art Museum: Theory and Practice  
3 s.h.
Introduction to different aspects of art museums; emphasis on roles of art historians, especially curatorial practice; current and historical theories and practices of art exhibitions; varying debates of the politics of display; art museum professions; the many facets of art exhibition preparation; the University of Iowa Museum of Art collections. Same as 01H:181.

024:180 Museum Internship  
arr.
Working experience in functions, departments, programs of the sponsoring museum; relation to museum’s overall mission and museum field in general.

024:181 Marketing, Promoting, Politicking Contemporary Public Art  
3 s.h.
How public art projects are conceived, created, and paid for; projects sponsored and funded by federal, state, and local governments and private businesses 1960 to present; projects’ operational structures, how artists are selected; Vietnam Veterans Memorial, Serra’s Tilted Arc, recent projects. Requirements: an introductory course in an appropriate area for art majors. Same as 01H:180.

024:190 Topics in Museum Studies  
1 s.h.
Systematic and analytic methods used for research in physical collections; tutorials in collection building, curation, and preservation; designed by members of the University of Iowa Collections Coalition. Same as 012:159.

024:247 Nonprofit Organizational Effectiveness I  
3 s.h.

024:248 Nonprofit Organizational Effectiveness II  
3 s.h.
Music

Director, Division of Performing Arts
Alan MacVey

Director
David Gier

Director of planning
Kristin Thelander

Associate directors
Benjamin Coelho, Christine Getz, Dan Moore

Professors
Mary Adamek, Elizabeth Aubrey, Benjamin Coelho, Katherine Eberle, Michael Eckert, Kate Gfeller (Music/Communication Sciences and Disorders), David Gier, David K. Gompper, William LaRue Jones, Kevin Kastens, René LeCuona, Maurita Murphy Mead, Dan Moore, Ksenia Nosikova, John Rapson, Christine Rutledge, Stephen Swanson, Kristin Thelander, Ingo Titze (Communication Sciences and Disorders/Music), Uriel Tsachor

Professors emeriti

Associate professors

Associate professors emeriti
Richard J. Bloesch, Don Haines, T.M. Scruggs, Carole Thomas, Robert Yeats

Assistant professors
Matthew Arndt, Mary Cohen (Teaching and Learning/Music), Robert Cook, Nicole Esposito, Gregory Hand, Alan Hicks, Jennifer Iverson, Elizabeth Mellon, Andrew Parker, Nathan Platte, David Puderbaugh, Amy Schendel, Erin Wehr

Adjunct assistant professors
Rachelle Tsachor, Joey Walker, Brett Wolgast

Lecturers
Jonathan Allen, James Dreier, Steven Grismore, Trevor Harvey, Hannah Holman, Susan Jones, Elizabeth Oakes, Donna Parsons, Shari Rhoads, Brent Sandy

Undergraduate degrees: B.A. in Music; B.M.

Undergraduate nondegree program: Minor in Music
Graduate degrees: M.A., M.F.A., Ph.D. in Music; D.M.A.
Graduate nondegree program: Certificate in Sacred Music
Web site: http://www.uiowa.edu/~music

The University of Iowa School of Music is prominent in a fine arts community of international repute. It has long been recognized as one of the excellent university-based schools of music in the United States.

The school's on-campus enrollment of approximately 470 music majors is large enough to sustain strong programs in all areas of specialization, yet small enough to ensure the individual attention essential to each student's development.

The faculty consists of highly trained artist-teachers in each area of specialization and scholars of international distinction. Faculty ensembles in residence include the Iowa Woodwind Quintet, the Iowa Brass Quintet, and the Maia String Quartet. Private lessons with faculty members are offered in all band and orchestra instruments, voice, piano, and organ.

The school's undergraduate programs offer all qualified students, whether music majors or nonmajors, the opportunity for further study of music. In addition to its comprehensive course offerings for majors, the school provides a substantial selection of courses especially recommended for nonmajors and several approved for the General Education Program (p. 381) (see "Courses for Nonmajors").

Graduate programs in music are designed primarily to prepare students for teaching in secondary schools, colleges, and universities and for careers in performance and music therapy.

The School of Music is a charter member of the National Association of Schools of Music. The requirements for entrance and for graduation are in accordance with the association's published standards.

The department is one of three academic units in the Division of Performing Arts (p. 288). It participates in offering the division's Performing Arts Entrepreneurship (p. 613).

Undergraduate Programs

- Major in music (Bachelor of Arts, Bachelor of Music)
- Minor in music
The Bachelor of Music program offers concentrations in composition, music therapy, and performance; a second emphasis in jazz studies may be added to the performance concentration. Professional certification in music education and music therapy are available only through the B.M.

The Bachelor of Arts is a nonprofessional degree for students who are not planning careers as musicians or for those who wish to pursue a double major or earn more than one bachelor’s degree.

All undergraduate enrollments require School of Music approval. Entering first-year and transfer students who plan to major in music must be accepted into a performance area through audition either in person or by recording before they register. Students who plan to major in composition also must submit examples of creative work; for details, see “Composition Concentration” below. All entering students must complete the online theory diagnostic examination for 025:002 Musicianship and Theory I and a piano proficiency exam to determine appropriate placement in related courses.

Transfer students admitted to the School of Music must complete a minimum of one year of applied music (lower- or upper-level) and one year of major ensemble at The University of Iowa in order to earn a degree in music. Transfer students who have not completed the equivalent of the four-semester sequence of Musicianship and Theory I-IV (025:002 Musicianship and Theory I, 025:003 Musicianship and Theory II, 025:004 Musicianship and Theory III, and 025:005 Musicianship and Theory IV) must complete a theory diagnostic exam to determine appropriate placement in the musicianship and theory sequence. Transfer students who have not completed the equivalent of two semesters of class piano or a piano proficiency exam must meet piano proficiency requirements at The University of Iowa.

Bachelor of Music

The Bachelor of Music requires a minimum of 120 s.h.; many students earn more than 120 s.h. in fulfilling the requirements for their majors—for instance, those who choose the music therapy concentration or seek teacher certification. The College of Liberal Arts and Sciences maximum hours rule does not apply to the Bachelor of Music, so B.M. students may count more than 50 s.h. of course work in music toward the degree. All students must complete the College of Liberal Arts and Sciences General Education Program (p. 381).

The program offers concentrations in composition, music therapy, and performance; a second emphasis in jazz studies may be added to the performance concentration. Bachelor of Music students may not choose guitar as their major instrument, and Bachelor of Arts students may not transfer to the B.M. program with guitar as their major instrument.

Students seeking professional certification in music education or music therapy should enroll in the B.M. program.

The Bachelor of Music requires the following School of Music course work.

GENERAL COURSE REQUIREMENTS

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>025:001</td>
<td>Fundamentals of Music for Majors (or successful completion of the online theory diagnostic examination for 025:002)</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>025:071-025:072</td>
<td>Group Instruction in Piano I-II (or successful completion of proficiency exams I and II)</td>
<td>2 s.h.</td>
</tr>
<tr>
<td>025:074</td>
<td>Recital Attendance (six semesters)</td>
<td>6 s.h.</td>
</tr>
<tr>
<td>025:107</td>
<td>Techniques of Conducting</td>
<td>2 s.h.</td>
</tr>
<tr>
<td>025:144</td>
<td>History of Music I (western music of the Middle Ages, Renaissance, and Baroque)</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>025:146</td>

<td>3 s.h.</td>
</tr>
<tr>
<td>025:154</td>
<td>Senior Recital</td>
<td>1 s.h.</td>
</tr>
</tbody>
</table>

To complete the senior recital, students must have achieved upper-level applied status or be enrolled in upper-level applied music courses (see “Applied Music” below). Music therapy students may complete a senior recital or a senior research project. Composition students substitute 025:099 Bachelor’s Thesis for the senior recital. The
senior recital, research project, or thesis must be completed at The University of Iowa.

One of these:

- 025:080 Jazz Cultures in America and Abroad 3 s.h.
- 025:103 World Music 3 s.h.
- 025:104 Music of Latin America and the Caribbean 3 s.h.
- 025:141 History of Jazz 3 s.h.
- 025:178 Music, Culture, and Identity 3 s.h.

At least 3 s.h. from these:

- 025:006 Form and Analysis 3 s.h.
- 025:101 Introduction to Improvisation 3 s.h.
- 025:102 Intermediate Jazz Improvisation 2 s.h.
- 025:117 Arranging for Band 2 s.h.
- 025:118 Jazz Theory 2 s.h.
- 025:145 Counterpoint Before 1600 3 s.h.
- 025:147 Counterpoint After 1600 3 s.h.
- 025:148 Instrumentation 2 s.h.
- 025:153 Keyboard Harmony 2 s.h.
- 025:157 Orchestration 2 s.h.
- 025:243 Advanced Jazz Improvisation 2 s.h.
- 025:244 Transcription 2 s.h.
- 025:247 Post-Tonal Analysis 3 s.h.
- 025:249 Tonal Analysis 3 s.h.
- 025:256 Special Topics in Theory and Analysis 3 s.h.

**APPLIED MUSIC**

Four years of applied music are required. Instruction is provided on two levels, lower and upper. Students must achieve upper-level status before they may present the senior recital. Readiness for upper-level applied music is determined by a jury examination in the area. The eighth semester of applied music may be waived for students who are enrolled in the Teacher Education Program and are student teaching. Students are allowed a maximum of six semesters (not including summer) in lower-level applied instruction. Those who want to continue lessons beyond the maximum allowable lower-level registration must do so under the nonmajor category.

Composition students are required to take 6 s.h. of lower-level applied music and 2 s.h. of secondary piano.

Music therapy students who complete a senior research project rather than a senior recital are required to take three years of lower-level applied music.

**ENSEMBLE PARTICIPATION**

Eight semesters of major ensemble participation are required. Students normally enroll in major ensemble participation during consecutive semesters, beginning early in their degree work, to ensure completion of the requirement in a timely manner. Ensemble assignments are made at the discretion of the major teacher and ensemble director. String students participate in University Orchestra and Chamber Orchestra. Wind and percussion students participate in the Symphony Band/Concert Band/University Band. Voice students participate in Camerata Singers, University Choir, Kantorei, and/or University Chorale. Keyboard students may substitute accompaniment for major ensemble participation for two semesters during their junior and/or senior years, with their major applied-music teacher's consent. Composition students may, with their advisor's consent, substitute two semesters of other ensembles during their junior and/or senior year.

Music therapy students who complete a senior research project rather than a senior recital are required to complete 6 s.h. of major ensemble participation.

Any student who wants to request adjustment of the major ensemble requirement must submit his or her request in writing to a review committee consisting of the ensemble director(s) involved, the studio instructor, and the associate director for undergraduate studies.

Major ensembles are as follows.

- 025:142 Camerata Singers 1 s.h.
- 025:181 University Choir 1 s.h.
- 025:185 Kantorei 1 s.h.
- 025:191 Women's Chorale 1 s.h.
- 025:192 Orchestra 1 s.h.
- 025:194 Symphony Band/Concert Band/University Band 1 s.h.

**ELECTIVES**

Students may take advanced electives in performance (including chamber music and piano accompaniment), theory, composition, music education, music therapy, music history, diverse music cultures, music literature, conducting, and orchestration.
Performance Concentrations

A performance concentration is available in each of the orchestral areas—strings, brass, woodwinds, and percussion—and in voice, piano, and organ. Students must take at least an additional 17 s.h. beyond the School of Music general course requirements. This course work includes required courses and electives unique to each performance area. Course listings for each of the respective areas are available from the School of Music office.
